An invitation to academic exploration

We invite you to think of this catalog as your guide to a year of adventure and exploration at the University of California, Riverside, one of the world's most prestigious universities.

In these pages you will find information that will help you plot the course of your academic journey at UCR, where you will meet and work with outstanding faculty, dedicated staff and engaging students.

Many of the scientific and artistic accomplishments that are changing the world today are built on the research and creative endeavors of University of California faculty and students, past and present.

UCR faculty are conducting research that holds promise for halting the spread of deadly diseases, protecting California's citrus industry and finding signs of life on other planets. The achievements of these faculty members and the recognition we have received in many international rankings demonstrates the quality of the degree you will earn at UCR.

Our history of providing a quality education to one of the most diverse student populations in the U.S. helps ensure that you will succeed during the time you spend with us. Your education is important to you. It is to us, too. Even as our campus has grown in recent years, our faculty remain highly accessible and our community close-knit.

UCR faculty involve you in their work, allowing you to contribute to advances in research, creative expression and public service. UCR offers opportunities to help you reach your own academic aspirations, whether those involve undergraduate research, specialized study or mentorships. Our standards are high, as are our expectations.

With your help, UCR will also continue to build its relationships with the off-campus community, in Riverside, Southern California and beyond. UCR students have long been recognized for their contributions to community service. You can be part of that, too.

We hope that during your time here, you will grow intellectually, socially and personally, becoming well-rounded citizens of the world.

So, please join us on this journey of adventure and exploration. We look forward to seeing the contributions each of you will make to UCR, and to the greater good.

Kim A. Wilcox
Chancellor

PLEASE NOTE
Every effort has been made to ensure the accuracy of the information presented in the University of California, Riverside General Catalog. However, all courses, course descriptions, instructor designations, curricular degree requirements, and fees described herein are subject to change or elimination without notice. Students should consult the appropriate department, school, college, or graduate division for current information, as well as for any special rules or requirements imposed by the department, school, college, or graduate division.

Students can browse latest Schedule of Classes and the Course Catalog by logging into their R’Web account and selecting the Registration icon.

Faculty and staff can browse the latest Schedule of Classes by visiting registrar.ucr.edu.

The 2023–24 University of California, Riverside General Catalog and prior issues are available at catalog.ucr.edu. Other campus websites providing similar information may not reflect current approved curricula or course information.

1 Administrative Studies, and Law and Society are only offered as a major combined with other programs.
2 New student registration in this program is not open at present.
3 Students who, in truly exceptional cases, matriculate into the Thomas Haider Program without a UCR baccalaureate degree are eligible to receive a B.S. degree in Biomedical Sciences upon satisfactory completion of the first year of the curriculum leading to the M.D. degree.
4 Applications are not accepted from students wishing to work toward the master’s degree only.
5 A combined B.S.+M.S. program is offered in this discipline (designed to lead to a B.S. degree as well as an M.S. degree in five years).
6 See School of Education section for credential program information.
7 The Bourns College of Engineering offers an online Master of Science (M.S.) degree in Engineering. See Engineering section for more details.
8 New student registration in this program is not open at present. For further information, contact the Graduate Division.
9 Doctoral studies are available through the Ph.D. program in Comparative Literature.

</table>
UC Riverside is a major research university and one of the 10 University of California campuses. A national center for the humanities, it offers students a supportive, collegial learning environment with nationally and internationally recognized faculty dedicated to the highest standards in research, teaching, and public service.

Located on nearly 1,200 acres near the Box Springs Mountains in Southern California, the park-like campus provides convenient access to the vibrant and growing Inland region and to local mountains — home to some of the best skiing and snowboarding in the region — beautiful beaches, amusement parks, golf courses, and outstanding shopping and entertainment.

The University is in the city of Riverside, a community of approximately 300,000 people. Located east of Los Angeles and north of San Diego, the area enjoys a year-round temperate climate and an exceptional quality of life with its architectural beauty, cultural art museums, quality housing, and wide variety of recreational opportunities. UCR is an integral part of the Riverside community through its partnership programs and the involvement of both employees and students in community activities and programs.

The nearby Ontario International Airport has daily flights to most of the nation’s major cities and connecting commuter flights to Los Angeles International Airport. Metrolink train service is available to Los Angeles.

History
The roots of the campus date back to 1907, when the California State Legislature established the Citrus Experiment Station to conduct research on the agricultural problems of Southern California. In 1948, the University of California Regents approved the establishment of the College of Letters and Science, and the college opened for classes in February 1954. The University’s Graduate Division was established in 1960.

Since then, the University’s growth has mirrored the growth of Southern California. Once a small university in a small town, UC Riverside is now the premier research and educational institution in thriving Inland Southern California.

The UCR Palm Desert campus provides educational programs, research, and outreach to meet the higher education needs of the greater Coachella Valley region.

Academic Distinctions

College of Humanities, Arts, and Social Sciences is the largest and most diverse college at UCR, housing 20 departments and 50+ majors, minors, and interdisciplinary programs that explore human existence through humanistic study, creative activity, and social scientific inquiry. It is home to renowned programs, including a ground-breaking Public History program and one of the highest ranked Philosophy departments globally, and new, innovative interdisciplinary ones, including Sustainability Studies and Medical Humanities. The college’s largest program, Psychology, is recognized for engaging undergraduate and graduate students in a wide range of research areas in neuroscience, development, and personality. The college has the only UC undergraduate major in Creative Writing, a unique Critical Dance Studies graduate program, and an arts outreach program funded by the Gluck Foundation, one of only three nationally. Visit chass.ucr.edu.

College of Natural and Agricultural Sciences is a leader in the biological, physical, and agricultural sciences. The UCR Institute for Integrative Genome Biology, one of the leading institutes of genomics research in the world, brings together faculty from a variety of academic units to participate in genomics-based discovery, providing researchers and students with access to state-of-the-art tools for advanced studies in genomics, gene expression, proteomics, microscopy, and bioinformatics. Visit cnas.ucr.edu.

The Marlan and Rosemary Bourns College of Engineering
Researchers excel in study of alternative-fueled engines and vehicles, conversion of biomass to vehicle fuel, and air pollution. Majors include bioengineering; computer science and engineering; computer science with business applications; chemical, computer, data science, electrical, environmental, and mechanical engineering; as well as materials science and engineering. Visit www.engr.ucr.edu.

The School of Business offers the UC’s oldest and most comprehensive undergraduate Business Administration major in Southern California and is the first and only one in the UC system that offers the B.S. in Actuarial Science degree. The School of Business houses The A. Gary Anderson Graduate School of Management, which offers the Master of Business Administration program (M.B.A.), the professional M.B.A. program, the Master of Professional Accountancy (M.P.Acc.) program, the Master of Finance (M.Fin.) program, Master of Science in Business Analytics (MSBA), and the Ph.D. program in Business Administration. The School of Business is accredited by AACSB International – The Association to Advance Collegiate Schools of Business. Visit business.ucr.edu.
The School of Medicine provides a unique pathway to aspiring doctors seeking an M.D. or aspiring researchers seeking a Ph.D. or M.S. in Biomedical Sciences. The School's Longitudinal Ambulatory Care Experience program gives medical students hands-on clinical experience almost immediately in their first year, with 24 of the seats in the M.D. class reserved for UCR undergraduates. The Biomedical Sciences program uniquely positions students to bridge the gulf between clinical medicine and science research. Visit medschool.ucr.edu.

School of Education
The breadth and depth of the programs offered at the School of Education (SOE) is extraordinary, reflecting faculty expertise and research in such areas as autism; culture and language; higher education; issues of diversity; intervention for children with reading difficulties; policy, and qualitative and quantitative methods. The school offers an undergraduate major in Education, Society, and Human Development, two minor programs, research-focused M.A. and Ph.D. programs, M.Ed. professional programs, and teacher credential programs. Visit education.ucr.edu.

School of Public Policy
Established in 2012, the UCR School of Public Policy (SPP) is home to the only Master of Public Policy (MPP) program offered by a major research university in inland Southern California, as well as one of only two undergraduate public policy programs in the ten-campus University of California system. SPP’s BA/MPP program will allow students to obtain both BA and MPP degrees through an integrated five-year plan of study. This program prepares students for policy and public service careers at the local, community, regional, and national levels as well as for pursuing doctoral degrees in relevant disciplines. With its motto, “Solutions for the Region, Solutions for the World,” the UCR School of Public Policy is distinctive in its focus on addressing the big policy challenges facing California – and in particular the inland region – while placing an emphasis on applying policy lessons learned from other parts of the nation and the world to solving California’s problems. For more information, visit spp.ucr.edu.

Principles of Community
The University of California, Riverside is committed to equitable treatment of all students, faculty and staff. UCR’s faculty, staff and students are committed to creating an environment in which each person has the opportunity to grow and develop and is recognized for their contribution.

There are three objectives that our campus must strive toward to achieve these goals.

First, we must ensure that we have an environment that nurtures the intellectual and personal growth of our students, faculty and staff.

Second, we must ensure that our campus sets an example of respect for all people.

Third, we must ensure that our campus is a safe and welcoming environment for everyone.

We take pride in the diversity of the campus community and in ourselves by using the campus environment as a place committed to academic integrity, where all members are encouraged to use their unique talents to enrich the daily life of the community in which they live, work, teach and learn. Respect for differences and civil discourse must become the hallmark of how we live and work together to build our community of learners at UCR.

We, as members of the University of California, Riverside, affirm our responsibility and commitment to creating and fostering a respectful, cooperative, professional and courteous campus environment. Implicit in this mutual respect is the right of each of us to live, study, teach and work free from harassment or denigration on the basis of race/ethnicity, age, religious or political preference, gender, transgender, sexual orientation, nation of origin, or physical abilities. Any violation of this right by verbal or written abuse, threats, harassment, intimidation, or violence against person or property will be considered a violation of the principles of community that are an integral part of the University of California’s focus, goals and mission (and subject to sanction according to University policies and procedures).

We recognize that we will all need to continually work together to make our campus community a place where reason and mutual respect among individuals and groups prevail in all forms of expression and interaction.

Accreditations
UCR is a member of the Western Association of Schools and Colleges (WASC). The campus is fully accredited by the Western Association of Schools and Colleges (WSCUC) Senior College and University Commission (WSCUC). This accreditation requires periodic review in accord with WASC policies and standards. WASC is located at 985 Atlantic Avenue, Suite 100 Alameda, CA 94501, (510) 748-9001.

- The credential programs in the School of Education are approved by the California Commission on Teacher Credentialing.
- The School of Education School Psychology Ph.D. program is approved by the National Association of School Psychologists and accredited by the California Commission on Teacher Credentialing.
- The School of Business and The A. Gary Anderson Graduate School of Management are accredited by AACSB International – The Association to Advance Collegiate Schools of Business.
- The M.D. programs in the School of Medicine are accredited by the Liaison Committee on Medical Education (LCME).

UC Riverside Resources at Your Fingertips

A–Z Listing
Use UCR’s A–Z Listing to find almost anything on campus, including departments and organizations.

Academic calendar
Access important dates and deadlines by visiting the academic calendar on the Registrar’s website.

Academic Resource Center (ARC)
Catch up or get ahead in class by participating in the ARC's academic support programs, such as Supplemental Instruction (SI), Early Assist, tutoring, and writing support. The R’Success Workshop Series and Assistance, Coaching, and Encouragement (ACE) peer mentoring program are also offered to help you develop skills and achieve academic and professional success.

Campus events
UCR offers virtual and in-person events, job fairs, lectures, conferences, performances, and more! Visit events.ucr.edu for a complete lineup.

Campus map
Access the campus map to locate buildings, parking lots, ATMs, solar charging tables, water refill stations, and more.

Campus life
There are countless ways to get involved and inspired at UCR. We’re home to a thriving arts community, one-of-a-kind events, and 500+ student organizations. We also offer the gorgeous 40-acre Botanic Gardens, the famed 22-acre Japanese Citrus Variety Collection, KUCR (a noncommercial campus radio station), the largest photographic center in the western United States, more than 2 million books, and one of the world’s largest cataloged collections of science fiction and fantasy. Be a part of an exciting campus life!
Campus tours
There’s no better way to get a feel for life at UCR than from a current student! Sign up for a one-hour Family Tour (student and up to three guests), or download a map to take a self-guided tour to explore the UCR campus at your own pace.

Not in the area? Take virtual tours of UCR colleges, residence halls, and life on the UCR campus. Then be sure to explore our vibrant city of Riverside.

Campus website

Campus Advocacy, Resources & Education (CARE)
CARE is an intervention and prevention support program committed to ending sexual violence at UCR. It seeks to unite, inspire, and cultivate a community culture of care by providing direct advocacy, resources, and prevention educational programming related to issues of sexual assault, relationship violence, and stalking to students, staff, faculty, and UCR affiliates.

Career Center
Become career-ready with the help of UCR’s Career Center. Connect with career counselors via drop-in appointments and virtual career counseling. Attend a job fair, access skill-building workshops and resources, and log into UCR Handshake to find internships and part- and full-time jobs.

Counseling resources
UCR’s Counseling and Psychological Services (CAPS) is a multidisciplinary student mental health center. Its services and programs include individual counseling and psychotherapy, group therapy, and couples counseling, as well as crisis consultation and emergency intervention, referrals, and campus mental health and wellness promotion.

Driving directions
Getting to UCR is easy — thanks to Google Maps! The campus address is 900 University Ave., Riverside, CA 92521.

Locate people and organizations
Browse profiles.ucr.edu to locate faculty, staff, students, organizations, groups, and research areas.

Office of Diversity, Equity, and Inclusion (DEI)
The Office of Diversity, Equity and Inclusion is committed to the urgent, sustained, and comprehensive work of creating a campus climate of mutual respect and communal vision at UCR. This work belongs to every member of our community and includes ensuring greater representation of individuals from all backgrounds in every part of the university and keeping fairness and accessibility in higher education at the heart of our policies and procedures. We value a deep, collective understanding that an institutional and personal commitment to diversity, equity, and inclusion is a true commitment to meaningful, lifelong learning.

DEI programs that will help you navigate college life and engage fully in the community. Offices include Ethnic & Gender Centers, the Student Disability Resources Center, The Well, and the Veterans Resource Center.

Student Life
Student Life provides you with the total UCR experience. That means supporting opportunities for learning, leadership, community building, and creative expression that go way beyond the classroom. Get involved, join a student org, attend a concert, and so much more!

Transportation to and around UCR
Explore Transportation Services for all sorts of ways to travel to and around UCR. You’ll also find information on parking permits, alternative transportation methods, and accessibility options.

Veteran resources
UCR welcomes veterans! Join a community of over 300 veteran and military-connected students, and enjoy a wide range of veteran-focused resources.
UCR ARTS is a photography museum and art center with national and international visibility and engagement through its outstanding exhibitions, performances, collections, programs and research center. Located in downtown Riverside, UCR ARTS is ten minutes from the main campus and is at the core of the vibrant arts scene in the City.

REGIONAL ART HOUSE
The Culver houses a 72-seat state-of-the-art film and video screening room; the Coil Atrium Gallery for exhibitions, music, and performances under a magnificent 35-foot skylight, and 1-stop pedestrian gallery. Culver’s second floor contains an incubator for advanced research in the arts and a black-box theater. The screening room exhibits more than 250 different films every year and is one of just a few venues in the region to screen independent, foreign, documentary, and experimental films.

INTERNATIONALLY RECOGNIZED COLLECTIONS
The California Museum of Photography has more than 500,000 pieces in its collection, spanning the entire history of photography. The Culver Center has over 1,500 works of contemporary art. Researchers and visitors from around the world come to UCR ARTS to explore its collections.

PERFORMING ARTS
UCR ARTS Culver Center’s Atrium is a premier venue for experiencing music, dance, theater, and spoken word.

For most programs UCR student admission is FREE.
For more information go to https://ucrarts.ucr.edu

UCR ARTS's activities embody UCR's commitment to broadly-based public education and cutting-edge research. As a university museum and art gallery, UCR ARTS is committed to offering students opportunities for professional museum work. Students from UCR and elsewhere are involved under the aegis of independent course status, internships, work-study, and as volunteers.

California Museum of Photography
The California Museum of Photography at UCR ARTS is devoted to showing the work of contemporary artists who use photography, collaborating with UCR faculty and students to bring their varied expertise to the public in exhibitionary form, and to preserving and making accessible its vast holdings of photography and related apparatus.

Barbara and Art Culver Center of the Arts
The Barbara and Art Culver Center of the Arts hosts art installations, a weekly film program, and musical, dance, and theatrical performances in a dynamic setting. Recognizing that artists play a crucial role in society, the Culver Center also hosts a robust program of lectures, symposia, and community forums with artists, filmmakers, playwrights, dancers, and musicians. The main level is home to an expansive atrium gallery beneath a 40’ high skylight, the Sweeney Art Gallery, and a 72-seat screening room. On the second level, the Culver Center houses a Media Lab, two dance studios with sprung wood floors, a black box equipped with green screen, and a sound recording studio. In the lower level, the California Museum of Photography’s important Keystone-Mast Collection of stereographs is preserved in state-of-the-art seismically isolated cabinets.
Information Technology Solutions
Associate Vice Chancellor and CIO: Matthew Gunkel
Computing and Communications Building
(951) 827-4741; its.ucr.edu

Information Technology Solutions provides technology services and support to faculty, staff, and students.

Network Services
(951) 827-4624; dial@ucr.edu

This division provides network and voice communication needs for the campus.

Bear Help
Helpdesk (951) 827-IT4U (4848); bearhelp@ucr.edu

This division provides desktop computing support to faculty and staff, including installations, troubleshooting, consulting, and assistance with acquiring and using stand-alone or networked desktop and laptop computers.

Multimedia and Classroom Technology
(951) 827-3041; multimedia.ucr.edu

This division provides support with classroom technology and multimedia systems to support faculty, staff, and students with their academic and nonacademic events.

Student Technology Support
(951) 827-IT4U (4848); bearhelp@ucr.edu

Supports campus computer labs, student e-mail, Canvas, wireless network, and VPN. Computer Labs are available in Watkins Hall and the Arts Building. WEPA printers (aka web printing) are available throughout the UCR campus. Students can also check out laptops from laptop kiosks located in the Student Success Center, Rivera Library, Orbach Library, and the HUB.

University Library
University Librarian: Steven Mandeville-Gamble, M.L.I.S.
(951) 827-3221; stevenmg@ucr.edu; library.ucr.edu

The UCR Library serves as the information commons, intellectual center and nexus for research and study on campus. Our collections include more than 4.2 million print volumes, more than 1 million e-books, 143,000 serials, and thousands of multimedia materials. The library also provides access to hundreds of databases and state-of-the-art information technology. Two library facilities (Tomás Rivera Library and Raymond L. Orbach Science Library) offer wireless network access on-site, and UCR students, staff and faculty can remotely access the library’s electronic databases and e-resources. Ranked among the 124 largest research libraries in the U.S. and Canada, the UCR Library is a member of the Association of Research Libraries, the Coalition for Networked Information, and the Digital Library Federation.

In addition to our collections, our librarians and staff can provide a variety of services designed to enhance the academic experience, including Ask a Librarian, Creat’R Lab, Research Services, Teaching & Learning, Special Collections & University Archives, Interlibrary Loan/Document Delivery Services, Digitization Services, and Course Reserves. We also have Collection Strategists who can help acquire content in support of research, teaching and learning.

Library facilities offer many comfortable spaces for intellectual exploration, collaboration and relaxation including technology-enhanced group study rooms (some of which can be reserved online), mediascapes, study carrels, tables, and comfortable chairs and couches.

Rivera and Orbach Libraries lend headphones, calculators, charging cables, marker sets, and other items. Computers, laptops you can check out, printers, and scanners are available in both libraries.

During the academic year, Rivera and Orbach Libraries are open until midnight Monday through Thursday, and Orbach Library is open even later during finals week. Hours vary during intersession and summer quarter. Check library.ucr.edu/hours for current library hours.

Tomás Rivera Library
(951) 827-3220; rivref@ucr.edu

Rivera Library provides access to materials in the humanities, social sciences and arts, housing more than 2,000,000 print volumes. It also houses Special Collections and University Archives, Xcite, the Center for Geospatial Sciences, and the Health Professions Advising Center.

Raymond L. Orbach Science Library
(951) 827-3701, sciref@ucr.edu

Materials in Orbach Library support the life and physical sciences, including engineering, agriculture, and medicine. It also houses the Creat’R Lab, the Scholarly Technology and Research (STAR) Lab, the Patent and Trademark Resource Center (PTRC), and the Geospatial Resources section.

Services
Ask Us
For quick questions, text (833) 450-3355 and start your message with ucrlib. (Example: “ucrlib what time can I drop off reserves until?”) Online chat also available 24/7 at library.ucr.edu/research-services/ask-a-librarian

Creat’R Lab
Orbach Library, first floor
Rooms 140, 144 & 145
library.ucr.edu/creatr-lab

Open to all UCR students and faculty, the Creat’R Lab is an innovation makerspace for learning, experimenting, designing and collaborating; this is where new technologies, curiosity and creativity come together. Equipment includes 3D printers, 3D scanners and associated software, basic hand tools, electronics for prototyping, tools for working with textiles, paper, and more.

Research Services
(951) 827-3316
library.ucr.edu/research-services

The Research Services department provides consultations, resources and services focused on finding and using information resources, planning and conducting research and digital scholarship projects, working with data, mapping and geospatial information, publishing and sharing research, supporting patent and trademark searching, and innovating with 3D printing and maker technologies.

Teaching & Learning
(951) 827-4392
library.ucr.edu/instructional-support

The department of Teaching and Learning supports student success by providing course-related instruction to develop library and information literacy skills, online learning modules through Canvas, designing library guides for course research, and providing consultations beyond course-related library instruction.

Interlibrary Loan (ILL) and Document Delivery Services
UCR students, faculty, and staff may use ILL to borrow materials from other libraries.

Document Delivery Services offers paging of books and journal articles located at the UCR Library. This service is provided to UCR faculty, staff, and students.

Patent & Trademark Resource Center (PTRC)
Main floor, Orbach Science Library
(951) 827-3316
library.ucr.edu/ptrc

The PTRC provides resources for trademark, patent, and intellectual property research to both the general public and the UCR community.
**Posters Printing**
Orbach Library, Room 121
UC Riverside students, faculty, and researchers can print academic documents up to 12’ long. Accepted payments are Bear Bucks or department recharge.

For hours, guidelines, policies, pricing, and general information, visit: guides.lib.ucr.edu/plotter

**Distinctive Collections**

**K-12 Curriculum Resources**
Basement, Rivera Library
The circulating collection of K-12 Curriculum Resources offers a variety of materials, manipulatives, textbooks, and award-winning children’s literature to support the work of students in the School of Education’s Teacher Education programs.

**Government Documents**
Main floor, Rivera Library
(951) 827-4392
The UCR Library serves as a selective depository for U.S. federal and California state government publications.

**Special Collections & University Archives**
Rivera Library, fourth floor
(951) 827-3233
Special Collections contains an extensive collection of rare books, manuscripts, archives and other unique or fragile materials in subject areas including agricultural, botanical and natural sciences, STEM related subjects, local and State history, Latin American studies, literary and cultural studies, ethnic studies, dance, artists' books, miniature books, and art history. In addition to the collections described below, notable collections include the Citrus Experiment Station records, the Sadakichi Hartmann Papers, the Oswald Jonas archive, the Avery E. Field photograph collection and the Sabino Osuna papers.

University Archives houses the official historical records of the University of California, Riverside including faculty papers and documentation of student life and activities.

**Tomás Rivera Archive**
In 1985, the Rivera Library was re-named for Tomás Rivera, the first Mexican-American UC Chancellor (UCR 1979-1984). The Archive includes approximately 85,000 items including biographical works and correspondence, as well as literary, educational, and civic materials. Rivera’s legacy as Chancellor, educator, poet, novelist, and civic leader are captured in the depth of the archive.

**Water Resources Collections and Archives (WRCA)**
Located in both the Rivera Library’s fourth floor and throughout the STEM collections in Orbach Library, the WRCA is the premier collection devoted to water resources in California and the west, including more than 280 archival collections, 180,000 technical reports, 6,000 archival maps, and 45,000 historic photographs pertaining to water development from the 1900s to the present.

**Eaton Collection of Science Fiction and Fantasy**
One of the world’s largest, richest and deepest research collections of science fiction, fantasy, horror, utopian literature and related genres, the Eaton Collection contains more than 100,000 printed books, full runs of most pulp magazines, approximately 100,000 fanzines, film and visual material (including 500 shooting scripts from science fiction films), and the archives of prominent writers including Robert Forward, Jerry Pournelle, Anne McCaffrey, and the Poul & Karen Anderson papers. Also included are collectibles, ephemera, and realia as well as almost 100,000 comic books, anime and manga.

**Tuskegee Airmen Collections**
Part of a national effort to collect and preserve the history of the first African Americans to serve as pilots in the U.S. Army Air Force in World War II, the Tuskegee Airmen Collections contain personal letters, diaries, photographs, memorabilia, posters, oral history interviews, documentation of careers before, during, and after military service as well as books by and about the Tuskegee Airmen, and African American military history.

**Rupert Costo Library of the American Indian**
The Costa Library documents Native American history and culture in multiple-media formats including approximately 7,000 volumes and more than 9,000 documents, pamphlets, tape recordings, slides, baskets, pottery and artwork. The Costa Library was donated by Rupert and Jeanette Costo, co-founders of the American Indian Historical Society. Rupert Costo (Cahuilla) was a Native American author, publisher, and philanthropist. Jeanette Costo (Eastern Cherokee) was a journalist and activist.

**Educational Opportunities**

**California Teach-Science and Mathematics Initiative (CalTeach-SMI)**
Leslie Bushong, Director
Resource Center, 1114 Pierce Hall
(951) 827-4970; smi.ucr.edu
facebook.com/ScienceMathInitiativeAtUcr
instagram.com/smiatucr/

California Teach-Science and Mathematics Initiative (CalTeach-SMI) has a goal of addressing the critical need of highly qualified K-12 science and mathematics teachers in California. With an economy increasingly reliant on science, technology, engineering, and mathematics (STEM) and the anticipated large scale retirement of qualified teachers, this is an essential time to explore and prepare for a career in teaching science or mathematics.

CalTeach-SMI at UCR offers undergraduate students paid/unpaid opportunities to explore STEM teaching as a career option. Through CalTeach-SMI, students receive advising and mentoring to prepare for entrance into an intern teaching credential program while diligently coordinating with academic advisors to ensure completion of STEM degree requirements. The CalTeach-SMI Resource Center provides future STEM teachers with material and financial resources to promote planning and professional development towards a science/mathematics education career.

**Honorary Societies**
To learn more about these organizations: highlanderlink.ucr.edu

**Gamma Beta Phi** is a national collegiate honorary and service society that recognizes and encourages educational excellence, develops leadership and character in its members, and fosters, disseminates, and improves education through appropriate service projects. It recognizes students ranking in the top 20 percent of their class.

**Mu Sigma Rho** is a national statistics honor society seeking to promote and encourage scholarly activity in statistics as well as recognizing outstanding achievements among students and faculty. Students must have a 3.25 GPA and have a certain amount of statistics courses and class standing to be eligible.

**National Residence Hall Honorary** aids the development and maintenance of a strong, diverse and academically successful residential community within the UCR Residence Halls. Students must be in the top one percent of the residence hall population.

**Order of Omega** is a national honor society to recognize junior and senior members of social Greek letter organizations with a minimum 3.0 cumulative GPA for their service to the Greek system and the university. It honors the top 3 percent of the university Greek population for excellence in academics, leadership and campus or community service.
Phi Beta Kappa, founded in 1776, is the oldest and most distinguished academic honor society in the United States. Approximately 10 percent of seniors majoring in liberal subject areas of the arts and sciences are eligible for membership. UC Riverside chapter reviews the records of eligible students and elects members on the basis of scholarly achievement, character, and broad cultural interests. All prospective members must have the equivalent of level four (intermediate skill level) of a foreign language and some significant evidence of breadth, through courses beyond those required for the major or by the student’s college, or through other demonstration of academic excellence across a diversity of fields. Students are nominated for induction each spring quarter.

Psi Chi National Honor Society in Psychology was founded in 1929 for the purposes of encouraging, stimulating, and maintaining excellence in scholarship and advancing the science of psychology. Society members must rank in the top 35 percent of their class with a minimum 3.0 cumulative GPA.

Tau Beta Pi (National Engineering Honor Society) marks those who have conferred honor upon their alma mater by distinguished scholarship and exemplary character as students, or by their attainments as alumni. Students rank in the top 1/8 of the junior class or top 1/5 of the senior class.

Tau Sigma National Honor Society recognizes the academic achievement of students transferring to an institution of higher learning from another academic institution, and encourages and promotes the students’ involvement in the institution to which they have transferred. Tau Sigma students rank in the top 20 percent of their class with a 3.5 GPA.

Education Abroad

Skye Hall 321
(951) 827-4113
international.ucr.edu/abroad

WHY study abroad?
Choose to challenge yourself, by complementing your studies at UCR with learning abroad. By venturing outside your comfort zone into the unfamiliar, you invest in an opportunity to learn more about yourself, about others, and about the world. Education Abroad provides a gateway to high-quality international opportunities which help you cultivate intercultural understanding, collaboration, and other key skills needed to work in today’s global marketplace.

WHO can study abroad?
Anyone who meets the program requirements, which vary – for more details, see international.ucr.edu/abroad

WHERE can you study abroad?
Anywhere in the world where we offer a program – see international.ucr.edu/abroad for more details.

WHEN can you study abroad?
You can go abroad for a full year, a single term, or in the summer. Since it can take up to a year to prepare for a program, most go as sophomores, juniors, seniors and even graduate students.

WHAT can you study abroad?
You can take courses that meet the UC breadth/general education and major requirements (subject to approval), and our programs cover a wide range of disciplines – see international.ucr.edu/abroad for additional information.

HOW can you study abroad?
Visit the Education Abroad website – international.ucr.edu/abroad – for details on the three types of programs we provide – UCEAP, FLEAP, and OAP – which include internships, field trips, field study, research, language learning, service learning, volunteer and work opportunities. Support services include advising, resource library on international opportunities, travel planning, and scholarships.

Faculty Led Education Abroad Program (FLEAP) – take UC courses in an international setting with UCR professors, in which you could conduct research, collaborate with students from other countries, and experience another culture.

When you study abroad through FLEAP, you:
• Remain enrolled at UCR, earning UC credits;
• Use eligible federal, state, and UC financial aid and grants;
• Access UCEAP scholarships and awards;
• Enjoy internationally recognized health and safety support;
• Can choose from over 40 country destinations worldwide;
• Take courses at a highly ranked host university abroad.

Opportunities Abroad Program (OAP) – any type of abroad experience offered by other UC campuses and non-UC education abroad programs which are governed by UCR’s Planned Opportunities Abroad Agreements (POAA; see Withdrawals and Leaves of Absence section about POAA).

When you study abroad through OAP, you:
• Are on a leave of absence through POAA and earn transfer credit;
• Use eligible federal and state aid;
• Apply for scholarships and grants;
• Enjoy many options with the flexibility to study abroad with other abroad programs.

Reserve Officer’s Training Corps

Students may with the permission of the dean of their college enroll in ROTC courses at another institution while completing their degree programs at UCR. Students interested in Air Force or Army ROTC should contact the Office of the Registrar at (951) 827-7284 or rotpinal@ucr.edu for more details.

WHY study abroad?
ROTC at (951) 827-2764 or Claremont McKenna College, (909) 537-5533 or armyrotc@ucr.edu

Air Force Reserve Officer Training Corps (AFROTC) is a nationwide program that allows students to pursue commissions (become officers) in the United States Air Force (USAF) while simultaneously attending college. AFROTC consists of four years of Aerospace Studies classes (Foundations of the USAF, Evolution of USAF and Space Power, Air Force Leadership Studies, and National Security Affairs/Preparation for Active Duty), and a corresponding Leadership Laboratory for each year (where students apply leadership skills, demonstrate command and effective communication, develop physical fitness, and practice military customs and courtesies). College students enrolled in the AFROTC program (known as “cadets”) who successfully complete both AFROTC training and college degree requirements will graduate and simultaneously commission as Second Lieutenants in the Active Duty Air Force.

Army ROTC

1100E Hinderaker Hall
(951) 827-2764, armymrotc@ucr.edu

Students can take the first two years on the UC Riverside campus and then cross enroll at California State University, San Bernardino. Two-, three-, or four-year Army ROTC (AROTC) programs are available. Scholarships are offered as well. Academic units earned in the program may be counted as elective units toward fulfillment of UCR graduation requirements. Successful completion of the AROTC program leads to a commission as a Second Lieutenant with subsequent service on active duty or assignment to an Army Reserve or National Guard unit. For more information call UC Riverside Army ROTC at (951) 827-2764 or Claremont McKenna College, (909) 537-5533 or 537-5534 or visit https://ue.ucr.edu/units/reserve-officer-training-corps.
Summer Sessions offers over 650 regular UCR courses in multiple, abbreviated summer sessions, giving students the opportunity to expedite time to graduation, take hard-to-get classes, improve their GPA, get back on academic track, perform research with faculty, and seek professional development or enrichment courses. On campus housing options are available during the summer for both UC and visiting students. UCR students are eligible for Financial Aid and should talk to their Financial Aid counselor for more information.

Who May Attend? Summer term is open to all UC and non-UC students with a high school degree, or to those who are at least 18 years of age. Students do not have to be admitted to the university to attend Summer Sessions. Please visit summer.ucr.edu for the visiting student application form and for more information. Admission to Summer Sessions does not constitute admission as a regular student of the University.

Credits, Grades, and Units
UCR courses are normally transferable to other institutions and applicable degree programs. For UCR students, summer quarter credits and grades are automatically placed on their official transcript of record. UCR continuing students wishing to take courses in excess of 15 units for the entire summer must have the approval of their advisor or their college’s Associate Dean; all other students must have the permission of the Summer Sessions Director of Administration. UCR students in dismissed status must seek approval from their advisor or the Associate Dean from the college they wish to readmit to before registering for Summer Sessions.

University of California Center Sacramento Program (UCCS)
Associate Director: Cindy Simmons
1130 K Street, Suite LL22
Sacramento, CA 95814
(916) 445-7300 or (951) 827-2634
uccs.ucdavis.edu

The UCCS program provides students with an opportunity to gain first-hand knowledge of California’s public policy challenges and processes. The program includes coursework as well as professional experience while living, interning, and attending classes in Sacramento. Participants will:

• Work as an intern supporting the policy making process in a legislator’s office, an executive branch agency, or another setting in the Sacramento policy community. (10 credit hours)
• Learn about the state’s political processes, institutions, and policy challenges in the California Policy Seminar taught by members of the UC Davis faculty and featuring guest lectures given by a wide array of participants in and observers of California politics and government. (4 credit hours)
• Take courses on the UC Davis campus as appropriate to individual needs and interests. (optional)

Housing is available for students 10 minutes from the Capitol building and internships range from 24 to 33 hours per week. Application requirements include a 3.0 recommended GPA and junior/senior standing during the participating quarter. Undergraduates only. Students should begin applying during their sophomore year. Financial aid is available for the quarter in Sacramento.

UC Riverside Extension
UC Riverside Extension
1299 University Ave., Suite 201
Riverside, CA, 92507
(951) 827-4105; fax (951) 827-7278
register@ucx.ucr.edu; extension.ucr.edu

UCR Extension is the continuing education branch of the university. Extension programs are open to anyone seeking higher education. University Extension offers degree credit; postgraduate continuing education credit; and noncredit programs for pursuit of intellectual and cultural interests, professional and career advancement, and examination and study of a variety of topics and subject areas. Current and former undergraduate students can enhance their degrees through one of the specialized Professional Certificate Programs. Many courses are offered weekends and evenings for students’ convenience.

UCR Extension provides a range of educational opportunities and formats, including concurrent enrollment in UCR campus courses, XR courses, weekend and one-day conferences, and intensive and online Certificate Programs. Intensive English and other programs for non-matriculated international students and international groups are available throughout the year. Students do not need to be admitted to a degree program at UCR to enroll in Extension’s courses or programs.

Degree Credit
Credit earned in certain Extension courses may be applicable to degree requirements at the time of admission to the university. (See University of California Extension Courses in the Program and Courses section.) Students should check with the Office of Undergraduate Admissions about the applicability of such credit. Resident students in the university wishing to apply Extension credit to degree requirements must have advanced approval from the dean of their college or division before enrolling in Extension courses.

International Education Program
UC Riverside Extension
1299 University Ave., Suite 201
Riverside, CA, 92507
(951) 827-4105; fax (951) 827-7278
ieapplication@ucx.ucr.edu; extension.ucr.edu

Offers a wide variety of English language, Certificate and Diploma programs for international students and professionals on a year-round basis. Also offers academic pathways for students wishing to study at UCR and other U.S. colleges and universities, and opportunities for visiting international students to take UCR credit courses, on a space available basis.

Offers the following programs:
• Intensive English
• University Credit Program
• UCR Admission Preparation Program
• Several intensive professional programs including postgraduate diplomas in management, hospitality, engineering, entertainment & media, sports management and public policy.

UC Riverside Palm Desert Center
Executive Director: Agam Patel
75080 Frank Sinatra Drive
Palm Desert, CA 92211
(760) 834-0800; fax (760) 834-0796
palmdesert@ucr.edu; palmdesert.ucr.edu

The UCR Palm Desert Center expands the reach of University of California, Riverside into one of the fastest growing regions of California. Established as a teaching and research center in 2005, the UCR Palm Desert Center is a catalyst for diversification of the inland desert region by providing relevant regional research, offering innovative programs that attract and retain world class talent to the region, convening and creating partnerships that advance the public good, and enriching the cultural life of the community.
University of California Washington Center (UCDC) Academic Internship Program
1100 Hinderaker Hall
(951) 827-2634
engage@ucr.edu; ucdc.ucr.edu

This program provides undergraduate students with a multi-dimensional education experience in Washington, DC. Students undertake academic pursuits as well as cultural and social activities. The program combines course work with field research and internship experience. Students also have the opportunity to tour local sites and dialogue with distinguished professionals in the Speaker Series.

Students from all majors can benefit from the program. Visit ucdc.ucr.edu for information about internships and links to other job search sites. The UC Washington Center is located in downtown Washington, DC, six blocks from the White House. The UC Washington Center is an innovative teaching and research facility shared by all of the UC campuses that has classrooms, faculty and staff offices, a modern computer lab, and a student lounge, as well as living facilities for all participants in the program.

Academic Program
Students may enroll in 12 to 16 units of course credit for the quarter.

Internship (8-16 units). Letter grade only
The focal point of the academic program is the internship, which is based on the students’ interests and major, and is arranged before the student leaves for Washington, D.C. May be letter graded or S/NC depending on discipline. Visit ucdc.ucr.edu for sample internships.

Core Research Seminar (4 units)
UCR students meet once per week with a faculty member in residence at the UC Washington Center in D.C. Academic assignments focus on understanding the city of Washington, D.C., its history, politics and culture. Offered for a letter grade.

Interdisciplinary Elective (4 units)
Serves as a weekly forum for students to share and enhance their knowledge of living and working in Washington, D.C. Students will read about, experience and analyze key sites in a multi-disciplinary context. Offered for a letter grade.

Academic Planning/How to Apply
Interested students should consult well in advance with their academic advisors and the UCDC program staff to determine how participation in the program will affect their degree progress. Consult ucdc.ucr.edu for application deadlines and information on how to apply.

Eligibility and Selection
Minimum requirements are a 3.0 cumulative GPA, junior or senior standing during the participating quarter, and completion of at least two upper division courses with a B+ or better. In addition to academic criteria, the selection committee considers the student’s seriousness of purpose, maturity and the capacity to adapt to a study-quarter away.

Financial Matters Program
Participates pay the same UC and campus fees as a quarter at UCR and are responsible for room and board, books, and personal expenses. The only additional cost directly related to the program is round-trip transportation.

Many forms of financial assistance are available to participants. Students who receive state and federal financial aid may use their scholarships, grants and loans to finance their quarter at UCDC. Students who receive financial aid may also be eligible for other awards and scholarships. Other support may also be available; students should consult with the UCDC program staff or the financial aid office for more information.

University Honors
381 Skye Hall
(951) 827-5323
honors@ucr.edu; honors.ucr.edu

University Honors emphasizes scholarship, engagement, and student success and is designed for high-achieving, undergraduate students from all academic disciplines who value intellectual challenges; a curriculum characterized by depth and complexity; and an innovative, diverse, and stimulating learning community comprised of like-minded scholars and based on the three pillars of Promoting Creativity and Innovation, Cultivating a Culture of Contribution, and Celebrating Diversity and Global Citizenship. University Honors seeks to supplement, enhance, and maximize a student’s experience at UCR by providing opportunities and resources for students to pursue and achieve their academic, co-curricular, and professional goals. All University Honors students are required to participate in faculty-mentored, undergraduate research, creative activity, or experiential learning, which culminates in a capstone project.

• Incoming first-year students will be invited to apply for admission to University Honors on the basis of their high school grade point average.
• First-year and second-year UCR students will be invited to apply for admission to the second year or third year of University Honors if their cumulative grade point average is 3.50 or above.
• Incoming transfer students will be invited to apply for admission to the third year of University Honors if their transfer grade point average is 3.25 or above.

University Honors provides students with high-impact, educational opportunities; experiential-learning opportunities; co-curricular opportunities; and leadership opportunities. Those opportunities, along with small class settings, close interaction with Honors faculty, counseling from professional staff members, peer-mentoring, and an interdisciplinary curriculum, contribute to the educational experience of University Honors students.

Research Opportunities
Students at UC Riverside have a distinct advantage in the multitude of opportunities available for participating in faculty research programs. Independent participation in such research helps students develop technical skills, explore areas of modern research, and learn how the world of research operates. In addition, working with faculty members gives students the opportunity to interact closely with professors, who, in turn, get to know the students.

To participate in undergraduate research opportunities on campus, students can:
• Check out the college and multicampus research opportunities listed below and visit https://www.ucr.edu/research for other opportunities
• Explore the undergraduate research opportunities portal at engage.ucr.edu
• Examine research-specific websites posted by colleges and departments
• Contact departmental advisors directly
• See the Internship Program under Career Center in the Services for Students section in this catalog. Also, the Capitol Internship program at UC Riverside provides a variety of opportunities for eligible students to earn course credit for substantive internships associated with their academic and career goals. Visit https://engage.ucr.edu/internship/overview for more information.

College of Humanities, Arts, and Social Sciences
California Center for Native Nations
Director: Michelle Raheja, Ph.D.
2006 Humanities and Social Sciences Building
(951) 827-1799
michelle.raheja@ucr.edu; cccnn.ucr.edu

Provides opportunities for research collaborations with California’s native peoples and other Indian tribes that benefit tribal communities and expand scholarly knowledge. As UCR is a neighbor to more than 30 tribes in the surrounding area, the center particularly supports interdisciplinary and culturally sensitive research in collaboration with these communities.

Center for Bibliographical Studies and Research
Director: Brian Geiger, Ph.D., MLS
INTN M1006
(951) 827-5841; fax (951) 827-4120
cbs.ucr.edu

Provides records every item published in Great Britain and any British governed territories from the beginning of printing (1473) through the end of the eighteenth century. The catalog is searchable free of cost via the British Library at estc.bl.uk
• The California Newspaper Project (CNP) records surviving issues of all newspapers published in California, freely available for searching at the [cnp.ucr.edu](http://cnp.ucr.edu).

• The California Newspaper Microfilm Archive (CNMA) preserves and stores approximately 100,000 reels of California newspaper microfilm from 1846 to the present. Accessible at [cnma.ucr.edu](http://cnma.ucr.edu).

• The California Digital Newspaper Collection (CDNC) is a text-searchable collection of more than 550,000 pages of digitized California newspapers from 1848 to the present. Accessible at [cdnc.ucr.edu](http://cdnc.ucr.edu).

• Un Catálogo Colectivo de Impresos Latinoamericanos hasta 1900 (CCILA) is a comprehensive union catalog of Latin American imprints through 1900. Searchable at [ccila.ucr.edu](http://ccila.ucr.edu).

Center for Family Studies
Director: Nancy Guerra, Ph.D.
Olmsted Hall, Third Floor
(951) 827-6421
nancy.guerra@ucr.edu

Focuses on significant advances in family theory, research, and application requiring an interdisciplinary perspective and intra- and cross-cultural approaches to family issues. Represents anthropology, education, history, sociology, and psychology.

Center for Ideas and Society
Director: Georgia Warnke, Ph.D., Distinguished Professor of Political Science
College Building South
(951) 827-1555; fax (951) 827-6377;
ideasandsociety.ucr.edu

The Center for Ideas and Society is an interdisciplinary research center dedicated to advancing humanistic studies and creativity at UC Riverside. The Center’s fellowships, research workshops, and public events strengthen the intellectual and creative life of the university. The center is committed to disseminating the results of its programs to the Riverside community and beyond.

The center also houses the Institute for the Study of Immigrant Religions and the Mellon Mays Undergraduate Fellowship Program.

Institute for Research on World-Systems
Director: Christopher Chase-Dunn, Ph.D.
4111 Interdisciplinary Building South
(951) 827-2062;
chriscd@ucr.edu; irows.ucr.edu

Organizes collaborative research among social, biological, and physical scientists on long-term, large-scale social change and its ecological, geographical and climatological causes and effects. Research foci include globalization; global inequalities; transnational social movements; urbanization and settlement systems; biotechnology and hegemony; the rise and fall of cities, states, and empires; and climate change.

College of Natural and Agricultural Sciences
AES – Citrus Research Center
[https://agops.ucr.edu/](https://agops.ucr.edu/)

Founded in 1907, the Agricultural Experiment Station-Citrus Research Center predates the campus by half a century and is the reason that UCR was established in Riverside. The Citrus Experiment Station, as it was first known, was established to provide research-based assistance to the region's flourishing citrus orchards. Today, after 100+ years, UCR's oldest research center continues to generate discoveries that have transformed the way we eat, the way we farm, and the way we treat our natural resources.

Alternative Earths Astrobiology Center
[astrobiology.ucr.edu](http://astrobiology.ucr.edu)

The Alternative Earths Astrobiology Center is cultivating a "search engine" for life on distant worlds using the best possible template: the billions of years that Earth was teeming with simple life, long before the evolution of animals. Building on $12 million in NASA-funded assets at UC Riverside, this cross-departmental integration of Earth science and astronomy—plus a broader array of on-campus collaborations spawned by this alliance—will position the university as a world leader in the search for habitable worlds and life beyond Earth.

Botanic Gardens
[ucrbg@ucr.edu](mailto:ucrbg@ucr.edu); [gardens.ucr.edu](http://gardens.ucr.edu)

The UCR Botanic Gardens is a living museum with more than 3,500 plant species and thousands of specimens with a focus on plants from Mediterranean climate and arid lands. The Gardens are utilized for teaching, research, and demonstration purposes, as well as enjoyment and appreciation of nature. Numerous engagement activities are offered each year including plant sales, classes and workshops, tours and walks, and an annual fundraiser. The Gardens are supported by an active Friends of the Botanic Gardens membership group and hundreds of volunteers from the campus and community.

California Agriculture and Food Enterprise (CAFÉ)
[cafe.ucr.edu](http://cafe.ucr.edu)

The California Agriculture and Food Enterprise (CAFÉ) builds on UCR’s unique history and strengths in interdisciplinary research, facilities and outreach to positively impact the science, policies and practices related to the critical role of food and agriculture to human health and well-being.

Center for Interactive Bee Research (CIBER)
CIBER is located at the Department of Entomology. Collectively, the team currently includes 10 faculty and their research groups that conduct collaborative and cross-disciplinary research on pollinator health. Activities connect landscape-level processes with organismal-level interactions and molecular mechanisms to develop tools to identify, quantify, and manage threats to pollinators. The goal is to halt and reverse nationwide declines in pollination services to ensure food security and agricultural sustainability and ecosystem stability. For more information see [ciber.ucr.edu](http://ciber.ucr.edu).

Center for Catalysis
[catalysis.ucr.edu](http://catalysis.ucr.edu)

The mission of the Center for Catalysis is to tackle new and novel interdisciplinary challenges faced by the field of chemical catalysis in the 21st century. Emphasis is placed on addressing catalytic needs in several areas of current importance in society, including energy storage and generation, environmental remediation, green chemistry and synthesis of specialty chemicals. The center draws from expertise across multiple departments at UCR in undertaking projects in the collaborative, interdisciplinary manner that is prevalent in the field today.

Center for Conservation Biology
[ccb.ucr.edu](http://ccb.ucr.edu)

The Center for Conservation Biology assists in the conservation and restoration of species and ecosystems by facilitating the collection, evaluation, and dissemination of scientific information. The CCB proactively identifies new research priorities in conservation biology and inaugurates new collaborative research programs. It also develops research programs in response to existing needs in conservation biology.

Center of Nano-Scale Electronics, Phenomena, and Technology
Director: Chun Ning (Jeanie) Lau, Ph.D.
jeanie.lau@ucr.edu

The Center of Nano-Scale Electronics, Phenomena, and Technology (CONSEPT) focuses on exploring novel electronic, optical, thermal, and mechanical phenomena that emerge in nanoscale systems, and exploiting these phenomena for next-generation devices and systems. Researchers explore novel materials such materials as graphene, carbon nanotubes, magnetic systems, and topological insulators as well as nanomechanical systems and chemical and biological sensing.
Center for Invasive Species Research
https://cisr.ucr.edu/

The Center for Invasive Species Research provides a forward-looking approach to managing invasions by exotic pests and diseases in California. CISR programs on exotic pests involve: (a) risk assessment; (b) early detection; (c) rapid development of control or eradication measures; (d) pest control via biological, microbial, genetic, and chemical practices; and (e) better understanding of patterns and processes facilitating invasions.

Citrus Clonal Protection Program
https://ccpp.ucr.edu/

The Citrus Clonal Protection Program provides a safe mechanism for the introduction of citrus varieties from any citrus-growing area of the world for the purposes of research, variety improvement, or direct use by the commercial industry. CCPP maintains blocks of trees that serve as the primary source of disease free, true to type budwood of all important fruits and rootstock varieties for California’s citrus industry and citrus researchers.

The EDGE Institute
https://edge.ucr.edu/

The Environmental Dynamics and GeoEcology Institute (EDGE) brings together interdisciplinary scientists to answer questions and enable scientific discovery about our changing world while educating students and the public. Using a multidisciplinary approach, the focus of the EDGE Institute is to examine life in a changing environment. In particular, this institute focuses on the fate of carbon, nutrients and water in time and space.

Integrative Biological Collections (CIBC)
https://cibc.ucr.edu/

The Center for Integrative Biological Collections has a mission to advance research and teaching in biodiversity and to provide support for the management of natural resources by fostering an interdepartmental alliance among UC’s world-class natural history collections. This will be accomplished through integrated and transformative approaches across UCR collections that leverage novel systems in communication, relational databases, data mining, geo-referencing, outreach, and advocacy.

Institute for Integrative Genome Biology
https://genomics.ucr.edu/

The Institute for Integrative Genome Biology (IIGB) brings together faculty from a wide variety of campus units to participate in this era of rapid genomics-based discovery. Research efforts are focused on the areas of biology, vector biology, mammalian biology, plant biology, bioengineering, and public policy issues and are directed toward pioneering solutions towards hunger, disease and environmental sustainability.

Center for Infectious Disease and Vector Research
https://cdv.ucr.edu/

The Center for Infectious Disease and Vector Research is dedicated to obtaining and maintaining an economically and environmentally viable agricultural industry by utilizing the knowledge of insect biology towards the control of insect pests. Researchers collaborate across disciplines to find new approaches to alleviate the medical and economic burden exacted by insect-borne disease.

Center for Plant Cell Biology
https://cepceb.ucr.edu/

The Center for Plant Cell Biology (CPCB) answers significant outstanding questions in plant biology by integrating genomic, bioinformatic, cellular, molecular, biochemical, and genetic approaches. Their goal is to apply the knowledge of how plants respond to their dynamic environment toward manipulation of crop plants safely and efficiently for better and more sustainable production.

Plant Transformation Research Center (PTRC)
https://ptrc.ucr.edu/services/

The University of California at Riverside has a state-of-art facility that can provide you with the infrastructure and expertise for the implementation of molecular biology and genetic engineering technologies for scientific research and teaching purposes. The Center is equipped with two BL2 greenhouses, a growth room, three tissue culture rooms, a laboratory with all the essential equipment for molecular biology, image analyses, and genetic technologies. Beyond our state of the art facilities, the scientific staff at the Center has extensive experience in working with in vitro plant tissue culture and micropropagation, molecular biology and plant genetic transformation techniques.

The SHINES Center
https://efrcshines.ucr.edu/

SHINES (Spins and Heat in Nanoscale Electronic Systems) is a new Energy Frontier Research Center (EFRC) funded in 2014 by the US Department of Energy. The SHINES EFRC has three inter-related research themes to address the central question: how do we harvest energy more efficiently from spins and heat on the nanoscale? The boundaries between themes are rather artificial. Many PIs are cross-theme members who work with members in other themes.

Statistical Consulting Collaboratory

Director: Yehua Li, Ph.D.

Provides statistical consulting services in areas including bioinformatics, agricultural field trials, health studies, ecological studies, entomological studies, sociological studies, marketing studies, industrial experiments, quality and reliability studies, and product and process development studies. Clients include the campus research community and off-campus agencies from all disciplines who use statistics. The collaboratory develops collaborative research relationships as well as research publications. It also provides financial support and consulting experiences to UCR undergraduate and graduate students.

Stem Cell Center
stemcells@ucr.edu, stemcells.ucr.edu

Focuses on understanding the basic mechanisms that control stem cell function and deciphering how the tremendous potential of stem cells can be used to improve human health. Researchers at the center have expertise in many different fields including developmental biology, cancer biology, endocrinology, biomaterials for tissue regeneration, micro/nanotechnologies to control differentiation, neuroscience, toxicology, skeletal tissue repair, endothelial cell differentiation, osteogenesis, differentiation of microglia, brain development, neural crest cell differentiation, and bioengineering.

UCR Natural Reserves
https://cnas.ucr.edu/academics/natural-reserves

UCR’s Natural Reserves consists of four major and four minor reserves that have research facilities and permanent staff: the Deep Canyon, Granite Mountains, Motte, and James Reserves. Within the nearly 11,400 hectares (28,000 acres) is a broad representation of Southern California’s flora, fauna, and major ecosystems. These lands are an invaluable outdoor laboratory for teaching and research, used by scientists throughout the world. In addition, many endangered or diminishing species are protected from the urbanization occurring in Southern California on “habitat islands” preserved within reserve boundaries.
The Marlan and Rosemary Bourns College of Engineering
College of Engineering—Center for Environmental Research and Technology (CE-CERT)
Director: Matthew Barth, Ph.D.
1084 Columbia Avenue
Riverside, CA 92507
(951) 781-5791; fax (951) 781-5790
info@cert.ucr.edu; cert.ucr.edu

A model for partnerships among industry, government, and the academic community, CE-CERT is one of California’s premier facilities for research into air quality, transportation, and energy efficiency. The research mission includes transportation systems, emissions and fuels, renewable energy, environmental modeling and policy, and atmospheric processes.

Center for Nanoscale Science and Engineering (CNSE)
Nanofabrication Facility
Director: Dr. Alexander A. Balandin, Distinguished Professor
(951) 827-3058; fax (951) 827-6262
balandin@ece.ucr.edu; cnse.ucr.edu

The Center for Nanoscale Science and Engineering (CNSE) was established by the Bourns College of Engineering (BCOE) and the College of Natural and Agricultural Sciences (CNAS), and maintains strong ties to the Materials Science and Engineering Program, the Division of Biomedical Sciences, and the UCR Medical School. CNSE brings together researchers from engineering, physics, chemistry, materials science, and medicine, and fosters interdisciplinary research and cooperation by providing a state-of-the-art environment for graduate students, postdoctoral researchers and faculty. Its Nanofabrication Cleanroom Facility supports world-class research and graduate student training in all areas of nanotechnology. CNSE supports externally funded multi-PI projects and research centers at UCR, and facilitates cooperation with the high-tech industry in the region and the State. The research thrusts supported by CNSE include next-generation electronics, spintronics, low-dimensional materials and devices, and nano-medicine, as well as emerging interdisciplinary fields such as heterogeneously integrated devices and circuits, sensor technologies, biomedical, renewable energy, and environmental engineering.

Center on Robotics and Intelligent Systems (CRIS)
Director: Amit Roy Chowdhury, Ph.D.
Associate Director: Fabio Pasqualetti, Ph.D.
Winston Chung Hall, Room 216
(951) 827-7886; fax: (951) 827-2425
amitr@ece.ucr.edu; cris.ucr.edu

The Center for Research in Intelligent Systems conducts cutting-edge research on the foundations and applications of intelligent and autonomous systems, including robotics, computer vision, controls, machine learning, real-time systems, and biomedical systems, among others. The center brings together faculty from across UCR and outside in developing cross-disciplinary and highly impactful projects, while fostering industrial collaborations and training the next generation of researchers.

Data Science Center
Director: Vassilis Tsotras, Ph.D.
Multidisciplinary Research Building
(951) 827-2888; fax: (951) 827-4643
tsotras@cs.ucr.edu; datascience.ucr.edu

The purpose of the Data Science Center (DiSCover) is to establish UCR as a prominent player in data science related research. It does so by promoting collaborations between the faculty in the data science group with researchers across campus. In addition to its research activities, the Center runs a weekly Data Science Seminar where speakers describe research challenges they face dealing with data. Education is also a major focus of the center.

Winston Chung Global Energy Center (WCGEC)
Director: Reza Abbaspicht, Ph.D., Distinguished Professor
Associate Director: Hamed Mohsenian-Rad, Ph.D.
Main Campus: Bourns Hall, A203
Off Campus: 1084 Columbia Ave, Riverside, CA 92507
(951) 827-6452; fax: (951) 827-5696
wcgecinfo@wcgec.ucr.edu; wcgec.ucr.edu

The Winston Chung Global Energy Center (WCGEC) focuses on solutions for today’s energy storage demands, while developing far-sighted energy storage research and energy-use strategies for tomorrow’s applications. Bridging the gap between industry and academia, the center’s goal is to contribute to the economic, social and environmental health of communities around the world. The activities of this innovative center include fostering a premier academic environment of research and discovery in sustainable energy, with a focus on storage issues; educating a diverse and distinguished engineering workforce that is dedicated to addressing global energy needs; offering tools and training that will increase the capacity of public and private planners, architects, engineers, utilities and developers to design and build energy-efficient community projects; reaching out to global organizations and businesses as a partner in fostering clean energy storage solutions; and inspiring leadership and community action to address energy storage issues in California and the world.

UCR Center for Advanced Neuroengineering (UCR CAN)
Director: Xiaoping Xu, Ph.D.
MRI Building
(951) 827-7535
can@ucr.edu; can.ucr.edu

The Center for Advanced Neuroimaging (CAN) is an interdisciplinary research center bringing together faculty from bioengineering and other engineering disciplines, psychology, and medicine. The center houses a 3 Tesla Siemens Prisma Magnetic Resonance Imaging (MRI) scanner and a MRI compatible 64 channel electroencephalogram (EEG), allowing CAN researchers to probe brain structure and function. The ultimate goal of CAN is to improve our understanding of normal brain function and dysfunction. Ongoing research includes (but is not limited to) studies examining brain function/structure in normal subjects and brain dysfunction in autism spectrum disorders, Parkinson’s disease, stroke, and traumatic brain injury.

Center for Industrial Biotechnology (CIB)
Director: Ian Wheeldon, Ph.D.
Bourns Hall
(951) 827-2471; fax: (951) 827-5696
ian.wheeldon@ucr.edu; cib.ucr.edu

The UCR Center for Industrial Biotechnology (CIB) seeks to co-train a new generation of engineers and life scientists to collaborate in entrepreneurial and multidisciplinary settings, employing biotechnology in the manufacture of chemicals, biofuels, and healthcare products and in agriculture and crop production. With a focus on microbial and plant synthetic biology, the Center’s research activities will translate the rapid advances in engineering and life sciences into industrially useful products and processes that address important societal needs. The Center pursues innovation in four areas of application: agriculture, the production of industrial chemicals, biofuels and healthcare. The training of students, development of processes, products, and “toolboxes” for manipulation, control and optimization of biological systems will result in discoveries and innovations that are ready for commercialization. The development of plant synthetic biology will provide new routes to monitor and regulate plant stress responses, providing new approaches to enhance crop productivity.
UCR Center for Research and Education in Cyber Security and Privacy (CRESP)
Director: Heng Yin, Ph.D.
Winston Chung Hall
(951) 827-6437
heng@cs.ucr.edu  cresp.cs.ucr.edu
The mission of the Center for Research and Education in Cyber Security and Privacy (CRESP) is to bring together academic researchers, students, and industrial partners to develop innovative and disruptive technologies for the prevention, mitigation, detection, and analysis of attacks in cyberspace. We seek to be a premier center for cybersecurity, designing novel approaches to building secure systems and enabling them to detect and tolerate attacks. We also seek to prepare talented engineers and researchers with the technical and problem-solving skills in this area of national need.

School of Education
The School of Education’s website for research specific centers, programs, and labs is: education.ucr.edu/research.

Center for Athletes’ Rights and Equity (CARE)
The UCR Center for Athletes’ Rights and Equity (CARE) is an interdisciplinary engaged research center focused on the rights and collective well-being of athletes across all levels of competition. CARE’s mission is to address structural inequalities in sport and to create better, more equitable experiences and outcomes for amateur, collegiate, and professional athletes.

CARE prioritizes research with an overarching goal to inspire, engage, educate, and empower sport and education leaders and athletes themselves—and to holistically prepare athletes for sustainable professional careers beyond sport. With our innovative and cutting-edge research, educational programs, learning sessions, community outreach, and diverse partnerships, CARE serves as a unique and leading resource to advance knowledge and contribute to a more vibrant, inclusive, and equitable future for athletes.

Eddie.Comeaux@ucr.edu
athletescare.ucr.edu

Institute for Teachers of Color Committed to Racial Justice (ITOC)
Dr. Rita Kohli is co-founder and co-director of ITOC. ITOC serves educators with who demonstrate capacity for racial justice leadership in public schools. Using critical race frameworks, ITOC is intended as a community building, professional development space for teachers of Color to explore the racial climate of their schools and its impact on their students, communities, and themselves, receive leadership training to navigate these realities, and strategize how to create racially transformative classrooms and schools.

Rita.Kohli@ucr.edu
http://www.instituteforteachersofcolor.org

Social Cognitive Developmental Neuroscience Lab
Dr. Katherine Meltzoff oversees the Social Cognitive Developmental Neuroscience Lab. The lab is part of the School of Education at the University of California, Riverside. The lab uses neuroscience to better understand social and cognitive processes in children and adults.

https://scdnlab.ucr.edu/

School Service Provision Research Collaborative
The School Service Provision Research Collaborative (SSPRC) is dedicated to conducting high-quality, applied research to effect enduring improvements to universal and targeted academic, behavioral, and social-emotional supports in schools as well as the processes and procedures used in their implementation. The work of the SSPRC is grounded in a prevention, early intervention, and multi-tiered problem-solving approach to service delivery. SSPRC work is heavily influenced by implementation science, consultation, and Multi-tiered Systems of Educator Support (MTSES) principles. This work is driven by the understanding that improving factors influencing school service provision can impact the short- and long-term outcomes for students in school and beyond and may be even more impactful for historically undeserved, marginalized groups.

https://ssprc.org/

STEM Teaching and Learning Lab
The Science Technology Engineering and Mathematics (STEM) Teaching and Learning Lab is directed by Dr. Kinnari Atit. In the lab, research is conducted to better understand how to improve teaching and learning in the STEM fields.

Kinnari.Atit@ucr.edu
stemteachlearn.ucr.edu

SEARCH Family Autism Resource Center
SEARCH is the acronym for Support, Education, Advocacy, Resources, Community, and Hope. The center is the University of California’s first family autism resource center focused exclusively on family needs, such as educational access. Housed in the UCR School of Education, the mission of SEARCH is to reduce the amount of stress they experience in attempting to learn about autism and access appropriate programs and treatments. While simultaneously training the next generation of autism researchers and educators, SEARCH provides assessments in both Spanish and English, and students learn procedures used both in clinic and schools.

(951) 827-3849
searchcenter@ucr.edu, searchcenter.ucr.edu

Civic Engagement Research Group (CERG)
CERG’s mission is to provide an evidence base that informs the design of policies and programs that promote the development of citizens for an effective, just, and humane democratic society. We conduct quantitative and qualitative research focused on understanding:

• The nature of youth civic engagement
• The impact of civic learning opportunities and digital media participation on young people’s civic capacities and commitments
• The quantity, quality, and equality of civic opportunities and outcomes in public schools and other contexts

The goal is to monitor trends, frame priorities, and develop an evidence base regarding effective civic education practices and policies.

Joseph.Kahne@ucr.edu, www.civicsurvey.org

School of Medicine
BREATHE – A Multidisciplinary Collaborative on Air Quality & Health Research
Director: David Lo M.D., Ph.D.
david.lo@medsch.ucr.edu
breath.ucr.edu
The BREATHE Center at the University of California, Riverside School of Medicine is a multidisciplinary collaborative for studies Bridging Regional Ecology, Aerosolized Toxins, and Health Effects. Research efforts among the collaborative include regional climate modeling, culture and policy studies on air quality and health, environmental justice and health disparities, and the health impacts of aerosolized particles including dusts, soil microbes, allergic pollens from invasive species, and pollutants.

The main partners in this work include faculty in the Center for Conservation Biology (CCB), the College of Engineering Center for Environmental Research and Technology (CE-CERT), and Biomedical Sciences in the School of Medicine. Affiliated faculty include researchers in the Bourns College of Engineering (BCOE), the College of Natural and Agricultural Sciences (CNAS), the College of Humanities, Arts, and Social Sciences (CHASS), the School of Public Policy (SPP), and the School of Medicine (SOM). There are also affiliations with the Science and Technology Studies group in the UCR Center for Ideas and Society, and Health Assessment and Research for Communities (HARC).
Center for Glial-Neuronal Interactions: Innovative Collaborations Applied to Problems of Brain Health and Disease
Director: Monica J. Carson, Ph.D.
monica.carson@ucr.edu, cgni.ucr.edu

The Center for Glial-Neuronal Interactions (CGNI) in UCR’s School of Medicine is dedicated to facilitating innovative collaborations between neuro- and glial-centric researchers as well as with researchers from outside the field of neuroscience. The ultimate goal is to understand central nervous system function at a molecular level with the goal of identifying risk factors and therapeutic targets of intervention for cognitive, neurodevelopmental and neurodegenerative central nervous system diseases. Ongoing research includes programs on Alzheimer’s disease, autism spectrum disorders, cognitive disorders, epilepsy, glioblastoma, infections of the brain, multiple sclerosis, neuroinflammatory disorders, phantom limb syndrome, stroke, substance abuse and traumatic brain injury.

Center for Healthy Communities
Director: Michelle C. Burroughs, M.P.H.
michelle.burroughs@medsch.ucr.edu, healthycommunities.ucr.edu

The Center for Healthy Communities (CHC) works with community partners to employ innovative community-based participatory research that promotes health equity in Inland Southern California communities (Riverside and San Bernardino counties). CHC is building bridges with community groups and interdisciplinary health-field faculty to improve the health of the culturally and economically diverse population, particularly the medically underserved.

The center fosters collaborations between UCR faculty, community-based organizations, grass-roots community leaders, and scholars from other institutions. Although the center is housed in the UCR School of Medicine, the intention is for it to benefit all UCR faculty and programs and to community-based partners.

Center for Molecular and Translational Medicine
Director: Maurizio Pellecchia, Ph.D.
amaurizio.pellecchia@ucr.edu, molmed.ucr.edu

This campus-wide initiative provides a forum to accelerate and enhance collaboration among faculty whose research is devoted to the translation of basic sciences into potential therapeutics, medical devices or diagnostics. With this initiative, UC Riverside and the School of Medicine commit to devote resources to assist in the development of novel treatments. The translation of basic laboratory discoveries into potential therapies, however, requires a multitude of efforts and expertise that no individual laboratory or funding source can, in isolation, fulfill. Potentially effective therapeutic strategies often never reach the patients due to the lack proper support necessary to channel basic laboratory pre-clinical studies through the complex and rigorous testing of experimental therapeutics. It is envisioned that the Center would either directly support or catalyze funding initiatives to advance the most promising innovative targeting approaches and agents into early stage clinical experimental therapeutics, therefore actively assisting in the first steps toward their development.

Center for RNA Biology and Medicine
Director: Sika Zheng, Ph.D.
sika.zheng@medsch.ucr.edu, rna.ucr.edu

The Center for RNA Biology and Medicine at the University of California, Riverside is a multi-disciplinary research center that builds upon UCR’s deep and unique strengths in RNA research and facilitates interdisciplinary interactions to promote fundamental science discoveries and to address RNA-centric industrial, biomedical, and therapeutic needs.

Center for Health Disparities Research (HDR@UCR)
Principal Investigator & Director: David Lo, M.D., Ph.D.
david.lo@medsch.ucr.edu, healthdisparities.ucr.edu

This is an NIH-funded Research Center at Minority Institutions (RCMI) to support research in health disparities and community engagement. The Center provides training for emerging investigators and interdisciplinary research workgroups in health disparities research, introducing the main concepts behind health disparities and health equity, as well as the methods used in interdisciplinary health disparities research. Community engagement is a key component of effective community-based participatory research, and our center also trains participants in engagement methods, and helps provide researchers with connections to key community partners. Funding from the center supports several pilot research projects in health disparities, as well as providing staff resources to enable the projects, including biostatistical and related assistance. The center also hosts a reading group in structural racism, and sponsors an annual research symposium and related workshops.

School of Public Policy
Center for Social Innovation
Director: Karthick Ramakrishnan, Ph.D.
socialinnovation.ucr.edu

The Center for Social Innovation is designed to connect with local communities and provide a credible research voice that can shift away from a “problem and deficit” narrative to an “opportunity and asset” narrative, one that will help unlock the region’s potential in the eyes of government agencies and foundations, as well as the corporate sector and elected officials.

Inland Center for Sustainable Development
Internal Director: Qingfang Wang, Ph.D.
External Director: Rick Bishop
Deputy Director: Ronald Loveridge
cssd.ucr.edu

Explores the social, economic, political and ecological questions posed by population growth and movement, using neighboring communities as a laboratory while recognizing these are global issues. Involves interdisciplinary collaborations in the community and among faculty and researchers.

Robert Presley Center of Crime and Justice Studies
Director: Sharon Oselin, Ph.D.
Associate Director: Justine Ross, Ph.D.
External Co-Director: Sergio Diaz
External Co-Director: Michael Ramos
presleycenter.ucr.edu

Conducts empirical research that informs evidence-based practice on issues related to crime and the criminal justice system. The center maintains an active research agenda in the areas of re-entry, recidivism, and justice and collaborates with regional and state agencies on projects that contribute to improved policy and practice.

Multicampus Research
Agricultural Experiment Station – Citrus Research Center
http://cnas.ucr.edu/about/aes/aes.html

A branch of the University of California’s statewide Agricultural Experiment Station, the nation’s largest land-grant experiment station and the research arm of the University of California’s Division of Agricultural and Natural Resources headquartered in Davis. Conducts research in plants, pests and disease, and natural resource sciences; through Cooperative Extension, provides leadership in the dissemination and application of research-based knowledge in agricultural and environmental science to the people of California. Through educational programs and research opportunities, prepares tomorrow’s leaders in agricultural and environmental science.
Ubiquitous Communication by Light (UC-Light)
Director: Albert Wang, Ph.D.
234 Winston Chung Hall
(951) 827-2986
aw@ece.ucr.edu; uclight.ucr.edu

The mission of the UC-Light center is to enable wireless communications by embedding signals into the light emitted by next-generation LEDs in systems for illumination, traffic control, advertising, and other purposes. Funded from the Multicampus Research Program and Initiatives (MRPI) competition within the University of California (UC) system and under assistance of Founding Director, Zhengyuan Xu, the UC-Light center is situated in a modern engineering complex at UC Riverside. The center research comprehensively and uniquely covers three thrust areas pertinent to LED lighting – efficient lighting, communication, and navigation – with significant potential for creating new technological innovations, economic activity, and energy savings benefits. Developed protocols and sub-systems are further integrated into modern architecture design and ASIC chips to ultimately deliver deployable systems and transfer technologies. The iterative experimentation, modeling, design, validation, and multi-dimensional feedback constitute a unified coherent framework to ensure Center success.

The Center closely interacts with a large community, from communication to lighting industries, standardization organizations, peer researchers, funding agencies, and general public.

Cooperative Extension
http://cnas.ucr.edu/about/aes/ces.html

Cooperative Extension specialists headquartered at UCR oversee research programs that provide technologies and scientific information to aid the region’s residents and help coordinate the activities of farm, family and consumer services advisors based in more than 50 county offices. Programs include sustainable agriculture, pest and disease management, irrigation, water quality, urban horticulture, and natural resources management.

Natural Reserve System
Director: Kimberly Hammond, Ph.D.
Assistant Director: Richard Redak, Ph.D.
kimberly.hammond@ucr.edu; richard.redak@ucr.edu
ucnrs.org

The University of California Natural Reserve System maintains for teaching and research a system of reserves encompassing the diversity of California’s natural terrain. Any qualified individual or institution may use the reserves under the direction and with the approval of the university. UCR administers 8 of the approximately 40 reserves systemwide.

Philip L. Boyd Deep Canyon Desert Research Center encompasses 6,122 acres of desert habitat around Deep Canyon, near Palm Desert. An air-conditioned field station with living quarters and laboratories is located near the mouth of Deep Canyon. A primitive campground and 2-square-mile teaching area is available for class use. ucnrs.org

Box Springs Reserve consists of 160 acres near the top of Box Springs Mountains and includes a coastal sage scrub. No laboratory facilities are present on the property, because of the proximity of such facilities on the UCR campus. This reserve has been used for field class laboratories and student research projects, but other research projects can be conducted at this site. ucnrs.org

James San Jacinto Mountains Reserve near Idyllwild is approximately 30 acres, surrounded on all sides by relatively undisturbed national forest land. Nearby there are 60 miles of hiking trails with access to thousands of acres of mid- and high-elevation wilderness, from nearby Lake Fulmor to the summit of Black Mountain, at 7,800 feet. The reserve is equipped for over seventy researchers and classes of student in four fully-equipped cabins. The reserve can also accommodate visitors in a stand-alone classroom. james.ucnrs.org

Oasis de los Osos Reserve is a satellite reserve of the James San Jacinto Mountains Reserve and is located near Snow Creek at the northern base of Mount San Jacinto. This property consists of 160 acres of rocky desert slopes and a dry alluvial fan. It also contains a perennial stream (Lamb Creek) with some waterfalls. A riparian woodland grows along this stream. A semi-desert scrub plant community occurs on the dry slopes and alluvial fan and along the washes. No facilities are available at this site. https://james.ucnrs.org/oasis-de-los-osos/

Jack and Marilyn Sweeney Granite Mountains Desert Research Center Encompasses 9,000 acres embedded in the 1.8 million-acre Mojave National Preserve in eastern San Bernardino County. Rising to near 7,000 ft, this rugged and scenic site offers exceptional local and regional biotic diversity, ranging from species typical of the Mojave, Sonoran and Great Basin Deserts, and relictual taxa affiliated with the Colorado Plateau and Transverse Ranges. The Kenneth Norris Teaching Area offers both indoor and camping facilities for class use, and the Allanson complex in Granite Cove includes a state-of-the-art research laboratory, conference room, and lodging for up to 20 researchers. granite.ucnrs.org

Sacramento Mountains Reserve is a satellite of the Sweeney Granite Mountains Desear Reserve Center and contains approximately 590 acres of Mojave Desert habitat at the Sonoran Desert transition. It is located about 18 miles west of Needles, CA, in San Bernardino County. The reserve contains ten species of cacti, including one of the best displays of Bigelow Cholla (Cylindropuntia bigelovii) in California. It also boasts the northwesternmost occurrence of Ocotillo (Fouquieria splendens). No laboratory facilities or living quarters are on this site, but lodging is available just off-site or at the nearby Granite Mountains Desert Research Center, for anyone wishing to use the reserve for teaching or research. granite.ucnrs.org

Motte Rimrock Reserve consists of approximately 715 acres at the northwestern corner of Perris, about 15 miles from campus. The vegetation is principally coastal sage scrub and grassland with riparian corridors in the canyons. This land is of particular biological interest for this region because it contains several species of conservation interest. Indian pictographs and a former Indian village site also are on this reserve. A headquarters building contains sleeping facilities for reserve users. ucnrs.org

Emerson Oaks Reserve is located 5 miles east of Temecula and 1 mile south of Highway 79. This 255-acre site contains coastal sage scrub on the lower hills, and oak woodland. ucnrs.org

UC Institute for Mexico and the United States (UC MEXUS)
Interim Director: Stefano Bertozzi, Ph.D.
3324 Olmsted Hall
(951) 827-3519; fax (951) 827-3856;
ucmexus@ucr.edu; ucmexus.ucr.edu

Since its establishment in 1980, the University of California Institute for Mexico and the United States (UC MEXUS) has maintained the primary mission of developing and sustaining a coordinated, university-wide approach to Mexico-related studies. The institute’s broad objectives are:

- to increase the quantity, visibility, and effectiveness of Mexico-United States projects in the university;
- to strengthen and develop research, exchange programs, and teaching;
- to support and coordinate interdisciplinary and inter-campus projects;
- to encourage and enable collaborative approaches by UC and Mexican scholars to the issues which affect both nations;
- to act as a source of information about university-sponsored United States-Mexico activities;
- to develop new sources for support of research and instructional programs;
- and to promote a better understanding between the two countries.

Within this broad definition, UC MEXUS seeks to identify, encourage, secure financial support for, and publicize programs which promise to contribute substantially to scholarship, to enhance university instruction—particularly in graduate and professional areas—to improve bina
tional understanding, and to make positive contributions to society in both Mexico and the United States. The Institute has been located at the UC Riverside campus since 1984.
Services for Students

Academic Resource Center
Director: Rena M. Burton, M.Ed.
156 Skye Hall
(951) 827-3721; arc.ucr.edu

The Academic Resource Center (ARC) provides academic support to all enrolled undergraduate students at UCR with the goal of helping students succeed and excel academically. Programs and services are at no additional cost, unless otherwise noted. See the ARC website for hours of operation and service locations.

In addition to the programs and services listed below, the ARC offers student employment and leadership development opportunities for undergraduate students as peer educators: SI leaders, ARC 35 lab leaders, tutors, peer counselors, math advisory exam proctors, and administrative support assistants. Highlander Early Start Academy (HESA) also offers TA positions for graduate students. **ARC programs and services include the following:**

**Assistance, Coaching & Encouragement (ACE)**
Provides individualized support to students who are encountering academic difficulty, helping them to meet satisfactory academic progress requirements. The ACE coaching team is made up of full-time professional staff and peer mentors who are trained and experienced at sorting out the factors that can adversely affect academic performance.

**Transfer Success Program**
The Transfer Success Program is a support program for incoming and matriculated transfer students. In collaboration with campus wide partners, the program provides programming and connects students to student success services to empower them in their academic, professional, and personal endeavors while assisting students in navigating the university system. The Transfer Student Success Zone located in the ARC, provides a space for transfer students to meet and attend events that address their needs.

**Early Assist**
The Early Assist program supports first-year students in the Bourns College of Engineering (BCOE) and the College of Natural and Agricultural Sciences (CNAS) who as a result of their score on the Math Advisory Exam, place into the Intermediate Algebra Workshop (ARC 35).

**Highlander Early Start Academy (HESA)**
Offers incoming first-year students an opportunity to prepare for the academic rigors and challenges of UCR. Students must have placed into English 4 through the Analytical Writing Placement Exam (AWPE), OR Math 5 or 6A through the Mathematics Advisory Exam (MAE) to be eligible. HESA participating students will take a primary course (English 4, Math 5 or Math 6A), secondary course (English 008), and HESA 001 (College Success Course). The goal of this program is to support incoming first-year students during the transition from high school to university, connecting them to campus resources for academic and personal success, and helping to build a community with fellow HESA peers.

**Intermediate Algebra Workshop—ARC 35**
Developed in collaboration with the Math Department, ARC 35 offers a refresher math workshop for admitted UCR students who have placed into Community College Math but nevertheless need to qualify to take more advanced math classes to complete their academic degree objectives. ARC 35 helps students develop better grounding in the fundamentals needed to be successful in university-level math courses. There is a fee associated with this workshop.

**Placement and Advisory Examinations**
Used by UCR to assess student readiness for University-level coursework and to determine the appropriate course placement in English, Mathematics, Chemistry, and Foreign Languages. UCR students must satisfy placement requirements before registering for these subjects. Exam results are used for advising and placement purposes only; unit credit cannot be earned with these exams. There are four placement and advisory exams:

- **Analytical Writing Placement Exam (AWPE)** Used to satisfy the University of California Entry Level Writing Requirement (ELWR) and to place first-year students into an appropriate English composition course.
- **Mathematics Advisory Exam (MAE)** Used to place first-year students into an appropriate Mathematics course.
- **California Chemistry Diagnostic Test (CCDT)** Optional placement exam that may be used for placement into the Freshman Chemistry series.
- **Foreign Language Placement Exams** Used to determine the appropriate level of Foreign Language entry.

**R’Success Workshop Series**
The workshop series covers a variety of study and life skills topics aimed at enhancing study and life skills. If you’re looking for ways to strengthen your study habits and time management skills, you’ve come to the right place. R’Success provides students the flexibility to choose workshop sessions on various study and life skills workshops that align with their individual interests and schedule. Receive a stamp for each session you attend (some workshops are worth two (2) stamps); 7 stamps earn you a certificate of completion, an invitation to the Academic Resource Center recognition event held at the end of spring quarter.

**Supplemental Instruction (SI)**
Peer-led group study to help students succeed in targeted high-priority courses. SI consists of regularly scheduled study sessions, giving students an opportunity to practice and develop academic skills necessary for success. Marketed as “guaranteed study time”, SI helps students develop study strategies specific to the course. The goal of SI is to improve academic performance in traditionally difficult courses offered in both lower and upper divisions.

**Tutorial Assistance Program (TAP)**
The Tutorial Assistance Program (TAP) provides tutoring for a variety of subjects and disciplines. The ARC’s trained tutors are multi-talented and multi-disciplined students that have performed well at the University. Students can utilize tutoring by appointment and on a walk-in basis. Most tutoring is done in small groups with each session lasting for about an hour. The tutoring schedule can be found on the ARC’s website.

**Writing Support Program**
The Writing Support Program provides writing support to all UCR undergraduate students through writing consultations and workshops. We provide writing assistance in any academic discipline during any stage of the writing process. The professional staff also provides targeted support to students applying for prestigious scholarships/fellowships, Undergraduate Research Journal submissions, and Honors theses.

**Associated Students (ASUCR)**
(Undergraduate Student Government)
202 Highlander Union Building (HUB)
(951) 827-3621; asucr.ucr.edu

ASUCR is the undergraduate student government consisting of 18 elected senators representing all five colleges: Engineering, 2; Natural and Agricultural Sciences, 5; Humanities, Arts, and Social Sciences, 9; Public Policy, 1, and SOE, 1. Also elected by the undergraduate students are a President, an Executive Vice President, a Vice President of External Affairs, a Vice President of Finance and a Vice President of Campus Internal Affairs and a Vice President of Sustainability. Additionally, there are 7 director positions elected: a Personnel Director, an Elections Director, a Marketing and Promotions Director, a Transfer Student Director, a Non-Traditional Student Director, a First Time College Student Director and an International Student Director. Together, these 13 officers make up the Executive Branch, which is the decision-making body when senate is not in session.

ASUCR is supported by the ASUCR fee, $12.50 per quarter: $2.00 funds clubs and organizations; and $10.50 funds student programs and advocacy efforts, and the operating costs of ASUCR. ASUCR is a member of the UC Student Association (USC) for system-wide and statewide representation. It appoints undergraduates to several important committees that play a role in campus governance, including the Highlander Union Board of Governors, the Recreation Facility Governing Board, the Student Services Fee Advisory Committee, Student Conduct, and the Academic Senate.
The Associated Student Programming Board is student-run and plays a critical role in providing student programming and entertainment for UCR’s campus community. From annual events such as Highlander Welcome, Block Party, the Wednesday Nooner Series, Homecoming, and Spring Splash, to special programs such as comedy shows, spoken word, unique experiences and early film premieres.

Athletics and Recreation

Highlander Athletics

Director: Wesley Mallette
120 Physical Education Building
(951) 827-7732; gohighlanders.com

A member of the National Collegiate Athletics Association (NCAA) Division I and the Big West Conference, UCR competes in 17 sports: eight for men — baseball, basketball, cross country, golf, soccer, tennis, and indoor and outdoor track and field — and nine for women — basketball, cross country, golf, soccer, softball, tennis, indoor and outdoor track and field, and volleyball. All UCR undergraduate students are admitted free to any regular season, home athletics event by presenting their UCR ID card at the Athletics Ticket Booth. For sport schedules and other information regarding Highlander Athletics, gohighlanders.com.

Recreation

Director: Lindy Fenex, Ph.D.
Student Recreation Center
Linden Street (northwest side of campus)
(951) 827-7378; recreation.ucr.edu

All UCR students are automatically members of the Student Recreation Center (SRC), a 155,000 square foot state-of-the-art facility for exercise, sports activities, and general recreational use. The SRC includes a large swimming pool and spa, tennis courts, an indoor running track, a gym with multiple courts, classroom kitchen, outdoor gear rental shop, cardio and weight space, an indoor climbing wall and boulder. Download the UCRSRC mobile app from http://go.ucr.edu/src to gain access to your premium fitness center today!

Activity Classes offers fee based activity classes such as a variety of dance and martial arts classes. We also offer tennis and CPR instruction.

Aquatics offers a large swimming pool, with lap/recreational swimming, lessons, workouts, and events such as dive-in-movie and quarterly free events.

Competitive Sports include intramural sports consisting of men’s, women’s and coed intramural leagues in basketball, volleyball, flag football, soccer, racquetball, dodgeball, and softball. Also, the club sports program offers men’s and women’s rugby, soccer, volleyball, and dance sport competition clubs.

Cooking Well offers UCR students the ability to learn new skills and gain confidence in the kitchen by exposing them to fresh ingredients with fun, affordable, simple recipes/techniques.

FitWell is the SRC fitness program. Access group fitness classes, such as Zumba, yoga, cardio kickboxing, cycling, as well as state-of-the-art cardio machines and a 21,000-square-foot weight room at no additional cost.

Open Recreation offers access to our weight room, cardio area, basketball, racquetball, badminton, volleyball and squash courts at your own leisure.

Outdoor Excursions (OE) offers hiking, rock climbing, scuba, snowboarding, kayaking, and many other activities. The OE rental shop offers tents, sleeping bags, snowboards and so much more for a discounted fee.

Ropes can challenge you with climbing activities! Experience the Challenge Course, our outdoor ropes and team building course located behind the SRC. Also take part in competitions, clinics and open climbing at The Rock (our indoor rock wall and boulder).

Visit our website for additional online classes, workshops and virtual offerings.

Basic Needs

Basic Needs Senior Manager: Sesley Lewis
127 Highlander Union Building
(951) 827-6276
sesley.lewis@ucr.edu

The Basic Needs department focuses on providing resources to students experiencing food and/or housing insecurity, or students who need support during a financial crisis. Our resources include the R’Pantry which provides currently enrolled students with food resources, hygiene products, and child care items. Additionally, we offer application assistance for the CalFresh food aid enrollment process, and additional support through our Economic Crisis Response Team.

For more information on the resources available and how to access these resources please visit us at basicneeds.ucr.edu.

Campus Media

The Highlander (Student Newspaper)
101 Highlander Union Building (HUB)
Newsroom (951) 827-3617; Business/Advertising (951) 827-5039
highlandernews.org

The Highlander provides quality reporting and insightful editorials on campus-related issues, Riverside community-based issues, and coverage of UCR cultural and sports events. The paper is published every Tuesday during the academic year. It receives funding from advertising and a student fee. Students with a desire to write and a passion for journalism or graphic design as well as advertising can work for The Highlander. The Highlander Newspaper office is located in HUB 101 at UC Riverside.

You can contact the front desk at (951) 827-3617 from 9 a.m. to 5 p.m., Monday to Friday.

KUCR (Radio Station of UC Riverside)
(88.3 FM in the Riverside area, kucr.org online)

Director: Louis Vandenberg
691 Linden Street
(951) 827-3737
kucr.org (info, show schedules, and live on-line web-streaming)

KUCR, the radio station of UC Riverside, has been a vital and active element of the campus (and Inland Empire) since 1965. KUCR is real college radio in the classic mode, licensed by the FCC and broadcasting to the campus and greater Riverside community on air and on-line. KUCR music programs are deep and diverse, presenting a wide variety of genres, from the most current indie rock, electronic and hip-hop, to world, classical music, and jazz. The station, which is nationally recognized, features an excellent award-winning set of public affairs, news, and sports programs. KUCR also presents live concerts, public affairs lectures, debates, a long-running comedy series and panel discussions. In addition, the station does numerous in-person dj events on campus and in the community throughout the year. The station has developed a burgeoning online presence, with numerous YouTube interviews and performance videos, Facebook, Instagram, Twitter, et al. KUCR has a small core professional staff with faculty participation, but features students at all levels, in management, programming, on-air dj’s, sportscasters, producers, staffers and more. KUCR embodies the university’s respect for diverse points of view, ethnic backgrounds, political beliefs, attitudes, and sexual orientations. KUCR doesn't duplicate the mainstream, but provides “alternative” programming not normally heard on commercial radio. The station broadcasts 24 hours a day, 365 days a year, on the air, via web-streaming, and via a free KUCR iPhone app (Android via the Tunein app) for mobile devices.

Visit our website for additional online classes, workshops and virtual offerings.
Card Services
Interim Director: Irma Henderson; (951) 827-1060
Assistant Director: Erica Henderson; (951) 827-1210
Card Services Coordinator: Denise Stadelbacher; (951) 827-2273
Open Monday through Friday, 9 a.m. – 4 p.m.
Located at the Highlander Service Station
(adjacent to the UCR Bookstore)
(951) UCR-CARD (827-2273); uccard.ucr.edu

Multi-Purpose Access Card
Your UCR ID (R'Card) is the official campus ID, connecting you to essential
-campus services and activities. You use it for class attendance, as a ticket
for UCR home athletic games and major social events. Your R'Card also
provides access to UCR libraries, Residence Halls, Dining Plans, laptop
rentals, labs, and printing kiosks. Some campus resources require an R'Card
to access services.

Use the R'Card as a Payment/Debit Card
By adding Bear Bucks, Dining Dollars, or Meal Plans your R'Card can be
used for payment at nearly all campus locations. Venues that accept the
R'Card include: The UCR Bookstore, campus restaurants and convenience
stores, vending machines, WEPA kiosks and library printing solutions for
3D and large format posters.

Bear Bucks
Bear Bucks are accepted almost everywhere on campus and provide
a secure payment method. To add funds to Bear Bucks, log in to your
“My Card Account” at uccard.ucr.edu with your CAS credentials. Family
members can add to their student’s Bear Bucks account at the “Make a
Guest Deposit” link on our website. There’s never a fee to add Bear Bucks,
and deposited funds never expire.

Dining Dollars
If you have a Dining Plan that includes Dining Dollars, they are automatically
added to your R'Card account. Dining Dollars roll over from quarter
to quarter, but expire at the end of each academic year.

Campus Advocacy, Resources & Education (CARE)
HUB 381
(951) 827-6225
advocate@ucr.edu
care.ucr.edu

CARE is an advocacy and prevention equity center committed to ending sexual
relationship violence at UC Riverside by providing trauma-informed
primary prevention, direct advocacy and resources related to experiences of
sexual assault, relationship violence and stalking to students, staff, faculty
and UCR affiliates. CARE approaches survivor advocacy and the development
of violence prevention through intersectional, empowerment-based and
trauma-informed practices. Inclusivity, social justice and collaboration
through community are core values of the department and it’s commitment
to student and staff success at UCR.

Confidential Survivor Advocacy
Traumatic incidents of sexual and relationship violence can impact the
holistic wellbeing of students, staff, and faculty. The aftermath can include having to navigate healing support, emotional & psychological
symptoms, safety, housing and academic challenges, and law enforcement/
Title IX reporting options. CARE Advocates are campus-based, confidential & privileged sexual assault/domestic violence counselor advocates
dedicated to empowering students, staff and faculty navigating such experiences. CARE advocates can help facilitate:

• Holistic healing opportunities for individuals and communities that have experienced violence
• Housing and academic accommodations
• Safety planning that includes assistance with restraining orders and other protective measures
• Coordination and accompaniments of SART examinations, investigative interviews and court proceedings
• Referrals to on and off campus resources
• Exploring reporting options with Title IX and/or law enforcement
• Ongoing opportunities to build community and support for survivors on campus

Violence Prevention
CARE works with campus departments, student organizations, peer
educators, and the general campus community to engage in developing
healthy climates, workplaces, and learning environments free from
harassment and violence. This includes working to develop ongoing
trauma-informed training with staff/faculty; peer-led violence prevention
workshops that include bystander intervention, consent, healthy rela-
tionships, social norms; programmatic initiatives that seek to work with
particular communities on campus including Athletics, Fraternity and
Sorority Involvement Center, Ethnic & Gender Programs, International
Students and much more.

Career Center
Director: Sean H. Gil, M.P.A.
Career Center Plaza
(in front of the University Lecture Hall and Sky Hall Building)
(951) 827-3631; careers.ucr.edu

The Career Center has fourteen professional staff and over 20 student
peers and assistants to assist students with their career planning, major
choice, internship search, graduate and professional school preparation,
and the job search process. Open year-round, the Center offers special
events and workshops, individual counseling, career assessments, and
a comprehensive virtual resource website available 24 hours a day.

Student Employment. The Career Center provides thousands of full-
time, part-time, temporary, and summer jobs posted on our online
job board, Handshake, at ucr.joinhandshake.com. These include
on-campus, off-campus, and remote jobs.

Job Search Assistance. Students can use in-person and virtual
appointments, and web-based resources to practice interviews and
get assistance with resume writing and job search strategies. Companies
visiting campus in 2020 - 2021 for recruitment and engagement efforts have included: Enterprise Holdings, DHL Supply Chain, PepsiCo, City Year, Indeed, RSM US LLP, Amazon, County of Riverside, HUB International,
Kohl’s Corporation, Riverside Unified School District, Southern California
Edison, Target, U.S. Department of State, Applied Medical, Coupa Software,
ESRI, JP Morgan Chase & Co., FBI, Lawrence Livermore National Laboratory,
Northrop Grumman, Accenture, Inland Empire Utilities Agency, Teach for
America, U.S. Environmental Protection Agency to name a few.

Internship Program. Internships may be part-time volunteer experiences or
may offer a salary or stipend. Academic credit for an internship is available if
approved by the academic unit. Coursework will be assigned that runs parallel
with the internship in order to provide an effective learning outcome.

Events. The Career Center hosts a number of annual career fairs, both
virtual and in-person: Business and Diversity Expo; Science, Technology,
Engineering and Math (STEM) Career & Internship Fair; Public Service & Social Impact Career & Internship Fair; Graduate, Professional, & Law School
Fair; Engineering & Technology Career Expo; Education & Social Impact Fair;
Teacher Career Fair; Health Professions School Information Day; Spring Career & Internship Fair: Career Night and the Just in Time Career Fair. The
Career Center also offers various skill building workshops, industry panels,
information sessions, and on-campus and virtual interviews for career
positions and internships.

Case Management
Director of Case Management: Laurie Lee, M.S.
(951) 827-5000
casemanager@ucr.edu; casemanager.ucr.edu

Case Management assist students in navigating issues that interfere with
their academic and personal success by providing support directly to
students, and through linkage, advocacy, problem-solving, and referrals
to campus and community resources.

Case Managers assistance is free to any enrolled UCR undergraduate,
graduate, or professional student. Students can contact us directly,
without a referral. Parents, staff and faculty can refer a student, or call
and consult with a case manager about a student of concern.

To schedule an appointment please go to our website and complete an
Appointment Request form.
Center for Undergraduate Research and Engaged Learning
Director: Gladis Herrera-Berkowitz
Associate Dean: Richard A. Cordullo, Ph.D.
2nd Floor of Student Services Building
(951) 827-7750; engage@ucr.edu

The Center for Undergraduate Research and Engaged Learning seeks to enrich the quality of the UCR undergraduate academic experience through high-impact experiential programs. As a unit of the Division of Undergraduate Education, our mission is to support student involvement in faculty-mentored research, academic internships, community service and engaged learning, scholarly and creative activities, prestigious scholarships, leadership development, and career readiness. We provide programming to support student success in their academic, professional, and career goals.

Counseling and Psychological Services (CAPS)
Director: Elizabeth Mondragon, Psy.D.
Student Health and Counseling Center (adjacent to Lot 21)
(951) 827-5531 or 951-UCR-TALK; counseling.ucr.edu

Visit us on Instagram: ucr_caps

UC Riverside’s Counseling and Psychological Services (CAPS) is dedicated to creating a positive, healthy atmosphere for our undergraduate and graduate student populations, working hand-in-hand with students to provide access to confidential mental health services and resources to support and promote their academic, personal and social development. Our commitment is to help each student to thrive and achieve success at UCR by providing students access to free, confidential, and professional mental health services. All registered UCR students are eligible to be seen, FREE of charge, regardless of insurance status.

Clinical Services
UCR CAPS provides a range of services and programs, both in-person and virtual, to promote mental health, emotional resilience, and wellness throughout the campus community. Our clinical services include individual counseling, couples counseling, and group therapy, as well as referrals for specialized treatment needs (e.g., psychiatric services, long-term treatment, etc.). All of our clinical services are provided by diverse and multiculturally competent licensed professional clinicians and supervised doctoral interns.

UCR CAPS provides same-day walk-in/virtual walk-in, and urgent consultations (weekdays from 9 a.m. – 4 p.m.). These appointments offer brief problem-solving and consultation to and about students in distress, or for those needing support with referrals.

Outreach and Education
Our professional team offers outreach, education, and consultation to faculty, staff, and students across campus. We provide training and education on a variety of mental health and wellness topics, specifically focusing our efforts on understanding, supporting and working with students who may be experiencing distress or have suicidal thoughts or concerns. CAPS utilizes a collective impact model to coordinate efforts and collaborate with other Health, Well-being and Safety division departments to support the overall mental well-being of the campus community.

Location and Accessing Services
CAPS provides FREE services to all registered UCR students. The office is open Monday-Friday, 8 a.m. – 5 p.m. For appointments or general inquiries: Call (951) 827-5531, option 2. To speak to a 24/7 counselor immediately, call 951-UCR-TALK or (951) 827-5531, and select option 1. Visit counseling.ucr.edu for critical mental health resources on and off campus, self-help tools, and more information about our services. Visit us in our NEW Student Health and Counseling building located on Linden St, next to Lot 21.

Cultural Student Programs
Asian Pacific Student Programs
Director: William Caganap, M.A.
244 Costo Hall
(951) 827-7272; apsp.ucr.edu

Asian Pacific Student Programs (APSP) promotes a diverse learning environment, providing UCR with opportunities to learn from and about the Asian American and Pacific Islander (AAPI) student population. Various social, cultural, and educational activities such as the AAPI Heritage Month, the Peer Mentor Program, leadership training, and AAPI Womxn’s Conference are designed to assist students in their personal, academic, cultural, and social development.

Chicano Student Programs
Director: Estella Acuña
145 Costo Hall
(951) 827-3821 estella.acuna@ucr.edu; csp.ucr.edu

Founded in 1972 as a result of student, staff, and faculty activism Chicano Student Programs was the first professionally staffed Chicano/Latino cultural center in the UC System. The center has a legacy of fostering a culture of Chicano/Latino student success within and outside the institution. The center provides co-curricular inclusive programming, advocacy, intentional partnerships, leadership development, outreach, and retention efforts focused on the academic, cultural and social success of Chicano/Latino students.
Middle Eastern Student Center
Director: Omar Aziz, M.A.
Program Coordinator: Ali Saadat
Highlander Union Building (HUB) 377
(951) 827-7233; mesc.ucr.edu

The first of its kind in the UC system, MESC is a central place of community, cultural expression, and celebration of Middle Eastern culture. Through dynamic educational and cultural programming and support services, MESC fosters relationships to build inclusion, acceptance, and earnest communication with an emphasis on cultural diversity. To meet the needs of the Middle Eastern student population at UCR, we advise MESC affiliated student organizations, provide mentorship and internships for students, host leadership trainings, and create a home away from home for all that come to MESC.

Native American Student Programs
Director: Joshua Gonzales, M.B.A.
229 Costo Hall
(951) 827-3850; FAX: (951) 827-4145
nasp@ucr.edu; nasp.ucr.edu

Provides educational, cultural, and social support for Native American students and all students on the UCR campus and surrounding communities through Native American events such as the American Indian speaker/film series, the annual Spirit of the Tribes 5K Run/Walk, the annual Medicine Ways Conference, the annual UCR Pow Wow, “Indian Time” radio program on KUCR (88.3 FM or kucr.org), community outreach, cultural workshops, and much more.

Office of Foster Youth Support Services
Director: Stephen Morales
Bannockburn K101
(951) 827-6545
ucrfosteryouth@gmail.com; fosteryouth.ucr.edu

The Office of Foster Youth Support Services (OFYSS) provides a network of resources to current and former foster youth who are attending UCR. OFYSS offers the opportunity for students who experienced foster care to explore and realize their full potential, and connect with material and emotional support services. Services include: health and counseling services, financial aid assistance and counseling, personalized writing tutoring, admission and enrollment assistance, monthly community luncheons, quarterly community building activities, textbook assistance, and a food and hygiene pantry.

Housed within OFYSS, the Guardian Scholars Program (GSP) provides an intensive and case-managed network of resources to students who are currently in extended foster care and who will or have already “aged out” or “emancipated” from the foster care system. GSP prioritizes our most vulnerable subset of foster youth, namely those who were not reunited with kin or adopted out of the system. In addition to the support services above, students who participate in GSP are eligible for financial awards and scholarships to support their basic living expenses, educational, health, and emergency needs.

Graduate Student Association
Highlander Union Building (HUB) 203A
(951) 827-3141
gsau@ucr.edu; gsa.ucr.edu

GSA represents all campus graduate students, including credential and medical students. It is governed by the Graduate Student Council, which comprises representatives from each of UCR’s graduate programs. Officers, elected at large, are the President, Executive Vice President, Vice President of Academic Affairs, Health Insurance Chair, and Public Relations Officer.

It is supported by a $13.57 per quarter fee for services, operations, Grad Bash parties and mixers, and a $20.00 fee for the Conference Travel Grant program which provides travel grants to graduate students who attend or present research at professional conferences.

GSA is heavily involved in campus governance and appoints students to serve on various committees.

Health Professions Advising Center
Director: Charles P. Scruggs, M.A.
Rivera Library Ground Floor B03
(951) 827-6233; hpac@ucr.edu; hpac.ucr.edu

The Health Professions Advising Center (HPAC), a unit of Undergraduate Education, provides information, advising and support for students planning to pursue a graduate/professional degree in the health professions. Services include individualized advising, peer mentoring, workshop series, speakers, special events and other activities for students who wish to enhance their academic and co-curricular preparation for all health professions programs.

There is no application process to utilize HPAC and all services are free and available to all UCR students and alumni.

Highlander Union Building (HUB)
Director: Brendan O’Brien
Highlander Union Building (HUB)
Highlander Union, HUB 353
(951) 827-5778; hub.ucr.edu

The Highlander Union Building (HUB) is a gathering place where students, faculty, and staff meet, eat, relax, and study. Featuring dining and retail facilities, lounges, meeting and event spaces. It also provides offices for student government, cultural programs, and various student affairs departments.

The Highlander Union Governing Board is responsible for developing facility operations policy, annual approval of the HUB Operating Budget and hosts monthly meetings open to the public. This student-majority board works to ensure that the HUB serves the needs of our campus community.

The Highlander Union offers:

• Assistance in reserving meeting space and event planning in any of the HUB Conference Rooms, Student Success Center Event Spaces or surrounding outdoor locations through HUB Scheduling. The HUB also has a variety of locations for advertising your event such as digital signage screens, display cases and beacons.

• An Information Desk designed to assist students and visitors of the Highlander Union located on the first floor. The Highlander Union’s Information Desk associates are prepared to provide students and guests with directions and information about the HUB and the campus. Students can check out laptops from the self-service kiosk located next to the Information Desk for up to 24 hours.

• A wide range of food fare from restaurants like Coffee Bean & Tea Leaf, Subway, Panda Express, Chronic Taco, Halal Shack, and Hibachi-San Japanese Grill. For those on the go, the Scotty’s Convenience Store is a quick stop to pick up a snack.

• Latitude Fifty-Five is equipped with pool tables and TVs. The Habit Burger Grill, located inside Latitude Fifty-Five, offers a tasty menu of burgers, sandwiches, snacks, and drinks.

• Multiple lounge areas throughout the building provide comfortable places to relax and study, refill your water bottle, or heat up a meal. The outdoor Highlander Plaza and upper mall also have ATM’s and provide shaded seating areas as well as tables with solar powered outlets to recharge your electronics.

• The Highlander Union Building provides numerous student employment opportunities, including Information Desk Attendants, HUB Programmers, Front Desk Assistants and Highlander Union Managers. Visit hub.ucr.edu for more information on how to apply.

• A HUB Programs team that designs and hosts a variety of events throughout the building complex for all students to enjoy. Past events have included guest lectures, movie screenings, food giveaways, Chalk the Walk, and much more!
Housing Services
Senior Director: Robert Brumbaugh
3595 Canyon Crest Drive
Riverside, CA 92507
(951) 827-6350
housing.ucr.edu

UCR campus housing provides a variety of living environments designed to encourage both academic achievement and personal growth. Our three housing types — Residence Halls, Campus Apartments, and Family Housing — are divided into 11 distinct housing communities. Each option is designed to fit the needs of students at all levels, from newly-admitted students, to those approaching their degrees, and students with families of their own.

Living on campus — as opposed to commuting or living in off-campus apartment complexes — ensures that students are more completely integrated into the college community, with easy access to valuable resources and opportunities to participate with student peers in activities that complement the classroom academic experience.

Studies conducted both at the national and local UCR level indicate that living on campus, especially during the critical first year, results in higher GPA’s, increases student engagement and satisfaction, as well as the likelihood of an incoming student receiving their degree.

Four Residence Halls are typically home to more than 4,000 first-year students living in double- and triple-occupancy rooms on co-educational halls. All Residence Hall rooms are furnished and air-conditioned, with high speed data connectivity, and television service included. A Residence Hall contract includes a selected Dining Plan, as well.

Some halls are intentionally arranged as Living-Learning Communities for students who share a common academic or social interest. These include:

- **CHASS**
  First-year students in the College of Humanities, Arts, and Social Sciences

- **Enginuity**
  First-year students in the Bourns College of Engineering

- **University Honors**
  Newly-admitted and continuing students admitted to University Honors at UCR

- **Pre-Business**
  Students in the College of Humanities, Arts, and Social Sciences’ Pre-Business Program

**PATH (Pan African Theme Hall)**
Students interested in expanding an interest in Pan African culture

**Mundo**
Chicano/Latino cultural-interest hall

**Gender-Inclusive Housing**
Students with diverse gender identities, expressions, and orientations

**Stonewall Hall**
Students of diverse gender identities and sexual orientations, as well as gender-diversity allies

**SiMS (Students in Math & Science)**
First-year students in the College of Natural & Agricultural Sciences

**Markaz**
First-year students interested in the culture and ethnicities of the Middle East, North Africa, Central & South Asia

**Stride 2 Success**
An intentional second-year student experience

**Pathways**
Helping new and continuing Transfer students thrive

In the Residence Halls, professional and student staff work together to plan activities and programs that develop a sense of community and encourage social interaction. Educational support consists of academic study groups, tutorial assistance programs, seminars, computer labs, study rooms and scheduled study hours. Social activities include hall competitions, off-campus excursions, theme dances, special dinners, mock game shows, cultural events and intramural sports. The Residence Halls also feature fitness rooms, music practice rooms and social lounges. On-site convenience stores provide snacks, school supplies and toiletries. Residential restaurants provide access to a high-quality, all-you-care-to-eat culinary program.

Six unique Campus Apartments offer more than 4,000 Transfer, Continuing, and Graduate students the enhanced privacy of traditional apartment-style living while retaining the advantages of living on campus. Apartments range from economical, fully-furnished suites to furnished and unfurnished multi-bedroom, multi-bath apartment homes. All UCR Campus Apartments include refrigerators, window coverings, heating, and air-conditioning. Most include full kitchens and private baths. Communities may also feature a swimming pool and spa, picnic areas with barbecue grills, recreational and study rooms, computer labs, vending machines, bike storage, secure laundry rooms and recreational space.

Professional and student staff plan social and educational activities appropriate for upperclassmen and graduate-level students. On-site staff are also trained and available to assist residents with questions, concerns, or advice regarding personal and facility needs and peer-to-peer relationships 24 hours a day.

**Family Housing** is available to all students with families. The community is comprised of moderately-priced, unfurnished one- and two-bedroom apartment homes directly adjacent to the UCR campus. Interiors include fully-equipped kitchens, central heating/cooling, as well as complimentary Wi-Fi, Basic cable television services, and partially-subsidized utilities. Family-friendly community amenities also include a playground, covered picnic area, perimeter fence, a secure central laundry room, and on-site parking. Residential Life staff offer a family-oriented activities calendar throughout the year, as well. The Family Housing Eligibility & Assignment Policy can be viewed on the Housing website.

Students living in Campus Apartments or Family Housing who would like to broaden their food choices or create a time-saving alternative can select from an assortment of Dining Plans when they sign their contracts or at any other time during the year.

The **Off-Campus Housing Program** is a free online service designed to assist students with searches for housing opportunities in the community adjacent to UCR when on-campus housing is unavailable. This service includes information and links to private apartment communities and homes for rent.

**International Students and Scholars (ISS)**
Director: Michael Schmelzle
Skye Hall, Third Floor, Suite 321
(951) 827-4113; internationalstudents@ucr.edu
international.ucr.edu

UC Riverside has a vibrant international community representing over 80 countries worldwide. We are dedicated to the success and wellness of our international students, and to creating a welcoming and safe environment that respects people from all backgrounds.

As a core function of International Affairs at UCR, International Students and Scholars (ISS) helps students get answers, find support, and connect to community seamlessly with key programs and services. ISS staff conduct pre-arrival and orientation sessions; offer cultural and adjustment advising; organize community building and support programs; coordinate workshops about employment and benefits; facilitate referrals to appropriate campus and community resources; and provide advice and guidance on all immigration issues related to student status.

All UCR students can benefit from the wide range of international programs and activities designed to develop intercultural skills and global awareness. Students can connect with the ISS office to get involved, develop their leadership and intercultural skills, and expand their professional network by participating in internationally-focused programs, special events, and community outreach. Peer-to-peer leadership opportunities through the International Orientation Leaders, and the International Student Peer Mentor Program allows students to develop as globally-minded leaders.

ISS programs encourage the mutual exchange of language, culture, and knowledge. We celebrate the unique and diverse lived experiences of UCR’s global community!
Lesbian Gay Bisexual Transgender Resource Center
Director: Nancy Jean Tubbs, M.S.
245 Costo Hall
(951) 827-2267;
out@ucr.edu; out.ucr.edu
Social Media: @ucrgbtcr

The LGBT Resource Center provides support, education, and advocacy regarding sexual orientation and gender identity for the UCR campus community. The center offers a David Bohmelt CyberCenter; a Resource Library of books and films; “drop-in” staff and peer support; and referrals to on- and off-campus resources.

Programs include the Community OUTreach Educators (CORE) peer education program, Tuesday Talks and other discussion groups, Q-Camp Orientation, T-Camp InterCampus Retreat, Lambda Celebration, and student-initiated campus traditions such as Dragalicious Drag Ball and Pride Prom. Center staff offer campus-wide trainings on LGBTQ cultural competency and trans-inclusive practices.

The LGBT Resource Center works closely with student organizations, the Queer Studies Minor, Stonewall Hall & Gender Inclusive Housing, the Chancellor’s Advisory Committee on LGBT Students, Faculty & Staff, and members of the Common Ground Collective to make UCR a national leader in LGBTQ inclusion.

Office of the Ombuds
Campus Ombuds: Andrew Larratt-Smith, JD, MDR
Intake and Outreach Coordinator: John Medinilla, MDR
388-390 Skye Hall
(951) 827-3213
ombuds@ucr.edu; ombuds.ucr.edu

Anyone who has a university-related problem, or is in conflict with someone on campus, or thinks they have been treated unfairly may consult the Ombuds. The Ombuds will discuss the situation with a visitor privately and does not participate in formal processes. If appropriate, however, the Ombuds may also help the visitor in gaining a better understanding of personal conflict approaches and styles, or may serve as an impartial facilitator or mediator to resolve disputes and conflict situations.

Some examples of issues that students have brought to the Ombuds are:

- Academic, pedagogic or research issues;
- Disciplinary matters;
- Roommate or housing conflicts;
- Unfair treatment, harassment, bullying, or discrimination;
- Clarification on university policies or procedures;
- Ethics issues or violations of policy

In all cases, the Ombuds is confidential*, independent, impartial and informal. The Ombuds does not receive notice or maintain records on behalf of the University. The Ombuds advocates for fairness and equity, but does not advocate for individuals or entities, and does not provide legal advice. The Ombuds is an informal resource for the UCR campus community, and does not participate in formal processes. If appropriate, however, the Ombuds can aid in identifying formal options and other resources that may be available.

Please remember that email is not a secure method for relaying personal or confidential information to the Ombuds. Phone and in-person contact are encouraged.

*A exception to confidentiality exists when the Ombuds perceives there may be an imminent threat of serious physical harm to self or others.

Police and Safety
Interim Chief of Police: John Freese B.S.
3500 Canyon Crest Drive
9-1-1 for reporting emergencies
(951) 827-5222; police.ucr.edu

The UC Police Department (UCPD) operates 24 hours per day, 365 days a year. UCR Police officers have full police powers and are responsible for all law enforcement activities and criminal investigations on the UCR campus. Police officers work in uniform or plain clothes patrolling the campus in marked and unmarked vehicles, on bicycles, and by foot.

Incident Reporting
The university strongly encourages victims to report all criminal incidents, regardless of their nature, to the police immediately to ensure that appropriate action can be taken. Emergencies are best reported using the 9-1-1 system and nonemergencies using routine channels.

Emergencies
Any police, fire, or medical emergency on campus can be reported by the 9-1-1 emergency reporting system, campus Emergency Call Boxes, campus emergency phones located in all campus building elevators and various campus buildings, or by walk-in reporting to the Police Department. Call boxes are located in or adjacent to most campus parking lots and are indicated on campus maps.

Publication of Incidents
To increase awareness of campus safety at UCR, incidents of criminal activity within the campus community are publicized via the UCPD Annual Report and Crime Statistics online; an ongoing “press log” of Community Crime Alert Bulletins (posters); the above Web site; “Crime Watch” columns in campus housing newsletters; regular police activity reports to campus housing administrators; Crime Alert e-mails to the campus community in compliance with the “Timely Notice” provisions of the federal Jeanne Clery Disclosure of Campus Security and Campus Crime Statistics Act of 1998; and crime prevention programs. Details can be found at police.ucr.edu.

The Campus Safety Escort Service is free to students, staff, faculty, and anyone else who needs an escort. This service is available Sunday-Thursday from dark to 11:30p.

- Pick up any red phone on campus that says Campus Safety Escort Service, which will automatically connect to the Dispatcher Desk
- Request an escort from the 1st floor HUB Information Desk or the Dispatcher Desk located inside Rivera Library
- Call the Dispatcher Desk at (951) 827-3772 and ask for an escort

ScotSurplus
Director: Mike Clemons (951.827.9185)
Logistics Manager: Mike Gonzales (951.827.5543)
1st and 3rd Tuesday of the Month, from 11 a.m. to 4 p.m.
Located in the Corporation Yard (across from Pentland Hills) (951) 827-4298; cbs.ucr.edu

The campus and local community can benefit from UCR’s very own “thrift store”! From gently used furniture, computers, bicycles, clothing, books, lab supplies, skateboards, sunglasses, and musical instruments, our campus Surplus Sales are truly a treasure hunt!
ScotSurplus gladly accepts credit cards and Bear Bucks for those who wish to use their R’Card. During the summer months (July and August) Surplus Sales occur on the 1st Tuesday of the month only. We also feature retired university equipment and vehicles on our online auction website: publicsurplus.com

Student Alumni Association
Alumni and Visitor’s Center
Alumni and Visitor’s Center
ucrsaa@ucr.edu; saa.ucr.edu

Affiliated with the UCR Alumni Association, a network of over 133,000 alumni, the Student Alumni Association prepares students for life after college through mentorships with successful alumni in the working world; nationally recognized career conferences; dinners with alumni; Highlander Day of Service, and other leadership-building activities. More information is available at the above website.
Student Conduct and Academic Integrity Programs (SCAIP)
Director: Tasha Yules, M.S.
(951) 827-4208; conduct.ucr.edu; conduct.ucr.edu

Student Conduct & Academic Integrity Programs (SCAIP) strives to maintain a campus environment in which the Tartan Soul principles of Accountability, Integrity, Excellence and Respect are fostered. SCAIP upholds campus standards for student conduct and academic integrity by resolving alleged violations of university policies or campus regulations. We train and educate staff, faculty, and students about the student conduct process and student rights and responsibilities. Visit SCAIP online at conduct.ucr.edu to learn more or report student behavior of concern.

Student Disability Resource Center
Director: Laura Riley, M.S.Ed.
1228 Student Services Building
(951) 827-3861
sdrc@ucr.edu; sdrc.ucr.edu

The Student Disability Resource Center (SDRC) offers information to prospective students with disabilities, including chronic health issues, about potential accommodations and services available while attending UCR. Prospective students are invited to contact the office early in their planning to attend UCR. For specific information about admission requirements, contact the Office of Undergraduate Admissions, the Graduate Division or the School of Medicine.

Services available to regularly enrolled UCR students may include information on and referral to on- and off-campus services, mobility assistance, and academic support services. Students wishing to receive disability accommodations should contact SDRC to request services. Accommodations are individually designed to meet the documented disability-related needs of each student.

Student Health, Counseling and Wellness Services
Assistant Vice Chancellor: Denise Woods, DrPH
Denise.woods@ucr.edu

Student Health, Counseling, and Wellness Services is a team of departments within Student Affairs dedicated to leading the university in creating a strong and active well-being culture at UC Riverside. The team includes Basic Needs, Counseling and Psychological Services, Student Affairs Case Management, Student Health Services, Student Disability Resource Center, Recreation, and The Well. Together they are accountable for administering, developing, assessing and improving comprehensive Student Health, Counseling, and wellness services and educational programs designed to empower all enrolled students to take charge of their health and develop life-long wellness practices. Read the description for each department to learn more about the depth and breadth of Health, Counseling, and Wellness Services available to UCR students.

Student Health Services
Senior Administrative Director: William Rall
Student Health Services Building near lot 15
(951) 827-3031
Health insurance, including waivers:
(951) 827-3031
studenthealth.ucr.edu

Student Health Services provides high quality medical care that is affordable and accessible to our students. All registered students are eligible to use Student Health Services which includes primary care, women's health, pharmacy, radiology (including x-ray and ultrasound), and laboratory (including blood draw) services. Other clinical services include psychiatry, dental, and travel services.

Insurance
Health Insurance is a condition of enrollment at the University of California. All students are automatically enrolled in the UC Student Health Insurance Program (UC SHIP). The premiums are billed to the students' accounts. Student Health Services is the primary care facility for students who are enrolled in UC SHIP. Students who can demonstrate comparable insurance coverage may apply for a waiver in lieu of automatic enrollment to UC SHIP. Visit studenthealth.ucr.edu for more information on filing a waiver request.

Student Life
Director: Carly Garcia
229 Highlander Union Building (HUB)
studentlife.ucr.edu

Students can contact the office or go to the website to find ways to get involved on campus and find resources available to support student organizations and fraternity and sorority life. Student Life coordinates programs to assist students with their personal and Highlander Orientation, New Student Programs, Veterans Resource Center, Student Organizations, Leadership Development resources, Community Service programs, and Civic Engagement opportunities. Student Life provides a variety of campus activities and events throughout the year. Visit the Student Life website for more information about services and resources provided by the office.

Student Org Team provides comprehensive support and assistance to student organizations, including assistance with university recognition, recruitment, program and event planning, major event management, accessing university resources, understanding and negotiating university policies and procedures, organizational development and enhancement, fundraising, promotion and marketing, and communication.

Fraternity and Sorority Involvement Center is a resource center for students involved in fraternity and sorority life, as well as for students who want to learn more about what fraternity and sorority life has to offer. The FSIC provides assistance with recruitment, event planning, scholarship, philanthropy, and community service for fraternity and sorority life on campus.

Highlander Spirit and Traditions provides a variety of activities and opportunities for students, staff, and faculty to show their Highlander pride and spirit.

Highlander Orientation helps new first year and transfer students get to know the university and become acclimated to UCR. Highlander Orientation provides opportunities to meet other first year students, receive academic advising, enroll in classes, and learn about campus resources to help students be successful.

New Student Programs assist new students, both first-year and transfer, in starting off on the right track in their college experiences through mentorship programs, workshops and leadership opportunities. New Student programs serves all students, including specific resources and activities for commuter students to stay connected to UCR.

Community Service Programs provides resources to students and student organizations to track their service hours and to find service opportunities. communityservice.ucr.edu

Leadership and Service Programs provides students with opportunities to strengthen and develop leadership skills. This area offers a number of different programs including the Inspiring R’ Leaders Conference and the Cultural Awareness Project.

Transportation and Parking Services
Director: Irma Henderson
683 Linden Street
Riverside, CA 92507
(951) 827-TAPS (8277)
transportation.ucr.edu

Transportation and Parking Services (TAPS) is responsible for the coordination and administration of all transportation related services including flexible parking permit options, subsidized transit passes, bike registration, and other sustainable transportation programs to help you get to and around the campus community.

All vehicles parked on campus must have a valid parking permit. Time limits are strictly enforced. All-day parking permits can be purchased at the Information & Parking Kiosks on campus. Short term parking is available in specific lots via self-service pay stations or via the Park Mobile app. Visit the website listed above for more information including lot locations and permit rates.
UCR Bookstore (Barnes & Noble)
Director: Mike Clemons (951) 827-9185
Store Manager: Tabitha Rosser (951) 827-4446
UCR Bookstore hours (fall 2022): Monday – Friday (8 a.m. to 5 p.m.)
Northeast of the Highlander Union Building (HUB) (951) 827-BOOK (2665); ucrbncollege.com

The UCR Bookstore is your one stop shop on campus. From affordable textbook options to school supplies, convenience items, and official Highlander gear, your campus store has everything you need for your academic career. The partnership between UCR and Barnes & Noble ensures that industry leading service, while still allowing a portion of bookstore proceeds to go directly back to the university. When you shop with your campus store, the money you spend on campus, stays on campus!

Textbook Price Matching.
The UCR Bookstore will price match any textbook retail price from competitors like Barnes & Noble and Amazon. Price match does not apply to Amazon Marketplace or other third party student-to-student sellers.

Save with Rental Books.
Students can save up to 80% by renting vs. buying textbooks. Rental books provide one of the most affordable options for students and the great thing is that you can still highlight and underline while studying! Rental books are due back the last day of the academic quarter and reminders will be sent.

UCR Gear.
The UCR Bookstore is the official supplier of and features the largest selection of UCR and Highlander clothing and gifts! From brands like Adidas, Champion, and Under Armour, you sure to find the perfect way to show your school spirit!

Refunds.
Textbooks are refundable one week from the start of academic term with receipt and as long as books are in original condition. After the first week of classes, textbook refunds can be given with proof of schedule change and original receipt. All other merchandise can be refunded within 14 days of purchase with valid receipt.

UCR Dining & Hospitality Services
Executive Director: Marcus Van Vleet 3595 Canyon Crest Drive Riverside, CA 92507
diningservices@ucr.edu
dining.ucr.edu

UCR Dining & Hospitality Services offers diverse culinary choices, encompassing residential restaurants, food courts, markets, coffee shops, and campus restaurants. With a wide range of dining options and services, UCR’s dining program includes:

- Residential Restaurants: UCR has two residential restaurants, Glasgow and Lothan Dining. These restaurants offer elevated dining experiences with chef-inspired menus, gourmet dishes, and themed events. They provided all-you-care-to-eat meal options and accommodated various dietary preferences, including vegetarian, vegan, and gluten-free choices.

- Campus Restaurants + Markets: You’ll find a delightful array of campus restaurants and markets, each offering a unique dining experience. These dining locations encourage students to explore a variety of flavors beyond our residential restaurants, making mealtime a truly enjoyable and diverse experience.

Locations include:
- The Barn
- The HUB Dining Plaza (Panda Express, The Halal Shack, Hibachi San, Chronic Tacos, Subway, The Habit Burger Grill, Coffee Bean Tea & Leaf)
- Campus Coffee Shops (Emerbee’s Cafe, Bytes, and Ivan’s)
- The Market at Glen Mor (Starbucks + Noods: The Noodle Bar)
- The Market at North District (Lolllicup Fresh Boba and Fry House)
- Scotty’s C-stores (HUB, Glasgow, School of Medicine)

Dining Plans: Optimize your campus dining experience with our convenient, prepaid meal packages, known as Dining Plans. These plans are designed to cater to regular on-campus dining needs; dining plans provide both convenience and flexibility. For further details on our dining plans and how they can enhance your dining experience, please visit our website at https://dining.ucr.edu/dining-plan-options.

Sustainable Dining: UCR Dining strives to source locally produced, organic, and sustainable ingredients whenever possible, promoting environmentally conscious practices.

Overall, UCR’s Dining & Hospitality program plays a crucial role in fostering a sense of community, supporting students’ well-being, and enhancing the overall campus experience. For more information, please visit our website at https://dining.ucr.edu/.

Undocumented Student Programs
Director: Ana Coria, M.Ed.
224 Costo Hall (951) 827-2193
usp@ucr.edu, usp.ucr.edu

Undocumented Student Programs supports undocumented students and immigration-impacted students to succeed in higher education and prepare for post-graduation.

Founded in 2015, Undocumented Student Programs is instrumental in imparting resources and institutional support to students. USP provides the following services:

- One-on-one advising on academic, career, and financial aid resources
- CA Dream Act assistance
- DACA assistance
- Free legal services through the UC Immigrant Legal Service Center
- Textbooks and calculators from the USP -Lending Library
- Leadership opportunities
- Undocu Ally training for staff and faculty
- Grad school workshops
- Internships and fellowships
- The R’Dream Scholarship and Book Grant
- High school and community college outreach
- Policy Advocacy

In addition to supporting undocumented students, USP also serves immigration-impacted students, such as U.S. citizen students with undocumented family members, Temporary Protection Status (TPS), Special Immigrant Juvenile Status (SIJ), U Visa, and Asylee/Refugee Status.

University Advancement
Vice-Chancellor for University Advancement: Peter Hayashida, M.S.
4128 Hinderaker Hall (951) UCR-NEWS (827-6397); ucr.edu

Headed by the Vice Chancellor for University Advancement, this division has primary responsibility for generating external support for the campus, through fund-raising, strategic media relations, marketing, campus publications such as the campus magazine, video production services, the UCR home page, event planning, and alumni services, including a Student Alumni Association.
Veterans Resource Center
Coordinator: Tamara Thacker
(951)827-2099
125 Costo Hall
veterans.ucr.edu

Our Veterans Resource Center is a hub of information for all military-affiliated students, including student veterans, spouse and children dependents of veterans, and even active and reservist military members. The VRC works closely with Financial Aid to help answer questions about financial benefits that one might receive from the military, as well as working with our Career Center to help veterans find employment following their time at UC Riverside.

The VRC is located physically at 125 Costo Hall, including a social space to meet other veterans, study rooms, office space to meet with staff members, and even a kitchenette to keep and prepare food.

Our Veterans Resource Center and the services we offer to veterans is expansive, with UCR being ranked the #1 research institution in the country for student veterans in 2019-2020.

Vocational Rehabilitation Services
State Department of Rehabilitation
2010 Iowa Ave, Suite 100
Riverside, CA 92507
(951) 782-6650 (Voice) or (844) 729-2800 (TTY); dor.ca.gov

Students who have a disability that impacts them vocationally may be eligible for services from a state department of rehabilitation office, including vocational counseling and guidance, training (with payment of costs such as books, fees, and tuition), and job placement.

The Well
(Well-being, Empowerment, Life, Learning)
Highlander Union Building 248
(951) UCR-WELL (827-9355)
thewell@ucr.edu; well.ucr.edu

The Well is UCR’s health promotion department focused on holistic student well-being. The Well provides health education, training, resources, and programming for students in a variety of topic areas, through a network of peer educators, mentors, and professional staff. Health education topics include alcohol & other drugs, sexual health & reproductive justice, mental well-being, stress, sleep, and more. Students can attend our events, and join one of our peer groups to engage with public health topics on campus and to gain leadership skills.

At The Well, we understand that it can be challenging to maintain health and wellness. Our work centers on increasing access to information and resources, and helping students remove barriers to well-being, in support of academic and personal success. We provide students with free access to health-supporting resources, including safer sex supplies, period products, stress balls, sleep kits, COVID safety-related health supplies, and herbal tea. Check our website for current department hours and general information, and follow us on Instagram @thewellucr to stay current on our resources, services, and events.

Women’s Resource Center
Director: Nina Ruelas, M.S., L.M.F.T.
260 Costo Hall
(951) 827-3337; wrc.ucr.edu

The Women’s Resource Center (WRC) provides advocacy, educational programs, informal counseling, enrichment activities, support groups, and referrals for the entire UCR student community. Its goals are equity, access, outreach, retention, knowledge and skill development, safety, and a general sense of well-being. Core services include the Campus Safety Escort Service, self-defense classes, The Persist Women’s Political Engagement Conference and other groups, initiatives, events, drop-in hours, and volunteer opportunities throughout the year.

The Campus Safety Escort Service provides safety escorts that will walk or drive you to and from your car or nearby destination. This service, comprised of trained student volunteers, is available on **Sunday-Thursday from dark to 11:30pm** by calling (951) 827-3772, using the red direct dial telephone located on the first floor of most campus buildings, or by dropping by the HUB or Rivera Library lobbies. To volunteer, just complete an application online at [campus-safety-escort-service](https://wrc.ucr.edu/programs/campus-safety-escort-service) or stop by the Women’s Resource Center, 260 Costo Hall.

Voter Registration
Students who need to register to vote for the first time, or re-regis-ter because they have moved, or want to switch their party affiliation, can learn more at vote.ucr.edu or by visiting the Student Life Office in HUB 229.

You must be registered at least 15 days prior to an election in order to be eligible to vote in that election.
Campus Tours

Campus Tours Office
1137 Student Services Building
(951) 827-TOUR (8687)
tour@ucr.edu; visit.ucr.edu

Visitors can learn more about UCR’s history, academic programs, research and other interesting facts from a current undergraduate student. 30 minute presentation and 1 hour campus, engineering lab, and science tours are offered weekdays and select Saturdays. Reserve a tour online, at admissions.ucr.edu/visit.

Early Academic Outreach Program (EAOP)

2210B Student Services Building, 2nd Floor
(951) 827-4695; fax (951) 827-4762
eaop.ucr.edu; facebook.com/UCREAOP

As UC’s largest academic preparation program, EAOP provides academic advising to high school students who are first generation, economically disadvantaged, and English Language Learners about college admission requirements. The Program also provides students with assistance when completing their college and financial aid applications. Service areas include select schools in Riverside and San Bernardino Counties.

Student Disability Resource Center (SDRC)

1228 Student Services Building
(951) 827-3861
sdrc@ucr.edu; sdrc.ucr.edu

The SDRC is available to provide prospective students with disabilities information about possible accommodations, services, or other concerns related to access and attending UCR. Prospective students are invited to contact SDRC early in their planning to attend UCR. Services may include information and referrals to on- and off-campus resources and academic access support.

TRIO Pre-College Programs

2210B Student Services Building, 2nd Floor
(951) 827-4685, fax (951) 827-4762
trio.ucr.edu

TRIO Pre-College Programs (Educational Talent Search, Upward Bound Classic, Upward Bound Oasis, Upward Bound Rialto/Colton Joint) provide services to income-qualified and/or potential first-generation college-bound high school students in their preparation for college entrance through grants provided by the United States Department of Education. The Pre-College programs partner with select high schools in Riverside and San Bernardino counties to assist participants as they complete high school and successfully enroll in a postsecondary institution. Pre-College participants receive free services including: academic advising, tutoring, information about college admissions, mentoring, summer residential programs, study skill development workshops, college application support, financial aid application support, Financial Literacy workshops, major and career exploration, and cultural and educational field trips.

University Eastside Community Collaborative (UECC)

2210B Student Services Building, 2nd Floor
(951) 827-2514
uecc@ucr.edu; uecc.ucr.edu

The UECC provides an opportunity for undergraduate college students to become engaged in their community as AmeriCorps members and provide tutoring and mentoring in local schools and community centers. UECC members receive a monthly stipend, professional development, and the opportunity to leave a lasting impact on Riverside’s Eastside and University neighborhoods.

UECC members provide tutoring, mentoring, and homework help to lower performing students in literacy and mathematics in grades K-6 while receiving supervisory support from in-classroom teachers. In after-school programs and during summer camps, UECC members are guided by Riverside Parks and Recreation professional staff to engage local students in enrichment activities to support their academic, personal and socio-emotional growth. As an AmeriCorps program, UECC members participate in meaningful community service projects that improve the quality of life for residents of the City of Riverside. Upon completing a year of service, UECC members earn the prestigious Segal AmeriCorps Education Award.
Application for Admission

Serving high school and community college students, their parents, and counselors, Undergraduate Admissions provides information about college preparation and admission of new undergraduate first-year and transfer students. Admission Counselors visit high schools and community colleges to provide individual preadmission advising to students. Staff members are also available by appointment and on a walk-in basis for preadmission advising. The office hosts various events throughout the year which give prospective students and their families the opportunity to visit the campus; meet faculty, staff, and students; and learn more about UCR and its programs and opportunities for undergraduates.

Undergraduate Admissions
3106 Student Services Building
University of California, Riverside
900 University Avenue
Riverside, CA 92521
(951) 827-3411

Prospective Students may contact undergraduate admissions via admissions@ucr.edu/ask.

When to Apply
UCR accepts applications for admission to all undergraduate majors for first-year and transfer students during the priority filing period, October 1–November 30, 2022. Transfer applicants can also apply for Winter 2024 admission, July 1–31, 2023.

How to Apply
Prospective applicants may apply online: admission.universityofcalifornia.edu.

First-Year Student Admission

UCR seeks to recruit and retain an academically strong student body that has demonstrated the rigorous preparation needed for admission to a major research institution and reflects the diversity of our state and region.

This section describes the two-phase undergraduate admission and selection process at UCR:
1. Satisfying the University of California minimum admission requirements
2. Selection by UCR according to the principles of Comprehensive Review, as determined by the UCR faculty

Meeting UC minimum admission requirements will not guarantee admission to UCR. Applicants who seek to increase their likelihood for admission should strive for achievement well beyond UC minimum requirements.

Final determination of admission will be made within the context of campus enrollment goals.

UC Admission Requirements

First-year Students interested in entering the University as first-year need to satisfy the following requirements:

1. Complete a minimum of 15 college-preparatory courses (a-g courses) with at least 11 finished prior to the senior year. The a-g course requirements are shown in the box on this page. More information about the a-g course requirements can be found at admission.universityofcalifornia.edu/admission-requirements/freshman-requirements/subject-requirement-a-g.html. The university will accept only those “a-g” courses that appear on the official UC-Certified Course List for the California high school the student attended. The UC-Certified course list is available at ucp.edu/agguide.

Students who have attended high school outside the state of California will have their high school coursework evaluated in the context of the general A-G requirements noted on this page.

2. Earn a grade point average (GPA) of 3.0 or better (3.4 for non-residents) in these courses with no grade lower than a C.

a. Honors Courses
The university assigns extra points for up to four year-long university-certified honors level, Advanced Placement, and/or UC-designated International Baccalaureate courses taken in grades 10, 11, and 12: A=5 points, B=4 points, C=3 points. College-level courses in the a-g college preparatory courses that are transferable to the university are also assigned honors grade points. A maximum of two year-long courses taken in grade 10 are assigned honors points. Grades of D are not assigned extra honors points. (Extra points will be awarded to 10th graders only when they take honors courses that have been certified by the university as honors-level courses.) Acceptable honors-level courses include Advanced Placement courses, specific Standard Level and all Higher Level International Baccalaureate courses, and college courses that are transferable to the university.

“a-g” Subject Requirement

a. History/Social Science (2 years required)
Two years of history/social science, including one year of U.S. history or one-half year of U.S. history and one-half year of civics or American government; and one year of world history, cultures, and geography.

b. English (4 years required)
Four years of college preparatory English that include frequent and regular writing, and reading of classic and modern literature. Not more than two semesters of ninth-grade English or no more than one year of approved ESL-type courses can be used to meet this requirement.

c. Mathematics (3 years required, 4 years recommended)
Three years of college preparatory mathematics that include the topics covered in elementary and advanced algebra and two- and three-dimensional geometry. Approved integrated math courses may be used to fulfill part or this entire requirement, as may math courses taken in the seventh and eighth grades that the student’s high school accepts as equivalent to its own math courses.

d. Science (2 years required, 3 recommended)
Two years of college-preparatory science, including or integrating topics that provide fundamental knowledge in two of these three subjects: biology, chemistry, or physics. One year of approved interdisciplinary or earth and space sciences coursework can meet one year of the requirement. Computer Science, Engineering, Applied Science courses can be used in area D as an additional science (i.e., third year and beyond).

e. Language Other Than English (2 years required, 3 years recommended)
Two years of the same language other than English. Courses should emphasize speaking and understanding, and include instruction in grammar, vocabulary, reading, composition, and culture. Courses in language other than English taken in the seventh and eighth grade may be used to fulfill part of this requirement if the student’s high school accepts them as equivalent to its own courses.

f. Visual and Performing Arts (1 year required)
A single yearlong approved arts course from a single visual and performing arts discipline: dance, drama or theater, music, or visual art.

g. College Preparatory Electives (1 year required)
One year (two semesters) in addition to those required in “a-f” above, chosen from visual and performing arts (nonintroductory-level courses), history, social science, English, advanced mathematics, laboratory science, and language other than English (a third year in the language used in the “e” requirement or two years of another language).
3. Testing Requirement
For the most up to date information on the exam requirement for students applying for admission to the University of California as freshman, please visit the following website:
https://admission.universityofcalifornia.edu/admission-requirements/freshman-requirements/exam-requirement

2020 Graduation Rates
The following information is provided by UCR’s Institutional Research (ir.ucr.edu). Percentages represent the share of the cohort starting in the indicated fall term that graduated within the specified time. Graduation rates are cumulative and are measured through the final summer of the corresponding year.

6-Year Rate for the 2014 Cohort: 77.3%
4-Year Rate for the 2016 Cohort: 62.4%

UCR Comprehensive Review
Comprehensive Review is the process by which UCR evaluates freshman applicants, who meet minimum UC requirements, using multiple measures of achievement and promise, while considering the context in which each student has demonstrated accomplishment. UCR will calculate an Academic Index Score (AIS) for all UC-eligible freshman applicants. Admission to UCR will be determined within the context of campus enrollment goals. Although no particular AIS will guarantee admission to UCR, prospective students who strive for the highest possible AIS increase their likelihood for admission. For detailed information regarding what factors are included in UCR’s comprehensive review process please visit https://admissions.ucr.edu/freshman#apply.

Paths to Admission for California Residents
For the highest-achieving California applicants, we have two paths to admission. If you are in one of the following groups and you are not admitted to any of the UC campuses you apply to, you may be offered a spot at another campus if space permits.

1. Statewide Path
Students who rank in the top 9 percent of California high school students according to the UC admissions index, which can be found at admission.universityofcalifornia.edu/admission-requirements/freshman-requirements/california-residents, or

2. Local Path (ELC)
Students who rank in the top 9 percent of their graduating class at a participating high school. Students whose high schools participate in the ELC program – which most California high schools do – will be identified to be in the top 9 percent on the basis of GPA in UC-approved coursework completed in the 10th and 11th grades. To be considered for ELC, students must have a minimum GPA of 3.0 and complete the following a-g courses prior to their senior year:

- a. History/Social Science 1 Year
- b. English 2 Years
- c. Mathematics 2 Years
- d. Laboratory science 1 Year
- e. Language other than English 1 Year
- f. College-preparatory elective (chosen from the subjects listed above or another course approved by the university) 4 Years

After students enter their coursework and grades in their applications, the University of California will compare their GPAs to the historic top GPA for their school. Students who meet or exceed that GPA will be identified as ELC and will be designated as such on their application. For more information on this process, go to Local guarantee (ELC).
International Admission
Students may apply electronically during the priority filing periods at admission.universityofcalifornia.edu. Early in the application filing period, students should submit the following to Undergraduate Admissions: official certificates and detailed transcripts of record, including hours and marks, accompanied by English translations; and course syllabi. If you’ve completed all or some high school or secondary school in a country where English was not the language of instruction, you will be required to demonstrate English proficiency if you have had less than 3 years of instruction in English. Ways to demonstrate English proficiency can be found at the following website: https://admission.universityofcalifornia.edu/admission-requirements/freshman-requirements/english-language-proficiency.html.

Transfer Student Admission
The university considers a transfer applicant a student who has graduated from high school and enrolled in a regular session at a college or university immediately following the summer after high school graduation. Students cannot disregard their college record and apply as freshmen.

California Residents must complete the following to meet minimum admission requirements:

1. Complete 60 semester (90 quarter) units of transferable college credit with at least a 2.4 GPA (2.8 for nonresidents). No more than 14 semester (21 quarter) units may be taken Pass/Not Pass.
2. Complete the following seven transferable college courses, earning a grade of C or better in each course:
   a) Two courses in English (1 course in English Composition, 1 course in Critical Thinking);
   b) One course in mathematical concepts and quantitative reasoning;
   c) Four courses chosen from at least two of the following subject areas: arts and humanities, social and behavioral sciences, and physical and biological sciences.

Each course must be worth at least 3 semester (4–5 quarter) units.

Students who satisfy the Intersegmental General Education Transfer Curriculum (IGETC) prior to transferring to UC, may satisfy the seven-course pattern outlined above, depending on the courses taken. For more information, visit assist.org.

Students who were eligible for admission to the university when they graduated from high school — meaning that they satisfied the subject, and scholarship requirements, in addition to campus selection — may be eligible for lower division transfer to non-selecting majors in the College of Humanities, Arts, and Social Sciences; School of Education and School of Public Policy if they have a 2.0 GPA (2.8 GPA for non-residents) in all transferable course work.

Nonresidents of California
The minimum admission requirements for nonresidents are very similar to those for residents. Students who are not California residents should consult with Undergraduate Admissions for details. However, nonresidents must have a GPA of 2.8 or higher in all transferable college course work.

College-Level Examination Program
The UC does not grant credit for scores earned on the College-Level Examination Program (CLEP).

UC Intercampus Transfer
A regular undergraduate student who is registered at any campus of the UC may apply for transfer to another campus of the UC by filing the UC Undergraduate Application for Admission and Scholarships. Fees and procedures are the same for all undergraduates, and there is no special procedure for intercampus transfer.

An undergraduate student in good standing, currently registered at UCR, may apply for intercampus visitor status at another UC campus for one term. Forms and instructions are available at the Office of the Registrar, 2249 Student Services Building.

Student Conduct
Disciplinary suspension or dismissal from a previously attended educational institution is considered in the admission decision.
Credits, Transcripts, and Test Scores
Credit for English-as-a-Second-Language Course Work
Students whose first language is not English may receive up to 12 quarter units of credit for English-as-a-second-language course work. Students may receive workload credit (for financial aid purposes) for courses taken beyond this 12-unit limit but will not receive additional unit credit applicable to the bachelor’s degree.

Credit for Native Language
Students whose first language is not English may receive credit for course work in their native language and literature, provided such courses were completed at the college level in the country of the first language or at the upper-division or graduate level at UCR or another accredited English-speaking institution.

Unit Credit for Courses Taken Elsewhere
The University grants unit credit only for courses consistent with its curriculum that have been completed at other accredited colleges and universities. To be accepted for credit, the courses must be comparable to those offered at the university. Undergraduate Admissions determines the acceptability of courses taken at an institution other than the university. The faculty of the particular school or college in which the student plans to enroll determines the applicability of such course work in satisfaction of degree requirements.

Limitations on Transfer Credits
Students will be granted up to 70 semester/105 quarter units of credit for lower-division coursework completed at any institution or any combination of institutions. For units beyond the maximum, subject credit for appropriate coursework taken in excess of this unit limitation will be granted and may be used to satisfy requirements.

- Units earned through: AP, IB, and/or A-Level examinations are not included in the limitation and do not put applicants at risk of being denied admission.

Units earned at any UC campus (Extension, summer, cross/current and regular academic year enrollment) are not included in the limitation but are added to the maximum transfer credit allowed and may put applicants at risk of being denied admission due to excessive units.

Transcripts and Test Scores
Undergraduate Admissions requires complete, accurate, and up-to-date information about a student’s academic program and work in progress in order to process and respond to the application in a timely manner. The transcript and other documents submitted as part of the application become the property of the university; they cannot be returned or forwarded in any form to another college or university.

First-Year Applicants
Applicants are notified if a preliminary high school transcript is required. If submitting standardized test scores for consideration, applicants are responsible for requesting that testing agencies report to UCR Undergraduate Admissions.

Admitted students must forward an official final high school transcript that shows the date of graduation, final transcript(s) for college work attempted, and official passing scores from Advanced Placement or International Baccalaureate specific Standard Level and all Higher Level examinations. Transcripts are due to the Office of Undergraduate Admission postmarked on or before July 1st. All other required information is due postmarked on or before July 15th.

Transfer Applicants
Applicants are notified if the university requires a preliminary transcript(s). Applicants must request a final transcript from each college they attended. A transcript from the last high school they attended may also be required. Attendance at any other school or college after an application has been filed is considered to be part of the student’s record and must be reported to Undergraduate Admissions. Transcripts are due to the Office of Undergraduate Admission postmarked on or before July 1st. All other required information is due postmarked on or before July 15th.

Selection Criteria — Transfer Applicants
UCR attempts to accommodate as many qualified students from other universities and colleges as possible, particularly as juniors and seniors. In addition to meeting minimum UC eligibility requirements, transfer students will be selected on the basis of academic preparation as assessed by their GPA in all transferrable coursework and completion of required major preparatory coursework where applicable. Applicants with 120 quarter units or more are also subject to screening beyond the minimum requirements for transfer students.

School of Business
Actuarial Science will begin accepting transfers Fall 2025. Business Administration admission is selective based on the GPA in all transferrable coursework with a minimum GPA of 2.7. It is preferred that applicants complete the Intersegmental General Education Transfer Curriculum (IGETC) or all breadth requirements, along with the seven published lower-division business prerequisites (with a minimum GPA of 2.5). Further information may be obtained from The School of Business, 2340 Olmsted Hall, at (951) 827-4551.

Bourns College of Engineering
Students are selected on the basis of academic preparation. Admission is selective based on the GPA in all transferrable coursework with a minimum GPA of 2.8, and completion of required major preparatory coursework. See Admission to Majors under the Marlan and Rosemary Bourns College of Engineering section of this catalog or go to assist.org. For further information call Student Academic Affairs at (951) 827-ENGR (3647).

College of Natural and Agricultural Sciences
Students are selected primarily on the basis of academic preparation, as assessed by their GPA in academic coursework and strength of preparation for the intended major. Admission is selective based on the GPA in all transferrable coursework with a minimum GPA of 2.7 and completion of required major preparatory coursework. Students should visit assist.org for updated and comprehensive major preparation requirements.

College of Humanities, Arts and Social Sciences
Admission is selective based on GPA in all transferrable coursework with a minimum GPA of 2.4. Neuroscience and Psychology applicants must have a minimum GPA of 2.7 in all transferrable college coursework. Psychology applicants must also have a minimum of one UC transferrable mathematics course equivalent to Math 004 or higher. Business Economics and Economics applicants must also have a minimum of one UC transferrable mathematics course equivalent to Math 1A. For further information call Student Academic Affairs at (951) 827-3683.

School of Public Policy
Students are selected primarily on the basis of academic preparation, as assessed by their GPA in academic coursework and strength of preparation for the intended major. Admission is selective based on the GPA in all transferrable coursework with a minimum GPA of 2.4 and completion of required major preparatory coursework. Students should visit assist.org for updated and comprehensive major preparation requirements.

120 Quarter Units or More
Applications from UC-eligible applicants with 120 quarter units or more of transfer credit are reviewed by the Associate Dean of the College for completion of a specified pattern of courses that provides continuity with upper-division courses within the major.
Admission to Special Categories

Undergraduate Admissions does not accept applications for Limited Status or Second Baccalaureate degrees.

Notification of Admission

Fall quarter applicants are notified beginning early March. Winter quarter applicants are notified beginning early September. In some cases, complete transcripts of course work are required before a final decision can be made.

Applicants should monitor the status of their application at My.UCR.edu. The Web site contains valuable information about admission procedures, course enrollment, housing, financial aid, and upcoming events. When offered admission by the university, students are asked to sign and return a Statement of Intent to Register (SIR) accompanied by a nonrefundable deposit of $250. This amount will be applied toward payment of university fees, provided the students register in the quarter to which they are admitted.

Concurrent Enrollment

Taking courses at another college or university, including UCR Extension, while in residence at UCR is called concurrent enrollment. See Finances and Registration for the policy regarding concurrent enrollment for continuing students.

Reapplication

Application for admission is for a specific term. If the student is not eligible for admission, or is admitted and does not register, the university requires a new application and an application fee if the student wants to be admitted to another term. The new application will be considered in light of the admission requirements in effect and the space available on campus at the time of application.

International Baccalaureate

The university grants 8 quarter units credit for each International Baccalaureate (IB) higher level examination on which a student scores 5 or higher. Higher level examinations are considered honors courses. The university does not grant credit for subsidiary level examinations. Some higher level examinations may be considered equivalent to freshman level courses in the subject and may be used to satisfy general education or breadth requirements. The units granted for IB examinations are not counted toward the maximum number of credits required for formal declaration of an undergraduate major or the maximum number of units one may accumulate prior to graduation from the university. Students who enter the university with IB credit do not have to declare a major earlier than other students nor are they required to graduate earlier.

See International Baccalaureate Examination Credit chart on next page.

Note: Certain credit limits apply to Advanced Placement and International Baccalaureate tests offered in similar subject areas. See "Programs and Courses" for subject abbreviations.
The university grants credit for all College Board Advanced Placement Tests for which a student scores 3 or higher. The credit may be subject credit, graduation credit, or credit toward general education or breadth requirements, as determined by each college office.

The units granted for AP tests are not counted toward the maximum number of credits required for formal declaration of an undergraduate major or the maximum number of units a student may accumulate prior to graduation from the university. Students who enter the university with AP credit do not have to declare a major earlier than other students, nor are they required to graduate earlier.

FINANCES AND REGISTRATION

Fees and Expenses

Student expenses depend upon a great many factors that should be considered carefully before planning a budget. Financial help needed — beyond funds that students or their families are able to provide — should be determined well in advance of the entering quarter. Use the charts in this section as guides to planning and visit finaid.ucr.edu for detailed information on costs to attend UCR.

Residency Classification

The University of California (UC) is a public university, and charges different tuition for resident (in-state) and nonresident (out-of-state) students. This means that UC has to decide which level of tuition will be charged for each student. For many students — both resident (in-state) and nonresident (out-of-state) — this is simple. However, for some students with more complex circumstances, this determination may require additional steps.

After you’ve been admitted, UCR determines if you’re a California resident for tuition purposes—that is, whether you qualify for resident or nonresident tuition. The term “California resident for purposes of tuition” is different from other definitions of California residence. For example, a person who is a California resident for tax or voting purposes is not necessarily a resident for purposes of tuition at the UC. The UC has four residency requirements: 1) Physical presence 2) Intent to remain in California 3) Financial independence 4) Immigration status. More information on the UC residency requirements can be found at ucop.edu/residency.

The definition of residency may vary by office. If determined to be a resident by Admissions and/or Financial Aid, it is not a guarantee that you are a resident for tuition purposes. In order to determine your residency for tuition purposes, all new students must complete a Statement of Legal Residence (slr.ucr.edu). This form is completed online after committing to UCR by filing your Statement of Intent to Register (SIR). The Statement of Legal Residence must be completed no later than the resident determination date, or the start of instruction for the student’s first term. Students will be charged nonresident supplemental tuition (NRST) until they are determined to be a resident for tuition purposes or exempt from NRST and should therefore complete their SLR as soon after completing their SIR as possible. Tuition will not be adjusted for forms completed once a term has ended. Residency for tuition purposes is decided by the campus residence deputy. If appealed, the information is reviewed by a UCR Appeals Committee, and UC Office of General Council when necessary. In certain cases, a student is classified as a nonresident, but will not be charged nonresident supplemental tuition.

More information regarding exemptions, waivers, and the UC residency determination process can be found at ucop.edu/residency.

Tuition Administrative Processing Fee

Tuition Administrative Processing Fees are assessed to student who fail to make their tuition payment by the published payment due date and after an additional 5-business day grace period. In certain circumstances, the Tuition Administrative Processing Fees may be waived ONLY for the following reasons: physician verified student health condition, death in the family, or a verified administrative error on the part of the university.

Fee Exemptions

Dependents of Veterans

The California Education Code provides for exemption from certain fees at state-owned colleges, universities, and other schools for eligible students who are dependents or spouses of veterans whose death or disability was service connected. Qualifying UCR students are eligible for exemption from the Student Services Fee, tuition, and Professional Degree Supplemental Tuition. Claims for fee exemptions must be presented to the university during the academic year for which the claim applies. Retroactive approval can be granted only in situations in which students applied for the exemption in a timely manner but approval was delayed by the U.S. Department of Veterans Affairs processing of an original or reopened service-connected disability compensation or Dependence and Indemnity Compensation claim. Contact the Financial Aid Office, 2106 Student Services Building, (951) 827-3878, for information.

Tuition Stability Plan

Beginning fall 2022, tuition will be adjusted for each incoming undergraduate class but will subsequently remain flat until the student graduates, for up to six years. For undergraduates who first enrolled in fall 2021 or earlier—tuition will remain at the fall 2021 rates for up to six years. The plan will be up for reauthorization by the Board of Regents in five years.

Required Student Tuition and Fees

Fall Quarter 2023

For detailed information on fees, visit registrar.ucr.edu/tuition-fees

Note: Students in the MBA, MPP, and MD programs pay Professional Degree Supplemental Tuition. Additional mandatory fees such as the Professional Degree Supplemental Tuition and the Medical School Disability Insurance Fee are assessed to all medical school students. Visit registrar.ucr.edu for more information.

Totals do not include the Technology Course Materials Fee of $5.00 per unit for graduate students and $7.00 per unit for undergraduate students. Some or all instruction for all or part of Academic Year 2023-24 may be delivered remotely. Tuition and mandatory fees have been set regardless of the method of instruction and will not be refunded in the event instruction occurs remotely for any part of the Academic Year.

The amounts shown in this document represent fees as currently approved. However, all University fees are subject to change, and the fee amounts billed for this period may be adjusted at a future date.

*UCSA Fee effective Fall 2022. UCPC Fee effective Fall 2023. ($3.00 Fall • $2.00 Winter • $2.00 Spring)
Exemption from Nonresident Supplemental Tuition
Some students may be eligible for exemption from nonresident supplemental tuition. See the section called Residency for Tuition Purposes on page 49 for more information.

Fee Reductions
Employees
A regular status employee who meets the admission requirements of the university is eligible for a two-thirds reduction of both the Student Services Fee and tuition for up to 9 units or three regular-session university courses per quarter or semester, whichever is greater. An employee so registered is ineligible for the services and facilities of the counseling center, gymnasiums, or the student health services, other than those to which the employee may be otherwise entitled.

Doctoral Students Advanced to Candidacy
Students who are considered nonresidents for tuition purposes and are advanced to candidacy for the Ph.D. receive a reduction of 100% of the nonresident supplemental tuition. Students are eligible for a maximum of three calendar years. Time spent not registered (withdrawn, on leave, or on filing fee status) counts toward the three-year total unless the graduate dean grants an exception. Students must be advanced by the first day of instruction to qualify for that term.

Deferred Payment Plan
The Deferred Payment Plan (DPP) offers students an opportunity to pay their quarterly fees and tuition in three monthly installments. For each quarter of participation, a new application must be submitted through rweb.ucr.edu, with a non-refundable processing fee. Visit sbs.ucr.edu/student-services#payment_options for more information.

Refunds
Students who withdraw from all courses before the end of a quarter may be eligible to receive refunds for some fees. Go to registrar.ucr.edu for more information on the refund schedule. A withdrawal petition must be obtained from myforms.ucr.edu or from the Graduate Division. In accordance with federal regulations, refunds to financial aid recipients are first applied to repayment of aid disbursed.

The effective date for determining a refund of fees is the date the student files an official notice of withdrawal with the university. It is presumed that no university services will be provided to the student after that date.

Beginning the second day of instruction, the Student Services Fee, tuition, UCR campus fees, Professional Degree Supplemental Tuition, and nonresident supplemental tuition are refunded on a prorated basis.

Course Material Fees, Student Technology Fees, and the Single Document Fee are not refundable after the end of the add/drop period.

Refunds for health insurance vary. Consult the Student Health Services, Veitch Student Center, (951) 827-5683.

The Medical School Disability Insurance Fee is not refunded unless the student requests a prorated refund when withdrawing from UCR. Consult the School of Medicine at (951) 827-4333 for information about the refund of insurance benefits after withdrawal.

Self-supporting programs may have different refund policies. To learn more go to registrar.ucr.edu for published refund policies.

For details concerning fees and fee refunds, consult Fees and Enrollment at ucop.edu/operating-budget/.

Refunds for New Students Receiving Federal Financial Aid
Fee refunds for new students receiving Title IV federal financial aid are as follows:

Prior To and Including Day 1
Prior to and including the first day of instruction, the Student Services Fee is refunded except for the $250 Statement of Intent to Register deposit paid by undergraduates. Other eligible fees paid are refunded in full.

Day 2 and After
Beginning the second day of instruction, the Student Services Fee is refunded on a prorated basis except for the $250 Statement of Intent to Register deposit. Refunds of other eligible fees are prorated as shown in the Schedule of Refunds on registrar.ucr.edu.

New students receiving Title IV federal financial aid who withdraw during their first quarter at UCR receive a prorated refund if they withdraw by the end of the sixth week of the quarter.

Refunds for All Other Students
Refunds for all continuing and readmitted students are as follows:

Prior To and Including Day 1
Prior to and including the first day of instruction, eligible fees paid are refunded in full.

Day 2 and After
Beginning the second day of instruction, a prorated refund is given for eligible fees paid. Please see registrar.ucr.edu for details.

If students withdraw during a quarter, federal regulations require UCR to calculate the amount of federal financial aid that has been “earned” for the period they attended. If they withdraw before completing 60 percent of the quarter, a pro rata portion of the aid must be returned to the federal government. Any portion of unearned aid that must be returned to federal aid programs by UCR will be deducted from the amount of the tuition and fee and/or housing refund. If the amount UCR must return to federal aid programs exceeds the amount of the student's institutional refund, the student’s account may be billed. More information regarding the return of Title IV federal aid requirements is available at finaid.ucr.edu.

Distribution Formula for Institutional Refunds
If a Housing or Registration refund is due to a student under UCR's refund policy and the student received financial aid under any aid program other than Federal Work-Study, the refund shall be returned to student assistance programs in the following order: outstanding balances on Federal Direct Unsubsidized Loan, Federal Direct Loan, Federal Direct PLUS Loan, Federal Pell Grant, Federal Supplemental Educational Opportunity Grant, Cal Grant A or B, Middle Class Scholarship, Grant-in-Aid State, other institutional grants or scholarships. The portion of a refund allocated to a program may not exceed the amount a student received from that program.
Financial Support

The Financial Aid Office assists students with meeting educational expenses that cannot be met from personal resources. To obtain financial aid students must file the Free Application for Federal Student Aid (FAFSA) with the Financial Aid Office yearly. FAFSAs are available online beginning mid December for the upcoming academic year at studentaid.gov/h/applying-for-aid/ffas. Undocumented students who meet the California high school attendance and graduation requirements of state law AB540 who are ineligible to file the FAFSA should complete the California Dream Application available online at: dream.csac.ca.gov. See chart for deadlines for financial aid.

Students applying for other grants, loans, and work-study should apply as early as possible. Applications are accepted year-round, with awards to late applicants based on fund availability. Funding cannot be guaranteed to students whose FAFSA or Dream Applications are submitted after March 2.

An analysis of the FAFSA or Dream Application is required to determine the amount that a student’s parents, the student, and/or the student’s spouse can be expected to contribute toward the cost of the student’s education. The university expects the student and parent (if the student is dependent), or spouse (if the student is married), to contribute toward the educational costs to every extent possible. In addition to filing the FAFSA or Dream Application, applicants for financial aid may also be required to submit supporting materials (such as income tax transcripts) that the Financial Aid Office uses to determine each student’s financial need.

</tbody>
</table>

All undergraduate financial aid applicants must also apply for California State Grants (Cal Grant A and/or B) by completing the FAFSA or Dream Application, and GPA Verification Form and submitting them by the March 2 filing deadline. If the California Student Aid Commission determines that a student is ineligible for a Cal Grant A or B award, the grant may be replaced with a Federal Direct Loan in the financial aid package from UCR.

In order to maintain eligibility to receive financial aid, students must re-apply every year, meet all posted deadlines, enroll in sufficient units, not default on any federal loans or owe repayments on any federal grants, clear all holds, and make satisfactory academic progress. More information on eligibility requirements is available on the UCR Financial Aid website at financialaid.ucr.edu/apply/stay-eligible.

International students are expected to have the necessary funds to cover their entire period of study. The Financial Aid Office does not have funds available to offer assistance to international students. Assistance is not available to students on "limited" status or to those enrolled in UCR Extension. An exception is made for students admitted on "limited" status who must take required prerequisite course work for full admission into the Graduate Division. Students who fall into this category must submit documentation from the Graduate Admissions Office confirming that they are taking prerequisite course work for graduate admission.

For information on graduate student support, see Financial Support under Graduate Studies in this catalog.

Grants, Loans, Employment, and Scholarships

Students who receive financial aid may receive funds from one or more of the following sources: grants, loans, employment, and scholarships. These sources are described briefly in the following sections. More detailed information regarding eligibility criteria, fund disbursement rules, and enrollment requirements can be obtained from the Financial Aid Office and on the financial aid website at financialaid.ucr.edu.

Veterans Affairs Benefits

The Financial Aid Office hosts the School Certifying Official, who is the liaison to the U.S. Department of Veterans Affairs (VA) for students who are eligible for VA educational benefits as a result of their own military service or that of a parent or spouse. It’s the student’s responsibility to report to Financial Aid any change in status that may affect benefits. The Certifying Official can be directly contacted at vasco@ucr.edu.

Children and spouses or registered domestic partners of veterans whose death or disability (at any percentage) was service-connected may also be eligible for exemption from most university fees under provisions of the California Educational Code. Application may be made to any California county veterans services office. Claims or fee exemptions should be presented to the university during the academic year for which the claim applies. Retroactive approval can be granted only in situations in which students applied for the exemption in a timely manner but approval was delayed by the VA’s processing of an original or reopened service-connected disability compensation or Dependency and Indemnity Compensation claim; a copy of the initial denial letter from the California Department of Veterans Affairs or county services office is required to document such circumstances.

Grants

The Federal Pell Grant program is federally funded and may provide awards up to a maximum of $7,395 for the academic year. To be eligible, an applicant must be a U.S. citizen or eligible noncitizen, must be enrolled as an undergraduate, and must not have previously received a bachelor’s degree. An exception is available for eligible students enrolled in the teaching credential program in the School of Education. Students apply for the Pell Grant by filing out the 2023-2024 FAFSA.

Federal Supplemental Education Opportunity Grants are federally funded, need-based grants available only to U.S. citizens and eligible noncitizen undergraduate students who have not previously received a bachelor’s degree. The grants range from $100 to $4,000 per year.

The State of California–Cal Grant A and B Program

The Cal Grant A program provides awards ranging from $100 to $13,752 for the academic year. To be eligible, new applicants must be California residents. Awards are based on academic achievement and financial need. The Cal Grant B program provides awards ranging from $100 to $15,408. To be eligible, applicants must be California residents and must demonstrate financial need. The awards are for students from disadvantaged families.

Middle Class Scholarships (MCS) are awarded by the California Student Aid Commission to on-time FAFSA or DREAM Applicants undergraduates and teaching credential students who are California residents or eligible for AB540 nonresident tuition exemptions to students who meet MCS income and asset ceilings. In order to ensure consideration for the MCS award, students must complete a Free Application for Federal Student Aid (FAFSA) or the California Dream Act Application by March 2nd each year. MCS amounts are tiered based on family income and are calculated by the California Student Aid Commission. Final amounts are determined after all Federal, State, Institutional or outside scholarship aid is finalized and may differ from initial estimates based on changes in the student’s cost of attendance, grant and scholarship awards, number of terms enrolled in the award year, enrollment on a less than full time basis, change in residency status, and/or state appropriation amounts. MCS award amounts may be reduced at any time during the academic year if a recipient receives any additional federal, state, institutional or private funding after the MCS has already been awarded.
Loans

Normally, one or more types of loans are included in each combination of aid offered to a student. Borrowers must be aware of their repayment obligations.

Federal Direct Loans are available to both undergraduate and graduate students who are U.S. citizens or eligible noncitizens. The maximum amount that may be borrowed under this program is $33,000 per year for students in their first year of undergraduate study (0–44 quarter units), $4,500 per year for the second year of undergraduate study (45–89 quarter units), and $5,500 per year after reaching junior status (90 or more quarter units), up to an aggregate undergraduate maximum of $23,000. Teaching credential students are limited to the $5,500 annual maximum for fifth year undergraduate students according to federal regulations. Graduate students are not eligible for subsidized loans.

In addition to these amounts, under the Federal Direct Unsubsidized Loan Program dependent students may borrow up to $2,000 per year, and independent students may borrow $5,000 for the first or second year of undergraduate study (0–89 quarter units), or $7,000 for the third or fourth year of undergraduate study (90 or more quarter units), or $7000 for teaching credential study, and $20,500 for graduate study. Interest on a Federal Direct Unsubsidized Loan accrues immediately and must be paid while in school or added back to the principal amount borrowed.

Dependent undergraduate students may borrow an aggregate of $31,000 in combined Federal Direct Subsidized and Unsubsidized Loans, of which no more than $23,000 can be from Subsidized Loans. Independent undergraduate and teaching credential students may borrow an aggregate of $57,500 in combined Federal Direct Subsidized and Unsubsidized loans of which no more than $23,000 can be from Subsidized Loans, and graduate students may borrow a combined aggregate maximum of $13,500, including amounts borrowed as undergraduates.

An origination fee of 1.05% is deducted from your loan before the funds are sent to your school. For loans taken out for the 2023-2024 school year, undergraduate students receive a 5.50% interest rate and graduate students receive a 7.05% interest rate. Interest rates will be set annually for new loans and are subject to change. Minimum monthly repayment of $50 per month begins 6 months after students cease to be enrolled at least half-time. Borrowers can choose a repayment plan based on their financial circumstances with repayment periods ranging from up to 10 years for standard fixed monthly repayment, to up to a period of 12 to 30 years under alternate repayment options. Information on repayment plans is available at https://studentaid.gov/manage-loans/repayment.

Graduate students may borrow Federal Grad PLUS Loans for up to the annual cost of education minus any estimated financial aid received. An origination fee of 4.228% is deducted from the loan prior to disbursement. For Direct PLUS Loans first disburse on or after July 1, 2023, and before July 1, 2024, the interest rate is 6.05%. This is a fixed interest rate for the life of the loan, which begins accrual immediately upon disbursement. The terms, including the six-month grace period, are otherwise the same as for unsubsidized Loans.

Parents may borrow up to the annual cost of education minus any estimated financial aid received by the student from Federal Direct PLUS Loans (Parent Loans), regardless of financial need. A FAFSA application must be submitted for this loan. New parent borrowers awarded the PLUS loan will be instructed to complete a PLUS Loan Request form online, then a separate online loan promissory note. The application approval process includes a standard credit check for all parent borrowers. An origination fee of 4.228% is deducted from the amount of the loan prior to disbursement. For Direct PLUS Loans first disburse on or after July 1, 2023, and before July 1, 2024, the interest rate is 8.05%. This is a fixed interest rate for the life of the loan, which begins accrual immediately upon disbursement. Interest begins accruing on the PLUS loan after the first disbursement. The first payment of principal and interest is due approximately 60 days after the final loan disbursement for the year is made, but may be deferred while the student is enrolled.

UCR Grant awards are offered to undergraduates with the greatest financial need whenever guidelines and funding levels permit.

The USHIP Fee Grants are offered to eligible undergraduate students who meet all financial aid deadlines and financial eligibility requirements to help cover the cost of undergraduate student health insurance fees. Students who elect to waive USHIP Fees are not eligible to receive the USHIP Fee Grant.

UCR Achievement Scholarship, an award offered to incoming first year and transfer recipients must be classified as a Non-Resident student as determined by the University for purposes of assessing tuition charges.

University Loans are offered to eligible undergraduate students by the campus to pay for the annual cost of attendance, less any financial aid received. The University Loan has a 5% fixed interest rate. Repayment begins 9 months after full-time or half-time enrollment ends.

Emergency Student Loan Fund

In addition to the long-term loans from financial aid programs mentioned above, UCR has an emergency student loan fund. This loan, which does not bear interest, is of a short-term nature to cover emergency needs of up to $500. Students may borrow up to three times a year.

Employment

Federal Work-Study is awarded to students with demonstrated financial need. Work-study awards enable students to reduce the amount of loan indebtedness they may incur while attending the university.

Various work opportunities are available through the UCR Career Center, online at careers.ucr.edu, in either on-campus or off-campus jobs at nonprofit and community services agencies.

Scholarships

Scholarship awards are based on a student's academic achievements and, except for honorary scholarships, on need. Scholarships are considered gift assistance.

Most scholarships available through the Financial Aid Office are based on financial need. Other undergraduate scholarships are offered to entering and continuing undergraduates who show evidence of high scholastic attainment. Applicants must meet all priority deadlines for consideration. Non-need based scholarship awards, including Alumni Scholarships, are available to undergraduate students. Financial need is not required

Regents Scholarship, one of the highest honors conferred upon UC students, is awarded on the basis of academic excellence and exceptional promise, without reference to financial need. Students are eligible upon graduation from high school. The appointments run for four years for students entering from high school. Regents Scholars receive an honorarium each year of appointment.

Regents Transfer Scholarship, a renewable award offered to incoming transfer students with a transfer GPA of 3.95 or above who have financial need.

Chancellor’s Scholarship, an award offered to incoming first year undergraduate students with a distinguished high school academic record. The scholarship provides an honorarium applied toward student fees. More information regarding the terms of the scholarship award and the amount of the honorarium are available on the Chancellor’s Scholarship Terms that the recipient accepts on MyUCR when offered this award.

Chancellor’s Performance Awards

Information on Chancellor’s Performance Awards may be obtained from the departments of Art, Creative Writing, Dance, Music, and Theatre, Film and Digital Production.

UCR Achievement Scholarship, an award offered to incoming first year and transfer recipients must be classified as a Non-Resident student as determined by the University for purposes of assessing tuition charges.

The UCR Achievement Scholarship is designated to pay non-resident tuition. Should a recipient receive another source that is specifically for non-resident tuition (i.e. a non-resident tuition waiver or a non-resident scholarship), the UCR Achievement Scholarship will be cancelled. UCR Achievement Scholarship recipients are required to enroll full time in a minimum of 12 units to receive their scholarship disbursement per the eligibility provisions in the terms of their merit scholarship awards which they receive at the time of their initial offer.

DREAM Loans are available to undocumented AB540 undergraduate and graduate students. Applicants must complete a California Dream Application. The amount a student may borrow is determined by the Financial Aid Office based on annual allocations. Interest rates are subject to change annually and are the same as those for the Federal Direct Subsidized Loan program (5.50% for loans disbursed on or after July 1, 2023 for the 2023-2024 academic year).

University Loans are offered to eligible undergraduate students by the campus to pay for the annual cost of attendance, less any financial aid received. The University Loan has a 5% fixed interest rate. Repayment begins 9 months after full-time or half-time enrollment ends.

Emergency Student Loan Fund

In addition to the long-term loans from financial aid programs mentioned above, UCR has an emergency student loan fund. This loan, which does not bear interest, is of a short-term nature to cover emergency needs of up to $500. Students may borrow up to three times a year.

Employment

Federal Work-Study is awarded to students with demonstrated financial need. Work-study awards enable students to reduce the amount of loan indebtedness they may incur while attending the university.

Various work opportunities are available through the UCR Career Center, online at careers.ucr.edu, in either on-campus or off-campus jobs at nonprofit and community services agencies.

Scholarships

Scholarship awards are based on a student's academic achievements and, except for honorary scholarships, on need. Scholarships are considered gift assistance.

Most scholarships available through the Financial Aid Office are based on financial need. Other undergraduate scholarships are offered to entering and continuing undergraduates who show evidence of high scholastic attainment. Applicants must meet all priority deadlines for consideration. Non-need based scholarship awards, including Alumni Scholarships, are available to undergraduate students. Financial need is not required.

Regents Scholarship, one of the highest honors conferred upon UC students, is awarded on the basis of academic excellence and exceptional promise, without reference to financial need. Students are eligible upon graduation from high school. The appointments run for four years for students entering from high school. Regents Scholars receive an honorarium each year of appointment.

Regents Transfer Scholarship, a renewable award offered to incoming transfer students with a transfer GPA of 3.95 or above who have financial need.

Chancellor’s Scholarship, an award offered to incoming first year undergraduate students with a distinguished high school academic record. The scholarship provides an honorarium applied toward student fees. More information regarding the terms of the scholarship award and the amount of the honorarium are available on the Chancellor’s Scholarship Terms that the recipient accepts on MyUCR when offered this award.

Chancellor’s Performance Awards

Information on Chancellor’s Performance Awards may be obtained from the departments of Art, Creative Writing, Dance, Music, and Theatre, Film and Digital Production.

UCR Achievement Scholarship, an award offered to incoming first year and transfer recipients must be classified as a Non-Resident student as determined by the University for purposes of assessing tuition charges.

The UCR Achievement Scholarship is designated to pay non-resident tuition. Should a recipient receive another source that is specifically for non-resident tuition (i.e. a non-resident tuition waiver or a non-resident scholarship), the UCR Achievement Scholarship will be cancelled. UCR Achievement Scholarship recipients are required to enroll full time in a minimum of 12 units to receive their scholarship disbursement per the eligibility provisions in the terms of their merit scholarship awards which they receive at the time of their initial offer.
Most enrollment and payment functions can be performed at rweb.ucr.edu.

Natural and Agricultural Scholarships
Information on scholarships in the natural and agricultural sciences may be obtained from the College of Natural and Agricultural Sciences Student Affairs Office.

Departmental Scholarships
Some scholarships are available through academic departments. For more information, students should contact their department.

Graduate Fellowships and Assistantships
For information on graduate fellowships and assistantships refer to the Graduate Studies section of this catalog or contact the Graduate Division.

Undergraduate Research Grants
As a research university UCR encourages the tradition of student and faculty engagement in research. UCR provides grant support for students to deepen their knowledge and skills in cutting edge research, field work, and other creative activities under the close guidance of a faculty mentor. Student travel for the purpose of presenting research work at a scholarly conference is also supported through these funds. Grants are available on a quarterly basis. All awards support the costs of conducting a project and cannot be used as a student salary or scholarship aid. Student grant proposals may be initiated directly by students after approaching a faculty member for sponsorship or by faculty suggesting projects to undergraduates.

Student grant awards may be available from the student’s department or college, or through the Office of Undergraduate Education. For more information visit ssp.ucr.edu.

Graduate Studies

Part-Time Study

Undergraduates
Part-time study (less than 12 units) is available to undergraduate students who find it difficult to enroll full time because of health problems, family and home responsibilities, or occupational and financial need. Students must submit a Part Time Fee Waiver (registrar.ucr.edu/tuition-fees/waiver) by the published deadline in the Academic Calendar in order to receive the benefit of paying ½ tuition, and 1/3 nonresident supplemental tuition (if applicable) for the requested quarter. The student is still required to pay the full Student Service Fees. Requesting a Part Time Fee Waiver may impact financial aid. All students interested in attending part time should discuss their plans with the Associate Dean of their college who must approved the form, and the Financial Aid Office (if applicable).

Graduates
In some programs, half-time study is possible for graduate students who for reasons of occupation (i.e., full-time employment), unusual family responsibilities, or health reasons are not able to attend full time. A half-time student may not enroll for more than 6 units at any level. Half-time for the Online Masters in Engineering is 5 units and for the Masters in Business Administration it is 8 units. Graduate students who are approved for this program receive a refund of one-half of the tuition, one-half of the nonresident supplemental tuition (if applicable), and one-half of the Professional Degree Supplemental Tuition (if applicable). For further details and an application, contact the Graduate Division.

Concurrent Enrollment Options
UCR credit for any course taken at another college institution (including UCR Extension) while the student is in residence at UCR is called credit from concurrent enrollment. Credit is normally awarded only under unusual circumstances or through the Cross Registration Program described below during the regular academic year and only with prior approval of the associate dean of the UCR college in which the student is enrolled.

UCR Extension students taking regular-session UCR courses through concurrent enrollment may receive grade points as well as unit credit (effective Spring 1999) should they continue in or be subsequently admitted or readmitted to regular UCR student status. A transcript of the work must be submitted to the Office of Undergraduate Admissions.

Courses taken elsewhere during the summer by a UCR student do not require that the student be under extraordinary circumstances, but they do require prior approval to receive UCR credit even if the student is not in residence at UCR during that summer.

Regular Summer Sessions courses taken at UCR are credited automatically to the UCR academic record of any student enrolled in the regular academic year.

Cross Enrollment

Senate Bill 1914 (Killea)
The California Education Code Sections 66750 through 66756, commonly referred to as Senate Bill 1914 (Killea), permits undergraduate students enrolled in any campus of the California Community Colleges, the California State University, or the UC to enroll without formal admission in a maximum of one course per academic term at a campus of either of the other systems on a space-available basis at the discretion of the appropriate campus authorities on both campuses. At UC campuses, the beginning of the third week of instruction has been designated as the date by which an instructor can determine when space is available to accommodate a student seeking to enroll on this basis. (Normally, instructors in all segments permit students to attend classes until their final course registration has been certified.) Killea does not allow enrollment at another campus within the same system. Students who seek to cross enroll under this program must have met all of the following requirements:

1. Completed at least one term at their home campus as a matriculated student
2. Enrolled for a minimum of six units at their home campus for the current term
3. Earned a cumulative grade point average of 2.00
4. Paid appropriate fees and any applicable tuition at their home campus for the current term
5. Completed appropriate academic preparation for the desired course, as determined by the host campus, consistent with the standards applied to regularly enrolled students
6. Have been classified as a California resident by their home campus
Both schools must be participating in this program before a student can take a course at another institution for the $46 per unit cross enrollment fee. Additional information and cross enrollment application forms are available at the Office of the Registrar.

**CSUSB Cross Registration Program**
The Cross Registration Program allows a full-time UCR undergraduate student who has officially declared a major and who is in good academic standing to enroll simultaneously at California State University, San Bernardino for no more than one course per quarter. The program is designed for students to take classes not available at UCR. (This program is not available during Summer Session.) Approvals are required from the student’s academic advisor, college dean, and the Registrar. Application forms and deadline information may be obtained from the Office of the Registrar.

**Simultaneous Enrollment and UC Online Enrollment**
Simultaneous Enrollment is similar to the Intercampus Visitor Program, but participants are enrolled in at least six units at UCR while simultaneously taking additional classes at another UC campus. UC Online Enrollment allows participants to simultaneously take online courses offered by another UC campus. Participants of either program don’t have to be formally admitted nor pay additional tuition/fees; however other fees may apply depending on the course. For additional information and an application for Simultaneous Enrollment, please visit the Registrar’s website ([registrar.ucr.edu](http://registrar.ucr.edu)). For additional information and to initiate enrollment for UC Online Enrollment course opportunities please go to [https://uconline.edu/](https://uconline.edu/).

**Eligibility requirements for both programs include:**

- Has completed a minimum of 12 units as a matriculated student at UCR (home campus).
- Is enrolled for a minimum of 6 units for the current term at UCR (home campus)
- Is in good standing.
- Has the appropriate academic preparation as determined by the host campus.
- Must have fees paid by Fee Payment deadline

**Intercampus Visitor Program**
The Intercampus Visitor Program enables qualified undergraduates at the UC to take advantage of educational opportunities at other UC campuses. Under this program, students may take courses that are not available on their home campus, participate in special programs, or study with a distinguished faculty member at another campus. Participants may enroll at another campus for only one term. Additional information on requirements and application forms can be obtained at the Registrar’s website ([registrar.ucr.edu](http://registrar.ucr.edu)). Intercampus visitors must apply for financial aid at their host campus and must be making satisfactory academic progress on their home campus to be eligible to be awarded.

**Withdrawals and Leaves of Absence**
Undergraduate students who wish to withdraw from all courses in the university during a current quarter, officially and without scholarship penalty, must initiate an application for withdrawal through myforms.ucr.edu. The student must settle all accounts and return any university property such as books, keys, laboratory equipment, and uniforms. After the first few weeks of the quarter, such petitions are granted only under exceptional circumstances.

Students who withdraw are no longer considered continuing students. Students wishing to return to the university must apply for readmission by the published deadlines. Visit registrar.ucr.edu for deadline information.

Students who do not officially withdraw from the university may receive grades of “F” in all courses in which they are enrolled. Further, the Financial Aid Office is required to notify the Department of Veterans Affairs when any student fails, receives no credit, or withdraws from all registered courses.

The **Planned Educational Leave Program (PELP)** is for undergraduate students who want to interrupt their regular education for one year or less while clarifying educational goals, gaining practical experience away from campus, or enhancing the prospect of successful completion of an academic program. Students must have completed at least one quarter of course work at UCR and be in good academic standing to qualify. Students holding F-1/J-1 visas must consult with an International Student Advisor before participating in this program. Information on PELP is available from the dean of the student’s college, UCR Counseling and Psychological Services, and the Office of the Registrar.

**Planned Opportunities Abroad Agreement (POAA)** permits UCR students to Education Abroad on a non-UC program through the Opportunity Abroad Program (OAP) and return to UCR without having to file for readmission. Courses completed are subject to review for transferability. POAA advising and applications are available at the Education Abroad Programs, Skye Hall, Room 321. ([international.ucr.edu/abroad](http://international.ucr.edu/abroad)).

**Readmission**
Undergraduate students who wish to return to UCR must file an application for readmission with their college Student Academic Affairs Office if they have withdrawn or if they have been away for more than 3 consecutive terms, not counting summer session. Visit registrar.ucr.edu for deadline information. Nonrefundable application fee of $70 is charged. Approval of the dean of the student’s college is required for readmission. Students dismissed or not in good standing may be required to meet with the appropriate dean. Readmission of students disqualified for disciplinary purposes is subject to approval of the Dean of Students.

Transcripts from other institutions (including University Extension) attended during a student’s absence must be filed with the Undergraduate Admissions Office at least six weeks prior to the quarter of readmission.

Graduate students desiring readmission or termination of leaves of absence should contact the Graduate Division.

**Student Records and Transcripts**
The Office of the Registrar prepares and permanently retains records of students’ academic work at UCR for regular sessions and summer sessions. It maintains separate academic records for undergraduate, medical, and graduate levels, but sends all levels taken at UCR as one transcript. The academic record chronologically lists courses, units, grades, cumulative GPA, transfer credits, and total units. Students may order copies of their transcript through rweb.ucr.edu. The online order includes the student’s authorization of the release of the academic record. Rush service for the transcript is available for $10 and pick-up service is available for $20. Express mail service is available for an additional fee based on current Federal Express rates. For pricing and service options, please see registrar.ucr.edu. Payment, if applicable, is due in advance for all official transcripts.

Students are strongly advised to check their academic records carefully and to bring any discrepancies to the attention of the Office of the Registrar immediately. Supporting enrollment documents are retained for no more than one year. After one year, it is assumed that students accept the accuracy of their academic records. Once a degree has been posted, changes to a student’s academic record are allowed only to correct an administrative error.

**Degree Conferral**
The culmination of the student's academic career is the conferral of degree on the official transcript. The graduation process is multi-step starting with the student applying to graduate at rweb.ucr.edu by the published deadline. Students must ensure all transfer work transcripts are submitted prior to the published deadline or the graduation application will be deferred to a future quarter. It is not recommended for students to study abroad in their final quarter, as receipt of grades may delay their conferral date to a future quarter. Student academic records are reviewed and approved by the academic college or school and the Registrar’s Office. Degrees are traditionally conferred approximately 5 weeks after the end of the term. Diplomas are mailed directly to students who do not have a hold preventing its release. Details and deadlines can be found at registrar.ucr.edu.
Disclosure of Student Records
Pursuant to UCR’s Policies Applying to the Disclosure of Information from Student Records – Local Procedure document, this is the annual notification of the Family Educational Rights and Privacy Act (FERPA). The UCR FERPA policy is located on the Office of the Registrar website. FERPA affords eligible students certain rights with respect to their education records. (An “eligible student” under FERPA is a student who is 18 years of age or older or who attends a postsecondary institution at any age.) These rights include:

1. The right to inspect and review the student’s education records within 45 days after the day the Registrar’s Office at UCR, receives a request for access.

2. The right to request the amendment of the student’s education records that the student believes is inaccurate, misleading, or otherwise in violation of the student’s privacy rights under FERPA.
   A student who wishes to ask UCR to amend a record should write the Registrar, clearly identify the part of the record the student wants changed, and specify why it should be changed.

3. The right to provide written consent before UCR discloses personally identifiable information (PII) from the student’s education records, except to the extent that FERPA authorizes disclosure without consent.
   Students provide access to their record in one of three ways:
   1. Customizing Directory Information through R’Web Self-Service
   2. Set up Authorized Users through R’Web Self-Service
   3. Use of Department-Specific Release Forms

UCR discloses education records without a student’s prior written consent under the FERPA exception for disclosure to school officials with legitimate educational interests. UCR defines “legitimate educational interest” as information relevant and necessary for a campus official to perform any of the following tasks:

1. An employment responsibility or an assigned subject matter for the inquirer
2. Participation in the student’s education
3. The discipline of a student
4. Providing a service or benefit related to a student or student’s family (such as health care, counseling, job placement, or financial aid)

Upon request, the school also discloses education records without consent to officials of another school in which a student seeks or intends to enroll. Disclosure of Information from Student Records (130.720) within UCOP’s Policies Applying to Campus Activities, Organizations and Students (PACAOS) provides further documentation on permissible disclosures without student consent.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the UCR to comply with the requirements of FERPA. The name and address of the office that administers FERPA is:
   Family Policy Compliance Office
   U.S. Department of Education
   400 Maryland Avenue, SW
   Washington, DC 20202

Students are encouraged to follow the UCR informal and formal grievance process by notifying the FERPA officer/Registrar with concerns of inappropriate disclosures.

The University of California, Riverside considers the following to be public information with respect to individual students: – Directory information includes: Student Name, Date of Birth, Place of Birth, E-mail address, Telephone Numbers, Field of Study (including major, minor, concentration, specialization, and similar designations), Dates of Attendance, Grade Level, Enrollment Status (e.g., full time or part time), Number of Units in which Enrolled, Degrees and Honors Received, Previous Educational Institution Attended, and Participation in Officially Recognized Activities, including, but not limited to, Intercollegiate Athletics; the name, weight, and height of participants in Intercollegiate UCR athletic teams.

Residency for Tuition Purposes
Residency Requirements and Classifications
A classification as resident, nonresident, or nonresident supplemental tuition exempt (NRST) are dependent upon the student’s circumstances.

All students are presumed to be dependent student which requires that parents must also satisfy all applicable residency requirements, until the student has been determined to qualify as an independent student as set forth below.

Resident Classification
To receive resident classification for UC tuition purposes, the student must be in an eligible immigration status, established a primary and permanent domicile in California for at least one year and one day prior to the residency determination date (RDD), fulfilled the physical presence and intent requirements, or, demonstrate eligibility for a Special Circumstances Resident Classification.

NRST Exempt Classification
To receive an NRST Exemption classification, a student must be eligible for, and have fulfilled all applicable requirements for the NRST Exempt classification. As NRST Exempt, the student is considered a nonresident, but exempt from the assessment of nonresident supplemental tuition.

Nonresident Classification
Nonresident classification is determined for students who do not meet the requirements as a California resident, NRST Exempt, or Special Circumstances Resident classification based on the student’s circumstances.

International Student (F-1/J-1) Visa Holders
International students holding F-1 or J-1 visas are subject to nonresident tuition and are unable to gain California residency.

Principles Governing Residency Determinations
The Regents of the University of California confers the benefit of “resident tuition” to Students who have fulfilled the Residency Requirements established by Regents Policy 3105 as set forth in the UC Residence Policy and Guidelines (“RPG”) herein.

Residency for purposes of UC tuition is specific to the University of California and separate from the California Community Colleges and California State University systems and may be different from residency for purposes of UC admission and other state rules or regulations governing residency for other purposes.

New Incoming and Transfer Students (includes UC Campus Transfers)
will have their residency evaluated and may be asked to submit a Statement of Legal Residence (SLR) before initial enrollment at a UC campus. The Residence Deputy evaluates the SLR and supporting documentation and will determine a residency classification of resident, NRST Exempt, or nonresident. Failure to submit the SLR and all requested documentation by the published deadline will result in a residency classification based on the information provided to-date, which will often result in an undetermined status, resulting in nonresident tuition. All residency determinations, including nonresident are final.

Returning Students: Students returning after a leave of 3 or more terms must submit an SLR as determined per campus policy. A Student who fails to submit an SLR by the relevant deadline will not be entitled to retroactive reimbursement of NRST assessments.

Change in Residency Status: A student who has received a resident or NRST Exempt classification is required to notify the campus Residency Deputy within 30 days if they are no longer eligible as a resident or NRST Exempt classified student due to a change in student and/or parent circumstances (when applicable). The updated classification will become effective with the next academic term. Failure to notify the campus within 30 days may result in retroactive assessment of NRST.

Petition for Reclassification: A student who received nonresident classification will retain that status until the student files a Petition for Reclassification by the published deadline after meeting the requirements as either a California resident or NRST Exempt classification. A student who fails to file the petition is not entitled to retroactive reimbursement of NRST charges.
Inquiries regarding UC residency for purposes of tuition should be directed to a campus Residence Deputy in the campus Registrar’s Office or to a Residency Analyst in the Office of the General Counsel of The Regents of the University of California, Office of the President. No other office, entity, or individual is authorized to provide residency information on behalf of the University of California.

**Penalty of Perjury**

All statements and documents submitted to the University of California to support a residency classification for purposes of UC tuition are submitted under penalty of perjury under the laws of the State of California. The student, parents, or qualifying individual when applicable, are required to declare under oath, declaration or affidavit, that all statements and supporting documents are true and correct. Where a residency classification is found to be obtained based on concealed facts or untruthful statements, the University may:

- Bill the student for all tuition, NRST, and fees that would have been charged;
- Hold a student’s registration until full payment of amount due is received;
- Hold diplomas until full payment of amount due is received;
- Notify appropriate regulatory agencies;
- Initiate discipline under Policy on Student Conduct and Discipline (“PACAOS 100”); and
- Pursue civil, criminal, or other remedies that may be appropriate.

The SLR must be signed, handwritten or electronically, by the student under penalty of perjury. A student must sign the SLR even if the student has yet to reach the age of majority; pursuant to State of California law, a minor may be prosecuted for perjury.

**Compliance and Delegation**

The UC Residence Policy and Guidelines (“RPG”) is established by The Regents under Regents Policy 3105, approved May 24, 2018, effective with the 2019-20 Academic Year. The President, or designee, in consultation with the General Counsel, or designee, is authorized to adopt and amend implementing guidelines consistent with Regents Policy 3105. Accordingly, Students should review the RPG prior to applying for a residency classification to ensure compliance with the most recent requirements for the relevant academic term.

**No Right of Action**

This policy is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the University of California or its Board of Regents, individual Regents, officers, employee, or agents.

**Appeals**

Requirements to appeal a nonresident classification

The UC Office of General Counsel processes appeal applications for all UC campuses. A student may only appeal a campus nonresident classification if one or more of the following circumstances applies:

- The nonresident classification decision was based on an error made by UC, including (a) a significant error of fact, or (b) a significant procedural error, or (c) an incorrect application of policy,

  OR

- The student received significant new information that (a) became available after the issue date of the campus nonresident classification, and (b) despite the exercise of reasonable diligence, the information was not previously known by or available to the student, which, if corrected, the nonresident classification is incorrect. Failure to respond to the campus or to provide requested information by the campus deadline is not a basis for appeal.
Academic Policies

Catalog Rights Policy for Undergraduate Degrees

Students who enter UCR as freshmen normally follow the catalog in effect in their first year of studies. Transfer students who have completed appropriate transfer programs have prior catalog rights. Check with the college dean’s office for more information.

Academic Senate Regulation R6.12 states as follows: To be awarded the bachelor’s degree, a student must either (a) meet graduation requirements in the UCR catalog in effect in the year of their graduation from the Riverside campus; or (b) fulfill graduation requirements in one UCR catalog applicable during any of the previous four years in which the student successfully completed at least one quarter or one semester of full-time college-level work, regardless of where matriculated. Upon applying for candidacy, the student must specify the applicable catalog.

At UCR, courses are assigned a unit value determined by the number of hours of work per week required of the student. Specifically, Academic Senate regulations require three hours of work per week for each unit of credit. For example, in a 4-unit course scheduled to meet four hours per week, a student is expected to spend eight hours of preparation outside of class.

Grades in courses are assigned as follows:

- **Passing** “A” (distinction), “B” (high pass), “C” (pass), “D” (marginal pass). Grade point values per unit are as follows: “A”=4, “B”=3, “C”=2, “D”=1. The grades “A,” “B,” “C,” and “D” may be modified by plus (+) or minus (-) suffixes. Minus grades carry three-tenths grade point less per unit, and plus grades (excluding “A+”) carry three-tenths grade point more per unit than unsuffixed grades.

- **Not passing** “F” (failure). No grade point value.

Grade Delay “GD.” Assigned temporarily when grade posting is delayed for administrative reasons. Students who see “GD” on their grade report or transcript should contact their instructor for clarification.

Incomplete “I.” Units are not charged and grade points are not assigned.

Withdrawal “W.” Course dropped after the end of the add/drop period. Units are not earned and grade points are not assigned.

The grade point average (GPA) is determined by multiplying each grade point value by the number of units assigned to the course, adding up these grade point units, and dividing the total grade point units by the total number of units for which letter grades are received.

Satisfactory/No Credit Grades

A student in good standing may undertake courses on a Satisfactory/No Credit (S/NC) basis subject to the following limitations: the grade “S” is awarded for work satisfactory for unit credit in meeting degree requirements. For undergraduates, the requirement is a “C” average (2.00); for graduate students, it is a “B” average (3.00). Units are assigned for courses graded “S,” but “S” has no grade point equivalent and does not enter the GPA. Neither units nor grade points are assigned for an “NC” grade; the grade is recorded on the transcript but does not enter the GPA.

Some graduate and undergraduate courses may, in accordance with regulations, be designated for grading on an S/NC basis at the discretion of the dean of the school or college in which the student is enrolled. Courses in the X or XR300, X400, or 300 series (UCR Extension coursework) are not subject to the one-third limitation on courses graded “S.” For additional limitations on 300 and 400 series courses, see individual college sections in the Undergraduate Studies section of this catalog.

An undergraduate student may elect “S/NC” or delete “S/NC” from a course by filing an Enrollment Adjustment Form through myforms.ucr.edu. The deadline is the end of the eighth week of instruction and is listed each quarter at registrar.ucr.edu (click on Academic Calendar). Graduate students should refer to the Graduate Studies section of the catalog for S/NC policy and procedures.

Incomplete Grades

The grade “I” (incomplete) is a provisional grade which denotes that a student’s work was of passing quality but incomplete for good cause. Incomplete units are attempted, but not earned. The grade of “I” may be replaced if the work is completed as specified by the instructor prior to the end of the following quarter. When a course graded “I” has not been successfully completed after one additional quarter or by the time the student is ready to graduate (whichever is less), it will be replaced by a grade of “F” or by “NC” (if the course were taken on an S/NC basis). The appropriate dean may extend the time for successful completion when he or she considers that circumstances warrant it, provided the request is received before the grade “I” is changed to “F” or “NC.”

In Progress Grades

For certain courses extending over more than one term, where, by consent of the Academic Senate, evaluation of the student’s performance may be deferred until the end of the final term, provisional grades of “IP” (in progress) are assigned in the intervening terms.

Neither units nor grade points are assigned for “IP” grades. The provisional grades are replaced by the final grade if the student completes the full sequence. In the event that the full sequence is not completed, the grade “IP” is replaced by the grade “I,” and further changes in the student’s record are subject to regulations governing the grade “I.”

Workload Credit

Workload credit is granted for UCR preparatory courses required for regular university work. Workload credit does not carry units for graduation, but does count as part of the academic course load for determining enrollment status. Workload credit will not be calculated in the GPA. Grades assigned for workload credit have a leading “W” before the official grade.

Repetition of Courses

Repetition of courses not authorized to be taken more than once for credit is subject to the following conditions: generally, a student may repeat only courses in which a grade of “D,” “F,” or “NC” was received. Courses that would place the student above the 16 unit maximum will not be included and will not be split.

In some circumstances, students may repeat a “C-” to satisfy an academic requirement. For example, in courses taken to meet the Entry Level Writing Requirement, such as ENGL 004 and ENGL 005; students must earn a grade of “C” or higher to satisfy the requirement, so students who receive a grade of “C-” may repeat the course.
Degree credit for a course will be given only once, but the grade assigned at each enrollment shall be permanently recorded. In computing GPA of an undergraduate who repeats courses in which the student received a "D" or an "F," only the most recently earned grades and grade points shall be used for the first 16 units repeated. In the case of further repetitions, the GPA shall be based on all grades assigned and the total units attempted. Courses in which a grade of "D" or "F" has been earned may not be repeated on an S/NC basis. Repetition of a course more than once requires approval by the appropriate dean in all instances.

The Department of Veterans Affairs will not consider toward full time those units which are a repeat of courses in which a grade of "D-" has been received, unless a higher grade in the course is specifically required for graduation. Contact the Financial Aid Office, (951) 827-3878, for additional details.

**Change of Grade**

All grades except "I" and "IP" become final when they are assigned. No term grade may be revised by reexamination. No change of grade may be made on the basis of reassessment of the quality of a student's work. However, at the discretion of the instructor in charge of a course, reexamination and reassessment of work may be allowable under the terms of the Sanctioning Guidelines of the UCR Academic Integrity Policy. See Academic Integrity later in this section. An instructor may submit an approved grade change to the Office of the Registrar at any time until the degree is conferred, when clerical or procedural errors have been made while assigning, transmitting, or recording of the original grade.

**Procedures for the Appeal of Grades**

The Regulations of the Riverside Division of the Academic Senate state that if a student believes that nonacademic criteria have been used in determining a grade, the student shall attempt to resolve the grievance with the instructor of the course through written appeal to the instructor via the chair of the department. If the grievance is not resolved to the student's satisfaction at the departmental level, the student may file a complaint with the dean of the college or school having jurisdiction over the course or with the dean of the Graduate Division if the student is in graduate status. The complaint should be filed immediately after the alleged use of nonacademic criteria but no later than six weeks after the beginning of the subsequent quarter. Nonacademic criteria are criteria not directly reflective of class performance, such as discrimination on political grounds or for reasons of race, religion, sex, or ethnic origin or for other arbitrary or personal reasons.

**Expected Progress for Undergraduate Students**

**Expected Progress**

A full-time undergraduate student is considered to be making Expected Progress toward a baccalaureate degree if he or she:

1. passes at least 45 units each academic year,
2. declares a major by the time the student earns 90 units, and
3. follows a program of study consistent with the requirements of the student's declared major or undeclared student's College or School.

**Continued Registration**

A full-time undergraduate student is considered ineligible for Continued Registration if he or she:

1. does not pass at least 37 units in each academic year, or
2. does not complete the Expected Progress requirements as stated above.

**Failure to Meet Criteria for Continued Registration**

Registration of a full-time undergraduate student who is ineligible for Continued Registration under any of the criteria described above shall be at the discretion of the faculty in the student's College or School or Associate Dean for Student Academic Affairs in each College or School.

**Units Passed**

For purposes of determining eligibility for Continued Registration, in addition to units earned by passing regularly enrolled courses, the following defines what shall be counted as units passed.

1. Workload only, non-credit courses with passing grades shall be counted as units passed.
2. If a student receives a grade of "D" in a course and then repeats and passes the course, the units from each enrollment shall be counted as units passed during the quarter the course was taken, provided the student has not accumulated more than a total of 16 repeated units.
3. Units earned during a summer session, either at UCR or another accredited school and transferred to UCR, shall be counted as units passed during the academic year immediately preceding the summer session.
4. Units passed by examination shall be counted as units passed during the quarter in which the examination was taken.
5. Units graded IP (In Progress) shall be counted as units passed.
6. Units graded I (Incomplete) are not counted as units passed. When the grade of I is replaced by a passing grade, the units shall be counted toward Expected Progress for the quarter in which the I grade was awarded.

**Units of Courses Taken at Other Institutions**

A student is prohibited from obtaining transfer units for courses taken at a non-University of California campus in a quarter during which the student is enrolled as a full-time student at UCR. Summer session course work is exempt from this restriction.

1. To request an exception, a petition must be submitted to and approved by the appropriate College or School committee or administrative officer prior to the quarter of concurrent enrollment.
2. In those instances where approval has been granted, units earned from courses taken at a non-University of California campus shall be counted toward the Expected Progress in the quarter(s) in which the concurrent enrollment occurred.

**Posthumous Awards**

The University of California, Riverside seeks to extend sympathy and compassion to the families of students who pass away near the completion of their degrees and to recognize the academic achievement of students who would have fulfilled the requirements of the degree. These actions must also be balanced with attention to academic and institutional integrity. For more information on identifying and considering candidates for the award of posthumous undergraduate degree, please contact the Office of Student Affairs in the appropriate college. For posthumous graduate degrees, contact the Graduate Division.

**Final Examinations**

The instructor in charge of an undergraduate course shall be responsible for assigning the final grade in the course. The final grade shall reflect the student's achievement in the course and shall be based upon adequate evaluation of that achievement. The instructor's methods of evaluation must be clearly announced during the progress of the course. Evaluation methods must be of reasonable duration and difficulty and in accord with applicable departmental policies. The methods may include a final written examination, a term paper, a final oral examination, a take-home examination, or other evaluation device. If a final written examination is given, it shall not exceed three hours in duration and shall be given only at the time and place announced at registrar.ucr.edu. No student shall be excused from assigned final examinations.

**Backdating Units**

UCR graduate students may use, with the approval of their Graduate Advisor, any relevant 200-level course(s) taken during a UCR bachelor's program toward a graduate degree at UCR, excluding any 200-level course(s) approved to count for bachelor's degree, unit, or GPA requirements. Alternatively, the Graduate Advisor may approve waiving degree requirements based on 200-level courses taken as a UCR undergraduate and require the student to complete minimum unit requirements while enrolled in a graduate program.

**Credit by Examination**

Credit by examination may be earned in accordance with regulations established by each college. The student should consult the Undergraduate Studies section of this catalog for specific regulations.

A UCR student in residence may take examinations for degree credit in courses offered on the campus without formally enrolling in them. The results of the examinations are entered upon the student's record.
Students interested in obtaining undergraduate credit for graduate courses should contact the office of the dean of their college for further information.

Undergraduate classification is determined by the number of quarter units earned. Postbaccalaureate and graduate classifications are based on the student's academic objective and whether or not the student is advanced to candidacy for a doctorate.

Scholarship Regulations

Academic Standing
To remain in good academic standing, a student must maintain a GPA of at least 2.00 and make progress toward the degree at a satisfactory rate.

Academic Probation
Students are placed on academic probation if, at the end of any term, their GPA for the term is less than 2.00 or their cumulative GPA, computed on the total of all courses undertaken in the university, is less than 2.00 ("C" average).

Academic Disqualification
Students are subject to disqualification from further registration in the university a) if, at the end of any term, their GPA for that term is less than 1.50 or b) if, after two terms on academic probation, their cumulative GPA, computed on the total of all courses undertaken in the university, is less than 2.00 ("C" average).

Students who are subject to the provisions of this regulation are also subject to such supervision as the faculty of their college may determine. The faculty may disqualify a student under its supervision from further registration in the university or, by suspending the provisions of this regulation, permit a student subject to disqualification to remain in the university.

Undergraduate students who are disqualified are excluded from the university, and their connection with the university is presumed to be ended by such exclusion. Under certain circumstances, disqualified students may be readmitted if approved after submitting a petition to their college and after meeting with their dean. Ordinarily, students are not readmitted until after the lapse of a year and unless their deficiencies are repairable within a reasonable period of time. During the period of disqualification, a student must give evidence of conduct which indicates that improved academic performance can be expected upon readmission. If readmitted, students must remove their deficiencies through above-average work undertaken in the university. It is usually required that all deficiencies be removed during the first year after readmission.

To transfer from one campus of the university to another, or from one college to another on the same campus, students who have been disqualified or who are on probation must obtain the approval of the appropriate dean to whose jurisdiction transfer is sought. Upon completion of the transfer, the students are subject to such supervision as the faculty of their college may determine.

Title 38 Beneficiaries
To maintain eligibility for Department of Veteran Affairs programs, Title 38 beneficiaries must maintain a GPA of at least 2.00 and make progress toward the degree at a satisfactory rate.

All received grades and statuses of no credit "NC", withdrawal, unauthorized withdrawal, probation, and disqualification will be reported to the VA. If a student does not have earned credit towards their Academic Requirements, the student must notify the VA Certifying Official in writing within 10 days by submitting their last date of attendance. This date will be verified in accordance with VA regulations and may result in the retroactive loss of benefits.

Incomplete grades must be resolved within the next quarter of enrollment. If grades remain incomplete after the next quarter of enrollment, this will be reported as a "NC" to the VA. Student will be responsible to pay any retroactive losses as the result of this reporting.

Final quarter grades that result in either a term or a cumulative GPA of less than 2.00 will cause an undergraduate student to be placed on academic probation. If a student is on probation for 2 consecutive quarters, they are not eligible for certification of VA education benefits.

Certification for VA benefits will resume when the student is no longer on VA academic probation. Questions should be directed to the Financial Aid Office at finaid@ucr.edu, or you can find additional resources at https://studentdocs.ucr.edu/financial-aid/uc-riverside_financial-aid_veterans-brochure.pdf.

UCR will not prevent enrollment, assess late registration fees, require alternate or additional funding, or deny access to campus resources available for students using VA Education Chapter 33 (Post-9/11 GI Bill®) or Chapter 31 (Vocational Rehabilitation) benefits while payment is pending from the VA (up to 90 days). To qualify, provide a Certificate of Eligibility or an eBenefits GI Bill Statement of Benefits and all required VA forms needed to certify enrollment by the first day of class. For more information please see the Veterans Benefits and Transition Act of 2018, section 103.

Programs for Outstanding Students
Departments of the colleges offer and administer various courses and honors programs for specially prepared, outstanding students. In some departments, equivalent special studies and seminar programs have been designed for students with special aptitudes. Interested students should consult their faculty advisors early for details of the program in their major department.

Honors

Dean's Honor List
Undergraduates who successfully complete a quarter with a minimum of 12 units with letter grades (B or higher), and have a term GPA of 3.50 or higher is placed on the Dean's Honor List. Student may not have any grades of "W", "NC", or "I" for that quarter to qualify.

Chancellor's Honor List
Students who are placed on the dean’s honor list for all three quarters in a single academic year (fall, winter, and spring) are placed on the Chancellor’s Honor List for that academic year.

Graduation with Honors
The Academic Senate has established the following standards for award of honors at graduation: No more than the top 2 percent (by GPA) in the June graduating class shall receive highest honors. No more than the next 4 percent of graduating students shall receive high honors, and no more than the next 10 percent shall receive honors. To be eligible for honors at graduation, a student must have completed 60 or more quarter units of graded courses at the UC. The GPAs used to determine class rank shall be based on courses taken at the UC.

Students may obtain a statement of the specific requirements for graduation with honors from the office of the dean of their college.

University Honors Program
For a description of the University Honors Program, see Educational Opportunities in the front of this catalog. For a listing of requirements and courses, refer to University Honors Program in the Programs and Courses section of this catalog.
Academic Integrity

Academic Integrity for Students at the University of California, Riverside.

Policy
University Of California Policies Applying to Campus Activities, Organizations, and Students, section 100.00 Policy on Student Conduct and Discipline states that "Chancellors may impose discipline for the commission or attempted commission (including aiding or abetting in the commission or attempted commission) of the following types of violations by students:

102.1 All forms of academic misconduct including but not limited to cheating, fabrication, plagiarism, or facilitating academic dishonesty.
102.2 Other forms of dishonesty including but not limited to fabricating information, furnishing false information, or reporting a false emergency to the University."

Principles of Academic Integrity
At the University of California, Riverside (UCR) honesty and integrity are fundamental values that guide and inform us as individuals and as a community. The culture of academia requires that each student take responsibility for learning and for products that reflect their intellectual potential, curiosity, and capability. Students must represent themselves truthfully, claim only work that is their own, acknowledge their use of others’ words, research results, and ideas, using the methods accepted by the appropriate academic disciplines and engage honestly in all academic assignments. Anything less than total commitment to honesty circumvents the contract for intellectual enrichment that students have with the University to become an educated person, undermines the efforts of the entire academic community, and diminishes the value of an education for everyone, especially for the person who cheats. Both students and faculty are responsible for ensuring the academic integrity of the University.

These guidelines establish definitions for academic misconduct and procedures for the adjudication of academic integrity cases by the Office of Student Conduct and Academic Integrity Programs (SCAIP) for undergraduate students and Graduate Division for graduate student cases.

Misunderstanding of appropriate academic conduct will not be accepted as an excuse for academic misconduct. If a student is in doubt about appropriate academic conduct in a particular situation, he or she should consult with the instructor in the course to avoid the serious charge of academic misconduct.

Types of Academic Misconduct
The following provides definitions of academic misconduct to assist students in developing an understanding of the University’s expectations, recognizing that no set of written guidelines can anticipate all types and degrees of violations of academic integrity. To the extent that these definitions are not exhaustive, duly appointed representatives of the University will judge each case according to its merits. If a referral requires further expertise, additional appropriate representatives may be designated to review. Types of academic misconduct include, but are not limited to:

Cheating
Fraud, deceit, or dishonesty in an academic assignment, or using or attempting to use materials, or assisting others in using materials that are prohibited or inappropriate in the context of the academic assignment in question.

Fabrication
Making up data or results and recording or reporting them, including laboratory or field research results. In the context of student academic integrity, this also includes falsifying academic or university documents and providing false information or testimony in connection with any investigation or hearing under this policy.

Plagiarism
The appropriation of another person’s ideas, processes, results, or words without giving appropriate credit. This includes the copying of language, structure, or ideas of another and attributing (explicitly or implicitly) the work to one’s own efforts. Plagiarism means using another’s work without giving credit.

Facilitating academic dishonesty
Assisting another in violating the policy of Academic Integrity, such as taking an exam for another student or providing coursework for another student to turn in as their own effort.

Unauthorized collaboration
Working with others without the specific permission of the instructor on assignments that will be submitted for a grade. This applies to in-class or take-home tests, papers, labs, or homework assignments. Students may not collaborate without faculty authorization.

Interference or sabotage
Damaging, removing, or otherwise harming another student’s work or University materials and systems to affect the academic performance of others.

Research non-compliance is a failure to comply with research regulations such as those applying to human subjects, vertebrate animals, biosafety, stem cells, conflict of interest, responsible conduct of research training, and conflict of interest disclosures.

Retaliation of any kind against a person who reported or provided information about suspected or alleged misconduct and who has not acted in bad faith.
Undergraduate Students

Requirements and Expectations

Research
To foster intellectual honesty with regard to undergraduate research, all academic units at UCR are encouraged to develop statements that fit the distinctive research climate and needs of their individual disciplines. These guidelines may cover responsibilities of research supervisors, assignment of credit for publications, training of research apprentices, requirements for record keeping of experimental procedures and data storage.

Policies relevant to research and agencies funding research are posted on the Research and Economic Development Office website: research.ucr.edu

Courses
Faculty members, teaching assistants, and other instructional personnel are encouraged to include statements addressing academic integrity as part of the syllabus for every course and to educate students about expectations and standards in the context of the course in order that students may not, through ignorance, subject themselves to the charge of academic misconduct. Instructors are further encouraged to inform students of campus resources available for dealing with academic difficulty.

Undergraduate Procedures
Throughout the process of reviewing allegations of academic misconduct, this policy articulates deadlines for action based on calendar days. If the day of a deadline falls on a weekend, holiday, or day the University is otherwise closed, that deadline will be moved to the next day the University is open.

I. Faculty Actions
Research
In cases of alleged research non-compliance or research misconduct by faculty members, TA's, students, and other personnel, it should be reported to Vice Chancellor for Research who will be responsible for coordinating further actions.

Courses
If a faculty member, teaching assistant, or other instructional personnel suspects that an act of academic misconduct has occurred in a course, she or he must promptly communicate with the student regarding the alleged act of misconduct and the information upon which the allegation is based within 30 calendar days of discovery of the alleged act. Under special circumstances, the instructor may make a request for an extension of time through the Vice Provost for Administrative Resolution. If the discovery is made by a teaching assistant, reader, grader, or tutor, the TA should immediately communicate to the Faculty member in charge of the course, so that the Faculty member in charge can proceed with the investigation.

Whenever possible, the communication should take place through an in-person consultation and should be conducted in a manner that respects each student's privacy and maintains an environment that supports teaching and learning. When a meeting is not possible or practical, an instructor may communicate with the student in writing. Written communication will be sent to the student's University e-mail address. When multiple students are involved, in order to preserve a students right to privacy, the faculty member is asked to communicate with each student separately.

The Faculty member or the student may request the assistance of the Ombudsperson at the conference to assist in a fair and focused discussion about what may have occurred.

The student must be given the opportunity to respond to the allegation of misconduct. When communication is made in writing, students will be given 14 calendar days to respond.

After conferring with the student and/or considering the student's written response, the faculty member may determine there has been no misconduct, in which case the instructor may dismiss the allegation and take no further action.

If the faculty member determines that it is more likely than not that the student committed an act of academic misconduct, regardless of the student's intent to engage in misconduct, the instructor may then pursue one of the following actions:

A. In cases where the student does not dispute the facts upon which the charges are based, the instructor may impose an appropriate academic sanction, taking into account the clarity of course expectations, the level of the student's experience or knowledge of principles of academic integrity, the nature of the assignment, and the degree of intentionality and pre-meditation of the misconduct. These admissions of guilt and the sanction the instructor imposes are final.

Actions taken must be documented through the Academic Misconduct Referral form, or a referral memo to SCAIP, the central location where all records of incidents of academic dishonesty are kept on file. It is essential that the form or referral memo include the student's name and student identification number, the name of the class in which the act took place, the date or time period in which the act occurred, a description of the academic misconduct, a summary of actions taken, all original documentation supporting the charge, and the academic sanctions assigned.

B. In cases where the student disputes the facts upon which the charges are based, the instructor will refer the case to SCAIP. The Academic Misconduct Referral form, available at conduct.ucr.edu, or memo must include the student's name and student identification number, the name of the class in which the act took place, the date or time period in which the act occurred, a description of the academic misconduct, a summary of actions taken by the instructor, all original documentation supporting the charge (except where prohibited by law), and the academic sanctions recommended. Faculty members are encouraged to forward a copy of the course syllabus and other written communication that addresses academic integrity standards and expectations for the course. Faculty are further encouraged to evaluate the assignment or examination on its merits and to make note of the grade to be assigned in the event that the student is not found responsible for violation of the University's policies or where insufficient evidence exists to hold the student responsible.

Faculty members who will not be available to participate fully in resolving allegations (e.g., individuals holding part-time or temporary appointments, those on sabbatical or other leave, or those leaving University employment) must provide a copy of all documentation to the immediate supervising administrator: department chair, program director, center director, or dean of school, who will serve as a proxy for the Faculty member to conclude the case.

If grades are awarded while the case is in progress, the Faculty member is expected to assign a temporary grade placeholder of Grade Delay "GD" pending the outcome of the review process.

The Faculty member is encouraged to evaluate the disputed assignment or examination on its merits and to note the grade to be assigned in the event that the student is not found responsible for violation of the University of California Policy on Student Conduct and Discipline or where insufficient evidence exists to hold the student responsible.

C. Violations that the instructor believes to be particularly egregious shall be referred directly to the School or College Academic Integrity Committee in the instructor's School or College for review.

The student may not avoid the imposition of a sanction by withdrawing from a course. If the student is found not responsible for academic misconduct, the student will be permitted to request a withdrawal from the course with a grade of "W". Students should use an Undergraduate Enrollment Adjustment Form in this case.
II. Administrative Actions

Research
The Vice Chancellor of Research will review the details of alleged research misconduct in accordance with the relevant policy.

A. In cases where the student does not dispute the facts upon which the charges are based, SCAIP, upon receipt of the Academic Misconduct Referral form, will follow up with the student in writing to formally advise the student of the academic sanctions assigned by the instructor as well as appropriate disciplinary sanctions assigned by the University.

The decision shall be forwarded in writing to the student within 20 calendar days of the review; and communicated to the instructor, school or college and/or division in accordance with legitimate educational interest criteria as articulated by the Family Education Rights and Privacy Act.

Students with a record of previous academic misconduct will be referred to the Academic Integrity Committee in their School or College for a formal hearing (Review Stage 2), with a recommendation that suspension or dismissal be considered

B. In cases where the student disputes the facts upon which the charges are based, upon receipt of the Academic Misconduct Referral Form, SCAIP will notify the student of their alleged violation of the University of California Policy on Student Conduct and Discipline, the factual basis for the charges, and the plan to conduct a Review Stage 1 Administrative Review of the case. The student will be advised that the Administrative Review is intended as a thorough exposition of all related facts and written materials associated with the alleged misconduct, and that it is not intended as an adversarial criminal or civil legal proceeding. It is not modeled on these adversarial systems; nor does it serve the same functions; rather, it is an academic process unique to the community of scholars that comprise a University. The student will also be informed of their right to be assisted by an advisor of their choice. Such written notification will occur within 20 calendar days of the receipt of the referral by SCAIP and will be sent to the student’s University e-mail address.

1. Review Stage 1, Administrative Review, process:

The Administrative Review conducted by SCAIP involves meetings with the student, the faculty member, and others who may have relevant information. The student will have the opportunity to discuss any extenuating circumstances, causes, and motivations that may have contributed to the alleged misconduct. If SCAIP deems it necessary, the Administrative Review will be scheduled such that both the faculty member and the student can attend. The purpose of an Administrative Review is to explore and investigate the incident giving rise to the appearance of academic dishonesty, and to reach an informed conclusion as to whether or not academic dishonesty occurred. In keeping with the ultimate premise and justification of academic life, the duty of all persons at a Review is to assist in a thorough and honest exposition of all related facts. A Review is not in the character of a criminal or civil legal proceeding. It is not modeled on these adversarial systems; nor does it serve the same functions; rather, it is an academic process unique to the community of scholars that comprise a University.

The review will:

• explain fully the alleged violation of the Standards of Conduct
• review written materials associated with the alleged misconduct
• give the student and the instructor the opportunity to present their accounts of the incident and present any witnesses or other individuals who may have relevant information about the incident
• address how the student’s alleged conduct was judged, why the behavior is unacceptable, the impact of conduct on others in the community, causes and motives of the conduct, and alternatives for balancing personal circumstances with needs and expectations of the community

2. Outcome of the Administrative Review:

If SCAIP determines it is more likely than not that the student is responsible for academic misconduct, the academic sanctions recommended by the faculty member as well as appropriate disciplinary sanctions will be assigned taking into account the clarity of cause expectations, the level of the student’s experience or knowledge of principles of academic integrity, the nature of the assignment, and the degree of intentionality and premeditation of the misconduct.

The decision shall be forwarded in writing to the student within 20 calendar days of the review and communicated to the instructor, school or college and/or division in accordance with legitimate educational interest criteria as articulated by the Family Education Rights and Privacy Act. In cases where the instructor has held a grade in abeyance pending the outcome of an Administrative Review, the instructor shall submit a final grade with the Registrar that is consistent with the decision of SCAIP as to the question of misconduct.

3. Appeals of Decisions by Faculty Members and/or from Review Stage 1:

Academic Integrity Committees, described in Section C function as the appellate bodies for decisions made at Review Stage 1. Section E below more fully explains appeal procedures.

C. Cases involving a student with a record of previous academic misconduct or cases that are sufficiently complex to require additional consultation shall be referred directly by SCAIP for a Stage 2 review by the Academic Integrity Committee in the relevant college/school for a formal hearing.

III. Academic Integrity Committees

1. Review Stage 2, College/School Academic Integrity Committees for Cases Involving Undergraduate Students

An Academic Integrity Committee will be established in each School or College to:

• hear cases referred by SCAIP that are sufficiently complex to require additional review
• hear serious and repeated violations of academic misconduct upon referral from an instructor or SCAIP
• consider appeals of decisions and/or sanctions imposed by SCAIP

The Academic Senate’s Committee on Committees will appoint four faculty members from each of BCOE, CNAS, and SoB, and six from CHASS to the undergraduate Academic Integrity Committees for each college/school to serve one-year terms, effective September 1-August 31. Each committee should include faculty who are available to participate in hearings during the summer months.
In addition, SCAIP will solicit and review applications from interested undergraduate and graduate students and make recommendations to the Associated Students of UCR and Graduate Student Association regarding students to be appointed to serve on each college/school committee for one-year terms, effective September 1-August 31. The final endorsement of student members will rest with the Committee on Committees. Students are not eligible to serve if they have been suspended or are on academic or disciplinary probation, have been evicted from University Housing for reasons related to conduct, or have a case pending before SCAIP. (Am 20 February 07)

In all cases an effort will be made to appoint members who represent the disciplinary diversity within each college/school, whenever possible. Staff support to the committees will be provided by the office of the Vice Provost for Administrative Resolution, the office of the AVC/Dean of Students, and SCAIP.

2. Hearing Panels
SCAIP will schedule a hearing panel of three to five members, from the relevant AIC for each case. A quorum of the committee consists of three persons, with at least one faculty member and one student for School or College Committees. In the absence of a quorum, the hearing will be rescheduled. Staff support to the Committee will be provided by the Vice Provost for Administrative Resolution or their designee.

The purpose of an Academic Integrity Committee Hearing is to explore and investigate the incident giving rise to the appearance of academic dishonesty, and to reach an informed conclusion as to whether or not academic dishonesty occurred. In keeping with the ultimate premise and justification of academic life, the duty of all persons at a hearing is to assist in a thorough and honest exposition of all related facts. A hearing is not in the character of a criminal or civil legal proceeding. It is not modeled on these adversarial systems; nor does it serve the same role, if needed for a quorum. The chair will read aloud the charges of academic misconduct and the student will be asked to respond to the charges by (a) accepting responsibility, (b) accepting responsibility and relevance of testimony.

The administrative chair shall rule on all questions of procedure and evidence, including but not limited to: the order of presentation of evidence, admissibility of evidence, applicability of regulations to a particular case, and relevance of testimony. 

3. Hearing Procedures
Preparation: Prior to the hearing, panel members will receive and review a copy of the notification of charges and documentary evidence provided by the instructor, the University, and the student.

Introductory comments: At the beginning of the hearing, the administrative chair will ask all present at the hearing to introduce themselves for the record. The administrative chair will warn any panel members to disqualify themselves from participation if they believe for any reason that they cannot render a just and fair decision and will permit the student to request that a member be disqualified if the student believes for an appropriate reason that a panel member cannot render a just and fair decision. If a student or faculty member of the hearing panel is disqualified, another member will be appointed to fill the same role, if needed for a quorum. The chair will read aloud the charges of academic misconduct and the student will be asked to respond to the charges by (a) accepting responsibility, (b) accepting responsibility and noting that there are mitigating circumstances, or (c) denying responsibility for the alleged violation of the University of California Policy on Student Conduct and Discipline.

Presentation of accounts: The faculty member and the student will be given the opportunity to present their accounts of the incident and present any witnesses or other individuals who may have relevant information about the alleged academic misconduct. Hearing panel members will be given an opportunity to ask questions of the faculty member, the student, and witnesses. Each party will then be asked if there is additional information needed, or if any discrepancies or questions need to be presented or addressed.

Deliberation: The hearing panel will deliberate in private to decide, by a majority vote, if a preponderance of the evidence indicates that the student is responsible or not responsible for alleged violation of University of California Policy on Student Conduct and Discipline.

If the student is found to be responsible for violations of the Policy, the Committee shall be informed of the student’s prior record to determine whether the student has been found responsible for previous academic misconduct. Based on this information, the Committee will determine the sanction(s) to be assigned.

Notification of decision: Once the hearing panel has reached a decision, the parties involved will reassemble, and the results of the deliberation will be presented. Within 20 calendar days, the Vice Provost for Administrative Resolution or their designee will send written notification to the student, the faculty member, and the dean or their designated associate dean for student academic affairs of the college/school detailing the decision and the sanctions imposed by the hearing panel. The notification will also outline the appeal process.

Records: An audio recording of the hearing, but not the deliberations, shall be made and retained in SCAIP as part of the record for as long as the disciplinary record is retained, or for seven years from the date of decision, whichever is shorter (see Section F below). The student may obtain a copy of the recording upon paying the expense of making such copy. Either the student with conduct under investigation or the faculty member may arrange for a stenographer to make a full transcript of the proceedings at their own expense. If one party has the proceedings transcribed, arrangements shall be made before the hearing as to how to apportion the cost if both parties want copies. Other than for the purpose of the official record as provided above, mechanical or electronic devices for recording or broadcasting shall be excluded from the hearing.

4. Students may appeal the decision of Stage 2 review by the Academic Integrity Committees in writing to the Campus Academic Integrity Executive Committee
College Academic Integrity Executive Committee
The Vice Provost for Administrative Resolution or their designee shall select one faculty member and one student from each Academic Integrity Committee to serve as the Campus Academic Integrity Executive Committee for undergraduates. The Campus Academic Integrity Executive Committee also serves as the appellate body for primary decisions made at Review Stage 2 for undergraduate students. The Executive Committee will also review, on an annual basis, cases addressed by SCAIP and Academic Integrity Committee actions to provide oversight and direction and to ensure that policies and procedures are appropriate and properly applied.

IV. Appeals
1. Channels for Appeals
Stage 1 Review decisions made by SCAIP may be appealed through the School or College Academic Integrity Committee in the faculty member’s School or College. Appellate decisions of a School or College Academic Integrity Committee are final.

Stage 2 Review decisions made by a School or College Academic Integrity Committee may be appealed to the Campus Academic Integrity Executive Committee. Appellate decisions of the Campus Academic Integrity Executive Committee are final.

2. Criteria for Appeals
• New evidence not reasonably available at the time of the original hearing, the absence of which can be shown to have had a detrimental impact on the outcome of the hearing
• Procedural error that can be shown to have had a detrimental impact on the outcome of the hearing
• Errors in the interpretation of University policy so substantial as to deny one of the parties a fair hearing
• Grossly inappropriate sanction having no reasonable relationship to the charges
3. Appeal Procedures

- The faculty member or the student may appeal a decision in writing to the appropriate body for appeal, as described above. The appeal must be made within 14 calendar days after the written decision is made available.
- Appeals must be authored and signed by the submitting party. Appeals produced by advisors or other non-parties will not be considered.
- The filing of a timely appeal suspends the imposition of sanctions until the appeal is decided. Grades or degrees will be withheld pending conclusion of the appeal.
- When an appeal has been filed, the relevant parties may be requested to respond in writing to the matters in question before a decision about the appeal is made. The non-appealing party, whether student or Faculty member, will be notified of the appeal as soon it has been received by the appropriate appellate body and will be given an opportunity to submit a written statement for consideration during the appeal process.
- The appellate body will determine whether the grounds for appeal have been satisfied and whether further process is necessary to resolve the appeal. Findings of fact will be accepted as determined by the original adjudicating body, unless the appellate body determines that the original adjudicating body acted in an arbitrary, capricious, or unfair manner.
- The appellate body will make a decision based on the written submissions within 20 calendar days, or indicate in writing what further process is necessary for final resolution.
- The appellate body may approve, reject, or modify the decision and sanction in question. The action taken shall be communicated in writing to the student, the faculty member, SCAIP, and/or the original adjudicating body within 20 calendar days after receipt of the appeal and related documents. The decision of the appellate body is final.

V. Maintenance Of Records

SCAIP shall serve as the central location where all written, audio, and electronic records of incidents of academic misconduct are kept on file. The records will be readily available for review by the Deans and Associate Deans of each College or School, the Dean of the Graduate Division, the Executive Vice Chancellor and Provost and the Vice Provost for Administrative Resolution, in accordance with legitimate educational interest criteria as articulated by the Family Educational Rights and Privacy Act.

The file of a student found in violation of campus regulations (including the transcripts or recordings of the hearing) will be maintained by the SCAIP for a period of at least seven years from the date of the letter providing notice of final disciplinary action, unless otherwise determined by the Vice Provost for Administrative Resolution. When a student is suspended as a result of a violation of the University of California Policy on Student Conduct and Discipline, the fact that suspension was imposed must be posted on the academic transcript for the duration of the suspension. When a student is dismissed as a result of a violation of this policy, the fact that dismissal was imposed must be posted on the academic transcript permanently.

VI. Scheduling for Hearings and Appeals

In general, Academic Integrity Committees will conduct hearing panels September through June, the main academic year. In special circumstances, including hearings involving graduating seniors and those involving course sequences and prerequisites, SCAIP and the Academic Integrity Committees will work to expedite the process and endeavor to hold summer hearings on a limited basis.

Regulations Specifically for Graduate Students

1. Requirements and Expectations in Research

To foster intellectual honesty with regard to graduate student research, all academic units at UCR are encouraged to develop statements that fit the distinctive research climate and needs of their individual disciplines. These guidelines may cover responsibilities of research supervisors, assignment of authorship or credit for publications, training of research apprentices, requirements for record keeping of experimental procedures and data storage.

It is the responsibility of each individual engaged in research at UCR to be informed of University policies relating to research and of the policies and procedures of the agencies funding research. Relevant policies are posted on the Research and Economic Development Office (RED) website: research.ucr.edu

2. Allegations of Misconduct in Research

All allegations of research misconduct by graduate students should be immediately reported to the Vice Chancellor of Research. The Vice Chancellor of Research serves as the UCR Research Integrity Officer and who, in furtherance of the University’s obligations and responsibilities, has been delegated the administrative authority by the Chancellor with respect to the oversight, implementation, maintenance and updating of the Policy and Procedures for Responding to Allegations of Research Misconduct at the University Of California, Riverside. All complainants should consult the Policy and Procedures for Responding to Allegations of Research Misconduct at the University Of California, Riverside prior to bringing an allegation of research misconduct to the Vice Chancellor for Research and Economic Development.

The Vice Chancellor for Research or their designee will review the description of the research misconduct and all documentation supporting the charge. He/she will determine if misconduct may have occurred, and if so, may undertake an inquiry or formal investigation, following the guidelines outlined in the UCR Policy on Integrity in Research, posted on the UCR Office of Research website. In the event that the preliminary inquiry or formal investigation finds probable cause with respect to research misconduct to warrant disciplinary proceedings, charges of misconduct will be processed in accordance with procedures for adjudicating alleged academic misconduct in courses, as outlined below, beginning with Review Stage 1.

3. Requirements and Expectations in Courses

Instructional personnel responsible for courses (herein referred to as Faculty) are encouraged to include statements addressing academic integrity as part of the syllabus for every course and to educate students about expectations and standards of the course in order that students may not, through ignorance, subject themselves to the charge of academic misconduct. Faculty are further encouraged to inform students of campus resources available for dealing with academic difficulty.

4. Allegations of Misconduct in Courses

The table below shows the steps in the investigation and review process.
4.1. Initiation of Cases

If a Faculty member suspects that an act of academic misconduct has occurred in a course, he or she must promptly communicate with the student regarding the alleged misconduct and the information upon which the allegation is based; the notification process must occur within 30 calendar days of the discovery of the alleged act. The Faculty member may request an extension of time through the Associate Dean for Graduate Academic Affairs. If the discovery is made by a student, teaching assistant, reader, grader or tutor he or she should immediately communicate to the Faculty member in charge of the course, so that the Faculty member in charge can proceed with the investigation. Whenever possible, communication with the student should take place through an in-person consultation and should be conducted in a manner that respects the student’s privacy and maintains an environment that supports teaching and learning. When multiple students are involved, Faculty are encouraged to communicate with each student separately. The Faculty member or the student may request the presence at the consultation meeting of the Ombudsperson.

When an in-person meeting is not possible, the Faculty member may communicate with the student in writing. Written communication should be sent to the student’s University e-mail address. The student must be given the opportunity to respond to the allegation of misconduct. When communication is made in writing, students will be given 10 calendar days to respond. After conferring with the student and/or considering the student’s written response, the Faculty member may determine that there has been no misconduct, in which case the Faculty member may dismiss the allegation and take no further action. If the Faculty member determines that it is more likely than not that the student committed an act of academic misconduct, regardless of the student's intent to engage in misconduct, the case moves to Stage 1 in the review process.

Faculty members who will not be available to participate fully in resolving allegations (e.g., individuals holding part-time or temporary appointments, those on sabbatical or other leave, or those leaving University employment) must provide a copy of all documentation to the immediate supervising administrator: department chair, program director, center director, or dean of school, who will serve as a proxy for the Faculty member to conclude the case. If grades are awarded while the case is in progress, the Faculty member should assign a temporary grade placeholder of Grade Delay “GD” pending the outcome of the review process.

### Action | Responsible Body: Undergraduate Students
---|---
Initiation of Cases • Communication with the student regarding suspected misconduct and documentation of actions via the Graduate Academic Misconduct Referral Form | Faculty Member

Review Stage 1 • Initial [Administrative] Review | Associate Dean for Graduate Academic Affairs

Review Stage 2 • Hearings for cases that are complex, egregious, and/or repeated cases of misconduct • Appeals of decisions made at Review Stage 1 | Graduate Academic Integrity Committee [GaIC]

Review Stage 3 • Annual assessments of cases addressed at Review Stages 1 & 2 • Appeals of primary decisions made at Review Stage 2 | Graduate Council

4.1.1. Student Admits Responsibility

If the student admits responsibility for the alleged misconduct, the Faculty member may immediately impose an appropriate academic sanction. The Faculty member must document the case and the sanction on the Graduate Academic Misconduct Referral form and send the form to the Associate Dean for Graduate Academic Affairs. Faculty members are advised to consult with the Graduate Advisor for the student's program and with the Associate Dean for Graduate Academic Affairs prior to imposing the academic sanction.

4.1.2. Student Admits Responsibility

If the student does not admit responsibility but the Faculty member makes a determination of misconduct, the Faculty member will refer the case to the Associate Dean for Graduate Academic Affairs using the Graduate Academic Misconduct Referral Form. The referral form must include the student’s name and student identification number, the name of the class in which the act took place, the date or time period in which the act occurred, a description of the academic misconduct, a summary of actions taken, all original documentation supporting the charge (including a copy of the course syllabus and other written communication that addresses academic integrity standards and expectations for the course), and the academic actions and disciplinary sanctions recommended by the Faculty member. Faculty members are advised to consult with the Graduate Advisor for the student's program and with the Associate Dean for Graduate Academic Affairs prior to recommending sanctions.

The Faculty member also will evaluate the disputed assignment or examination on its merits and note the grade to be assigned in the event that the student is not found responsible for violation of the University of California Policy on Student Conduct and Discipline or where insufficient evidence exists to hold the student responsible. Upon receipt of the Academic Misconduct Referral Form, the Associate Dean for Graduate Academic Affairs will notify the student of the University of California Policy on Student Conduct and Discipline that was allegedly violated, the factual basis for the charges, and the plan to conduct an Initial [Administrative] Review of the case. The student will be advised that the Initial [Administrative] Review is intended as a thorough exposition of all related facts and written materials associated with the alleged misconduct, and that it is not intended as an adversarial criminal or civil legal proceeding. The student will also be informed of their right to be assisted by an advisor of his or her choice. Such written notification will occur within 20 calendar days of the receipt of the referral by the Associate Dean and will be sent to the student’s University e-mail address.

A student may not avoid the imposition of a sanction by withdrawing from a course. A student officially notified of alleged academic misconduct may not withdraw from the course until the determination of responsibility is made and any sanctions are imposed. A sanction for a violation of academic integrity that affects the course grade will be applied. If the student is found not responsible for academic misconduct, the student will be permitted to withdraw from the course in accordance with campus regulations.

4.2. Review Stage 1: Initial [Administrative] Review

The Initial [Administrative] Review, conducted by the Associate Dean for Graduate Academic Affairs, involves meetings with the student, the Faculty member, and others who may have relevant information. The student will have the opportunity to discuss any extenuating circumstances, causes, and motivations that may have contributed to the alleged misconduct. If the Associate Dean deems it necessary, a joint meeting will be scheduled at a time when both the Faculty member and the student can attend. If the Faculty member is unavailable for a timely Initial [Administrative] Review, the immediate supervising administrator will be asked to serve in place of the Faculty member.

4.2.1. Outcome of the Initial [Administrative] Review

If the Associate Dean for Graduate Academic Affairs determines that it is more likely than not that the student is responsible for academic misconduct, the academic actions recommended by the Faculty member, as well as any disciplinary sanctions imposed by the University, will be assigned.
The determination shall be forwarded by the Associate Dean for Graduate Academic Affairs in writing to the student within 20 calendar days of the Initial [Administrative] Review; notice will be sent to the student’s University e-mail address and communicated to the Faculty member and to the dean of the college/school in accordance with legitimate educational interest criteria as articulated by the Family Education Rights and Privacy Act. In cases where the Faculty member has held a grade in abeyance pending the outcome of an Initial [Administrative] Review, he or she shall submit a final grade to the Registrar that is consistent with the determination by the Associate Dean for Graduate Academic Affairs as to the question of misconduct. Either the student or faculty member can appeal the decision of the Associate Dean for Graduate Academic Affairs.

Cases involving a student with a record of previous academic misconduct or cases that are sufficiently complex to require additional consultation shall be referred directly by the Associate Dean for Graduate Academic Affairs for a Stage 2 review by the Graduate Academic Integrity Committee for a formal hearing.

4.3. Review Stage 2: Complex Cases and Appeals from Stage 1

Review Stage 2 is reserved for cases involving a student with a record of previous academic misconduct or cases that are sufficiently complex or egregious to require additional consultation by the Graduate Academic Integrity Committee [GAIC] for a formal hearing. Review Stage 2 also serves as the stage for appeals of decisions made at Review Stage 1. Appellate decisions at Review Stage 2 are final.

The Academic Senate’s Committee on Committees will appoint faculty to the Graduate Academic Integrity Committee to serve one-year terms, effective September 1-August 31, and will appoint one faculty member from the GAIC to serve as chair. The GAIC may consist of at least one member from each school and at least two members from each college and should include faculty who are available to participate in hearings during the summer months.

In addition, the Graduate Division will solicit and review applications from interested graduate students and make recommendations to the Graduate Student Association of UCR regarding students to be appointed to serve on the GAIC for one-year terms, effective September 1-August 31. The final endorsement of student members will rest with the Committee on Committees. Students are not eligible to serve if they have been suspended or are on academic or disciplinary probation, have been evicted from University Housing for reasons related to conduct, or have a case pending before the Graduate Division, GAIC, or Graduate Council.

Faculty and student members should represent the disciplinary diversity within each college/school, whenever possible. Staff support to the committee will be provided by the Graduate Division.

4.3.1. Hearing Panels

For each Stage 2 case, the chair of the GAIC will schedule a hearing panel of three to five GAIC members. A quorum is required for a hearing to proceed and consists of three persons, including at least one faculty member and one student.

The Associate Dean for Graduate Academic Affairs or designee will serve as a non-voting member of the hearing panel. The chair of the hearing panel shall rule on all questions of procedure and evidence, including but not limited to: the order of presentation of evidence, admissibility of evidence, applicability of regulations to a particular case, and relevance of testimony.

4.3.2. Hearing Panels

1. Preparation: Prior to the hearing, panel members will receive and review a copy of the notification of charges and documentary evidence provided by the Faculty member, the University, and the student.

2. Introductory comments: At the beginning of the hearing, the chair will ask any panel members to disqualify themselves from participation if they believe that they cannot render a just and fair decision, and will permit the student to request that a member be disqualified if the student believes for an appropriate reason that a panel member cannot render a just and fair decision. If a student or Faculty member of the hearing panel is disqualified, another member will be appointed to fill the same role, if needed for a quorum.

The chair will read aloud the charges of academic misconduct, and the student will be asked to respond to the charges by (a) accepting responsibility, (b) accepting responsibility and noting that there are mitigating circumstances, or (c) denying responsibility for the alleged violation of the University of California Policy on Student Conduct and Discipline.

3. Presentation of accounts: The Faculty member and the student will be given the opportunity to present their accounts of the incident and to present any witnesses or other individuals who may have relevant information about the alleged academic misconduct. Hearing panel members will be given an opportunity to ask questions of the Faculty member, the student, and witnesses. Each party will then be asked if there is additional information needed, or if any discrepancies or questions need to be presented or addressed.

4. Deliberation: The hearing panel will deliberate in private to decide, by a majority vote, if a preponderance of the evidence indicates that the student is responsible or not responsible for alleged violation of University of California Policy on Student Conduct and Discipline.

5. Determination of sanctions: If the student is found to be responsible for violations of policies, the hearing panel shall be informed of the student’s prior record of academic misconduct. Based on this information and the recommendation of the faculty member, the committee will determine the disciplinary sanctions to be assigned, how and for how long the record of the sanctions will be maintained on the student’s permanent record, and the conditions that must be met for the record to be removed, if any.

6. Notification of decision: Once the hearing panel has reached a decision, the parties will reassemble, and the results of the deliberation will be presented. Within 20 calendar days, the Associate Dean for Graduate Academic Affairs will send written notification to the student, the Faculty member, and the dean or their designated associate dean for student academic affairs of the college/school detailing the decision and the sanctions imposed by the hearing panel. The notification will also outline the appeal process.

7. Records: An audio recording of the hearing, but not the deliberations of the hearing panel, shall be made and retained by the Graduate Division as part of the record for as long as the disciplinary record is retained, or for seven years from the date of decision, whichever is shorter (see Section 6 below). The student may obtain a copy of the recording upon paying the expense of making such copy. Either party may arrange for a stenographer to make a full transcript of the proceedings at their own expense. If one party has the proceedings transcribed, arrangements shall be made before the hearing as to how to apportion the cost if both parties want copies. Other than for the purpose of the official record as provided above, mechanical or electronic devices for recording or broadcasting shall be excluded from the hearing.

4.4. Review Stage 3: Appeals from Stage 2 and Annual Assessment of Cases

Review Stage 3 is reserved for appeals of primary decisions made at Review Stage 2, and for annual assessment of cases adjudicated at Review Stages 1 and 2. For each Stage 3 case, the Chair of the Graduate Council or designee shall select a 3-5 member subcommittee of the Graduate Council to serve as an appeal panel. Each Stage 3 hearing will be conducted according to the Hearing Procedures described above in Section 4.3.2.

The Graduate Council additionally conducts annual assessments of cases adjudicated at Review Stages 1 and 2 for the purpose of providing oversight and ensuring that policies and procedures are appropriately and consistently applied.

5. Appeals

Decisions of the Associate Dean for Graduate Academic Affairs may be appealed to the GAIC. Appellate decisions by the GAIC are final. Primary decisions of the GAIC may be appealed to the Graduate Council. Appellate decisions by the Graduate Council are final. In any decision that includes a sanction of dismissal of a graduate student, the Dean of the Graduate Division will be the final arbiter.

5.1. Criteria for Appeals

Appeals must be based on one or more of the following:

- New evidence not reasonably available at the time of the original hearing, the absence of which can be shown to have had a detrimental impact on the outcome of the hearing
- Procedural error that can be shown to have had a detrimental impact on the outcome of the hearing
• Errors in the interpretation of University policy so substantial as to deny one of the parties a fair hearing
• Grossly inappropriate sanction having no reasonable relationship to the charges

5.2. Appeal Procedures

Appeals must be based on one or more of the following:

• New evidence not reasonably available at the time of the original hearing, the absence of which can be shown to have had a detrimental impact on the outcome of the hearing
• Procedural error that can be shown to have had a detrimental impact on the outcome of the hearing
• Errors in the interpretation of University policy so substantial as to deny one of the parties a fair hearing
• Grossly inappropriate sanction having no reasonable relationship to the charges

1. The Faculty member or the student may appeal a decision in writing to the appropriate body for appeal, as described above. The appeal must be made within 10 calendar days after the written decision is made available.

2. Appeals must be authored and signed by the submitting party. Appeals produced by advisors or other non-parties will not be considered.

3. The filing of a timely appeal suspends the imposition of sanctions until the appeal is decided. Grades or degrees will be withheld pending conclusion of the appeal.

4. When an appeal has been filed, the relevant parties may be requested to respond in writing to the matters in question before a decision about the appeal is made. The non-appealing party, whether student or Faculty member, will be notified of the appeal within 10 calendar days and will be given an opportunity to submit a written statement for consideration within 20 calendar days.

5. The appellate body will determine whether the grounds for appeal have been satisfied and whether further process is necessary to resolve the appeal. Findings of fact will be accepted as determined by the original adjudicating body, unless the appellate body determines that the original adjudicating body acted in an arbitrary, capricious, or unfair manner.

6. The appellate body will make a decision based on the written submissions within 20 calendar days, or indicate in writing what further process is necessary for final resolution.

7. The appellate body may approve, reject, or modify the decision and sanction in question. The action taken shall be communicated in writing to the student, the faculty member, and the original adjudicating body within 20 calendar days after receipt of the appeal and related documents. The decision of the appellate body is final.

6. Maintenance of Records

Graduate Division shall serve as the central location where all written, audio, and electronic records of incidents of academic misconduct are kept on file. The records will be readily available for review by the Deans and Associate Deans of each College or School, the Dean of the Graduate Division, the Executive Vice Chancellor and Provost, and the Vice Provost for Conflict Resolution, in accordance with legitimate educational interest criteria as articulated by the Family Educational Rights and Privacy Act.

The file of a student found in violation of campus regulations (including the transcripts or recordings of the hearing) will be maintained for a period of at least seven years from the date of the letter providing notice of final disciplinary action, unless otherwise determined by the Associate Dean for Graduate Academic Affairs. When a student is suspended as a result of a violation of the University of California Policy on Student Conduct and Discipline, the fact that suspension was imposed must be posted on the academic transcript for the duration of the suspension. When a student is dismissed, the fact that dismissal was imposed must be posted on the academic transcript permanently.

---

Campus Policies and Regulations

Student Conduct and Responsibility

Students enrolling in the university assume an obligation to conduct themselves in a manner compatible with the university’s function as an educational institution. Students shall refrain from conduct which interferes with university teaching, research, administration, or the university's subsidiary responsibilities, or which endangers the health or safety of members of the university community or of visitors to the campus, and from disorderly conduct on university premises or at university-related events.

In cases of student misconduct, the student’s College Executive Committee may defer or withhold their degree for a specified period of time. The Dean of Students may recommend such an action to the College Executive Committee.

By authority of the Board of Regents, the Chancellor is entrusted with full power to act in the administration of student discipline. Rules concerning student conduct, student organizations, use of university facilities and related matters are set forth in both university policies and campus regulations, copies of which are available upon request at the Vice Chancellor, Student Affairs office, Student Conduct and Academic Integrity Programs, or at conduct.ucr.edu.

Particular attention is called to the University of California Policies Applying to Campus Activities, Organizations, and Students and to the campus regulations implementing them. The UCR Student Conduct Procedures are also available in the Vice Chancellor, Student Affairs office.

Standards of Conduct

Chancellors may impose discipline for the commission or attempted commission (including aiding or abetting in the commission or attempted commission) of the following types of violations by students, as well as such other violations as may be specified in campus regulations:

102.01 All forms of academic misconduct including but not limited to cheating, fabrication, plagiarism, or facilitating academic dishonesty.
102.02 Other forms of dishonesty including but not limited to fabricating information, furnishing false information, or reporting a false emergency to the University.
102.03 Forgery, alteration, or misuse of any University document, record, key, electronic device, or identification.
102.04 Theft of, conversion of, destruction of, or damage to any property of the University, or any property of others while on University premises, or possession of any property when the student had knowledge or reasonably should have had knowledge that it was stolen.
102.05 Theft or abuse of University computers and other University electronic resources such as computer and electronic communications facilities, systems, and services. Abuses include (but are not limited to) unauthorized entry, use, transfer, or tampering with the communications of others; interference with the work of others and with the operation of computer and electronic communications facilities, systems, and services; or copyright infringement (for example, the illegal file-sharing of copyrighted materials).

Use of University computer and electronic communications facilities, systems, or services that violates other University policies or campus regulations.

Please refer to the UC Electronic Communications Policy and Digital Copyright Protection at UC for the University’s position on digital copyright.

102.06 Unauthorized entry to, possession of, receipt of, or use of any University services; equipment; resources; or properties, including the University’s name, insignia, or seal.
102.07 Violation of policies, regulations, or rules governing University-owned, -operated, or -leased housing facilities or other housing facilities located on University property.
102.08 Physical abuse including but not limited to physical assault; threats of violence; or other conduct that threatens the health or safety of any person.

Sexual Violence (including Sexual Assault – Penetration, Sexual Assault – Contact and Relationship Violence) is defined by the University of California Policy on Sexual Violence and Sexual Harassment (https://policy.ucop.edu/doc/4000385/SVSH). Please refer to 102.26.

102.09 Harassment, defined as conduct that is so severe and/or pervasive, and objectively offensive, and that so substantially impairs a person’s access to University programs or activities that the person is effectively denied equal access to the University’s resources and opportunities. Harassment includes, but is not limited to, conduct that is motivated on the basis of a person’s race, color, national or ethnic origin, citizenship, sex, religion, age, sexual orientation, gender identify, pregnancy, marital status, ancestry, service in the uniformed services, physical or mental disability, medical condition, or perceived membership in any of these classifications. Pursuant to section 104.90, sanctions may be enhanced for conduct motivated on the basis of the above classifications.

102.10 Stalking behavior in which a student repeatedly engages in a course of conduct directed at another person and makes a credible threat with the intent to place that person in reasonable fear for his or her safety, or the safety of his or her family; where the threat is reasonably determined by the University to seriously alarm, torment, or terrorize the person; and where the threat is additionally determined by the University to serve no legitimate purpose.

102.11 (deleted on October 9, 2009)

102.12 Participation in hazing or any method of initiation or pre-initiation into a campus organization or other activity engaged in by the organization or members of the organization at any time that causes, or is likely to cause, physical injury or personal degradation or disgrace resulting in psychological harm to any student or other person.

102.12.1 Prohibited hazing includes (but is not limited to) the aiding or abetting in the commission or attempted commission of hazing, or the obstruction or attempted obstruction of any investigation (including during disciplinary hearings) of any hazing activity, any of which may result in discipline up to and including suspension or dismissal. Students who are aware of the occurrence of hazing are encouraged to take action to discourage it. Failure to report hazing is considered to constitute permission, contribution, or encouragement of hazing and is not permitted and may result in discipline up to and including suspension or dismissal.

Revision approved April 25, 2021

102.13 Obstruction or disruption of teaching, research, administration, disciplinary procedures, or other University activities.

102.14 Disorderly or lewd conduct.

102.15 Participation in a disturbance of the peace or unlawful assembly.

102.16 Failure to identify oneself to, or comply with the directions of, a University official or other public official acting in the performance of his or her duties while on University property or at official University functions; or resisting or obstructing such University or other public officials in the performance of or the attempt to perform their duties.

102.17 Unlawful manufacture, distribution, dispensing, possession, use, or sale of; or the attempted manufacture, distribution, dispensing, or sale of controlled substances, identified in federal and state law or regulations.

102.18 Manufacture, distribution, dispensing, possession, use, or sale of; or the attempted manufacture, distribution, dispensing, or sale of alcohol that is unlawful or otherwise prohibited by, or not in compliance with, University policy or campus regulations.

102.19 Possession, use, storage, or manufacture of explosives, firebombs, or other destructive devices.

102.20 Possession, use, or manufacture of a firearm or other weapon as prohibited by campus regulations.

102.21 Violation of the conditions contained in the terms of a disciplinary action imposed under these Policies or campus regulations.

102.22 Violation of the conditions contained in a written Notice of Emergency Suspension issued pursuant to Section 53.00 of these Policies or violation of orders issued pursuant to Section 52.00 of these Policies, during a declared state of emergency (https://policy.ucop.edu/doc/2710525/PCAES-50).

102.23 Selling, preparing, or distributing for any commercial purpose course lecture notes or video or audio recordings of any course unless authorized by the University in advance and explicitly permitted by the course instructor in writing. The unauthorized sale or commercial distribution of course notes or recordings by a student is a violation of these Policies whether or not it was the student or someone else who prepared the notes or recordings.

Copying for any commercial purpose handouts, readers or other course materials provided by an instructor as part of a University of California course unless authorized by the University in advance and explicitly permitted by the course instructor or the copyright holder in writing (if the instructor is not the copyright holder).

102.23.1 Copying, posting or distributing materials provided by an instructor for any noncommercial purpose.

102.24 Conduct, where the actor means to communicate a serious expression of intent to terrorize, or acts in reckless disregard of the risk of terrorizing, one or more University students, faculty, or staff. ‘Terrorize’ means to cause a reasonable person to fear bodily harm or death, perpetrated by the actor or those acting under his/her control. ‘Reckless disregard’ means consciously disregarding a substantial risk. This section applies without regard to whether the conduct is motivated by race, ethnicity, personal animosity, or other reasons. This section does not apply to conduct that constitutes the lawful defense of oneself, another, or of property.

102.25 Making a video recording, audio recording, taking photographs, or streaming audio/video of any person in a location where the person has a reasonable expectation of privacy, without that person’s knowledge and express consent.

Looking through a hole or opening, into, or otherwise viewing, by means of any instrumentality, the interior of a private location without the subject’s knowledge and express consent.

Making a video recording, audio recording, or streaming audio/video of private, non-public conversations and/or meetings, without the knowledge and express consent of all recorded parties. These provisions do not extend to public events or discussions, nor to lawful official law or policy enforcement activities. These provisions may not be utilized to impinge upon the lawful exercise of constitutionally protected rights of freedom of speech or assembly.

Definitions
“Express consent” is clear, unmistakable and voluntary consent that may be in written, oral or nonverbal form.

“Private locations” are settings where the person reasonably expects privacy. For example, in most cases the following are considered private locations: residential living quarters, bathrooms, locker rooms, and personal offices.

“Private, non-public conversations and/or meetings” include any communication carried on in circumstances that reasonably indicate that any party wants the communication to be confined to the parties, but excludes a communication made in a public gathering, or in any other circumstance in which the parties to the communication may reasonably expect that the communication may be overheard or recorded.

Invasions of Sexual Privacy are defined by the University of California Policy on Sexual Violence and Sexual Harassment (https://policy.ucop.edu/doc/4000385/SVSH). Please refer to 102.26

102.26 Violation of the University of California Policy on Sexual Violence and Sexual Harassment.

102.27 Violating health and safety requirements issued by the University and/or local, state or federal governments in response to public health emergencies (e.g. COVID-19).

102.28 Violation of local, state, or federal laws, regulation or ordinance not otherwise covered under these standards of conduct.

102.29 Violation of any other University policy or campus regulation not otherwise covered by these standards of conduct.
Speech and Assembly
UCR values free speech and expression. Policies and procedures and guidance on topics such as when speech becomes harassment, the First Amendment’s relationship to civil disobedience, and student organizations’ free speech rights are available on UCR’s Free Speech website freespeech.ucr.edu.

Substance Abuse
UCR is committed to achieving and maintaining a campus community that fosters personal and institutional excellence and strives to provide conditions under which the work of the university can go forward freely, with the highest standards of quality and institutional integrity. In keeping with this commitment, each student should help to create a campus community that is free from the problems of substance abuse and dependency.

UCR distributes to all students and employees via email at least annually Alcohol/Drug Abuse Prevention Information. This notification is made pursuant to the federal Drug-Free Schools and Communities Act. This information is available in the Annual Security and Fire Safety Report, available at compliance.ucr.edu/clery-act-compliance. Information includes university and campus policies, applicable laws, and the penalties and sanctions for violations.

Nondiscrimination Policy and Grievance Procedures
The University of California, in accordance with applicable Federal and State law and University policy, does not discriminate on the basis of race, color, national origin, religion, sex, gender identity, pregnancy, physical or mental disability, medical condition (cancer related or genetic characteristics), ancestry, marital status, age, sexual orientation, citizenship, or service in the uniformed services. The University also prohibits sexual harassment. This nondiscrimination policy covers admission, access, and treatment in University programs and activities. Inquiries regarding the University’s nondiscrimination policies may be directed to the Office of Title IX and Civil Rights (https://compliance.ucr.edu/office-title-ix-equal-opportunity-affirmative-action).

Consistent with this non-discrimination policy, UCR student conduct policies prohibit harassment, defined as conduct that is so severe and/ or pervasive, and objectively offensive, and that so substantially impairs a person’s access to University programs or activities that the person is effectively denied equal access to the University’s resources and opportunities. Harassment includes, but is not limited to, conduct that is motivated on the basis of a person’s race, color, national or ethnic origin, citizenship, sex, religion, age, sexual orientation, gender identity, pregnancy, marital status, ancestry, service in the uniformed services, physical or mental disability, medical condition, or perceived membership in any of these classifications. (PACACOS 102.09, Policy on Student Conduct and Discipline)

University policy prohibits retaliation for bringing a complaint of discrimination or harassment. University policy also prohibits retaliation against a person who assists with a complaint of discrimination or harassment, or participates in any manner in an investigation or resolution of a complaint of discrimination or harassment.

Students may report or file complaints of discrimination, including harassment, or retaliation through UCR grievance or complaint procedures. Sexual harassment, including sexual violence, and other conduct prohibited by the UC Policy on Sexual Violence and Sexual Harassment, should be reported to the Office of Title IX and Civil Rights, at titleix.ucr.edu/reporting. (More information about sexual violence and sexual harassment is provided in the next section of this Catalog.) Complaints by students about other types of discrimination, harassment and retaliation should be filed as follows:

• Reports or complaints about other students or student organizations should be filed with UCR’s Office of Student Conduct and Academic Integrity Programs at conduct.ucr.edu.
• Reports or complaints about faculty, staff, or others should be filed with UCR’s Office of Title IX and Civil Rights, at titleix.ucr.edu/reporting.
• Other options and resources related to complaints and grievances are available through https://help.ucr.edu.

Sexual Violence and Sexual Harassment Policy and Grievance Procedure
UCR is committed to fostering an environment where all UCR students can work and learn in an atmosphere that is inclusive, safe, and rewarding in an atmosphere that is free from all forms of sex- and gender-based harassment, including sexual violence. The UC Policy on Sexual Violence and Sexual Harassment prohibits sexual harassment, including sexual assault, relationship violence and stalking, and protects those who report sexual harassment (or engage in other protected activities) from retaliation. The policy applies to all students, faculty, and staff. The campus will respond promptly to all reports of sexual harassment involving UCR students, and will take appropriate action to address prohibited behavior and to provide supportive services to those affected by sexual harassment.

You are strongly encouraged to review and become familiar with UCR’s Policies and Procedures which are available through the Office of Title IX and Civil Rights, at titleix.ucr.edu.

For information, assistance, or to explore options for addressing sexual harassment and sexual violence, or to make a report contact:

Title IX Coordinators
UCR has designated the following employees to coordinate its efforts to comply with and carry out its responsibilities under Title IX of the Education Amendments of 1972 and implementing regulations, including investigation of complaints:

• Kiersten Boyce, Interim Title IX Officer
• Holly Hare, Deputy Title IX Officer
  365 Skye Hall
  Email: titleix@ucr.edu
  Phone: (951) 827-7070

These procedures are not to be used for grade appeals and other complaints for which specific appeal procedures currently exist. Grade appeals are addressed under the procedure established by the UCR Faculty Senate. See Regulation 5 (https://senate.ucr.edu/regulations).

Students may also file a complaint through the Office of Civil Rights (OCR) of the U.S. Department of Education (Voice: 415.486.5555; TTY: 877.521.2122, Email: ocr.sanfrancisco@ed.gov).

1 Pregnancy includes pregnancy, childbirth, and medical conditions related to pregnancy or childbirth.
2 Service in the uniformed services includes membership, application for membership, performance of service, application for service, or obligation for service in the uniformed services.
Disability Discrimination Grievance Procedure
The University of California, Riverside (UCR) is committed to full compliance with laws and policies protecting individuals with disabilities. As described above (under Nondiscrimination Policy and Grievance Procedures), discrimination or harassment on the basis of disability is prohibited.

Resolving a Grievance
In addition to the grievance options described under Nondiscrimination Policy and Grievance Procedures, above, students have the additional options to address concerns regarding disability discrimination:

- Consult with the ADA Coordinator: The ADA/Section 504 Coordinator may assist in resolving the matter, or can identify the appropriate complaint procedure depending on the nature of the concern.
  
  Kiersten Boyce, ADA/504 Coordinator  
  Email: titleix@ucr.edu  
  Phone: (951) 812-7070

- Student Accommodations: Contact the Director of the Student Disability Resource Center.
  
  Laura Riley, Director  
  Email: laura.riley@ucr.edu  
  Phone: (951) 827-5379  
  Website: sdrc.ucr.edu

Retaliation
University policy prohibits retaliation for bringing a complaint of discrimination or harassment. University policy also prohibits retaliation against a person who assists with a complaint of discrimination or harassment, or participates in any manner in an investigation or resolution of a complaint of discrimination or harassment.

Anti-Hazing
Hazing is strictly prohibited by both California law and University of California policy. California Penal Code, Section 245.6 (b) defines “hazing” as any method of initiation or preinitiation into a student organization or student body, whether or not the organization or body is officially recognized by an educational institution, which is likely to cause serious bodily injury to any former, current, or prospective student of any school, community college, college, university, or educational institution of this state. The term “hazing” does not include customary athletic events or school-sanctioned events. University of California policy further defines “hazing” as participation in hazing or any method of initiation or preinitiation that causes, or is likely to cause, physical injury or personal degradation or disgrace resulting in psychological harm to any student or other person. Incidents of hazing may be addressed through student disciplinary action, criminal charges, and/or civil action. 

More information about hazing and how to report hazing is available in the Vice Chancellor, Student Affairs office, Dean of Students office, Student Life, or Student Conduct and Academic Integrity Programs deanofostudents.ucr.edu/policies-and-procedures/hazing.

E-mail and Computer Expectation Policy
The primary mode of campus communication is e-mail, and it is therefore mandatory for students to utilize their UCR Webmail accounts to review academic and administrative electronic correspondence. UCR strongly recommends that all students have a computer with Internet access. UCR faculty will assume students have such access, and academic work may require it. The UCR administration will also assume that students have Internet access, and many administrative tasks may require students to use the Internet. For information concerning computer acquisition, student network access, student computing laboratories, and student computer support, visit UCR’s Student Technology Support Web, its.ucr.edu/sts.

Fees
Students are expected to pay all fees and charges which they incur. Those with outstanding obligations to the university are not allowed to register or participate in certain university services.
Goals of an Undergraduate Education

The faculty of UCR hereby declare the following set of general educational goals to be pursued through our individual and collective efforts in teaching and guiding the undergraduates of this campus.

A university education must help students realize their potential as individuals and contributing participants in society. This involves the acquisition of knowledge and skills, as well as preparation for future responsibilities.

A general education provides a framework that enables one to appreciate and critically examine the significant aspects of civilization. This framework is derived from the study of world history; political and economic systems; the ethnic, cultural, and religious diversity of the peoples of the Earth; the arts and letters of all cultures; the social and natural sciences; and technology. Such a broad education is the foundation for concentrated studies that enable students to prepare for careers and to strive for an understanding of the world in which they live and about which they must make decisions.

A university education nurtures the critical skills of oral and written communication, including the exercise of these skills in a language other than one’s own. It must teach students to become verbally and quantitatively literate, to analyze and synthesize, and to regard the acquisition of knowledge as a lifetime activity. A university education must promote tolerance of the opinions of others and an understanding of the mutual dependence of human beings on each other and on their natural environment. The student’s university years also provide an opportunity to develop integrity, self-esteem, self-discipline, style, humanness, commitment to the general welfare, sensitivity to the interplay of environment and technology, and confidence that the human drama is worthy of a lengthy future.

UCR has three undergraduate colleges and three undergraduate schools that offer bachelor’s degrees: Humanities, Arts, and Social Sciences; Natural and Agricultural Sciences; and Engineering. UCR also has the School of Business, School of Education, and the School of Public Policy that offer bachelor’s degrees.

Requirements for the Bachelor’s Degree

Requirements for the bachelor’s degree vary according to the college and major selected. There are three kinds of requirements: general university, college, and major.

1. General University requirements
   - Entry-Level Writing
   - American History and Institutions
   - Scholarship
   - Residence

2. College breadth requirements
   - English Composition
   - Humanities
   - Social Sciences
   - Ethnicity
   - Foreign Language
   - Natural Sciences and Mathematics
   - Additional Courses

3. Major requirements
   - Lower-Division or Core Courses
   - Upper-Division Courses

Students should plan a program of study carefully and consult an academic advisor. Students are responsible for meeting all requirements for graduation.
General University Requirements

General university requirements are university-wide requirements that all undergraduates must satisfy. The following regulations and requirements are applicable to all undergraduate students on the Riverside campus.

University of California Entry-Level Writing Requirement

All university faculty assume that students are proficient in reading and writing English, and that they understand how to compose an essay on an academic topic. For this reason, students are asked to provide proof of their writing ability on entering the university.

Completion of the UC Entry-Level Writing Requirement is a prerequisite to ENGL 001A. The UC Entry-Level Writing Requirement may be completed after enrollment in the university by passing an Entry-Level Writing Requirement course as directed by the University Writing Program (see below). It may be completed before enrollment in any one of the following ways:

1. Receiving a score of 680 or better on the College Board SAT Reasoning Test, Writing test (last administered January 2016).
2. 680 or better on the SAT, Evidence-Based Reading and Writing.
3. Achieving a score of 30 or better on the ACT, English Language Arts test.
4. Achieving a score of 30 or better on the ACT, Combined English/Writing test (last administered June 2015).
5. Achieving a score of 63 or better on the ACT, English plus Reading.
6. Receiving a score of 3, 4, or 5 on the College Board Advanced Placement Test in English (Language and Composition or English Literature and Composition). In addition to fulfilling the UC Entry-Level Writing Requirement, a score of 3 satisfies the ENGL 001A requirement; a score of 4 or 5 satisfies the ENGL 001A and ENGL 001B requirements.
7. Receiving a score of 3, 4, or 5 on the College Board Advanced Placement test in Seminar.
8. Receiving a score of 3, 4, or 5 on the College Board Advanced Placement assessment in Research.
9. Receiving a score of 5, 6, or 7 on an International Baccalaureate Higher Level English A: Literature exam (formerly known as Higher Level English A1 exam).
10. Receiving a 6 or 7 on an International Baccalaureate Standard Level English A: Literature exam (formerly known as Standard Level English A1 exam).
11. Receiving a 5, 6, or 7 on an International Baccalaureate Higher Level English A: Language and Literature exam.
12. Receiving a 6 or 7 on an International Baccalaureate Standard Level English A: Language and Literature exam.
13. Completion with a grade of “C” or better of a 4 quarter unit or 3 semester unit college-level course in English composition, taken at another institution before the student enters the university and judged acceptable by the Office of Undergraduate Admissions.
14. Receiving a passing grade on the Analytical Writing Placement Exam administered by UC Riverside.

All incoming freshmen who have not met the UC Entry-Level Writing Requirement and are entering in the fall quarter must take the Analytical Writing Placement Exam.

The exam is administered at UC Riverside on multiple test dates leading up to the start of the fall quarter, including during in-person Highlander Orientation sessions for freshmen.

For more information, see https://admission.universityofcalifornia.edu/elwr/ or https://uw.ucr.edu/elwr/awpe.

Students also have an opportunity to pass the requirement in UCR’s summer sessions by passing ENGL 004 or ENGL 005* before they become full-time students in the fall. They can also take a pre-ENGL 001A class during the summer at a local college or university before they become full-time students at UCR. Students taking summer courses not at UCR can then retake the UC Analytical Writing Placement Exam at UCR at the end of the summer.

Students who have not met the requirement upon entrance to UCR are placed into one of the following UCR courses of instruction. Placement in these courses is determined by the Director of the University Writing Program and is based on the student’s performance on the UC Analytical Writing Placement Exam.

1. BSWT 001 (an ESL course preparatory to BSWT 003)
2. BSWT 003 (an ESL course preparatory to ENGL 004)
3. ENGL 004
4. ENGL 005*
5. A qualifier course plus ENGL 006D

To pass the Entry-Level Writing Requirement (once enrolled as full-time students), students must earn a course grade of “C” (2.0) or better in ENGL 004, ENGL 005*, ENGL 01PA, or earn a course grade of “C” (2.0) or better in a qualifier course approved by the University Writing Program and the Academic Senate.

According to systemwide regulations, any student who has not satisfied the Entry-Level Writing Requirement after three quarters of university residence (three quarters of enrollment during the regular academic year) is not normally eligible to enroll for a fourth quarter at the University of California. (For students placed in BSWT 001 or BSWT 003, this three-quarter residence rule begins after satisfactory completion of BSWT 003 or at the start of their fourth quarter of regular enrollment at UCR, whichever comes first.) Students are encouraged to complete the requirement as soon as possible in their freshman year.

*ENGL 005 is no longer offered.

American History and Institutions

Candidates for a bachelor’s degree must satisfy the requirement in American History and Institutions by demonstrating a knowledge of American history and of American political institutions and ideals. The requirement may be satisfied by satisfactory completion of any one of the following:

1. One (1) high school unit in American History, or 1/2 high school unit in American History and 1/2 high school unit in civics or American Government
2. The requirement in a junior college or other accredited institution
3. One college course in the field of American History or one college course in the field of American Government. UCR courses that fulfill this requirement are HIST 017A or 017B, POSC 010, POSC 100, and POSC 113

Students applying for one of the teacher credential programs should check with the School of Education concerning limitations on ways of meeting this requirement.

Unit Requirement

A minimum of 180 units of academic work with a grade point average of 2.00 in all courses undertaken in the UC is required for graduation.

Not more than 6 units of physical education activities courses, no 400 series course, and not more than three courses in the 300 series may be counted toward the 180 unit requirement.

Scholarship Requirement

To receive a bachelor’s degree, students must obtain twice as many grade points as units (2.00 grade point) for all courses attempted in the university. An exception to this rule is made for those students undertaking certain honors courses.
Residence Requirement
The minimum residence at the UC required for a degree is three quarters. One of the three quarters may be completed in a UCR summer session in which the student carries 12 units, unless a reduced load is approved in advance by the dean of the student's college.

Courses completed in UC Extension are not considered work in residence, even if taken through concurrent enrollment.

Thirty-five (35) of the final 45 units must be earned in residence in the student’s college (this does not preclude the student from taking courses in other colleges on campus). For students who are enrolled in the Education Abroad Program, UC Washington Center (UCDC) or UC Center Sacramento (UCSS) programs, 35 of the final 90 units, including the final 12 units, must be earned in residence. Eighteen (18) of the 35 units may be completed in summer session courses on the Riverside campus.

With the approval of the dean of a student's college or school, a candidate for the bachelor's degree who was in active service in the armed forces of the United States in the year preceding the awarding of the degree may be recommended for the degree after only one quarter of university residence in which the candidate completes at least 16 units or passes a comprehensive examination in the major or field of concentration.

College Breadth Requirements
Each college has established additional requirements for a degree. The requirements of the colleges at Riverside are designed to stimulate an interest in areas of knowledge not necessarily related to a student's major field. Students should note that they consist of a certain number of units and courses covering a variety of fields. Although these requirements determine a large and important part of the four-year curriculum, there are opportunities for students in all departments to do special, independent work.

The main objective of the colleges on the Riverside campus is to provide a setting within which students may develop those qualities of mind and character necessary to intellectual advancement and to useful membership in society. The major areas of human knowledge form the substance of the colleges on the Riverside campus: the College of Humanities, Arts, and Social Sciences; the College of Natural and Agricultural Sciences; The Marlan and Rosemary Bourns College of Engineering; The School of Business; and The School of Public Policy. The breadth requirements for the colleges are similar; however, refer to each college’s section for a detailed discussion of its requirements.

Courses taken in a student's major discipline (including courses cross-listed with the major discipline) may not be applied toward satisfaction of the Humanities, Social Sciences, Ethnicity, or the Natural Sciences and Mathematics requirements except for Biology majors in connection with the Biological Sciences requirement, English majors in connection with the English Composition requirement, History majors in connection with the World History requirement, Ethnic Studies majors in connection with the Ethnicity requirement, Foreign Language majors in connection with language requirements, and students permitted by their college to take a Senate-approved alternative to English 1C in order to satisfy the third-quarter writing requirement. However, courses outside the major discipline, but required for the major, may be applied toward satisfaction of these requirements. Students are urged to make sure that they understand which courses are permitted to satisfy more than one requirement.

Information on specific degree requirements and courses is available in the academic advising office in each college.

Placement exams may be required before a student takes courses in certain subjects, such as foreign languages and mathematics. Foreign language placement exams are required before students register for courses in the language that they took in high school or have some experience with the language. Students are only allowed one placement exam per applicable language. For foreign languages, a sufficiently high score on the UCR placement exam can fulfill the Foreign Language requirement. Students who are required to take math courses, will need to complete the Mathematics Advisory Exam (MAE) or have met the math prerequisites before registering. Please refer to the MAE website at https://arc.ucr.edu/mae for placement information.

For details about the UC policy on intercampus reciprocity of breadth requirements and the UC policy on the Intersegmental General Education Transfer Curriculum, see below.

Intercampus Reciprocity Policy Regarding Breadth/General Education Requirements
Students who transfer from one UC campus to another and who have completed the Breadth/General Education (B/GE) requirements of the campus from which they have transferred (except for upper-division B/GE requirements) will be considered to have met the B/GE requirements of the campus to which they transfer.

Courses taken for B/GE requirements at the campus from which they transfer will be accepted toward the appropriate B/GE requirements of the campus to which they transfer.
Intersegmental General Education Transfer Curriculum (IGETC) Policy

The Intersegmental General Education Transfer Curriculum (IGETC) is a series of courses offered in the California community colleges that transfer students may complete as a way to satisfy the lower-division breadth/general education requirements at the UC or the California State University. The IGETC program is administered through the California community college system. Completion of the IGETC must be certified by a community college counselor and submitted to UCR with the student’s final transcript.

The IGETC is accepted for students pursuing majors in the College of Humanities, Arts, and Social Sciences; The School of Education, The School of Business, and The School of Public Policy, as extensive major preparation is not required at the lower-division level. All students should ensure that the CHASS Student Academic Affairs office or SOE Undergraduate Programs office or the Undergraduate Business Programs Office have received the certified IGETC during their first quarter of UCR attendance.

The College of Natural and Agricultural Sciences does not accept IGETC, although courses taken to satisfy IGETC may be applied toward the college’s breadth pattern. Although the Bourns College of Engineering (BCOE) accepts completion of IGETC as satisfying the majority of the college’s breadth requirements for transfer students, some additional breadth coursework may be required after enrollment at Bourns. For more information on BCOE breadth requirements, go to https://student.engr.ucr.edu/policies/requirements/breadth.html. Prospective applicants are strongly encouraged to focus on preparatory course work for their desired major, such as mathematics, science, and other technical preparatory course work, rather than on IGETC completion. (Strong technical preparation is essential for success in the admissions process, and subsequently, in all coursework at Bourns.) For more information, go to https://transfer.engr.ucr.edu/.

Major Requirements

A major is a coordinated group of upper-division courses giving depth to a student’s work in a chosen area. A list of degrees offered and possibilities for establishing individual majors are described in each college section below. Degrees are also listed in the front of the catalog. A student should choose a major not later than the beginning of the junior year. However, a choice of major before that time facilitates program planning in most academic fields.

The departmental major represents advanced and relatively specialized work in one of the academic disciplines in the college. The interdepartmental or nondepartmental major is broader in scope and usually based upon two or more disciplines. The individual major is designed for the student who has an unusual but definite academic interest for which no suitable major is offered.

Major requirements are described in detail in the Programs and Courses section of this catalog under the department or program offering the major.

The responsibility for fulfillment of all degree requirements — general university, college, and major — rests with the student. Students are urged, however, to seek program counseling with appropriate advisors.

Assignment to a major or to the undeclared category (open to freshman and sophomore students) is based on the student’s choice indicated on the Application for Admission. The student should enroll in accordance with this choice; changes may be made following course enrollment.

Change of Major

Students may transfer from one major to another, elect a double major within their college, or add a second major in another college by filing a declaration with the dean of the colleges concerned. Students must be in good academic standing and meet eligibility requirements to change or add majors.
Graduate students at UCR are an essential part of the university’s distinguished research teams and full partners in the undergraduate teaching mission of the faculty. Founded as a research institution in 1907, Riverside is the oldest of the UC’s southern campuses. UCR combines the intellectual and material resources of the UC system with a uniquely intimate research environment, fostering a type of frequent and high-powered faculty-student contact unavailable at other universities.

Graduate degrees at UCR are research degrees, certifying that students are trained in the techniques of independent inquiry and have demonstrated the capacity to make unique contributions to their fields. Occupying a distinctive niche in disciplines ranging from chemistry to critical dance studies, computer science to economics, UCR offers graduate and professional programs leading to the degrees of doctor of philosophy, master of arts, master of business administration, master of education, master of finance, master of fine arts, master of professional accountancy, master of public policy, and master of science.

Administration

Campus regulations concerning graduate education are set by the Graduate Council, a committee of the Academic Senate, and carried out by the Graduate Division staff under the direction of the Graduate Dean.

Each academic program has a graduate advisor appointed by the Graduate Dean. Advisors assist students in program planning and completing degree requirements and write a yearly evaluation of each student’s progress toward the degree. Students should make an effort to confer regularly with their graduate advisor.

Graduate Student Association

The Graduate Student Association (GSA) seeks to represent the views of graduate students and promote their interests with the faculty and administration, both at the campus level and universitywide. All graduate students whose fees include the GSA fee are members. Further information can be found under Graduate Student Association in the Services for Students section of this catalog. For more detailed descriptions of GSA activities and services, visit gsa.ucr.edu.

Application and Admission

The admission process has as its prime objective the selection of those students most likely to complete their chosen graduate programs with distinction. After consultation between the program and the Graduate Division, the final authority to admit rests with the Graduate Dean.

Applicants are initially reviewed and rated based on their undergraduate and, where appropriate, postbaccalaureate GPAs. The minimum requirement for admission to graduate status is the bachelor’s degree or its academic equivalent from an accredited institution. However, the evaluation process is intended to be flexible, and programs take a variety of other factors into consideration when making their admissions recommendations, including GRE or other test scores, GPA in the major subject, letters of recommendation, and the reputation of the degree-granting program or institution.

Soon after the program forwards its recommendation to the Graduate Division, the applicant is notified of the dean’s decision. If admission is offered with work still in progress, official transcripts reflecting the satisfactory completion of this work and the awarding of the degree (where appropriate) must be submitted as soon as possible. An offer of admission is valid for a specific quarter only. Accepted students who wish to be admitted for a subsequent quarter may submit a deferment request. If additional course work has been completed, submit updated transcripts.

Applicants should apply at grad.ucr.edu/apply.

Campus-wide application deadlines for domestic students are August 1 for the fall quarter, November 1 for the winter quarter, and February 1 for the spring quarter. Visit graduate.ucr.edu/app_deadlines.html for deadline information.

The deadline for students seeking fellowship awards, teaching or research assistantships, and other merit-based forms of support is January 5.
These deadlines may vary somewhat by program, so applicants should not hesitate to contact programs directly for additional information. Please refer to International Student Admissions section below for information about international student deadlines.

A nonrefundable application fee must be submitted at the time of application:

Domestic application fee (AB540 and/or DACA status, US citizens, and US permanent residents):
- $135 all programs (except Business Analytics, M.B.A, M.Fin., & M.P.Ac.)

International application fee (non-immigrant):
- $155 all programs (except Business Analytics, M.B.A, M.Fin., & M.P.Ac.)

The following must also be submitted:
1. Official transcripts from each college or university attended since high school
2. Three letters of recommendation are required by most programs
3. Graduate Record Examination (GRE) general test score is required by some programs

Some programs also require the appropriate GRE subject test. GRE scores are not required for the teacher education credential programs or the MFA programs in Creative Writing & Writing for the Performing Arts, Experimental Choreography, and Visual Art. The Business Analytics, M.B.A, M.Fin., M.P.Ac. & Ph.D. in Business Administration programs accept either the Graduate Management Admission Test (GMAT) or the GRE. Test scores should not be older than five years.

Domestic applicants whose first language is not English and who have not earned an undergraduate (bachelor’s or first-degree equivalent) or advanced degree (master’s or doctorate) at an institution where English is the exclusive language of instruction must provide proof of English proficiency. Please see complete information below under International Student Admission.

</table>

*Applications are not accepted from students wishing to work toward the master’s degree only.
*A combined 4+1 program is offered in this discipline (designed to lead to a bachelor’s degree and master’s degree in five years.)
International Student Admissions

International students follow the same procedures and are governed by the same regulations as domestic applicants with the following exceptions.

Applicants whose first language is not English and who have not earned an undergraduate (bachelor’s or first-degree equivalent) or advanced degree (master’s or doctorate) at an institution where English is the exclusive language of instruction must submit scores from the Test of English as a Foreign Language (TOEFL). This exam is administered by the Educational Testing Service and offered in nearly every country abroad. The minimum acceptable scores are: 550 for the written exam; 213 for the computer-based exam (IBT). Applicants should arrange to take the examination in their home country by visiting ets.org.

The TOEFL must be taken no more than two years prior to the intended quarter of enrollment.

Applicants may submit scores from the Academic Module of the International English Language Testing System (IELTS). This exam also must be taken no more than two years prior to the intended quarter of enrollment at UCR. The minimum acceptable score is an overall bandscore of 7 with no score less than 6 on any individual component. Please request an official Test Report Form (TRF) from the test center where the test was taken.

Admitted international students will be required to provide a minimum verification of support (based on program) after accepting an offer of admission. The International Students and Scholars office will be unable to issue a Certificate of Eligibility (I-20 or DS2019) without evidence of the applicant’s ability to pay all fees and expenses for the duration of the program of study.

Application deadlines for international students are June 1 (January 5 for admission with fellowship support) for the fall quarter, September 1 for the winter quarter, and December 1 for the spring quarter. These deadlines may vary somewhat by program, so applicants should not hesitate to contact programs directly.

The International Students and Scholars office specializes in providing information and a broad range of services to international students and can be contacted at (951) 827-4113 or visit international.ucr.edu.

Reapplication

Students who have no student status or are not identified as ready to enroll, will have to reapply to the University to continue in their degree programs. They should follow the same process as new students to apply for readmission. The Graduate Division will retain a students’ file for five years. Students applying for readmission within that five year period will not have to provide the University with new transcripts if they have not enrolled elsewhere but will need to provide a new statement of purpose and one letter of recommendation. Students who have been gone over five years must order transcripts from all former institutions attended.

Students will be held to the new catalog requirements at the time of readmission and will lose their candidacy when they fail to maintain continuous enrollment unless the Graduate Dean approves an exception. Students may return on filing fee status to graduate if they have not used it before and the Dean approves an exception and allows them to reenter under their original catalog requirements and approves their continued advancement to candidacy.

Teaching Credential Programs

Prospective applicants to teaching credential programs should contact the UCR School of Education, education.ucr.edu for admission information and application materials or see School of Education later in this catalog.

Degrees and Programs

The minimum requirements for master’s and doctor of philosophy degrees are outlined below. Individual program requirements are described in the Programs and Courses section of this catalog.

Foreign Language Requirement

Each program determines what, if any, knowledge of a foreign language or languages should be required of students pursuing graduate degrees. Proficiency in a foreign language may be demonstrated by (1) passing a written examination administered by the department or program or (2) successfully completing a course or courses specified by the program or (3) alternative methods outlined by the specific program. With the support of the program and the approval of the graduate dean, students may receive credit for foreign language examinations or course work completed not more than four years before being admitted to graduate study at UCR.

Professional Development Requirement

Professional development training is required for all MS, MA, MFA, MPP, and Ph.D. programs. Such training is ideally designed to help students achieve mastery of some core competencies including communication (e.g., writing and publishing, presentation skills, networking); academic development (e.g., skill building in teaching and mentoring, grant writing); leadership and professionalism (e.g., abilities in research/scholarship, professional ethics, and inclusiveness); and career development (e.g., strategies for success in graduate school and the profession, maintaining work/life balance, time management, and career and job market guidance). This list is not meant to be exhaustive or prescriptive, but rather to reflect the range of skills our students need to be successful.

Each program determines the format, content, and extent of its training in order to make it specific to, and appropriate for, the discipline. Training must be for unit credit and may be delivered as a single course or as portions of multiple courses. The courses must be listed in the catalogue and clearly noted as serving to meet the professional development requirement.
Standards of Scholarship
GR 1.2 Standards of Scholarship and Disqualification

Graduate students are expected to prove themselves worthy of the privilege of advanced study and research offered at the university by making acceptable progress towards degree objectives and maintaining the standards of scholarship established by the Graduate Council.

Acceptable Progress includes, but is not limited to:
1. Completing courses with letter grades of “C-” or better or “S”. Only these grades and higher may count toward satisfying graduate degree requirements.
2. Completing course work and other degree requirements in a timely manner. In order to support timely progress, students may take courses outside of their required course work only with approval of the Graduate Advisor. Applying to graduate and completing the academic program once all degree requirements are met.

Students are considered to be making unacceptable progress and become subject to dismissal when:
1. Cumulative grade point average falls below the required level of 3.0 at any time or
2. Quarterly GPA in two consecutive terms falls below 3.0, even if the cumulative GPA remains above 3.0 or
3. Fail to make progress in research for two consecutive quarters resulting in NC grades in research units or
4. Program requirements such as exams or research are not fulfilled in a timely or satisfactory manner or
5. Fail to pass critical exams (including comprehensive or qualifying exams) in two attempts or
6. Does not have a faculty advisor to supervise research in accordance with the standard of practice in the student’s program or
7. PhD students not advanced to candidacy by their 15th quarter or any student not having completed all degree requirements within one year beyond normative time.

After consultation with the appropriate department or graduate group, the Dean of the Graduate Division will notify students who become subject to dismissal of action taken.

Courses must be completed with letter grades of C- or better or S. Only these grades or higher may count toward satisfying graduate degree requirements. To continue in good standing and obtain an advanced degree, students must complete course work and other degree requirements. In order to support timely progress, students may take courses outside of their required course work only with approval of the Graduate Advisor. In addition, students must apply to graduate and complete their academic program once all degree requirements are met. Students are considered to be making unacceptable progress and become subject to dismissal when:

- cumulative grade point average falls below the required level of 3.0 at any time or
- quarterly GPA in two consecutive terms falls below 3.0, even if the cumulative GPA remains above 3.0 or
- failing to make progress in research for two consecutive quarters resulting in NC grades in research units or
- program requirements such as exams or research are not fulfilled in a timely or satisfactory manner or
- failing to pass critical exams (including comprehensive or qualifying exams) in two attempts or
- does not have a faculty advisor to supervise research in accordance with the standard of practice in the student’s program or
- PhD students not advanced to candidacy by their 15th quarter or any student not having completed all degree requirements within one year beyond normative time.

Academic Standing is noted internally in the student profile, not publicly on the transcript or diploma.

Good Standing means the student has at least a 3.0 GPA both cumulative and quarterly.
Minimum Degree Requirements

Master’s Degree

The minimum required period of residence in the University is one academic year (3 quarters) of which two quarters must normally be spent at the University of California, Riverside. A candidate for a higher degree is regarded as a student in residence in a regular term only if he/she is actually enrolled in at least four units of upper division and/or graduate work; or, in a ten-week summer session at least four units.

The master’s degree can generally be earned in one of two ways: by writing a thesis or by passing a comprehensive examination. Some programs offer only one of these options.

Both plans require a minimum of 36 quarter units of graduate (200 level) or upper-division (100 level) undergraduate work in the major subject or some other subject deemed relevant by the program faculty. Many programs have additional requirements. Courses at the 300 and 400 level do not count towards this minimum requirement.

Unless otherwise stated in the program description, the normative time required to complete the master’s degree is two years.

Plan I (Thesis) requires that at least 24 units be in graduate (200 level) level courses taken at a University of California campus (see residency requirements). Of these, only 12 may be in graduate research for the thesis and, in most cases, none may be in courses numbered 291 (exam preparation). Students are guided by a committee of three faculty who must be approved by the Graduate Dean. In addition to requiring an acceptable thesis, the department may require any examination that it feels necessary to confirm that the student has an appropriate knowledge of the discipline. Once completed the thesis must adhere to University standards and be filed in the Graduate Division electronically.

Plan II (Comprehensive Examination) requires that at least 18 units be in graduate (200 level) level courses taken at a University of California campus (see residency requirements). Of these, only 12 may be in directed research, none may be in graduate research for the thesis and, in most cases, none may be in courses number 291 (exam preparation). Students must take a comprehensive examination, the content of which is determined by the department or program. No more than two attempts to pass the exam are allowed.

Master’s students in residence and in good standing may earn course credit by examination. Consult the departmental graduate advisor for further details.

Advancement to Candidacy in Master’s Program

Students must file for advancement to candidacy no later than the first week of the quarter in which they expect to receive their degree. Some degree requirements may be in progress at that time. The advancement to candidacy form is available through R’Grad (via R’Web) or directly at rgrad.ucr.edu. Students must complete all requirements for the degree by the last day of the quarter in which they intend to graduate. Students cannot graduate with an incomplete grade unless they are continuing in a PhD program. Students may not graduate with a GD grade outstanding. Students must be enrolled or on filing fee status to complete degree requirements. If they were enrolled (or on filing fee status) every quarter of the previous academic year then they may complete during the summer without paying fees.

Duplication of Degree

Permission to work for a second master’s degree may be approved when there is little relation in content between the two degrees. Duplication of a master’s degree in a single field is allowable only with permission of the Graduate Dean.

Pursuit of a second doctorate is not permitted for currently enrolled graduate students. It is rarely permitted for students when they first apply to the University. For the Graduate Dean to consider such an exception it must be in a fundamentally unrelated area and there will be no duplication or waiving of coursework if approved.

Continuing from the Master’s to the Doctorate

Students who are enrolled in a master’s program may petition to pursue the doctorate in their field of study. To do so, they should file a Change in Degree Objective Form with the Graduate Division while they are enrolled. Approval by the department is not automatic; the department determines whether or not each student has the academic potential to succeed in its PhD program. This requirement for evaluating each student’s potential and academic fitness to proceed toward the PhD is enforced regardless of the student’s initial degree objective at matriculation.

Doctoral Degree

The minimum academic residence for the PhD is six quarters at the University of California, three of which must be spent in continuous residence at UCR. The normative time required for the PhD varies considerably and is given at the end of each program’s description in the Programs and Courses section of this catalog. For the doctoral degree, normative time is defined as the period of full-time registration required to earn the degree. For most UCR programs, this is between five and seven years.

The doctorate, the highest degree the university can bestow, is a research degree, conferred on the recommendation of a doctoral committee, which is nominated in consultation with the student by the program faculty and confirmed by the Graduate Dean.

Because the PhD is a research degree, the university gives programs considerable latitude in establishing degree requirements. The individual student’s program of study is planned in consultation with the graduate advisor, who supervises the student’s progress prior to the appointment of the doctoral committee.

A doctoral program generally involves two stages. The first stage is spent fulfilling the requirements established by the program or department and the Graduate Council, typically a series of courses culminating in written and oral qualifying examinations. When these are passed, the student is advanced to candidacy for the PhD.

The second, or in-candidacy stage, is devoted primarily to independent study and research and to the preparation of the dissertation. The doctoral dissertation must be an original work of research in the candidate’s chosen field of specialization. The doctoral committee determines the acceptability of the dissertation and may require that the student defend its contents in a final oral examination.

Candidate in Philosophy

A PhD student who is advanced to candidacy and has to leave UCR without a degree may apply for the Candidate in Philosophy. This is awarded only to students leaving UCR without a master’s or doctoral degree.

Designated Emphases

All graduate students admitted to a PhD program may participate in a Designated Emphasis (D.E.), a specialization that might include a new method of inquiry or an important field of application related to two or more existing PhD programs. The Designated Emphasis is awarded in conjunction with the PhD degree and is signified by a transcript designation. Graduate students who have completed a Designated Emphasis may be more competitive candidates for positions in their primary disciplines. For a complete list of D.E.’s visit graduate.ucr.edu/petitions-and-forms.

Special Programs

GradSuccess

Located in UOB 141, GradSuccess (graduate.ucr.edu/gradsuccess) supports graduate student retention, degree completion, and post-degree career outcomes through a diverse range of programs, events, expert consultations, and peer support. As graduate students, you are the engine of a research university, and GradSuccess is your fuel. We offer the following programs:

- Graduate Student Resource Center (GSRC) gsrc.ucr.edu: develops and coordinates various opportunities and events with one goal in mind: to help you succeed both academically and professionally as outstanding, well-rounded, and healthy scholars. From weekly coffee socials and peer support office hours, to
quarterly stress-relief fairs and professional development seminars, GSRC is your first stop on the path to building a grad student community and a rewarding post-grad career.

- **Teaching Assistant Development Program (TADP)** [tadp.ucr.edu](http://tadp.ucr.edu): provides training, support, and pedagogical development for the nearly 1,000 graduate students employed as teaching assistants. TADP offers orientations, workshops in pedagogical methods, and one-on-one mentoring, as well as recognizing excellence in assistant teaching.

- **University Teaching Certificate Program (UTC)** [utc.ucr.edu](http://utc.ucr.edu): is a competitive instructional training and certification program for students planning a career in teaching at the college level. Students completing the two-quarter program develop student-centered teaching and active learning strategies, design a teaching philosophy, and become members of the professional teaching community.

- **Graduate Student Mentorship Program (GSMMP)** [gradmentors.ucr.edu](http://gradmentors.ucr.edu): pairs 80 incoming graduate student mentees with both peer and faculty mentors in their own or related disciplines. Over the course of their first academic year, mentees gain access to support, advice, resources, and community.

- **Graduate Writing Center (GWC)** [gwc.ucr.edu](http://gwc.ucr.edu): provides writing support and instruction in any academic genre during any stage of the writing process. Located in UOB 122, the GWC offers free workshops and writing consultations, as well as summer fellowship preparation programs, dissertation writing support, and specialized disciplinary courses.

- **Graduate Quantitative Methods Program (GradQuant)** [gradquant.ucr.edu](http://gradquant.ucr.edu): offers trainings on a variety of topics, including remedial, introductory, and advanced methods; data management; probability and statistical inference; statistical software and computing; and professional ethics in data management/analysis. Located in LFSC 1425, GradQuant’s highly trained staff also provide consultations and drop-in hours.

### Intercampus Exchange
The Intercampus Exchange Program (ICE) allows students to register for up to three courses at another UC campus. To be eligible, students must be in good standing with at least one quarter in residence at UCR and demonstrate at least one of the following: the need to take a course or courses not offered at UCR, the need to study with a particular individual, or the need for continuous access to library holdings or other facilities not available at UCR.

### Education Abroad
Education Abroad provides students with the opportunity to study, intern, or conduct research abroad. To be eligible, students should have completed one year of graduate study, be making acceptable progress toward the degree, and know the language of the host country. Applications and information can be obtained from the Education Abroad office. Additional information about Education Abroad can also be found in the Educational Opportunities sections in the beginning of this catalog.

### Fees and Financial Support
See Fees and Expenses under the Finances and Registration section of this catalog for a list of estimated expenses and a schedule of mandatory quarterly fees. Deadlines for paying fees are published quarterly at registrar.ucr.edu.

Graduate students serving as teaching assistants (TAs) or graduate student researchers (GSRs) who are appointed at 25 percent time (10 hours per week) or more qualify for a remission of the student services fee and tuition. Nonresident supplemental tuition is paid for nonresident GSRs who are appointed 45 percent time or more for an academic term, are not receiving any other form of support which pays the nonresident tuition, and who meet the eligibility requirements for the GSR title. Students should check with their departments for further information on these fee remissions.

All students who are considered nonresidents for tuition purposes and are advanced to candidacy for the Ph.D. on or before the first day of instruction will receive a reduction of 100 percent of the nonresident supplemental tuition. Each student is eligible for this reduced nonresident supplemental tuition rate a maximum of three calendar years. Time spent not registered (withdrawn, on leave, or filing fee status) will count toward the three-year total unless the Graduate Dean grants an exception. A student must be advanced by the first day of instruction to qualify for that term.
Loan Programs
Federal Direct Subsidized Loans and Federal Direct Unsubsidized Loans are available to graduate students through the Financial Aid Office. Students should contact the Financial Aid Office or check financialaid.ucr.edu for a FAFA if they want to be considered for these federal loan funds.

Research Grants
Dissertation Research Grants provide funds to doctoral candidates for research-related expenses associated with the dissertation. Applicants must be advanced to candidacy and plan to be registered during the period of the award. Proposals may be funded up to a maximum of $2,000. Applications are available at graduate.ucr.edu/funding#fellowships.

The Master’s Thesis Research Grant is for students enrolled in the Anthropology (M.S. degree only), Art History, Creative Writing and Writing for the Performing Arts, Experimental Choreography, Southeast Asian Studies, and Visual Art for the purposes of expenses directly related to thesis research. Applications are available at graduate.ucr.edu/funding#fellowships.

Graduate Student Association Conference Travel Grants help to meet the financial needs of students who have been invited to present scholarly papers or posters at regional and national professional conferences. The program, administered by the UCR Graduate Student Association, funds both conference attendees and presenters, with attendees reimbursed at one half the rate of presenters. The percentage of reimbursement is set monthly and is based on the volume of applications received. More information can be found at https://gsa.ucr.edu/cts/.

The Earl C. Anthony Graduate Student Travel Awards are available for PhD students who have advanced to candidacy in the biological, physical, agricultural, engineering, mathematics, and health sciences fields, and in interdisciplinary approaches to these fields, to attend national or international meetings/conferences. Applications are available at graduate.ucr.edu/funding#fellowships.

UCR Emeriti Association Graduate Student Travel Award supports graduate students traveling to a national or international professional society conference, symposium, or workshop to present and defend research is a critical part of graduate student education. Travel to access resources available at another institution, museum, private collection, or field site can be essential to the completion of a graduate student’s research.

The UC President’s Pre-Professoriate Fellows (HSI) Award’s goal is to enhance faculty pathways for historically underrepresented groups, particularly Latinx, African Americans, American Indians/Native Americans, Filipinx, and Pacific Islanders in all disciplines; women in STEM; and Asian Americans in the humanities and social sciences. The intent of the program is to provide fellowships for domestic historically underrepresented minorities from California HSIs. For the UC-PFFFF (HSI) application form, please contact your graduate advisor. Each graduate program will be submitting their nominees to Graduate Division.

The Graduate Research Mentoring Program (GRMP) award is intended to enhance the mentoring of domestic PhD students entering their 3rd, 4th, or 5th year of graduate school who are actively engaged in research. This award provides up to three quarters of support, plus fees. For the GRMP application form, please contact your graduate advisor. Each graduate program will be submitting their nominees to Graduate Division.

The Dissertation Year Program (DYP) Award is intended to provide support to PhD students who are nearing completion of their dissertation research and expect to complete their dissertation within the academic year in which the award is granted. This award provides up to three quarters of support, plus fees. For the DYP application form, please contact your graduate advisor. Each graduate program will be submitting their nominees to Graduate Division.

Registration, Enrollment and Transfer of Credit
Continuous Registration
Unless a leave of absence has been granted, students must register for every academic quarter once their graduate studies begin. Students must either be registered or on filing fee status in the quarter in which the degree is awarded. If a student was enrolled or on filing fee status every quarter of the previous academic year, then they may complete their degree during the summer without paying fees.

Filing Fee Status
Students who have completed all degree requirements except for filing their dissertations/theses or sitting for their master’s comprehensive examinations are eligible for filing fee status during the final quarter of residence. For students writing dissertations or theses, the student’s committee must have read and approved a draft of the manuscript, with only minor revisions remaining.

Students on filing fee status pay only one-half of the student services fee. Because filing fee status is tied to that fee, it can vary from quarter to quarter. See registraion.ucr.edu for information on fees. Only one quarter on filing fee status is allowed, unless a student fails the master’s comprehensive exam. Then a retake of the exam on filing fee status is allowed. Students who fail to complete their degree programs by the appropriate deadline while on filing fees status must register and pay full fees for the following quarter.

Leave of Absence
A leave of absence is intended to allow the temporary interruption of the student’s academic program. Leaves are granted for the following reasons:

1. Serious illness or other temporary disability
2. The need to concentrate on a job or occupation not directly related to the degree program
3. Family responsibilities

To be eligible for a leave of absence, students must have the approval of their graduate advisor, be in good standing, and have been enrolled for at least one quarter. Leaves are not normally granted for more than one year.

Since students on leave do not pay fees, they may not use university facilities or make demands on faculty time. Students on leave are ineligible for fellowships, research grants, and financial aid. Appointment as a graduate student researcher or teaching assistant, or any other appointment requiring full-time enrollment, is not possible. Nor can students on leave take qualifying examinations or receive credit for academic work done during the leave period.

In Absentia Registration
Students pursuing graduate study or research more than 100 miles from the UCR campus for an entire quarter may register in absentia and receive an 85 percent reduction in the student services fee and tuition. Refer to the Finances and Registration section of this catalog for a schedule of fees. In absentia registrants are normally advanced to candidacy for the doctorate; master’s candidates are normally in the stage of researching the master’s thesis.

Withdrawal
Students who withdraw during the first five weeks of a quarter are entitled to a partial refund of fees. The amount of the refund is determined by the number of calendar days elapsed between the first day of instruction and the date on which a withdrawal form is filed with the Graduate Division. See the Schedule of Refunds in the Finances and Registration section of this catalog. Students who have applied for the Deferred Payment Plan are considered registered students and are held to the same refund schedule.

Students who are unable to file the necessary paperwork due to illness or emergency should contact their academic program immediately.
Lapse of Candidacy
Candidacy for the degree may lapse after withdrawing or failing to register at the end of a leave of absence.

Enrollment
Each quarter, graduate students must pay their fees, or ensure their fees are paid, and enroll by the date indicated at registrar.ucr.edu. Course schedules require the prior approval of the departmental graduate advisor.

All graduate students are expected to carry a full academic course load unless good reasons exist for not doing so. Graduate students are considered to be full time if they are carrying 12 graduate units. Courses for research (e.g., 297, 299) and professional level courses (300 and 400) may only be required for completion of academic degree requirements. When a course program contains both graduate and undergraduate courses, the table on this page is used to calculate the appropriate course load.

Half-Time Study and Reduced Fees
The regulations regarding a reduction in fees for attending half-time is set by the Office of the President. It is only approved for students who cannot attend full-time for reasons of occupation (full-time employment outside the university), unusual family responsibilities, or poor health. Students may not be advanced to candidacy for the PhD and can only enroll in 6 units or less. Employees may not apply for this reduction in fees unless they do not meet the requirements of the Employee Reduced Fee Program. International students should be aware that federal regulations governing student visa status require full-time attendance. University financial aid is not available for students taking less than six units of course work. Eligibility for deferment of student loan repayment obligations may be in jeopardy as well. Students should consult the Student Business Office of the University where they incurred their debt for specific information.

The application must be submitted to the Graduate Division two weeks before fees are due unless students want to pay their full fees first. If full fees are paid first, a refund will be processed. In no event may the student turn in a petition after the third week of the quarter.

Transfer of Credit
A maximum of 8 quarter units from institutions outside the University of California may be counted towards the master’s degree at UCR. All transfer work must have been completed in graduate standing with a minimum grade of “B.” Units cannot be transferred if the student earned a degree. These units may not be used to reduce the minimum number of graduate level units required (24 units required for the thesis plan and 18 units required for the comprehensive exam plan).

Department and Graduate Division approval must be obtained before these units can be accepted for credit. Units are transferred as “Satisfactory” (S) with no grade point value.

Since doctoral students do not have a strict unit requirement they do not need to transfer in units.

Students may apply summer sessions course work from any UC campus toward their graduate degree requirements if they have the prior approval of their departments and of the Graduate Dean.

Units from another UC campus may be used to satisfy one of the three quarters of the residence requirement and may be counted for up to one-half of the total units required for the UCR master’s degree. Department and Graduate Division approval must be obtained before such units can be accepted for credit. Units cannot be transferred if the student has earned a degree from that campus.

In addition, students may transfer up to 8 units of concurrent enrollment credit. Concurrent enrollment means that a student took regularly scheduled UCR classes but was not an admitted student and paid for the class through UCR Extension. Students must have taken these units before their enrollment as graduate students. Matriculated graduate students (including students on leave of absence) may not enroll in course work through Extension without the Graduate Dean’s approval. Graduate students who withdraw before completing their program objectives, then take courses through Extension are required to wait one year before applying courses to their degrees. Grades from UCR Extension courses will be recorded on student transcripts.

Backdating
UCR graduate students may use, with the approval of their Graduate Advisor, any relevant 200-level course(s) taken during a UCR bachelor’s program toward a graduate degree at UCR, excluding any 200-level course(s) approved to count for bachelor’s degree, unit, or GPA requirements. Alternatively, the Graduate Advisor may approve waiving degree requirements based on 200-level courses taken as a UCR undergraduate and require the student to complete minimum unit requirements while enrolled in a graduate program.

Substituting and Waiving Course Work
All substitutions or waivers of degree requirements must be reviewed by the Graduate Adviser and approved by the Graduate Dean, prior to the beginning of the quarter. Waiver of course work will not reduce the minimum number of units required for a master’s degree.
COLLEGES AND ACADEMIC PROGRAMS

College of Humanities, Arts, and Social Sciences

Student Academic Affairs
3400 Humanities and Social Sciences
University of California, Riverside
Riverside, CA 92521
(951) 827-3683; fax (951) 827-5836
chass.ucr.edu

The degree programs in the College of Humanities, Arts, and Social Sciences are designed to introduce students to both the breadth and depth of the university’s curriculum. This is accomplished by combining a wide distribution of courses with the opportunity to concentrate on course work in depth in a selected field. To achieve the first goal, students are required to take a wide range of lower-division courses that explore the diversity of human knowledge. In the upper-division curriculum, students are relatively free to concentrate in depth in their major field of interest.

Majors

A major is a coordinated group of upper-division courses (courses numbered 100-199) in a field of specialization. The major may be a program of upper-division courses within a single department (departmental major), a group of related courses involving a number of departments (interdisciplinary major), or a group of courses chosen to meet a special interest (Humanities, Arts, and Social Sciences individual major).

Before enrolling in certain upper-division courses, students may be required to gain appropriate knowledge by completing specific prerequisite courses. With the assistance of a departmental advisor, students are expected to select lower-division courses that prepare them for the advanced studies they propose to follow.

Choosing a Major, Undeclared Majors

While freshmen may choose an academic major on entering UCR, those who are unsure about specific academic goals may request to be admitted to the college as undeclared. These students often take introductory courses in the natural sciences, social sciences, humanities, and fine arts while searching for an area that most excites their interest. Undeclared majors are encouraged to meet with an advisor in the Student Academic Affairs Office about their selection of courses.

Students with 90 or more units toward a degree must declare a major. To declare a major, students must obtain approval from the department offering the major and from the Student Academic Affairs office. Students who do not declare a major by 90 or more units may have a hold placed on their registration.

If undeclared majors feel that their interests lie in the areas of the natural and agricultural sciences, mathematics and statistics, or engineering and computer science, the College of Humanities, Arts, and Social Sciences (CHASS) Transition Advisor should be consulted. Contact information for the CHASS Transition Advisor, as well as information on the CHASS Transition Policy, can be found on the CHASS Student Affairs website.

Double Majors

Students can declare a second major within the College of Humanities, Arts, and Social Sciences or a second major in a department or program of another college. Changes of major are not permitted while on academic probation or during the final senior year (135 units or more). Both majors must be completed within the maximum limit of 216 units, and approval must be obtained from advisors in both departments or programs. In such cases, all course requirements must be completed for each of the two majors chosen. One of the two majors must be designated as the primary major for the purpose of satisfying breadth or general education requirements. No more than 8 upper-division units may count for both majors simultaneously.

A declaration of two majors in different colleges must be signed by the deans of the colleges concerned and filed by the student with the college of the principal major. If the two majors lead to different degrees (B.S. and B.A.), that fact will be noted on the transcript, but only one diploma indicating both degree designations will be issued upon successful completion of such a program. Furthermore, if the double major is a mixed B.S./B.A., the college requirements for both majors must be met.

Students wishing to declare a second major must present an outline to the Student Academic Affairs Office, indicating which major will be used to satisfy breadth requirements and any overlap courses between the two majors.

Interdisciplinary, Individual Majors

Humanities, Arts, and Social Sciences Interdisciplinary Major offers courses of broad interest, and students with interests not readily satisfied through existing departments and programs may develop individual majors under the direction of special faculty sponsors. The consent of the Humanities, Arts, and Social Sciences Interdisciplinary Program Committee and the associate dean are required. The title of the major will be entered on the official degree list and on the official transcript. Diplomas will read “Humanities, Arts, and Social Sciences Interdisciplinary” with the individual field of concentration specified.

Liberal Studies Major

Students planning to become elementary school teachers should consider declaring the Liberal Studies Major. The lower-division core of courses prepares students with subject matter preparation in the required subjects of the California Department of Education K-6 Frameworks. The upper-division requirements allow students to build upon their strengths and interests and at the same time provide them with a connection to the core Education courses.

This major achieves the goal of a rigorous major while providing prospective teachers with the broad undergraduate education required for elementary school teaching. See information on these programs in the Programs and Courses section of this catalog. Several of the college’s regular major programs have an interdisciplinary emphasis that allows examination of a particular problem, theme, or area from a variety of perspectives.
Internships, Independent Projects, and Student Research

The Humanities, Arts, and Social Sciences student can often practice the subject, as well as read about it. Many undergraduates have the opportunity to work with a faculty member on a research project, and many departments offer field work and internship courses. In these courses, students combine several hours per week of experience in an agency or firm with study of related academic materials and participation in a seminar, where formal knowledge and practical experience are related to one another. Internship experiences are regularly available in settings such as public and business administration, politics, environmental protection, social welfare, criminal justice, clinical and other psychology programs, museums and archival installations, newspapers, and art galleries.

Normally, each local internship does not count for more than 4 or 5 units in a single term, larger numbers of units being reserved for quarter-away internships. Petitions for credit beyond 5 units in a single quarter for a local internship must have the sponsoring agency’s approval and a written justification by the student’s faculty sponsor. All such requests require the associate dean’s approval.

A maximum of 16 units of credit toward the bachelor’s degree may be obtained through internship courses, with a maximum of 12 units of internship scheduled in a single quarter for quarter-away situations. Students who are on academic probation may not enroll in internship courses.

Transfer of Majors, Changing Majors

College of Humanities, Arts, and Social Sciences. Admission is selective based on GPA in all transferrable coursework with a minimum GPA of 2.4. Neuroscience and Psychology applicants must have a minimum GPA of 2.7 in all transferrable college coursework. Psychology applicants must also have a minimum of one UC transferrable mathematics course equivalent to Math 004 or higher. For further information call Student Academic Affairs at (951) 827-3683.

Minors

The College of Humanities, Arts, and Social Sciences offers minor programs; however, no student is required to take a minor. Minors are not degree-granting majors; they are sequences of supplemental courses designed to enhance work in certain areas. Any minor may be taken jointly with any departmental or interdepartmental major. Minors in the college shall consist of not fewer than 16 nor more than 28 units of organized upper-division course work. No overlap may occur among courses used to satisfy upper-division course requirements for a major and a minor. A GPA of at least 2.00 is required in upper-division courses in the field of the minor.

A minor is a set of courses focused on a single discipline or an interdisciplinary thematic area. There can be no substitution for the courses listed as constituting a minor without approval of the governing department or committee. There is no limit on the number of minors a student can declare.

Students must declare the minor(s) before their final degree check before graduating by completing a petition with the Student Affairs Office in the College of Humanities, Arts, and Social Sciences, the College of Natural and Agricultural Sciences, or the Bourns College of Engineering, depending on their major. Prior approval by the department or committee offering the minor is required. The minor is noted on the transcript at the time the degree is conferred.

University Honors Program

For a description of the University Honors Program, see Educational Opportunities in the front of this catalog. For a listing of requirements and courses, refer to University Honors Program in the Programs and Courses section.

Undergraduate Pre-Business Program

Pre-Business is a two-year program that prepares students to apply to the Business Administration major. Students who elect Pre-Business are advised in the College of Humanities, Arts, and Social Sciences during their freshman and sophomore years. Students who elect Pre-Business must gain admission to Business Administration by the time they have earned 90 units.

Degree Requirements

Students in the College of Humanities, Arts, and Social Sciences must meet three levels of requirements for the Bachelor of Arts or Bachelor of Science degree: general university requirements, college requirements, and major requirements.

General University Requirements

General university requirements are listed at the beginning of the Undergraduate Studies section. In addition, the College of Humanities, Arts, and Social Sciences has the following requirements and limitations.

Unit Requirements

Students must satisfactorily complete for credit a minimum of 180 units for the bachelor’s degree. A maximum of 216 units is allowed. After having credit for 216 units, students are not permitted to continue except in cases approved by the associate dean in which specific academic or professional reasons are involved.

Credit Limitations

Transfer students with credit from other institutions (advanced standing credit), receive a transfer profile from the Office of Undergraduate Admissions. The Transfer Credit and Articulation Services (TCAS) office will articulate and reduce units to 105 lower division transfer units (not including UC courses). However, credit limitations may reduce the total number of units which apply toward the degree in the College of Humanities, Arts, and Social Sciences. Students should meet with an academic advisor in their major for questions regarding transfer credits.

The following credit limitations apply for all students enrolled in the college:

1. No more than 70 semester/105 quarter lower-division units completed at another institution or any combination of institutions will be allowed. Units earned at any UC campus are not included in this limitation.
2. No more than 6 units in physical education activity courses may be applied toward the 180-unit requirement for the bachelor’s degree.
3. No 400 series courses and not more than three courses in the 300 series of courses may be counted toward the 180 unit requirement for the bachelor’s degree.
4. No more than 5 units of credit may be taken per quarter in special studies courses. See specific restrictions under each departmental listing regarding credit toward the major in special studies courses.
Students must demonstrate adequate proficiency in English Composition by completing a one-year sequence of college level instruction in English Composition with no grade lower than a "C". Courses in the Writing Across the Curriculum (WAC) program and other alternatives approved by the Academic Senate designate as alternatives to English 1C may be applied toward satisfaction of the third quarter of the writing requirement if students earn a "C" or higher.

College Breadth Requirements

The Student Academic Affairs Office, in consultation with the Executive Committee of the College of Humanities, Arts, and Social Sciences, determines which courses apply to the following requirements. It is the student’s responsibility to verify those courses that fulfill these subject requirements. To search for courses that meet specific breadth requirements, visit classes.ucr.edu.

Courses taken in the department or program of a student’s major (including courses cross-listed with the major) may not be applied toward the breadth requirements except for History majors in connection with the World History requirement, English majors in connection with the English Composition requirement, Ethnic Studies majors in connection with the Ethnicity requirement, and foreign language majors in connection with the Foreign Language requirement. However, courses outside the major discipline, but required for the major, may be applied toward satisfaction of these requirements.

Students who elect a double major may apply courses in one of the majors toward satisfaction of the breadth requirements.

For the following requirements, a course is defined as a block of instruction which carries credit of 4 or more units.

No course may be applied to more than one breadth requirement, with the exception of the course taken to meet the Ethnicity requirement. Internship and independent studies courses may not be used to satisfy breadth requirements.

Courses offered by or cross-listed with Business Administration, Education, and Physical Education may not be used to satisfy breadth requirements.

**English Composition**

Students should enroll in an English composition course each quarter they are registered at UCR until the sequence of preliminary Entry Level Writing courses, if needed, and ENGL 001A, ENGL 001B, ENGL 001C (or an alternative designated by the Academic Senate) is completed with satisfactory GPA.

Transfer students who have credit for one semester of English Composition from another institution are required to take two additional quarters, i.e., ENGL 001B and ENGL 001C.

Students have the option of using a score of 3 on the College Board Advanced Placement Test in English to satisfy ENGL 001A; they must complete ENGL 001B and ENGL 001C.

Students with a score of 4 or 5 on the College Board Advanced Placement Test in English have satisfied ENGL 001A and ENGL 001B; they must complete ENGL 001C.

**Humanities: 20 units**

**For the B.A. degree**

1. One course in World History (At UCR, courses that satisfy this requirement are HIST 010 or HIST 015 or HIST 020.)

2. One course in the Fine Arts (Art, Art History, Dance, Media and Cultural Studies, Music, Theatre, Film and Digital Production, or Creative Writing courses in poetry, fiction, or playwriting)

3. Two courses from among the following:
   a) Literature (offered by the departments of English, Comparative Language and Foreign Languages, Hispanic Studies)
   b) Philosophy
   c) Religious Studies

4. One additional course from the following:
   a) History, the Fine Arts, Literature, Philosophy, Religious Studies
   b) A foreign language at level 3 or higher (Courses used in fulfillment of the foreign language requirement may not be used to meet this requirement.)
   c) A humanities course offered by Ethnic Studies, Creative Writing (courses in journalism); Humanities, Arts, and Social Sciences Interdisciplinary; Latin American Studies; Linguistics; or Gender and Sexuality Studies

**For the B.S. degree**

1. One course in World History (At UCR, courses that satisfy this requirement are HIST 010, HIST 015, or HIST 020.)

2. One course from the following:
   a) Fine arts (Art, Art History, Dance, Media and Cultural Studies, Music, Theatre, Film and Digital Production, Creative Writing courses in poetry, fiction, or playwriting)
   b) Literature (taken in the departments of English, Comparative Language and Foreign Languages, or Hispanic Studies)
   c) Philosophy
   d) Religious Studies

3. Three additional courses from the following:
   a) History, the Fine Arts, Literature, Philosophy, Religious Studies
   b) A foreign language at level 3 or above (Courses used in fulfillment of the foreign language requirement may not be used to meet this requirement.)
   c) Humanities courses offered by Ethnic Studies; Creative Writing (courses in journalism); Humanities, Arts, and Social Sciences Interdisciplinary; Latin American Studies; Linguistics; or Gender and Sexuality Studies

**Social Sciences: 16 units**

1. One course in Economics or Political Science

2. One course in Anthropology, Psychology, or Sociology

3. Two additional social science-related courses from Comparative Ancient Civilizations, Ethnic Studies; Environmental Sciences; Geography (cultural geography courses); Human Development; Humanities, Arts, and Social Sciences Interdisciplinary; Gender and Sexuality Studies; or one of the disciplines in 1. or 2. above
Ethnicity: 4 units
One course focusing on the general concepts and issues in the study of race and ethnicity in California and the United States. Courses that satisfy this requirement must concentrate on one or more of four principal minority groups (African American, Asian American, Chicano/Latino, and Native American). These courses must be comparative in nature, analyzing the minority group experience within the present and historical context of other racial and ethnic groups, such as European-American minorities. The courses are to be offered by or cross-listed with the Department of Ethnic Studies.

Refer to the Programs and Courses section for the courses that fulfill the Ethnicity requirement.

Foreign Language
Courses in American Sign Language may be used to meet this requirement.

For the B.A. degree: course level 4 or equivalent
This requirement may be satisfied by students (except for foreign language majors who satisfy the spirit of the language requirement by majoring in one or more languages) by completing the fourth-quarter level or its equivalent in one language at UCR (or at another college or university) with a minimum grade of “C” or by demonstrating proficiency at the fourth-quarter level on a foreign language placement exam offered by one of the foreign language departments at UCR. This test does not yield unit credit; it only determines whether the Foreign Language requirement has been met, or in which course of the language sequence a student should enroll. The placement exam may be taken only once in each subject during a student’s UCR career. Students continuing with the same foreign language they completed in high school must take a placement exam (visit placementtest.ucr.edu for dates and locations). Credit will be allowed only at the course level for which they qualify according to the placement exam.

For the B.S. degree: course level 3 or equivalent
This requirement may be satisfied by students (except for foreign language majors who satisfy the spirit of the language requirement by majoring in one or more languages) by completing the third-quarter level or its equivalent in one language at UCR (or at another college or university) with a minimum grade of “C” or by demonstrating proficiency at the third-quarter level on a foreign language placement exam offered by one of the foreign language departments at UCR. This test does not yield unit credit; it only determines whether the Foreign Language requirement has been met, or in which course of the language sequence a student should enroll. The placement exam may be taken only once in each subject during a student’s UCR career. Students continuing with the same foreign language they completed in high school must take a placement exam (visit placementtest.ucr.edu for dates and locations). Credit will be allowed only at the course level for which they qualify according to the placement exam.

Natural Sciences and Mathematics: 20 units
1. One course in Mathematics, Statistics, or Computer Science
2. One course in Biological Sciences (Biochemistry, Biology, Botany, Plant Sciences, Entomology, Nematology, or Plant Pathology)
3. One course in Physical Sciences (Chemistry, Physics, Earth Sciences, excluding cultural Geography courses)
4. Two additional courses from the areas listed above or in physical and/or biological science courses offered in the Department of Environmental Sciences

Major Requirements
Detailed requirements for each major can be found under the department or program listing in the Programs and Courses section of this catalog.

A major in the College of Humanities, Arts, and Social Sciences shall consist of not fewer than 36 upper-division units. All courses applied toward the major and preparation for the major must be taken for a letter grade unless otherwise approved by the department chair. A 2.00 GPA in upper-division courses in the major is required for graduation. Once enrolled on this campus, students must complete all courses designated for a major in regular or summer sessions at UCR except to this policy must be approved by the department chair and by the associate dean.

Candidates for the B.A. degree may not receive more than 80 units of credit toward the degree for work taken in the major discipline (i.e., students must take at least 100 units outside the major discipline). Music and Dance majors may count a maximum of 102 units of music course work toward the B.A. degree (i.e., students must take at least 78 units outside the Music or Dance major).

Candidates for the B.S. degree may not receive more than 108 units of credit toward the degree for work taken in the major discipline (i.e., students must take at least 72 units outside the major discipline).

To receive the bachelor’s degree, transfer students must complete a minimum of 16 upper-division units in the major on the Riverside campus.

Students who have been away from the university for several terms should consult with their major departmental advisor about the requirements under which they may graduate. See the Catalog Rights Policy for Undergraduate Degrees in the Policies and Regulations section of this catalog.

College Policies and Procedures
For more information on UCR policies and regulations see the Policies and Regulations section of this catalog.

College Regulations
Refer to the Student Academic Affairs Web site at chassstudentaffairs.ucr.edu for more information on college policies and procedures.

Student Responsibility
Students are responsible for meeting deadline dates regarding enrollment, add/drop/withdrawal, change of grading basis, credit by examination, declaration of candidacy, and other actions. The dates are online at registrar.ucr.edu and must be observed. Advising can be obtained in the student’s major department or in the college’s Student Academic Affairs Office, 3400 Humanities and Social Sciences Building.

Academic Advising
It is the student’s responsibility to meet all graduation requirements: general university, college, and major.

Students with declared majors receive academic advising through their major department. Major advisors are available within each department or program (see a list of departmental staff for academic affairs at chassstudentaffairs.ucr.edu). All departments assign an academic advisor to each major and may require an advisor’s approval before enrolling, submitting an academic petition, or making a change in the class schedule. Entering students who have not yet selected a major field of study should contact the Student Academic Affairs Office.

Undeclared and Pre-Business students are advised through the Student Academic Affairs Office. A staff of academic advisors is readily available to assist with questions pertaining to academic regulations and procedures, selection of courses which satisfy breadth requirements, major options, and alternatives. Students who need to confer with an advisor about overall degree requirements, academic difficulty, program planning, or assistance in selecting a major need to schedule an appointment with their advisor.

Course Enrollment
Students are required to register and enroll by the date set by the campus (visit registrar.ucr.edu for details).

The recommended study load for undergraduate students is 15 to 16 units per quarter. This is the average quarterly load to ensure steady progress for graduation in four years. The minimal program for an undergraduate student to be considered full time is three courses (12 units) per quarter. The normal progress for an undergraduate student is four courses (16 units) per quarter.

A class schedule of fewer than 12 units must be approved by the associate dean (visit registrar.ucr.edu for details on a part-time fee waiver for enrollment in 10 or less units). The college has established enrollment limits beyond which students require academic advisor approval. The limits are as follows: students in good academic standing: 20 units; students on academic probation, 17 units; students on subject-to-dismissal status, 15 units. Students on probation may not take courses on an “S/NC” basis.
After the second week of instruction, students may request changes by petition during a specified period. Petitions must usually be approved by the advisor and also, in the case of adds, by the instructor concerned. Changes to grading basis need advisor approval after the second week of classes. The associate dean must approve any changes in the class schedule requested after the regular petition period.

Courses (including Special Studies courses) can be added through the third week of instruction. Courses dropped after the second week of instruction will appear on the record with a “W” notation, signifying withdrawal. Students can withdraw from courses through the sixth week of instruction. The grading basis for a course can be changed through the eighth week of instruction. After the third week of instruction, a fee is required to file the petition to change the class schedule.

Enrollment on Satisfactory/No Credit Basis

Undergraduate students in good academic standing may receive credit for courses undertaken and graded “S” up to a limit of one-third of the total units undertaken and passed on the Riverside campus at the time the degree is awarded. Normally, this means no more than 4 units of “S/NC” per quarter. The total also includes courses graded only “S/NC” Courses that are required in, or prerequisite to, a major may not be taken on a “S/NC” basis unless approved by the chair of the major department. Students on special status or limited status may take courses on a "S/NC" basis only with the approval of the associate dean.

A student may elect "S/NC" or delete "S/NC" from a course by filing a petition (enrollment adjustment form) with the Registrar. The deadline is the end of the eighth week of instruction and is listed each quarter at registrar.ucr.edu. This deadline is strictly enforced.

Regulations governing the "S/NC" option are described under Credit and Grades in the Policies and Regulations section of this catalog.

Repetition of Courses

See Repetition of Courses in the Policies and Regulations section.

Part-time Study

For details, see Part-Time Study under the Finances and Registration.

Petitions

A petition is a form representing a student’s need or desire to be excepted from any standard rule or regulation in the university. It is the only way to obtain formal approval from the department, the college or school, the Registrar, or whomever has authority over a particular request. Some petitions carry a small fee; others are free.

An approved petition for a waiver or substitution in degree requirements represents an agreement between the student, the college or school, and in some cases, the department chair, granting the student an exception from the existing regulations.

Petitions are also used at UCR to change college or major, enroll in fewer units than regulations permit, make late changes to a class schedule, obtain credit by examination, gain approval for concurrent enrollment, or withdraw from the university. Petitions for most of these exceptions are available in the Student Academic Affairs Office. Please note that petitions for retroactive actions more than one year old will not be approved.

Credit by Examination

To earn credit for a course by examination without formal enrollment in that course, students must be in residence and in good academic standing.

Before the examination may be given, arrangements and approval for examination for degree credit must be made with the instructor appointed to give the examination, a faculty advisor (if the major department requires it), and the associate dean. Petitions must be filed with the Office of the Registrar no later than the third week of instruction. Credit by examination is not allowed for English Composition courses.

The results of all examinations for degree credit are entered on students’ records as though they had actually taken the courses of instruction. There is a $5 service charge for each petition. The credit by examination procedure may not be used as a means of improving a previous grade.

Undergraduate Credit for Graduate Courses

Students who have a GPA of at least 3.00 in all courses taken in the university or have shown exceptional ability in a special field may take a graduate course for undergraduate credit with the permission of the instructor concerned. Students must have completed at least 18 upper-division quarter units basic to the subject matter of the course.

Expected Progress for Undergraduate Students

At the close of each quarter, the courses, units, grades, and grade points earned are added to the student’s cumulative university record. This record summarizes progress toward a degree. Lack of adequate progress may jeopardize continued registration. Students can access their advisory degree check through rweb.ucr.edu.

Applying for Graduation

Submit your application via R’Web by the appropriate deadline. The application process is a two-step process with an initial submission via R’Web and a secondary submission through the College of Humanities, Arts and Social Sciences Application for Graduation. Instructions are provided at the end of your R’Web application.

Students should review their remaining requirements through rweb.ucr.edu each quarter. They should also contact their academic advisor in their major department or program two quarters before expected graduation to confirm remaining requirements. Completion of the degree depends upon completion of any work in progress. During the graduation quarter, any changes made to a student’s schedule after the third week of instruction should be immediately reported to the academic advisor.

If for any reason a student does not meet the requirements for graduation after filing the application, another application must be filed for the appropriate quarter. Students graduating in absentia after an absence of one or more quarters and need to change their major, minor, concentration, or catalog year before they apply to graduate should contact their academic advisor to update their expected graduation date and discuss applying for graduation; in some cases, applying for readmission for graduation purposes may be necessary. Students who do not need to make changes can go directly to file an application for graduation.

All course work, whether taken at UCR or elsewhere, must be completed by the last day of UCR’s finals week during the quarter of graduation (no GDs or Incomplete grades). Incomplete, IE, IP or GD grades on the transcript will stop the processing of the degree.

Once the application for graduation is filed, the student’s name will be entered on the appropriate degree list. Students who need to amend the prospective quarter of graduation and who have submitted an application for graduation petition must notify their Academic Advisor, in writing, as soon as possible.

Withdrawals

Students may withdraw from the university prior to the end of instruction, for serious personal reasons, with the approval of the associate dean. Students can initiate the withdrawal process online by going to myforms.ucr.edu. Students should review the tuition and fee refund table (registrar.ucr.edu) and speak to their financial aid counselor prior to withdrawal to understand any potential financial impact.
Preparing for the Professions

The wide variety of majors and programs available in the College of Humanities, Arts, and Social Sciences provides an excellent background and preparation for immediate entry into the job market or for graduate and professional schools. Some of these are listed below; however, students are urged to see their faculty advisor or a counselor in the Career Center for further information.

The Arts

Undergraduate majors in the arts at UCR are designed to provide a solid liberal arts education at the same time as they provide essential training in the practical techniques of the specific art field involved. This means that arts majors provide a broad educational background, on a par with the other majors in the college, which prepares each student for effective participation in any job market where educational breadth is important.

Through the thorough practical training in each art field, an increasing number of UCR students are finding attractive career opportunities in the visual arts, writing, dance, music, and theater arts. Not that it has become any easier to practice as an artist or performer; these remain options best followed by the most talented and determined. However, the opportunities in many arts-related fields are increasing as the role of the arts continues to expand. Such opportunities include positions in teaching, music and dance therapy, graphics, theater management, costume design, performing arts management, fine arts publication, the recording industry, the arts, and criticism. Moreover, new professions, which will open yet wider vistas in coming years, are evolving for those trained in the arts.

UCR students who graduate with a major in one of the arts have consistently gained admission to graduate schools at outstanding universities, conservatories, and professional schools throughout the country.

At UCR, students may major in Art, Art History, Creative Writing, Dance, Media and Cultural Studies, Music, or Theatre, Film and Digital Production. At the graduate level, the M.A. degree is offered in Art History and in Music. M.F.A. degrees include Experimental Choreography, Visual Art, and Creative Writing and Writing for the Performing Arts. A Ph.D. is offered in Critical Dance Studies.

The Chancellor provides performance awards for excellence in the arts for students who have already achieved high proficiency upon entry into the university and who will continue to practice their art forms while students at UCR. For further information, contact the departments of Art; Dance; Music; Theatre, Film and Digital Production; and Creative Writing.

The Gluck Fellows Program of the Arts at UCR provides Gluck Faculty, Graduate, and Undergraduate Fellows the opportunity to bring their respective art forms to elementary, middle, and high school students and nursing home residents who have little or no access to the arts. The departments of Art; Art History; Creative Writing; Dance; Music; and Theatre, Film and Digital Production as well as the Sweeney Art Gallery and UCR/California Museum of Photography participate in the Gluck Fellows Program of the Arts. Students interested in the Gluck Fellows Program of the Arts should check with individual departments.

Business

While no specific major is required for admission to most graduate schools of Administration or management, the undergraduate programs in Business Economics and the various majors offered in combination with Administrative Studies provide excellent preparation. At UCR, the curriculum in these majors stresses the principles of managerial decision making and methods of gathering and analyzing the diverse data on which decisions must be based.

It is also important to note that other majors in the liberal arts can serve as effective preparation for entry into the worlds of management and business. Any major curriculum that includes substantial emphasis on oral and written expression and analytic and critical thinking can serve this purpose, particularly if accompanied by a suitable cluster of courses in business and management topics. Internships, which are available in business and industry settings, can assist in clarifying educational and personal goals, allowing exploration of alternative career options, and providing the opportunity to apply academic background to a practical, real world experience.

Students who wish to pursue a graduate degree in the Business Administration field may wish to consider UCR’s School of Business.
Law
Most law schools require a baccalaureate degree. Law schools do not require a uniform prelaw course of study or a specific college major; backgrounds in the physical sciences are as acceptable as those in the social sciences and humanities. However, law schools in general do recommend that the prelaw student attempt to reach several goals during the undergraduate years: an understanding of the development of social, political, and economic institutions; an ability to communicate well, both orally and in writing; the capacity to think clearly, carefully, and independently; and a habit of disciplined study. Therefore, there is no specific, formal prelaw curriculum that a student must take.

Most law schools require applicants to take the Law School Admission Test, administered regionally by the Educational Testing Service.

Students who are considering applying to law schools are strongly urged to consult with the advisors in the Department of Political Science, 2203 and 2205 Watkins Hall.

Librarianship
All library schools accredited by the American Library Association require a baccalaureate degree for admission and usually a reading knowledge of one or two languages other than English. A broad general background, supported by the ability to read rapidly and intelligently, is helpful. The knowledge, in depth, of the literature of some subject area is especially advantageous. All subject fields, including the biological and natural sciences, the humanities, and the social sciences may prepare a student for graduate study in librarianship.

In addition to career opportunities in public, school, and academic libraries, special librarians may work in government agencies, and in commercial and industrial firms, such as pharmaceutical companies, banks, and advertising agencies.

Museums, Archives, and Historic Preservation
The American Association of Museums and The Society of American Archivists have designated the master’s degree as the professional degree level for careers in museums and archives. The Public History Program M.A. (Department of History) provides professional education and training for these careers, as well as for careers in general historic preservation and public history.

The UCR/California Museum of Photography is of significant value to those interested in photographic history and museum practices, as well as to those with creative interests in photography.

Public Administration
Government agencies offer many administrative career options including jobs in personnel, budget administration, labor relations, program analysis and public information. These types of positions may require a bachelor’s or a master’s degree or a combination of degrees plus experience. Students interested in a career in public information are encouraged to acquire a broad liberal arts education at the undergraduate level. An undergraduate major in any of the social sciences provides appropriate preparation for graduate work in public administration. Special attention is called to the majors in Political Science/Administrative Studies, Political Science/International Affairs, and Political Science/Public Service.

At UCR, students may gain valuable experience in government agencies through the Academic Internship Program. In addition to numerous local internship settings, there are quarter-away internships available in several Sacramento and Washington, D.C. offices. See the Career Center in the Services for Students section of this catalog.

UC Center Sacramento (UCSS) offers student internship opportunities. Students live in UC housing, near the state Capitol, and intern from 24 to 33 hours per week with members of the state legislature, government offices, or nonprofit agencies. See UC Center Sacramento (UCSS) in the Introducing UC Riverside section of this catalog.

The UC Washington Center (UCDC) provides undergraduate students with a multidimensional educational experience in Washington, D.C. Students undertake academic pursuits as well as cultural and social activities. The program combines course work with field research and internship experience. See UC Washington Center (UCDC) in the Introducing UC Riverside section of this catalog.

Social Welfare
Full professional training usually consists of two years of graduate training leading to the degree of Master of Social Work.

Students planning to seek employment in social welfare after completing the baccalaureate degree should prepare in the fields of psychology (particularly child and adolescent psychology and the study of personality), sociology (with emphasis on society and personality, social thought and social organization), economics, political science, anthropology, and statistical and research methods in the social sciences. Students who plan to enter a professional school of social work following undergraduate training should consult with an advisor at UCR for the best selection of classes.

Career opportunities for students with the B.A. or B.S. degree include positions as deputy probation officer, social worker, group counselor, corrections officer, substance abuse counselor, and community relations worker. Internships provide useful experience as part of the undergraduate program in preparation for such careers.

Teaching Credential Programs
Students planning a career as a teacher may wish to consider one of the majors that offers a subject-matter preparation program.

Specific details and counseling are available at individual department offices and the School of Education and at education.ucr.edu.

Students who are considering working toward any teaching credential should attend one of the credential information seminars offered by the Teacher Education Services Office (1124 Sproul) for advice in planning an academic program.
With strengths in the biological, physical, mathematical, and agricultural sciences, the college offers the Bachelor of Arts and the Bachelor of Science degrees along with B.S to M.S. degrees in Microbiology and Statistics. The B.A. degree, when offered, provides for both broad general education and major field specialization. The B.S. degree stresses advanced work in the major and associated fields. All degree programs provide students with an opportunity to develop an understanding and appreciation of our relationship to the world around us, in addition to preparing them for careers in their fields of specialization.

The variety of degree programs and the flexibility of each provide great freedom of choice to students. Cooperative efforts between departments in the college provide for interdepartmental (interdisciplinary) majors. Students may elect to complete double majors within the college or between this college and another. See the college’s Undergraduate Academic Advising Center for information on double majors. Individual majors may be planned for students who find that individual goals can be accommodated through the resources and interested faculty at UCR. Information and regulations on individual majors may be obtained from the college’s Undergraduate Academic Advising Center.

For information on graduate degrees see the Graduate Studies section of this catalog.

Majors
A major is a coordinated group of upper-division courses (100-199 series) in a field of specialization. Early choice of a major is desirable. Students must declare a major by the time they have earned 90 units. The courses for any particular major are specified by the relevant department or departmental group, and they must provide at least 36 upper-division units of credit, normally taken on a letter grade basis. No more than 84 units in any one discipline may be applied to the degree.

Admission to Majors
First Year Admission
Applicants to majors in the College of Natural and Agricultural Sciences who excel in the academic criteria, with additional emphasis on advanced mathematics and laboratory science preparation, will be considered. It is recommended that students have sufficient mathematics competency to qualify for college-level calculus at the time of enrollment.

Mathematics Advisory Examination
All incoming CNAS first year students who are not exempt must take the Mathematics Advisory Examination (MAE) prior to attending the summer Highlander Orientation. Certain MAE scores that indicate the need for additional work in intermediate algebra will place students in a college-level intermediate algebra course. This means that these students will need to complete an intermediate algebra course prior to enrolling in any Science and Math courses required for CNAS majors. Students will have the option to enroll in the Intermediate Algebra Workshop (ARC 035) college-level intermediate algebra course during the summer prior to their first Fall quarter at UC Riverside or, at the latest, during their first Fall quarter.

ARC 035 Intermediate Algebra Workshop is designed to give students the math proficiency to succeed in a rigorous, university level pre-calculus mathematics course. Based on a student's math performance in all ARC 035 coursework, the workshop has two outcomes for CNAS students: 1) placement in Math 006A; or 2) no placement.

Students must complete the IAW college-level intermediate algebra course on the UCR campus. For more information about the IAW program, students may visit arc.ucr.edu/arc35.
Students who place in but do not plan to complete a college-level intermediate algebra course by the end of their first quarter of enrollment at UC Riverside, should file a Change of Major Petition to an appropriate, non-Calculus-requiring major in the College of Humanities, Arts, and Social Sciences (CHASS) or petition the Divisional Dean of CNAS Student Affairs to remain in CNAS under special circumstances. Students who pass the IAW college-level intermediate algebra course at a level deemed satisfactory for CNAS students, will be advised to enroll in Math 066A for the following quarter at UC Riverside.

Transfer Students
Students are selected primarily on the basis of academic preparation, as assessed by their GPA in academic coursework and strength of preparation for the intended major. Admission is selective based on the GPA in all transferable coursework with a minimum GPA of 2.7 and completion of required major preparatory coursework. Students should visit assist.org for updated and comprehensive major preparation requirements.

Choosing a Major, Undeclared Majors
Although first year students may choose an academic major upon entering UCR, those who are unsure about specific academic goals may request to be admitted to the college as an undeclared student, choosing one of three options in this category:

1. Undeclared — Life Sciences, for students interested in Biochemistry, Biology, Cell, Molecular and Developmental Biology, Entomology; Microbiology; Neuroscience; or Plant Biology.
2. Undeclared — Mathematical Sciences, for students interested in Data Science; Mathematics; Mathematics for Teachers of Secondary School; or Statistics
3. Undeclared — Physical Sciences, for students interested in Chemistry, Earth Sciences, Environmental Sciences, Geology, Geophysics or Physics

Students who follow the recommended program for any of the three undeclared options will be prepared to enter a wide variety of science majors. Individuals entering as students in one of the three undeclared options are advised through the college’s Undergraduate Academic Advising Center by both professional academic advisors and faculty mentors from diverse science departments. Actual admission into degree programs is predicated upon successful completion of courses with satisfactory grades. Transfer into another college requires performance judged to be satisfactory by that college.

All students with 90 or more units toward a degree are expected to declare a major. To declare a major, obtain approval from the college’s Undergraduate Academic Advising Center by filing a Change of Major Petition. Students are expected to declare a major by the beginning of their junior year (completion of 90 units). Students who fail to declare a major by this time will not be permitted to register until an approved declaration of major has been submitted to the Divisional Dean of CNAS Student Affairs at the CNAS Undergraduate Academic Advising Center.

If students in one of the three undeclared options feel their interests lie primarily in the areas of humanities or social sciences, advising is obtained in the College of Humanities, Arts, and Social Sciences, (951) 827-3683. Students interested in engineering or computer science and engineering can be advised in the Bourns College of Engineering, (951) 827-ENGK (3647). Students interested in public policy can be advised in the School of Public Policy, (951) 827-2334. Students interested in education can be advised in the School of Education, (951) 827-5850.

Double Majors
A declaration of a second major must be filed at the college’s Undergraduate Academic Advising Center at least two quarters before graduation and approved by your academic advisor and the Divisional Dean of CNAS Student Affairs. At the time of filing, a student must have completed 120 units, with at least 18 upper-division units in the primary major and at least 8 upper-division units in the secondary major. Of the required upper-division units, a minimum of 24 (no more than 4 of which can be 190-199 courses) must be unique to each major. To declare a second major, a student must have a cumulative GPA of 2.7 or higher and an upper-division major GPA of 2.7 or higher in each major. A student may elect a second major in a department or interdepartmental group of another college. A declaration of such a second major must be signed by the appropriate deans of both colleges and filed by the student with the primary college. A student must meet requirements of both primary and secondary majors and the college requirements of the primary major if they are both in the same baccalaureate class. If the two majors lead to different degrees (B.S. and B.A.), that fact is noted on the transcript, but only one diploma indicating both degree designations will be issued upon successful completion of such a program. Furthermore, if the double major is a mixed B.S./B.A., the college requirements for both majors must be met. Information on how to file for double majors may be obtained from the college’s Undergraduate Academic Advising Center.

Changing Majors
Students may change majors if they are in good standing and not expected to exceed the unit limitation of 216 units toward the degree. Students can petition to change their major within the college or transfer from another college to the College of Natural and Agricultural Sciences. Students interested in transferring to the College of Natural and Agricultural Sciences should consult specific ‘change of major’ criteria located at cnasstudent.ucr.edu regarding specific prerequisite courses. Students will be reviewed for course coverage and GPA for the new major. Major changes to CNAS or within CNAS are approved by the Divisional Dean of CNAS Student Affairs.

Students who fail to attain a GPA of 2.00 (“C”) in preparation for the major or major courses may be denied the privilege of entering or continuing in that major.

Minors
Each minor in the College of Natural and Agricultural Sciences consists of at least 20 but not more than 28 units of organized, upper-division courses. No more than 4 units of 190-199 courses may be used in fulfilling the upper-division unit requirement for a minor. Of the specified upper-division units, a minimum of 16 must be unique to the minor and may not be used to satisfy major requirements. The CNAS Undergraduate Academic Advising Center is responsible for student and administrative issues pertaining to the minors offered by CNAS. Minors offered by other colleges are administered by the department, program, or interdisciplinary program offering the minor. Students must file a declaration of a minor by filing a petition with the college's Undergraduate Academic Advising Center at least one quarter before graduation and must be in good academic standing at the time of filing. A minor requires signature of the Lead Academic Advisor for the requested minor and the signature of the Divisional Dean of CNAS Student Affairs.

University Honors Program
For a description of the University Honors Program, see Educational Opportunities in the section Introducing UC Riverside. For a listing of requirements and courses, refer to University Honors Program in the Programs and Courses section.

Financial Assistance
The College of Natural and Agricultural Sciences maintains funds for undergraduate scholarships. General information is available in the college’s Undergraduate Academic Advising Center. Visit https://cnasstudent.ucr.edu/scholarship-opportunities or e-mail cnasstudent@ucr.edu.

First Year Advising Seminars
First Year Advising Seminars are designed to introduce students to a wide variety of topics in the College of Natural and Agricultural Sciences, including major selection, curriculum planning, career options and goals in the sciences, opportunities for undergraduate research, development of learning and study skills, ethics in research and education, and an introduction to the faculty in the college. Each quarter’s offerings are listed at registrarl.ucr.edu under NASC 092 and NASC 093. Topics vary from quarter to quarter.

The seminars have no prerequisites, and first year students are given enrollment priority. Each seminar is limited to 24 students to encourage discussion and carries 1 or 2 units of academic credit, although units are not applied toward major requirements. The seminars are graded on an “S/NC” basis.

<sup>1</sup> Registration in this program is not open at present.

<sup>2</sup> A combined B.S.-M.S. program is offered in this discipline (designed to lead to a B.S. degree as well as an M.S. degree in five years).

---

## Degree Requirements

Students in the College of Natural and Agricultural Sciences must meet three levels of requirements for the B.A. or B.S. degree: general university requirements, college requirements, and major requirements.

### General University Requirements

General university requirements are listed at the beginning of the Undergraduate Studies section. For information on university regulations see the Policies and Regulations section of this catalog.

In addition to the above general university requirements, the College of Natural and Agricultural Sciences has the following unit requirement.

### Unit Requirement

Students are not normally expected to take significantly more than 180 units to obtain the bachelor's degree. After earning credit for 216 units, a student will not be permitted to continue except by approval of the Divisional Dean of CNAS Student Affairs when specific academic or professional reasons are involved.

The following credit limitations apply for all students enrolled in the college:

1. After completing 105 quarter units at a community college, students are not allowed further units for courses completed at a community college.
2. No more than 6 units in physical education activity courses may be applied toward the bachelor’s degree.
3. Enrollment in more than 8 units of graduate courses requires submission of a petition and approval by the Divisional Dean of CNAS Student Affairs. No more than three courses in the 300 series of courses may be applied toward the bachelor’s degree. Credit is not granted for 400 series courses taken in UC Extension.

### College Policy for the Intersegmental General Education Transfer Curriculum

The Intersegmental General Education Transfer Curriculum (IGETC) is not accepted for students planning to transfer to the College of Natural and Agricultural Sciences. However, courses taken to satisfy the IGETC may be applied to the college’s breadth pattern.

### College Breadth Requirements

For the following requirements, a course is defined as a block of instruction that carries credit of 4 or more units. Courses taken in the department or program of a student’s major (including courses cross-listed with the major) may not be applied toward the breadth requirements except for Biology majors in connection with the Biological Sciences requirement. However, courses outside the major discipline, but required for the major, may be applied toward satisfaction of these requirements.

Some majors in the college may have specific course requirements for meeting the following breadth requirements. Check under individual major requirements in the Programs and Courses section of this catalog.

Requirements are for both the B.A. and the B.S. degrees unless specified separately.

### Humanities

**For the B.A. degree: 20 units**

1. One course in World History (At UCR, courses that satisfy this requirement are HIST 010, HIST 015, or HIST 020.)
2. One course in the fine arts (Art; Art History; Creative Writing courses in poetry, fiction, or playwriting; Dance; Media and Cultural Studies; Music; Theatre or from among courses within these disciplines as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences)
For the B.A.

</tbody>
</table>

*The 4-unit ethnicity requirement can be applied to either the Humanities or Social Sciences requirement, depending on content.

3. Two courses from among the following:
   a) Literature taken in the departments or programs in Comparative Literature and Foreign Languages, English, Media and Cultural Studies, Hispanic Studies, or from among courses within these disciplines as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences.
   b) Philosophy, taken in the Department of Philosophy, or from among courses within this discipline as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences.
   c) Religious Studies, taken in the Department of Religious Studies, or from among courses within this discipline as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences.

4. One additional course from the following:
   a) History, the Fine Arts, Literature, Philosophy, Religious Studies
   b) A foreign language at level 4 or above
   c) A humanities course offered by Ethnic Studies; Comparative Ancient Civilizations; Creative Writing (courses in journalism); Gender and Sexuality Studies; Humanities, Arts, and Social Sciences; Latin American Studies; Linguistics; or Media and Cultural Studies

No course used to satisfy the English Composition requirement will apply toward Humanities credit.

No more than two courses in performance may be counted toward the Humanities requirement.

**English Composition**

Students must demonstrate adequate proficiency in English Composition by completing a one-year sequence of college-level instruction in English Composition, with no grade lower than C. Courses in the Writing Across the Curriculum (WAC) program and other alternatives approved by the Academic Senate as alternatives to the sequence’s third-quarter course, English 001C, may be applied toward satisfaction of the third-quarter requirement if a student’s college permits its majors to substitute such a course for 001C, and if students have first passed English 001B with a “C” or higher. The grade in the alternative course must be no lower than a “C.” Individual colleges may set a higher GPA requirement in English 001A and/or 001B as a prerequisite to take Senate-approved alternatives to English 001C.

Transfer students who have taken one semester of English Composition at another college or university are required to take ENGL 001B and ENGL 001C, with the option of taking a course in the WAC program and other alternatives to English 001C approved by the Academic Senate if a student’s college permits its majors to substitute such a course for 001C.

Students have the option of using a score of 3 on the College Board Advanced Placement Test in English to satisfy ENGL 001A; they must complete ENGL 001B and ENGL 001C.

Students with a score of 4 or 5 on the College Board Advanced Placement Test in English have satisfied ENGL 001A and ENGL 001B; they must complete ENGL 001C.

**For the B.S. degree: 12 units**

1. One course in world history (At UCR, courses that satisfy this requirement are HIST 010, HIST 015, or HIST 020.)

2. One course from among the following:
   a) Fine arts (Art; Art History; Creative Writing courses in poetry, fiction, or playwriting; Dance; Media and Cultural Studies; Music; Theatre or from among courses within these disciplines as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences)
   b) Literature taken in the departments or programs in Comparative Literature and Foreign Languages, English, Hispanic Studies, Media and Cultural Studies or from among courses within these disciplines as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences
   c) Philosophy, taken in the Department of Philosophy, or from among courses within this discipline as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences
   d) Religious Studies, taken in the Department of Religious Studies, or from among courses within this discipline as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences
3. One additional course chosen from the following:
   a) History; the Fine Arts, Literature, Philosophy, Religious Studies
   b) A foreign language at level 3 or above
   c) Humanities courses offered by Ethnic Studies; Comparative Ancient Civilizations; Creative Writing (courses in journalism); Gender and Sexuality Studies; Humanities, Arts, and Social Sciences; Latin American Studies; Linguistics; or Media and Cultural Studies

No course used to satisfy the English Composition requirement will apply toward Humanities credit.

No more than one course in performance may be counted toward the Humanities requirement.

**Social Sciences**

**For the B.A. degree: 16 units**

1. One course must be taken in the departments of Economics or Political Science or from among courses within these disciplines as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences
2. One course must be taken in the departments of Anthropology, Psychology, or Sociology, or from among courses within these disciplines as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences
3. Social science courses offered by Ethnic Studies; Environmental Sciences; Geography (cultural geography courses); Human Development; Humanities, Arts, and Social Sciences; Women’s Studies, or one of the disciplines in 1. or 2. above

**For the B.S. degree: 12 units**

1. One course must be taken in the departments of Economics or Political Science or from among courses within these disciplines as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences
2. One course must be taken in the departments of Anthropology, Psychology, or Sociology, or from among courses within these disciplines as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences
3. Social science courses offered by Ethnic Studies; Environmental Sciences; Geography (cultural geography courses); Human Development; Humanities, Arts, and Social Sciences; Women’s Studies, or one of the disciplines in 1. or 2. above

Course work that may be taken to be used in partial satisfaction of the Humanities and Social Sciences requirements must be evaluated by the college’s Undergraduate Academic Advising Center. The college’s Undergraduate Academic Advising Center, in consultation with the college Executive Committee, determines which courses apply to these requirements. It will implement this policy.

It is the student’s responsibility to verify those courses that fulfill either the Humanities or the Social Sciences requirement, particularly the series of courses in cultural geography.

**Ethnicity: 4 units**

One course dealing with general concepts and issues in the study of race and ethnicity in California and the United States. Courses that satisfy this requirement must concentrate on one or more of four principal minoritized groups (African American, Asian American, Chicano/Latino, and Native American). These courses must be comparative in nature, analyzing the minoritized group experience within the present and historical context of other racial and ethnic groups. The courses are to be offered by or cross-listed with the Department of Ethnic Studies.

Regardless of the student’s college and major, the course may be counted toward the Humanities or the Social Sciences graduation requirements, depending upon the course’s content as evaluated by the College of Humanities, Arts, and Social Sciences Executive Committee. Check with the college’s Undergraduate Academic Advising Center for the courses that fulfill the Ethnicity requirement.

**Foreign Language**

**For the B.A. degree: 16 units**

This requirement may be fulfilled in one language by completing course 4 with a minimum grade of “C” or demonstrating equivalent proficiency; or by completing course 2 with a minimum grade of “C” in each of the two languages; or by demonstrating equivalent proficiency (level 2) in each of two languages. American Sign Language may also be used to satisfy this requirement. Biology and Neuroscience majors must complete four quarters of one language. Students who are pursuing a B.A. degree and who have not completed a foreign language course may enroll in a level-1 foreign language course. However, students must take a placement exam if they plan to take a course in the same foreign language that they studied in high school. The placement exam may be taken only once in each subject during a student’s UCR career. Transfer students who have taken a college-level foreign language course should consult with an advisor.

**Natural Sciences and Mathematics: 20 units**

1. One course in Mathematics, Statistics, or Computer Science
2. One course in Biological Sciences (Biochemistry, Biology, Entomology, Botany, Plant Biology, or Plant Pathology); the course must include a laboratory
3. One course in Physical Sciences (Chemistry, Physics, Earth Sciences, excluding cultural geography courses)
4. Two additional courses from areas (2) or (3) above or in physical and/or biological science courses offered in the Department of Environmental Sciences

This requirement may automatically be satisfied by lower-division requirements for the major.

**Additional Courses: 16 units**

For the B.S. degree: An additional 16 units of substantive course work in the student’s chosen major or fields related to the major is required. The additional course work is specified by the major department.

**Major Requirements**

Detailed requirements for each major are found under the department listings in the Programs and Courses section of this catalog.

A major in the College of Natural and Agricultural Sciences shall consist of not fewer than 36 nor more than 60 upper-division units. No more than 9 units of courses in the 190-199 series may be counted in fulfilling the upper-division units needed for the major.

By the beginning of the junior year, students must consult with their advisor and choose a major. A GPA of at least 2.00 (C) in the upper-division courses taken in the major field is required for graduation.

**Life Sciences Core Curriculum**

A lower-division core curriculum prepares students for a wide variety of majors, including Biochemistry; Biology; Cell, Molecular, and Developmental Biology; Entomology; Microbiology; Neuroscience; and Plant Biology. Students complete a uniform core curriculum prior to advancing to upper-division courses. The curriculum is Introductory Biology (1 year, including laboratory), General Chemistry including laboratory (1 year), Organic Chemistry (1 year, including laboratory), Calculus (2 quarters), Physics including laboratory (1 year), Statistics (1 quarter), and Introductory Biochemistry (1 quarter). No more than 12 units of upper-division life sciences courses not being used to satisfy the core may be taken prior to completion of the core.

**College Policies and Procedures**

For detailed information on UCR policies and regulations see the Policies and Regulations section of this catalog.
College Regulations
Detailed information and specifics with regard to the college regulations governing undergraduate student status as approved by the faculty and contained in the Manual of the Riverside Division of the Academic Senate may be obtained from a faculty advisor or the college’s Undergraduate Academic Advising Center.

Student Responsibility
Students are responsible for meeting deadlines regarding enrollment, add/drop, change of grading basis, credit by examination, withdrawal, applications for graduation, declaration of candidacy, and other actions. The deadline dates are listed at registrar.ucr.edu and must be observed. Academic advising can be obtained in the college’s Undergraduate Academic Advising Center, 1223 Pierce Hall.

Faculty Mentors
All students who declare a major upon entrance to the College of Natural and Agricultural Sciences are assigned to a department or interdepartmental faculty oversight committee granting the degree for that major or area of specialization. For assignment of faculty mentors, new students should report to the Undergraduate Academic Advising Center. Students in one of three undeclared options in the college are also advised in the college’s Undergraduate Academic Advising Center.

Professional Academic Advisors
Students should keep in touch with their professional academic advisor housed in the Undergraduate Academic Advising Center on all academic matters, including choice of courses, consideration of a major, and requirements for graduation. Before consulting the academic advisor, students should formulate a tentative program according to their interests and needs and should be familiar with general university, college, and major requirements.

It is important that each student keep in mind that the advisor serves to assist students but does not administer the student’s program. Students must be responsible for ensuring that they meet all requirements for graduation.

Course Enrollment
Before each quarter, students advance enroll in all courses they plan to take. Students are expected to register and enroll by the date set by the campus (visit registrar.ucr.edu for details).

Since the college expects all students to make regular progress toward their degrees, class schedules of less than 12 units must be approved by the Divisional Dean of CNAS Student Affairs. Repeated courses are considered part of the total unit load.

Students on academic action may not register for more than 15 units in a quarter without consent of the Divisional Dean of CNAS Student Affairs. Repeated courses are considered part of the total unit load.

Students on academic action may not register for more than 15 units in a quarter without consent of the Divisional Dean of CNAS Student Affairs. No student may enroll in less than 8 units (two classes).

During the first two weeks of the quarter, students may make course enrollment changes via rweb.ucr.edu, and approvals by academic advisors and instructors are generally not required. After the second week of instruction ends, students must file an enrollment adjustment form online at myforms.ucr.edu to make changes. With the approval of their academic advisor and the course instructor, students may add courses to their class schedule up to noon on the end of the third week of classes. With the approval of their academic advisor, students may withdraw from a course up to noon on the end of the sixth week or change the grading basis up to noon on the end of the eighth week. For courses dropped after the second week, a “W” appears on the transcript, indicating withdrawal. Students may withdraw from all their courses up until the end of the tenth week of instruction. Students exercising this option will receive “WS’s” in all their courses for that quarter.

Enrollment on a Satisfactory/No Credit Basis
Students in this college who are not on academic action may take nonmajor courses on an “S/NC” basis and other courses graded only on an S/NC basis, provided they do not exceed one third of the total units undertaken and passed (graded “S”) on the UCR campus at the time the degree is awarded.

Courses required for the major and lower-division mathematics or science courses that are prerequisites to major courses cannot be taken on an “S/NC” basis.

A student may elect “S/NC” or delete “S/NC” from a course during the RWeb enrollment period or later in the quarter by filing an enrollment adjustment form online at myforms.ucr.edu. The deadline is noon on the end of the eighth week of instruction and is listed each quarter at registrar.ucr.edu.

Regulations governing the “S/NC” option are described under Credit and Grades in the Policies and Regulations section of this catalog.

Credit by Examination
A student may petition for the privilege of examination for degree credit without formal enrollment in a particular course but must be in residence and not on academic action. Arrangements for examination for degree credit must be made with the student’s faculty mentor. Approvals of the faculty mentor, the Divisional Dean of CNAS Student Affairs of the college, and the instructor who is agreeing to give the examination are necessary before the examination may be given. The results of all examinations for degree credit are entered on the student’s record as though the student had actually taken the courses of instruction.

Undergraduate Credit for Graduate Courses
Upper-division students with a UCR cumulative GPA of 3.00 or above may take a graduate course for undergraduate credit with the permission of the faculty advisor and the instructor concerned. Enrollment in more than 8 units of graduate coursework requires Divisional Dean of CNAS Student Affairs approval. See the CNAS Undergraduate Advising Center for more information.

Expected Progress for Undergraduate Students
At the close of each quarter, the courses, units, grades, and grade points earned are added to the student’s cumulative university record. This record summarizes progress toward a degree. UCR requires all undergraduate students to make Expected Progress each academic year. A full-time undergraduate student is considered to be making Expected Progress towards a baccalaureate degree if the student:

• Passes at least 45 units each academic year
• Declares a major by the time the student earns 90 units
• Follows a program of study consistent with the student’s declared major

Students who have not earned a minimum of 37 units each academic year, have not declared a major by the time they earn 90 units, or are not following a program of study consistent with the student’s declared major are not considered to be making Expected Progress towards a baccalaureate degree.

Students who fail to make Expected Progress may be ineligible for continued registration. Continued registration will be at the discretion of the Divisional Dean of CNAS Student Affairs.

Students can access their advisory degree audit through rweb.ucr.edu.

Declaration of Candidacy
Applications for graduation are available online at rweb.ucr.edu and must be filed by the deadline established for the quarter in which graduation is expected. The deadline for filing applications for graduation is listed at registrar.ucr.edu each quarter. If it is necessary to amend the prospective date of graduation during the quarter in which graduation is expected, the student must notify the college’s Undergraduate Academic Advising Center, in writing, as soon as possible.

Applications are not accepted after the deadline established for the quarter in which the student intends to graduate. If for any reason the student does not meet the requirements for graduation after announcing candidacy, or fails to meet the deadline for filing, a new application must be filed for the subsequent quarter.

Students graduating in absentia after an absence of three or more quarters and need to change their major, minor, concentration, or catalog year before they apply to graduate must apply for readmission to the university and file an application for graduation with the college Undergraduate Academic Advising Center. Students who do not need to make changes only have to file an application for graduation.
Preprofessional Academic Preparation

Undergraduate academic preparation for several professional careers can be acquired in the College of Natural and Agricultural Sciences. Brief explanations of preprofessional academic programs follow.

Forestry

Any Life Science major at UCR will be good preparation for students who wish to transfer to UC Berkeley’s College of Natural Resources, forestry program. For more information on this program, please see visit their website here.

Medical Technology

Training for Clinical Laboratory Scientist Prospective licensed clinical laboratory scientists should obtain a bachelor’s degree in either biochemistry; biology; cell, molecular and developmental biology; and microbiology and complete any other requirements necessary. Students must apply independently to any of the state-approved programs in clinical laboratory science offered at various universities and hospitals. Following successful completion of this training and testing by the state of California the student is eligible to become a licensed clinical laboratory scientist. Prerequisites for entry change periodically, so interested students should obtain current information from the Health Professions Advising Center at hpac.ucr.edu. The state Department of Health also provides information on careers in this field.

Medicine and Dentistry

Although the specific requirements of all medical and dental schools cannot be listed here, the general requirements are discussed below to indicate the various preprofessional programs available at UCR.

More than 90 percent of the students admitted to medical schools in the United States have attained the B.A. or B.S. degree, and a large proportion of those admitted to dental schools have three or more years of undergraduate work.

Leaders in medical and dental education urge prospective students to arrange their programs to obtain a broad general education, since the subject matter of the humanities and social sciences is not offered by the professional schools. It is recommended that students preparing to seek admission to medical or dental school obtain a bachelor’s degree, to which all of UCR’s preprofessional programs lead.

A student may satisfy the requirements for admission to medical or dental school in one of the following ways:

1. Completing any UCR Life Science major
2. Completing the major in Chemistry
3. Majoring in any department but fulfilling concurrently the specific course requirements of medical or dental schools

Most medical and dental schools recommend that the courses shown above be taken in a preprofessional degree program. These courses should include laboratories.

The Thomas Haider Program at the UCR School of Medicine

Students in any major at UCR are eligible to complete admission requirements and apply for up to 24 positions reserved for UCR students in the UCR School of Medicine. Students eligible to apply to this unique pathway into the UCR medical school, called the Thomas Haider Program at the UCR School of Medicine, are those who attend UCR for at least six consecutive quarters and complete their bachelor’s degree at UCR. Information on this program and general admission to the UCR medical school is provided at medschool.ucr.edu, in the school’s section of this catalog, in the medical school Student Affairs Office (1682A School of Medicine Education Building; (951) 827-4334), and at orientation meetings held at UCR.

Other Health Professions

In addition to those described above, UCR offers the preprofessional requirements for entrance to other health professional schools, including optometry, pharmacy, podiatry, nursing, physical therapy, and physician assistant, among others. Information about these can be obtained from the Health Professions Advising Center (H PAC), hpac.ucr.edu, or the Career Center (Veitch Student Center).

Teaching

The California Commission on Teacher Credentialing has established guidelines and standards that prepare students for teaching credentials. For a description of how students can prepare for the multiple-subject (elementary) and single subject (secondary) credentials, refer to individual departments in the Programs and Courses section of this catalog.

After earning the bachelor’s degree, the prospective teacher registers for an additional year of training in education theory and practice needed to obtain a teaching credential. Anyone considering obtaining a teaching credential should attend one of the credential information seminars offered by the Teacher Education Services Office, 1124 Sproul Hall, and consult with an advisor early in the planning of an academic program.

California Teach-Science and Mathematics Initiative (CalTeach-SMI)

Students with a talent for science, math or engineering can translate that ability into preparing for a teaching career in California through the California Teach-Science and Mathematics Initiative (CalTeach-SMI). Students who partner with CalTeach-SMI at UCR can complete a science, engineering, or mathematics degree and become eligible for an intern teaching credential in just four years. Beginning with the freshman year, students intern in a local primary or secondary classroom with a mentor teacher. At UCR, they can meet other CalTeach-SMI students and their UCR peer mentor at the program’s Resource Center, where students can receive credential advising. The CalTeach-SMI Resource Center also provides future STEM teachers with material and financial resources, such as the Scholar Apprentice Program and the NSF Noyce Scholarship Program. For more information contact smi@ucr.edu, visit the Resource Center at T114 Pierce Hall, smi.ucr.edu.

The Prepare to Teach Program is a preprofessional program open to undergraduates from all majors who are interested in teaching in California elementary schools. Through this program, prospective elementary school teachers gain early field experience in the schools and learn more about the profession. Advising includes information on state requirements that are best met before graduation. For more information, contact the Office of Interdisciplinary Programs; 3116 Interdisciplinary Building South; or call (951) 827-2743.

Veterinary Medicine

The course work at UCR is designed to prepare students to meet the requirements for admission to California’s veterinary programs, the School of Veterinary Medicine at UC Davis, and the Western University of Health Sciences in Pomona. Students should consult the Health Professions Advising Center (visit hpac.ucr.edu), the UC Davis General Catalog, or the Western University Web site https://www.westernu.edu/veterinary/ for additional details.
The Marlan and Rosemary Bourns College of Engineering

The Marlan and Rosemary Bourns College of Engineering emphasizes fundamental disciplines of engineering and computer science and engineering, introducing students to the new technologies necessary for today’s highly technical environments.

The vision of the Bourns College of Engineering is to become a nationally recognized leader in engineering research and education. Its mission is to

- Produce engineers with the educational foundation and the adaptive skills necessary to serve rapidly evolving technology industries
- Conduct nationally recognized engineering research focused on providing a technical edge for the United States
- Contribute to knowledge in both fundamental and applied areas of engineering
- Provide diverse curricula that will instill in our students the imagination, talents, creativity, and skills necessary for the varied and rapidly changing requirements of modern life and to enable them to serve in a wide variety of other fields that require leadership, teamwork, decision making, and problem-solving capabilities
- Be a catalyst for industrial growth in the Inland Empire region of Southern California

The majors offered by the college are based on the needs of the practicing professional and are founded on a solid core of mathematics and the sciences. Breadth in the educational experience is represented by requirements in arts, humanities, and social sciences and by emphasis on oral and written communication skills. The principles and practice of engineering and computer science and engineering are provided in lecture and related laboratory courses. All students must choose a set of technical electives, emphasizing synthesis and design, to complete their undergraduate programs.

Majors

A major is a coordinated group of upper-division courses (courses numbered 100–199) in a field of specialization. The major may be a group of upper-division courses within a single department or program, or a group of related courses from several departments or programs. Before enrolling in upper-division courses, students may be required to gain appropriate knowledge by completing specific prerequisite courses. With the assistance of a departmental advisor, students are expected to select lower-division courses which prepare them for the advanced studies they propose to follow.

Change of Major or Double Majors

A student in good standing may request to change from one major to another by filing a Major Change Petition with the Office of Student Academic Affairs.

A student in good standing may elect to take a second major within the college. The student must file a declaration of a second major with the Office of Student Affairs. A course used to satisfy the requirements for one major may be used to fulfill the requirements of a second major as well. However, of the required upper-division units, a minimum of 24 must be unique to each major, and both majors must be completed within the maximum unit cap of the primary Engineering major.

A student in good standing may elect to take a second major in another college. A declaration of such a second major must be signed by the deans of both colleges and filed by the student with the primary college.
If the minimum GPA in the minor field has not been met.

A student will meet requirements of both primary and secondary majors and the college requirements of the primary major, if they are both in the same baccalaureate class. If the two majors lead to different degree designations (B.S. and B.A.), that fact will be noted on the transcript, but only one diploma indicating both degree designations will be issued upon successful completion of such a double major program. Furthermore, if the double major is a mixed B.S./B.A., the college requirements of both majors must be met. A course used to satisfy the requirements for one major may be used to fulfill the requirements for a second major as well. However, of the required upper-division units, a minimum of 24 must be unique to each major, and both majors must be completed within the maximum unit cap of the primary Engineering major. A student who has declared a double major may graduate in one major upon the completion of all requirements for that major but may not continue in the university for completion of the second major. For details, please contact the Office of Student Academic Affairs.

Minors

The Bourns College of Engineering currently has a minor in Computer Science. Minors in the college shall consist of not fewer than 20 nor more than 28 units of organized upper-division courses. No more than 4 units of 190-199 courses may be used in fulfilling the upper-division unit requirement for a minor. Overlap may occur between the upper-division course requirements of the major and the minor only to the extent permitted by the department, programs, or interdisciplinary committee offering the minor, or the college of the minor. Courses used, or prerequisite to those used, in fulfilling the minor may be taken on an “S/NC” basis only on approval of the dean. The department, program, or interdisciplinary committee offering the minor is responsible for student and administrative issues pertaining to the minor. Students must file a declaration of a minor at least two quarters before graduation and must be in good academic standing at the time of filing. A minor requires the signature of the department chair or chair of the faculty committee which supervises the minor and the signature of the dean of the college. A GPA of at least 2.00 in upper-division courses in the field of the minor is a graduation requirement. When all other requirements for graduation have been met, the student will be graduated without the minor if the minimum GPA in the minor field has not been met.

University Honors Program

For a description of the University Honors Program, see Educational Opportunities section in the section Introducing UC Riverside. For a listing of requirements and courses, refer to University Honors Program in the Programs and Courses section of this catalog.

Admission to Majors

Admission of Freshmen Prospective Bourns College of Engineering students must complete high school programs that meet UC requirements as described in the Undergraduate Admission section of this catalog.

<table>
<thead>

<td>Trigonometry (often contained in Precalculus or Algebra II, strongly suggested)</td>
<td>1/2</td>
</tr>
<tr>
<td>Chemistry or Physics, with laboratory (preferably both)</td>
<td>1</td>
</tr>
</tbody>
</table>

In addition, appropriate high school mathematics and science course work should include the following:

A supplemental screening process for majors in the Bourns College of Engineering places emphasis on the GPA earned in college preparatory course work, especially mathematics and science, and on aptitude test scores. Qualification for first-year calculus is also expected.

UC-eligible students not qualifying for the preferred major are considered for admission to their alternate major.

Application should be made during the priority filing period (November 1–30).

Transfer Students

All transfer students must meet the UC requirements for admission as described in the Undergraduate Admission section of this catalog. The Bourns College of Engineering accepts completion of IGETC as satisfying the majority of the college’s breadth requirements for transfer students. Some additional breadth coursework may be required after enrollment at Bourns. For more information on BCOE breadth requirements, please contact the Office of Student Academic Affairs.

However, prospective applicants are strongly encouraged to focus instead on preparatory course work for their desired major, such as mathematics, science, and other technical preparatory course work, rather than on IGETC completion. Strong technical preparation is essential for success in the admissions process, and subsequently, in all coursework at Bourns.

Students intending to transfer to engineering majors are expected to complete the equivalent of UCR course work required in the first two years of the programs and to apply for transfer starting with their junior year. Specific information on transfer requirements may be obtained from the Office of Student Academic Affairs, (951) 827-ENGR (3647).

Financial Assistance

The Bourns College of Engineering awards several scholarships to its students each year from funds provided by corporate and private sponsors. Other scholarships are available. Further information may be obtained by calling the Office of Student Academic Affairs, (951) 827-ENGR (3647).

Special Facilities

See Research Opportunities in the section About UC Riverside in this catalog for a detailed description of the following centers:

- Center for Bioengineering Research
- Center for Environmental Research and Technology
- Center for Nanoscale Science and Engineering
- Center for Research in Intelligent Systems (including the Visualization and Intelligent Systems Laboratory)
- Center for Ubiquitous Communication by Light
Degree Requirements
Students in the Bourns College of Engineering must meet three levels of requirements for the Bachelor of Science degree: general university requirements, college requirements, and major requirements.

General University Requirements
General university requirements are listed at the beginning of the Undergraduate Studies section. For other UCR regulations including repetition of courses, concurrent enrollment, scholarship regulations, and incomplete (I) grades, see the Policies and Regulations section of this catalog.

In addition to the above general university requirements, the Bourns College of Engineering has the following unit requirement.

Unit Requirement
Most of the majors in this college require more than the nominal university requirement of 180 units for graduation. No more than 6 units of physical education activity may be counted toward this requirement. However, after having credit for 216 units or 120 percent of the units required for the major, a student is not permitted to continue except by approval of the dean when specific academic or professional reasons are involved.

College Breadth Requirements
All undergraduate students in the Bourns College of Engineering are required to satisfy the Campus Graduation Requirements mandated by the Academic Senate under Regulation R6. Detailed requirements are available in the Office of Student Academic Affairs. Internships and independent study courses may not be used to satisfy breadth.

<table>

<tr>
<td><strong>Total Units</strong></td>
</tr>
</tbody>
</table>

1 The 4-unit ethnicity requirement can be applied to the Humanities or Social Science requirement, depending on content.

For the following requirements, a course is defined as a block of instruction that carries credit of 4 or more units.

To provide depth in satisfying breadth in the humanities and social sciences, at least two of the humanities and/or social science courses must be upper division.
English Composition

Students must demonstrate adequate proficiency in English Composition by completing a one-year sequence of college-level instruction in English Composition with no grade lower than A- or UC Davis's sequence is ENGL 001A, ENGL 001B, and ENGL 001C. Transfer students should have completed ENGL 001B and either ENGL 001A or ENGL 001C, or an approved alternative from Writing Across the Curriculum. Transfer students who have credit for one semester of English composition from another institution must take two additional quarters (i.e., ENGL 001B and either ENGL 001A or ENGL 001C).

Students have the option of using a score of 3 on the College Board Advanced Placement Test in English to satisfy ENGL 001A; they must complete ENGL 001B and either ENGL 001C or ENGL 015C or an approved alternative from Writing Across the Curriculum. Students with a score of 4 or 5 on the College Board Advanced Placement Test in English have satisfied ENGL 001A and ENGL 001B; they must complete ENGL 001C or ENGL 015C or an approved alternative from Writing Across the Curriculum.

Students should enroll in an English composition course each quarter they are registered at UCR until the sequence of preliminary Entry Level Writing courses, if needed, and ENGL 001A, ENGL 001B, and ENGL 001C or ENGL 015C or an approved alternative from Writing Across the Curriculum is completed with a satisfactory GPA. A student may not receive baccalaureate credit for any work in English Composition taken prior to completing the Entry Level Writing requirement.

Humanities: 12 units

Courses used to fulfill the Humanities requirements must be selected from an approved list available in the Office of Student Academic Affairs.

1. One course in World History
2. One course in one of the areas of Fine Arts, Literature, Philosophy, or Religious Studies
3. One additional course chosen from
   a) History, the Fine Arts, Literature, Philosophy, Religious Studies
   b) A foreign language at level 3 or above
   c) Humanities courses offered by Ethnic Studies, Creative Writing (courses in journalism), Humanities and Social Sciences, Latin American Studies, Linguistics, or Women's Studies

No course used to satisfy the English Composition requirement can be applied toward Humanities credit. A list of approved courses is available in the Office of Student Academic Affairs.

Social Sciences: 12 units

Courses used to fulfill the Social Sciences requirements must be selected from an approved list available in the Office of Student Academic Affairs.

1. One course from Economics or Political Science
2. One course from Anthropology, Psychology, or Sociology
3. One additional social science course offered by Ethnic Studies, Geography (cultural geography courses), Human Development, or Women's Studies, or one of the disciplines in 1 or 2. above.

At least two of the humanities and/or social science courses must be upper-division. The list of approved courses is available in the Office of Student Academic Affairs.

Ethnicity: 4 units

Courses used to fulfill the Ethnic Studies requirement must be selected from an approved list available in the Office of Student Academic Affairs.

One course dealing with general concepts and issues in the study of race and ethnicity in California and the United States. Courses that satisfy this requirement must concentrate on one or more of four principal minority groups (African American, Asian American, Chicano/Latino, and Native American). These courses must be comparative in nature, analyzing the minority group experience within the present and historical context of other racial and ethnic groups, such as European-American minorities. The courses are to be offered by or cross-listed with the Department of Ethnic Studies. The list of approved courses is available in the Office of Student Academic Affairs.

Natural Sciences and Mathematics: 20 units

Courses used to fulfill the Natural Sciences and Mathematics requirements must be selected from an approved list available in the Office of Student Academic Affairs.

1. One course in Biological Sciences
2. One course in Physical Sciences. No course in cultural geography may be used.
3. One course in Mathematics or Computer Science or Statistics
4. Two additional courses in the Biological or Physical Sciences

Check with the Office of Student Academic Affairs for the courses that fulfill the biological sciences, physical sciences, and additional sciences. In some cases, these are satisfied by requirements of the major. The mathematics/computer science/statistics requirement is always satisfied by a major requirement.

Major Requirements

Detailed requirements for each major are found under the department listings in the Programs and Courses section of this catalog, and are available from the Office of Student Academic Affairs. (951) 827-ENGR (3647). A GPA of at least 2.00 (“C”) in upper-division courses taken in the major field is required for graduation. Not more than 9 units of courses in the 190-199 series may be counted in fulfilling the upper-division units needed for the major.

College Policies and Procedures

For detailed information on UCR policies and regulations see the Policies and Regulations section of this catalog.

College Regulations

Detailed information and specifics with regard to the college regulations governing undergraduate student status as approved by the faculty and contained in the Manual of the Riverside Division of the Academic Senate can be obtained from the Dean's Office.

Student Responsibility

Students are responsible for meeting deadline dates regarding enrollment, add/drop, change of grading basis, credit by examination, withdrawal, declaration of candidacy, and other procedures. The dates are at registrar.ucr.edu and must be observed. Students are responsible for ensuring that they meet all requirements for graduation and that they attend the undergraduate faculty advisor’s annual forum. Students are also responsible for obtaining their grades, selecting an appropriate collection of courses, and confirming their enrollment by relevant deadlines. Academic advising can be obtained in the Office of Student Academic Affairs.

Faculty Advisors

All Bourns College of Engineering students are advised on a regular basis. In addition, each department designates a faculty undergraduate advisor who is the primary contact in the student’s areas of academic interest. Faculty advisors assist students in their undergraduate careers, as appropriate, and are also mentors in the student’s areas of interest.
Credit by Examination

A student may petition for the privilege of examination for degree credit without formal enrollment in a particular course, but must be in residence and not on academic probation. Arrangements for examination for degree credit must be made with the student’s advisor. Approvals of the advisor, the dean of the college, and the instructor who is agreeing to give the examination are necessary before the examination may be given. The results of all examinations for degree credit are entered on the student’s record as if the student had actually taken the courses of instruction.

Expected Progress for Undergraduate Students

At the close of each quarter, the courses, units, grades, and grade points earned are added to the student’s cumulative university record. This record summarizes progress toward a degree. Lack of adequate progress may jeopardize continued registration. Students can access their advisory degree check through rweb.ucr.edu.

Declaration of Candidacy

Application for graduation is available in R’Web and must be filed by the deadline established for the quarter in which graduation is intended. The deadline for filing applications for graduation is listed at registrar.ucr.edu each quarter. Applications are not accepted after the deadline established for the quarter. If for any reason a student does not meet the requirements for graduation after announcing candidacy, or if a student fails to meet the deadline for filing, an application must be filed for a subsequent quarter.

California Teach–Science and Mathematics Initiative (CalTeach-SMI)

California Teach–Science and Mathematics Initiative (CalTeach-SMI) has a goal of addressing the critical need of highly qualified K-12 science and mathematics teachers in California. With an economy increasingly reliant on science, technology, engineering, and mathematics (STEM) and the anticipated large scale retirement of qualified teachers, this is an essential time to explore and prepare for a career in teaching science or mathematics.

CalTeach-SMI at UCR offers undergraduate students paid/unpaid opportunities, such as the Scholar Apprentice Program, to explore STEM teaching as a career option. Through CalTeach-SMI, students receive advising and mentoring to prepare for entrance into an intern teaching credential program while diligently coordinating with academic advisors to ensure completion of STEM degree requirements. The CalTeach-SMI Resource Center provides future STEM teachers with material and financial resources which includes the NSF Noyce Scholarship Program, to promote planning and professional development towards a science/mathematics education career.

For more information about the CalTeach-SMI program, please visit smi.ucr.edu, the Resource Center at 1114 Pierce Hall, or on Facebook at facebook.com/ScienceMathInitiativeAtUcr and on Instagram at Instagram.com/smiatucr/.

Course Enrollment

Students should plan their program of study carefully, in consultation with an academic advisor. Class schedules of fewer than 12 units must have the approval of the Divisional dean of the college.

Students who have not met the Entry Level Writing Requirement must enroll in an Entry Level Writing or qualifier course, as determined by their placement, during their first quarter of residency.

Students must attend class meetings. Students who do not attend in accordance with any published requirement listed at registrar.ucr.edu or on a course syllabus may be dropped from the course.

Students may add or drop a course via R’Web through the second week of instruction. Beginning the third week of instruction, students must file an Enrollment Adjustment Form to make changes and obtain required approvals. During the third week of classes, students may, with the consent of the instructor and the approval of their academic advisor, add a course. Students may drop a course until the end of the sixth week of instruction, but courses dropped after the second week of instruction require an academic advisor’s signature and result in a “W” (for withdrawal) noted on the transcript. Changes in enrollment after deadlines published at registrar.ucr.edu require the approval of the associate dean of the college.

A student on probation may enroll for more than 13 quarter units only with the consent of the associate dean of the college.

With the approval of the associate dean, students may withdraw from the university at any time prior to the end of instruction.

Any changes in a student’s class schedule not covered by the above regulations must have the approval of the associate dean.

Enrollment on a Satisfactory/No Credit Basis

A student in good standing may enroll and receive credit for courses graded “S.” However, the “S/NC” grading system cannot be used for any course that is used to fulfill major or breadth requirements, except for any required course which is restricted to “S/NC” grading and up to 8 units of courses in the humanities and social sciences. Exceptions to this policy may be granted, upon petition, by the student’s advisor and the Executive Committee.

Students may change their grading basis in a course from letter grading to “S/NC” (or vice versa) up to the end of the eighth week of instruction.

Regulations governing the “S/NC” option are described under Credit and Grades in the Policies and Regulations section of this catalog.
School of Business

(951) 827-6200; fax: (951) 827-2055

Undergraduate Programs:
Undergraduate Business Programs Office:
2340 Olmsted Hall
(951) 827-4551; fax: (951) 827-5061
business.ucr.edu

Mission Statement
The school is dedicated to the pursuit of excellence in substantive scholarly research enhancing the world’s base of knowledge about organizations, their environments, and their management, and to the transmission of this knowledge through quality educational programs to students, alumni, business managers, and the public.

The School
The School of Business emphasizes growing strengths in the areas of marketing, supply chain management, accounting, and finance. The school resides in a 30,000-square-foot home featuring state-of-the-art research and teaching facilities.

The School of Business Microcomputer Facility offers software packages in statistics, databases, spreadsheets, financial planning, management science, econometrics, graphics, word processing, and Internet connections. The facility is used for teaching, class demonstrations, theses, and research projects. Students learn computing skills in business courses with special computing requirements, and in optional seminars.

The UCR Library, with more than 2 million bound volumes, 13,000 serials, and 1.6 million microforms, including extensive literature in the management field, provides substantial support for student and faculty research.

Student evaluations of courses are an important part of the evaluation of curriculum and faculty performance.

Undergraduate Program in the School of Business
The School of Business offers the UC’s oldest and most comprehensive undergraduate Business Administration major in Southern California and is the first and only one in the UC system that offers the BS in Actuarial Science degree. The School of Business houses The A. Gary Anderson Graduate School of Management, which offers the Master of Business Administration program (M.B.A.), the professional M.B.A. program, the Master of Professional Accountancy (M.P.A.C.) program, the Master of Finance (M.Fin.) program, Master of Science in Business Analytics (MSBA), and the Ph.D. program in Business Administration. The School of Business is accredited by AACSB International – The Association to Advance Collegiate Schools of Business. Visit business.ucr.edu.

Majors
A major is a coordinated group of upper-division courses (courses numbered 100-199) in a field of specialization. The major may be a program of upper-division courses within a single department (departmental major), a group of related courses involving a number of departments (interdisciplinary major), or a group of courses chosen to meet a special interest.

Before enrolling in certain upper-division courses, students may be required to gain appropriate knowledge by completing specific prerequisite courses. With the assistance of a departmental advisor, students are expected to select lower-division courses that prepare them for the advanced studies they propose to follow.

Choosing a Major, Undeclared Majors
While freshmen may choose an academic major on entering UCR, those who are unsure about specific academic goals may request to be admitted to CHASS as undeclared. These students often take introductory courses in the natural sciences, social sciences, humanities, and fine arts while searching for an area that most excites their interest. Undeclared majors are encouraged to meet with an advisor in the Student Academic Affairs Office in CHASS about their selection of courses.

Students with 90 or more units toward a degree must declare a major. To declare a major, students must obtain approval from the Student Academic Affairs Office by filing a Petition for Declaration of Major. Students who do not declare a major by 90 or more units may have a hold placed on their registration.

Double Majors
Students can declare a second major in a department or program of another college. Changes are not permitted while on academic probation or during the final senior year (135 units or more). Both majors must be completed within the maximum limit of 216 units, and approval must be obtained from advisors in both departments or programs. In such cases, all course requirements must be completed for each of the two majors chosen. One of the two majors must be designated as the primary major for the purpose of satisfying breadth or general education requirements. No more than 8 upper-division units may count for both majors simultaneously.

A declaration of two majors in different colleges must be signed by the deans of the colleges concerned and filed by the student with the college of the principal major. If the two majors lead to different degrees (B.S. and B.A.), that fact will be noted on the transcript, but only one diploma indicating both degree designations will be issued upon successful completion of such a program. Furthermore, if the double major is a mixed B.S./B.A., the college requirements for both majors must be met.

Students wishing to declare a second major must present an outline to the Undergraduate Business Programs Office, indicating which major will be used to satisfy breadth requirements and any overlap courses between the two majors.

Internships, Independent Projects and Student Research
The School of Business student can often practice the subject, as well as read about it. Many undergraduates have the opportunity to work with a faculty member on a research project, and many departments offer field work and internship courses. In these courses, students combine several hours per week of experience in an agency or firm with study of related academic materials and participation in a seminar, where formal knowledge and practical experience are related to one another.

Normally, each local internship does not count for more than 4 or 5 units in a single term, larger numbers of units being reserved for quarter-away internships. Petitions for credit beyond 5 units in a single quarter for a local internship must have the sponsoring agency's approval and a written justification by the student's faculty sponsor. All such requests require the associate dean's approval.

A maximum of 16 units of credit toward the bachelor's degree may be obtained through internship courses, with a maximum of 12 units of internship scheduled in a single quarter for quarter-away situations. Students who are on academic probation may not enroll in internship courses.
Transfer of Majors, Changing Majors
Students in good academic standing can petition to transfer from another college to The School of Business. The petition must be approved by the Undergraduate Business Programs Office before the change can be processed by the Office of the Registrar. Changes are not permitted while on probation or during the final senior year (135 units or more).

Students who fail to attain a GPA of 2.00 ("C") in preparation for the major or courses required for the major may be denied the privilege of entering or continuing in that major.

Minors in Business
The School of Business offers minor programs; however, no student is required to take a minor. Minors are not degree-granting majors; they are sequences of supplemental courses designed to enhance work in certain areas. Any minor may be taken jointly with any departmental or interdepartmental major. Minors in the college shall consist of not fewer than 16 nor more than 28 units of organized upper-division course work. No overlap may occur among courses used to satisfy upper-division course requirements for a major and a minor. A GPA of at least 2.00 is required in upper-division courses in the field of the minor.

A minor is a set of courses focused on a single discipline or an interdisciplinary thematic area. There can be no substitution for the courses listed as constituting a minor without approval of the governing department or committee. There is no limit on the number of minors a student can declare. Students must declare the minor(s) before their final degree check before graduation by completing a petition with the Student Affairs Office in the School of Business. There is no limit on the number of minors a student can declare. Students who fail to attain a GPA of 2.00 ("C") in preparation for the major or courses required for the major may be denied the privilege of entering or continuing in that major.

University Honors Program
For a description of the University Honors Program, see Educational Opportunities in the front of this catalog. For a listing of requirements and courses, refer to University Honors Program in the Programs and Courses section.

Undergraduate Pre-Business Program
Pre-Business is a two-year program that prepares students to apply to the School of Business major. Students who elect Pre-Business are advised in the College of Humanities, Arts, and Social Sciences during their freshman and sophomore years. Students who elect Pre-Business must gain admission to Business by the time they have earned 90 units.

Degree Requirements
Students in The School of Business must meet three levels of requirements for the Bachelor of Science degree: general university requirements, college requirements, and major requirements.

General University Requirements
General university requirements are listed at the beginning of the Undergraduate Studies section. In addition, The School of Business has the following requirements and limitations.

Unit Requirements
Students must satisfactorily complete for credit a minimum of 180 units for the bachelor’s degree. A maximum of 216 units is allowed. After having credit for 216 units, students are not permitted to continue except in cases approved by the associate dean in which specific academic or professional reasons are involved.

Credit Limitations
Transfer students with credit from other institutions (advanced standing credit), receive a transfer profile from the Office of Undergraduate Admissions. The Undergraduate Business Programs Office evaluates the course work, indicating how the transferable credits are applied toward the degree. However, the following credit limitations may reduce the total number of units which apply toward the degree in The School of Business. Students should meet with an academic advisor in their major for questions regarding transfer credits.

The following credit limitations apply for all students enrolled in the college:

1. After completing 105 quarter units at a community college, students are not allowed further units for courses completed at a community college.
2. No more than 6 units in physical education activity courses may be applied toward the 180-unit requirement for the bachelor’s degree.
3. No 400 series courses and not more than three courses in the 300 series of courses may be counted toward the 180 unit requirement for the bachelor’s degree.
4. No more than 5 units of credit may be taken per quarter in special studies courses. See specific restrictions under each departmental listing regarding credit toward the major in special studies courses.

College Breadth Requirements
The Undergraduate Business Programs Office, in consultation with the Executive Committee of the School of Business, determines which courses apply to the following requirements. It is the student’s responsibility to verify those courses that fulfill these subject requirements. To search for courses that meet specific breadth requirements, visit registrar.ucr.edu.

Courses taken in the department or program of a student’s major (including courses cross-listed with the major) may not be applied toward the breadth requirements. However, courses outside the major discipline, but required for the major, may be applied toward satisfaction of these requirements. Students who elect a double major may apply courses in one of the majors toward satisfaction of the breadth requirements.

For the following requirements, a course is defined as a block of instruction which carries credit of 4 or more units.

No course may be applied to more than one breadth requirement, with the exception of the course taken to meet the Ethnicity requirement. Internship and independent studies courses may not be used to satisfy breadth requirements.
English Composition

Students must demonstrate adequate proficiency in English Composition by completing a one-year sequence of college level instruction in English Composition with no grade lower than “C.” Students should enroll in an English composition course each quarter they are registered at UCR until the sequence of preliminary Entry Level Writing courses, if needed, and ENGL 001A, ENGL 001B, ENGL 001C is completed with satisfactory GPA.

For new students, the placement exam may be taken only once in each subject during a student’s UCR career. Students continuing with the same foreign language in which course of the language sequence a student should enroll. The placement exam determines whether the Foreign Language requirement has been met, or in which course of the language sequence a student should enroll.

Transfer students who have credit for one semester of English Composition from another institution are required to take two additional quarters, i.e., ENGL 001B and ENGL 001C.

Students have the option of using a score of 3 on the College Board Advanced Placement Test in English to satisfy ENGL 001A; they must complete ENGL 001B and ENGL 001C.

Students with a score of 4 or 5 on the College Board Advanced Placement Test in English have satisfied ENGL 001A and ENGL 001B; they must complete ENGL 001C.

In lieu of ENGL 001C, students can complete their last quarter of the English Composition requirement by earning a “C” or better in BUS 100W. (As a prerequisite to either course, students must earn a “C” or better in ENGL 001B.)

Humanities: 20 units
For the B.S. degree
1. One course in World History (At UCR, courses that satisfy this requirement are HIST 010, HIST 015, or HIST 020.)
2. One course from the following:
   a) Fine arts (Art, Art History, Dance, Media and Cultural Studies, Music, Theatre, Creative Writing courses in poetry, fiction, or playwriting)
   b) Literature (taken in the departments of English, Comparative Literature and Foreign Languages, or Hispanic Studies)
   c) Philosophy
   d) Religious Studies
3. Three additional courses from the following:
   a) History, the Fine Arts, Literature, Philosophy, Religious Studies
   b) A foreign language at level 3 or above (Courses used in fulfillment of the foreign language requirement may not be used to meet this requirement.)
   c) Humanities courses offered by Ethnic Studies; Creative Writing (courses in journalism); Humanities, Arts, and Social Sciences Interdisciplinary; Latin American Studies; Linguistics; or Women’s Studies

Social Sciences: 16 units
1. One course in Economics or Political Science
2. One course in Anthropology, Psychology, or Sociology
3. Two additional social science-related courses from Comparative Ancient Civilizations, Ethnic Studies; Environmental Sciences; Geography (cultural geography courses); Human Development; Humanities, Arts, and Social Sciences Interdisciplinary; Women’s Studies; or one of the disciplines in 1 or 2 above.

Ethnicity: 4 units
One course focusing on the general concepts and issues in the study of race and ethnicity in California and the United States. Courses that satisfy this requirement must concentrate on one or more of four principal minority groups (African American, Asian American, Chicano/Latino, and Native American). These courses must be comparative in nature, analyzing the minority group experience within the present and historical context of other racial and ethnic groups, such as European-American minorities. The courses are to be offered by or cross-listed with the Department of Ethnic Studies.

Refer to the Programs and Courses section for the courses that fulfill the Ethnicity requirement.

Foreign Language
Courses in American Sign Language may be used to meet this requirement.

For the B.S. degree in Business Administration: course level 3 or equivalent
This requirement may be satisfied by students (except for foreign language majors who satisfy the spirit of the language requirement by majoring in one or more languages) by completing the third-quarter level or its equivalent in one language at UCR (or at another college or university) with a minimum grade of “C” or by demonstrating proficiency at the third-quarter level on a foreign language placement exam offered by one of the foreign language departments at UCR. This test does not yield unit credit; it only determines whether the Foreign Language requirement has been met, or in which course of the language sequence a student should enroll. The placement exam may be taken only once in each subject during a student’s UCR career. Students continuing with the same foreign language they completed in high school must take a placement exam (visit placementtest.ucr.edu for dates and locations). Credit will be allowed only at the course level for which they qualify according to the placement exam.
Natural Sciences and Mathematics: 20 units
1. One course in Mathematics, Statistics, or Computer Science
2. One course in Biological Sciences (Biochemistry, Biology, Botany and Plant Sciences, Entomology, Nematology, or Plant Pathology)
3. One course in Physical Sciences (Chemistry, Physics, Earth Sciences, excluding cultural Geography courses)
4. Two additional courses from the areas listed above or in physical and/or biological science courses offered in the Department of Environmental Sciences

Major Requirements
Detailed requirements for the Business major can be found under the department or program listing in the Programs and Courses section of this catalog.

A major in The School of Business shall consist of not fewer than 36 upper-division units. All courses applied toward the major and preparation for the major must be taken for a letter grade unless otherwise approved by the department chair. A 2.00 GPA in upper-division courses in the major is required for graduation. Once enrolled on this campus, students must complete all courses designated for a major in regular or summer sessions at UCR; exceptions to this policy must be approved by the department chair and by the associate dean.

Candidates for the B.S. degree may not receive more than 108 units of credit toward the degree for work taken in the major discipline (i.e., students must take at least 72 units outside the major discipline). To receive the bachelor's degree, transfer students must complete a minimum of 16 upper-division units in the major on the Riverside campus.

Students who have been away from the university for several terms should consult with their major departmental advisor about the requirements under which they may graduate. See the Catalog Rights Policy for Undergraduate Degrees in the Policies and Regulations section of this catalog.

College Policies and Procedures
For more information on UCR policies and regulations see the Policies and Regulations section of this catalog.

College Regulations
Refer to The School of Business Web site at business.ucr.edu for more information on college policies and procedures.

Student Responsibility
Students are responsible for meeting deadline dates regarding enrollment, add/drop/withdrawal, change of grading basis, credit by examination, declaration of candidacy, and other actions. The dates are online at registrar.ucr.edu and must be observed. Advising can be obtained in the Undergraduate Business Programs Office, 2340 Olmsted Hall.

Academic Advising
It is the student's responsibility to meet all graduation requirements: general university, college, and major. Pre-Business students are advised in CHASS Student Affairs (see a list of departmental staff for academic affairs at chassstudentaffairs.ucr.edu). As Pre-Business students are accepted in to the Business program, they are advised by academic advisors in the Office of Undergraduate Business Programs (see a list of departmental staff for academic affairs at business.ucr.edu).

Undeclared students are also advised through the Student Academic Affairs Office in CHASS. A staff of academic advisors is readily available to assist with questions pertaining to academic regulations and procedures, selection of courses which satisfy breadth requirements, major options, and alternatives. Students who need to confer with an advisor about overall degree requirements, academic difficulty, program planning, or assistance in selecting a major need to schedule an appointment with their advisor.

Course Enrollment
Students are required to register and enroll by the date set by the campus (visit registrar.ucr.edu for details).

The recommended study load for undergraduate students is 15 to 16 units per quarter. This is the average quarterly load to ensure steady progress for graduation in four years. The minimal program for an undergraduate student to be considered full time is three courses (12 units) per quarter. The normal progress for an undergraduate student is four courses (16 units) per quarter.

A class schedule of fewer than 12 units must be approved by the associate dean (visit registrar.ucr.edu for details on a part-time fee waiver for enrollment in 10 or less units). The college has established enrollment limits beyond which students require academic advisor approval. The limits are as follows: students in good academic standing, 20 units; students on academic probation, 17 units; students on subject-to-dismissal status, 15 units. Students on probation may not take courses on an “S/NC” basis.

After the second week of instruction, students may request changes by petition during a specified period. Petitions must usually be approved by the advisor and also, in the case of adds, by the instructor concerned. Changes to grading basis need advisor approval after the second week of classes. The associate dean must approve any changes in the class schedule requested after the regular petition period.

Courses (including Special Studies courses) can be added through the third week of instruction. Courses dropped after the second week of instruction will appear on the record with a “W” notation, signifying withdrawal. Students can withdraw from courses through the sixth week of instruction. The grading basis for a course can be changed through the eighth week of instruction. After the third week of instruction, a fee is required to file the petition to change the class schedule.

Enrollment on Satisfactory/No Credit Basis
Undergraduate students in good academic standing may receive credit for courses undertaken and graded “S” up to a limit of one-third of the total units undertaken and passed on the Riverside campus at the time the degree is awarded. Normally, this means no more than 4 units of “S/NC” per quarter. The total also includes courses graded only “S/NC.” Courses that are required in, or prerequisite to, a major may not be taken on a “S/NC” basis unless approved by the chair of the major department. Students on special status or limited status may take courses on a “S/NC” basis only with the approval of the associate dean.

A student may elect “S/NC” or delete “S/NC” from a course by filing a petition (enrollment adjustment form) with the Registrar. The deadline is the end of the eighth week of instruction and is listed each quarter at registrar.ucr.edu. This deadline is strictly enforced.

Regulations governing the “S/NC” option are described under Credit and Grades in the Policies and Regulations section of this catalog.

Repetition of Courses
See Repetition of Courses in the Policies and Regulations section.

Part-time Study
For details, see Part-Time Study under the Finances and Registration.

Petitions
A petition is a form representing a student's need or desire to be excepted from any standard rule or regulation in the university. It is the only way to obtain formal approval from the department, the college or school, the Registrar, or whomever has authority over a particular request. Some petitions carry a small fee; others are free.

An approved petition for a waiver or substitution in degree requirements represents an agreement between the student, the college or school, and the department chair, granting the student an exception from the existing regulations.

Petitions are also used at UCR to change college or major, enroll in fewer units than regulations permit, make late changes to a class schedule, obtain credit by examination, concurrent enrollment, or withdraw from the university. Petitions for most of these exceptions are available in the Office of Undergraduate Business Programs in Olmsted 2340, and
The A. Gary Anderson Graduate School of Management

Master of Business Administration Program
Through The A. Gary Anderson Graduate School of Management, the School of Business offers a professional graduate program leading to the Master of Business Administration (M.B.A.) degree.

The M.B.A. curriculum prepares students to excel in a competitive environment marked by unprecedented challenges and technological advances. Communication and computer skills are incorporated into a global approach to both the art and science of management. Most elective courses are seminar size and encourage participative learning. Computers and software are used extensively for teaching and effective management decision making. An internship program assists students in obtaining experience in their professional fields. The mixture of career professionals and recent baccalaureate graduates provides a stimulating and well-rounded classroom environment.

The M.B.A. curriculum balances the art and science of management, with a particular emphasis on managing through information, and recognizes the global context of management. The curriculum also emphasizes growing strengths in marketing, accounting, and finance. The first-year core courses of the two-year M.B.A. program provide a strong integrated foundation in the common body of knowledge for management. Thereafter, students take 28 to 36 units of electives offered in various fields, and complete a required internship, capstone course, and a thesis or case analysis.

The M.Fin. program addresses the substantial unmet demand for trained finance professionals. The program is best suited for students with a sufficient quantitative background to enable successful completion of the program. The program provides a comprehensive overview of the entire field of finance, with an emphasis on empirical methods and applications. The full-time, one-year program will enable graduates to gain the specialized expertise required for professional advancement, and prepare students who seek to pursue professional certifications in finance.

The M.P.Ac. program provides emerging professional accountants and auditors with advanced education in audit and assurance, taxation, accounting information systems and ethics. Accountants and auditors help to ensure that public, private and not for profit entities are run efficiently. Accountants and auditors analyze, verify and communicate financial information for various entities. They may also be involved with budget analysis, tax analysis, management consulting, financial and investment planning, information technology consulting as well as a broad array of assurance services. The M.P.Ac. degree is offered as a one year program (48 units) for graduates with a baccalaureate degree with a concentration or major in accounting. Other students without the equivalent of a baccalaureate degree with a concentration or major in accounting may be admitted to the program with the understanding that additional coursework may be required to earn the M.P.Ac. degree. Candidates will be admitted for the fall quarter only.

The Master of Science in Business Analytics (MSBA) program is a rigorous STEM program jointly offered by the School of Business and the Department of Statistics in the College of Agricultural and Natural Sciences. This program helps students gain the crucial skill sets needed to provide critical insights to companies as a business analytics professional. The program is ideally suited for the student who has a strong quantitative aptitude couple with an interest in solving business problems using data analytics. As such, admission is open to students with undergraduate majors from such diverse areas as science, engineering, economics, mathematics, statistics, computer science or a quantitative business discipline such as operations, finance and marketing. The degree requires 48 units of study, which can be done as a full-time three-quarter program or over a longer period on a part-time basis.

The Ph.D. Program in Business Administration offers the Doctor of Philosophy Degree (Ph.D.). Concentrations are offered in five major field areas: Accounting; Finance; Marketing; Operations; and Strategic Management and Organizations. The Ph.D. Program in Business Administration trains doctoral students in the design and execution of original research in Management.
The **PROFESSIONAL M.B.A. program** provides an M.B.A. experience tailored according to one's schedule. It allows flexibility and convenience in attaining one of the most sought-after degrees. The PROFESSIONAL M.B.A. is the program of choice for a broad swath of students. Among them might be full-time students who want to earn an M.B.A. on a fast track or who seek to take longer with their studies, international students looking for an M.B.A. at a top university, working professionals seeking a graduate degree without interrupting their careers, or individuals who need to accommodate responsibilities at home and with family as they pursue their academic goals.

**Admissions**

Admission requirements for the programs are similar to requirements for the Graduate Division. In addition to transcripts, applicants should submit test scores from the Graduate Management Admissions Test (GMAT) or General Record Examination (GRE), and at least one letter of recommendation from persons knowledgeable about the applicant's academic ability and potential for success in the program.

### The School

Since its founding in 1969, the School of Education (SOE) at UCR, has consistently delivered cutting edge master’s, doctoral and teacher credentialing programs that prepare students to become outstanding classroom educators, researchers, and educational leaders. Our inland Southern California communities, with their growing population, diversity, and economic disparity, provide excellent opportunities to research important educational problems and develop effective solutions. Our faculty includes scholars in a wide range of areas including autism, learning disability research, education policy, reading development and disabilities, diversity and equity, and assessment and evaluation, and access to higher education.

The School of Education integrates the themes of Learning and Cognition, Social and Cognitive Development within the educational context, Language and Literacy, and Educational Policy. We use these themes to enrich students within a variety of degree programs including the B.A. in Education, Society, and Human Development, the minors in Athletic Leadership and Education, the Teaching Credential, the Master of Arts, the Master of Education, and the Ph.D. in Education, both in and out of the classroom, to enhance the well-being of those who participate in them. The School of Education focuses on the goal of enhancing the learning environments for all within all contexts.

**Undergraduate Programs**

The School of Education (SOE) offers a B.A. in Education, Society, and Human Development and a Minor in Education. The major builds a theoretical foundation, presents applied understandings in the study of education, and explores the varied contexts of learning over the life course. Program faculty bring multiple disciplinary perspectives to their research and courses, including cognitive sciences, developmental psychology, understanding of the exceptional child, applied behavior analysis, the relationship between education, society and culture, educational policy and leadership, measurement and assessment, and issues in higher education.

Students will benefit from completing the major or a minor because they will be exposed to critical theories that investigate how education has been used to create, maintain, and reinforce social stratification. In addition, students will develop a historical and contemporary awareness of different learning settings, and gain a strong foundation in human development, assessment and interventions in the education context.

Students who are interested in teaching elementary, middle, or high schools should consult an academic advisor in the SOE Undergraduate Programs Office about combining an appropriate major and minor or completing a double major in order to develop appropriate expertise in the subject they plan to teach. The B.A. in Education, Society, and Human Development is not a teacher credential program. (See School of Education section on Teaching Credentials and Masters programs.)

**Major**

A major is a coordinated group of upper-division courses (courses numbered 100-199) in a field of specialization. The major may be a program of upper-division courses within a single department (departmental major), a group of related courses involving a number of departments (interdisciplinary major), or a group of courses chosen to meet a special interest.

Before enrolling in certain upper-division courses, students may be required to gain appropriate knowledge by completing specific prerequisites. With the assistance of a departmental advisor, students are expected to select lower-division courses that prepare them for the advanced studies they propose to follow.

**Minor in Education**

The School of Education (SOE) offers two minor programs, however no student is required to take a minor. Minors are not degree-granting majors; they are sequences of supplemental courses designed to enhance work in certain areas. Any minor may be taken jointly with any departmental or interdepartmental major. The minor in the School shall consist of not fewer than 16 nor more than 24 units of organized upper-division course work. No overlap may occur among courses used to satisfy upper-division course requirements for a major and a minor. A GPA of at least 2.00 is required in upper-division courses in the field of the minor.

A minor is a set of courses focused on a single discipline or an interdisciplinary thematic area. There can be no substitution for the courses listed as constituting a minor without approval of the governing department or committee. There is no limit on the number of minors a student can declare. Students must declare the minor(s) before their final degree check before graduation by completing a petition with the Student Affairs Office in the College of Humanities, Arts, and Social Sciences, the College of Natural and Agricultural Sciences, the Bourns College of Engineering, the School of Education, School of Business, or the School of Public Policy, depending on their major. Prior approval by the department or committee offering the minor is required. The minor is noted on the transcript at the time the degree is conferred.

**Choosing a Major, Undeclared Majors**

While first-year students may choose an academic major on entering UCR, those who are unsure about specific academic goals may request to be admitted to CHASS or CNAS as undeclared. These students often take introductory courses in the natural sciences, social sciences, humanities, and fine arts while searching for an area that most excites their interest. Undeclared majors are encouraged to meet with an advisor in the Student Academic Affairs Office in CHASS or CNAS about their selection of courses. Students are encouraged to attend a major change workshop hosted by their college. The School of Education also hosts major change workshops to help you learn about declaring the major in Education, Society, and Human Development. Students with 90 or more units toward a degree must declare a major.

To declare a major, students must obtain approval from the Student Academic Affairs Office by filing a Petition for Declaration of Major. Students who do not declare a major by 90 or more units may have a hold placed on their registration.
Double Majors
Students can declare a second major in a department or program of another college or school. Changes are not permitted while on academic probation or during the final senior year (135 units or more). Both majors must be completed within the maximum limit of 216 units, and approval must be obtained from advisors in both departments or programs. In such cases, all course requirements must be completed for each of the two majors chosen. One of the two majors must be designated as the primary major for the purpose of satisfying breadth or general education requirements. No more than 8 upper-division units may count for both majors simultaneously.

A declaration of two majors in different colleges must be signed by the deans of the colleges concerned and filed by the student with the college of the principal major. If the two majors lead to different degrees (B.S. and B.A.), that fact will be noted on the transcript, but only one diploma indicating both degree designations will be issued upon successful completion of such a program. Furthermore, if the double major is a mixed B.S./B.A., the college requirements for both majors must be met.

Students wishing to declare a second major must present an outline to the SOE Undergraduate Programs Office, indicating which major will be used to satisfy breadth requirements and any overlap courses, if permitted by college and/or school regulations, between the two majors.

Overlap Restrictions
Double Majors: In fulfilling degree requirements for multiple majors, a maximum of 8 units may overlap between two majors if permitted by college and/or school regulations.

Major and Minor Requirements: Students may not receive both the major in Education, Society, and Human Development and a minor in the School of Education. In fulfilling requirements for a minor, a maximum of 8 units may overlap between a major in Education, Society, and Human Development and a minor from another department. No overlap may occur among courses used to satisfy upper-division course requirements for a major and a minor.

Transfer of Majors, Changing Majors
Students in good academic standing may petition to transfer from another college to The School of Education. The petition must be approved by the SOE Undergraduate Programs Office before the change can be processed by the Office of the Registrar. Changes are not permitted while on probation or during the final senior year (135 units or more). Detailed requirements can be found under the department or program listing in the Programs and Courses section of this catalog.

University Honors Program
For a description of the University Honors Program, see Educational Opportunities in the front of this catalog. For a listing of requirements and courses, refer to University Honors Program in the Programs and Courses section.

Degree Requirements
Students in the School of Education must meet three levels of requirements for the Bachelor of Arts degree: general university requirements, college requirements, and major requirements.

If you have questions contact your major department and academic advisor. It is your responsibility to be aware of all University, College, and major graduation requirements and to satisfactorily complete those requirements.

Obtaining a Bachelor's Degree
To complete the Bachelor of Arts (B.A.):

- Fulfill General University requirements in Entry Level Writing Requirement and American History and Institutions.
- Complete 180 units (but not exceed 216 units), which 35 of the last 45 must be in residence in the student's college with at least a "C" average (2.0) in overall coursework.
- Fulfill campus-wide English Composition requirement and College of Humanities, Arts, and Social Sciences (CHASS) “breadth requirements” for the B.A. degree.
- Complete the specified requirements in the major, with at least a "C" average (2.00) for upper-division courses in the major discipline.

General University Requirements
General university requirements are listed at the beginning of the Undergraduate Studies section.

Unit Requirements
Students must satisfactorily complete for credit a minimum of 180 units for the bachelor’s degree. A maximum of 216 units is allowed. After having credit for 216 units, students are not permitted to continue except in cases approved by the associate dean in which specific academic or professional reasons are involved.

Major Requirements
Detailed requirements for the Education, Society, and Human Development major can be found under the department or program listing in the Programs and Courses section of this catalog.

College Policies and Procedures
For more information on UCR policies and regulations see the Policies and Regulations section of this catalog.

Student Responsibility
Students are responsible for meeting deadline dates regarding enrollment, add/drop/withdrawal, change of grading basis, credit by examination, declaration of candidacy, and other actions. The dates are online at registrar.ucr.edu and must be observed. Advising can be obtained in the SOE Undergraduate Programs Office.

Academic Advising
It is the student's responsibility to meet all graduation requirements: general university, college, and major. A staff of academic advisors is readily available to assist with questions pertaining to academic regulations and procedures, selection of courses which satisfy breadth requirements, major options, and alternatives. Students who need to confer with an advisor about overall degree requirements, academic difficulty, program planning, or assistance in selecting a major need to schedule an appointment with their advisor.

Course Enrollment
Students are required to register and enroll by the date set by the campus visit registrar.ucr.edu for details.

The recommended study load for undergraduate students is 15 to 16 units per quarter. This is the average quarterly load to ensure steady progress for graduation in four years. The minimal program for an undergraduate student to be considered full time is three courses (12 units) per quarter. The normal progress for an undergraduate student is four courses (16 units) per quarter.

A class schedule of fewer than 12 units must be approved by the associate dean (visit registrar.ucr.edu for details). The university has established enrollment limits beyond which students require academic advisor approval. The limits are as follows: students in good academic standing, 20 units; students on academic probation, 17 units; students on subject-to-dismissal status, 15 units. Students on probation may not take courses on an "S/ NC" basis.

After the second week of instruction, students may request changes by petition during a specified period. Petitions must usually be approved by the advisor and also, in the case of adds, by the instructor concerned. Changes to grading basis need advisor approval after the second week of classes. The associate dean must approve any changes in the class schedule requested after the regular petition period.

Courses (including Special Studies courses) can be added through the third week of instruction. Courses dropped after the second week of instruction will appear on the record with a “W” notation, signifying withdrawal. Students can withdraw from courses during the sixth week of instruction. The grading basis for a course can be changed through the eighth week of instruction. After the third week of instruction, a fee is required to file the petition to change the class schedule.

Repetition of Courses
See Repetition of Courses in the Policies and Regulations section.
Part-time Study
For details, see Part-Time Study under the Finances and Registration.

Petitions
A petition is a form representing a student’s need or desire to be accepted, transferred without standard rule or regulation in the university. It is the only way to obtain formal approval from the department, the college or school, the Registrar, or whomever has authority over a particular request. Some petitions carry a small fee; others are free.

An approved petition for a waiver or substitution in degree requirements represents an agreement between the student, the college or school, and in some cases, the department chair, granting the student an exception from the existing regulations.

Petitions are also used at UCR to change college or major, enroll in fewer units than regulations permit, make late changes to a class schedule, obtain credit by examination, concurrent enrollment, or withdraw from the university. Petitions for most of these exceptions are available on the Undergraduate Education Programs section of the SOE website and in the SOE Undergraduate Programs Office. Please note that petitions for retroactive actions more than one year old will not be approved.

Credit by Examination
To earn credit for a course by examination without formal enrollment in that course, students must be in residence and in good academic standing.

Before the examination may be given, arrangements and approval for examination for degree credit must be made with the instructor appointed to give the examination, a faculty advisor (if the major department requires it), and the associate dean. Petitions must be filed with the Office of the Registrar no later than the third week of instruction. Credit by examination is not allowed for English Composition courses.

The results of all examinations for degree credit are entered on students’ records as though they had actually taken the courses of instruction. There is a $5 service charge for each petition. The credit by examination procedure may not be used as a means of improving a previous grade.

Enrollment on Satisfactory/No Credit Basis
Undergraduate students in good academic standing may receive credit for courses undertaken and graded “S” up to a limit of one-third of the total units undertaken and passed on the Riverside campus at the time the degree is awarded. Normally, this means no more than 4 units of “S/NCE” per quarter. The total also includes courses graded only “S/NCE.” Courses that are required in, or prerequisite to, a major may not be taken on a “S/NCE” basis unless approved by the chair of the major department. Students on special status or limited status may take courses on a “S/NCE” basis only with the approval of the associate dean.

A student may elect “S/NCE” or delete “S/NCE” from a course by filing a petition (enrollment adjustment form) with the Registrar. The deadline is the end of the eighth week of instruction and is listed each quarter at registrar.ucr.edu. This deadline is strictly enforced.

Regulations governing the “S/NCE” option are described under Credit and Grades in the Policies and Regulations section of this catalog.

Undergraduate Credit for Graduate Courses
Students who have a GPA of at least 3.00 in all courses taken in the university or have shown exceptional ability in a special field may take a graduate course for undergraduate credit with the permission of the instructor concerned and permission of associate dean. Students must have completed at least 18 upper division quarter units basic to the subject matter of the course.

Expected Progress for Undergraduate Students
At the close of each quarter, the courses, units, grades, and grade points earned are added to the student’s cumulative university record. This record summarizes progress toward a degree. Lack of adequate progress may jeopardize continued registration. Students can access their advisory degree check through rweb.ucr.edu.

Applying for Graduation
To graduate from UCR, undergraduate students must file an application for graduation. The application must be submitted by 4 p.m. of the deadline date listed at registrar.ucr.edu. Applications are not accepted after the deadline established for the quarter.

Students should review their remaining requirements through rweb.ucr.edu each quarter. They should also contact their academic advisor two quarters before expected graduation to confirm remaining requirements.

Completion of the degree depends upon completion of any work in progress. During the graduation quarter, any changes made to a student’s schedule after the third week of instruction should be immediately reported to the academic advisor.

If for any reason a student does not meet the requirements for graduation after filing the application, another application must be filed for the appropriate quarter. Students graduating in absentia after an absence of one or more quarters must apply for readmission to the university and file an application for graduation.

All course work, whether taken at UCR or elsewhere, must be completed by the last day of UCR’s finals week during the quarter of graduation (no GDs or Incomplete grades). Incomplete, IE, IP or GD grades on the transcript will stop the processing of the degree.

Once the application for graduation is filed, the student’s name will be entered on the appropriate degree list. Students who need to amend the prospective quarter of graduation and who have submitted an application for graduation petition must notify the SOE Undergraduate Education Programs Office, in writing, as soon as possible.

Withdrawals
Students may withdraw from the university prior to the end of instruction, for serious personal reasons, with the approval of the associate dean. Forms are available in the SOE Undergraduate Education Programs Office.

Graduate Degrees and Credentials
The School of Education (SOE) offers credential programs for students preparing for careers in elementary, middle school, and high school teaching and teaching in classrooms for individuals with mild/moderate and moderate/severe disabilities. The programs prepare students to teach English learners and students from diverse backgrounds.

The School offers a Master of Education (M.Ed.) degree with a General Education Teaching Emphasis. This is for qualified students earning a Multiple Subject or Single Subject credential and is generally completed in one academic year and a summer term. A combined M.Ed. and credential in the area of Special Education is also available to qualified candidates. In addition, M.Ed. emphases in Diversity and Equity, Education Policy Analysis and Leadership; and Higher Education Administration and Policy are also offered. The school also offers M.A. programs in Education, Society, and Culture; Educational Psychology; Neuroscience and Education; Research Evaluation, Measurement and Statistics (REMS); and Special Education and Autism. Ph.D. programs in Education, Society and Culture; Education Policy Analysis and Leadership; Educational Psychology; Higher Education Administration and Policy; School Psychology and Special Education. The M.A. in School Psychology may be awarded only to students matriculating in the School of Education Ph.D. program. The Ph.D. in School Psychology is offered in combination with a Pupil Personnel Services Credential for School Psychology.

Graduate Study
Curricula are offered through the School of Education for the M.A., M.Ed. and Ph.D. degrees. These programs require broad training in education and in a cognate field of study. Further information can be found under the School of Education in the Programs and Courses section of this catalog or visit education.ucr.edu.
**Teaching Credential Programs**

Students planning to become teachers can pursue the following teaching credential programs in SOE:

1. **Multiple Subject (elementary school).** In addition, students may add:
   - Bilingual emphasis in Spanish. Please see the Teacher Education section of the SOE website at education.ucr.edu to learn about the pathways to complete the Bilingual Authorization.

2. **Single Subject (specified subject(s) at the middle school and high school level).**

3. **Education Specialist (special education)** in the following specializations:
   - Mild/Moderate Support Needs: authorizes service for mild to moderate retardation, attention deficit and attention deficit hyperactivity disorders; serious emotional disturbance; and includes specific learning disabilities.
   - Moderate/Severe Support Needs: authorizes autism, deaf-blindness, moderate to severe mental retardation, multiple disabilities, and serious emotional disturbance.

**Admission**

Admission to Teacher Education Programs is required in order to complete the professional and graduate level courses. The admission requirements vary depending on the credential specialization but at minimum students need a 3.0 GPA (calculated on the last two years of undergraduate studies), passage of the basic skills requirement, and subject matter competency. Students who want to be considered for an intern program or the M.Ed. General Education Teaching Emphasis have additional requirements. More information is available at [education.ucr.edu](http://education.ucr.edu).

**Licensure and Certification Disclosure**

Notice to Students re: Professional Licensure and Certification at [https://www.ucop.edu/institutional-research-academic-planning/content-analysis/academic-planning/licensure-and-certification-disclosures.html](https://www.ucop.edu/institutional-research-academic-planning/content-analysis/academic-planning/licensure-and-certification-disclosures.html)

**California Teach-Science and Mathematics Initiative (CalTeach-SMI)**

California Teach-Science and Mathematics Initiative (CalTeach-SMI) has a goal of addressing the critical need for highly qualified K-12 science and mathematics teachers in California. With an economy increasingly reliant on science, technology, engineering, and mathematics (STEM) and the anticipated large scale retirement of qualified teachers, this is an essential time to explore and prepare for a career in teaching science or mathematics. CalTeach-SMI at UCR offers undergraduate students paid/unpaid opportunities to explore STEM teaching as a career option. Through CalTeach-SMI, students receive advising and mentoring to prepare for entrance into an intern teaching credential program while diligently coordinating with academic advisors to ensure completion of STEM degree requirements. The CalTeach-SMI Resource Center provides future STEM teachers with material and financial resources to promote planning and professional development towards a science/mathematics education career.

For more information about the CalTeach-SMI program, please visit [smi.ucr.edu](http://smi.ucr.edu), the Resource Center at 1114 Pierce Hall, or at [https://www.facebook.com/ScienceMathInitiativeAtUcr](https://www.facebook.com/ScienceMathInitiativeAtUcr) and at [instagram.com/smiatucr](http://instagram.com/smiatucr).

---

**The School of Medicine**

**Medical Student Affairs**

School of Medicine Education Building II  
(951) 827-9017; fax: (951) 827-5504  
[somsa.ucr.edu](http://somsa.ucr.edu); [medschool.ucr.edu](http://medschool.ucr.edu)

Ph.D. Program in Biomedical Sciences  
1212 Webber Hall  
(951) 827-6540; [biomed.ucr.edu/our-degree-programs](http://biomed.ucr.edu/our-degree-programs)

**Mission Statement**

The mission of the UCR School of Medicine is to improve the health of the people of California and, especially, to serve inland Southern California by training a diverse workforce of physicians and by developing innovative research and health care delivery programs that will improve the health of the medically underserved in the region and become models to be emulated throughout the state and nation.

**The School**

The UCR School of Medicine was created to address the physician workforce needs in inland Southern California and to improve the health of people living in the region. The school’s community-based model provides medical students with clinical experiences in a variety of healthcare settings with diverse patient populations.

The M.D. curriculum offers a program that trains physicians who will be more attuned to the needs of increasingly diverse and underserved patient populations, with emphasis on culturally competent medical care. The Thomas Haider Program at the UCR School of Medicine maintains a unique pathway into medical school for UCR students, with up to 24 seats filled by students who attend UCR for at least six consecutive quarters and complete their bachelor’s degree at UCR. [somsa.ucr.edu/haider-program](http://somsa.ucr.edu/haider-program)

Together with affiliated medical centers in the community, the school is building a range of residency and fellowship training programs to provide the post-M.D. education required for physicians to become fully independent, licensed and board certified. [gme.ucr.edu](http://gme.ucr.edu)

**Graduate Study and Research**

The Graduate Program in Biomedical Sciences is an interdisciplinary translational research program that incorporates a medical school curriculum with basic science training. Our students become independent research scientists with skills that allow them to bridge the wide gulfs that exist between clinical medicine and basic science research.

The training leads to a Ph.D., combined M.D./Ph.D., or M.S. degree. Students have the opportunity to work with more than 60 faculty members from across the campus conducting interdisciplinary research at the forefront of more than a dozen different fields, including neuroscience, bioengineering immunology, and molecular endocrinology. [biomed.ucr.edu/our-degree-programs](http://biomed.ucr.edu/our-degree-programs)

Biomedical sciences faculty in the school have robust research programs in such areas as neurodevelopmental, neuroinflammatory and neurodegenerative disorders, traumatic brain injury, parasitic infections, intestinal bowel disease, metabolic and neuroendocrine control of fertility, tumor cell biology, vaccine development, and immune responses to viral infections. This outstanding base is being expanded with additional faculty in the biomedical sciences and clinical sciences with the goals of establishing new translational/clinical research programs and building research expertise in population-based health outcomes, prevention and wellness, health services and health disparities.

**The BREATHE Center** at the UCR School of Medicine is a multidisciplinary collaborative for studies bridging regional ecology, aerosolized toxins, and health effects. Research efforts among the collaborative include regional climate modeling, culture and policy studies on air quality and health, environmental justice and health disparities, and the health impacts of aerosolized particles including dusts, soil microbes, allergenic pollens from invasive species, and pollutants. [breathe.ucr.edu](http://breathe.ucr.edu)
The Center for Glial-Neuronal Interactions (CGNI) in UCR's School of Medicine brings together researchers with very diverse expertise to foster innovative and collaborative research on problems of brain and spinal cord health and disease. Together, faculty, fellows, and students seek to define molecular mechanisms required for optimal brain and spinal cord function as well as for prevention and therapeutic intervention of neurodevelopmental, neurologic and neurodegenerative diseases. Ongoing research includes programs on Alzheimer’s disease, autism spectrum disorders, cognitive disorders, epilepsy, stroke, glioblastoma, infections of the brain, multiple sclerosis, neuroinflammatory disorders, phantom limb syndrome, substance abuse, and traumatic brain injury. cgni.ucr.edu

The Center for Healthy Communities (CHC) aims to use innovative community-based research and to promote the health of communities in Inland Southern California. CHC is building bridges with community groups and interdisciplinary health-field faculty to promote the health of the culturally and economically diverse population surrounding UCR, particularly the medically underserved. healthycommunities.ucr.edu

The Center for Molecular and Translational Medicine provides a forum to accelerate and enhance collaboration among faculty whose research is devoted to the translation of basic sciences into potential therapeutics, medical devices or diagnostics. With this initiative, UC Riverside and the School of Medicine commit to devoting resources to assist in the development of novel treatments. The translation of basic laboratory discoveries into potential therapies, however, requires a multitude of efforts and expertise that no individual laboratory or funding source can, in isolation, fulfill. Potentially effective therapeutic strategies often never reach patients due to the lack of proper support necessary to channel basic laboratory pre-clinical studies through the complex and rigorous testing of experimental therapeutics. It is envisioned that the Center would either directly support or catalyze funding initiatives to advance the most promising innovative targeting approaches and agents into early stage clinical experimental therapeutics, therefore actively assisting in the first steps toward their development. molmed.ucr.edu

Center for RNA Biology and Medicine
The Center for RNA Biology and Medicine is a research center sponsored by UC Riverside and founded by Professor Sika Zheng of the UCR School of Medicine Division of Biomedical Sciences.

The center cultivates a vibrant, dynamic research environment that amplifies UCR’s deep and unique strengths in RNA research, and interfaces scientific discovery with medical and industrial applications. The center lays a fluid, forward-facing pipeline from basic to clinical RNA research at UCR and bolster UCR’s worldwide engagement and visibility.

Key areas of current research include the elucidation of RNA biogenesis, RNA processing and modifications, RNA coding of phenotypic variability, and establishing the role of RNA in disease and the exploration of RNA-based and RNA-targeted therapies. rna.ucr.edu

Student Pathway Programs and Advising
The School of Medicine’s Pathway Programs provide a continuum of student enrichment and academic support activities for students from the middle school level to postbaccalaureate level. The 10 programs can stand alone or build upon one another throughout their academic career, and assist in recruiting, advising and mentoring these future health professionals. The programs are overseen by or coordinated with the Pathway Programs Office at the UCR School of Medicine. pathwayprograms.ucr.edu

Student Pipeline Programs and Advising
The School of Medicine has expanded its student pipeline programs that together provide a continuum of student enrichment and academic support activities for students from the middle school level to postbaccalaureate level. Specific programs include Medical Leaders of Tomorrow, Future Physician Leaders, Health Sciences Partnership, Community College Outreach, FastStart, Medical Scholars Program, and the Premedical Postbaccalaureate Program. medschool.ucr.edu/pipeline_programs.html

The Health Professions Advising Center (HPAC), a unit of Undergraduate Education, is a resource available to all UCR undergraduate students and alumni interested in careers in the health professions, including medicine, dentistry, nursing, optometry, pharmacy, physical therapy, veterinary medicine, and public health. Professional staff and peer mentors are available to guide students in planning pre-health professions coursework, gaining health-related experiences and completing service work. A variety of workshops on such topics as the application process and personal statement writing are also offered. se.ucr.edu/hpac/overview

Facilities
In addition to the School of Medicine Research Building and School of Medicine Education Building I and II, the school’s faculty, students, and staff carry out their educational, research and administrative functions in the Multidisciplinary Research Building, Webber Hall, Pierce Hall, and in several clinical locations within Riverside and San Bernardino counties.

The School of Public Policy
4133 CHASS Interdisciplinary South (951) 827-5563; spp.ucr.edu; spp.ucr.edu

Mission Statement
The mission of the UCR School of Public Policy is to train a new generation of forward-thinking public policy leaders equipped to address the complex, interrelated challenges of poverty, disease, illiteracy, climate change, energy security, pollution and more. Their training will be informed by a diverse, interdisciplinary curriculum that emphasizes evidence-based policy research as well as cross-learning from both international and domestic problem-solving experiences, and a rich internship program that emphasizes experiential learning.

Distinctions
UCR is only the third UC to have a School of Public Policy and the first in the ten-campus UC system to offer an undergraduate degree in public policy. It is also the only major research university in the Inland Southern California region to offer a Master of Public Policy (MPP) program. The UCR School of Public Policy is distinctive in its focus on addressing the big policy challenges facing California and, in particular, the Inland Region. Our “Solutions for the Region, Solutions for the World” approach places an emphasis on applying policy lessons learnt from other parts of the nation and the world to solving California’s problems. The School of Public Policy brings together the national and international strengths of policy faculty from across the disciplines at UCR to create an exceptional educational experience for our students.

Undergraduate Study
The School of Public Policy (SPP) offers a B.A. in Public Policy and a minor in Public Policy. The major provides students with a set of research, analytical, and management skills that are transferable across sectors and across issue areas. Program faculty bring multidisciplinary perspectives to courses offered, including political science, data science, economics, education, sociology, social work, and geography. Students will benefit from completing the major or minor as coursework exposes students to finding solutions to address different societal issues. In addition, students will learn how policies should be designed and implemented to have the desired impact on individuals and communities, and how those policies should be monitored and evaluated to see if created policies are having the desired impacts.
Major in Public Policy
The public policy major is a coordinated group of lower division (courses numbered 0-99) and upper division (courses numbered 100-199) courses. The major requires students to complete seven (7) lower division requirements and thirteen (13) upper division requirements. Students are required to complete a minimum of one (1) quarter participation in a public policy related internship as part of the major curriculum.

Before enrolling in certain upper-division courses, students may be required to gain appropriate knowledge by completing specific prerequisite courses or university placement exams. Additionally, lower division courses titled "PBPL" cannot be used to satisfy breadth requirements.

The most current information pertaining to the public policy major requirements can be found on sppstudents.ucr.edu/undergraduate-students/degree-requirements#major_and_breadth_requirements.

Minor in Public Policy
The School of Public Policy offers a minor in public policy, however declared public policy major students are not allowed to declare a minor in public policy. A minor in public policy is not a degree-granting major; the minor is a sequence of supplemental coursework designed to enhance work in certain areas. The minor may be taken jointly with any interdepartmental major.

The public policy minor is a coordinated group of lower division (courses numbered 0-99) and upper division (courses numbered 100-199) courses. The minor requires students to complete three (3) lower division requirements and seven (7) upper division requirements.

Students can declare a minor in public policy with successful completion of all lower division requirements. A student’s primary college can have additional requirements in order to declare a minor in public policy.

The most current information pertaining to the public policy minor requirements can be found on sppstudents.ucr.edu/undergraduate-students/degree-requirements#minor_requirements.

Double Majors
Students can declare a secondary major in a department or program of another program or school. Changes are not to be made on academic probation or with senior standing (153 units or more). Both majors must be completed with the maximum limit of 216 units, and approval must be obtained from advisors in both departments or programs. In such cases, all course requirements must be completed for each of the two majors chosen. One of the two majors must be designated as the primary major for the purpose of satisfying breadth or general education requirements. No more than eight (8) upper-division units may count for both majors simultaneously.

A declaration of two majors in different colleges must be signed by the deans of the colleges concerned and filed by the student with the college of the principal major. If the two majors lead to different degrees (B.S. and B.A.), that fact will be noted on the transcript, but only one diploma indicating both degree designations will be issued upon successful completion of such a program. Furthermore, if the double major is a mixed B.S./B.A., the college requirements for both majors must be met.

Academic Advising
It is the student’s responsibility to meet all graduation requirements: general university, college, and major. A staff of academic advisors is readily available to assist with questions pertaining to academic regulations and procedures, selection of courses which satisfy breadth requirements, major options, and alternatives. Students who need to confer with an advisor about overall degree requirements, academic difficulty, program planning, or assistance in selecting a major need to schedule an appointment with their advisor. Students can schedule appointments on sppstudents.ucr.edu/undergraduate-students/advising.

Graduate Study
Master of Public Policy (MPP)
The MPP program is a full-time, two-year program designed to train a new generation of forward-thinking public policy leaders equipped to address complex and interrelated challenges.

The program focuses on the intersection of social and environmental policy and will prepare students for various careers in the public, private and non-profit sectors.

To be considered for admission, applicants should have a GPA of 3.0 or higher in their last two years of coursework. Applicants must upload a copy of their unofficial transcripts, a resume, two personal statements, and the contact information for three recommenders.

While there are no required courses to be considered for admission, students are strongly encouraged to have completed a course in Statistics, Economics, and Political Science. For additional information on admission requirements and important dates and deadlines, please visit mpp.ucr.edu.

The program is designed around 12 core courses six elective courses offered in the policy areas addressing health, education, environmental, urban, and social justice.

BA/MPP Program
The BA/MPP program will allow students to obtain both BA and MPP degrees through an integrated, five-year plan of study. This program prepares students for professional careers as well as for pursuing subsequent doctoral degrees in relevant disciplines.

Qualified students will be invited to apply for the program in the spring quarter of their junior year. While completing the curriculum for the Bachelor’s degree in their senior year, students in the program will also begin the curriculum for the MPP degree. Students will stay for a fifth year and graduate with both their BA and MPP degrees.

For more information, please email bamppdegree@ucr.edu.

MD/MPP Program
Students interested in the concurrent degree program have already been admitted to the School of Medicine (SOM). Students will spend the first three years of the SOM. After admission to the program, students will spend a full academic year at the SPP. After completion of MPP coursework, students will finish their last year of medical school and apply for residency. During the 4th year of medical school (5th and final year of the concurrent degree program), students in the concurrent degree program will work on their health policy capstone project.

For more information, please email mpp@ucr.edu.
PROGRAMS AND COURSES

Numbering and Classification
The credit value of each course in quarter units is indicated for each term by a number following the title. The Schedule of Classes, at registrationssb.ucr.edu, published several weeks before each term commences, lists the courses that will actually be offered for that term, along with their class hours and locations.

The class type, such as lecture or laboratory, and number of hours per week are listed in the first line of the description.

The letters “A,” “B,” “C,” and “D” are used with the course numbers to indicate sequential order; they do not necessarily indicate that an earlier quarter in the sequence is a prerequisite to the later quarters; the prerequisites (if any) of a given course are stated in the description of that course. The letter designation “E-Z” immediately following a course number — for example, HIST 191 (E-Z) — indicates different topics offered under a general title; no specific instance of such a course, for example, HIST 191E, HIST 191F, or HIST 191G, may be repeated for credit unless otherwise indicated in the course description. The letters “E” through “Z” have no sequential implications. The letters “H”, “L”, or “P” immediately following a course number usually have special designations: “H” for an honors course, “L” for a laboratory course (usually in the sciences), and “P” for a proseminar. A grade is assigned by the instructor at the end of each term, and credit is granted for each term, except as otherwise noted. Courses are numbered as follows:

1. Lower-division: 001–099; generally recommended for freshmen and sophomores.
2. Upper-division: 100–199; normally open only to students who have completed at least one lower-division course in the subject, or six quarters/four semesters of college work. Credit in special studies courses for undergraduates is limited to 5 units per quarter.
3. Graduate: 200–299; normally open only to students who have completed at least 18 upper-division quarter units basic to the subject matter of the course.

The admission of undergraduates to graduate courses is limited to upper-division students who have an overall scholarship average not lower than “B”; these limits are imposed by the rules of the Graduate Division. However, graduate courses completed before attaining the baccalaureate will not be accepted in partial fulfillment of requirements for the credential or minimum requirements in the 200 series for the master’s degree, except for undergraduate students who have received approval for backdating their graduate status to cover the session during which such courses were taken. See the Backdating Units section under Policies and Regulations.

4. Professional courses for teaching credential candidates: 300–399.
5. Other professional courses: 400–499.

Cross-listed Courses
Cross-listed courses share equivalent course content but are taught by two or more departments. Cross-listed courses generally share a course number, but each course is tied to a specific subject area and department. While prerequisites, unit coverage, and grading basis are identical for cross-listed courses, it may be preferable for students in certain degree programs to enroll under only one of the available subject areas. See an academic advisor to determine which subject area is most appropriate before enrolling in a cross-listed course.

To determine which courses are cross-listed, see individual course descriptions in this catalog or visit registrationssb.ucr.edu.

UC Extension Courses
Students may earn credit toward bachelor’s and master’s degrees at the UC through University Extension. Acceptance of such credit is based on requirements of a particular college, division or department. Generally, preference is given to credits from courses numbered 001–099 and 100–199, prefixed by XR, XL, XI, XB, etc., indicating that such courses are intended to replicate regular offerings of a campus of the UC. Also, courses organized by University Extension, numbered 001–099 and 100–199, prefixed only with an X, are acceptable.

Extension credits are treated like transfer units from approved colleges. They apply toward unit requirements for a degree, but they do not count toward the requirements for residence. Resident students in the university must have advance approval from the appropriate dean for enrollment in UC Extension courses.

Credit earned in University Extension courses is not automatically applicable toward requirements for a master’s degree or university-recommended teaching credential and is permitted only in unusual circumstances. Students desiring such credit should consult with their graduate advisors and the Graduate Division before undertaking such course.
Actuarial Science

Subject abbreviation: BUAS
The School of Business

Actuarial Science Major
Lower division requirements (12–13 courses [at least 52 units]) Major prerequisites (non-BUS courses may be used to satisfy breadth requirements for the School of Business):

- BUS 010 and BUS 020
- CS 009A
- ECON 002 and ECON 003
- STAT 008 or STAT 010 or ECON 101
- MATH 010A and MATH 010B
- MATH 031
- MATH 046

And at least one sequence from either

- MATH 009A, MATH 009B, and MATH 009C or
- MATH 005B and MATH 005C

College Requirements
College Requirements in Actuarial Science follow the School of Business breadth requirements for Actuarial Science as stated below:

English Composition: 12 units up to ENGL 001C (BUS 100W can be used for ENGL 001C with a grade of C or better)

Humanities: 12 units. One course each from:
  - A. World History
  - B. Fine Arts, Literature, Philosophy, or Religious Studies
  - C. One additional Humanities course

Social Sciences: 8 units. One course each from:
  - A. Economics or Political Science
  - B. Anthropology, Psychology, or Sociology

Ethnicity (4 units)*: The 4-unit ethnicity requirement can be applied to either the Humanities or Social Sciences requirement, depending on content*

Natural Sciences and Mathematics: 20 units.
One course each from:
  - A. Biological Science
  - B. Mathematics
  - C. Physical Science
  - Plus, two additional courses from Mathematics, Statistics, or Computer Science

Additional Courses: 12 units from Humanities, Social Sciences, or Natural Sciences and Mathematics

Total Units: 56 plus English Composition

The major requirements for the B.S. in Actuarial Science are as follows:

Upper-division major requirements (19–20 courses [at least 80 units])
BUAS 101, BUS 100W, BUS 125, BUS 126, BUS 130, BUS 131, BUS 133 (or BUS 106 and BUS 132), BUS 134, BUS 136, BUS 137, ECON 104A, ECON 104B, STAT 107, STAT 146, STAT 160A, STAT 160B, STAT 160C and two of the following: STAT 161, STAT 167, STAT 170, STAT 171.

Administrative Studies

College of Humanities, Arts, and Social Sciences

Committee in Charge
Jana Grittersova, Chair (Political Science)
Muhammad Ali (Religious Studies)
Matthew Mahutga, interim (History)
Yang Xie (Economics)
TBD (Art History)
Daryl Williams, Dean, ex officio

Major
B.A. degrees are offered in Art History, Economics, History, Political Science, and Sociology with Administrative Studies. A B.S. degree is offered in Sociology with Administrative Studies. Specified departmental requirements are listed under respective departmental listings.

University Requirements
See Undergraduate Studies section.

College Requirements
See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

Major Requirements
1. All requirements of the College of Humanities, Arts, and Social Sciences
2. Specified requirements of the relevant department, to include at least 36 upper-division units in that discipline

Administrative Studies requirements
(37 units)
1. Lower-division courses (17 units)
   - a) BUS 010, BUS 020
   - b) STAT 008 or equivalent (may be used to satisfy breadth requirements)
   - c) CS 008 (may be used to satisfy breadth requirements)
2. Upper-division requirements (20 units)
   - a) Two courses (8 units) from the list below:
     - (1) ECON 102 or ECON 103 or ECON 104A or ECON 130 or ECON 162/BUS 162
     - (2) PSYC 140 or PSYC 142
     - (3) SOC 150 or SOC 151
     - (4) POSC 181 or POSC 182 or POSC 183 or POSC 186
   - b) BUS 100W, BUS 107, BUS 125, BUS 126, BUS 130, BUS 131, BUS 133 (or BUS 106 and BUS 132), BUS 134, BUS 136, BUS 137, ECON 104A, ECON 104B, STAT 107, STAT 146, STAT 160A, STAT 160B, STAT 160C
   - c) Two courses (8 units) from the list below:
     - (1) ECON 102 or ECON 103 or ECON 104A or ECON 130 or ECON 162/BUS 162
     - (2) PSYC 140 or PSYC 142
     - (3) SOC 150 or SOC 151
     - (4) POSC 181 or POSC 182 or POSC 183 or POSC 186

(5) ANTH 127 or ANTH 127S or ANTH 131
These two courses must be outside the discipline of the relevant major and cannot be courses included as part of the three-course Business Administration track or their cross-listed equivalents.

b) A three-course track (12 units) in Business Administration courses, from one of the following:
(1) Organizations (General): BUS 100 or BUS 100W, BUS 107, BUS 158/ANTH 105, BUS 176/SOC 176, SOC 150, SOC 151
(2) Human Resources Management/Labor Relations: BUS 100 or BUS 100W, BUS 107, BUS 121, BUS 144, BUS 145, ECON 153/ECON 153, BUS 155, BUS 156, BUS 157, PSYC 142
(3) Business and Society: BUS 100 or BUS 100W, BUS 102, BUS 107, PHIL 116, POSC 182, POSC 186
(4) Marketing: BUS 103, and two from BUS 111, BUS 112, BUS 113, BUS 114, BUS 115, BUS 116, BUS 117, BUS 118, BUS 119, BUS 124, BUS 126, BUS 151, BUS 152, BUS 159, BUS 164
(5) Managerial Accounting/Taxation: BUS 108, and two from BUS 166, BUS 168A, BUS 168B
(7) Finance: BUS 106/ECON 134 and Two from BUS 131, BUS 132, BUS 134, BUS 135, BUS 136, BUS 137, BUS 138, BUS 139, BUS 140E, BUS 141, BUS 147
(8) Management Information Systems: BUS 101, BUS 110, BUS 125, BUS 128, BUS 171, BUS 172, BUS 173, BUS 174, BUS 175, BUS 179
(9) Production Management: BUS 104/STAT 104, and two from BUS 105, BUS 122, BUS 127/STAT 127
Anthropology

Hyejin Nah, Ph.D.
Nawa Sugiyama, Ph.D.

Assistant Professor of Teaching
Worku Nida, Ph.D.

Majors
Anthropologists study the way diverse groups of people understand and live in various settings ranging from urban environments to rural villages all over the world. They are interested in such questions as: What does it mean to be human? What activities define the social life of groups and how are they related? How do the members of groups communicate? What is the material evidence for their social and biological history? What are the historical, social, political, economic, and environmental forces that have helped to shape the experiences of particular groups of people, both in the past and in the contemporary world? And, how do human societies change and why? Anthropologists apply this knowledge for the benefit of the peoples whose communities they study.

Anthropology includes four broad subfields:
1. Sociocultural anthropology, the comparative study of communities in their local and global contexts
2. Archaeology, the investigation of past societies through their material and written remains
3. Biological anthropology, which focuses on the evolution of human beings as a species and the interaction of human biological variability with culture
4. Linguistic anthropology, which explores the interconnectedness of language, culture, thought, and social structure

Career Opportunities
Anthropology prepares students for dealing with the challenges of an increasingly international economy, transnationally connected communities, and multicultural citizenries. Besides helping students hone and refine analytical skills and critical thinking, anthropology helps them recognize the impact of cultural dynamics on interpersonal communication and on the social structures that affect everyone’s daily lives. Anthropology majors interested in pursuing graduate studies are excellent candidates for programs in anthropology, business, law, journalism, medicine, social work, urban planning, and almost any other profession that calls for working with people from a variety of backgrounds and in a number of different settings.

The skills and knowledge learned as an undergraduate anthropology major help students understand the connections between people. Anthropology majors who are not planning to pursue graduate or professional studies immediately can forge careers as teachers at the primary and secondary levels; interviewers; recruiters in executive and specialized employment agencies; staff and managers in various local, state, and federal governmental agencies as well as in a variety of national and international non-governmental organizations and community development organizations; archaeological field or laboratory technicians; intercultural communications professionals in hospitals and other organizations; or union organizers.

University Requirements
See Undergraduate Studies section.

College Requirements
See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

Major Requirements
The Department of Anthropology offers the B.A. and B.S. degrees in Anthropology and the B.A. degree in Anthropology/Law and Society. The B.S. program is intended for those planning professional careers in anthropology or in the related fields mentioned above. The B.A. programs are intended for those desiring a broad liberal arts curriculum.

Anthropology Major
The major requirements for the B.A. and B.S. degrees in Anthropology are as follows:

1. Lower-division requirements
   (four courses [at least 16 units])
   a) ANTH 001, ANTH 001H, or ANTH 001W, ANTH 002, ANTH 005, and ANTH 007 or ANTH 007S with a grade of C- or better in each
2. Upper-division requirements
   a) One theoretical/history course
      ANTH 100 or ANTH 100W.
   b) One methods course; ANTH 165E, ANTH 165F, ANTH 165G, or ANTH 165I
   c) One regional course; ANTH 115E-Z or ANTH 140E-Z
3. At least 6 courses (24 units) in one area of concentration
   a) Four field approach to anthropology
      1) At least one upper-division course in each of the subdisciplines of anthropology:
         (a) Archaeology
         (b) Biological anthropology
         (c) Cultural and social anthropology
         (d) Linguistic anthropology
      2) Two courses (at least 8 units) of upper-division Anthropology for the B.A.; three courses (at least 12 units) for the B.S.
   b) Medical Anthropology
      1) At least two upper division courses in two different subdisciplines of anthropology:
         (a) Archaeology
         (b) Biological anthropology
         (c) Cultural and social anthropology
         (d) Linguistic anthropology
      2) At least four upper division courses for a B.A. with a concentration in Medical Anthropology (at least 16 units); five courses (at least 20 units) for the B.S. selected from the following:
         (a) ANTH 144 E-Z courses
         (b) GSST 171
   c) Black and Black Diaspora Studies
      1) At least two upper division courses in two different subdisciplines of anthropology:
         (a) Archaeology
         (b) Biological anthropology
         (c) Cultural and Social anthropology
         (d) Linguistic anthropology
         2) At least four upper division courses in Black and Black Diaspora Studies (at least 16 units); for a B.A. with a concentration in Black and Black Diaspora Studies (at least 16 units); five courses (at least 20 units) for the B.S. selected from the following:
         (a) ANTH 142 E-Z courses
         (b) ANTH 144F, ANTH 144I, ANTH 144K, ANTH 144O
The title of the Anthropology major will be entered on the official degree list and on the official transcript. Diplomas will read “Anthropology” with the individual field of concentration specified where appropriate (Medical Anthropology or Black and Black Diaspora Studies).

Note: Students are strongly urged to take the lower-division requirements in the first two years of university study. Students intending to major in anthropology should work closely with a faculty advisor in planning their programs.

Anthropology/Law and Society Major
The Law and Society major is open to undergraduate students with junior standing who have completed LWSO 100 with a grade of “C” or higher. The major requirements for the B.A. degree in Anthropology/Law and Society are as follows:

1. Anthropology requirements
   All requirements for the B.A. in Anthropology. See Anthropology Major above for specific requirements.

2. Law and Society requirements (36 units)
   a) PHIL 007 or PHIL 007H
   b) LWSO 100 (with a grade of “C” or better)
   c) One course chosen from POSC 114, PSYC 012, SOC 004 (or equivalent course in research methods)
   d) Three courses chosen from ANTH 127, ECON 119, HRM 153, PHIL 165, POSC 167, PSYC 175, SOC 159
   e) Two courses chosen from HISA 120A, HISA 120B, HIS 123, LWSO 175 (E-Z), PHIL 164, POSC 111, POSC 166, POSC 168, POSC 186, SOC 147, SOC 149, SOC 180
   f) LWSO 193, Senior Seminar

Note: For sections 2.d) and 2.e) combined, no more than two courses may be taken from the same department. In filling the dual requirements of the major, students may not count more than two courses toward both parts of their total requirements (Anthropology requirements and Law and Society requirements).

Minor
The Department of Anthropology offers a minor in Anthropology which consists of 24 upper-division units. Many upper division anthropology courses have lower division prerequisites. Lower division prerequisites do NOT count towards the 24 unit requirement for the minor.

The courses are to be selected as follows:

1. Two upper-division courses in cultural anthropology from ANTH 103, ANTH 117, ANTH 121, ANTH 122, ANTH 124, ANTH 125, ANTH 126, ANTH 127 or ANTH 127S, ANTH 131, ANTH 132, ANTH 133, ANTH 136, ANTH 137, ANTH 139, ANTH 142E, ANTH 142F, ANTH 142G, ANTH 144E, ANTH 144F, ANTH 144G, ANTH 145, ANTH 148, ANTH 149/WMST 149, ANTH 163, ANTH 142G/ESTT 148/LNST 168, ANTH 170, ANTH 173, ANTH 177, ANTH 179, ANTH 182 (ANTH 001 is the normal lower-division prerequisite for these courses.)
2. Two upper-division courses (8 units) from any ONE of the following subdisciplinary areas: (Both courses MUST be taken in the same subdiscipline)
   a) Archaeology
      (1) Prerequisite: ANTH 005
      (2) Courses: ANTH 110, ANTH 111, ANTH 112, ANTH 113, ANTH 118, ANTH 172, ANTH 178/WMST 178
   b) Physical/Biological Anthropology
      (1) Prerequisite: ANTH 002
      (2) Courses: ANTH 104, ANTH 107, ANTH 144J, ANTH 152, ANTH 153, ANTH 155
   c) Linguistic Anthropology
      (1) Prerequisite: ANTH 003
      (2) Courses: ANTH 120, ANTH 123, ANTH 167/LING 167
3. One upper-division course (4 units) pertaining to a geographic area from ANTH 115 (E-Z), ANTH 128, ANTH 136 or ANTH 136S, ANTH 140 (E-Z), ANTH 151, ANTH 157, ANTH 161/LNST 161, ANTH 142G/ESTT 148/LNST 168
4. One upper division methodological course (4 units) from ANTH 165E, ANTH 165F, ANTH 165G, ANTH 184, ANTH 185

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Education Abroad
Education Abroad is an excellent opportunity to learn more about another country and its culture while taking courses to earn units toward graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit Education Abroad at ea.ucr.edu or call (951) 827-4113.

See Education Abroad in the Educational Opportunities section in the beginning of this catalog.

Visit the departmental Education Abroad website at https://anthropology.ucr.edu/education-abroad Consult the departmental student affairs officer for assistance.

Graduate Program
The Department of Anthropology offers the M.A., M.S., and Ph.D. degrees in Anthropology.

Doctoral Degree
The graduate program transforms scholars into professional anthropologists who will variously engage in research, teaching, policy-related and/or administrative activities that benefit the people with whom they work. The program focuses on how people living in various settings participate in and adapt to processes of change and transformation, both historically and in the contemporary world. The faculty is committed to an integrated, socially engaged concept of the discipline. The traditional subfields — sociocultural anthropology, biological anthropology, archaeology, and linguistics anthropology — are crosscut by a series of concentrations that constitute areas of strength. The most developed concentrations are (1) the applied anthropology of transnational processes (inequality, migration) and the border and binational communities associated with globalization and the internalization of capital; (2) the archaeology of Mesoamerica; (3) cultural and political ecology; (4) Black and Black Diaspora Studies; and (5) the bioarchaeology and paleoanthropology of Asia and the Americas. The department has close working relationships with other programs on campus.

The department is dedicated to educating the next generation of professional anthropologists. The faculty consists of active research scholars with solid records of publication, conducting original research, obtaining extramural grants, and placing graduate students in regional, national, and international labor markets. Aware of the current structures of employment, faculty prepare students to pursue both academic and nonacademic careers.

Admission
Applicants must supply official transcripts from all institutions attended since high school, three letters of recommendation, a writing sample, and a personal statement specifying why they wish to undertake and complete graduate training at the UCR Department of Anthropology.

Course Requirements
During their first year, students complete the year-long seminar sequence ANTH 200A, ANTH 200B, and ANTH 200C (Core Theory in Anthropology). Students must acquire a basic understanding of three of the four subfields (sociocultural anthropology, biological anthropology, archaeology, and linguistics). To fulfill the breadth requirement, students must take at least one graduate course in each of two subfields outside the student’s major focus. All students must complete professional development training by the end of their 9th quarter. This is fulfilled by taking ANTH 210A and ANTH 210B before taking their Ph.D. Oral Exam.

Language Requirement
Students must demonstrate at least a reading knowledge in one language other than English. In some cases, the student’s advisor may require knowledge of a second language. The choice of language(s) and the method of demonstrating competence should be determined in consultation with the student’s advisor. All students must file a Statement of Plan to Fulfill the Language Requirement by the end of the second quarter of their first year in residency. This includes students who are fully bilingual or whose primary language is not English. Competency may be demonstrated by the following:

1. Placing higher than level 3 in the Language Placement Examination,
2. Receiving a grade of at least “B” or “S” in a reading skills course or level 3 traditional language course, or
3. Alternative certification
In addition, students who plan to conduct fieldwork in a non-English setting must acquire conversational skills in the appropriate language before commencing fieldwork. Be-
cause language acquisition is a slow process, students are encouraged to begin language training early in their graduate program.

**Methodological Skills Requirement**

Students must demonstrate competency in a qualitative or quantitative methodological skill such as GIS, lithic analysis, statistics, or hieroglyphic analysis. The choice of methodological skill should be determined in consultation with the student's advisor. All students must file a Statement of Plan to fulfill the Methodological Skills Requirement by the end of the second quarter of their first year in residency.

**Master's Examination**

Students take the master's examination during the week of spring-quarter examinations of their first year. The examination is based on the material covered in the ANTH 200A, ANTH 200B, and ANTH 200C sequence and is required of all students, including those holding a master's degree from another institution. Depending on the student's performance on the test, the faculty will recommend one of the following:

1. **Pass with Distinction or High Pass**
   Automatic continuation in the Ph.D. program and award of the master's degree under Graduate Division Plan II.

2. **Pass**
   Awarding of the master's degree under Graduate Division Plan II, but a successful retake (Pass with Distinction or High Pass) is required to continue in the Ph.D. program.

3. **Fail**
   Master's degree not awarded, but one retake within six months is allowed for potential awarding of the master's degree under Graduate Division Plan II.

The **Preliminary Research Statement** is designed to present the research orientation for an intended dissertation topic and to explain how the student intends to develop and pursue the area of research. The statement should present a comprehensive plan of study and a timeline covering the remainder of the student's graduate career, and outline intended areas, theories, and methods. It should be considered a precursor to the materials developed later in the research proposal and the written qualifying examination. Designating a dissertation committee is part of completing the statement.

The **Written Qualifying Examination** is a research paper written during a specified two-week period. The examination question is generated by the faculty advisor in consultation with the student and the dissertation committee, and must be approved by the department before the student can begin the examination.

The **Research Proposal** prepares students to undertake dissertation research and provides, in part, the basis for the oral qualifying examination. The length and format of the proposal should be similar to that of a proposal for a major funding agency.

Students must give a **Public Oral Presentation** to the department, at the James Young Colloquium, or at a national or international meeting. This presentation is intended to provide the student with experience in presenting research papers in a public context.

The **Oral Qualifying Examination** involves a demonstration of general competence in anthropology, combined with an extended discussion of the proposed dissertation research (preparation, methodology, significance, etc.). Once students have satisfactorily fulfilled the courses requirement (including breadth requirement), language requirement, methodological skills requirement, master's examination, preliminary research statement, written qualifying examination, research proposal, public presentation, and oral qualifying examination, they are advanced to candidacy for the Ph.D. and formally begin research for the dissertation.

**Dissertation and Final Oral Examination (Dissertation Defense)**

After advancement to candidacy, students complete a dissertation representing original research within their field of specialization. Dissertations generally require a year of field research followed by an additional year of data analysis and write-up. After completing the dissertation (or a substantial portion of it), students present an oral, public defense of the dissertation.

**Professional Development Requirement**

All students must complete professional development training by the end of their 9th quarter. This is fulfilled by taking ANTH 210B before taking their Ph.D. Oral Exam.

**Master's Degree**

The M.A. degree in Anthropology is normally awarded as part of the Ph.D. program, rather than as a separate degree objective.

**Plan II (Comprehensive Examination)**

Candidates complete 36 units, of which at least 18 must be 200-series courses and must include the ANTH 200A ANTH 200B, and ANTH 200C sequence, and pass a written comprehensive examination prepared by a departmental committee.

**M.A. in Anthropology and Education**

The M.A. is offered in cooperation with the School of Education; see the listing under Plan I (Thesis). Candidates must complete 56 units, of which at least 24 must be 200-series courses; courses for the area of specialization as specified by the department, and an acceptable thesis.

**Lower-Division Courses**

**ANTH 001 Cultural Anthropology 4**

Lecture, 3 hours; discussion, 1 hour. Explores the basic contributions of anthropology to the understanding of human behavior and culture and the explanation of similarities and differences among human societies. Addresses the relevance of materials drawn from tribal and peasant culture to problems of the modern world. Stresses the application of anthropological methods to research problems. Credit is awarded for one of the following ANTH 001, ANTH 001H, or ANTH 001W.

**ANTH 001H Honors Cultural Anthropology 4**

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to ANTH 001. Explores the basic contributions of anthropology to the understanding of human behavior and culture and the explanation of similarities and differences among human societies. Addresses the relevance of materials drawn from tribal and peasant culture to problems of the modern world. Stresses the application of anthropological methods to research problems. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of ANTH 001 or ANTH 001H or ANTH 001W.

**ANTH 001W Cultural Anthropology 4**

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENGL 001B with a grade of C or better, ENGL 007, may be taken concurrently; for concurrent enrollment in ENGL 007, review the course titles or topics in the current online Schedule of Classes to find the corresponding ENGL 007 writing workshop. Explores the basic contributions of anthropology to the understanding of human behavior and culture and the explanation of similarities and differences among human societies. Addresses the relevance of materials drawn from tribal and peasant culture to problems of the modern world. Stresses the application of anthropological methods to research problems. Fulfills the third-quarter writing requirement for students who earn a grade of “C” or better for courses that the Academic Senate designates, and that the student's college permits, as alternatives to English 001C. Credit is awarded for one of the following ANTH 001W, ANTH 001, or ANTH 001H.

**ANTH 002 Biological Anthropology 5**

Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours. A survey of past and contemporary human variation and evolution considered from the perspective of the fossil record, inferences from nonhuman primate biology and social behavior, and the forces of evolution.

**ANTH 003 World Prehistory 4**

Lecture, 3 hours; discussion, 1 hour. Examines the cultural history of humankind, from the beginning of tool-using behavior in the Old World to the rise of complex social and political systems (civilizations) in both the Old and New World.
ANTH 005 Introduction to Archaeology
Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours. A general introduction to the aims and methods of archaeology, in the field and in the laboratory. Briefly surveys world prehistory as revealed by these methods.

ANTH 006 Introduction to World Music
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. A survey of people, identity, and music making. Includes listening to music from many cultural contexts. Also covers a variety of scholarly topics in world music. Cross-listed with MUS 006.

ANTH 007 Introduction to Linguistic Anthropology
Lecture, 3 hours; research, 3 hours. Prerequisite(s): none. Introduces linguistic anthropological understanding of how language not only reflects but also refracts and shapes our social, political, cultural, and moral realities, values, and interests. Examines linguistic anthropological theories, ethnographies, and methodologies to explore how, to what extent, and why language is unexpectedly cultural, social, and political. Credit is awarded for one of the following ANTH 007 or ANTH 007S.

ANTH 007S Introduction to Linguistic Anthropology
Lecture, 3 hours; discussion, 1 hour; research, 3 hours. Prerequisite(s): none. Introduces linguistic anthropological understanding of how language not only reflects but also refracts and shapes our social, political, cultural, and moral realities, values, and interests. Examines linguistic anthropological theories, ethnographies, and methodologies to explore how, to what extent, and why language is unexpectedly cultural, social, and political. Credit is awarded for one of the following ANTH 007S or ANTH 007.

ANTH 010 Mysteries of the Ancient Maya
Lecture, 3 hours; research, 3 hours. An introduction to all aspects of the ancient Maya civilization of southern Mexico and Central America. Explores Maya origins, political organization, agriculture, art, religion, architecture, hieroglyphic writing, and the unexplained collapse of the civilization. Credit is awarded for one of the following ANTH 010 or ANTH 010S.

ANTH 010S Mysteries of the Ancient Maya
Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours. An introduction to all aspects of the ancient Maya civilization of southern Mexico and Central America. Explores Maya origins, political organization, agriculture, art, religion, architecture, hieroglyphic writing, and the unexplained collapse of the civilization. Credit is awarded for one of the following ANTH 010S or ANTH 010.

ANTH 012 Great Discoveries in Archaeology
Lecture, 3 hours; extra reading and written exercises, 3 hours. Introduces the methods and goals of archaeology through examples of “great discoveries” that have altered our understanding about the past. Explores discoveries from around the world, including such well-known examples as King Tut’s tomb, Pompeii, and the lost cities of the ancient Maya. Also covers lesser-known recent finds and the application of modern scientific technologies in archaeology.

ANTH 020 Culture, Health, and Healing
Lecture, 3 hours; consultation, 1 hour. Surveys health, disease, curing, and nutrition in a cross-cultural perspective. Covers how different cultural groups consider disease, health maintenance, and healing; how traditional beliefs about health and nutrition arise; and what one can and cannot learn from traditional health-seeking practices. Credit is awarded for one of the following ANTH 020 or ANTH 020S.

ANTH 020S Culture, Health and Healing
Lecture, 3 hours; discussion, 1 hour. Surveys health, disease, curing, and nutrition in a cross-cultural perspective. Covers how different cultural groups consider disease, health maintenance, and healing; how traditional beliefs about health and nutrition arise; and what one can and cannot learn from traditional health-seeking practices. Credit is awarded for one of the following ANTH 020S or ANTH 020.

ANTH 027 Art of Pre-Columbian America
Lecture, 3 hours; research, 3 hours. Prerequisite(s): none. A survey course that provides a background to the ancient art of Mexico, Central America, and the Andean region of western South America. Discusses art of pre-Columbian America according to the three broad cultural regions of Mesoamerica, the lower part of central and southwestern North America, and the Andean area. Cross-listed with AHS 027 and LNST 027.

ANTH 050 Human Evolution
Lecture, 3 hours; research, 3 hours. Prerequisite(s): none. Explores the evolutionary history of humans as biocultural beings adapting to changing environments. Examines fossils, genetics, and archaeological data.

Upper-Division Courses

ANTH 100 History of Anthropological Theory
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W; or consent of instructor. A survey of the history of theory in anthropology and the development of the discipline. Focuses on useful ideas from these theories and methods anthropologists have developed to study other societies. Credit is awarded for one of the following ANTH 100 or ANTH 100W.

ANTH 100W History of Anthropological Theory
Lecture, 3 hours; discussion, 1 hour; extra reading, 1 hour. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W; ENGL 001B with a grade of C or better, ENGL 007, may be taken concurrently; for concurrent enrollment in ENGL 007, review the course titles or topics in the current online Schedule of Classes to find the corresponding ENGL 007 writing workshop. A survey of the history of theory in anthropology and the development of the discipline. Focuses on useful ideas from these theories and methods anthropologists have developed to study other societies. Fulfills the third-quarter writing requirement for students who earn a grade of "C" or better for courses that the Academic Senate designates, and that the student's college permits, as alternatives to English 001C. Credit is awarded for one of the following ANTH 100W or ANTH 100.

ANTH 101 Contemporary Anthropological Theory
Lecture, 3 hours; research, 3 hours. Prerequisite(s): ANTH 100. Explores the core ideas in modern anthropology about culture and society. Covers basic issues of contemporary theory since the 1980s. Explores the new methodologies and application of theory to ethnography.

ANTH 103 Introduction to Visual Anthropology
Seminar, 3 hours; individual study, 3 hours; research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W; or consent of instructor. An introduction to the field of visual anthropology. Examines the similarities and differences between ethnographic film, critical studies, and written ethnographies. Explores the politics of representing other cultures visually. Cross-listed with MCS 103. Credit is awarded for one of the following ANTH 103, MCS 103, ANTH 103S, or MCS 103S.

ANTH 103S Intro to Visual Anthropology
Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours; research, 3 hours. Prerequisite(s): ANTH 001 with a grade of C- or better or ANTH 001H with a grade of B or better or ANTH 001W with a grade of C- or better; or consent of instructor. An introduction to the field of visual anthropology. Examines the similarities and differences between ethnographic film, critical studies, and written ethnographies. Explores the politics of representing other cultures visually. Cross-listed with MCS 103S. Credit is awarded for one of the following ANTH 103S, MCS 103S, ANTH 103, or MCS 103.

ANTH 104 Bioarchaeology
Lecture, 2 hours; practicum, 3 hours; research, 3 hours. Prerequisite(s): ANTH 002 with a grade of "C-" or better. Introduces the study of bioarchaeology in order to explore human skeletal remains from archaeological settings. Topics include the history and ethics of studying human remains, mortuary archaeology, methodological shifts in skeletal research, and interpretation of human skeletons using various methods.

ANTH 105 Organizations as Cultural Systems
Lecture, 6 hours; extra reading and written exercises, 6 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the role of culture in the formation and management of complex bureaucratic organizations. Covers types of organizations and organizational cultures, the impact of the cultural environment, and problems posed by rapid cultural change. Offered in summer only. Cross-listed with BUS 158.

ANTH 106 Gender and Genocide
Lecture, 3 hours; individual study, 2 hours; term paper, 1 hour. Prerequisite(s): one of the following courses: GSST 001, GSST 001H, GSST 001S; or consent of instructor. Examines gendered dimensions of contemporary and historical genocides. Analyzes the ways gender ideologies intersect racialization and ethnic marking. Explores how gender shapes selection, forced labor, torture, and murder. Considers gender ideologies in relation to collective, institutional, and individual responses to genocide and genocidal campaigns. Cross-listed with GSST 125.
ANTH 107 Evolution of the Capacity For Culture 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or ANTH 002 or ANTH 003 or relevant preparation in psychology or biology or consent of instructor. An examination of the evolution of the biological and social capacities that have made culture the central attribute of the human species. Topics include the evolution of human diet, tool-making, the family and kinship, and language.

ANTH 108 Anthropology of Global Media 4 Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the global production, transmission, and consumption of mass media in diverse national and transnational contexts. Includes debates over the power of media; construction of knowledge of others; affective responses to images of violence; practices of self-representation; and the ways in which consumers accept, reject and negotiate media messages.

ANTH 110 Prehistoric Agriculture 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A cross-cultural perspective on prehistoric agriculture as resource management, economic system, and political tool. Archaeological methods and theory of reconstructing agricultural systems and their role in prehistoric societies.

ANTH 111 Peopling of the New World 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Consideration of the archaeological, biological, linguistic, and dating evidence documenting the nature and timing of the earliest occupation of the Western Hemisphere by human populations.

ANTH 112 Settlement Patterns and Local-Anthropological Interpretations 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): ANTH 003 or ANTH 005 or consent of instructor. An archaeological perspective on spatial behavior from architectural design to regional economic systems. Provides an introduction to a broad range of issues and analytical perspectives with an emphasis on theoretical approaches and case studies.

ANTH 113 Ancient Households and Communities 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W; ANTH 003 or ANTH 005; or consent of instructor. An archaeological perspective on households and communities. Discusses their composition, function, and meaning. Illustrates with specific cases from diverse cultural contexts. Topics include everyday life in ancient households and communities, social and economic reproduction, and long-term stability and change.

ANTH 114A Lithic Technology I 4 Lecture, 3 hours; laboratory, 4 hours. Prerequisite(s): ANTH 003 or ANTH 005; or consent of instructor. Introduction to the technology of core-and-flake stone tools. Addresses principles of fracture, quarrying, reduction, heat treatment, core technology, and production and use of flaked stone tools in core-and-flake lithic assemblages. Includes assemblage formation processes and their interpretation.

ANTH 114B Lithic Technology II 4 Lecture, 3 hours; laboratory, 4 hours. Prerequisite(s): ANTH 114A; or consent of instructor. Covers the technology of core-and-blade and ground-stone industries. Addresses percussion- and pressure-flake reduction sequences and strategies. Emphasizes quarrying, initial reduction, core and blade production, and production and use of tools from blades. Includes technology and production of ground-stone tools, quarrying of raw material, and assemblage formation processes and their interpretation.

ANTH 114C Lithic Analysis 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): ANTH 114B; or consent of instructor. Covers characterization, analysis, and interpretation of stone tool assemblages with emphasis on debitage.

ANTH 115 (E-Z) Archaeological Interpretations 4 Prerequisite(s): ANTH 003 or ANTH 005. Study of the prehistory of different regions of the world. Emphasis is on the method and theory underlying archaeological investigations of the nature of people and culture and the course of human development.

ANTH 115E North American Prehistory 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ANTH 003 or ANTH 005 or consent of instructor. Interpretation of the archaeological record of North America from initial peopling of the continent to the historic period.

ANTH 115M Prehistory of California 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ANTH 003 or ANTH 005 or consent of instructor. A survey of prehistoric cultures of California from the earliest settlement to the historic period.

ANTH 115R Archaeology of Eastern Mesoamerica 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): ANTH 003 or ANTH 005 or consent of instructor. An introduction to Mayan archaeology intended to provide an overview of ancient Maya cultural history from the Formative period to the time of Spanish contact. During the course, particular Maya sites will be described in detail.

ANTH 115S Archaeology of Western Mesoamerica 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): ANTH 003 or ANTH 005 or consent of instructor. An introduction to the archaeology and culture history in the New World nuclear area of Western Mesoamerica from the occupation of this area before 10,000 years ago to the arrival of Spanish Europeans in A.D. 1519.

ANTH 115T Prehistory of the Southwest 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): ANTH 003 or ANTH 005 or consent of instructor. A survey of prehistoric cultures of the American Southwest from earliest settlement to the historic period.

ANTH 115U Andean Prehistory 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ANTH 003 or ANTH 005 or consent of instructor. A description of Andean culture history, emphasizing Peru, from the earliest documentation of human occupation to the Spanish conquest of the Incas. Topics include origins of food production, early ceremonial architecture, Paracas textiles, the Nasca lines, Moche iconography and ritual, and Inca architecture. Discussion of major sites and their architecture, ceramics, sculpture, and other archaeological remains.

ANTH 115X Ancient Oaxaca 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W; ANTH 003 or ANTH 005; or consent of instructor. Explores current understanding about ancient Zapotec, Mixtec, and neighboring cultures in Oaxaca, Mexico, the location of the earliest Mesoamerican state system and one of its earliest cities.

ANTH 117 Anthropology of Cities 4 Lecture, 3 hours; field, 1 hour; extra reading, 2 hours. Prerequisite(s): upper-division standing or consent of the instructor. Examines theoretical and methodological debates in the anthropological study of cities and urban life. Uses ethnographic case studies in Asia, Africa, and Latin America to explore cultural practices and representations of urban space, and struggles over rights to the city. Topics include urban inequality, ecology, housing, planning, and redevelopment.

ANTH 118 Origins of Cities 4 Lecture, 3 hours; extra reading, 3 hours; field, 1 hour; term paper, 1 hour. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or ANTH 003 or ANTH 005 or consent of instructor. Explores new forms of social, economic, and political organization that developed with the advent of cities. Examines case studies of the rise of urbanism in both the Old and New Worlds to investigate how and why cities emerged and consolidated.

ANTH 119 The Anthropology of Tourism 4 Lecture, 3 hours; extra reading, 1 hour; field, 1 hour; term paper, 1 hour. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or ANTH 003 or consent of instructor. Surveys the central problems and issues in the archaeological study of tourism. Main topics include the place of tourism in the global economy, the impact of tourism on cultural identity and culture change, environmental issues in tourism development, and tourism as a form of cross- and multicultural communication. Credit is awarded for only one of ANTH 119 or ANTH 280.

ANTH 120 Language and Culture 4 Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W; LING 020 or ANTH 007 or ANTH 007S; restricted to class level standing of junior, or senior; or consent of instructor. Covers the interrelations among language, culture, and habitual behavior; the classification of languages; and anthropological uses of linguistic evidence.

ANTH 121 Anthropological Theories of the Arts 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W; LING 020 or ANTH 007 or ANTH 007S; or consent of instructor. Covers anthropological theories of the arts emphasizing folk and traditional forms. Features oral and written literature and discusses theories of musical, visual, and other arts.

ANTH 122 Economic Anthropology 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W; or consent of instructor. Examines the social and cultural dimensions of production,
exchange, saving, borrowing, and consumption. Topics covered include rationality and economizing, reciprocity, gender and household decision-making, and neoliberalism.

ANTH 123 Linguistic Anthropology 4 Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): LING 020, or consent of the instructor. Course will cover the application of linguistics techniques to studies of other symbolic and social fields, the analysis of semantic systems, and the use of linguistics techniques for prehistory.

ANTH 124 Ritual and Religion 4 Lecture, 3 hours. The elements and forms of religious belief and behavior; functions of ritual in society. Cross-cultural comparisons.

ANTH 125 Kinship and Family Organization 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W. Introduces the study of kinship, marriage, family, and social organization in contemporary cultural anthropology and the history of approaches to these topics. Examines the interplay and tensions between cultural norms and practices and state legal systems.

ANTH 126 Southeast Asian Performance 4 Lecture, 3 hours; screening, 2 hours; extra reading, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Introduction to the roles and genres of expressive culture in Southeast Asia, including dance, music, theater, film, and digital culture. Performance is discussed as both a time-honored and a contemporary medium for cultural production, from the courts to everyday experience. Cross-listed with AST 123, DNCE 123, MUS 123, and SEAS 123.

ANTH 127 Political Anthropology 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or consent of instructor. Examines different overt and covert means by which power and social differentiation are produced, perpetuated, and challenged in societies across the world. Studies the politics of culture, ethnicity, nationalism, and gender. Credit is awarded for only one of ANTH 127 or ANTH 127S.

ANTH 127S Political Anthropology 4 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or consent of instructor. Examines different overt and covert means by which power and social differentiation are produced, perpetuated, and challenged in societies across the world. Studies the politics of culture, ethnicity, nationalism, and gender. Credit is awarded for only one of ANTH 127 or ANTH 127S.

ANTH 128 Performing Arts of Asia 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of music, dance, theatre, and ritual in four major geocultural regions of Asia: Central, East, South, and Southeast. No Western music training is required. Course is repeatable to a maximum of 8 units. Cross-listed with AST 128, DNCE 128, and TFD 176.

ANTH 129A Introduction to Maya Hieroglyphs 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or ANTH 005 or ANTH 007 or ANTH 007S; or consent of instructor. Introduces the Maya hieroglyphs and critically evaluates its political history. Topics include three Maya calendars, a basic grammar (logographs, syllables, verbs, pronouns), three writing methods (transcriptions, transliteration, and translation), dynastic events, gods, supernaturals, and political interactions. Cross-listed with CPAC 129A, and LNST 129A.

ANTH 129B The Linguistics of Ancient Maya Writing 4 Lecture, 3 hours; extra reading, 2 hours; research, 3 hours; term paper, 1 hour. Prerequisite(s): ANTH 129A; or consent of instructor. Analyzes and critically evaluates the linguistics of Ancient Maya Writing. Topics include grammar (transitive, intransitive, positional, active, passive, mediopassive, antipassive, inchoactive verbs, tense, aspect, transitive perfect, noun, pronoun, morphosyllable, phonology); three writing methods (transcriptions, transliteration, and translation); title and rank; scripts and ideologies; and dynamic interactions. Cross-listed with CPAC 129B, and LNST 129B.

ANTH 130 Ancient Pottery Analysis 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): ANTH 005 or consent of instructor. An extensive review of the techniques used by archaeologists to study ceramic artifacts, one of the most common archaeological remains found at many Holocene sites throughout the world. Critically explores the use of typology, attribute analysis, experimental archaeology, petrography, source analysis, residue analysis, and ceramic ethnoarchaeology.

ANTH 131 Applied Anthropology 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or consent of instructor. Applies anthropology to current issues such as community development, education, health, public administration, and conflict.

ANTH 132 Cultural Ecology 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or consent of instructor. Introduces people’s relationships to their total environment. Explores strategies for managing the environment and its resources, the effects of the environment on culture and society, the impact of human management on the ecosystem, and ways in which human groups view their surroundings.

ANTH 133 Anthropology and International Development 4 Lecture, 3 hours; research, 2 hours; written work, 1 hour. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or consent of instructor. Analyzes the concept of development by examining major theories and approaches in the anthropological study of international development. Focuses on the relationship between anthropology and the development industry. Topics include ethical issues in development anthropology, causes of failure and success in development interventions, and transformations in development theory and practice.

ANTH 134 The Will to Adorn Dress and Identity 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Explores sartorial practices as a means for examining formations of identities and structural inequalities across space and time.

ANTH 135 The Archaeology of African Diaspora History and Culture 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Covers the thematic and methodological approaches associated with the historical archaeology of Africa and the African diaspora.

ANTH 136 Anthropological Perspectives On Gender in Southeast Asia 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or equivalent. Examines the intersections of gender, power, and sexuality in post-colonial Southeast Asia. Revisits early ethnographic claims of gender equality. Addresses current anthropological literature on the effects of colonialism, capitalism, and globalization on gender roles and relations within national and transnational contexts. Cross-listed with SEAS 136. Credit is awarded for only one of ANTH 136/SEAS 136 or ANTH 136S/SEAS 136S.

ANTH 136S Anthropological Perspectives On Gender in Southeast Asia 4 Lecture, 3 hours; discussion, 1 hour; field, 1 hour; extra reading, 2 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or equivalent. Examines the intersections of gender, power, and sexuality in post-colonial Southeast Asia. Revisits early ethnographic claims of gender equality. Addresses current anthropological literature on the effects of colonialism, capitalism, and globalization on gender roles and relations within national and transnational contexts. Cross-listed with SEAS 136S. Credit is awarded for only one of ANTH 136/SEAS 136 or ANTH 136S/SEAS 136S.

ANTH 137 Anthropology: the American Tradition 4 Lecture, 3 hours; research, 3 hours; extra reading, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Introduces the historical development of anthropological thought in the United States as a manifestation of class and state formation. Clarifies various intellectual currents in contemporary anthropology and their relationships to intellectual and social developments in the broader society.

ANTH 139 Change and Development 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or ANTH 003 or ANTH 005; upper-division standing or consent of instructor. Examines alternative theories of society, change, and development, as well as the assumptions and premises on which they are based. Considers how they are used to explain capitalist development, imperialism, colonial encounters, nationalism, decolonization, socialist revolution, modernization, unequal exchange, uneven development, globalization, and postcolonialism.
ANTH 140 (E-Z) Ethnographic Interpretations 4
Prerequisite(s): restricted to class level standing of junior, or senior. Study of peoples and cultures in particular areas of the world. Emphasis is placed on ethnological and theoretical problems as these are revealed in the examination of the history, coherent sociocultural patterns, and ecology of specific aboriginal populations and contemporary groups.

ANTH 140E Ethnology of the Greater Southwest 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the many varied native cultures of the Greater Southwest. Major differences as well as similarities in the forms of language, social organization, religion, and material culture occurring in the Greater Southwest will be defined and described. The peoples of the Greater Southwest are considered, not only in terms of the ethnographic present, but also through a diachronic perspective, from the prehistoric past through the Spanish colonial era to the present.

ANTH 140G Anthropological Perspectives in Africa 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A number of African cultures are carefully examined in terms of three or four anthropological topics, such as: subsistence patterns, social organization, and religious systems. The treatment of these cultures follows a brief overview of the geography, history, and linguistic patterns of Africa.

ANTH 140I Cultures of Southeast Asia 4 Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or equivalent. Anthropological interpretations of culture and society in southeast Asia including Indonesia. Topics include prehistory, ethnic groups, social organization and structure, human ecology, and folk and high culture.

ANTH 140P Cultures of the Pacific 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or consent of instructor. Overview of the cultures and contemporary issues facing the people of Melanesia, Micronesia, and Polynesia. Examines the contribution of Oceanic studies to anthropological theories of kinship and exchange, gender, development studies, and indigenous knowledge systems. Emphasizes how Pacific Islanders draw on their cultural heritage in emerging from formal colonialism to establish new island nations.

ANTH 140S The Peoples of Mexico in Historical and Global Perspective 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Survey of the cultures and societies of Mexico in historical and global perspective. Emphasis on agrarian communities and the contributions of Mesoamerican ethnography to general anthropological theory.

ANTH 142 (E-Z) Black and Black Diaspora Studies 4 Lecture, 3 hours; activity, 3 hours. Prerequisite(s): see individual segments for assigned prerequisites. Segments offer critical anthropological perspectives on anti-blackness including historical political economic perspectives, colonial legacies, institutional and individual racism, racialized health disparities, and social movements.

ANTH 142E Blackness and Mass Incarceration 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Introduction to the data, policy, political debates, and grassroots initiatives addressing unprecedented current incarceration in the United States. Critically investigates role of race and blackness in incarceration trends, new trends in policy, and alternatives to incarceration.

ANTH 142F Black Business Cultures and Identities 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or consent of instructor. Examines major debates, methods, and theories in studies of entrepreneurship and the commodification of (ethnic) cultures in transnational and cross-cultural contexts. Critically investigates how identity shapes and is shaped by entrepreneurial success with special attention to the contested and shifting meanings of entrepreneurial success and identity formations.

ANTH 142G Caribbean Culture and Society 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. An overview of the Caribbean region from a historical, cultural, and political perspective. Emphasizes contemporary issues affecting the Caribbean and the struggle of its people to maintain their identities. Cross-listed with ETST 148, and LNST 168.

ANTH 142I Afro-American Experience in the United States 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W; or consent of instructor. Explores the racial politics of African American cultures and identities in juxtaposition with the making of the American nationhood and global capitalism. Critically examines the various anthropological discourses about African Americanness and portrays African Americans as nation-builders.

ANTH 142J Political Economy of Southern Africa 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W; or consent of instructor. Examines contemporary societies of southern Africa. Focuses on changes and continuities since the end of apartheid. Topics include transformations in ethnic and racial identity and classification; post-apartheid class formation and neoliberalism; labor migration and immigration; HIV/AIDS; land reform, resettlement, and spatial transformation; tourism; and conservation.

ANTH 144 (E-Z) Medical Anthropology Specialization 4 Lecture, 3 hours; activity, 3 hours. Prerequisite(s): see individual segment for assigned prerequisites; or consent of instructor. Courses related to the cross-cultural study of health and healing including health systems, healthcare, the political, economic, sociocultural, and biological factors that shape human health, and personal experiences of illness.

ANTH 144C Culture and Medicine 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or ANTH 020 or ANTH 020S; restricted to class level standing of junior, or senior; or consent of instructor. Explores the interrelations of health, illness, and culture. Addresses cross-cultural comparisons of health and healing and the effects of cultural systems on health and illness. Examines a diversity of societies and their belief systems and the effects of cultural change (historical and modern) on health and wellbeing.

ANTH 144F Gender, Race, and Medicine 4 Lecture, 3 hours; written work, 1 hour; extra reading, 1 hour; individual study, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Explores the relationship between Western medicine and women, racial minorities, and non-Western citizens. Investigates how gender ideology, racial inequity, and colonialism shape the medical representation of bodies, sexuality, and pathology. Examines how patients have renegotiated their relationships with medicine through health movements and alternative healing practices. Cross-listed with GSST 185.

ANTH 144G Reproduction: Policies, Politics, and Practices 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Examines reproductive policies, politics, and practices from a cross-cultural and historical perspective. Discusses political and economic processes and sociocultural dynamics; population control; sex preference; infanticide and neonatal neglect; adoption and foster parenting; abortion; technologically assisted conception; and gestation-al surrogacy. Cross-listed with GSST 140.

ANTH 144H Anthropology of Human Immunodeficiency Virus 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. A cross-cultural examination of the global Human Immunodeficiency Virus (HIV) epidemic from an anthropological perspective.

ANTH 144J Biological Approaches to Medical Anthropology 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): ANTH 002; or consent of instructor. Introduces medical anthropology from the biological perspective. Explores topics on evolution, health, and medicine; human biological variation in relation to disease; bioarchaeology; and the history of health. Takes the integrative and multidisciplinary approach.

ANTH 144K Drugs and Culture 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. A cross-cultural examination of drug use and its relation to race, class, gender, morality, laws, and health policy.

ANTH 144M Political Economy of Health 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instruc-

ANTH 144N Anthropology of Global Health 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Examines the overlaps, debates, and potential of medical anthropology to address contemporary issues in global health. Focuses on how the historical development, theoretical frameworks, methodological approaches, and ethical debates within medical anthropology can contribute to a just and inclusive version of global health.

ANTH 144O Anthropology of Bodies 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Explores various anthropological discourses about the constitution of bodies focusing on how bodies differ across cultures and historical moments.

ANTH 145 Sexualities and Culture 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): one of the following courses: GSST 001, GSST 001H, GSST 001S; or consent of instructor. Examines the field of sexuality studies using a comparative, cross-cultural approach. Emphasizes the relation between culture, history, and political economy in the emergence of sexual practices and sexualized identities. Examines theories of sexuality and identity focusing on violence, human rights, and political agency. Cross-listed with GSST 103.

ANTH 149 Gender, Kinship, and Social Change 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): one of the following courses: GSST 001, GSST 001H, GSST 001S. Examines theories of gender and kinship, the formation of gender hierarchies and their uneven development, and the dynamics of family and gender in stratified social formations. Analyzes the relationship between family forms and political and economic processes. Cross-listed with GSST 149.

ANTH 151 The Art of the Aztec Empire 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): AHS 027/ANTH 027/LNST 027 or upper-division standing or consent of instructor. An introduction to the art, architecture, and urban form of the Inca civilization. Examines how these elements influenced state formation, conquest, and resistance. Includes studies of urban plans, buildings, paintings, textiles, prints, sculpture, metalwork, and ceramics. Cross-listed with AHS 117, and LNST 117.

ANTH 155 Human Osteology 6 Lecture, 2 hours; discussion, 1 hour; laboratory, 6 hours, research, 3 hours. Prerequisite(s): ANTH 002, upper-division standing or consent of instructor. An in-depth study of the human skeleton, including bone biology, functional morphology, fragment identification, reconstruction, forensic methods, and curation techniques. Useful for anthropologists and those intending careers in medicine, physical therapy, and forensics.

ANTH 157 Visual Culture of the Incas 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the art, architecture, and urban form of the Inca civilization. Examines how these elements influenced state formation, conquest, and resistance. Includes studies of urban plans, buildings, paintings, textiles, prints, sculpture, metalwork, and ceramics. Cross-listed with AHS 117, and LNST 117.

ANTH 161 The Body in Western Art: Antiquity to Present 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): Restricted to class level standing of sophomore, junior, or senior; Restricted to major(s) Anthropology, Art History, Art History/Admin Studies, Art History/Religious Studies, Gender and Sexuality Studies, History, History/Administrative Studies, History/Law and Society; or consent of instructor. Presents further questions and study of the human body and how it was depicted and interpreted in works of art from Roman Antiquity to the present. Explores a broad range of artworks in their specific historical, cultural, medical, social, religious, political, and intellectual contexts. Cross-listed with ANTH 161, GSST 130, and HISE 149. Credit is awarded for one of the following AHS 133, ANTH 161, GSST 130, HISE 149, or AHS 016.

ANTH 163 Transnational and Global Communities 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A critical survey of recent anthropological and related research and theory concerning transnational and global sociocultural processes. Special emphasis on transnational, diasporan, and other unbound communities; borders; and the impact of global media and communication and transnational migration on community and identity.

ANTH 164 Forensic Anthropology 4 Lecture, 2 Activity, 3 Research, 3 Prerequisite(s): ANTH 002 with a grade of “C” or better; Introduces the applied study of forensic anthropology. Topics include basic training in forensic anthropology, its history and theoretical background, medico-legal aspects, case studies, and training in how to identify human skeletal remains and information that can be determined from human bone.

ANTH 165 (E-Z) Anthropological Methods 4 Lecture, 3 hours. Prerequisite(s): ANTH 005. Surveys methods and techniques utilized in archaeology, biological anthropology, cultural anthropology, and linguistic anthropology. Emphasizes field and laboratory methods.

ANTH 165E Methods in Archaeology 4 Lecture, 3 hours; Research, 3 hours; Prerequisite(s): ANTH 005 with a grade of “C-” or better. Review of methods used by archaeologists in field and laboratory contexts. Critically explores the applications of different techniques to answer social questions.

ANTH 165F Methods in Biological Anthropology 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): ANTH 002 or consent of instructor. Introduces research methods in biological anthropology. Topics include the history of scientific approach in American anthropology, statistics, data resampling, evolution, and variation.

ANTH 165G Methods in Cultural Anthropology 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): ANTH 001 with a grade of “C-” or better. Introduces research methods used by cultural anthropologists. Examines the research process from identifying research problems, to selecting research methods, developing research strategies, collecting and analyzing data, and reporting research findings. Methods and topics covered include participant observation, writing fieldnotes, interviews and surveys, qualitative and quantitative data analysis, and research ethics.

ANTH 165I Research Methods of Linguistic Anthropology 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): ANTH 0075 or ANTH 007. Examines research methods of linguistic anthropology, providing students with insights into recording and transcription, participant observation, linguistic biography, and ethnography. Includes a quarter-long ethnographic fieldwork project focused on different methods of data collection and analysis. Investigates several ethnographic accounts of linguistic anthropology including issues of evidence, analysis, and theory generation.

ANTH 167 Structural/Descriptive Linguistics 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): LING 020 or consent of instructor. An overview, from the original sources, of the contribution of major figures and schools in linguistics from Saussure through early Chomsky. Cross-listed with LING 167.

ANTH 169 From the Maghreb to the Middle East 4 Lecture, 3 hours; written work, 1 hour; individual study, 1 hour; extra reading, 1 hour. Prerequisite(s): ANTH 001 or ANTH 005 or ANTH 001W or GBST 001 or GBST 002 or consent of instructor. An introduction to the peoples and societies of North Africa and the Middle East. Follows the travels of Ibn Battutah, Ibn Khaldun, and Rafik al Tahtawi. Topics include religion, migration, gender, political organization, the global Middle East, Orientalism, and cultural production. Cross-listed with GBST 169.
ANTH 172 Archaeological Theory 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ANTH 003 or ANTH 005; or consent of instructor. An overview of archaeological theory and the critical evaluation of conceptual approaches to archaeological data. Topics include both archaeological and social theories.

ANTH 173 Social Meanings of Space 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the range of meanings attached to spaces and places, from small-scale expressions such as houses to larger ones such as cities and landscapes. Explores how spaces can reflect and foster social conflict or social unity. Through a study of diverse cultural traditions, considers both the architecture and occupied but “unbuilt” spaces in ancient and current societies.

ANTH 176 Music Cultures of Southeast Asia 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of music, dance, theatre, and ritual in the Philippines, Indonesia, Malaysia, Thailand, Myanmar (Burma), Laos, Cambodia, and Vietnam. Designed for the student interested in the performing arts and cultures of mainland and insular Southeast Asia. No Western music background is required. Cross-listed with AST 127, DNCE 127, ETST 172, MUS 127, and SEAS 127.

ANTH 177 Gender, Sexuality, and Music in Cross-Cultural Perspectives 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An overview of gendered performance genres from a number of cultures. Explores gender-specific music and notions of gender that are often constructed, maintained, transmitted, and transformed through music and performance. Cross-listed with MUS 126, and GSST 126.

ANTH 178 Gender and Archaeology 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): one of the following courses: ANTH 001, ANTH 001H, ANTH 001W, ANTH 005, GSST 001, GSST 001H, GSST 001S; or consent of instructor. Considers gender roles in ancient and historically recent human societies, as well as how gender has shaped archaeological investigation. Cross-listed with GSST 178.

ANTH 179 Gender, War, and Militarism 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines politics of militarization in relation to gender, race, and sexuality in national and international contexts of war. Explores ideologies and representations of masculinity and femininity in discourses of militarism. Topics include war crimes; contestations over historical memory; effects of militarization on gender roles; cults of heroism; and peace activism.

ANTH 180 Material Culture 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or ANTH 005; or consent of instructor. Introduces theoretical and methodological debates in the anthropological study of material culture. Compares archaeological and sociocultural approaches to understanding the significance of matter and materiality across time and space. Covers the relationships between people and things, and the role of objects in social, economic, religious, and political life.

ANTH 182 Anthropology of Human Rights 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines debates in the study of human rights and social injustice. Uses case studies in Asia, Africa, and Latin America to explore legal, cultural, and political practices and representations of rights and reconciliation in postconflict settings. Includes globalization of rights; cultural relativism; indigenous rights movements; advocacy; and gender and health rights.

ANTH 183 Professionalism in Anthropology 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): ANTH 100 or ANTH 100W; or consent of instructor. Covers many aspects of professional career development in anthropology including archaeological research, including developing career goals, building a professional reputation, presenting papers at meetings, submitting manuscripts for publication, applying to graduate school, identifying sources of research funding, and creating a curriculum vitae.

ANTH 184 Field Course in Anthropology 4 to 16 Field, 12 to 48 hours. Prerequisite(s): upper-division standing or consent of the instructor. Study with a qualified professional at selected research sites with on-site supervision. Normally, 16 units will be assigned only when the student is engaged in full-time research at a site distant from UC Riverside. Course may be repeated for credit for up to three quarters with consent of the instructor and approval of a research plan by the department chair.

ANTH 185 Field Course in Archaeology: Survey and Documentation 4 Lecture, 1 hour; discussion, 1 hour; field, 6 hours. Prerequisite(s): ANTH 003 or ANTH 005; upper-division standing; consent of instructor. Trains students in field surveying and documenting historic and aboriginal archaeological sites. Covers satellite-assisted electronic location, cadastral survey location, Universal Transverse Mercator grid coordinates, field mapping, recording environmental parameters, characterizing assemblage, assessing significance, and using archaeological information centers.

ANTH 186 War and Violence in the Ancient World 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): ANTH 005. Cross-cultural study of social contexts of warfare and interpersonal violence among ancient peoples. Critically explores the definitions associated with different forms of violence and the methodological, theoretical, and interpretational implications for anthropologists studying warfare across the globe.

ANTH 188 Islam, Women, and the State 4 Lecture, 3 hours; individual study, 2 hours; extra reading, 1 hour. Prerequisite(s): GSST 167 or GSST 168; restricted to class level standing of junior, or senior. Examines the links between women, Islamic practices, and the politics of state formation and nation building. Explores ways women constitute the terrain of struggle between the traditional and modern, colonialism and nationalism, and religion and politics. Cross-listed with GSST 151.

ANTH 189 Gender and Power in Muslim Societies 4 Lecture, 3 hours; extra reading, 1 hour; written work, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the dynamics of gender relations within the context of the Muslim world. Analyzes processes of power which influence concepts of femininity, masculinity, the body, and sexuality. Explores heterogeneity of the Muslim world as well as its unifying cultural and social history. Cross-listed with GSST 168.

ANTH 190 Special Studies 1 to 5 variable hours. Prerequisite(s): consent of instructor. Independent study and research by qualified undergraduate students under supervision of a particular faculty member. With consent of instructor, may be repeated without duplication of credit.

ANTH 191 Seminar in Anthropology 4 Seminar, 3 hours, research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines contemporary issues and topics in anthropology that are not part of the regular curriculum offerings. Content of the course varies and is announced as the course is offered. Course is repeatable to a maximum of 16 units.

ANTH 195A Senior Thesis 4 Optional for anthropology majors; open to senior students having a “B” average in their major, with consent of instructor. Graded In Progress (IP) until ANTH 195A, ANTH 195B, and ANTH 195C are completed, at which time a final grade is assigned.

ANTH 195B Senior Thesis 4 Optional for anthropology majors; open to senior students having a “B” average in their major, with consent of instructor. Graded In Progress (IP) until ANTH 195A, ANTH 195B, and ANTH 195C are completed, at which time a final grade is assigned.

ANTH 195C Senior Thesis 4 Optional for anthropology majors; open to senior students having a “B” average in their major, with consent of instructor.

ANTH 1981 Internship in Anthropology 1 to 12 Field Research, 1 hour to 16 hours. Prerequisite(s): consent of instructor. Systematic participation by an individual in studies associated with future career(s) development within the context of an anthropological research project directed by a faculty member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units towards graduation.

ANTH 199H Senior Honors Research 1 to 5 Research, variable hours. Independent work under the direction of members of the staff. With consent of instructor, may be repeated without duplication of credit.
Graduate Courses

ANTH 200A Core Theory in Anthropology 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the foundational theories of anthropology and how these inform current discussions about human origins, the origins of human society, divergences in different national traditions, including debates and congruencies with other disciplines.

ANTH 200B Core Theory in Anthropology 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing, ANTH 200A, or consent of instructor. Examines the foundational theories of anthropology and how these inform current discussions about diversity; inequality; language; power; knowledge systems; and their intersections in the four subfields.

ANTH 200C Core Theory in Anthropology 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): ANTH 200B; graduate standing; or consent of instructor. Examines the foundational theories of anthropology and how these inform current discussions about history, capitalism, diversity, anti-blackness, feminist anthropology, and globalization.

ANTH 201 Critical Theories of Gender, Race, and Blackness 4
Lecture, 3 hours; individual study, 4 hours; written work, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces major critical theories on the intersections of gender, race, and blackness. Topics include the afterlives of slavery, black feminisms, colonialism, empire, genocide, and revolt. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

ANTH 202 Topics in Southeast Asian Studies 4
Seminar, 3 hours; written work, 2 hours; term paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. An introduction to the world of Southeast Asia and the scholarly discussions about it, with an emphasis on cultural aspects, embedded in their historical context. Materials are in English. Course is repeatable as content changes to a maximum of 12 units. Cross-listed with CPLT 200 and SEAS 200.

ANTH 203 Southeast Asian Cultures 4
Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Surveys ethnographic literature on Southeast Asian cultures, with an emphasis on contemporary research. Covers anthropological approaches to the study of text, ritual, and performance practices; intercultural dynamics; the impact of colonialism and nationalism on traditional cultures; and globalization. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with SEAS 203.

ANTH 204 Anthropology of Identity 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Covers cross-cultural study of anthropological discussions about identity formations that are rooted in shifting relations of power and production. Critically examines major debates, methods, and theories in studies of identity. Focuses on the processes and mechanisms through which people craft their individual and collective identities. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

ANTH 205 Race and Ethnicity in Mexico 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introductions to history and development of race in Mexico. Examines creation and lasting effects of Casta System. Examines ideologies of Mestizaje and Indigenismo, and changing relationships between indigenous, African descendants, and mestizos in Mexico. Discusses intersections between race, class, and immigration and impacts on national conceptions of race and ethnicity.

ANTH 206 Archaeology of Violence and Conflict 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Covers the cross-cultural study of social contexts of violence and conflict among ancient peoples. Critically explores the definitions associated with different forms of violence and the methodological, theoretical, and interpretational implications for archaeologists studying warfare across the globe. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

ANTH 207 Archaeology of Power and Ideology 4
Lecture, 3 hours; research, 3 hours. Prerequisite(s): ANTH 200A, ANTH 200B, or consent of instructor. Critically evaluates social theories that underlay the concepts of power and ideology, and examines archaeological approaches to relevant questions of social change. Develop student's perspectives on the mechanism of power and ideology beyond Western philosophy. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

ANTH 208 Anthropology of the Black Diaspora 4
Seminar, 3 hours; written work, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on intellectual history, analytical perspectives, and political implications of black diasporic(s). Addresses constitution, viability, and specificities of the multitude of Black experiences through formations of modern subjectivity, society, and empire-state. Theorizes the notion of diaspora in relation to blackness and the Black experience.

ANTH 209 Field Course in Maya Archaeology 4 to 12
Lecture, 2 hours; laboratory, 3 hours to 6 hours; research, 0 to 3 hours; field, 3 to 21 hours. Prerequisite(s): graduate standing and consent of instructor. Archaeological survey and excavation, including training in: site mapping; use of satellite-based Global Positioning Systems; natural resources surveying; and field laboratory techniques. Course is repeatable to a maximum of 36 units with consent of instructor and approval of a research plan by the department chair.

ANTH 210A Description and Inference in Anthropology 4
Seminar, 3 hours; research, 1 hour; individual study, 1 hour; extra reading, 1 hour. Prerequisite(s): graduate standing or consent of instructor. An examination of the modes of defining concepts and relations, developing and framing theories, and relating data to theory in anthropology; analysis of representative attempts to describe and explain behavior; and practice in carrying out simple analyses.

ANTH 210B Professionalism in Anthropology 4
Seminar, 3 hours; research, 1 hour; extra reading, 1 hour; proposal preparation, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Covers many aspects of professional career development in anthropology (including archaeology). Topics include the establishment of career goals, building a professional reputation, presenting papers at meetings, submitting manuscripts for publication, developing a research proposal, identifying sources of research funding, and the job search.

ANTH 211 Afro-Latino(a) Ethnography 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Provides an ethnographic approach to the contemporary experience of blackness in Latin America. Theorizes local intersections of race, gender, and sexuality, and the ways local conditions manifest blackness as an ontology within a broader context of production and consumption.

ANTH 217 Matter and Materiality 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Surveys major topics in anthropological research on material culture and relationships between people and things. Compares archaeological and sociocultural approaches to studies of matter and materiality across time and space. Theorizes role and significance of objects in the organization of social, economic, and religious life and maintenance of power structures. May be taken Satisfactory (S) or No Credit (NC) by students advanced to candidacy for the Ph.D. Course is repeatable as content or topic changes to a maximum of 8 units.

ANTH 218 Ancient Maya History and Religion 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Along with describing major historical figures and religious concepts of the ancient Maya, this course describes the analytic approaches used for the study of ancient Maya writing and art. The pioneering work of the nineteenth century as well as the most recent findings in the ongoing process of decipherment and iconographic interpretation will be discussed. Basic background needed to begin original research and interpretation will be provided.

ANTH 220 Theoretical Archaeology 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the foundational theories of archaeology, the underlying networks of assumptions, and contemporary theoretical developments in the field.

ANTH 224 Lithic Analysis 4
Seminar, 2 hours; laboratory, 3 hours; research, 3 hours. Prerequisite(s): graduate standing, or consent of instructor. Introduces the method to analyze lithic assemblages. Includes the identification of rocks, stone tool types, waste flakes, different production technologies (direct...
ANTH 251 Theory and Method in Mexican Ethnography 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on the basic issues of theory and method in Mexican ethnography. Major streams of thought framing the substance and approaches of rural and urban ethnographies of Mexico are examined.

ANTH 252 Seminar in Archaeology 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Studies in culture history and in the data and methods of archaeological research. Course is repeatable.

ANTH 253 Seminar in Physical Anthropology 4 Seminar, 3 hours; research 3 hours. Prerequisite(s): graduate standing or consent of instructor. Selected topics in the analysis of human variation and evolution, the structure of human populations, and the biocultural aspects of human variation and evolution, the structure of instructor. Selected topics in the analysis of human variation and evolution, the structure of human populations, and the biocultural environments of humans. Course is repeatable.

ANTH 255 Feminism, Gender, and Archaeology 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Considers feminist perspectives on past human societies, as well as how feminism and gender have shaped archaeological research design. Examines how gender relates to careers in archaeology.

ANTH 256 Seminar in Cultural Anthropology 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Provides focused coverage of concepts, theory, and methods central to various subfields in cultural anthropology. Course is repeatable.

ANTH 257 Southeast Asian Religions 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Discusses different and dynamic aspects of religion in various Southeast Asian countries including Indonesia, Malaysia, Thailand, Cambodia, Vietnam, and the Philippines. Explores contextualized readings featuring historical, anthropological, literary, and other disciplinary perspectives on this diverse region. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as topic changes to a maximum of 8 units. Cross-listed with RLLST 253 and SEAS 202.

ANTH 258 Space and Place in Archaeology 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines concepts of space and place in archaeology. Explores how spaces can reflect and foster social conflict or unity through studies of diverse cultural traditions. Considers both the architecture and occupied but unbuilt spaces in ancient and current societies.

ANTH 259 Seminar in Linguistic Anthropology 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Studies in the concepts, methods, and data pertinent to linguistic anthropology.

ANTH 260 Ethnographic Field Methods 4 Seminar, 3 hours; field, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces ethnographic field methodologies and research techniques through theoretical and practical application. Examines historical and contemporary models of fieldwork practices and ethics. Topics include fieldwork preparation; participant observation; ethnographic responsibilities; data collection techniques; interviews; gendered dynamics of field research; historical and visual methods; and violence in the field. Course is repeatable.

ANTH 261 Anthropology of the Body 4 Seminar, 3 hours; written work, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines cultural anthropology's focus on the body as both a subject and object of social processes through recent and classic texts. Aims to ground theoretical inquiry in ethnographic and historical materials through the examination of bodies across time and space.

ANTH 262 Seminar in Medical Anthropology 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Surveys major topics in medical anthropology. Examines the theoretical and methodological underpinnings of medical anthropology, including the cultural construction of health and disease, the nature of the therapeutic process, and how social structures contribute to inequality and suffering.

ANTH 263 Seminar in Ecological Anthropology 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Selected topics in method and theory of ecological anthropology, including ethnobiology, food production and consumption, development issues, views of the environment, and questions about the relationship of humans to their environments.

ANTH 264 Codices of Ancient Mexico 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. The major manuscripts of the pre-Hispanic and contact periods of Mesoamerica will be reviewed. Special focus will be on the ancient codices of the Maya, Aztec, Mixtec, and the unprovenienced Borgia Group.

ANTH 265 Seminar On Anthropology of Visual Culture 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Presents a historical and ethnographic overview of the role of visual culture in the production and transmission of scientific and cultural knowledge. Focuses on the politics of representation and the ways in which images have maintained or challenged racial, gender, and global hierarchies and inequalities.

ANTH 266 Seminar On History and Memory 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores how societies remember, forget, and give meaning to the past through diverse forms of expression in national and transnational contexts. Examines contestations over historical representations and narrations, as well as the ways in which history and memory are shaped and contested by competing claims to power, legitimacy, and authenticity.

ANTH 267 Ethnographies of Postsocialism 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores diverse sociocultural, economic and political experiences of socialist-capitalist transformations. Includes late and post-socialist nation states in Eastern Europe and postcolonial Asia, Latin America, and Africa. Examines the revival of socialist political and cultural projects as a response to capitalist globalization and escalating social and economic inequalities.

ANTH 277 Seminar in Political Ecology 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An advanced course focusing on the relationship between political economy and human ecology for the analysis of the interaction between people, natural resources, and the environment.

ANTH 278 Seminar in Representation and the Ethnographic Text 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Critically reviews and analyzes ethnographic texts, both traditional and experimental. Examining ethnographies as a form of writing, the seminar explores the larger intellectual, theoretical, and political context in which production of ethnographies occurs.

ANTH 279 Seminar in Political Anthropology 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Reviewing different forms of stratification and power in society, this seminar critically reviews and analyzes a broad range of materials, debates, and contemporary trends within political anthropology.

ANTH 280 Seminar in Anthropology of Tourism 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An anthropological study of travel and tourism. Topics include cultural implications for travelers, local people, environment, and economy; historical and social construction of tourist sites; material objects; the culture and performance of tourism; the photographic eye; the tourist encounter; cultural mediation; politics of cultural representation; and commoditization of culture. Credit is awarded for only one of ANTH 119 or ANTH 280.
ANTH 281 Anthropology of Humanitarianism 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines debates in anthropological study of humanitarianism and human rights. Uses case studies in Asia, Africa, and Latin America to explore legal, cultural, and political practices of rights and reconciliation in post-conflict settings. Topics include religious aid, philanthropy, ideas of humanity and personhood, state violence and citizenship, and peacekeeping missions.

ANTH 290 Directed Studies 1 to 6 Independent study by graduate students under supervision of a particular faculty member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ANTH 291 Individual Studies in Coordinated Areas 1 to 6 Prerequisite(s): graduate standing. A program of study designed to advise and assist candidates who are preparing for doctoral examination. The following rules apply: 1) a student may take up to 12 units for the Basic Requirements; 2) a student may take up to 8 units for the Comprehensive Requirements. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ANTH 292 Concurrent Analytical Studies in Anthropology 1 to 4 Each ANTH 292 course will be taken concurrently with some 100-series course, but on an individual basis. It will be devoted to completion of a graduate paper based on research or criticism related to the 100-series course. Faculty guidance and evaluation will be provided throughout the quarter. Satisfactory (S) or No Credit (NC) grading is not available. Course is repeatable.

ANTH 297 Directed Research 1 to 6 Individual research by graduate students directed by a particular faculty member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ANTH 299 Research For Thesis Or Dissertation 1 to 12 Field training and directed research in preparation for and completion of doctoral dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

ANTH 301 Directed Studies in the Teaching of Anthropology 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing, consent of instructor. Discusses bibliography and research and teaching techniques used in the instruction of anthropology. Covers how to lead discussion sections and relate student experience to anthropological problems. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ANTH 302 Teaching Practicum 1 to 4 Prerequisite(s): limited to departmental teaching assistants; graduate standing, ANTH 301, or consent of instructor. Supervised teaching in upper- and lower-division Anthropology courses. Required of all teaching assistants. Fulfills teaching portion of Ph.D. teaching requirement. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

Archives, Museums, Manuscript, and Print Designated Emphasis

Subject abbreviation: AMMP
College of Humanities, Arts, and Social Sciences

Kristoffer Neville (Art History)
Padma Rangarajan (English)
Fusion Wang (English)
Cherry Williams (UCR Library Special Collections & University Archives)
Susan Zieger (English)

Designated Emphasis Requirements
The Designated Emphasis is a 12-unit interdisciplinary graduate course of study, requiring coursework across at least two departments. Two of the three required courses, if otherwise eligible, may count towards the student’s Ph.D. requirements.

1. Two (2) courses (8 units) selected from:
   - AHS 260, AHS 273, AHS 274, CRWT 186A, CRWT 186B, ENGL 117T, ENGL 120T, ENGL 151T, ENGL 152, ENGL 246, ENGL 250, ENGL 260, ENGL 272, ENGL 273, ENGL 282, FREN 160, HISE 113, HISE 114, HIST 197, HIST 240 (E-Z), HIST 262, HIST 263. Students may ask to count another course with relevant content as approved by the Designated Emphasis Director. Students must select courses from at least two different departments or programs, one of which may be the student’s home department. Undergraduate courses taken to fulfill these requirements must be accompanied by a 2-unit 292 course with extra work mutually agreed upon by professor and student.

2. Significant Research Product: All students must complete a 297 graduate course (4 units) with a AMMP affiliated faculty member that produces an approximately 25-page research paper. This paper will fulfill the research requirement of the DE. Students may ask to write their research project within a graduate seminar, as approved by the Designated Emphasis Director. If they request this option, the seminar in question will replace the required 297 units and cannot be used for PhD units.

All requirements for the Designated Emphasis must be satisfied before a student advances to candidacy in their Ph.D. field; a minimum GPA of 3.0 is required for the award of the Designated Emphasis.

Major

The Department of Art offers a B.A. degree in an interdisciplinary program that emphasizes a critical approach to artistic production. Courses are offered in the following curricular areas: photography, digital art, video, two- and three-dimensional media (painting, drawing, sculpture, installation), and critical theory. The program is designed primarily for students preparing for graduate study and those who plan to continue professionally as artists. The Department of Art does not offer courses in commercial art or in graphic design. The department welcomes the participation of nonmajors and nondegree students.

Admission

Incoming freshmen applicants may declare a major in Art upon the submission of their Undergraduate Admission application. Current UCR non-majors and new incoming transfer students must submit a portfolio electronically, consisting of ten (10) images of your original work and/or three (3) clips of moving images or sound work. Guidelines for the portfolio and a link to the site for submission can be found on the Art Department website at art.ucr.edu/. Students whose portfolios are approved will be admitted to the major. Guidelines for submission are also available from Undergraduate Admissions and from the Department of Art.

University Requirements
See Undergraduate Studies section.

College Requirements
See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.
Major Requirements

The major requirements for the B.A. in Art are as follows:

1. Lower-division requirements (33-34 units)
   a) ART 001 or ART 002
   b) ART 003 or ART 010
   c) ART 005
   d) ART 006/MCS 006
   e) Two of the following courses: ART 009, ART 065, ART 066, ART 067, or any of ART 002, ART 003 and ART 010 not used to fulfill Major Requirements 1.a) or 1.b).
   f) One course from the following courses: AHS 017C, AHS 020, or AHS 021.
   g) ART 032

2. Upper-division requirements (40 units)
   a) ART 160
   b) One of the following Art History courses: AHS 115, AHS 135, AHS 136/MCS 137, AHS 175, AHS 176/MCS 176, AHS 178/URST 178, AHS 179, AHS 180, AHS 181, AHS 182, ART 183, AHS 184/URST 184, AHS 185/URST 185, AHS 186/MCS 186, AHS 187, AHS 188, AHS 189/2- or any other upper-division Art History course that covers the period 1945 to present
   c) ART 180
   d) ART 132 (must pass with a C or better)
   e) A minimum of 24 additional units of upper-division Art course work

Note: A maximum of 12 upper-division transfer units of established equivalency can be accepted for credit. Equivalent transfer units in lower-division studio art course work and lower- and upper-division Art History course work is also accepted for credit toward the major in the respective lower- or upper-division category.

A minimum of 36 units of Art must be taken in residence (UCR Department of Art) to fulfill this major.

Education Abroad

Education Abroad is an excellent opportunity to learn more about another country and its culture while taking courses to earn units toward graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit Education Abroad at ea.ucr.edu or call (951) 827-4113.

See Education Abroad in the Educational Opportunities section in the beginning of this catalog.

Graduate Program

The Art Department offers the Master of Fine Arts (M.F.A.) degree in Visual Art.

Master of Fine Arts in Visual Art

The program's primary goal is to provide a context for research and production of contemporary art at the highest level. The M.F.A. in Visual Art is interdisciplinary, and students can draw on the resources of other departments on campus, including the UCR/California Museum of Photography.

The core of the M.F.A. program is independent creative work done in consultation with faculty. Creative work can be digital imaging, film or video works, installations, painting, performances, photography, sculpture, or any visual medium.

Admission

Applicants must have a B.A. or B.F.A. degree. They must submit an application including all required support documents, a portfolio of their work, and three letters of recommendation. The GRE is not required. Students without any visual arts background may be required to complete courses in Studio Art and Art History subsequent to admission.

Plan I (Thesis)

The M.F.A. is a Plan I (thesis) master’s degree program, requiring 72 units in graduate or approved upper-division undergraduate courses that must be completed with at least a letter grade of "B" or "Satisfactory."

Required courses include 48 units in graduate courses in theory and criticism, as well as individual projects and tutorials:

1. Three courses of ART 285, Graduate Critique
2. ART 230, Contemporary Critical Issues
3. ART 240, Critical Theory
4. ART 299, Research for Thesis
5. One of the following Art History Graduate Seminars (AHS 252, AHS 260, AHS 263, AHS 272, AHS 273, AHS 274, AHS 276, AHS 277, AHS 278, AHS 279, AHS 282, AHS 283, AHS 284, AHS 285, AHS 286, or AHS 287)
6. 20 units of ART 293, Directed Individual Studio Production

Of the remaining 24 units in elective courses, at least one additional course must be in Art History or Media and Cultural Studies, and at least two additional courses must be taken from a department other than art. These courses may be graduate or undergraduate courses.

M.F.A. students receive a degree in Visual Art. The course of field study is not characterized by medium.

All students must undergo an annual review in their first and second year by a departmental graduate studies committee. The committee will review the student’s comprehensive record of TA-ships, grades, and overall progress of their research and studio work and make one of the following recommendations: proceed in the program or probationary warning (hold).

Each student will be given a written evaluation letter that elaborate on this assessment and make suggestions for improvement. If the student is given a hold, they must undergo a special review after one quarter in order to review progress in areas of concern where the outcome would be to remove the hold or terminate. The thesis requirement is met by the student’s M.F.A. exhibition, accompanied by a written thesis. A graduate thesis committee reviews the thesis. The committee is composed of four faculty members, at least three from the Department of Art. The fourth faculty member may be from another department at any UC Campus. Persons who are not UC Senate members may be appointed only with the approval of the Graduate Dean. Students will select their committee chairperson by the end of the spring quarter of their second year, and select the remaining committee members by the end of the fall quarter of their third year.

Professional Development Requirement

ART 400, Art Practice Seminar, spring quarter. Students must complete the course a minimum of two times. Units earned through ART 400 do not count towards the 72-unit minimum degree requirement.

Foreign Language Requirement

None

Teaching Requirement

None; however, students are given opportunities to teach and are encouraged to do so.

Normative Time to Degree

Nine quarters

Lower-Division Courses

ART 001 Beginning Drawing and Design 4 Lecture, 2 hours; studio, 4 hours. Introduction to the materials, techniques, structure, and expressive properties of drawing and design. Must attend the first day of class for studio orientation and instruction to avoid being dropped from the class.

ART 002 Beginning Painting and Design 4 Lecture, 2 hours; studio, 4 hours. Introductory course in the media, techniques, structural, and expressive properties of painting and design. Must attend the first day of class for studio orientation and instruction to avoid being dropped from the class.

ART 003 Introduction to Photographic Processes 5 Lecture, 3 hours; studio, 4 hours. Introduction to basic principles of photography as fine art. Addresses a range of technological approaches to digital image capture and printing. Explores historical and contemporary approaches to creating meaningful photographs. Must attend the first day of class.

ART 004 Introduction to Moving Images: Film, Video and New Media 5 Lecture, 3 hours; studio, 3 hours; screening, 3 hours. Prerequisite(s): none. Explores issues and skills of video/film/media art based in production, history, and theory of the moving image. Introduces basic production, editing concepts and techniques of live-action production, storyboards, image editing, and final authoring. Examines the moving image through installation, documentary, experimental film, video art, sound art, and performance. Cross-listed with MCS 004.

ART 005 Beginning Sculpture and Three-Dimensional Design 4 Lecture, 3 hours; studio, 3 hours. An introduction to tools and assembly techniques working with wood, plaster, metal, and found objects. Provides an understanding of 3D qualities including volume, surface, and scale as well an overview of twentieth-century art movements and contemporary sculpture strategies. See Schedule Notes for Attendance Policy.
ART 066 Introduction to Contemporary Critical Issues in Art 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Examines basic principles and methodologies of theory as applied to the interpretation and creation of works of art. Includes screenings. Cross-listed with MCS 006.

ART 008 Current Topics in Contemporary Art 4 Lecture, 3 hours; activity, 3 hours. Examines visual arts as contemporary phenomenon. Includes study of recent exhibitions of contemporary art, the way art is culturally distributed, and the ideological and conceptual dialogue surrounding significant contemporary art. Encourages visits to nearby museums and major art galleries.

ART 009 Introductory Web-Based Art: Site Creation and Navigation 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): none. An introduction to the technology and critical issues of Web-based art. Covers Website creation software and conceptual and creative navigation. Emphasis is on contemporary issues of non-object, byte-based art practice.

ART 010 Introduction to Video and Time-Based Experimentation 4 Lecture, 3 hours; studio, 3 hours. Prerequisite(s): none. Introduction to time-based media including video, sound, performance, and installation as studio art practice. Builds aesthetic, conceptual, and technical skills for the creation of video and time-based works. Addresses work of contemporary artists and issues. Emphasizes experimental practical techniques. Must attend the first day; see Schedule Notes for attendance policy.

ART 012 Art After the Internet: Memetic Images and Vernacular Technology 4 Lecture, 3 hours; discussion, 1 hour. An introduction to the history of art within the context of the Internet and vernacular technology (i.e., smartphones and desktop technologies). Emphasizes critical examination of representations and dissemination. Offered online only.

ART 032 Art Studio One 4 Lecture, 3 hours; studio, 3 hours. Prerequisite(s): Restricted to major(s) Art (Studio). Introduces art majors to the importance of interdisciplinary work. Includes independent projects, critical analysis in a group critique situation, exhibition preparation, and considerations of presentation of their work through written and spoken language. Prepares art majors for upper division coursework.

ART 065 Introduction to Digital Painting and Drawing: Painting Without A Trace 4 Lecture, 3 hours; laboratory, 3 hours; individual study, 2 hours. An introduction to digitally based painting and drawing. Focuses on use of digital software such as Adobe Photoshop and Illustrator to create paintings without the use of traditional paint. Explores the back and forth relationship this new medium and traditional painting, drawing, and photography in history and practice.

ART 066 Introduction to Three-Dimensional Digital Modeling and Animation 4 Lecture, 3 hours; laboratory, 3 hours; individual study, 2 hours. Prerequisite(s): none. Covers basic skills necessary to create three-dimensional digital images and models. Emphasizes techniques for polygon and curved-surface modeling and photorealistic image creation through material shading, texturing, and lighting. Introduces basic scripting methods to create complex models and images with Autodesk Maya or equivalent.

ART 067 Three-Dimensional Digital Modeling and Animation 4 Lecture, 3 hours; laboratory, 3 hours; individual study, 2 hours. Prerequisite(s): ART 066. Builds advanced skills for three-dimensional modeling. Introduces basic computer animation techniques within framework of existing software. Techniques include rigging skeletons for character models, keyframing, and special effects animation using Autodesk Maya software or equivalent. Teaches proficiency in analogous scripting operations. May be graded with Letter Grade or Satisfactory/No Credit [S/NC]; no petition required. Course is repeatable to a maximum of 8 units.

ART 070 (E-Z) Digital Imaging Software For The Visual Arts 4 Lecture, 2 hours; laboratory, 6 hours. Provides training in basic digital image manipulation software skills in preparation for digital image applications across varied media. E. Introduction To Image Manipulation (Photoshop); F. Introduction To Video Editing (Final Cut Pro, Avid, Media 100); G. Introduction To Web Authoring (Dreamweaver, QuickTime); I. Introduction To Graphic Design And Desktop Publishing (Quark). Course is repeatable as content or topic changes to a maximum of 8 units.

ART 071 (E-Z) Photographic Materials and Processes 4 Lecture, 2 hours; laboratory, 6 hours. In-depth instruction of conventional (i.e., nondigital) photographic processes. Instruction is primarily technical; involves some discussion of application to contemporary art. F. View Camera Workshop; K. Technical Issues Of Black And White Photography; M. Technical Issues Of Color Photography; N. Intermediate Technical Aspects Of Black And White Photography; O. Intermediate Technical Aspects Of Film-based Digital Photography. Course is repeatable as content or topic changes.

ART 075 (E-Z) Sculpture Materials and Processes 2 Laboratory, 3 hours; workshop, 10 hours per quarter. Each topic focuses on a single art-making process. Provides in-depth understanding for the beginning sculpture student and a project-derived technique. E. Metal; F. Mold-making; G. Plaster And Clay; J. Wood. Course is repeatable to a maximum of 8 units.

Upper-Division Courses

ART 102 Intermediate Drawing 4 Lecture, 2 hours; studio, 4 hours. Prerequisite(s): ART 001 and ART 002 or equivalent and consent of instructor. An intermediate course of study. Subject: primarily still life, landscape and non-figurative images. Purpose: a fuller understanding of the technical and expressive aspects of drawing. Studio exercises and in-studio lectures. Course is repeatable to a maximum of 8 units with consent of instructor.

ART 103 Advanced Drawing 4 Lecture, 2 hours; studio, 4 hours. Prerequisite(s): ART 102. Intermediate Drawing, or equivalent and consent of instructor. An advanced course of study in drawing techniques and the employment of the drawing medium as a terminal means of artistic expression. Course is repeatable to a maximum of 12 units.

ART 104 Life Drawing 4 Lecture, 2 hours; studio, 4 hours. Prerequisite(s): ART 001 and ART 002 or equivalent and consent of instructor. Subject: primarily still-life, landscape and figure. Purpose: a fuller understanding of the technical aspects of painting. Method: studio exercises, in-studio lectures and outside assignments. Course may be repeated for credit to a total of 12 units.

ART 110 Intermediate Painting 4 Lecture, 2 hours; studio, 4 hours. Prerequisite(s): ART 001 and ART 002 or equivalent and consent of instructor. Subject: primarily still-life, landscape and figure. Purpose: a fuller understanding of the technical aspects of painting. Method: studio exercises, in-studio lectures and outside assignments. Course may be repeated for credit to a total of 12 units.

ART 111 Advanced Painting 4 Lecture, 2 hours; studio, 4 hours. Prerequisite(s): ART 110 and consent of instructor. Advanced problems in figurative and nonfigurative painting. Emphasis on the development of personal direction. Investigation of the individual student’s relation to contemporary ideas in painting. In-studio lectures, studio exercises, and outside assignments. May be repeated for credit to a total of 12 units.

ART 112 (E-Z) Painting Materials and Processes 2 Studio, 2 hours; workshop, 1 hour. Prerequisite(s): restricted to class level standing of junior or senior. Focuses on selected special techniques or approaches to painting. E. Supports, grounds, Underpainting, And Blending; F. Glazing, Varnishing, And Layering, G. Big Collaborative Painting, G. Big Collaborative Painting I, All Paint. Course is repeatable to a maximum of 12 units.

ART 115 Intermediate Sculpture 4 Lecture, 3 hours; studio 3 hours. Prerequisite(s): ART 005. Develops the necessary critical and imaginative faculties for making sculpture. Through project assignments, students explore associations between materials, forms, and context to construct or deconstruct ideas. Audiovisual presentations, readings, and group critiques survey twentieth-century modern sculpture and more recent practices. Examines the artist’s role in the cultural landscape of spectacle and entertainment. Course is repeatable to a maximum of 12 units.
ART 123 Chromalogue 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): ART 001 or ART 002 or ART 003 or ART 005 or ART 010; restricted to class level standing of junior, or senior; restricted to major(s) Art (Studio). Introduces philosophical, theoretical, scientific histories related to the understanding and development (use) of color in aesthetic production alongside material history of chemical industry in the 19th and 20th centuries. Addresses recent discoveries of color and technology. Focuses on color as material and perception. Explores fluidity in meaning, production, and experience.

ART 125 Sculpture Hybrid: Furniture, Architecture, Decoration (fad) 4 Lecture, 3 hours; laboratory, 3 hours; consultation, 5 to 1.5 hours. Prerequisite(s): ART 005, ART 115; or consent of instructor. Introduces the sculptural object that exists as or in relationship to furniture, architecture, and interior decoration. Includes an overview of work that defies classification as art or design such as the Bauhaus movement, through utopian American mid-century design and architecture and Italian-based Memphis design, to contemporary art-making practices. Explores theoretical challenges inherent in this art-making strategy.

ART 131 Intermediate Photography and Digital Technology 4 Lecture, 3 hours; laboratory, 4 hours. Prerequisite(s): ART 003 or consent of instructor. Covers the complete cycle of photographic production from scanning to output. Emphasizes developing skill in creating digital photographic imagery for creative and cultural expression. Software and some digital equipment are provided. A 35mm single lens reflex (SLR) or digital cameras and flash drives are required. Course is repeatable to a maximum of 8 units. Cross-listed with MCS 131.

ART 132 Art Studio Two 4 Lecture, 3 hours; studio, 3 hours. Prerequisite(s): ART 006/MCS 006, ART 032, upper-division standing in Art; or consent of instructor. Prepares junior Art majors for their senior course work. Emphasizes interdisciplinary work, independent projects, critical analysis in a group critique situation, exhibition preparation, and writing a preliminary artist statement. Letter Grade only.

ART 133 Senior Art Workshop 4 Lecture, 3 hours; studio, 3 hours. Prerequisite(s): upper-division standing in Art, 16 upper-division units in Art course work, or consent of instructor. Prepares senior Art majors for their thesis exhibition show. Emphasizes interdisciplinary work, independent projects, critical analysis in a group critique situation, exhibition preparation, and writing a final thesis statement.

ART 134 Mixed Media 4 Lecture, 3 hours; studio, 3 hours. Prerequisite(s): ART 001 and ART 002. Exploration into experimental methods for creating an image; techniques of frottage, collage, photo transfer, modeling and mold making, assemblage.

ART 135 Intermedia: Art, Media, and Culture 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of performance, photography, video, film, television, installation, and other related "intermedias.” Focuses on intermedial artworks and how they are constructed, documented, analyzed, and viewed in the larger context of culture. Cross-listed with MCS 135.

ART 136 Installation and Site-Specific Art 4 Lecture, 3 hours; studio, 3 hours. Prerequisite(s): consent of instructor. Focuses on performance, photo installation, computer art, video/film, site-specific installation, sculpture, and/or other intermedias. Focuses on self-directed individual sculpture projects. Course is repeatable to a maximum of 12 units.

ART 139 Intermediate Web-Based Art: Animation, Audio, and Interactivity 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): ART 009 or consent of instructor. Explores the conceptual and creative possibilities of Web-based animation, audio, and interactive software at the intermediate level. Addresses the complex interconnections and unique quality of Internet-based art.

ART 140 Intermediate Analog Photography 4 Lecture, 3 hours; studio, 4 hours. Prerequisite(s): ART 003 or ART 071K; or consent of instructor. Introduction to analog film processing and black and white printing. Focuses on developing individual creative approaches in analog photography. Some analog film cameras available for rental, or students may provide their own cameras. Course is repeatable to a maximum of 12 units.

ART 143 Advanced Digital Imaging Technology 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): ART 003, ART 131/MCS 131. Covers advanced digital imaging technologies such as large-format scanning, printing, color correction, retouching, and color management. Emphasizes the development of technical skills.

ART 145 Advanced Photography Workshop 4 Lecture, 3 hours; studio, 4 hours. Prerequisite(s): ART 131/MCS 131 or ART 140 or consent of instructor. Advanced individual photographic project based activities. Emphasis on technology, theory, history and process. Critique and lecture. Course is repeatable to a maximum of 12 units.

ART 146 (E-Z) Topics in Advanced Photography 4 Lecture, 2 hours; studio, 4 hours. Prerequisite(s): ART 131 or MCS 131 or ART 140 or ART 145; or consent of instructor. An advanced studio course designed to focus on selected special techniques of or approaches to photography. Subject matter determined by the instructor and may vary. K. Polaroid Photography; L. The Book And The Photography; M. Dye Transfer; N. Current Art Practices; O. Photography And The Urban Edge; P. Fabricated To Be Photographed And The Directorial Mode; Q. Sycamore Canyon Photographic Project. Course is repeatable as content or topic changes to a maximum of 12 units.

ART 150 Intermediate Moving Images: Film Video and New Media 5 Lecture, 3 hours; studio, 3 hours; screening, 3 hours. Prerequisite(s): ART 004/MCS 004. Examines the moving image through installation, documentary, experimental film, video art, sound art, and performance. Builds upon production and editing concepts introduced in ART 004/MCS 004. Explores issues and skills of video/film/media art based in production, history, and theory of the moving image. Covers editing theory, lighting, and sound editing. Course is repeatable to a maximum of 10 units. Cross-listed with MCS 150.

ART 151 Intermediate Video and Time-Based Experimentation 4 Lecture, 3 hours; studio, 3 hours. Prerequisite(s): ART 010; restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Develops conceptual methods and experimental practical techniques for making video and time-based artworks through assignments and self-directed projects. Includes support of production through critique, discussion, and exposure to contemporary artists and theorists. Explores time-based media's expanding critical role in contemporary art and society. Course is repeatable to a maximum of 8 units.

ART 152 Advanced Video and Time-Based Experimentation 4 Lecture, 3 hours; studio, 3 hours. Prerequisite(s): ART 151; restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Focuses on the production of self-directed individual video and/or time-based projects. Emphasizes contextualization in contemporary art practice, critical analysis in a group critique situation, exhibition and presentation, and writing an artist statement. Course is repeatable to a maximum of 12 units.

ART 155 Advanced Moving Images: Film, Video and New Media 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): ART 150/MCS 150. Expands on skills introduced in ART 150/MCS 150. Explores issues and skills connected with video/film/media art based on the production, history, and theory of the moving image. Covers recording, editing theory, lighting, and sound mixing. Examines time-based media through installation, documentary, experimental film, video art, sound art, and performance. Course is repeatable to a maximum of 12 units. Cross-listed with MCS 155.

ART 160 Intermediate Art Theory 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ART 006/MCS 006. Addresses current critical and theoretical issues in modern and contemporary culture. Examines art production in light of contemporary and modernist art practice, theory, and history in relation to the interpretation and creation of art. Focuses on issues of race, gender, politics, aesthetics, class, and sexuality.

ART 161 Special Topics in Art Criticism and Theory 4 Seminar, 3 hours; activity, 3 hours. Prerequisite(s): MCS 001 with a grade of C- or better or ART 160 with a grade of C- or better; restricted to class level standing of junior, or senior; or consent of instructor. Advanced topics in contemporary art theory and criticism. Examines the reception, analysis,
and theoretical underpinning of works of art in relation to contemporary and historical issues in the visual arts. Course is repeatable to a maximum of 12 units. Cross-listed with MCS 163.

ART 162 Special Topics in New Genres of Art Practice 4 Lecture, 2 hours; studio, 4 hours. Prerequisite(s): ART 006/MCS 006 and a beginning studio art course with grades of “C” or better or consent of instructor. Through group critiques, readings, and discussions, explores art making while introducing significant and recent practices in cultural production. Course is repeatable to a maximum of 12 units.

ART 165 Intermediate Digital Painting and Drawing: Intermediate Painting Without A Trace 4 Lecture, 3 hours; laboratory, 4 hours; individual study, 2 hours. Prerequisite(s): ART 065. Continues the investigation of two-dimensional digitally based painting and drawing. Explores possibilities in combining traditional and digital painting techniques. Examines the relationship between this new medium and traditional painting, drawing, and photography. Course is repeatable to a maximum of 8 units.

ART 167 Intermediate Digital Media: Web Authoring 4 Lecture, 3 hours; laboratory, 4 hours. Prerequisite(s): ART 009 or consent of instructor. Examines the histories, myths, and technical particularities of the Web from the artist’s perspective. Includes art projects that are site-specific to the Internet. Explores issues including access, interface design, activism, multiple narratives, programming, and code. Does not cover software training or commercial graphic design.

ART 168 Intermediate Digital Media: Interactive Technology 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): digital art course or consent of instructor. Create interactive digital artworks in both time-based and environmental forms; explore issues including interactivity, interface design, activism, and multiple narratives. Does not cover software training or commercial graphic design.

ART 169 (E-Z) Digital Imaging Software For the Visual Arts: Intermediate Software Skills 1 Lecture, 6 hours per quarter; laboratory, 12 hours per quarter. Prerequisite(s): ART 003 or MCS 004 or ART 004 or ART 009 or ART 065 or ART 066. Covers digital imaging application across varied media. Includes Web design, digital video editing, video compositing and effects, Web authoring, digital photography, and desktop publishing. Targets specific software that aid in developing digital production skills that can be applied to a wide array of intermediate course work. E. Image Manipulation (Adobe Photoshop); F. Video Editing (Final Cut Pro, Avid, Media 100); G. Web Authoring (Dreamweaver, QuickTime); H. Graphic Design And Desktop Publishing (Quark). Course is repeatable to a maximum of 3 units.

ART 171 Intermediate and Advanced Sculpture and Digital Technology 4 Lecture, 2 hours; laboratory, 4 hours; individual study, 2 hours. Prerequisite(s): ART 005, ART 066. Covers intermediate and advanced three-dimensional modeling and printing resulting in sculpture derived entirely from the computer. Emphasizes individual projects with the potential to create both computer-based models and material-based sculptures. Discusses new digitally based sculptural possibilities in relation to historical sculptural practice. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable to a maximum of 8 units.

ART 175 Advanced Digital Workshop 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): ART 131/MCS 131 or ART 139 or ART 150/MCS 150. Designed to encourage the development of individual projects utilizing digital technology. Areas of inquiry may include, but are not limited to, digital imaging, Web-based works, forms of digital publishing, digital video, and digital multimedia installation. Involves laboratory exercises, lectures, discussion of articles and exhibitions, and self-directed assignments.

ART 180 Contemporary Issues and Practice 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): any lower-division studio art course. A course structured around a sequence of three to six visiting artists, authors, and critics. Visitor presentations will be augmented by relevant articles and in-class presentations. Students generate written and oral responses to specific artists and topics. Artists and topics to be determined by the instructor. Course is repeatable to a maximum of 12 units.

ART 185 Senior Exhibition Seminar 4 Seminar, 3 hours; activity, 3 hours. Prerequisite(s): restricted to class level standing of senior; restricted to major(s) Art (Studio); review and approval of proposed project for exhibition in quarter prior to exhibition; consent of instructor. Consists of independent work and group seminars. Includes coordination with gallery staff and administration, completion of an artist’s statement, and presentation of a finished body of work in public exhibition. Satisfaction (S) or No Credit (NC) is not available. Credit is awarded for one of the following ART 185 or ART 195.

ART 190 Special Studies 1 to 5 Prerequisite(s): To be taken with the consent of the chair of the department as a means of meeting special curricular problems. Total credit may not exceed 8 units.

ART 195 Senior Thesis 4 Independent work, 12 hours. Prerequisite(s): completion of 32 units of upper-division studio art courses, review of a preliminary portfolio two quarters prior to intended enrollment; or consent of faculty advisor. The student produces and presents a finished body of work to the faculty. Credit is awarded for only one of ART 185 or ART 195.

ART 198I Individual Internship 1 to 12 Field, 2 hours per unit. Prerequisite(s): consent of instructor and upper-division standing. Work with an appropriate professional individual or organization to gain experience and skills in the student’s chosen art specialization. Repeatable to a total of 16 units; maximum of 4 units count toward major in Art.

Graduate Courses

ART 230 Contemporary Critical Issues 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing. Course is repeatable. Covers analysis of contemporary issues of art and media practice, theoretical systems as applied to modern, postmodern, and post-postmodern art. Course is repeatable to a maximum of 12 units.

ART 240 Current Topics in Critical Theory 4 Seminar, 3 hours, extra reading, 3 hours; research, 2 to 3 hours. Prerequisite(s): graduate standing. ART 006/MCS 006 and ART 160 or equivalents or consent of instructor. Selected theoretical systems as applied to modern, postmodern, and post-postmodern art. Course is repeatable to a maximum of 12 units.

ART 285 Peer Critique 4 Seminar, 3 hours, research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Provides a serious and sophisticated environment for peer critique of studio production. Involves readings, screenings, and field trips. Course is repeatable.

ART 290 Directed Studies 1 to 6 Individual Study, 3 to 18 hours; studio, 3 to 6 hours. Prerequisite(s): graduate standing; consent of instructor and graduate advisor. Individual study of selected topics directed by a faculty member. Course is repeatable.

ART 292 Concurrent Studies in Art 1 to 4 Research, 3 to 12 hours. Prerequisite(s): graduate standing; consent of instructor. Taken concurrently with a 100-series course but on an individual basis. Involves research, critique, studio production, or written work commensurate with the number of units elected. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ART 293 Directed Individual Studio Production 1 to 4 Studio, 3 to 12 hours. Prerequisite(s): graduate standing; consent of instructor; graduate advisor. Independent study with faculty member to evaluate artwork, assess progress and provide criticism. Topics may include historical precedents, theoretical readings and consultation on production or presentation of artworks. Course is repeatable.

ART 299 Research For Thesis 1 to 4 Research, 1 to 6 hours; studio, 3 to 6 hours. Prerequisite(s): graduate standing; consent of instructor and graduate advisor; satisfactory completion of 28 graduate units in the Masters of Fine Arts program. Independent research with faculty advisor in preparation for comprehensive exhibition for the degree. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

ART 302 Teaching Practicum 1 to 4 Practicum, 2 to 8 hours; consultation, 1 to 4 hours. Prerequisite(s): graduate standing. Provides supervision of teaching in under-graduate Art courses. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.
ART 400 Artist Practice Seminar 4 Lecture, 3 hours; studio, 3 hours. Prerequisite(s): restricted to major(s) Visual Art; MFA, graduate standing. Provides opportunities for individual studio production and research. Includes work with the faculty member, guest artists, and art professionals. Also includes topic-driven discussions, individual consultation, and group activities. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

**Art History**

Subject abbreviation: AHS  
College of Humanities, Arts, and Social Sciences  
Kristoffer Neville, Ph.D., Chair  
Department Office, 231 Arts  
(951) 827-5057; arthistory.ucr.edu  
Professor  
Johannes Endres, Dr. phil.habil.  
Kristoffer Neville, Ph.D.  
Associate Professors  
Jeanette Kohl, Ph.D.  
Liz Kotz, Ph.D.  
Susan Laxon, Ph.D.  
Jason Weems, Ph.D.  
Assistant Professors  
Yong Cho, Ph.D.  
Savannah Esquivel, Ph.D.  
Aleca LeBlanc, Ph.D.  
Fatima Quaraishi, Ph.D.  
Professor Emeriti  
Malcolm Baker, Ph.D. Distinguished Professor  
François Forster-Hahn, Ph.D. Distinguished Professor  
Ginger C. Hsü, Ph.D.  
Conrad Rudolph, Ph.D. Distinguished Professor

**Major**  
The Art History major provides the framework for the critical study of a wide range of global art and visual culture from different periods of human history and in all media.  
The department works closely at both the undergraduate and graduate levels with the UCR California Museum of Photography to give students an opportunity to work with archival and art photographs and with the Jack and Marilyn Sweeney Art Gallery to provide access to cutting-edge multimedia works of art and to give the possibility of gaining curatorial experience.

**Education Abroad**  
Education Abroad is an excellent opportunity to learn more about another country and its culture while taking courses to earn units toward graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit Education Abroad at ea.ucr.edu or call (951) 827-4113.

See Education Abroad in the Educational Opportunities section in the beginning of this catalog.

**University Requirements**  
See Undergraduate Studies section.

**College Requirements**  
See College of Humanities, Arts, and Social Sciences, Undergraduate Studies section.

**Major Requirements**  

**Art History Major**  
The major requirements for the B.A. in Art History are as follows: (52 units)

1. **Lower-division requirements (12 units):** one lower-division course in each of the three major areas. Note: No course that appears in more than one area can be repeated.
   a) Pre-modern: AHS 013, AHS 015, AHS 016, AHS 017A or AHS 017HA, AHS 017B or AHS 017HB, AHS 027/ANTH 027/LNST 027
   b) Early Modern: AHS 013, AHS 015, AHS 016, AHS 017B or AHS 017HB, AHS 017C or AHS 017HC, AHS 023, AHS 028/LNST 028
   c) Modern/Contemporary: AHS 008, AHS 013, AHS 017C or AHS 017HC, AHS 020/MCS 023, AHS 021/URST 021, AHS 023, AHS 028/LNST 028

2. **Upper-division requirements (40 units)**
   a) AHS 192
   b) Two courses in each of the major areas (24 units). Note: No course that appears in more than one area can be repeated.
   (1) Pre-modern: AHS 112/ANTH 151/LNST 112, AHS 116/LNST 116, AHS 117/ANTH 157/LNST 117, AHS 125, AHS 126, AHS 133/ANTH 161/GSST 130/HISE 149, AHS 138/AST 138, AHS 139/AST 139, AHS 143/AST 143, AHS 144/AST 144, AHS 146/AST 146, AHS 147, AHS 155, AHS 156, AHS 157, AHS 158, AHS 159
   (2) Early Modern: AHS 113, AHS 116/ LNST 116, AHS 117/ANTH 157/LNST 117, AHS 125, AHS 126, AHS 133/ANTH 161/GSST 130/HISE 149, AHS 134/AST 138, AHS 139/AST 139, AHS 143/AST 143, AHS 144/AST 144, AHS 145/AST 145, AHS 146/AST 146, AHS 158, AHS 160, AHS 161, AHS 162, AHS 163, AHS 165/HISE 133/WMST 170, AHS 167, AHS 168, AHS 169, AHS 170, AHS 171, AHS 172, AHS 173, AHS 177
   3. Twelve (12) elective units of upper-division course work in Art History chosen from the three major areas:  

**Art History/Administrative Studies Major**  
The major requirements for the B.A. degree in Art History/Administrative Studies are as follows:  

**Art History requirements (48 units)**
1. Lower-division requirements (12 units): one lower-division course in each of the three major areas. Note: No course that appears in more than one area can be repeated.
   a) Pre-modern: AHS 013, AHS 015, AHS 016, AHS 017A or AHS 017HA, AHS 017B or AHS 017HB, AHS 018/AST 018, AHS 027/ANTH 027/LNST 027, AHS 030/HIST 027/CLA 017  
   b) Early Modern: AHS 013, AHS 015, AHS 016, AHS 017B or AHS 017HB, AHS 017C or AHS 017HC, AHS 023, AHS 028/LNST 028  
   c) Modern/Contemporary: AHS 008, AHS 017C, AHS 020/MCS 023, AHS 021/URST 021, AHS 023, AHS 028/LNST 028  

2. Upper-division requirements (36 units)
   a) AHS 192, Junior and Senior Seminar (4 units)
   b) Two courses (24 units total) in each of the major areas (Pre-modern, Early Modern, Modern/Contemporary) Note: No course that appears in more than one area can be repeated.
   c) Eight (8) elective units of upper-division course work in Art History chosen from the three major areas.

**Administrative Studies requirements (37 units)**
1. Lower-division requirements (17 units)
   a) BUS 010, BUS 020  
   b) STAT 008 or equivalent (may be used to satisfy breadth requirements)  
   c) CS 008 (may be used to satisfy breadth requirements)

2. Upper-division requirements (20 units)
   a) Two courses (8 units) from the list below:  
      (1) ECON 102 or ECON 103 or ECON 104A or ECON130 or ECON 162/ BUS 162  
      (2) PSYC 140 or PSYC 142  
      (3) SOC 150 or SOC 151  
      (4) POSC 181 or POSC 182 or POSC 183 or POSC 186  
      (5) ANTH 127 or ANTH127S or ANTH 131  

These two courses must be outside the discipline of Art History and cannot be courses included as part of the three-course Business Administration track or their cross-listed equivalents.

b) A three-course track (12 units) in Business Administration courses from one of the following:  
   (1) Organizations (General): BUS 100 or BUS 100W, BUS 107, BUS 158/ANTH 105, BUS 176/SOC 176, SOC 150, SOC 151
Administrative Studies requirements. Note: In filing the dual requirements of the major students may not count more than two courses toward both parts of their total requirements (Art History requirements and Administrative Studies requirements).

Art History/Religious Studies Major

The Art History/Religious Studies Major combines the disciplinary interest in the history of the visual arts with its related religious content and background.

Major Requirements

The major requirements for the B.A. degree in Art History/Religious Studies are as follows:

Asian Concentration (52 units)

1. Lower-division requirements (12 units)
AHS 015, AST 030/CHN 030, RLST 005

2. Upper-division requirements (40 units)
   a) Art History (16 units): AHS 125, AHS 126, AHS 138/AST 138, AHS 139/AST 139, AHS 143/AST 143, AHS 144/AST 144, AHS 145/AST 146, AHS 146/AST 147, CPLT 141
   b) Religious Studies (24 units): choose from RLST 101, RLST 103, RLST 105, RLST 106, RLST 142/AST 142/CHN 142, RLST 144/CPLT 144

3. Optional 190-level work in either Art History or Religious Studies

Student-designed Comparative Concentration (52 units)

1. Lower-division requirements (12 units)
   a) Art History, choose at least 4 units: AHS 013, AHS 015, AHS 017A or AHS 017HA, AHS 017B or AHS 017HB, AHS 017C or AHS 017HC, AST 030/CHN 030
   b) Religious Studies, choose at least 4 units: RLST 005, RLST 007, RLST 010

2. Upper-division requirements (40 units)
   a) Art History, choose at least 12 units: AHS 139/AST 139, AHS 143, AHS 155, AHS 156, AHS 157, AHS 159, AHS 160, AHS 161, AHS 162, AHS 163, AHS 164, AHS 167, AHS 169, AHS 170, AHS 171, AHS 172, AHS 173 CPLT 141
   b) Religious Studies, choose at least 12 units: RLST 100, RLST 101, RLST 103, RLST 105, RLST 106, RLST 111, RLST 121, RLST 128 (E-Z), RLST 130, RLST 131, RLST 135/HISE 130, RLST 136, RLST 142/AST 142/CHN 142, RLST 144/CPLT 144

3. Optional 190-level work in either Art History or Religious Studies

Western Concentration (At least 52 units)

1. Lower-division requirements (16 units)
   a) Art History: AHS 017A or AHS 017HA, AHS 017B or AHS 017HB, AHS 017C or AHS 017HC, AHS 030
   b) Religious Studies, choose at least 4 units: RLST 007, RLST 010

2. Upper-division requirements (36 units)
   a) Art History (16 units): choose from AHS 155, AHS 156, AHS 157, AHS 159, AHS 160, AHS 161, AHS 162, AHS 163, AHS 164, AHS 167, AHS 170, AHS 171, AHS 172
   b) Religious Studies (20 units): choose from RLST 100, RLST 111, RLST 121, RLST 128 (E-Z), RLST 130, RLST 131, RLST 135/HISE 130, RLST 136

3. Optional 190-level work in either Art History or Religious Studies

Minor

The minor upper-division requirements are designed to encourage study across art-historical areas, while providing the opportunity for some concentration in one specific area.

Requirements for the minor in Art History are as follows:

1. Lower-division requirements (8 units): One lower-division course from two of the three major areas. Note: No course that appears in more than one area can be repeated.
   a) Pre-modern: AHS 013, AHS 015, AHS 016, AHS 017A or AHS 017HA, AHS 017B or AHS 017HB, AHS 027/ANTH 027/LNST 027
   b) Early Modern: AHS 013, AHS 015, AHS 016, AHS 017B or AHS 017HB, AHS 017C or AHS 017HC AHS 023, AHS 028/LNST 028
   c) Modern/Contemporary: AHS 008, AHS 013, AHS 016, AHS 017C or AHS 017HC, AHS 020/MCS 023, AHS 021/URST 021, AHS 023, AHS 028/LNST 028

2. Upper-division requirements: Sixteen (16) upper-division units selected from the three areas listed under the minor (No more than 8 units may be selected from any one area.) See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Graduate Program

The Department of the History of Art offers the M.A. and Ph.D. in Art History

The department offers upper-division and graduate courses in the history of European, U.S., Central and Latin American, and Asian visual culture from ancient to contemporary times (including the history of photography), emphasizing the interpretation of art and visual culture in its historical and cultural context.

Admission

Applicants must have completed a bachelor’s degree or its approved equivalent from an accredited institution and have attained an undergraduate record that satisfies the standards established by the Graduate Division and University Graduate Council. Applications are accepted in the fall quarter only. GRE scores are not required of applicants to the M.A. or Ph.D. programs.

Applicants whose first language is not English are required to submit acceptable scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) unless they have a degree from an institution where English is the exclusive language of instruction. Additionally each applicant must submit a writing sample and three letters of recommendation, at least two of which must be academic references.

Areas of Specialization

M.A. and Ph.D. students select one area of specialization from the list below.

Areas of specialization (and related courses)

1. Pre-Modern (AHS 112, AHS 116, AHS 117, AHS 125, AHS 138, AHS 139, AHS 143, AHS 144, AHS 147, AHS 155, AHS 156, AHS 157, AHS 159, AHS 263, AHS 272, AHS 280, AHS 285)

2. Early-Modern (AHS 113, AHS 116, AHS 117, AHS 125, AHS 133, AHS 138, AHS 139, AHS 143, AHS 144, AHS 146, AHS 158, AHS 160, AHS 161, AHS 162, AHS 163, AHS 165, AHS 167, AHS 168, AHS 169, AHS 170, AHS 171, AHS 172, AHS 173, AHS 175, AHS 177, AHS 178, AHS 179, AHS 252, AHS 260, AHS 263, AHS 267, AHS 273, AHS 274, AHS 280, AHS 285)

3. Modern/Contemporary (AHS 107, AHS 114, AHS 115, AHS 116, AHS 120, AHS 124, AHS 133, AHS 135, AHS 136, AHS 137, AHS 145, AHS 146, AHS 157, AHS 176, AHS 177, AHS 178, AHS 179, AHS 180, AHS 181, AHS 182, AHS 183, AHS 184, AHS 185, AHS 186, AHS 188, AHS 189 (E-Z), AHS 191, AHS 252, AHS 260, AHS 276, AHS 277, AHS 278, AHS 279, AHS 280, AHS 282, AHS 283, AHS 284, AHS 285, AHS 286, AHS 287)

Master’s Degree

The terminal M.A. (Plan I: Thesis) program will allow students to explore the academic study of art history, to pursue careers requiring some graduate education (such as museum education), or to prepare for admission to a Ph.D. program.
Course Work
Candidates must complete a minimum of 48 units as follows. At least 32 of these units must be in graduate level courses. Students may also take courses – with the approval of the graduate advisor – in visual culture offered by the department of Anthropology, Media and Cultural Studies, or other departments or programs at UCR or other UC campuses.

1. Proseminar and Professional Development requirements (12 units):
   - AHS 251A
   - AHS 251B
   - AHS 280

2. Seminar requirements (20 units):
   - One seminar in student’s area of specialization
   - Two seminars outside student’s area of specialization
   - Two additional graduate seminars

3. Elective requirements (16 units):
   Four additional graduate or upper-division courses (up to 12 units of AHS 297/299 may be applied to this requirement)

Students may also take courses – with the approval of the Graduate Advisor – in visual culture offered by the department of Anthropology, Media and Cultural Studies, or other departments or programs at UCR or other UC campuses.

Students may take as many units of AHS 297 and AHS 299 (thesis research and writing) as desired, but only 12 of these units may be applied to the 16 units of elective requirements for the M.A. degree.

The thesis is the culminating requirement for the M.A. degree. Students must complete a successful oral discussion (the “Thesis Defense Meeting”) prior to filing the completed thesis. The thesis should be filed within one year after completing all formal course work.

Language Requirement
M.A. students must demonstrate proficiency in one research language (in addition to English) appropriate to their area of study. The relevant language is chosen in consultation with the graduate advisor and, if possible, the potential M.A. thesis advisor. Ideally, the student should acquire this language proficiency before entering the program. If this is not the case, the language requirement should be fulfilled before the fourth quarter in residence. This requirement is meant to provide the student with an understanding of a research language so that the student can perform graduate level research in this language.

The requirement may be satisfied by completing one of the following options:

1. Complete appropriate coursework with a grade of "B" or better, a UC language or courses equivalent to the following UCR classes:
   - CHN 006
   - FREN 004 or FREN 009A and FREN 009B
   - GER 004 or GER 001R and GER 002R
   - ITAL 004

   Students may also take courses – with the approval of the Graduate Advisor – in visual culture offered by the department of Anthropology, Media and Cultural Studies, or other departments or programs at UCR or other UC campuses.

Doctoral Degree
The Ph.D. will prepare students for academic work as researchers, university instructors, and curators in their fields of expertise.

Admission
The Ph.D. program is conceived in two stages: coursework and candidacy. Students admitted with a bachelor’s degree complete two years of coursework (60 units), as well as the language requirements and qualifying exams before advancing to candidacy. Students who already hold an M.A. in Art History are required to complete one year of coursework (24 units), as well as the language requirements, and the qualifying exams as stated in the program description below. Students admitted post-M.A. usually advance to candidacy after one year of coursework.

Course Work
Candidates for the Ph.D. degree entering with a bachelor’s degree complete a minimum of 60 units of required coursework, 36 of which must be at the graduate level. The requirements are as follows:

1. Proseminar and Professional Development requirements (12 units):
   - AHS 251A
   - AHS 251B
   - AHS 280

2. Seminar requirements (24 units):
   - Two seminars in student’s area of specialization
   - Two seminars outside student’s area of specialization
   - Two additional graduate seminars

3. Elective requirements (24 units):
   - Six additional graduate or upper-division courses

Students who enter with an M.A. degree complete a minimum of 24 units, 16 of which must be at the graduate level. The Graduate Advisor will review the MA degree transcripts of all incoming students and may require supplemental coursework. The requirements are as follows:

1. Proseminar and Professional Development requirements (12 units):
   - AHS 251A
   - AHS 251B
   - AHS 280

2. Seminar requirements (8 units):
   - One seminar in student’s area of specialization
   - One seminar outside student’s area of specialization

3. Elective requirements (4 units):
   - One graduate or upper-division course

 Students may also take courses – with the approval of the Graduate Advisor – in visual culture offered by the department of Anthropology, Media and Cultural Studies, or other departments or programs at UCR or other UC campuses.

Sixth-Quarter Review
All Ph.D. students undergo a comprehensive review no later than the sixth quarter of enrollment in the program, based on a portfolio of writings selected by the student and advisor. The graduate studies committee reviews the student’s record and makes one of the following recommendations: proceed, hold, or terminate. Students receiving a hold may reapply once, within three quarters. Students receiving a terminate may continue enrolling for no more than three quarters to complete M.A. requirements.

Only under extraordinary circumstances may a student continue enrolling for more than 9 quarters (including enrollment while an M.A. student at UCR) without permission to proceed to examinations.

Language Requirement
Ph.D. students are required to demonstrate proficiency in two research languages (in addition to English) before advancement to candidacy. For some fields, additional languages may be required for mastery of the primary and secondary literature. The appropriate languages will be determined in consultation with the student’s academic advisor and approved by the graduate advisor.

The requirement may be satisfied by completing one of the following options:

1. Complete appropriate coursework with a grade of "B" or better, a UC language or courses equivalent to the following UCR classes:
   - CHN 006
   - FREN 004 or FREN 009A and FREN 009B
   - GER 004 or GER 001R and GER 002R
   - ITAL 004
   - JPN 006
   - SPN 006

   2. Placement Exam
   3. Department Language Translation Exam

4. Native Language other than English

Detailed methods are outlined in the department’s Graduate Student Handbook.

Written Qualifying Examination
The qualifying examination will take the form of written field reviews. Upon completion of all coursework and language requirements, each student will write a substantial literature review of the major field, with the expectation that the review of the major field will demonstrate a broad knowledge of the field in which the dissertation will make a contribution. The field review will then be examined and approved by a panel of faculty readers selected by the student in consultation with their dissertation advisor no later than the end of the winter quarter in the third year.
M.A. in Art History degree for Ph.D. Students (Plan II)
Following the successful completion of the coursework requirements for the Ph.D. and the field reviews, all Ph.D. students who do not hold an accredited M.A. in Art History may apply for an M.A. in Art History.

Oral Qualifying Examination and Advancement to Candidacy
Advancement to candidacy is predicated on successful passage of the required coursework, language exams, and field reviews/oral exams. To advance to candidacy, a student must write a dissertation prospectus and pass a qualifying oral examination. The prospectus consists of a concise explanation of the rationale, scope, and method of the proposed dissertation, and should be prepared in consultation with the dissertation advisor, who must approve it before the oral qualifying exam can be scheduled. The oral examination, which is supervised by a faculty committee as stipulated in the regulations of the Graduate Division, concentrates on the students’ preparation of writing a dissertation as indicated by the dissertation prospectus.

Dissertation and Final Oral Examination
A dissertation to be presented as prescribed by the Graduate Council is prepared under the direction of the candidate’s dissertation committee. The dissertation itself must make a significant and original contribution to the field of art history, as demonstrated in a final oral examination or defense.

Normative Time to Degree including UCR M.A.
The normative time is 18 quarters counting time spent as UCR M.A. student or 15 quarters for those entering with 18 quarters counting time spent as UCR M.A. student. 15 quarters counting time spent as UCR M.A.

Lower-Division Courses
AHS 007 World Art: Images, Issues, and Ideas 4 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours. An introduction to artistic achievements of the world’s cultures and ways in which they can be viewed. Considers such issues as the use of artworks as historical documents; connections between “high art” and popular culture; and the relationship between artist, viewer, artistic tradition, and society.

AHS 008 Modern Western Visual Culture 4 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours. Prerequisite(s): none. Focuses on broadly defined cultural practices in relation to painting, photography, video, architecture, and film. Introduces historical, aesthetic, and theoretical issues in twentieth-century visual culture, emphasizing political and social themes relevant to contemporary life.

AHS 010 Topics in Art and Architectural History 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Explores significant themes and topics from the history of art and architecture around the world. Concentrates on particular subtopics to be announced in the Schedule of Classes. Course is repeatable as topics change to a maximum of 24 units. Credit is awarded for only one of AHS 010 or AHS 0105 as topics change.

AHS 010S Topics in Art and Architectural History 5 Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours. Prerequisite(s): none. Explores significant themes and topics from the history of art and architecture around the world. Concentrates on particular subtopics to be announced in the Schedule of Classes. Course is repeatable as topics change to a maximum of 24 units. Credit is awarded for only one of AHS 010 or AHS 0105 as topics change.

AHS 013 Arts and Architecture of the Islamic World 4 Lecture, 3 hours; discussion, 1 hour; outside research, 2 hours. Prerequisite(s): none. A survey of the major monuments and themes of the visual arts in the Middle East, North Africa, South Asia, and Spain, from the rise of Islam to present day.

AHS 015 Arts of Asia 4 Lecture, 3 hours; discussion, 1 hour; outside research, 2 hours. Prerequisite(s): none. A survey of the major monuments and themes of the visual arts of India, China, and Japan. Topics include recent archaeological discoveries, Buddhist art, Hindu sculpture and architecture, Zen in art, and the development of Asian pictorial art.

AHS 016 Introduction to the Body in Western Art 4 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours. Prerequisite(s): none. Introduces questions of the human body and how it was depicted and interpreted in works of art from Roman Antiquity to the present, familiarizing them with a broad range of artworks in their specific historical, cultural, medical, social, religious, political and intellectual contexts. Credit is awarded for only one of AHS 016 or AHS 133/ANTH 161/ DNCE 129/GSST 130/HISE 149.

AHS 017A History of Western Art: Prehistoric to Byzantine 4 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours. Prerequisite(s): none. A survey of the visual arts of the ancient Near East and Egypt, the Greek world, and the Roman and Byzantine empires. Topics include the growth of urbanism, art as an expression of religious and political beliefs, and cultural contact as a source of artistic change. Credit is awarded for only one of AHS 017A or AHS 17HA.

AHS 017B History of Western Art: Medieval to Renaissance 4 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours. Prerequisite(s): admission to the University Honors Program or consent of instructor. Honors course corresponding to AHS 017C. Surveys of the visual arts of Europe and America from 1600 through the present. Includes the religious and political roles of art, the rise of secular imagery, the increased role of women in the arts, the impact of popular culture and photography, and the other new media in the visual arts. Satisfaction (S) or No Credit (NC) grading is not available. Credit is awarded for only one of AHS 017C or AHS 17HC.

AHS 017C History of Western Art: Baroque to Modern 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to the impact of media technology on the visual arts from photography to the Internet. Addresses mechanical reproduction, perception, gender, sexuality, identity, interactivity, cybernetics, and popular culture. Cross-listed with MCS 023.

AHS 021 Introduction to Architecture and Urbanism 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to the built environment including buildings, gardens, and cities, examined in terms of historical, cultural, social, technological, and political factors. Emphasis is on examples from Southern California. Credit is awarded for one of the following AHS 021 or AHS 021W.

AHS 021W Introduction to Architecture and Urbanism 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENGL 001B with a grade of C or better, ENGL 001, may be taken concurrently for concurrent enrollment in ENGL 007, review the course titles or topics in the current online Schedule of Classes to find the corresponding ENGL 007 writing workshop. An introduction to the built environment, including buildings, gardens, and cities, examined in terms of historical, cultural, social, technolog-
ical, and political factors. This is a writing-intensive course designed to help students improve critical writing skills while writing within the discipline of architectural history. Fulfills the third-quarter writing requirement for students who earn a grade of "C" or better for courses that the Academic Senate designates, and that the student's college permits, as alternatives to English 001C. Credit is awarded for one of the following AHS 021W or AHS 021.

AHS 023 Introduction to American Art 4 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours. Surveys the art and visual culture of North America (primarily in the United States) from the first European contact to the present. Emphasizes visual representation as means for cultural encounter; the construction of race, class and gender; and the relationship between art, nation, and identity.

AHS 025 Art of Mesoamerica 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): None. Surveys the art and architecture of Mesoamerica from the Olmec to the fall of the Aztec capital in 1521. Focuses on empire and trade, religion and astronomy, writing systems and the history the book, and cross-cultural interaction through emphasizing the close analysis of artworks and historical texts.

AHS 027 Art of Pre-Columbian America 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): None. A survey course that provides a background to the ancient art of Mexico, Central America, and the Andean region of western South America. Discusses art of pre-Columbian America according to the three broad cultural regions of Mesoamerica, the lower part of central and southwestern South America, and the Andean area. Cross-listed with ANTH 027 and LNST 027.

AHS 028 Art and Architecture of Latin America 4 Lecture, 3 hours; discussion, 1 hour; individual study, 2 hours. Introduces Latin American art and architecture from the European conquest to the present. Topics include religious and secular art and architecture; hybridization of indigenous and imported styles; national styles after independence; Mexican murals; women artists; Latin American modernismo; and Chicano and Border art. Cross-listed with LNS 028.

AHS 030 Rome: the Ancient City 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): None. Traces the development of the city of ancient Rome. By studying the literary and historical evidence alongside the physical remains of the city—its monuments, art, and historical and archaeological remains—this course seeks to introduce students to the Romans and to their importance for later ages. Cross-listed with CLA 017 and HIST 027.

Upper-Division Courses

AHS 107 Photography Since 1960 4 Lecture, 3 hours; individual study; 3 hours. Prerequisite(s): sophomore, junior or senior standing; or consent of instructor. A critical overview of major historical, social, and political issues in art photography since 1960. Topics include New Documentary, conceptual photography, the Pictures generation, institutional critique, identity politics, the emergence of digital photography, and the cross-categorical expansion of the medium.

AHS 111 The Art and Architecture of Tenochtitlan/Mexico City 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Uses a case study of Mexico City (formerly Tenochtitlan) to introduce Latin America’s urban history. Illustrates through murals, mausoleums, pyramids and park show how the connections between art, architecture, and the natural environment (earthquakes, lakes, smog, volcanoes) underpin life and experience in the megalopolis.

AHS 112 The Art of the Aztec Empire 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): AHS 027/ANTH 027/LNST 027 or upper-division standing or consent of instructor. An introduction to the art of the Aztec Empire. Studies architecture, sculpture, ceramics, painting, lapidary work, gold work, and feather work. Explores the relationship between art and ritual and art and the imperial state. Cross-listed with ANTH 151 and LNST 112.

AHS 113 Sixteenth-Century Mexico: An Art of Two Worlds 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Explores the art of the first colonial century in Mexico. Investigates the translation of European art forms to the New World, the fate of indigenous traditions, and artistic change in the context of colonialism and evangelization.

AHS 114 History of Brazilian Art and Architecture 4 Lecture, 3 hours; research, 1 hour; term paper, 1 hour; written work, 1 hour. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. The history of Brazilian art and architecture from the nineteenth century to present. Explores visual culture including painting, sculpture, prints, murals, architecture, urbanism, landscape design, and installation art. Studies artworks and buildings through a social historical framework, taking into consideration topics like colonialism, modernization, underdevelopment, race, nationalism, internationalism, and globalization. Cross-listed with LNST 114.

AHS 115 Modern and Contemporary Art of Latin America 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. A study of Latin American art from circa 1900 to the present. Considers national and regional histories and artistic trajectories beginning with the advent of an artistic avant-garde. Investigates the relationships between European and Latin American developments. Cross-listed with LNST 115.

AHS 116 Architecture and Arts of the Andes 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. An introduction to architecture, urbanism, and related material culture of the Andes from ancient times to the present. Focuses on the diverse and rich architectural heritage of an important building center in the Americas. Addresses architecture’s relationship to artistic and material production such as painting, pottery, sculpture, city planning, and textiles. Cross-listed with LNST 116.

AHS 117 Visual Culture of the Incas 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the art, architecture, and urban form of the Inca civilization. Examines how these elements influenced state formation, conquest, and resistance. Includes studies of urban plans, buildings, paintings, textiles, prints, sculpture, metalwork, and ceramics. Cross-listed with ANTH 157 and LNST 117.

AHS 120 Berlin Metropolis in Literature, Film, Music, and Art 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): Restricted to class level standing of sophomore, junior, or senior; or consent of instructor. An introduction to the metropolis Berlin as a gateway between the East and West. Explores topography of the city through film, art, music, and literary texts. Considers Berlin's dramatic transformations as a microcosm of Germany and Europe's troubled history in the twentieth century. Course conducted in English. Cross-listed with CPLT 111, EUR 120, GER 111, and MCS 178.

AHS 124 Conceptual Art in Latin America 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Considers conceptual art made across Latin America, from 1960s to present. Focuses on subversive strategies artists developed to critique military dictatorships then in power, while circumventing legalized censorship. Considers localized versions of conceptual art in Santiago, Buenos Aires, Rio de Janeiro, Havana, Mexico City, and situate them within international movement. Cross-listed with LNST 124.

AHS 125 Illustrations and Illuminations: the Arts of the Book in the Islamic World 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Introduction to manuscript production in the Islamic world from simple Qur’ans to opulent manuscripts illustrating Persian literature. Explores the centrality of manuscripts in Islamic artistic culture. Topics include calligraphy, painting styles, patronage, workshop organization, the production of knowledge, conceptions of the artist, and the relationship between word and image.

AHS 126 Sultans and Saints: the Visual and Material Culture of Islam in South Asia 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Introduction to the art and architecture of Muslim dynasties in South Asia from the eighth to the eighteenth century. Explores the centrality of manuscripts in Islamic artistic culture. Studies the movement and settlement of religious, political, and intellectual elites throughout the Subcontinent and the buildings and objects they commissioned.

AHS 133 The Body in Western Art: Antiquity to Present 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): Restricted to class level standing of sophomore, junior, or senior; Restricted to major(s) Anthropology, Art History,
AHS 141 The Mongol Empire: the World of Genghis Khan and His Descendants 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): restricted to class level standing of sophomore, junior, or senior; or consent of instructor. An exploration of artistic and architectural developments in the Mongol Empire (1206-1368), the largest contiguous land empire in world history.

AHS 143 Text and Image in Chinese Painting 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Examines the art of writing and painting in China, focusing on the close relationship between written language and pictorial image. Reading knowledge of the Chinese language is not necessary. Cross-listed with AST 143.

AHS 144 Arts of Japan 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Major developments in the arts of Japan from the prehistoric to the contemporary. Explores the wide spectrum of contemporary arts from China, Korea, and Japan in terms of modernism, orientalism/occidentalism, identity politics, and globalization. Cross-listed with AST 144.

AHS 145 Contemporary Asian Art 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): Restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Explores the wide spectrum of contemporary arts from China, Korea, and Japan in terms of modernism, orientalism/occidentalism, identity politics, and globalization. Cross-listed with AST 145.

AHS 146 The Japanese House 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. History of the traditional Japanese house from prehistoric times to the nineteenth century. Includes the place of the Japanese house within the general history of Japanese architecture and within its social and cultural context. Cross-listed with AST 146.

AHS 147 The Art of Greece 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Explores the architecture, sculpture, painting, and minor arts of ancient Greece from the earliest Archaic Period through the Hellenistic Age.

AHS 155 Cultures in Conflict: Art at the Fall of the Roman Empire 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Surveys the painting, sculpture, and minor arts of the Roman Empire. Stresses the role of art in the co-optation of the Church by the Empire and then in the aftermath of its fall.

AHS 156 Memory of Empire: the Art of Early Medieval Europe 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Covers manuscript illumination, barbarian jewelry, architecture, and sculpture from the fall of the Roman Empire and through the Carolingian Empire up to the tenth century. Stresses the interplay between indigenous Germanic and foreign classical traditions.

AHS 157 The Medieval Pilgrimage and the Art of Romanesque France 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Covers architecture, sculpture, and illuminated manuscripts of the eleventh and twelfth centuries. Stresses the role of the pilgrimage and of politics during the period of the revival of monumental architecture and of public sculpture of the Middle Ages.

AHS 158 Self-Portraits: Renaissance to Contemporary Art 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Introduces major works of art and important interpretations/methods of art history.

AHS 159 The Gothic Cathedral in its Urban Context 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): Restricted to class level standing of sophomore, junior, or senior; or consent of instructor. An introduction to architecture in the period 1400-1600. Explores the major ideas and trends in architecture that took form in this period, including the architects and the ideas that motivated them in their historical context.

AHS 161 Italian Renaissance: Fifteenth- and Sixteenth-Century Florence 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Surveys the painting, sculpture, and minor arts of the period 1400-1600. Explores the major ideas and trends in architecture that took form in this period, including the architects and the ideas that motivated them in their historical context.

AHS 162 Italian Renaissance: Fifteenth- and Sixteenth-Century Rome 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Surveys the painting, sculpture, and minor arts of the period 1400-1600. Explores the major ideas and trends in architecture that took form in this period, including the architects and the ideas that motivated them in their historical context.
AHS 163 Renaissance in Venice: West Meets East 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. An introduction to the art and culture of Venice circa 1420-1600. Addresses central issues of artistic, cultural, and intellectual exchange among Venice, the Eastern Mediterranean, and the North. Discusses major artworks in the fields of painting, sculpture, and architecture.

AHS 165 Women Artists in Renaissance Europe, 1400-1600 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): restricted to class level standing of sophomore, junior, or senior. Surveys the lives and work of women artists in Renaissance Europe. Considers circumstances under which it was possible for women to become artists; how they evolved from practicing in the cloistered convent to participating in the competitive public market place; what they painted; and who their patrons were. Cross-listed with HISE 133, and GSST 170.

AHS 167 Europe in the Early Modern World: Global Artistic Contact and Exchange, 1492-1750 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): Restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Explores trade, religious conversion, intersecting traditions, and the creation of new traditions. Examines the mechanisms and cultural consequences of change through time.

AHS 168 Politeness and Commerce: British Art and Design, 1660-1820 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. An introduction to the production and use of images and material culture in Britain between 1660 and 1820. Examines the role of art and design within British culture and public life.

AHS 169 Sculpture and its Roles in Eighteenth-Century France and Britain 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Examines the production and uses of sculpture within eighteenth-century British and French culture.

AHS 170 Baroque Architecture 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Examines the development of architecture in Europe and the Americas from 1580 to 1750. Explores the concept of buildings and the city as a form of communication; the spread and reformulation of architectural ideas in new contexts; and the rise of the architectural profession.

AHS 171 The Church, the Court, and the People: Art in Seventeenth-Century Europe 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. A study of the dominant trends and figures of Italian, French, Spanish, Flemish, and Dutch Baroque art. Includes the works of Caravaggio, Bernini, Velazquez, and Rembrandt. Emphasizes the development of illusionistic ceiling decoration, the theoretical basis of Baroque art, and the sacred and political uses of art.

AHS 172 Baroque Rome 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. An in-depth examination of Roman art in the seventeenth century. Studies painting, sculpture, architecture, and urban planning in their political and religious contexts. Emphasizes the ecclesiastical and private patrons who transformed Rome into one of the world's most important cities.

AHS 173 Rococo to Revolution: Art in Eighteenth-Century Europe 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Examines major developments in eighteenth-century painting, sculpture, and interior decoration from the emergence of the Rococo to the dawn of Neoclassicism. Explores the response of art to new forms of patronage, the erotics of eighteenth-century art, and how art functioned as social and political commentary.

AHS 174 Revolution, Reaction, and Revision: American Art Between the World Wars 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): Restricted to class level standing of sophomore, junior, or senior; or consent of instructor. An in-depth study of American art and visual culture during the early twentieth century, focusing on the period between the two world wars. Traces artistic developments in painting, photography, cinema, and material culture. Explores the issues of race, class, gender, and regional identity as addressed in these media.

AHS 175 Industry and Alienation: Late Nineteenth-Century American Art 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): Restricted to class level standing of sophomore, junior, or senior; or consent of instructor. A study of American art from 1848 to 1900. Focuses on social, political, and artistic issues related to industrialization. Explores themes in visual culture; the construction of an American identity; the role of fine arts in American society; and the tensions of class, gender, race, and ethnicity in American art.

AHS 176 Twentieth-Century Photography 1900-1960 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. A critical overview of photographic practices in Europe and the United States in the first half of the twentieth century. Topics include pictorialism, the interwar avant-gardes, the rise of documentary, photojournalism, and street photography. Examines technological, conceptual, aesthetic, economic, and social issues.

AHS 177 American Art: Colonial Period to 1900 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. An in-depth study of the history of the modern movement from impressionism to the end of World War II. Focuses on the arts in their interrelationships to the political events and social conditions of the period. Emphasizes the persecution of modernism in Europe under fascism and communism.

AHS 178 Visual Art and Visual Theory After 1945 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Traces the history of the modern movement from impressionism to the end of World War II. Focuses on the arts in their interrelationships to the political events and social conditions of the period. Emphasizes the persecution of modernism in Europe under fascism and communism.

AHS 179 Photography On Display 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): Restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Covers various topics related to current exhibitions at the California Museum of Photography. Provides the necessary historical and theoretical background of the specific photographs on display. Addresses the wider museum context of the difference between working photographs, art photographs, and the politics of that designation. Course is repeatable as content or topic changes to a maximum of 12 units.

AHS 180 Modern European Art I: Nineteenth-Century 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Examines European art since 1845 primarily from Europe and the United States. Traces developments in all media within a historical and theoretical context. Focuses on the rise of postmodernism, analyzing work in relation to theories of representation and cultural identity.

AHS 181 Modern European Art II: Art in Europe, 1870-1945 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Examines European art since 1845 primarily from Europe and the United States. Traces developments in all media within a historical and theoretical context. Focuses on the rise of postmodernism, analyzing work in relation to theories of representation and cultural identity.

AHS 183 Modern Architecture 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): Restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Covers various topics related to current exhibitions at the California Museum of Photography. Provides the necessary historical and theoretical background of the specific photographs on display. Addressed are museum contexts of the difference between working photographs, art photographs, and the politics of that designation. Course is repeatable as content or topic changes to a maximum of 12 units.
AHS 185 Architectural Theory From Vitruvius to Venturi 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. History of architectural thought from Vitruvius to the present, emphasizing the modern period. Surveys the major themes of architectural theory and investigates the relationships between ideas about architecture and architectural production. Cross-listed with URST 185.

AHS 186 Media and Movements: Film, Video, Photography, and the Visual Arts 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on key cultural movements or developments is global arts over the past century. Provides a thematic history of the avant-garde and experimental arts including painting, sculpture, photography, video, film, performance, installation, and new media art. Cross-listed with MCS 186. Fulfills the Humanities requirement for the College of Humanities, Arts, and Social Sciences.

AHS 188 Nineteenth-Century Photography 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Examines the development of photography in the nineteenth century. Addresses the technologies, artistic practices, and social uses of this medium. Focuses on European and American materials, as well as traces the histories of portrait, landscape, scientific, and documentary photography.

AHS 189 (E-Z) Topics in Contemporary Art 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): restricted to class level standing of sophomore, junior, or senior. Addresses selected issues, movements, and artists of importance to international art history since the 1960s. E. Art Since Conceptual Art. Course is repeatable as content or topic changes to a maximum of 12 units.

AHS 190 Special Studies 1 to 5 variable hours. Prerequisite(s): To be taken with the consent of the chair of the department as a means of meeting special curricular problems. Course is repeatable to a maximum of 12 units.

AHS 191 California Modern Art 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): an Art History course or upper-division standing or consent of instructor. Explores California visual expression from 1900 to 1980. Provides critical attention to the development of a purportedly unique California art and culture. Focuses on Southern Californian topics in order to take advantage of local and regional museums, collections, lectures, and events.

AHS 192 Junior and Senior Seminar in Art History 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing in Art History or Art History Administrative Studies. Critical study of selected topics in the history of art and its methods. Topics vary. Course is repeatable to a maximum of 12 units.

AHS 195H Senior Honors Thesis 1 to 4 Thesis, 3 hours to 12 hours. Prerequisite(s): admission to University Honors or consent of the Art History Department. Independent research and preparation of a senior honors thesis completed under the supervision of a faculty member. Satisfactory (S) or No Credit (NC) grading is not available. Course is repeatable to a maximum of 8 units.

AHS 198l Individual Internship 1 to 12 Research, variable hours. Prerequisite(s): consent of instructor and upper-division standing. Individual study or apprenticeship in a museum, art library, or slide and photo archive in order to gain practical experience and skills for future professional work. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

Graduate Courses

AHS 251A Proseminar in Historiography 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to the history of the discipline of art history. Covers historiographic traditions from antiquity to the present. Includes instruction in preparing a conference paper as an element of professional training.

AHS 251B Proseminar in Methodology 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to current methodologies of art history. Covers the models and approaches in art history and cognate disciplines. Includes instruction in writing the methodological component of a grant application as an element of professional training.

AHS 252 History and Ideology of the Museum 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores the history of collecting and the evolution of the museum as a cultural institution in the western world. Includes an investigation of sources, documents, and historiography complemented by a study of museums and collections in the Los Angeles area.

AHS 260 Seminar in Latin American Art 4 Seminar, 3 hours; research, 2 hours; term paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Selected topics in the history and theory of Latin American art from the European conquest to the present. Course is repeatable.

AHS 262 Seminar in Islamic Art and Culture 4 Seminar, 3 hours; research, 3 hours; term paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Selected topics in the history and theory of Islamic art from the seventh century to the present. Course is repeatable as topics change to a maximum of 24 units.

AHS 267 Seminar in Asian Art 4 Seminar, 3 hours; research, 3 hours; research paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Covers special topics in Asian art. Course is repeatable.

AHS 272 Seminar in Medieval Art 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Selected issues of the function of art within medieval social, political, theological, and intellectual culture. Course is repeatable.

AHS 273 Seminar in Renaissance Art 4 Seminar, 3 hours; research, 2 hours; term paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Special topics in Italian and/or Northern Renaissance art. Course is repeatable.

AHS 274 Seminar in Seventeenth- and Eighteenth-Century Art 4 Seminar, 3 hours; research, 2 hours; term paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Special topics in seventeenth- and eighteenth-century art. Course is repeatable.

AHS 276 Seminar in Nineteenth-Century Art 4 Seminar, 3 hours; research, 2 hours; term paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Selected topics in the history and theory of nineteenth-century European and/or American art. Course is repeatable.

AHS 277 Seminar in Twentieth-Century Art 4 Seminar, 3 hours; research, 2 hours; term paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Selected topics in the history and theory of twentieth-century European and/or American art. Course is repeatable.

AHS 278 Seminar in Modern Architecture 4 Seminar, 3 hours; research, 3 hours; research paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Selected topics in the history and theory of nineteenth- and twentieth-century architecture and urbanism. Course is repeatable.

AHS 279 Seminar in American Art 4 Seminar, 3 hours; research, 3 hours; research paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Selected topics in the history and theory of American art, photography, and visual/material culture from the colonial period to the present. Course is repeatable.

AHS 280 Seminar in Research, Critical Analysis, and Thesis Writing 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Covers advanced research that helps in conceptualizing a thesis topic, organizing and structuring material, and in writing one chapter of the thesis. Examines research in different fields of the history of art. Explores scholarly issues from a diversity of specializations. Course is repeatable.

AHS 282 Seminar in New Media 4 Seminar, 3 hours; research, 3 hours; term paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Selected topics in the history and theory of photography, film, video, and digital media. Course is repeatable.
AHS 283 Seminar in History of Photography 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Selected topics in the history of photography, with an emphasis on new theories and histories of photographic practice. Students encouraged to do research projects drawing on the collections of the UCR/California Museum of Photography. Course is repeatable.

AHS 284 Seminar in Contemporary Art and Theory 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Studies of selected topics in contemporary art, photography, and related media, with an emphasis on critical theories of representation and issues of practice. Course is repeatable.

AHS 285 Getty Consortium Seminar 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An intramural seminar at the Getty Research Institute. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable.

AHS 286 Curatorial Seminar 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Initiates the process of bringing the work of the seminar into the public sphere. Students critique contemporary exhibition practice and develop an exhibition concept that successfully communicates the research and debates of the specific topic of study. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 12 units.

AHS 287 Curating as Critical Practice 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): AHS 286. Brings the work of the Curatorial Seminar into the public sphere through a critical examination of the curatorial process and the mounting of a museum exhibition, catalog production, and linked programming. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 12 units.

AHS 290 Directed Studies 1 to 6 Research, variable hours. Prerequisite(s): consent of instructor. Independent work under a staff member’s supervision in a particular field. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

AHS 292 Concurrent Analytical Studies 1 to 4 Research, 3 hours to 12 hours. Prerequisite(s): graduate standing and consent of instructor. To be taken concurrently with a 100-series course, but on an individual basis. It will be devoted to research, criticism, and written work of graduate order commensurate with the number of units elected. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

AHS 297 Directed Research 1 to 6 Research, variable hours. Prerequisite(s): consent of instructor, completion of language requirement, and one seminar. Research study or exploratory work toward the development of the thesis. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

AHS 298I Individual Internship 1 to 4 Research, variable hours. Prerequisite(s): graduate standing. Individual study or apprenticeship in a museum, art library, or slide and photo archive in order to gain practical experience and skills for future professional work. Graded Satisfactory (S) or No Credit (NC). Repeatable to a total of 12 units. Not more than 8 units count toward the 40 units required for the M.A.

AHS 299 Research For Thesis Or Dissertation 1 to 12 Thesis, 3 to 36 hours, variable hours. Prerequisite(s): consent of instructor, completion of language requirement, and one seminar. Thesis or Dissertation research and writing. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

AHS 301 Directed Studies in the Teaching of the History of Art 3 Seminar, 2 hours; consultation, 1 hour. Prerequisite(s): graduate standing A program of weekly meetings and individual formative evaluation required of new Art History Teaching Assistants. Covers instructional methods and classroom/section activities. Conducted by the Teaching Assistant Development Program and department faculty. Credit is not applicable toward degree unit requirements. Graded Satisfactory (S) or No Credit (NC).

AHS 302 Teaching Practicum 1 to 4 Lecture, 1 to 4 hours; clinic, 1 hour. Prerequisite(s): limited to departmental teaching assistants; graduate standing. Supervised teaching in upper- and lower-division Art History courses. Required of all Art History teaching assistants. Credit not applicable toward degree unit requirements. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

Yenna Wu (Comp Lit & Lang)

Major

The Asian Studies major affords students the opportunity to study Asia from an interdisciplinary perspective, drawing on courses and faculty from various departments of the College of Humanities, Arts, and Social Sciences. Students are strongly encouraged to consider participating in Education Abroad offered in various Asian locales, including China, Taiwan, Hong Kong, Japan, Vietnam, Singapore, the Philippines, India, and Korea. Students may also participate in the undergraduate inter-campus exchange program, which offers any UC student to apply for study for one term at other UC campuses. Both options provide rich opportunities to participate in additional course work on Asia that may be counted toward the major.

University Requirements

See Undergraduate Studies section.

College Requirements

See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

Major Requirements

The requirements for the B.A. degree in Asian Studies are as follows:

Students can focus on any aspect of Asia and/or Asian America, and are strongly encouraged to select a disciplinary focus in Anthropology, Art History, History, Comparative Literature and Foreign Languages, Ethnic Studies, Music and Culture, Media and Cultural Studies, or Religious Studies. Students may choose to focus on the historical interactions and connections among East, Northeast, South, Southeast, West, and Central Asia peoples, including those constituting transnational and/or diaspora communities throughout the world. Students interested in Asian diaspora communities are also encouraged to consider a secondary disciplinary focus in Ethnic Studies, leading to a minor in Asian American Studies.

All students are required to enroll in at least 4 units of AST 195 and write a senior thesis during the first or second quarter of their senior year. (This is a substantial paper based on original research under the supervision of one faculty member of the Asian Studies program.)

1. Lower-division requirements (12 units plus language requirement)

a) Two years of basic language instruction in any Asian language (This requirement may be fulfilled by language courses currently offered at UCR or through approved summer language programs. In some cases, the second year requirement may be waived with the approval of the Asian Studies Committee in Charge)

b) At least 12 units from the following:

AHS 015, AST 022/ MCS 022/JPN 022, AST 023/CPLT 023/JPN 023, AST 030/CHN 030, AST 034/JPN 034, AST 040/CHN 040, AST 045 (E-Z)/HIST 045 (E-Z), AST 046/CHN 046, AST 046W/CHN 046W, AST 047 KOR 047/MCS 047, AST 056/CPLT 056/JPN 056, AST 062/ CPLT 062/ SEAS 062, AST 063/CPLT 063/SEAS 063,
Lower-Division Courses

AST 022 Introduction to Japanese Film 4 Lecture, 3 hours; discussion, 1 hour; screening, 2 hours. An introduction to major genres, styles, and creators in the Japanese film world. Focuses on formal analysis and critical writing about film. Works studied range from the samurai epics of Kurosawa to recent anime. All films have subtitles. No previous knowledge of Japanese language or culture required. Cross-listed with JPN 022, and MCS 022.

AST 023 Modern Japan and Personal Narrative 4 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; written work, 1.5 hours. Introduces major debates in history, politics, and culture through the genres of biography, autobiography, diary, and confession. Explores the parallel construction of the modern nation, the modern language, and the modern self. Traces the development of Japan's “novel.” Builds skills in close reading by studying the rhetoric of self-narrative. Cross-listed with CPLT 023, and JPN 023.

AST 030 Introduction to Chinese Civilization 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. An introduction to Chinese civilization through an interplay of philosophical, historical, religious, and literary readings from the ancient times through the modern age. Uses audiovisual collections to 18th century puppet plays. Focuses on the relationship among aesthetics, politics, language, and gender. Assignments include manga translations, creative writing, and intensive Web research. Cross-listed with JPN 034.

AST 040 Masterworks of Chinese Literature 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): none. Reading and discussion of selected great works of Chinese literature in (English translation) with attention to cultural contexts. Various critical methods and approaches are used. Cross-listed with CHN 040, and CPLT 041.

AST 045 (E-Z) Topics in Asian History 4 Lecture, 3 hours; consultation, 1 hour. An introduction to regional histories and cultures of Asia. E. Premodern China And Japan; F. Contemporary China; G. India In The Western Imagination. Cross-listed with HIST 045 (E-Z).

AST 046 Responses to Political Repression in Modern Chinese Literature and Film 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. An examination of the various responses to political repression in China during the second half of the twentieth century through selected literary and artistic representations. Cross-listed with CHN 046, and CPLT 042. Credit is awarded for one of the following CHN 046, AST 046, CPLT 042, AST 046W, CHN 046W, or CPLT 042W.

AST 046W Responses to Political Repression in Modern Chinese Literature and Film 4 Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ENGL 001B with a grade of C or better. An examination of the various responses to political repression in China during the second half of the twentieth century through selected literary and artistic representations. Fulfills the third-quarter writing requirement for students who earn a grade of "C" or better for courses that the Academic Senate designates, and that the student’s college permits, as alternatives to English 001C. Cross-listed with CHN 046W, and CPLT 042W. Credit is awarded for one of the following CHN 046, AST 046W, CPLT 042W, AST 046, CHN 046W, or CPLT 042.

AST 047 Introduction to Korean Film 4 Lecture, 3 hours; screening, 2 hours; discussion, 1 hour. An introduction to the major directors and films of Korea. Covers the genres and periods of works produced from the 1960s to the present. All films have English subtitles. No previous knowledge of Korean language or culture required. Cross-listed with KOR 047, and MCS 047.

AST 048 Chinese Cinema 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. A study of selected films from China and Taiwan focusing on cultural context. Includes what to look for in these films; the interrelations with theater, photography, and literature; and how these films are understood as an art form. Cross-listed with CHN 048, CPLT 048, and MCS 048.
AST 056 Cultures of the Japanese Empire 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Covers the social histories and literatures of the Japanese Empire from the foundation of the Meiji state to the present. Includes the Ainu, Okinawan, Taiwanese, and Korean cultures. Explores the concepts of assimilation, citizenship, national language, nation-state, sovereignty, total war, and translation. Utilizes readings in English. Cross-listed with JPN 056, and CPLT 056.

AST 062 Introduction to Southeast Asian Literature 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. An introduction to modern and contemporary Southeast Asian literature and culture with a focus on individual national histories. Explores the relationship between aesthetics, politics, and academic scholarship. Readings are in translation; classes conducted in English. Cross-listed with CPLT 062, and SEAS 062.

AST 063 Reading Southeast Asian Stories 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. An introduction to the modern short story in Southeast Asia with a focus on literariness and the act of reading. Readings are in translation; classes conducted in English. Course is repeatable as content changes to a maximum of 8 units. Cross-listed with CPLT 063, and SEAS 063.

AST 064 Introduction to Vietnamese and Diasporic Film Culture 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. Engages in critical viewing strategies and analytical visual critique. Explores the revival of film production in Vietnam following the Vietnam War, with a focus on the means of production, state control, and international distribution. Readings are in translation; classes conducted in English. Cross-listed with VNM 064, MCS 049, and SEAS 064.

AST 067 Language and Text in Contemporary South Asian Religions 4 Seminar, 3 hours; written work, 6 hours. Prerequisite(s): none. Prepares to undertake independent research of literary sources in contemporary South Asian religious traditions, as well as more general and traditional Hindu and Urdu linguistic traditions. Focuses on the modern linguistic landscape of Hindustani (hybrid Hindi/Urdu) within the context of religious and culturally revered literary texts. Cross-listed with RLST 067.

AST 068 Language and Text Inner Asian Religions 4 Seminar, 3 hours; written work, 6 hours. Prerequisite(s): none. Focuses on classical linguistic landscape of Tibetan and, in some years, classical Mongolian within the context of religious and culturally revered texts and literary practices. Introduces students to advanced study of major classical language and literature. Cross-listed with RLST 068.

AST 090 Special Studies 1 to 5 Individual Study, 3 to 15 hours. To be taken with the consent of the Chair of the Program as a means of meeting special curricular problems. Course is repeatable.

### Upper-Division Courses

**AST 112 Modern Korean Literature 4** Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of modern Korean literature from the colonial era to the present. Topics include colonialism; cultural influence and exchange; gender, family and sexuality; nation and nationalism; Confucian tradition and patriarchal culture; and modernization and capitalism. Cross-listed with KOR 112.

**AST 119 Japanese Music and Culture 4** Lecture, 3 hours; term paper, 1 hour; online discussion and listening, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines Javanese traditional and contemporary music. Focuses on the music of the Javanese gamelan and its relation to larger cosmological themes. Other topics include rural versus court traditions, popular music, mass media, piracy, Hindu roots, modernity, and local practices versus global trends. Cross-listed with MUS 119.

**AST 120 Tibetan Buddhism: Dalai Lamas, Tantric Madness, and Mass Monasticism 4** Lecture, 3 hours; term paper, 1 hour; written work, 1 hour; research, 1 hour. Prerequisite(s): Restricted to class level standing of junior, or senior; or consent of instructor. Introduces the globally influential Tibetan Buddhist tradition of the Dalai Lamas, Covers the development of its unique history, doctrine, literary heritage, and gendered ritual cosmologies. Cross-listed with RLST 120.

**AST 123 Southeast Asian Performance 4** Lecture, 3 hours; screening, 2 hours; extra reading, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Introduction to the roles and genres of expressive culture in Southeast Asia, including dance, music, theater, film, and digital culture. Performance is discussed as both a time-honored and a contemporary medium for cultural production, from the courts to everyday experience. Cross-listed with MUS 123, ANTH 126, and DNCE 123. SEAS 123.

**AST 124 Music of Asian America 4** Lecture, 3 hours; music listening, 1 hour; individual study, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores music as a window on the cultural politics of Asian America. Examines expressive culture as a constitutive site for ethnic identities and emergent political formations. Covers music of Asian immigrants and of subsequent generations, including Asian American jazz and hip-hop. Cross-listed with MUS 124.

**AST 126 Southeast Asia, Prehistory to 1800 4** Lecture, 3 hours; extra reading. Prerequisite(s): upper-division standing or consent of instructor. Covers the major Southeast Asian historical periods and cultures. Includes prehistory, classical kingdoms, and early modern trading states. Considers the role of ancient stories, religious systems, technologies, and art forms in forming traditional Southeast Asian identities, as well as the influences on these identities from outside the region. Cross-listed with HIST 185, and SEAS 185.

**AST 127 Music Cultures of Southeast Asia 4** Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of music, dance, theatre, and ritual in the Philippines, Indonesia, Malaysia, Thailand, Myanmar (Burma), Laos, Cambodia, and Vietnam. Designed for the student interested in the performing arts and cultures of mainland and insular Southeast Asia. No Western music background is required. Cross-listed with ANTH 176, DNCE 127, ETST 172, MUS 127, and SEAS 127.

**AST 128 Performing Arts of Asia 4** Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of music, dance, theatre, and ritual in four major geocultural regions of Asia: Central, East, South and Southeast. No Western music training is required. Course is repeatable to a maximum of 8 units. Cross-listed with ANTH 128, DNCE 128, and TFDP 176.

**AST 129 Modern Southeast Asia, 1800 to Present 4** Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the formation of modern Southeast Asian nations and cultures since 1800. Compares colonial and postcolonial experiences in the region. Studies the formation of nationalist movements and the relationship of nationalist history with traditional and local histories. Considers the role of the individual, modern media, and global trade in the near-present. Cross-listed with HIST 186, and SEAS 186.

**AST 130 History of Philosophy in India 4** Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. An examination of the main philosophical themes, figures, and texts in premodern India. Pays particular attention to Hindu, Buddhist, and Jain philosophy. Cross-listed with PHIL 129, and RLST 129.

**AST 132 Medical Traditions in China and Greece 4** Lecture, 3 hours; research, 3 hours. Prerequisite(s): AST 030 or CHN 030 or CHN 104 or CHN 107 or AST 142 or CHN 142 or RLST 142 or AST 148 or CHN 148 or CLA 010A or CLA 010B or CLA 010C or CLA 040 or CLA 050 or CLA 100 or HIE 110 or CLA 102 or CPAC 102 or CLA 112 or CPLT 112 or RLST 117 or CLA 124 or CPTL 114 or CPAC 112 or CLA 113 or HIE 113 or CLA 120 or CLA 120C or CLA 120D or CLA 120E or CLA 121 or CPAC 121 or POSC 121 or CPAC 133 or HIE 114 or CPAC 134 or HIST 110 or CPAC 141 or AST 145 or CHN 141 or CLA 141 or POSC 140 or CPAC 143 or CHN 143 or RLST 143 or CLT 030; restricted to class level standing of junior, or senior; or consent of instructor. A comparative examination
of the early development of Western medical traditions in classical Greece and the origins and development of the Chinese medical systems (now referred to as traditional Chinese medicine). Focuses on their cultural and social contexts. Cross-listed with CHN 132, CLA 132, and CPAC 132.

AST 133 Buddhist Literature 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Readings in canonical and non-canonical Buddhist texts. Includes Buddhist-influenced literature written by Asian, European, and American authors. Examines themes of emptiness, impermanence, and no-self. Cross-listed with CPTL 144, and RLST 144.

AST 134 Modern Chinese Literature in Translation 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. An introduction to major works of Chinese fiction, drama, and poetry from the first half of the twentieth century. Considers literary quality and technique, as well as the social and political ideas of Chinese writers during a turbulent time in China's history. Cross-listed with CHN 134. Credit is awarded for one of the following CHN 134, AST 134, or CHN 110M.

AST 135 Great Novels of China 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the social, philosophical, and aesthetic features in major Ming-Qing novels through critical reading and analysis of literature in translation. No knowledge of Chinese required. Cross-listed with CHN 135.

AST 136 Family and Gender in the Chinese Short Story 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines a broad array of short stories from the Tang to the Qing dynasties (approximately ninth to eighteenth century). Investigates love, marriage, family, gender dynamics, and the representation of women in Chinese literature. No knowledge of Chinese required. Cross-listed with CHN 136.

AST 137 Contemporary Chinese Literature in Translation 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior, or consent of instructor. An introduction to important works of fiction, drama, poetry, and reportage from the mid-twentieth century to the present. Includes readings from mainland China, as well as writings from Taiwan and other overseas communities. Cross-listed with CHN 137. Credit is awarded for one of the following CHN 137, AST 137, or CHN 110E.

AST 138 Arts of China 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): Restricted to class level standing of sophomore, junior, or senior; or consent of instructor. A survey of Chinese art and culture from the prehistoric to the contemporary. Cross-listed with AHS 138.

AST 139 The Arts of Buddhism 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): Restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Explores the history, concepts, and arts of Buddhism. Emphasizes the transmission and cultural translation of pictorial arts within Asia and to Western worlds. Cross-listed with AHS 139.

AST 142 Zhuangzi 4 Lecture, 3 hours; research, 1 hour; extra reading, 1 hour; term paper, 1 hour. Prerequisite(s): CHN 107 or CHN 112 or PHIL 110. An examination of chaos, epistemological and linguistic relativism, fate, skill, and the character of the sage in the Chinese Daoist text Zhuangzi. Discusses the structure and style of this literary masterpiece. Students with knowledge of classical Chinese may arrange additional work through special studies. Cross-listed with CHN 142, and RLST 142.

AST 143 Text and Image in Chinese Painting 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Examines the art of writing and painting in China, focusing on the close relationship between written language and pictorial image. Reading knowledge of the Chinese language is not necessary. Cross-listed with AHS 143.

AST 144 Arts of Japan 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Major developments in the arts of Japan from the prehistoric to the contemporary period. Emphasizes the social and cultural contexts of religious art, architecture, and master artists through history, with a brief introduction to contemporary art and pop culture. Cross-listed with AHS 144.

AST 145 Militarism and Hegemony in the Ancient World 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CHN 030 or AST 030 or CHN 104 or CHN 107 or AST 142 or CHN 142 or RLST 142 or AST 146 or CHN 148 or CLA 010A or CLA 010B or CLA 010C or CLA 040 or CLA 050 or CLA 100 or HISE 110 or CLA 112 or CPTL 112 or RLST 117 or CLA 114 or CPTL 114 or CLA 120E or CPAC 102 or CLA 102 or CPAC 112 or CLA 113 or HISE 113 or CPAC 121 or CLA 121 or POSC 121 or CPAC 132 or AST 132 or CHN 132 or CLA 132 or CPAC 133 or HISE 114 or CPAC 134 or HIST 110 or CLA 143 or CPAC 143 or CHN 143 or RLST 143 or CLA 120F or CLA 120G or CLA 120J or CPTL 030; restricted to class level standing of junior, or senior; or consent of instructor. Comparative study of ancient warfare and hegemony in two or more civilizations of the ancient world. Perspectives may include social and political contexts, gender and war, acquisition of empire, religious wars, and weapons, strategies and tactics in theory and practice. Study of primary source material in texts and visual arts. Cross-listed with CHN 141, CLA 141, CPAC 141, and POSC 140.

AST 146 Contemporary Asian Art 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): Restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Explores the wide spectrum of contemporary arts from China, Korea, and Japan in terms of modernism, Orientalism/Occidentalism, identity politics, and globalization. Cross-listed with AHS 145.

AST 147 The Japanese House 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. History of the traditional Japanese house from prehistoric times to the nineteenth century. Examples used to place the Japanese house within the general history of Japanese architecture and within its social and cultural context. Cross-listed with AHS 146.

AST 148 Chinese Poetry and Poetics in Translation 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior or senior; or consent of instructor. Examination of traditional Chinese poetry through the study of selected major texts. Emphasizes forms, themes, and Chinese poetics in its close relation to the development of Chinese literature. Classes conducted in English. Cross-listed with CHN 148.

AST 150 In Women's Hands: Reading Japanese Women Writers 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines major works of Japanese women writers from Heian (ninth century) to contemporary, focusing on themes, genres, representations of gender, ideas of love and romance, and feminine aesthetics. Readings include fiction, poetry, essays, and drama, with the main emphasis on fictional writing. Classes are conducted in English. Cross-listed with JPN 150.

AST 152 (E-Z) Themes in Modern Japanese Literature 4 Lecture, 2 hours; discussion, 1 hour; term paper, 3 hours. An introduction to modern Japanese literature in translation, as seen through the lens of a particular theme or issue. All materials read or viewed in English. E. The End Of The World In Japanese Literature; G. Love And Death; J. Classics And Canon; K. Dreams And Other Virtual Worlds. Cross-listed with JPN 152 (E-Z).

AST 153 (E-Z) Themes in Early Japanese Literature 4 Lecture, 2 hours; discussion, 1 hour; term paper, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. An introduction to early Japanese literature, as seen through the lens of a particular theme or issue. All works are read in English translation. E. Supernatural Japan; F. Warrior Japan; G. The Culture Of The Floating World: Tokugawa Period Literature, Drama, And Art. Cross-listed with JPN 153 (E-Z).

AST 154 (E-Z) Themes in the Folklore and Popular Culture of Japan 4 Lecture, 2 hours; discussion, 1 hour; extra reading, 1 hour; written work, 2 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Topics include myth, legend, folktale, folk performance, festival, ritual, and the development of popular or commercial culture. Considers literary versus oral tradition, ethnic identity, authenticity, nationalism, modernity, commodification, and the invention of tradition. E. Ancient Myth To Contemporary Legend: A Study Of Japanese Folk Narrative; F. History Of Japanese Popular Culture. Cross-listed with JPN 154 (E-Z).
AST 160 The Vietnam Wars 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. An introduction to Vietnamese history in the twentieth century. Covers the three Indochina wars (1945-1986) from different Vietnamese perspectives. Topics include experiences during French colonial rule, the anticolonial movements; periods of French and American military involvement up to 1975; the postwar society; and the post- doi moi society. Cross-listed with HIST 184, SEAS 184, and VNM 184.

AST 161 Translating Modern Southeast Asian Texts 4 Lecture, 3 hours; term paper, 1.5 hours; written work, 1.5 hours. Prerequisite(s): upper-division standing; knowledge of one Southeast Asian language is recommended. An introduction to translating modern Southeast Asian texts into English. Presents translations of texts from Vietnam, Indonesia, and the Philippines in a context of theory. Materials are in English. Course is repeatable as content changes to a maximum of 8 units. Cross-listed with SEAS 161.

AST 162 Vietnamese Literary History 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing. A historical analysis of Vietnamese literature from its oral tradition to contemporary fiction. Follows the formation of the nation-state and the subsequent struggles with the Chinese, French, Japanese, and Americans. No knowledge of Vietnamese required. Readings are in translation or bilingual editions. Classes are conducted in English. Cross-listed with VNM 162, HIST 187, and SEAS 162.

AST 163 Nationalism and the Novel 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing. An introduction to the novel and its role within nationalism as a representative summary or mirror of the nation. Cross-listed with CPLT 163, and SEAS 163.

AST 164 Vietnamese American Culture 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of the pervasive aspects of Vietnamese American culture. Includes shared histories, acculturation patterns, class diversity, identity struggles, community-building, and cultural survival. Also introduces foundational literature, visual culture, and scholarship in the field. Cross-listed with VNM 164, and SEAS 164.

AST 165 (E-Z) Themes in Vietnamese Literature: Women and War 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. An exploration of Vietnamese literature in translation as seen through the lens of a particular theme or issue. Focuses on the implications of gender and sexuality on nation formation. All materials are read or viewed in English. E. Women And War. Cross-listed with GSST 165 (E-Z), SEAS 165 (E-Z), and VNM 165 (E-Z).

AST 166 Vietnam and the Philippines 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the comparative national histories of Vietnam and the Philippines by way of great literary works in various genres including poetry, short fiction, and novels. All materials are read in English. Cross-listed with CPLT 166, VNM 166, and SEAS 166.

AST 167 Postcolonial Literature and Criticism in Southeast Asia and South Asia 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores how the theoretical concepts of postcolonial criticism inform and challenge the literature of Southeast Asia and South Asia, as the literature itself pushes the limits of the criticism. Addresses themes of nation, identity, space, gender, home, diaspora, alterity, history, sexuality, transnationalism, neocolonialism, tourism, and education. Cross-listed with CPLT 167, and SEAS 167.

AST 168 Javanese Gamelan Ensemble: Beginning 2 Studio, 6 hours. Prerequisite(s): upper-division standing and consent of instructor. Study and performance of the Central Javanese gamelan, consisting mainly of gongs and gong-chime instruments. Readings and discussions focus on Javanese culture. Course is repeatable. Cross-listed with MUS 168 and SEAS 168.

AST 169 Taiko Ensemble 1 Studio, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Study and performance of Japanese drumming. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable. Cross-listed with MUS 169.

AST 170 Rondalla Ensemble 1 to 2 Studio, 2 to 4 hours. Prerequisite(s): upper-division standing or consent of instructor. Study and performance of the Filipino rondalla, an ensemble consisting of various sizes of lute-like and guitar-like instruments. Discussions focus on Filipino culture. Cross-listed with MUS 170 and SEAS 170. Course is repeatable.

AST 180 Japanese Documentary 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Studies the history of Japanese documentary cinema. Teaches strategies for reading non-fiction visual narrative. Explores other forms of documentation controversial in modern Japanese history including oral testimony, photography, and internet activism. Topics may include war, war protest, peace activism, environmental activism, nuclear politics, and green energy. Course is repeatable as topics and instructor change to a maximum of 8 units. Cross-listed with JPN 180, and MCS 180.

AST 184 Japanese Media and Cultural Studies 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Investigates Japanese media and culture including film, television, video games, manga (comics), anime, music, and print and digital media. Analyzes the function of media relating to issues of national identity, imperial culture, collective memory, and censorship. Includes transnational circulation of Japanese cultural forms, alternative media, and historical changes in technologies. Cross-listed with MCS 184, and JPN 184.

AST 185 New Chinese Cinema 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): MCS 180, upper-division standing or consent of instructor. A study of representative films from the People’s Republic of China, with a focus on those made during the last decade. Conducted in English; most films have English subtitles. Cross-listed with CHN 185, and MCS 169.

AST 186 Hong Kong Cinema: Gender, Genre, and the “New Wave” 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): MCS 180 or upper-division standing or consent of instructor. Examines contemporary Hong Kong films, specifically the “New Wave” genre. Particular focus is on the sociopolitical conditions of Hong Kong and its relations with Great Britain and China, the linkages of which set the stage for the films and thematic concerns. Cross-listed with MCS 168.

AST 188 (E-Z) Topics in Chinese History 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): HIST 180 or HIST 181 or HIST 182; restricted to class level standing of junior, or senior. An in-depth look at important topics in Chinese history. E. Chinese Food Culture; F. Four Great Inventions Of Imperial China; G. Environmental History Of China. Cross-listed with HIST 188 (E-Z).

AST 189 Encountering Vietnam 5 Lecture, 6 hours; tutorial, 6 hours; project, 6 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on literary and historical accounts of Vietnam. Utilizes translated travel writings from different genres and eras. Proficiency in Vietnamese not required. Taught in Vietnam and offered only in summer. Cross-listed with HIST 189, SEAS 189, and VNM 189.

AST 190 Special Studies 1 to 5 Individual Study, 3 to 15 hours. Prerequisite(s): upper-division standing or consent of instructor. To be taken with the consent of the Chair of the Program as a means of meeting special curricular problems. Course is repeatable.

AST 195 Capstone Senior Thesis 1 to 4 Thesis, 3 to 12 hours. Prerequisite(s): senior standing. Thesis composition under the guidance of Asian Studies faculty. Required for all Asian Studies majors. Course is repeatable to a maximum of 8 units.
Biochemistry

Subject abbreviation: BCH
College of Natural and Agricultural Sciences

Xuan Liu, M.D., Ph.D., Chair
Graduate Program (951) 827-4116
Undergraduate Program (951) 827-7294
biochemistry.ucr.edu

Professors
Richard J. Debys, Ph.D.
Li Fan, Ph.D.
Russ Hille, Ph.D.
Paul R. Larsen, Ph.D.
Xuan Liu, M.D., Ph.D.
Ernest Martinez, Ph.D.
Jikui Song, Ph.D.

Professors Emeriti
Thomas O. Baldwin, Ph.D.
Craig V. Byus, Ph.D. (Biochemistry/Biomedical Sciences)
Michael F. Dunn, Ph.D. (Biochemistry/Biomedical Sciences)
Justin K.M. Roberts, Ph.D.
Stephen R. Spindler, Ph.D.

Associate Professors
Gregor Blaha, Ph.D.
Sean O’Leary, Ph.D.

Assistant Professors
Siemel Cheloufi, Ph.D.
Jernej Murn, Ph.D.
Maria Ninova, Ph.D.

Associate Professor of Teaching
Stephanie Dingwall, Ph.D.

Assistant Professors of Teaching
Selene Bobadilla, Ph.D.
Sarah Radi, Ph.D.

Senior Lecturer Emerita
Miriam Ziegler, Ph.D.

Cooperating Faculty
Michael E. Adams, Ph.D. (Entomology/Molecular, Cell & Systems Biology)
Bahman Anvari, Ph.D. (Bioengineering)
Julia Bailey-Serres, Ph.D. (Botany and Plant Sciences)
Devin K. Binder, Ph.D. (Biomedical Sciences)
Katherine A. Borkovich, Ph.D. (Microbiology and Plant Pathology)
Richard Cardullo, Ph.D. (Evolution, Ecology, and Organismal Biology)
Chia-En Chang, Ph.D. (Chemistry)
Meng Chen Ph.D. (Botany and Plant Sciences)
Patrick Degnan, Ph.D. (Microbiology and Plant Pathology)
Adler Dillman, Ph.D. (Nematology)
Nicholas Dipietro, Ph.D. (Biomedical Sciences)
Thomas Eulgem, Ph.D. (Botany and Plant Sciences)
Weifeng Gu, Ph.D. (Molecular, Cell, and Systems Biology)
Rong Hai, Ph.D. (Microbiology and Plant Pathology)
Richard Hooley, Ph.D. (Chemistry)
Ansel Hsiao, Ph.D. (Microbiology and Plant Pathology)
Hailing Jin, Ph.D. (Microbiology and Plant Pathology)

Ryan Julian, Ph.D. (Chemistry)
Isgouhi Kaloshian, Ph.D. (Nematology)
Fedor Karginov, Ph.D. (Molecular, Cell, Systems Biology)
Thomas Kuhlman, Ph.D. (Physics and Astronomy)
Yannan Li, Ph.D. (Chemical & Environmental Engineering)
Jiayu Liao, Ph.D. (Bioengineering)
David Lo, Ph.D. (Biomedical Sciences)
Declan McCole Ph.D. (Biomedical Sciences)
Leonard Mueller, Ph.D. (Chemistry)
Carolyn Rasmussen, Ph.D. (Botany and Plant Sciences)
Frances Sladek, Ph.D. (Molecular, Cell, and Systems Biology)
Valentine Vulley, Ph.D. (Bioengineering)
Ian Wheeldon, Ph.D. (Biomedical Science)
Emma Wilson, Ph.D. (Biomedical Sciences)
Jingsong Zhang, Ph.D. (Chemistry)
Linglin Zhao, Ph.D. (Chemistry)
Sika Zheng, Ph.D. (Biomedical Sciences)
Changcheng Zhou, Ph.D. (Biomedical Sciences)
Nicolet Zur Nieden, Ph.D. (Molecular, Cell, and Systems Biology)

Major
The three emphases areas within the Biochemistry major are Chemistry, Biology, and Medical Sciences. The Biology and Chemistry emphases are for students interested in postgraduate education or employment in the basic areas of the discipline of Biochemistry. The goal of the Medical Sciences emphasis is to prepare students for admission to postbaccalaureate education in the health professions. The Biology, Chemistry, and Medical Sciences emphases focus on the development of laboratory and critical thinking skills, and hands-on laboratory experience. In addition, participation in an independent research project (BCH 197) or research tutorial (BCH 190), carried out under the supervision of a faculty member, is encouraged. Internships in industry (BCH 198I) are also available, and often lead to valuable job experience and employment opportunities.

The department offers both B.A. and B.S. degrees. The major and emphasis requirements are the same for both, and most students choose the B.S. degree. The B.A. degree requires 12 additional units of Humanities and Social Sciences courses, and 16 units or a course 4 equivalency level of a foreign language (see College Breadth Requirements). The Biology and Chemistry emphases are available to postbaccalaureate education in the health professions. The Biology, Chemistry, and Medical Sciences emphases focus on the development of laboratory and critical thinking skills, and hands-on laboratory experience. In addition, participation in an independent research project (BCH 197) or research tutorial (BCH 190), carried out under the supervision of a faculty member, is encouraged. Internships in industry (BCH 198I) are also available, and often lead to valuable job experience and employment opportunities.

The department offers both B.A. and B.S. degrees. The major and emphasis requirements are the same for both, and most students choose the B.S. degree. The B.A. degree requires 12 additional units of Humanities and Social Sciences courses, and 16 units or a course 4 equivalency level of a foreign language (see College Breadth Requirements). The Biology and Chemistry emphases are available to postbaccalaureate education in the health professions. The Biology, Chemistry, and Medical Sciences emphases focus on the development of laboratory and critical thinking skills, and hands-on laboratory experience. In addition, participation in an independent research project (BCH 197) or research tutorial (BCH 190), carried out under the supervision of a faculty member, is encouraged. Internships in industry (BCH 198I) are also available, and often lead to valuable job experience and employment opportunities.

Note: A maximum of 12 units of 190-199 courses may be counted toward the 180 unit graduation requirement. All courses used towards the Biochemistry major requirements must be taken for letter grades.

Transfer Students
Transfer students desiring to major in Biochemistry must have completed:

1. Two quarters of calculus, equivalent to MATH 009A and MATH 009B
2. A year of general chemistry, equivalent to CHEM 001A, CHEM 001A, CHEM 001B, CHEM 001B, CHEM 001C, CHEM 001C
3. A year of organic chemistry, equivalent to CHEM 008A, CHEM 008A, CHEM 008B, CHEM 008B, CHEM 008C, CHEM 008C
4. A course in general biology, equivalent to BIOL 005A and BIOL 05LA

Strongly recommended but not required for admission to the major are:

1. General Biology, equivalent to BIOL 005B and BIOL 005C
2. One quarter of Ordinary Differential Equations, equivalent to MATH 046
3. General physics (calculus-based) equivalent to PHYS 002A, PHYS 002B, PHYS 002C or PHYS 040A, PHYS 040B, PHYS 040C

Students must have a minimum grade point average of 2.70 in transferable college courses.

University Requirements
See Undergraduate Studies section.

College Requirements
See College of Natural and Agricultural Sciences, Colleges and Programs section.

Some of the following requirements for the major may also fulfill some of the college’s breadth requirements. Consult with a department advisor for course planning.

Major Requirements
The major requirements and the emphasis requirements are the same for the B.A. and the B.S. degree in Biochemistry. Choose one emphasis. All upper-division courses presume completion of the life sciences core curriculum.

Continuation in the major requires that the student maintains cumulative and upper division/science GPAs of 2.00 or higher, a GPA of 2.00 or higher in each academic quarter, and makes adequate progress in the major with no more than 16 units of repeated courses. Adequate progress in the major is defined as (a) earning no grade lower than a “C-” in any required lower division mathematics or science course, STAT 010, CHEM 008A, CHEM 008B, CHEM 008C, CHEM 008C, CHEM 08LC, or any upper division BCH course, and (b) completing MATH 009B and CHEM 001A by the end of the Fall Quarter of the second year of residence and BCH 110A or BCH 110B, and BCH 110B or BCH 110B, by the end of the third year of residence. Freshmen must also complete BCH 095 with a grade of “S” during their first year of residence. Students in the Medical Science Emphasis must also complete BCH 096 with a grade of “S” during their first year of residence. A student who does not meet these adequate progress standards will be discontinued from the major. In addition, a student who receives a grade of “D+” or lower in any two of the courses in (A) on the first attempt, or in any one of these courses in each of two attempts, will be discontinued from the major. Students who receive a grade lower than “B-” in BIOL 005A or CHEM 008A are strongly encouraged to complete BCH 100 during their second year of residence to better prepare themselves for BCH 110A or BCH 110A, BCH 110B or BCH 110B, and BCH 110C or BCH 110C.
Chemistry Emphasis
1. Lower-division requirements (76 units)
   a) BCH 095 or equivalent, BCH 015
   b) BIOL 005A, BIOL 051A or BIOL 020, BIOL 005B, BIOL 005C
   c) CHEM 001A, CHEM 010A, CHEM 001B, CHEM 010B, CHEM 010C, CHEM 010L
   d) CHEM 008A and CHEM 081A or CHEM 08HA and CHEM 8HLA, CHEM 008B and CHEM 08LB or CHEM 08HB and CHEM 08HB and CHEM 8HLB, CHEM 08HC and CHEM 08LC or CHEM 08HC and CHEM 08LC
   e) MATH 007A or MATH 009A, MATH 007B or MATH 009B, MATH 046
   f) PHYS 002A, PHYS 02LA, PHYS 002B, PHYS 02LB, PHYS 002C, PHYS 02LC
   g) STAT 010

2. Upper-division requirements (40-41 units)
   a) BCH 110A or BCH 110HA, BCH 110B or BCH 110HB, BCH 110C or BCH 110HC, BCH 162, BCH 184
   b) At least 3 units from BCH 111, BCH 120, BCH 153/BIOL 153/BPSC 153, BCH 180 (E-Z), BCH 183/BPSC 183, BCH 186, BCH 187, BCH 210, BCH 211, BCH 212
   c) BIOL 102
   d) CHEM 109 or CHEM 110A
   e) Choose two biological science courses from the following:
      (1) BCH 111, BCH 120, BCH 153/BIOL 153/BPSC 153, BCH 180 (E-Z), BCH 183/BPSC 183, BCH 186, BCH 187, BCH 210, BCH 211, BCH 212
      (2) BIOL 105, BIOL 108, BIOL 114, BIOL 117, BIOL 119, BIOL 121/MCBL 121, BIOL 121L/MCBL 121L, BIOL 123/MCBL 123/LPLA 123, BIOL 124/MCBL 124, BIOL 128/CBNS 128, BIOL 151, BIOL 155/BPSC 155, BIOL 157, BIOL 159/NEM 159, BIOL 160, BIOL 161A, BIOL 161B, BIOL 171L, BIOL 171L, BIOL 173/ENTM 173, BIOL 175
      (3) BIOL 104/BPSC 104, BIOL 109/CBNS 109, BIOL 132/BPSC 132, BIOL 143/BPSC 143, BIOL 148/BPSC 148, BIOL 155/BPSC 155, BIOL 155/BPSC 155, BIOL 155/BPSC 155
      (4) BIOL 100/ENTM 100, BIOL 173/ENTM 173, BIOL 173/ENTM 173
      (5) CBNS 101, CBNS 106, CBNS 116, CBNS 120/PSYC 120, CBNS 120L/PSYC 120L, CBNS 124/PSYC 124, CBNS 125/PSYC 125, CBNS 150/ENTM 150, CBNS 165, CBNS 169
      (6) ENSC 100
      (7) ENTC 101, CBNS 150/ENTM 150

3. BCH 190 or BCH 197 are available as elective courses. Enrollment requires upper-division standing and written permission of the supervising faculty member. No more than 9 units of courses numbered 190-199 may be counted towards the major.
Doctoral Degree

The Department of Biochemistry offers the Ph.D. degree in Biochemistry and Molecular Biology.

Course Work

The following courses are required. Credit for upper division courses listed below will be given at the discretion of the graduate advisor if equivalent coursework has been taken previously. Students’ course requirements are determined in consultation with the graduate advisor for them upon their arrival. The graduate advisor suggests an individualized course program involving classes in biochemistry and subsidiary fields of study, chosen from any of the physical, biological, or agricultural sciences. Although an adequate course preparation is a requisite part of the training program, the department encourages early involvement of the students in research directed toward their dissertations.

BCH 110A-110B-110C: General Biochemistry
BCH 162; or equivalent research experience
BCH 184: Topics in Physical Biochemistry
BCH 210; Biochemistry of Macromolecules
BCH 211; Molecular Biology
BCH 212; Signal Transduction.
BCH 230 series: at least one course
BCH 240 Special topics in Biochemistry; required each quarter from the time the student finds a permanent major professor. The course consists of the laboratory group meeting of the student’s Major Professor
BCH 250 Oral Presentation in Biochemistry; this course must be taken prior to Advance ment to Candidacy.
BCH 251 Graduate Seminar in Biochemistry; one formal oral presentation is required in the student’s first four years in the program.
BCH 252 General Seminar in Biochemistry; must be taken every quarter, when offered except when they present in the seminar, they must enroll in BCH 251 instead. Exceptions to this rule may be made by petition to the Graduate Advisor in cases where the General Seminar in Biochemistry conflicts with the student’s Teaching Assistant responsibilities.

Elective Course Requirement: The elective courses consist of at least 9 units of graduate or upper division undergraduate course work in the sciences. Courses taken to satisfy deficiencies at the time of admission cannot be counted toward the elective course requirements.

At the end of the second quarter, students select major professors and are ready to initiate a research project. At the end of the first year, students submit a written report describing their research efforts and relating them to current biochemical work in related areas.

Written and Oral Qualifying Examinations

At the end of the first year, and no later than the end of the second year, students take a comprehensive written qualifying examination consisting of material from BCH 210, BCH 211, and BCH 212. Upon successful completion of this exam, the student will then submit and orally defend a research report in which they describe the research they have performed thus far and develop a plan for their complete dissertation research project. This fulfills the requirement for an oral qualifying examination. Students completing all necessary requirements are advanced to candidacy for the Ph.D. degree.

Students must sit the comprehensive written exam within the first two years in the program. Unless excused by either the graduate advisor or department chair, failure to sit the examination will be regarded as a failed exam. Students must sit every sequential offering of the exam and no student will be given more than two attempts to achieve a satisfactory grade on the comprehensive written exam.

Dissertation and Final Oral Examination

Following completion of their research, students submit a written dissertation and conclude their studies with an oral defense of the dissertation.

Teaching Requirement

As part of the program, each student is required to serve at least two quarters as a teaching assistant.

Professional Development Training

Ph.D. graduate students fulfill their professional training requirement through enrollment in BCH 250, BCH 252 and GDIV 403.

Normative Time to Degree

15 quarters. In the case that a student changes the degree aim from M.S. to Ph.D., normative time will be reset.

Master’s Degree

In addition to the Ph.D. program, the department offers two plans for the master’s degree (Plan I, Thesis; Plan II, Comprehensive Examination). Both plans require completion of at least 36 course units; for Plan I, a maximum of 12 units may be for thesis research.

Course Work

The following courses offered by the Biochemistry Department, or acceptable substitutes (determined by the Graduate Advisor when the student joins the program), are required:

BCH 110A-110B-110C: General Biochemistry
BCH 162; or equivalent research experience
BCH 184: Topics in Physical Biochemistry
BCH 210; Biochemistry of Macromolecules
BCH 211; Molecular Biology
BCH 212; Signal Transduction.
BCH 230 series: at least one course

BCH 251 Graduate Seminar in Biochemistry; one formal oral presentation is required in the student’s first four years in the program.
BCH 252 General Seminar in Biochemistry; must be taken every quarter, when offered except when they present in the seminar, they must enroll in BCH 251 instead. Exceptions to this rule may be made by petition to the Graduate Advisor in cases where the General Seminar in Biochemistry conflicts with the student’s Teaching Assistant responsibilities.

Lower-Division Courses

BCH 010 Introduction to Nutrition 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduction to the biological basis of human nutrition in the context of plant-animal-microorganism cycles and the characteristics of different food classes. The effects of nutritional needs, food availability, and the expanding human population are discussed. Students record and evaluate their own diet.

BCH 015 Introduction Biochemistry Laboratory 3 Lecture, 1 hour; discussion, 1 hour, laboratory, 3 hours. Prerequisite(s): CHEM 008A and CHEM 08LA or CHEM 08HA and CHEM 08HLA with grade of “C-” or better (CHEM 008A and CHEM 08LA or CHEM 08HA and CHEM 08HLA may be taken concurrently); or consent of instructor. Introduces basic biochemistry laboratory techniques for biological samples. Includes micropipetting, volumetric relationships, dilutions, pH measurement, buffer preparation, spectrophotometry, gel permeation chromatography, and ion-exchange chromatography. Explores the use of molecular graphics for investigation of macromolecular structure-function relationships.

BCH 095 Topics in Biochemistry For Career Planning 1 Seminar, 1 hour. Prerequisite(s): lower-division standing in Biochemistry. Topics include analysis of academic aspects of career goals and options; curriculum planning; undergraduate research opportunities; preparation for postgraduate education; laboratory experiences and evaluation of data; ethics in education and research; research problems in contemporary biochemistry; and modern experimental approaches in biochemistry. Graded Satisfactory (S) or No Credit (NC). Credit is awarded for only one of BCH 095, NASC 091, or NASC 093.

BCH 096 Introduction to Humanitarian and Healthcare Service 1 Lecture, 8 hours per quarter; consultation, 2 hours per quarter. Prerequisite(s): a major in Biochemistry with an emphasis in Medical Sciences. Acquaints students with opportunities for volunteer activities in the humanitarian and healthcare arenas in southern California. Provides students with the opportunity to validate their commitment to a career in the healthcare arena. Requires a term paper. Graded Satisfactory (S) or No Credit (NC).
BCH 097 Research Tutorial in Biochemistry
Laboratory, 3 hours. Prerequisite(s): lower-division standing, minimum grade point average of 3.5, approval of undergraduate advisor and consent of instructor. Laboratory tutorial in Biochemistry. To provide biochemistry laboratory experience for exceptional lower-division students. A written report is required at the end of each quarter. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 3 units.

BCH 098I Individual Internship in A Humanitarian Or Healthcare Arena
Internship, 3 hours; term paper, 10 hours per quarter. Prerequisite(s): BCH 096; restricted to major(s) Biochemistry; with an emphasis in Medical Sciences; permission by department. Real-world experience is gained by providing community service in a humanitarian or healthcare arena. Requires a written report. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 2 units.

Upper-Division Courses

BCH 100 Introductory Biochemistry
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A with a grade of C- or better; CHEM 08HB with a grade of C- or better or CHEM 080B with a grade of C- or better; CHEM 08LB with a grade of C- or better or CHEM 08HLB with a grade of C- or better. Introduction to the biochemistry of living organisms based on a study of the structure, function, and metabolism of small molecules and macromolecules of biological significance. Examines selected animals, plants, and microorganisms to develop a general understanding of structure-function relationships, enzyme action, regulation, bioenergetics, and intermediary metabolism. Credit is awarded for one of the following BCH 100 or BCH 100H. Credit is not awarded for BCH 100 if a grade of “C-” or higher has been awarded previously in BCH 110A or BCH 110H or BCH 110B or BCH 110HB or BCH 110C or BCH 110HC.

BCH 100H Honors Introductory Biochemistry
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A with a grade of C- or better; CHEM 008B with a grade of C- or better or CHEM 080B with a grade of C- or better; CHEM 08LB with a grade of C- or better or CHEM 08HLB with a grade of C- or better. Consideration of the structure and function of biological molecules including proteins, carbohydrates, lipids, and nucleic acids. Credit is awarded for one of the following BCH 100 or BCH 100H. Credit is not awarded for BCH 100 if a grade of “C-” or higher has been awarded previously in BCH 110A or BCH 110H or BCH 110B or BCH 110HB or BCH 110C or BCH 110HC.

BCH 110A General Biochemistry
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A with a grade of “C-” or better; CHEM 008C and CHEM 08LC or CHEM 08HC and CHEM 08HLC with grades of “C-” or better. Considers the structure and function of biological molecules including proteins, carbohydrates, lipids, and nucleic acids. Credit is awarded for only one of BCH 110A or BCH 110HA.

BCH 110B General Biochemistry
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110A or BCH 110HA with a grade of “C-” or better or consent of instructor. Consideration of metabolic pathways including mechanisms and regulation of catabolism, anabolism, and bioenergetics in living organisms. Credit is awarded for only one of BCH 110B or BCH 110HB.

BCH 110C General Biochemistry
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110A or BCH 110HA with a grade of “C-” or better, BIOL 102 or consent of instructor. Considers regulation of gene expression, protein synthesis, chromatin structure, genome replication, recombination, and repair. Examines both prokaryotic and eukaryotic systems, including recombinant DNA technology, protein engineering, and applications to molecular medicine. Credit is not awarded for BCH 110C if it has already been awarded for BCH 110HC or BIOL 107A.

BCH 110HA Honors General Biochemistry
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A with a grade of “C-” or better; CHEM 008C and CHEM 08LC or CHEM 08HC and CHEM 08HLC with grades of “C-” or better. Honors course corresponding to BCH 110A. Consideration of the structure and function of biological molecules including proteins, carbohydrates, lipids, and nucleic acids. Credit is awarded for only one of BCH 110A or BCH 110HA.

BCH 110HB Honors General Biochemistry
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110A with a grade of C- or better or BCH 110HB with a grade of C- or better; admission to the University Honors Program. Honors course corresponding to BCH 110B. Consideration of metabolic pathways including mechanisms and regulation of catabolism, anabolism, and bioenergetics in living organisms. Credit is awarded for only one of the following BCH 110A or BCH 110B.

BCH 110HC Honors General Biochemistry
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110A or BCH 110HA with a grade of “C-” or better. BCH 110B or BCH 110HB is highly recommended. Honors course corresponding to BCH 110C. Considers regulation of gene expression, protein synthesis, chromatin structure, genome replication, recombination, and repair. Examines both prokaryotic and eukaryotic systems, including recombinant DNA technology, protein engineering, and applications to molecular medicine. Credit is not awarded for BCH 110HC if it has already been awarded for BCH 110C or BIOL 107A.

BCH 120 Topics in Human Biochemistry
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 100 with a grade of “C-” or better or BCH 110B or BCH 110HB with a grade of “C-” or better or consent of instructor. Lectures on biochemical and molecular aspects of modern endocrinology, nutrition, metabolic diseases, and blood chemistry. Emphasis is on relation of the above topics to medicine. The discussion sections are used for presentations on topical medical problems.

BCH 162 Advanced Biochemistry
Laboratory 5 Lecture, 2 hours; laboratory, 9 hours. Prerequisite(s): BCH 015; BCH 110B or BCH 110HB; BCH 110C or BCH 110HC all with grades of “C-” or better, or consent of instructor. Advanced biochemistry laboratory techniques including modern methods of protein engineering, purification, and characterization, enzyme assays, principles of various types of column chromatography, SDS gel and other methods of electrophoresis, centrifugation, and crystallization. Most experiments include quantitative reasoning through data manipulation, numerical simulations, parametric evaluation, and detailed laboratory reports. Satisfactory (S) or No Credit (NC) grading is not available.

BCH 180 (E-Z) Advanced Methods in Biochemistry
Lecture 2, hour; seminar, 1 hour. Prerequisite(s): BCH 197, may be taken concurrently or BCH 110C or BCH 110HC or BIOL 107A with a grade of C- or better; restricted to class level standing of junior, or senior, or consent of instructor. An introduction and discussion of the experimental approaches and modern techniques in the study of cell growth regulation, signal transduction, and cell death in cancer. E. Gene Regulation; F. Chromatins Research; G. Cell Signaling; I. Structural Biology; J. Biophysical Chemistry; K. Cryoelectron Microscopy; M. Biological Structure/Function; N. Genome Stability; O. Genomics And Proteomics; P. Regulation Of Protein Synthesis; Q. Stem Cell Biology; R. Epigenetics; S. Molecular Biology Of Genetic Diseases; T. Biochemistry Of Development And Aging; U. Biochemistry Of Stress Responses. Course is repeatable as content or topic changes to a maximum of 6 units.

BCH 183 Plant Biochemistry and Pharmacology of Plant Metabolites
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110A or BCH 110HA; BCH 110B or BCH 110HB; or BCH 110C; or consent of instructor. Explores plant biochemistry and the significance of plant metabolites in medicine and pharmacology. Focuses on biotechnology, medicinal plants, and plant-derived drugs as well as the biochemical and pharmacological mode-of-action of secondary plant metabolites. Also addresses plant-specific biochemical processes such as photosynthesis. Cross-listed with BPSC 183.

BCH 184 Topics in Physical Biochemistry
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 100 with a grade of “C-” or better or BCH 110A or BCH 110HA with a grade of “C-” or better or BIEN 135 with grade of “C-” or better, or CHEM 109 with grade of “C-” or better or CHEM 107A with grade of “C-” or better; or consent of instructor. Explores modern biophysical
methods determining the structures of biological macromolecules and relating structure to function. Covers x-ray crystallography, NMR, and cryoelectron microscopy. Imaging and mass spectrometry for determining structure and ultraviolet, visible, infrared, Raman, fluorescence, NMR, EPR, and other forms of spectroscopy for relating macromolecular structure to function.

**BCH 185 Epigenetics in Development and Disease 4** Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours. Prerequisite(s): BCH 110C with a grade of C- or better or BCH 110HC with a grade of C- or better or BIOL 107A with a grade of C- or better; or equivalents. Examines epigenetic regulation of gene expression in mammalian development and human disease. Covers the roles of epigenetic mechanisms in normal homeostasis including mammalian embryogenesis, memory formation, and trans-generational inheritance. Addresses aberrant epigenetic control in major human disorders including cancer, neurological disorders, and systemic disease. Explores epigenetics in regenerative medicine.

**BCH 186 Molecular Bioenergetics 3** Lecture, 3 hours. Prerequisite(s): BCH 100 with a grade of C- or better or BCH 100H with a grade of C- or better or BCH 110B with a grade of C- or better or BCH 110HC with a grade of C- or better; BCH 184 with a grade of C- or better; or consent of instructor. Introduction to biological energy transduction. Describes the coupling of oxidative phosphorylation and photosynthesis to adenosine triphosphate (ATP) synthesis and the coupling of ATP hydrolysis to ion transport, chemotaxis, molecular motors, biomimetics, and other biological processes on the basis of recent structural and mechanistic studies of the protein complexes involved.

**BCH 187 Fundamentals of Enzymology 3** Lecture, 3 hours. Prerequisite(s): BCH 100 or BCH 110A or BCH 110HA with a grade of C- or better. An introduction to the fundamental principles of enzymology. Specific topics include acid-base catalysis, strain effects, transition state theory, enzyme kinetics (including isotope effects), enzyme dynamics and enzyme regulation. Consists in detail the reactions of several representative enzymes.

**BCH 188 Fundamentals of Genomics Technologies 3** Lecture, 3 hours. Prerequisite(s): BCH 110C with a grade of C- or better or BCH 110HC with a grade of B- or better; or BIOL 107A with a grade of C- or better; or equivalent. A systematic overview leading and emerging genomics technologies. Emphasizes the biochemical and molecular methods behind different genomic technologies and various applications in areas such as functional genomics, developmental biology, metagenomics, and clinical diagnostics. Course appropriate for biochemistry or other biological sciences majors.

**BCH 189 Advanced Analysis of Biochemical Methods 2** Lecture, 1 hour; discussion, 1 hour. Prerequisite(s): senior standing in a Biochemistry major, concurrent enrollment in BCH 162, and consent of instructor. Working with a faculty mentor, students investigate the use of a set of biochemical methods through research of the original literature. Includes a term paper that summarizes the current state of the technology/methodology of interest. Satisfactory (S) or No Credit (NC) grading is not available.

**BCH 190 Special Studies 2 to 4** Individual Study, 6 to 16 hours. Prerequisite(s): upper-division standing and consent of instructor. Literature review and tutorial in select modern biochemical topics. Course is repeatable.

**BCH 197 Research For Undergraduate Students 1 to 4** Prerequisite(s): junior status and consent of the instructor. Directed research and preparation of written report. Course is repeatable.

**BCH 198I Internship in Biochemistry 1 to 12** Internship, 3 to 36 hours. Prerequisite(s): BCH 015, consent of instructor. An internship to provide on-the-job biochemical experience in government, industrial, or clinical laboratories. Each individual project must be approved by the Biochemistry Department and the laboratory director where the internship is to be carried out. A written report is required. Grad-Ed Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

**Graduate Courses**

**BCH 204 Genome Maintenance and Stability 4** Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110C or BCH 110HC or BIOL 107A; BIOL 113 or BIOL 114 or CBNS 101; BIOL 102 is strongly recommended. Emphasizes chromosome-based processes that maintain genome integrity and ensure accurate genome transmission during cell division. Topics are drawn from the primary literature and include chromatin structure and composition, DNA repair and recombination, telomere function and chromosome maintenance, mitotic chromosome segregation, and checkpoint surveillance mechanisms. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CMDB 204, and ENYX 204.

**BCH 209 Ribonucleic Acid Biology 3** Lecture, 2 hours; discussion, 1 hour. Prerequisite(s): BIOL 107A or CBNS 101 or equivalent; or consent of instructor. A comprehensive overview of the multiple functions of ribonucleic acid (RNA) in the cell. Topics include mRNA, tRNA, and tRNA function and metabolism; RNA catalysis and the "RNA world"; eukaryotic and bacterial non-coding RNAs; and bacterial riboswitches. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CMDB 209, and GEN 209.

**BCH 210 Biochemistry of Macromolecules 4** Lecture, 4 hours. Prerequisite(s): BCH 110A, BCH 110B, BCH 110C or equivalents; BCH 184 (may be taken concurrently); CHEM 109; graduate standing or consent of instructor. Discussion of recent advances in the knowledge of the molecular architecture of proteins and nucleic acids, especially with respect to new experimental approaches for analyzing their structure and function. Chemistry of the active site of enzymes.

**BCH 211 Molecular Biology 3** Lecture, 3 hours. Prerequisite(s): BCH 110A, BCH 110B, BCH 110C or equivalents; graduate standing or consent of instructor. Advanced topics in molecular biology of the biosynthesis and regulation of DNA, RNA, and proteins. Some topics covered include the following: molecular anatomy of genes and chromosomes; DNA repair and recombination; regulation of genes in the cell cycle; telomerase; RNA processing and splicing; RNA editing; regulation of normal genes and oncogenes; chaperones and protein targeting.

**BCH 212 Signal Transduction and Biochemical Regulation 3** Lecture, 3 hours. Prerequisite(s): BCH 110A, BCH 110B, BCH 110C or equivalents; graduate standing or consent of instructor. Advanced topics in signal transduction and biochemical regulation. Topics include protein kinases and protein phosphorylation; phosphatases and their role in regulation; function of phosphorylation events in regulation of metabolism and growth; calcium and other ion channels as signal transduction mechanisms; steroid hormones receptor super family; immune system signal transduction events.

**BCH 230 (E-Z) Advanced Topics in Biochemistry 2** Lecture, 1 hour; discussion, 1 hour. Prerequisite(s): BCH 100 or BCH 110A, BCH 110B or BCH 110HA, BCH 110HB; graduate standing. Addresses advances in a particular field of biochemistry by analysis of the recent literature. E. Structure Of Biological Molecules; F. Enzyme Catalysis; G. Glycobiology; H. Membrane Biochemistry; I. Cytoskeleton And Extracellular Matrix; J. Metabolism; K. Regulation Of Chromatin Structure And Transcription; M. Genome Stability; N. Regulation Of Protein Synthesis; O. Signal Transduction; P. Emerging Topics In Biochemistry And Molecular Biology; Q. Cell Cycle Regulation; R. Biochemistry Of Stress Responses; S. Biochemistry Of Development And Aging; T. Molecular Basis Of Genetic Diseases; U. Genomics And Proteomics; W. Stem Cell Biology. Course is repeatable.

**BCH 231 The Plant Genome 4** Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 100, BIOL 107A; or BCH 110A or BCH 110HA, BCH 110B or BCH 110HB, BCH 110C or BCH 110HC; or consent of instructor. Gives students an appreciation for the structure of the plant nuclear, chloroplast, and mitochondrial genomes. Gene structure, regulation of gene expression, transposons, and methods of gene introduction are also emphasized. Cross-listed with BPS 231.

**BCH 240 Special Topics in Biochemistry 2** Lecture, 2 hours. Prerequisite(s): restricted to major(s) Biochemistry; graduate standing; or consent of instructor. Provides oral presentations and intensive small-group discussion of selected topics in the area of specialization of each faculty member. Emphasizes recent advances in the special topic area and varies accordingly. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 56 units.
BCH 250 Oral Presentations in Biochemistry 2 Seminar, 1 hour, discussion, 1 hour, Prerequisite(s): graduate standing, Training and practice in the presentation of biochemical concepts in both short and long seminar formats, using blackboard, overhead projector, and slides. Presentations are immediately and critically evaluated by both faculty and staff. Limited to 10 students.

BCH 251 Graduate Seminar in Biochemistry 2 Seminar, 1 hour, Discussion, 1 hour, Prerequisite(s): BCH 250. Oral reports by graduate students on current research topics in biochemistry.

BCH 252 General Seminar in Biochemistry 1 Seminar, 1 hour, Prerequisite(s): graduate standing, Oral reports by faculty, graduate students, and visiting scholars on current research topics in biochemistry. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BCH 261 Seminar in Genetics, Genomics, and Bioinformatics 1 Seminar, 1 hour, Prerequisite(s): graduate standing or consent of instructor. Oral reports by visiting scholars, faculty, and students on current research topics in Genetics, Genomics, and Bioinformatics. Graded Satisfactory (S) or No Credit (NC). Course is repeatable. Cross-listed with BIOL 261, BPS 261, ENTM 261, PLPA 261, and GEN 261.

BCH 289 Special Topics in Neuroscience 2 Seminar, 2 hours, Prerequisite(s): graduate standing or consent of instructor. An interdisciplinary seminar consisting of student presentations and discussion of selected topics in neuroscience. Content and instructor(s) vary each time course is offered. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. Cross-listed with BIOL 289, CHEM 289, ENTM 289, NRSC 289, and PSYC 289.

BCH 290 Directed Studies 1 to 4 Research, 3 to 12 units. Prerequisite(s): graduate standing in Biochemistry; consent of instructor and graduate advisor. Experimental or literature studies on specifically selected topics undertaken under the direction of a staff member. Course is repeatable.

BCH 291 Individual Study in Biochemistry 1 to 6 Prerequisite(s): graduate standing in Biochemistry or consent of instructor. A program of studies designed to advise and assist candidates who are preparing for examinations. Open to M.S. and Ph.D. candidates; does not count toward the unit requirement for the M.S. degree. Graded Satisfactory (S) or No Credit (NC). Repeatable up to 6 units for pre-Master’s students and up to 12 units for Ph.D. students prior to successful completion of the qualifying examination.

BCH 297 Directed Research 1 to 6 Research, 3 to 36 hours. Prerequisite(s): graduate status in Biochemistry or consent of instructor. Directed research in preparation for dissertation projects performed prior to advancement to candidacy. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BCH 299 Research For Thesis Or Dissertation 1 to 12 Research, 3 to 36 hours. Prerequisite(s): graduate status in Biochemistry or consent of instructor. Original research in an area selected for the advanced degree. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

BCH 301 Teaching of Biochemistry at the College Level 1 Seminar, 1 hour, Prerequisite(s): graduate standing and consent of instructor. A program of weekly meetings and individual formative evaluations required of new biochemistry teaching assistants. Covers instructional methods and classroom/section activities most suitable for teaching Biochemistry. Conducted by the TA Development Program. Credit not applicable to graduate unit requirements. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BCH 302 Apprentice Teaching 1 to 4 variable hours, Prerequisite(s): graduate standing; limited to departmental teaching assistants. Supervised teaching in lower- and upper-division Biochemistry courses. Required for all Biochemistry teaching assistants. Fulfills portion of the teaching requirements for Ph.D. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

Bioengineering

Subject abbreviation: BIEN
The Marlan and Rosemary Bourn College of Engineering
Xiaoping Hu, Ph.D., Chair
Department Office, 203 MSE
(951) 827-2925; xiaoping.hu@ucr.edu
https://www.bioeng.ucr.edu/

Professors
Bahman Anvari, Ph.D.
Xiaoping Hu, Ph.D. Chair and Provost Fellow
Victor G. J. Rodgers, D.Sc.
Valentine Vullev, Ph.D.

Professor Emeritus
Jerome S. Schultz, Ph.D. Distinguished Professor

Associate Professors
William H. Grover, Ph.D.
Huiman Liu, Ph.D.
Jiayu Liao, Ph.D.
Jin Nam, Ph.D.
b. hyle Park, Ph.D.

Assistant Professors
Vasilios Christopoulos, Ph.D.
Kevin Freedman, Ph.D.
Jia Guo, Ph.D.
Elena Kokkoni, Ph.D.
Joshua Morgan, Ph.D.
Giulia Palermo, Ph.D.

Cooperating Faculty
Mark Alber, Ph.D. (Distinguished Professor Mathematics)
Bir Bhanu, Ph.D. (Chair and Distinguished Professor Electrical and Computer Engineering)
Devin Binder, Ph.D. (School of Medicine)
Byron Ford, Ph.D. (School of Medicine)

David Lo, Ph.D. (Distinguished Professor School of Medicine)
Aaron Seitz, Ph.D. (Psychology)
Hongdian Yang, Ph.D. (Cell Biology and Neuroscience)

Major
The major in Bioengineering allows students to complete a B.S. degree that provides a basic education to enter the fields of bioengineering and biotechnology.

Bioengineering is rooted in physics, mathematics, chemistry, biology, and the life sciences. It is the application of a systematic, quantitative, and integrative way of thinking about and approaching the solutions of problems important to biology, health, and clinical practice. Bioengineers develop processes and products that are important for health and treatment of diseases, new materials, protecting environments, and food production. They are employed by the pharmaceutical, biotechnology, medical device, and environmental and food industries. For students interested in medicine, the bioengineering program provides the basic courses to prepare for application to medical schools.

The objective of the bioengineering program is to produce graduates who:
- have a strong foundation to apply science, engineering, and biological principles to meet the challenges at the interface of engineering, life sciences, and medicine
- have the capability to pursue graduate studies, careers in the medical device or biotechnology industries, or entry into medical or other health related professional schools
- are effective as professionals working individually and in teams and can communicate effectively to integrate contributions from multiple disciplines to address biological and medical problems
- have an appreciation of and sensitivity to a broad range of ethical and social concerns related to bioengineering

The Bioengineering B.S. degree program at UCR is accredited by the Engineering Accreditation Commission of ABET, abet.org.

All undergraduates in the College of Engineering must see an advisor at least annually. Visit student.engr.ucr.edu for details.

Change of Major Criteria
All students who request a change of major to Bioengineering must meet the following requirements:
- Be in good academic standing
- Have no less than a C- in any Math, Science and Engineering coursework
- Have a minimum 2.0 GPA in all Math, Science and Engineering required coursework
- Be able to complete major within maximum allowable units
- Complete all the courses listed below, based on the total number of units earned, prior to submitting the major change request
• UCR transfer students interested in changing to a BCOE major must have been admitted to the major at point of entry, or must satisfy transfer admission and change of major requirements before earning 120 units.
• If changing in the 90-119 units category student must have the ability to complete major within 5 years of entry as a Freshmen or 3 years after entry as a Transfer student.
• Students who have earned 120 or more units are not eligible for a change of major in BCOE. NOTE: AP/IB units are excluded from maximum unit calculation.

Completed 0 to less than 45 units
Completion of ENGL 001A with C or better and completion of the following with at least 2.500 GPA:
• CHEM 001A or CHEM 01HA
• CHEM 01LA or CHEM 01HLA
• CHEM 01LB or CHEM 01HB
• CHEM 01LA or CHEM 01HLB
• MATH 009A or MATH 09HA

Completed 45 to less than 90 units
Completion of ENGL 001A with C or better and completion of the following with at least 2.500:
• BIOL 005A or BIOL 05HA
• BIOL 05LA or BIOL 05HLA
• CHEM 001A or CHEM 01HA
• CHEM 01LA or CHEM 01HLA
• CHEM 01LB or CHEM 01HB
• CHEM 01LA or CHEM 01HLB
• MATH 009A or MATH 09HA
• MATH 009B or MATH 09HB
• MATH 009C or MATH 09HC

Completed 90 to less than 120 units
Completion of ENGL 001A and ENGL 001B with C or better and completion of the following with at least 2.500:
• BIOL 005A or BIOL 05HA
• BIOL 05LA or BIOL 05HLA
• CHEM 001A or CHEM 01HA
• CHEM 01LA or CHEM 01HLA
• CHEM 01LB or CHEM 01HB
• CHEM 01LA or CHEM 01HLB
• MATH 009A or MATH 09HA
• MATH 009B or MATH 09HB
• MATH 009C or MATH 09HC
• PHYS 040A or PHYS 040HA

University Requirements
See Undergraduate Studies section.

College Requirements
See The Marlan and Rosemary Bourns College of Engineering, Colleges and Programs section.

The Bioengineering major uses the following major requirements to satisfy the college’s Natural Sciences and Mathematics breadth requirement.
1. BIOL 005A, BIOL 05LA
2. CHEM 001A, CHEM 001B, CHEM 001C
3. MATH 009A

Major Requirements
1. Lower-division requirements (84 units)
   a) BIEN 001, BIEN 010
   b) BIOL 005A, BIOL 05LA, BIOL 005B
   c) CHEM 001A, CHEM 001B, CHEM 001C, CHEM 01LA, CHEM 01LB, CHEM 01LC (or CHEM 01HA, CHEM 01HB, CHEM 01HC, CHEM 11HA, CHEM 11LB, CHEM 11HC), CHEM 008A, CHEM 008B, CHEM 08LA, CHEM 08LB, (or CHEM 08HA, CHEM 08HB, CHEM 08HLA, CHEM 08HLB)
   d) CS 009P
   e) EE 005
   f) MATH 009A, MATH 090B, MATH 090C, (or MATH 09HA, MATH 09HB, MATH 09HC)
   g) MATH 010A, MATH 010B, MATH 046
   h) PHYS 040A, PHYS 040B, PHYS 040C

2. Upper-division requirements (70 units)
   a) BIEN 101
   b) BIEN 105, BIEN 110, BIEN 120, BIEN 125, BIEN 130, BIEN 130L, BIEN 135, BIEN 140A/CHEM 140A, BIEN 155, BIEN 175A, BIEN 175B, BIEN 175C
   c) BIEN 115
   d) BIEN 111
   e) Technical electives (16 units): BIEN 136/ MIE 136, BIEN 137, BIEN 138, BIEN 140B/CHEM 140B, BIEN 142, BIEN 159/CHEM 159, BIEN 160, BIEN 165, BIEN 166, BIEN 167

Visit the Student Affairs Office in the College of Engineering or student.engr.ucr.edu for a sample program.

Lower-Division Courses
BIEN 001 Introductory Colloquium in Bioengineering
1 Colloquium, 1 hour. Colloquia on current topics in bioengineering and other related fields delivered at an introductory level. Presented by faculty members, visiting scientists, or individuals with industrial bioengineering experience. Graded Satisfactory (S) or No Credit (NC).

BIEN 010 Overview of Bioengineering
Lecture, 3 hours; discussion, 1 hour; practicum, 3 hours. Provides an overview of the various aspects of bioengineering and introduces bioengineering design. Illustrates the application of engineering principles for the design of various products to health science industries. Covers diagnostic instruments, artificial organs, biotechnology, and cell and tissue engineering. Covers engineering ethics.

Upper-Division Courses
BIEN 101 Quantitative Biochemistry
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A; CHEM 008A and CHEM 008B or CHEM 08HA and CHEM 08HLA; MATH 046. Provides bioengineering students with an in-depth experience in applying mathematical modeling and simulation methods to understand the dynamics of biochemical systems. Prepares for designing new applications of genetic engineering.

BIEN 105 Circulation Physiology
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 110. Introduces tensor and vector mathematics that describe the conservation of momentum and mass transport in biological sciences, the cardiovascular system, and pulmonary system. Includes constitutive equations, significance of fluid stress in biological vessels, and the physiological relevance of fundamental parameters. Emphasizes the relation between function and system behavior.

BIEN 110 Biomechanics of the Human Body
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 001C or CHEM 01HC; CS 010A; MATH 010A; PHYS 040B or PHYS 040H. Introduces the motion, structure, and function of the musculoskeletal system, the cardiovascular system, and the pulmonary system. Topics include applied statics, kinematics, and dynamics of these systems and the mechanics of various tissues (ligament, bone, heart, blood vessels, lung). Emphasizes the relation between function and material properties of these tissues.

BIEN 111 Advanced Statistical Methods and Research Design For Bioengineering
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 090C or MATH 09HC; consent of instructor. Covers topics in applied statistical methods typically used in bioengineering and biomechanics including random variables and probability distributions; statistical inference and null hypothesis significance testing, and Bayesian and nonparametric statistical testing. Also covers research design/execution topics relevant to bioengineering applications including factorial experimental design and ethical conduct of research. Credit is awarded for one of the following BIEN 111 or BIEN 211.

BIEN 115 Quantitative Physiology
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 110; consent of instructor is required for non-majors. Analyzes engineering aspects of physiological systems. Covers the nervous system, muscular system, respiratory system, renal system, and endocrine system based on fundamental principles of material transport across biological membrane.

BIEN 120 Biosystems and Signal Analysis
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 105. Provides basic knowledge for the quantitative analysis of the dynamic behavior of biological systems. Particular applications include neural systems, control of metabolic and hormonal systems, and design of instruments for monitoring and controlling biological systems. Topics include system theory, signal properties, control theory, and transfer functions.

BIEN 125 Biotechnology and Molecular Bioengineering
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 101. Provides an overview of biochemical processes in cells and their use in developing new products and processes. Presents cellular processes such as metabolism, protein synthesis, enzyme behavior, and cell signaling and control from an engineering viewpoint of modeling and control.
BIEN 130 Bioinstrumentation 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): concurrent enrollment in BIEN 130L; EE 005 with a grade of C- or better. Introduces basic components of instruments for biological applications. Explores sources of signals and physical principles governing the design and operation of instrument systems used in medicine and physiological research. Topics include data acquisition and characterization; signal-to-noise concepts and safety analysis; and interaction of instrument and environment.

BIEN 130L Bioinstrumentation Laboratory 2 Laboratory, 3 hours; discussion, 1 hour. Prerequisite(s): concurrent enrollment in BIEN 130; EE 005 with a grade of C- or better. Provides a laboratory experience with instrumental methods of measuring biological systems. Introduces various sensors and transducers to measure physical, chemical, and biological properties. Covers reliability, dynamic behavior, and data analysis.

BIEN 135 Biophysics and Biothermodynamics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 101, MATH 108, MATH 046, PHYS 040C or PHYS 040HC. An introduction to the application of thermodynamic principles to understanding the behavior of biological systems. Discusses biophysical properties of biomacromolecules such as proteins, nucleic acids, carbohydrates, and lipids, as well as the methods of characterizing their properties and interactions.

BIEN 136 Tissue Engineering 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): BIOL 005B, CHEM 001C or CHEM 01HC, BIEN 140A or CEE 140A; restricted to class level standing of junior, or senior; or consent of instructor. Covers progress in cellular and molecular biology and engineering. Provides the basis for advancing tissue repair and regeneration with the goal of restoring compromised tissue functions. Presents methods for cell culture, tissue design and development, manipulation of the cell/tissue microenvironment, and current strategies for functional reconstruction of injured tissues. Cross-listed with MSE 136.

BIEN 137 Advanced Biomechanics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN110, BIOL 005B, MATH 046, PHYS 040A or equivalents; or consent of instructor. Focuses on mechanical characterization of biological tissues at the cellular, organ, and system level. Explores biomechanical factors of physiological and pathological conditions.

BIEN 138 Fundamental Principles of Wound Repair 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 105, BIOL 002 or BIOL 005A, or equivalents; or consent of instructor. Provides fundamental understanding of the molecular and cellular biology of wound repair and regeneration. Focuses on the spatiotemporal roles of inflammatory cytokines; growth factors; extracellular matrix; mechanical forces; tissue cells and adult stem/progenitor cells in soft tissue repair. Topics include embryonic wound regeneration and adult skin and cardiovascular repair.

BIEN 140A Biomaterials 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 101 or BCH 100, MATH 010B, PHYS 040B or PHYS 040HB; or consent of instructor. Covers the principles of materials science and engineering with attention given to topics in bioengineering. Explores atomic structures, hard treatment, fundamentals of corrosion, manufacturing processes, and characterization of materials. Cross-listed with CEE 140A.

BIEN 140B Biomaterials 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 040B or PHYS 040HB. Covers the structure-property relations of metals, ceramics, polymers, and composites, as well as hard and soft tissues such as bone, teeth, cartilage, ligament, skin, muscle, and vasculature. Focuses on behavior of materials in the physiological environment. Cross-listed with CEE 140B.

BIEN 142 Introductory Biomedical Optical Imaging 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 040C or PHYS 040HC, and MATH 010B; or consent of instructor. Explores fundamental theory and basic design of biomedical optical imaging systems. Topics include a basic understanding of the working principles of optical components, diagnostic light-tissue interaction, and design of imaging systems to exploit the interaction of light with biological phenomena.

BIEN 155 Biotechnology Laboratory 2 Laboratory, 3 hours; discussion, 1 hour. Prerequisite(s): concurrent enrollment in BIEN 175A or a grade of “C-” or better in BIEN 175A; BIEN 101, BIEN 125. Laboratory experience in cell culture, bioreactors, optical techniques, array techniques, and separation and purification methods.

BIEN 159 Dynamics of Biological Systems 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005B, MATH 046; or consent of instructor. Covers engineering principles for the analysis and modeling of biological phenomena. Topics include molecular diffusion and transport, membranes, ligand-bioreceptor interactions, enzyme kinetics, and dynamics of metabolic pathways. Examines the application of these principles to the design of bioreactors, biosensors, chemical sensors, and artificial organs. Cross-listed with CEE 159.

BIEN 160 Biomedical Imaging 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 120. An introduction to the fundamental physics and engineering principles for medical imaging systems. Covers X-ray, ultrasound, radionuclide, magnetic resonance imaging, positron emission tomography, optical coherent tomography, and other optical methods. Includes image formation and reconstruction, image characteristics, and quality and image processing.

BIEN 165 Biomolecular Engineering 4 Lecture, 1 hour; discussion, 1 hour, term paper, 3 hours. Prerequisite(s): BIEN 135, or consent of instructor. Emphasizes engineering, biochemical, and physical concepts and technologies intrinsic to specific topics of biomolecular engineering. Introduces the history of genetic and protein engineering. Topics include biophysical and biophysical approaches, protein engineering, high-throughput screening technologies, and protein engineering with unnatural amino acids.

BIEN 166 Bioinspired Engineering For Sustainable Energy 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 140A/CEE 140A Introduces the use of concepts from basic biological sciences (including biochemistry and biophysics) for applied energy engineering. Covers biological energy conversion (including photosynthesis) and its implication for sustainable energy technologies. Discusses recent advances in biomimetic and bioinspired energy conversion.

BIEN 167 Medical Diagnostics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 130 or consent of instructor. Provides an overview of medical diagnostics. Topics include methods of biochemical detection, genotyping, DNA sequencing, medical imaging, hematology, microfluidics, epidemiology, diagnostics for point-of-care and resource-limited settings, and case studies of commercially successful diagnostic products.

BIEN 168 Bioengineering Analysis and Modeling 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 051A or CS 009A or CS 010A or MATH 010B or EE 020A or MATH 045 or MATH 046; or consent of instructor. Introduces numerical techniques for bioengineering phenomena. Topics include biomedical data handling; linear and nonlinear fitting of biological data; iterative solutions to nonlinear and transcendental biomedical problems; stochastic and deterministic models of biology; system level modeling of physiologic and basics of bioinformatic techniques.

BIEN 175A Senior Design 2 Lecture, 1 hour; practicum, 3 hours. Prerequisite(s): BIEN 010 with a grade of C- or better; BIEN 155 with a grade of C- or better, may be taken concurrently, BIEN 130L with a grade of C- or better; restricted to class level standing of senior; restricted to major(s) Bioengineering, Biomedical Engineering BS • MS. Covers the entire design process for bioengineering. Explores intellectual property, quality control, and regulatory and ethical considerations. Requires working in small teams effectively to prepare formal engineering reports, web pages notebooks, oral presentations, a project demonstration, and a business plan.

BIEN 175B Senior Design 4 Lecture, 2 hours; discussion, 1 hour; practicum, 3 hours. Prerequisite(s): BIEN 175A; restricted to class level standing of senior. Covers the entire design process for bioengineering. Explores intellectual property, quality control, and regulatory and ethical considerations. Requires working in small teams effectively to prepare formal engineering reports, web pages notebooks, oral presentations, a project demonstration, and a business plan.

BIEN 175C Senior Design 4 Lecture, 2 hours; discussion, 1 hour; practicum, 3 hours. Prerequisite(s): BIEN 175B. Covers the entire design process for bioengineering. Explores intellectual property, quality control, and regulatory and ethical considerations. Requires working
in small teams effectively to prepare formal engineering reports, web pages, notebooks, oral presentations, a project demonstration, and a business plan.

BIEN 190 Special Studies 1 to 5 Individual study. 3 to 15 hours. Prerequisite(s): upper-division standing; consent of instructor and department chair. Provides individual study to meet special curricular needs. Course is repeatable to a maximum of 9 units.

BIEN 197 Research For Undergraduates 1 to 4 Laboratory, 3 to 12 hours. Prerequisite(s): consent of instructor and Bioengineering undergraduate program advisor. Directed research on a topic relevant to bioengineering. Requires a final written report. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BIEN 198 R’course: Variable Topics 1 Activ- ity hours vary per R’Course proposal. Prerequisite(s): permission needed from department; sophomore standing or better. An opportunity for UCR undergraduate students to develop leadership skills, innovate the undergraduate curriculum, and promote democratic, experiential education. Original course topics are variable and unique from other departmental course offerings, designed to highlight the student facilitators’ expertise while working closely with a faculty mentor. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as topics change to a maximum of 8 units.

Graduate Courses

BIEN 201 Mathematical Methods For Bioengineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 146A; or equivalent; first-year standing in the graduate program in Bioengineering. For BIEN 201 online section: enrollment in the online Masters-in-Science in Engineering program; graduate standing. Provides a fundamental grounding in advanced mathematics to determine solutions to problems such as biotransport and bioreaction kinetics. Topics include solutions to linear differential equations, analytical methods for partial differential equations, similarity transforms and perturbation methods, regression techniques, and related error analysis.

BIEN 211 Advanced Statistics and Research Design For Bioengineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 009C or MATH 09HC; or equivalent; graduate standing or consent of instructor. Covers topics in applied statistical methods typically used in bioengineering and biomedicine including random variables and probability distributions; statistical inference and null hypothesis significance testing; and Bayesian and nonparametric statistical testing. Also covers research design/execution topics relevant to bioengineering applications including: factorial experimental design and ethical conduct of research. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following BIEN 211 or BIEN 111.

BIEN 223 Engineering Analysis of Physiological Systems 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): course work in basic biology, calculus, chemistry, and physics; graduate standing or consent of instructor. BIEN 223 online section: enrollment in the Online Master-in-Science in Engineering program. Provides a bioengineering approach to the physiological properties and interactions of various mammalian organ systems. Covers the nervous, muscular, cardiovascular, respiratory, and renal systems. Emphasizes the physical and engineering principles governing these systems by applying quantitative and analytical approaches. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

BIEN 224 Cellular and Molecular Engineering 4 Lecture, 2 hours; discussion, 1 hour; practicum, 3 hours. Prerequisite(s): graduate standing or consent of instructor. BIEN 224 online section: enrollment in the Online Master-in-Science in Engineering program. Emphasizes biophysical and engineering concepts intrinsic to specific topics at the cellular and molecular level. Includes receptor-ligand dynamics in cell signaling and function; DNA replication and RNA processing; cellular and protein sorting; control of gene expression; membrane structure, transport and traffic; biological signal transduction; and mechanics of cell division. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with MSE 246.

BIEN 225 Self Assembly in Engineered Tissue 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 009A or CS 010A; BIOL 113 or BIOL 114; graduate standing or consent of instructor. An overview of cellular signaling, motility, adhesion, and invasion. Studies how these mechanisms give rise to tissue morphogenesis, form, structure, and homeostatic organization. Addresses application of these concepts in tissue engineering. Introduces classical models for cell behavior. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

BIEN 227 Biophotonics: Laser-Tissue Interactions and Therapeutic Applications 3 Lecture, 2 hour; research, 5 hours; extra reading, 1 hour; written work, 1.5 hours. Prerequisite(s): BIOL 005C, CHEM 001C, CS 005, MATH 046, PHYS 002C, or equivalents. Provides an overview of various types of interactions between lasers and biological tissues. Addresses methods of optical properties measurements, mathematical modeling of light propagation, and selected therapeutic applications of lasers. Includes one or two field trips to medical laser centers to observe laser treatment procedures.

BIEN 228 Biophotonics: Optical Diagnosis and Measurements 3 Lecture, 2 hour; research, 5 hours; extra reading, 1 hour; written work, 1.5 hours. Prerequisite(s): BIEN 227. Covers the fundamentals underlying optical diagnostic procedures, including absorption and scattering-based techniques. Also addresses the physics of optical tweezers and their applications in biological sciences.

BIEN 233 Computational Modeling of Biomolecules 4 Lecture, 2 hours; workshop, 2 hours. Prerequisite(s): BIOL 005B; CHEM 008B and CHEM 088L or CHEM 088H and CHEM 088LB; MATH 090C or MATH 09HC; PHYS 040B or PHYS 040HB; basic computer programming experience. Introduces computational methods for the quantitative analysis of biomolecular structures at atomic resolution. Aids in understanding the physicochemical properties of biomolecular function, the prediction of biological properties, and the design of new experiments. Forms the basis for structure-based design of proteins with tailored properties and inhibitors of protein function. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

BIEN 234 Orthopaedic Regenerative Engineering and Mechanobiology 4 Lecture, 4 hours. Prerequisite(s): BIEN 110, BIEN 140A, BIOL 005A, and BIOL 005B, or equivalents; graduate standing or consent of instructor. Introduces advanced biomechanics and mechanobiology of skeletal tissues including bone and cartilage. Provides an understanding of structure-function relationship in biological tissues. Focuses on bone and cartilage regenerative engineering approaches based on scaffolds, stem cells, and mechanotransduction.

BIEN 235 Vascular Biomechanics and Engineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 002, BIOL 005A, BIEN 105, or equivalent; graduate standing or consent of instructor. Provides detailed understanding of the crucial role of mechanical forces in guiding blood vessel formation and function in human health and disease. Topics include embryogenesis, wound repair, atherosclerosis, and cancer. Addresses the principles of biomaterials science and regenerative medicine for promoting therapeutic neovascularization.

BIEN 236 Nanomaterials For Regenerative Medicine 4 Lecture, 4 hours. Prerequisite(s): BIOL 005C, CHEM 001C (or CHEM 01HC), MSE 001, or equivalents; graduate standing or consent of instructor. Covers recent advances in nanomaterial synthesis, fabrication, and characterization. Focuses on the medical applications of nanomaterials and nanotechnologies. Addresses methods of synthesis of nanomaterials such as nanoparticles, nanotubes, and nanofibers. Includes critical design criteria and assessment methods for properties of nanomaterials to meet medical requirements. Cross-listed with MSE 236.

BIEN 237 Medical Diagnostics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Provides an in-depth analysis of current topics in medical diagnostics. Focuses on critical reviews of recent journal articles on diagnostics and case studies of recent commercial diagnostic products. Topics include methods of biochemical detection, genotyping, DNA sequencing, medical imaging, hematology, microfluidics, epidemiology, and diagnostics for point-of-care and point-of-lab settings. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

147
BIEN 242 Advanced Biomedical Optical Imaging 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 142 or equivalent; graduate standing or consent of instructor. Examines advanced theory and optimized design of biomedical optical imaging systems. Topics include a full understanding of the working principles of optical components, diagnostic light-tissue interaction, and design of imaging systems to exploit the interaction of light with biological phenomena. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

BIEN 245 Optical Methods in Biology, Chemistry, and Engineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 109 or equivalent; graduate standing; consent of instructor. Covers the origin of fluorescence and other emission processes that modulate the characteristics of molecular emissions. Presents emission-based analytical and bioanalytical methods and techniques. Reviews state-of-the-art instrumentation, including their applicability, limitations, and source. Also provides interpretation and meaning of the measured signals as applied to biological systems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes. Cross-listed with MSE 226.

BIEN 249 Integration of Computational and Experimental Biology 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005B, MATH 010B, MATH 046, PHYS 040C or PHYS 040HC with graduate standing. BIEN 249/CEE 249 online section: enrollment in the Online Master-in-Science in Engineering program. A multidisciplinary introduction to computational methods used to analyze experimental biological data. Introduction to mathematical concepts needed to understand protein structure and dynamics, protein-protein interactions (structures and networks), gene regulatory networks, signal transduction networks, metabolic networks, and kinetic modeling of cellular processes. Also covers techniques used to derive experimental data. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CEE 249.

BIEN 251 Biophotonics: Optical Microscopy and its Biological Applications 3 Lecture; 2 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Examines the fundamentals of optical system design and system integration in light microscopy. Covers design components, including light sources, lenses, mirrors, dispersion elements, optical fibers, and detectors. Also covers optical system analysis, transfer functions, magnification, resolution, contrast, and molecular, cellular, organ, and organism applications.

BIEN 260 Special Topics in Biomechanical Imaging 1 or 2 Seminar, 1 hour; term paper, 0 or 3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on advanced methods for the determination of structure, dynamics, and interactions of biomolecules. Utilizes multidimensional and multinuclear NMR spectroscopy. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

BIEN 261 Special Topics in Computational Imaging 1 or 2 Seminar, 1 hour; term paper, 0 or 3 hours. Prerequisite(s): graduate standing; consent of instructor. Focuses on various advanced methods for the determination of structure, dynamics, and interactions of biomolecules. Utilizes multidimensional and multinuclear NMR spectroscopy. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

BIEN 262 Special Topics in Biosignaling s. Prerequisite(s): graduate standing or consent of instructor. Focuses on current research in cell signaling and control, including G protein-coupled receptors, signal transduction and cytoskeletal and cell adhesion, and cell metabolism. Students who submit a term paper receive credit for 2 units; other students receive credit for 1 unit. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

BIEN 263 Special Topics in Biocomputation 1 or 2 Seminar, 1 hour; term paper, 0 or 3 hours. Prerequisite(s): graduate standing; consent of instructor. Focuses on various advanced methods for computational studies of biomolecules and simulations. Includes Brownian dynamics simulations; Monte Carlo methods; normal mode analysis; electrostatic calculations; and free energy calculations. Students who submit a term paper receive credit for 2 units; other students receive credit for 1 unit. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

BIEN 264 Biotransport Phenomena 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 105 or equivalent; graduate standing or consent of instructor. BIEN 264 online section: enrollment in the Online Master-in-Science in Engineering program. Covers the mathematical expression and modeling of principles underlying the transport processes of biological systems and biomedical engineering processes. Emphasizes momentum, mass transport, and interpretation of these processes. Topics include advanced development of governing conservation equations and the appropriate constitutive equations for transport in blood and tissue. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

BIEN 265 Special Topics in Biomedical Optical Imaging 1 or 2 Seminar, 1 hour; term paper, 0 or 3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on advanced methods for the determination of structure, dynamics, and interactions of biomolecules. Addresses novel sources of optical contrast, current developments in optical imaging instrumentation, and recent advances in their application to biomedicine. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

BIEN 266 Special Topics in Biological Nuclear Magnetic Resonance Spectroscopy 1 or 2 Seminar, 1 hour; term paper, 0 or 3 hours. Prerequisite(s): graduate standing; consent of instructor. Focuses on various advanced methods for the determination of structure, dynamics, and interactions of biomolecules. Utilizes multidimensional and multinuclear NMR spectroscopy. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

BIEN 267 Special Topics in Biophotonics 1 or 2 Seminar, 1 hour; term paper, 0 or 3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on advanced science and technology methods that use electromagnetic radiation for medical and biomedical applications. Covers photonic devices, detection, microscopy and spectroscopy techniques, and diagnostics and mechanistic ideas on photodynamic therapy. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

BIEN 268 Bioengineering Experimentation and Analysis 2 Laboratory, 3 hours; discussion, 1 hour; written work, 2 hours. Prerequisite(s): BIOL 005C, CHEM 001C, CS 005, MATH 046, PHYS 002C or equivalents or consent of instructor. Introduces measurement principles and data acquisition methods related to biomechanics and biochemical and bioelectrical signals from living systems. Addresses the fundamental mechanisms underlying the operation of various types of sensors and the modern instruments illustrating noise analysis, filtering, signal processing, and conditioning. Includes experiments aimed at investigating physical responses of cells and tissues to a variety of stimuli.

BIEN 269 Special Topics in Optical Measurements and Photomedicine 2 Discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on the applications of optical trapping methods to characterize the mechanical and electromechanical properties of biological cells and membranes, as well as to quantify molecular interactions. Also covers the use of optical probes for cellular and tissue imaging, as well as optical therapy. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as content changes.

BIEN 270 Transport With Reactions in Biological Systems 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 264 or equivalent; graduate standing or consent of instructor. For BIEN 270 online section, enrollment in the Online Master-in-Science in Engineering program. Covers the mathematical expression and modeling of principles underlying the transport processes of biological systems reactions and biomedical engineering processes involving reactions. Topics include advanced development of chemical kinetics and reaction mechanisms of biological systems; enzymatic reactions; Michaelis-Menten kinetics; and cell-surface ligand-receptor kinetics. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.
BIEN 272 Special Topics in Biomaterials and Tissue Engineering 1 to 2 Seminar, 1 to 2 hours; term paper, 0 to 3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on advanced biomaterials and tissue engineering for medical applications. Explores the design, processing, characterization, and evaluation of biomaterials. Examines current development in novel materials and recent advances in their applications in tissue engineering, drug delivery, gene therapy, cell therapy, medical devices, and implants. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable as content changes to a maximum of 30 units. Cross-listed with MSE 280.

BIEN 273 Special Topics in Regenerative Engineering and Biomechanics 2 Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on advanced regenerative engineering and biomechanics in the skeletal system. Examines biomechanics of skeletal system at the tissue and cell levels utilizing molecular biology approaches. Develops and implements regenerative methodologies for repairing damaged skeletal tissues by a thorough understanding in mechanobiology. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 30 units.

BIEN 274 Special Topics in Endothelial Biomedicine 2 Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Presents an integrated view of the fundamental role of endothelial cells in regulating vascular tone, inflammation, and repair in both health and disease. Encompasses the principles related to developmental biology, molecular and cellular biology, biomechanics, bioengineering, and translational medicine. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 30 units.

BIEN 275 Magnetic Resonance Imaging 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 111 with a grade of C- or better; or equivalent; graduate standing; or consent of instructor. Covers physics principles and engineering fundamentals, advanced techniques, and major biomedical approaches of magnetic resonance imaging (MRI). Focuses on fundamentals and general methodology of MRI. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

BIEN 276 Intro to Neuroimaging With MRI 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; or consent of instructor. Focuses on the use of magnetic resonance imaging (MRI) in the study of the brain. Topics include structural imaging, functional imaging, diffusion tensor imaging, and brain connectivity. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with PSYC 276.

BIEN 286 Colloquium in Bioengineering 1 Colloquium, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Colloquia on current research topics in bioengineering and other related fields. Presented by faculty members and visiting scientists. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BIEN 290 Directed Studies 1 to 6 Individual Study, 3 to 18 hours. Prerequisite(s): graduate standing consent of instructor and graduate advisor. Faculty-directed individual study of selected topics in Bioengineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 9 units.

BIEN 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor. Provides research opportunities for selected problems in bioengineering. Conducted under faculty supervision. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

BIEN 298 Individual Internship 1 to 12 Internship, 2 to 24 hours; written work, 1 to 12 hours. Prerequisite(s): graduate standing; consent of instructor. An individual apprenticeship in bioengineering with an approved professional individual or organization and academic work under the direction of a faculty member. Requires a written report. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

BIEN 299 Research For the Thesis Or Dissertation 1 to 12 Research, 3 to 36 hours. Prerequisite(s): graduate standing; consent of instructor. Designated for research in bioengineering for the M.S. thesis or Ph.D. dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Course

BIEN 302 Teaching Practicum 1 to 4 Practicum, 3 to 12. Prerequisite(s): graduate standing; appointment as a teaching assistant or associate in Bioengineering Provides supervised teaching in undergraduate courses. Graded Satisfactory (S) or No Credit (NC).

BIEN 401 Fundamentals of Proposal Preparation and Ethical Standards in Bioengineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing. An introduction to effective proposal preparation and writing for bioengineering-related research. Also covers ethical standards of scientific research related to bioengineering. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

BIEN 402 Effective Writing For Bioengineering Research Publications 4 Lecture, 4 hours. Prerequisite(s): BIEN 401. An introduction to effective manuscript writing for bioengineering-related research publications.

Bioengineering Interdepartmental Graduate Program

Xiaoping Hu, Ph.D., Chair
Department Office, 203 MSE
(951) 827-2925; xiaoping.hu@ucr.edu
https://www.bioeng.ucr.edu/

Distinguished Professors
Mark Alber, Ph.D. (Mathematics)
Bir Bhanu, Ph.D. (Electrical and Computer Engineering)
Sarjeet Gill, Ph.D. (Cell Biology & Neuroscience/Entomology)
David Lo, Ph.D. (Biomedical Sciences)
Ashok Mulchandani, Ph.D. (Chemical & Environmental Engineering)
Michael Prippung, Ph.D. (Chemistry)
Kambiz Vafai, Ph.D. (Mechanical Engineering)
Charles Wyman, Ph.D.
(Chemical & Environmental Engineering)

Professors
Michael E. Adams, Ph.D. (Cell Biology & Neuroscience/Entomology)
G. John Andersen, Ph.D. (Psychology)
Christopher J. Bardeen, Ph.D. (Chemistry)
David Bocian, Ph.D. (Chemistry)
Richard Cardullo, Ph.D. (Cell Biology & Neuroscience/Entomology)
Quan Cheng, Ph.D. (Chemistry)
Sean Cutler, Ph.D. (Botany & Plant Sciences)
Iryna Ethell, Ph.D. (Biomedical Sciences)
Byron Ford, Ph.D. (Biomedical Sciences)
Thomas Girke, Ph.D. (Biological Informatics)
Tao Jiang, Ph.D. (Computer Science)
Cynthia K. Larive, Ph.D. (Chemistry)
Stefano Lonardi, Ph.D. (Computer Science)
Manuela Martins-Green, Ph.D. (Chemical & Environmental Engineering)
Umber Mohideen, Ph.D. (Physics & Astronomy)
Thomas H. Morton, Ph.D. (Chemistry)
Eugene Nothnagel, Ph.D. (Botany & Plant Sciences)
Cengiz S. Ozkan, Ph.D.
(Mechanical Engineering)
Mihri Ozkan, Ph.D. (Electrical and Computer Engineering)
Maurizio Pellecchia, Ph.D. (Biomedical Sciences)
Aaron Seitz, Ph.D. (Psychology)
Thomas F. Stahovich, Ph.D. (Mechanical Engineering)
Prudence Talbot, Ph.D. (Cell Biology and Neuroscience)
Harry W. K. Tom, Ph.D. (Physics & Astronomy)
Jianzhong Wu, Ph.D.
(Chemical & Environmental Engineering)

Associate Professors
Devin K. Binder, Ph.D. (Biomedical Sciences)
Anupama Dahanukar, Ph.D. (Entomology)
Martin I. Garcia-Castro, Ph.D. (Biomedical Sciences)
Elaine Haberer, Ph.D. (Electrical and Computer Engineering)
Michael Marsella, Ph.D. (Chemistry)
Masaru P. Rao, Ph.D. (Mechanical Engineering)
Khaleel A. Razak, Ph.D. (Psychology)
Seema Tiwari-Woodruff, Ph.D. (Biomedical Sciences)
Nicole I. zur Nieder, Ph.D. (Molecular, Cell and Systems Biology)
Assistant Professors
Nicholas DiPatrizio, Ph.D. (Biomedical Sciences)
Elisa Franco, Ph.D. (Mechanical Engineering)
Xin Ge, Ph.D. (Chemical & Environmental Engineering)
Hideaki Tsutsui, Ph.D. (Mechanical Engineering)

Program Overview
The Bioengineering Interdepartmental Graduate Program (BIG) is the umbrella for graduate level research efforts associated with the faculty in the Department of Bioengineering as well as other faculty at UCR who have an interest in training graduate students in bioengineering. The program offers graduate instruction leading to M.S. and Ph.D. degrees in Bioengineering.

Our interdisciplinary program combines a solid fundamental foundation in biological and biomedical sciences and engineering, and aims to equip the students with diverse communication skills and training in the most advanced quantitative bioengineering research so that they can become leaders in their respective fields. The result is a rigorous, but exceptionally interactive and welcoming educational training for Bioengineering graduate students.

The interdepartmental aspect of the program allows students to develop skills related to bioengineering with faculty in a broad range of disciplines. The research vision is to build strength from experts in biochemistry, biology, biophysics, and engineering to focus on critical themes that impact bioengineering.

Contributing departments include: Bioengineering, Biochemistry, Biomedical Sciences, Botany & Plant Sciences, Cell Biology & Neuroscience, Chemistry, Chemical & Environmental Engineering, Computer Science, Electrical and Computer Engineering, Entomology, Mechanical Engineering, Physics & Astronomy, and Psychology.

The five research focus areas in the department are: (I) biomaterials and regenerative medicine, (II) biomedical imaging, (III) computational bioengineering, (IV) molecular and cellular engineering, and (V) neuroengineering.

Other research areas include: high-throughput screening systems, structural bioinformatics, microfluidics, charge transfer in biological and biomimetic systems, immunophysics, auditory bioengineering, molecular mechanisms of platelets activation, fatty acid contributions to obesity and diabetes, brain imaging, and bioseparations.

Please visit the UCR website to determine the research emphasis of the various participating faculty. The research efforts of faculty in the Department of Bioengineering can be found at https://www.bioeng.ucr.edu/.

Combined B.S. + M.S. Five-Year Program
The college offers a combined B.S. + M.S. program in Bioengineering designed to lead to a Bachelor of Science degree as well as a Master of Science degree in five years. Applicants for this program must have a high school GPA above 3.6, complete the Entry Level Writing Requirement before matriculation, and have sufficient mathematics preparation to enroll in calculus in their first quarter as freshmen.

Interested students who are entering their junior year should check with their academic advisor for information on eligibility and other details.

Students in the B.S. + M.S. program may use units from their last two technical electives from their undergraduate course work towards their M.S. degree in addition to their B.S. degree. Students may not choose which technical elective units they will use. Only the last two courses will count. To transfer the units to the M.S. degree, students must see the department to submit the proper paperwork.

Admission
In addition to the following requirements, all applicants must meet the general requirements as set forth in this catalog under the Graduate Studies section.

Application to the Big program is limited to the fall quarter.

Applicants will need to have completed coursework in chemistry, physics, math, biochemistry and biology, and engineering. Students without an undergraduate engineering degree should have excellent training in mathematics and the physical sciences.

Specific requirements for students are:
- Two years of mathematics (equivalent UCR course = MATH 009A, MATH 009B, MATH 009C, MATH 010A, MATH 031, MATH 046).
- One year of physics (equivalent UCR course = PHYS 002A, PHYS 002B, PHYS 002C with lab).
- One year of inorganic chemistry including lab (equivalent UCR course = CHEM 001A, CHEM 001B, CHEM 001C).
- One year of organic chemistry including lab (equivalent UCR course = CHEM 112A, CHEM 112B, CHEM 112C).
- One course in biochemistry (equivalent UCR course = BCH 100 or BCH 110A or BCH 110B or BCH 110C).
- One course in molecular biology (equivalent UCR course = BCI 110C or BIOL 107).

Students with strong academic records may be admitted with limited coursework deficiencies, provided that these are satisfied by appropriate coursework taken during the first two years of graduate study.

Students may be admitted to either the Master’s or the Ph.D. program. Students in the Master’s program may petition for admission into the Ph.D. program.

Master’s Program
The M.S. program is ideal for professionals seeking greater depth in several areas of bioengineering. The degree requires a minimum of 36 quarter credits and may be completed in three to four academic quarters of full-time study. Both thesis and non-thesis options are offered for the degree program (Plan I, Thesis and Plan II, Comprehensive Examination).

Student must request permission to pursue an M.S. in Bioengineering while simultaneously pursing a Ph.D. in a program other than Bioengineering.

Normative Time to Degree
Two years.

Plan I (Thesis)
In addition to the following requirements, all applicants must meet the requirements for Plan I as set forth in this catalog under the Graduate Studies section Master’s Degree Plan I (Thesis).

Course Requirements
Students must satisfy the core course requirements (see Core Courses). Students must enroll in BIEN 286, Colloquium in Bioengineering, each quarter it is offered.

Plan II (Comprehensive Examination)
This plan is designed primarily for students who do not intend to pursue a Ph.D. in Bioengineering.

In addition to the following requirements, all applicants must meet the requirements for Plan I as set forth in this catalog under the Graduate Studies section Master’s Degree Plan II (Comprehensive Examination).

Course Requirements
Students must satisfy the core course requirements (see Core Courses). Students must enroll in BIEN 286, Colloquium in Bioengineering, each quarter it is offered.

The comprehensive examination is prepared and administered by the Graduate Examination Committee. The student is allowed to choose between an oral and a written examination. The examination covers a broad range of topics chosen from upper division undergraduate courses and graduate courses taken by M.S. students.

Subsequent to the examination, the Graduate Examination Committee issues a passing or failing grade. Students who fail in the first attempt may retake the examination at the next scheduled comprehensive examination period. No more than two attempts to pass the exam are allowed.

The M.S. Comprehensive Examination may be held at the end of any quarters throughout the year. The committee to administer the M.S. Comprehensive Examination is selected by the Graduate Advisor and approved by the Graduate Program Committee.

Doctoral Program
The Ph.D. program is heavily integrated with research activities and is intended for well-qualified individuals who wish to pursue leadership careers in academic or industrial research. The Ph.D. program requires approximately three years of full-time study beyond the master’s degree. In consultation with a faculty advisor, Ph.D. students plan their program of study.

The doctoral dissertation is based on original research in the field of specialization. An M.S. degree is not a prerequisite for entering the Ph.D. program.

The doctoral program includes a teaching requirement, an oral and written qualifying examination, and a dissertation.

Normative Time to Degree
Five years.
Written Qualifying Examination
Students in the Ph.D. program must pass a written qualifying examination that covers the fields of engineering and biology that relate to the student's dissertation project.

Oral Qualifying Examination
Following successful completion of the written examination, candidates for the doctoral degree must pass an oral examination, normally within three quarters of the date of their written exam. The oral examination is scheduled only after the candidate has written a proposal detailing the rationale, specific aims and approaches to be undertaken for her/his dissertation research.

Dissertation
A written dissertation is completed by each student.

Candidates for the degree of Ph.D. may be required to defend the dissertation in a public, oral presentation at a time announced to members of the University community.

Course requirements
To ensure that graduate students in the Bioengineering program have advanced knowledge in mathematical, engineering, and biological principles that form the foundation for bioengineering, all M.S. and Ph.D. students are required to complete the following course program. Students who have completed these (or equivalent) courses elsewhere may petition to have partial waiver of course requirements or some of their units transferred (see the Graduate Division policy for transferring course units). Competency in these areas will be tested as part of the comprehensive exam for M.S. students and in the written preliminary examination for Ph.D. students.

The overall course curriculum includes courses in core bioengineering topics (3), mathematical and statistical methods (2), bioscience (1), general engineering (1), and professional development.

Bioengineering Core
Every student must complete a program of study that includes:

A. 2 courses from one of 5 bioengineering research focus areas (listed in Program Overview) in order to increase the depth of knowledge in a bioengineering research specialty

B. 1 course from one of the other bioengineering research focus areas to increase the student's breadth of knowledge.

The courses in each of the research focus areas are as follows:

I. Biomaterials and Regenerative Medicine: BIEN 234, BIEN 235, BIEN 236
II. Biomedical Imaging: BIEN 227, BIEN 242, BIEN 245, BIEN 275
III. Computational Bioengineering: BIEN 223, BIEN 249, BIEN 264, BIEN 270
IV. Neuroengineering: BIEN 275, BIEN 276
V. Molecular and Cellular Engineering: BIEN 224, BIEN 225

A single course can be used to satisfy either requirement A or B, but not both.

Mathematical and statistical methods
All graduate students must complete the following two courses in order to reach graduate-level mastery of mathematical and statistical methods used in bioengineering: BIEN 201, BIEN 211.

Bioscience coursework
All graduate students must complete one graduate-level bioscience class chosen from: BCH 210, BCH 211, BCH 212, BIOL/CMBD 200, BIOL/CMBD 201, BIOL 203, BIOL 221/MCBL 221/PLPA 226, NRSC 200A, CMBD 207.

Engineering coursework
All graduate students must complete one graduate-level course in a more traditional engineering topic from the following list: BIEN 264, BIEN 270, CEE 238A, CEE 210, CEE 212, EE 206, EE 217, EE 233, EE 217, EE 240, EE 241, EE 243, EE 244, ME 220, ME 240A, ME 241A, ME 261, ME 266, ME 267, ME 270, ME 271, ME 272, MSE 208A, MSE 208B, MSE 229A, MSE 238.

The course used to fulfill this requirement should be closely connected to the courses chosen for the student’s chosen primary bioengineering research focus area.

Professional development training
All graduate students must complete professional development through the following mechanisms:

A. BIEN 286. This course is required every quarter in which it is offered.

B. BIEN 401. Ph.D. students must enroll in this course during their first year.

C. BIEN 402. M.S. students must enroll in this course during their first year; Ph.D. students must enroll in the course before attempting their Oral Qualifying Examination.

Substitutions or other alterations to the overall course requirements require approval from the Bioengineering Graduate Advisor.

Other courses may be substituted but must be approved by the Bioengineering Graduate Advisor.

Additional courses may be required by the Advisory Committee depending on the student's background and fields of interest.

With the exception of BIEN 402 for Ph.D. students, M.S. and Ph.D. students are expected to complete course requirements for the programs within their first year of residence. Exceptions to this timeline require approval from the Bioengineering Graduate Advisor.

Course Descriptions All Bioengineering courses are listed and described under Bioengineering.

Biological Sciences

Subject abbreviation: BLSC
College of Natural and Agricultural Sciences

The Biological Sciences interdepartmental major is not currently accepting new students. For more information, contact CNAS Undergraduate Academic Advising Center, 1223 Pierce Hall, (951) 827-7294.

Biology

Subject abbreviation: BIOL
College of Natural and Agricultural Sciences

Joel L. Sachs, Ph.D., Department Chair
Department Office, Boyce Hall 5404
(951) 827-6357; neob.uci.edu

Professors
Richard A. Cardullo, Ph.D.
Theodore Garland, Jr., Ph.D. Distinguished Professor
Kimberly A. Hammond, Ph.D.
Timothy E. Higham, Ph.D.
Helen M. Regan, Ph.D.
David N. Reznick, Ph.D. Distinguished Professor
Joel L. Sachs, Ph.D.
Wendy G. Saltzman, Ph.D.

Professors Emeriti
Michael F. Allen, Ph.D.
Carlton R. Bowell, Ph.D.
Mark A. Chappell, Ph.D.
Daphne Fairbairn, Ph.D.
Roger D. Farley, Ph.D.
Leah T. Haimo, Ph.D.
Bradley C. Hyman, Ph.D.
Leonard P. Nunney, Ph.D. (Professor of the Graduate Division)
Edward G. Platzer, Ph.D. (Biology/Nematology)
Mary V. Price, Ph.D.
Derek A. Roff, Ph.D. Distinguished Professor
John T. Rotenberry, Ph.D.
Clay A. Sassaman, Ph.D.
Mark S. Springer, Ph.D. Distinguished Professor
Nickolas M. Waser, Ph.D.

Associate Professors
Kurt Anderson, Ph.D.
Alan Brelsford, Ph.D.
Polly Campbell, Ph.D.
Christopher Clark, Ph.D.

Assistant Professors
Lucy Delaney, Ph.D.
Natalie Holt, Ph.D.
Daniel Moen, Ph.D.
Kate Ostevik, Ph.D.
Nicole Rafferty, Ph.D.
Kieran Samuk, Ph.D.
Marko Spasojevic, Ph.D.

Assistant of Teaching
Elisa Cabrera Guzman, Ph.D.

Adjunct Faculty
John Gatesy, Ph.D.
Cheryl Y. Hayashi, Ph.D.
Marlene Zuk, Ph.D.
Cooperating Faculty
Khaleel A. Razak (Psychology)
Emma Aronson, Ph.D. (Microbiology & Plant Pathology)
Janet Franklin, Ph.D. (Botany and Plant Sciences)
Sydney Glassman, Ph.D. (Microbiology & Plant Pathology)
Erica Heinrich (SOM)
Darrel Jenerette, Ph.D. (Botany and Plant Sciences)
Daniel Koenig (Botany & Plant Sci)
Loralie Larios, Ph.D. (Botany and Plant Sciences)
Amy Litt, Ph.D. (Botany and Plant Sciences)
Paul Nabbity, Ph.D. (Botany and Plant Sciences)
Jessica Purcell, Ph.D. (Entomology)
Erin Rankin, Ph.D. (Entomology)
Louis Santiago, Ph.D. (Botany and Plant Sciences)
Danelle Seymour (Botany & Plant Sci)
Jason Stajich, Ph.D. (Microbiology & Plant Pathology)
Loralee Larios, Ph.D. (Botany and Plant Sciences)
Erica Heinrich (SOM)
Janet Franklin, Ph.D. (Botany and Plant Sciences)
Emma Aronson, Ph.D. (Microbiology & Plant Sciences)
Khaleel A. Razak (Psychology)
Tracy L. Kahn, Ph.D. (Oncology)
Hollis Woodard, Ph.D. (Entomology)

**Major**

The Department of Evolution, Ecology, and Organismal Biology offers B.A. and B.S. degrees in Biology. Both programs are based on the conviction that broad undergraduate training in biology, mathematics and the physical sciences, together with study in the humanities and social sciences, are fundamental to the education of a biologist. In addition to English composition, humanities, social sciences and the Life Sciences core curriculum (see below, Major Requirements), both degrees require 36 units of upper-division (numbered 100-199) biology courses. The degrees differ in the humanities and social sciences requirements; also 16 units of a foreign language are required for the B.A., whereas the B.S. requires 16 additional units in substantive courses in biology or related fields.

The research and teaching of the Department of Evolution, Ecology, and Organismal Biology includes different levels (e.g., molecules, cells, organisms, populations, communities) and processes (e.g., development, evolution) of biological organization. An overview is presented in the introductory courses (BIOL 005A, BIOL 05LA, BIOL 005B, and BIOL 005C), and emphasis is placed on the unifying principles of the discipline.

Because of the diversity within biology and the wide range of career options, much latitude is allowed in selecting upper-division biology courses for the 36 units required for the major. Each student can select courses and plan a program of study to meet her/his specific interests and career goals. For assistance with this, faculty advisors are available in The Department of Evolution, Ecology, and Organismal Biology. The section below, Programs of Specialization, is provided as a guide for course selection for graduate schools, medical and health science professional schools and the broad range of careers that are possible with the Biology major.

The 36 upper-division units are selected from a list which includes courses offered by the Department of Evolution, Ecology, and Organismal Biology (BIOL 100-199) and a limited number of courses in Biochemistry (BCH), and Cell Biology and Neuroscience (CBNS). Qualified undergraduates (GPA 3.0 or above) may participate in graduate-level biology seminar courses with consent of the instructor, and up to 4 units (with letter grade) may be included in the major.

Those who choose to obtain a B.S. degree have as a college requirement an additional 16 units in upper-division biology courses and/or substantive courses in a field or fields related to the major. The purpose of this related area is to add strength and breadth to the major and to meet specific requirements for postgraduate study or a chosen career. The substantive courses in fields related to the major may be lower or upper division, but they usually have science or mathematics prerequisites (e.g., CBNS 120/PSYC 120, CHEM 005, STAT 011, MATH 009C).

The Thomas Haider Program at the UCR School of Medicine

Students in the Biology major and all others at UCR are eligible to complete admission requirements and apply for up to 24 positions reserved for UCR students in the UCR School of Medicine. Students eligible to apply to this unique pathway into the UCR medical school, called the Thomas Haider Program at the UCR School of Medicine, are those who attend UCR for at least six consecutive quarters and complete their bachelor’s degree at UCR. Information on this program and general admission to the UCR medical school is provided at medschool.ucr.edu, in the school’s section of this catalog, in the medical school Student Affairs Office [162ZA School of Medicine Education Building, (951) 827-4334], and at orientation meetings held at UCR.

**University Requirements**

See Undergraduate Studies section.

**College Requirements**

See College of Natural and Agricultural Sciences, Colleges and Programs section.

**Major Requirements**

Some of the following requirements for the major in Biology may also fulfill the College’s breadth requirements. Consult with an academic advisor for course planning.

1. **Life Sciences core curriculum (68-72 units)**
   a) BIOL 005A, BIOL 05LA or BIOL 020, BIOL 005B, BIOL 005C
   b) CHEM 001A, CHEM 001B, CHEM 010C, CHEM 01LA, CHEM 01LB, CHEM 01LC
   c) CHEM 008A and 08LA or CHEM 08HA and CHEM 8HLA, CHEM 008B and CHEM 08LB or CHEM 08HB and CHEM 8HLB, CHEM 008C and CHEM 08LC or CHEM 08HC and CHEM 8HLC
   d) MATH 007A or MATH 009A, MATH 007B or MATH 009B
   e) PHYS 002A or PHYS 002HA, PHYS 002B or PHYS 002HB, PHYS 002C or PHYS 002HC, PHYS 02LA or PHYS 02HLA, PHYS 02LB or PHYS 02HLB, PHYS 021C or PHYS 02HLC
   f) STAT 010
   g) BCH 100 or BCH 110A or BCH 110HA

The core curriculum must be completed with a grade point average of 2.0 or better and no grade lower than “C-”. If a grade of D or F is received in two core curriculum courses, either in separate courses or repetitions of the same course, the student will not be permitted to continue in the major.

2. **Upper-division requirements (36 units)**
   a) BIOL 102
   b) Thirty-two (32) additional Biology units to be taken in consultation with a faculty advisor

3. **Other requirements**

For the Bachelor of Arts only (0-16 units): The foreign language requirement may be fulfilled by completing level four or the demonstration of equivalent proficiency in one foreign language.

For the Bachelor of Science only (16 units): An additional 16 units in upper-division biology courses and/or substantive courses in a field or fields related to the major. A list of acceptable courses is available in the CNAS Academic Advising Center.

**Programs of Specialization**

The Life Sciences core curriculum (item 1 above) fulfills many of the requirements for admission to graduate schools in biology or professional schools in the medical and health science fields. In addition to Introductory Genetics (BIOL 102, 4 units), a wide choice is available for the remaining 32 upper-division units required for the Biology major (item 2.b above) and the 16 additional units related to the field of the major (B.S. degree, item 3 above). Each student selects upper-division and related courses depending on the type of school and career chosen (e.g., education, pharmacy, dentistry, optometry, veterinary medicine, nursing, physical therapy, public health, graduate school in one of the fields below).

In planning an academic program to prepare for teaching or one of the medical fields, present and prospective Biology majors are referred to relevant topics in the Biological Sciences section of this catalog. That section has information for those planning to attend graduate school in education to obtain a teaching credential (subsection, Teaching Credential) and/or a master’s or Ph.D. degree in education (subsection, Preparation for Graduate School). Also included are guidelines to help students select courses to prepare for admission to professional schools in the medical field (subsections, Medical Biology, Suggestions for Elective Units for Medical/Health Professions, Admission Requirements for Medical and Health Professional Schools). Additional information about required course work and admission tests (MCAT, OAT, VCAT, PCAT, GRE)
California Teach-Science and Mathematics Initiative (CalTeach-SMI)

California Teach-Science and Mathematics Initiative (CalTeach-SMI) has a goal of addressing the critical need of highly qualified K-12 science and mathematics teachers in California. With an economy increasingly reliant on science, technology, engineering, and mathematics (STEM), preparing students for advanced study in fields below and others. Students considering graduate study are encouraged to do undergraduate research and take courses in computer science and statistics. In some cases, a course of study differing substantially from the examples given below will best meet the needs of the student. In consultation with a faculty advisor, a student may prepare a program in some other biological specialization such as animal behavior, evolution/development or developmental biology.

Cell and Molecular Biology
BIOL 102, BIOL 105, BIOL 107A, BIOL 107B, BIOL 109 or BIOL 153/BCH 153/BPSC 153, CBNS 101 or BIOL 113 and BIOL 114, BIOL 119, BIOL 121/MCBL 121, BIOL 121L/MCBL 121L, BIOL 122/MCBL 122, BIOL 123/MCBL 123/LPLA 123, BIOL 124/MCBL 124, BIOL 128/CBNS 128, BIOL 155/BPSC 155, BIOL 168, BCH 100 or the BCH 110A/BCH 110HA, BCH 110B/BCH 110HB, and BCH 110C/BCH 110HC sequence, BCH 102, CBNS 108, CBNS 150/ENTX 150, CHEM 005, CHEM 109, STAT 011

Ecology and Population Biology
BIOL 102, BIOL 104/BPSC 104, BIOL 105, BIOL 108, BIOL 116, BIOL 116L, BIOL 117, BIOL 160L, BIOL 171, either BIOL 175 or BIOL 143/BPSC 143, the MATH 007A or MATH 009A, MATH 007B or MATH 009B, and MATH 009C sequence, STAT 011

Also recommended: BIOL 151, BIOL 161A, BIOL 163, BPSC 146, MATH 046, BIOL 165/ BPSC 165, BIOL 166

Molecular Genetics

Zoology and Physiology
BIOL 100/ENTM 100, BIOL 102, BIOL 105, CBNS 101 or BIOL 113 and BIOL 114, BIOL 151, BIOL 152/GEO 152, BIOL 157, BIOL 159, BIOL 160, BIOL 160L, BIOL 161A, BIOL 161B, BIOL 162/ENTM 162, BIOL 168, BIOL 171, BIOL 171L, BIOL 173/ENTM 173, BIOL 174, BIOL 175, BIOL 178, BCH 100, CBNS 106, CBNS 108, CBNS 116, CBNS 169. Students are also encouraged to take laboratory courses (e.g., BCH 102). Also recommended: a course in ecology (e.g., BIOL 116, BIOL 116L), STAT 011

Independent Study and Research

The Department of Evolution, Ecology, and Organismal Biology offers courses in which students can enroll to do independent laboratory research or an in-depth library study of a topic of special interest.

Students desiring to do Independent Reading (BIOL 194), Introduction to Research (BIOL 197) or Junior/Senior Research (BIOL 199) should consult with a professor who is willing to supervise the project. The student may suggest a specific question or formulate a project after consultation with the instructor. Information about the research fields of the professors is available on the Department of Evolution, Ecology, and Organismal Biology website.

To enroll in these Independent Study and Research courses, students must first contact the associated instructor for approval and proceed with enrolling through the CNAS Enrollment Management Center (1140F Batchelor Hall / cnasemc.ucr.edu); preferably before the first day of instruction but no later than the end of the second week of the quarter.

Applicants for BIOL 194 and BIOL 199 should ordinarily be juniors or seniors with a GPA of 3.00 or higher. Sophomore students with a GPA of 3.00 or higher may apply to enroll in BIOL 197 (Introduction to Research), since the purpose of this course is to enable the student to do preliminary reading and laboratory research to explore with the professor the feasibility of undertaking a project for later enrollment in BIOL 199. Enrollment in BIOL 197 is not required before enrollment in BIOL 199, but the former course is available for those situations where preliminary work will be helpful.

For BIOL 194 and BIOL 199, the student writes a report of the library study or laboratory results for the quarter, which is reviewed and submitted to the sponsoring professor by the last day of instruction of the quarter.

Students may also receive credit toward the major for independent study or research performed in other departments, with the approval of the Lead Faculty Advisor.

BIOL 194, BIOL 197, and BIOL 199 are graded “S/NC”, and up to 9 units of credit may be counted as part of the 16 substantive units related to the major for the B.S. degree.

Natural Reserve System

This system was formed by the UC in 1965 to preserve for study a series of undisturbed natural areas representing the state’s vast ecological diversity. Since then the system has grown to include thirty-seven reserves, eight of them administered by the UCR campus. See Research Opportunities in this catalog.

Most of the reserves are undeveloped except for fencing, roads and trails, but laboratory facilities, housing and campgrounds for class use are available at some sites. The reserves are used as outdoor classrooms and laboratories by students, teachers and researchers from educational institutions, public and private,
throughout the state, across the nation and around the world. Some of the courses offered by the UCR Department of Evolution, Ecology, and Organismal Biology include field trips and overnight camping trips to the reserves. In the field, students are introduced to the great diversity of plant and animal organisms in Southern California, and to the effect of environmental factors on this diversity.

Undergraduate and graduate students who wish to use the reserves in their individual research projects should contact Dr. Kim Hammond, Department of Evolution, Ecology, and Organismal Biology, 3318 Spiehi Hall, (951) 827-4076, to obtain an application, map and list of rules and regulations.

Graduate Program
The Department of Evolution, Ecology, and Organismal Biology administers programs leading to the M.S. and Ph.D. degrees in Evolution, Ecology, and Organismal Biology.

Admission
Applicants are strongly advised to contact potential faculty advisors prior to applying to the program. Applicants must submit GRE scores for the General Test (verbal, quantitative, and analytical). In addition, submission of the Subject Test score may improve chances of admission and is recommended.

All graduate students entering the department meet with a guidance committee during the first quarter of enrollment so that their educational background can be addressed. Considering the requirements of the student’s specialization, the committee recommends a program of study to be followed in pursuit of graduate work. Because of the diversity among the specializations, course requirements for advanced degrees are specified by the student’s guidance committee.

Doctoral Degree
The Department of Evolution, Ecology, and Organismal Biology offers the Ph.D. degree in Evolution, Ecology, and Organismal Biology. In addition to the general requirements of the Graduate Division, students intending to become candidates for the Ph.D. degree in Evolution, Ecology, and Organismal Biology must complete the following:

Course Work
Course requirements are determined in consideration of the requirements of the student’s area of specialization. Selection of specific courses is done by the guidance committee in consultation with the student.

All students are required to take EEOB 400, EEOB 210, EEOB 211, and EEOB 216. Students are also required to take two courses on current research topics (BIOL 252 or another disciplinary colloquium and EEOB 265) for a minimum of 5 quarters of each prior to advancement to candidacy and 12 quarters of each prior to completion of the doctoral degree.

Professional Development
One unit of coursework in professional development, which is satisfied by EEOB 400.

Written and Oral Qualifying Examinations
Students must pass a Written Examination in their specialized field of interest before taking their Oral Qualifying Examination. Written Qualifying Examinations must be completed by the eighth week of the sixth quarter in residence. Upon successful completion of the Written Qualifying Examination, an Oral Qualifying Examination is administered wherein students defend their dissertation proposal.

Dissertation
Candidates may be required to successfully defend their dissertation research in a public oral presentation.

Teaching Requirements
All students are required to serve as a Teaching Assistant for at least three quarters.

Normative Time to Degree
18 quarters

Master’s Degree
The Department offers the M.S. degree in Evolution, Ecology, and Organismal Biology. To qualify for the M.S. degree, candidates must meet the following requirements:

Plan I (Thesis)
Thirty-six (36) quarter units of approved courses in the 100 or 200 series, of which at least 24 units must be in the 200 series courses in the biological sciences. Not more than 12 units of EEOB 299 may be applied to the degree. A minimum of 12 units of course work other than courses in the 290 series must be completed in fulfillment of the requirement for 24 units of graduate courses. Students must present an acceptable thesis and undergo a final oral examination in defense of the thesis.

Joint Doctoral Program with SDSU
The Department of Evolution, Ecology, and Organismal Biology at UCR along with the Department of Evolutionary Biology at San Diego State University (SDSU) administers a program leading to the Ph.D. degree in Evolutionary Biology, referred to as the Joint Doctoral Program in Evolutionary Biology (JDEB).

Admission
Applicants for admission to the JDEB will apply to the SDSU-UCR JDEB which will be coordinated by SDSU. Potential applicants should have a bachelor’s degree in one of the life sciences or physical sciences. Promising students with other academic backgrounds are also encouraged to apply if they have strong undergraduate coursework in biology. Applicants must have a bachelor’s and/or master’s degree from an accredited institution.

In addition, the student will enroll in a current research topics seminar course during each UCR quarter (BIOL 252 or another disciplinary colloquium and EEOB 265) or SDSU semester (BIOL 795) of residence. The majority of required course work should be completed prior to the Written Qualifying Exam, which is taken at the end of the second year. All required disciplinary courses must be completed before taking the Oral Qualifying Exam.

Professional Development
One unit of coursework in professional development, which is satisfied by EEOB 400.

Written Qualifying Exam
By the end of the second year, students are expected to have taken a written qualifying examination. The Written Exam consists of a dissertation proposal that includes a synthetic review of the intended topic of the dissertation. The written exam is evaluated by the student’s Oral Qualifying Exam Committee (see Oral Qualifying Exam below).

Oral Qualifying Exam
Upon passing the written exam, the student (in consultation with their SDSU and UCR coadvisors) selects an Oral Qualifying Exam Committee. This committee normally consists of five faculty members: a minimum of 2 UCR EEOB faculty, a UCR outside committee member, and a minimum of 2 SDSU EB faculty. During the exam, the candidate must defend the research proposal and may be questioned on other topics by the Oral Qualifying Exam Committee. Normally the Oral Qualifying Exam occurs in the fall term of the student’s third year.
Lower-Division Courses

BIOL 002 Cellular Basis of Life

- Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): none. An introduction to the fundamentals of life processes at the cellular level. Topics include cell structure, chemical composition, metabolism, reproduction, genetics, and development with emphasis on humans. Not recommended for natural science majors. Either BIOL 002 or BIOL 003 may be taken as a breadth requirement in biology; together they provide a general introduction to the field of biology. Credit is not awarded for BIOL 002 if it has already been awarded for BIOL 005A, BIOL 05LA or BIOL 020.

BIOL 003 Organisms in Their Environment

- Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): none. An introduction to the physiology, ecology, and evolution of living organisms with emphasis on humans. Not recommended for natural science majors. Either BIOL 002 or BIOL 003 may be taken as a breadth requirement in biology; together they provide a general introduction to the field of biology. Credit is not awarded for BIOL 003 if it has already been awarded for BIOL 005B.

BIOL 005A Introduction to Cell and Molecular Biology

- Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 05LA with a grade of C- or better, may be taken concurrently or BIOL 020 with a grade of C- or better, may be taken concurrently; CHEM 001A with a grade of C- or better, may be taken concurrently; CHEM 01LA with a grade of C- or better, may be taken concurrently; CHEM 01HA with a grade of C- or better; CHEM 02LA, may be taken concurrently; CHEM 02LB, may be taken concurrently, CHEM 01HB, may be taken concurrently, CHEM 1HLB, may be taken concurrently or CHEM 002B, may be taken concurrently, CHEM 02LB, may be taken concurrently. An intensive course designed to prepare for upper-division courses in organismal biology. Covers developmental biology, physiology, and regulation at the level of the organism. Required for Biology majors; recommended for science majors desiring an introduction to biology.

BIOL 005C Introductory Evolution and Ecology

- Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005A with a grade of C- or better; BIOL 05LA with a grade of C- or better or BIOL 020 with a grade of C- or better; BIOL 005B with a grade of C- or better; MATH 009A with a grade of C- or better or MATH 09HA with a grade of C- or better or MATH 007A with a grade of C- or better; CHEM 001C, may be taken concurrently, CHEM 01LC, may be taken concurrently or CHEM 01HC, may be taken concurrently, CHEM 1HLC, may be taken concurrently or CHEM 002C, may be taken concurrently, CHEM 02LC, may be taken concurrently. An intensive introduction to the subjects of evolution and ecology. Covers population dynamics, community ecology, population genetics, and evolutionary theory. Recommended for science majors desiring an introduction to biology. Students who take equivalent first-year biology at another institution may enter directly into BIOL 005C without critical handicap.

BIOL 05LA Introduction to Cell and Molecular Biology Laboratory

- Laboratory, 3 hours. Prerequisite(s): BIOL 005A (may be taken concurrently); consent of instructor is required for students repeating the course. An introduction to laboratory exercises on fundamental principles of and techniques in cell and molecular biology. Illustrates the experimental foundations of the topics covered in BIOL 005A. Credit is not awarded for BIOL 05LA if it has already been awarded for BIOL 020.

BIOL 010 Headlines in the History of Life

- Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): none. Evolution of life beginning with precellular life. Topics include the origin of sex; multicellularity; vertebrate classes; morphological specializations; adaptive radiations; extinction dynamics; and the biology of dinosaurs. Cross-listed with GEO 003.

BIOL 020 Dynamic Genome

- Laboratory, 6 hours. Prerequisite(s): CHEM 001A with a grade of C- or better; may be taken concurrently; CHEM 01LA with a grade of C- or better, may be taken concurrently; CHEM 01HA with a grade of C- or better, may be taken concurrently, CHEM 1HLA with a grade of C- or better, may be taken concurrently or CHEM 02LA with a grade of C- or better, may be taken concurrently; CHEM 02LB, may be taken concurrently or CHEM 002A with a grade of C- or better, may be taken concurrently, CHEM 02LA with a grade of C- or better, may be taken concurrently or CHEM 002A with a grade of C- or better; CHEM 009A, may be taken concurrently or MATH 09HA, may be taken concurrently or MATH 007A, may be taken concurrently; MATH 009A, may be taken concurrently or MATH 09HA, may be taken concurrently; MATH 09HA, may be taken concurrently or MATH 007A, may be taken concurrently; restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Introductory study of insects, Earth’s most diverse group of animals (75 percent of animal species are insects). Covers the anatomy, physiology, ecology, behavior, and diversity of insects. Focuses on insect identification. Cross-listed with ENTM 100.

BIOL 100 Computational & Data Skills

For Everyday Biology

- Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, STAT 008 or STAT 010 or STAT 011. Covers computational and data skills required for modern biological data analysis using R. Topics include R Markdown for reproducible reports; data cleaning, manipulation and visualization; digitalizing morphological data; analyzing messy datasets common across biology; mapping species ranges and temporal data; building phylogenies; and interacting with biological databases using APIs.

BIOL 102 Introductory Genetics

- Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 020 or BIOL 05LA, and BIOL 005B with grades of “C-” or better. An introductory course that includes classical Mendelian genetics, linkage and recombinant, sex-linked traits, cytogenetics, developmental genetics, and molecular genetics. Also includes some probability theory and statistics.

BIOL 030 Human Reproduction and Sexual Behavior

- Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. A consideration of human anatomy, physiology and behavior as related to sexual reproduction, including discussion of fertility, pregnancy, childbirth and birth control. Consideration will also be given to homosexuality, venereal diseases, sex education, sexual intercourse and response.

BIOL 034 Human Heredity and Evolution

- Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Designed for both non-science and science majors. Covers basic human genetics and evolution, and explores their relationship to physical and mental health. An exploration of the political, societal, and ethical implications of human heredity and evolution.

BIOL 040 Disease and History: From the Bubonic Plague to AIDS

- Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. This lecture course for non-science majors will deal with the natural history of infectious diseases and how plagues have influenced the course of human history. It will cover the biology, pathology, epidemiology, and immunology of viruses, bacteria, and protozoan parasites causing smallpox, yellow fever, influenza, AIDS, syphilis, bubonic plague, tuberculosis, leprosy, malaria, and African sleeping sickness. The role of scientific inquiry in the conquest of human disease will be emphasized.
BIOL 104 Foundations of Plant Biology 4
Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005C. A study of the plant world from cells to ecosystems. Examines the structure and function of organisms from the major plant groups and their role in the biosphere. The laboratory explores the unique properties of plants. Cross-listed with BPSC 104.

BIOL 105 Evolution 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005C with a grade of "C-" or better, BIOL 102, CHEM 008C and CHEM 08LC, or CHEM 08HC and CHEM 08HLC, MATH 007B or MATH 009B or MATH 09HB; PHYS 002C or PHYS 02HC, PHYS 02LC or PHYS 02HLC, one course in statistics, or consent of instructor. Covers the causal interpretation of organic diversity and adaptation. Topics include inferences of evolutionary change from the fossil record and from genomic and molecular patterns; microevolution and macroevolution; systematics and the species problem; and natural selection, drift, and other forces of evolution.

BIOL 106 Biology of Human Variation 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 102; BIOL 105 or BIOL 108; STAT 011, may be taken concurrently; or consent of instructor. A survey of variation within and among contemporary human populations arising from genetic and environmental factors. Covers single-locus and polygenic inheritance, developmental plasticity, and physiological acclimatization. Includes biogeographic and demographic influences; variation in pigmentation, stature, physiology, disease susceptibility, behavior, and IQ; and critical evaluation of racial and ethnic classifications.

BIOL 107A Molecular Biology 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC; CHEM 008C and CHEM 08LC, or CHEM 08HC and CHEM 08HLC; MATH 007B or MATH 009B or MATH 09HB; PHYS 002C or PHYS 02HC, PHYS 02LC or PHYS 02HLC, BCH 100 or BCH 110A or BCH 110H, one course in statistics. Topics include genotype calling, analysis of genetic data, and interpretation of statistical results using modern computational methods. Includes example and case studies presented for a variety of human infectious diseases.

BIOL 107B Advanced Molecular Biology 3
Lecture, 2 hours; discussion, 1 hour. Prerequisite(s): BIOL 107A or BCH 110C or BCH110HC or equivalents. An advanced treatment of the functional architecture of genetic material. Topics include genome structure and chromosome organization, DNA replication and recombination, regulation of gene expression, and protein synthesis. Examines both prokaryotic and eukaryotic systems including contemporary recombinant DNA technology and applications of molecular cloning procedures. Credit is not awarded for BIOL 107A if it has already been awarded for BCH 110C.

BIOL 108 Population Genetics and Genomics 4
Lecture, 3 hour; discussion and demonstration, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 008C and CHEM 08LC, or CHEM 08HC and CHEM 08HLC, MATH 007B or MATH 009B or MATH 09HB, PHYS 002C or PHYS 02HC, PHYS 02LC or PHYS 02HLC, one course in statistics. A study of factors influencing genomic variation in biological populations. Topics include the effects of natural selection and genetic drift on genetic variation, detecting adaptive change from genomic data, why genetic diseases and cancers persist, the evolution of co-operation, adaptation to pathogens and to a changing environment, and the genetic challenges faced by small conserved populations.

BIOL 110 Biology of Human Problems 4
Seminar, 4 hours. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 008C and CHEM 08LC, or CHEM 08HC and CHEM 08HLC; MATH 007B or MATH 009B or MATH 09HB; PHYS 002C or PHYS 02HC, PHYS 02LC or PHYS 02HLC, BCH 100 or BCH 110A or BCH 110A; one course in statistics. Devoted to selected human problems that have a large biological component and relate to medicine, ethics, and human existence. Topics covered vary and include issues of major biophysical importance such as euthanasia, national health care, effects of industrial pollution on individuals and communities, population problems, abortion, and genetic engineering.

BIOL 111 Infectious Disease Epidemiology 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A with a grade of C- or better, BIOL 005B with a grade of C- or better, BIOL 005C with a grade of C- or better; STAT 010 with a grade of C- or better. Introduces epidemiological methods used to investigate infectious diseases. Includes examples and case studies presented for a variety of human infectious diseases.

BIOL 112 Systematics 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005C or equivalent. Principles and philosophy of classification: phylogenetic and phenetic methods, species concepts, taxonomic characters, evolution, hierarchy of categories, and nomenclature. Cross-listed with BPSC 112, and ENTM 112.

BIOL 113 Advanced Cell Biology: Membranes, Organelles, and the Cytoskeleton 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, BIOL 102, CHEM 001C or CHEM 01HC, CHEM 008C and CHEM 08LC, or CHEM 08HC and CHEM 08HLC, MATH 007B or MATH 009B or MATH 09HB, PHYS 002C or PHYS 02HC, PHYS 02LC or PHYS 02HLC, BCH 100 or BCH 110A or BCH110HC, one course in statistics. An examination of the organization, function, and behavior of eukaryotic cells. Topics include membrane systems, protein targeting, the cytoskeleton, motility, and cell division. Emphasis is placed on the experiments that form the basis of the current understanding of the cell. The discussion section focuses on reading and analyzing original journal articles.

BIOL 114 Advanced Cell Biology: Cellular Reproduction and Signaling 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, BIOL 102, CHEM 001C or CHEM 01HC, CHEM 008C and CHEM 08LC, or CHEM 08HC and CHEM 08HLC, MATH 007B or MATH 009B or MATH 09HB, PHYS 002C or PHYS 02HC, PHYS 02LC or PHYS 02HLC, BCH 100 or BCH 110A or BCH 110A; one course in statistics. An examination of the organization, function, and behavior of eukaryotic cells. Explores the molecular mechanisms used by cells to control reproduction, growth, and responses to extracellular signals. Emphasis is on experiments that form the basis of the current understanding of the cell. The discussion section focuses on reading and analyzing original journal articles.

BIOL 115 Human Genetics 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 102; BCH 100 or BCH 110A or BCH 110A; one course in statistics. An introduction to human genetics. Topics include human gene organization, chromosome structure, chromosomal aberrations, patterns of single-gene inheritance, multifactorial disorders, developmental biology in medicine, cancer genetics, prenatal diagnosis, personalized health care, gene therapy, and ethical issues in medical genetics.

BIOL 116 Ecology and Conservation Biology 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005C with a grade of C- or better, CHEM 001C or CHEM 01HC, MATH 007B or MATH 009B or MATH 09HB or MATH 099B; consent of instructor. Introduces principles of ecology emphasizing the implications for the conservation of biodiversity. Topics include physiological ecology, organismal adaptations to the environment, life histories, the niche concept, population growth, interspecific interactions, and the structure and functioning of communities and ecosystems. Also covers topics in applied ecology and conservation biology.

BIOL 118 Methods in Molecular Ecology and Evolution 4
Lecture, 2 hours; discussion, 1 hour; laboratory, 3 hours. Prerequisite(s): BIOL 005C with a grade of C- or better; CHEM 008C or CHEM 08HC, CHEM 08LC or CHEM 08HLC, MATH 007B or MATH 009B or MATH 09HB, PHYS 002C or PHYS 02HC, PHYS 02LC or PHYS 02HLC, STAT 010, BCH 100 or BCH 110A or BCH 110A; one course in statistics. Covers theory, techniques, and analytical methods for interpreting patterns of genetic variation based on current high-throughput DNA sequencing technology. Topics include genotype calling, analysis of population structure, genome-wide association studies, and phylogenetic inference using modern computational methods. Includes laboratory techniques for sequencing library preparation.

BIOL 119 Introduction to Genomics and Bioinformatics 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005C with a grade of C- or better; BIOL 102, CHEM 001C or CHEM 01HC, CHEM 008C and CHEM 08LC, or CHEM 08HC and CHEM 08HLC, MATH 007B or MATH 009B or MATH 09HB, PHYS 002C or PHYS 02HC, PHYS 02LC or PHYS 02HLC, BCH 100 or BCH 100H or BCH 110A or BCH 110A. An introduction to the science of genomics and bioinformatics.
BIOL 120 Introduction to Plant Pathology 3 Lecture, 3 hours. Prerequisite(s): BIOL 005A, BIOL 05LA or BIOL 020; BIOL 005B, BIOL 05SC, CHEM 001C or CHEM 01HC, CHEM 008C and CHEM 08LC, or CHEM 08HC and CHEM 008C; MATH 007B or MATH 009B; PHYS 002C or PHYS 02HC; PHYS 02LC or PHYS 02HLC; BCH 100 or BCH 110A of BCH110HA, one course in statistics; or consent of instructor. An introduction to the study of plant diseases. Topics include diseases and disease-causing agents, host-pathogen interaction during disease development, and strategies for disease management. An optional, separate laboratory is offered. Cross-listed with MCB 120 and PLPA 120. Credit is not awarded for PLPA 210 if it has already been awarded for BIOL 120/MCBL 120/PLPA 120 and/or BIOL 120L/MCBL 120L/PLPA 120L.

BIOL 120L Introduction to Plant Pathology Laboratory 1 Laboratory, 4 hours. Prerequisite(s): BIOL 005A, BIOL 05LA or BIOL 020; BIOL 005B; BIOL 05SC, CHEM 008C or CHEM 08HC; CHEM 08LC or CHEM 08HLC; MATH 007B or MATH 009B; PHYS 002C or PHYS 02HC; PHYS 02LC or PHYS 02HLC; BCH 100 or BCH 110A or BCH 110A; MCBL 120, may be taken concurrently or BIOL 120, may be taken concurrently; STAT 010, may be taken concurrently; BIOL 121/MCBL 121 and BIOL 124/MCBL 124 recommended; or consent of instructor. Covers fundamentals in the use of laboratory instruments and techniques for the isolation, identification, and identification of representative infectious agents that cause disease in plants. Cross-listed with MCBL 120L, and PLPA 120L. Credit is awarded for one of the following PLPA 120L, BIOL 120L, MCBL 120L, or PLPA 210.

BIOL 121 Introductory Microbiology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A; BIOL 05LA or BIOL 020; BIOL 005B; BIOL 05SC; CHEM 001C or CHEM 01HC; MATH 007B or MATH 009B; PHYS 002A, may be taken concurrently or PHYS 02HA, may be taken concurrently; PHYS 02LA, may be taken concurrently or PHYS 02HHA, may be taken concurrently; BCH 100, may be taken concurrently or BCH 110A, may be taken concurrently or BCH 110HA, may be taken concurrently; STAT 010; or consent of instructor. An introductory introduction to the fundamental physiology and molecular biology of bacteria and viruses. Covers bacterial and viral molecular genetics, an introduction to microbial pathogenesis, and applications of microbiology in modern societies. Cross-listed with MCB 121. Credit is awarded for one of the following MCB 121L, BIOL 121L, or MCB 131L.

BIOL 121L Microbiology Laboratory 3 Lecture, 1 hour; laboratory, 6 hours. Prerequisite(s): BIOL 121 with a grade of C- or better or MCB 121L with a grade of C- or better. Laboratory exercises in diagnostic microbiology, basic virology, and epidemiology. Includes fundamental quantitative and diagnostic microbiological procedures, basic mechanisms of microbial genetic exchange, and a project examining bacterial epidemiology. Cross-listed with MCB 121L. Credit is awarded for one of the following MCB 121L, BIOL 121L, or MCB 131L.

BIOL 122 Food Microbiology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 05LA or BIOL 020; BIOL 005B; BIOL 005C; CHEM 008C or CHEM 08HC; CHEM 08LC or CHEM 08HLC; MATH 007B or MATH 009B; MATH 009B; PHYS 002C or PHYS 02HC; PHYS 02LC or PHYS 02HLC; BCH 100 or B. [Text continues here]
BIOL 151 Invertebrate Zoology  Lecture, 3 hours; discussion, 1 hour; laboratory, 3 hours. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, PHYS 002A or PHYS 02HA with grades of "C-" or better. Structure, classification, and biology of the invertebrates.

BIOL 152 Principles of Invertebrate Paleobiology and Paleoecology  Lecture, 2 hours; laboratory, 3 hours; three 1-day field trips. Prerequisite(s): BIOL 005C with a grade of "C-" or better or BIOL 010/GEO 003 with a grade of "C-" or better. Topics include evolution and the fossil record, paleoecology, classification theory; the nature of adaptive radiations, and "C-" or better or BIOL 010/GEO 003 with a grade of "C-" or better. Structure, classification, and biology of the invertebrates.

BIOL 154 Forensic Entomology  Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005C with a grade of "C-" or better; restricted to class level standing of sophomore, or junior or senior; or consent of instructor. Introduces the application of entomological principles and collection of entomological data to be used as evidence in courts of law. Explores the basis of using insects to time and place of death in criminal cases including the collection, handling, and identification of insects of forensic importance. Cross-listed with GEO 152.

BIOL 155 Chromosomes  Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, CHEM 010C or CHEM 01HC, CHEM 008C and CHEM 08LC or CHEM 08HC and CHEM 08HLC, MATH 007B or MATH 009B or MATH 09HB, PHYS 002C or PHYS 02HC, PHYS 002LC or PHYS 02HLC, BCH 100 or BCH 110A or BCH 110A/ BCHA 110A (BCHA 100 or BCHA 110A or BCHA 110A/H may be taken concurrently); or consent of instructor. An examination of the structure, function, and behavior of eukaryotic chromosomes. Cross-listed with BPSC 155.

BIOL 157 Parasitology  Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, CHEM 010C or CHEM 01HC, CHEM 008C and CHEM 08LC or CHEM 08HC and CHEM 08HLC, MATH 007B or MATH 009B or MATH 09HB, BCH 100 or BCH 110A or BCH 110A/H, one course in statistics. Surveys the biology of protozoan and helminth interactions with their human hosts.

BIOL 158 Medical Molecular Parasitology  Lecture, 3 hours; seminar, 1.5 hours. Prerequisite(s): BCH 110C or BCH 106HC or BIOL 107A. An overview of genome organization and gene expression, with aspects of biochemistry, evolution, natural history, and clinical manifestations of human parasites Trypanosoma, Leishmania, Plasmodium, and others. Emphasizes the molecular and biochemical adaptations to parasitism. Prior knowledge of classical parasitology is not assumed. Students present original research papers during the seminar.

BIOL 159 Biology of Nematodes  Lecture, 2 hours; discussion and demonstration, 1 hour. Prerequisite(s): BIOL 005A, BIOL 05LA or BIOL 020, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 008C and CHEM 08LC or CHEM 08HC and CHEM 08HLC, MATH 007B or MATH 009B or MATH 09HB, PHYS 002C or PHYS 02HC, PHYS 002LC or PHYS 02HLC, BCH 100 or BCH 110A or BCH 110A/H, one course in statistics. An introduction to the biology of nematodes. Topics include the morphology, physiology, development, genetics, behavior, and ecology of nematodes from parasitic and free-living habitats. In the discussion and demonstration section, students observe the comparative morphology and biology of nematodes and give oral presentations on selected nematode life histories. Cross-listed with NEM 159.

BIOL 160 Animal Behavior  Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, and BIOL 102 with grades of "C-" or better, CHEM 001C or CHEM 01HC, CHEM 008C and CHEM 08LC, or CHEM 08HC and CHEM 08HLC, MATH 007B or MATH 009B or MATH 09HB, PHYS 002C or PHYS 02HC, PHYS 002LC or PHYS 02HLC, BCH 100 or BCH 110A or BCH 110A/H, one course in statistics. An examination of behavior from an evolutionary and ecological perspective. Topics include the inheritance of behavior, evolution of communication and displays, migration and habitat selection, foraging ecology, mating systems, and the evolution of social behavior.

BIOL 160L Laboratory in Animal Behavior  Lecture, 4 hours. Prerequisite(s): BIOL 160 (may be taken concurrently). Laboratory and field exercises in animal behavior. Covers topics such as foraging behavior, aggression, and territoriality.

BIOL 161A Functional Anatomy of the Vertebrates  Lecture, 3 hours; laboratory, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A with a grade of "C-" or better; BIOL 005B with a grade of "C-" or better; BIOL 005C with a grade of "C-" or better; CHEM 001C with a grade of "C-" or better or CHEM 01HC with a grade of "C-" or better; CHEM 008A with a grade of "C-" or better; CHEM 008B with a grade of "C-" or better or CHEM 08LC with a grade of "C-" or better; CHEM 08HLA with a grade of "C-" or better; MATH 007B with a grade of "C-" or better or MATH 009B with a grade of "C-" or better or MATH 09HB with a grade of "C-" or better; PHYS 002A with a grade of "C-" or better or PHYS 02HA with a grade of "C-" or better. Functional anatomy of vertebrates including humans. Examines organ systems from developmental and evolutionary perspectives. Topics include phylogeny, the skeleton, muscles, and circulatory, sensory, respiratory, digestive, and urogenital systems. A combination of BIOL 161A, BIOL 161B, BIOL 171A, BIOL 171B, and BIOL 171L provides a one-year sequence in anatomy and physiology.

BIOL 161B Functional Anatomy of the Vertebrates  Lecture, 3 hours; laboratory, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 161A with a grade of "C-" or better; CHEM 008B with a grade of "C-" or better or CHEM 08HLA with a grade of "C-" or better, CHEM 008B with a grade of "C-" or better or CHEM 08LB with a grade of "C-" or better; PHYS 002B with a grade of "C-" or better or PHYS 02HB with a grade of "C-" or better. Functional anatomy of vertebrates including humans. Examines organ systems from developmental and evolutionary perspectives. Topics include the nervous system, integument, and circulatory, sensory, respiratory, digestive, and urogenital systems. A combination of BIOL 161A, BIOL 161B, BIOL 171A, BIOL 171L, and BIOL 171L provides a one-year sequence in anatomy and physiology.

BIOL 162 Insect Behavior  Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005C with a grade of "C-" or better or BIOL 100 with a grade of "C-" or better or ENMT 100 with a grade of "C-" or better; restricted to class level standing of sophomore, junior, or senior; or consent of instructor. An analysis of the mechanisms that cause and control behavioral reactions of insects. Emphasizes ethological and physiological knowledge concerning orientation mechanisms, communication systems, learning, and the role of the nervous system in integrating behavior in insects. Cross-listed with ENMT 162.

BIOL 163 Vertebrate Natural History  Lecture, 3 hours; laboratory, 6 hours. Prerequisite(s): BIOL 005B; BIOL 005C; CHEM 001C or CHEM 01HC; MATH 007B or MATH 009B. Topics include ecology, evolution, and behavior of birds, mammals, reptiles, and amphibians. Laboratory covers systematics, morphology, and identification. Includes indoor labs and field trips to local habitats.

BIOL 165 Restoration Ecology  Lecture, 3 hours; field, 8 hours. Prerequisite(s): BIOL 104 or BPSC 104 or BIOL 116 or ENSC 100; CHEM 008B, CHEM 08LB or CHEM 08HB, CHEM 08HLB; STAT 010, may be taken concurrently; or consent of instructor. An examination of the basic ecological principles related to land restoration. Topics include enhanced succession; plant establishment; plant adaptations; ecology; weed colonization and competition; nutrient cycling; functions and reintroduction of soil microorganisms; restoration for wildlife; and the determination of successful restoration. Includes field trips to restored sites. Cross-listed with BPSC 165.

BIOL 166 Global Change Biology  Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 116 with a grade of "C-" or better; CHEM 008C, CHEM 08LC or CHEM 08HC, CHEM 08HLC; PHYS 002C, PHYS 02LC or PHYS 02HC, PHYS 02HLC, BCH 100 or BCH 110A or BCH 110A/H, one course in statistics. Topics include diversity, evolution, physiology, and circulation of soil microorganisms; restoration for wildlife; and the determination of successful restoration. Includes field trips to restored sites.

BIOL 168 Developmental Biology  Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110C or BCH 110HC or BIOL 107A; a course in cell biology is recommended. An advanced description of the embryonic development of animals. Covers the basic concepts of fertilization, gastrulation, and neurulation. Analyzes topics in current developmental research, with an emphasis on the molecular mechanisms of pattern formation and differentiation.

BIOL 169 Ornithology  Lecture, 2 hours; laboratory, 3 hours; field, 30 hours. Prerequisite(s): BIOL 005C; CHEM 001C or CHEM 01HC; MATH 007B or MATH 009B or MATH 09HB. Topics include diversity, evolution, physiology, ecology, behavior, field identification, and conservation of species that live in Southern California. Labs and field trips include identifi-
cation, anatomy, and ornithological techniques such as mist-netting. Includes over-night field trips to University of California field stations.

**BIOL 170 Herpetology** Lecture, 3 hours; laboratory, 3 hours; field, 30 hours per quarter. Prerequisite(s): BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, MATH 007B or MATH 009B or MATH 09HB. An introduction to the study of amphibians, snakes, lizards, and turtles with emphasis on the Southwest U.S. Topics include diversity, ecology, physiology, functional morphology, biomechanics, and conservation. Field trips will involve identification and techniques for studying behavior and ecology. Lab exercises will involve functional morphology, internal anatomy, and identification.

**BIOL 171A Human Physiology** Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005LA or BIOL 020; BIOL 005B; BIOL 005C; CHEM 001C or CHEM 01HC; CHEM 005C; CHEM 008C or CHEM 01HC; CHEM 08AC or CHEM 08HC; CHEM 08BL or CHEM 08HL; MATH 007B or MATH 009B or MATH 09HB; PHYS 002B or PHYS 02HB; PHYS 02LB or PHYS 02HB; BCH 100 or BCH 110A or BCH 110HA. Provides first-principles analysis of cell, tissue, and organ structure and function. Emphasizes an integrative, problem-solving approach using applications such as disease and exercise. Topics include the musculoskeletal, nervous, endocrine, and reproductive systems.

**BIOL 171B Human Physiology** Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 171A. Builds on concepts introduced in Biology 171A with an analysis of cell, tissue, and organ structure and function using problem-solving approaches in humans. Emphasizes applications such as extreme environments, disease, and exercise. Topics include the cardiovascular, pulmonary, digestive, and renal systems.

**BIOL 171L Human Anatomy and Physiology Laboratory 1** Laboratory, 3 hours. Prerequisite(s): BIOL 171A; BIOL 171B, may be taken concurrently. Experiments in physiology, human anatomy, and histology. Covers experimentation and data analysis incorporating hematology, blood proteins, urinalysis, neuromuscular control, cardiac excitation and pharmacology, blood pressure, electrocardiography, and electroencephalography.

**BIOL 172 Biology of Fishes** Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005B; BIOL 005C; CHEM 001C or CHEM 01HC; MATH 007B or MATH 009B or MATH 09HB. Introduction to the study of freshwater and marine fishes. Topics include diversity, ecology, physiology, functional morphology, biomechanics, and conservation. Laboratory exercises will include species identification, functional anatomy, biomechanics, and physiology. A final paper and oral presentation are required.

**BIOL 173 Insect Physiology** Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005A, BIOL 005B; CHEM 008A or CHEM 08HA; CHEM 008B or CHEM 08HB; CHEM 008C or CHEM 08HC; CHEM 08LA or CHEM 08HLA; CHEM 08LB or CHEM 08HLB; CHEM 08LC or CHEM 08HLC; restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Introduction to principles of insect physiology. Covers growth, development and hormones, cuticle, nervous system, circulation, respiration, digestion, nutrition, excretion, reproduction, water balance, and temperature relations. Prior knowledge of insects not required. Cross-listed with ENTM 173.

**BIOL 174 Ecological and Evolutionary Physiology** Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 008C and CHEM 008L or CHEM 08HC and CHEM 08HLHC, MATH 007B or MATH 009B or MATH 09HB, PHYS 002C or 02HC, PHYS 02LC or PHYS 02HLCC, BCH 100 or BCH 110A or BCH 110HA, one course in statistics. Examines the interactions between organisms and their environments, emphasizing coadaptation of physiological, morphological, and behavioral phenotypes. Includes allometry and scaling, metabolism and locomotion, heat and water exchange, evolution of endothermy, artificial selection experiments, and phylogenetically based statistical methods.

**BIOL 175 Comparative Animal Physiology** Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, BIOL 161A; CHEM 001C or CHEM 01HC; CHEM 008C or CHEM 08HC; CHEM 08LC or CHEM 08HLHC; MATH 007B or MATH 009B or MATH 09HB; PHYS 002C or PHYS 02HC; PHYS 02LC or PHYS 02HLCC; BCH 100 or BCH 110A or BCH 110HA; STAT 1010; recommended: BIOL 151 and BIOL 161B. Topics include nutrition and energy metabolism, gas exchange, circulation, and regulation of body fluid composition.

**BIOL 176 Comparative Biomechanics** Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005C; PHYS 002C or PHYS 02HC or PHYS 040C or PHYS 040HC; BCH 100 or BCH 110A or BCH 110HA. Applies principles from physics and engineering to the study of the relationship between organism form and function. Covers examples from diverse plant and animal systems. Includes fundamental properties of solids and fluids, viscoelasticity, drag, biological pumps, locomotion, and muscle mechanics.

**BIOL 178 Hormones and Behavior** Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 008C and CHEM 08LC or CHEM 08HC and CHEM 08HLHC, MATH 007B or MATH 009B or MATH 09HB, PHYS 002C or PHYS 02HC, PHYS 02LC or PHYS 02HLCC, BCH 100 or BCH 110A or BCH 110HA, one course in statistics. An examination of the interactions between hormones and behavior in animals, including humans. Provides an overview of endocrine physiology, and examines the roles of hormones in sexual differentiation, sex differences in behavior, sexual behavior, parental behavior, affiliation, aggression, stress, and mood.

**BIOL 190 Special Studies 1 to 4** Individual Study, 3 to 12 hours. Prerequisite(s): consent of instructor and departmental chairperson. To be taken as a means of meeting special curricular needs. Grading basis to be selected in consultation with the instructor and departmental chairperson. Course is repeatable.

**BIOL 191 Seminar in Biology 2 to 4** Seminar, 2 to 4 hours. Prerequisite(s): upper-division standing; consent of instructor. A critical study of selected topics in biology. Course is repeatable.

**BIOL 194 Independent Reading 1 to 4** Research, 3 to 12 hours. Prerequisite(s); consent of instructor. Independent study under supervision of members of the faculty. Course is repeatable to a maximum of 6 units.

**BIOL 197 Introduction to Research 1 to 2** Consultation, 1 to 2 hours. Prerequisite(s); sophomore, junior or senior standing and consent of instructor and departmental chairperson. Reading, planning and preliminary laboratory work to develop a research project suitable for BIOL 199, Junior/Senior Research. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

**BIOL 199 Junior/Senior Research 1 to 4** Laboratory, 1 to 4 hours. Prerequisite(s); junior or senior standing, a minimum GPA of 3.0 and consent of instructor and departmental chairperson. Special problems and research in biology performed under the supervision of members of the faculty of the Department of Biology. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

**Graduate Courses**

**BIOL 200 Cell Biology** Lecture, 3 hours; seminar, 1 hour. Prerequisite(s); BCH 110A or BCH 110B or equivalent (may be taken concurrently); BIOL 102 or equivalent; BIOL 113 or BIOL 114 or CBNS 101 or equivalent. An examination of the structure and function of eukaryotic cells and their components with emphasis on the key experiments that provide the foundation for our current knowledge. Covers topics such as cell membranes, intracellular trafficking, cell-to-cell interactions, motility, and the cytoskeleton. Cross-listed with CMDB 200.

**BIOL 201 Molecular Biology** Lecture, 3 hours; seminar 1 hour. Prerequisite(s); BCH 110A or BCH 110B or equivalent (may be taken concurrently); BIOL 102 or equivalent; BIOL 107A or equivalent. Covers the structure and inheritance of genetic material, the regulation of gene expression at the cellular and molecular level including molecular mechanisms for regulation of gene transcription, posttranscriptional regulation at the level of messenger RNA stability, processing, editing and translation, methods for gene mapping, and positional cloning. Cross-listed with CMDB 201.

**BIOL 203 Cellular Biophysics** Lecture, 3 hours. Prerequisite(s): BIOL 200/CMDB 200; BIOL 201/CMDB 201; CHEM 109 or equivalent; or consent of instructor. Biophysical principles that determine cellular structure and function including diffusion, electrochemical gradients, transport, macromolecular interactions, and genetic recombination. Illustrative examples are used to highlight the importance of these principles in modern cell biology and physiology.
BIOL 221 Microbial Genetics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110C or BIOL 107A; BIOL 102. In-depth coverage of the genetics of microbes. Emphasizes the primary data and the foundation of modern techniques using viruses, archaea, prokaryotes, and eukaryotes. Includes genome sequences and organization, plasmids and other vectors, and mutation and genetic screens. Also covers transposable elements, recombination, and regulation of gene expression, development, and pathogenesis. Cross-listed with MCB 221, and PLPA 226.

BIOL 250 Special Topics in Biology 1 to 2 Seminar, 1 to 2 hours. Prerequisite(s): graduate standing and consent of instructor. Oral presentations and intensive small-group discussion of selected topics in the area of special competence of each staff member. Course content will emphasize recent advances in the special topic area and will vary accordingly. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

BIOL 261 Seminar in Genetics, Genomics, and Bioinformatics 1 Seminar, 1 hour. Prerequisite(s): graduate standing Oral reports by visiting scholars on current biological research. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

BIOL 261 Seminar in Genetics, Genomics, and Bioinformatics 1 Seminar, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Oral reports by visiting scholars, faculty, and students on current research topics in Genetics, Genomics, and Bioinformatics. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BIOL 281 (E-Z) Seminar in Cell Development, Structure, and Function 2 Seminar, 2 hours. Prerequisite(s): graduate standing. Lectures, discussions, and demonstrations by students, faculty, and invited scholars on selected subjects concerned with the principles of cell development, structure, and function. E. Cell Biology; F. Molecular Biology; G. Developmental Biology. Course is repeatable to a maximum of units. Cross-listed with CMDB 281 (E-Z).

BIOL 284 Seminar in Biology 2 to 4 Seminar, 2 to 4 hours. Prerequisite(s): graduate standing; consent of instructor. Consists of lectures, discussions, and demonstrations by students, faculty, and invited scholars on selected topics concerned with the principles of biology. Course is repeatable.

BIOL 289 Special Topics in Neuroscience 2 Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. An interdisciplinary seminar consisting of student presentations and discussion of selected topics in neuroscience. Content and instructor(s) vary each time course is offered. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. Cross-listed with BCH 289, CHEM 289, ENTM 289, NRSC 289, and PSYC 289.

EEOB 210 Organismal Biology 4 Lecture, 4 hours. Prerequisite(s): at least one upper division undergraduate course that covers the principles of physiology (such as animal physiology, plant physiology, human physiology, or comparative anatomy and physiology), or a similar course, AND an upper division undergraduate course that covers the principles of evolution, or a similar course, OR consent of instructor. Explores the historical development of modern ideas in organismal biology. Topics include homeostasis, scaling, energetics, structure-function relationships, control systems, and response systems. Examines recent research in the context of the classic studies.

EEOB 211 Foundations of Ecology 4 Lecture, 4 hours. Prerequisite(s): BIOL 116 or consent of instructor. Examination of the history, theory, and interrelationships of fundamental ecological principles through readings and discussions of classic and recent literature. Topics include quantitative, population, community, ecosystem, evolutionary, and conservation ecology.

EEOB 212 Ecological Systems in Space and Time 4 Lecture, 3 hours; field, 30 hours per quarter. Prerequisite(s): one upper-division undergraduate course in population or community ecology or paleoecology; or consent of instructor. Focuses on how ecological systems are interpreted and reconciled at the community, landscape, and paleontological scales. Addresses the role of extrinsic factors operating at each of these scales. Also examines the historical development of our understanding of ecological systems at various scales. Cross-listed with ENTM 212, and GEO 212.

EEOB 213 Behavioral Ecology 4 Lecture, 4 hours. Prerequisite(s): BIOL 103 or consent of instructor. Examines animal behavior in an evolutionary context. Traces the historical development of the study of behavior, drawing from ethology, comparative psychology, and sociobiology. Topics include evolution of sociality, sexual selection, predator-prey behavior, and parental care.

EEOB 214 Evolutionary Genetics 4 Lecture, 4 hours. Prerequisite(s): BIOL 108 or consent of instructor. Traces the historical development of modern ideas in evolutionary genetics. Focuses on the influence of Fisher, Haldane, and Wright on current views of genetic variation in natural populations, by examining recent research in the context of their classic works.

EEOB 215 Advanced Methods of Data Analysis in Evolution, Ecology, and Behavior 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): PSYC 212 or STAT 011; or equivalent; graduate standing. Introduces new methods of data analysis in the fields of evolution, ecology, and behavior. Covers theory and practical application using relevant examples. Topics include maximum likelihood, randomization, the jackknife, bootstrapping, Monte Carlo approaches, and meta-analysis.

EEOB 216 The Theory of Evolution 4 Lecture, 4 hours. Prerequisite(s): BIOL 105 or consent of instructor. Traces the historical development of modern ideas in evolutionary theory. Focuses on the influence of Darwin and of the various authors of the modern synthesis on current views of macroevolution by examining recent research in the context of their classic works.

EEOB 217 Advanced Population and Community Ecology 4 Lecture, 4 hours. Prerequisite(s): one upper-division undergraduate class in population or community ecology; or consent of instructor. Traces the development of the major concepts in ecology. Focuses on the influence of pioneers in the field, historical roots of key concepts, and key controversies. Evaluates current research with reference to these historical origins.

EEOB 219 Theory of Systematics 4 Lecture, 4 hours. Prerequisite(s): BIOL 112/BPSC 112/ENMT 112 or equivalent or consent of instructor. Examines topics developed around a series of classical and recent papers on the principles, philosophy, and methodology of modern systematics and phylogenetic methods. Cross-listed with ENMT 219, and GEO 219.

EEOB 220 Evolutionary Physiology 4 Lecture, 4 hours. Prerequisite(s): an upper-division course in evolution and animal physiology or behavior; an upper-division course in statistics that covers analysis of covariance; or consent of instructor. Covers evolutionary approaches to the study of animal physiology. Includes organismal physiology and organ-system physiology; biomechanics; and locomotor mechanisms; cell physiology; the development of physiological systems; and behavioral neuroscience.

EEOB 230 Analysis of Ecological Communities 5 Lecture, 3 hours; discussion, 2 hours. Prerequisite(s): PSYC 212 or STAT 21B or equivalent; consent of instructor. Covers principles of multivariate analysis and its application to the interpretation of ecological community data. Topics include multiple and partial correlation and regression, canonical correlation, detrended and canonical correspondence analysis, multidimensional scaling, similarity indices and cluster analysis, and discriminant analysis.

EEOB 265 Advances in Population and Evolutionary Biology 1 or 2 Seminar, 1 hour; research, 0 or 3 hours. Prerequisite(s): graduate standing or consent of instructor. Presentations by visiting scholars, faculty, and students on current research topics in population and evolutionary biology. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

EEOB 268 Seminar in Genetics and Evolution 2 to 4 Seminar, 2 to 4 hours. Prerequisite(s): graduate standing; consent of instructor. Presentations by students, faculty, and invited scholars on selected topics concerned with the principles of genetics and evolution. Course is repeatable.

EEOB 283 Seminar in Organismal Biology 1 to 4 Seminar, 1 to 4 hours. Prerequisite(s): graduate standing; consent of instructor. Presentations by students, faculty, and invited scholars on selected topics concerned with the principles of organismal biology, including physiology, behavior, morphology, biomechanics, and related topics. Course is repeatable to a maximum of 18 units.
EEOB 290 Directed Studies 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor and graduate advisor. Individual studies on specially selected topics in evolution, ecology, and organismal biology under the direction of a faculty member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

EEOB 291 Individual Study in Coordinated Areas 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing. Provides a program of study designed to advise and assist candidates who are preparing for examinations. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

EEOB 292 Concurrent Analytical Studies in Evolution, Ecology, and Organismal Biology 2 to 4 Research, 6 to 12 hours. Prerequisite(s): consent of instructor. Elected concurrently with an appropriate undergraduate course but on an individual basis. Devoted to one or more graduate papers based on research or criticism related to the course. Faculty guidance and evaluation provided throughout the quarter. Course is repeatable.

EEOB 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing. Directed research in evolution, ecology, and organismal biology. Experimental studies on specially selected topics under the direction of a faculty member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

EEOB 299 Research For the Thesis Or Dissertation 1 to 12 Research, 3 to 36 hours. Prerequisite(s): graduate standing. Original research in an area selected for the advanced degree. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

BIOL 301 Teaching of Biology at the College Level 1 Seminar, 1 hour. Prerequisite(s): graduate standing. A program of weekly meetings and individual formative evaluations required of new Biology Teaching Assistants. Covers instructional methods and classroom/section activities most suitable for teaching Biology. Conducted by the TA Development Program. Graded Satisfactory (S) or No Credit (NC).

BIOL 303 Philosophy and Pedagogy of Teaching Undergraduate Life Sciences 3 Lecture, 1 hour; laboratory, 3 hours; workshop, 1 hours. Prerequisite(s): graduate standing in life sciences. Explores the opportunities and challenges associated with developing an undergraduate course in the life sciences. Emphasizes determining how students learn, as well as exploring contemporary instruction methods that foster student engagement in the classroom. Graded Satisfactory (S) or No Credit (NC). Cross-listed with ENTM 303.

EEOB 400 Introduction to Graduate Study in Biology 2 Lecture, 1 hour; discussion, 1 hour. Prerequisite(s): graduate standing; consent of instructor. Introduces opportunities and requirements for successful graduate study. Emphasis is placed on effective strategies for developing and implementing a program of professional development and graduate research. Graded Satisfactory (S) or No Credit (NC).

Biomedical Sciences

Subject abbreviation: BMSC

Division of Biomedical Sciences

Deborah Deas, M.D., M.P.H., Vice Chancellor, Health Sciences; the Mark and Pam Rubin Dean, UCR School of Medicine
Monica J. Carson, Ph.D., Chair, 5. Sue Johnson Presidential Endowed Chair in Gial-Neuronal Interactions
Division of Biomedical Sciences 1212 Webber Hall (951) 827-4560
biomed.ucr.edu

Professors
Monica J. Carson, Ph.D. Neuroimmunology
Djurdjica Coss, Ph.D. Endocrinology, Neuroscience
Iryna M. Ethell, Ph.D. Neuroscience
Martin I. Garcia-Castro, Ph.D. Biomedical Sciences
Adam Godzik, Ph.D. Bruce D. and Nancy B. Varner Presidential Endowed Chair in Cancer Research
Marcus Kaul, Ph.D. Neuroscience
David Lo, M.D., Ph.D. Distinguished Professor, Genetics and Mucosa/Immunity
Declan McCole, Ph.D. Physiology, Pharmacology
Scott Pegan, Ph.D. Innate Immunity
Maurizio Pellecchia, Ph.D., Daniel Hays Endowed Chair in Cancer Research, Drug Discovery
Seema K. Tiwari-Woodruff, Ph.D. Neurodegenerative Diseases/Glia Biology
Emma Wilson, Ph.D. Parasite Immunologist
Sika Zheng, Ph.D. Neurobiology/Molecular Genetics
Changcheng Zhou, Ph.D. Xenobiotics, Cardiovascular and Metabolic Disease

Professors Emeriti
Mary Ann Baker, Ph.D. Neuroscience
Craig V. Byus, Ph.D. Pharmacology
(K biomedical Sciences/ Biochemistry)
Kathryn DeFea, Ph.D. Cell Biology/Biochemistry
David A. Johnson, Ph.D. Pharmacology
Richard A. Luben, Ph.D. Endocrinology (Biomedical Sciences/Biochemistry)
Christian Y. Lytle, Ph.D. Physiology
Neal L. Schiller, Ph.D. Distinguished Teaching Professor, Microbiology/Immunology
Michael B. Stemerman, M.D. Biomedical Sciences
Daniel S. Straus, Ph.D. Human Genetics (Biomedical Sciences)
Ameae M. Walker, Ph.D. Distinguished Teaching Professor, Microanatomy

Associate Professors
Nicholas V. DiPatriazio, Ph.D. Biomedical Sciences
Meera G. Nair, Ph.D. Infectious Diseases, Mucosa/Immunology

Assistant Professors
Erica Heinrich, Ph.D. Integrative Physiology, Hypoxia and High Altitude Medicine
Jean-Pyo Lee, Ph.D. Stroke, Cardiovascular Disease, and Stem Cells
Natalie Ziebik, Ph.D. Addiction

Professor in Residence
Devin Binder, M.D., Ph.D. Clinical Neuroscience

University Requirements
See Undergraduate Studies section.

College Requirements
See College of Natural and Agricultural Sciences, Colleges and Programs section.

B.S. Degree Requirements
The following major requirements apply only to students who, in truly exceptional cases, matriculate into the Thomas Haider Program at the UCR School of Medicine without a UCR baccalaureate degree. These students are eligible to receive a B.S. degree in Biomedical Sciences upon satisfactory completion of the first year of the curriculum leading to the M.D. degree.

Major Requirements
1. Biological Sciences Core Curriculum (65–68 units)
   a) BIOL 005A, BIOL 05LA, BIOL 005B, BIOL 005C or equivalent
   b) CHEM 001A, CHEM 001B, CHEM 001C, CHEM 01LA, CHEM 01LB, CHEM 01LC, CHEM 112A, CHEM 112B, CHEM 112C or equivalent
   c) PHYS 002A, PHYS 002B, PHYS 002C, PHYS 02LA, PHYS 02LB, PHYS 02LC or equivalent
   d) MATH 008B or MATH 009A, MATH 009B or equivalent
   e) STAT 100A or equivalent
   f) BCH 100 or BCH 110A or equivalent
2. Courses taken during the first year of medical school (59 units)
   BMSC 231, BMSC 231M, BMSC 232, BMSC 232M, BMSC 233, BMSC 234, BMSC 234M, BMSC 235, BMSC 235M

Lower-Division Courses

BMSC 091 Freshman Advising Seminar For Medical Scholars Program Students 1 Seminar, 1 hour. Prerequisite(s): freshman standing in the Medical Scholars Program. Introduction to UCR for students in the Medical Scholars Program. Focuses on learning the necessary survival skills to succeed in college and prepare for a career in the allied health sciences. Graded Satisfactory (S) or No Credit (NC).

BMSC 092 First-Year Seminar For Medical Scholars Program Students: Topics in Health Careers 1 Seminar, 1 hour. Prerequisite(s): freshman standing in the Medical Scholars Program or consent of instructor. A discussion of health careers in biomedical sciences and allied health sciences for students in the Medical Scholars Program. Graded Satisfactory (S) or No Credit (NC).
BMSC 093 Seminar For Medical Scholars Program Students 1 Seminar, 1 hour. Prerequisite(s): lower-division standing in the Medical Scholars Program or consent of instructor. A discussion of special topics in biomedical sciences and allied health sciences as they pertain to students in the Medical Scholars Program. Graded Satisfactory (S) or No Credit (NC).

BMSC 094 Independent Reading 1 to 2 Consultation, 1 to 2 hours. Prerequisite(s): consent of instructor. Independent study under faculty supervision. Possible topics include modern approaches to the pathophysiology of disease, delivery of medical care to the community, or current medical education. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 4 units.

BMSC 097 Research Tutorial in Biomedical Sciences 1 to 2 Laboratory, 3 to 6 hours. Prerequisite(s): grade point of 3.0 and consent of instructor. Laboratory tutorial in research related to biomedical sciences. To provide laboratory experience in the areas of physiology, microbiology, molecular biology, pharmacology, cell biology, immunology, biochemistry for exceptional lower-division students. A written report is required at the end of each quarter. Graded Satisfactory (S) or No Credit (NC). May be repeated for up to 6 units.

Upper-Division Courses

BMSC 191 Seminar in Biomedical Sciences 2 Seminar, 20 hours per quarter. Prerequisite(s): upper-division standing in the Medical Scholars Program or consent of instructor. Special topics in biomedical sciences, healthcare delivery, cultural competency, biomedical research, and related areas. Course is repeatable to a maximum of 6 units.

BMSC 194 Independent Reading 1 to 2 Discussion, 1 hour; research, 2 to 3 hours. Prerequisite(s): upper-division standing and consent of instructor and Divisional Dean Independent study involving library projects on topics related to Biomedical Sciences. Independent study will be conducted under faculty supervision. A written report is graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 4 units.

BMSC 197L Research For Undergraduates 1 to 3 Laboratory, 3 to 9, hours. Prerequisite(s): upper-division standing (completion of 90 quarter units) and consent of instructor. An introduction to the methods of research in biomedical sciences. The student will conduct investigation in an area of biomedical sciences under the supervision of a Division of Biomedical Sciences faculty member and submit a written report on his/her work. Course is repeatable.

Graduate Courses

BMSC 202 Molecular Basis of Disease 3 Lecture, 2 hours; discussion, 1 hour. Prerequisite(s): graduate standing, consent of instructor. Discusses the molecular basis of disease emphasizing new developments and the broad application of approaches and techniques. Course is repeatable.

BMSC 222 (E-Z) Special Topics in Biomedical Sciences 2 Lecture, 1 hour; discussion, 1 hour. Prerequisite(s): graduate standing. Oral presentations and intensive small-group discussion of selected topics in the area of special competence of each faculty member. Course emphasizes research advances in the special topic area and varies accordingly. E. Membranes & Ion Trans Pheno; G. Mechanisms For Ctrl Cell P; J. Host Defense Mechanisms; L. Hormone Secretion; M. Hormone Action; N. Mechanisms Of Steroid Hormones; O. Steroid Metabolism; P. Drug & Hormone-receptor Int; Q. Mechanisms Of Carcinogenesis; U. The Mechanisms Of Locomotion; W. Advanced Immunology; X. Mutagenesis&genetic Instability; Y. Cancer Genetics. Course is repeatable to a maximum of units.

BMSC 223 (E-Z) Themes in Human Biology and Disease 2 to 4 Prerequisite(s): graduate standing. For hours and prerequisites, see section descriptions. Graduate students write a paper on current basic research relevant to the course theme. Credit is awarded for one of the following BMSC 223 (E-Z), BMSC 229, BMSC 231, or MDCL 231.

BMSC 223F Cardiovascular Physiology 4 Lecture, 30.5 hours per quarter; discussion, 11.5 hours per quarter; laboratory, 5 hours per quarter. Prerequisite(s): consent of course coordinator. Integrative view of the human cardiovascular system in health and disease. Credit is awarded for only one of BMSC 223F or BMSC 229 or BMSC 231 or MDCL 231.

BMSC 223G Renal Physiology 3 Lecture, 22 hours per quarter; discussion, 8 hours per quarter, laboratory, 2 hours per quarter. Prerequisite(s): consent of course coordinator. Integrative view of the human urinary system and dysfunction. Credit is awarded for only one of BMSC 223G or BMSC 232 or MDCL 232.

BMSC 223I Thrombosis and Hemostasis 2.5, 3 Lecture, 22.5 hours per quarter; discussion, 8.5 hours per quarter; laboratory, 2 hours per quarter. Prerequisite(s): consent of course coordinator. Integrative view of the human vascular system and dysfunction. Credit is awarded for only one of BMSC 223I or BMSC 232 or MDCL 232.

BMSC 229 Foundations in Translational Research 8 Lecture, 67 hours per quarter; discussion, 7 hours per quarter; laboratory, 18 hours per quarter. Prerequisite(s): first-year standing in the Biomedical Sciences graduate program or consent of graduate advisor. Covers basic principles of disease processes, genetics, and molecular, cellular, and developmental biology. Case-driven instruction accomplished through lectures and discovery in small group discussions and laboratories. Offered in summer only. Credit is awarded for only one of BMSC 223E or BMSC 229 or BMSC 231 or MDCL 231.

BMSC 231 Foundations of Medicine I 7.5 Lecture, 65.5 per quarter; discussion, 6 per quarter; laboratory, 20.5 per quarter. Prerequisite(s): first-year standing in medical school or consent of instructor. Covers basic principles of disease processes, genetics, and molecular, cellular, and developmental biology. Instruction is driven by cases and accomplished through lectures and discovery in small group discussions, laboratories, and conferences. Students using this course to fulfill requirements for the B.S. degree in Biomedical Sciences receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Credit is awarded for only one of BMSC 223E or BMSC 229 or BMSC 231 or MDCL 231.

BMSC 232 Cardiovascular, Renal, and Respiratory Sciences I 12 Lecture, 107 hours per quarter; discussion 9 per quarter; laboratory 19 per quarter. Prerequisite(s): first-year standing in medical school or the graduate program in Biomedical Sciences or consent of instructor; BMSC 229 or BMSC 231. Covers physiology, pathophysiology, physical diagnosis, and imaging in the cardiovascular, renal, and respiratory sciences. Instruction is driven by cases and accomplished through lectures and discovery in small group discussions, laboratories, and conferences. Students using this course to fulfill requirements for the B.S. or Ph.D. degree in Biomedical Sciences receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Credit is awarded for only one of BMSC 223F or BMSC 232 or MDCL 232 and for only one of BMSC 223G or BMSC 232 or MDCL 232 and for only one of BMSC 223I or BMSC 232 or MDCL 232.

BMSC 233 Gastrointestinal, Endocrine, and Reproductive Health I 10 Lecture, 85 hours per quarter; discussion, 8 hours per quarter; laboratory, 21 hours per quarter. Prerequisite(s): first-year standing in medical school or the graduate program in Biomedical Sciences or consent of instructor; BMSC 229. Covers biochemistry, pathophysiology, physical diagnosis, and imaging associated with gastrointestinal, endocrine, and reproductive health. Instruction is driven by cases and accomplished through lectures and discovery in small group discussions, laboratories, and conferences. Credit is awarded for only one of BMSC 223J or BMSC 233 or MDCL 233.
BMSC 234 Musculoskeletal Medicine 4
Lecture, 36 hours per quarter; discussion, 2 hours per quarter; Laboratory, 7 hours per quarter. Prerequisite(s): first-year standing in medical school or the graduate program in Biomedical Sciences or consent of instructor; BMSC 233. Covers the musculoskeletal system, biology and pathology of the peripheral nervous system, and physical diagnosis. Utilizes lectures and case studies to accomplish course objectives. Promotes discovery of learning by small group discussions, laboratories, and conferences. Credit is awarded for only one of BMSC 234 or MDCL 234.

BMSC 235 Clinical Neurosciences 15
Lecture, 42 hours per quarter; discussion, 8 hours per quarter; laboratory, 6 hours per quarter. Prerequisite(s): BMSC 234. Covers neurobiology and provides an introduction to neurology and psychiatry, as well as physical diagnosis and imaging of the nervous system. Utilizes lectures and case studies to accomplish course objectives. Promotes discovery of learning by small group discussions, laboratories, and conferences. Credit is awarded for only one of BMSC 235 or MDCL 235.

BMSC 236 Foundations of Medicine II 10
Lecture, 93 hours per quarter; discussion, 8 hours per quarter; laboratory, 10 hours per quarter. Prerequisite(s): second-year standing in medical school or the graduate program in Biomedical Sciences or consent of instructor; BMSC 235. Covers the pathophysiology, pharmacology, physical diagnosis and treatment of infectious diseases, clinical hematology and oncology, and epidemiology and clinical reasoning skills. Instruction involves weekly cases and is presented through lectures and discovery in small group discussions, laboratories, and conferences. Students using this course to fulfill requirements for the Ph.D. degree in Biomedical Sciences receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade.

BMSC 251 Colloquium in Biomedical Sciences 1
Colloquium, 1 hour. Prerequisite(s): graduate standing in Biomedical Sciences or consent of instructor. Specialized discussions by staff and students of current research topics in biomedical sciences. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BMSC 252 General Seminar in Biomedical Sciences 1
Seminar, 1 hour. Prerequisite(s): graduate standing. Oral presentations by staff and visiting scholars on current research topics in biomedical sciences. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

BMSC 254 Graduate Seminar in Biomedical Sciences 1
Seminar, 1 hour. Prerequisite(s): graduate standing. Oral reports by graduate students on current research topics in biomedical sciences. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

BMSC 260A Topics in Translational Biomedical Research 2
Lecture, 2 hours per quarter; discussion, 18 hours per quarter. Prerequisite(s): consent of instructor or graduate advisor; concurrent enrollment in BMSC 232. A survey of the mechanisms of common human diseases at the molecular, cellular and organ system levels and the multidisciplinary approaches used for their investigation. Instructional components include lectures, discovery in problem-based learning sessions, and independent study. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

BMSC 260B Topics in Translational Biomedical Research 2
Lecture, 2 hours; discussion, 18 hours per quarter. Prerequisite(s): consent of instructor or graduate advisor; concurrent enrollment in BMSC 233. A survey of the mechanisms of common human diseases at the molecular, cellular and organ system levels and the multidisciplinary approaches used for their investigation. Instructional components include lectures, discovery in problem-based learning sessions, and independent study. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

BMSC 260C Topics in Translational Biomedical Research 2
Lecture, 2 hours; discussion, 18 hours per quarter. Prerequisite(s): consent of instructor or graduate advisor; concurrent enrollment in BMSC 234 and BMSC 235. A survey of the mechanisms of common human diseases at the molecular, cellular and organ system levels and the multidisciplinary approaches used for their investigation. Instructional components include lectures, discovery in problem-based learning sessions, and independent study. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

BMSC 261 Methods in Biomedical Research 1
Tutorial, 3 hours. Prerequisite(s): graduate standing in Biomedical Sciences or consent of instructor. Experimental studies on a specific laboratory technique involved in the study of human disease. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 3 units.

BMSC 290 Directed Studies 1 to 6
Research, 3 to 18 hours. Prerequisite(s): graduate standing in Biomedical Sciences or consent of instructor. Experimental or literature studies on specifically selected topics under direction of a staff member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BMSC 297 Directed Research 1 to 6
Research, 3 to 18 hours. Prerequisite(s): graduate standing in Biomedical Sciences or consent of instructor. Directed research in biomedical sciences performed prior to advancement to candidacy in preparation for dissertation projects. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BMSC 299 Research For Dissertation 1 to 12
Research, 3 to 36 hours. Prerequisite(s): graduate standing in Biomedical Sciences or consent of instructor. Original research in the area selected for the advanced degree. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Course
BMSC 302 Directed Teaching 2
Practicum, 6 hours. Prerequisite(s): graduate standing in Biomedical Sciences. Supervised teaching in medical school courses. Required for all Biomedical Sciences graduate students. Fulfills the teaching portion of the teaching requirement for the Ph.D.; four units are required for the Ph.D. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 6 units.

Biomedical Sciences Graduate Program

Subject abbreviation: BMSC
Division of Biomedical Sciences
Seema Tiwari-Woodruff, Ph.D., Program Director
Graduate Student Affairs Office, 205 SOM Research Bldg
(951) 827-7819; medschool.ucr.edu/graduate

Professors
Michael E. Adams, Ph.D. (Entomology)
Bahman Anvari, Ph.D. (Bioengineering)
Peter Atkinson, Ph.D. (Entomology)
Monica J. Carson, Ph.D. (Biomedical Sciences)
Djurdjica Coss, Ph.D. (Biomedical Sciences)
David A. Eastmond, Ph.D. (Cell Biology and Neuroscience)
Iryna Ethell, Ph.D. (Biomedical Sciences)
Martin I. Garcia-Castro, Ph.D. (Biomedical Sciences)
Ted Garland, Ph.D. (Biology)
Adam Godzik, Ph.D. (Biomedical Sciences)
Marcus Kaul, Ph.D. (Neuroscience)
Karine Le Roch, Ph.D. (Cell Biology and Neuroscience)
Xuan Liu, M.D., Ph.D. (Biochemistry)
David Lo, M.D., Ph.D. (Biomedical Sciences)
Morris Maduro, Ph.D. (Biology)
Ernest Martinez, Ph.D. (Biochemistry)
Manuela M. Martins-Green, Ph.D. (Cell Biology and Neuroscience)
Declan McCole, Ph.D. (Biomedical Sciences)
Scott Pegan, Ph.D. (Biomedical Sciences)
Maurizio Pellecchia, Ph.D. (Biomedical Sciences)
Michael C. Pirrung, Ph.D. (Chemistry)
Khaleel Razak, Ph.D. (Psychology)
Victor Rodgers, Ph.D. (Bioengineering)
Wendy Saltzman, Ph.D. (Biology)
Aaron Seitz, Ph.D. (Psychology)
Frances M. Sladek, Ph.D. (Cell Biology and Neuroscience)
B. Glenn Stanley, Ph.D. (Cell Biology and Neuroscience/Psychology)
Vijit Santhakumar, Ph.D. (Neuroscience)
Yingsheng Wang, Ph.D. (Chemistry)
Emma Wilson, Ph.D. (Biomedical Sciences)
Seema K. Tiwari-Woodruff, Ph.D. (Biomedical Sciences)
Sika Zheng, Ph.D. (Neurobiology/Molecular Genetics)
Changcheng Zhou, Ph.D. (Biomedical Sciences)
The development of diabetes), immunology (by insulin), genetics (hereditary factors in secretion and action), cell biology (cell understanding of endocrinology (hormone studying diabetes to understand the disease), fluid and electrolyte pathophysiology; molecular genetics of human cell response to environmental carcinogens; factors controlling lymphocyte differentiation; mechanisms of action of cytotoxic lymphokines; physiologically aspects of host-parasite interaction; host defense mechanisms in infectious disease; mucosal immunity and molecular approaches to vaccine development; hypoxia, cardiovascular and metabolic disease.

Endocrinology/Pharmacology research areas include molecular mechanisms of obesity; fertility and reproductive biology; endocannabinoids; regulation of eating behavior; molecular mechanisms for carcinogenesis (glioblastoma, breast and prostate cancer); drug development.

Neurosciences research areas includes studies of the hypothalamic control of homeostatic and sexual function; molecular mechanisms of neurodegeneration, neuroinflammation, neuronal death and neuro degeneration, and gut-brain interactions with emphasis on the following diseases: Alzheimer’s disease, Parkinson’s disease, Autism, Fragile X/intellectual disability, multiple sclerosis, epilepsy, traumatic brain injury, stroke and pathogen-induced encephalitis.

Admission
Applicants should have completed an undergraduate degree in one of the physical or biological sciences and must submit scores from the GRE General Test (verbal and quantitative). (GRE requirement not applicable to UC Biomedical Sciences students applying for the M.D.–Ph.D.) Courses required for admission include one year each of general chemistry, organic chemistry, physics, and calculus and at least two years of biological sciences. Preferred upper-division courses in biology include vertebrate or human anatomy and physiology, embryology, genetics, cell biology, microbiology, immunology, and neurosciences.

Doctoral Degree
The aim of the graduate program in Biomedical Sciences is to train Ph.D. scientists in a specific area of research specialization who also have enough general knowledge in the basic medical sciences to apply their research expertise to unraveling the basis of disease. This approach includes understanding not only pathogenic manifestations of disease but also the normal physiologic state. To accomplish this, the student completes a core and elective curriculum, the latter tailored to the student’s research interests.

Core requirements include:
1. BMSC 229: Foundations of Translational Research
2. BMSC 232, 233, 234 and 235: Foundations of Medicine Series
3. BMSC 260A, BMSC 260B, BMSC 260C: Topics in Biomedical Research. The three quarter series is required in the second year of graduate education.
4. BMSC 261: Methods in Biomedical Research. Enrollment required all 3 quarters of the first year of graduate education.
5. BMSC 252: General seminar in Biomedical Sciences (enrollment required each quarter)
6. BMSC 254: Graduate seminar in Biomedical Sciences (enrollment required each quarter)
7. BMSC 302: (one-quarter requirement, not required of M.D.–Ph.D. students)

Under normal circumstances, each student should complete core course work requirements 1-4 during the first year of studies.

At the end of the student’s first full year of residence, the advisory committee for each student evaluates the progress of the student and recommends to the faculty whether the student should continue in the program.

In addition, prior to advancement to candidacy and at the beginning of each academic year, the student must present a written summary of the research progress and plans to the advisory committee. Continuation in the program depends on the advisory committee’s positive evaluation of the student’s research progress.

Written and Oral Qualifying Examinations
Prior to advancement to candidacy, students must complete both parts of a qualifying examination. Part I consists of the preparation of a research proposal, to be written in the form of a grant proposal, including literature review, description of methods and experimental plans for the dissertation. This proposal should outline the research progress of the student to date and delineate the planned dissertation research aims and objectives. Part I is usually completed in the spring quarter of year 2 and no later than the fall quarter of year 3 of a student’s graduate training. Part II consists of an oral comprehensive examination administered by a committee of five faculty members, at least one of whom is from outside the program. The student’s research advisor does not serve on the oral qualifying committee. The oral comprehensive examination includes examination of the student’s knowledge and understanding of material covered in the core courses and in the student’s area of specialization. Part II must be completed no later than the end of year 3 of the student’s graduate training.

Research Project, Dissertation and Final Oral Examination
After successful completion of the qualifying exam and advancement to candidacy, the student completes the research project, submits a written dissertation, and defends the dissertation in a final oral examination.

Normative Time to Degree
15 quarters
M.D.–Ph.D. Combined Degree

Admission

The combined degree is offered to students admitted to the medical school and to exceptional students from other four-year LCMC-accredited medical schools. Normally, a student completes the first two years of medical school and then spends approximately three years in the Ph.D. part of the program before completing the M.D. degree. However, the track is also offered to students who have completed the M.D. degree. UCR Biomedical Sciences students may apply for admission concurrently with their applications to the medical school or any time after acceptance to the medical school. For these students only, the MCAT is accepted in lieu of the GRE.

Students from other medical schools should apply in the fall of their sophomore or senior year. Applications from sophomores must be accompanied by official permission for an appropriate leave of absence. The GRE requirement is the same as for regular Ph.D. students.

Master’s Degree

The Biomedical Sciences Graduate Group offers an M.S. degree. Students may directly apply to the M.S. degree program with a rolling admissions deadline. Students in the Ph.D. degree program may also complete the M.S. program if the student’s advisory committee decides the master’s degree is an appropriate alternative to the Ph.D. degree anytime after the first year of graduate education. In both situations a Plan I (Thesis) or Plan II (Comprehensive Examination) M.S. degree is available. The decision of completing a Plan I or II M.S. degree is to be decided in consultation with the student and the student’s Guidance Committee. The Guidance Committee and Individual Development Plan (IDP) will be formed at the time of enrollment.

Professional Development

Two quarters of BMSC 254 are required. Additional specific professional development courses will be determined in consultation with the student’s Guidance Committee.

Course Work Core requirements:

1. Two quarters of BMSC 252
2. Two quarters of BMSC 254
3. BMSC 299 (minimum of 8 Units
   Directed Research)
4. Two quarters selected from any category in the following list:
   i) BMSC 222 – Special Topics
   ii) BMSC 223
   iii) MDCL 231, 232, 233, 234, 235
   iv) BMSC 260A, B, C
   v) Designated Emphasis - Cell Molecular and Behavioral Neuroscience Courses
      (CBNS 106, CBNS 116, CBNS 120, CBNS 125, CBNS 126, CBNS 127, CBNS 129, PSYC 112, PSYC 117, PSYC 203B, PSYC 207C, PSYC 208)
   vi) Designated Emphasis - Inflammation and Infectious Disease Courses BMSC 223E, BMSC 236, MCBL 124, MCBL 202, MCBL 221

A total of 36 units are required with normative time to degree 6 quarters. Teaching experience may be required based on consultation with the student’s guidance committee.

Course Descriptions

All Biomedical Sciences courses are listed and described under Biomedical Sciences.

Further information regarding graduate studies in Biomedical Sciences may be obtained from medschool.ucr.edu/graduate.

Biophysics

Subject abbreviation: BPHY

See schedule of classes for courses

College of Natural and Agricultural Sciences

Roya Zandi, Ph.D., Program Director

Program Office: 1140 Batchelor Hall
(800) 735-0717 or (951) 827-6746
biophysics.ucr.edu

Professors

Mark Alber, Ph.D. Distinguished Mathematics
Bahman Anvari, Ph.D. Bioengineering
Richard Cardullo, Ph.D. Evolution, Ecology, and Organismal Biology
Chia en Chang, Ph.D. Chemistry
Meng Chen, Ph.D. Cell Biology
Richard Debus, Ph.D. Biochemistry
Li Fan, Ph.D. Biochemistry
Theodore Garland, Jr., Ph.D. Distinguished Evolution, Ecology, and Organismal Biology
Adam Godzik, Ph.D. Biomedical Sciences
Russ Hille, Ph.D. Distinguished Biochemistry
Richard Hooley, Ph.D. Chemistry
Darrel Jenerette, Ph.D. Botany and Plant Sciences
Ryan Julian, Ph.D. Chemistry
Bahram Mobasher, Ph.D. Physics and Astronomy
Umar Mohideen, Ph.D. Physics and Astronomy
Leonard Mueller, Ph.D. Chemistry
Scott Pegan, Ph.D. Innate Immunity
Maurizio Pellucchia, Ph.D. Biomedical Sciences
Louis Santiago, Ph.D. Botany and Plant Sciences
Jikui Song, Ph.D. Biochemistry
Yinsheng Wang, Ph.D. Chemistry
Roya Zandi, Ph.D. Physics and Astronomy
Wenwan Zhong, Ph.D. Chemistry

Associate Professors

Kurt Anderson, Ph.D. Evolution, Ecology, and Organismal Biology
Gregor Blaha, Ph.D. Biochemistry
Natalie Holt, Ph.D. Evolution, Ecology, and Organismal Biology
Zhenu Jia, Ph.D. Quantitative Genetics
Carolyn Rasmussen, Ph.D. Botany and Plant Sciences

Assistant Professors

John Barton, Ph.D. Physics and Astronomy
Weitao Chen, Ph.D. Mathematics
Kevin Freedman, Ph.D. Bioengineering
Joseph Genebreux, Ph.D. Chemistry
Thomas Kuhlman, Ph.D. Physics and Astronomy
Dawn Nagel, Ph.D. Botany and Plant Sciences
Sean O’Leary, Ph.D. Biochemistry
Giuila Palermo, Ph.D. Bioengineering
John Jefferson Perry, Ph.D. Biochemistry
Nicole Rafferty, Ph.D. Evolution, Ecology, and Organismal Biology
Carolyn Rasmussen, Ph.D. Botany and Plant Sciences
Min Xue, Ph.D. Chemistry
Linlin Zhao, Ph.D. Chemistry

Graduate Program

The program offers the M.S. and Ph.D. degree in Biophysics.

The interdepartmental graduate program in Biophysics has participating faculty from the departments of Biochemistry; Biomedical Sciences; Botany and Plant Sciences; Chemistry; Evolution, Ecology and Organismal Biology; Mathematics; and Physics and Astronomy.

The goal of the program is to promote teaching, training and research in the field of Biophysics. Areas of specialization include biological electron transfer, computational/mathematical modeling of biological systems, structural biology, neurobiophysics, imaging and protein engineering. Biophysicists are needed by institutions of higher learning, and by federal, state and private research organizations.

Admission

Students must have a B.A. or B.S. degree in Biology, Biochemistry, Biophysics, Chemistry, Physics or in a related field from an accredited institution and an academic record that satisfies the minimum admission standards established by the UCR Graduate Division. In addition, students are required to take the GRE General Test as well as the Subject Examinations in Biochemistry, Biology, Chemistry or Physics, which must be submitted at the time of application. Students admitted to regular standing will have satisfied all prerequisite course work. Under special circumstances, students who have not completed all undergraduate requirements may be admitted provided that the deficiencies are corrected early in their graduate studies. Undergraduate or other previous training must include the following coursework:

• One year of introductory biochemistry, including laboratory
• One year of introductory biology, including laboratory
• One year of introductory chemistry, including laboratory
• One year of organic chemistry, including laboratory
• One year of introductory physics, including laboratory
• One year of calculus, plus one upper division mathematics course

Students with strong academic records may be admitted with coursework deficiencies, provided they are remediated during the first two years of graduate study.
Doctoral Degree
The program offers the Ph.D. degree in Biophysics.

Course Work
Thirty-six (36) units of 100 or 200 series courses, of which at least twenty-four (24) units must be in the graduate 200 series; includes the program’s graduate core curriculum and courses from a list of approved electives. A minimum of sixteen (16) units of coursework other than courses in the 290 series must be completed in fulfillment of the twenty-four (24) unit program requirement for graduate coursework.

All students are required to take a sequence of core courses (BCH 184, BCH 210, and PHYS 246) in their first year, and complete a series of research rotations in laboratories of participating faculty under BPHY 297 as part of the thesis advisor selection process. Participation in the Biophysics Graduate Seminar (BPHY 252) is also required for each quarter the student is enrolled; each student is expected to present a formal research seminar in this course prior to graduation. Students who present will receive a letter grade.

Approved Elective Courses include:

Comprehensive Examination
At the end of the first year, and no later than the end of the second year, students must pass a written comprehensive examination consisting of questions provided by the participating faculty, with topics taken from the core curriculum.

Qualifying Examination and Advancement to Candidacy
Doctoral students must pass a written qualifying examination that will consist of the preparation of a research proposal based on their dissertation work and taking the form of a grant application to the National Science Foundation or National Institutes of Health. Once the proposal is deemed satisfactory, the student must pass an oral examination that will consist of a defense of the written research proposal before the student’s qualifying exam committee. Upon successful completion of all coursework and passing of the Qualifying Examination, the student will advance to candidacy.

Dissertation
Students are expected to complete laboratory rotations and select a dissertation advisor by the end of their first academic year. The dissertation advisor will chair a Ph.D. Dissertation Committee that will meet annually to assess progress and provide input to the research project. A written dissertation will be completed by each student in the program.

Final Defense
Doctoral candidates will defend their dissertations in a public oral presentation at a time announced to members of the University community. The Dissertation Committee will then make a recommendation to the Graduate Division as to whether the degree of Ph.D. be conferred.

Professional Development
Biophysics students must complete an annual research evaluation, complete a minimum of 2 quarters as a teaching assistant, and complete GDIV 403.

Normative Time to Degree
15 quarters

Master’s Degree
The program offers the M.S. degree in Biophysics.

Students will normally be admitted to the Ph.D. program. Upon advancement to candidacy for the Ph.D. degree the student may petition the Graduate Division for conferment of the M.S. degree.

Students enrolling in the master’s degree in Biophysics must meet the requirements for the Plan II of the UCR Graduate Council, take core courses as described above and pass a Comprehensive Examination.

Plan II (Comprehensive Exam)
Thirty-six (36) units of 100 or 200 series courses, of which at least eighteen (18) units must be in the graduate 200 series; includes the program’s graduate core curriculum and courses from a list of approved electives. Students must enroll in BPHY 252 each quarter offered. Students must pass a three-hour Comprehensive Examination consisting of questions provided by the participating faculty, with topics taken from the core curriculum.

Professional Development
Biophysics students must complete GDIV 403.

Normative Time to Degree
6 quarters

Graduate Courses
BPHY 250 Advanced Topics in Biophysics 2
Seminar, 2 hours. Prerequisite(s): restricted to major(s) Biophysics; graduate standing; consent of instructor. Addresses advances in a particular field of Biophysics by analysis of the recent literature. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC). Course is repeatable.

BPHY 252 Seminar in Biophysics 1
Seminar, 1 hour. Prerequisite(s): restricted to major(s) Biophysics; graduate standing; consent of instructor. Provides oral presentations by visiting scholars, faculty, and graduate students on current research in Biophysics. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC). Course is repeatable.

BPHY 290 Directed Studies 1 to 2 Research, 3 to 18 hours. Prerequisite(s): restricted to major(s) Biophysics; graduate standing; consent of instructor. Explores literature or research topics under the direction of a faculty member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BPHY 296 Special Topics in Biophysics 1 to 2
Seminar, 1 to 2 hours. Prerequisite(s): restricted to major(s) Biophysics; graduate standing; consent of instructor. Oral presentations and intensive small-group discussion of selected topics in the area of special competence of each participant. Emphasizes recent advances in topic area and content varies accordingly. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as content or topic changes.

BPHY 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): restricted to major(s) Biophysics; graduate standing; consent of instructor. Original research in an area selected for the advanced degree. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BPHY 299 Thesis Or Dissertation 1 to 12 Research, 3 to 36 hours. Prerequisite(s): restricted to major(s) Biophysics; graduate standing; consent of instructor. Original research in an area selected for the advanced degree. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Black Study Department

Subject abbreviation: BLKS
College of Humanities, Arts, and Social Sciences
Sage N’i’a Whitson, M.F.A, Chair
Department Office, Arts 106

Professors
Dylan Rodriguez, Ph.D.
João H. Costa Vargas, Ph.D.

Associate Professors
Imani Kai Johnson, Ph.D.
Vorris Nunley, Ph.D.
Sage N’i’a Whitson, M.F.A

Assistant Professors
Elyse Ambrose, Ph.D.
Anthony Jerry, Ph.D.
Desireé Melonas, Ph.D.

Lower-Division Courses
BLKS 001 Introduction to Black Study 1: Black People Domestically and Globally
4 Lecture, 3 hours; activity, 2 hours; extra reading, 1 hour. Introduces social issues and movements impacting Black peoples globally. Studies creation of possibilities to navigate issues (e.g., AIDS and other pandemics, food and nutrition insecurity, state terror and industrial incarceration, residential segregation, exposure to environmental toxins, and health and education inequities) to create vibrant futures.

BLKS 002 Introduction to Black Study 2: Imagined and Embodied Futures
4 Lecture, 3 hours; activity, 2 hours; extra reading, 1 hour. Engages critical appraisal of artistic forms, political organizing efforts, embodied praxis and resistance formations, and theoretical prisms that imagine and propose alternatives to antiblackness. Examines Black interventions through time and technologies focusing on transgender, queer, and feminist perspectives-building on what Cedric Robinson terms the Black Radical Tradition.
BLKS 003 Introduction to Black Study 3: Black Ways of Knowing, Doing, and (b)eing Otherwise 4 Lecture, 3 hours; activity, 2 hours; extra reading, 1 hour. Prerequisite(s): none. Introduction to religion in the experiences of Black people in the United States. Topics include Black religion in the social imagination, in ritual, the arts (e.g., African American spirituals, literature), Black Nationalism, social change, and queernesses in Black religion. Engages primary sources for examining religious contributions in society. Cross-listed with RLST 019.

Upper-Division Courses

BLKS 101 Critical Theories of Gender, Race, and Blackness 4 Lecture, 3 hours; activity, 2 hours; extra reading, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Explores Blackness combined with historical trajectories of regional social, political, and economic development create regional experiences of Blackness. Traces forms of being and modes of resistance among diasporic Black communities to understand broader Black diasporic experiences. Course is repeatable as content or topic.

BLKS 115 Black Religion and its Anti Icons 4 Lecture, 4 hours. Prerequisite(s): restricted to class level standing of junior, or senior. A survey of various figures and communities that have resisted hegemonic norms in Black religion in the United States. Explores historical primary resources, literature, oral histories, and contemporary artistic and cultural productions. Examines moral visions of Black and collective resistance and thriving. Cross-listed with RLST 115.

BLKS 118 Black Political Thought 4 Lecture, 3 hours; extra reading, 1 hour; activity, 2 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Examines political implications of such engagements and through Black political thought. Focuses on to the Black experience in the context of the United States but also covers African and Caribbean thinkers. Topics include freedom, democracy, liberation, futurity, community, radical imagining, and state-sanctioned violence.

BLKS 123 Reclaiming the Dark: Black Life Is Speculative Fiction 4 Lecture, 3 hours; activity, 2 hours; extra reading, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Explores theories of the flesh and the body in Black thought to understand the multiple ways that Black bodies signify in the world. Examines flesh, epidermalization, embodiment, and other concepts that consider both antiblack perspectives and theories rooted in and routed through Black radical imagination and praxes.

BLKS 121 The Body & the Flesh in Black Thought 4 Lecture, 3 hours; activity, 2 hours; extra reading, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Explores theories of the flesh and the body in Black thought to understand the multiple ways that Black bodies signify in the world. Examines flesh, epidermalization, embodiment, and other concepts that consider both antiblack perspectives and theories rooted in and routed through Black radical imagination and praxes.

BLKS 121A The Medicine Sessions: Futurist Cypher Technologies 4 Lecture, 3 hours; extra reading, 1 hour; activity, 2 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Engages Black and Queer improvisatory social and spiritual practices to study the diasporic technologies of the circle. Presents the ring shout as foundational to unlocking the structures, the sacred, and the corporeal lirugies embedded within Black trance-inducing social dance forms.

BLKS 142 Blackness and Carcerality 4 Lecture, 3 hours; activity, 2 hours; extra reading, 1 hour. Prerequisite(s): or consent of instructor. Examines the history, contemporary dynamics, key social theories, and social movements focusing on the criminal justice system. Addresses the vast apparatus of surveillance and punishment that constitute its lesser-known aspects including schools, hospitals, immigration detention centers, and various technologies.

BLKS 144 Artist Healers: Trans Indigenous Medicine and Art Intersections 4 Lecture, 3 hours; extra reading, 1 hour; activity, 2 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Examines a range of contemporary live performance makers and healers (centered in trans-indigeneity) who call us to question the construction of norms, binaries, borders, and being. Focuses on healing modalities and positioning wellness and political and critical engagement as partners in accessing a radical imaginary.

BLKS 145 Black Language in Schools and Society 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Explores linguistic, sociolinguistic, and sociopolitical dimensions of Black language in the United States. Considers the relationship between Black language and Blackness. Critically interrogates the role of Black language in classroom instruction, schools, and society. Encourages liberatory learning engagements and centers the lived experiences of Black language speakers. Cross-listed with EDUC 145.

BLKS 151 Afrological Improvisation 4 Lecture, 3 hours; activity, 2 hours; extra reading, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Examines Afrolingual improvisation, a diasporic artform and essential element of jazz. Presents key concepts, pertinent bibliography, and basic discography on jazz since 1950. Covers styles and performers which draw from Black collective knowledge and engage formations of state, society, and empire.

BLKS 191A Seminar in Black Study Research Methods 1: Gateways to Inquiry 4 Seminar, 3 hours; activity, 2 hours; extra reading, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Introduces interdisciplinary and transdisciplinary research approaches to study questions to attend to the lives of Black folk around the world. Covers traditional and experimental methodologies focusing on contemporary research practices and methods deriving from Black diasporic epistemologies. Prepares for the beginning stages of research for senior projects.
BLKS 191B Seminar in Black Study Research Methods 2: Practicing Inquiry 4 Seminar, 3 hours; activity, 2 hours; extra reading, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Engages practical use of research practices, methods, and epistemologies introduced in BLKS 191A. Facilitates student design of research questions and projects for senior capstone project as well as further exploration of the role of researcher. Focuses on research development skills and field-based concentrations. Helps identify relevant theoretical frameworks and bibliographies.

BLKS 193A Black Study Senior Capstone 1 4 Seminar, 3 hours; activity, 2 hours, extra reading, 1 hour. Prerequisite(s): BLKS 191A with a grade of C- or better, BLKS 191B with a grade of C- or better; or equivalent; restricted to class level standing of senior; or consent of instructor. Facilitates initiation of a transdisciplinary capstone project drawing on methods and practices learned in the Black Study major. Applies research and critical writing methods, performance and embodied praxis, and knowledge of visual cultures and media. Provides mentorship for research, writing, and revision processes.

BLKS 193B Black Study Senior Capstone 2 4 Seminar, 3 hours; activity, 2 hours; extra reading, 1 hour. Prerequisite(s): BLKS 193A with a grade of C- or better; or equivalent; restricted to class level standing of senior; or consent of instructor. Continues transdisciplinary capstone project drawing on methods and practices learned in Black Study major. Applies research and critical writing methods, performance and embodied praxis, and knowledge of visual cultures and media. Provides mentorship for research, writing, and revision processes. Focuses on research and writing skills, peer reviews, and field-based work.

BLKS 195 Black Study Inland Empire Community Initiative 4 Seminar, 3 hours; activity, 2 hours; extra reading, 1 hour. Prerequisite(s): BLKS 001, BLKS 002, BLKS 003; restricted to class level standing of junior, or senior; or consent of instructor. Introduces community engagement including prevention of social problems and promotion of well-being in diverse contexts. Critically examines how to define and propose solutions to social and institutional problems. Covers empowerment, resilience, diversity, cultural competence, and social action. Involves service learning through community organizations in Inland Empire communities. Course is repeatable to a maximum of 8 units.

BLKS 196 Directed Research Or Creative Activity in Black Study 4 Seminar, 3 hours; activity, 2 hours; extra reading, 1 hour. Prerequisite(s): BLKS 001, BLKS 002, BLKS 003; or equivalent; restricted to class level standing of junior; or senior; and consent of instructor. Concentrated, in-depth study with a faculty member. Enables conduct of interdisciplinary research in one or two of the upper-division track concentrations in the Black Study major. Course is repeatable to a maximum of 8 units.
College Requirements
See College of Natural and Agricultural Sciences, Colleges and Programs section.

Some of the following requirements for the major may also fulfill some of the college’s breadth requirements. Consult with a department advisor for course planning.

Major Requirements
The major requirements for the B.S. and B.A. degrees in Plant Biology are as follows:

1. Life Sciences core requirements (72-77 units)
   Students must complete all required courses with a grade of “C-” or better and with a cumulative GPA in the core courses of at least 2.0. Grades of “D” or “F” in two core courses, either separate courses or repetitions of the same course, are grounds for discontinuation from the major.
   a) BIOL 005A, BIOL 05LA or BIOL 020, BIOL 005B, BIOL 005C
   b) CHEM 001A, CHEM 01LA, CHEM 001B, CHEM 01LB, CHEM 001C, CHEM 01LC
   c) CHEM 008A and CHEM 08LA or CHEM 008HA and CHEM 08HLA, CHEM 008B and CHEM08LB or CHEM 008HB and CHEM 008HLB, CHEM 008C and CHEM 08LC or CHEM 008HC and CHEM 08HLC
   d) MATH 007A or MATH 009A, MATH 007B or MATH 009B (MATH 009C recommended)
   e) PHYS 002A, PHYS 02LA, PHYS 002B, PHYS 02LB, PHYS 002C, PHYS 02LC
   f) STAT 010
   g) BCH 100 or BCH 110A (BCH 110A is strongly recommended)

2. Upper-division requirements (38 units for the B.S., 33 units for the B.A.)
   A GPA of at least 2.0 in upper-division courses taken in the field of the major is a graduation requirement. A student is subject to discontinuation from the major whenever the GPA in upper-division course work is below 2.0. Students finding themselves in this circumstance must meet with an advisor.
   a) BIOL 102
   b) BPSC 104/Biol 104
   c) BIOL 132/BPSC 132, BIOL 143/BPSC 143, BPSC 133
   d) For the B.S. only: Two (2) units of BPSC 195H, BPSC 197, BPSC 198I, or BPSC 199
   e) BPSC 184
   f) BPSC 193 with a grade of C- or better
   g) For the B.S. At least 11 additional units from one of the five areas of specialization (consult with a faculty advisor). Students may apply a maximum of 6 units of BPSC 190 and/or BPSC 195H and/or BPSC 197 and/or BPSC 198I and/or BPSC 199.
   For the B.A. at least 8 additional units from one of the five areas of specialization (consult with a faculty advisor).

Note: Students planning a B.A. degree should schedule the required language courses in place of a series of electives.

Areas of Specialization
Individual student career goals may be achieved by selecting an area of specialization within the diverse disciplines of botany and plant sciences. Adjustments within these programs can be made to accommodate students’ interests. Students must consult with a faculty advisor to clarify educational goals and to plan a program of study.

1. Plant Cellular, Molecular, and Developmental Biology
   a) BPSC 135
   b) Additional units from the following to meet either the B.S. or B.A. requirement: BCH 102, BCH 110B, BCH 110C or BIOL 107A, BCH 126, BCH 183/BPSC 183, BIOL 107B, BIOL 113, BIOL 114, BIOL 121/MBCL 121L, MBCL 121LS, BIOL 123/MBCL 123/LPSC 123, BIOL 155/BPSC 155, BIOL 168, BPSC 138/MBCL 138, CBNS 101, CBNS 108, BPSC 109/CBNS 109, BPSC 149

2. Plant Genetics, Breeding, and Biotechnology
   a) BPSC 150
   b) Additional units from the following to meet either the B.S. or B.A. requirement: BIOL 105, BIOL 107A, BIOL 107B, BIOL 109, BIOL 119, BIOL 148/BPSC 148, BIOL 155/BPSC 155, BPSC 135, CBNS 108, STAT 011, BPSC 109/CBNS 109, BPSC 149

3. Ecology, Evolution, and Systematics
   a) BPSC 146
   b) Additional units from the following to meet either the B.S. or B.A. requirement: BIOL 105, BIOL 108, BIOL 112/BPSC 112/ENTM 112, BIOL 116, BIOL 116L, BIOL 138/BPSC 138, BIOL 165/BPSC 165, BPSC 134/ENTM 134, BPSC 166, ENSC 100, GEO 151, GEO 153, GEO 169, BPSC 145

4. Plant Pathology, Nematology, and Pest Management
   a) BIOL 120/MBCL 120/LPSC 120
   b) Additional units from the following to meet either the B.S. or B.A. requirement: BCH 183/BPSC 183, BIOL 121/MBCL 121, BIOL 121L/MBCL 121L, MBCL 121LS, BIOL 124/MBCL 124, BPSC 146, BPSC 150, BPSC 166, ENSC 134/BPSC 134, ENMT 100/BPSC 100, ENMT 109, ENMT 124, ENMT 127/BIOL 127, ENMT 129, ENMT 129L, ENSC 100, ENSC 120/NEC 120, NEC 159/BPSC 159, LPSC 120L/BIOL 120L/MBCL 120L, LPSC 123/MBCL 123/MBCL 123L, LPSC 134/BPSC 134, LPSC 134L/BIOL 134L, ENSC 104, MBCL 128

5. Individualized specialization
   For students who wish to pursue cross-disciplinary education in plant biology. Course selection can be individualized, but needs to be approved by faculty advisor.

Minor
The minor in Plant Biology allows students majoring in other departments to obtain in-depth training in Plant Biology.

Requirements for the minor in Plant Biology are as follows:
1. BIOL 104/BPSC 104 (4 units)
2. One course (4–5 units) from the following: BIOL 132/BPSC 132, BIOL 138/BPSC 138, BIOL 143/BPSC 143, BPSC 133
3. 12 to 20 units from the following: BCH 183/BPSC 183, BIOL 132, BIOL 138/BPSC 138, BIOL 143/BPSC 143, BIOL 148/BPSC 148, BIOL 155/BPSC 155, BIOL 165/BPSC 165, BPSC 133/BPS 134/ENSC 134, BPSC 135, BPSC 146, BPSC 150, BPSC 166, BPSC 190, BPSC 195H, BPSC 197, BPSC 198-I, BPSC 199, PLPA 120/BIOL 120/MBCL 120, BPSC 109/CBNS 109, BPSC 149

Note: No more than 4 units of BPSC 190-199 may be used to fulfill this requirement. The course used to fulfill the requirement in 2 cannot also be used to fulfill the requirement in 3.

See Minors under the College of Natural and Agricultural Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Graduate Program
The Department of Botany and Plant Sciences offers programs leading to the M.S. and Ph.D. degrees in Plant Biology. Research in these programs can focus on basic and/or applied questions.

Admission
Applicants who have a baccalaureate degree and who satisfy the general requirements of the university listed in the Graduate Studies section of this catalog are considered for admission to graduate status. Students applying to the M.S. and Ph.D. program must submit GRE General Test scores (verbal, quantitative, and analytical).

Regardless of the area of their major for the baccalaureate degree, students must have had, or complete soon after entering graduate school the following:
1. A year of course work in general biology
2. A year of course work in general chemistry
3. A course in genetics
4. A course in biochemistry or ecology
5. A course in calculus
6. Two courses in physics and/or statistics

Credit from these courses does not count toward the graduate degree.

Immediately after being admitted, each student should identify a faculty advisor and consult with that advisor or the graduate advisor regarding educational goals; scheduling initial course work and possible lab rotations; and forming a guidance committee. Further guidance on these matters is provided in the Botany and Plant Sciences Graduate Student Handbook.
Master’s Degree
The Department of Botany and Plant Sciences offers programs leading to the M.S. degree in Plant Biology.

The master’s degree may be earned under Plan I (Thesis) or Plan II (Comprehensive Examination). Students must meet all general requirements of the Graduate Division. The detailed course program is determined by the guidance committee after considering the specific interests of the student. Department requirements are as follows:

Plan I (Thesis)
1. Three courses from Section I are required. Students who have taken courses comparable to those in Section I during their baccalaureate training may have a portion or all of this section waived. Recommendations for waivers should specify alternative courses and should be sent to the department educational advisory committee for approval. In such instances, however, it is expected that their programs include increased units in courses from Sections II, III, and/or IV.
2. Two courses (6 units) from Section II are required. In fulfilling the Section II requirement, students may use no more than one course cross-listed by Botany and Plant Sciences and another program. If such a cross-listed course is used toward fulfilling the Section II requirement, the same course may not be used toward fulfilling the Section I or III requirements. No more than four units may be in professional development courses.
3. At least 6 units from Section III must be taken.
4. Preparation of a thesis: Not more than 12 units from Section V (299 units) may apply toward the degree. If the student takes research courses (290/297) from Section IV, not more than 6 units may be applied toward the degree. A total of 12 units of 297/299 may be used towards the degree.

Seminar Requirement
All full-time students must enroll in the BPSC 250 seminar during each quarter in which it is offered. Part-time students may take one BPSC 250 seminar for every 12 units of courses. All students must present at least one BPSC 250 seminar and complete at least one quarter of BPSC 240 (or approved similar equivalent that involves substantial student presentations).

Plan II (Comprehensive Examination)
1. Three courses from Section I are required. Students who have taken courses comparable to those in Section I during their baccalaureate training may have a portion or all of this section waived. In such instances, however, it is expected that their programs include increased units in courses from Section II and/or III. Recommendations for waivers should specify alternative courses and should be sent to the educational advisory committee for approval.
2. Two courses (6 units) from Section II are required. In fulfilling the Section II requirement, students may use no more than one course cross-listed by Botany and Plant Sciences and another program. If such a cross-listed course is used toward fulfilling the Section II requirement, the same course may not be used toward fulfilling the Section I or III requirements. No more than 4 units may be in professional development courses.
3. At least 3 courses (11-12 units) from Section III are required.
4. Students must complete at least 6 units from Section IV for a research project (297) or literature review (290), which should be described in a report to be submitted for evaluation by the comprehensive examination committee.
5. Comprehensive written and oral examinations

Seminar Requirement
All full-time students must enroll in the BPSC 250 seminar during each quarter in which it is offered. Part-time students must take one BPSC 250 seminar for every 12 units of courses. All students must present at least one BPSC 250 seminar and complete at least one quarter of BPSC 240 (or approved similar equivalent that involves substantial student presentations).

Courses available for fulfilling the requirement for the M.S. degree in Plant Biology:

Section II — Graduate and upper-division undergraduate courses in related departments or programs and professional development courses (i.e., BPSC 200A - BPSC 200B). Applicable courses are approved by the Graduate Educational Advisory Committee. A minimum of 6 units of course work is required. No more than 4 units may be from professional development classes.

Professional Development Training
Students are required to take BPSC 200A. Students are encouraged to enroll in BPSC 200B. Students may also enroll in BPSC 200C to develop skills in research mentoring in the life sciences.

Section III — BCH 231/BPSC 231, BPSC 201 (E-Z) (for a maximum of 2 units), BPSC 221, BPSC 222, BPSC 225 (E-Z), BPSC 230, BPSC 231, BPSC 234, BPSC 235, BPSC 239, BPSC 240 (only if taken in addition to the required seminar units; see seminar requirement), BPSC 243, BPSC 244, BPSC 245, BPSC 246, and BPSC 247.

Section IV — Research courses: BPSC 290 and BPSC 297

Section V — Thesis research: BPSC 299, Thesis for Plan I

Normative Time to Degree 7 quarters

Doctoral Degree
The Department of Botany and Plant Sciences offers programs leading to the Ph.D. degree in Plant Biology.

The student must meet the general requirements of the Graduate Division.

Admission
Either prior to entering the graduate program or before advancement to candidacy, students must have completed the equivalent of BPSC 104 and one other course from the core plant biology courses (BIOL 107A, BPSC 132, BPSC 135, BPSC 138, BPSC 143, BPSC 146). Course requirements for each student are determined by individual guidance committees and by the educational advisory committee. No later than the second quarter in residence, students meet with a guidance committee to (1) determine a course program to be submitted to the educational advisory committee, and (2) choose a major area of specialization and two minor areas.

Course Work
Guidance committees and students should design individual course programs that meet the specific needs of the student and the requirements of the Ph.D. program. Course programs should prepare students for the qualifying examination and dissertation research. All first-year students must enroll in BPSC 200A and 200B during their first Fall and Spring quarters. Students must take a minimum of 3 graduate-level courses (11-12 units) relevant to the specialization. Graduate courses taken previously may be considered towards fulfilling this requirement. Students’ course programs must be approved by the educational advisory committee. At the time of submission of course programs to the educational advisory committee, the area of specialization and two minor areas to be covered on the qualifying examination should be specified. Students may petition to change the course program, area of specialization, or minor areas at any time.

Students entering the Plant Biology Ph.D. program have four choices, as listed below. Students with a general interest in plant biology and/or evolution are encouraged to choose the first.

Ph.D. in Plant Biology
Students who choose to obtain a Ph.D. in Plant Biology without one of the following concentrations are encouraged to – with the advice and consent of their Major Professor and Guidance Committee—select a set of graduate-level courses (11-12 U) that is specifically tailored to their individual research interests and career objectives.

Students can also choose from one of three concentrations:
Ph.D. in Plant Biology (Concentration in Plant Cell, Molecular, and Developmental Biology) To earn the concentration in Plant Cell, Molecular, and Developmental Biology (appears on the transcript only), students must complete BPSC 231, and BPSC 235. In addition, the required BPSC 240 course must be on a topic related to the concentration.
Ph.D. in Plant Biology
(Concentration in Plant Ecology)

To earn the concentration in Plant Ecology (appears on the transcript only), students must complete BPSC 245, and two additional courses (7-8 units) from the following list: EEOB 211, EEOB 212, EEOB 217, EEOB 230, BPSC 225, BPSC 243, BPSC 244, BPSC 246, BPSC 247, ENTM 241, ENSC 218, ENSC 232, GEO 260, and GEO 268. In addition, the required BPSC 240 course must be on a topic related to the concentration.

Ph.D. in Plant Biology
(Concentration in Plant Genetics)

To earn the concentration in Plant Genetics (appears on the transcript only), students must complete three graduate-level courses (11-12 units) relating to Genetics. Required courses must include two courses from the following list: BPSC 221, BPSC 222, BPSC 225K, BPSC 231, BPSC 234, EEOB 214, BIOL 221/MCBL 221/PLPA 226, GEN 240A. The additional units can be chosen in an area that supports the concentration. In addition, the required BPSC 240 course must be on a topic related to the concentration.

Written and Oral Qualifying Examinations
Advancement to candidacy depends on the student passing written and oral qualifying examinations. The qualifying examination covers the student’s area of specialization and two minor areas. Granting of the degree is contingent upon acceptance of the dissertation by the candidate’s dissertation committee and satisfactory oral defense of the dissertation.

Seminar Requirement
All candidates must enroll in the BPSC 250 seminar during each quarter in which it is offered until advancement to candidacy. After this time, PhD candidates must enroll in BPSC 250 seminar two quarters per year until conferal of the degree. The dissertation defense is normally presented in the BPSC 250 seminar series; however, if necessary, a special seminar may be scheduled for the defense. Also, students must present at least one BPSC 250 seminar in addition to the defense of the dissertation. All students must complete at least one quarter of BPSC 240 (or approved equivalent that involves substantial student presentations) during the Ph.D. program.

Professional Development Training
Ph.D. graduate students must enroll in BPSC 200A and BPSC 200B to fulfill their professional development training requirement. Students may enroll in BPSC 200C to develop skills in research mentoring in the life sciences.

Foreign Language Requirement
None

Teaching Requirement
Students must obtain at least one quarter of teaching experience.

Normative Time to Degree
15 quarters

Normative Time to Candidacy
2 years

Lower-Division Courses
BPSC 011 Plants and Human Affairs 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction for non-science and non-Botany majors to the importance of plants and plant products in the shaping of human affairs and civilization. Covers the origin and practice of agriculture; the utilization of plant products; the latest agricultural advances, including genetic engineering; and the current agricultural and social issues. Plants and plant products are examined during class demonstrations and exercises.

BPSC 021 California’s Cornucopia: Food From the Field to Your Table 5 Lecture, 3 hours; discussion, 1 hour; outside activities, 30 hours per quarter. Prerequisite(s): none. Examines California’s diverse agricultural products. Addresses related contemporary issues such as crop improvement by biotechnology, climate change, pollution, resource use, and nutrition. Also examines how the interplay of geography, history, and culture shapes the cuisine of a region.

BPSC 031 Spring Wildflowers 4 Lecture, 3 hours; laboratory, 3 hours; one Saturday field trip. Prerequisite(s): none. General approach to the study of vegetative and floral features of plants as a means of identification and botanical classification of major plant families in Southern California. Secondary emphasis on the field biology of flowering plants.

BPSC 050 The Evidence For Evolution 4 Lecture, 3 hours, extra reading, 3 hours. Prerequisite(s): none. Introduces and explores the extensive evidence of evolution as the driver of biological diversity. Designed for non-science majors and/or those with limited prior knowledge about biology. Includes the scientific method, paleontology, natural selection, genetics, speciation, and the importance of sex. Addresses the broader need for scientific literacy in society. Cross-listed with ENTM 050.

BPSC 097 Lower-Division Research 1 to 4 Individual Study, 3 to 12 hours. Prerequisite(s): consent of instructor. Involves special research projects in plant biology performed under faculty supervision. Requires a final written report. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 6 units.

Upper-Division Courses
BPSC 104 Foundations of Plant Biology 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005C. A study of the plant world from cells to ecosystems. Examines the structure and function of organisms from the major plant groups and their role in the biosphere. The laboratory explores the unique properties of plants. Cross-listed with BIOL 104.

BPSC 109 Epigenetics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 102. Introduction to mechanisms that cause a heritable change in phenotype without a change in the genetic code. Covers DNA modifications, histone modifications, and noncoding RNAs that influence the expression, maintenance, and inheritance of traits. Discusses impacts of epigenetics on multicellular life such as learning, memory, disease, and crosstalk with environments. Cross-listed with CBNS 199.

BPSC 112 Systematics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005C or equivalent. Principles and philosophy of classification. Topics include phylogenetic and phenetic methods, species concepts, taxonomic characters, evolution, hierarchy of categories, and nomenclature. Cross-listed with BIOL 112, and ENTM 112.

BPSC 132 Plant Anatomy 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005A and BIOL 005B; BPSC 104 or BIOL 104; or consent of instructor. Functional and developmental aspects of plant cell, tissue, and organ structure. Covers all aspects of the flowering plant life cycle from germination to pollination and fruit and seed development. Cross-listed with BIOL 132.

BPSC 133 Plant Diversity and Evolution 5 Lecture, 3 hours; laboratory, 3 hours; field, 30 hours per quarter. Prerequisite(s): BIOL 005C, or consent of instructor. Introduces the principles and methods of identifying, naming, and classifying flowering plants. Surveys selected flowering plant families in California and shows their interrelationships. Introduces the principles and methods of identifying, naming, and classifying flowering plants. Surveys selected flowering plant families in California and shows their interrelationships.

BPSC 134 Soil Conditions and Plant Growth 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 104/BPSC 104 or ENSC 100; or consent of instructor. A study of the chemical, physical, and biological properties of soils and their influence on plant growth and development. Topics include soil-plant water relations; fundamentals of plant mineral nutrition; soil nutrient pools and cycles; soil acidity, alkalinity, salinity, and sodicity; root symbioses; and rhizosphere processes. Cross-listed with ENSC 134.

BPSC 135 Plant Cell Biology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005C; BCH 100 or BCH 110A; or consent of instructor. Explores concepts of dynamic plant cell structures and functions as revealed by modern technologies such as genetic manipulation and live-imaging of cellular structures and molecules.

BPSC 138 Plant Developmental Morphology 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BCH 100 or BCH 110A or BCH 110HA (BCH 100 or BCH 110A or BCH 110HA may be taken concurrently). BIOL 005B, BIOL 005C, CHEM 008C and CHEM 08LC or CHEM 08HC and CHEM 08HLC, PHYS 002C or PHYS 02HC, PHYS 002LC or PHYS 02HLC; or consent of instructor. Introduces the key areas of research in plant morphology and developmental biology. Emphasizes flowering plants (angiosperms). Cross-listed with BIOL 138.

BPSC 143 Plant Physiology 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 008C and CHEM 08LC or CHEM 08HC and CHEM 08HLC, MATH 007B or MATH 009B or MATH 09HB, PHYS 002C or PHYS 02HC, PHYS 002LC or PHYS 02HLC, BCH 100 or BCH 110A or BCH 110HA (BCH 100 or BCH 110A or BCH 110HA may be taken concurrently).
BIOL 104/BPSC 104; or consent of instructor. A survey of the fundamental principles of plant physiology including photosynthesis, respiration, water relations, mineral nutrition, growth, morphogenesis, plant hormones, dormancy, and senescence. Cross-listed with BIOL 143.

BPSC 145 Geospatial Analytics For Landscape Ecology 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 010; or equivalent; or consent of instructor. Builds on the basic understanding of fundamental concepts of Geographic Information Science (GIScience). Applies spatial data concepts to understand the ecological impacts of human activities across landscapes. Examines the link between landscape patterns and ecological processes at larger spatial scales.

BPSC 146 Plant Ecology 4 Lecture, 3 hours; laboratory, 1.8 hours; field, 1.2 hours. Prerequisite(s): BIOL 104 or BPSC 104 or BIOL 116; STAT 010, or consent of instructor. A study of the fundamentals of plant ecology. Emphasizes community ecology, environment, life histories, population dynamics, species interactions, succession, ecosystem and landscape ecology, and plant conservation ecology.

BPSC 148 Quantitative Genetics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 05LA; BIOL 005B; BIOL 005C; BIOL 102; CHEM 001C or CHEM 01HC; CHEM 008C, CHEM 008C or CHEM 008HC, CHEM 008LC; MATH 007B or MATH 009B or MATH 009B; PHYS 002C or PHYS 002HC, PHYS 002LC or PHYS 002HLC; BCH 100 or BCH 110A or BCH 110HA; STAT 010. Examines approaches to studying the genetic basis of polygenic metric traits. Includes types of gene action, partitioning of variance, response to selection, and inferring the number and location of quantitative trait loci. Cross-listed with BIOL 148.

BPSC 149 Nanobiotechnology 2 Lecture, 1 hour; discussion, 1 hour. Prerequisite(s): BIOL 005C; BIOL 102; CHEM 008C or CHEM 008HC, CHEM 008LC or CHEM 008HLC; PHYS 002C or PHYS 002HC, PHYS 002LC or PHYS 002HLC; BCH 100 or BCH 110A or BCH 110HA; STAT 011. Focuses on biotechnology, medicinal plants, bioactive molecules, metabolic engineering, and targeted drug delivery, nanosensors for biochemical processes such as photosynthesis. Also addresses plant-specific plant metabolites. Also addresses plant-specific biochemical processes such as photosynthesis. Cross-listed with BIOL 183.

BPSC 150 Genes, Selection, and Populations 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 102 with a grade of “C-” or better, upper-division standing; or consent of instructor. Considers the conscious manipulation of allelic frequencies in populations as the basis for domestication of crop and animal species. Examines the genetic basis and standard strategies for the improvement of targeted characteristics in populations of plants and animals through selection and introgression of specific genes and gene constructs.

BPSC 155 Chromosomes 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 008C and CHEM 008HC or CHEM 008B and CHEM 008LC, MATH 007B or MATH 009B or MATH 009B; PHYS 002C or PHYS 002HC, PHYS 002LC or PHYS 002HLC; BCH 100 or BCH 110A or BCH 110HA (BCH 100 or BCH 110A or BCH 110HA may be taken concurrently); or consent of instructor. An examination of the structure, function, and behavior of eukaryotic chromosomes. Cross-listed with BIOL 155.

BPSC 165 Restoration Ecology 4 Lecture, 3 hours; field, 8 hours. Prerequisite(s): BIOL 104 or BPSC 104 or BIOL 116 or ENSC 106; CHEM 008B; CHEM 008LB or CHEM 008H; BCH 100 or BCH 110A or BCH 110HA; STAT 010, may be taken concurrently; or consent of instructor. An examination of the basic ecological principles related to land restoration. Topics include enhanced succession; plant establishment; plant adaptations; ecotype; weed colonization and competition; nutrient cycling; functions and reintroduction of soil microorganisms; restoration for wildlife; and the determination of successful restoration. Includes field trips to restored sites. Cross-listed with BIOL 165.

BPSC 166 Plant Physiological Ecology 4 Lecture, 3 hours; workshop, 1 hour. Prerequisite(s): BIOL 005C or consent of instructor; university-level courses in mathematics, physics, and chemistry are recommended. Topics include plant responses to light, temperature, evaporative demand, and limiting soil conditions. Explores photosynthesis, plant-water relations, and plant-temperature relations. Gives attention to plant adaptation to climates with varying aridity and temperature extremes.

BPSC 183 Plant Biochemistry and Pharmacology of Plant Metabolites 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110A or BCH 110HA, BCH 110B or BCH 110HB; or BCH 100, or consent of instructor. Explores plant biochemistry and the significance of plant metabolites in medicine and pharmacology. Focuses on biotechnology, medicinal plants, and plant-derived drugs as well as the biochemical and pharmacological mode-of-action of secondary plant metabolites. Also addresses plant-specific biochemical processes such as photosynthesis. Cross-listed with BCH 183.

BPSC 184 Planning For A Postgraduate Career in Life Sciences 2 Lecture, 1 hour; discussion, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; restricted to majors. Introductory course for seniors at both campuses. Emphasizes career development in the life sciences, with an emphasis on opportunities for graduate programs. Cross-listed with BIOL 184.

BPSC 190 Special Studies 1 to 5 variable hours. Library, laboratory or field work designed to meet special curricular needs. A written proposal signed by the supervising faculty member must be approved by the major advisor and the Department Chair. A written report must be filed. Course is repeatable, but total credit toward graduation may not exceed 9 units.

BPSC 191 Seminar in Agricultural Careers in the 21st Century 1 Seminar, 1 hour. Prerequisite(s): sophomore or junior standing; or consent of instructor. Introduces students to diverse career options in agriculture and biotechnology through seminars and interviews with industry, government, and academic professionals. Develops skillsets for finding and acquiring jobs in agricultural and biotechnology. Graded Satisfactory (S) or No Credit (NC).

BPSC 193 Senior Seminar 2 Seminar, 1 hour; lecture, 1 hour. Prerequisite(s): BIOL 104 or BIOL 104; or PHYS 002C or PHYS 002HC, PHYS 002LC or PHYS 002HLC, BCH 100 or BCH 110A or BCH 110HA; STAT 011. Restricted to class level standing of senior; restricted to major(s) Plant Biology, or consent of instructor. Emphasizes thinking across hierarchical levels and understanding structure-function relationships in plant biology. Includes lectures and presentation of classical or landmark papers. Satisfactory (S) or No Credit (NC) is not available.

BPSC 195H Senior Honors Thesis 1 to 4 Thesis, 3 to 12 hours. Prerequisite(s): upper division standing; admission to University Honors or consent of instructor. Directed research and completion of a senior Honors thesis under the supervision of a faculty member. Course is repeatable to a maximum of 12 units.

BPSC 197 Research For Undergraduates 1 to 4 Research, 1 to 4 hours. Prerequisite(s): upper-division standing; consent of instructor. Individual research conducted under the direction of a Botany and Plant Sciences faculty member. A written proposal must be approved by the supervising faculty member and undergraduate advisor. A written report must be filed with the supervising faculty member at the end of the quarter. Course is repeatable.

BPSC 198I Individual Internship in Botany and Plant Sciences 1 to 12 Internship, 2 to 24 hours; written work, 1 to 12 hours. Prerequisite(s): upper-division standing; consent of instructor. An off-campus internship related to plant biology. The student conducts the internship in the public or private sector but is jointly supervised by an off-campus sponsor and a faculty member in Botany and Plant Sciences. Requires an initial written proposal and a final written report. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

BPSC 199I Individual Internship in Botany and Plant Sciences 1 to 12 Internship, 2 to 24 hours; written work, 1 to 12 hours. Prerequisite(s): upper-division standing; consent of instructor. An off-campus internship related to plant biology. The student conducts the internship in the public or private sector but is jointly supervised by an off-campus sponsor and a faculty member in Botany and Plant Sciences. Requires an initial written proposal and a final written report. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.
**Graduate Courses**

**BPSC 200A Plant Biology Core 2** Lecture, 1 hour; practicum, 3 hours. Prerequisite(s): graduate standing in Plant Biology or consent of instructor. Explores plant biology research approaches. Emphasizes critical thinking and advanced planning of hypothesis testing, as well as experimental/descriptive/theoretical caveats, trade-offs, and options. Presents topics in a case-study approach. Also addresses professional development.

**BPSC 200B Plant Biology Core 2** Lecture, 1 hour; practicum, 3 hours. Prerequisite(s): BPSC 200A. Builds on material covered in BPSC 200A. Focusing on complete grant proposals based upon the guidelines of an actual funding source. Presents topics in a case-study approach. Includes peer review of completed proposals.

**BPSC 200C Plant Biology Core 2** Lecture, 0.5 hour; discussion, 0.5 hour; written work, 3 hours. Prerequisite(s): restricted to major(s) Plant Biology; graduate standing; or consent of instructor. Teaches how to become a reflective and effective research mentor. Includes designing and implementing an effective strategy to mentoring. Addresses learning how to critically evaluate student learning and the effectiveness of mentoring initiatives. Creates a mentoring community where challenges and solutions can be shared among students with diverse backgrounds. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

**BPSC 201 (E-Z) Methods in Plant Biology 1 to 2** Laboratory, 3 hours. Prerequisite(s): graduate standing. Explores the theory and principles of instruments and laboratory techniques applicable to research in the plant sciences. Experiments provide experience in the use of laboratory instruments and techniques including applications and limitations. E. Plant Molecular Biology; F. Plant Ecology; G. Plant Systematics; I. Plant Microscopy; J. Plant Physiology; K. Plant Genetics; M. Plant Cell Biology; N. Plant Cytogenetics. Course is repeatable to a maximum of units.

**BPSC 208 Product Design and Entrepreneurship For Agricultural and Biological Applications 3** Lecture, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Examines the discovery, design, and evaluation processes for biological and agricultural products through team study and project design. Includes participation from various disciplines working together to broaden knowledge and enhance communication skills key to tackling challenges related to agriculture, the environment, human health, and other needs. May be Taken Satisfactory (S) or No Credit (NC) by students advanced to candidacy for the Ph.D. Cross-listed with CE 208.

**BPSC 221 Advanced Plant Breeding 4** Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 148 / BPSC 148 or consent of instructor; BPSC 150. Advanced treatment of plant breeding theory and practice including development and use of information on inheritance of traits; choice of breeding plans; breeding for yield, quality, and disease and stress resistance; and use of biotechnology.
BPSC 246 Landscape Ecology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 116 or BPSC 146; STAT 231A; or consent of instructor. Introduces landscape ecology both as a sub-discipline of ecology and an interdisciplinary approach for environmental research. Includes identification of spatial patterns, pattern-process relationships, and scaling. Analyzes population, community, and ecosystem dynamics in connection with landscape functioning. Evaluates landscape theory and methods for applications in species conservation, pollution, and climate changes.

BPSC 247 Ecological Theory and Modeling 4 Lecture, 2 hours; discussion, 2 hours. Prerequisite(s): MATH 090C or MATH 09HC; STAT 110 or STAT 231B or equivalent; an undergraduate course in ecology, or consent of instructor. Explores the fundamental ecological theory and modeling methodology with emphasis on the ecosystem and landscape levels. Synthesizes current research developments in the context of their classic works.

BPSC 250 Seminar in Plant Biology 1 Seminar, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Intensive study of selected topics in plant biology. Includes lectures by students, faculty, and invited scholars on subjects related to the principles of plant biology. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

BPSC 252 Special Topics in Botany/Plant Science 1 Seminar, 1 hour. Prerequisite(s): graduate standing and consent of instructor. Oral presentations and intensive small-group discussion of selected topics in the area of special competence of each staff member. Course content will emphasize recent advances in the special topic area and will vary accordingly. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BPSC 261 Seminar in Genetics, Genomics, and Bioinformatics 1 Seminar, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Oral reports by visiting scholars, faculty, and students on current research topics in Genetics, Genomics, and Bioinformatics. Graded Satisfactory (S) or No Credit (NC). Course is repeatable. Cross-listed with BCH 261, BIOL 261, ENTM 261, PLPA 261, and GEN 261.

BPSC 290 Directed Studies 1 to 6 Individual Study, 3 to 18 hours. Prerequisite(s): consent of instructor. Library, laboratory, or field studies conducted under the direction of a faculty member. Designed to meet specific curricular needs in areas of plant biology not covered by formal course work and outside of required directed dissertation or thesis research. Not intended to replace BPSC 297 or BPSC 299.

BPSC 291 Individual Study in Coordinated Areas 1 to 6 Prerequisite(s): graduate standing. A program of study designed to advise and assist candidates who are preparing for examinations. Up to 6 units may be taken prior to the master's degree. Up to 12 units may be taken prior to advancement to candidacy for the Ph.D. Graded Satisfactory (S) or No Credit (NC). Course is repeatable upon recommendation of the instructor.

BPSC 292 Concurrent and Advanced Studies in Botany and Plant Sciences 1 to 4 Research, 3 to 12 hours. Prerequisite(s): consent of instructor. Elected concurrently with an appropriate undergraduate course, but on an individual basis. Devoted to one or more graduate projects based on research and criticism related to the course. Faculty guidance and evaluation is provided throughout the quarter.

BPSC 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing or consent of instructor. Individual research conducted under the direction of a Botany and Plant Sciences faculty member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BPSC 299 Research For Thesis Or Dissertation 1 to 12 Thesis, 3 to 36 hours. Prerequisite(s): graduate standing. Original research in an area selected for the advanced degree. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Business Administration

Subject abbreviation: BUS

The School of Business
Yunzeng Wang, Ph.D., Dean
Office, 142 Anderson Hall
(951) 827-2932
Undergraduate Business Programs Office
2340 Omlsted Hall
(951) 827-4551; fax: (951) 827-5061
business.ucr.edu

Professors
Subramanian ‘Bala’ Balachander, Ph.D.
Albert O. Steffey Chair (Marketing)
Margaret Campbell, Ph.D. Associate Dean and Department Chair, and A. Gary Anderson Family Foundation Endowed Presidential Chair (Marketing)
Y. Peter Chung, Ph.D. (Finance)
Elodie Goodman, Ph.D. (Operation and Supply Chain Management)
Mohsen El-Hafsi, Ph.D. (Operations and Supply Chain Management)
Jeray ‘John’ Haleblian, Ph.D. Associate Dean, and A. Gary Anderson Family Foundation Endowed Presidential Chair in Business Administration (Management)
Jean Helwege, Ph.D. A. Gary Anderson Family Foundation Endowed Presidential Chair in Finance (Finance)
Thomas Kramer, Ph.D. Associate Dean for the Academic Undergraduate Programs (Marketing)
Birendra Mishra, Ph.D. (Accounting) Theodore Mock, Ph.D. Distinguished Professor (Accounting)
Ashutos Prasad, Ph.D. (Marketing)
Yunzeng Wang, Ph.D. Dean’s Distinguished Scholar (Operations and Supply Chain Management)
Ivy Zhang, Ph.D. (Accounting and Information System)
Rami Zwicky, Ph.D. Associate Dean for the Graduate Academic Programs (Marketing)

Professors Emeriti
Bajis M. Dodin, Ph.D. (Operations and Supply Chain Management)
Woody Liao, Ph.D. (Accounting)
Kathleen Montgomery, Ph.D. Distinguished Professor (Management)
Michael Moore, Ph.D. (Accounting)
Amonn Rapoport, Ph.D. Distinguished Professor (Management)
Waymond Rodgers, Ph.D. (Accounting and Information Systems)
Richard Smith, Ph.D. (Finance)
David Stewart, Ph.D. Distinguished Professor (Marketing)

Associate Professors
Alexander Barinov, Ph.D. (Finance)
Hai Che, Ph.D. (Accounting)
Long Gao, Ph.D. (Operations and Supply Chain Management)
Michael Haselhuhn, Ph.D. (Management)
Hyun ‘Shana’ Hong, Ph.D. (Accounting)
Yawen Jiao, Ph.D. (Finance)
Boris Maciejovsky, Ph.D. (Management)
Marlo Raveendran, Ph.D. (Management)
Ashish Sood, Ph.D. (Marketing)
Danko Turicci, Ph.D. (Operations and Supply Chain Management)
Mindy Truong, Ph.D. (Management)
Elaine Wong, Ph.D. (Management)

Assistant Professors
Eric Allen, Ph.D. (Accounting)
Richard Carrizosa, Ph.D. (Accounting)
Mengmeng Dong, Ph.D. (Finance)
Mingyu ‘Max’ Joo, Ph.D. (Marketing)
Demetrius Lewis, Ph.D. (Management)
Adem Orsdemir, Ph.D. (Operations and Supply Chain Management)

Assistant Professor of Teaching
Neman Desai, Ph.D. (Accounting)
Kyle Ingram, Ph.D. (Management)
Jonathan Lim, Ph.D. (Marketing)
Sanjoy Moulik, Ph.D. (Information Systems)
Greg Richey, Ph.D. (Finance)
Rich Yueh, Ph.D. (Information Systems)

Lecturers
Arturo Alcaraz (Management)
Sean Jasso, Ph.D. (Management and Marketing)
Jonathan Pittard, M.B.A. (Accounting)
Raj Singh, Ph.D. (Management)

Majors
The B.S. in Business Administration is a two-year upper-division major offered by the School of Business. Students can enroll in a Pre-Business status and are advised in CHASS during their freshman and sophomore years. The Pre-Business curriculum includes the prerequisites to the major and the college breadth requirements. After admission to the major, students are advised by the School of Business through its Undergraduate Business Programs Office located at 2340 Omlsted Hall. The B.S. degree in Business Administration is conferred by the School of Business.

The program is accredited by the AACSB International - The Association to Advance Collegiate Schools of Business.
Admission
A limited number of students are accepted into the Business Administration major, chosen according to overall GPA. Students must apply for the major when they have completed not fewer than 75 and not more than 100 quarter units of college work. Final acceptance into the major is based on completion of all prerequisites and breadth requirements within a 100-quarter-unit limit, a GPA of 2.50 or above in major prerequisites, and cumulative GPA of at least 2.70. (Students who have not completed the foreign language breadth requirement, ENGL 001C, or one Social Science course of their breadth requirement, may be accepted into the program, but they must complete the requirement before graduation.) Exceptions to the 100-quarter-unit maximum must be requested by petition.

UCR Students (excluding Pre-Business students) interested in changing major to Business Administration will be admissible to the Business Preparatory (BSPR), which is not a major in UCR, but a holding group of transfer students who appear to be qualified for admission into business administration, but have some deficiencies which need to be completed before admission into business administration) status only if they can complete their deficiencies in breadth and/or major prerequisites within one quarter (the first quarter after admission into Bus-Preparatory).

The same rule will apply to students transferring in from a community college or a four-year school. In the event these students fail to meet this one quarter requirement, they will not be admitted into the BSPR category, and will be advised to find another major at UCR.

Students are encouraged to participate in at least one internship during their junior or senior year. Students interested in international business are encouraged to participate in Education Abroad, which has programs affiliated with more than 150 institutions in 35 countries worldwide. For details, visit Education Abroad at ea.ucr.edu or call (951) 827–4113.

Outstanding academic achievement is recognized by the awarding of the Delta Sigma Pi Scholarship Key to a graduating senior. Other awards, presented on an annual basis, include the Bank of America Business Leaders Scholarship, Deloitte and Touche Scholarship, Gordon Blunden/Provident Savings Bank Business Scholarship, and the Ernst & Young Scholarship.

Graduating seniors are also eligible for the School of Business Award for Academic and Service Excellence, and also the School of Business Concentration Area Awards, which recognizes the student with the best overall performance in each concentration area.

Each Spring, the top 10% of juniors and seniors in the Business Administration program are invited to join Beta Gamma Sigma, the only international honors society recognized by AACSB International. Membership in Beta Gamma Sigma is the highest recognition a business student anywhere in the world can receive in a business program accredited by AACSB International. New Members are recognized by an official induction ceremony led by the Dean of the School of Business in the Spring quarter.

University Requirements
See Undergraduate Studies section.

College Requirements
Students must fulfill all breadth requirements of the College of Humanities, Arts, and Social Sciences or the Intersegmental General Education Transfer Curriculum prior to transferring to the UC.

Major Requirements
The following are requirements leading to the B.S. degree in Business Administration. At least 50 percent of business course requirements must be completed at UCR.

Business Administration Major
1. Preparation for Business Administration major (6 courses at least 23 units)
   Major prerequisites (non-BUS courses may be used to satisfy breadth requirements for the School of Business):
   (1) BUS 010
   (2) BUS 020
   (3) ECON 002
   (4) ECON 003
   (5) STAT 008 or STAT 010 or ECON 101
   (6) MATH 022

   The major requirements for the B.S. in Business Administration are as follows:
   2. Upper-division major requirements (19 courses at least 77 units)

   Core courses (at least 11 courses at least 44 units):
   ECON 102/ECON 103, BUS 100W, BUS 101, BUS 102, BUS 103, BUS 104/STAT 104, BUS 105, BUS 106/BUS 133/ECON 134, BUS 107, BUS 108, BUS 109

   Concentration (At least 24 units): Students in the Business Administration major (BSAD) will be required to declare a concentration at least three quarters prior to graduation, provided they be allowed to change their concentration, if justified. The Office of Undergraduate Business Programs will manage the process. Students can declare one concentration.

   Choose six courses from one of the concentrations listed below. Courses completed to meet core requirements may not be used to meet concentration requirements.

   Business Administration: BUS 120, BUS 121, BUS 123, BUS 124A, BUS 124B, BUS 125, BUS 126, BUS 127/STAT 127, BUS 128, BUS 129, BUS 130, BUS 131
   Business Analytics: BUS 150, BUS 154, BUS 155, BUS 156, BUS 157, ANTH 105/BUS 158, BUS 163, BUS 173, BUS 177
   Marketing: BUS 111, BUS 112, BUS 113, BUS 114, BUS 115, BUS 116, BUS 117, BUS 118, BUS 119, BUS 151, BUS 152, BUS 159, BUS 164
   Operations and Supply Chain Management: BUS 123, BUS 124A, BUS 124B, BUS 125, BUS 126, BUS 127/STAT 127, BUS 128, BUS 129, BUS 130, BUS 173

   An additional 2 courses (at least 8 units) of Business Administration elective courses from BUS 110–BUS 199H, excluding BUS 190. Courses completed to satisfy the six-course concentration requirement may not be used to meet this requirement. Related courses outside of Business Administration may be approved to satisfy their requirement with the approval of the Associate Dean or Director of Undergraduate Business Programs.

Minor
Students declaring a minor in Business Administration will petition the Undergraduate Business Programs Office at least three quarters prior to graduation. That office will publicize the deadlines each quarter to all colleges and major departments.

Prerequisites for the minor in Business Administration are as follows:
Three lower-division courses (14 units) (must be completed with no grade lower than “C”): BUS 020, ECON 003, STAT 008 or STAT 010 or ECON 101

Additionally, students need to complete four upper-division courses as follows, depending on the minor of their choice, the general business minor or any of the eight functional business minors (16 units):

   General Business:
   Four core courses from the following list: BUS 103, BUS 104/STAT 104, BUS 106 or BUS 133 or ECON 134, BUS 107, BUS 108
   Accounting:
   a) Required: BUS 108, BUS 165A
   b) Two additional upper-division Business Administration accounting courses selected from the following: BUS 161, BUS 165B, BUS 165C, BUS 168A, BUS 168B, BUS 169A, BUS 169B, BUS 170
   Business Analytics:
   a) Required: BUS 104, BUS 124A
   b) Two additional upper-division business analytics courses selected from the following: BUS 119, BUS 123, BUS 124B, BUS 125, BUS 129, BUS 130, BUS 136, BUS 173
   Finance:
   a) Required: Either BUS 133 or BUS 106, BUS 132
   b) Additional upper-division Business Administration finance courses to meet 4-course minor requirement selected from the following: BUAS 101, BUS 131, BUS 134 (highly recommended), BUS 135, BUS 136 (highly recommended), BUS 137, BUS 138, BUS 139, BUS 140E, BUS 141, BUS 142, BUS 147
Information Systems:
a) Required: BUS 101
b) Three additional upper-division Business Administration information systems courses selected from the following: BUS 110, BUS 125, BUS 128, BUS 163, BUS 166, BUS 171, BUS 172, BUS 173, BUS 174, BUS 175, BUS 179

Management: Organizational Behavior/Human Resources:
a) Required: BUS 107, BUS 155
b) Two additional upper-division Business Administration organizational behavior or human resources courses selected from the following: BUS 121, BUS 143, BUS 144, BUS 145, BUS 149, BUS 156, BUS 157, BUS 177

Management: Strategy and Entrepreneurship:
a) Required: BUS 109, BUS 146
b) Two additional upper-division Business Administration courses selected from the following: BUS 155, BUS 112, BUS 113, BUS 144, BUS 143, BUS 145, BUS 147, BUS 148, BUS 149, BUS 150, BUS 154, BUS 155, BUS 156, BUS 157, BUS 159, BUS 163, BUS 173

Marketing:
a) Required: BUS 103
b) Three additional upper-division Business Administration marketing courses selected from the following: BUS 111, BUS 112, BUS 113, BUS 114, BUS 115, BUS 116, BUS 117, BUS 118, BUS 119, BUS 151, BUS 152, BUS 159, BUS 164

Operations and Supply Chain Management:
a) Required: BUS 104, BUS 105
b) Two additional upper-division Business Administration operations and supply chain management courses selected from the following: BUS 123, BUS 124A (highly recommended), BUS 124B, BUS 125, BUS 126, BUS 127/STAT 127, BUS 128, BUS 129 (highly recommended), BUS 130, BUS 173

Lower-Division Courses

BUS 001 Personal Finance 4 Lecture, 3 hours; workshop, 1 hour. Prerequisite(s): none. Provides students with tools necessary to analyze the decision to finance their UCR education with student loans. Topics include personal budgets, student loans, interest rates, career planning, auto and health insurance, and other issues related to financing higher education. Credit is awarded for only one of BUS 001 or BUS 001H.

BUS 001H Personal Finance 4 Lecture, 3 hours; workshop, 1 hour. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to BUS 001. Provides students with tools necessary to analyze the decision to finance their UCR education with student loans. Topics include personal budgets, student loans, interest rates, career planning, auto and health insurance, and other issues related to financing higher education. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of BUS 001 or BUS 001H.

BUS 010 Introduction to Business 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): none. Provides an overview of the field of business administration. Explores business goals and strategies, functional areas of business and their integration in policy and decision making, social responsibility, computers in business, and business trends and challenges including the international dimension.

BUS 020 Financial Accounting and Reporting 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): none. A study of the concepts and techniques for measurement and communication of financial information. Includes interpretation of financial statements.

BUS 021 Generation of Financial Accounting Information 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BUS 020 with a grade of “C-” or better. A detailed study of the process of measuring, recording, and communicating financial accounting information.

Upper-Division Courses

BUAS 101 Fundamentals of Insurance 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): BUS 106 or ECON 134 or BUS 133. Introduces the insurance industry and the pricing of actuarial risks. Topics include asymmetric information, adverse selection, and moral hazard as they apply to life insurance and property and casualty policies, state regulations, and models for regulatory capital and reinsurance.

BUS 100W Management Writing and Communication 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENG 101B with a grade of C- or better. A study of the concepts and techniques for measurement and communication of financial information. Includes interpretation of financial statements.

BUS 101 Information Technology Management 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BUS 020; ECON 003; STAT 008; or equivalent; or consent of instructor. Topics include computer hardware and software, business data processing, databases, telecommunications, systems analysis and design, cost-benefit analysis, and systems applications in business. Includes database and spreadsheet projects.

BUS 102 Ethics and Law in Business and Society 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BUS 020; ECON 003; STAT 008; or equivalent; or consent of instructor. Analyzes the legal, ethical, political, and social aspects of the business environment. Topics include ethics and social responsibility, government regulation, corporate governance, and global management issues.

BUS 103 Marketing and Distribution Management 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BUS 020; ECON 003 or ECON 003H, STAT 008; or consent of instructor. An introduction to the role of marketing in society emphasizing concepts, marketing methods, and institutions.

BUS 104 Decision Analysis and Management Science 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 008; STAT 008 or STAT 010; or equivalents; or consent of instructor. A survey of deterministic and probabilistic models for decision making. Topics include linear programming and extensions, networks, dynamic programming, decision trees, queueing models, and simulation. Explores the application of these models in decision making. Cross-listed with STAT 104.

BUS 105 Production and Operations Management 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 008 or STAT 010; or equivalent. Addresses the issues of design and control of production systems in manufacturing and service organizations. Covers product and process selection, capacity planning, location and layout design, project and job scheduling, inventory control, material planning, and quality control.

BUS 106 Introduction to Financial Management 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BUS 020; ECON 003 or ECON 003H; STAT 008 or ECON 107; or equivalent; or consent of instructor. An introduction to financial management and financial institutions. Includes time value of money, stock and bond valuation, risk and return, portfolio theory, capital budgeting, capital structure, dividend policy, and financial databases. Cross-listed with ECON 134. Credit is awarded for one of the following BUS 106, ECON 134, or BUS 133.

BUS 107 Organizational Behavior 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BUS 020; ECON 003; STAT 008; or equivalent; or consent of instructor. Studies organizations from the behavioral science perspective. Topics include motivation, leadership, communication, groups, organization structure and culture, and control in complex organizations.

BUS 108 Financial Evaluation and Managerial Analysis 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BUS 020; ECON 003; STAT 008; or equivalent; or consent of instructor. A study of accounting data used for managerial planning and controlling of business operations. Provides an introduction to manufacturing operations and cost accounting systems, cost-volume-profit analysis, relevant costing, standard costing and variance analysis, and budgeting.

BUS 109 Competitive and Strategic Analysis 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BUS 100W; BUS 103; BUS 108; BUS 106 or ECON 134 or BUS 133; restricted to major(s) Business Administration. Provides an understanding of strategic decision-making processes in organizations, the interrelationships among functional areas, and how decision making is affected by internal and external environments.
BUS 110 Introduction to Data Mining and Visual Analytics 4 Lecture, 2 hours; laborato-
ry, 1 hour; extra reading, 2 hours; written work, 3 hours. Prerequisite(s): BUS 101. Covers the processes, methodologies and practices used to transform data into useful information to support business decision-making. Offers an opportunity to gain insights and hands-on-experience with basic functionality of industry-standard data mining and visualization software tools such as Tableau, JMP and IBM’s Watson Analytic.

BUS 111 Services Marketing 4 Lecture, 3 hours; outside project, 3 hours. Prerequisite(s): BUS 103. Covers the marketing of services and ideas. Focuses on marketing for service organizations such as hotels, hospitals, and banks. Provides understanding of the broader role of service provision for both service firms and goods firms.

BUS 112 Consumer Behavior 4 Lecture, 3 hours; extra reading, 2 hours; activity, 1 hour. Prerequisite(s): BUS 103. Provides a basic understanding of the general models of choice behavior as it relates to marketing decision making. Emphasizes motivation, perceptions, learning, and social forces as they impact the choice process.

BUS 113 Marketing Institutions 4 Lecture, 3 hours; extra reading, 2 hours; projects, 1 hour. Prerequisite(s): BUS 103. Covers the concepts and strategies relating to the delivery of consumer goods and services, the main topic being the management of marketing activities within the channels of distribution, especially in retail and wholesale institutions.

BUS 114 Marketing in A Global Environment 4 Lecture, 3 hours; research, 2 hours; term paper, 1 hour. Prerequisite(s): BUS 103. Covers the theory and practice of marketing across national borders. Provides an understanding of global marketing environments and examines the development of marketing strategies to maximize growth of global companies.

BUS 115 Marketing Research 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): BUS 103. Covers types and sources of marketing information, the marketing research process, and techniques of data collection and analysis, including consumer and customer surveys and test marketing. Examines both quantitative and qualitative research with analysis of the values and limitations of data. Emphasis is placed on evaluation and interpretation of results.

BUS 116 Pricing Strategy and Management 4 Lecture, 3 hours; research, 3 hours. Prereq-
quisite(s): BUS 103 or consent of instructor. Integrates theory and practice into a frame-
work for making pricing decisions. Prepares for addressing strategic and tactical pricing issues. Topics include customer demand and price sensitivity, psychological reaction to price, segmented pricing, price promotions, bundling, online pricing, dynamic pricing, competitive reaction, profitability analysis, and pricing strategy development.

BUS 117 Advertising and Integrated Marketing Communications 4 Lecture, 3 hours; extra reading, 2 hours; activity, 1 hour. Prerequisite(s): BUS 103. Covers the basic concepts and functions of advertising, sales promotion, and other communication tools in an integrated marketing communications framework.

BUS 118 Digital Marketing 4 Lecture, 3 hours; activity, 3 hours. Prerequisite(s): BUS 103. An introduction to the role of digital marketing in business-to-consumer and business-to-business marketing. Covers the application of traditional marketing principles to an electronic commerce environment and new digital marketing techniques made possible by this environment.

BUS 119 Data-Driven Marketing 4 Lecture, 3 hours; individual study, 2 hours; extra read-
ing, 1 hour. Prerequisite(s): BUS 103; or consent of instructor. Examines marketing cases and develops data analytical skills for managerial decision making. Utilizes statistical software to manage, display, and analyze marketing information including consumer survey, relationship management, scanner, and socioeconomic data. Topics include attitude measurement, market segmentation and targeting, competition analysis, market performance analysis, and store location choice.

BUS 120 Global Strategy 4 Lecture, 3 hours; extra reading 1 hour; term paper, 2 hours. Pre-
erequisite(s): BUS 109 or equivalents. Introduces global strategic management and how to win the global marketplace. Covers topics including the challenges of creating the right kind of organization, motivating a global workforce, entering new markets, creating global competitive advantage, and building a global mindset.

BUS 121 Employee Benefits 4 Lecture, 3 hours; individual study, 1 hour; research, 1 hour; written work, 1 hour. Prerequisite(s): BUS 107. Provides a foundation of knowledge regarding employee benefits and the design and management of employee benefit plans. Discusses current issues and recent developments in the ever-changing field regarding employee benefits-related topics.

BUS 122 Spreadsheet Modeling For Decision-Making 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): BUS 104 or STAT 104. Introduces the fundamental techniques of using data to make informed management decisions in the presence of uncertainty. Utilizes advanced Microsoft Excel functionality.

BUS 123 Business Analytics 4 Lecture, 3 hours; activity, 3 hours. Prerequisite(s): STAT 008 or STAT 010 or ECON 101. Provides fundamental concepts and tools needed to understand the emerging role of business analytics in organizations. Applies basic business analytics tools in a spreadsheet environment. Introduces market-leading techniques that help identify and manage key data from business processes. Provides the essential tools required for data mining and business process re-engineering.

BUS 124A Advanced Business Analytics 4 Lecture, 3 hours; written work, 3 hours. Prereq-
quisite(s): BUS 124A with a grade of C- or better; STAT 008 or STAT 010 or ECON 101. Teaches statistical methods for descriptive, predictive, and prescriptive analysis. Provides opportunities to apply these acquired skills in various business applications in operations, finance, and marketing. Utilizes tools such as R Programming for data analysis and Tableau for data visualization.

BUS 125 Simulation For Business 4 Lecture, 3 hours; extra reading, 1.5 hours; activity, 1.5 hours. Prerequisite(s): BUS 104 or STAT 104; or equivalents. Introduces simulation as a tool for analyzing complex systems. Analyzes and discusses the theory and practice of modeling through simulation. Topics include modeling uncertainty and collecting input data, Monte Carlo simulation techniques, model verification and validation, and sensitivity analysis. Examines applications in finance, marketing, operations, and supply chain management.

BUS 126 Practical Business Forecasting 4 Lecture, 3 hours; activity, 3 hours. Prereq-
usite(s): BUS 105; or consent of instructor. Teaches how forecasts are developed and utilized. Emphasizes common forecasting methods used in business and uses specific cases to illustrate these methods. Applications to business include forecasting sales, production, inventory, macroeconomic factors such as interest and exchange rates, and other aspects of both short- and long-term business planning.

BUS 127 Introduction to Quality Improvements 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 008 or STAT 010. Explores Deming’s 14 points for management, graphical methods, fishbone diagram, Pareto analysis, control charts for attributes and variables, cusum and moving average charts, process-capability. Also covers economic design, acceptance sampling, Taguchi method, parameter design, tolerance design, reliability, hazard rate, censoring, and accelerated life testing. Cross-listed with STAT 127.

BUS 128 Project Planning and Control 4 Lecture, 3 hours; assigned problems and field project, 3 hours. Prerequisite(s): BUS 104/STAT 104 or consent of instructor. Covers issues related to planning and control. Explores the differences between projects and production systems; breakdown structures of project organization and work; sequencing and budgeting; resource management; project evaluation and control; and use of current project management software. Includes application of method-ology to a real-world project.

BUS 129 Supply Chain Management 4 Lecture, 3 hours; assigned problems, 3 hours. Prereq-
usite(s): BUS 105. Focuses on management of the distribution of goods and services from plants, ports, and vendors to customers. Key topics include transportation, inventories, warehousing, materials handling, order processing, packaging, pricing, customer service standards, and warehouse and retail location.
BUS 130 Quantitative Business Decision Models 4 Lecture, 3 hours; activity, 3 hours. Prerequisite(s): BUS 104 or BUS 105 or STAT 104. Covers the modeling and analysis of decision problems in supply chain management. Includes logistics network design, integration of supply chain operations, and supply and sourcing decisions. Utilizes the electronic spreadsheet as the principal device for building models, as well as addresses the concepts of effective spreadsheet design and use. If BUS 130 has been completed with a passing grade with the title of “Supply Chain Modeling” the new BUS 130 “Quantitative Business Decision Models” may not be taken for credit.

BUS 131 Fixed-Income Securities 4 Lecture, 3 hours; research, 1 hour; extra reading, 2 hours. Prerequisite(s): BUS 133 or BUS 132; BUS 106 or ECON 134. Covers fixed-income securities and basic analytical tools in fixed-income markets. Topics include relative pricing of fixed-income securities, yield-curve estimation, securities with embedded options, and trading strategies. Utilizes instruments such as interest rate swaps, mortgage-backed securities, and credit derivatives.

BUS 132 Foundations of Finance 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): BUS 020; ECON 101 or STAT 008; ECON 102 or ECON 103 or ECON 104A or ECON 105A. Covers the mathematical and economic foundations of finance. Topics include intertemporal production and consumption,isher separation, risk and return, two-fund separation, standard asset-pricing models, arbitrage, derivatives concepts and parity relationships, and international finance parity relationships. Credit is awarded for one of the following BUS 132 or BUS 133.

BUS 133 Accelerated Foundations of Finance 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): BUS 020 with a grade of B or better; STAT 004 with a grade of B or better or STAT 008 with a grade of B or better or STAT 010 with a grade of B or better or ECON 101 with a grade of B or better; ECON 003 with a grade of B or better or ECON 003H with a grade of B or better; or a score of 3 or higher on the Advance Placement exam in Statistics; or consent of instructor. Covers materials from BUS 106/ECON 134 and BUS 132. Examines investment and operational decisions of individuals and companies. Covers relationship between investment decisions, wealth, and risk tolerance. Addresses operational decisions from the perspective of an entrepreneur or manager. Pursues strategies that personally appeal rather than investments that maximize shareholder value. Satisfactory(S) or No Credit(N/C) is not available. Credit is awarded for one of the following BUS 133, or BUS 106/ECON 134 and BUS 132.

BUS 134 Corporate Finance 4 Lecture, 3 hours; term paper, 2 hours; extra reading, 1 hour. Prerequisite(s): BUS 133 with a grade of C- or better or BUS 132 with a grade of C- or better; BUS 106 with a grade of C- or better or ECON 134 with a grade of C- or better. Explores capital budgeting under uncertainty, cost of capital, capital structure, and basics of corporate governance. May cover other related topics. Provides an understanding of the theoretical issues related to these topics. Emphasizes formulating optimal financial decisions. May include case-method teaching and data analysis.

BUS 135 Corporate Financial Policy 4 Lecture, 3 hours; term paper, 2 hours; extra reading, 1 hour. Prerequisite(s): BUS 133 with a grade of C- or better or BUS 132 with a grade of C- or better; BUS 106 with a grade of C- or better or ECON 134 with a grade of C- or better. Covers application of option pricing in corporate finance, financial planning, working capital management, mergers and acquisitions, and risk management. May cover other related topics. Emphasizes formulating optimal financial decisions. May include case-method teaching and data analysis.

BUS 136 Investments: Security Analysis and Portfolio Management 4 Lecture, 3 hours; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): BUS 133 with a grade of C- or better or BUS 132 with a grade of C- or better; BUS 106 with a grade of C- or better or ECON 134 with a grade of C- or better. Provides a thorough study of the investment process. Topics include portfolio selection, asset-pricing models, term structure, and portfolio performance valuation. Discusses empirical uses of securities data and empirical issues in testing asset pricing models.

BUS 137 Investments: Derivatives Markets 4 Lecture, 3 hours; extra reading, 2 hours; activity, 1 hour. Prerequisite(s): BUS 133 with a grade of C- or better or BUS 132 with a grade of C- or better; BUS 106 with a grade of C- or better or ECON 134 with a grade of C- or better. Covers option market characteristics, option pricing theories, and speculative strategies used in local, national, and international markets. Includes ways to predict market strength, to profit, and to understanding the risk and trading costs of performing such trading strategies. Considers the most well-known empirical deviations from the capital asset pricing model (CAPM) and trading strategies.

BUS 138 International Finance 4 Lecture, 3 hours; extra reading, 2 hours; activity, 1 hour. Prerequisite(s): BUS 133 with a grade of C- or better or BUS 132 with a grade of C- or better; BUS 106 or ECON 134. A survey of international financial institutions and the financial factors that affect the modern multinational corporation. Covers trade and international investment theories and empirical analysis. Topics include the international financial systems, balance of payments, foreign exchange markets, measurement of foreign exchange risk, international asset pricing, and trade financing.

BUS 140 Real Estate Investments 4 Lecture, 3 hours; extra reading, 2 hours; activity, 1 hour. Prerequisite(s): BUS 133 or BUS 132; BUS 106 or ECON 134. Analysis of real estate development including consideration of site selection, market analysis, financing, design and construction, loan contracts, mortgage risks, and investment analysis.

BUS 141 Trading Strategies 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): BUS 133, BUS 136 or BUS 132, BUS 136, BUS 106 or ECON 134. Introduces stock market anomalies. Includes ways to predict market strength, to profit, and to understanding the risk and trading costs of performing such trading strategies. Considers the most well-known empirical deviations from the capital asset pricing model (CAPM) and trading strategies.
with the title of “Conflict and Cooperation in Groups” the new BUS 145 “Designing and Lead-
ing Teams” may not be taken for credit.

BUS 146 Introduction to Entrepreneurship 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): restricted to class level standing of junior or se-
nior; or consent of instructor. Discusses the nature of entrepreneurship and its role in the economy. Topics include identifying and evaluating business opportunities, creating a team, and acquiring financial and other necessary resources.

BUS 147 Entrepreneurial Finance 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): BUS 133 with a grade of C- or better or BUS 132 with a grade of C- or better; BUS 106 with a grade of C- or better or ECON 134 with a grade of C- or better. Focuses on the financing of entrepre-
neurial ventures. Provides an understanding of opportunity recognition skills, funding techniques, and institutions involved in the financing of new ventures. Includes financial modeling, cash needs assessment, valuation, deal structure, financing alternatives, simula-
tion, and harvesting.

BUS 148 Business Plan Development 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): BUS 107, or consent of instructor. Provides the skills necessary to assess new venture opportuni-
ties and convert them into businesses.

BUS 149 Advanced Topics in Management and Decision-Making 4 Lecture, 3 hours; activity, 3 hours. Prerequisite(s): BUS 107; or consent of instructor. Covers advanced topics in management and decision-making. Includes incentives and motivation, social labor, the psycholo-
y of money, competition and mar-
kets, grey marketing and revenge, dishonesty and cheating, decision-making in groups, other-regarding preferences, and welfare infer-
ences and well-being.

BUS 150 Corporate Strategic Analysis in Multi-Business Firms 4 Lecture, 3 hours; written work, 2 hours; extra reading, 1 hour. Prerequisite(s): BUS 109, may be taken concur-
rently; or consent of instructor. Explores the distinct challenges multi-business organiza-
tions face when creating and reviewing their corporate-level strategies. Topics include mergers and acquisitions, alliances, out-
sourcing, reorganizations, diversification, and change implementation. Emphasizes how top management can identify opportunities, define the corporate headquarters’ role, and create value for the businesses it holds.

BUS 151 Brand Management 4 Lecture, 3 hours; research, 1 hour; written work, 2 hours. Prerequisite(s): BUS 103 or consent of in-
structor. Provides an understanding of how to manage a brand or a branded product. Topics include brand development and equity, brand architecture and brand leveraging, and managing a brand over the product life cycle.

BUS 152 Sales Management 4 Lecture, 3 hours; research, 1 hour; written work, 2 hours. Prerequisite(s): BUS 103. Discusses strategic and tactical aspects of sales force manage-
ment including sales force planning, deploy-
ment, compensation, and control. Also covers selling strategies and managing of customer relationships.

BUS 153 Labor Economics 4 Lecture, 3 hours; individual study, 3 hours. Prerequi-
site(s): ECON 102 or ECON 104A. An analysis of labor demand, labor supply, market equilibri-
um, and policies affecting each. Topics include labor supply, labor demand, minimum wages, government transfers, education, job training, and discrimination. Cross-listed with ECON 153.

BUS 154 Business Law 4 Lecture, 3 hours; extra reading, 1.5 hours; term paper, 1.5 hours. Prerequisite(s): upper-division standing. Studies law as an integral part of the business environment, a process derived from and changing with the larger society. Areas covered include contracts, torts, agency, partnerships, corporations, and bankruptcy.

BUS 155 Managing Human Resources 4 Lecture, 3 hours; activity, 3 hours. Prereq-
site(s): BUS 107; or consent of instructor. Applies a strategic planning approach to man-
gaging relations between an organization and its human resources. Topics include processes of forecasting and job analysis, environmental scanning, recruitment and selection, evaluation and compensation, and dispute resolution.

BUS 156 Leadership Development 4 Lecture, 3 hours; extra reading, 3 hours. Prereq-
site(s): BUS 107; or consent of instructor. Analyzes leadership theory and practice. Surveys areas pertaining to leadership, such as leadership theory, leadership style, oral and written communication, ethical leadership, interpersonal conflict management, and the dynamics of culture and gender in organiza-
tion leadership.

BUS 157 Managing Work Force Diversity 4 Lecture, 3 hours; activity, 3 hours. Prerequi-
site(s): BUS 107; or consent of instructor. Covers management topics for understanding how to navigate, manage, and lead diverse organiza-
tions more effectively. Topics include diversity in organizations, cross-cultural management, research-based strategies for reducing bias in organizations, and workplace inclusion.

BUS 158 Organizations as Cultural Sys-
tems 4 Lecture, 6 hours; extra reading and written exercises, 6 hours. Prerequisite(s): upper-
division standing or consent of instructor. Examines the role of culture in the formation and management of complex bureaucratic organizations. Covers types of organizations and organizational cultures, the impact of the cultural environment, and problems posed by rapid cultural change. Offered in summer only. Cross-listed with ANTH 105.

BUS 159 New Product Development 4 Lecture, 3 hours; research, 1 hour; written work, 2 hours. Prerequisite(s): BUS 103 or consent of in-
structor. Provides a process of starting a new technology-based venture from the original idea to commercialization. Introduces a set of cross-functional concepts in technol-
y management, intellectual property laws, marketing, operations and strategy. Concepts apply to a class project focused on the de-
velopment of a business plan for a technolo-
gy-based startup.

BUS 160 Industrial Organization 4 Lecture, 3 hours; individual study, 3 hours. Prerequi-
site(s): ECON 104A. A study of the organization and structure of the American industrial system. Emphasizes production and pricing behavior and policies. Also addresses market structure and public policies regulating or influencing market behavior. Cross-listed with ECON 160.

BUS 161 Forensic and Fraud Auditing 4 Lecture, 3 hours; discussion, 1 hour. Prerequi-
site(s): BUS 165B. An introduction to forensic accounting and fraud examination and how they pertain to both civil and criminal matters. Covers the characteristics of fraud, fraud prevention and detection, investigative techniques, asset recovery, and the use of information technology.

BUS 162 Managerial Economics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ECON 102 or ECON 104A. Examines applica-
tions of economic analysis to problems of management, especially of capital. Emphasis is on production economics and cost analysis. Cross-listed with ECON 162.

BUS 163 Technology Entrepreneurship 4 Lecture, 3 hours; extra reading, 1 hour; research, 1 hour; term paper, 1 hour. Prerequi-
site(s): BUS 103 or consent of instruc-
tor. Focuses on planning and development of marketing and product portfolio strategies for long-term success. Emphasizes marketing analysis and decision-making through the use of case studies and/or a computer-based marketing simulation.

BUS 165A Intermediate Financial Accounting 4 Lecture, 3 hours; individu-
al study, 3 hours. Prerequisite(s): BUS 201 or equivalent. In-depth study of financial accounting theory and practice. Develops an understanding of accounting concepts and generally accepted accounting principles and the ability to apply this technical knowledge to solve accounting problems. Topics include principal financial statements and accounting and valuation of various assets.

BUS 165B Intermediate Financial Accounting 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): BUS 165A. A continuation of study of financial accounting theory and practice. Topics include current liabilities and contingencies, long-term liabilities, contributed capital, retained earnings, and temporary and long-term investments.
BUS 165C Intermediate Financial Accounting 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): BUS 165A. A continuation of study of financial accounting theory and practice. Covers the conceptual discussion and procedural presentation of financial accounting topics as well as recent developments in accounting valuation and reporting practices promulgated by practitioners in industry and public accountants.

BUS 166 Accounting Information Systems 4 Lecture, 3 hours; extra reading, 2 hours; projects, 1 hour. Prerequisite(s): BUS 101, BUS 108, or equivalents. Study of the concepts and techniques in the design and implementation of accounting information systems within companies’ operating environments. Emphasis is on the effects of the computer on these systems.

BUS 167 Advanced Financial Accounting 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): BUS 165C (may be taken concurrently). Covers advanced accounting topics such as consolidated financial statements, accounting for multinational corporations, partnership accounting, and accounting for nonprofit organizations.

BUS 168A Individual Taxation 4 Lecture, 3 hours; extra reading, 2 hours; projects, 1 hour. Prerequisite(s): BUS 108 or equivalent. Concentrates primarily on the basic provisions of the federal income taxes imposed on individuals and the accounting for those taxes. While the major emphasis is on current tax provisions and tax planning, consideration is also given to the legislative and judicial development of these provisions.

BUS 168B Federal Taxation For Corporations, Partnerships, Estates, and Trusts 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): BUS 168A. Covers tax research, corporate taxation, partnership taxation, the wealth transfer taxes, income taxation of estates and trusts, international taxation, and tax administration.

BUS 169A Auditing 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): BUS 165B, may be taken concurrently; or consent of instructor. Covers the auditing environment, the auditor’s legal liability, audit responsibilities and objectives, audit evidence, audit planning and documentation, the auditor’s report, and management letters.

BUS 169B Quality Assurance in Auditing 4 Lecture, 3 hours; case analyses, 3 hours. Prerequisite(s): BUS 169A. Covers the audit process (internal control, compliance tests, sampling, substantive evidence gathering, electronic data processing auditing) and the audit procedures for various types of accounts such as sales, cash, accounts receivable, payroll, inventory, and capital acquisitions.

BUS 170 Financial Statement Valuation 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): BUS 165B, may be taken concurrently; or consent of instructor. Explains weighted average cost of capital as used in operating income based, revenue based, and market based valuation methods. Requires research to determine valuation of an existing publicly held company under all three methods. Also considers off balance sheet financing, credit risk analysis, and minority interests.

BUS 171 Systems Analysis and Design 4 Lecture, 3 hours; extra reading, 2 hours; projects, 1 hour. Prerequisite(s): BUS 101 or equivalent. Involves detailed analysis, specification, design, and implementation of computer-based information systems. Includes economic analyses, evaluation of alternatives, analysis or design tools, and systems project management and planning. Case studies are used.

BUS 172 Information Economics 4 Lecture, 3 hours; assigned cases and project, 3 hours. Prerequisite(s): BUS 103; ECON 003 or ECON 003H. Discusses economic concepts and strategies related to the network economy. Topics include economic issues surrounding information goods, competition in electronic business, privacy concerns, and the design and implementation of information (hardware) elements of electronic business.

BUS 173 Introduction to Databases For Management 4 Lecture, 3 hours; extra reading, 2 hours; projects, 1 hour. Prerequisite(s): BUS 101 or equivalent. Covers physical and conceptual aspects of database management systems, including familiarity with the variety of database systems based on different data models. Examines the role of database systems in management information systems (MIS) and issues in database design for effective support of MIS. Requires the use of a database package.

BUS 174 Electronic Commerce 4 Lecture, 3 hours; extra reading, 2 hours; project, 1 hour. Prerequisite(s): BUS 101. Reviews the technological evolution of electronic commerce (EC). Investigates how EC can be used to interact with customers, other organizations, and those within the organization. Studies technical innovations, provides a critical evaluation of strategies, and examines current applications and their impact on the business environment.

BUS 175 Business Data Communications 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): BUS 101. Surveys components of telecommunication systems; examines major design and analysis issues in the development and implementation of computer communication systems. Studies both voice and data communication systems including local area networks, wireless systems, satellite systems, and distributed computer and database systems. Emphasizes evaluation of these systems for business purposes.

BUS 176 The Sociology of Work in Organizations 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): SOC 001 or SOC 001H or consent of instructor. Emphasizes the roles of individuals in organizations. Topics include the effects of jobs on workers, long-term trends in the nature of work, and differences in work among major segments of the labor force. Cross-listed with SOC 176.

BUS 177 Labor Relations 4 Lecture, 3 hours; extra reading, 1 hour; written work, 1 hour; research, 1 hour. Prerequisite(s): BUS 101. Explores the foundation of knowledge regarding labor in the United States. Emphasizes the historical development of unionism, labor legislation, union structure, bargaining issues, contract negotiations and administration, and labor-management relations.
Cell Biology and Neuroscience

Subject abbreviation: CBNS
College of Natural and Agricultural Sciences

Morris F. Maduro, Ph.D., Chair
Vijj Santhakumar, Ph.D., Vice Chair
Department Office, 2710 Life Sciences, Psychology Bldg.
(951) 827-5903; mcbs.ucr.edu

Professors
Michael E. Adams, Ph.D. (Molecular, Cell, Systems Biology and Neuroscience/Entomology)
Margarita C. Currás-Collazo, Ph.D.
Anupama Dahanukar, Ph.D.
Karine G. Le Roch, Ph.D.
Morris Maduro, Ph.D.
Manuela Martins-Green, Ph.D.
Anandasankar Ray, Ph.D.
Viji Santhakumar, Ph.D.
Frances M. Sladek, Ph.D.
Raphael Zidovetzki, Ph.D.
Nicole zur Nieden, Ph.D.

Professors Emeriti
David A. Eastmond, Ph.D.
Sarjeet S. Gill, Ph.D., Professor of the Graduate Division
Dmitri Maslov, Ph.D.
B. Glenn Stanley, Ph.D. (Molecular, Cell, Systems Biology and Neuroscience/Psychology)
Prudence Talbot, Ph.D.

Associate Professors
Jeffrey B. Bachant, Ph.D.
Jun-Hyeong Cho, M.D., Ph.D.
Scott N. Currie, Ph.D.
Todd Fiacco, Ph.D.
Weifeng Gu, Ph.D.
Fedor V. Karginov, Ph.D.
Constance I. Nugent, Ph.D.
Martin Riccomagno, Ph.D.
Hongdian Yang, Ph.D.

Assistant Professors
Garret R. Anderson, Ph.D.
Sachiko Haga-Yamanaka, Ph.D.
Huimin Zhang, Ph.D.

Research in the Department of Molecular, Cell and Systems Biology uses multidisciplinary approaches to understanding basic cellular processes in various tissues, including the nervous system, as well as more integrative levels of analysis, including behavior. Areas of research represented in the department include the following:
- Biophysical properties of excitable membranes
- DNA repair
- Transcriptional regulation
- Mechanisms of toxicity
- Insect development
- Membrane transport
- Mechanisms of mitotic chromosome transmission
- Telomere maintenance
- Synaptic structure and function
- Changes in nervous system with experience
- Interactions of nervous and endocrine systems
- Reproductive biology and fertilization
- Cell and molecular mechanisms of response to injury
- Glia-neuron signaling and sensory and motor integrative processes
- RNA Biology

Undergraduate Curriculum
Students interested in Cell Biology and Neuroscience with Molecular, Cell, and Systems Biology can obtain training through the interdepartmental major in Cell, Molecular, and Developmental Biology leading to the B.S. degree. Students interested in neuroscience can obtain training in behavioral neuroscience, neurobiology, and neurochemistry through the Neuroscience major leading to the B.A. or B.S. degree. The Neuroscience major is an intercollege major offered by the College of Humanities, Arts, and Social Sciences and the College of Natural and Agricultural Sciences. See Cell, Molecular, and Developmental Biology section and Neuroscience Undergraduate Major section, respectively.

Graduate Curriculum
Courses and research opportunities are offered by the graduate programs in Cell, Molecular, and Developmental Biology; Environmental Toxicology; and Neuroscience. See the respective graduate program section.

Lower-Division Courses

CBNS 004 Concepts in Medical Cell Biology
3 Lecture, 1 hour. workshop, 4 hours. Prerequisite(s): CHEM 001A or CHEM 01HA (may be taken concurrently). Introduces fundamental concepts in molecular cell biology, with emphasis on human health and disease. Modules involve lectures and interactive, problem-oriented discussions with faculty. Through classical and contemporary examples, modules acquaint students with the scientific process and how it leads to insights into human biology. Credit is not awarded for CBNS 604 if it has already been awarded for BIOL 005A.

CBNS 010 The Human Brain: A User’s Guide
4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduction to contemporary neuroscience. Topics include foundational principles of brain organization, nerve and glial cell form and function, synaptic transmission, and the neural mechanisms underlying human behavior and physiology. Discusses neuroscience methods and neurological diseases and disorders. Intended for non-science majors. Science majors are not encouraged to take this course. Credit is not awarded for CBNS 010 if it has already been awarded for CBNS 106 or PSYC 110.

CBNS 101 Fundamentals of Cell Biology
4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 008C and CHEM 08LC or CHEM 08HC and CHEM 08HL and BCH 100 or BCH 110A or BCH 110A (BCH 100 or BCH 110A or BCH 110A may be taken concurrently). Introduces the principles of eukaryotic cell biology. Includes an examination of the molecules and systems that mediate cell function and an overview of membrane architecture and function, cell signaling and signal transduction, the cytoskeleton, organelles, protein targeting and secretion, and the nucleus and nuclear transport. Credit is not awarded for CBNS 101 if it has already been awarded for BIOL 113 or BIOL 114.

CBNS 106 Introduction to Neuroscience
4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A and BIOL 005B with grades of “C-” or better, CHEM 001A, CHEM 001B, CHEM 001C, or consent of instructor. An introduction to cellular, organismal, and behavioral neuroscience for science majors. Topics include structure and functions of the brain, neurons, and synapses; sensory systems and perception; control of movement; neurobiology of hormones and sexual behavior; biorythms; learning; memory; and psychoses.

CBNS 108 Introduction to Developmental Biology
4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 102, CHEM 008C and CHEM 08LC or CHEM 08HC and CHEM 08HL; or consent of instructor. Emphasizes common principles and key concepts that govern development of multiple eukaryotic systems, and how genes control cell behavior during development.

CBNS 109 Epigenetics
4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 102. Introduction to mechanisms that cause a heritable change in phenotype without a change in the genetic code. Covers DNA modifications, histone modifications, and noncoding RNAs that influence the expression, maintenance, and inheritance of traits. Discusses impacts of epigenetics on multicellular life such as learning, memory, disease, and crosstalk with environments. Cross-listed with BPSC 109.

CBNS 116 Human Neuroanatomy: Structure-Function Relationships
4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 106 with a grade of “C-” or better or consent of instructor. Provides an in-depth study of human functional neuroanatomy including gross anatomy of the brain and spinal cord, microscopic anatomy (histology) of cellular components, and fine structure of the nervous system at the electron microscope (EM) level. Emphasizes understanding the neuroanatomy of key structures (e.g., hypothalamus, brainstem, hippocampus).

CBNS 120 Cellular Neuroscience: Membrane and Synaptic Phenomena
4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 106 or consent of instructor. An examination of cellular and molecular mechanisms of nervous system function using concepts drawn from the study of vertebrates and invertebrates with emphasis on mammalian systems. Cross-listed with PSYC 120.
CBNS 120L Neuroscience Laboratory 2 Lecture, 1 hour; laboratory, 3 hours. Prerequisite(s): CBNS 120/PSYC 120 or concurrent enrollment. Laboratory experiments using electrophysiological, chemical, and anatomical research methods fundamental to understanding neurons and neural systems. Cross-listed with PSYC 120L.

CBNS 121 Developmental Neuroscience 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 106 or consent of instructor. A study of the development of nervous systems. Examines the cellular and molecular mechanisms of neural development and the determinants of cell birth and death, axonal pathfinding, neuronal connections, and development of central and peripheral behavior. Cross-listed with PSYC 121.

CBNS 124 Systems Neuroscience 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 106 with a grade of C- or better; or consent of instructor. Covers fundamental principles of organization and function related to systems neuroscience. Selected topics include control of breathing, body water, temperature, cardiovascular function, and the stress response.

CBNS 130L Computational Neuroscience Laboratory: Introduction to Brain Modeling Techniques 2 Lecture, 1 hour; laboratory, 3 hours. Prerequisite(s): CBNS 120 or PSYC 120; or consent of instructor. Introduces computer modeling techniques used to study neurons and neural systems. Selected topics include biophysical models of single neurons, small neural circuits, synaptic interactions, and larger scale network models. Cross-listed with PSYC 123L.

CBNS 133 Scientific Writing For Cell, Molecular and Developmental Biologists 4 Lecture, 3 hours; written work, 6 hours. Prerequisite(s): BIOL 102, BIOL 107A, CBNS 101, CBNS 108; a major in Cell, Molecular, and Developmental Biology; or consent of instructor. An introductory course in scientific writings. Includes preparing scientific manuscripts, research proposals, and other types of technical presentations. Satisfactory (S) or No Credit (NC) grading is not available.

CBNS 135 Educational Outreach Training in Neuroscience 4 Lecture, 10 hours per quarter; discussion, 10 hours per quarter; practicum, 20 hours per quarter; activity, 20 hours per quarter; written work, 20 hours. Prerequisite(s): CBNS 120/PSYC 120 and CBNS 124/PSYC 124 with grades of “C” or better and upper division standing in Neuroscience. Introduction to multiple approaches and activities that can be used when teaching neuroscience concepts. Builds proficiency in organizational and presentation skills, as well as provides opportunities for educational outreach. Topics include components of oral presentations, models of teaching and learning styles, and published successes in neuroscience outreach. Satisfactory (S) or No Credit (NC) grading is not available.

CBNS 150 Cancer Biology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110C or BCH 110HC or BIOL 107A or CBNS 101 (may be taken concurrently with consent of instructor). Explores the origin, development, and treatment of cancer with emphasis on molecular mechanisms. Covers topics such as oncogenes, tumor suppressors, cell cycle and differentiation, AIDS, and hereditary and environmental factors in the development of cancer. Cross-listed with EN150.

CBNS 165 Stem Cell Biology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 101 or consent of instructor. An introduction to various stem cells, their characteristics, and their niches. Explores the molecular concepts of stem cell self-renewal and tissue and organ development. Illustrates their application in therapies and explains routine methods used in stem cell biology. Reviews current governmental regulations and ethics.

CBNS 169 Human Embryology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C or consent of instructor. An in-depth study of normal human development from conception through the early postnatal period. Demonstrations use microscopic and other materials specifically adapted for the course. Some consideration is given to abnormal development.

CBNS 190 Special Studies 1 to 4 Individual Study, 3 to 12 hours. Prerequisite(s): upper-division standing; consent of instructor and department chair. Individual study to meet special curricular needs. Grading basis to be determined in consultation with the instructor and department chair. Course is repeatable to a maximum of 12 units.

CBNS 194 Independent Reading 1 to 2 Individual Study, 3 to 6 hours. Prerequisite(s): consent of instructor. Individual reading under faculty direction. Course is repeatable to a maximum of 4 units.

CBNS 197 Research For Undergraduates 1 to 6 Research, 3 to 12 hours. Prerequisite(s): either sophomore standing and one course in Cell Biology and Neuroscience or upper-division standing; consent of instructor. An introduction to laboratory research conducted under faculty supervision. Students who submit a written report or give an oral presentation receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CBNS 198I Individual Internship 1 to 12 Internship, 2 to 24 hours; written work, 1 to 12 hours. Prerequisite(s): consent of instructor. Explores career development within the context of cell, molecular, and developmental biology or health sciences. Includes supervision by an off-campus sponsor and an on-campus faculty member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

CBNS 199 Senior Research 1 to 4 Research, 3 to 12 hours. Prerequisite(s): senior standing; consent of instructor. Original research undertaken under the direction of a faculty member. Students who submit a written report or give an oral presentation receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

Graduate Courses

CBNS 240 Special Topics in Scientific Rigor in Molecular, Cell and Systems Biology Research 1 or 2 Seminar, 1 or 2 hours. Prerequisite(s): graduate standing; consent of instructor. Discusses current research and publications focused on rationale, scientific premise, rigor in experimental design, and statistical methods in the area of specialization of faculty. Provides sustained discipline-specific training in hypothesis testing, critical thinking, bioethics, and professionalism. Content varies accordingly. Intended for Life Science majors. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 56 units.
MCSD 282 Current Approaches to System Biology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CMDB 201, may be taken concurrently; Credential Masters; permission by faculty; graduate standing; or consent of instructor. Introduces contemporary Systems Biology focusing on disease in humans and other organisms. Covers experimental design, data analysis, and visualization. Also addresses modeling along with appropriate use of omics approaches to discern function and response to stress (including pathogenic infections).

Cell, Molecular and Behavioral Neuroscience Designated Emphasis

School of Medicine

Iryna Ethell (Biomedical Sciences), Co-Director
khaleel@ucr.edu

Advisory Committee & Participating Faculty

Devin Binder (Biomedical Sciences)

Monica Carson (Biomedical Sciences)

Djurdjica Coss (Biomedical Sciences)

Nicholas DiPatrizio (Biomedical Sciences)

Anandasankar Ray (Molecular, Cell and Systems Biology)

Michael Adams (Cell Biology and Neuroscience)

David Lo (Biomedical Sciences)

Emma Wilson (Biomedical Sciences)

Seema Tiwari-Woodruff (Biomedical Sciences)

Sika Zheng (Biomedical Sciences)

Peter Hickmott (Psychology)

Khaleel Razak (Psychology)

Michael Adams (Cell Biology and Neuroscience)

Margarita Curras-Collazo (Molecular, Cell and Systems Biology)

Scott Currie (Molecular, Cell and Systems Biology)

Toddy Fiacco (Molecular, Cell and Systems Biology)

Anupama Dahanukar (Molecular, Cell and Systems Biology)

Anandasankar Ray (Molecular, Cell and Systems Biology)

Designated Emphasis Requirements

The Designated Emphasis is an interdisciplinary graduate program of study to enhance student training in the field through a focused coursework across at least two departments. The program is optional and the courses used for the DE may not be counted toward MS or PhD requirements.

1. Three (3) courses (12 units) with a focus in basic principles of cell, molecular and behavioral neuroscience will be selected from:

NRSC 200A Fundamentals in Neuroscience, Molecular and Cellular Mechanisms

NRSC 200B Fundamentals in Neuroscience, Neural and Hormonal Systems

NRSC 200C Fundamentals in Neuroscience, Neural Control of Behavior

NRSC 201 Graduate Neuroscience Lab

PSYC 203A Overview of Cognitive Science and Perception

PSYC 203B Attention and Memory

PSYC 207C Processes of Cognitive Development

PSYC 208 Research Methods in Development

PSYC 233 Research Methods in Cognitive Science

CBNS 106 Introduction to Neuroscience

CBNS 108 Introduction to Developmental Biology

CBNS 116 Cellular Neuroscience: Structure-Function Relationship

CBNS 120 Cellular Neuroscience: Membrane and synaptic Phenomena

CBNS 121 Developmental Neuroscience

CBNS 124 Systems Neuroscience

CBNS 125 Neuropharmacology

CBNS 126 Neuroscience of Learning and Memory

CBNS 127 Behavioral Control Systems

CBNS 129 Human Neuropsychology

PSYC 112 Neural Mechanisms of Animal Behavior

PSYC 117 Cognitive Neuroscience of Memory and Consciousness

Students must select courses with relevant content in consultation with the Designated Emphasis Advisory Committee comprising of three participating faculty including student’s major professor. Students must select courses from at least two different departments. Undergraduate course taken to fulfill the requirement must be accompanied by a 292 course taken in the same quarter with extra work agreed upon by professor and student.

2. BMSC 222 (2 units): Special Topics in Biomedical Sciences with emphasis in neurologic diseases. The course will address the research pertaining to the student's interest and prepare trainees in applying the knowledge of basic principles in neuroscience to the pathophysiology of neurologic disease. Graded Satisfactory (S) or No Credit (NC)

3. Research Project: students will write a review article on a selected neuroscience topic. The review will be evaluated by the Designated Emphasis Advisory Committee. It is the committee's expectation that student will fulfill this component by submitting the review article for the journal publication. Successful completion of this review is required for the Designated Emphasis completion.

All requirements for the Designated Emphasis must be satisfied no later than one calendar year from the quarter in which candidate advances to candidacy in their PhD field; a minimum GPA of 3.0 is required for the Designated Emphasis completion.

Major
The Cell, Molecular and Developmental Biology major is designed to prepare students for diverse and exciting careers that include research, professional programs in the health sciences, and biotechnology. Course work is structured so that students first receive a solid grounding in the basic genetic and biological principles. Subsequent course requirements expand upon these themes and include courses in cell biology, molecular biology, developmental biology and genetics. Problem-based learning is employed throughout the curriculum to produce graduates with the analytical and critical thinking skills necessary to become successful researchers and professionals. After completing required core courses, students take intermediate level courses that lay the foundation for more advanced undergraduate courses. Several mechanisms exist to tailor the curriculum to the needs of the individual student, including by choosing either Disciplinary or Health Science track options.

Both the Disciplinary and Health Science tracks can lead to B.A. or B.S. degrees. They have similar major requirements, but the B.A. degree requires 12 additional units of Humanities and Social Sciences courses and 16 units in a foreign language (see College Breadth Requirements).

University Requirements
See the Undergraduate Studies section for requirements that all students must satisfy.

College Requirements
See Degree Requirements, College of Natural and Agricultural Sciences, in the Undergraduate Studies Section, for requirements that students must satisfy.

Major Requirements
Some of the following requirements for the Cell, Molecular and Developmental Biology major may also fulfill the College’s breadth requirements. Consult with an advisor for course planning.

1. Life Sciences core curriculum (72-76 units)
   a) BIOL 005A, BIOL 051A or BIOL 020, BIOL 005B, BIOL 005C
   b) CHEM 001A, CHEM 001B, CHEM 001C, CHEM 01LA, CHEM 01LB, CHEM 01LC or CHEM 01HA, CHEM 01HB, CHEM 01HC, CHEM 01LA, CHEM 01LB, CHEM 01LC
   c) CHEM 008A, CHEM 008B, CHEM 008C, CHEM 008LA, CHEM 008LB, CHEM 008LC, or CHEM 00HA, CHEM 00HB, CHEM 00HC, CHEM 00HLA, CHEM 00HLB, CHEM 00HLC
   d) PHYS 002A, PHYS 002B, PHYS 002C, PHYS 002A, PHYS 002LB, PHYS 002LB, PHYS 002HLB, PHYS 002HLB, PHYS 002HC, PHYS 002HC, or PHYS 0040A, PHYS 040B, PHYS 040C, or PHYS 040HA, PHYS 040HB, PHYS 040HC
   e) MATH 007A or MATH 009A or MATH 009HA, MATH 007B or MATH 009B or MATH 009HB
   f) STAT 010
   g) BCH 100, or BCH 110A and BCH 110B, or BCH 110HA and BCH 110HB

Students must complete all required Core Curriculum courses with a grade of C- or better and with a cumulative GPA in the courses of at least 2.0. Grades of D or F in two required courses, either separate courses or repetitions of the same course, are grounds for discontinuation from the major.

2. Upper-division requirements (40 units)
   a) Major core (16 units) BIOL 102, BIOL 107A or BCH 110C or BCH 110HC, CBNS 101, CBNS 108.
   b) Major electives (24 units from the following):
      Cellular emphasis. At least one of the following is required: BCH 180G; BIOL 121/MCBL 121, BIOL 128/CBNS 128, BPSC 135; CBNS 106; CBNS 120/PSYC 120; CBNS 165.
      Molecular emphasis. At least one of the following is required: BPSC 109/CBNS 109; BCH 180E; BIOL 107B; BIOL 119; BIOL124/MCBL 124; BIOL 155/BPSC 155; CBNS 150/ENTX 150.
      Developmental emphasis. At least one of the following is required: BCH 183/BPSC 183; BIOL 123/MCBL 123; BIOL 132/BPSC 132; BIOL 115; CBNS 121/PSYC 121; CBNS 169.

Laboratory course: Two courses in a biological science are required. Courses including at least 3 hours of lab per week are eligible, including combined lecture and lab classes. Eligible classes include BIEN 155; BIOL 118; BIOL 121L/MCBL 121L or MCBL 121LS; BIOL 104/BPSC 104; BIOL 132/BPSC 132; BIOL 143/BPSC 143; BIOL 160A; CBNS 120L/PSYC 120L; MCBL 125; and others. Students in the Health Science Track may substitute one laboratory course with a course in ethics.

Note: A maximum of 8 units of 190-199 courses, including no more than 4 units of 198 courses, may be counted towards the major elective requirement. Three units of BCH 197, BIOL 197, BPSC 197, CBNS 197, ENTM 197, PLPA 197, MCBL 197, NEM 197, BCH 199, BIOL 199, BPSC 199, CBNS 199, ENTM 199, PLPA 199, MCBL199, or NEM 199 may substitute for one of the required laboratory courses.

3. Depth requirement (16 units). For B.A. students, this requirement can be fulfilled with additional courses in Humanities and Social Sciences, and Foreign Languages. For the B.S. degree, students are required to take an additional 16 units of course work in natural sciences (including a biological or chemical science) or mathematics. Additional major elective units beyond the 24 required in 2b may be applied to this requirement.

4. Health Science track. Students wishing to apply to medical, dental or veterinary professional schools must follow the requirements listed above, but are encouraged to select from the following courses. For B.A. students, some of these will fulfill their Humanities and Social Sciences and Foreign Languages requirements. Please consult the faculty adviser.
Sample Program Outlines

1. **Bachelor of Science Degree**
   (Disciplinary track)

   The sample program for B.S. students provides a solid science background for students interested in research or teaching careers in biomedical science. Undergraduate laboratory research is strongly recommended as an important element in the program.

   **Freshman Year**
   - Fall: NASC 093 (2 units)
   - Winter: ENGL 001A, 001B (4 units)
   - Spring: CHEM 001A, 001B, 001C, 01LA, 01B, 01C (5 units)
   - Total Units: 15

   **Sophomore Year**
   - Fall: PHYS 002A, 002B, 002C, 02LA, 02LB, 02LC (5 units)
   - Winter: BIOL 005C, BIOL 102 (4 units)
   - Spring: CHEM 008A, 008B, 008C, 008LA, 008LB, 008LC (4 units)
   - Total Units: 13

   **Junior Year**
   - Fall: BIOL 107A (4 units)
   - Winter: CBNS 101 (4 units)
   - Spring: STAT 010 (5 units)
   - Total Units: 17

   **Senior Year**
   - Fall: ENGL 001C (4 units)
   - Winter: CBNS 108 (4 units)
   - Spring: Major Elect. & Depth reqs (e.g. BIOL 113, 168; BIOL 132/BPSC 132; BPSC 135; CBNS 120/PSYC 120; CBNS 169) (8 units)
   - Total Units: 15

2. **Bachelor of Science Degree**
   (Health Science track)

   The sample program for B.S. students with a professional emphasis provides a very strong science background, with recommended elective course choices emphasizing biomedical pertinence. Additionally, a foreign language is recommended, as well as Community Service (for course credit). Further breadth may be developed by electing Humanities and Social Science course options within the major depth requirement.

   **Freshman Year**
   - Fall: NASC 093 (2 units)
   - Winter: ENGL 001A, 001B (4 units)
   - Spring: CHEM 001A, 001B, 001C, 01LA, 01B, 01C (5 units)
   - Total Units: 15

   **Sophomore Year**
   - Fall: PHYS 002A, 002B, 002C, 02LA, 02LB, 02LC (5 units)
   - Winter: BIOL 005C, BIOL 102 (4 units)
   - Spring: CHEM 008A, 008B, 008C, 008LA, 008LB, 008LC (4 units)
   - Total Units: 13

   **Junior Year**
   - Fall: BIOL 107A (4 units)
   - Winter: CBNS 101 (4 units)
   - Spring: Major Elect. & Depth reqs (e.g. BIOL 121/MCBL 121, 121L or 121LS, BIOL 107B, BIOL 128/CBNS 128) (4 units)
   - Total Units: 17

   **Senior Year**
   - Fall: CBNS 108 (4 units)
   - Winter: Major Elect. & Depth reqs (e.g. BIOL 113, 168; BIOL 132/BPSC 132; BPSC 135; CBNS 120/PSYC 120; CBNS 169) (8 units)
   - Total Units: 15

3. **Bachelor of Arts Degree**
   (Disciplinary or Health Science tracks)

   The sample program for B.A. students provides a broad-based education that builds on the strong foundation in science, with emphasis in humanities, social sciences, and foreign language.

   **Freshman Year**
   - Fall: NASC 093 (2 units)
   - Winter: ENGL 001A, 001B (4 units)
   - Spring: CHEM 001A, 001B, 001C, 01LA, 01B, 01C (5 units)
   - Total Units: 15

   **Sophomore Year**
   - Fall: PHYS 002A, 002B, 002C, 02LA, 02LB, 02LC (5 units)
   - Winter: BIOL 005C, BIOL 102 (4 units)
   - Spring: CHEM 008A, 008B, 008C, 008LA, 008LB, 008LC (4 units)
   - Total Units: 13

   **Junior Year**
   - Fall: BIOL 107A (4 units)
   - Winter: CBNS 101 (4 units)
   - Spring: Major Elect. & Depth reqs (e.g. BIOL 113, 168; BIOL 132/BPSC 132; BPSC 135; CBNS 120/PSYC 120; CBNS 169) (8 units)
   - Total Units: 17

   **Senior Year**
   - Fall: CBNS 108 (4 units)
   - Winter: Major Elect. & Depth reqs (e.g. BIOL 113, 168; BIOL 132/BPSC 132; BPSC 135; CBNS 120/PSYC 120; CBNS 169) (8 units)
   - Total Units: 15

- Adler Dillman, Ph.D. (Nematology)
- Nicholas V. DiPatrizio, Ph.D. (School of Medicine)
- Todd Fiacco, Ph.D. (Molecular, Cell and Systems Biology)
- Kaustabh Ghosh, Ph.D. (Bioengineering)
- Juan Pablo Giraldo, Ph.D. (Botany and Plant Science)
- Weifeng Gu, Ph.D. (Molecular, Cell and Systems Biology)
- Rong Hai, Ph.D. (Microbiology and Plant Pathology)
- Ted Karginov, Ph.D. (Molecular, Cell and Systems Biology)
- Jiayu Liao, Ph.D. (Bioengineering)
- Amy Litt, Ph.D. (Botany and Plant Sciences)
- Kerry Mauck, Ph.D. (Entomology)
- Meera Nair, Ph.D. (School of Medicine)
- Jin Nam, Ph.D. (Bioengineering)
- David Nelson, Ph.D. (Botany and Plant Sciences)
- James Ng, Ph.D. (Plant Pathology and Microbiology)
- Constance I. Nugent, Ph.D. (Molecular, Cell and Systems Biology)
- Carolyn Rasmussen, Ph.D. (Botany and Plant Sciences)
- Martin Riccomagno, Ph.D. (Molecular, Cell and Systems Biology)
- Naoki Yamanaka, Ph.D. (Entomology)
- Hongdian Yang, Ph.D. (Molecular, Cell and Systems Biology)
- Sika Zheng, Ph.D. (School of Medicine)

**Assistant Professors**

- Garret Anderson, Ph.D. (Molecular, Cell and Systems Biology)
- Sihem Che louf, Ph.D. (Biochemistry)
- Patrick Degnan, Ph.D. (Plant Pathology and Microbiology)
- Sachiko Haga-Yamanaka, Ph.D. (Molecular, Cell and Systems Biology)
- Ansel Hsiao, Ph.D. (Plant Pathology and Microbiology)
- Joshua Morgan, Ph.D. (Bioengineering)
- Juliette Morrison, Ph.D. (Microbiology and Plant Pathology)
- Jernej Murn, Ph.D. (Biochemistry)
- Dawn H. Nagel, Ph.D. (Botany and Plant Sciences)
- María Ninova, Ph.D. (Biochemistry)
- Tara Nordgren, Ph.D. (School of Medicine)
- Sean O’Leary, Ph.D. (Biochemistry)
- Danelle Seymour, Ph.D. (Botany and Plant Sciences)
- Jaimie Van Norman, Ph.D. (Botany and Plant Sciences)
- Huimin Zhang, Ph.D. (Molecular, Cell and Systems Biology)

**Program Overview**

The Cell, Molecular, and Developmental Biology Graduate Program offers M.S. and Ph.D. degrees to students seeking advanced training in these disciplines. The program focuses on the bridge between basic and applied research and on the interface between cell, molecular, and developmental biology. Participating faculty are drawn from numerous biological sciences departments whose research interests in cell, molecular, and developmental biology span biomedical to agricultural problems, and students in the program benefit from unique training opportunities.

Students seeking admission into the program should meet all general requirements of the Graduate Division as printed in the Graduate Studies section of this catalog.

**Admission**

Applicants should have adequate undergraduate course work in chemistry (two years), physics (one year), calculus (one year), statistics (one course), biochemistry (one course), and biology (two years, including a course in genetics and two courses among cell, molecular, or developmental biology). Applicants with strong academic records but with deficiencies in preparation for graduate training may be admitted and must rectify undergraduate deficiencies early in the first two years of residence. Applicants must submit GRE General Test scores (verbal, quantitative and analytical).

**Course Work**

All students must complete the following core of course work:

1. **CMDB 203**
2. One graduate-level course in cell biology (BIOL 200/CMDB 200, BPSC 237, or NRSC 200A/PSYC 200A)
3. One graduate-level course in molecular biology (BIOL 201/CMDB 201, BCH 211, BPSC 231/BCH 231, BMSC 202, or NRSC 200B/PSYC 200B)
4. One graduate-level course in developmental biology (BPSC 232, CMDB 202)
5. **GDIV 403 Research and Scholarship Ethics** (1 unit; may be taken any time prior to graduation)

Each student must enroll in the program seminars (CMDB 257, CMDB 258) each time they are offered. Upon entry into the program, each student meets with a guidance committee, which recommends a course of study commensurate with the student's interests and background.

---

186
Plan I (Thesis)

Students complete the course work above, enroll in one graduate seminar course in cell, molecular, or developmental biology (SCH 230 (E-Z), BIOL 281 (E-Z)/CMDB 281 (E-Z), BPSC 240, BCH 289/BIOL 289/NRSC 289/PSYC 289) or other with consent of the graduate advisor, and undertake a research project leading to a thesis.

Each student must complete 36 units of course work, of which at least 24 units must be in the graduate series (200 level) in the biological sciences. No more than 12 units in courses numbered 290-299 may be taken to fulfill the 24-unit requirement. Candidates for the M.S. degree must defend their thesis at a public oral presentation.

Doctoral Degree

The Cell, Molecular, and Developmental Biology program offers a Ph.D. degree.

Degree Requirements

1. Completion of the course work listed above
2. One additional graduate course in cell, molecular, and developmental biology
3. One graduate seminar course in cell, molecular, or developmental biology (BCH 230 (E-Z), BIOL 281 (E-Z)/CMDB 281 (E2), BPSC 240, BCH 289/BIOL 289/COMB 289/ENTM 289/NRSC 289/PSYC 289) or other with consent of the graduate advisor
4. A research project leading to a dissertation
5. Oral public defense of dissertation

Written and Oral Qualifying Examinations

Doctoral students are advanced to candidacy following successful completion of written and oral qualifying examinations. Students write a proposal detailing the rationale, specific aims, and approaches to be undertaken for their proposal detailing the rationale, specific aims, and approaches to be undertaken for their dissertation research prior to taking the oral qualifying examination.

Professional Development Training

Ph.D. graduate students fulfill their professional development training requirement through the following activities:

1) Responsible conduct of research:
   One-time mandatory enrollment in GDIV 403 Research and Scholarship Ethics (1 unit; may be taken any time prior to graduation).
2) Teaching:
   One-time mandatory orientation in the Teaching Assistant Development Program administered through Graduate Division (must be fulfilled prior to classroom instruction). CMDB requires two quarters of TA teaching.
3) Safety training:
   Mandatory laboratory safety training administered through Environmental Health and Safety. Additional training may be mandated for some research activities.

4) Presentations, scientific interactions and intellectual development:
   Enrollment each quarter in CMDB 257 Seminar in Cell, Molecular and Developmental Biology. Part of the professional development in this course involves luncheon meetings between the speakers and students following the seminar. CMDB also offers opportunities for participation and presentation in intra-mural research seminars.

5) Research Training:
   Individual research training in major professor laboratories is associated with enrollment in CMDB 250, which encompasses laboratory journal clubs and lab meetings, as well as CMDB 297 and CMDB 299 research units.

Doctoral students are advanced to candidacy when enrolled in CMDB 250, which encompasses laboratory journal clubs and lab meetings, as well as CMDB 297 and CMDB 299 research units. Students are also required to schedule an Annual Research Progress Evaluation (ARPE) with their guidance or dissertation committee to monitor ongoing professional development.

Dissertation

Candidates must successfully defend their dissertation research in a public oral presentation.

Teaching Requirement

Students must fulfill a two-quarter teaching requirement.

Career Opportunities

There is a high demand in industry and academia for scientists with training in cell, molecular, and developmental biology. Students matriculating from the program are well trained in this field and successfully obtain positions in biotechnology, including biomedical and agricultural industries, and at colleges and universities nationwide.

Normative Time to Degree

Two years

Master's Degree

The Cell, Molecular, and Developmental Biology program offers an M.S. degree.

Graduate Courses

CMDB 200 Cell Biology 4 Lecture, 3 hours; seminar, 1 hour. Prerequisite(s): BCH 110A or BCH 110B or equivalent (may be taken concurrently); BIOL 102 or equivalent; BIOL 113 or CBNS 101 or equivalent. An examination of the structure and function of eukaryotic cells and their components with emphasis on the key experiments that provide the foundation for our current knowledge. Covers topics such as cell membranes, intracellular trafficking, cell-to-cell interactions, motility, and the cytoskeleton. Cross-listed with BIOL 200.

CMDB 201 Molecular Biology 4 Lecture, 3 hours; seminar, 1 hour. Prerequisite(s): BCH 110A or BCH 110B or equivalent (may be taken concurrently); BIOL 102 or equivalent; BIOL 107A or equivalent. Covers the structure and inheritance of genetic material, the regulation of gene expression at the cellular and molecular level including molecular mechanisms for regulation of gene transcription, posttranscriptional regulation at the level of messenger RNA stability, processing, editing and translation, methods for gene mapping, and positional cloning. Cross-listed with BIOL 201.

CMDB 202 Developmental Biology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 101 or equivalent. An examination of development, beginning with the principles that underlie developmental studies of all multicellular organisms. Focuses on plants, insects, and fungi but introduces other model systems. Topics are taken from the current literature.

CMDB 203 Advanced Genetic Analysis in Model Organisms 4 Lecture, 2 hours; discussion, 2 hours. Prerequisite(s): BIOL 102 or equivalent; graduate standing or consent of instructor. Examines essential concepts in modern genetics. Focuses on universal principles of genetic analysis in prokaryotic and eukaryotic model organisms, emphasizing underlying concepts and logic. Develops skills reading primary scientific literature and critical thinking through analysis of landmark papers. Cross-listed with GEN 203.

CMDB 204 Genome Maintenance and Stability 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110C or BCH 110HC or BIOL 107A; BIOL 113 or CBNS 114 or CBNS 101; BIOL 102 is strongly recommended. Emphasizes chromosome-based processes that maintain genome integrity and ensure accurate genome transmission during cell division. Topics are drawn from the primary literature and include chromatin structure and composition, DNA repair and recombination, telomere function and chromosome maintenance, mitotic chromosome segregation, and checkpoint surveillance mechanisms. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with BCH 204, and ENTX 204.

CMDB 206 Gene Silencing 3 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): graduate standing. BIOL 107A or CBNS 101; or consent of instructor. An in-depth coverage of mechanisms, functions, and applications of RNAi and related gene regulatory pathways guided by small RNAs such as siRNAs and miRNAs in plants and animals. Cross-listed with GEN 206, and MCBL 206.

CMDB 207 Stem Cell Biology and Disease 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Introduces animal and human stem cell biology and the application of stem cell biology to medicine.

CMDB 208 Stem Cell Ethics 2 Seminar, 2 hours. Prerequisite(s): graduate standing; or consent of instructor. Introduces stem cell ethics emphasizing moral, legal, and social issues in stem cell research.

CMDB 209 Ribonucleic Acid (RNA) Biology 3 Lecture, 2 hours; discussion, 1 hour. Prerequisite(s): BIOL 107A or CBNS 101 or equivalent; or consent of instructor. A comprehensive overview of the multiple functions of ribonucleic acid (RNA) in the cell. Topics include mRNA, rRNA, and tRNA function and metabolism; RNA catalysis and the “RNA world”; eukaryotic and bacterial non-coding RNAs; and bacterial riboswitches. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with BCH 209, and GEN 209.
CMDB 210 Molecular Biology of Human Disease Vectors 3 Lecture, 2 hours; seminar, 1 hour. Prerequisite(s): consent of instructor. Covers the molecular aspects of vectors transmitting most dangerous human diseases. Involves lectures and student presentations about current issues in molecular biology and genomics of vector insects and pathogens they transmit. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with ENTM 210, and MCB 210.

CMDB 211 Laboratory in Human Embryonic Stem Cell Culture 2 Lecture, 5 hours per quarter, laboratory, 40 hours per quarter, workshop, 5 hours per quarter. Prerequisite(s): consent of instructor. Introduces the methods used to culture human embryonic stem cells (hESC) in vitro. Provides hands-on experience in plating, passaging, culturing, differentiating, and freezing of hESC. Additional topics include staining colonies of hESC for pluripotency markers (including alkaline phosphatase); labeling colonies using immunohistochemistry; and performing chromosome squashes for evaluation of aneuploidy. Graded Satisfactory (S) or No Credit (NC).

CMDB 230 Molecular Plant-Microbial Interactions 3 Lecture, 2 hours; discussion, 1 hour. Prerequisite(s): BCH 100, BIOL 120/MCBL 120/PLPA 120, or equivalents. A study of the physiology of host-pathogen interactions with emphasis on the metabolism of diseased plants, nature of pathogenicity, and defense mechanisms in plants. Cross-listed with PLPA 230, BPSC 230, and GEN 230.

CMDB 250 Special Topics in Cell, Molecular, and Developmental Biology 1 to 2 Seminar, 1 to 2 hours. Prerequisite(s): graduate standing. Oral presentations and intensive small-group discussion of selected topics in the area of special competence of each participant. Content emphasizes recent advances in the topic area and varies accordingly. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CMDB 255 Stem Cell Biology 1 Discussion, 10 hours per quarter. Prerequisite(s): graduate standing or consent of instructor. Presents research data to an interdisciplinary group of stem cell biologists. Covers presentation skills and answering questions about research data. Fosters discussion of stem cell biology. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CMDB 256 Seminar in Stem Cell Biology 1 Seminar, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Provides opportunities to meet stem cell researchers from other campuses and learn about the latest developments in animal and human stem cell research. Includes investigators who focus on the potential application of stem cells to medicine. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CMDB 257 Seminar in Cell, Molecular, and Developmental Biology 1 Seminar, 1 hour. Prerequisite(s): graduate standing. Presentations by visiting scholars, CMDB faculty, and CMDB students on current research in cell, molecular, and developmental biology. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 30 units.

CMDB 258 Graduate Student Seminar in Cell, Molecular, and Developmental Biology 1 Seminar, 10 hours per quarter; one 1-day seminar, Prerequisite(s): graduate standing in Cell, Molecular, and Developmental Biology. An interdisciplinary seminar consisting of student presentations of original research and discussion of current research topics in cell, molecular, and developmental biology. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 30 units.

CMDB 281 (E-Z) Seminar in Cell Development, Structure, and Function 2 Seminar, 2 hours. Prerequisite(s): graduate standing. Lectures, discussions, and demonstrations by students, faculty, and invited scholars on selected subjects concerned with the principles of cell development, structure, and function. E. Cell Biology; F. Molecular Biology; G. Developmental Biology. Course is repeatable to a maximum of units. Cross-listed with BIOL 281 (E-Z).

CMDB 290 Directed Studies 1 to 6 Individual Study, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor and graduate advisor. Individual study, directed by a faculty member, of specially selected topics in cell, molecular, and developmental biology. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CMDB 292 Concurrent Analytical Studies in Cell, Molecular, and Developmental Biology 2 to 4 Research, 6 to 12 hours. Prerequisite(s): graduate standing. Elected concurrently with an appropriate undergraduate course, but on an individual basis. Students are required to submit one or more graduate papers based on research or criticism related to the course. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CMDB 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing. Research and experimental studies conducted under the supervision of a faculty member on specially selected topics in cell, molecular, and developmental biology. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CMDB 299 Research For the Thesis Or Dissertation 1 to 12 Research, 3 to 36 hours. Prerequisite(s): graduate standing. Original research in an area selected for the advanced degree. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Course
CMDB 301 Teaching of Cell, Molecular, and Developmental Biology at the College Level 1 Seminar, 1 hour. Prerequisite(s): graduate standing. A program of weekly meetings and individual formative evaluations required of new teaching assistants. Covers instructional methods and classroom/section activities most suitable for teaching Biology. Conducted by the Teaching Assistant Development Program. Graded Satisfactory (S) or No Credit (NC).

CHASS F1RST

Subject abbreviation: CHFY
College of Humanities, Arts, and Social Sciences
Dr. Christina Acoff, CHASS F1RST Director
1609 Humanities and Social Sciences
(951) 827-7831; ChassFirst.ucr.edu

CHASS F1RST provides first-year students with courses designed to help with the transition to UCR, a major research university setting, which involves high academic standards and rigorous course work. The courses offer students the resources and tools necessary to excel in the first year and beyond. They take place within a “learning-communities” framework so that students can successfully integrate into campus life.

Lower-Division Courses
CHFY 001 (E-Z) CHASS F1RST Humanities Course 4 Lecture, 3 hours. Prerequisite(s): restricted to class level standing of freshman or sophomore. A College of Humanities, Arts, and Social Sciences course designed to introduce students to the humanities and to academic life. Segments of CHFY 001 (E-Z), CHFY 002 (E-Z), and/or CHFY 003 (E-Z) may be thematically and pedagogically linked.

CHFY 001F CHASS F1RST Humanities Course: Literature 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to class level standing of freshman or sophomore standing in the College of Humanities, Arts, and Social Sciences. A literature course thematically and pedagogically linked to another CHFY 001 (E-Z) segment, a CHFY 002 (E-Z) segment, and/or a CHFY 003 (E-Z) segment. Topics vary.

CHFY 001F CHASS F1RST Humanities Course: Religious Studies 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to class level standing of freshman or sophomore standing in the College of Humanities, Arts, and Social Sciences. A religious studies course thematically and pedagogically linked to another CHFY 001 (E-Z) segment, a CHFY 002 (E-Z) segment, and/or a CHFY 003 (E-Z) segment. Topics vary.

CHFY 001F CHASS F1RST Humanities Course: History 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to class level standing of freshman or sophomore standing in the College of Humanities, Arts, and Social Sciences. A history course thematically and pedagogically linked to another CHFY 001 (E-Z) segment, a CHFY 002 (E-Z) segment, and/or a CHFY 003 (E-Z) segment. Topics vary.
CHFY 001J CHASS FIRST Humanities Course: Comparative Literature 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): freshman or sophomore standing in the College of Humanities, Arts, and Social Sciences. A comparative literature course thematically and pedagogically linked to another CHFY 001 (E-Z) segment, a CHFY 002 (E-Z) segment, and/or a CHFY 003 (E-Z) segment. Topics vary.

CHFY 001K CHASS FIRST Humanities Course: Hispanic Studies 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): freshman or sophomore standing in the College of Humanities, Arts, and Social Sciences. A Hispanic studies course thematically and pedagogically linked to another CHFY 001 (E-Z) segment, a CHFY 002 (E-Z) segment, and/or a CHFY 003 (E-Z) segment. Topics vary.

CHFY 001M CHASS FIRST Humanities Course: Philosophy 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): freshman or sophomore standing in the College of Humanities, Arts, and Social Sciences. A philosophy course thematically and pedagogically linked to another CHFY 001 (E-Z) segment, a CHFY 002 (E-Z) segment, and/or a CHFY 003 (E-Z) segment. Topics vary.

CHFY 002 (E-Z) CHASS FIRST Fine Arts Course 4 Lecture, 3 hours. Prerequisite(s): restricted to class level standing of freshman, or sophomore. A College of Humanities, Arts, and Social Sciences course designed to introduce students to the fine arts and to academic life. Segments of CHFY 001 (E-Z), CHFY 002 (E-Z), and/or CHFY 003 (E-Z) may be thematically and pedagogically linked.

CHFY 002I CHASS FIRST Fine Arts Course: Theatre, Film, and Digital Production 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): freshman or sophomore standing in the College of Humanities, Arts, and Social Sciences. A theatre course thematically and pedagogically linked to a CHFY 001 (E-Z) segment, another CHFY 002 (E-Z) segment, and/or a CHFY 003 (E-Z) segment. Topics vary.

CHFY 002F CHASS FIRST Fine Arts Course: Music 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): freshman or sophomore standing in the College of Humanities, Arts, and Social Sciences. A music course thematically and pedagogically linked to a CHFY 001 (E-Z) segment, another CHFY 002 (E-Z) segment, and/or a CHFY 003 (E-Z) segment. Topics vary.

CHFY 002G CHASS FIRST Fine Arts Course: Media and Cultural Studies 4 Lecture, 3 hours; discussion, 1 hour; screening, 3 hours. Prerequisite(s): freshman or sophomore standing in the College of Humanities, Arts, and Social Sciences. A film and visual culture course thematically and pedagogically linked to a CHFY 001 (E-Z) segment, another CHFY 002 (E-Z) segment, and/or a CHFY 003 (E-Z) segment. Topics vary.

CHFY 002J CHASS FIRST Fine Arts Course: Dance 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): freshman or sophomore standing in the College of Humanities, Arts, and Social Sciences. A dance course thematically and pedagogically linked to a CHFY 001 (E-Z) segment, another CHFY 002 (E-Z) segment, and/or a CHFY 003 (E-Z) segment. Topics vary.

CHFY 002K CHASS FIRST Fine Arts Course: Creative Writing 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): freshman or sophomore standing in the College of Humanities, Arts, and Social Sciences. A creative writing course thematically and pedagogically linked to a CHFY 001 (E-Z) segment, another CHFY 002 (E-Z) segment, and/or a CHFY 003 (E-Z) segment. Topics vary.

CHFY 003 (E-Z) CHASS FIRST Social Science Course 4 Lecture, 3 hours. Prerequisite(s): restricted to class level standing of freshman, or sophomore. A College of Humanities, Arts, and Social Sciences course designed to introduce students to the social sciences and to academic life. Segments of CHFY 001 (E-Z), CHFY 002 (E-Z), and/or CHFY 003 (E-Z) may be thematically and pedagogically linked.

CHFY 003E CHASS FIRST Social Science Course: Anthropology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): freshman or sophomore standing in the College of Humanities, Arts, and Social Sciences. An anthropology course thematically and pedagogically linked to a CHFY 001 (E-Z) segment, a CHFY 002 (E-Z) segment, and/or another CHFY 003 (E-Z) segment. Topics vary.

CHFY 003F CHASS FIRST Social Science Course: Economics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): freshman or sophomore standing in the College of Humanities, Arts, and Social Sciences. An economics course thematically and pedagogically linked to a CHFY 001 (E-Z) segment, a CHFY 002 (E-Z) segment, and/or another CHFY 003 (E-Z) segment. Topics vary.

CHFY 003G CHASS FIRST Social Science Course: Political Science 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): freshman or sophomore standing in the College of Humanities, Arts, and Social Sciences. A political science course thematically and pedagogically linked to a CHFY 001 (E-Z) segment, a CHFY 002 (E-Z) segment, and/or another CHFY 003 (E-Z) segment. Topics vary.

CHFY 003I CHASS FIRST Social Science Course: Sociology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): freshman or sophomore standing in the College of Humanities, Arts, and Social Sciences. A sociology course thematically and pedagogically linked to a CHFY 001 (E-Z) segment, a CHFY 002 (E-Z) segment, and/or another CHFY 003 (E-Z) segment. Topics vary.

CHFY 004 Educational Research 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to class level standing of freshman; Permission by Department. An introduction to Educational Research within the context of educational concerns, theories, and best practices. Covers disciplinary perspectives that include diverse research, educational leadership, and understanding the study of education.

CHFY 007 CHASS FIRST Learning Community Workshop 1 Workshop, 1 hour. Prerequisite(s): restricted to College of Humanities, Arts, and Social Sciences; restricted to class level standing of freshman, or sophomore. A workshop linked to a CHASS FIRST Learning Community lecture course. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 3 units.

CHFY 010 CHASS Gateway Lecture Course 5 Lecture, 3 hours; discussion, 1 hour, workshop, 1 hour. Prerequisite(s): first-year freshman standing in the College of Humanities, Arts, and Social Sciences. A College of Humanities, Arts, and Social Sciences course designed to introduce freshmen to the College's annual theme.

CHFY 020 Theory and Practice of Peer Instruction 4 Seminar, 4 hours. Prerequisite(s): consent of the CHASS FIRST Academic Advisor. An intensive examination of study development theory, retention models, and pedagogy related to peer-to-peer instruction.

Upper-Division Courses
CHFY 198I CHASS FIRST Individual Internship 1 to 4 Consultation, 5 to 2 hours; internship, 3 to 12 hours; written work, 1 to 4 hours. Prerequisite(s): approval of the CHASS FIRST Academic Coordinator. Provides on-campus opportunities in the CHASS FIRST office to acquire skills and experience for future endeavors. Course is repeatable to a maximum of 8 units.
Chemical and Environmental Engineering

Subject abbreviations: CEE, CHE, ENVE
The Marlan and Rosemary Bourns College of Engineering

David Cocker, Ph.D., Chair
Department Office, A220 Bourns Hall
(951) 827-2423; https://www.cee.ucr.edu/

Professors
David Cocker, Ph.D., Chair in Chemical and Environmental Engineering
Don Collins, Ph.D.
Georgios Karavalakis, Ph.D.
Ashok K. Mulchandani, Ph.D., W. Ruel Johnson Chair in Environmental Engineering
Markus Peters, Ph.D.
Jianzhong Wu, Ph.D.
Michael Zachariah, Ph.D., Distinguished Professor

Professors Emeriti
Harvey Blanch, Ph.D.
Charles Wyman, Ph.D., Ford Motor Company

Associate Professors
Juchen Guo, Ph.D.
Haizhou Liu, Ph.D.
Ian Wheeldon, Ph.D.
Bryan Wong, Ph.D.
Min, Younjin, Ph.D.

Assistant Professors
Leslie Abdul-Aziz, Ph.D.
Liu, Jinyong, Ph.D.
Ruoxue Yan, Ph.D.
Min, Younjin, Ph.D.
Men, Vuje, Ph.D.

Adjunct Professors
Mark Thomas Durbin, Ph.D.
Wayne Miller, Ph.D.
Joon Min, Ph.D.

Adjunct Associate Professor
Chan Seung Park, Ph.D.

Adjunct Assistant Professors
Kanok Boriboonsomsin, Ph.D.
Kent Johnson, Ph.D.
Rajeev Kumar, Ph.D.
Shen, Yun, Ph.D.

Cooperating Faculty
Haghverdi, Amir Ph.D. (Chemical and Environmental Sciences)
Matthew J. Barth, Ph.D. (Electrical and Computer Engineering)
Jiang, De-en, Ph.D. (Chemistry)
Ariel Dinar, Ph.D. (Environmental Sciences)
Boniface Fokwa, Ph.D. (Chemistry)
Heejung Jung, Ph.D. (Mechanical Engineering)
Nemat, Mehdi Ph.D. (School of Public Policy)
Bahreini, Roya, Ph.D. (Environmental Sciences)
Coh, Sinisa, Ph.D. (Mechanical Engineering)
Francisco Zaera, Ph.D. (Chemistry)

Majors
The Department of Chemical and Environmental Engineering offers B.S. degrees in Chemical Engineering and in Environmental Engineering, and M.S. and Ph.D. degrees in Chemical and Environmental Engineering. For more details, see https://www.cee.ucr.edu/.

Chemical Engineering focuses on transforming raw materials into useful everyday products. Chemical engineers turn the discoveries of chemists and physicists into commercial realities. They find work in a variety of fields including pharmaceuticals, materials, chemical, fuels, pollution control, medicine, and nuclear and electronic industries. At UCR, the B.S. degree in Chemical Engineering offers students three options: Biochemical Engineering, focusing on biochemical processes; Nanotechnology, focusing on nanoscale processes; or Chemical Engineering, emphasizing traditional chemical engineering issues.

The program’s educational objectives are to produce graduates who attain high levels of technical expertise to enable their achievement in diverse chemical engineering practice and research, or in allied careers, prepare them for graduate level education, and enable them to be successful members of the professional community, for the benefit of our constituents.

The Chemical Engineering B.S. degree program at UCR is accredited by the Engineering Accreditation Commission of ABET, abet.org.

Environmental Engineering deals with design and construction of processes and equipment intended to lessen the impact of man’s activities on the environment. With the growing importance of environmental quality, the environmental engineer plays a pivotal role in modern industrial activity. Environmental engineers are involved in a wide range of activities including the design of alternative fueled vehicles, the development of renewable energy sources, the design of equipment for solid waste collection and disposal, municipal and industrial wastewater treatment, air pollution control systems, and hazardous waste management.

The program’s educational objectives are to produce graduates who attain high levels of technical expertise to enable their achievement in diverse environmental engineering practice and research, or in allied careers, prepare them for graduate level education, and enable them to be successful members of the professional community, for the benefit of our constituents.

The Environmental Engineering B.S. degree program at UCR is accredited by the Engineering Accreditation Commission of ABET, abet.org.

All undergraduates in the College of Engineering must see an advisor at least annually. Visit student. engr. ucr.edu for details.

Change of Major Criteria
All students who request a change of major to Chemical Engineering must meet the following requirements:

• Be in good academic standing
• Have no less than a C- in any Math, Science and Engineering coursework
• Have a minimum 2.0 GPA in all Math, Science and Engineering required coursework
• Be able to complete major within maximum allowable units
• Complete all the courses listed below, based on the total number of units earned, prior to submitting the major change request
• UCR transfer students interested in changing to a BCOE major must have been admissible to the major at point of entry, or must satisfy transfer admission and change of major requirements before earning 120 units
• If changing in the 90-119 units category student must have the ability to complete major within 5 years of entry as a Freshmen or 3 years after entry as a Transfer student
• Students who have earned 120 or more units are not eligible for a change of major in BCOE. NOTE: AP/IB units are excluded from maximum unit calculation

Completed 0 to less than 45 units
Completion of ENGL 001A with C or better and completion of the following with at least 2.500 GPA:

• CHEM 001A or CHEM 01HA
• CHEM 01LA or CHEM 01HLA
• MATH 099A or MATH 099A
• PHYS 040A or PHYS 040HA

Completed 45 to less than 90 units
Completion of ENGL 001A with C or better and completion of the following with at least 2.500 GPA:

• CHEM 001A or CHEM 01HA
• CHEM 01LA or CHEM 01HLA
• CHEM 001B or CHEM 01HB
• CHEM 01LB or CHEM 01HLB
• MATH 099A or MATH 099A
• MATH 099B or MATH 099B
• MATH 099C or MATH 099C
• PHYS 040A or PHYS 040HA

Completed 90 to less than 120 units
Completion of ENGL 001A and ENGL 001B with C or better and completion of the following with at least 2.500 GPA:

• CHEM 001A or CHEM 01HA
• CHEM 01LA or CHEM 01HLA
• CHEM 001B or CHEM 01HB
• CHEM 01LB or CHEM 01HLB
• MATH 099A or MATH 099A
• MATH 099B or MATH 099B
• MATH 099C or MATH 099C
• PHYS 040A or PHYS 040HA
Change of Major Criteria
All students who request a change of major to Environmental Engineering must meet the following requirements:

- Be in good academic standing
- Have no less than a C- in any Math, Science and Engineering coursework
- Have a minimum 2.0 GPA in all Math, Science and Engineering required coursework
- Be able to complete major within maximum allowable units
- Complete all the courses listed below, based on the total number of units earned, prior to submitting the major change request
- UCR transfer students interested in changing to a BCOE major must have been admissible to the major at point of entry, or must satisfy transfer admission and change of major requirements before earning 120 units
- If changing in the 90-119 units category student must have the ability to complete major within 5 years of entry as a Freshmen or 3 years after entry as a Transfer student
- Students who have earned 120 or more units are not eligible for a change of major in BCOE. NOTE: AP/IB units are excluded from maximum unit calculation

Completed 0 to less than 45 units Completion of ENGL 001A with C or better and completion of the following with at least 2.500 GPA:
- CHEM 001A or CHEM 01HA
- CHEM 01LA or CHEM 01LHA
- MATH 009A or MATH 099A
- PHYS 040A or PHYS 040HA

Completed 45 to less than 90 units Completion of ENGL 001A with C or better and completion of the following with at least 2.500 GPA:
- CHEM 001A or CHEM 01HA
- CHEM 01LA or CHEM 01LHA
- CHEM 001B or CHEM 01HB
- MATH 009A or MATH 099A
- MATH 009C or MATH 099C
- PHYS 040A or PHYS 040HA

Completed 90 to less than 120 units Completion of ENGL 001A and ENGL 001B with C or better and completion of the following with at least 2.500 GPA:
- CHEM 001A or CHEM 01HA
- CHEM 01LA or CHEM 01LHA
- CHEM 001B or CHEM 01HB
- CHEM 01LB or CHEM 01LHB
- CHEM 001C or CHEM 01HC
- CHEM 01LC or CHEM 01LHC
- MATH 009A or MATH 099A
- MATH 009B or MATH 099B
- MATH 009C or MATH 099C
- PHYS 040A or PHYS 040HA
- CHEM 001A or CHEM 01HA
- CHEM 01LA or CHEM 01LHA
- CHEM 001B or CHEM 01HB
- CHEM 01LB or CHEM 01LHB
- CHEM 001C or CHEM 01HC
- CHEM 01LC or CHEM 01LHC
- MATH 009A or MATH 099A
- MATH 009B or MATH 099B
- MATH 009C or MATH 099C
- PHYS 040A or PHYS 040HA
- CHEM 001A or CHEM 01HA
- CHEM 01LA or CHEM 01LHA
- CHEM 001B or CHEM 01HB
- CHEM 01LB or CHEM 01LHB
- CHEM 001C or CHEM 01HC
- CHEM 01LC or CHEM 01LHC
- MATH 009A or MATH 099A
- MATH 009B or MATH 099B
- MATH 009C or MATH 099C
- PHYS 040A or PHYS 040HA
- C or better ENGL 1A

University Requirements
See Undergraduate Studies section.

College Requirements
See The Marian and Rosemary Bourns College of Engineering, Colleges and Programs section.

The Chemical Engineering major and the Environmental Engineering major use the following major requirements to satisfy the college's Natural Sciences and Mathematics breadth requirement.

1. BIO 005A, BIO 05LA
2. CHEM 001A, CHEM 001B, CHEM 001C, CHEM 01LA, CHEM 01LB, CHEM 01LC
3. MATH 008B or MATH 099A

Major Requirements
Chemical Engineering

Students must choose either a Biochemical Engineering, Chemical Engineering or Nanotechnology option.

1. Lower-division requirements (76 units)
   a) BIO 005A, BIO 05LA
   b) CHEM 001A, CHEM 001B, CHEM 001C, CHEM 01LA, CHEM 01LB, CHEM 01LC
   c) MATH 008B or MATH 099A

2. Upper-division requirements (63 units)
   a) CEE 158
   b) CHE 100, CHE 114, CHE 120
   c) ENGR 118
   d) ENSC 100/SWSC 100
   e) ENVE 120, ENVE 133, ENVE 135, ENVE 142, ENVE 146, ENVE 160B, ENVE 160C, ENVE 171, ENVE 175A, ENVE 175B
   f) ENVE 130/CHE 130, ENVE 160A/CHE 160A
   g) ENVE 121, ENVE 134, ENVE 140
   h) Choose one from CHE 102, CHE 116, CHE 124, CEE 125, CEE 132, ENVE 138, ENVE/ENSC 144, ENVE 145, ENSC/ENTX/CHE 135, ENSC 136, ENSC 163, 4 units of HNPG 199H

Environmental Engineering

1. Lower-division requirements (76 units)
   a) BIO 005A, BIO 05LA
   b) CEE 010
   c) CHEM 001A, CHEM 001B, CHEM 001C, CHEM 01LA, CHEM 01LB, CHEM 01LC
   d) MATH 008B, MATH 009A, MATH 009B, MATH 099C, MATH 010A, MATH 010B, MATH 046
   e) PHYS 040A, PHYS 040B, PHYS 040C
   f) CHE 010

2. Upper-division requirements (85 units)
   a) CEE 158
   b) CHE 100, CHE 114, CHE 120
   c) ENGR 118
   d) ENSC 100/SWSC 100
   e) ENVE 120, ENVE 133, ENVE 135, ENVE 142, ENVE 146, ENVE 160B, ENVE 160C, ENVE 171, ENVE 175A, ENVE 175B
   f) ENVE 130/CHE 130, ENVE 160A/CHE 160A
   g) ENVE 121, ENVE 134, ENVE 140
   h) Choose one from CHE 102, CHE 116, CHE 124, CEE 125, CEE 132, ENVE 138, ENVE/ENSC 144, ENVE 145, ENSC/ENTX/CHE 135, ENSC 136, ENSC 163, 4 units of HNPG 199H

Graduate Program
The Graduate Program in Chemical and Environmental Engineering offers training leading to the degrees of M.S. and Ph.D. in Chemical and Environmental Engineering. Fields of specialization include biochemical engineering and bioengineering, environmental biotechnology, air quality systems engineering, water quality systems engineering, thermodynamics, advanced materials, and nanotechnology.

Combined B.S. + M.S. Five-Year Program
The college offers combined B.S. + M.S. programs in both Chemical Engineering and Environmental Engineering designed to lead to a Bachelor of Science degree as well as a Master of Science degree in five years. Applicants for this program must have a high school GPA above 3.6, a combined SAT Reasoning score above 1950 (or ACT Plus Writing equivalent), complete the Entry Level Writing Requirement before matriculation, and have sufficient mathematics preparation to enroll in calculus in their first quarter as freshmen.

Visit the Student Affairs Office in the College of Engineering or student.engr.ucr.edu for a sample program.

Visit the Student Affairs Office in the College of Engineering or student.engr.ucr.edu for a sample program.
Interested students who are entering their junior year should check with their academic advisor for information on eligibility and other details.

**Admission**

Applicants should have a degree in chemical and environmental engineering or closely related fields, have a satisfactory overall GPA from their undergraduate studies, good letters of recommendation, and high scores on the GRE General Test. Normally, students admitted to regular standing have satisfied all prerequisites to course work. Under special circumstances, students who have not completed all undergraduate requirements may be admitted provided that the deficiencies are corrected to the satisfaction of the student's advisory committee within the first year of graduate study. Courses taken for this purpose do not count towards an advanced degree. International students, permanent residents, and even U.S. citizens whose native language is not English and who do not have a bachelor's or postgraduate degree from an institution where English is the exclusive language of instruction must complete the Test of English as a Foreign Language (TOEFL) with a minimum score of 550 (paper-based test), 213 (computer-based), or 80 (internet-based).

**Course Work**

To ensure that advanced degree recipients in the graduate program have advanced knowledge in mathematics and chemical engineering principles that form the foundation for chemical and environmental engineering, a core course program has been implemented. All M.S. and Ph.D. students must participate in the core course program. Students who have completed these (or equivalent) courses elsewhere may petition to have the core course requirement waived or some of their units transferred (see the Graduate Division policy for transferring course units). Competency in these areas will be tested as part of the comprehensive exam for M.S. students and in the written preliminary examination for Ph.D. students. The current core courses are as follows:

- CEE 200 (Advanced Engineering Computations)
- CEE 202 (Transport Phenomena)
- CEE 204 (Advanced Kinetics and Reaction Engineering)
- CEE 206 (Advanced Chemical Engineering Thermodynamics)

**Academic Appeals Process**

Policies and procedures relating to Academic Appeals can be found through the UCR Graduate Division link, [https://graduate.ucr.edu/regulations-and-procedures/](https://graduate.ucr.edu/regulations-and-procedures/).

Incoming students without a B.S. degree in chemical or environmental engineering must demonstrate competency in these areas either by taking the appropriate undergraduate courses and/or by passing the written preliminary exam. At UCR, the required courses are CHE 100, CHE 110A, CHE 110B, ENVE 171, CHE 114, CHE 116, CHE 120, CHE 130, and ENGR 118. Students may also be required to take some of the above courses to satisfy the prerequisites of the core graduate courses.

Each quarter, all M.S. and Ph.D. students in residence must enroll in CEE 286 (Colloquium in Chemical and Environmental Engineering). In addition, all M.S. and Ph.D. students must participate each year in the CEE Graduate Student Symposium, usually held just before the beginning of the fall quarter.

**Professional Development Training**

1. Two sessions of CEE 286 each quarter will be dedicated to professional development. The subjects will include but are not limited to: research ethics, scientific and technical writing, academic careers, employment opportunities beyond academia, and professional networking.
2. A weekly one hour networking meeting with a visiting colloquia speaker.
3. Fall quarter fellowship/grant writing workshops. Focus will be on upcoming domestic students applying for NSF graduate fellowships.

**Master's Degree**

The Department of Chemical and Environmental Engineering offers the M.S. degree in Chemical and Environmental Engineering.

**Plan I (Thesis)** requires completion of a minimum of 36 units of approved course work including the core courses and submission of an acceptable M.S. thesis. At least 24 of these units must be in regular lecture graduate courses (200-series courses). No more than 4 units of CEE 290 or CEE 297 combined and 6 units of CEE 286 or special topics courses (CEC 250 or CEE 260 series) may apply towards the 36 units.

**Plan II (Comprehensive Examination)** requires completion of a minimum of 36 units of approved course work including the core courses and successful passage of a comprehensive examination. At least 28 of these units must be in regular lecture graduate courses (200-series courses), and none may be in courses numbered CEE 286, CEE 290, CEE 297, CEE 299, or CEE 302.

**Examination** – The exam consists of three written tests in three different areas emphasizing graduate level fundamental knowledge and breadth of the study area rather than specifics covered in individual courses. Exams areas can include, but are not limited to:

1. Advanced Air Pollution Control and Engineering
2. Advanced Chemical Engineering Thermodynamics
3. Advanced Kinetics and Reaction Engineering
4. Physical and Chemical Separation Processes
5. Transport Phenomena

An oral follow-up session may be requested by the examination committee following its evaluation of the written exam. No more than two attempts to pass the exam are allowed. Students who fail the exam once and then want to switch to the thesis plan should contact the graduate advisor. Students who fail the exam twice may not switch to the thesis plan.

The Comprehensive Exam is only offered once an academic year during the Spring quarter. Students should state intent to take the exam by week 10 of Winter quarter.

**Plan II (Comprehensive Examination, Industrial Biotechnology concentration)** requires completion of a minimum of 36 units of approved course work including the industrial biotechnology related courses CHE 124, CHE 124L, CEE 210, CEE 211, CEE 212, CEE 236, CEE 238A, CEE 238B, CEE 238C, CEE 248, and CEE 298-I. A minimum of 2 units of CEE 298-I is required. Students who elect the Industrial Biotechnology track must complete an industry-based research project with accompanying written report. This project serves in lieu of a comprehensive final examination. Students whose project and report are deemed “not acceptable” are given one additional quarter to revise them to an “acceptable” level.

**Plan II (Comprehensive Examination, Air Quality Engineering concentration)** requires completion of a minimum of 36 units of approved course work including:

**Required core courses (16 units)**

- CEE 200, CEE 202, CEE 204, CEE 206, CEE 220, CEE 125, CEE 136, ENVE 133, ENVE 134, ENVE 135, ENVE 138, ENVE 227, ENVE 245, ME 248, PBPL 233, ENSE 1351, ME 117, ME 136

**Electives selected from the following list (16 units)**

- CEE 200, CEE 202, CEE 204, CEE 206, CEE 220, CEE 125, CEE 136, ENVE 133, ENVE 134, ENVE 135, ENVE 138, ENVE 227, ENVE 245, ME 248, PBPL 233, ENSE 1351, ME 117, ME 136

**Required internship course (4 units)**

- CEE 298I

A minimum of 4 units of CEE 298I is required. Students who elect the Air Quality Engineering track must complete an internship and research project with accompanying written report. This project serves in lieu of a comprehensive final examination. Students whose project and report are deemed “not acceptable” are given one additional quarter to revise them to an “acceptable” level.

1 Credit awarded for no more than 8 units of undergraduate courses
2 Credit awarded for no more than 8 units of out of department courses

**For the M.S. degree, students must complete a minimum of three quarters in residence in the UC with a GPA of 3.00 or better in all 100- and 200-level course work related to the degree.**

**Thesis Committee**

The committee consists of three members. The student and advisor nominate the committee before the end of the first year with the concurrence of the graduate committee. After review of the nominations, the dean of the Graduate Division appoints the committee on behalf of the Graduate Council. The committee, once approved by the graduate dean, rather than the department, becomes responsible for the student’s academic guidance and evaluation. The chairman of the committee is the director of the candidate’s research and is normally a faculty member of the CEE department or a cooperating faculty member. A member may be appointed who is a researcher on campus, from off-campus, or a visiting lecturer within the department; however, a memo indicating the academic degree and affiliation of the nominated member, as well as a curriculum vitae, must accompany such a request. (Memos need not accompany the nomination of an adjunct faculty member.) After the com-
The student should be selected by the faculty panel. The panel will evaluate whether the student passes the exam. Students who fail the examination on the first attempt are granted a second and final attempt to pass a makeup examination. This exam is typically completed during the third quarter of study and after completing the four core Chemical and Environmental Engineering graduate courses.

Teaching Requirement
All students must be employed as teaching assistants for at least one quarter. All TAs must take CEE 302 (Teaching Practicum) to help them learn effective teaching methods such as handling discussion sections; preparing and handling laboratory sections; preparing and grading homework, examinations, and lab reports; and student relations.

Oral Qualifying Examination
Selection of the Qualifying Committee is as follows: 2 members are selected by the Graduate Committee; 2 members are selected by the student, and the student’s advisor will chair the committee. All members of the qualifying committee are expected to have the appropriate expertise to guide and evaluate a candidate’s research. No more than 1 member can be a non-academic senate member. After review of the nominations, the dean of the Graduate Division appoints the committee on behalf of the Graduate Council. This committee becomes responsible for the student’s academic guidance and evaluation until advancement to candidacy and administers the qualifying examination.

Dissertation Proposal
After successful completion of the written preliminary exam, each student, with advisement from an advisor, prepares a dissertation proposal. Typically, students submit a dissertation proposal to their qualifying committee within one year after successfully completing the written preliminary examination. The proposal should clearly demonstrate the student’s adequate preparation for the completion of the thesis research, which includes but is not limited to a thorough review of the pertinent literature, a presentation and discussion of the candidate’s own research, and a detailed research plan with sufficient breadth and depth for the completion of the thesis. The qualifying committee chair schedules an oral defense normally within one month of the written proposal submission. The presentation is given only to the dissertation committee members.

The oral presentation/defense of the proposal focuses on the dissertation problem. Students should demonstrate considerable depth of knowledge in the student’s area of specialization and a clear understanding of the research methods that are needed for successful completion of the dissertation research. The oral presentation/defense begins with a presentation by students on their dissertation topic and is followed by questions and suggestions from the qualifying committee.

On the basis of the written proposal and oral defense, the qualifying committee decides whether the student should be advanced to candidacy, asked to modify and enhance the proposal, or requested to withdraw from the program.

Dissertation and Final Oral Examination
Following advancement to candidacy, students formally focus on their dissertation research. The progress of the dissertation is monitored by the student’s dissertation committee. Candidates should interact frequently with members of their dissertation committee to ensure that dissertation progress is acceptable.

The graduate committee nominates and approves the dissertation committee after consideration of the suggestions made by the student and thesis advisor. The dissertation committee consists of a minimum of three UCR Academic Senate members. The chair and majority of members must be from Chemical and Environmental Engineering. All committee members should be in a position to offer guidance and be able to judge the scholarship of the dissertation work. Upon recommendation of the graduate advisor, doctoral dissertation committees are appointed by the dean of the Graduate Division.

After completing the dissertation research, students must submit a written copy of the dissertation for approval for defense by the student’s dissertation committee. Once a draft has been approved, an oral defense of the dissertation is scheduled. This defense consists of a seminar open to the entire academic community, followed by a question-and-answer period conducted by the dissertation committee.

Students must complete at least six quarters in residence in the UC with a GPA of 3.00 or better in all 100- and 200-level course work related to the degree.

Normative Time to Degree
Three years for students with a UCR M.S. degree in Chemical and Environmental Engineering (five years for those without an M.S. degree in Chemical and Environmental Engineering)

Lower-Division Courses

CEE 010 Introduction to Chemical and Environmental Engineering 1 Lecture, 1 hour. Prerequisite(s): none. An introduction to chemical and environmental engineering for engineering and nonengineering majors. Aims to enrich an appreciation of chemical, biochemical, and environmental engineering. Discusses typical careers, key applications, latest developments and the need to engage in lifelong learning in the field. Graded Satisfactory (S) or No Credit (NC).

CEE 011 Introduction to Bioengineering 2 Lecture, 1 hour; laboratory, 3 hours. An introduction to bioengineering for engineering and nonengineering majors. Discusses the application of concepts and methods of the physical sciences and mathematics to problems in the life sciences. Covers typical careers, key applications, latest developments in the field, and the need to engage in lifelong learning. Provides hands-on experiences and includes a field trip. Graded Satisfactory (S) or No Credit (NC).
Cross-listed with BIEN140B.

Focuses on behavior processes, and characterization of materials. Topics include molecular diffusion and transport, membranes, ligand-bioreceptor interactions, enzyme kinetics, and dynamics of metabolic pathways. Examines the application of these principles to the design of bioreactors, biosassays, drug delivery systems, and artificial organs. Cross-listed with BIEN 159.

Cross-listed with BIEN140A.

Examines chromatographic separations, mass spectrometry, atomic absorption, and electrophoresis. Presents total carbon analysis as an introduction to analytical methods and their use in the chemical and environmental engineering fields.

Cross-listed with BIEN140B.

Upper-Division Courses

CEE 125 Analytical Methods For Chemical and Environmental Engineers 4 Lecture, 2 hours; laboratory, 6 hours. Prerequisite(s): CEE 010 (CEE 010 may be taken concurrently); CHEM 001C and CHEM 010C; CHEM 008A and CHEM 008A or CHEM 08HA and CHEM 08HA; PHYS 040C or PHYS 040HC. Examines chromatographic separations, mass spectrometry, atomic absorption, and electrophoresis. Presents total carbon analysis as an introduction to analytical methods and their use in the chemical and environmental engineering fields.

CEE 132 Green Engineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 110A or ENVE 171, senior standing or consent of instructor. An introduction to the design, commercialization, and use of feasible and economical processes and products that minimize risks to human health and the environment. Topics covered include environmental risk assessment; regulations; chemical process flow-sheet analysis for pollution prevention; product life-cycle assessment; and industrial ecology. Credit is awarded for only one of CEE 132 or CEE 232.

CEE 135 Chemistry of Materials 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 008A and CHEM 08LA or CHEM 08HA and CHEM 08HLA; PHYS 040C or PHYS 040HC. An introduction to the synthesis, structure, properties, and performance of modern materials. Topics include the science of materials, bonding and structure, the strength of materials, electrons in materials, semiconductors, superconductors, and optical properties of materials.

CEE 136 Aerosol Technology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): concurrent enrollment in CHE 120. Explores the physical and chemical properties of aerosol and its relationship to ambient air quality, control technology, health impacts, and global climate change. Introduces the principles of aerosol measurement and aerosol measurement technology.

CEE 139 Biomaterials 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 110A or CHEM 110C, BIOL 109, PHYS 040C or PHYS 040HB, or consent of instructor. Covers the principles of materials science and engineering, with attention to topics in bioengineering. Explores atomic structures, hard treatment, fundamentals of corrosion, manufacturing processes, and characterization of materials. Cross-listed with BIEN 140A.

CEE 140B Biomaterials 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 040B or PHYS 040HB; Covers the structure-property relations of metals, ceramics, polymers, and composites, as well as hard and soft tissues such as bone, teeth, cartilage, ligament, skin, muscle, and vasculature. Focuses on behavior of materials in the physiological environment. Cross-listed with BIEN 140B.

CEE 158 Professional Development For Engineers 3 Lecture, 3 hours. Prerequisite(s): upper-division standing. A review of various topics relevant to the professional development of chemical engineers. Includes career paths; interview strategies; professional registration and preparation for certification examinations; ethics; risk management and environmental health and safety, regulatory issues; and lifelong learning.

CEE 159 Dynamics of Biological Systems 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005B, MATH 046; or consent of instructor. Covers engineering principles for the analysis and modeling of biological phenomena. Topics include molecular diffusion and transport, membranes, ligand-bioreceptor interactions, enzyme kinetics, and dynamics of metabolic pathways. Examines the application of these principles to the design of bioreactors, biosassays, drug delivery systems, and artificial organs. Cross-listed with BIEN 159.

CEE 172 Chemistry of Materials 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 114, CHE 116, CHE 120, ENGR 118; or consent of instructor. For CEE 172 online section: enrollment in the Online Master-of-Science in Engineering program. Topics include transport phenomena, potential flow, and boundary layer theories with applications to simultaneous heat, momentum, and mass transfer. Introduces numerical techniques used to solve advanced transport phenomena problems.

CEE 197 Research For Undergraduates 1 to 4 Research, 3 to 12 hours. Prerequisite(s): consent of instructor and Chemical and Environmental Engineering undergraduate program advisor. Directs a research project on a topic relevant to chemical and environmental engineering. Requires a final written report. Course is repeatable to a maximum of 8 units.

Graduate Courses

CEE 200 Advanced Engineering Computation 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENGR 118 or consent of instructor. For CEE 200 online section: enrollment in the Online Master-of-Science in Engineering program. Program-solving techniques for basic engineering systems including heat and mass transfer, coupled reactions, fluid flow potential, and control.

CEE 201 Transport Phenomena 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 114, CHE 116, CHE 120, ENGR 118; or consent of instructor. For CEE 201 online section: enrollment in the Online Master-in-Science in Engineering program. Topics include transport phenomena, potential flow, and boundary layer theories with applications to simultaneous heat, momentum, and mass transfer. Introduces numerical techniques used to solve advanced transport phenomena problems.

CEE 202 Transport Phenomena 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 114, CHE 116, CHE 120, ENGR 118; or consent of instructor. For CEE 202 online section: enrollment in the Online Master-in-Science in Engineering program. Topics include transport phenomena, potential flow, and boundary layer theories with applications to simultaneous heat, momentum, and mass transfer. Introduces numerical techniques used to solve advanced transport phenomena problems.

CEE 203 Biomass Conversion to Fuels, Chemicals, Materials, and Power 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of the instructor. Provides current and future sustainable technologies for energy production. Includes key physical and chemical principles governing performance. Considers economics and life cycle implications of energy options. Examines current and projected energy use patterns and impacts on the environment. Considers energy policies that can facilitate introduction of sustainable energy production systems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CEE 204 Advanced Kinetics and Reaction Engineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of the instructor. For CEE 204 online section: enrollment in the Online Master-of-Science in Engineering program. Emphasizes kinetics and mechanisms of heterogeneous reactions in different types of reactors. Specific topics include gas-solid noncatalytic reactions; catalytic surfaces and catalyst characterization; and adsorption, diffusion, reaction, and heat transfer in porous catalysts.

CEE 206 Advanced Chemical Engineering Thermodynamics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 130/ENVE 130 or consent of instructor. For CEE 206 online section: enrollment in the online Master-in-Science in Engineering program. Application of the laws of thermodynamics to phase and chemical reaction equilibrium. Introduction to statistical thermodynamics, molecular simulations, and the evaluation of thermodynamic properties from molecular simulations.

CEE 207 Air Quality Modeling 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CEE 202, CEE 206, ENVE 134; graduate standing; or consent of instructor. Examines the discovery, design, and evaluation processes for biological and agricultural products through team study and project design. Includes participation from various disciplines working together to broaden knowledge and enhance communication skills key to tackling challenges related to agriculture, the environment, human health, and other needs. May be taken Satisfactory (S) or No Credit (NC) by students advanced to candidacy for the Ph.D. Cross-listed with BPSC 208.

CEE 210 Cell Engineering 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CHE 124 or consent of instructor. Introduces to genetic and environmental manipulation of cells for production of proteins and for enhanced biocatalytic and synthetic activities. Topics include cloning and gene expression enhanced biocatalytic and synthetic activities in different host systems, posttranslational processing, metabolic controls and kinetics, in vivo nuclear magnetic resonance spectroscopy, cell modeling, and sensitivity analysis. Credit is awarded for only one of CEE 210 or CHE 140.

CEE 214 Upstream Processes in Biotechnology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 124, CEE 236, graduate standing; or consent of instructor. Introduces the techniques and laboratory practices of upstream processes including mammalian, animal, and plant cell culture, protein engineering, and bioprocess design. Topics covered include antibody, protein, and biomolecule design, production of proteins and biomolecules by cell culture, and media formulation, sterilization, and quality control of upstream processes.
CIE 221 Introduction to Microfluidics 4 Lecture, 4 hours. Prerequisite(s): CHE 160A/ENVE 160A or consent of instructor. Provides a theoretical and practical introduction to microfluidic devices. Covers traditional and new methods for making microfluidic devices and assembly of components into systems. Emphasizes the considerations underlying the design or operation of devices based on pressure-driven or electrokinetic flow. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CIE 222 Fundamentals of Heterogeneous Catalysis 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): CIE 204; graduate standing; or consent of instructor. Explores fundamental phenomenon of chemical reactivity on ground and excited state potential energy surfaces. Quantitatively relates electronic structure of catalytic materials to their chemical reactivity. Covers state-of-the-art experimental and computational approaches to studying catalytic reactivity. Provides a holistic understanding of catalysis at an atomic scale. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CHEM 222, and MSE 239A.

CIE 224 Synthesis and Characterization of Nanomaterials 3 Lecture, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Covers key concepts in synthesis and characterization techniques of nanoscale materials. Explores top down and bottom-up strategies for synthesizing low-dimensional nanomaterials and common techniques for nanoscale materials characterization. Also covers fundamental chemical principles of bonding, electronic structure, and atomic arrangements. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with MSE 239B.

CIE 225 Physical-Chemical Separation Processes 4 Lecture, 4 hours. Prerequisite(s): graduate standing in Chemical and Environmental Engineering or consent of instructor. CIE 225 online section: enrollment in the Online Master-in-Science in Engineering program. Covers concepts of physical and chemical processes relevant to engineered and natural environmental systems. Topics include basic colloid chemistry, DLVO theory, coagulation and flocculation, mechanisms of particle removal in filters and transport in porous media, absorption, disinfection, control of disinfection by-products, and advanced treatment processes such as membranes. Credit is awarded for only one of CIE 225 or ENVE 120.

CIE 226 Biological Unit Processes 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 120, ENVE 142; or consent of instructor. CIE 226 online section: enrollment in the Online Master-in-Science in Engineering program. Theory and design of biological unit processes used in environmental engineering. Suspended growth processes, attached growth processes, digestion processes, and nutrient removal systems are covered. Credit is not awarded for CIE 226 if already awarded for ENVE 121.

CIE 230 Biosensors 4 Lecture 2, Laboratory 6, Prerequisite(s): BCH 110A or BCH 110HA, BCH 110B or BCH 110HB, BIOL 121/MCLB 121, CHE 124; or consent of instructor. Introduces the fundamentals and applications of biosensors. Covers enzyme-, whole cell-, tissue-, antibody- or antigen-based electrochemical, optical, and piezoelectric biosensors. Applies such knowledge to bioprocess monitoring and control, environmental monitoring, and health care.

CIE 231 Scattering and Reflectometry For Environmental, Material, and Biological Applications 4 Lecture, 3 hours discussion, 3 hours per quarter; laboratory 15 hours per quarter. Prerequisite(s): CIE 206 or equivalent. Covers experimental and theoretical aspects of conventional static and dynamic light scattering, small-angle X-ray scattering, small-angle neutron scattering, X-ray and neutron reflectivity for colloids and biological solutions, surfaces, and interfaces. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CIE 232 Green Engineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 120 or consent of instructor. A study of the design, commercialization, and use of feasible and economical processes and products that minimize risks to human health and the environment. Topics include environmental issues, risk assessment, and regulations; flow of chemical and manufacturing unit processes and flow-sheet analysis for pollution prevention; product life-cycle assessment; and industrial ecology. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for only one of CIE 132 or CIE 232.

CIE 233 Advanced Air Pollution Control and Engineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CIE 220; CHEM 206; CHEM 008A, CHEM 008LA or CHEM 008HA, CHEM 080HLA; CHEM 008B, CHEM 080LB or CHEM 080HB, CHEM 080LB; ENVE 133; ENVE 134; graduate standing. For the CIE 233 online section: enrollment in the Master of Science in Engineering program; graduate standing. Covers principles necessary to understand the atmospheric behavior of air pollutants. Topics include gas- and aerosol-phase chemistry, atmospheric dispersion, removal processes and residence times, and the formation and fate of gas and aerosol pollutants.

CIE 234 Vehicle Emissions Control Technology, Measurement Procedures, and Alternative Fuels 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Covers the nature of gaseous and particulate emissions and the technical aspects of energy efficiency from mobile sources. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.
Cee 238B Bioprocess Design Laboratory II 3
Lecture, 2 hours; laboratory, 3 hours. Prerequisite(s): CEE 238A, graduate standing, or consent of instructor. Covers plant design, heat, mass, and fluid transport, with a focus on downstream separation processes and technoeconomic analysis. Students (individually or in small teams) propose and design a bioprocess. A written report and presentation are required.

Cee 238C Bioprocess Design Laboratory III 3
Lecture, 2 hours; laboratory, 3 hours. Prerequisite(s): CEE 238B, graduate standing, or consent of instructor. Explores the fundamentals and application of bioprocess design. Covers plant design, process technoeconomic analysis and cost sensitivity, and good manufacturing practices. Students (individually or in small teams) propose and design a bioprocess. A written report and presentation are required.

Cee 240 Advanced Computation For Materials Design 4
Lecture, 4 hours. Prerequisite(s): graduate standing, or consent of instructor. Covers both desktop computing and high-performance computing (i.e., supercomputing resources) in the engineering sciences to understand and design materials using computational methods. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with MSE 229.

Cee 241 Aquatic Chemistry 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 100, ENV 142; or consent of instructor. CEE 241 online section: enrollment in the Online Master-in-Science in Engineering program. Chemical principles and equilibrium models used to describe the behavior of natural water systems, water and wastewater treatment processes, and pollutant transformations in the aqueous environment. Topics include acid-base chemistry, precipitation, complexation, and redox reactions. Credit is not awarded to CEE 241 if already awarded to ENVE 140.

Cee 242 Pilot Plant Laboratory 4
Lecture, 1 hour; laboratory, 9 hours. Prerequisite(s): ENV 120, ENV 121; or consent of instructor. Laboratory investigations of physical, chemical, and biological processes for water treatment, wastewater treatment, and soil remediation.

Cee 243 Advanced Water Treatment Technologies 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing consent of instructor. For the CEE 243 online section: enrollment in the Online Master-in-Science in Engineering program; graduate standing; or consent of instructor. Fundamentals of advanced water treatment processes emphasizing membrane separation, advanced oxidation processes, and the application of nanomaterials in environmental engineering applications.

Cee 245 Advanced Hydraulic Engineering 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 114, ENV 142 (ENV 142 may be taken concurrently); or consent of instructor. An introduction to the basic methods of hydraulic engineering for water quality control. Topics include design and analysis of basic flow and water containment structures, sanitary and storm sewers, pumps and valves, and pipe networks. Emphasis is given to design projects aimed at developing skills in problem specification, modeling, and analysis. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

Cee 246 Surface and Interface Phenomena 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 100 or ME 100A or consent of instructor. An introduction to colloidal systems, capillarity, surface tension and contact angle, and micelles and microemulsions. Also covers adsorption and desorption at the solid-liquid interface, electrostatic forces, and colloid stability.

Cee 247 Molecular Thermodynamics of Complex Fluids 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 200 or equivalent, CEE 206, MSE 204/PHYS 212A; or consent of instructor. Introduces recent developments in applied thermodynamics and molecular simulations. Emphasizes current concerns in chemical and environmental engineering such as colloids, polymers, biomacromolecules, and fluids under inhomogeneous conditions.

Cee 248 Quantitative Analysis of Upstream Processes in Biotechnology 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CEE 211, graduate standing, or consent of instructor. Examines fundamentals of biomolecular ligand binding, enzyme kinetics, enzyme reaction mechanisms, and whole-cell biocatalysis. Topics include the qualitative description of steady state and pre-steady state enzyme kinetics, the effects of mass transfer on enzyme and whole-cell biocatalysis, and analytical methods to study enzyme kinetics and protein-ligand binding interactions.

Cee 249 Integration of Computational and Experimental Biology 4
Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005B; MATH 010B, MATH 046, PHYS 040C or PHYS 040HC; graduate standing. BIEN 249/CEE 249 online section: enrollment in the Online Master-in-Science in Engineering program. A multidisciplinary introduction to computational methods used to analyze experimental biological data. Introduction to mathematical concepts needed to understand protein structure and dynamics, protein-protein interactions (structures and networks), gene regulatory networks, signal transduction networks, metabolic networks, and kinetic modeling of cellular processes. Also covers techniques used to derive experimental data. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with BIEN 249.

Cee 250 Special Topics in Chemical and Environmental Engineering 1 or 2
Seminar, 1 or 2 hours. Prerequisite(s): graduate standing. Seminar in selected topics in chemical and environmental engineering presented by graduate students, staff, faculty, and invited speakers. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

Cee 251 Microbial Engineering and Environmental Biotechnology 1 or 2
Seminar, 1 or 2 hours. Prerequisite(s): graduate standing. Discusses the recent development of novel biocatalysts and biological materials for degrading toxic pollutants or synthesizing environmentally friendly chemicals. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

Cee 253 Biodegradation and Bioremediation 1 or 2
Seminar, 1 or 2 hours. Prerequisite(s): graduate standing. Reviews current research. Special emphasis is placed on biological techniques for air pollution control, bioremediation of methyl tert-butyl ether, and molecular techniques for microorganism monitoring. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable.

Cee 254 Organic Electronic Materials 2
Seminar, 2 hours. Prerequisite(s): graduate standing. Reviews current research. Special emphasis is placed on biological techniques for air pollution control, bioremediation of methyl tert-butyl ether, and molecular techniques for microorganism monitoring. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable.

Cee 255 Special Topics in Water Quality Engineering 1 or 2
Seminar, 1 or 2 hours. Prerequisite(s): graduate standing. Involve reports and discussion by students, faculty, and visiting scholars on current research topics in water quality engineering. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

Cee 256 Special Topics in Particulate Measurement and Air Quality 1 or 2
Seminar, 1 or 2 hours. Prerequisite(s): graduate standing. Topics include atmospheric chemistry, aerosol chemistry and physics, and measurement techniques used for source and ambient sampling of gases and aerosols. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable.

Cee 257 Special Topics of Bio-Nanotechnology 1 or 2
Seminar, 1 hour; consultation, 0 to 1 hour. Prerequisite(s): graduate standing or consent of instructor. Focuses on the application of nanotechnology for further developments in bioengineering and medicine. Students complete presentations on the latest developments in nanotechnology. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.
CEE 258 Biosensing and Biodecontamination 1 or 2 Seminar, 1 or 2 hours. Prerequisite(s): graduate standing. Involves oral presentations and intensive small-group discussions of current literature on biological detoxification of hazardous chemicals and biological-based sensors for environmental, clinical, food quality, and process monitoring. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CEE 259 Special Topics in Materials Electrochemistry 1 Seminar, 1 hour. Prerequisite(s): graduate standing. Topics include nanoelectrochemical systems, electrochemistry, bioelectrochemistry, magnetic materials, spintronics, microelectromechanical systems/nanoelectromechanical systems (MEMS/NEMS), nanosensor arrays, nanoelectronics, corrosion, fuel cells, batteries, thermoelectric materials, electroenzymology, electrodeposition, electroless deposition, and synthesis of nanowires and nanotubes. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable.

CEE 260 Structural Ordering in Colloidal Dispersions 1 or 2 Seminar, 1 or 2 hours. Prerequisite(s): graduate standing. Introduces recent advances in understanding intercolloid forces and self-assembly of colloidal particles for the fabrication of new materials. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CEE 261 Special Topics in Zeolites, Fuel Cells, and Nanostructured Materials 1 or 2 Seminar, 1 or 2 hours. Prerequisite(s): graduate standing. Covers design, synthesis, and engineering of zeolite thin films for applications in semiconductors and in aerospace; development of fuel cell membranes and electrode catalysts and production of hydrogen, and synthesis and manipulation of nanomaterials. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CEE 262 Special Topics in Systems Biology 1 or 2 Seminar, 1 or 2 hours. Prerequisite(s): graduate standing. Consists of oral presentations and intensive small-group discussions of the current literature and research on computational and experimental aspects of systems biology. Explores high-throughput experiments, experimental design, numerical methods, model development, written and oral presentation skills, ethics, and laboratory techniques. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CEE 263 Membrane Separations 2 Seminar, 2 hours. Prerequisite(s): graduate standing in Chemical and Environmental Engineering or consent of instructor. Covers theoretical and applied concepts of membrane separation processes. Topics may include basic membrane transport theory, membrane materials and formation processes, advanced colloid and surface chemistry, Derjaguin-Landau-Verwey-Overbeek (DLVO) theory on colloid stability, colloidal hydrodynamics, and transport in porous media. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CEE 264 Special Topics in Microbial Fate and Transport in Aquatic Environments 1 or 2 Seminar, 1 hour; individual study, 0 to 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores the theoretical and applied research currently being conducted in the area of microbial pathogen transport in natural and engineered aquatic systems. Topics include the theory of colloid transport and filtration, quantification and analysis of microbial adhesion or deposition kinetics, and whole-cell and molecular-scale microbial analysis techniques. Students who give class presentations receive credit for 2 units; other students receive credit for 1 unit. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CEE 266 Special Topics in Biological Conversion of Biomass 1 or 2 Seminar, 1 hour; individual study, 0 to 3 hours. Prerequisite(s): graduate standing. Consists of oral presentations and small group discussions of current and historic literature on biological conversion of biomass to fuels and chemicals. Students who make presentations receive credit for 2 units; other students receive credit for 1 unit. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CEE 267 Special Topics in Bionanotechnology 2 Seminar, 2 hours. Prerequisite(s): graduate standing. Introduces recent advances in biomimetics, biomineralization, and bio-inspired materials for nanostructures, as well as for energy storage and conversion applications. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 18 units.

CEE 268 Special Topics in Environmental Chemistry 2 Seminar, 2 hours. Prerequisite(s): graduate standing. Addresses the key role that environmental chemical processes play in water quality, pollutant fate, and the development of strategies for the treatment and reuse of contaminated natural resources. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 18 units.

CEE 269 Special Topics in Aerosols and Climate 2 Seminar, 2 hours. Prerequisite(s): graduate standing. Introduces research at the interface of particle air quality and climate. Focuses on the effects of particle formation and composition on climate. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable.

CEE 286 Colloquium in Chemical and Environmental Engineering 1 Colloquium, 1 hour. Prerequisite(s): graduate standing. Lectures on a current research topic in chemical engineering, environmental engineering, and other related fields presented by faculty members and visiting scientists. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

C 290 Directed Studies 1 to 6 Individual Study, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor and graduate advisor. Individual study, directed by a faculty member, of selected topics in chemical and environmental engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 9 units.

CEE 292 Concurrent Studies in Chemical and Environmental Engineering 1 to 4 Research, 3 to 12 hours. Prerequisite(s): consent of instructor. To be taken concurrently with a 100-series course but on an individual basis. Devoted to specific additional projects related to the 100-series course. Faculty provide guidance and evaluation throughout the quarter. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

CEE 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor. Research conducted under the supervision of a faculty member on selected problems in chemical and environmental engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CEE 298I Individual Internship 1 to 4 Written Work, 1 to 4 hours. Prerequisite(s): graduate standing; consent of instructor. Individual apprenticeship in chemical and environmental engineering with an approved professional individual or organization, and a faculty member. A written report is required. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

CEE 299 Research for the Thesis Or Dissertation 1 to 12 Research, 3 to 36 hours. Prerequisite(s): graduate standing; consent of instructor. Research in chemical and environmental engineering for the M.S. thesis or Ph.D. dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Course

CEE 302 Teaching Practicum 1 to 4 Seminar, 3 to 12 hours. Prerequisite(s): appointment as a teaching assistant or associate in Chemical and Environmental Engineering. Topics include effective teaching methods, such as those involved in leading discussion sections, preparing and grading examinations, and student-instructor relations in lower- and upper-division Chemical Engineering and Environmental Engineering courses. Required of each quarter of teaching assistants and associates in Chemical and Environmental Engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.
Upper-Division Courses

**CHE 100 Engineering Thermodynamics**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 001C, MATH 046 (or concurrent enrollment), PHYS 040B or PHYS 040B; or consent of instructor. An introduction to engineering thermodynamics with emphasis on chemical and environmental engineering systems. Topics include concepts of equilibrium, temperature, and reversibility; the first law and concept of energy; and the second law and concept of entropy. Also examines equations of state, thermodynamic properties, and engineering applications used in the analysis and design of closed and open systems. Credit is awarded for only one of CHE 116 or ME 116A.

**CHE 102 Catalytic Reaction Engineering**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 122 or consent of instructor. Principles of surface reactions and heterogeneous catalysis. Catalyzed reaction kinetics, heterogeneous reactions, diffusion and heterogeneous catalysis, analysis and design of heterogeneous reactors.

**CHE 105 Introduction to Nanoscale Engineering**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CEE 135, MATH 010A, PHYS 040C or PHYS 040HC; or consent of instructor. An introduction to nanotechnology engineering and its various applications. Includes electromagnetic waves and quantum mechanics; synthesis of nanostructures; assembly of nanostructures; and traditional and nontraditional methods of nanolithography and interactions between electronic and optical properties. Also covers organic heterostructures, nanotubes, and quantum computing.

**CHE 110A Chemical Process Analysis 3**
Lecture, 2 hours; discussion, 1 hour. Prerequisite(s): CHEM 001C, MATH 009C, PHYS 040B or PHYS 040B; or consent of instructor. Introduces the principles of conservation of mass in chemical process systems. Topics include the development of steady-state mass balances, and application of mass balances to existing industrial processes.

**CHE 110B Chemical Process Analysis 3**
Lecture, 2 hours; discussion, 1 hour. Prerequisite(s): CHE 110A with a grade of "C-" or better; or consent of instructor. Applies principles of conservation of energy to chemical process systems. Topics include the development of steady-state and unsteady-state energy balances as well as combined mass and energy balances in industrial processes.

**CHE 114 Applied Fluid Mechanics**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 110A or ENVE 171, MATH 046, PHYS 040B or PHYS 040B; or consent of instructor. An introduction to fluid statics, fluid flow, and flow of compressible and incompressible fluids in conduits and open-channel flow. Also covers flow past immersed bodies, transportation and metering of fluids, and agitation and mixing of liquids. Credit is awarded for only one of CHE 114 or ME 113.

**CHE 116 Heat Transfer**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 100, CHE 114 with a grade of "C-" or better; or consent of instructor. An analysis of heat transfer for Chemical Engineering and Environmental Engineering majors. Topics include steady- and unsteady-state heat conduction, forced convection, basic radiation heat transfer, and design of heat exchangers. Credit is awarded for only one of CHE 116 or ME 116A.

**CHE 117 Separation Processes**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 116, CHE 120; or consent of instructor. Covers fundamental concepts and practical techniques for designing equipment based on equilibrium stage processes. Explores gas-liquid absorption, distillation, liquid-liquid extraction, solid-liquid extraction, humidification, drying, and membrane processes.

**CHE 118 Process Dynamics and Control**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 117, CHE 122, ENGR 118; or consent of instructor. Fundamentals of process control. Feedback and feedforward control of dynamic processes. Frequency response analysis. Introduction to multivariable control.

**CHE 120 Mass Transfer**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 114 with a grade of "C-" or better, MATH 046; or consent of instructor. Introduction to analysis of mass transfer in systems of interest to chemical and environmental engineering practice. Explores transport of matter by diffusion, free, and forced convection.

**CHE 122 Chemical Engineering Kinetics**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 100, CHE 110B, CHE 120 (may be taken concurrently), ENGR 118; or consent of instructor. Introduction to homogeneous and heterogeneous kinetics and reactor design for chemical and biochemical processes.

**CHE 124 Biochemical Engineering Principles**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110A or BCH 110A; CHE 120, CHE 122. Examines the principles of biochemical engineering. Topics include kinetics of enzymatic reactions and microbial growth, batch and continuous culture reactors, product formulation, and nutrient utilization. Also studies oxygen transfer, bioreactor scale-up, air and media sterilization, fundamentals of bioreactor design, and bioseparations.

**CHE 124L Biochemical Engineering Laboratory**
Laboratory, 6 hours. Prerequisite(s): CHE 124 or consent of instructor. Laboratory practices in biochemical engineering. Determination of microbial kinetics and biologically mediated reactions, oxygen transfer coefficients. Batch and continuous culturing, air and media sterilization, bioseparations.

**CHE 130 Advanced Engineering Thermodynamics**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 100 or consent of instructor. Advanced study of chemical thermodynamics and their applications to chemical and environmental engineering processes. Applies principles for the thermodynamic behavior of pure solutions and mixtures, phases, and chemical equilibria for homogeneous and heterogeneous systems to a variety of processes common to chemical and environmental engineering. Cross-listed with ENVE 130.

**CHE 131 Electrochemical Engineering**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 100, CHE 120, CHE 122; or consent of instructor. Explores role of thermodynamics, charge transfer kinetics, and mass transfer on behavior of electrochemical systems. Includes cell thermodynamics, faradaic and non-faradaic rate processes, ionic transport, nucleation and growth theories. Shows applications to chemical sensors, batteries, corrosion, and thin film deposition. Provides in-class demonstrations to illustrate concepts.

**CHE 136 Advanced Topics in Heat Transfer**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 116, CHE 120. Advanced study of the computational and theoretical methods associated with heat transfer, fluid flow, and other related processes. Topics include phenomena of heat conduction, convection, and the calculation of flow fields.

**CHE 140 Cell Engineering**
Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CHE 124 or consent of instructor. Introduction to genetic and environmental manipulation of cells for production of proteins and for enhanced biocatalytic and synthetic activities. Cloning and gene expression in different host systems, posttranslational processing, metabolic control and kinetics, in vivo NMR spectroscopy, cell modeling, and sensitivity analysis. Credit is awarded for only one of CEE 210 or CHE 140.

**CHE 150 Biosensors**
Lecture, 2 hours; laboratory, 6 hours. Prerequisite(s): BCH 184 or CHE 124 or consent of instructor. Introduces the fundamentals and applications of biosensors. Topics on enzyme-, whole cell-, tissue-, and antibody/antigen-based electrochemical, optical, and piezoelectric biosensors for applications in bioprocess monitoring and control, environmental monitoring, and health care are covered.

**CHE 160A Chemical and Environmental Engineering Laboratory**
Laboratory, 6 hours; discussion, 1 hour. Prerequisite(s): CHE 114; CHE 120. Involves laboratory exercises in chemical and environmental engineering. Experiments cover physical measurements, fluid mechanics, and mass transfer. Emphasizes experimental design, analysis of results, and preparation of engineering reports. Cross-listed with ENVE 160A.

**CHE 160B Chemical Engineering Laboratory**
Laboratory, 6 hours; discussion, 1 hour. Prerequisite(s): CHE 116, CHE 122. Consists of laboratory exercises in chemical engineering. Includes experiments in physical measurements, heat transfer, reactor analysis, and chemical kinetics. Emphasizes experimental design, analysis of results, and preparation of engineering reports.
Environmental Engineering

Upper-Division Courses

ENVE 120 Unit Operations and Processes in Environmental Engineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 120, ENVE 142; or consent of instructor. Introduction to physical and chemical processes used for drinking water and wastewater treatment. Topics include coagulation and flocculation, sedimentation, granular-medium filtration, membrane disinfection, and softening. Credit is awarded for only one of CEE 225 or ENVE 120.

ENVE 121 Biological Unit Processes 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENVE 120, ENVE 142 An introduction to the theory and design of biological unit processes used in environmental engineering. Covers suspended growth processes, attached growth processes, digestion processes, and nutrient removal systems. Credit is awarded for only one of CEE 226 or ENVE 121.

ENVE 130 Advanced Engineering Thermodynamics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 100 or consent of instructor. Advanced study of chemical thermodynamics and their applications to chemical and environmental engineering processes. Applies principles for the thermodynamic behavior of pure solutions and mixtures, phases, and chemical equilibria for homogeneous and heterogeneous systems to a variety of processes common to chemical and environmental engineering. Cross-listed with CHE 130.

ENVE 133 Fundamentals of Air Pollution Engineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 110A or ENVE 171, CHE 11A, CHEM 008B; MATH 046; PHYS 040B; CHEM 08HB or CHEM 08LB or CHEM 08HBLB or CHEM 12HB or CHEM 12B; PHYS 040HB; or consent of instructor. Covers principles, modeling, and design of systems for atmospheric emission control of pollutants such as photocatalytic smog and by-products of combustion. Explores the effects of air pollution on health.

ENVE 134 Technology of Air Pollution Control 4 Lecture, 4 hours. Prerequisite(s): ENVE 133. Processes and design of control technologies for gaseous and particulate pollutants. Methods and design of ambient air quality measurements and air pollution source sampling for both gaseous and particulate pollutants.

ENVE 135 Fate and Transport of Environmental Contaminants 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 120; CHEM 008B and CHEM 08LB or CHEM 08HB and CHEM 08HBLB; ENGR 118, ENVE 133, ENVE 142; or consent of instructor. Covers fate and transport of contaminants in the air, water, and soil environments. Addresses description and modeling of advection, dispersion, phase transfers, and chemical transformation mechanisms.

ENVE 138 Combustion Engineering 4 Lecture, 4 hours. Prerequisite(s): CHE 11A, ENVE 133. Covers the fundamental development of the engineering and design principles underlying combustion engines and turbines and the associated emission control technology. Includes aspects of fuels, lubricants, instrumentation, chemistry of combustion, and kinetics related to the understanding of engineering processes, engine design, and emission control.

ENVE 140 Aquatic Chemistry 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 100, ENVE 142; or consent of instructor. An introduction to the chemical principles and equilibrium models used to describe the behavior of natural water systems, water and wastewater treatment processes, and pollutant transformations in the aqueous environment. Topics include acid-base chemistry, precipitation, complexation, and redox reactions. Credit is awarded for only one of CEE 241 or ENVE 140.

ENVE 142 Water Quality Engineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 114 or ENVE 171; or consent of instructor. An introduction to the engineering aspects of water quality management. Addresses water quality characterization and modeling techniques for natural and engineered systems. Discusses application of chemical equilibrium and kinetic models to water quality.

ENVE 144 Solid Waste Management 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 002 or BIOL 005A, BIOL 05LA; CHEM 010C, CHEM 010LC or CHEM 010HC, CHEM 010LC; ENSE 001, ENSE 002 or ENVE 171; MATH 007B or MATH 009B or MATH 099HB; or consent of instructor. A study of the characterization, collection, transportation, processing, disposal, recycling, and composting of municipal solid waste. Emphasizes accepted management strategies and design procedures for recovering or disposing solid wastes while protecting public and environmental well-being. Cross-listed with ENSE 144.

ENVE 145 Hazardous Waste Management 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENVE 120 and ENVE 142. Advanced course in the study of physio-chemical, thermal, and biological treatment of hazardous waste. Emphasis is placed on the technical understanding and design of physical, biological, and thermal treatment methods; transportation of hazardous waste; and hazardous waste characterization and site assessment.

ENVE 146 Water Quality Systems Design 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 114 or consent of instructor. Analysis and design of water conveyance systems including water distribution networks, wastewater and storm water collection systems, structures for flow measurement and control, and pumps and pump stations. Includes projects to develop design process skills including problem specification, modeling, and analysis.
ENVE 160A Chemical and Environmental Engineering Laboratory 3 Laboratory, 6 hours; discussion, 1 hour. Prerequisite(s): CHE 114; CHE 120. Involves laboratory exercises in chemical and environmental engineering. Experiments cover physical measurements, fluid mechanics, and mass transfer. Emphasizes experimental design, analysis of results, and preparation of engineering reports. Cross-listed with CHE 160A.

ENVE 160B Environmental Engineering Laboratory 3 Laboratory, 6 hours; discussion, 1 hour. Prerequisite(s): ENVE 133. Consists of laboratory exercises in environmental engineering. Includes experiments in physical measurements, reaction kinetics, reactor analysis, and air pollution engineering. Emphasizes experimental design, analysis of results, and preparation of engineering reports.

ENVE 160C Environmental Engineering Laboratory 3 Laboratory, 6 hours; discussion, 1 hour. Prerequisite(s): ENVE 120; ENVE 142. Consists of laboratory exercises in environmental engineering. Includes experiments in physical measurements, water quality, and unit operations and processes. Emphasizes experimental design, analysis of results, and preparation of engineering reports.

ENVE 171 Fundamentals of Environmental Engineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 001C, MATH 009C, PHYS 040B or PHYS 040HB, or consent of instructor. An introduction to mass and energy balances. Includes an overview of contaminants and their effects on human health and the environment. Provides a basic understanding of contaminants, their sources, and their movement and fate in the environment.

ENVE 175A Senior Design Project 4 Lecture, 1 hour; laboratory, 6 hours; consultation, 1 hour. Prerequisite(s): ENVE 120; Restricted to class level standing of senior; Restricted to major(s) Environmental Engineering, Environmental Engr BS + MS. Under the direction of a faculty member, students (individually or in small teams with shared responsibilities) propose, design, build, and test environmental engineering devices or systems. Requires a written report giving details of the project and test results and an oral presentation of the design aspects. Graded in-progress until ENVE 175A and ENVE 175B are completed at which time a final letter grade is assigned.

ENVE 175B Senior Design Project 4 Lecture, 1 hour; laboratory, 6 hours; consultation, 1 hour. Prerequisite(s): ENVE 120; Restricted to class level standing of senior; Restricted to major(s) Environmental Engineering, Environmental Engr BS + MS. Under the direction of a faculty member, students (individually or in small teams with shared responsibilities) propose, design, build, and test environmental engineering devices or systems. A written report, giving details of the project and test results, and an oral presentation of the design aspects are required. Satisfactory (S) or No Credit (NC) grading is not available.

ENVE 190 Special Studies 1 to 5 Individual Study, 3 to 15 hours. Prerequisite(s): upper-division standing; consent of instructor and department chair. Individual study to meet special curricular needs. Course is repeatable to a maximum of 9 units.

Graduate Courses

CxEE 200 Advanced Engineering Computation 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENGR 118 or consent of instructor. For CCEE 200 online section: enrollment in the Online Master-of-Sciences in Engineering program. Problem-solving techniques for basic engineering systems including heat and mass transfer, coupled reactions, fluid flow potential, and control.

CCEE 202 Transport Phenomena 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 114, CHE 116, CHE 120, ENGR 118, or consent of instructor. Five sections. (S) or No Credit (NC) grading is not available. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CCEE 203 Biomass Conversion to Fuels, Chemicals, Materials, and Power 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of the instructor. Provides current and future sustainable technologies for energy production. Includes key physical and chemical principles governing performance. Considers economics and life cycle implications of energy options. Examines current and projected energy use patterns and impacts on the environment. Considers energy policies that can facilitate introduction of sustainable energy production systems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CCEE 204 Advanced Kinetics and Reaction Engineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of the instructor. For CCEE 204 online section: enrollment in the Online Master-of-Science in Engineering program. Emphasizes kinetics and mechanisms of heterogeneous reactions in different types of reactors. Specific topics include gas-solid noncatalytic reactions, catalytic surfaces and catalyst characterization; and adsorption, diffusion, reaction, and heat transfer in porous catalysts.

CCEE 206 Advanced Chemical Engineering Thermodynamics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 110/ENVE 130 or consent of instructor. For CCEE 206 online section: enrollment in the online Master-of-Science in Engineering program. Application of the laws of thermodynamics to phase and chemical reaction equilibrium. Introduction to statistical thermodynamics, molecular simulations, and the evaluation of thermodynamic properties from molecular simulations.

CCEE 207 Air Quality Modeling 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CCEE 202, CCEE 206, ENVE 134; graduate standing; or consent of instructor. Prepares for research and entry-level positions that require knowledge of empirical and deterministic air quality modeling applications. Covers empirical model derivations and applications, box modeling, chemical transport modeling, model evaluation, model sensitivity analysis, and data visualization.

CCEE 208 Product Design and Entrepreneurship For Agricultural and Biological Applications 3 Lecture, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Examines the discovery, design, and evaluation processes for biological and agricultural products through team study and project design. Includes participation from various disciplines working together to broaden knowledge and enhance communication skills key to tackling challenges related to agriculture, the environment, human health, and other needs. May be Taken Satisfactory (S) or No Credit (NC) by students advanced to candidacy for the Ph.D. Cross-listed with BPSC 208.

CCEE 210 Cell Engineering 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CHE 124 or consent of instructor. Introduction to genetic and environmental manipulation of cells for production of proteins and for enhanced biocatalytic and synthetic activities. Topics include cloning and gene expression in different host systems, posttranslational processing, metabolic controls and kinetics, in vivo nuclear magnetic resonance spectroscopy, cell modeling, and sensitivity analysis. Credit is awarded for only one of CCEE 210 or CHE 140.

CCEE 211 Upstream Processes in Biotechnology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 124, CCEE 236, graduate standing; or consent of instructor. Introduces the techniques and laboratory practices of upstream processes including mammalian, animal, and plant cell culture, protein engineering, and bioprocess design. Topics covered include antibody, protein, and biomolecule design, production of proteins and biomolecules by cell culture, and media formulation, sterilization, and quality control of upstream processes.

CCEE 212 Bioseparations and Bioprocess Engineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 124 or consent of instructor. Examines fundamentals of separation processes used to isolate and purify biochemical products such as whole cells, enzymes, food additives, and pharmaceuticals. Covers selected aspects of biochemical engineering such as microbial interactions, economics, and mathematical modeling of bioprocesses.

CCEE 215 Environmental Microbial Ecology 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): CCEE 225 or CHE 226 or ENVE 120 or ENVE 121; graduate standing. For the CCEE 215 online section enrollment in the online Master-of-Science in Engineering Program; graduate standing; or consent of instructor. Introduces fundamental knowledge of microbial community analysis, microbial ecology, and microbial interactions. Also addresses the molecular tools to analyze microbial communities that are important in environmental engineering and environmental biotechnologies.

CCEE 220 Modeling Chemical, Biochemical, and Environmental Processes 4 Lecture, 2 hours; discussion, 2 hours. Prerequisite(s): graduate standing in Chemical and Environmental Engineering or consent of instructor. Introduces simulation softwares and the use of numerical simulation to solve dynamic chemical, biochemical, and environmental problems. Topics include model formulation.
and development, model sensitivity studies, and application of simulations to chemical, biochemical, and environmental processes.

CEE 221 Introduction to Microfluidics 4 Lecture, 4 hours. Prerequisite(s): CHE 160A/ENVE 160A or consent of instructor. Provides a theoretical and practical introduction to microfluidic devices. Covers traditional and new methods for making microfluidic devices and assembly of components into systems. Emphasizes the considerations underlying the design or operation of devices based on pressure-driven or electrokinetic flow. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CEE 222 Fundamentals of Heterogeneous Catalysis 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): CEE 204; graduate standing or consent of instructor. Explores fundamental phenomenon of chemical reactivity on ground and excited state potential energy surfaces. Quantitatively relates electronic structure of catalytic materials to their chemical reactivity. Covers state-of-the-art experimental and theoretical approaches to studying catalytic reactivity. Provides a holistic understanding of catalysis at an atomic scale. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CHEM 222, and MSE 239A.

CEE 224 Synthesis and Characterization of Nanomaterials 3 Lecture, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Covers key concepts in synthesis and characterization techniques of nanoscale materials. Explores top down and bottom-up strategies for synthesizing low-dimensional nanomaterials and common techniques for nanoscale materials characterization. Also covers fundamental chemical principles of bonding, electronic structure, and atomic arrangements. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with MSE 239B.

CEE 225 Physical-Chemical Separation Processes 4 Lecture, 4 hours. Prerequisite(s): graduate standing in Chemical and Environmental Engineering or consent of instructor. CEE 225 online section: enrollment in the Online Master-in-Science in Engineering program. Covers concepts of physical and chemical processes relevant to engineered and natural environmental systems. Topics include basic colloid chemistry, DLVO theory, coagulation and flocculation, mechanisms of particle removal in filters and transport in porous media, absorption, disinfection, control of disinfection by-products, and advanced treatment processes such as membranes. Credit is awarded for only one of CEE 225 or ENVE 120.

CEE 226 Biological Unit Processes 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 120, ENVE 142; or consent of instructor. CEE 226 online section: enrollment in the Online Master-in-Science in Engineering program. Theory and design of biological unit processes used in environmental engineering. Suspended growth processes, attached growth processes, digestion processes, and nutrient removal systems are covered. Credit is not awarded for CEE 226 if already awarded for ENVE 121.

CEE 230 Biosensors 4 Lecture 2, Laboratory 6, Prerequisite(s): BCH 110A or BCH 110HA, BCH 110B or BCH 110HB, BIOL 121/MCBI 121, CHE 124; or consent of instructor. Introduces the fundamentals and applications of biosensors. Covers enzyme-, whole cell-, tissue-, and antibody- or antigen-based electrochemical, optical, and piezoelectric biosensors. Applies such knowledge to bioprocess monitoring and control, environmental monitoring, and health care.

CEE 231 Scattering and Reflectometry For Environmental, Material, and Biological Applications 4 Lecture, 3 hours discussion, 5 hours per quarter; laboratory 15 hours per quarter. Prerequisite(s): CEE 206 or equivalent. Covers experimental and theoretical aspects of conventional static and dynamic light scattering, small-angle X-ray scattering, small-angle neutron scattering, X-ray and neutron reflectivity for colloids and biological solutions, surface, and interfaces. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CEE 232 Green Engineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 120 or consent of instructor. A study of the design, commercialization, and use of feasible and economical processes and products that minimize risks to human health and the environment. Topics include environmental issues, risk assessment, and regulations; flow of chemical and manufacturing unit processes and flow-sheet analysis for pollution prevention; product life-cycle assessment; and industrial ecology. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for only one of CEE 132 or CEE 232.

CEE 233 Advanced Air Pollution Control and Engineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CEE 202; CEE 206; CHEM 008A, CHEM 081A or CHEM 081A, CHEM 081HA, CHEM 008B, CHEM 081B or CHEM 081B, CHEM 081B; ENVE 133; ENVE 134; graduate standing. For the CEE 233 online section: enrollment in the Master of Science in Engineering program; graduate standing. Covers principles necessary to understand the atmospheric behavior of air pollutants. Topics include gas- and aerosol-phase chemistry, atmospheric dispersion processes and residence times, and the formation and fate of gas and aerosol pollutants.

CEE 234 Vehicle Emissions Control Technology, Measurement Procedures, and Alternative Fuels 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Covers the nature of gaseous and particulate emissions and the technical aspects of energy efficiency from mobile sources. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CEE 235 Electrochemical Engineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; or consent of instructor. For CEE 235/MSE 239C online section; enrollment in the Online Master of Science in Engineering program; graduate standing. Explores the role of thermodynamics, charge transfer kinetics, and mass transfer on the behavior of electrochemical systems. Includes cell thermodynamics, Faradaic and non-Faradaic rate processes, ionic transport, nucleation, and growth theories. Covers applications to chemical sensors, batteries, corrosion, and thin film deposition. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with MSE 239C.

CEE 236 Energy: Production, Use, Economics, and Sustainability 4 Discussion, 1 hour; lecture, 3 hours. Prerequisite(s): graduate standing or consent of instructor. For CEE 236 online section: enrollment in the Online Master of Science in Engineering program; graduate standing. Provides insights into current and future sustainable energy production technologies including key governing physical and chemical principles. Considers economics and life cycle implications of energy options. Also examines current and projected energy use patterns and environmental impacts. Considers energy policies that can facilitate introduction of sustainable energy production systems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CEE 238A Bioprocess Design Laboratory I 2 Lecture, 1 hour; laboratory, 3 hours. Prerequisite(s): CEE 124 (CHE 124 may be taken concurrently); graduate standing; or consent of instructor. A detailed introduction to bioprocess design. Covers plant design and heat, mass, and fluid transport, with a focus on upstream processes including bioreactors and feedstocks. Students (individually or in small teams) propose and design a bioprocess. A written report and an oral presentation of the bioprocess design are required.

CEE 238B Bioprocess Design Laboratory II 3 Lecture, 2 hours; laboratory, 3 hours. Prerequisite(s): CEE 238A, graduate standing; or consent of instructor. Covers plant design, heat, mass, and fluid transport, with a focus on downstream separation processes and technoeconomic analysis. Students (individually or in small teams) propose and design a bioprocess. A written report and presentation are required.

CEE 238C Bioprocess Design Laboratory III 3 Lecture, 2 hours; laboratory, 3 hours. Prerequisite(s): CEE 238B, graduate standing; or consent of instructor. Explores the fundamentals and application of bioprocess design. Covers plant design, process technoeconomic analysis and cost sensitivity, and good manufacturing practices. Students (individually or in small teams) propose and design a bioprocess. A written report and presentation are required.

CEE 240 Advanced Computation For Materials Design 4 Lecture, 4 hours. Prerequisite(s): graduate standing; or consent of instructor. Covers both desktop computing and high-performance computing (i.e., supercomputing resources) in the engineering sciences to understand and design materials using computational methods. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with MSE 229.
CEE 241 Aquatic Chemistry 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 110, ENV 142; or consent of instructor. CEE 241 online section: enrollment in the Online Master-in-Science in Engineering program. Chemical principles and equilibrium models used to describe the behavior of natural water systems, water and wastewater treatment processes, and pollutant transformations in the aquatic environment. Topics include acid-base chemistry, precipitation, complexation, and redox reactions. Credit is not awarded to CEE 241 if already awarded to ENVE 140.

CEE 242 Pilot Plant Laboratory 4 Lecture, 1 hour; laboratory, 9 hours. Prerequisite(s): ENVE 120, ENVE 121; or consent of instructor. Laboratory investigations of physical, chemical, and biological processes for water treatment, wastewater treatment, and soil remediation.

CEE 243 Advanced Water Treatment Technologies 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing consent of instructor. For the CEE 243 online section: enrollment in the Online Master-in-Science in Engineering program; graduate standing; or consent of instructor. Fundamentals of advanced water treatment processes emphasizing membrane separation, advanced oxidation processes, and the application of nanomaterials in environmental engineering applications.

CEE 245 Advanced Hydraulic Engineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 114, ENVE 142 (ENVE 142 may be taken concurrently); or consent of instructor. An introduction to the basic methods of hydraulic engineering for water quality control. Topics include design and analysis of basic flow and water containment structures, sanitary and storm sewers, pumps and valves, and pipe networks. Emphasis is given to design projects aimed at developing skills in problem specification, modeling, and analysis. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CEE 246 Surface and Interface Phenomena 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 100 or ME 100A or consent of instructor. An introduction to colloid systems, capillarity, surface tension and contact angle, and micelles and microemulsions. Also covers adsorption and desorption at the solid-liquid interface, electrostatic forces, and colloid stability.

CEE 247 Molecular Thermodynamics of Complex Fluids 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CEE 200 or equivalent, CEE 206, MSE 204/PHYS 212A; or consent of instructor. Introduces recent developments in applied thermodynamics and molecular simulations. Emphasizes current concerns in chemical and environmental engineering such as colloids, polymers, biomacromolecules, and fluids under inhomogeneous conditions.

CEE 248 Quantitative Analysis of Upstream Processes in Biotechnology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CEE 211, graduate standing; or consent of instructor. Examines fundamentals of biomolecular ligand binding, enzyme kinetics, enzyme reaction mechanisms, and whole-cell biocatalysis. Topics include the quantitative description of steady state and pre-steady state enzyme kinetics, the effects of mass transfer on enzyme and whole-cell biocatalysis, and analytical methods to study enzyme kinetics and protein-ligand binding interactions.

CEE 249 Integration of Computational and Experimental Biology 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005B; MATH 010B, MATH 046, PHYS 040C or PHYS 040HC; graduate standing. BIEN 249/CEE 249 online section: enrollment in the Online Master-in-Science in Engineering program. A multidisciplinary introduction to computational methods used to analyze experimental biological data. Introduction to mathematical concepts needed to understand protein structure and dynamics, protein-protein interactions (structures and networks), gene regulatory networks, signal transduction networks, metabolic networks, and kinetic modeling of cellular processes. Also covers techniques used to derive experimental data. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with BIEN 249.

CEE 250 Special Topics in Chemical and Environmental Engineering 1 or 2 Seminar, 1 or 2 hours. Prerequisite(s): graduate standing. Seminar in selected topics in chemical and environmental engineering presented by graduate students, staff, faculty, and invited speakers. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CEE 251 Microbial Engineering and Environmental Biotechnology 1 or 2 Seminar, 1 or 2 hours. Prerequisite(s): graduate standing. Discusses the recent development of novel biocatalysts and biological materials for degrading toxic pollutants or synthesizing environmentally friendly chemicals. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CEE 253 Biodegradation and Bioremediation 1 or 2 Seminar, 1 or 2 hours. Prerequisite(s): graduate standing. Reviews current research. Special emphasis is placed on biological techniques for air pollution control, bioremediation of methyl tert-butyl ether, and molecular techniques for microorganism monitoring. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable.

CEE 254 Organic Electronic Materials 2 Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. A study of design, synthesis, purification, manufacture, and application of carbon-based electronic materials. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. Cross-listed with CHEM 267.

CEE 255 Special Topics in Water Quality Engineering 1 or 2 Seminar, 1 or 2 hours. Prerequisite(s): graduate standing. Involves reports and discussion by students, faculty, and visiting scholars on current research topics in water quality engineering. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CEE 256 Special Topics in Particulate Measurement and Air Quality 1 or 2 Seminar, 1 or 2 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on the application of nanotechnology for further developments in bioengineering and medicine. Students complete presentations on the latest developments in nanotechnology. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CEE 257 Special Topics of Bio-Nanotechnology 1 to 2 Seminar, 1 hour; consultation, 0 to 1 hour. Prerequisite(s): graduate standing or consent of instructor. Involves oral presentations and intensive small-group discussions of current literature on biological detoxification of hazardous chemicals and biological-based sensors for environmental, clinical, food quality, and process monitoring. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CEE 258 Biosensing and Biodetoxification 1 or 2 Seminar, 1 or 2 hours. Prerequisite(s): graduate standing. Involves oral presentations and intensive small-group discussions of current literature on biological detoxification of hazardous chemicals and biological-based sensors for environmental, clinical, food quality, and process monitoring. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CEE 259 Special Topics in Materials Electrochemistry 1 Seminar, 1 hour. Prerequisite(s): graduate standing. Topics include nanoelectrochemical systems, electrochemistry, bioelectrochemistry, magnetic materials, spintronics, microelectromechanical systems/nanoelectromechanical systems (MEMS/NEMS), nanosensor arrays, nanoelectronics, corrosion, fuel cells, batteries, thermoelectric materials, electroenzymology, electrodeposition, electroless deposition, and synthesis of nanowires and nanotubes. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable.
CEE 260 Structural Ordering in Colloidal Dispersions 1 or 2 Seminar, 1 or 2 hours. Prerequisite(s): graduate standing. Introduces recent advances in understanding intercolloid forces and self-assembly of colloidal particles for the fabrication of new materials. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CEE 261 Special Topics in Zeolites, Fuel Cells, and Nanostructured Materials 1 or 2 Seminar, 1 or 2 hours. Prerequisite(s): graduate standing. Covers design, synthesis, and engineering of zeolite thin films for applications in semiconductors and in aerospace; development of fuel cell membranes and electrode catalysts and production of hydrogen; and synthesis and manipulation of nanomaterials. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CEE 262 Special Topics in Systems Biology 1 or 2 Seminar, 1 or 2 hours. Prerequisite(s): graduate standing. Consists of oral presentations and intense small-group discussions of the current literature and research on computational and experimental aspects of systems biology. Explores high-throughput experiments, experimental design, numerical methods, model development, written and oral presentation skills, ethics, and laboratory techniques. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CEE 263 Membrane Separations 2 Seminar, 2 hours. Prerequisite(s): graduate standing in Chemical and Environmental Engineering or consent of instructor. Covers theoretical and applied concepts of membrane separation processes. Topics may include basic membrane transport theory, membrane materials and formation processes, advanced colloidal and surface chemistry, Derjaguin-Landau-Verwey-Overbeek (DLVO) theory on colloid stability, colloidal hydrodynamics, and transport in porous media. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CEE 265 Special Topics in Microbial Fate and Transport in Aquatic Environments 1 or 2 Seminar, 1 hour; individual study, 0 to 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores the theoretical and applied research currently being conducted in the area of microbial pathogen transport in natural and engineered aquatic systems. Topics include the theory of colloid transport and filtration, quantification and analysis of microbial adhesion or deposition kinetics, and whole-cell and molecular-scale microbial analysis techniques. Students who give class presentations receive credit for 2 units; other students receive credit for 1 unit. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CEE 266 Special Topics in Biological Conversion of Biomass 1 or 2 Seminar, 1 hour; individual study, 0 to 3 hours. Prerequisite(s): graduate standing. Consists of oral presentations and small group discussions of current and historic literature on biological conversion of biomass to fuels and chemicals. Students who make presentations receive credit for 2 units; other students receive credit for 1 unit. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CEE 267 Special Topics in Biomass Utilization 2 Seminar, 2 hours. Prerequisite(s): graduate standing. Topics may include the theory of colloid transport and filtration, quantification and analysis of microbial adhesion or deposition kinetics, and whole-cell and molecular-scale microbial analysis techniques. Students who give class presentations receive credit for 2 units; other students receive credit for 1 unit. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CEE 268 Special Topics in Environmental Chemistry 2 Seminar, 2 hours. Prerequisite(s): graduate standing. Addresses the key role that environmental chemical processes play in water quality, pollutant fate, and the development of strategies for the treatment and reuse of contaminated natural resources. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 18 units.

CEE 269 Special Topics in Aerosols and Climate 2 Seminar, 2 hours. Prerequisite(s): graduate standing. Introduces research at the interface of particle air quality and climate. Focuses on the effects of particle formation and composition on climate. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable.

CEE 270 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor. Research conducted under the supervision of a faculty member on selected problems in chemical and environmental engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

CEE 271 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor. Research conducted under the supervision of a faculty member on selected problems in chemical and environmental engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

CEE 272 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor. Research conducted under the supervision of a faculty member on selected problems in chemical and environmental engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

CEE 273 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor. Research conducted under the supervision of a faculty member on selected problems in chemical and environmental engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

CEE 274 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor. Research conducted under the supervision of a faculty member on selected problems in chemical and environmental engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

CEE 275 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor. Research conducted under the supervision of a faculty member on selected problems in chemical and environmental engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

CEE 276 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor. Research conducted under the supervision of a faculty member on selected problems in chemical and environmental engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

CEE 277 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor. Research conducted under the supervision of a faculty member on selected problems in chemical and environmental engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

CEE 278 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor. Research conducted under the supervision of a faculty member on selected problems in chemical and environmental engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

CEE 279 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor. Research conducted under the supervision of a faculty member on selected problems in chemical and environmental engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

CEE 280 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor. Research conducted under the supervision of a faculty member on selected problems in chemical and environmental engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

CEE 281 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor. Research conducted under the supervision of a faculty member on selected problems in chemical and environmental engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

CEE 282 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor. Research conducted under the supervision of a faculty member on selected problems in chemical and environmental engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

CEE 283 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor. Research conducted under the supervision of a faculty member on selected problems in chemical and environmental engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

CEE 284 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor. Research conducted under the supervision of a faculty member on selected problems in chemical and environmental engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.
Chemistry

Subject abbreviation: CHEM
College of Natural and Agricultural Sciences

Leonard J. Mueller, Ph.D., Chair
Chia-En A. Chang, Ph.D., Vice Chair
Department Office, 248 Chemical Sciences
(951) 827-3789; chem.ucr.edu

Distinguished Professors
Pingyun Feng, Ph.D.
Michael Pirrung, Ph.D.
Richard Schrock, Ph.D.
Kathryn Uhlich, Ph.D.
Yinsheng Wang, Ph.D.
Francisco Zarea, Ph.D.

Professors
Christopher J. Bardeen, Ph.D.
Ludwig Bartels, Ph.D.
Gregory J.O. Beran, Ph.D.
Chia-En A. Chang, Ph.D.
Quan “Jason” Cheng, Ph.D.
Boniface Fokwa, Ph.D.
Richard Hooley, Ph.D.
Ryan Julian, Ph.D.
Vincent Lavallo, Ph.D.
Leonard J. Mueller, Ph.D.
Christopher Y. Switzer, Ph.D.
Yadong Yin, Ph.D.
Jingsong Zhang, Ph.D.
Wenwan Zhong, Ph.D.

Professors Emeriti
David F. Bocian, Ph.D.
Eric L. Chronister, Ph.D.
Walter J. Deal, Ph.D.
M. Mark Midland, Ph.D.
Robert C. Neuman, Jr., Ph.D.
William H. Okamura, Ph.D.
William H. Ottung, Ph.D.
Dallas L. Rabenstein, Ph.D.
Christopher A. Reed, Ph.D.
Gary W. Scott, Ph.D.
Charles L. Wilkins, Ph.D.
Richard M. Wing, Ph.D.

Associate Professors
Matthew Conley, Ph.D.
James Davies, Ph.D.
W. Hill Harman, Ph.D.
De-en Jiang, Ph.D.
Catharine Larsen, Ph.D.
Min Xue, Ph.D.
Haofei Zhang, Ph.D.

Assistant Professors
Ana Bahamonde, Ph.D.
Joseph Genereux, Ph.D.
Kevin Kou, Ph.D.
Samuel Mann, Ph.D.
William Neary, Ph.D.
Timothy Su, Ph.D.
Linlin Zhao, Ph.D.

Lecturer with Security of Employment
Matthew Casselman, Ph.D.
Jack Eichler, Ph.D.

Lecturer with Potential for Security of Employment
Joshua Hartman, Ph.D.

Cooperating Faculty
Roya Bahreini, Ph.D. (Atmospheric Science)
Shane Cybart, Ph.D. (Electrical & Computer Engineering)
Richard J. Debus, Ph.D. (Biochemistry)
Yuchen Guo, Ph.D. (Chemical & Environmental Engineering)
Boerge Hemmerling, Ph.D. (Physics & Astronomy)
Russ Hille, Ph.D. (Biochemistry)
Jocelyn G. Millar, Ph.D. (Entomology)
Gengzi Oszkán, Ph.D. (Mechanical Engineering)
Mihriz Oszkán, Ph.D. (Electrical and Computer Engineering)
Giulia Palermo, Ph.D. (Bioengineering)
Maurizio Pellecchia, Ph.D. (Biomedical Sciences)
Valentine Vullev, Ph.D. (Bioengineering)
Bryan Wong, Ph.D. (Chemical & Environmental Engineering)
Michael Zacharia, Ph.D. Distinguished Professor (Chemical & Environmental Engineering)

Major
The Department of Chemistry offers a B.S. and B.A. degree in Chemistry and a B.S. in Chemistry with a Chemical Physics option or an Environmental Chemistry option.

The B.S. program is approved by the American Chemical Society and is designed for students interested in a professionally oriented major leading most often to a career or advanced study in chemistry.

The B.A. program is designed for students who wish to obtain a broad educational background with less intensive emphasis on chemistry. In this program, students have increased ease in meeting requirements for such areas as premedical, preprofessional, or prepharmaceutical science; education; and administration. Check careers.ucr.edu.

A Chemical Physics option is available for students who wish to prepare for admission to a graduate program in chemical physics.

The Environmental Chemistry option is available for students who wish to become familiar with environmental processes and problems related to air, water, and soil, and to apply their chemical knowledge working in environmental-related areas. This option also prepares students for admission to a graduate program emphasizing environmental chemistry.

Pre-Health Science Chemistry majors in either the B.S. or B.A. programs can prepare for admission to medical, pharmacy, or dental schools by carefully planning their programs of study. Students planning to apply for post-graduate studies in the health sciences should make it a special point to consult with their Chemistry advisor early in their studies at UCR. Check hpac.ucr.edu.

Teaching Credential
Teachers in the public schools in California must have a credential approved by the State Commission on Teacher Credentialing. The credential requires an undergraduate major, baccalaureate degree, and completion of a graduate credential program such as that offered by the School of Education at UCR (see Education in this catalog and education.ucr.edu).

UCR has an approved undergraduate program for Chemistry majors who plan to get a Multiple Subjects Credential and teach in the elementary (K-6) grades. A breadth of course work is necessary, in addition to the specified requirements for the major. Students are urged to start early, preferably as freshmen, selecting courses most helpful for this career. Details and counseling on the Bridge to Teaching Program, a preparation program for the multiple subjects credential, are available in the Office of Interdisciplinary Programs, 3111 Interdisciplinary Building South (INTS), (951) 827-1584; lsnid.ucr.edu. Details and counseling on other programs are available in the School of Education and https://education.ucr.edu//teacher-education.

UCR does not yet have a state-approved undergraduate program for chemistry majors who wish to teach at the secondary level. The Teaching Credential in Science, chemistry emphasis, is required for chemistry teachers, grades 7-12. Students who plan to get this credential must take the commission’s subject-matter assessment examination and should be certain their academic program includes preparatory course work. The examination includes chemistry in depth and general science with introductory, college-level biology, chemistry, physics, and geoscience (geology, meteorology, oceanography, astronomy).

Further information about courses, requirements, and examinations can be obtained in orientation meetings and the School of Education (1124 Sproul Hall).

California Teach-Science and Mathematics Initiative (CalTeach-SMI)
California Teach-Science and Mathematics Initiative (CalTeach-SMI) has a goal of addressing the critical need of highly qualified K-12 science and mathematics teachers in California. With an economy increasingly reliant on science, technology, engineering, and mathematics (STEM) and the anticipated large scale retirement of qualified teachers, this is an essential time to explore and prepare for a career in teaching science or mathematics.

CalTeach-SMI at UCR offers undergraduate students paid/unpaid opportunities, such as the Scholar Apprentice Program, to explore STEM teaching as a career option. Through CalTeach-SMI, students receive advising and mentoring to prepare for entrance into an intern teaching credential program while diligently coordinating with academic advisors to ensure completion of STEM degree requirements. The CalTeach-SMI Resource Center provides future STEM teachers with material and financial resources which includes the National Science Foundation (NSF) Noyce Scholarship Program to promote planning and professional development towards a science/mathematics education career.

For more information about the CalTeach-SMI program, please visit smi.ucr.edu, the Resource Center at 1114 Pierce Hall, or on Facebook at facebook.com/ScienceMathInitiativeAtUcr and on Instagram at smiapu.ucr/.
Transfer Students

Students transferring to the Chemistry major must complete courses comparable to the following one-year sequences before they transfer:

1. General chemistry, equivalent to CHEM 001A or CHEM 002A, CHEM 001B or CHEM 002B, CHEM 001C or CHEM 002C, CHEM 010A or CHEM 02LA, CHEM 010B or CHEM 02LB, CHEM 010C or CHEM 02LC, each course completed with a grade of "C" or better.

2. First-year calculus, equivalent to MATH 009A, MATH 009B, MATH 009C, each course completed with a grade of "C" or better.

At least one of the following one-year sequences:

1. General physics (calculus-based) equivalent to PHYS 040A, PHYS 040B, PHYS 040C, each course completed with a grade of "C" or better (strongly recommended).

2. Second-year calculus, equivalent to MATH 010A, MATH 010B, MATH 046, each course completed with a grade of "C" or better.

3. Organic chemistry (one-year lower-division), each course completed with a grade of "B" or better.

Students must have a minimum grade point average of 2.70 in transferable college courses. UCR has articulation agreements with most of the California community colleges. These agreements list specific community college courses that have been designated as comparable to UCR courses (see the statewide articulation web site at assist.org). Transfer students will usually find it advantageous to complete most or all sequences before starting at UCR. All prospective transfers should try to complete the sequences they begin rather than divide a sequence between two campuses.

Change of Major Criteria

General requirement:

1. Students must be in good academic standing with 2.0 cumulative GPA and 2.0 upper-division chemistry major GPA.

2. Grades for all chemistry core and required lower-division math and physics courses must be "C" or better.

3. A grade of "C" or better in each of the courses used to satisfy the 20-unit CNAS Natural Science and Mathematics breadth requirement.

4. AP credit is not accepted for lower-division chemistry courses.

Specific requirement:

If student has completed less than 45 units (first year students), then

- Completion of CHEM 001A or CHEM 002A or CHEM 010A, CHEM 010B, CHEM 02LA or CHEM 01HLA, MATH 009A

If student has completed between 45 and 90 units (second year students), then

- Completion of MATH 009A, MATH 009B, MATH 009C

- Completion of CHEM 001A or CHEM 002A or CHEM 010A, CHEM 010B, CHEM 001C or CHEM 002C or CHEM 01HC, CHEM 01LA or CHEM 02LA or CHEM 01HLA, CHEM 01LB or CHEM 02LB or CHEM 01HLB, CHEM 01LC or CHEM 02LC or CHEM 01HLC and PHYS 040A or PHYS 002A and PHYS 02LA (PHYS 002A & PHYS 02LA can be used for B.A. program only)

If student has completed between 90 and 135 units (third year students), then

- Completion of all lower-division math requirements (MATH 009A, MATH 009B, MATH 009C, MATH 010A for B.A. program; and MATH 009A, MATH 009B, MATH 009C, MATH 010A, and two out of the following: MATH 010B, MATH 031, MATH 046 for B.S. program).

- Completion of the following chemistry courses (CHEM 001A or CHEM 002A, CHEM 001B or CHEM 002B, CHEM 001C or CHEM 002C, CHEM 010A or CHEM 02LA, CHEM 010B or CHEM 02LB, CHEM 010C or CHEM 02LC, CHEM 005, CHEM 008A and CHEM 08LA, CHEM 008B and CHEM 08LB, CHEM 008C and CHEM 08LC (or CHEM 08HA and CHEM 08HLA, CHEM 08HB and CHEM 08HLB, CHEM 08HC and CHEM 08HLC).

- Completion of all lower-division physics requirements (PHYS 040A, PHYS 040B, PHYS 040C or PHYS 002A, PHYS 002B, PHYS 02LA and PHYS 02LB, PHYS 02LC) (PHYS 002A, PHYS 002B, PHYS 002C and PHYS 02LA, PHYS 02LB, PHYS 02LC can be used for B.A. program only)

If student has completed more than 135 units (fourth year students), then

- Completion of all lower-division math requirements (MATH 009A, MATH 009B, MATH 009C, MATH 010A for B.A. program; and MATH 009A, MATH 009B, MATH 009C, MATH 010A, and two out of the following: MATH 010B, MATH 031, MATH 046 for B.S. program).

- Completion of all lower-division chemistry courses (CHEM 001A or CHEM 002A, CHEM 001B or CHEM 002B, CHEM 001C or CHEM 002C, CHEM 010A or CHEM 02LA, CHEM 010B or CHEM 02LB, CHEM 010C or CHEM 02LC, CHEM 005, CHEM 008A and CHEM 08LA, CHEM 008B and CHEM 08LB, CHEM 008C and CHEM 08LC (or CHEM 08HA and CHEM 08HLA, CHEM 08HB and CHEM 08HLB, CHEM 08HC and CHEM 08HLC).

- Completion of all lower-division physics requirements (PHYS 040A, PHYS 040B, PHYS 040C or PHYS 002A, PHYS 002B, PHYS 02LC) (PHYS 002A, PHYS 002B, PHYS 002C and PHYS 02LA, PHYS 02LB, PHYS 02LC can be used for B.A. program only)

University Requirements

See Undergraduate Studies section.

College Requirements

See College of Natural and Agricultural Sciences, Colleges and Programs section.

Some of the following requirements for the major may also fulfill some of the college's breadth requirements. Consult with a professional academic advisor at the CNAS Advising Center, 1223 Pierce Hall.

Major Requirements

The major requirements for the B.A. and the B.S. degree in Chemistry are as follows:

Bachelor of Arts

1. Lower-division requirements (63 units)

a) CHEM 001A or CHEM 002A, CHEM 001B or CHEM 002B, CHEM 001C or CHEM 002C, CHEM 010A or CHEM 02LA, CHEM 010B or CHEM 02LB, CHEM 010C or CHEM 02LC (or CHEM 01HA and CHEM 01LA, CHEM 01HB and CHEM 01HC and CHEM 01HLC), CHEM 005, CHEM 008A and CHEM 08LA, CHEM 008B and CHEM 08LC and CHEM 08LC (or CHEM 08HA and CHEM 08HLA, CHEM 08HB and CHEM 08HLB, CHEM 08HC and CHEM 08HLC)

b) MATH 009A, MATH 009B, MATH 009C, MATH 010A

c) PHYS 040A, PHYS 040B, PHYS 040C (or PHYS 002A, PHYS 002B, PHYS 002C, PHYS 02LA, PHYS 02LB, PHYS 02LC)

2. Upper-division requirements (36 units)

a) A minimum grade of "C" for any upper-division course used to fulfill the requirements for the B.A. degree.

a) CHEM 110A, CHEM 110B, CHEM 113, CHEM 125W, CHEM 150A, CHEM 191, and either CHEM 111 or CHEM 140 or CHEM 155 or CHEM 166

b) Ten (10) additional upper-division units

Chemistry with Education Focus Option

Students must consult with their Chemistry advisor before electing this option.

1. Lower Division Requirements (66 units)

a) CHEM 001A or CHEM 002A, CHEM 001B or CHEM 002B, CHEM 001C or CHEM 002C, CHEM 010A or CHEM 02LA, CHEM 010B or CHEM 02LB, CHEM 010C or CHEM 02LC (or CHEM 01HA, CHEM 01HB, CHEM 01HC and CHEM 01HLC), CHEM 005, CHEM 008A and CHEM 08LA, CHEM 008B and CHEM 08LB, CHEM 008C and CHEM 08LC (or CHEM 08HA and CHEM 08HLA, CHEM 08HB and CHEM 08HLB, CHEM 08HC and CHEM 08HLC)

b) MATH 009A or MATH 007A, MATH 009B or MATH 007B, MATH 009C, MATH 010A

c) PHYS 040A, PHYS 040B, PHYS 040C (or PHYS 002A and PHYS 002B, PHYS 002C and PHYS 002C, PHYS 02LC)

d) EDUC 003

2. Upper Division Requirements (41 or 42 units)

a) A minimum grade of "C" for any upper-division course used to fulfill the requirements for Chemistry with Education Focus option.

a) CHEM 110A, CHEM 110B, CHEM 113, CHEM 125W, CHEM 150A, CHEM 191, CHEM 111 or CHEM 140 or CHEM 155 or CHEM 166

b) EDUC 105, EDUC 162, and one course from EDUC 132 or EDUC 147

205
Bachelor of Science

1. Lower-division requirements (71-72 units)
   a) CHEM 001A or CHEM 002A, CHEM 001B or CHEM 002B, CHEM 001C or CHEM 002C, CHEM 01LA or CHEM 02LA, CHEM 01LB or CHEM 02LB, CHEM 01LC or CHEM 02LC (or CHEM 01HA and CHEM 1HLA, CHEM 01HB and CHEM 1HLB, CHEM 01HC and CHEM 1HLC), CHEM 005, CHEM 008A and CHEM 08LA or CHEM 08LB and CHEM 08LB, CHEM 008C and CHEM 08LC, CHEM 008H and CHEM 08HLB, CHEM 08HC and CHEM 08HLC)
   b) MATH 009A, MATH 009B, MATH 009C, MATH 010A, and two out of the following: MATH 010B, MATH 031, MATH 046
   c) PHYS 040A, PHYS 040B, PHYS 040C

2. Upper-division requirements (41-43 units)
   A minimum grade of "C-" for any upper-division course used to fulfill the requirements for the B.S. degree.
   a) CHEM 110A, CHEM 110B, CHEM 111, CHEM 113, CHEM 125W, CHEM 150A, CHEM 191
   b) Two laboratory courses from CHEM 114 or CHEM 140, CHEM 156, CHEM 166, BCH 162
   c) One course from BCH 100, BCH 110A, CHEM 143
   d) One 4-unit course from CHEM 135/ENSC 135/ENTX 135, CHEM 136/ENSC 136/ENTX 136/WSWC 136, CHEM 150B, CHEM 197, CHEM 199. CHEM 197 and CHEM 199 must be taken for a grade and a written report submitted.

Chemical Physics Option

Students must consult with their Chemistry advisor before electing this option.

1. Lower-division requirements (71 units)
   a) CHEM 001A or CHEM 002A, CHEM 001B or CHEM 002B, CHEM 001C or CHEM 002C, CHEM 01LA or CHEM 02LA, CHEM 01LB or CHEM 02LB, CHEM 01LC or CHEM 02LC (or CHEM 01HA and CHEM 1HLA, CHEM 01HB and CHEM 1HLB, CHEM 01HC and CHEM 1HLC), CHEM 005, CHEM 008A and CHEM 08LA or CHEM 08LB and CHEM 08LB, CHEM 008C and CHEM 08LC, CHEM 008H and CHEM 08HLB, CHEM 08HC and CHEM 08HLC)
   b) MATH 009A, MATH 009B, MATH 009C, MATH 010A, and two of the following: MATH 010B, MATH 031, MATH 046
   c) PHYS 040A, PHYS 040B, PHYS 040C

2. Upper-division requirements (49-50 units)
   A minimum grade of "C-" for any upper-division course used to fulfill the requirements for the Environmental Chemistry option.
   a) CHEM 110A, CHEM 110B, CHEM 111, CHEM 125W, CHEM 135/ENSC 135/ENTX 135, CHEM 136/ENSC 136/ENTX 136/WSWC 136, CHEM 114 or CHEM 140, CHEM 150A, CHEM 191
   b) One course from ENSC 104/WSWC 104 or GEO 137
   c) One course from BCH 100, BCH 110A or CHEM 143
   d) Two additional courses from CHEM 113, CHEM 150B, CHEM 155, CHEM 166, CHEM 197, CHEM 199, ENSC 100, ENSC 101, ENSC 102, ENSC 140/WSWC 140, ENSC 163, ENSC 171, GEO 132, GEO 157 (4 units total allowed)

Environmental Chemistry Option

Students must consult with their Chemistry advisor before electing this option.

1. Lower-division requirements (71 units)
   a) CHEM 001A or CHEM 002A, CHEM 001B or CHEM 002B, CHEM 001C or CHEM 002C, CHEM 01LA or CHEM 02LA, CHEM 01LB or CHEM 02LB, CHEM 01LC or CHEM 02LC (or CHEM 01HA and CHEM 1HLA, CHEM 01HB and CHEM 1HLB, CHEM 01HC and CHEM 1HLC), CHEM 005, CHEM 008A and CHEM 08LA, CHEM 008B and CHEM 08LB, CHEM 008C and CHEM 08LC, CHEM 008H and CHEM 08HLB, CHEM 08HC and CHEM 08HLC)
   b) MATH 009A, MATH 009B, MATH 009C, MATH 010A, MATH 010B, MATH 046
   c) PHYS 040A, PHYS 040B, PHYS 040C
   d) BIOL 005A, BIOL 051A, or BIOL 052, BIOL 005B, BIOL 005C

2. Upper-division requirements (49-50 units)
   A minimum grade of "C-" for any upper-division course used to fulfill the requirements for the Environmental Chemistry option.
   a) CHEM 110A, CHEM 110B, CHEM 111, CHEM 125W, CHEM 135/ENSC 135/ENTX 135, CHEM 136/ENSC 136/ENTX 136/WSWC 136, CHEM 114 or CHEM 140, CHEM 150A, CHEM 191
   b) One course from ENSC 104/WSWC 104 or GEO 137
   c) One course from BCH 100, BCH 110A or CHEM 143
   d) Two additional courses from CHEM 113, CHEM 150B, CHEM 155, CHEM 166, CHEM 197, CHEM 199, ENSC 100, ENSC 101, ENSC 102, ENSC 140/WSWC 140, ENSC 163, ENSC 171, GEO 132, GEO 157 (4 units total allowed)

Chemistry with Education Focus Option

Students must consult with their Chemistry advisor before electing this option.

1. Lower Division Requirements (74–75 units)
   a) CHEM 001A or CHEM 002A, CHEM 001B or CHEM 002B, CHEM 001C or CHEM 002C, CHEM 01LA or CHEM 02LA, CHEM 01LB or CHEM 02LB, CHEM 01LC or CHEM 02LC (or CHEM 01HA and CHEM 1HLA, CHEM 01HB and CHEM 1HLB, CHEM 01HC and CHEM 1HLC), CHEM 005, CHEM 008A and CHEM 08LA, CHEM 008B and CHEM 08LB, CHEM 008C and CHEM 08LC, CHEM 008H and CHEM 08HLB, CHEM 08HC and CHEM 08HLC)
   b) MATH 009A, MATH 009B, MATH 009C, MATH 010A, MATH 010B, MATH 046
   c) PHYS 040A, PHYS 040B, PHYS 040C

2. Upper Division Requirements (53–55 units)
   A minimum grade of "C-" for any upper-division course used to fulfill the requirements for the Chemistry with Education Focus option.
Sample Program

Student programs are planned on an individual basis with their advisors, and there is considerable flexibility in the sequence in which courses required for the major are taken. For example, PHYS 040A, PHYS 040B, PHYS 040C can be started equally well during either the freshman or sophomore year. The sample program is typical for a well-prepared entering freshman who seeks the B.S. degree.

Minor

The minor in Chemistry consists of 21 upper-division units in chemistry.

1. Of the specified upper-division units, a minimum of 16 units must be unique to the minor and may not be used to satisfy major requirements.
2. At least one the courses used to satisfy the 21 units must be in CHEM 125, CHEM 111, CHEM 140, CHEM 155 or CHEM 166 (courses which include laboratory work).
3. No more than 8 units of 190-199 courses may be used in fulfilling the upper-division units for a minor.

Of the upper-division courses in chemistry there is considerable flexibility in the sequence in which they are taken. Any combination of courses required for the major are taken, and most have CHEM 005 as a prerequisite. Students with a minor in Chemistry should consult their Chemistry advisor to construct a specific program consistent with their career goals.

See Minors under the College of Natural and Agricultural Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Graduate Program

The Chemistry Department offers the M.S. and Ph.D. degrees in Chemistry. Fields of specialization (subdisciplines) are analytical chemistry, inorganic chemistry, organic chemistry, and physical chemistry. Research is also carried out in bioanalytical, bioinorganic, and biophysical chemistry and in chemical physics, environmental/atmospheric, organometallic chemistry, and neuroscience. For additional information on the latter, please see Neuroscience Graduate Program in the Programs and Courses section of this catalog.

Admission

The department normally considers applications for teaching and research assistantships at the same time as fellowships; therefore, students are strongly encouraged to complete their applications for admission and support as early as possible. Normally applications for fellowships are awarded by February for students entering in the following fall quarter. Although most students begin in the fall quarter, students may begin their studies in the winter or spring quarter.

Orientation Examinations

Admitted students must, at the beginning of their first quarter in residence, take orientation examinations. The examinations are normally given during two consecutive days starting up to one week prior to the first day of instruction. Although a notice of the times and places of these examinations is sent to each student admitted to regular graduate status in chemistry, it is the student’s responsibility to be on the campus early enough to check the bulletin boards in Chemical Sciences for this information. Students take these examinations in the four subdisciplines: analytical, inorganic, organic, and physical chemistry. The purpose of these examinations is to assess the student’s undergraduate preparation. The results permit the faculty to determine the course program that will most effectively aid the students’ development in their chosen subdisciplines.

Master’s Degree

The Department of Chemistry offers the M.S. degree in Chemistry. The requirements are:

1. Satisfactory performance in orientation examinations in analytical, inorganic, organic, and physical chemistry
2. General university requirements and departmental requirements for either Plan I or Plan II.

Plan I (Thesis)

Students must take at least 36 units of approved courses and graduate research of which five regular lecture courses in the CHEM 200-249 series (CHEM 110A or CHEM 110B, CHEM 113, CHEM 125, and CHEM 150A or CHEM 150B may apply under certain circumstances). A maximum of 12 units of seminar courses (CHEM 250-259) and a maximum of 12 units of graduate research (but not those numbered CHEM 260-289) may apply towards the 36 units. Students must complete a thesis, and a final oral examination on the thesis may be required.

A final oral examination will occur in an in-person format by default, with the student and all committee members physically present in the exam room. If one or more participants is unable to attend an in-person exam within the appropriate time frame, some or all participants may attend remotely via video conferencing software. The decision to adopt a remote or hybrid exam modality should be mutually agreed upon by the committee chair and the student, and the student must notify the Graduate Advisor of the change prior to the exam. If the exam participants cannot reach a consensus regarding the exam modality, the Graduate Advisor will arbitrate the modality.

Plan II (Comprehensive Examination)

Students must complete at least 36 units of approved courses of which at least 18 must be in regular lecture courses numbered CHEM 200-249 (CHEM 110A or CHEM 110B, CHEM 113, CHEM 125, and CHEM 150A or CHEM 150B may apply under certain circumstances). A maximum of 12 units of seminar courses (CHEM 250-259) and up to 12 units of graduate research courses numbered CHEM 250-259. Those numbered CHEM 260-289 are specifically excluded.

Normative Time to Degree

6 quarters
Doctoral Degree
The Department of Chemistry offers the Ph.D. degree in Chemistry.

The requirements are orientation examinations in analytical, inorganic, organic, and physical chemistry; general university requirements; and departmental requirements.

Program of Study
The departmental committee on graduate study determines a program of study on the basis of the students’ performance on the orientation examinations and a consideration of their subdisciplines. For students with a normal B.S. level preparation, the typical course pattern involves five courses selected from CHEM 200-249. If a student does not pass at least two of the four orientation exams, a sixth course selected from CHEM 200-249 will be required.

Professional Development Training
1. All students must take 1 quarter of CHEM 401 (Professional Development in Chemistry).
2. All students must take 1 quarter of CHEM 402 (Chemical Laboratory Safety).
3. Each quarter, all students in residence must enroll in:
   - CHEM 250 (Graduate Seminar in Chemistry) and one from the following list based on the student’s subdiscipline:
     - CHEM 251 (Graduate Seminar in Analytical Chemistry)
     - CHEM 252 (Graduate Seminar in Inorganic Chemistry)
     - CHEM 253 (Graduate Seminar in Organic Chemistry)
     - CHEM 254 (Graduate Seminar in Physical Chemistry)

Second Year Research Evaluation
Students seeking advancement to candidacy for the Ph.D. degree must undergo a Second-Year Research Evaluation (SYRE) by the end of the student’s fourth quarter of residency. This examination consists in writing a proposal based on the student’s dissertation research and defending it before a committee of faculty members. The SYRE is designed to test the student’s development as a researcher and provide feedback to the student about the progress toward candidacy. A negative outcome on the SYRE notifies the student that significant improvements will be required to pass the qualifying exam, but it does not directly impact the student’s academic standing.

Oral Qualifying Examination
This examination consists in part of defending an original proposition and is designed to test the extent of the candidates’ development and their breadth of knowledge in chemistry and related fields.

Dissertation and Final Oral Examination
After completing the dissertation research, students must submit a written copy of the dissertation for approval by the student’s dissertation committee. The dissertation research is then defended in a formal, public seminar presentation, followed by questioning of the candidate by the dissertation committee.

Modality for the Second-Year Research Evaluation, Oral Qualifying Exam, and Final Oral Examination
By default, the Second-Year Research Evaluation (SYRE), oral qualifying exam, and final oral examination will occur in an in-person format, with the student and all committee members physically present in the exam room. If one or more participants is unable to attend an in-person exam within the appropriate time frame, some or all participants may attend remotely via video conferencing software. The decision to adopt a remote or hybrid exam modality should be mutually agreed upon by the committee chair and the student, and the student must notify the Graduate Advisor of the change prior to the exam. If the exam participants cannot reach a consensus regarding the exam modality, the Graduate Advisor will arbitrate the modality.

Students must complete at least six quarters in residence in the UC with a GPA of 3.00 or better in all 100- and 200-level course work related to the degree.

Teaching Requirement
Normally requires three quarters of service as a teaching assistant, or equivalent.

Normative Time to Degree
15 quarters

Lower-Division Courses
CHEM 001 Preparation For General Chemistry
2 Lecture, 2 hours. Prerequisite(s): none. Provides problem-solving methods to succeed in general chemistry. Offered online only. Graded Satisfactory (S) or No Credit (NC). Credit is awarded for one of the following CHEM 001 or CHEM 001W. Credit is not awarded to CHEM 001 if credit has been awarded to CHEM 002A.

CHEM 001A General Chemistry
4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): concurrent enrollment in CHEM 01A; MATH 005A with a grade of C- or better or MATH 006A with a grade of C- or better or CHEM 01W with a grade of S or better or CHEM 001 with a grade of S or better or MATH 007A with a grade of C- or better or MATH 009A with a grade of C- or better or MATH 009B with a grade of C- or better or MATH 009C with a grade of C- or better or MATH 009 with a grade of B or better or CHEM 02LA with a grade of B or better or MATH 007B with a grade of C- or better or MATH 009B with a grade of C- or better or MATH 009 with a grade of B or better or MATH 006A with a grade of C- or better or MATH 006B with a grade of C- or better or MATH 006C with a grade of C- or better or MATH 006 with a grade of B or better or MATH 007A with a grade of C- or better or MATH 009A with a grade of C- or better or MATH 009B with a grade of C- or better or MATH 009 with a grade of B or better or MATH 006A with a grade of C- or better or MATH 006B with a grade of C- or better or MATH 006C with a grade of C- or better or MATH 006 with a grade of B or better or MATH 007A with a grade of C- or better or MATH 009A with a grade of C- or better or MATH 009B with a grade of C- or better or MATH 009 with a grade of B or better.

CHEM 001B General Chemistry
4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): concurrent enrollment in CHEM 01B; CHEM 001A with a grade of C- or better, CHEM 01LA with a grade of C- or better or CHEM 01HA with a grade of C- or better, CHEM 01LAH with a grade of C- or better or CHEM 002A with a grade of C- or better, CHEM 02LA with a grade of C- or better. An introduction to the basic principles of chemistry. Provides lectures either in person or in a virtual online environment, depending on section offerings. Credit is awarded for one of the following CHEM 001B, CHEM 002B, or CHEM 01HB.

CHEM 001C General Chemistry
4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): concurrent enrollment in CHEM 01LC; CHEM 001B with a grade of C- or better or CHEM 01HB with a grade of C- or better, CHEM 01LB with a grade of C- or better or CHEM 1HLB with a grade of C- or better or CHEM 002B with a grade of C- or better, CHEM 02LB with a grade of C- or better. An introduction to the basic principles of chemistry. Provides lectures either in person or in a virtual online environment, depending on section offerings. Credit is awarded for one of the following CHEM 001C, CHEM 002C, or CHEM 01HC.

CHEM 01HA Honors General Chemistry
4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): concurrent enrollment in CHEM 1HLA; MATH 007A, may be taken concurrently or MATH 009A, may be taken concurrently or MATH 09HA, may be taken concurrently or MATH 007B or MATH 009B or MATH 09HB; or equivalent or a score of 4 or 5 on the College Board Advance Placement Chemistry Examination; a score of 600 or higher on the Mathematics portion of the SAT Reasoning Test or a score of 25 or higher on the ACT Mathematics Test; high school chemistry; or consent of instructor. Honors course corresponding to CHEM 001A. Covers the principles of chemistry in greater depth than in CHEM 001A. A limited enrollment course. Satisfactory (S) or No Credit (N/C) is not available. Credit is awarded for one of the following CHEM 01HA, CHEM 001A, or CHEM 002A.

CHEM 01HB Honors General Chemistry
4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): concurrent enrollment in CHEM 1HLB; CHEM 001A with a grade of B or better or CHEM 01HA with a grade of B or better or CHEM 01LA with a grade of B or better or CHEM 1HLA with a grade of B or better or CHEM 02LA with a grade of B or better or MATH 007B with a grade of C- or better or MATH 009B with a grade of C- or better or MATH 009 with a grade of B or better or MATH 006A with a grade of C- or better or MATH 006B with a grade of C- or better or MATH 006C with a grade of C- or better or MATH 006 with a grade of B or better or MATH 007A with a grade of C- or better or MATH 009A with a grade of C- or better or MATH 009B with a grade of C- or better or MATH 009 with a grade of B or better.

CHEM 01HC Honors General Chemistry
4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): concurrent enrollment in CHEM 1LHC; CHEM 001B with a grade of B or better or CHEM 01HB with a grade of B or better or CHEM 002B with a grade of C- or better; CHEM 01LB or CHEM 1LHB or CHEM 02LB; admission to University Honors. Honors course corresponding to CHEM 001B. Covers the principles of chemistry in more depth than in CHEM 001B. A limited enrollment course. Satisfactory (S) or No Credit (N/C) is not available. Credit is awarded for one of the following CHEM 01HB, CHEM 001B, or CHEM 002B.

CHEM 01HC Honors General Chemistry
4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): concurrent enrollment in CHEM 1LHC; CHEM 001B with a grade of B or better or CHEM 01HB with a grade of B or better or CHEM 002B with a grade of C- or better; CHEM 01LB or CHEM 1LHB or CHEM 02LB; admission to University Honors. Honors course corresponding to CHEM 001B. Covers the principles of chemistry in more depth than in CHEM 001C. A limited enrollment course. Satisfactory (S) or No Credit (N/C) is not available. Credit is awarded for one of the following CHEM 01HC, CHEM 001C, or CHEM 002C.
CHEM 1HLA Honors General Chemistry Laboratory 1 Laboratory, 3 hours. Prerequisite(s): concurrent enrollment in CHEM 01HA; MATH 009A, may be taken concurrently or MATH 009B, may be taken concurrently or MATH 09HA, may be taken concurrently or MATH 007A, may be taken concurrently or MATH 007B, may be taken concurrently or MATH 009C, may be taken concurrently or CHEM 001 or CHEM 001W; admission to University Honors. Honors course corresponding to CHEM 01LA. An introduction to laboratory principles and techniques related to lecture topics in CHEM 01HA. Satisfactory(S) or No Credit(N/C) is not available. Credit is awarded for one of the following CHEM 1HLA, CHEM 01LA, or CHEM 02LA.

CHEM 1HLB Honors General Chemistry Laboratory 1 Laboratory, 3 hours. Prerequisite(s): concurrent enrollment in CHEM 01HB; CHEM 001A with a grade of B or better, CHEM 01LA with a grade of B or better or CHEM 01HA with a grade of B or better, CHEM 1HLA with a grade of B or better or CHEM 002A with a grade of B or better, CHEM 01LB with a grade of B or better; admission to University Honors. Honors course corresponding to CHEM 01LB. An introduction to laboratory principles and techniques related to lecture topics in CHEM 01HB. Satisfactory(S) or No Credit(N/C) is not available. Credit is awarded for one of the following CHEM 1HLB, CHEM 01LB, or CHEM 02LB.

CHEM 1HLC Honors General Chemistry Laboratory 1 Laboratory, 3 hours. Prerequisite(s): concurrent enrollment in CHEM 01HC; CHEM 001A with a grade of B or better or CHEM 01LB with a grade of B or better or CHEM 002B; CHEM 01LB or CHEM 1HLB or CHEM 02LB; admission to University Honors. Honors course corresponding to CHEM 01LC. An introduction to laboratory principles and techniques related to lecture topics in CHEM 01HC. Satisfactory(S) or No Credit(N/C) is not available. Credit is awarded for one of the following CHEM 1HLC, CHEM 01LC, or CHEM 02LC.

CHEM 01LA General Chemistry Laboratory 1 Laboratory, 3 hours. Prerequisite(s): concurrent enrollment in CHEM 001A; MATH 005A with a grade of C- or better or MATH 006A with a grade of C- or better or MATH 007A with a grade of C- or better or MATH 007B with a grade of C- or better or MATH 009A with a grade of C- or better or MATH 009B with a grade of C- or better or MATH 009C with a grade of C- or better; or a score of 3, 4, or 5 on the College Board Advanced Placement Calculus Examination or a passing score on the California Chemistry Diagnostic Test or a score on the Mathematics Advisory Exam sufficient for placement in MATH 009A, restricted to major(s) Chemistry. An introduction to basic principles of chemical reactions, stoichiometry, and stoichiometry. Designed for Chemistry majors. Credit is awarded for one of the following CHEM 01LA, CHEM 01LC, or CHEM 02LC.

CHEM 01LB General Chemistry Laboratory 1 Laboratory, 3 hours. Prerequisite(s): concurrent enrollment in CHEM 001B; CHEM 001A with a grade of C- or better or CHEM 01HA with a grade of C- or better or CHEM 01LA with a grade of C- or better or CHEM 1HLA with a grade of C- or better or CHEM 02LA with a grade of C- or better or CHEM 02LB with a grade of C- or better or CHEM 002A with a grade of C- or better or CHEM 002B; CHEM 01LB or CHEM 1HLB or CHEM 02LB. An introduction to laboratory principles and techniques related to lecture topics in CHEM 001B. Credit is awarded for one of the following CHEM 01LB, CHEM 02LB, or CHEM 1HLB.

CHEM 01LC General Chemistry Laboratory 1 Laboratory, 3 hours. Prerequisite(s): concurrent enrollment in CHEM 001C; CHEM 001B with a grade of C- or better or CHEM 01HB with a grade of C- or better or CHEM 01LC with a grade of C- or better or CHEM 002B; CHEM 01LB or CHEM 1HLB or CHEM 02LB. An introduction to laboratory principles and techniques related to lecture topics in CHEM 001C. Credit is awarded for one of the following CHEM 01LC, CHEM 02LC, or CHEM 1HLC.

CHEM 02A General Chemistry For Chemistry Majors 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): concurrent enrollment in CHEM 002B; CHEM 002A with a grade of C- or better or CHEM 002A with a grade of C- or better or MATH 009A with a grade of C- or better or MATH 009B with a grade of C- or better or MATH 009C with a grade of C- or better or MATH 009B with a grade of C- or better or MATH 009A with a grade of C- or better or MATH 009B with a grade of C- or better or MATH 009C with a grade of C- or better or a score of 3, 4, or 5 on the College Board Advanced Placement Calculus Examination or a passing score on the California Chemistry Diagnostic Test or a score on the Mathematics Advisory Exam sufficient for placement in MATH 009A; restricted to major(s) Chemistry. An introduction to the basic principles of chemistry focusing on the properties of liquids and gases as well as thermodynamics and kinetics of chemical reactions. Credit is awarded for one of the following CHEM 002B, CHEM 001B, or CHEM 01HB.

CHEM 02B General Chemistry For Chemistry Majors 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): concurrent enrollment in CHEM 02LB; CHEM 002A with a grade of C- or better, CHEM 02LA with a grade of C- or better or CHEM 001A with a grade of C- or better, CHEM 01LA with a grade of C- or better or CHEM 01HA with a grade of C- or better, CHEM 01LA with a grade of C- or better, CHEM 01LA with a grade of C- or better; restricted to major(s) Chemistry. An introduction to the basic principles of chemistry focusing on the properties of liquids and gases as well as thermodynamics and kinetics of chemical reactions. Credit is awarded for one of the following CHEM 002B, CHEM 001B, or CHEM 01HB.

CHEM 02C General Chemistry For Chemistry Majors 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): concurrent enrollment in CHEM 02LC; CHEM 002B with a grade of C- or better, CHEM 02LB with a grade of C- or better or CHEM 001B with a grade of C- or better, CHEM 01LB with a grade of C- or better, CHEM 01LB with a grade of C- or better, CHEM 01BLC with a grade of C- or better, CHEM 01LB with a grade of C- or better; restricted to major(s) Chemistry. An introduction to the basic principles of chemistry focusing on chemical equilibrium, acid-base reactions, and that the student's college permits, as alternatives to English 001C. Graded Satisfactory(S) or No Credit (NC). Credit is awarded for one of the following CHEM 01LC, CHEM 02LC, or CHEM 1HLC.

CHEM 02LA General Chemistry Laboratory For Chemistry Majors 1 Laboratory, 3 hours. Prerequisite(s): concurrent enrollment in CHEM 002A; MATH 006B with a grade of C- or better or MATH 009A with a grade of C- or better or MATH 009B with a grade of C- or better or MATH 009C with a grade of C- or better or MATH 009C with a grade of C- or better or MATH 009A with a grade of C- or better; or a score of 3, 4, or 5 on the College Board Advanced Placement Calculus Examination or a passing score on the California Chemistry Diagnostic Test or a score on the Mathematics Advisory Exam sufficient for placement in MATH 009A; restricted to major(s) Chemistry. An introduction to laboratory principles and techniques related to lecture topics in CHEM 002A. Credit is awarded for one of the following CHEM 02LA, CHEM 01LA, or CHEM 1HLC.

CHEM 02LB General Chemistry Laboratory For Chemistry Majors 1 Laboratory, 3 hours. Prerequisite(s): concurrent enrollment in CHEM 002B; CHEM 002A with a grade of C- or better, CHEM 02LA with a grade of C- or better or CHEM 001A with a grade of C- or better, CHEM 01LA with a grade of C- or better or CHEM 001B with a grade of C- or better or CHEM 01LB with a grade of C- or better or CHEM 01KH with a grade of C- or better, CHEM 01LA with a grade of C- or better, CHEM 01LB with a grade of C- or better or CHEM 002B with a grade of C- or better or CHEM 002A with a grade of C- or better or MATH 009B with a grade of C- or better or MATH 009C with a grade of C- or better or MATH 009A with a grade of C- or better; or a score of 3, 4, or 5 on the College Board Advanced Placement Calculus Examination or a passing score on the California Chemistry Diagnostic Test or a score on the Mathematics Advisory Exam sufficient for placement in MATH 009A; restricted to major(s) Chemistry. An introduction to laboratory principles and techniques related to lecture topics in CHEM 002B. Designed for Chemistry Majors. Credit is awarded for one of the following CHEM 02LB, CHEM 01LB, or CHEM 1HLC.

CHEM 02LC General Chemistry Laboratory For Chemistry Majors 1 Laboratory, 3 hours. Prerequisite(s): concurrent enrollment in CHEM 002C; CHEM 002B with a grade of C- or better, CHEM 02LB with a grade of C- or better or CHEM 001C with a grade of C- or better, CHEM 01LC with a grade of C- or better or CHEM 01HC with a grade of C- or better, CHEM 01LC with a grade of C- or better or CHEM 002C with a grade of C- or better or CHEM 002B with a grade of C- or better; restricted to major(s) Chemistry. An introduction to laboratory principles and techniques related to lecture topics in CHEM 002C. Designed for Chemistry majors. Credit is awarded for one of the following CHEM 02LC, CHEM 01LC, or CHEM 1HLC.
CHEM 003 Concepts of Chemistry 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. A survey of basic concepts of Chemistry. Designed for non-science majors and not as preparation for CHEM 001A or CHEM 01HA. Not open to students with credit for CHEM 001A or CHEM 01HA, but students who have completed CHEM 003 may take CHEM 001A or CHEM 01HA for full credit.

CHEM 005 Quantitative Analysis 5
Lecture, 3 hours; laboratory, 8 hours. Prerequisite(s): CHEM 001C with a grade of C- or better, CHEM 01LC with a grade of C- or better or CHEM 01HC with a grade of C- or better, CHEM 1HLC with a grade of C- or better or CHEM 002C with a grade of C- or better, CHEM 02LC with a grade of C- or better. Covers stoichiometric calculations and applications of principles of chemical equilibrium to analytical problems. Includes titrimetric and gravimetric laboratory procedures.

CHEM 008A Organic Chemistry 3
Lecture, 3 hours. Prerequisite(s): concurrent enrollment in CHEM 08LA; CHEM 001C with a grade of C- or better, CHEM 01LC with a grade of C- or better or CHEM 01HC with a grade of C- or better, CHEM 1HLC with a grade of C- or better or CHEM 002C with a grade of C- or better, CHEM 02LC with a grade of C- or better. Covers modern organic chemistry including structural determination via spectroscopic analysis, reaction mechanisms and multistep organic synthesis. Satisfactory(S) or No Credit(N/C) is not available. Credit is awarded for one of the following CHEM 008A or CHEM 008B.

CHEM 008B Organic Chemistry 3
Lecture, 3 hours. Prerequisite(s): concurrent enrollment in CHEM 08LA; CHEM 008A with a grade of C- or better, CHEM 08LB with a grade of C- or better or CHEM 08LA with a grade of C- or better, CHEM 02LC with a grade of C- or better. Covers modern organic chemistry including hydrocarbon structure and nomenclature, stereochemistry, and reaction mechanisms. Satisfactory(S) or No Credit(N/C) is not available. Credit is awarded for one of the following CHEM 008A or CHEM 008B.

CHEM 08HC Honors Organic Chemistry 3
Lecture, 3 hours. Prerequisite(s): concurrent enrollment in CHEM 08HC; CHEM 088B with a grade of B or better, CHEM 08LB with a grade of B or better or CHEM 08LA with a grade of B or better, admission to University Honors; or consent of instructor. Honors course corresponding to CHEM 008B. Honors course that covers the principles of organic chemistry in greater depth than in CHEM 008B. Covers modern organic chemistry including structural determination via spectroscopic analysis, reactivity, reaction mechanisms and multistep organic synthesis. Satisfactory(S) or No Credit(N/C) is not available. Credit is awarded for one of the following CHEM 08HB or CHEM 088B.

CHEM 08HB Honors Organic Chemistry 3
Lecture, 3 hours. Prerequisite(s): concurrent enrollment in CHEM 08HB; CHEM 008A with a grade of B or better, CHEM 08LA with a grade of B or better or CHEM 08HA with a grade of B or better, admission to University Honors; or consent of instructor. Honors course corresponding to CHEM 008B. Honors course that covers the principles of organic chemistry in greater depth than in CHEM 008B. Covers modern organic chemistry including structural determination via spectroscopic analysis, reactivity, reaction mechanisms and multistep organic synthesis. Satisfactory(S) or No Credit(N/C) is not available. Credit is awarded for one of the following CHEM 088B or CHEM 008A.

CHEM 08LA Honors Organic Chemistry Laboratory 1
Lecture, 4 hours. Prerequisite(s): CHEM 088C and CHEM 08HC or CHEM 008C. Laboratory course corresponding to CHEM 08LA in depth. An introduction to laboratory techniques of purification, isolation, synthesis, reactions, and spectroscopic analysis. Satisfactory(S) or No Credit(N/C) is not available. Credit is awarded for only one of CHEM 08LC or CHEM 08HLC.

CHEM 08LC Organic Chemistry Laboratory 1
Lecture, 4 hours. Prerequisite(s): CHEM 088C and CHEM 08LA or CHEM 08HC or CHEM 008C. Laboratory course corresponding to CHEM 08LA in depth. An introduction to laboratory techniques of purification, isolation, synthesis, reactions, and spectroscopic analysis. Satisfactory(S) or No Credit(N/C) is not available. Credit is awarded for only one of CHEM 08LB or CHEM 08HLC.

CHEM 091 Freshman Seminar: What Chemists Do 1 Seminar, 1 hour. Explores the frontiers of chemistry (analytical, inorganic, organic, and physical) as well as the role of chemistry in allied areas such as agriculture, biology, environmental science, forensics, materials, medicine, and neuroscience. Graded Satisfactory(S) or No Credit(N/C).

CHEM 095 Explorations in Molecular Science 1 Laboratory, 3 hours. Prerequisite(s): CHEM 001A with a grade of C- or better or CHEM 01HA with a grade of C- or better or CHEM 002A with a grade of C- or better; CHEM 001B, may be taken concurrently or CHEM 01HB, may be taken concurrently or CHEM 002B, may be taken concurrently; NASC 093; or consent of instructor. Laboratory experiments and computer modeling in areas of chemistry (analytical, inorganic, organic, and physical) relevant to allied fields such as environmental science, astrophysics, chemical biology, or materials sciences. Course is repeatable as content or topic changes to a maximum of 2 units.
CHEM 097H Freshman Honors Project: Introduction to Research 1 to 4 Lecture, 3 to 12 hours. Prerequisite(s): admission to University Honors. Prior arrangement with a chemistry faculty member is required. An introduction to the methods of research in chemical sciences. The student conducts an investigation under the supervision of a faculty member. A written report is required at the end of the quarter. To satisfy the requirement for the University Honors Program Freshman Project, the student must earn a minimum of 4 units during the first year. Satisfactory (S) or No Credit (NC) grading is not available. Course is repeatable.

Upper-Division Courses

CHEM 109 Survey of Physical Chemistry 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 001C with a grade of C- or better or CHEM 01HC with a grade of C- or better; CHEM 01LC with a grade of C- or better or CHEM 1HLC with a grade of C- or better; MATH 009B with a grade of C- or better or MATH 009B with a grade of C- or better or MATH 007B with a grade of C- or better; or consent of instructor. Introduces thermodynamics, chemical equilibrium, kinetics, quantum chemistry, atomic and molecular structure, and spectroscopy. Primarily for majors in life and agricultural sciences; not recommended for Chemistry majors.

CHEM 110A Physical Chemistry: Chemical Thermodynamics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 001C with a grade of C- or better or CHEM 01HC with a grade of C- or better or CHEM 002C with a grade of C- or better; CHEM 01LC with a grade of C- or better or CHEM 1HLC with a grade of C- or better; MATH 009B with a grade of C- or better or MATH 007B with a grade of C- or better or MATH 009C with a grade of C- or better with a grade of C- or better or MATH 009C with a grade of C- or better or MATH 009B with a grade of C- or better or MATH 009C with a grade of C- or better or MATH 007B with a grade of C- or better; or consent of instructor. An introduction to thermodynamics, chemical equilibrium, kinetics, quantum chemistry, atomic and molecular structure, and spectroscopy. Primarily for majors in life and agricultural sciences; not recommended for Chemistry majors.

CHEM 110B Physical Chemistry: Introduction to Statistical Mechanics and Kinetics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 110A with a grade of C- or better or CHEM 01HC with a grade of C- or better or CHEM 002C with a grade of C- or better; or CHEM 01LC with a grade of C- or better or CHEM 1HLC with a grade of C- or better; MATH 009B with a grade of C- or better or MATH 009B with a grade of C- or better or MATH 007B with a grade of C- or better; or consent of instructor. An introduction to thermodynamics, chemical equilibrium, kinetics, quantum chemistry, atomic and molecular structure, and spectroscopy. Primarily for majors in life and agricultural sciences; not recommended for Chemistry majors.

CHEM 113 Physical Chemistry: Introduction to Quantum Chemistry 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 001C with a grade of C- or better or CHEM 01HC with a grade of C- or better or CHEM 002C with a grade of C- or better; CHEM 01LC with a grade of C- or better or CHEM 1HLC with a grade of C- or better or CHEM 02LC with a grade of C- or better; MATH 009C with a grade of C- or better or MATH 09HC with a grade of C- or better; MATH 010A with a grade of C- or better, may be taken concurrently or PHYS 002C with a grade of C- or better, may be taken concurrently or PHYS 040C with a grade of C- or better, or may be taken concurrently; or consent of instructor. Introduction to quantum mechanics with application to atomic and molecular structure and spectra.

CHEM 114 Advanced Physical Chemistry Laboratory 4 Lecture, 2 hours; laboratory, 8 hours. Prerequisite(s): CHEM 111 with a grade of “C-” or better or consent of instructor; completion of or concurrent enrollment in CHEM 113. Involves measurements and laboratory experiments illustrating applications of physical chemistry methods to problems in environmental, materials, and biological chemistry. Covers modern data acquisition, analysis, and computational techniques.

CHEM 125 Instrumental Methods 3 or 5 Lecture, 3 hours; laboratory, 8 hours. Prerequisite(s): CHEM 005 with a grade of C- or better or PHYS 002C, may be taken concurrently or PHYS 02HC, may be taken concurrently or PHYS 040C, may be taken concurrently or PHYS 040HC, may be taken concurrently or consent of instructor. A capstone course consisting of lectures and experiments presenting contemporary instrumental methods and their use in chemistry. Graduate students may register for lecture only (3 units).

CHEM 135 Atmospheric Chemistry 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 008A and CHEM 008A or CHEM 008A and CHM 008LA, CHEM 008B and CHEM 008B or CHEM 008H and CHEM 008LB, or consent of instructor; ENSC 102 recommended. Structure of the troposphere and stratosphere; formation of atmospheric ozone; tropospheric NOx chemistry; methane oxidation cycle; phase distributions of chemicals; wet and dry deposition; chemistry of volatile organic compounds; formation of photochemical air pollution; modeling of air pollution and control strategies; stratospheric ozone depletion and global warming. Cross-listed with ENSC 135, and ENXT 135.

CHEM 136 Chemistry of Natural Waters 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 005 with a grade of “C-” or better or consent of instructor. Introduction to processes controlling the chemical composition of natural waters. Topics include chemical equilibria, acid-base and coordination chemistry, oxidation-reduction reactions, precipitation-dissolution, air-water exchange, and use of equilibrium and kinetic models for describing marine nutrient, trace metal, and sediment chemistry. Cross-listed with ENSC 136.

CHEM 140 Environmental Chemistry Laboratory 4 Lecture, 2 hours; laboratory, 8 hours. Prerequisite(s): CHEM 125 with a grade of C- or better; CHEM 110A with a grade of C- or better or CHEM 109 with a grade of C- or better. Covers theory and application of chemical techniques for the analysis of environmentally relevant chemical processes. Discusses gas phase, condensed phase, surface, and particulate chemistry. Topics include “acid rain,” photochemical smog, ozone depletion, and chemical analysis monitoring.

CHEM 141 Foundations of Chemistry Education Research 3 Lecture, 3 hours. Prerequisite(s): CHEM 005 with a grade of C- or better; or consent of instructor. Provides an overview of the theoretical frameworks of learning relevant to chemistry and the typical research methodologies used in chemistry education research. Includes a discussion of experimental design considerations and an introduction to quantitative data analysis. Credit is awarded for one of the following CHEM 141 or CHEM 241.

CHEM 143 Chemical Biology 3 Lecture, 3 hours. Prerequisite(s): CHEM 008C and CHEM 08LC or CHEM 08HC and CHEM 08HLC. Discusses biochemical reactions from a chemical standpoint and presents how the principles of chemistry have been applied to address fundamental questions in life sciences.

CHEM 150A Inorganic Chemistry 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 008A with a grade of C- or better or CHEM 08HA with a grade of C- or better or CHEM 012A with a grade of C- or better or CHEM 12HA with a grade of C- or better; CHEM 08LA with a grade of C- or better or CHEM 08LA with a grade of C- or better or CHEM 08LB with a grade of C- or better; CHEM 08LB with a grade of C- or better; CHEM 08BB with a grade of C- or better or CHEM 08BB with a grade of C- or better or CHEM 012B with a grade of C- or better or CHEM 12BB with a grade of C- or better; CHEM 08LB with a grade of C- or better or CHEM 08LB with a grade of C- or better. A systematic introduction to the synthesis, reactions, structure, and bonding of important classes of inorganic compounds. Emphasizes on non-transition metal chemistry.

CHEM 150B Inorganic Chemistry 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 150A with a grade of “C-” or better. A systematic introduction to synthesis, reactions, structure, and bonding of important classes of inorganic compounds. Emphasis on transition metal chemistry.

CHEM 155 Advanced Inorganic Chemistry: Synthesis and Methods 4 Lecture, 2 hours; laboratory, 8 hours. Prerequisite(s): CHEM 150A with a grade of C- or better; restricted to major(s) Chemistry. Covers the synthesis, purification, and characterization of inorganic and organometallic compounds. Examples involve air-sensitive species in solution, as well as inorganic materials such as metal-organic frameworks and polymers. Techniques include inert atmosphere synthesis, crystal growth and X-ray diffraction, infrared and UV-vis spectroscopies, heteronuclear and variable temperature NMR, and cyclic voltammetry. Satisfactory (S) or No Credit (NC) is not available.
CHEM 166 Advance Organic Chemistry: Synthesis and Methods 4 Lecture, 2 hours; laboratory, 8 hours. Prerequisite(s): BCH 162 with a grade of C- or better or CHEM 005 with a grade of C- or better; CHEM 008C with a grade of C- or better or CHEM 08HC with a grade of C- or better; CHEM 08LC with a grade of C- or better or CHEM 08HLC with a grade of C- or better; or consent of instructor. Covers advanced topics in organic chemistry, multi-step synthesis of bioactive molecules, new synthetic methods, and methods for the synthesis and characterization of complex organic compounds. Introduces synthetic techniques such as inert atmosphere synthesis with Schlenk lines. Includes hands-on use of spectroscopic methods for structural characterization.

CHEM 190 Special Studies 1 to 5 To be taken with the consent of the chair of the department as a means of meeting special curricular problems.

CHEM 191 Seminar in Chemistry Careers 1 Seminar, 1 hour. Prerequisite(s): upper-division standing. Oral reports and discussions by students, faculty, and visiting speakers. Required of chemistry majors; normally taken in the spring of the junior year. Graded Satisfactory (S) or No Credit (NC).

CHEM 197 Research For Undergraduates 1 to 4 Research, 1 to 4 hours. Prerequisite(s): sophomore or junior standing; consent of instructor. An introduction to the methods of research in chemistry. Includes a research project completed under the supervision of a Chemistry faculty member. Students who submit a written research report receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 6 units.

CHEM 198 Individual Internship 1 to 12 Internship, 2 to 24 hours; term paper or presentation for preparation, 1 to 12 hours. Prerequisite(s): upper-division standing in chemistry; consent of instructor. Industrial work experience coordinated and supervised by a chemistry faculty member and an off-campus sponsor. Requires a term paper or presentation. Course is repeatable to a maximum of 12 units.

CHEM 199 Senior Research 1 to 4 Research, 3 to 12 hours. Prerequisite(s): senior standing; consent of instructor. Research project completed under the supervision of a Chemistry faculty member. Students who submit a written research report receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Total credit for CHEM 199 and/or CHEM 199H may not exceed 9 units.

CHEM 199H Senior Honors Research 1 to 5 Research, 3 to 15 hours. Prerequisite(s): senior standing; consent of instructor, a minimum GPA of 3.00 in chemistry courses and in all university course work. Research in chemistry conducted under the supervision of a Chemistry faculty member. Students who submit a written research report receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Total credit for CHEM 199 and/or CHEM 199H may not exceed 9 units.

Graduate Courses

CHEM 201A Advanced Physical Chemistry: Quantum Mechanics 3 Lecture, 3 hours. Prerequisite(s): CHEM 113 with a grade of "C" or better. Covers concepts in quantum mechanics including wavepackets, uncertainty, single particles in multiple dimensions, and approximate methods for solving the Schrödinger equation.

CHEM 201B Advanced Physical Chemistry: Quantum Mechanics and Spectroscopy 3 Lecture, 3 hours. Prerequisite(s): CHEM 113 with a grade of "C" or better. Covers concepts in quantum mechanics with particular applications to spectroscopy.

CHEM 201C Advanced Physical Chemistry: Elementary Statistical Mechanics 3 Lecture, 3 hours. Prerequisite(s): CHEM 110A and CHEM 110B with grades of "C" or better. Covers concepts in elementary statistical mechanics including ensembles, interpretations of thermodynamic functions, and quantum statistics.

CHEM 201D Advanced Physical Chemistry: Thermodynamics 3 Lecture, 3 hours. Prerequisite(s): CHEM 110A and CHEM 110B with grades of "C" or better. Covers concepts in thermodynamics including fundamental thermodynamic equations, potentials, Maxwell relations, and stability criteria. Cross-listed with MSE 205.

CHEM 201E Advanced Physical Chemistry: Kinetics 3 Lecture, 3 hours. Prerequisite(s): CHEM 110A and CHEM 110B with grades of "C" or better. Covers concepts in kinetics including reaction mechanisms and the molecular interpretation of reaction dynamics.

CHEM 203 Nanoscience and Nanotechnology 3 Lecture, 3 hours. Prerequisite(s): graduate standing in Chemistry, Physics, Engineering, or a related subject or consent of instructor. Provides a condensed, interdisciplinary overview of selected fields of nanoscience and emerging nanotechnological applications. Focuses on applications relevant for the campus research community that are not based on electronic applications of silicon. Cross-listed with MSE 245C.

CHEM 206A Introduction to Computational Quantum Chemistry 3 Lecture, 3 hours. Prerequisite(s): CHEM 113 or equivalent, graduate standing; or consent of instructor. Introduces computational techniques in quantum chemistry. Includes Hartree-Fock theory, Density Functional Theory, and electron correlation methods. Emphasizes practical applications in a research setting. Cross-listed with MSE 225C.

CHEM 206B Modeling Chemical and Biochemical Molecules 3 Lecture, 3 hours. Prerequisite(s): graduate standing in Chemistry or a related field or consent of instructor. Introduces students to the principles, concepts, and techniques for modeling chemical and biological systems. Covers the various methods and techniques for molecular simulations, energy calculations, obtaining initial data, accessing data reliably, visualization, and analysis of molecules, and screening and designing chemicals for proteins.

CHEM 207 Chemical Group Theory 3 Lecture, 3 hours. Prerequisite(s): consent of instructor. The principles of group theory and molecular symmetry. Applications in several areas of chemistry.

CHEM 208 Interdisciplinary Overview of Current Issues in Semiconductor Processing 3 Lecture, 3 hours. Prerequisite(s): graduate standing in Chemistry, Physics, Engineering, or a related subject or consent of instructor. An interdisciplinary overview of present-day semiconductor processing. Introduces topics such as properties of semiconductors, cleanroom environment, epitaxy, ion implantation, etching, lithography, device architecture, testing, and fault detection. May offer field trips. Cross-listed with PHYS 202, and MSE 245D.

CHEM 209 (E-Z) Advanced Topics in Physical Chemistry 2 to 3 Prerequisite(s): graduate standing. Selected advanced topics from modern physical chemistry.

CHEM 209M Magnetic Resonance 3 Lecture, 3 hours. Prerequisite(s): consent of instructor. Presents the quantum-mechanical theory and experiments of magnetic resonance. Topics include the spin-density operator formalism, multidimensional NMR, and solid-state NMR with examples chosen from chemistry, physics, biology, and medicine.

CHEM 209S Potential Surfaces 3 Lecture, 3 hours. Prerequisite(s): CHEM 208 or consent of instructor. This course concentrates on the spectroscopic methods for determining potential energy surfaces of molecules. Also discussed are the theoretical models that are used to interpret the experiments. The wave packet dynamics formalism will receive special attention.

CHEM 209W Laser Chemistry and Spectroscopy 3 Lecture, 3 hours. Prerequisite(s): consent of instructor. An introduction to laser spectroscopy and chemistry including the principles of laser operation and the use of lasers as spectroscopic tools. Topics will include absorption and emission of light, spectral lineshapes, coherent light sources, Doppler-limited and sub-Doppler high-resolution laser spectroscopy, time-resolved laser spectroscopy, Raman spectroscopy, chemical lasers and laser chemistry.

CHEM 209Y Nonlinear Coherent Spectroscopy 3 Lecture, 3 hours. Prerequisite(s): consent of instructor. Study of molecular spectroscopy and dynamics by the use of high intensity light. Also to be covered is the development of lasers as a means for generating intense coherent light.

CHEM 209Z Surface Chemistry 3 Lecture, 3 hours. Prerequisite(s): consent of instructor. This course will cover a description of the main modern surface analytical techniques and their applications to practical problems, specially to catalysis.
CHEM 211A Structure and Mechanism in Organic Chemistry 3 Lecture, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Covers structure and bonding in organic compounds emphasizing more advanced aspects of the field.

CHEM 211B Advanced Organic Chemistry: Reactions and Mechanism 3 Lecture, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores organic and organometallic reaction mechanisms and their application to modern synthesis.

CHEM 211C Advanced Synthetic Analysis 3 Lecture, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces synthetic organic chemistry emphasizing strategy, reactions, and techniques.

CHEM 211D Spectrometry in Organic Structure Analysis 3 Lecture, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Utilizes modern spectroscopic techniques such as NMR spectroscopy, and 1H and 13C NMR to determine the structure of complex organic molecules. Topics include advanced NMR techniques such as 2D NMR, NMR pulse sequences, diffusion NMR, and MRI. Cross-listed with MSE 225A.

CHEM 211E Advanced Organic Reactions 3 Lecture, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Covers modern organic reactions and reagents and their mechanistic pathways with emphasis on recent developments and practical organic chemistry. Cross-listed with MSE 245A.

CHEM 216 Physical Organic Chemistry 3 Lecture, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An advanced treatment of physical organic chemistry.

CHEM 217 Polymers: Synthesis and Characterization 3 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces fundamentals of polymer synthesis, types of polymers, stereo architectures, and applications. Explores modern methods of synthesis, emphasizing catalytic methods. Describes industrial synthetic methods. Examines polymer physics and characterization, emphasizing physical methods.

CHEM 221A Advanced Analytical Chemistry: Separation Science 3 Lecture, 3 hours. Prerequisite(s): CHEM 125; graduate standing or consent of instructor. Provides an overview of modern analytical separations including theory, instrumentation, and applications.

CHEM 221B Advanced Analytical Chemistry: Optical Spectroscopy 3 Lecture, 3 hours. Prerequisite(s): CHEM 125; graduate standing or consent of instructor. Provides an overview of modern analytical optical spectroscopic techniques including theory, instrumentation, and applications. Cross-listed with MSE 225B.

CHEM 221C Advanced Analytical Chemistry: Electrochemistry 3 Lecture, 3 hours. Prerequisite(s): CHEM 125; graduate standing. Provides an overview of modern electrochemistry including basic theory, applications, and instrumentation of potentiometry and amperometry.

CHEM 221D Advanced Analytical Chemistry: Mass Spectroscopy 3 Lecture, 3 hours. Prerequisite(s): CHEM 125; graduate standing. Provides an overview of modern mass spectroscopy including basic theory, instrumentation, and applications. Focuses on biological applications.

CHEM 221E Advanced Analytical Chemistry: Introduction to Bioanalytical Chemistry 3 Lecture, 3 hours. Prerequisite(s): CHEM 125; graduate standing. Covers important aspects of modern chemical measurements with particular emphasis on bioanalysis. Discusses analytical challenges associated with drug discovery and development including analysis of combinatorial libraries, high-throughput screening, metabolomics, genomics, and proteomics. Addresses new developments in analytical methods and instrumentation.

CHEM 221F Advanced Analytical Chemistry: Advanced Chemical Biology 3 Lecture, 3 hours. Prerequisite(s): graduate standing in Chemistry or a related field or consent of the instructor. Introduces synthetic and analytical methods that enable molecular control over and interrogation of proteins and nucleic acids in vitro, in cellulo, and in vivo. Includes emerging technologies for biomolecular labeling and regulation.

CHEM 222 Fundamentals of Heterogeneous Catalysis 4 Lecture, 3 hours, term paper, 3 hours. Prerequisite(s): CHEM 221B; graduate standing or consent of instructor. Explores fundamental phenomenon of chemical reactivity on ground and excited state potential energy surfaces. Quantitatively relates electronic structure of catalytic materials to their chemical reactivity. Covers state-of-the-art experimental and theoretical approaches to studying catalytic reactivity. Provides a holistic understanding of catalysis at an atomic scale. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CEE 222, and MSE 239A.

CHEM 223 Nature of the Chemical Bond 3 Lecture, 3 hours. Prerequisite(s): graduate standing in Chemistry or a related field or consent of instructor. Explores all aspects of chemical bonding including molecular orbital theory, valence bond theory, and noncovalent bonding, with coverage of key concepts from all subdivisions of chemistry.

CHEM 229N Nanoscale Analyses 3 Lecture, 3 hours. Prerequisite(s): consent of instructor. Covers novel analytical instrumentation used to analyze ultrasmall (10-9 to 10-11 L) samples—for example, single molecules, individual cells and subcellular organelles, and dilute concentrations of biologically important molecules. Addresses applications, biological relevance, and instrumentation.

CHEM 229P Fourier Transform in Chemical Analysis 2 Lecture, 2 hours. Prerequisite(s): consent of instructor. Fundamentals of the discrete fast Fourier transform will be introduced. Applications of the technique to laboratory data processing including smoothing and deconvolution will be considered. Instrumentation, theory, and applications of Fourier transform infrared, nuclear magnetic resonance, and mass spectrometry are to be reviewed.

CHEM 229Q Nuclear Magnetic Resonance Spectroscopy 3 Lecture, 3 hours. Prerequisite(s): consent of instructor. State-of-the-art nuclear magnetic resonance spectroscopy will be covered, including a discussion of the principles of NMR and the techniques used to measure NMR spectra. The emphasis will be on Fourier transform NMR.

CHEM 229R Fourier Transform Infrared Spectroscopy 3 Lecture, 3 hours. Prerequisite(s): consent of instructor. This course covers the theory of instrumentation of Fourier transform infrared (FT-IR) spectroscopy, and its applications to such areas as kinetics, surface chemistry, quantitative and qualitative analysis of mixtures and biochemical systems.

CHEM 229S Mass Spectrometry 3 Lecture, 3 hours. Prerequisite(s): consent of instructor. This course will cover the theory of mass spectrometry, including instrumentation, interpretation, and applications.

CHEM 229T Luminescence Spectroscopy 3 Lecture, 3 hours. Prerequisite(s): CHEM 221B; MSE 225B; consent of instructor. Surveys static and dynamic luminescence measurements, measurements of polarized luminescence, the associated instrumentation, and several principal applications of luminescence spectroscopy.

CHEM 229U Chemometrics 3 Lecture, 3 hours. Prerequisite(s): consent of instructor. The development of mathematical statistical analysis and its application to univariate and higher-order chromatographic, spectroscopic, and electrochemical measurements.

CHEM 229W Environmental Analytical Chemistry 3 Lecture, 3 hours. Prerequisite(s): consent of instructor. Current techniques for the analysis of gas and particulate atmospheric samples. Applications to current environmental issues.
CHEM 229X Electrochemistry at Ultramicroelectrodes 3 Lecture, 3 hours. Prerequisite(s): consent of instructor. Analytical properties of electrodes of micrometer dimensions discussed. Special properties including mass transport, the effect of geometry, and current density at the electrode surface emphasized. Applications of these electrodes in resistive media, kinetic characterization of fast electron transfer reactions, and the effects of surface modification on electrode response highlighted.

CHEM 2292 Separation Science 3 Lecture, 3 hours. Prerequisite(s): CHEM 221A; consent of instructor. An in-depth treatment of the physical principles and practice of modern analytical separations. Emphasizes microscale separation techniques including capillary electrophoresis, capillary liquid chromatography, and micellar electrokinetic chromatography.

CHEM 231A Structure and Bonding in Inorganic Chemistry 3 Lecture, 3 hours. Prerequisite(s): CHEM 150A; CHEM 150B Covers advanced synthesis, structure, and bonding in inorganic, coordination, and organometallic chemistry. Cross-listed with MSE 245B.

CHEM 231B Reactivity and Mechanism in Inorganic and Organometallic Chemistry 3 Lecture, 3 hours. Prerequisite(s): CHEM 231A/ MSE 245B. Covers advanced synthesis, reactivity, and mechanism in inorganic, coordination, and organometallic chemistry.

CHEM 231C Solid State and Materials in Inorganic Chemistry 3 Lecture, 3 hours. Prerequisite(s): CHEM 231A/ MSE 245B; consent of instructor. Covers the advanced synthesis, structure, bonding, and properties of inorganic materials. Cross-listed with MSE 235.

CHEM 231D Inorganic and Organometallic Chemistry 3 Lecture, 3 hours. Prerequisite(s): CHEM 231A or equivalent; a passing grade on the Chemistry Department organic chemistry examination. Explores topics in organic chemistry. Part I involves theoretical and practical aspects of organic chemistry; includes the determination of structures and bonding, and properties of organic compounds. Cross-listed with MSE 245.

CHEM 239T Fullerenes, Nanotubes, and Carbon-Based Materials 3 Lecture, 3 hours. Prerequisite(s): graduate standing; CHEM 211A or CHEM 231A/ MSE 245B. Covers the chemistry, physics, and materials science of carbon-based molecules.

CHEM 239X Modern Applications of Transition Metals in Organic Synthesis 3 Lecture, 3 hours. Prerequisite(s): graduate standing; CHEM 211A or CHEM 231A/ MSE 245B. Covers carbene complexes and their use in alkene metathesis, pi-arene complexes, palladium, samarium, and rare earths in organic synthesis and zirconium- and titanium-based reagents. Also discusses theoretical aspects of complexation.

CHEM 241 Foundations of Chemistry Education Research 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to major(s) Chemistry; graduate standing. Provides an overview of the theoretical frameworks of learning relevant to chemistry and the typical research methodologies used in chemistry education research. Includes a discussion of experimental design considerations and an introduction to quantitative data analysis. Credit is awarded for one of the following CHEM 241 or CHEM 141.

CHEM 242 Combinatorial Chemistry and Chemical Genomics 3 Lecture, 3 hours. Prerequisite(s): BIOL 102, CHEM 098C, or equivalents; a passing grade on the Chemistry Department organic chemistry examination. Explores topics in chemical genomics. Part I involves combinatorial principles, library methods, solid-phase and split-pool synthesis, deconvolution, library design and informatics, and parallel synthesis. Part II involves screening and selection systems, forward and reverse chemical genetic approaches, phenotyping and epistasis, preparation and use of molecular arrays, and target identification. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CHEM 244 Chemistry and Physics of Aerosols 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 109, CHEM 110B; consent of instructor. Fundamentals of chemical and physical processes controlling behavior and properties of airborne particles. Topics include particle mechanics; electrical, optical, and thermodynamic properties; nucleation; surface and aqueous-phase chemistry; gas-particle partitioning; sampling; size and chemical analysis; atmospheric aerosols, and environmental effects. Cross-listed with ENTX 245, and ENSC 245.

CHEM 246 Fate and Transport of Chemicals in the Environment 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): one year of organic chemistry; graduate standing; consent of instructor. Covers identification of toxicants and their sources in the environment; equilibrium partitioning of chemicals between air, water, soil, sediment, and biota using physico-chemical properties; and the transport and transformations of chemicals in air, water, and soil media. Includes case studies of fate and transport of selected toxic chemicals. Cross-listed with ENSC 200, and ENTX 200.

CHEM 250 Graduate Seminar in Chemistry 1 Seminar, 1.5 hour. Prerequisite(s): graduate standing. Oral reports by graduate students, faculty, and visiting scholars on current research topics in chemistry. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CHEM 251 Graduate Seminar in Analytical Chemistry 2 Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Includes oral reports and discussion by students, faculty, and visiting scholars from academia and industry on current research topics in analytical chemistry. Offered each quarter. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CHEM 252 Graduate Seminar in Inorganic Chemistry 2 Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Includes oral reports and discussion by students, faculty, and visiting scholars from academia and industry on current research topics in inorganic chemistry. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CHEM 253 Graduate Seminar in Organic Chemistry 2 Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Includes oral reports and discussion by students, faculty, and visiting scholars from academia and industry on current research topics in organic chemistry. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CHEM 254 Graduate Seminar in Physical Chemistry 2 Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Includes oral reports and discussion by students, faculty, and visiting scholars from academia and industry on current research topics in physical chemistry. Offered each quarter. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CHEM 256 Chemistry of Nanostructured Materials 2 Seminar, 2 hours. Prerequisite(s): graduate standing in Chemistry or consent of instructor. Explores the chemistry of nanostructured materials. Introduces nanotechnology, solid state chemistry and physics of nanomaterials, nanoscale characterization tools, lithography, micro- and nanofabrication, physical and chemical methods to nanomaterials, surface modification, sol-gel chemistry, self-assembly at various length scales, and bio-inspired materials. Emphasis is on development of novel functional nanostructured materials through chemical synthesis, surface modification, and self-assembly. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.
CHEM 258 Seminar in Surface Science 1 Seminar, 1 hour. Prerequisite(s): graduate standing in Physics or Chemistry or consent of instructor. Oral presentations by participating scholars, postdoctoral researchers, students, and UCR faculty on current research topics in surface science. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Cross-listed with PHYS 258.

CHEM 259 Bioanalytical Chemistry 2 Seminar, 2 hours. Prerequisite(s): graduate standing in Chemistry or consent of instructor. Explores bioanalytical separation and detection techniques. Topics include liquid chromatography, capillary electrophoresis, field flow fractionation, flow cytometry, multidimensional or multiplexed chromatography, microfluidics, mass spectrometry, biological sample preparation, and biosensors. Emphasis is on development of new bioanalytical techniques for detection of pathogens and study of pathogen-host interactions. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CHEM 260 Organic and Organometallic Methodology and Synthesis 2 Seminar, 2 hours. Prerequisite(s): graduate standing in Chemistry or consent of instructor. Introduces key areas of synthetic organic and organometallic chemistry in a mechanism-based approach. Explores current literature with an emphasis on catalytic asymmetric reactions and their application to the synthesis of biologically active compounds. Surveys the background and history of discoveries leading to the development of new catalytic methodology. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 36 units.

CHEM 261 Scanning Probe Microscopy in Surface Science 2 Seminar, 2 hours. Prerequisite(s): graduate standing in Chemistry or consent of instructor. Focuses on theory and applications of scanning probe microscopy in surface science, including the use of scanning tunneling microscopy to image surfaces on the atomic and molecular length scale, and scanning probe techniques to investigate and control elementary steps of surface reactions. Reviews surface crystallography, electronic, and phononic band structure. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CHEM 262 Ultrafast Dynamics in Condensed Matter 2 Seminar, 2 hours. Prerequisite(s): consent of instructor. The extremely fast relaxation and dephasing of nuclear (vibrational) and electronic excitations in condensed matter are probed by the use of coherent spectroscopic measurements at cryogenic temperatures (approximately 1K) and at various high pressures (greater than 100 Kbar). Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. May be repeated for credit.

CHEM 263 Analysis and Synthesis at the Chemistry-Biology Interface 2 Seminar, 2 hours. Prerequisite(s): graduate standing in Chemistry or consent of instructor. Introduces key areas of bioanalytical chemistry and chemical biology. Explores current literature with an emphasis on protein engineering, fluorescence imaging, and synthesis of light-active compounds and their applications to the modulation of biological pathways. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 36 units.

CHEM 265 Raman Spectroscopy of Biological Systems 2 Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Applications of Raman spectroscopy to the characterization of the structure and function of biological membranes and membrane proteins. Emphasis will be placed on resonance enhanced Raman scattering, including the theoretical origins of resonance enhancement. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CHEM 266 Molecular Recognition and Catalysis 2 Seminar, 2 hours. Prerequisite(s): graduate standing in Chemistry or consent of instructor. Explores topics in biological and organic chemistry relevant to the study of molecular recognition. Emphasizes the study of non-covalent forces in self-association and the properties of macromolecular constructs. Also involves the study of the synthetic organic and inorganic chemistry used to create these constructs. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CHEM 267 Organic Electronic Materials 2 Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. A study of design, synthesis, purification, manufacture, and application of carbon-based electronic materials. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. Cross-listed with ECE 254.

CHEM 269 New Trends in Main Group Chemistry 2 Seminar, 2 hours. Prerequisite(s): senior or graduate standing in Chemistry or consent of instructor. Training in modern main group chemistry, covering boron, silicon, phosphorus, and related elements. Organic and inorganic chemists benefit from this course. Introduces students to the peculiar properties of these elements, thus enabling them to use this knowledge in their own field of expertise. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CHEM 270 Theoretical Quantum Chemistry: Methods and Applications 2 Seminar, 2 hours. Prerequisite(s): graduate standing in Chemistry or consent of instructor. Explores topics in computational quantum chemistry relevant to both wave function and density functional theories. Emphasizes new computational algorithms and physical approximations that can be used to accelerate calculations and the applications of these methods to solve chemical problems. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CHEM 271 Design, Synthesis, and Applications of Highly Conjugated Organic Systems 2 Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Explores the design and synthesis of highly conjugated organic molecules and polymers for applications in molecular devices such as sensors, light emitting diodes, and conductors. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CHEM 272 Gaseous Ion Chemistry 2 Seminar, 2 hours. Prerequisite(s): graduate standing in Chemistry or consent of instructor. Surveys all aspects of ion chemistry in the gas phase. Topics include mass spectrometry, ion mobility, electrospray ionization, matrix-assisted laser desorption ionization, ion-molecule reactions, ion-ion reactions, quantum calculations, instrumentation, and photodissociation spectroscopy. Emphasis is on bioanalytical applications for the study of protein structure, folding, and assembly. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CHEM 273 Bioanalytical Nuclear Magnetic Resonance Spectroscopy 2 Seminar, 2 hours. Prerequisite(s): consent of instructor. Development of Pulse Fourier transform NMR techniques and their application to the characterization of peptides, proteins and intact cells. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. May be repeated for credit.

CHEM 274 Chemical Biology 2 Seminar, 2 hours. Prerequisite(s): senior or graduate standing in Chemistry or consent of instructor. Involves formal presentations by graduate students on topics in the current literature and their research. Presentation responsibilities rotate among enrolled students and postdoctoral fellows. Also entails team work on problem sets and oral presentation of solutions. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CHEM 275 Bioorganic Chemistry of Nucleic Acids 2 Seminar, 2 hours. Prerequisite(s): consent of instructor. The design, synthesis, and evaluation of nucleic acids with novel hydrogen-bonding capabilities as well as oligonucleotides capable of regulating gene expression. Discussion of ribonucleic acid catalysis, including possible catalytic functions that have not yet been determined. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.
CHEM 276 The Nanocrystal-Ligand Interface 2 Seminar, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Explores the nanocrystal-ligand interface. Topics include a quantitative understanding of the nanocrystal-ligand interface, single molecule spectroscopic methods; the self-assembly of nanoparticles; supramolecular chemistry; synthesis and characterization of organic-inorganic hybrid nanostructures; and nanostructures with novel catalytic and optoelectronic properties. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 36 units.

CHEM 277 Surface Chemistry 2 Seminar, 2 hours. Prerequisite(s): consent of instructor. Discussions for new advances in surface science, concentrating mainly on the use of molecular level. Letter grades will be assigned to students who present a paper; others will be graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

CHEM 278 Nuclear Magnetic Resonance: Theory, Techniques, and Applications 2 Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on the development of solid-state and liquid-state nuclear magnetic resonance (NMR) as a probe of molecular structure, function, and dynamics with applications that range from chemistry to physics and biology. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade based on seminar participation. Course is repeatable.

CHEM 279 Molecular Spectroscopy 2 Seminar, 2 hours. Prerequisite(s): consent of instructor. Properties of excited states of molecules. Molecular photophysics and photochemistry. Theory of radiationless transitions. Kinetics and mechanism of excited state decay. Laser spectroscopy. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. May be repeated for credit.

CHEM 280 Chemistry and Biochemistry of Gaseous Molecules 2 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): consent of instructor. Reactions and properties of organic compounds and ions in the absence of bulk media. Preparative mass spectrometry and ion-molecule reactions. Molecular mechanisms in the sense of smell. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. May be repeated for credit.

CHEM 282 Elementary Processes in Atmospheric Chemistry 2 Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Applies state-of-the-art laser techniques to investigate elementary processes in atmospheric chemistry. Emphasis is quantitative understandings of atmospheric free-radical intermediates, their photochemistry, and their reaction mechanisms. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CHEM 283 Development of Inorganic Solid State Materials 2 Seminar, 2 hours. Prerequisite(s): graduate standing; consent of instructor. Focuses on the development of advanced materials such as optical, electronic, and porous materials. Topics include synthetic methods, characterization techniques, property measurements, and device applications. Special emphasis is placed on the design of synthetic strategies for the discovery of new functional materials with novel properties. Course is repeatable.

CHEM 284 Biological Mass Spectrometry 2 Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. A study of the synthesis, purification, and mass spectrometric characterization of biomolecules, nucleic acids in particular. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CHEM 285 Bio-Inspired Materials and Chemical Sensors 2 Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. A study of biomaterials and their application in analytical chemistry. Focus is on the design and synthesis of new materials, electrochemical detection, and the Surface Plasmon Resonance (SPR) technique. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CHEM 286 Time-Resolved Spectroscopy and Microscopy and Dynamics in Complex Systems 2 Seminar, 2 hours. Prerequisite(s): senior or graduate standing in Chemistry or consent of instructor. A comprehensive survey of modern time-resolved spectroscopy and microscopy techniques. Emphasizes applications to outstanding problems in materials science and biology. Specific problems include the measurement of energy transport in organic semiconductors and DNA dynamics in biological media. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CHEM 287 Modeling Molecular Recognition 2 Seminar, 2 hours. Prerequisite(s): graduate standing in Chemistry or consent of instructor. Focuses on molecular recognition and systems-level simulations, addressing theory and applications. Includes statistical mechanics (as applied to the prediction of equilibrium and nonequilibrium properties of chemical and biological systems), drug design and discovery, and cheminformatics. Utilizes numerical analysis, molecular dynamics and Brownian dynamics simulations, docking and scoring programs, and chemical database tools. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CHEM 288 Bioanalytical Applications of Nuclear Magnetic Resonance (nmr) and Mass Spectrometry (ms) 2 Seminar, 2 hours. Prerequisite(s): consent of instructor. Focuses on the study of ligand-protein interactions, metabolomics, with special emphasis on the application of hyphenated NMR and MS experiments. Also discusses new NMR pulse sequences and microcoil probes. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CHEM 289 Special Topics Seminar 2 Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. An interdisciplinary seminar consisting of student presentations and discussion of selected topics in neuroscience. Content and instructor(s) vary each time course is offered. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. Cross-listed with BCH 289, BIOL 289, ENTM 289, NRSC 289, and PSYC 289.

CHEM 290 Special Topics Seminar 2 Seminar, 2 hours. Prerequisite(s): graduate standing in Chemistry or consent of instructor. Includes oral presentations and intensive small-group discussion of selected topics in the area of specialization of each faculty member. Emphasizes recent advances in the special topic area; course content varies according-ly. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CHEM 291 Directed Research 1 to 6 Prerequisite(s): consent of a staff member. Research in analytical, inorganic, organic, or physical chemistry under the direction of a member of the staff. A written report is required of the research study. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CHEM 292 Research For Thesis Or Dissertation 1 to 12 Prerequisite(s): consent of a staff member. Research in analytical, inorganic, organic, or physical chemistry under the direction of a member of the staff. This research is to be included as part of the dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

CHEM 301 Oral Presentations in Chemistry 1 Lecture, 1 hour. The technique of oral presentation, emphasizing the problems that arise in chemistry laboratory and classroom situations. Designed primarily for new graduate students in the Chemistry Department. Graded Satisfactory (S) or No Credit (NC).

CHEM 302 Teaching Practicum 1 to 2 Lecture/laboratory, 4 to 8 hours. Prerequisite(s): Limited to Chemistry Department teaching assistants and Associates-In Chemistry. Supervised teaching in undergraduate courses in Chemistry. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit. Units are not applicable to degree unit requirements.
for the DE may not be counted toward MS or PhD requirements. The Designated Emphasis in Chemistry Education has two core requirements:

1. Completion of three (3) graduate courses (12 units), with one (1) graduate course being in Chemistry Education and two (2) graduate courses in Psychology:
   a) CHEM 241 (4 units)
   b) PSYC 211 (4 units)
   c) Either PSYC 212 (4 units) or PSYC 207C (3 units)

2. Completion of a chemistry education research project anytime after the student advances to candidacy. The scope of this project is expected to be such that it comprises one chapter in the final PhD dissertation. This project may be completed under the guidance of a chemistry department professor of teaching (who would act as a co-advisor overseeing the chemistry education research), or could be completed independently under the approval of the Chemistry Education DE Program Committee and the student’s research advisor. CHEM 299 (4 units).

The Chicano Bilingual-Bicultural Studies Minor

College of Humanities, Arts, and Social Sciences
Adalberto Aguirre, Jr., Ph.D., Chair
Office, 1140 Watkins Hall
(951) 827-5567

Committee in Charge
Adalberto Aguirre, Chair (Sociology)
Alfredo Mirandé (Ethnic Studies)
Covadonga Lamar Prieto (Hispanic Studies)
Yolanda Venegas, non-voting
Daryle Williams, Dean, ex officio

Professor Emeritus
Philip Gericie (Spanish & Portuguese)

The Chicano Bilingual-Bicultural Studies minor provides the student with a basic understanding of the Spanish language and of the Mexican American bicultural contexts in which that language is used in the southwestern United States.

1. Lower-division requirements (8 units)
   a) Four (4) units from ETST 002, ETST 004 / HIST 004
   b) Four (4) units from one of the following:
      (1) SPN 006
      (2) Any upper-division course taught in Spanish language

2. Upper-division requirements (16 units)
   a) One course in the general area of Education and Bilingualism from ETST 146 / EDUC 146, ETST 163/SOC 163, ETST 165 / SOC 165, ETST 166
   b) One course from the general area of Societal Perspectives on the Chicano Experience ETST 142

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Comparative Literature and Languages

College of Humanities, Arts, and Social Sciences
Jeffrey Sacks, Ph.D., Chair
Heidi Brevik-Zender, Ph.D., Vice Chair
Department Office, 2402 Humanities and Social Sciences
(951) 827-1462; complitlang.ucr.edu

Professors Emeriti
David K. Danow, Ph.D. Russian/Comparative Literature
Robert B. Griffin, Ph.D. Comparative Literature
Georg M. Gugelberger, Ph.D. Comparative Literature
Stephanie B. Hammer, Ph.D. Germanic Studies/Comparative Literature
Jules F. Levin, Ph.D. Russian/Comparative Literature

Associate Professors
Heidi Brevik-Zender, Ph.D. French/Comparative Literature
Kelly Jeong, Ph.D. Korean Literature and Culture/Comparative Literature
John N. Kim, Ph.D. German/Japanese/Comparative Literature

Professors
Michelle E. Bloom, Ph.D. Comparative Literature/French
Johannes Endres, Ph.D. Germanic Studies/Comparative Literature
Anthonia Kalu, Ph.D. African Literature and Culture/Comparative Literature
Eugene Perry Link, Ph.D., Chancellorial Chair for Teaching Across Disciplines, Chinese Literature, Language and Culture

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.
Comparative Literature

The department offers the B.A. degree in Languages and Literatures/Comparative Literature and the M.A. and Ph.D. graduate degrees in Comparative Literature.

While students majoring in Languages and Literatures/Comparative Literature must have a knowledge of the languages involved in the literatures of their choice, Comparative Literature courses themselves are open to all students. All work is done in translation and the courses are given in English.

French, Germanic Studies, and Russian Studies

The B.A. degree is offered in Languages and Literatures/French, Languages and Literatures/Germanic Studies, and Languages and Literatures/Russian Studies. Requirements for degrees include proficiency in the language of the literature.

Languages

The Languages and Literatures/Languages major allows a student to specialize in two foreign languages through a knowledge not only of the languages themselves but also of the bases of language (linguistics), examples of their creative use (literature), and the cultures which they reflect (civilization).

Linguistics

A B.A. in Linguistics is available through a program administered by an interdepartmental committee. Some foreign language study is essential for specialization in this discipline, as well as the pursuit of research projects and other kinds of practical work in linguistic-related areas.

Graduate Degrees

Comparative Literature (interliterary) M.A.

Comparative Literature (interliterary or interdisciplinary) Ph.D.

UC Tri-Campus Graduate Program in Classics M.A. and Ph.D.

Teaching Assistantships and Fellowships

Teaching assistantships and fellowships are available. Teaching assistants are normally held for CPLT 301 (Teaching of Foreign Language at the College Level). Course work and/or teaching experience at another college-level institution may be accepted in fulfillment of this requirement.

Education Abroad

Education Abroad is an excellent opportunity to learn more about another country and its culture while taking courses to earn units toward graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs office for assistance. For further details, visit Education Abroad at ea.ucr.edu or call (951) 827-4113.

See Education Abroad in the Educational Opportunities section in the beginning of this catalog.

Arabic Minor

This minor introduces the field of Arabic studies, and offers training in the Arabic language and in the close reading of texts—including poetry, literature, philosophy, theoretical writings, essays, and film—with attention to problems of translation, the history of disciplines, and the formation of institutions. It teaches students to read cultural objects, practices, texts, and institutions as active sites of translation, negotiation, contestation, and invention.
Minor Requirements

1. Lower Division Requirements (language proficiency)
   a) ARBC 001, 002, 003, and 004
2. Upper Division Requirements (16 units)
   a) Twelve upper-division units in Arabic Literature and Culture from ARLC 120, ARLC 151/CPLT 151/MEIS 151, ARLC 152/CPLT 152, ARLC 154/CPLT 154/PHIL 128, ARLC 155/CPLT 155/MEIS 155, ARLC 156/CPLT 156/MEIS 156/RLST 156, and any other related courses chosen in consultation with the student’s faculty advisor.
   b) Four upper-division units from CPLT 110 or a related upper-division course

Arabic Language

Foreign Language Placement Examination
A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and placementtest.ucr.edu for date and time. Transfer students who have taken a college-level language course cannot take the placement examination and should consult with their advisors. No college-level credit may be duplicated. See college placement examination policy.

Lower-Division Courses

ARBC 001 Elementary Arabic
4 Lecture, 4 hours. Prerequisite(s): Student must take the Arabic placement examination. An introduction to modern standard Arabic. Focusses on the development of the four language skills: listening, speaking, reading, and writing. Also explores aspects of Arabic cultures. Classes conducted primarily in Arabic.

ARBC 002 Elementary Arabic
4 Lecture, 4 hours. Prerequisite(s): ARBC 001 with a grade of “C-“ or better or equivalent or a sufficiently high test score on the Arabic placement examination as determined by the department faculty. An introduction to modern standard Arabic. Focusses on the development of the four language skills: listening, speaking, reading, and writing. Also explores aspects of Arabic cultures. Classes conducted primarily in Arabic.

ARBC 003 Elementary Arabic
4 Lecture, 4 hours. Prerequisite(s): ARBC 002 with a grade of “C-“ or better or equivalent or a sufficiently high test score on the Arabic placement examination as determined by the department faculty. An introduction to modern standard Arabic. Focuses on the development of the Arabic language. Classes conducted primarily in Arabic.

ARBC 004 Intermediate Arabic
4 Lecture, 4 hours. Prerequisite(s): ARBC 003 with a grade of “C-“ or better or equivalent or a sufficiently high test score on the Arabic placement examination as determined by the department faculty. An introduction to intermediate modern standard Arabic. Builds upon current knowledge levels of grammar and vocabulary to gain greater fluency and accuracy in listening, speaking, reading, and writing. Classes conducted in Arabic.

ARBC 005 Intermediate Arabic
4 Lecture, 4 hours. Prerequisite(s): ARBC 004 with a grade of “C-“ or better or equivalent or a sufficiently high test score on the Arabic placement examination as determined by the department faculty. An introduction to intermediate modern standard Arabic. Builds upon current knowledge levels of grammar and vocabulary to gain greater fluency and accuracy in listening, speaking, reading, and writing. Classes conducted in Arabic.

ARBC 006 Intermediate Arabic
4 Lecture, 4 hours. Prerequisite(s): ARBC 005 with a grade of “C-“ or better or equivalent or a sufficiently high test score on the Arabic placement examination as determined by the department faculty. An introduction to intermediate modern standard Arabic. Builds upon current knowledge levels of grammar and vocabulary to gain greater fluency and accuracy in listening, speaking, reading, and writing. Classes conducted in Arabic.

ARBC 101A Advanced Arabic
3 hours; individual study, 3 hours. Prerequisite(s): ARBC 006 or equivalent. An introduction to advanced modern standard Arabic. Builds upon knowledge of grammar and vocabulary to gain greater fluency and accuracy in listening, speaking, reading, and writing. Class conducted in Arabic.

ARBC 101B Advanced Arabic
3 hours; individual study, 3 hours. Prerequisite(s): ARBC 101A or equivalent. An introduction to advanced modern standard Arabic. Builds upon knowledge of grammar and vocabulary to gain greater fluency and accuracy in listening, speaking, reading, and writing. Class conducted in Arabic.

ARBC 101C Advanced Arabic
3 hours; individual study, 3 hours. Prerequisite(s): ARBC 101B or equivalent. An introduction to advanced modern standard Arabic. Builds upon knowledge of grammar and vocabulary to gain greater fluency and accuracy in listening, speaking, reading, and writing. Class conducted in Arabic.

ARBC 105 Media Arabic
3 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ARBC 006 or consent of instructor. Develops listening, speaking, reading, and writing skills through a focus on the language in newspapers, the news, and other forms of media in the Arabic language.

ARBC 110 Advanced Readings in Arabic
3 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ARBC 006 or consent of instructor. Advanced seminar in the reading of Arabic texts. Focuses on improving students’ reading skills while reviewing and deepening knowledge of Arabic grammar and vocabulary. Course is repeatable as content changes up to a maximum of 12 units.

ARLC 120 Classical Arabic Literary Prose
4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores aspects of classical Arabic literary prose. Includes the modes of quotation, citation, falsification, fabrication, and forgery. Focuses upon selected writings of al-Hamadhawi, al-Jahiz, al-Ma‘arri, Ibn Tufayl, and Ibn Hazim.

ARLC 151 Palestine/Algeria
4 Lecture, 3 hours; screening 6 hours per quarter; extra reading, 24 hours per quarter. Prerequisite(s): upper-division standing or consent of instructor. Considers two distinct and related literary and historical moments: Palestine and Algeria. Topics include the relations between language and context; literature and literary historiography; genre and idiom; violence and the body; and the state and institutional practices of reading. Cross-listed with CPLT 151, and MEIS 151.

ARLC 152 Modern Arabic Poetry in A Multilingual Frame
4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Considers selected writings of Adunis (‘Ali Ahmed Sa’id), Mahmoud Darwish, Abdelatatib La‘abi, and Etel Adnan, published originally in Arabic, French, and English. Topics include language (idiom, statement, utterance, translation, repetition, rhythm) and history (loss, violence, mourning, inheritance, future, legacy). Course is taught in English. Cross-listed with CPLT 152.

ARLC 154 Introduction to Arabic Philosophy
4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to Arabic philosophical texts. Provides close and literary reading of texts in philosophy, as well as considers the impact these texts have had or can have on Western cultural formation. Cross-listed with CPLT 154, and PHIL 128.

ARLC 155 Introduction to Arabic Literature
4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior, or consent of instructor. An introduction to Arabic literature that focuses on language and rhetoric. Considers major issues such as colonialism, secularism, modernity, language, and the state. Utilizes texts from literature, the law, and philosophy. Cross-listed with CPLT 155, and MEIS 155.

ARLC 156 Jews and Arabs
4 Lecture, 3 hours; extra reading, 3 hours Prerequisite(s): upper-division standing or consent of instructor. Traces the formation of the shared and divided history of the Jewish and Arab peoples. Focuses on the literary and institutional dimensions of this history, as well as the formation of related areas of study, such as religion, philosophy, literature, and psychoanalysis. Cross-listed with CPLT 156, MEIS 156, and RLST 156.
Arabic Literatures and Cultures

Lower-Division Courses

ARBC 001 Elementary Arabic 4 Lecture, 4 hours. Prerequisite(s): Student must take the Arabic placement examination. An introduction to modern standard Arabic. Focuses on the development of the four language skills: listening, speaking, reading, and writing. Also explores aspects of Arabic cultures. Classes conducted primarily in Arabic.

ARBC 002 Elementary Arabic 4 Lecture, 4 hours. Prerequisite(s): ARBC 001 with a grade of "C-" or better or equivalent or a sufficiently high test score on the Arabic placement examination as determined by the department faculty. An introduction to modern standard Arabic. Focuses on the development of the four language skills: listening, speaking, reading, and writing. Also explores aspects of Arabic cultures. Classes conducted primarily in Arabic.

ARBC 003 Elementary Arabic 4 Lecture, 4 hours. Prerequisite(s): ARBC 002 with a grade of "C-" or better or equivalent or a sufficiently high test score on the Arabic placement examination as determined by the department faculty. An introduction to modern standard Arabic. Focuses on the development of the four language skills: listening, speaking, reading, and writing. Also explores aspects of Arabic cultures. Classes conducted primarily in Arabic.

ARBC 004 Intermediate Arabic 4 Lecture, 4 hours. Prerequisite(s): ARBC 003 with a grade of "C-" or better or equivalent or a sufficiently high test score on the Arabic placement examination as determined by the department faculty. An introduction to intermediate modern standard Arabic. Builds upon current knowledge of grammar and vocabulary to gain greater fluency and accuracy in listening, speaking, reading, and writing. Classes conducted in Arabic.

ARBC 005 Intermediate Arabic 4 Lecture, 4 hours. Prerequisite(s): ARBC 004 with a grade of "C-" or better or equivalent or a sufficiently high test score on the Arabic placement examination as determined by the department faculty. An introduction to intermediate modern standard Arabic. Builds upon current knowledge of grammar and vocabulary to gain greater fluency and accuracy in listening, speaking, reading, and writing. Classes conducted in Arabic.

ARBC 006 Intermediate Arabic 4 Lecture, 4 hours. Prerequisite(s): ARBC 005 with a grade of "C-" or better or equivalent or a sufficiently high test score on the Arabic placement examination as determined by the department faculty. An introduction to intermediate modern standard Arabic. Builds upon current knowledge of grammar and vocabulary to gain greater fluency and accuracy in listening, speaking, reading, and writing. Classes conducted in Arabic.

Upper-Division Courses

ARBC 101A Advanced Arabic 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ARBC 006 or equivalent. An introduction to advanced modern standard Arabic. Builds upon knowledge of grammar and vocabulary to gain greater fluency and accuracy in listening, speaking, reading, and writing. Class conducted in Arabic.

ARBC 101B Advanced Arabic 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ARBC 101A or equivalent. An introduction to advanced modern standard Arabic. Builds upon knowledge of grammar and vocabulary to gain greater fluency and accuracy in listening, speaking, reading, and writing. Class conducted in Arabic.

ARBC 101C Advanced Arabic 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ARBC 101B or equivalent. An introduction to advanced modern standard Arabic. Builds upon knowledge of grammar and vocabulary to gain greater fluency and accuracy in listening, speaking, reading, and writing. Class conducted in Arabic.

ARBC 105 Media Arabic 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ARBC 006 or consent of instructor. Develops listening, speaking, reading, and writing skills through a focus on the language in newspapers, the news, and other forms of media in the Arabic language.

ARBC 110 Advanced Readings in Arabic 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ARBC 006 or consent of instructor. Advanced seminar in the reading of Arabic texts. Focuses on improving students' reading skills while reviewing and deepening knowledge of Arabic grammar and vocabulary. Course is repeatable as content changes up to a maximum of 12 units.

ARLC 120 Classical Arabic Literary Prose 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores aspects of classical Arabic literary prose. Includes the modes of quotation, citation, falsification, fabrication, and forgery. Focuses upon selected writings of al-Hamadhani, al-Jahiz, al-Ma'amari, Ibn Tufayl, and Ibn Hazim.

ARLC 151 Palestine/Algeria 4 Lecture, 3 hours; screening 6 hours per quarter; extra reading 24 hours per quarter. Prerequisite(s): upper-division standing or consent of instructor. Considers two distinct and related literary and historical moments: Palestine and Algeria. Topics include the relations between language and context; literature and literary historiography; genre and idiom; violence and the body; and the state and institutional practices of reading. Cross-listed with CPLT 151, and MEIS 151.

ARLC 152 Modern Arabic Poetry in A Multilingual Frame 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Considers selected writings of Adunis ('Ali Ahmed Sa'id), Mahmoud Darwish, Abdelatif La'abi, and Etel Adnan, published originally in Arabic, French, and English. Topics include language (idiom, statement, utterance, translation, repetition, rhythm) and history (loss, violence, mourning, inheritance, future, legacy). Course is taught in English. Cross-listed with CPLT 152.

ARLC 154 Introduction to Arabic Philosophy 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to Arabic philosophical texts. Provides close and literary reading of texts in philosophy, as well as considers the impact these texts have had or can have on Western cultural formation. Cross-listed with CPLT 154, and PHIL 128.

ARLC 155 Introduction to Arabic Literature 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior or senior; or consent of instructor. An introduction to Arabic literature that focuses on language and rhetoric. Considers major issues such as colonialism, secularism, modernity, language, and the state. Utilizes texts from literature, the law, and philosophy. Cross-listed with CPLT 155, and MEIS 155.

ARLC 156 Jews and Arabs 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Traces the formation of the shared and divided history of the Jewish and Arab peoples. Focuses on the literary and institutional dimensions of this history, as well as the formation of related areas of study, such as religion, philosophy, literature, and psychoanalysis. Cross-listed with CPLT 156, MEIS 156, and RLST 156.

Cahuilla

Subject Abbreviation: CAH

Lower-Division Courses

CAH 001 Introductory Cahuilla 4 Lecture, 4 hours. Prerequisite(s): none. An introduction to the Cahuilla language. Focuses on the development of listening, speaking, and writing skills. Also explores Cahuilla culture and the sociopolitical aspects of learning and speaking a Native American language.

CAH 002 Introductory Cahuilla 4 Lecture, 4 hours. Prerequisite(s): CAH 001 with a grade of C- or better. An introduction to the Cahuilla language. Focuses on further development of listening, speaking, and writing. Also explores Cahuilla culture and the sociopolitical aspects of learning and speaking a Native American language.

CAH 003 Introductory Cahuilla 4 Lecture, 4 hours. Prerequisite(s): CAH 002 with a grade of C- or better. An introduction to the Cahuilla language. Focuses on further development of listening, speaking, and writing. Also explores Cahuilla culture and the sociopolitical aspects of learning and speaking a Native American language.
Upper-Division Courses

CAH 100 Cahuilla Literature and Linguistics 4
Lecture, 4 hours; individual study, 4 hours. Prerequisite(s): CAH 003 with a grade of C- or better. Builds upon skills developed in first-year Cahuilla to further develop proficiency in listening, speaking, and writing the Cahuilla language. Explores complex grammatical and discourse constructions through guided linguistic analysis of Cahuilla literature (focusing on traditional narrative texts). Also includes practice in developing and narrating original stories.

Chinese

Subject abbreviations: CHN

Committee in Charge
Yenna Wu, Director, Ph.D. Chinese/Civilizations/ Comparative Literature
Eugene Perry Link, Ph.D. Chinese Literature, Language and Culture
Daryle Williams, Ph.D. Dean, College of Humanities, Arts, and Social Sciences, ex officio

Major

The Chinese Major enables a student to acquire proficiency in the Chinese language and to study Chinese literature, culture, and society using interdisciplinary methods.

1. Lower-division requirements (12 units plus language proficiency)
   a) Proficiency in Chinese through the intermediate level (CHN 006 or its equivalent)
   b) Four (4) units from lower-division lecture courses on Chinese literature, culture, and film: AST 030/CHN 030, AST 040/CHN 040, AST 046/CHN 046, AST 048/CHN 048, and any other lower-division lecture courses on Chinese literature, culture, and film chosen in consultation with the student's advisor.
   c) Eight (8) units: CPLT 001 or CPLT 001W, 1 lower-division CPLT course

2. Upper-division requirements (36 units)
   a) Twelve (12) units in Chinese language from CHN 101A, CHN 101B, CHN 101C. Students whose proficiency exceeds the 101 series should take the 12 required units by taking CHN 110 (E-Z), CHN 115 (E-Z), CHN 118 (E-Z)/AST 118 (E-Z), CHN 132/AST 132/CLA 132/CPAC 132, CHN 134, CHN 135/AST 135, CHN 136/AST 136, CHN 137, CHN 141/AST 145/CLA 141/CPAC 141/POSC 140, CHN 142/AST 142, CHN 148/AST 148, CHN 185/AST 185/MCS 169, CHN 190 CPLT 142E/GSST 142E, and any other upper-division lecture courses related to China or East Asia chosen in consultation with the student's advisor.
   b) Twelve (12) units in Chinese literature, culture, and film from CHN 107, AST 135/CHN 135, AST 136/CHN 136, AST 142/CHN 142, AST 145/CHN 145/CLA 141/CPAC 141/POSC 140, AST 148/CHN 148, AST 185/CHN 185/MCS 169, CHN 104, CHN 106, CHN 110 (E-Z), CHN 115 (E-Z), CHN 134, CHN 137, CHN 190, CPLT 142E/GSST 142E, and any other upper-division lecture courses related to China or East Asia chosen in consultation with the student's advisor.
   c) Eight (8) units in upper-division courses related to China or East Asia from other departments (with adviser's consent), can include the courses listed under (b).
   d) CPLT 193 (4) units. (CPLT 196 strongly recommended but not required)

Chinese Minor

1. Lower-division requirements (4 units plus language proficiency)
   a) Proficiency in Chinese through the intermediate level (second year)
   b) Four (4) units from lower-division lecture courses on Chinese literature and culture: CHN 030/AST 030, CHN 040/AST 040, CHN 046/AST 046 or CHN 046W/AST 046W, CHN 048/AST 048

2. Upper-division requirements (20 units)
   a) Twelve (12) upper-division units in Chinese language from CHN 101A, CHN 101B, CHN 101C. Students whose proficiency exceeds the 101 series should take the 12 required units by taking CHN 110 (E-Z), CHN 115 (E-Z), by taking the courses listed under (b) or by using EAP language courses.
   b) Eight (8) units in Chinese literature and culture from CHN 104, CHN 106/PHIL 123, CHN 107, CHN 110 (E-Z), CHN 115 (E-Z), CHN 118 (E-Z)/AST 118 (E-Z), CHN 132/AST 132/CLA 132/CPAC 132, CHN 134, CHN 135/AST 135, CHN 136/AST 136, CHN 137, CHN 141/AST 145/CLA 141/CPAC 141/POSC 140, CHN 142/AST 142, CHN 148/AST 148, CHN 185/AST 185/MCS 169, CHN 190 CPLT 142E/GSST 142E, and any other upper-division lecture courses related to China or East Asia chosen in consultation with the student's advisor.

Chinese Courses

Foreign Language Placement Examination
A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and placementtest.ucr.edu for date and time. Transfer students who have taken a college-level language course may not take the placement examination and should consult with their advisors. No college-level credit may be duplicated. See college placement examination policy.

Lower-Division Courses

CHN 001 First-Year Chinese 4 Lecture, 4 hours. Prerequisite(s): Student must take the Chinese placement examination. An introduction to the sound system and grammar of Chinese. Focuses on the development of the four skills: understanding, speaking, reading, and writing. Classes are conducted in Chinese as much as possible. Audio-lingual learning materials are available in the language laboratory. Credit is awarded for only one of the following sequences: CHN 001, CHN 002, CHN 003, and CHN 004; CHN 001, CHN 002, and CHN 020B; CHN 020A and CHN 020B.

CHN 002 First-Year Chinese 4 Lecture, 4 hours. Prerequisite(s): CHN 001 with a grade of “C-” or better or equivalent or a sufficiently high test score on the Chinese placement examination as determined by the department faculty. An introduction to the sound system and grammar of Chinese. Focuses on the development of the four skills: understanding, speaking, reading, and writing. Classes are conducted in Chinese as much as possible. Audio-lingual learning materials are available in the language laboratory. Credit is awarded for only one of the following sequences: CHN 001, CHN 002, CHN 003, and CHN 004; CHN 001, CHN 002, and CHN 020B; CHN 020A and CHN 020B.

CHN 003 First-Year Chinese 4 Lecture, 4 hours. Prerequisite(s): CHN 002 with a grade of “C-” or better or equivalent or a sufficiently high test score on the Chinese placement examination as determined by the department faculty. An introduction to the sound system and grammar of Chinese. Focuses on the development of the four skills: understanding, speaking, reading, and writing. Classes are conducted in Chinese as much as possible. Audio-lingual learning materials are available in the language laboratory. Credit is awarded for only one of the following sequences: CHN 001, CHN 002, CHN 003, and CHN 004; CHN 001, CHN 002, and CHN 020B; CHN 020A and CHN 020B.

CHN 004 Second-Year Chinese 4 Lecture, 4 hours. Prerequisite(s): CHN 003 with a grade of “C-” or better or equivalent or a sufficiently high test score on the Chinese placement examination as determined by the department faculty. Provides continuing development of the four skills: understanding, speaking, reading, and writing. Lectures are conducted primarily in Mandarin. Credit is awarded for only one of the following sequences: CHN 001, CHN 002, CHN 003, and CHN 004; CHN 001, CHN 002, and CHN 020B; CHN 020A and CHN 020B.

CHN 005 Second-Year Chinese 4 Lecture, 4 hours. Prerequisite(s): CHN 004 or CHN 020B; or equivalent or a sufficiently high test score on the Chinese placement examination as determined by the department faculty. Continued development of the four skills: understanding, speaking, reading, and writing. Lectures conducted primarily in Mandarin.

CHN 006 Second-Year Chinese 4 Lecture, 4 hours. Prerequisite(s): CHN 005; or equivalent or a sufficiently high test score on the Chinese placement examination as determined by the department faculty. Continued development of the four skills: understanding, speaking, reading, and writing. Lectures conducted primarily in Mandarin.

CHN 020A First-Year Chinese For Heritage Learners 4 Lecture, 4 hours. Prerequisite(s): Student must take the Chinese placement examination. A first-year Mandarin Chinese course designed for heritage learners who have some proficiency in listening comprehension and speaking but are unable to read and write in Mandarin. Credit is awarded for only one of the following sequences: CHN 001, CHN 002, CHN 003, and CHN 004; CHN 001, CHN 002, and CHN 020B; CHN 020A and CHN 020B.
CHN 020B First-Year Chinese For Heritage Learners 4 Lecture, 4 hours. Prerequisite(s): CHN 002 with a grade of "C-" or better or CHN 020A with a grade of "C-" or better or equivalent or a sufficiently high test score on the Chinese placement examination as determined by the department faculty. A first-year Mandarin Chinese course designed for heritage learners who have some proficiency in listening comprehension and speaking but are unable to read and write in Mandarin. Credit is awarded for only one of the following sequences: CHN 001, CHN 002, CHN 003, and CHN 004; CHN 001, CHN 002, and CHN 020B; CHN 020A and CHN 020B.

CHN 030 Introduction to Chinese Civilization 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): none. An introduction to Chinese civilization through an interplay of philosophical, historical, religious, and literary readings from the ancient times through the modern age. Uses audiovisual media. All work is in English. Cross-listed with AST 030, and CPLT 030.

CHN 040 Masterworks of Chinese Literature 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): none. Reading and discussion of selected great works of Chinese literature (in English translation) with attention to cultural contexts. Various critical methods and approaches are used. Cross-listed with AST 040, and CPLT 041.

CHN 046 Responses to Political Repression in Modern Chinese Literature and Film 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. An examination of the various responses to political repression in China during the second half of the twentieth century through selected literary and artistic representations. Cross-listed with AST 046, and CPLT 042. Credit is awarded for one of the following CHN 046, AST 046, CPLT 042, AST 046W, CHN 046W, or CPLT 042W.

CHN 046W Responses to Political Repression in Modern Chinese Literature and Film 4 Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ENGL 001B with a grade of C or better. An examination of the various responses to political repression in China during the second half of the twentieth century through selected literary and artistic representations. Fulfills the third-quarter writing requirement for students who earn a grade of "C" or better for courses that the Academic Senate designates, and that the student's college permits, as alternatives to English 001C. Cross-listed with AST 046W, and CPLT 042W. Credit is awarded for one of the following CHN 046W, AST 046W, CPLT 042W, AST 046, CHN 046, or CPLT 042.

CHN 048 Chinese Cinema 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. A study of selected films from China and Taiwan focusing on cultural context. Includes what to look for in these films; the interrelations with theater, photography, and literature; and how these films are understood as an art form. Cross-listed with AST 048, CPLT 048, and MCS 048.

CHN 090 Special Studies 1 to 5 Individual Study, 3 to 15 hours. To be taken with the consent of the Chair of the Department as means of meeting special curricular problems in either language or literature. Course is repeatable.

Upper-Division Courses

CHN 101A Third-Year Chinese 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): CHN 006; or equivalent. Further development of the four skills: understanding, speaking, reading, and writing with an emphasis on reading and writing. Classes conducted in Mandarin.

CHN 101B Third-Year Chinese 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): CHN 101A or equivalent or consent of instructor. Further development of the four skills: understanding, speaking, reading, and writing with an emphasis on reading and writing. Classes conducted in Mandarin.

CHN 101C Third-Year Chinese 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): CHN 101B or equivalent or consent of instructor. Further development of the four skills: understanding, speaking, reading, and writing with an emphasis on reading and writing. Classes conducted in Mandarin.

CHN 104 Introduction to Classical Chinese Texts 4 Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): CHN 003 or equivalent. An introduction to classical Chinese philosophical and historical texts. Readings of primary source materials and analysis of grammar and usage. Class is conducted in English.

CHN 106 Readings in Classical Chinese Philosophy 4 Lecture, 3 hours; written work, 2 hours. Prerequisite(s): CHN 104 or consent of instructor. Introduction to classical Chinese philosophical and historical texts. Readings of key philosophical texts in classical Chinese. Focuses on a combination of Chinese reading and philosophical understanding. Cross-listed with PHIL 123.

CHN 107 Taoist Traditions 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): CHN 030 or AST 030 or CPLT 030; restricted to class level standing of junior or senior; or consent of instructor. A survey of the ancient mystical and philosophical aspects of Taoism as well as the living religious tradition, their relationships to each other, and their expression in Chinese culture and civilization. Topics include the Tao Te Ching, the Chuang-tzu, the Taoist canon, meditation, immortality, alchemy, and ritual.

CHN 110 Readings in 20th Century Chinese Literature 4 Lecture, 3 hours, extra reading, 3 hours. Prerequisite(s): CHN 101C with a grade of C- or better. Explores selections from Chinese fiction from 1950 to the present. Considers questions of language, narrative mode, metaphor, and politics as well as the personal and social backgrounds of authors. Emphasizes the ideas and values of authors and the importance these had for readers. Credit is awarded for one of the following CHN 110E, AST 137, or CHN 137.

CHN 110M Readings in 20th Century Chinese Literature 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): CHN 101C with a grade of C- or better. Explores selections from Chinese fiction from 1918-1949. Considers questions of language, narrative mode, metaphor, and politics as well as the personal and social backgrounds of authors. Emphasizes the ideas and values of authors and the importance these had for readers. Credit is awarded for one of the following CHN 110M, AST 134, or CHN 134.

CHN 110P Readings in 20th Century Chinese Literature 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): CHN 101C with a grade of C- or better. Aims to further develop overall language proficiency beyond the third-year level. Introduces the modern belles-lettres prose in its various styles and themes through representative texts by major authors from the May-Fourth New Culture Movement to the middle of the twentieth century.

CHN 110S Readings in 20th Century Chinese Literature 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): CHN 101C with a grade of C- or better. Aims to further develop overall language proficiency beyond the third-year level. Introduces the modern vernacular poetry through close reading of representative texts by major poets from the New Culture Movement to the middle of the twentieth century. Conducted in modern Chinese.

CHN 110T Readings in 20th Century Chinese Literature 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): CHN 101C with a grade of C- or better. Aims to further develop overall language proficiency beyond the third-year level. Introduces the modern vernacular poetry through close reading of representative texts by major poets from the New Culture Movement to the middle of the twentieth century. Conducted in modern Chinese.

CHN 112 Asian Philosophy 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of Asian contributions to philosophy focusing on the Indian and Chinese traditions. Examines questions concerning how best to live one's life, what can be known, the relation between mind and body, whether there are minds and bodies, and the nature of the universe. Cross-listed with PHIL 112.

CHN 115 Readings in 13-19 Cen Chn Lit 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): CHN 101C with a grade of C- or better; or equivalent. Covers vernacular literature from the Yuan to the Qing dynasties. Course conducted in Chinese. G. Honglou Meng; M. Ming Novel; Q. Qing Novel; S. The Short Story; Y. Yuan Drama.
CHN 118 (E-Z) Masterworks of Chinese Literature in Translation 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Examines canonical Chinese works of literature in translation. Conducted in English. The Ancient Times Through the Early Imperial Dynasties. Cross-listed with AST 118 (E-Z).

CHN 132 Medical Traditions in China and Greece 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): AST 030 or CHN 030 or CHN 040 or CHN 107 or AST 142 or CHN 142 or RLST 142 or AST 148 or CHN 148 or CLA 010A or CLA 010B or CLA 010C or CLA 040 or CLA 050 or CLA 100 or HISE 110 or CLA 102 or CPAC 102 or CLA 112 or CPLL 112 or RLST 117 or CLA 114 or CPLL 114 or CPAC 112 or CLA 113 or HISE 113 or CLA 120E or CLA 120F or CLA 120G or CLA 120J or CLA 121 or CPAC 121 or POSC 121 or CPAC 133 or HISE 114 or CPAC 134 or HIST 110 or CLA 143 or CPAC 143 or CHN 143 or RLST 143 or CLA 142 or CPAC 143 or POSC 140. Cross-listed with AST 142, and RLST 142.

CHN 134 Modern Chinese Literature in Translation 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. An introduction to major works of Chinese fiction, drama, and poetry from the first half of the twentieth century. Considers literary quality and technique, as well as the social and political ideas of Chinese writers during a turbulent time in China's history. Cross-listed with AST 134. Credit is awarded for one of the following CHN 134, AST 134, or CHN 110M.

CHN 135 Great Novels of China 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the social, philosophical, and aesthetic features in major Ming-Qing novels through critical reading and analysis of literature in translation. No knowledge of Chinese required. Cross-listed with AST 135.

CHN 136 Family and Gender in the Chinese Short Story 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines a broad array of short stories from the Tang to the Qing dynasties (approximately ninth to eighteenth century). Investigates love, marriage, family, gender dynamics, and the representation of women in Chinese literature. No knowledge of Chinese required. Cross-listed with AST 136.

CHN 137 Contemporary Chinese Literature in Translation 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. An introduction to important works of fiction, drama, poetry, and reportage from the mid-twentieth century to the present. Includes readings from mainland China, as well as writings from Taiwan and other overseas communities. Cross-listed with AST 137. Credit is awarded for one of the following CHN 137, AST 137, or CHN 110E.

CHN 141 Militarism and Hegemony in the Ancient World 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CHN 030 or AST 030 or CHN 104 or CHN 107 or AST 142 or CHN 142 or RLST 142 or AST 148 or CHN 148 or CLA 010A or CLA 010B or CLA 010C or CLA 040 or CLA 050 or CLA 100 or HISE 110 or CLA 112 or CPLL 112 or RLST 117 or CLA 114 or CPLL 114 or CLA 120E or CLA 120F or CLA 120G or CLA 120J or CLA 121 or CPAC 121 or POSC 121 or CPAC 133 or HISE 114 or CPAC 134 or HIST 110 or CLA 143 or CPAC 143 or CHN 143 or RLST 143 or CLA 142 or CPAC 143 or POSC 140. Cross-listed with AST 142, and RLST 142.

CHN 142 Zhuangzi 4 Lecture, 3 hours; research, 1 hour; extra reading, 1 hour; term paper, 1 hour. Prerequisite(s): CHN 107 or CHN 112 or PHIL 110. An examination of chaos, epistemological and linguistic relativism, fate, skill, and the character of the sage in the Chinese Daoist text Zhuangzi. Discusses the structure and style of this literary masterpiece. Students with knowledge of classical Chinese may arrange additional work through special studies. Cross-listed with AST 142, and RLST 142.

CHN 143 Divination and Prediction in China and Greece 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): AST 030 or CHN 030 or CPLL 030 or CHN 104 or CHN 107 or AST 142 or CHN 142 or RLST 142 or AST 148 or CHN 148 or CLA 010A or CLA 010B or CLA 010C or CLA 040 or CLA 050 or CLA 100 or CLA 112 or HISE 110 or CPLL 112 or RLST 117 or CLA 114 or CPLL 114 or CLA 120 or CPAC 102 or CLA 102 or CPAC 112 or CLA 113 or HISE 113 or CLA 120E or CLA 120F or CLA 120G or CLA 120J or CLA 121 or CPAC 121 or POSC 121 or CPAC 133 or HISE 114 or CPAC 134 or HIST 110 or CLA 143 or CPAC 143 or CHN 143 or RLST 143 or CLA 120F or CLA 120G or CLA 120J or CPAC 134; or restricted to class level standing of junior, or senior; or consent of instructor. Comparative study of ancient warfare and hegemony in two or more civilizations of the ancient world. Perspectives may include social and political contexts, gender and war, acquisition of empire, religious wars, and weapons, strategies and tactics in theory and practice. Study of primary source material in texts and visual arts. Cross-listed with AST 145, CLA 141, CPAC 141, and POSC 140.

CHN 148 Chinese Poetry and Poetics in Translation 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Examination of traditional Chinese poetry through the study of selected major texts. Emphasizes forms, themes, and Chinese poetics in its close relation to the development of Chinese literature. Classes conducted in English. Cross-listed with AST 148.

CHN 185 New Chinese Cinema 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): MCS 020, upper-division standing or consent of instructor. A study of representative films from the People’s Republic of China, with a focus on those made during the last decade. Conducted in English; most films have English subtitles. Cross-listed with AST 185, and MCS 169.

CHN 190 Special Studies 1 to 5 Individual Study, 3 to 15 hours. Prerequisite(s): upper-division standing or consent of instructor. To be taken with the consent of the Chair of the Department as a means of meeting special curricular problems in either language or literature. Course is repeatable.

CHN 195 Senior Thesis 2 to 4 Thesis, 6 to 12 hours. Prerequisite(s): senior standing; consent of instructor. Individual research and preparation of a thesis completed under the supervision of a faculty member. Course is repeatable to a maximum of 12 units.

European Studies

Committee in Charge
Jeffrey Sacks, Ph.D. Arabic Literature/Comparative Literature
Daryl Williams, Ph.D., Dean, College of Humanities, Arts, and Social Sciences, ex officio

Lower-Division Courses
EUR 042 Italian Americans: Voices and Visions 4 Lecture, 3 hours; screening, 2 hours; written work, 1 hour. Prerequisite(s): none. A study of the Italian American experience as seen through major works of Italian and Italian American writers and filmmakers. Covers the 1950s to the present. No knowledge of Italian required. Cross-listed with ITAL 042.

EUR 043 Italian Cuisine and Literature Through the Centuries 4 Lecture, 3 hours; screening, 2 hours; written work, 1 hour. Prerequisite(s): none. Analyzes the relationship between food and literature in Italian culture through the study of gastronomic and literary texts from the Roman to present times. Cross-listed with ITAL 043.

EUR 044 Mafia and Malavita in Italian Literature and Film 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. A study of the history of malavita in the Italian peninsula. Explores topics from mischievous transgression to organized crime and Mafia as presented through the works of renowned Italian writers and directors. No knowledge of Italian required. Cross-listed with ITAL 044.

EUR 047 Introduction to Russian Culture 4 Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): none. A multimedia introduction to Russian culture. Emphasis on Russian masterpieces in art, architecture, dance, theatre, literature, film, and music which are characteristic of the culture and life of their period. All work is done in English. Strongly recommended for Russian majors.
Eur 048 Italian Culture and Civilization 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. An introduction to the concept of Italy and its geographical, historical, and cultural changes from the Middle Ages to the present as seen through the works of renowned writers, artists, and film directors. No knowledge of Italian required. Cross-listed with ITAL 048.

Upper-Division Courses

Eur 111a Survey of Russian Civilization 4 Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Covers pre-twentieth-century Russian music, architecture, and art. Any course within the EUR 111A, EUR 111B, and EUR 111C sequence may be taken independently. No knowledge of Russian is necessary.

Eur 111b Survey of Russian Civilization 4 Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Covers Russian symbolism and the Great Emigration. Any course within the EUR 111A, EUR 111B, and EUR 111C sequence may be taken independently. No knowledge of Russian is necessary.

Eur 111c Survey of Russian Civilization 4 Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Covers Soviet culture. Any course within the EUR 111A, EUR 111B, and EUR 111C sequence may be taken independently. No knowledge of Russian is necessary.

Eur 115 (E-Z) French Studies 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Varying topics relating to the literature, thought, and culture of France. Possible topics might include: the Paris mystique, French literary existentialism, individualism in the Renaissance. F: Paris; M: Medieval Women in France. No knowledge of French is necessary.

Eur 115f Paris 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Varying topics relating to the literature, thought, and culture of France. Possible topics might include: the Paris mystique, French literary existentialism, individualism in the Renaissance. F: Paris; M: Medieval Women in France. No knowledge of French is necessary.

Eur 115m Medieval Women in France 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Varying topics relating to the literature, thought, and culture of France. Possible topics might include: the Paris mystique, French literary existentialism, individualism in the Renaissance. F: Paris; M: Medieval Women in France. No knowledge of French is necessary.

Eur 119 (E-Z) Topics in Italian Culture 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. In-depth study of major topics in Italian institutions, society, and culture. E: Contemporary Italy; M: Making Of Italian Arts; R: Risorgimento: Birth Of The Italian Nation; U: Italian Urban Culture. No Knowledge Of Italian is Required.

Eur 120 Berlin Metropolis in Literature, Film, Music, and Art 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): Restricted to class level standing of sophomore, junior, or senior; or consent of instructor. An introduction to the metropolis Berlin as a gateway between the East and West. Explores topography of the city through film, art, music, and literary texts. Considers Berlin’s dramatic transformations as a microcosm of Germany and Europe’s troubled history in the twentieth century. Course conducted in English. Cross-listed with AHS 120, CPLT 111, GER 111, and MCS 178.

Eur 124 Nordic Mythology, Folklore, and Fairytales 4 Seminar, 3 hours; extra reading, 1 hour; written work, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces the representation of animals, plants, and other appearances of the natural world such as sunrise and sunset in European creation and destruction mythology, fairytales, and folklore. Cross-listed with GER 124.

Eur 125 German Fairy Tales: From Brothers Grimm to Hollywood 4 Lecture, 3 hours; screening, 2 hours; written work, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Explores German and European folk and fairy tales from the 18th and 19th centuries, their precursors, and their later variations and receptions in oral, literary, and media cultures of the past and present. Includes their role in American popular culture through adaptations by Disney and Hollywood. Cross-listed with CPLT 125, GER 125, and MCS 141.

Eur 137 Passions, Apparitions, and Automata 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introductory study of German Romanticism from its origins in Goethe to its development in Hoffmann. Topics include madness, sexual desire, doppelganger, homicide, and automata. All readings are in English; selected readings are in German for German majors and minors. Cross-listed with GER 137, and CPLT 137.

Eur 139 The Divine Comedy 4 Lecture, 3 hours; written work, 1 hour; extra reading, 2 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. A close reading of Dante’s “Divine Comedy” using a bilingual edition. Focuses on conceptual and aesthetic questions. Although the work is read in English, students without previous knowledge of Italian are given some instruction in it to enable them to understand parts of the original work. Cross-listed with CPTL 139 and ITAL 139.

Eur 140 Italian Literature of the Holocaust in Translation 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Explores the experiences of Italian Jews during Fascism. Analyses the attitudes of the Fascist regime, Italian people, and the Catholic Church as seen through the works of renowned Italian writers and directors. Course taught in English. Cross-listed with ITAL 140.

Eur 150 Italian Theatre 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. A study of the development of Italian theatre from the commedia dell’arte to the present. Discusses works by Ruzzante, Machiaveli, Metastasio, Goldoni, Alfieri, Verga, Pirandello, Fo, and Rame. Includes videos of plays, melodramas, and operas. No knowledge of Italian required. Cross-listed with ITAL 150.

Eur 158 Italian Literature in the Period of Unification 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): Restricted to class level standing of junior, or senior; A study of nineteenth-century Italian literature. Emphasizes the pre-Unification “Risorgimento” period through the works of Foscolo, Leopardi, Pellico, and Manzoni. No knowledge of Italian required. Cross-listed with ITAL 158.

Eur 185 Modern and Contemporary Italian Literature in Translation 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor; Considered selected works by authors who exemplify major cultural and literary trends in Italy from the period of unification (1860s) to the present. Readings are supplemented by viewing of films. No knowledge of Italian is required. Cross-listed with ITAL 185.

Eur 192 Workshop in European Languages 1 Workshop, 1 hour. Prerequisite(s): concurrent enrollment in an upper-division course in European literature or culture that is taught in English. Taken in conjunction with an upper-division course in European literature or culture, provides discussion and alternative assignments in the language of the student’s emphasis. Course is repeatable to a maximum of 6 units.

Classical Studies

College of Humanities, Arts, and Social Sciences

Committee in Charge

D. Williams, Ph.D, Dean, College of Humanities, Arts, and Social Sciences, ex officio

J. Salzman (History)

J. Muller (Philosophy)

M. Khelfaf (Comp Lit & Lang)

K. Khellaf (Comp Lit & Lang)

B. King, non-voting

D. Williams, Ph.D, Dean, College of Humanities, Arts, and Social Sciences, ex officio

The objective of the B.A. in Classical Studies is the furthering of knowledge of classical civilization through two emphases: the study of Greek and/or Latin language(s) and literature(s) and the study of courses in English translation on topics including classical literature, history, politics, religion, mythology, and art in order to aid students’ appreciation of the Greek and Roman contributions to later Western civilization.

The student who major in Classical Studies acquires a balanced yet focused view of the language, literature, thought, and civilization of Greece and Rome. The student also obtains the valuable skills of a better vocabulary, a sharper critical sense, logical analysis of
exposure to both the Greek and Roman con-

Major
Language Proficiency
All students in Classical Studies must complete either LATN 001, LATN 002, and LATN 003 (or equivalents) or GRK 001, GRK 002, and GRK 003 (or equivalents). They must also complete 12 upper-division units (or the equivalent) of course work in Latin or Greek.

1. Language proficiency requirement:
a) either LATN 001, LATN 002, and LATN 003 (or equivalents) or GRK 001, GRK 002, and GRK 003 (or equivalents)

b) Twelve (12) upper-division units or the equivalent of course work in Latin or Greek.

Civilization requirement
Two courses from CLA 010A, CLA 010B, or CLA 010C, or CLA 010D

3. a) CPLT 001 or CPLT 001W and 1 lower-division CPLT course (8 units)
b) CPLT 193 (4 units). CPLT 196 strongly recommended but not required.

Twenty-four (24) units from the following:
a) Upper-division Latin or Greek literature courses beyond the language proficiency requirement
b) AHS 147, AHS 148, CLA 100/HISE 110 CLA 102/CPAC 102, CLA 112/CPCLT 112/RLST 117, CLA 113/CPAC 112/HISE 113, CLA 114/CPLT 114, CLA 120 (E-Z), CLA 121/CPAC 121/POSC 121, CLA 132/AST 132/CHN 132/CPAC 132, CLA 141/AST 145/CHN 141/CPAC 141/POS 140, CLA 190, GRK 190, HISE 111, HISE 112, HISE 114/CPAC 133, HISE 115, HISE 116, HISE 117, HISE 118, HIST 110/CPAC 134, LANTN 190, PHIL 120 (E-Z), PHIL 121Q, POSC 110, RLST 136, THEA 125E

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Classics

Subject abbreviation: CLA

Lower-Division Courses
CLA 010A Ancient Civilization: Early Greece and the Mediterranean 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): none. A broad treatment of history, art and archaeology, and literature, read in translation, comprising a cultural survey of the origins and the first formation of Western civilization.

CLA 010B Ancient Civilization: Classical Greece 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. A broad treatment of history, art and archaeology, and literature, read in translation, comprising a cultural survey of the origins and the first formation of Western civilization.

CLA 010C Ancient Civilization: Rome 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. A broad treatment of history, art and archaeology, and literature, read in translation, comprising a cultural survey of the origins and the first formation of Western civilization.

CLA 010D Ancient Civilization: Alexander the Great and the Hellenistic World 4 Lecture, 3 hours; discussion, 1 hour. An introduction to Alexander the Great and his legacy in shaping the Hellenistic World. Key themes include Alexander’s military conquests in Asia; the kingdoms established by his successors with emphasis on the Ptolemaic and Seleucid dynasties; cultural contact, ethnographic writing, and intercultural societies; and scientific, agricultural, and military technologies.

CLA 017 Rome: the Ancient City 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. Traces the development of the city of ancient Rome. By studying the literary and historical evidence alongside the physical remains of the city—its monuments, art, and historical and archaeological remains—this course seeks to introduce students to the Romans and to their importance for later ages. Cross-listed with AHS 030, and HIST 027.

CLA 020 Word Power From Greek and Latin Roots 4 Lecture, 3 hours; discussion, 1 hour. An intensive study of Greek and Latin elements in English etymology and word derivation. No knowledge of Greek or Latin necessary.

CLA 030 Scientific Word Power From Latin and Greek Roots 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. A systematic analysis of the scientific terminology in English derived from Greek and Latin stems, including those in the biological and natural sciences. Aims are to teach word-analysis, to increase technical and taxonomic vocabulary, and to study our linguistic and cultural debt to Greek and Roman scientific language.

CLA 040 Classical Mythology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introductory survey of the mythology of Greece and Rome. Includes the divine myths, heroic legends, and the implications of these polytheistic systems for ancient culture.

CLA 045 The Ancient World in Film and Television 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. A study of representations of Greece and Rome in film, television, and other modern media. Introduces these “visual texts” both as popular art forms on their own and in relation to their ancient and modern literary sources. Cross-listed with MCS 038.

CLA 050 Folktales, Monsters, and Magic in Ancient Greece and Rome 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. Examines beliefs of the supernatural as part of life in the ancient world. Topics include magic and witchcraft, the fear of demons and ghosts, and the wish to manipulate invisible powers. Utilizes a variety of media and sources both ancient and modern.

Upper-Division Courses
CLA 100 Ancient Historians 4 Lecture, 3 hours; research, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. The historical development of historiography as evidenced in ancient historical writings from Near Eastern king lists and biblical histories to the narrative histories of Greece and Rome. Focuses on the ideas of history in the various cultures of the ancient Near East and Mediterranean and their relation to modern historical thought. Cross-listed with HISE 110.
CLA 102 Ancient Civilizations and Later Identities 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Topical survey of aspects of ancient civilizations appropriated and re-applied to modern cultures. Course is repeatable as content changes to a maximum of 12 units. Cross-listed with CPAC 102.

CLA 112 Mythology 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A comparative study of mythic traditions from several world cultures and religions viewed from a variety of theoretical perspectives. Includes material drawn from epics, religious texts, divine hymns, creation myths, heroic legends, and concepts of the afterlife as reflected in literary and nonliterary sources. Cross-listed with RLST 117, and CPLT 112.

CLA 113 Comparative Ancient Historical Writing 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of the literary as well as historical writing in ancient cultures, with some comparison of the ancient contribution to later authors of the genre. Cross-listed with CPAC 112, and HISE 113.

CLA 114 The Classical Tradition 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of the legacy of Greece and Rome in Western culture, from the Renaissance to the present. Topics include literature, art, architecture, and politics. Cross-listed with CPLT 114.

CLA 120 (E-Z) Themes and Issues of the Classical World 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Focuses on an aspect of antiquity of critical importance to modern culture, and examines the relevant literary texts, artistic monuments, and cultural data. Students explore and interpret ancient sources to gain an appreciation of the differences and similarities between the classical world and the world today. All readings are in English; no knowledge of foreign languages is required. Ancient Sexuality And Gender: Myths And Realities; F. Greco-roman Popular Culture; G. Reading Greek And Roman Sports; J. Guide To Living In The Ancient World.

CLA 121 Monarchy 4 Lecture, 3 hours; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. A cross-cultural survey of the institution of monarchy in the ancient world and its role in political, social, economic, and religious life. Cross-listed with CPAC 121, and POSC 121. Credit is awarded for only one of CLA 121/CPAC 121/POS 121 or CLA 121S/CPAC 121S/POS 121S.

CLA 121S Monarchy 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines the cross-cultural survey of the institution of monarchy in the ancient world and its role in political, social, economic, and religious life. Cross-listed with POSC 121S, and CPAC 121S. Credit is awarded for only one of CLA 121/CPAC 121/POS 121 or CLA 121S/CPAC 121S/POS 121S.

CLA 132 Medical Traditions in China and Greece 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): AST 030 or CHN 030 or CHN 104 or CHN 107 or AST 142 or CHN 142 or RLST 142 or AST 148 or CHN 148 or CLA 010A or CLA 010B or CLA 010C or CLA 040 or CLA 050 or CLA 100 or HSE 110 or CLA 102 or CPAC 102 or CLA 112 or CPLT 112 or RLST 117 or CLA 114 or CPLT 114 or CLA 116 or CLA 117 or HSE 114 or CPAC 136 or HST 110 or CPAC 141 or AST 145 or CHN 141 or CLA 141 or POSC 140 or CPAC 143 or CHN 143 or RLST 140 or CPLT 140; restricted to class level standing of junior, or senior; or consent of instructor. A comparative examination of the early development of Western medical traditions in classical Greece and the origins and development of the Chinese medical systems (now referred to as traditional Chinese medicine). Focuses on their cultural and social contexts. Cross-listed with AST 132, CHN 132, and CPAC 132.

CLA 141 Militarism and Hegemony in the Ancient World 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CHN 030 or AST 030 or CHN 104 or CHN 107 or AST 142 or CHN 142 or RLST 142 or AST 148 or CHN 148 or CLA 010A or CLA 010B or CLA 010C or CLA 040 or CLA 050 or CLA 100 or HSE 110 or CLA 112 or CPLT 112 or RLST 117 or CLA 114 or CPLT 114 or CLA 120E or CPAC 102 or CLA 102 or CPAC 112 or CLA 113 or HSE 113 or CPAC 121 or CLA 121 or POSC 121 or CLA 132 or CLA 133 or HSE 114 or CPAC 134 or HST 110 or CLA 143 or CPAC 143 or CHN 143 or RLST 143 or CPAC 145 or CLA 116 or HSE 114; restricted to class level standing of junior, or senior; or consent of instructor. Comparative study of ancient warfare and hegemony in two or more civilizations of the ancient world. Perspectives may include social and political contexts, gender and war, acquisition of empire, religious wars, and weapons, strategies and tactics in theory and practice. Study of primary source material in texts and visual arts. Cross-listed with AST 145, CHN 141, CPAC 141, and POSC 140.

CLA 143 Divination and Prediction in China and Greece 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): AST 030 or CHN 030 or CPLT 030 or CHN 104 or CHN 107 or AST 142 or CHN 142 or RLST 142 or AST 148 or CHN 148 or CLA 010A or CLA 010B or CLA 010C or CLA 040 or CLA 050 or CLA 100 or HSE 110 or CPLT 112 or RLST 117 or CLA 114 or CPLT 114 or CLA 120 or CPAC 102 or CLA 102 or CPAC 112 or CLA 113 or HSE 113 or CPAC 121 or CLA 121 or POSC 121 or CLA 132 or AST 132 or CHN 132 or CLA 133 or CPAC 133 or HSE 114 or CPAC 134 or HST 110 or CPAC 143 or CHN 143 or RLST 143 or CPAC 145 or CLA 116 or HSE 114; restricted to class level standing of junior, or senior; or consent of instructor. Comparative study of early divination and prediction in early China, ancient Greece, and two other areas of the ancient world. Perspectives include social and intellectual contexts and institutions, as well as gender and boundaries between science, philosophy, and religion. Utilizes primary source material in texts and visual arts. Cross-listed with CHN 143, CPAC 143, and RLST 143.

CLA 190 Special Studies 1 to 5 Prerequisite(s): To be taken with the consent of the chair of the department as a means of meeting special curricular problems or deficiencies. Course is repeatable.

Graduate Courses
See also UC Tri-Campus Graduate Program in Classics.

CLA 200A Contemporary Literary Theory and the Classics 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. An introduction to contemporary literary theory focusing on important critical approaches. Topics vary from year to year. Requires written work that explores theoretical issues and involves engagement with a Greek or Latin text. This work may, for example, illustrate some aspect of a theorist's work, put two theorists into dialogue, or explore the usefulness of a particular approach to texts, authors, or genres. Taught at UC Irvine. Same as UC Irvine CLASSIC 200A. Course is repeatable.

CLA 200B Diachronic Perspectives On Classical Antiquity 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. Examines ways in which classical texts and ideas have been received and appropriated for the diverse purposes of ancient and subsequent cultures. Taught at UC Irvine. Same as UC Irvine CLASSIC 200B. Course is repeatable.

CLA 200C Greece and Rome in Their Contemporary Cultural Contexts 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. An introduction to the methods and perspectives of social scientific theory used to study the material and social dimensions of the ancient cultures of Greece and Rome. Taught at UC Irvine. Same as UC Irvine CLASSIC 200C. Course is repeatable.

CLA 201 Research Methods in Classical Studies 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. Covers various technical skills essential for successful research and pedagogy in Classics. Includes use of digital resources (e.g., bibliographical databases). Introduces important disciplinary subfields, such as textual criticism and epigraphy. Selection of topics is at the instructor's discretion. Taught at UC Irvine. Same as UC Irvine CLASSICS 201. Course is repeatable.

CLA 250 Seminar in Classics 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. Focuses mainly, but not exclusively, on major literary topics. Subject matter varies. Taught at UC Irvine. Same as UC Irvine CLASSIC 220. Course is repeatable.
CLA 290 Directed Studies 1 to 6 Research, 3 to 18 hours. Prerequisite(s): consent of instructor and graduate advisor; normally open only to students in the UC Tri-Campus Graduate Program in Classics. Supervised independent research. Same as UC Irvine CLASSIC 280. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CLA 292 Concurrent Studies in Classics 2 Individual Study, 6 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. Concurrent enrollment in an advanced undergraduate Greek or Latin course, with credit awarded for additional reading and separate examinations. Same as UC Irvine CLASSIC 205. Course is repeatable.

CLA 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. Research in preparation for the Candidacy Examination. Same as UC Irvine CLASSIC 290. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CLA 299 Research For the Thesis Or Dissertation 1 to 12 Research, 3 to 36 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. Directed research for the M.A. thesis or Ph.D. dissertation. Same as UC Irvine CLASSIC 299. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Course
CLA 302 Teaching Practicum 1 to 4 Practicum, 3 to 12 hours. Prerequisite(s): CPLT 301 or equivalent; graduate standing; employment as a teaching assistant or associate in. Supervised teaching in lower-division courses. Required of all teaching assistants in Classics. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Greek Courses

Upper-Division Courses
GRK 101 (E-Z) Advanced Greek Reading and Grammar 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): GRK 003 with a grade of C- or better. One or two of the following will be offered every year, according to need. E. Homer (IIiad); F. Homer ( Odyssey); G. Lyric Poets; H. Aeschylus; I. Sophocles; J. Euripides; K. Aristophanes; L. Herodotus; M. Thucydides; N. Xenophon; O. The Attic Orators; Q. Aristotle; R. New Testament; T. Hellenistic And Later Greek.

GRK 107 Plato 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): GRK 003 with a grade of “C-” or better. An introduction to the language and philosophical thought of Plato. Close reading of selections from one or more Platonic dialogues.

GRK 141 The Pre-Socratics 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): GRK 003 with a grade of “C-” or better or equivalent. An introduction to the Pre-Socratic philosophers through close reading of selected passages from a variety of authors, in both prose and verse.

GRK 190 Special Studies 1 to 5 Prerequisite(s): To be taken with the consent of the instructor as a means of meeting special curricular problems. Course is repeatable.

Graduate Courses
See also UC Tri-Campus Graduate Program in Classics.

CPLT 290 Directed Studies 1 to 6 Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

GRK 292 Concurrent Analytical Studies 2 Research, 6 hours. Prerequisite(s): consent of instructor; concurrent enrollment in GRK 100-series course. To be taken on an individual basis. Each student completes a graduate paper based on research related to the GRK 100-series course. Course is repeatable.

Professional Course
CPLT 301 Teaching of Foreign Language at the College Level 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing; or senior standing with consent of instructor. Covers first and second language acquisition; general models of L2 learning; learning different types of grammar; learning other components of language: acquisition of pronunciation, vocabulary, and discourse; multilingual societies and the goals of language teaching; and implications of second language acquisition research for the foreign language classroom. Graded Satisfactory (S) or No Credit (NC).

Latin Courses

Subject abbreviation: LATN

Foreign Language Placement Examination
A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and placementtest.ucr.edu for date and time. Transfer students who have taken a college-level language course may not take the placement examination and should consult with their advisors. No college-level credit may be duplicated. See college placement examination policy.

Lower-Division Courses
LATN 001 Introduction to Latin 4 Lecture, 4 hours. Prerequisite(s): none. Intensive study of the fundamentals of the Latin language with practice in reading and writing.

LATN 002 Introduction to Latin 4 Lecture, 4 hours. Prerequisite(s): LATN 001 with a grade of “C-” or better or equivalent. Intensive study of the fundamentals of the Latin language with practice in reading and writing.

LATN 003 Introduction to Latin 4 Lecture, 4 hours. Prerequisite(s): LATN 002 with a grade of “C-” or better or equivalent. Intensive study of the fundamentals of the Latin language with practice in reading and writing.

Upper-Division Courses
LATN 101 (E-Z) Advanced Latin Reading and Grammar 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): LATN 003. One or two of the following segments are offered every year according to need. E. Plautus; F. Terence; G. Virgil; H. Catullus; I. Horace; J. Ovid; K. Propertius; L. Tibullus; N. Cicero; O. Livy; P. Tacitus; Q. Juvenal; R. Lucretius; S. Seneca; T. Pliny; U. Medieval Latin; Z. Renaissance Latin.

LATN 107 Sallust 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): LATN 003 with a grade of “C-” or better or equivalent. Close reading of selections from Sallust. Primary focus on building a proficiency in reading Latin prose.
LATN 135 The Roman Novel 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): LATN 003. Involves reading and discussion of Latin prose fiction as represented by Petronius’ Satyricon and/or Apuleius’ Metamorphoses. Emphasizes the development of the romantic novel in Latin.

LATN 190 Special Studies 1 to 5 Individual study, 3 to 15 hours. Prerequisite(s): LATN 003. To be taken as a means of meeting special curricular needs. Course is repeatable.

Graduate Courses
See also UC Tri-Campus Graduate Program in Classics.

CPLT 290 Directed Studies 1 to 6 Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

LATN 292 Concurrent Analytical Studies 2 Research, 6 hours. Prerequisite(s): consent of instructor; concurrent enrollment in LATN 100-series course To be taken on an individual basis. Student will complete a graduate paper based on research related to the LATN 100-series course. Course is repeatable with different topic.

Professional Course
CPLT 301 Teaching of Foreign Language at the College Level 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing, or senior standing with consent of instructor. Covers first and second language acquisition; general models of L2 learning; learning different types of grammar; learning other components of language: acquisition of pronunciation, vocabulary, and discourse; multilingual societies and the goals of language teaching; and implications of second language acquisition research for the foreign language classroom. Graded Satisfactory (S) or No Credit (NC).

The UC Tri-Campus Graduate Program in Classics

https://www.humanities.uci.edu/classics/graduate/index.php

(UC Irvine, UC Riverside, UC San Diego)
The UC Tri-Campus Graduate Program in Classics is a joint venture that combines faculty in Classics and related disciplines from the three southernmost UC campuses.

Students accepted into the program may enroll at any of the three campuses, but they normally apply for admission to the Tri-Campus program through UC Irvine, which is the main location for instruction and administration. Applications to the Tri-Campus program are reviewed by an admissions committee composed of faculty members from all three campuses.

The goal of the program is to provide a graduate education that unites the main currents of modern literary, cultural, and social-scientific theory with the traditional skills and methodologies of classical philology. Candidates for degrees must exhibit facility in Greek and Latin, competence in research, including theoretical approaches to texts and objects, technical mastery of computing for research and teaching, and experience in teaching.

These goals are realized through the four core courses (CLA 200A, CLA 200B, CLA 200C, and CLA 201), seminars (UC Riverside CLA 250/UC Irvine CLASSICS 220) and reading courses (UC Riverside CLA 292/UC Irvine CLASSICS 205).

All students are admitted into the Ph.D. program. With the exception of those granted advanced standing because they hold the M.A. degree in Classics from another institution, entering students are concurrently enrolled in the M.A. program.

Master’s Degree
Students are admitted into the Ph.D. program only. Entering students who do not already hold a master’s degree in Classics from another institution will be required to complete M.A. requirements while pursuing the Ph.D.

The requirements for the M.A. degree in Classics are two years (six quarters) of course work, passage of a special set of examinations, and completion of a master’s paper. The normal course load is three 200-level courses each quarter. Minimum course requirements are four quarters of CLA 200A, CLA 200B, CLA 200C, and CLA 201; four quarters of UC Riverside CLA 292/UC Irvine CLASSICS 205; and four quarters of UC Riverside CLA 250/UC Irvine CLASSICS 220. (UC Riverside CLA 292/UC Irvine CLASSICS 280 may be substituted for these courses at the discretion of the faculty.) Requires a reading knowledge of either Germanic Studies, French, Italian, or equivalent language, demonstrated by examination or other means.

Normative Time to Degree Two years

Doctoral Degree
The requirements for the Ph.D. degree in Classics are three years (nine quarters) of course work. Minimum course requirements are four quarters of CLA 200A, CLA 200B, CLA 200C, and CLA 201; five quarters of UC Riverside CLA 292/UC Irvine CLASSICS 205; and six quarters of UC Riverside CLA 250/UC Irvine CLASSICS 220 or an equivalent course. (UC Riverside CLA 292/UC Irvine CLASSICS 280 may be substituted for these courses at the discretion of the Program faculty.) Students are encouraged to take courses and seminars in relevant areas outside the program at any of the three campuses.

Students must demonstrate reading proficiency in a second modern language by the end of the third year. By the end of the third year and during the fourth year of study, students must have read extensively in the primary texts and in literary history and theory and in ancient history. To qualify as a candidate and enter the dissertation stage, a student must pass an individually designed set of qualifying examinations, including translation examinations in Greek and Latin, written examinations or lengthy papers in special authors and fields, and an oral examination.

The facilities, course offerings, programs, and individual faculty mentorship of all three campuses are available to students in the Tri-Campus degree program. The resources of the program are enhanced through a cooperative teaching arrangement among the Tri-Campus program and the Classics graduate programs of UC Los Angeles and the University of Southern California.

Foreign Language Requirement Students must demonstrate reading proficiency in a second modern language by the end of the third year.

Teaching Requirement Experience in supervised teaching and/or research activity is normally required.

Normative Time to Degree Six years

Faculty
Michele Salzman, Ph.D. Director
Professor of History, UCR; Late Antiquity; Roman History and Literature, Religion, Gender and Sexuality Studies
Georgios Anagnostopoulos, Ph.D.
Professor of Philosophy, UCSD; Ancient Greek Philosophy, Ethics, Metaphysics
Cynthia L. Claxton, Ph.D.
Lecturer in Classics, and graduate teaching supervisor, UCI; Greek prose, Historiography
Page duBois, Ph.D.
Professor of Classics and Comparative Literature, UCSD; Greek Literature, Rhetoric, Critical Theory, Cultural Studies
Zina Giannopoulou, Ph.D.
Associate Professor of Classics, UCI; literary theory and Platonic hermeneutics, classical and Hellenic philosophy, Greek tragedy and epic.
David Glidden, Ph.D.
Professor Emeritus of Philosophy, UCR; Greek and Roman Philosophy
Anna Gkonosova, Ph.D.
Associate Professor of Art History, UCI; Byzantine and Medieval Art
Denver Graninger, Ph.D.
Associate Professor of History, UCR; Greek and Roman History, Greek Epigraphy and Archaeology
Monte Johnson, Ph.D.
Associate Professor of Philosophy, UCSD; Classical and Hellenistic Philosophy; Aristotle, Democritus and their later reception in philosophy and science
Dayna Kalleres, Ph.D.
Associate Professor of History and Religious Studies, UCSD; Late Antiquity, Religious Studies, and Critical Theories of Religion
Andromache Karanika, Ph.D.
Associate Professor of Classics, UCI; Greek Epic Poetry, Greek Lyric, Folklore
Benjamin King, Ph.D.
Lecturer in Classics, UCR; Greek Literature and Philosophy
Margaret M. Miles, Ph.D.
Associate Professor of Art History, UCI; Greek and Roman Art and Archaeology, Ancient Sicily, Greek Religion
Graduate Courses

Most of the following courses are taught at the UC Irvine campus.

See also CLA 302 under the Classics section.

CLA 200A Contemporary Literary Theory and the Classics 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. An introduction to contemporary literary theory focusing on important critical approaches. Topics vary from year to year. Requires written work that explores theoretical issues and involves engagement with a Greek or Latin text. This work may, for example, illuminate some aspect of a theorist’s work, put two theorists into dialogue, or explore the usefulness of a particular approach to texts, authors, or genres. Taught at UC Irvine. Same as UC Irvine CLASSIC 200A. Course is repeatable.

CLA 200B Diachronic Perspectives On Classical Antiquity 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. Examines ways in which classical texts and ideas have been received and appropriated for the diverse purposes of ancient and subsequent cultures. Taught at UC Irvine. Same as UC Irvine CLASSIC 200B. Course is repeatable.

CLA 200C Greece and Rome in Their Contemporary Cultural Contexts 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. An introduction to the methods and perspectives of social scientific theory used to study the material and social dimensions of the ancient cultures of Greece and Rome. Taught at UC Irvine. Same as UC Irvine CLASSIC 200C. Course is repeatable.

CLA 201 Research Methods in Classical Studies 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. Covers various technical skills essential for successful research and pedagogy in Classics. Includes use of digital resources (e.g., bibliographical databases). Introduces important disciplinary subfields, such as textual criticism and epigraphy. Selection of topics is at the instructor’s discretion. Taught at UC Irvine. Same as UC Irvine CLASSICS 201. Course is repeatable.

CLA 250 Seminar in Classics 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. Focuses mainly, but not exclusively, on major literary topics. Subject matter varies. Taught at UC Irvine. Same as UC Irvine CLASSIC 220. Course is repeatable.

CLA 290 Directed Studies 1 to 6 Research, 3 to 18 hours. Prerequisite(s): consent of instructor and graduate advisor; normally open only to students in the UC Tri-Campus Graduate Program in Classics. Supervised independent research. Same as UC Irvine CLASSIC 280. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CLA 292 Concurrent Studies in Classics 2 Individual Study, 6 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. Concurrent enrollment in an advanced undergraduate Greek or Latin course, with credit awarded for additional reading and separate examinations. Same as UC Irvine CLASSIC 205. Course is repeatable.

CLA 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. Research in preparation for the Candidacy Examination. Same as UC Irvine CLASSIC 299. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CLA 299 Research For the Thesis Or Dissertation 1 to 12 Research, 3 to 36 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. Directed research for the M.A. thesis or Ph.D. dissertation. Same as UC Irvine CLASSIC 299. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Comparative Ancient Civilizations

Subject abbreviation: CPAC
College of Humanities, Arts, and Social Sciences

Committee in Charge
Christopher Chase-Dunn (Sociology)
Lucille Chia (History)
Denver Graninger (History)
Kyle Khelaf (Comp Lit & Lang)
Matthew King (Religion)
John Laursen (Political Science)
Jozef Muller (Philosophy)
Michele Salzman (History)
Karl Taube (Archaeology)
Sabine Thuerwaechter (Comp Lit & Lang)
Daryle Williams, Ph.D. Dean, College of Humanities, Arts, and Social Sciences, ex officio

The Comparative Ancient Civilizations B.A. combines the breadth of an interdisciplinary major with the focus of more traditional majors like History or Classical Civilization. By undertaking a comparison of several major cultures of the past that have continued importance in the construction of our present world, the program affords a truly liberal education. Students have a unique opportunity to employ the methods of humanities and social sciences in their major study. They acquire skills of historical and social analysis, multicultural awareness, insight into constructions of gender and sexuality, and mental flexibility.

The major is an excellent choice as a double major taken along with any of the traditional disciplines to add distinction and intellectual breadth to one’s background.

Major

1. Lower-division requirements (20 units):
   CPTL 001 or CPTL 001W, 1 lower-division CPTL course, and any three from ANTH 003, ANTH 004, AST 030/CHN 030, CLA 010A, CLA 010B, CLA 010C, CPTL 017A

2. Upper-division requirements (44 units)
   a) At least 16 units from CPAC 102/CLA 102, CPAC 112/CLA 113/HISE 113, CPAC 121/CLA 121/POSC 121, CPAC 132/AST 132/CHN 132/CLA 132, CPAC 133/HISE 114, CPAC 134/HIST 110, CPAC 141/AST 141/CHN 141/CLA 141/AST 145/POSC 140
   b) CPTL 193 (4 units). (CPTL 196 strongly recommended but not required)
   c) The balance (26 units) from any of the following upper-division courses in related disciplines; students are recommended, in consultation with their advisor, to focus on one or two ancient civilizations in related courses to obtain special depth in those areas. Since related course offerings in these areas are often added, some of the most recent courses acceptable to fulfill this requirement may not be listed and students are advised to consult with the major advisor.

Upper-Division Courses
CPAC 102 Ancient Civilizations and Later Identities 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Topical survey of aspects of ancient civilizations appropriated and re-applied to modern cultures. Course is repeatable as content changes to a maximum of 12 units. Cross-listed with CLA 102.

CPAC 112 Comparative Ancient Historical Writing 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of the literary aspects of historical writing in ancient cultures, with some comparison of the ancient contribution to later authors of the genre. Cross-listed with CLA 113, and HISE 113.

CPAC 121 Monarchy 4 Lecture, 3 hours; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. A cross-cultural survey of the institution of monarchy in the ancient world and its role in political, social, economic, and religious life. Cross-listed with CLA 121, and POSC 121. Credit is awarded for only one of CLA 121/CPAC 121/POSC 121 or CLA 121S/CPAC 121S/POSC 121S.

CPAC 121S Monarchy 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines the cross-cultural survey of the institution of monarchy in the ancient world and its role in political, social, economic, and religious life. Cross-listed with POSC 121S, and CLA 121S. Credit is awarded for only one of CLA 121/CPAC 121/POSC 121 or CLA 121S/CPAC 121S/POSC 121S.

CPAC 129A Introduction to Maya Hieroglyphs 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or ANTH 005 or ANTH 007 or ANTH 007S; or consent of instructor. Introduces the Maya hieroglyphs and critically evaluates its political history. Topics include three Maya calendars, a basic grammar (logographs, syllables, verbs, pronouns), three writing methods (transcriptions, transliteration, and translation), dynamic events, gods, supernaturals, and political interactions. Cross-listed with ANTH 129A, and LNST 129A.

CPAC 129B The Linguistics of Ancient Maya Writing 4 Lecture, 3 hours; extra reading, 2 hours; research, 3 hours; term paper, 1 hour. Prerequisite(s): ANTH 129A; or consent of instructor. Analyzes and critically evaluates the linguistics of Ancient Maya Writing. Topics include grammar (transitive, intransitive, positional, active, passive, mediopassive, antipassive, inchoactive verbs, tense, aspect, transitive perfect, noun, pronoun, morphosyllable, phonology); three writing methods (transcriptions, transliteration, and translation); title and rank; scripts and ideologies; and dynamic interactions. Cross-listed with ANTH 129B, and LNST 129B.

CPAC 132 Medical Traditions in China and Greece 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): AST 030 or CHN 030 or CHN 104 or CHN 107 or AST 142 or CHN 142 or RLST 142 or AST 148 or CHN 148 or CHN 149 or CHN 150 or CHN 151 or CHN 152 or CHN 153 or CHN 154 or AST 145 or CHN 141 or CLA 161 or POSC 140; restricted to class level standing of junior, or senior; or consent of instructor. A comparative examination of the early development of Western medical traditions in classical Greece and the origins and development of the Chinese medical systems (now referred to as traditional Chinese medicine). Focuses on their cultural and social contexts. Cross-listed with AST 132, CHN 132, and CLA 132.

CPAC 133 Ancient Writing and Literacy 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Uses cross-cultural comparison to survey writing and literacy in ancient civilizations and how they are related in the origin and development of selected ancient cultures. Cross-listed with HISE 114.

CPAC 134 History of Ancient Astronomy 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the origins and history of ancient astronomy from Mesopotamia to the Greco-Roman world. Topics include the problems of the calendar and planetary motion, and the relation between astronomy and astrology in the ancient world. Focuses on readings from primary texts. Cross-listed with HIST 110.

CPAC 141 Militarism and Hegemony in the Ancient World 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CHN 030 or AST 030 or CHN 104 or CHN 107 or AST 142 or CHN 142 or RLST 142 or AST 148 or CHN 148 or CLA 010A or CLA 010B or CLA 010C or CLA 040 or CLA 050 or CLA 100 or HISE 110 or CLA 112 or CLT 112 or RLST 117 or CLA 114 or CLT 114 or CLA 120 or CPAC 102 or CPAC 112 or CLA 113 or HISE 115 or CLA 121 or CLA 121S or POSC 121 or CPAC 132 or AST 132 or HIST 110 or CLA 114 or HIST 110 or CLA 143 or CPAC 143 or CHN 143 or RLST 143 or CLA 120 or CLA 120 or CLA 120S or CPTL 120; restricted to class level standing of junior, or senior; or consent of instructor. Comparative study of ancient warfare and hegemony in two or more civilizations of the ancient world. Perspectives may include social and political contexts, gender and war, acquisition of empire, religious wars, and weapons, strategies and tactics in invasion and practice. Study of primary source material in texts and visual arts. Cross-listed with AST 145, CHN 141, CLA 141, and POSC 140.

CPAC 143 Divination and Prediction in China and Greece 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): AST 030 or CHN 030 or CLT 030 or CHN 104 or CHN 107 or AST 142 or CHN 142 or RLST 142 or AST 148 or CHN 148 or CLA 010A or CLA 010B or CLA 010C or CLA 040 or CLA 050 or CLA 100 or CLA 112 or HISE 110 or CLT 112 or CLA 114 or CLT 114 or CLA 120 or CPAC 102 or CLA 113 or HISE 113 or CLA 121 or POSC 121 or CPAC 132 or AST 132 or HIST 110 or CLA 123 or CPAC 133 or HIST 114 or CLA 143 or CPAC 143 or CHN 143 or RLST 143 or CLA 120 or CLA 120 or CLT 120; restricted to class level standing of junior, or senior; or consent of instructor. Comparative study of early divination and prediction in early China, ancient Greece, or two other areas of the ancient world. Perspectives include social and intellectual contexts and institutions, as well as gender
Comparative Literature and World Literature majors may also work with translations. In English translations. Comparative Literature present. Non-majors may do all the readings may be English, and three for graduates) they majors read whenever possible in the language of the course. Undergraduate or graduate, require that the student seeks to promote the study of interdisciplinary cultural traditions; on the graduate level, it interdisciplinary field which is studied interdisciplinarily. Literature is an interdisciplinary field which is studied interdisciplinarily. The department offers the B.A. in Comparative Literature/Arabic, Michelle E. Bloom, Ph.D. Comparative Literature/French, Heidi Brevik-Zender, Ph.D. Comparative Literature/French, Vrinda Chidambaram, Ph.D. Linguistics, Johannes Endres, Ph.D. Germanic Studies/Comparative Literature, Kelly Jeong, Ph.D. Chinese Literature/Language and Culture, Anthonia Kalu, Ph.D. African Literature and Culture/Comparative Literature, Kyle Khellaf, Ph.D. Classics, John N. Kim, Ph.D. Germanic Studies/Japanese/Comparative Literature, Mariam Beevi Lam, Ph.D. Vietnamese/Comparative Literature, Eugene Perry Link, Ph.D. Chinese Literature/Language and Culture, Anne Mc Knight, Ph.D. Japanese/Comparative Literature, Yenna Wu, Ph.D. Chinese/Civilizations/Comparative Literature, Daryle Williams, Ph.D. Dean, College of Humanities, Arts, and Social Sciences, ex officio. The department offers the B.A. in Comparative Literature. Comparative Literature is an interdisciplinary field which is studied internationally. At UCR, the Comparative Literature curriculum is organized around a core staff of comparatists assisted by qualified faculty from other departments and programs. The discipline of Comparative Literature encourages study of interliterary relationships among various cultural traditions; on the graduate level, it seeks to promote the study of interdisciplinary relationships. Comparative Literature courses, undergraduate or graduate, require that the majors read whenever possible in the languages (two for undergraduates, one of which may be English, and three for graduates) they present. Non-majors may do all the readings in English translations. Comparative Literature majors may also work with translations. Comparative Literature and World Literature courses are open to all students. **Major**

1. **Lower-division requirements**
   (12 units plus proficiency)
   a) Proficiency in at least one language (besides English), ancient or modern, through the intermediate level (second year)
   b) CPLT 001 or CPLT 001W, and 1 lower-division CPLT course
   c) CPLT 07C or 1 lower-division ARCL, CHN, CLA, CPAC, CPLT, EUR, FREN, GER, ITAL, JPN, KOR, RUSN, SEAS, or VNM course on literature, culture, cinema, or the like

2. **Upper-division requirements** (36 units)
   a) Twelve (12) units in one literature, distributed as much as possible among courses representing the various literary periods
   b) Eight (8) units in a second literature
   c) CPLT 110, CPLT 193, (CPLT 196 strongly recommended but not required)
   d) Eight (8) elective units in Comparative Literature

Students contemplating graduate study in Comparative Literature are urged to complete two years in a second (non-English) language before graduation.

**Graduate Programs**

The Department of Comparative Literature and Languages grants graduate degrees based on the comparative studies of world literatures and cultures. The Ph.D. degree has three tracks: Interliterary Studies, Interdisciplinary Studies, and Science Fiction, Science, and Literature described below. The department faculty, well balanced between Asianists and Europeanists, share a strong commitment to the study of literature through comparative and interdisciplinary approaches. We have particular strengths in comparative Asian and European studies; comparative ancient studies; gender and feminist studies; global cultures and post-colonialism; film and visual culture studies; narrative and cultural translation; and science and science fiction. Students are admitted into the Ph.D. program only. Entering students who do not already hold a master’s degree in Comparative Literature, in literature, or in comparable fields from another institution must complete M.A. requirements while pursuing the Ph.D.

**Admission**

Admission is open to qualified candidates with a B.A. or M.A. degree, preferably in Comparative Literature or a related field. All other admission requirements are specified in the graduate application.

**S/NC Courses**

No S/NC-graded courses may be applied toward the minimum unit requirement for the graduate degree(s).

**Note:** Courses in the student’s special literature areas used to fulfill either the M.A. or Ph.D. literature requirements may be either graduate courses, or undergraduate courses together with a concurrent 292 course.

**Language Requirement**

Students must have attained at least advanced language competency in their non-English areas of literary specialization. Competency is demonstrated by one of the following for each language required for a student’s particular literary specializations:

1. Course Work A translation seminar with additional work in a specific national language/literature as required by the instructor.
2. Translation Examination A translation exercise from the foreign language into English with use of only a dictionary administered on campus and about two hours long. Period and genre should be discussed in advance with the examiner. The choice of examiner is approved by the graduate advisor.

**Master’s Degree**

The Department of Comparative Literature and Languages requires the following for the M.A. degree in Comparative Literature.

All students must complete a minimum of 36 units of course work. Candidates must work in three of the following literatures, or two literatures for students in the interdisciplinary track: Chinese, English (either British or American), French, German, Classical Greek, Italian, Indonesian, Japanese, Latin, Philippine, Portuguese, Russian, Spanish, and Vietnamese.

**Requirements are as follows:**

1. Two courses in canonical literature (CPLT 210)
2. Two courses in methods and theory (CPLT 214 and CPLT 215A)
3. One course from CPLT 212, CPLT 222, or CPLT 301
4. Two graduate courses in each of three literatures or in each of two literatures and one interdisciplinary area
5. Three elective courses in Comparative Literature

**Note:** Students must take at least one graduate course in each of the following four areas: European, Asian, Ancient, and Modern Literature. After completing the course requirements, the student has two options:

a) Submit a portfolio of three essays, each one representing one of their three literary or interdisciplinary areas, and write a 750-1000 word commentary explaining the aims and achievements of the essays in relation to one another.

b) Write a comprehensive research paper (40-50 pages) that incorporates their three interliterary or interdisciplinary areas; this paper may develop topics of previous papers, or explore a new topic area.

The student then undergoes oral examination on the portfolio or the research paper. Following the examination, the graduate committee, after evaluation of the student’s entire graduate record, determines the candidate’s suitability for continuing in the Ph.D. program.
Doctoral Degree
The Department of Comparative Literature and Languages offers the Ph.D. degree in Comparative Literature with three tracks: Interliterary Studies, Interdisciplinary Studies, and Science Fiction, Science, and Literature. Areas of particular strength in the Interdisciplinary Studies are comparative Asian and European studies; comparative ancient civilizations; gender and feminist studies; global cultures and post-colonialism; film and visual culture studies; narrative and cultural translation; and science and science fiction.

Interliterary Studies
This program is designed for students wishing to concentrate in Comparative Literature as an interliterary discipline. Students examine the relation among various national literatures. They are expected to work in three of the following literatures: Chinese, English (either British or American), French, German, Classical Greek, Italian, Indonesian, Japanese, Latin, Portuguese, Russian, Spanish, and Vietnamese. Permission is granted in exceptional cases to work in other literatures related to the Germanic, Romance, or Slavic families, or in Hebrew or Arabic literature, in other Asian Literatures, and the literatures of Africa.

Students must obtain comprehensive knowledge of literature taken courses. Course requirements are two graduate courses in a first literature, two graduate courses in a second literature, two graduate courses in a third literature, and three additional elective graduate courses in Comparative Literature.

Note: Students must take at least one graduate course in each of the following four areas: European, Asian, Ancient, and Modern Literature.

Science Fiction, Science, and Literature
This option is designed for students with interests in science fiction studies and the relations of science to world literature. It builds upon the current widespread interest in Science Fiction and draws on the Eaton Collection. The program is intended for students who have already completed an undergraduate degree in Comparative Literature, English or kindred studies. It draws on the speculative richness of science fiction literature in a wide variety of social contexts, including the role of science in society (genetic engineering, artificial environments, nanotechnology, etc.), race and ethnicity, and social ethics. This track interacts with existing programs in the humanities, arts, social sciences and sciences. It is inherently cross-disciplinary both within the humanities, and between the humanities and sciences.

Students entering the Science Fiction, Science, and Literature Ph.D. program with an M.A. in any discipline must take courses from the following areas:

1. Three theory courses from among CPLT 214, CPLT 215A, and CPLT 210 (repeatable).
2. Three science, science fiction theory, literature and methods courses, including CPLT 272, CPLT 273, CPLT 274, CPLT 275.
3. One history of science course, (PHIL 237, PHIL 239, CHN/CLA 231, CHN/CLA 232, CPAC 134)
4. One course in Film and Media Studies (SOCI 211, CPLT 274, CPLT 273, MCS 175, MCS 139, MCS 146).
5. One course in Philosophy or Religion from among either PHIL 234, PHIL 237, PHIL 238 and PHIL 239 -- or RLST 200A, RLST 200C, and RLST 224A.
6. One course in Social Sciences (ANTH 261, ANTH 277, ANTH 279, CHN/CLA 141, SOC 247, SOC 261, SOC 281).

7. Three elective courses from any of the groups listed above.

Among all the various courses selected there must be at least one course on non-Western materials and two graduate literature courses with readings in the original language in each of the student's two language areas. Language areas include Arabic, Chinese, English, French, German, Classical Greek, Italian, Indonesian, Japanese, Latin, Philippine, Portuguese, Russian, Spanish, and Vietnamese. The graduate advisor may require appropriate courses on an individual basis. When taking any upper-division undergraduate course listed here, the student must enroll in a 292 course.

Teaching Requirement Normally some teaching experience is required; such experience is obtained through a teaching assistantship whereby a student is assigned either to Comparative Literature or to another program. Students are strongly recommended to take one of the pedagogy courses in the department (CPLT 222 or CPLT 301) which may be used as one of their required elective courses.

Written and Oral Qualifying Examinations
The written qualifying examination consists of the following:

1. For a student in the track of Interliterary Studies, the examination consists of four parts, which include the three national literatures that the student specializes in, with a comparative perspective, and on critical theory.
2. For a student in the track of Interdisciplinary Studies, the examination consists of four parts, which include two national literatures and one non-literary discipline that the student specializes in, with a comparative perspective, and on critical theory.

Prior to the examination for either track, students in consultation with the designated members of their committee, formulate a Special Reading List based on available departmental reading lists for each of the four parts that reflects the student's chosen fields of study and research and provides a basis for the examination.

Each of the four parts of the written examination for either the Interliterary or the Interdisciplinary Track is a three-hour exam.

The written examinations are followed by an oral qualifying examination.

Dissertation and Final Oral Examination
Candidates must write a dissertation on a topic approved by the dissertation committee and may be required to successfully undergo an oral examination on the dissertation.

Normative Time to Degree
18 quarters

Lower-Division Courses
CPLT 001 Introduction to Close Reading
4 Lecture, 3 hours; discussion, 1 hour. Teaches focused reading of works of literature and construction of compelling written arguments about texts. Explores methods of analyzing literature, framing relevant questions, and writing clear essays. Compares fiction and non-fiction, poetry and prose, narrator and author, and ancient and modern. Also covers basic critical concepts. Emphasizes non-English language traditions. Credit is awarded for only one of CPLT 001 or CPLT 001W.

CPLT 001W Introduction to Close Reading
5 Lecture, 3 hours; discussion, 1 hour; written work 3 hours. Prerequisite(s): ENGL 001B with a grade of “C” or better or consent of instructor. Teaches focused reading of literature and construction of compelling written arguments. Compares fiction and non-fiction, poetry and prose, and narrator and author. Also covers basic critical concepts. Fulfills the third-quarter writing requirement for students who earn a grade of “C” or better for courses that the Academic Senate designates, and that the student's college permits as alternatives to English 001C. Credit is awarded for only one of CPLT 001 or CPLT 001W.
CPLT 002 Reading World Literature 4
Lecture, 3 hours; discussion, 1 hour. Teaches concepts of cross-cultural literacy. Explores how writers in different cultures use literature to define the human, process the foreign, and perceive the world. Discusses what world literature has been and what it could be. Considers reading as a tool for approaching cultural difference. Emphasizes non-English language traditions.

CPLT 012 The Writer in Writing 4
Lecture, 3 hours; written work, 2 hours; research, 1 hour. Prerequisite(s): none. Targeted at the fledgling creative writer and apprentice literary critic, surveys the complex legacy surrounding the figure of the writer in world literature. Discussion and weekly writing exercises demonstrate the use of brainstorming in creating and critiquing literature. Cross-listed with CRWT 012.

CPLT 017A Masterworks of World Literature 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Explores selected great works of literature from around the world in historical and cultural contexts. Covers the early Renaissance, emphasizing textual analysis.

CPLT 017B Masterworks of World Literature 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Explores selected great works of literature from around the world in historical and cultural contexts. Covers the modern period, emphasizing critical methods and approaches to comparative literature.

CPLT 021 Introduction to Film, Literature, and Culture 4
Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. Surveys critical approaches to the cinema such as auteur and genre theory. Studies literature and film, national cinemas, and film movements. Cross-listed with MCS 021.

CPLT 022A Introduction to World Literature By Women 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduction to world literature by women across many centuries. Covers the creative work of women from ancient to early modern periods, examining both texts and the historical circumstances of the earliest women writers. Emphasizes texts originally written in languages other than English from around the globe. Cross-listed with GSST 022A.

CPLT 022B Introduction to World Literature By Women 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduction to the increasingly powerful voices of women writers in modernity and postmodernity. Emphasizes texts originally written in languages other than English from around the globe. Topics include the question of feminine writing and feminist theories about literature by women. Cross-listed with GSST 022B.

CPLT 023 Modern Japan and Personal Narrative 4
Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; written work, 1.5 hours. Introduces major debates in history, politics, and culture through the genres of biography, autobiography, diary, and confession. Explores the parallel construction of the modern nation, the modem language, and the modern self. Traces the development of Japan’s “y-novel.” Builds skills in close reading by studying the rhetoric of self-narrative. Cross-listed with AST 023, and JPN 023.

CPLT 024 World Cinema 4
Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. Introduction to world cinema as a fusion of national and international, culturally specific, and globally universal characteristics. Topics include realism, the role of world wars, Hollywood's global reach, alternative aesthetics of third-world cinemas, cross-fertilization between Europe and Asia, and the function of international film festivals and the international film market. Cross-listed with MCS 024.

CPLT 025 Introduction to Science Fiction 4
Lecture, 3 hours; research, 3 hours. Considers science fiction as an interface between today's scientific and humanistic disciplines. Utilizes books, films, and works of art to examine the interplay of these disciplines. Explores the perspective of science fiction on such themes as time, space, God, nature, mind, and the future.

CPLT 026 Introduction to Literature, Film, and Art By French and Francophone Women 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. Analyzes literature, art, and film by French and Francophone women from the 1400s to the present. Topics including marriage, motherhood, war, postcolonial conditions, space, sexual identity, fashion, feminism, and modernity. Studies transnational points of view of French-speaking women from and in Europe, Africa, and Asia. Course taught entirely in English. Cross-listed with FREN 026, and GSST 026.

CPLT 027 Food in Film 4
Lecture, 3 hours; discussion, 1 hour; screening, 3 hours. Explores the representation of food, cooking, and restaurants in films from different national traditions. Includes gender roles; sensuality and sexuality; social class and the economics of food; and excess and lack. Cross-listed with MCS 036.

CPLT 028 Justice, Law, Violence 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to the concepts of justice, law, and violence through literary and philosophical texts. Raises fundamental questions of individual human existence within the social collective. Topics include natural right, freedom of will, sacrifice, revolution, gender, and power.

CPLT 029 The Arts: Approach, Comparison, and Culture 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. An introductory course on the arts, their meaning and interrelationship as well as their cultural contexts East and West. Stresses such approaches as: How do you understand a poem? What do you look for in a painting? What do you listen for in music? How do different cultural backdrops help in appreciating a work of art?

CPLT 030 Introduction to Chinese Civilization 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): none. An introduction to Chinese civilization through an interplay of philosophical, historical, religious, and literary readings from the ancient times through the modern age. Uses audiovisual media. All work is in English. Cross-listed with AST 030, and CHN 030.

CPLT 037 Otaku Worldwide: the Globalization of Japanese Media and its Subcultures 4
Lecture, 3 hours; written work, 2 hours; extra reading, 1 hour. Prerequisite(s): none. Explores the historical contingency of subcultures, key moments in the evolving discourse on 'otaku' both within and outside Japan, and considers how the term is used to identify consumers and fan cultures. Explores how manga and anime reflect class, gendered, and erotic resistance to dominant political structures. Cross-listed with IPN 037.

CPLT 040 Literary Response to Disaster and Repression 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): none. An examination of how literature (e.g., memoir, fiction, and poetry) can be utilized in the recovery from disaster or repression. Analyzes examples from Asia, Africa, and Europe to address the issues of looking squarely, coming to terms, commemoration, and apology. Cross-listed with HIST 040. Credit is awarded for one of the following HIST 040, CPLT 040, or CPLT 040W.

CPLT 040W Literary Response to Disaster and Repression 5
Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ENGL 001B with a grade of C or better. Examines how literature is utilized in the recovery from major disaster or repression. Analyzes examples from Asia, Africa, and Europe that address the issues of looking squarely, coming to terms, commemoration, and apology. Fulfills the third-quarter writing requirement for students who earn a grade of "C" or better for courses that the Academic Senate designates, and that the student's college permits, as alternatives to English 001C. Credit is awarded for one of the following CPLT 040W, CPLT 040, or HIST 040.

CPLT 041 Masterworks of Chinese Literature 4
Lecture, 3 hours; research, 3 hours. Prerequisite(s): none. Reading and discussion of selected great works of Chinese literature (in English translation) with attention to cultural contexts. Various critical methods and approaches are used. Cross-listed with AST 040, and CHN 040.

CPLT 042 Responses to Political Repression in Modern Chinese Literature and Film 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. An examination of the various responses to political repression in China during the second half of the twentieth century through selected literary and artistic representations. Cross-listed with AST 046, and CHN 046. Credit is awarded for one of the following CHN 046, AST 046, CPLT 042, AST 046W, CHN 046W, or CPLT 042W.
CPLT 042W Responses to Political Repression in Modern Chinese Literature and Film 4 Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ENGL 001B with a grade of C or better. An examination of the various responses to political repression in China during the second half of the twentieth century through selected literary and artistic representations. Fulfills the third-quarter writing requirement for students who earn a grade of “C” or better for courses that the Academic Senate designates, and that the student’s college permits, as alternatives to English 001C. Cross-listed with AST 046W, and CHN 046W. Credit is awarded for one of the following CHN 046W, AST 046W, CPLT 042W, AST 046, CHN 046, or CPLT 042.

CPLT 046 Representing the Holocaust in Words and Images 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. Introduces representations of the Holocaust in documentary and narrative film, literature, and painting. Explores notions such as memory, mourning, trauma, spectatorship, and atrocity to come to terms with different responses to the Holocaust. Topics include memorialization, stigmatization, the ethics of historical representation, and black humor. Cross-listed with GER 046.

CPLT 048 Chinese Cinema 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. A study of selected films from China and Taiwan focusing on cultural context. Includes what to look for in these films; the interrelations with theater, photography, and literature; and how these films are understood as an art form. Cross-listed with AST 048, CHN 048, and MCS 048.

CPLT 056 Cultures of the Japanese Empire 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Covers the social histories and literatures of the Japanese Empire from the foundation of the Meiji state to the present. Includes the Ainu, Okinawan, Taiwanese, and Korean cultures. Explores the concepts of assimilation, citizenship, national language, nation-state, sovereignty, total war, and translation. Utilizes readings in English. Cross-listed with JPN 056, and AST 056.

CPLT 062 Introduction to Southeast Asian Literature 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. An introduction to modern and contemporary Southeast Asian literature and culture with a focus on individual national histories. Explores the relationship between aesthetics, politics, and academic scholarship. Readings are in translation; classes conducted in English. Cross-listed with AST 062, and SEAS 062.

CPLT 063 Reading Southeast Asian Stories 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. An introduction to the modern short story in Southeast Asia with a focus on literariness and the act of reading. Readings are in translation; classes conducted in English. Course is repeatable as content changes to a maximum of 8 units. Cross-listed with AST 063, and SEAS 063.

CPLT 070 Introduction to African Literature 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): none. An introduction to African literary traditions from its oral beginnings to the early 2000s. Topics include colonialism across the continent, apartheid in South Africa, politics of post-independence, gender, African aesthetics, and diverse cultures on the continent.

CPLT 072 African Oral Literature & Cultures 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduces traditional African storytelling and oral narrative performance. Examines selected oral narratives from ancient African civilizations through the continent’s contemporary encounters with European colonization. Includes primary readings of English translations from relevant indigenous African languages. Explores the African storyteller’s craft and uses of the oral narrative.

Upper-Division Courses

CPLT 110 Literary Analysis and Criticism 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of different critical approaches to literature, through reading and discussion of literary texts and critical essays on those texts. Reading and discussions cover different genres and traditions as well as different critical approaches.

CPLT 111 Berlin Metropolis in Literature, Film, Music, and Art 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): Restricted to class level standing of sophomore, junior, or senior; or consent of instructor. An introduction to the metropolis Berlin as a gateway between the East and West. Explores topography of the city through film, art, music, and literary texts. Considers Berlin’s dramatic transformations as a microcosm of Germany and Europe’s troubled history in the twentieth century. Course conducted in English. Cross-listed with AHS 120, EUR 120, GER 111, and MCS 178.

CPLT 112 Mythology 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A comparative study of mythic traditions from several world cultures and religions viewed from a variety of theoretical perspectives. Includes material drawn from epics, religious texts, divine hymns, creation myths, heroic legends, and concepts of the afterlife as reflected in literary and nonliterary sources. Cross-listed with CLA 112, and RLST 117.

CPLT 114 The Classical Tradition 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of the legacy of Greece and Rome in Western culture, from the Renaissance to the present. Topics include literature, art, architecture, and politics. Cross-listed with CLA 114.

CPLT 115 Modern German History Through Film 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores twentieth-century German history through film. Includes World Wars I and II, inflation and polarization of classes, Nazi Germany, representations of the Holocaust, and a divided and reunited Germany. Cross-listed with GER 163, MCS 115, and HISE 163.

CPLT 116 Japan and its Others 4 Lecture, 3 hours; extra reading, 1 hour; outside research, 1 hour; written work, 1. Prerequisite(s): upper-division standing or consent of the instructor. Studies gender/race/ethnic/sexual politics and minority cultural productions in modern Japan. Explores the historical backgrounds/epistemology of minority politics in Japan. Introduces the vibrant yet underprivileged voices of minority subjects. Includes LGBTQ issues, Zainichi Koreans, Ainu, Okinawa, Abelism, and the Buraku caste system. Cross-listed with JPN 116.

CPLT 118 The Alien as Other 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Considers the alien in science fiction studies as an image of both alterity (Otherness) and a reflection on what it means to be human. Topics include alien contact, societies and languages, and the deliberate modifications of both humans and aliens. Utilizes short stories, novels, and film.

CPLT 120 Autobiography 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of the genre of literary autobiography and its visual equivalents (self-portraits and autobiographical film). An examination of narrative structure and point of view; the boundaries between fiction and nonfiction; and concepts such as masks, sexuality, memory, and biculturalism. Focus may change from year to year. Course is repeatable as topics change.

CPLT 121 Crossing Borders: Immigration, Migration, and Exile in Cinema 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Proposes an international look at the phenomenon of migration through film. Film can be considered the foremost medium to do justice to this issue.

CPLT 123 Transnational Feminist Film and Media 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Covers contemporary women’s and feminist film and media productions. Connects the forces of globalization and militarization with gender-related experiences of displacement, migration, immigration, diaspora, trafficking, and refugee status. Focuses on innovative uses of visual language signaling changes in notions of nation, identity, class, race, ethnicity, gender, and sexuality. Cross-listed with GSST 123.
CPLT 125 German Fairy Tales: From Brothers Grimm to Hollywood 4 Lecture, 3 hours; screening, 2 hours; written work, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Explores German and European folk and fairy tales from the 18th and 19th centuries, their precursors, and their later variations and receptions in oral, literary, and media cultures of the past and present. Includes their role in American popular culture through adaptations by Disney and Hollywood. Cross-listed with EUR 125, GER 125, and MCS 141.

CPLT 126 From Novel to Screen: Film Adaptations of German Literature 4 Lecture, 3 hours; screening, 2 hours; individual study, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An introduction to classic works of German literature and their film adaptations. Explores adaptations by film directors such as Welles, Kubrick, Visconti, and Fassbinder. Studies the nexus between literature, film, and theatre. Course conducted in English. Cross-listed with MCS 126, and GER 126.

CPLT 131 Marx, Nietzsche, Freud 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Critical introduction to three central thinkers of modernity. Topics include alienation, free will, revolution, the unconscious, sexual difference, political power, and the modern conception of truth. Readings and discussions are in English. Selected readings are in German for German majors and minors. Cross-listed with GER 131.

CPLT 132 Rousseau and Revolution 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introductory study of the French philosopher and novelist Jean-Jacques Rousseau and the age of revolution in France, Germany, and England. Topics include social inequality, slavery, gender, subjectivity, violence, and political rights. All readings are in English. Cross-listed with FREN 132, and GER 132.

CPLT 134 Cinematic War Memory 4 Lecture, 3 hours; screening, 2 hours; extra reading, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines cinematic confrontations involving World War II in Germany and Japan. Topics include desire between victims and perpetrators, representation of trauma, and ethical responsibility. All screenings have English subtitles. Cross-listed with MCS 114, GER 134, and JPN 134.

CPLT 136 The Enlightenment and its Consequences: Modern Europe in the Arts 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the basic ideas of modernity in Europe that are central to the history of western cultures and civilization. Focuses on the function of the arts and sciences in relation to the philosophy and concepts of the Enlightenment. Addresses humankind’s changing relationship to religion, state, society, and history, as well as new strategies of self-reflection. Cross-listed with GER 136.

CPLT 137 Passions, Apparitions, and Automata 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introductory study of German Romanticism from its origins in Goethe to its development in Hoffmann. Topics include madness, sexual desire, doppelganger, homicide, and automata. All readings are in English; selected readings are in German for German majors and minors. Cross-listed with GER 137, and EUR 137.

CPLT 139 The Divine Comedy 4 Lecture, 3 hours; written work, 1 hour; extra reading, 2 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or the consent of instructor. A close reading of Dante’s “Divine Comedy” using a bilingual edition. Focuses on conceptual and aesthetic questions. Although the work is read in English, students without previous knowledge of Italian are given some instruction in it to enable them to understand parts of the original work. Cross-listed with EUR 139 and ITAL 139.

CPLT 142 (E-Z) Women’s Writing in Modern Asia and Asian America 4 Seminar, 3 hours; extra reading, 3 hours. Covers comparative histories of feminist literary movements, gender and immigration, autobiography, translation, and subjectivity. Asian literature will be circulated in the original language to students with reading ability (not required). E. Chinese American Chinese American Writing; J. Japanese And Japanese American American Writing; K. Korean American American Writing; L. Vietnamese American And Vietnamese American American Writing. Cross-listed with GSST 142 (E-Z).

CPLT 143 France and Asia in Literature and the Arts 4 Lecture, 3 hours; screening, 20 hours per quarter; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Explores French portrayals of Asia in literature, cinema, the other arts, and popular culture. Topics include colonialism, orientalism, gender, race, and language. Cross-listed with FREN 143.

CPLT 144 Buddhist Literature 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Readings in canonical and non-canonical Buddhist texts. Includes Buddhist-influenced literature written by Asian, European, and American authors. Examines the themes of emptiness, impermanence, and no-self. Cross-listed with RLST 144, and AST 133.

CPLT 145 Modern Japanese Thought 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Survey of modern Japanese thought from a theoretical and intellectual historical perspective. Topics include philosophical discussions of modernization, “Westernization,” nationalism, colonialism and imperialism, “contemporary women,” Japanese war crimes in continental Asia, the American bombing of Hiroshima and Nagasaki, post-World War II remembrance and denial. All readings are in English. Cross-listed with JPN145.

CPLT 146 Comedy and Satire 4 Lecture, 3 hours; outside reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Investigates the origins and historical development of contemporary Western culture’s two most popular genres. Although the focus is on literacy texts ranging from Aristophanes to the present, the course also considers the many other cultural media through which the comic and the satiric find expression—among them, caricature drawing, photography, comic books, film, and television. Attention is given to debates about the related functions of irony, laughter, violence, and sexuality.

CPLT 147 (E-Z) The Novel 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Investigation of the novel as a preeminent register of cultural values and common literary themes derived from the various national literatures and literary epochs. Examines the novel form in terms of selected, related works by some of its greatest practitioners. E. The Existential Novel; F. The Carnivalesque.

CPLT 148 Short Narrative 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Analysis and interpretation of short narrative texts from the linked perspectives of universal themes and shared literary concerns. The finest short prose, including the anecdote, short story, tale, and novella, by some of the world’s greatest writers is explored in depth.

CPLT 149 The Development of Classical Modern Drama 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Consisting of readings, discussions, and lectures, treats plays and theories from the German, Scandinavian, Russian, and French repertoire among others. Covers Naturalism to Expressionism (1880-1918).

CPLT 151 Palestine/Algeria 4 Lecture, 3 hours; screening 6 hours per quarter; extra reading, 24 hours per quarter. Prerequisite(s): upper-division standing or consent of instructor. Considers two distinct and related literary and historical moments: Palestine and Algeria. Topics include the relations between language and context; literature and literary historiography; genre and idiom; violence and the body; and the state and institutional practices of reading. Cross-listed with ARLC 151, and MEIS 151.

CPLT 152 Modern Arabic Poetry in A Multilingual Frame 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Con-siders selected writings of Adunis (‘Ali Ahmed Sa’id), Mahmoud Darwish, Abdelatif La’abi, and Etel Adnan, published originally in Arabic, French, and English. Topics include language (idiom, statement, utterance, translation, repetition, rhythm) and history (loss, violence, mourning, inheritance, future, legacy). Course is taught in English. Cross-listed with ARLC 152.
CPLT 154 Introduction to Arabic Philosophy 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to Arabic philosophical texts. Provides close and literary reading of texts in philosophy, as well as considers the impact these texts have had or can have on Western cultural formation. Cross-listed with ARLC 154, and PHIL 128.

CPLT 155 Introduction to Arabic Literature 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Introduction to Arabic literature that focuses on language and rhetoric. Considers major issues such as colonialism, secularism, modernity, language, and the state. Utilizes texts from literature, the law, and philosophy. Cross-listed with ARLC 155, and MEIS 155.

CPLT 156 Jews and Arabs 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to Arab literature that focuses on religion, philosophy, history of the Jewish and Arab peoples. Focuses on the formation of the shared and divided history of the Jewish and Arab peoples. Focuses on the literary and institutional dimensions of this history, as well as the formation of related areas of study, such as religion, philosophy, literature, and psychoanalysis. Cross-listed with ARLC 156, MEIS 156, and RLST 156.

CPLT 160 (E-Z) Comparative Cultural Studies: From the Middle Ages to Postmodernism 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Traces the formation of the shared and divided history of the Jewish and Arab peoples. Focuses on the literary and institutional dimensions of this history, as well as the formation of related areas of study, such as religion, philosophy, literature, and psychoanalysis. Cross-listed with ARLC 156, MEIS 156, and RLST 156.

CPLT 163 Nationalism and the Novel 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the novel and its role within nationalism as a representative summary or mirror of the nation. Cross-listed with AST 163, and SEAS 163.

CPLT 166 Vietnam and the Philippines 4
Lecture, 3 hours; written work, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the comparative national histories of Vietnam and the Philippines by way of great literary works in various genres including poetry, short fiction, and novels. All materials are read in English. Cross-listed with AST 166, VNM 166, and SEAS 166.

CPLT 167 Postcolonial Literature and Criticism in Southeast Asia and South Asia 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores how the theoretical concepts of postcolonial criticism inform and challenge the literature of Southeast Asia and South Asia, as the literature itself pushes the limits of the criticism. Addresses themes of nation, identity, space, gender, home, diaspora, alterity, history, sexuality, transnationalism, neocolonialism, tourism, and education. Cross-listed with AST 167, and SEAS 167.

CPLT 173 (E-Z) International Cinemas 4
Lecture, 3 hours; screening, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Considers non-Hollywood cinemas in the national, historical, political, and cultural contexts which produced them. E. Experimental And Avant-garde Film; F. French New Wave; G. New German Cinema; I. Italian Neorealism; T. Third World Cinema; U. Global Perspectives On The Vietnam War. Cross-listed with MCS 173 (E-Z).

CPLT 174 (E-Z) Comparative Studies in Film 4
Lecture, 3 hours; screening, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Considers film in the context of the other arts. Compares the treatment of various themes or problems in film and other media. E. Film & Lit In The Avant-garde. Cross-listed with MCS 174 (E-Z).

CPLT 175 Women in African Literature 4
Lecture, 3 hours; written work, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines portrayals and discussions of women in African literature from pre-colonial to contemporary times. Focuses on selected African writers' presentations of women from pre-colonial to post-independence periods. Considers various perceptions of women in African life and experience.

CPLT 176 The Holocaust in Literature, Film, and Culture 4
Lecture, 3 hours; screening, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Examines the Shoah, the Hebrew term for the World War II genocide also known as The Holocaust. Reviews texts in multiple genres and media from Europe and Asia. Topics include the following: Resistance and Collaboration; the Role of Women; Hidden Children; The Yellow Star; Concentration Camps; Trauma; and Spectacle. Cross-listed with MCS 176.

CPLT 177 Africa & the Post-Colonial in African Literature 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Studies contemporary African writers' portrayals of Africans' encounters with European and Arab interventions, traumata, and legacies of the two different civilizations in Africa. Promotes close reading of texts and engages contemporary considerations of the meanings of freedom, modernity, and progress.

CPLT 180 (E-Z) Literature and Related Fields 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. A critical survey of the theories and methodologies involved in the comparative study of literature and nonliterary fields. E. Literature And History; I. Literature And Institutions; L. Prelaw Readings In Literature; M. Literature And Music; P. Literature And Psychopathology; S. Literature And Science; U. Literature And The Visual Arts; X. Literature And Marxism; Z. Literature And Fiction/fantasy.

CPLT 181 Existentialism in Literature, Film, and Culture 4
Lecture, 3 hours; screening, 2 hours; outside research, .5 hours; term paper, .5 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the Existentialist movement in literature, film, and culture. Texts range from essays, plays, and novels to documentary and fiction films. Topics include choice, subjectivity, and alienation. Cross-listed with FREN 181, and MCS 181.

CPLT 187 Metafiction 4
Lecture, 3 hours; creative writing, take-home midterm, or term paper, 30 hours per quarter. Prerequisite(s): upper-division standing or consent of instructor. Covers postmodernism, metafiction, and the new novel in Europe and America. Creative writers submit fiction in lieu of a term paper or midterm. Cross-listed with CRWT 187.

CPLT 190 Special Studies 1 to 5
Prerequisite(s): to be taken with the consent of the chair of the Department as a means of meeting special curricular requirements. Course is repeatable.

CPLT 193 Capstone Research Seminar 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; restricted to major(s) Asian Literatures and Cultures, Classical Studies, Comparative Ancient Civilizations, Comparative Literature, French, Germanic Studies, Lang and Lit/Chinese, Lang and Lit/Classical Studies, Lang and Lit/Comp Ancient Civ, Lang and Lit/Comparative Lit, Lang and Lit/French, Lang and Lit/Germanic Studies, Lang and Lit/Japanese, Lang and Lit/Languages, Lang and Lit/Russian, Language, Russian Studies; or consent of instructor. Develops skills in the formulation and selection of research questions in Comparative Literature. Includes the identification of research questions and the use of primary texts, secondary texts, and theory to seek answers. Addresses techniques in the organization and presentation of writing.

CPLT 195H Senior Thesis 1 to 2
Prerequisite(s): Open by invitation to students in the Honors Program in Comparative Literature. To be taken for two or three consecutive quarters; total credit may not exceed 6 units.

CPLT 196 Senior Research Paper 2
Consultation, 3 hours; term paper, 3 hours. Prerequisite(s): CPLT 193. A continuation of the research project begun in CPLT 193. Conducted under supervision of a faculty advisor in the applicable field of study. Satisfactory (S) or No Credit (NC) grading is not available.

Graduate Courses
CPLT 200 Topics in Southeast Asian Studies 4
Seminar, 3 hours; written work, 2 hours; term paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. An introduction to the world of Southeast Asia and the scholarly discussions about it, with an emphasis on cultural aspects, embedded in their historical context. Materials are in English. Course is repeatable as content changes to a maximum of 12 units. Cross-listed with ANTH 202 and SEAS 200.
CPLT 205 Literature of Southeast Asia 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores themes and theories related to understanding literature and literary culture in Southeast Asia, insisting that the space of literature reaches beyond the text to include all disciplines. Students critically read, engage in, and question discourses of nationhood, identity, content, creativity, and memory. Course is repeatable as content changes to a maximum of 12 units. Cross-listed with SEAS 205.

CPLT 210 Canons in Comparative Literature 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Studies the concept of the canon and literary texts included in it and excluded from it. Considers the distinction between “mainstream” and “marginal” works. Examines how the concept of texts changes over time.

CPLT 212 Introduction to Graduate Studies in Comparative Literature 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing. Surveys the history of comparative literature and introduces the beginning graduate student to the various methodologies, aesthetic theories, and critical approaches which have come to dominate its field of inquiry. In addition to class discussion, examinations, and a term paper, students are also involved in a number of practical activities designed to sharpen their critical acumen, enlarge academic vocabulary, and encourage mastery of scholarship procedures.

CPLT 213 Rhetoric and Argument in Ancient China and Greece 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A study of theories and practices of rhetoric, argument, persuasion, and, in some cases, poetics in ancient China and Greece (texts dating from the fifth to the third centuries B.C.), as well as some of their implications for contemporary theory and practice. Students who submit a seminar paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. This course may also be taken on a Satisfactory (S) or No Credit (NC) basis by students advanced to candidacy for the Ph.D. Cross-listed with POSC 213.

CPLT 214 History of Criticism 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing. Seniors may be admitted by consent of instructor. A survey of critical theories from Plato to modern time through reading and group discussion. Emphasis is on fundamental theoretical issues that recur in the history of literary criticism and are relevant to modern concerns.

CPLT 215A Contemporary Critical Theory 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing. Consider representative critical works and movements in contemporary theory. Includes the study of formalism, structuralism, semiotics, psychoanalytic and feminist theory, and deconstruction.

CPLT 215B Issues in Contemporary Theory 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing. Focuses on a specific problem or movement in contemporary theory. Course is repeatable as content changes.

CPLT 220 (E-Z) German Aesthetic Theory 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing. An introduction to individual figures in the history of German aesthetic theory and their legacy in critical discourse. Topics include phiellenismen, the beautiful, the sublime, the ugly, fascist chic, mimesis, ornament, the “thing,” mechanical reproduction, suddenness, synthesthesia, and technomedia. All readings are in English. F. Kant: F. Benjamin. Course is repeatable as content or topic changes to a maximum of units.

CPLT 221 Film and Literature 4 Seminar, 3 hours; extra Reading, 4 hours; research, 2 hours; screening, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores relationships between film and literature, including adaptation, remakes, translation, novelizations; and literary films as well as cinematic literature. Studies world film and the concepts of national and transnational cinema. Readings include fiction, emphasizing concepts such as narrative framing, intertextuality and genre, and complementary critical and theoretical works.

CPLT 222 Problems in the Pedagogy of Comparative Literature 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing. Addresses the theories of literary pedagogy and emerging discussions about the teaching of comparative literature.

CPLT 223 Topics in East Asian Literature and Film 4 Seminar, 3 hours; extra reading, 2 hours; research, 1 hours. Prerequisite(s): graduate standing or consent of instructor. Explores East Asian literatures and cinema through critical theory and film studies. Key concepts include colonialism, postcoloniality, Cold War, gender ideology, cultural imperialism, interiority and surface. Focuses on texts that specifically discuss East Asian context and material. Film viewing is required. Taught in English. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as topics change to a maximum of 12 units.

CPLT 224 Film Theory 4 Seminar, 3 hours; screening, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Advanced introduction to classic texts of early and contemporary film theory. Discusses theoretical claims of relevant films. Major concepts include realist film theory, cinema of attractions, apparatus theory, theory of film practice, feminist film theory, and notions of gender, race, and class. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CPLT 243 France and Asia: Orientalism and Beyond 4 Seminar, 3 hours; screening, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores the phenomenon and concept of Orientalism as well as alternative paradigms for East-West aesthetic and cultural relations through theory, literature, and film. Geographical areas and periods of focus may vary. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CPLT 252 Topics in Tourism, Cultural Authenticity, and the Question of Nostalgia 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces theoretical literature concerning the intertwined notions of tourism, cultural authenticity, and nostalgia. Encourages students to approach written texts and other media from a critical perspective, considering the context of both cultural production and consumption. Valuable to students working on issues such as orientalism, modernity studies, diasporic literature, and postcolonial literature. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes.

CPLT 261 European Modernities 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing. Examines theoretical issues of late nineteenth-century European modernities. Utilizes literature, art, and popular images from France, England, Austria, and Russia. Addresses aesthetics, consumption, mass culture, fashion, melodrama, technology, psychology, and nihilism. Includes works by Baudelaire, Zola, Braddon, Boucicault, Turgenev, Manet, Degas, Daumier, and Klimt. Course is repeatable as content changes to a maximum of 12 units.

CPLT 267 Colonialisms and Postcolonial Criticism 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Covers the historical development of postcolonial criticism and how its theoretical concepts inform and challenge the study of literature and culture. Addresses themes of nation, identity, space, gender, home, diaspora, alterity, history, sexuality, transnationalism, neocolonialism, domestic colonialism, tourism, and education. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CPLT 270 Modern African Literature 4 Seminar, 3 hours; written work, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines literary portrayals of colonialism, post-colonialism and independence and their impact on understandings about space, women, gender, individual and communal consciousness, development and national identities in African experience. Includes post-colonial and African feminist thought.

CPLT 277 Seminar in Comparative Literature 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing. Special topics in comparative literature. Subject may vary from quarter to quarter depending on instructor. Course may be given by visiting faculty. May be repeated.
CPLT 284 Literature, Colonialism, and Religion 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to debates on secularism and religion in Europe. Examines how these debates may illumine perspectives on literary studies and colonialism.

CPLT 290 Directed Studies 1 to 6 Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CPLT 291 Individual Studies in Coordinated Areas 1 to 6 A directed program of study designed to advise and assist candidates who are preparing for examinations. Open to M.A. and Ph.D. candidates. Does not count toward the unit requirement for the M.A. Graded Satisfactory (S) or No Credit (NC). May be repeated quarterly until the qualifying examinations are completed.

CPLT 292 Concurrent Analytical Studies 2 Research, 6 hours. Prerequisite(s): consent of instructor; concurrent enrollment in CPLT 100-series course. To be taken on an individual basis. Student will complete a graduate paper based on research related to the CPLT 100-series course. May be repeated.

CPLT 293 (E-Z) Research Topics in Comparative Literature & Foreign Languages 1 to 6 Research, 3 hours. Prerequisite(s): graduate standing. Provides a means of meeting special curricular needs in literature. Topics include E. English; F. French; G. German; H. Greek; I. Italian; J. Japanese; K. Korean; L. Latin; M. Malay; N. Chinese; O. Vietnamese; P. Filipino; Q. Indonesian; R. Russian; S. Spanish; T. Arabic; U. Comparative Literature. Course is repeatable.

CPLT 299 Research For Thesis Or Dissertation 1 to 12 Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

CPLT 301 Teaching of Foreign Language at the College Level 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or senior standing with consent of instructor. Covers first and second language acquisition; general models of L2 learning; learning different types of grammar; learning other components of language acquisition; pronunciation, vocabulary, and discourse; multilingual societies and the goals of language teaching; and implications of second language acquisition research for the foreign language classroom. Graded Satisfactory (S) or No Credit (NC).

CPLT 302 Teaching Practicum 1 to 4 Practicum, 3 to 12 hours. Prerequisite(s): CPLT 301 or equivalent; graduate standing; employment as a teaching assistant or associate in. Supervised teaching in lower-division courses. Required of all teaching assistants in Comparative Literature. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Filipino Courses

Subject abbreviation: FIL

Foreign Language Placement Examination
A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and placementtest.ucr.edu for date and time. Transfer students who have taken a college-level language course may not take the placement examination and should consult with their advisors.

No college-level credit may be duplicated. See college placement examination policy.

Lower-Division Courses

FIL 001 First-Year Filipino 4 Lecture, 4 hours. Prerequisite(s): Student must take the Filipino placement examination. An introduction to the sound system and grammar of Filipino. Emphasizes reading, writing, understanding, and speaking. Conducted in Filipino whenever possible.

FIL 002 First-Year Filipino 4 Lecture, 4 hours. Prerequisite(s): FIL 001 with a grade of "C-" or better or equivalent or a sufficiently high test score on the Filipino placement examination. An introduction to the sound system and grammar of Filipino. Emphasizes reading, writing, understanding, and speaking. Conducted in Filipino whenever possible.

FIL 003 First-Year Filipino 4 Lecture, 4 hours. Prerequisite(s): FIL 002 with a grade of "C-" or better or equivalent or a sufficiently high test score on the Filipino placement examination as determined by the department faculty. An introduction to the sound system and grammar of Filipino. Emphasizes reading, writing, understanding, and speaking. Conducted in Filipino whenever possible.

FIL 004 Second-Year Filipino 4 Lecture, 4 hours. Prerequisite(s): FIL 003 with a grade of "C-" or better or equivalent or a sufficiently high test score on the Filipino placement examination as determined by department faculty. Emphasizes further development of the four language skills: reading, writing, understanding, and speaking. Conducted primarily in Filipino.

French

Subject abbreviation: FREN

Committee in Charge
Heidi Brevik-Zender, Ph.D., Director, French/Comparative Literature
Michelle E. Bloom, Ph.D. Comparative Literature/French
Christine Duvergé, Ph.D. French
Jennifer Ramos, M.A. French
Kelle Truby, Ph.D. French
Daryle Williams, Ph.D, Dean, College of Humanities, Arts, and Social Sciences, ex officio

The department offers the B.A. program in French. The core of the major is the study of French and Francophone literatures and cultures through innovative textual, visual and interdisciplinary approaches.

Students are encouraged to participate in Education Abroad. This is an excellent opportunity to become deeply familiar with another country and its culture while earning academic units toward graduation. Students should plan well in advance to ensure that the courses taken outside of the U.S. fit in their overall program at UCR. Consult the departmental student affairs officer for assistance. For details, visit Education Abroad at ea.ucr.edu or call (951) 827-4113.

See Education Abroad in the Educational Opportunities section in the beginning of this catalog.

Foreign Language Placement Examination
A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and placementtest.ucr.edu for date and time. Transfer students who have taken a college-level language course may not take the placement examination and should consult with their advisors. No college-level credit may be duplicated. See college placement examination policy.

Major

1. CPLT 001 or CPLT 001W, and 1 lower-division CPLT course (8 units)
2. Language proficiency (16 units) - FREN 075, FREN 101A, FREN 101B, FREN 101C
3. Eight courses (32 units) of upper-division electives in the French Program. Of these the student must choose a minimum of five courses (20 units) offered entirely in French. Students may petition to take one course (4 units) outside of the French Program on a related topic. It is strongly encouraged that students take at least one class focusing on a time period earlier than 1800. It is highly recommended that students complete FREN 101B and FREN 101C before enrolling in upper-division electives.
4. CPLT 193 (4 units). (CPLT 196 strongly recommended but not required)
Minor

1. Language proficiency (16 units) - FREN 075, FREN 101A, FREN 101B, FREN 101C

2. Two courses (8 units) chosen from among upper-division courses offered entirely in French.

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Honors Program

Students who wish to undertake a special program of honors study in upper-division courses should apply to the department.

Graduate Programs

Master's Degree

The master's program in French is not currently accepting new students.

Doctoral Degree

Ph.D. studies in French are available through the Ph.D. program in Comparative Literature.

Lower-Division Courses

FREN 001 Introduction to French 4 Lecture, 4 hours. Prerequisite(s): Student must take the French placement examination. An introduction to the sound system and grammar of French. Focuses on the development of the four skills: understanding, speaking, reading, and writing. Classes conducted in French.

FREN 002 Introduction to French 4 Lecture, 4 hours. Prerequisite(s): FREN 001 with a grade of “C-” or better or equivalent. An introduction to the sound system and grammar of French. Focuses on the development of the four skills: understanding, speaking, reading, and writing. Classes conducted in French.

FREN 003 Introduction to French 4 Lecture, 4 hours. Prerequisite(s): FREN 002 with a grade of “C-” or better or equivalent. An introduction to the sound system and grammar of French. Focuses on the development of the four skills: understanding, speaking, reading, and writing. Classes conducted in French.

FREN 004 Intermediate French 4 Lecture, 4 hours. Prerequisite(s): FREN 003 with a grade of “C-” or better or equivalent. Continued study of the grammatical structures of French; vocabulary building; and development of reading and compositional skills. Classes conducted in French.

FREN 009A French For Reading Knowledge 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): Consent of instructor. A specialized course developing the skill to translate from French into English. No previous knowledge of French is required.

FREN 009B French For Reading Knowledge 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): Consent of instructor. A specialized course developing the skill to translate from French into English. No previous knowledge of French is required.

FREN 015A Introduction to Literature and Culture 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): FREN 004 with a grade of “C” or better or consent of instructor. Continued progress towards mastery of the French language. Classes conducted entirely in French.

FREN 015B Introduction to Literature and Culture 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): FREN 015A with a grade of “C” or better or consent of instructor. Continued progress towards mastery of the French language. Classes conducted entirely in French.

FREN 026 Introduction to Literature, Film, and Art By French and Francophone Women 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. Analyzes literature, art, and film by French and Francophone women from the 1400s to the present. Topics include marriage, motherhood, war, postcolonial conditions, space, sexual identity, fashion, feminism, and modernity. Studies transnational points of view of French-speaking women from and in Europe, Africa, and Asia. Course taught entirely in English. Cross-listed with CPLT 026, and GSS 026.

FREN 045 French Cinema 4 Lecture, 3 hours; discussion, 1 hour; screening, 3 hours. Examines the evolution of French cinema from the beginnings to the present. Emphasizes major themes and directors. Considers genre, film techniques, and concepts including social class, gender, race, nationality, and language. Films are subtitled in English and the course taught entirely in English. Cross-listed with MCS 045.

FREN 075 Oral Proficiency in French 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): FREN 004. Provides practice in the development of oral proficiency, fluency of expression, and listening comprehension. Only 4 units may be applied toward the major.

FREN 090 Special Studies 1 to 3 To be taken with the consent of the Chair of the Department as a means of meeting special curricular problems. Course is repeatable.

Upper-Division Courses

FREN 100 Advanced Conversation 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): FREN 015B with a grade of “C” or better or equivalent. Provides practice in the development of oral proficiency, fluency of expression, and listening comprehension. Only 4 units may be applied toward the major. Course is repeatable to a maximum of 8 units.

FREN 101A Advanced French Studies 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): FREN 101B with a grade of “C” or better or equivalent. Advanced analysis of topics in literature, film, visual arts, or culture. Focuses on the development of written expression in French.

FREN 101B Advanced French Studies 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): FREN 101A with a grade of “C” or better or consent of instructor. Advanced analysis of topics in literature, film, visual arts, or culture. Focuses on the development of written expression in French.

FREN 101C Advanced French Studies 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): FREN 101A or FREN 101B with a grade of “C” or better or consent of instructor. Advanced analysis of topics in literature, film, visual arts, or culture. Focuses on the development of written expression in French.

FREN 109 Main Currents in French Literature: Seventeenth- and Eighteenth-Centuries 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): FREN 101A with a grade of “C” or better or consent of instructor. A study of the principal movements in French literature based on the reading of representative works in their entirety.

FREN 112 Mythology in French Literature, Film, and the Visual Arts 4 Lecture, 3 hours; field, 1 hour; research, 1 hour; term paper, 1 hour. Prerequisite(s): FREN 101A with a grade of “C” or better or consent of instructor. Studies myths and mythological figures in seventeenth- through twentieth-century French texts. Focuses on literature (theatre, short stories, and novels), film, painting, and popular culture. Myths include Pygmalion, Venus, Orpheus, Narcissus and Echo, and Icarus. Course conducted in French.

FREN 124 (E-2) Gender in French Studies 4 Lecture, 3 hours; extra reading, 2 hours; screening, 1 hour. Prerequisite(s): FREN 101A with a grade of C or better. Examines gender issues in French studies including literature, culture, and visual arts. Topics include depictions of women, writing by male and/or female authors, and women in relation to power. Instruc- tion is in French. G. Gender, Race, And Identity Politics; P. Portrayals Of Women In Literature And Film.

FREN 130 Sports in French Literature and Cinema 4 Lecture, 3 hours; screening, 1 hour; research, 1 hour; term paper, 1 hour. Prerequisite(s): FREN 101A or FREN 101B or FREN 101C or consent of instructor. Explores the role of sports in works of fiction from the French speaking world. Utilizes a variety of genres. Topics include the origin of Western sports, fraternity, hygiene, hubris, competition, the making and the fall of heroes, patriotism, doping, capitalism, and propaganda. Taught entirely in French.

FREN 132 Rousseau and Revolution 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introductory study of the French philosopher and novelist Jean-Jacques Rousseau and the age of revolution in France, Germany, and England. Topics include social inequality, slavery, gender, subjectivity, violence, and political rights. All readings are in English. Cross-listed with CPLT 132, and GER 132.

FREN 143 France and Asia in Literature and the Arts 4 Lecture, 3 hours; screening, 20 hours per quarter; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Explores French portrayals of Asia in literature, cinema, the other arts, and popular culture. Topics include colonialism, orientalism, gender, race, and language. Cross-listed with CPLT 143.
FREN 148 (E-Z) French Literature of the City 4 Lecture, 3 hours; extra reading, 2 hours; screening, 1 hour. Prerequisite(s): FREN 101A with a grade of C or better. Explores aspects of French literature dealing with city life. Examines visual and cultural material in conjunction with literary works read and discussed. Instruction and reading is in French. S. The Culture of the Paris Suburbs.

FREN 150 (E-Z) Francophone Studies 4 Lecture, 3 hours; research, 1 hour; screening, 1 hour; term paper, 1 hour. Prerequisite(s): FREN 101A with a grade of C or better. Explores the literature, film, and culture of French-speaking countries and regions outside of metropolitan France. Courses taught in French. E. Auto- biographies By West African Women; F. Island Literature; W. Writing By And About Women.

FREN 152 Food and French Literature 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): FREN 101A with a grade of “C” or better or consent of instructor. Explores the role of food in French literature. Discusses descriptions of food and concepts such as reading as consuming; food, desire, and sex; gendering of food; cooking food preparation, recipes, and menus; and food and social class (poverty and wealth). Taught in French.

FREN 153 Children in French Cinema 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): FREN 101A with a grade of “C” or better or consent of instructor. Explores the representation of children in French cinema from its inception to the present. Topics include children in the classroom (teachers’ pets and troublemakers); outside of school (juvenile delinquents); social class (the underprivileged and well-off); gender; coming of age; and parental roles (child neglect, the maternal/paternal). Conducted in French.

FREN 155 The Bande Dessinee: From Comics to Graphic Novels in French 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): FREN 101A with a grade of “C” or better or consent of instructor. Explores the medium of the Bande Dessinée in its various forms (precursors, comic strips, graphic novels, films). Examines form, content, and their interactions. Focus varies depending on instructor and year. Taught entirely in French.

FREN 156 The Holocaust in French Film, Literature and Graphic Novels 4 Lecture, 3 hours; screening, 1.5 hours; research, 0.5 hour; field, 1 hour. Prerequisite(s): FREN 101A with a grade of C- or better, or consent of instructor. Examines French cinematic and literary representations of the Holocaust.

FREN 160 The Fashion of Modernity 4 Lecture, 3 hours; extra reading, 2 hours; research, 1 hour. Prerequisite(s): FREN 101A with a grade of “C” or better or consent of instructor. Examines nineteenth-century French modernity as expressed through fashion. Utilizes critical and literary texts, fashion magazines, and films. Topics include the department store, cross-dressing, ready-to-wear, and the rise of the designer. Incorporates work by Baudelaire, Zola, Ranchorlde, Feydeau, and Maupassant. Course taught in French.

FREN 181 Existentialism in Literature, Film, and Culture 4 Lecture, 3 hours; screening, 2 hours; outside research, 0.5 hours; term paper, 0.5 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the Existentialist movement in literature, film, and culture. Texts range from essays, plays, and novels to documentary and fiction film. Topics include choice, subjectivity, and alienation. Cross-listed with MCS 181, and CPLIT 181.

FREN 190 Special Studies 1 to 5 To be taken with the consent of the department chair as a means of meeting special curricular problems. Course is repeatable.

FREN 195H Senior Honor Thesis 1 to 4 Consultation, 1 hour; individual study, 3 to 9 hours. Prerequisite(s): invitation by faculty to pursue honors work in French Senior standing. Intensive study and research in consultation with a faculty member, leading to a senior thesis. Grades will be deferred until presentation of the thesis during the final quarter. Satisfactory (S) or No Credit (NC) grading is not available. To be taken during two or three consecutive quarters; repeatable to a maximum of 8 units.

Graduate Courses

FREN 290 Directed Studies 1 to 6 Research, 3-18 hours. Prerequisite(s): graduate standing. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

FREN 291 Individual Studies in Coordinated Areas 1 to 6 Tutorial, 3 to 18 hours. Prerequisite(s): graduate standing. A program of studies designed to advise and assist candidates who are preparing for examinations. Open to M.A. candidates. Does not count toward the unit requirement for the M.A. May be repeated quarterly until the qualifying examinations are completed. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

FREN 292 Concurrent Analytical Studies in French 2 Research, 6 hours. Prerequisite(s): consent of instructor; concurrent enrollment in a French 100-series course. To be taken on an individual basis. Student completes a graduate paper based on research related to the French 100-series course. Course is repeatable as topics change. FREN 100 and the FREN 101A, FREN 101B, and FREN 101C sequence may not be used for FREN 292.

FREN 299 Research For Thesis Or Dissertation 1 to 12 Prerequisite(s): graduate standing. Research for thesis or dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

FREN 302 Teaching Practicum 1 to 4 Practicum, 3 to 12 hours. Prerequisite(s): CPLIT 301 or equivalent; graduate standing; employment as a teaching assistant or associate in Supervised teaching in lower-division courses. Required of all teaching assistants in French. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Germanic Studies

Subject abbreviation: GER

Committee in Charge

Johannes Endres, Ph.D. Director, Germanic Studies/Comparative Literature
Jeffrey Sacks, Ph.D. Arabic Literature/Comparative Literature
Sue Hertzog, Ph.D. German
John M. Kim, Ph.D. Comparative Literature
Sabine Thuerau, Ph.D. German/Comparative Literature
Heidi Waltz, Ph.D. Linguistics/German Studies
Daryle Williams, Ph.D. Dean, College of Humanities, Arts, and Social Sciences, ex officio

The B.A. in Germanic Studies enables a student to specialize in the German language through the acquisition of language competence, as well as exposure to the study of cultural, literary and filmic practices.

Students are encouraged to participate in Education Abroad. This is an excellent opportunity to become deeply familiar with another country and its culture while earning academic units toward graduation. Students should plan well in advance to ensure that the courses taken outside of the U.S. fit in their overall program at UCR. Consult the departmental student affairs officer for assistance. For details, visit Education Abroad at ea.ucr.edu or call (951) 827-4113.

See Education Abroad in the Educational Opportunities section in the beginning of this catalog.

Foreign Language Placement Examination

A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and placementtest.ucr.edu for date and time. Transfer students who have taken a college-level language course may not take the placement examination and should consult with their advisors. No college-level credit may be duplicated. See college placement examination policy.

Major

1. Lower-division requirements (24 units)
   a) Sixteen (16) units: GER 001, GER 002, GER 003, GER 004, or equivalents
   b) Eight (8) units: CPLIT 001 or CPLIT 001W, and 1 lower-division CPLIT course

2. Upper-division requirements (36 units)
   a) Sixteen (16) units from the following:
      GER 100, GER 101, GER 102, GER 103A, GER 103B, GER 104, GER 108, GER 172/PHIL 172
   b) Twenty (20) units as follows:
      (1) Sixteen (16) upper-division units in German literature and film beyond the language proficiency requirement, chosen in consultation with the student’s advisor.
      (2) CPLIT 193 (CPLIT 196 strongly recommended but not required)
Minors

1. Lower-division requirements (16 units)
   GER 001, GER 002, GER 003, GER 004, or equivalents

2. Upper-division requirements (28 units)
   a) Sixteen (16) units from the following: GER 100, GER 101, GER 102, GER 103A, GER 103B, GER 104, GER 108, GER 172/PHIL 172
   b) Twelve (12) upper-division elective units in German literature, film, or courses related to Germanic Studies, with approval of the student's advisor.

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Honors Program

Students who wish to undertake a special program of honors study in the upper division should apply at the beginning of the junior year. Acceptance for honors study is based on students’ previous grade records and the recommendations of their instructors. Candidates for honors must demonstrate superior capacity for independent study and during the senior year are required write an individually directed senior thesis.

Graduate Programs

Master’s Degree

The master’s program in Germanic Studies is not currently accepting new students.

Doctoral Degree

Ph.D. studies in Germanic Studies are available through the Ph.D. program in Comparative Literature.

Lower-Division Courses

GER 001 Elementary German 4 Lecture, 4 hours. Prerequisite(s): none. An introduction to the sound system and grammar of German. Focuses on the development of the four skills: listening, speaking, reading, and writing. Classes conducted in German as much as possible. Credit is awarded for only one of the following sequences: GER 001, GER 002, and GER 003; GER 010A and GER 010B.

GER 001R German For Reading Knowledge 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): GER 001R. Provides the second of a two-quarter sequence of a comprehensive coverage of basic German grammar. Emphasizes developing the skills of reading and translating German.

GER 003 Elementary German 4 Lecture, 4 hours. Prerequisite(s): GER 002 with a grade of “C-” or better or equivalent. An introduction to the sound system and grammar of German. Focuses on the development of the four skills: listening, speaking, reading, and writing. Classes conducted in German as much as possible. Credit is awarded for only one of the following sequences: GER 001, GER 002, and GER 003; GER 010A and GER 010B.

GER 004 Intermediate German 4 Seminar, 4 hours. Prerequisite(s): GER 003 with a grade of “C-” or better or GER 010B with a grade of “C-” or better or equivalent. Involves a grammar review combined with introductory readings of contemporary authors. Develops active language skills through readings, audiovisual media, and field trips.

GER 010A Accelerated German 6 Lecture, 4 hours; discussion, 2 hours. Prerequisite(s): none. Accelerated study of German. The GER 010A and GER 010B sequence is equivalent to the GER 001, GER 002, and GER 003 sequence including the four basic skills of listening, speaking, reading, and writing. Credit is awarded for only one of the following sequences: GER 001, GER 002, and GER 003 or GER 010A and GER 010B sequences.

GER 010B Accelerated German 6 Lecture, 4 hours; discussion, 2 hours. Prerequisite(s): GER 010A with a grade of “C-” or better or equivalent. An accelerated study of German that covers the four basic skills of listening, speaking, reading, and writing. Credit is awarded for only one of the following sequences: GER 001, GER 002, and GER 003; GER 010A and GER 010B.

GER 043 Introduction to German Cinema 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. Introduction to the history of German cinema from the advent of the studio system to the present. Covers film in Germany, Switzerland, and Austria. Attention is paid to the work of German-speaking filmmakers living in other parts of the world. Instruction is in English; all films have subtitles. Cross-listed with MCS 042.

GER 046 Representing the Holocaust in Words and Images 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. Introduces representations of the Holocaust in documentary and narrative film, literature, and painting. Explores notions such as memory, mourning, trauma, spectatorship, and atrocity, and how they have been interpreted and represented in different cultures. Cross-listed with CPLT 046.

GER 090 Special Studies 1 to 3 To be taken with the consent of the department chair as a means of meeting special curricular problems. Course is repeatable.

Upper-Division Courses

GER 100 Introduction to German Literature 4 Lecture, 3 hours; extra reading, 3 hours.Prerequisite(s): GER 004; or consent of instructor. Explores the development of German literature and culture through reading and analysis of literary texts within a literary-historical framework. Seeks to familiarize the beginning student of literature with the main currents, representatives, and genres of modern German literature. Language of instruction is German.

GER 101 German Conversation 4 Lecture, 4 hours. Prerequisite(s): GER 004 or equivalent. Focuses on the development of active control of the language with discussion and oral presentation of assigned topics. Supervised work in German phonetics.

GER 102 Contemporary German Cinema For Conversation 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): GER 004 or consent of instructor. Focuses on the development of active control of the language with discussion and oral presentation of assigned topics. Supervised work in German phonetics.

GER 103A Advanced Composition and Conversation 4 Lecture, 4 hours. Prerequisite(s): GER 004 or consent of instructor. Emphasizes the mastery of the subtleties of the German language, including conversational language skills through readings, audiovisual media, and field trips.

GER 103B Advanced Composition and Conversation 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): GER 004; or consent of instructor. Improves oral and written proficiency of the German language. Emphasizes reading increasingly difficult material, conversational use of German, vocabulary building, and study of idioms. Materials include newspaper articles and television programs that explain the German educational system, the arts, history, and politics.

GER 104 Intro to German Cultural History For Conversation 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): GER 004 or equivalent. Introduces German cultural history through conversation and composition in German. Organized thematically around politics, philosophy, music, art, and architecture. Class conducted in German.

GER 107 German Drama in Translation: Theater of Revolution / Theater as Revolution 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the influence of drama and stage on society and their role in disseminating philosophical ideas and aiding social change. Topics include the medieval Carnival play, theater of the Enlightenment and the Sturm und Drang, 19th century Realism and social drama, and Epic Theater.
GER 108 The Art of Translation 4 Lecture, 1 hour; discussion, 3 hours. Prerequisite(s): GER 101 or GER 103A or GER 103B or consent of instructor. Examines theories of translation, including recognized examples of good and bad translations. Provides an opportunity to put theory into practice.

GER 109 Masterworks of German Literature in Translation: Plays, Nineteenth-Century Realism to the 1960s 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing Provides an introduction to the great contribution of German letters to world literature.

GER 111 Berlin Metropolis in Literature, Film, Music, and Art 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): Restricted to class level standing of sophomore, junior, or senior; or consent of instructor. An introduction to the metropolis Berlin as a gateway between the East and West. Explores topography of the city through film, art, music, and literary texts. Considers Berlin's dramatic transformations as a microcosm of Germany and Europe's troubled history in the twentieth century. Course conducted in English. Cross-listed with AHS 120, CPLT 111, EUR 120, and MCS 178.

GER 118 (E-Z) Topics in German Cinema 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Study of selected films, directors, and movements in German film. Films are in German with English subtitles. No knowledge of German is required. Cross-listed with MCS 118 (E-Z).

GER 118E Weimar Cinema and After 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An investigation of the silent and sound films of the Weimar era, focusing on the works of Fritz Lang, G. W. Pabst, and F. W. Murnau and their impact on film directors such as Werner Herzog and Rainer W. Fassbinder. Includes readings in film theory and in the literature and cultural history of the period. Cross-listed with MCS 118E.

GER 118F The Cinema of Fritz Lang 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. In-depth study of the films of the Austrian-born director Fritz Lang (1890-1976), whose work spans the silent era, the Golden Age of Hollywood, and postwar Germany. Explores the evolution of film technique, changes in cinematic paradigms, and Lang's engagement with ideology. Cross-listed with MCS 118F.

GER 118G Film and the Holocaust 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the moral, philosophical, and cultural legacy of the Holocaust in documentary and narrative films. Films and selected theoretical and literary texts involve key issues such as truthfulness, politicization, marginalization, universalization, trivialization, abstraction, representation of trauma, abstraction, aestheticization, and testimonies. Cross-listed with MCS 118G.

GER 119 Vienna in Film 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): Restricted to class level standing of Junior, or Senior; Or the consent of instructor; Explores employment of cityscape as a narrative device while introducing some of the politics, culture, and technology that influenced late 19th and early 20th century Viennese society. Considers the filmmaker's usage of landscape, architecture, culture, art, history, politics and population. Taught in English with either English language or German/subtitled film.

GER 124 Nordic Mythology, Folklore, and Fairytales 4 Seminar, 3 hours; extra reading, 1 hour; written work, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces the representation of animals, plants, and other appearances of the natural world such as sunrise and sunset in European creation and destruction mythology, fairytales, and folklore. Cross-listed with EUR 124.

GER 125 German Fairy Tales: From Brothers Grimm to Hollywood 4 Lecture, 3 hours; screening, 2 hours; written work, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Explores German and European folk and fairy tales from the 18th and 19th centuries, their precursors, and their later variations and receptions in oral, literary, and media cultures of the past and present. Includes their role in American popular culture through adaptations by Disney and Hollywood. Cross-listed with CPLT 125, EUR 125, and MCS 141.

GER 126 From Novel to Screen: Film Adaptations of German Literature 4 Lecture, 3 hours; screening, 2 hours; individual study, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An introduction to classic works of German literature and their film adaptations. Explores adaptations by film directors such as Welles, Kubrick, Visconti, and Fassbinder. Studies the nexus between literature, film, and theatre. Course conducted in English. Cross-listed with CPLT 126, and MCS 126.

GER 131 Marx, Nietzsche, Freud 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Critical introduction to three central thinkers of modernity. Topics include alienation, free will, revolution, the unconscious, sexual difference, political power, and the modern conception of truth. Readings and discussions are in English. Selected readings are in German for German majors and minors. Cross-listed with CPLT 131.

GER 132 Rousseau and Revolution 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introductory study of the French philosopher and novelist Jean-Jacques Rousseau and the age of revolution in France, Germany, and England. Topics include social inequality, slavery, gender, subjectivity, violence, and political rights. All readings are in English. Cross-listed with CPLT 132, and FREN 132.

GER 134 Cinematic War Memory 4 Lecture, 3 hours; screening, 2 hours; extra reading, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines cinematic confrontations involving World War II in Germany and Japan. Topics include desire between victims and perpetrators, representation of trauma, and ethical responsibility. All screenings have English subtitles. Cross-listed with CPLT 134, MCS 114, and JPN 134.

GER 136 The Enlightenment and its Consequences: Modern Europe in the Arts 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the basic ideas of modernity in Europe that are central to the history of western cultures and civilization. Focuses on the function of the arts and sciences in relation to the philosophy and concepts of the Enlightenment. Addresses humankind's changing relationship to religion, state, society, and history, as well as new strategies of self-reflection. Cross-listed with CPLT 136.

GER 137 Passions, Apparitions, and Automata 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introductory study of German Romanticism from its origins in Goethe to its development in Hoffmann. Topics include madness, sexual desire, doppleganger, homicide, and automata. All readings are in English; selected readings are in German for German majors and minors. Cross-listed with MCS 115, HISE 163, and CPLT 115.

GER 163 Modern German History Through Film 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores twentieth-century German history through film. Includes World Wars I and II, inflation and polarization of classes, Nazi Germany, representations of the Holocaust, and a divided and reunited Germany. Cross-listed with MCS 115, HISE 163, and CPLT 115.

GER 172 Reading Philosophical German 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): GER 302R or GER 304 or consent of instructor. Explores selected readings and translation skills for German philosophical texts through a review of grammar and readings in the original language. Prepares for a graduate-level translation exam and independent research in German. Intermediate to advanced German reading proficiency required; familiarity with German philosophical works is recommended but not required. Cross-listed with PHIL 172.

GER 173 The Age of Goethe 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the mature work of Goethe against the dual backdrops of Klassik and Romantik. Considers works by Schiller, Kleist, Holderlin, the Schlegels, and E.T.A. Hoffmann in analysis of early nineteenth-century literary currents in Germany.
GER 185 Currents in Modern German Literature 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Analysis and interpretation of such major modern writers as Brecht, Mann, and Kafka.

GER 190 Special Studies 1 to 5 Tutorial, 1 to 4 hours. Prerequisite(s): graduate standing. To be taken with the consent of the department chair as a means of meeting special curricular problems. Course is repeatable.

Graduate Courses GER 290 Directed Studies 1 to 6 Prerequisite(s): graduate standing. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

GER 291 Individual Studies in Coordinated Areas 1 to 6 Prerequisite(s): graduate standing. A program of studies designed to advise and assist candidates who are preparing for examinations. Open to M.A. and Ph.D. candidates. Does not count toward the unit requirement for the M.A. Graded Satisfactory (S) or No Credit (NC). May be repeated quarterly until the qualifying examinations are completed.

GER 292 Concurrent Analytical Studies 2 Research, 6 hours. Prerequisite(s): consent of instructor; concurrent enrollment in German 100-series course. To be taken on an individual basis. Student will complete a graduate paper based on research related to the German 100-series course. Course is repeatable with different topics.

GER 299 Research For Thesis Or Dissertation 1 to 12 Prerequisite(s): graduate standing. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses CPLT 301 Teaching of Foreign Language at the College Level 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing, or senior standing with consent of instructor. Covers first and second language acquisition; general models of L2 learning; learning different types of grammar; learning other components of language; acquisition of pronunciation, vocabulary, and discourse; multilingual societies and the goals of language teaching; and implications of second language acquisition research for the foreign language classroom. Graded Satisfactory (S) or No Credit (NC).

GER 302 Teaching Practicum 1 to 4 Practicum, 3 to 12 units. Prerequisite(s): CPLT 301 or equivalent; graduate standing; employment as a teaching assistant or associate in. Supervised teaching in lower-division courses. Required of all teaching assistants in German. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Italian Studies Minor

Subject abbreviation: ITAL

College of Humanities, Arts, and Social Sciences

Committee in Charge
Jeffrey Sacks, Ph.D., Chair
Erith Jaffe-Berg (Theater)
Jeanette Kohl (Art History)
Marina Pianca (Hispanic Studies, Emeritus)
Daryle Williams, Ph.D, Dean, College of Humanities, Arts, and Social Sciences, ex officio

Students are encouraged to participate in Education Abroad. This is an excellent opportunity to become deeply familiar with another country and its culture while earning academic units toward graduation. Students should plan well in advance to ensure that the courses taken outside of the U.S. fit in their overall program at UCR. Consult the departmental student affairs officer for assistance. For details, visit Education Abroad at ea.ucr.edu or call (951) 827-4113.

See Education Abroad in the Educational Opportunities section in the beginning of this catalog.

Minor

The Italian Studies minor offers students the opportunity to attain an advanced level of proficiency in Italian language while taking a number of discipline-based courses that concentrate on Italian themes. The minor complements liberal arts degrees in many aspects of Western or European studies, including art history, history, philosophy, political science, and religious studies.

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog.

Requirements for the minor consist of 24 units, distributed as follows:

1. Twelve (12) units of ITAL 101A and ITAL 101B and ITAL 101C
2. Eight (8) units of upper-division courses in Italian literature, film and/or culture offered by the Department of Comparative Literature and Languages.
3. Four (4) units of upper-division courses in Italian art history, history, film, theatre, or another related discipline offered by other departments and approved by the student’s advisor.

Foreign Language Placement Examination

A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and placementtest.ucr.edu for date and time. Transfer students who have taken a college-level language course may not take the placement examination and should consult with their advisors. No college-level credit may be duplicated. See college placement examination policy.

Lower-Division Courses

ITAL 001 Elementary Italian 4 Lecture, 4 hours. Prerequisite(s): none. An introduction to the sound system and grammar of Italian focusing on the development of the four skills: understanding, speaking, reading, and writing. Classes conducted in Italian insofar as possible. Audio-lingual and media-based learning materials available in the Media Library. Credit is awarded for only one of the following sequences: ITAL 001, ITAL 002, and ITAL 003; ITAL 020A and ITAL 020B.

ITAL 002 Elementary Italian 4 Lecture, 4 hours. Prerequisite(s): ITAL 001 with a grade of “C-” or better or equivalent. An introduction to the sound system and grammar of Italian focusing on the development of the four skills: understanding, speaking, reading, and writing. Classes conducted in Italian insofar as possible. Audio-lingual and media-based learning materials available in the Media Library. Credit is awarded for only one of the following sequences: ITAL 001, ITAL 002, ITAL 003, ITAL 20A and ITAL 20B.

ITAL 003 Elementary Italian 4 Lecture, 4 hours. Prerequisite(s): ITAL 002 with a grade of “C-” or better or equivalent. An introduction to the sound system and grammar of Italian focusing on the development of the four skills: understanding, speaking, reading, and writing. Classes conducted in Italian insofar as possible. Audio-lingual and media-based learning materials available in the Media Library. Credit is awarded for only one of the following sequences: ITAL 001, ITAL 002, ITAL 003, ITAL 020A and ITAL 020B.

ITAL 004 Intermediate Italian 4 Lecture, 4 hours. Prerequisite(s): ITAL 003 or ITAL 020B with a grade of “C-” or better or equivalent. Continued study of the basic grammatical structures of Italian emphasizing competency in reading, writing, and speaking. Involves reading varied materials (literary and journalistic) dealing with contemporary Italy.

ITAL 020A Elementary Italian For Spanish Speakers 4 Lecture, 4 hours. An introductory course on the fundamental skills of speaking, reading, writing, and comprehending Italian for those acquainted with Spanish. Emphasizes comparing and contrasting Italian and Spanish grammatical constructions. Conducted entirely in Italian. Credit is awarded for only one of the following sequences: ITAL 001, ITAL 002, and ITAL 003; ITAL 020A and ITAL 020B.

ITAL 020B Elementary Italian For Spanish Speakers 4 Lecture, 4 hours. Prerequisite(s): ITAL 020A with a grade of “C-” or better or equivalent test; or consent of instructor. An introductory course on the fundamental skills of speaking, reading, writing, and comprehending Italian for those acquainted with Spanish. Emphasizes comparing and contrasting Italian and Spanish grammatical constructions. Conducted entirely in Italian. Credit is awarded for only one of the following sequences: ITAL 001, ITAL 002, and ITAL 003; ITAL 020A and ITAL 020B.
ITAL 042 Italian Americans: Voices and Visions 4 Lecture, 3 hours; screening, 2 hours; written work, 1 hour. Prerequisite(s): none. A study of the Italian American experience as seen through major works of Italian and Italian American writers and filmmakers. Covers the 1950s to the present. No knowledge of Italian required. Cross-listed with EUR 042

ITAL 043 Italian Cuisine and Literature Through the Centuries 4 Lecture, 3 hours; screening, 2 hours; written work, 1 hour. Prerequisite(s): none. Analyzes the relationship between food and literature in Italian culture through the study of gastronomic and literary texts from the Roman to present times. Cross-listed with EUR 043

ITAL 044 Mafia and Malavita in Italian Literature and Film 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. A study of the history of malavita in the Italian peninsula. Explores topics from mischievous transgression to organized crime and Mafia as presented through the works of renowned Italian writers and directors. No knowledge of Italian required. Cross-listed with EUR 044.

ITAL 045 Italian Cinema 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. Covers major works of the Italian cinema from Neo-Realism to the present. Emphasizes the historical evolution and representation of major elements of Italian culture. Knowledge of Italian not required. Cross-listed with MCS 044.

ITAL 048 Italian Culture and Civilization 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. An introduction to the concept of Italy and its geographical, historical, and cultural changes from the Middle Ages to the present as seen through the works of renowned writers, artists, and film directors. No knowledge of Italian required. Cross-listed with EUR 048.

ITAL 090 Special Studies 1 to 3 To be taken with the consent of the chair of the department as a means of meeting special curricular problems. Course is repeatable.

Upper-Division Courses

ITAL 101A Advanced Italian 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ITAL 004 with a grade of "C" or better or equivalent. Advanced Italian grammar and conversation. Emphasizes mastery of the subtleties of the language in conversation, reading, and writing.

ITAL 101B Advanced Italian 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ITAL 101A. Advanced Italian grammar and conversation. Emphasizes mastery of the subtleties of the language in conversation, reading, and writing.

ITAL 101C Advanced Italian 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ITAL 101B or equivalent. Advanced Italian grammar and conversation. Emphasizes mastery of the subtleties of the language in conversation, reading, and writing.

ITAL 139 The Divine Comedy 4 Lecture, 3 hours; written work, 1 hour; extra reading, 2 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. A close reading of Dante’s “Divine Comedy” using a bilingual edition. Focuses on conceptual and aesthetic questions. Although the work is read in English, students without previous knowledge of Italian are given some instruction in it to enable them to understand parts of the original work. Cross-listed with CPLT 139 and EUR 139.

ITAL 140 Italian Literature of the Holocaust in Translation 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Explores the experiences of Italian Jews during Fascism. Analyzes the attitudes of the Fascist regime, Italian people, and the Catholic Church as seen through the works of renowned Italian writers and directors. Course taught in English. Cross-listed with EUR 140.

ITAL 150 Italian Theatre 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. A study of the development of Italian theatre from the commedia dell’arte to the present. Discusses works by Ruzzante, Machiavelli, Metastasio, Goldoni, Alfieri, Verga, Pirandello, Fo, and Rame. Includes videos of plays, melodramas, and operas. No knowledge of Italian required. Cross-listed with EUR 150.

ITAL 158 Italian Literature in the Period of Unification 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): Restricted to class level standing of junior, or senior. A study of nineteenth-century Italian literature. Emphasizes the pre-Unification “Risorgimento” period through the works of Foscolo, Leopardi, Pellico, and Manzoni. No knowledge of Italian required. Cross-listed with EUR 158

ITAL 162 Contemporary Italian Women Writers in Translation 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on works by Italian women writers addressing issues of gender and sexuality in Italian historical and cultural contexts such as Fascism, the cultures of Sicily and Sardinia, and the North/South divide. Explores intersections of region, class, and gender with emphasis on the undoing of fascist and patriarchal aesthetics. Cross-listed with GSST 172.

ITAL 185 Modern and Contemporary Italian Literature in Translation 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Considers selected works by authors who exemplify major cultural and literary trends in Italy from the period of unification (1860s) to the present. Readings are supplemented by viewing of films. No knowledge of Italian is required. Cross-listed with EUR 185.

ITAL 190 Special Studies 1 to 5 Prerequisite(s): To be taken with the consent of the chair of the department as a means of meeting special curricular problems.

Graduate Courses

CPLT 290 Directed Studies 1 to 6 Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ITAL 292 Concurrent Analytical Studies 2 Research, 6 hours. Prerequisite(s): consent of instructor; concurrent enrollment in Italian 100-series course. To be taken on an individual basis. Student will complete a graduate paper based on research related to the Italian 100-series course. May be repeated with different topic.

Professional Courses

CPLT 301 Teaching of Foreign Language at the College Level 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing, or senior standing with consent of instructor. Covers first and second language acquisition; general models of L2 learning; learning different types of grammar; learning other components of language: acquisition of pronunciation, vocabulary, and discourse; multilingual societies and the goals of language teaching; and implications of second language acquisition research for the foreign language classroom. Graded Satisfactory (S) or No Credit (NC).

ITAL 302 Teaching Practicum 1 to 4 Practicum, 3 to 12 units. Prerequisite(s): CPLT 301 or equivalent; graduate standing; employment as a teaching assistant or associate in. Supervised teaching in lower-division courses. Required of all teaching assistants in Italian. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Japanese

Subject abbreviations: JPN

Committee in Charge
Anne McKnight, Director, Ph.D., Japanese/Comparative Literature
John N. Kim, Ph.D., German/Japanese/Comparative Literature
Taisei Yamamoto, Ph.D., English/Asian American Literary and Cultural Studies
Setsu Shigematsu, Ph.D., Media and Cultural Studies
Daryle Williams, Ph.D, Dean, College of Humanities, Arts, and Social Sciences, ex officio

Major

The Japanese Major enables students to acquire advanced proficiency in the Japanese language and to develop critical thinking skills in their analysis of Japanese literary, filmic, and social texts. Students are encouraged to study in Japan through the University of California’s numerous Education Abroad Programs.

1. Lower-division requirements (16 units plus language proficiency)
   a) Proficiency in Japanese through the intermediate level (JPN 006 or its equivalent)
b) Twelve (12) units in Japanese literature and culture: AST 022/JPN 022/MCS 022, AST 023/CPLT 023/JPN 023, AST 032/JPN 032, AST 034/JPN 034, AST 056/CPLT 056/JPN 056, JPN 035. and any other lower-division lecture courses on Japanese literature, culture, and film chosen in consultation with the student’s advisor.

c) Eight (8) units from CPLT 001 or CPLT 001W, and 1 lower-division CPLT course.

2. Upper-division requirements (36 units)

a) Twelve (12) upper-division units in Japanese language from JPN 101A, JPN 101B, JPN 101C, JPN 110. Students whose proficiency exceeds the 101 series should take the 12 required units by taking 110 more than once, by using EAP language courses, or, under the JPN 190 rubric, by converting an existing “content” course into a language course with the instructor’s help.

b) Twenty (20) units in upper-division Japanese literature and culture from AST 150/JPN 150, AST 151/JPN 151, AST 152 (E-Z)/JPN 152 (E-Z), AST 153 (E-Z)/JPN 153 (E-Z), AST 184/JPN 184, AST 190, CPLT 134/GER 134/JPN 134/MCS 134, CPLT 142/GSTT 142, CPLT 145/JPN 145, JPN 110, JPN 190, KOR 112, and any other upper-division lecture courses on Japanese literature, culture, and film chosen in consultation with the student’s advisor.

c) Four (4) units in CPLT 193. (CPLT 196 strongly recommended but not required)

Japanese Minor

The Japanese Minor enables students to acquire intermediate proficiency in the Japanese language and to develop critical thinking skills in their analysis of these literary, filmic, and social texts. Students are encouraged to study in Japan through the University of California’s numerous Education Abroad Programs.

1. Lower-division requirements (4 units plus language proficiency)

a) Proficiency in Japanese through the intermediate level (JPN 006 or its equivalent).

b) Four (4) units from lower-division lecture courses on Japanese literature and culture: JPN 002/JPN 022/MCS 022, JPN 003/JPN 023/CPLT 023, JPN 032/JPN 034/AST 034, JPN 035, JPN 056/JPN 056/CPLT 056, and any other lower-division lecture courses on Japanese literature, culture, and film chosen in consultation with the student’s advisor.

2. Upper-division requirements (20 units)

a) Eight (8) upper-division units in Japanese language from: JPN 101A, JPN 101B, JPN 101C, JPN 110. Students whose proficiency exceeds the 101 series should take the 8 required units by taking JPN 110 more than once, by using EAP language courses, or, under the JPN 190 rubric, by converting an existing “content” course into a language course with the instructor’s help.

b) Twelve (12) units in Japanese literature and culture: from: AST 190, CPLT 142/GSTT 142, JPN 110, JPN 134/CPLT 134/GER 134/MCS 134, JPN 145/CPLT 145, JPN 150/AST 150, JPN 152 (E-Z)/AST 152 (E-Z), JPN 153 (E-Z)/AST 153 (E-Z), JPN 154 (E-Z)/AST 154 (E-Z), JPN 184/AST 184/MCS 184, JPN 190, and any other upper-division lecture courses on Japanese literature, culture, and film chosen in consultation with the student’s advisor.

Japanese Courses

Foreign Language Placement Examination

A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and placementtest.ucr.edu for date and time. Transfer students who have taken a college-level language course may not take the placement examination and should consult with their advisors. No college-level credit may be duplicated. See college placement examination policy.

Lower-Division Courses

JPN 001 First-Year Japanese 4 Lecture, 4 hours. Prerequisite(s): Student must take the Japanese placement examination. An introduction to the sound system and grammar of Japanese. Emphasizes speaking, reading, writing, and comprehension skills. Classes conducted in Japanese whenever possible.

JPN 002 First-Year Japanese 4 Lecture, 4 hours. Prerequisite(s): JPN 001 with a grade of C- or better; or equivalent. An introduction to the sound system and grammar of Japanese with emphasis on speaking, reading, writing, and understanding. Classes conducted in Japanese as far as possible.

JPN 003 First-Year Japanese 4 Lecture, 4 hours. Prerequisite(s): JPN 002 with a grade of C- or better; or equivalent. An introduction to the sound system and grammar of Japanese with emphasis on speaking, reading, writing, and understanding. Classes conducted in Japanese as far as possible.

JPN 004 Second-Year Japanese 4 Lecture, 4 hours. Prerequisite(s): JPN 003 with a grade of C- or better; or equivalent. Introduces levels of speech and emphasizes reading and writing of advanced prose.

JPN 005 Second-Year Japanese 4 Lecture, 4 hours. Prerequisite(s): JPN 004 with a grade of C- or better. Concentrates on advanced speech levels and their cultural underpinnings.

JPN 006 Second-Year Japanese 4 Lecture, 4 hours. Prerequisite(s): JPN 005 with a grade of C- or better. Emphasizes the academic style of written and spoken Japanese and academic comprehension of the cultural background.

JPN 022 Introduction to Japanese Film 4 Lecture, 3 hours; discussion, 1 hour; screening, 2 hours. An introduction to major genres, styles, and creators in the Japanese film world. Focuses on formal analysis and critical writing about film. Works studied range from the samurai epics of Kurosawa to recent anime. All films have subtitles. No previous knowledge of Japanese language or culture required. Cross-listed with AST 022, and MCS 022.

JPN 023 Modern Japan and Personal Narrative 4 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; written work, 1.5 hours. Introduces major debates in history, politics, and culture through the genres of biography, autobiography, diary, and confession. Explores the parallel construction of the modern nation, the modern language, and the modern self. Traces the development of Japan’s “I-novel.” Builds skills in close reading by studying the rhetoric of self-narrative. Cross-listed with AST 023, and CPLT 023.

JPN 034 Introduction to Classical Japanese Literature 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): none. A survey of some of the more famous works of pre-modern Japanese literature from 10th century poetry collections to 18th century puppet plays. Focuses on the relationship among aesthetics, politics, language, and gender. Assignments include manga translations, creative writing, and intensive Web research. Cross-listed with AST 034.

JPN 035 Modern Japanese Society 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to Japanese culture and society with emphasis on the day-to-day lives of the modern Japanese people at home, work, and play.

JPN 037 Otaku Worldwide: the Globalization of Japanese Media and its Subcultures 4 Lecture, 3 hours; written work, 2 hours; extra reading, 1 hour. Prerequisite(s): none. Explores the historical contingency of subcultures, key moments in the evolving discourse on ‘otaku’ both within and outside Japan, and considers how the term is used to identify consumers and fan cultures. Explores how manga and anime reflect class, gendered, and erotic resistance to dominant political structures. Cross-listed with CPLT 037.

JPN 056 Cultures of the Japanese Empire 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Covers the social histories and literatures of the Japanese Empire from the foundation of the Meiji state to the present. Includes the Ainu, Okinawan, Taiwanese, and Korean cultures. Explores the concepts of assimilation, citizenship, national language, nation-state, sovereignty, total war, and translation. Utilizes readings in English. Cross-listed with AST 056, and CPLT 056.

JPN 090 Special Studies 1 to 5 Individual Study, 3 to 15 hours. To be taken with the consent of the Chair of the Department as a means of meeting special curricular problems in either language or literature.
Upper-Division Courses
JPN 101A Third-Year Japanese 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): JPN 006 with a grade of C- or better. Further development of students’ reading, writing, listening and speaking skills in Japanese. Course conducted in Japanese.

JPN 101B Third-Year Japanese 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): JPN 101A with a grade of C- or better. Further development of students’ reading, writing, listening and speaking skills in Japanese. Course conducted in Japanese.

JPN 101C Third-Year Japanese 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): JPN 101B with a grade of C- or better. Emphasizes the academic style of written and spoken Japanese and academic comprehension of the cultural background.

JPN 110 Advanced Reading in Japanese 4 Lecture, 3 hours; extra reading, 1 hour; written work, 2 hours. Prerequisite(s): previous or concurrent enrollment in JPN 101C or equivalent. Reading of extended authentic texts in Japanese. Texts may include newspaper or magazine articles, literature, or nonfiction. Emphasis may extend to translation, textual analysis, basic research using primary sources, or discussion of texts in Japanese. Course is repeatable as content changes.

JPN 116 Japan and its Others 4 Lecture, 3 hours; extra reading, 1 hour; outside research, 1 hour; written work, 1. Prerequisite(s): upper-division standing or consent of instructor. Studies gender/race/ethnic/sexual politics and minority cultural productions in modern Japan. Explores the historical backgrounds/epistemology of minority politics in Japan. Introduces the vibrant yet underprivileged voices of minority subjects. Includes LGBTQ issues, Zainichi Koreans, Ainu, Okinawa, Abelism, and the Buraku caste system. Cross-listed with CPLT 116.

JPN 120 Remediating Japan: Genre, Adaptation and Media Forms 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): CPLT 001 with a grade of C- or better or CPLT 002 with a grade of C- or better or CPLT 017 with a grade of C- or better or JPN 022 with a grade of C- or better or JPN 023 with a grade of C- or better or JPN 034 with a grade of C- or better; restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Introduces theories and examples of adaptation and remediation from Japanese culture. Includes literature to film adaptation, video game adaptation, uses of folk literature in performing arts, and cross-media franchises.

JPN 134 Cinematic War Memory 4 Lecture, 3 hours; screening, 2 hours; extra reading, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines cinematic confrontations involving World War II in Germany and Japan. Topics include desire between victims and perpetrators, representation of trauma, and ethical responsibility. All screenings have English subtitles. Cross-listed with CPLT 134, MCS 114, and GER 134.

JPN 145 Modern Japanese Thought 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Survey of modern Japanese thought from a theoretical and intellectual historical perspective. Topics include philosophical discussions of modernization, “Westernization,” nationalism, colonialism and imperialism, “comfort women,” Japanese war crimes in continental Asia, the Consulate General of Hiroshima and Nagasaki, post-World War II remembrance and denial. All readings are in English. Cross-listed with CPLT 145.

JPN 150 In Women’s Hands: Reading Japanese Women Writers 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines major works of Japanese women writers from Heian (ninth century) to contemporary, focusing on themes, genres, representations of gender, ideas of love and romance, and feminine aesthetics. Readings include fiction, poetry, essays, and drama, with the main emphasis on fictional writing. Classes are conducted in English. Cross-listed with AST 150.

JPN 152 (E-Z) Themes in Modern Japanese Literature 4 Lecture, 3 hours; written work, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. An introduction to modern Japanese literature in translation as seen through the lens of a particular theme or issue. Explores works in translated translation; optional readings in Japanese may be offered. E. The End Of The World In Japanese Fiction; G. Love And Death; J. Classics And Canon; K. Dreams And Other Virtual Worlds; M. Food In Japanese Literature And Film. Cross-listed with AST 152 (E-Z).

JPN 153 (E-Z) Themes in Early Japanese Literature 4 Lecture, 3 hours; written work, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. An introduction to early Japanese literature as seen through the lens of a particular theme or issue. Explores works in English translation. E. Supernatural Japan; F. Warrior Japan; G. The Culture Of The Floating World: Tokugawa Period Literature, Drama, And Art. Cross-listed with AST 153 (E-Z).

JPN 154 (E-Z) Themes in the Folklore and Popular Culture of Japan 4 Lecture, 2 hours; discussion, 1 hour; extra reading, 1 hour; written work, 2 hours. Topics include myth, legend, folktales, folk performance, festival, ritual, and the development of popular or commercial culture. Considers literary versus oral tradition, ethnic identity, authenticity, nationalism, modernity, commodification, and the invention of tradition. E. Ancient Myth To Contemporary Legend: A Study Of Japanese Folk Narrative; F History Of Japanese Popular Culture. Cross-listed with AST 154 (E-Z).

JPN 180 Japanese Documentary 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Studies the history of Japanese documentary cinema. Teaches strategies for reading non-fiction visual narrative. Explores other forms of documentation controversial in modern Japanese history including oral testimony, photography, and internet activism. Topics may include war, war protest, peace activism, environmental activism, nuclear politics, and green energy. Course is repeatable as topics and instructor change to a maximum of 8 units. Cross-listed with AST 180, and MCS 180.

JPN 184 Japanese Media and Cultural Studies 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Investigates Japanese media and culture including film, television, video games, manga (comics), anime, music, and print and digital media. Analyzes the function of media relating to issues of national identity, imperial culture, collective memory, and censorship. Includes transnational circulation of Japanese cultural forms, alternative media, and historical changes in technologies. Cross-listed with AST 184, and MCS 184.

JPN 190 Special Studies 1 to 5 Individual Study, 3 to 15 hours. Prerequisite(s): upper-division standing or consent of instructor. To be taken with the consent of the Chair of the Department as a means of meeting special curricular problems in either language or literature. Course is repeatable.

Korean Minor

The Korean minor provides students with the knowledge of Korean language, literature, culture, and society.

1. Lower-division requirements (8 units plus language proficiency)
   a) Proficiency in Korean through the intermediate level, KOR 005 (second year)
   b) Eight (8) units from lower-division lecture courses on Korean literature and culture: KOR 042, KOR 047/AST 047/MCS 047

2. Upper-division requirements (16 units)
   a) Four (4) upper-division units in Korean language from KOR 101
   b) Eight (8) units in Korean literature and culture from KOR 110 (E-Z), KOR 112/AST 112, Four (4) units in Asian literatures and cultures: can be chosen from all the upper-division lecture courses on Asian literature and culture from the department as well as Korea-related upper-division courses from other departments (with adviser’s consent), including the courses listed under (2)

Korean Courses

Foreign Language Placement Examination
A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and placement test, ucr.edu for date and time. Transfer students who have taken a college-level language course may not take the placement examination and should consult with their advisors. No college-level credit may be duplicated. See college placement examination policy.
Lower-Division Courses
KOR 001 First-Year Korean 4 Lecture, 4 hours. Prerequisite(s): Student must take the Korean placement examination. An introduction to the sound system and grammar of Korean. Emphasizes reading, writing, understanding, and speaking. Credit is awarded for only one of the following sequences: KOR 001, KOR 002, KOR 003, and KOR 004; KOR 001, KOR 002, and KOR 020B; KOR 020A and KOR 020B.

KOR 002 First-Year Korean 4 Lecture, 4 hours. Prerequisite(s): KOR 001 with a grade of “C-” or better or equivalent. An introduction to the sound system and grammar of Korean with emphasis on reading, writing, understanding, and speaking. Credit is awarded for only one of the following sequences: KOR 001, KOR 002, KOR 003, and KOR 004; KOR 001, KOR 002, and KOR 020B; KOR 020A and KOR 020B.

KOR 003 First-Year Korean 4 Lecture, 4 hours. Prerequisite(s): KOR 002 with a grade of “C-” or better or equivalent. A continuation of Korean language study. Emphasizes reading, writing, understanding, and speaking. Credit is awarded for only one of the following sequences: KOR 001, KOR 002, KOR 003, and KOR 004; KOR 001, KOR 002, and KOR 020B; KOR 020A and KOR 020B.

KOR 004 Second-Year Korean 4 Lecture, 4 hours. Prerequisite(s): KOR 003 with a grade of “C-” or better or equivalent. A continuation of Korean language study. Emphasizes reading, writing, grammar, and conversation. Credit is awarded for only one of the following sequences: KOR 001, KOR 002, KOR 003, and KOR 004; KOR 001, KOR 002, and KOR 020B; KOR 020A and KOR 020B.

KOR 005 Second-Year Korean 4 Lecture, 4 hours. Prerequisite(s): KOR 004 or KOR 020B. A continuation of Korean language study. Emphasizes reading, writing, grammar, and conversation. Conducted primarily in Korean.

KOR 020A First-Year Korean For Heritage Learners 4 Lecture, 4 hours. Prerequisite(s): Student must take the Korean placement examination. A first-year Korean course designed for heritage learners who have some proficiency in listening comprehension and speaking but are unable to read and write in Korean. Credit is awarded for only one of the following sequences: KOR 001, KOR 002, KOR 003, and KOR 004; KOR 001, KOR 002, and KOR 020B; KOR 020A and KOR 020B.

KOR 020B First-Year Korean For Heritage Learners 4 Lecture, 4 hours. Prerequisite(s): KOR 002 with a grade of “C-” or better or KOR 020A with a grade of “C-” or better; or equivalent or a sufficiently high test score on the Korean placement examination as determined by the department faculty. A first-year Korean course designed for heritage learners who have some proficiency in listening comprehension and speaking but are unable to read and write in Korean. Credit is awarded for only one of the following sequences: KOR 001, KOR 002, KOR 003, and KOR 004; KOR 001, KOR 002, and KOR 020B; KOR 020A and KOR 020B.

KOR 042 Korean Culture and Society 4 Lecture, 3 hours; screening, 15 hours per quarter; extra reading, 1.5 hours. Prerequisite(s): none. An introduction to major themes, events, and trends in Korean culture and society. Covers the end of the nineteenth century to the present. All readings are in English, and all films have subtitles.

KOR 047 Introduction to Korean Film 4 Lecture, 3 hours; screening, 2 hours; discussion, 1 hour. An introduction to the major directors and films of Korea. Covers the genres and periods of works produced from the 1960s to the present. All films have English subtitles. No previous knowledge of Korean language or culture required. Cross-listed with AST 047, and MCS 047.

Upper-Division Courses
KOR 101 Advanced Korean 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): KOR 005 or consent of instructor. Designed to develop students’ fluency in Korean to the level of intellectual conversation. Students review Korean web sites, view Korean films, read Korean short stories and journal articles, and discuss current issues of Korean society.

KOR 110 (E-Z) Themes in Modern and Contemporary Culture of Korea 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Explores themes of modern and contemporary Korean literature and culture. M. History, Memory, And Nostalgia; T. Tradition Of Social Criticism.

KOR 112 Modern Korean Literature 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of modern Korean literature from the colonial era to the present. Topics include colonialism; cultural influence and exchange; gender, family and sexuality; nation and nationalism; Confucian tradition and patriarchal culture; and modernization and capitalism. Cross-listed with AST 112.

KOR 120 Narrating the Korean War 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the Korean War from various perspectives and through diverse reading and visual material (including film). Topics and themes may include narrative techniques, colonialism, imperialism, militarism, humanism, nationalism, the East/West relationship, and gender ideologies.

Languages
Committee in Charge
Heidi Brevik-Zender, Ph.D., Director
French/Comparative Literature
Heidi Waltz, Ph.D. Linguistics/Germanic Studies
Yenna Wu, Ph.D. Chinese/Civilizations/Comparative Literature
Darylle Williams, Ph.D, Dean, College of Humanities, Arts, and Social Sciences, ex officio

Major
The B.A. in Languages enables a student to specialize in two foreign languages through the acquisition of language competencies, as well as exposure to the theoretical basis and structure of language itself (linguistics), and the study of the cultural and literary practices, which the target languages reflect and enact. Students interested in a single language concentration should see individual language program listings in this catalog.

1. CPLT 001 or CPLT 001W, LING 020, and 1 lower-division CPLT course
2. Elementary and intermediate courses in languages one and two as required
3. Forty-Four (44) upper-division units distributed as follows:
   a) Language one — 20 units which must include the following minimums:
      (1) Twelve (12) units in language
      (2) Eight (8) units in literature and culture
   b) Language two — 12 units which must include the following minimums:
      (1) Eight (8) units in language
      (2) Four (4) units in literature and culture
   c) LING 111 — 4 units
   d) One upper-division course in Linguistics or one additional upper-division course in the first or second language or literature — 4 units
   e) CPLT 193 (4 units). (CPLT 196 strongly recommended but not required.)

Subject abbreviation: LTG

Graduate Course
LTG 250 Colloquium in Literatures and Languages 1 to 2 Seminar, 1 hour. Prerequisite(s): graduate standing. Lectures and discussions by staff, visiting scholars and students on current research topic. Students delivering lectures may take the course for 2 units, students attending lecture and discussions may take the course for 1 unit. May not count towards minimum unit requirement for the degree. Graded Satisfactory (S) or No Credit (NC).

Professional Course
CPLT 301 Teaching of Foreign Language at the College Level 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing, or senior standing with consent of instructor. Covers first and second language acquisition; general models of L2 learning; learning different types of grammar; learning other components of language: acquisition of pronunciation, vocabulary, and discourse; multilingual societies and the goals of language teaching; and implications of second language acquisition research for the foreign language classroom. Graded Satisfactory (S) or No Credit (NC).
Linguistics

(Comp Lit & Lang)
Curt Burgess (Psychology)
Christine Chiarello (Psychology)
Peter Graham (Philosophy)
Claudia Holguín (Hispanic Studies)
Gerald Maguire (Medical School)
Hyjein Nah (Anthropology)
Michael Nelson (Philosophy)
Covadonga Lamar Prieto (Hispanic Studies)
Wesley Leonard (Ethnic Studies)
Christian Shelton (Computer Science)
Heidi Waltz (Comp Lit & Lang)
Daryl Williams, Ph.D, Dean, College of Humanities, Arts, and Social Sciences, ex officio

Linguistics is the science of language. It seeks to discover the psychological and motor mechanisms of human speech, the similarities and differences among languages, how languages change, and the way in which language is acquired. Because linguistics is largely independent of fields with which the student is likely to be familiar, no special background is required for students entering the major.

Linguistics interacts with a wide variety of fields, such as articulatory phonetics (biology), acoustic phonetics (physics), field methods (anthropology), language and culture (anthropology), sociolinguistics, psycholinguistics, neurolinguistics, logic, the philosophy of language, and the study of particular languages (including their history). This interaction provides opportunities for students with varied interests and can give new perspectives to those in related disciplines.

Major

Upon electing the linguistics major, and certainly no later than the middle of the sophomore year, a student should see the Director of the Linguistics Committee for advising.

The director can help students find a suitable advisor to file the necessary forms. In consultation with an advisor, a student plans a coherent program of specific courses to meet the requirements below. The student and the advisor must then submit a copy of the program to the full Committee on Linguistics for approval.

Students interested in the linguistics major should request from the committee director information concerning the many possible course programs. Many of them permit double majors, thus providing strong preparation for further study in two fields.

Students may add variety and depth to their UCR linguistics major by attending a Summer Program in Linguistics (held in various places) or by participating in Education Abroad. This is an excellent opportunity to become deeply familiar with another country and its culture while earning academic units toward graduation. Students should plan well in advance to ensure that the courses taken outside of the U.S. fit in their overall program at UCR. Consult the departmental student affairs officer for assistance. For details, visit Education Abroad at ea.ucr.edu or call (951) 827-4113.

See Education Abroad in the Educational Opportunities section in the beginning of this catalog.

Requirements for the major are as follows:

1. LING 020
2. Twenty-four (24) upper-division units distributed as follows:
   a) LING 111, LING 121, LING 131, LING 141
   b) ANTH 123
   c) PHIL 132 or PSYC 135
3. At least 12 additional upper-division units of linguistic electives, to be chosen in consultation with the advisor and with the approval of the Linguistics Program director. (The additional courses may be in linguistics or in related fields. They may relate either to a particular field or specialization or to general linguistics.)
4. Foreign language proficiency equivalent to six quarters (24 units) of study, including at least fourth-quarter proficiency in one language. (Students may arrange with the director to satisfy this requirement by examination.)

Honors Program in Linguistics

1. Linguistics requirement: LING 020, LING 111, LING 121, LING 141, LING 190, LING 191
2. Related courses requirement:
   a) ANTH 120, ANTH 123
   b) ENGL 112
   c) CS 008, CS 10A, CS 10B
   d) MATH 144
   e) PHIL 108 or PHIL 008H
   f) Additional courses as may be required by the Linguistics Committee
3. Language Requirement — study in at least two language areas:
   a) Primary language: 24 units of foreign language instruction in a single language (this may include any courses taught in that language) plus courses in the structure, phonetics and history of the primary language, if available
   b) Secondary language: 16 units of a single language or at least 8 units in each of two languages (none of which may be members of the same subfamily of Indo-European as the primary language) plus at least 8 units in the structure, phonetics, or history of the language(s) chosen for the secondary area

In fulfilling the language requirement, students interested in earning a degree beyond the B.A. should take into account the foreign language requirements of the graduate schools to which they may apply. Students must have at least a 3.00 GPA in courses required for the Honors Program.

Lower-Division Courses

LING 020 Language and Linguistics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to modern linguistics. Covers the nature of language; language structure; grammars; the languages of the world; historical and comparative linguistics; and interdisciplinary approaches including anthropological and psycholinguistics.

LING 021 Grammar 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Fundamental concepts of grammatical structure. Includes parts of speech, paradigms, word families, agreement and government, the grammar of sentences and longer units of discourse, and style.

Upper-Division Courses

LING 111 Phonetics 4 Lecture, 3 hours; laboratory, 1 hour; research, 1 hour; extra reading, 1 hour. Prerequisite(s): LING 020. Develops practice in pronouncing and recognizing sounds from many languages. Covers methods of transcribing and analyzing these sounds.

LING 121 Syntax 4 Lecture, 3 hours; individual study, 2 hours; research, 2 hours; extra reading, 1 hour. Prerequisite(s): LING 020. Survey of various approaches to syntax including transformational. Examines syntactic structures of English and other languages. Applies to: English, foreign languages, philosophy, and mathematics.

LING 131 Morphology 4 Lecture, 3 hours; research, 1 hour; individual study, 1 hour; extra reading, 1 hour. Prerequisite(s): LING 020, LING 111 or LING 121. Studies word structure, the lexical component of language, allomorphy, types of morphemes, and inflectional and derivational morphology. Examines various theories of lexical/morphological organization in the brain. Provides examples from English and other Indo-European languages.

LING 141 Phonology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): LING 111. Introduction to the study of functional sound units in speech, including phonotactics, morphophonemics. Various theories are examined, including generative. Applications: speech correction, speech analysis, English, foreign languages.

LING 151 Semantics 4 Lecture, 3 hours; extra reading, 1 hour; outside research, 1 hour; term paper, 1 hour. Prerequisite(s): LING 121. Introduces the study of meaning and its metalinguistic preliminaries. Explores lexical, sentence, and utterance meaning (including speech acts, text, and discourse). Provides a survey of theories of meaning, such as structural semantics and language as a semiotic system.

LING 160 (E-Z) Topics in Dynamic and Comparative Linguistics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): LING 111; LING 121 or LING 141. Comparative analyses of language groups such as Spanish and Portuguese, Slavic languages, and Native American languages. E. Historical Linguistics; F. Dialectology; G. Language Change; I. Sociolinguistics.
LING 162 Language and the Brain 4
Lecture, 3 hours; research, 2 hours; extra reading, 2 hours. Prerequisite(s): LING 020 or PSYC 110 or PSYC 135 or CBNS 106; or consent of instructor. Interdisciplinary introduction to the study of language and the brain. Includes brain evolution for language, neural bases for language production and language comprehension, aphasiology and language disorders, and additional special topics. Cross-listed with PSYC 128.

LING 163 Anatomy and Physiology of Speech, Language, and Swallowing 4
Lecture, 3 hours; laboratory, 2 hours; research, 1 hour. Prerequisite(s): LING 111 with a grade of C- or better; restricted to class level standing of sophomore, or junior; restricted to major(s) Linguistics; or consent of instructor. An in-depth study of the anatomical structures involved in speech, language, and swallowing and their physiological functions. Includes knowledge of the speech subsystems (respiration, phonation, resonance, and articulation), neural features related to language, and the structures involved in deglutition.

LING 167 Structural/Descriptive Linguistics 4
Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): LING 020 or consent of instructor. An overview, from the original sources, of the contribution of major figures and schools in linguistics from Saussure through early Chomsky. Cross-listed with ANTH 167.

LING 190 Special Studies 1 to 5
To be taken with the consent of the chair of the Committee as a means of meeting special curricular problems. Course is repeatable.

LING 192 Tutorial Activities 1 to 2
Prerequisite(s): junior or senior standing and nomination by faculty. Enlarging understanding of linguistics through conducting tutorial sessions in introductory courses, under the supervision of faculty members responsible for the courses involved. Graded Satisfactory (S) or No Credit (NC). May be repeated for a maximum of three quarters.

LING 195 Senior Thesis 2 to 4
Thesis, 6 to 12 hours. Prerequisite(s): senior standing or consent of instructor. Independent research and preparation of a thesis completed under the supervision of a faculty member. Course is repeatable to a maximum of 12 units.

LING 195H Senior Honors Thesis 2 to 4
Thesis, 6 to 12 hours. Prerequisite(s): invitation by faculty to pursue honors work in Linguistics; senior standing or consent of instructor. Intensive study, research, and preparation of a thesis in consultation with a faculty member. To be taken during two or three successive quarters; course is repeatable to a maximum of 12 units.

LING 198 R’Course: Variable Topics 1
Activity hours vary per R’Course proposal. Prerequisite(s): permission needed from department; sophomore standing or better. An opportunity for UCR undergraduate students to develop leadership skills, innovate the undergraduate curriculum, and promote democratic, experiential education. Original course topics are variable and unique from other departmental course offerings, designed to highlight the student facilitators’ expertise while working closely with a faculty mentor. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as topics change to a maximum of 8 units.

See Education Abroad in the Educational Opportunities section in the beginning of this catalog.

Major
The Russian Studies B.A. has been developed for students who are interested in Russian language and literature, Russian history and civilization.

Individual major programs are dependent upon the students’ particular interests. In consultation with the advisor, each student plans a coherent program of courses to meet the requirements for the major. Normally, students’ programs are submitted for approval no later than the beginning of their junior year.

1. Lower-division requirement: CPLT 001 or CPLT 001W, and 1 lower-division CPLT course
2. Upper-division requirements
   a) Language requirement: 12 units from RUSN 101 (E-Z), RUSN 102 (E-Z), RUSN 120 (E-Z), RUSN 103
   b) Literature requirement: 12 units from RUSN 109A, RUSN 109B, RUSN 109C
3. B units from EUR 111A, EUR 111B, EUR 111C
4. CPLT 193 (4 units). (CPLT 196 strongly recommended but not required)

Total upper-division units: 36

Minor
The department offers a 24-unit disciplinary minor in Russian Studies.

The requirements for the minor are as follows:
1. Eight (8) units of RUSN 101 (E-Z), RUSN 102 (E-Z), RUSN 103
2. Sixteen (16) units of Russian Literature and Civilization courses chosen from the following:
   RUSN 109A, RUSN 109B, RUSN 109C, RUSN 120 (E-Z)
   EUR 111A, EUR 111B, EUR 111C

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Foreign Language Placement Examination
A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and placementtest.ucr.edu for date and time. Transfer students who have taken a college-level language course may not take the placement examination and should consult with their advisors. No college-level credit may be duplicated. See college placement examination policy.

Lower-Division Courses
RUSN 001 Elementary Russian 4
Lecture, 4 hours. Prerequisite(s): none. An introduction to the sound system and grammar of Russian, with attention to the development of the four skills of listening, speaking, reading, and writing.
RUSN 002 Elementary Russian 4 Lecture, 4 hours. Prerequisite(s): RUSN 001 with a grade of "C-" or better. An introduction to the sound system and grammar of Russian. Focuses on the development of the four skills of listening, speaking, reading, and writing.

RUSN 003 Elementary Russian 4 Lecture, 4 hours. Prerequisite(s): RUSN 002 with a grade of "C-" or better. An introduction to the sound system and grammar of Russian. Focuses on the development of the four skills of listening, speaking, reading, and writing.

RUSN 004 Intermediate Russian 4 Lecture, 4 hours. Prerequisite(s): RUSN 003 with a grade of "C-" or better. A comprehensive review of the basic grammatical structures of Russian. Includes irregular and idiomatic forms, vocabulary building, and development of conversation and composition skills.

RUSN 027 Russian Conversation 1 Discussion, 1 hour. Prerequisite(s): RUSN 001. Weekly discussion of topics of current interest, intended to develop and maintain basic conversational skills. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit for a total of 6 units.

RUSN 045 Soviet Cinema 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. A survey of the Soviet cinema, beginning with the film innovations of the 1920s and continuing with representative films from each of the ensuing periods of Soviet culture. All work done in English. Cross-listed with MCS 043.

RUSN 090 Special Studies 1 to 5 To be taken with the consent of the chair of the department as a means of meeting special curricular problems. Course is repeatable.

Upper-Division Courses

RUSN 101 (E-Z) Advanced Russian 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): RUSN 004. Students read texts in literature and expository prose, with attention to usage, style, grammar, and interpretation. Emphasis on developing reading and translation skills for adult-level reading competence.

RUSN 102 (E-Z) Advanced Russian; Grammar 2 Lecture, 2 hours. Prerequisite(s): RUSN 004. Each segment will deal with a specific topic in Russian grammar at an advanced level. Texts or materials vary from quarter to quarter. E. Nominal Declensions; F. Syntax I; G. Phonetics; I. Syntax II; J. Syntax III; K. Vocabulary Building; M. Verb Morphology.

RUSN 103 Advanced Russian Conversation and Composition 2 Lecture, 2 hours. Prerequisite(s): RUSN 004 or consent of instructor. Conversation and short compositions in Russian. Intended to develop and maintain basic conversational and writing skills. Course is repeatable to a maximum of 8 units.

RUSN 109A Survey of Russian Literature in Translation 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduction to major literary figures and representative masterpieces of the Golden Age (1830-1880). Any course in the RUSN 109A, RUSN 109B, and RUSN 109C sequence may be taken independently.

RUSN 109B Survey of Russian Literature in Translation 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduction to major literary figures and representative classics of the late nineteenth century and prerevolutionary twentieth century (1880-1917). Any course in the RUSN 109A, RUSN 109B, and RUSN 109C sequence may be taken independently.

RUSN 109C Survey of Russian Literature in Translation 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduction to major literary figures and representative works of the Soviet period (1917-1991). Any course in the RUSN 109A, RUSN 109B, and RUSN 109C sequence may be taken independently.

RUSN 120 (E-Z) Studies in Russian Literature 4 Lecture, 3 hours; extra reading, 3 hours. Analysis and discussion of representative works of Russian literature. Readings are in Russian and vary from quarter to quarter. F. Readings In Twentieth Century; G. Readings In Nineteenth Century.

RUSN 190 Special Studies 1 to 5 To be taken with the consent of the chairman of the department as a means of meeting special curricular problems. Course is repeatable.

RUSN 195 Senior Thesis 1 to 4 Research, 3 to 12 hours. Prerequisite(s): senior standing and consent of instructor. The student works independently with a faculty member doing research and preparing a thesis as a final phase of the student's major.

Graduate Courses

CPLT 290 Directed Studies 1 to 6 Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

RUSN 292 Concurrent Analytical Studies 2 Research, 6 hours. Prerequisite(s): consent of instructor; concurrent enrollment in RUSN 100-series course. To be taken on an individual basis. Student will complete a graduate paper based on research related to the RUSN 100-series course. May be repeated with different topic. RUSN 103 may not be used for RUSN 292.

Professional Courses

CPLT 301 Teaching of Foreign Language at the College Level 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing, or senior standing with consent of instructor. Covers first and second language acquisition; general models of L2 learning; learning different types of grammar; learning other components of language: acquisition of pronunciation, vocabulary, and discourse; multilingual societies and the goals of language teaching and implications of second language acquisition research for the foreign language classroom. Graded Satisfactory (S) or No Credit (NC).

RUSN 302 Teaching Practicum 1 to 4 Practicum, 3 to 12 hours. Prerequisite(s): CPLT 301 or equivalent; graduate standing; employment as a teaching assistant or associate in Supervised teaching in lower-division courses. Required of all teaching assistants in Russian. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Southeast Asian Minor

The Southeast Asian minor provides students with the opportunity to enhance their knowledge of Southeast Asian languages, cultures, and literatures.

1. Lower-division requirements

(8 units plus language proficiency)

a) Proficiency in one of the Southeast Asian languages (Vietnamese/Indonesian/Tagalog) through the first-year level

b) Eight (8) units from lower-division lecture courses on Southeast Asian literature and culture: AST 062/CPLT 062/SEAS 062, AST 063/CPLT 063/SEAS 063, AST 064/MCS 049/SEAS 064/VNM 064, AST 065/SEAS 065

2. Upper-division requirements

Sixteen (16) units in Southeast Asian literature and culture from CPLT 162/VMST 162, AST 165/SEAS 165, AST 162/HIST 167/VNM 162, AST 163/CPLT 163/SEAS 163, AST 165 (E-Z)/SEAS 165 (E-Z) VNM 165 (E-Z)/VMST 165 (E-Z), AST 166/CPLT 166/SEAS 166/VNM 166, AST 167/CPLT 167/SEAS 167, AST 168/MUS 168/SEAS 168, or graduate courses in Southeast Asian literature and culture (with consent of instructor) such as CPLT 200/SEAS 200 and CPLT 205/SEAS 205

Vietnamese Courses

Foreign Language Placement Examination A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign-language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and placementtest.ucr.edu for date and time. Transfer students who have taken a college-level language course may not take the placement examination and should consult with their advisors. No college-level credit may be duplicated. See college placement examination policy.

Lower-Division Courses

VNM 001 Elementary Vietnamese 4 Lecture, 4 hours. Prerequisite(s): student must take the Vietnamese placement examination. An introduction to the sound system and grammar of Vietnamese. Focuses on the development of the four skills: comprehension, speaking, reading, and writing. Courses are conducted in Vietnamese as often as possible. Credit is awarded for only one of the following sequences: VNM 001, VNM 002, and VNM 003; VNM 020A and VNM 020B.
VNM 002 Elementary Vietnamese 4
Lecture, 4 hours. Prerequisite(s): VNM 001 with a grade of "C-" or better or equivalent or a sufficiently high test score on the Vietnamese placement examination as determined by the department faculty. An introduction to the sound system and grammar of Vietnamese. Focuses on the development of the four skills: comprehension, speaking, reading, and writing. Classes are conducted in Vietnamese as often as possible. Credit is awarded for only one of the following sequences: VNM 001, VNM 002, and VNM 003; VNM 020A and VNM 020B.

VNM 003 Elementary Vietnamese 4
Lecture, 4 hours. Prerequisite(s): VNM 002 with a grade of "C-" or better or equivalent or a sufficiently high test score on the Vietnamese placement examination as determined by the department faculty. An introduction to the sound system and grammar of Vietnamese. Focuses on the development of the four skills: comprehension, speaking, reading, and writing. Classes are conducted in Vietnamese as often as possible. Credit is awarded for only one of the following sequences: VNM 001, VNM 002, VNM 003; VNM 020A and VNM 020B.

VNM 004 Intermediate Vietnamese 4
Lecture, 4 hours. Prerequisite(s): VNM 003 with a grade of "C-" or better or VNM 020B with a grade of "C-" or better or equivalent or a sufficiently high test score on the Vietnamese placement examination as determined by the department faculty. Emphasizes further development of vocabulary, reading, writing, comprehension, and speaking skills. Provides foundation for recognizing, formulating, and articulating complex ideas.

VNM 005 Intermediate Vietnamese 4
Lecture, 4 hours. Prerequisite(s): VNM 004 or equivalent or a sufficiently high test score on the Vietnamese placement examination as determined by the department faculty. Emphasizes further development of vocabulary, reading, writing, comprehension, and speaking skills. Provides foundation for recognizing, formulating, and articulating complex ideas.

VNM 020A Beginning Vietnamese For Advanced Heritage Learners 4
Lecture, 4 hours. Prerequisite(s): Student must take the Vietnamese placement examination Structured for the heritage student at the beginning level who has advanced comprehension and some speaking skills. Focuses on developing language skills and improving existing reading and writing skills. Credit is awarded for only one of the following sequences: VNM 001, VNM 002, and VNM 003; VNM 020A and VNM 020B.

VNM 020B Beginning Vietnamese For Advanced Heritage Learners 4
Lecture, 4 hours. Prerequisite(s): VNM 020A with a grade of "C-" or better or equivalent or a sufficiently high test score on the Vietnamese placement examination as determined by the department faculty. Builds upon course work covered in VNM 020A. Includes integrating situational lessons with vocabulary, sentence patterns, grammar, and socio-linguistics used in daily life. Credit is awarded for only one of the following sequences: VNM 001, VNM 002, and VNM 003; VNM 020A and VNM 020B.

VNM 064 Introduction to Vietnamese and Diasporic Film Culture 4
Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. Engages in critical viewing strategies and analytical visual critique. Explores the revival of film production in Vietnam following the Vietnam War, with a focus on the means of production, state control, and international distribution. Readings are in translation; classes conducted in English. Cross-listed with AST 064, MCS 049, and SEAS 064.

Upper-Division Courses

VNM 101 Advanced Vietnamese 4
Lecture, 3 hours; written work, 3 hours. Prerequisite(s): VNM 005 or equivalent or a sufficiently high test score on the Vietnamese placement examination as determined by the department faculty or consent of instructor. Designed to develop fluency in Vietnamese to the level of intellectual conversation. Emphasis is on reading and writing of Vietnamese literature and criticism, visual culture, and discussion of current issues of Vietnamese society.

VNM 162 Vietnamese Literary History 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing. A historical analysis of Vietnamese literature from its oral tradition to contemporary fiction. Follows the formation of the nation-state and the subsequent struggles with the Chinese, French, Japanese, and Americans. No knowledge of Vietnamese required. Readings are in translation or bilingual editions. Classes are conducted in English. Cross-listed with AST 162, HIST 187, and SEAS 162.

VNM 164 Vietnamese American Culture 4
Lecture, 3 hours; written work, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of the pervasive aspects of Vietnamese American culture. Includes shared histories, acculturation patterns, class diversity, identity struggles, community-building, literary and cultural production, youth issues, and cultural survival. Also introduces foundational literature, visual culture, and scholarship in the field. Cross-listed with AST 164, and SEAS 164.

VNM 165 (E-Z) Themes in Vietnamese Literature 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. An exploration of Vietnamese literature in translation as seen through the lens of a particular theme or issue. Focuses on the implications of gender and sexuality on nation formation. All materials are read or viewed in English. E. Women And War. Cross-listed with AST 165 (E-Z), GSST 165 (E-Z), and SEAS 165 (E-Z).

VNM 166 Vietnam and the Philippines 4
Lecture, 3 hours; written work, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the comparative national histories of Vietnam and the Philippines by way of great literary works in various genres including poetry, short fiction, and novels. All materials are read in English. Cross-listed with CPT 166, AST 166, and SEAS 166.

VNM 184 The Vietnam Wars 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. An introduction to Vietnamese history in the twentieth century. Covers the three Indochina wars (1945-1986) from different Vietnamese perspectives. Topics include experiences during French colonial rule; the anti-colonial movements, periods of French and American military involvement up to 1975; the postwar society; and the post-doí moi society. Cross-listed with AST 160, HIST 184, and SEAS 184.

VNM 189 Encountering Vietnam 5
Lecture, 6 hours; tutorial, 6 hours; project, 6 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on literary and historical accounts of Vietnam. Utilizes translated travel writings from different genres and eras. Proficiency in Vietnamese not required. Taught in Vietnam and offered only in summer. Cross-listed with AST 189, HIST 189, and SEAS 189.
Major
The Computer Engineering major stresses the study of core computer science and electrical engineering topics. It prepares students for careers in the design of complex systems involving computer hardware, computer software, electronics and electrical signals for communications, networking, desktop computing, and embedded computing.

The objective of the Computer Engineering program is to produce graduates who:

- have a mastery of the fundamental areas required for designing and using computers and engineered systems that contain computers
- have an ability to apply principles of engineering, mathematics, science, and statistics to the use, design, and interfacing of computers
- are able to apply modern design methodologies and state-of-the-art tools to design problems common to modern computer engineering practice
- have had extensive, relevant laboratory and hands-on experience to strengthen their understanding of scientific, logical, statistical, and engineering principles
- have a well-rounded and balanced education through required studies in elected areas of the humanities and social sciences
- are adept at both oral and written communication
- possess the high-quality undergraduate education necessary to progress to the M.S. and Ph.D. level or succeed in a career in industry
- understand the social, cultural, ethical, and environmental context of their work

The Computer Engineering B.S. degree program at UCR is accredited by the Engineering Accreditation Commission of ABET, abet.org. For more details, visit cen.ucr.edu.

The Intersegmental General Education Transfer Curriculum (IGETC) does not meet transfer requirements for Engineering.

All undergraduates in the College of Engineering must see an advisor at least annually. Visit student.engr.ucr.edu for details.

Change of Major Criteria
All students who request a change of major to Computer Engineering must meet the following requirements:

- Be in good academic standing
- Have no less than a C- in any Math, Science and Engineering coursework
- Be able to complete major within maximum allowable units
- Complete all the courses listed below, based on the total number of units earned, prior to submitting the major change request
- UCR transfer students interested in changing to a BCOE major must have been admitted to the major at point of entry, or must satisfy transfer admission and change of major requirements before earning 120 units

- If changing in the 90-119 units category student must have the ability to complete major within 5 years of entry as a freshman or 3 years after entry as a Transfer student
- Students who have earned 120 or more units are not eligible for a change of major in BCOE. NOTE: AP/IB units are excluded from maximum unit calculation

Completed 0 to less than 45 units
Completion of ENGL 001A with C or better, and a C or better in CS 010A, and completion of the following with at least 2.700 GPA:

- CS 010A
- MATH 009A
- PHYS 040A
- Any additional Math/Science/Engineering/CS courses

Completed 45 to less than 90 units
Completion of ENGL 001A with C or better, and a C or better in CS 010A and CS 010B, and completion of the following with at least 2.700 GPA:

- CS 010A
- CS 010B
- CS 061
- MATH 009A or MATH 09HA
- MATH 009B or MATH 09HB
- MATH 009C or MATH 09HC
- PHYS 040A or PHYS 040HA
- Any additional Math/Science/Engineering/CS courses

Completed 90 to less than 120 units
Completion of ENGL 001A and ENGL 001B with C or better, and a C or better in CS 010A and CS 010B, and completion of the following with at least 2.700 GPA:

- CS 010A
- CS 010B
- CS 061
- MATH 009A or MATH 09HA
- MATH 009B or MATH 09HB
- MATH 009C or MATH 09HC
- PHYS 040A or PHYS 040HA
- PHYS 040B or PHYS 040HB
- Any additional Math/Science/Engineering/CS courses

University Requirements
See Undergraduate Studies section.

College Requirements
See The Marlan and Rosemary Bourns College of Engineering, Colleges and Programs section.

The Computer Engineering major uses the following major requirements toward the satisfaction of some of the college’s Natural Science and Mathematics breadth requirements.

1. MATH 009A
2. PHYS 040A, PHYS 040B, PHYS 040C

Major Requirements
1. Lower-division requirements (72 units):
   a) ENGR 001G
   b) CS 010A, CS 010B, CS 010C, CS 061
   c) CS 011/MATH 011
   d) EE 020A/MATH 045, EE 020B, EE 030A, EE 30A, EE 030B
   e) MATH 009A, MATH 009B, MATH 009C, MATH 010A
   f) PHYS 040A, PHYS 040B, PHYS 040C
   g) CHEM 001A or ME 010

2. Upper-division requirements (77 units minimum)
   a) ENGR 101G
   b) CS 100, CS 153, CS 161, CS 161L
   c) CS 120A/ EE 120A, CS 120B/EE 120B; one course from CS 122A or EE 128
   d) CS 111
   e) CS 168/EE 168
   f) ENGR 180W
   g) EE 100A
   h) EE 111
   i) EE 114
   j) Six courses (at least 24 units) as technical electives from the following set of upper division courses:
      CS 110, CS 122A, CS 122B, CS 130, CS 142,
      CS 144, CS 150, CS 152, CS 160, CS 162,
      CS 164, CS 165, CS 166, CS 169, CS 170,
      CS 171, CS 172, CS 175, CS 177, CS 178A,
      CS 178B, CS 179 (E-Z), CS 180, CS 181,
      CS 182, CS 183, CS 193 EE, 100B, EE 105,
      EE 106, EE 115, EE 123, EE 128 EE 132,
      EE 133, EE 135, EE 136, EE 137, EE 141,
      EE 144, EE 146, EE 147, EE 150, EE 151,
      EE 152, EE 162, EE 165, EE 175A, EE 175B,
      ENGR 160

   The technical electives selected from i) must include a senior capstone project option selected from the following 3 options: (1) CS 179 (E-Z), (2) CS 178A and CS 178B (both need to be taken), or (3) EE 175A and EE 175B (both need to be taken). The technical electives must be distinct from those used to satisfy the upper-division requirements specified in items a) to i) above.

   Students may petition for exceptions to the above degree requirements. Exceptions to Computer Science and Electrical Engineering course requirements must be approved by the Computer Engineering undergraduate faculty advisor or chair.

   Visit the Student Affairs Office in the College of Engineering or student.engr.ucr.edu for a sample program.

Graduate Program
The Computer Engineering program offers the B.S. + M.S. program and the M.S. degree in Computer Engineering. Specific requirements or each degree are described below.
Master’s Degree

M.S. in Computer Engineering

The college offers an M.S. program in Computer Engineering.

Admission

All applicants to this program must have completed a bachelor’s degree or its approved equivalent from an accredited institution and to have attained undergraduate record that satisfies the standards established by the Graduate Division and University Graduate Council. Applicants should have at least an undergraduate major in Computer Engineering, Computer Science, Electrical Engineering or a closely related field. Applicants who fail to meet this criterion may sometimes be admitted with course deficiencies. However, no more than three deficiencies will be allowed.

All applicants must submit scores from the Graduate Record Exam, General Test (GRE). The GRE subject test in Computer Science or Electrical Engineering is recommended but not required. Applicants whose first language is not English are required to submit acceptable scores from the TEST of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) unless they have a degree from an institution where English is the exclusive language of instruction. Additionally each applicant must submit three letters of recommendation, at least two of which must be academic references. All other application requirements are specified in the graduate application.

Prerequisite Material

Competence in the areas defined by the following UCR courses is essential to graduate study in computer engineering:

EE 100A, CS 153, CS 161, CS 120A/EE 120A

A student who is deficient in any of these competence areas may be asked to pass the corresponding UCR course with a letter grade of at least B, a grade of S if S/NC is an option for the class with the instructors approval, or to pass a challenge examination based on that course’s final exam with a grade of at least B. All such remedial work should be completed within the first year of graduate study, and in all cases the deficiency must be corrected before a student can enroll in any graduate course from the same specialty area. The admission prerequisite courses listed above may not be taken for graduate credit.

Course Requirements

Students must be in residence at least one year and complete a minimum of 44 quarter units of graduate and upper division undergraduate courses in or related to the major subject area. Students can enroll in maximum 15 units per quarter. Exceptions to this quarterly enrollment policy are only made for specific circumstances and are subject to evaluation and approval. Students who have completed similar courses elsewhere may petition for waiver of a required course or for substitution of an alternative course. For students interested in interdisciplinary research, individual study programs can be approved.

1. Core Requirement (12 units). Three courses from the list of core courses below, with no grade lower than B-:
   - CS 201 or CS 202, CS 203, CS 220, EE 213, CS 217/EE 217, CS 251/EE 255

2. Technical Electives (16 units). Choose four from Computer Science or Electrical Engineering 200-level courses. Seminar courses (CS 260 and CS 270-level courses, EE 260-level courses), as well as CS 290, CS 297, CS 299 and EE 290, EE 297 and EE 299 may not be used.

3. Additional Credits (16 units). This category may be satisfied by a combination of the choices below:
   - Additional graduate technical electives as described under (2.) above;
   - Up to three of the undergraduate courses below to satisfy additional credits;
   - CS 105, CS 111, CS 120B, CS 122A, CS 122B, CS 130, CS 141, CS 150, CS 152, CS 160, CS 161L, CS 162, CS 164, CS 165, CS 166, CS 168, CS 169, CS 170, CS 171, CS 172, CS 177, CS 179 (E-Z), CS 180, CS 181, CS 183, CS 193, EE 100B, EE 105, EE 115, EE 120B, EE 123, EE 128, EE 131, EE 135, EE 141, EE 144, EE 146, EE 150, EE 151, EE 152, EE 165, EE 175A, EE 175B, ENGR 160; or
   - Up to two seminar classes (CS260, EE260 or similar classes);
   - With the pre-approval of the graduate advisor, any relevant 200-level courses from other departments in Engineering or outside. If coursework is not obtained, there is no guarantee that a class will be deemed relevant.

4. Professional Development Requirement, Colloquium (1 unit)

M.S. students must satisfactorily complete one of the following courses: one quarter of CS 287, EE259, GDIV 301, GDIV 403 or at least one unit of CS 298I or EE 298I. Other professional development courses may be used to satisfy this requirement if approved by the graduate advisor.

5. Capstone Experience

All students must complete a capstone experience that synthesizes and integrates the knowledge and skills obtained throughout the master’s program, by either passing a comprehensive exam, writing a thesis, or completing a project. The Comprehensive Examination is the default option. If a student chooses the alternative project or thesis option, it is their responsibility to find a faculty member willing to supervise the master’s project or thesis, to form the faculty examining committee, and to schedule the oral examination.

a. Comprehensive Examination Option

In addition to the course requirements above, students must pass a comprehensive examination administered by the Computer Engineering Program.

b. Project Option

Students may replace up to 4 units of directed research (CS 297, EE 297) and/or directed studies (CS 290, EE 290) with 4 units of “Additional Credits” with 4 units of directed research (CS 297, EE 297) and/or directed studies (CS 290, EE 290).

Units obtained in graduate research for the thesis or dissertation (CS 299, EE 299) may not be used to satisfy any course requirements under this option. Students must complete a research project under the guidance of a faculty member. The project will be approved by a committee of at least two faculty members, at least one of whom is a faculty member in the Computer Engineering program, and requires a presentation and written report.

c. Thesis Option

Students may replace up to 8 units of courses listed under “Additional Credits” with 8 units of graduate research for the thesis or dissertation (CS 299, EE 299). Units obtained in directed research or directed studies (CS 290, CS 297, EE 290, EE 297) may not be used to satisfy any course requirements under this option. Students must submit a master’s thesis in accordance with the general requirements of the university. The thesis is original research work, and it should demonstrate the student's ability to study a research area, identify an open problem and make a research contribution. The thesis requires a presentation and must be approved by a committee of at least three faculty members.

Combined B.S. + M.S. Five-Year Program

The college offers a combined five year B.S. + M.S. program, designed to allow successful UCR Computer Engineering B.S. graduates to complete the Master of Science degree in Computer Engineering in one year by allowing up to 12 credits of coursework taken as a UCR undergraduate to be counted towards the elective requirements of the M.S. (The courses that can be double counted are those that are used as technical electives in the B.S. requirements.) A student may apply at the start of their senior year by submitting an application to the Computer Engineering M.S. program, providing that at the end of junior year, the student was a UCR Computer Engineering B.S. student with a cumulative GPA at least 3.4 and had completed the following courses with no grade less than B- and average grade at least 3.2: CS 100, CS 061 or CS 120A, CS 111 or CS 141, CS 153. The application to the M.S. program must include at least two recommendation letters from UCR Academic Senate faculty members (at least one, and preferably both, CSE faculty). Submission of GRE scores with the application is recommended but not required. Matriculation into the combined program occurs in the Fall term following senior year, provided: (a) the M.S. application is accepted, (b) through-out senior year, the student is a Computer Engineering B.S. major with cumulative GPA 3.4 or higher, (c) by the end of senior year, the student completes the Computer Engineering B.S. degree requirements.

Incoming students who are applying to the Computer Engineering B.S. program may simultaneously apply for preliminary admission into the combined program provided that their high school GPA is at least 3.6, their SAT-I combined score is at least 1500, they satisfy the Entry Level Writing requirement before matriculation, and they have sufficient math,
preparation to enroll in calculus upon arrival. Preliminary admission status is maintained as long as the student is a Computer Engineering or Computer Science B.S. student in good standing with a cumulative GPA of at least 3.4. Preliminarily admitted students still need to apply for full admission in their senior year as described above.

**Five-year programs leading to M.S. degrees in other programs** (including Computer Science) are also available. They are described separately in the catalog sections for those programs.

### Major

The Department of Computer Science and Engineering offers three majors at the undergraduate level. UCR’s offerings of all three majors are unique compared to many schools in the emphasis on theoretical foundations and practical applications.

The **Computer Science** major stresses the study of core and advanced computer science topics. It prepares students for a large variety of careers in computing, including software engineering, networks, databases, graphics, algorithms, security, system analysis, and embedded systems.

The objective of the B.S. degree program in Computer Science is to prepare graduates for professional practice in both the private and public sectors and for life-long learning, including the option for graduate degrees, by providing them with:

- **Background:** the necessary technical competencies, including knowledge of scientific principles and skill at rigorous analysis and creative design
- **Breadth:** a broad education that includes knowledge of current issues and trends in society and technology
- **Professionalism:** professional attitudes and ethics and skills for clear communication and responsible teamwork
- **Learning environment:** a learning environment that is rigorous, challenging, open, and supportive

All undergraduates in the College of Engineering must see an advisor at least annually. Visit student.engr.ucr.edu for details.

All three degree programs at UCR, Computer Science B.S., Computer Engineering B.S., and Computer Science with Business Applications B.S., are accredited by the Engineering Accreditation Commission of ABET, abet.org.

### Change of Major Criteria

All students who request a change of major to Computer Science must meet the following requirements:

- Be in good academic standing
- Have no less than a C- in any Math Science and Engineering coursework
- Be able to complete major within maximum allowable units
- Complete all the courses listed below, based on the total number of units earned, prior to submitting the major change request
• UCR transfer students interested in changing to a BCOE major must have been admissible to the major at point of entry, or must satisfy transfer admission and change of major requirements before earning 120 units
• If changing in the 90-119 units category student must have the ability to complete major within 5 years of entry as a Freshmen or 3 years after entry as a Transfer student
• Students who have earned 120 or more units are not eligible for a change of major in BCOE. NOTE: AP/IB units are excluded from maximum unit calculation

Completed 0 to less than 45 units
Completion of ENGL 001A with C or better, and a C or better in CS 010A and CS 010B, and completion of the following with at least 3.00 GPA:
• CS 010A
• CS 010B
• MATH 009A or MATH 09HA
• And any additional Math/Science/Engineering/CS courses (if taken)

Completed 45 to less than 90 units
Completion of ENGL 001A with C or better, and a C or better in CS 010A and in CS 010B, and completion of the following with at least 3.00 GPA:
• CS 010A
• CS 010B
• MATH 011/CS 011
• MATH 009A or MATH 09HA
• MATH 009B or MATH 09HB
• MATH 009C or MATH 09HC
• And any additional Math/Science/Engineering/CS courses (if taken)

Completed 90 to less than 120 units
Completion of ENGL 001A and ENGL 001B with C or better, and a C or better in CS 010A and in CS 010B, and completion of the following with at least 3.00 GPA:
• CS 010A
• CS 010B
• CS 010C
• CS 061
• MATH 011/CS 011
• MATH 009A or MATH 09HA
• MATH 009B or MATH 09HB
• MATH 009C or MATH 09HC
• And any additional Math/Science/Engineering/CS courses (if taken)

Change of Major Criteria
All students who request a change of major to Computer Science with Business Applications must meet the following requirements:
• Be in good academic standing
• Have no less than a C- in any Math, Science and Engineering coursework
• Be able to complete major within maximum allowable units

• Complete all the courses listed below, based on the total number of units earned, prior to submitting the major change request
• UCR transfer students interested in changing to a BCOE major must have been admissible to the major at point of entry, or must satisfy transfer admission and change of major requirements before earning 120 units
• If changing in the 90-119 units category student must have the ability to complete major within 5 years of entry as a Freshmen or 3 years after entry as a Transfer student
• Students who have earned 120 or more units are not eligible for a change of major in BCOE. NOTE: AP/IB units are excluded from maximum unit calculation

Completed 0 to less than 45 units
Completion of ENGL 001A with C or better, and a C or better in CS 010A, and completion of the following with at least 2.700 GPA:
• BUS 020
• CS 010A
• MATH 009A or MATH 09HA
• Any additional Math/Science/Engineering/CS courses (if taken)

Completed 45 to less than 90 units
Completion of ENGL 001A with C or better, and a C or better in CS 010A and in CS 010B, and completion of the following with at least 2.700 GPA:
• BUS 020
• CS 010A
• MATH 009A or MATH 09HA
• MATH 009B or MATH 09HB
• MATH 009C or MATH 09HC
• And any additional Math/Science/Engineering/CS courses (if taken)

Completed 90 to less than 120 units
Completion of ENGL 001A and ENGL 001B with C or better, and a C or better in CS 010A and in CS 010B, and completion of the following with at least 2.700 GPA:
• BUS 020
• CS 010A
• CS 010B
• MATH 009A or MATH 09HA
• MATH 009B or MATH 09HB
• MATH 009C or MATH 09HC
• And any additional Math/Science/Engineering/CS courses (if taken)

The Computer Science major uses the following major requirements toward the satisfaction of some of the college’s Natural Sciences and Mathematics breadth requirements and one of the college’s English Composition breadth requirements.
1. ENGR 180W
2. MATH 008B or MATH 009A
3. PHYS 040A, PHYS 040B, PHYS 040C

The Computer Science with Business Applications major uses the following major requirements toward the satisfaction of the college’s Social Sciences breadth requirements and one of the College’s Natural Science and Mathematics breadth requirements.
1. ECON 002, ECON 003
2. MATH 008B or MATH 009A
3. SOC 150

Major Requirements
Computer Science Major
1. Lower-division requirements (65 units minimum)
   a) ENGR 001-I
   b) CS 010A, CS 010B, CS 010C, CS 061
   c) CS 011/MATH 011
   d) MATH 009A, MATH 009B, MATH 009C, MATH 010A, and either MATH 031 or EE 020B.
   e) PHYS 040A, PHYS 040B, PHYS 040C
   f) At least 8 additional units that are distinct from other requirements, 4 of which must be engineering breadth electives and the remaining may be engineering breadth electives. Depth electives in this category include: BIEN 010, EE030A & 30A, EE 005, EE 016, EE 20A, ENSC 001, ENSC 002, MATH 010B, MATH 046, ME 002, ME 005, ME 018A, ME 018B, ME 009, ME 010, or other engineering courses outside the field of computer science to be selected in consultation with a faculty advisor. Breadth courses include: any depth course above CHEM 001A or CHEM 001B, CHEM 010A or CHEM 010C, CHEM 010C or CHEM 010H, CHEM 010H or CHEM 1HLA, CHEM 010L or CHEM 1HLB, CHEM 010L or CHEM 1LHC, CHEM 008A or CHEM 008B, CHEM 08AL or CHEM 08HLA, ECON 005, ECON 060, LING 020, LING 021, PHIL 125, PHIL 126, PHIL 127, STAT 004, STAT 008, STAT 010, or one selected in consultation with a faculty advisor. (Either a lower-division or an upper-division course may be used to satisfy this requirement).
2. Upper-division requirements (79 units minimum)
   a) ENGR 101-I
   b) CS 100, CS 141, CS 150, CS 152, CS 153, CS 161, CS 179 (E-Z)
   c) CS 120A/EE 120A
   d) CS 111
   e) ENGR 180W
   f) STAT 155

University Requirements
See Undergraduate Studies section.

College Requirements
See The Marlan and Rosemary Bourns College of Engineering, Colleges and Programs section.
g) At least 28 units of technical electives to be chosen from an approved list of courses which currently includes CS 105, CS 120B/EE 120B, CS 122A, CS 122B, CS 130, CS 131, CS 133, CS 135, CS 142, CS 144, CS 145, CS 147, CS 160, CS 162, CS 164, CS 165, CS 166, CS 167, CS/EE 168, CS 169, CS 170, CS 171, CS 172, CS 173, CS 175, CS 177, CS 178B, CS 179 (E-2) (4 units maximum), CS 180, CS 181, CS 182, CS 183, CS 193 (4 units maximum), MATH 120, MATH 126, MATH 135A, MATH 135B, PHIL 124.

The technical electives selected must be distinct from those used to satisfy the requirements specified in 2.a)–f) above, with at least half of the (16) units selected from Computer Science courses.

Visit the Student Affairs Office in the College of Engineering or student.engr.ucr.edu for a sample program.

Computer Science with Business Applications Major

1. Lower-division requirements (59 units)
   a) ENGR 001M
   b) BUS 020
   c) CS 01A0, CS 01B0, CS 01C0, CS 061
   d) CS 01/101
   e) ECON 002, ECON 003
   f) MATH 009A, MATH 009B, MATH 009C, MATH 010A, and either MATH 031 or EE 020B
   g) One course of 4 or more units from ECON 005, ECON 060, STAT 004, STAT 008, STAT 010, MATH 046 or one selected in consultation with a faculty advisor. (Either a lower-division or an upper-division course may be used to satisfy this requirement).

2. Upper-division requirements (86 units)
   a) ENGR 101M
   b) BUS 103, BUS 104/STAT 104, BUS 106/ECON 134
   c) CS 100, CS 141, CS 153
   d) At least two courses from CS 110, CS 160, CS 164, CS 166, CS 167, CS 169, CS 172, CS 180, CS 183
   e) CS 111
   f) ENGR 180W
   g) SOC 150
   h) STAT 155
   i) At least twenty (20) units of Computer Science technical electives to be chosen from an approved list of courses which currently includes CS 105, CS 108, CS 110, CS 120A, CS 120B, CS 122A, CS 122B, CS 130, CS 131, CS 133, CS 135, CS 142, CS 144, CS 145, CS/EE 147, CS 150, CS 152, CS 160, CS 161, CS 162, CS 164, CS 165, CS 166, CS 167, CS/EE 168, CS 169, CS 170, CS/EE 171/172, CS 173, CS 175, CS 177, CS 178B, CS 179 (E-Z) (4 units maximum), CS 180, CS 181, CS 182, CS 183, CS 193 (4 units maximum).
   j) At least sixteen (16) units of Business Administration technical electives, including at least 8 units of courses listed in the information systems concentration within the Business Administration major, which currently include BUS 110, BUS 125, BUS 128, BUS 163, BUS 166, BUS 171, BUS 172, BUS 173, BUS 174, BUS 175, BUS 179. Additionally, no credit will be given for BUS 101, and the following pairs of courses cannot both be taken for credit: BUS 125 and CS 177, BUS 163 and CS 175, BUS 171 and CS 180, BUS 173 and CS 166, BUS 175 and CS 164.

The technical electives selected for 2.i)-j) must be distinct from those used to satisfy the requirements specified in 2.a)–h) above.

Students may petition for exceptions to the above degree requirements. Exceptions to Computer Science course requirements must be approved by the Computer Science and Engineering undergraduate advisor or chair.

Visit the Student Affairs Office in the College of Engineering or student.engr.ucr.edu for a sample program.

Minor in Computer Science

The minor in Computer Science is designed to enhance majors with limited computational theory or practice. As such, students with majors in Computer Engineering, Computer Science, Computer Science and Business Applications, Data Science, and Mathematics (Computational Mathematics option) are not eligible.

Requirements for the minor in Computer Science are:

1. Lower-division courses: CS 01A0, CS 01B0, CS 01C0, CS 061, CS 01/101, MATH 009A, MATH 009B, MATH 009C.

2.  Core courses: CS 100, CS 111

3. Three elective courses, each of four or more units, such that:
   a) Each is an upper-division requirement or a listed technical elective for the Computer Science major, excluding courses numbered 190–199
   b) No course may be an upper-division requirement of the student's major
   c) At least two courses must be in the Department of Computer Science and Engineering

4. All courses for the minor must be taken for a letter grade.

Note: Students with a minor in Computer Science must obtain approval from the undergraduate advisor in Computer Science and Engineering for a specific program of electives consistent with their career goals.

Graduate Program

The Department of Computer Science and Engineering offers the M.S. and Ph.D. degrees in Computer Science. General requirements are listed in the Graduate Studies section of this catalog. Specific requirements for each degree are described below.

Students enrolled prior to Fall 2008 can still follow the old Graduate Program.

Admission

All applicants must supply GRE General Test scores. The GRE subject test in Computer Science is recommended but not required. Applicants should have at least an undergraduate degree in computer science or a closely related field, but applicants who fail to meet this criterion may sometimes be admitted with deficiencies.

Prerequisite Material

Competence in the areas defined by the following UCR courses is essential to graduate study in computer science:

CS 061, CS 141, CS 153

A student who is deficient in any of these competency areas may be asked to complete the corresponding UCR course with a letter grade of at least B+, or to pass a challenge examination based on that course’s final exam with a grade of at least B+. All such remedial work should be completed within the first year of graduate study, and in all cases the deficiency must be corrected before a student can enroll in any graduate course from the same specialty area.

Core Areas

Students have considerable flexibility in selecting specialty area(s) within the program. However, the following core areas introduce fundamental concepts and tools of general interest to all students.

1. Hardware design principles: CS 203 or CS 220.
2. Theoretical foundations: CS 215 or CS 218.

Major Specialty Areas

The department has active research programs in the following major specialty areas. A list of related graduate courses is provided for each area.

A. Algorithms, Bioinformatics, and Theory of Computation: CS 214, CS 215, CS 218, CS 219, CS 234, CS 238
C. Databases, Information Retrieval, Data Mining, and Machine Learning: CS 205, CS 224, CS 225, CS 226, CS 227, CS 229, CS 235, CS 236, CS 242, CS 228/EE 228, CS 248/EE 248
E. Computer Networks: CS 204, CS 208, CS 237, CS 239, CS 240, CS 254, CS 255, CS 257
F. Programming Languages, Compilers, and Software Engineering: CS 201, CS 206, CS 207, CS 246, CS 249
H. Cybersecurity: CS 216, CS 250, CS 254, CS 255
Master's Degree

The Department of Computer Science and Engineering offers the M.S. degree in Computer Science, after completion of the following degree requirements.

Course Requirements 48 quarter units of graduate or upper-division undergraduate courses are required. Students who have completed similar courses elsewhere may petition for a waiver of a required course or for substitution of an alternative course. For students interested in interdisciplinary research, individual study programs can be approved. All courses used to satisfy these requirements (with the exception of CS 297 and CS 299) must be taken for a letter grade. No course can be counted towards more than one category.

1. Core Requirement (8 units). Choose one course from two of the three Core Areas listed above, with no grade lower than B-.

2. Breadth Requirement (8 units). Two approved breadth courses chosen in such a way that together the core and breadth courses cover four different Major Specialty Areas (A to G).

3. Electives (32 units). Students have the option of completing their degree by taking a comprehensive exam, writing a thesis, or completing a project. Depending on the option selected, the electives that may be taken are:
   a. Comprehensive Examination Option. For a student pursuing the M.S. degree, comprehensive examination option, the 32 elective units must include at least 16 units of approved graduate lecture courses. The remaining 16 units may include additional approved graduate lecture courses, up to 8 units of graduate seminars in CS 260–269, and up to 12 units of approved undergraduate technical electives. Research units (CS 297 or CS 299) may not be used to satisfy any course requirements under this option.
   b. Project Option. A student pursuing the M.S. degree, project option, may include up to 4 units of Directed Research (CS 297) towards the elective requirement. Of the remaining 28 units, at least 12 units must be approved graduate lecture courses. The remaining 16 units may include additional approved graduate lecture courses, up to 8 units of graduate seminars in CS 260–269, and up to 12 units of approved undergraduate technical electives.
   c. Thesis Option. A student pursuing the M.S. degree, thesis option, may include up to 12 units of graduate research (CS 297 or CS 299) towards the elective unit requirement. Of the remaining 20 units, at least 4 units must be approved graduate lecture courses. The remaining 16 units may include additional approved graduate lecture courses, up to 8 units of graduate seminars in CS 260–269, and up to 8 units of approved undergraduate technical electives.

Capstone Experience

All students must complete a capstone experience that synthesizes and integrates the knowledge and skills obtained throughout the master's program, by either passing a comprehensive exam, writing a thesis, or completing a project. The Comprehensive Examination Option is the default option. If a student chooses the project or thesis option, it is the responsibility of the student to find a faculty member willing to supervise the master's project or thesis, to form the faculty examining committee, and to schedule the oral examination.

a. Comprehensive Examination Option. Students must pass a comprehensive examination administered by the Department of Computer Science and Engineering.

b. Project Option. Students must complete a research project under the guidance of a faculty member. The project will be approved by a committee of at least two faculty members and requires a presentation and written report.

c. Thesis Option. Students must submit a master's thesis in accordance with the general requirements of the university. The thesis is original research work and it should demonstrate the student's ability to study a research area, identify an open problem, and make a research contribution. The thesis requires a presentation and must be approved by a committee of at least three faculty members.

Normative Time to Degree 2 years.

Combined B.S. + M.S. Five-Year Program

The college offers combined five-year B.S. + M.S. programs designed to allow successful UCR Computer Science or Computer Engineering B.S. graduates to complete the Master of Science degree in Computer Science in one year, by allowing up to 12 credits of coursework taken as a UCR undergraduate to be counted towards the 32-unit elective requirements of the M.S. (The courses that can be double counted are those that are eligible to be counted as technical electives in the B.S. requirements.)

Capstone Experience

A student may apply at the start of their senior year by submitting an application to the Computer Science M.S. program, provided that at the end of junior year, the student was a UCR Computer Science or Computer Engineering B.S. student with cumulative GPA of at least 3.4 and had completed the following courses with no grade lower than B- and average grade at least 3.2: CS 100, CS 061 or CS 120A, CS 111 or CS 141, CS 153. The application to the M.S. program must include at least two recommendation letters from UCR Academic Senate faculty members (at least one, and preferably both, CSE faculty). Submission of GRE scores with the application is recommended but not required. Matriculation into the combined program occurs in the fall term following senior year, provided: (a) the M.S. application is accepted, (b) throughout senior year, the student is a Computer Science or Computer Engineering B.S. major with cumulative GPA 3.4 or higher, (c) by the end of senior year, the student completes the Computer Science or Computer Engineering B.S. degree requirements.

Incoming students who are applying to the Computer Science or Computer Engineering B.S. programs may simultaneously apply for preliminary admission into the combined program provided their high school GPA is at least 3.6, their SAT-I combined score is at least 1500, they satisfy the Entry Level Writing requirement before matriculation, and they have sufficient math preparation to enroll in calculus upon arrival. Preliminary admission status is maintained as long as the student is a Computer Science or Computer Engineering B.S. student in good standing with a cumulative GPA of at least 3.4. Preliminarily admitted students still need to apply for full admission in their senior year as described above.

Five-year programs leading to M.S. degrees in other programs (including Computer Engineering) are also available. They are described separately in the catalog sections for those programs.

Doctoral Degree

The Department of Computer Science and Engineering offers the Ph.D. degree in Computer Science, after completion of the following degree requirements. It provides a research-oriented education in preparation for a career in research, industry, or academia and exploring both the fundamental aspects of computer science and engineering as well as their applications.

Course Requirements

The course requirements for the Ph.D. degree ensure that Ph.D. students are exposed to fundamental concepts and tools (core requirement), a deep up-to-date view of their research specialty area (depth requirement), and an advanced, up-to-date view of the same topics outside their area (breadth requirement). Students are expected to complete all of these course requirements in the first two years of the program. These requirements consist of 44 quarter units of approved graduate or upper-division undergraduate courses, satisfying all four of the following course work categories. All of these courses must be taken for a letter grade, and no course can be counted towards more than one category. Students who have completed similar courses elsewhere may petition for a waiver of a required course or for substitution of an alternative course.

Units obtained in CS 270, CS 287, CS 290, CS 297, CS 298, CS 299, CS 301, and CS 302 cannot be counted in any course work category.

1. Core Requirement (12 units). Choose three courses from at least two of the three Core Areas described above, with no grade lower than B- and an overall core course GPA of at least 3.2.

2. Depth Requirement (8 units). Choose two courses listed above under the same Major Area (A to G). This requirement ensures that Ph.D. students, early on in their careers, acquire some depth of knowledge in a particular research area.
3. Breadth Requirement (12 units). Choose three courses from at least two different Major Areas (A to G) outside the student’s depth area. No course that is listed in the student’s depth area can be used to fulfill the breadth requirement, even if it is cross-listed in another area. Students, with the consent of the major professor, may petition for a non-CSE course to be counted towards the breadth requirement.

4. Electives (12 units). The remaining courses can be selected from additional CSE graduate classes, up to 8 units of graduate seminars in CSE 260-269, and up to 8 units of approved undergraduate technical electives. Students, with the consent of the major professor, may petition for a non-CSE course to be counted as an elective.

Milestones
The Department has established three milestones to mark progress towards the Ph.D. degree in Computer Science: advancement to candidacy, presentation of the dissertation proposal, and final oral examination. A Ph.D. student must also satisfy all applicable Graduate Division requirements for each milestone.

Milestone I: Advancement to Candidacy. A student advances to candidacy after he/she has completed all of the Ph.D. course requirements described above, and passed the combined written and oral qualifying examinations, as described below. These two exams are intended to verify three components of the student’s preparation for Ph.D. research: (1) breadth of comprehension sufficient to enable Computer Science research in areas beyond the topic(s) of the research exam and dissertation; (2) ability to perform critical study, analysis and writing in a focused area; and (3) demonstrated research experience or ability to do research.

Written Qualifying Examination
The written qualifying examination consists of a written report summarizing the oral presentation to be given at the oral qualifying examination. This report must be written in proper technical English and in the style of a typical Computer Science conference or journal publication, and must be submitted to the Qualifying Committee for approval at least one week prior to the oral qualifying examination.

Oral Qualifying Examination
The student must demonstrate research aptitude by undertaking a research study on some topic (typically a problem from student’s chosen research specialty that may be a promising area in which to conduct the dissertation research), under the guidance of his or her faculty major professor. The research must be presented orally to a Qualifying Committee, which is appointed by the Graduate Division based on nominations from the department. The committee will consist of at least four Senate faculty members, with at least three members whose home department is CSE. The committee evaluates the merits of the work and the student’s aptitude for research. The work must represent significant progress towards original and publishable research. The student must complete this requirement in no more than two attempts. The normative time for taking the Oral Qualifying Exam is by the end of the third year.

Dissertation Committee
After advancing to candidacy, the student must form a Doctoral Examination Committee chaired by his or her major professor. The committee will consist of at least four senate faculty members with at least three members belonging to the CSE department (their home department is CSE).

Milestone II: Dissertation Proposal Examination
After advancement to candidacy, the student prepares a dissertation proposal that describes the dissertation topic, summarizes the relevant background literature, and presents a comprehensive research plan for the doctoral dissertation. The Dissertation Proposal Examination evaluates appropriateness of the research topic and the feasibility of the research plan. It also establishes a realistic timeline for the completion of the Dissertation. The Dissertation Committee administers this exam. The normative time for the Dissertation Proposal Exam is by the end of the third year. The Dissertation Proposal exam must be taken at least six months prior to the Final Doctoral Examination.

Milestone III: Final Doctoral Examination
The student is required to write a dissertation in accordance with the Graduate Division requirements and may be required to defend it in a public oral final doctoral examination to the Dissertation Committee. After a satisfactory performance on the final doctoral examination, the Dissertation Committee recommends granting the Ph.D. degree. The student’s research and the dissertation must meet the highest standards of originality and scholarship.

The normative time for the completion of a Ph.D. in Computer Science is five years.

Professional Development Requirement
MS students must satisfactorily complete one of the following courses: one quarter of CS 287, GDIV 301, GDIV 403 or at least one unit of CS 298I. Other professional development courses may be used to satisfy this requirement if approved by the graduate advisor. PhD students must satisfactorily complete six quarters of CS287.

Lower-Division Courses

CS 005 Introduction to Computer Programming
Lecture, 3 hours; laboratory, 2 hours; individual study, 1 hour. An introduction to computer programming for non-engineering and nonscience majors and for those considering taking CS 010A but needing additional preparation. Topics include the history of computing, basic computer operation, the notion of an algorithm, and programming constructs such as variables, expressions, input/output, branches, loops, functions, parameters, arrays, and strings. Credit is not awarded for CS 005 if it has already been awarded for CS 010A.

CS 006 Effective Use of the World Wide Web
Lecture, 3 hours; laboratory, 3 hours. A detailed introduction to the Internet for non-engineering majors. Covers Web tools, e-communities, e-commerce, power searching, and verification of information, privacy, and other legal and societal issues.
file I/O, and classes. Also covers software design, testing, and debugging. Credit is awarded for one of the following CS 010A or CS 009A. Credit is not awarded for CS 005 or CS 008 if it has already been awarded for CS 010A.

CS 010B Introduction to Computer Science For Science, Mathematics, and Engineering II 4 Lecture, 3 hours; laboratory, 2 hours; individual study, 1 hour. Prerequisite(s): CS 010A with a grade of C- or better; familiarity with C or C++ language. Covers structured and object-oriented programming in C++. Emphasizes good programming principles and development of substantial programs. Topics include recursion, pointers, linked lists, abstract data types, and libraries. Also covers software engineering principles. Credit is awarded for one of the following CS 010B or CS 009B.

CS 010C Introduction to Data Structures and Algorithms 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 010B with a grade of C- or better or CS 009C with a grade of C- or better; proficiency in C++. Topics include basic data structures such as arrays, lists, stacks, and queues. Covers searching (including binary search trees and hashing) and priority queues (heaps). Offers an introductory analysis of algorithms, sorting algorithms, and object-oriented programming including abstract data types, inheritance, and polymorphism. Explores solving complex problems through structured software development.

CS 011 Introduction to Discrete Structures 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 007A or MATH 009A or MATH 09HA; CS 010A or MATH 007B or MATH 098B or MATH 09HB. Introduction to basic concepts of discrete mathematics emphasizing applications to computer science. Topics include propositional and predicate calculus, elementary set theory, functions, relations, proof techniques, elements of number theory, enumeration, and discrete probability. Cross-listed with MATH 011.

CS 015 Introduction to Data Science 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 009A with a grade of C- or better. Provides an introduction to data science with an emphasis on empirical analysis of real-world data sets through computation. Explores critical concepts and skills in computer programming and statistical inference. Covers the Data Science life-cycle including data collection, data cleaning and integration, visualization, and analysis.

CS 061 Machine Organization and Assembly Language Programming 4 Lecture, 3 hours; laboratory, 2 hours; individual study, 1 hour. Prerequisite(s): CS 010A with a grade of C- or better. An introduction to computer organization. Topics include number representation, combinational and sequential logic, computer instructions, memory organization, addressing schemes (including input/output (I/O), assembly language programming, assemblers, and linkers.

Upper-Division Courses

CS 100 Software Construction 5 Lecture, 3 hours; laboratory, 2 hours; discussion, 1 hour; individual study, 1 hour. Prerequisite(s): CS 010C with a grade of C- or better. Emphasizes development of software systems. Topics include design and implementation strategies and selection and mastery of programming languages, environment tools, and development processes. Develops skill in programming, testing, debugging, performance evaluation, component integration, maintenance, and documentation. Covers professional and ethical responsibilities and the need to stay current with technology.

CS 105 Data Analysis Methods 4 Lecture, 3 hours; laboratory, 2 hours; individual study, 1 hour. Prerequisite(s): CS 009B with a grade of C- or better or CS 010B with a grade of C- or better; restricted to class level standing of sophomore, junior, senior, or masters. An introduction to fundamental concepts and methods in data analysis and visualization essential to a variety of data science tasks. Designed to provide preparation for the data science major and for advanced courses in data analysis and applications of data science.

CS 108 Data Science Ethics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 105 or STAT 107 or CS 171; or consent of instructor. Covers ethics specifically related to data science. Topics include data privacy, data curation and storage; discrimination and bias arising in the machine learning process; statistical topics such as generalization, causality, curse of dimensionality, and sampling bias; data communication; and strategies for conceptualizing, measuring, and mitigating problems in data-driven decision-making. Cross-listed with STAT 108.

CS 110 Principles of Web Development 4 Lecture, 3 hours; laboratory, 2 hours; individual study, 1 hour. Prerequisite(s): CS 100. Provides an introduction to distributed systems, with a focus on web development techniques and the considerations to application scalability, security, reliability, and redundancy. Provides an in-depth study of technologies used for both back-end and front-end development, and how to design robust applications in the webs constantly evolving landscape.

CS 111 Discrete Structures 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 010A; CS 011 or MATH 011; MATH 009C or MATH 09HC. A study of discrete mathematical structures emphasizing applications to computer science. Topics include asymptotic notation, generating functions, recurrence equations, elements of graph theory, trees, algebraic structures, and number theory.

CS 120A Logic Design 5 Lecture, 3 hours; laboratory, 3 hours; individual study, 3 hours. Prerequisite(s): CS 061 with a grade of C- or better. Covers design of digital systems. Includes Boolean algebra; combinational and sequential logic design; and use of arithmetic logic units, carry-lookahead adders, multiplexers, decoders, comparators, multipliers, flip-flops, registers, and simple memories; state-machine design; and basic register-transfer level design. Uses hardware description languages, synthesis tools, programmable logic, and significant hardware prototyping. Cross-listed with EE 120A.

CS 120B Introduction to Embedded Systems 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 010B, CS 120A or EE 120A. Introduction to hardware and software design of digital computing systems embedded in electronic devices (e.g., digital cameras or portable video games). Includes embedded processor programming, custom processor design, standard peripherals, memories, interfacing, and hardware/software tradeoffs. Involves use of synthesis tools, programmable logic, microcontrollers, and developing working embedded systems. Cross-listed with EE 120B.

CS 122A Intermediate Embedded Real-Time Systems 4 Lecture, 3 hours; laboratory, 6 hours. Prerequisite(s): CS 010B; CS 120B or EE 120B. Covers software and hardware design of embedded computing systems. Includes hardware and software codeign, advanced programming paradigms (including state machines and concurrent processes), real-time programming, operating systems, basic control systems, modern chip, and design technologies. Laboratories involve use of microcontrollers, embedded microprocessors, programmable logic, advanced simulation, and debug environments.

CS 122B Advanced Embedded and Real-Time Systems 5 Lecture, 3 hours; laboratory, 6 hours. Prerequisite(s): CS 122A. Explores state-of-the-art aspects of building embedded computer systems. Topics include real-time programming, synthesis of coprocessor cores, application-specific processors, hardware and software cosimulation and codesign, low-power design, reconfigurable computing, core-based design, and platform-based methodology.

CS 130 Computer Graphics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 100; MATH 031, may be taken concurrently or EE 020B, may be taken concurrently; or consent of instructor. A study of the fundamentals of computer graphics necessary to design and build graphics applications. Examines raster graphics algorithms including scan-converting graphics primitives, anti-aliasing, and clipping. Also covers geometric transformations, viewing, solid modeling techniques, hidden-surface removal algorithms, color models, illumination, and shading.

CS 131 Edge Computing 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 100 or EE 120B or CS 120B. Covers industry standards for quality of service and security while leveraging performance constraints. Develops skill in deploying real-world applications using embedded artificial intelligence. Cross-listed with EE 131.

CS 133 Computational Geometry 4 Lecture, 3 hours; laboratory, 1 hour; individual study, 2 hours. Prerequisite(s): CS 100, CS 111, MATH 031; or equivalents. An introduction to the design of geometry algorithms. Covers the basic computational geometry concepts and techniques used in graphics, robotics, and engineering design. Topics include polygons and polytopes, convex hulls, and voronoi diagrams.
CS 135 Virtual Reality 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 100. Covers the development of virtual reality (VR) worlds, including motion and physics of VR worlds. Includes design practices for immersive experiences, human visual perception, environmental and social interactions. Also includes positional tracking with sensors, augmented and mixed reality, and storage and transmission of virtual reality worlds.

CS 141 Intermediate Data Structures and Algorithms 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 010C with a grade of C- or better; CS 111; MATH 009C or MATH 09HC; proficiency in C++. Explores basic algorithm analysis using asymptotic notations, summation and recurrence relations, and algorithms and data structures for discrete structures including trees, strings, and graphs. Also covers general algorithm design techniques including “divide-and-conquer,” the greedy method, and dynamic programming. Integrates knowledge of data structures, algorithms, and programming.

CS 142 Algorithm Engineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 100, CS 141; or equivalent. Covers the design and implementation of sequential, parallel, cache-efficient, external-memory, and write-efficient algorithms for fundamental computational problems including sorting, searching, as well as a selection of problems in algebra, geometry, combinatorial optimization, and string processing. Emphasizes practical aspects of algorithm design, efficient implementation, and experimental methodology for performance evaluation.

CS 144 Algorithms For Bioinformatics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 141. Introduces fundamental algorithms and data structures for solving analytical problems in molecular biology and genomics. Includes exact and approximate models for generating these languages such as finite-state automata, pushdown automata, regular expressions, and context-free grammars; mathematical properties of the languages; and models; and equivalence between the models. Also introduces Turing machines and decidability.

CS 150 Automata and Formal Languages 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 010C with a grade of C- or better; CS 111; MATH 009C or MATH 09HC. A study of formal languages. Includes regular and context-free languages; computational models for generating these languages such as finite-state automata, pushdown automata, regular expressions, and context-free grammars; mathematical properties of the languages; and models; and equivalence between the models. Also introduces Turing machines and decidability.

CS 152 Compiler Design 4 Lecture, 3 hours; laboratory, 2 hours; individual study, 1 hour. Prerequisite(s): CS 061; CS 100; CS 111; C++ programming proficiency. Covers the fundamentals of compiler design. Includes lexical analysis, parsing, semantic analysis, compile-time memory organization, run-time memory organization, code generation, and compiler portability issues.

CS 153 Design of Operating Systems 4 Lecture, 3 hours; laboratory, 2 hours; individual study, 1 hour. Prerequisite(s): CS 061; CS 100; CS 111; C++ programming proficiency. Covers the principles and practice of operating system design. Includes concurrency, memory management, file systems, protection, security, command languages, scheduling, and system performance.

CS 160 Concurrent Programming and Parallel Systems 4 Lecture, 3 hours; laboratory, 2 hours; individual study, 1 hour. Prerequisite(s): CS 061; CS 100; CS 111. A study of concurrent and parallel systems. Topics include modular structure and design, interprocess communication, synchronization, failures, persistence, and concurrency control. Also covers atomic transactions, recovery, language support, distributed interprocess communication, and implementation mechanisms. Provides preparation for the study of operating systems, databases, and computer networking.

CS 161 Design and Architecture of Computer Systems 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 120A or CS 120A. A study of the fundamentals of computer design. Topics include the performance evaluation of microprocessors; instruction set design and measurements of use; microprocessor implementation techniques including multicycle and pipelined implementations; computer arithmetic; memory hierarchy; and input/output (I/O) systems.

CS 161L Laboratory in Design and Architecture of Computer Systems 2 Lecture, 1 hour; laboratory, 3 hours. Prerequisite(s): CS 161 (may be taken concurrently). Covers the design and simulation of a complete computer system using hardware description language and simulator. Topics include instruction set architecture design; assemblers; datapath and control unit design; arithmetic and logic unit; memory and input/output (I/O) systems; and integration of all parts into a working computer system.

CS 162 Computer Architecture 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 161 with a grade of “C-” or better. The study of advanced processor design. Topics include CPU pipelining, data and control hazards, instruction-level parallelism, branch prediction, and dynamic scheduling of instructions. Also covers Very Long Instruction Word (VLIW) processing, multimedia support, design of network and embedded processors, basic multiprocessor design, shared memory and message passing, and network topologies.

CS 164 Computer Networks 4 Lecture, 3 hours; laboratory, 2 hours; individual study, 1 hour. Prerequisite(s): CS 100; CS 111; CS 153. Covers the fundamentals of computer networks. Topics include layered network architecture, communication protocols, local area networks, UNIX network programming, verification, network security, and performance studies.

CS 165 Computer Security 4 Lecture, 3 hours; laboratory, 2 hours. Prerequisite(s): CS 141, CS 153. Examines the ways in which information systems are vulnerable to security breaches. Topics include attacks; security labels, lattices, and policies; safeguards and countermeasures; intrusion detection; authorization and encryption techniques; networks; digital signatures, certificates, and passwords; privacy issues, firewalls, and spoofing; Trojan horses and computer viruses; CERT Coordination Center; and electronic commerce.

CS 166 Database Management Systems 4 Lecture, 3 hours; laboratory, 2 hours; individual study, 1 hour. Prerequisite(s): CS 100; CS 111. Covers basic concepts of databases and database management systems. Topics include entity-relationship modeling for design, relational data model, relational algebra, Structured Query Language (SQL), secondary storage, indexing and hashing, query evaluation and optimization, and overview of transactions.

CS 167 Introduction to Big-Data Management 4 Lecture, 3 hours; laboratory, 2 hours; individual study, 1 hour. Prerequisite(s): CS 100, CS 111; CS 167 online section: enrollment in the online Master-of-Science in Engineering program. Introduces the architecture of big-data systems and their applications in data management and processing. Describes the common functionality in big-data processing such as distributed storage, resource management, query processing, fault-tolerance, and programming APIs. Covers the popular big-data technologies such as distributed shared-nothing systems, NoSQL processing model, and semi-structured data management.

CS 168 Introduction to Very Large Scale Integration Design 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 120A or EE 120A; or consent of instructor. Studies integrated circuit fabrication, device characterization, and circuit simulation. Introduces basic device physics and physical design rules, MOS logic design, and timing and clock schemes. Covers layout generation, subsystem designs, and circuits for alternative logic styles. Also covers design and simulation using hardware description language and CAD tools. Cross-listed with EE 168. Credit is awarded for one of the following EE 168, CS 168, or EE 282A.
CS 169 Mobile Wireless Networks 4 Lecture, 3 hours; laboratory, 2 hours; extra reading, 1 hour. Prerequisite(s): CS 153 or consent of instructor. Introduces the fundamentals of wireless and mobile networks. Covers wireless channel models, MAC protocols, and wireless network architectures. Also covers cellular, WLAN and ad hoc networks, and routing in multi-hop wireless networks. Includes wireless security and the impact of wireless links on TCP and other transport layer solutions.

CS 170 Introduction to Artificial Intelligence 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 100 with a grade of "C-" or better, CS 111. An introduction to the field of artificial intelligence. Focuses on discrete-valued problems. Covers heuristic search, problem representation, and classical planning. Also covers constraint satisfaction and logical inference.

CS 171 Introduction to Machine Learning and Data Mining 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 010A; MATH 031 or EE 020B; STAT 155 or EE 114 or STAT 156A; CS 100 or CS 120B. Introduces formalisms and methods in data mining and machine learning. Topics include data representation, supervised learning, and classification. Covers regression and clustering. Also covers rule learning, function approximation, and margin-based methods. Cross-listed with EE 142.

CS 172 Introduction to Information Retrieval 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 100; CS 111; EE 114 or STAT 155. Introduces information retrieval (IR) principles and techniques for indexing and searching document collections. Topics include Web search, text processing, ranking algorithms, search in social networks, and search evaluation. Also studies scalability issues in search engines. Satisfactory (S) or No Credit (NC) grading is not available.

CS 173 Introduction to Natural Language Processing 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 100; CS 111; EE 114 or STAT 155. An overview of modern approaches for natural language processing. Focuses on major algorithms used in NLP for various applications such as part-of-speech tagging, parsing, named entity recognition, coreference resolution, sentiment analysis, and machine translation.

CS 175 Entrepreneurship in Computing 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 100; restricted to class level standing of junior, or senior. Introduces business and technological concepts to create companies based on computer technology. Covers technical aspects of real-world IT projects. Includes developing software and services; understanding user requirements; designing usable systems; and assessing technology. Addresses market analysis and strategy; legal and intellectual property; ethics and communication issues; and financial analysis.

CS 177 Modeling and Simulation 4 Lecture, 3 hours; laboratory, 2 hours; individual study, 1 hour. Prerequisite(s): CS 100; CS 111; C++ programming proficiency. Covers validation of random number sequences; concepts in modeling and systems analysis; and conceptual models and their mathematical and computer realizations. Examines simulation modeling techniques including object-oriented modeling and discrete-event modeling. Emphasizes the use of simulation libraries used with programming languages such as C++.

CS 178A Project Sequence in Computer Science and Engineering 4 Lecture, 1 hour; laboratory, 2 hours; individual study, 1 hour; practicum, 6 hours. Prerequisite(s): CS 141, ENGR 180W, restricted to class level standing of senior. Incorporates the proposal, design, building, testing, and documenting of software and hardware devices or systems under the direction of a faculty member. Emphasizes professional and ethical responsibilities and the need to stay current on technology and its global impact on economics, society, and the environment. Completed together, CS 178A and CS 178B may be applied as a substitute for the CS 179 (E-2) major requirement. Graded In Progress (IP) until CS 178A and CS 178B are completed, at which time, a final letter grade is assigned.

CS 178B Project Sequence in Computer Science and Engineering 4 Lecture, 1 hour; laboratory, 2 hours; individual study, 1 hour; practicum, 6 hours. Prerequisite(s): CS 178A; restricted to class level standing of senior. Incorporates the proposal, design, building, testing, and documenting of software and hardware devices or systems under the direction of a faculty member. Emphasizes professional and ethical responsibilities and the need to stay current on technology and its global impact on economics, society, and the environment.

CS 179 (E-2) Project in Computer Science 4 Prerequisite(s): CS 100 with a grade of C- or better; CS 152 with a grade of C- or better; ENGR 180W. For hours and prerequisites, see segment descriptions. Under the direction of a faculty member, student teams propose, design, build, test, and document software and/or hardware devices or systems. Emphasizes professional and ethical responsibilities and the need to stay current on technology and its global impact on economics, society, and the environment.

CS 179F Project in Computer Science: Operating Systems 4 Discussion, 1 hour; laboratory, 3 hours; research, 3 hours; extra reading, 3 hours. Prerequisite(s): CS 153 with a grade of "C-" or better; ENGR 180W; 8 additional upper-division units in Computer Science. CS 160 is recommended. Covers the planning, design, implementation, testing, and documentation of an operating systems-related system. Incorporates techniques from previous related courses. Emphasizes professional and ethical responsibilities; the need to stay current on technology; and its global impact on economics, society, and the environment.

CS 179G Project in Computer Science: Database Systems 4 Discussion, 1 hour; laboratory, 3 hours; research, 3 hours; extra reading, 3 hours. Prerequisite(s): CS 100 with a grade of C- or better; CS 166 with a grade of C- or better or CS 167 with a grade of C- or better; ENGR 180W; 8 additional upper-division units in Computer Science. Covers the planning, design, implementation, testing, and documentation of a database-related system. Incorporates techniques from previous related courses. Emphasizes professional and ethical responsibilities; the need to stay current on technology; and its global impact on economics, society, and the environment.

CS 179I Project in Computer Science: Networks 4 Discussion, 1 hour; laboratory, 3 hours; research, 3 hours; extra reading, 3 hours. Prerequisite(s): CS 100 and CS 164 with grades of "C-" or better; ENGR 180W; 8 additional upper-division units in Computer Science. Covers the planning, design, implementation, testing, and documentation of a network-related system. Incorporates techniques from previous related courses. Emphasizes professional and ethical responsibilities; the need to stay current on technology; and its global impact on economics, society, and the environment.

CS 179J Project in Computer Science: Computer Architecture and Embedded Systems 4 Discussion, 1 hour; laboratory, 3 hours; research, 3 hours; extra reading, 3 hours. Prerequisite(s): CS 100, CS 111, CS 120B/EE 120B, and CS 161 with grades of "C-" or better or consent of instructor; ENGR 180W; 3 additional upper-division units in Computer Science. Covers the planning, design, implementation, testing and documentation of a computer architecture and embedded systems-related system. Incorporates using techniques presented in previous related courses. Emphasizes professional and ethical responsibilities; the need to stay current on technology; and its global impact on economics, society, and the environment.

CS 179K Project in Computer Science: Software Engineering 4 Discussion, 1 hour; laboratory, 3 hours; research, 3 hours; extra reading, 3 hours. Prerequisite(s): CS 180; ENGR 180W; 8 additional upper-division units in Computer Science. Covers the planning, design, implementation, testing, and documentation of a software engineering-related system. Incorporates techniques presented in previous related courses. Emphasizes professional and ethical responsibilities; the need to stay current on technology; and its global impact on economics, society, and the environment.
CS 179M Project in Computer Science: Artificial Intelligence 4 Discussion, 1 hour; laboratory, 3 hours; research, 3 hours; extra reading, 3 hours. Prerequisite(s): CS 100, CS 111, and CS 170 with grades of "C-" or better; ENGR 180W; 8 additional upper-division units in Computer Science. Covers the planning, design, implementation, testing, and documentation of an artificial intelligence-related system. Incorporates techniques presented in previous related courses. Emphasizes professional and ethical responsibilities; the need to stay current on technology; and its global impact on economics, society, and the environment.

CS 179N Project in Computer Science: Graphics and Electronic Games 4 Discussion, 1 hour; laboratory, 3 hours; research, 3 hours; extra reading, 3 hours. Prerequisite(s): CS 130 with a grade of C- or better; ENGR 180W; 8 additional upper-division units in Computer Science. Covers the planning, design, implementation, testing, and documentation of a graphics or electronic game-related system. Incorporates using techniques presented in previous related courses. Emphasizes professional and ethical responsibilities; the need to stay current on technology; and its global impact on economics, society, and the environment.

CS 180 Introduction to Software Engineering 4 Lecture, 3 hours; laboratory, 2 hours; individual study, 1 hour. Prerequisite(s): CS 100. A study of software engineering techniques for the development, maintenance, and evolution of large software systems. Topics include requirements and specification; system design and implementation; debugging, testing, and quality assurance; reengineering, project management; software process; tools; and environments.

CS 181 Principles of Programming Languages 4 Lecture, 3 hours; laboratory, 2 hours; individual study, 1 hour. Prerequisite(s): CS 106; CS 100; CS 111; CS 150. Covers the principles of programming language design. Includes the study and comparison of several programming languages, their features, and their implementations.

CS 182 Software Testing and Verification 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 100. A study of modern techniques to assess the quality of software artifacts through functional, performance, and reliability testing. Introduces black box and white box testing techniques. Covers the application of modern testing tools to software units, components, subsystems, and entire systems. Also covers verification as a complementary technique to testing.

CS 183 Unix System Administration 4 Lecture, 3 hours; laboratory, 2 hours; individual study, 1 hour. Prerequisite(s): CS 100. Explores the technical aspects of system administration on a Unix system including advanced Unix. Includes managing system devices, operating system installation, communications, and networking.

CS 189 Apprentice Tutoring 1 Activity, 3 hours. Prerequisite(s): permission established by computer science faculty and consent of instructor. Aids in the learning of effective tutoring methods, such as best practices for leading Computer Science tutoring sessions, growth mindset, learning modalities, and student relations. Graded Satisfactory (S) or No Credit (NC).

CS 190 Special Studies 1 to 5 Individual Study, 3 to 15 hours. Prerequisite(s): consent of instructor and department chair. Individual study to meet special curricular needs. Course is repeatable to a maximum of 9 units.

CS 191 Seminar in Research Topics in Computer Science and Engineering 1 Seminar, 1 hour. Prerequisite(s): upper division or graduate standing or consent of instructor. An introduction to the range of research topics and methods in Computer Science and Engineering and to the research opportunities available within the department. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 3 units.

CS 193 Design Project 1 to 4 Laboratory, 1 to 6 hours; scheduled research, 1 to 3 hours; individual study, 1 to 3 hours, Prerequisite(s): CS 141; consent of instructor. Individual hardware or software design project to include establishment of objectives and criteria, synthesis, analysis, implementation, testing, and documentation. Course is repeatable to a maximum of 8 units.

CS 194 Independent Reading 1 to 4 Prerequisite(s): consent of instructor. Independent reading in material not covered in course work. Normally taken in senior year. Total credit for CS 194 may not exceed 8 units.

CS 198 Individual Internship in Computer Science 1 to 4 Internship, 3 to 12 hours. Prerequisite(s): upper-division standing at least 12 units in Computer Science courses. An academic internship to provide the student with career experience as a computer scientist in a governmental, industrial, or research unit under the joint supervision of an off-campus sponsor and a faculty member in Computer Science. Each individual program must have the prior approval of both supervisors and the Department chair. A final written report is required. Course is repeatable to a maximum of 8 units.

Graduate Courses

CS 201 Compiler Construction 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 152. Covers theory of compilers and translation. Also addresses compiler construction including lexical analysis, syntax analysis, code generation, and optimization. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 202 Advanced Operating Systems 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 153. Examines recent developments in operating systems. Also covers multiprogramming, parallel programming, time sharing, scheduling and resource allocation, and selected topics. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 203 Advanced Computer Architecture 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 161; graduate standing. Covers contemporary computer systems architecture including pipelined CPU design, instruction level parallelism, memory hierarchy, thread level parallelism, introduction to multiprocessing, and evaluation of computer performance. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 204 Advanced Computer Networks 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 101C with a grade of C- or better, CS 164; graduate standing. Covers advanced topics in computer networks, layering, Integrated Services Digital Networks (ISDN), and high-speed networks. Also covers performance models and analysis, distributed systems and databases, and case studies. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 205 Artificial Intelligence 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 170; or equivalent; graduate standing. Examines knowledge representation and automated reasoning and their use in capturing common sense and expert knowledge. Also addresses predicate and nonmonotonic logics; resolution and term rewriting; reasoning under uncertainty; theorem provers; planning systems; and belief networks. Includes topics in natural language processing, perception, logic programming, expert systems, and deductive databases. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 206 Advanced Software Testing and Analysis 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): CS 141, CS 150; or equivalents; graduate standing. Introduces techniques to verify that software runtime behavior meets its specifications. Topics include model checking (safety, liveness, temporal logics, and abstraction); static and dynamic analysis (data flow analysis, concept analysis, program slicing, and invariant detection); testing (test generation, prioritization, suite reduction, and regression); and automated debugging (fault location and visualization). May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 207 Advanced Programming Languages 4 Lecture, 3 hours; research, 1.5 hours; written work, 1.5 hours. Prerequisite(s): CS 152, CS 181, or equivalents. Introduces the techniques for analyzing program semantics and correctness. Covers simply-typed lambda calculus as well as basic and advanced type systems. Presents axiomatic, operational, and denotational semantics. Explores programming-language constructs and tools for specifying, reasoning, and verifying correctness properties. Includes safe memory accesses and safe concurrent programming or security. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.
CS 208 Cloud Computing and Cloud Networking
Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 164, CS 153, or equivalent. Covers cloud computing concepts. Introduces operating system virtualization techniques enabling multi-tenant cloud computing. Study of operating system scheduling concepts, virtualization, cloud resource management, VM migration and security. Overview of data center networking, networking cloud data centers, virtual private clouds, replication, disaster recovery and green computing. Examination of commercial cloud platforms.

CS 210 Scientific Computing
Lecture, 4 hours. Prerequisite(s): CS 010B, MATH 010A, MATH 031 or equivalent; graduate standing; or consent of instructor. Utilizes scientific computing in a specific computer science research area. Provides a foundation for pursuit of further studies of special topics in scientific computing. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 211 High Performance Computing
Lecture, 3 hours. Prerequisite(s): CS 161; graduate standing; or consent of instructor. Introduces performance optimization for sequential computer programs. Covers high performance computing on multicore shared memory computers and on distributed memory computing clusters. Also covers high performance scientific libraries and computing application development using pthreads, OpenMP, and Message Passing Interface (MPI) parallel file systems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 213 Multiprocessor Architecture and Programming
Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 203; graduate standing; or consent of instructor. Introduces multi-processing, multicores architectures, and CC-NuMA multiprocessors. Also covers heterogeneous multiprocessors and interconnection networks. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 214 Parallel Algorithms
Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 144; or equivalent; graduate standing. Covers basic concepts of parallel shared-memory algorithms such as theoretical models, scheduling, and concurrency. Addresses techniques for designing efficient parallel algorithms for computational problems in a variety of areas including sorting, searching, algebra, graph theory, data structures, computational geometry, and scheduling. Emphasizes correctness proofs and rigorous performance analysis. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 215 Theory of Computation
Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 150. Covers phrase structure grammars and languages; turing machines; relation of languages to automata; solvable and unsolvable problems; and theoretical limitations of computers. Also examines algorithmic complexity theory; polynomial reducibility; the classes P and NP; and correctness proofs. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 216 Advanced Cryptography
Lecture, 3 hours; written work, 3 hours. Prerequisite(s): CS 141, CS 150; or equivalents; graduate standing. Introduction to advanced cryptography. Covers formal models of security and applications including public key encryption, digital signatures, and secure protocols. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 217 Graphics Processing Unit Architecture and Parallel Programming
Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): CS 160 with a grade of "C-" or better or consent of instructor. Introduces the popular CUDA based parallel programming environments based on Nvidia GPUs. Covers the basic CUDA memory/threading models. Also covers the common data-parallel programming patterns needed to develop a high-performance parallel computing applications. Examines computational thinking; a broader range of parallel execution models; and parallel programming principles. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with EE 217.

CS 218 Design and Analysis of Algorithms
Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 141; graduate standing. Covers efficient algorithms and data structures for problems from a variety of areas such as sorting, searching, selection, linear algebra, graph theory, and combinatorial optimization. Focuses on techniques for algorithm design (greedy, divide-and-conquer, dynamic programming) and rigorous proofs of correctness and time-and space-complexity (amortized analysis, Master Theorem). May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 219 Advanced Algorithms
Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 218; or equivalent; graduate standing. Covers advanced techniques for the design and analysis of algorithms and data structures. Topics include linear and integer programming, randomized algorithms, approximation algorithms, online algorithms, parallel algorithms, and distributed algorithms. Emphasizes formal proofs of correctness and rigorous performance analysis. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 220 Synthesis of Digital Systems
Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 144, CS 161. Covers the synthesis and simulation of digital systems. Topics include synthesis at the system, behavioral, register-transfer, and logic levels; application-specific processors; simulation; and emerging system-on-a-chip design methodologies. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 223 Reconfigurable Computing
Lecture, 3 hours; written work, 3 hours. Prerequisite(s): CS 202 or CS 203; consent of instructor. Covers reconfigurable computing, a novel computational model that is fast becoming part of the mainstream in high-performance computing. Addresses architectures, software tools and compilers, programming models, and applications. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 224 Fundamentals of Machine Learning
Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 100, STAT 155, MATH 031; graduate standing. For the CS 224 online section: enrollment in the Online Master-in-Science in Engineering program; graduate standing. A study of generative and discriminative approaches to machine learning. Topics include probabilistic model fitting, gradient-based loss optimization, regularization, hyper-parameters, and generalization. Includes experience with data science programming environments, data from practice, and performance metrics. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 225 Spatial Computing
Lecture, 3 hours; individualized study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduction to the spatial computing technologies and techniques. Covers the fundamentals, the present, and the emerging use cases of spatial data analysis systems. Topics include spatial data modeling, spatial relationships, storage, indexing, query processing, and recent trends in the field. Includes a research-oriented project and hands-on experience on spatial technologies. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 226 Big-Data Management
Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): CS 166 or CS 236; graduate standing. Introduction to the architecture and design of big data management systems. Covers the design of distributed file systems and high-throughput databases. Describes popular programming paradigms for big data including MapReduce and Resilient Distributed Datasets. Includes a course project with hands-on experience on open-source big data systems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 227 Probabilistic Models For Artificial Intelligence
Lecture, 3 hours; written work, 3 hours. Prerequisite(s): CS 224; graduate standing. Covers methods for representing and reasoning about probability distributions in complex domains. Focuses on graphical models and their extensions such as Bayesian networks, Markov networks, hidden Markov models, and dynamic Bayesian networks. Topics include algorithms for probabilistic inference, learning models from data, and decision making. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.
CS 228 Introduction to Deep Learning 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 224 or EE 231 or EE 236 or EE 24d or CS 171 or EE 142; graduate standing; or consent of instructor. Explores fundamentals of deep neural networks and their applications in various machine learning tasks. Includes the fundamentals of perception, approximation, neural network architectures, loss functions, and generalization. Covers optimization methods including backpropagation, automatic differentiation, and regularization. Covers non-standard problems including auto-encoders and probabilistic models. Presents applications in machine learning/computer vision. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with EE 228.

CS 229 Machine Learning 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 171 or EE 142 or CS 224; graduate standing. For the CS 229 online section; enrollment in the Online Master-in-Science in Engineering program; graduate standing. A study of supervised machine learning that emphasizes discriminative methods. Covers the areas of regression and classification. Topics include linear methods, instance-based learning, neural networks, kernel machines, and additive models. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following CS 229 or EE 240.

CS 230 Computer Graphics 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 141 or CS 218; MATH 031 or MATH 131; graduate standing or consent of instructor. Covers advanced topics related to graphics and necessary fundamentals. Includes geometry representations; affine and perspective transforms; rendering with global illumination and other light models; shading and texture mapping; rasterization and anti-aliasing techniques; and hierarchical and keyframe animation. Also includes projects and/or in-depth programming assignments. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 231 Computer Animation 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 130 or CS 230. Covers topics in computer animation including motion capture, inverse kinematics, and dynamic simulation. Also examines deformable systems and other natural phenomena, facial animation, high-level behavior control, creature evolution, and procedural techniques. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 233 Pen-Based Computing 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor; computer programming experience introduces computational techniques for pen-based user interfaces. Topics include fundamental issues such as ink segmentation, sketch parsing and shape recognition. Explores the topic of sketch understanding, including reasoning about context and correcting errors. Also addresses issues related to building practical pen-based systems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with ME 231.

CS 234 Computational Methods For Biomolecular Data 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 111; CS 141 or CS 218; STAT 155 or STAT 160A; graduate standing. A study of computational and statistical methods aimed at automatically analyzing, clustering, and classifying biomolecular data. Includes combinatorial algorithms for pattern discovery; hidden Markov models for sequence analysis; analysis of expression data; and prediction of the three-dimensional structure of RNA and proteins. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following CS 234 or CS 144.

CS 235 Data Mining Techniques 4 Lecture, 3 hours; term paper, 1.5 hours; activity, 1.5 hours. Prerequisite(s): CS 141 or CS 170 is recommended. CS 235 online section; enrollment in the online Master of Science in Engineering program; graduate standing. Provides a broad background in the design and use of data mining algorithms and tools. Includes clustering, classification, association rules mining, time series clustering, and Web mining. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 236 Database Management Systems 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 141; CS 166 recommended; graduate standing or consent of instructor. Covers principles of file systems; architecture of database management systems; data models; and relational databases. Also examines logical and physical design of databases; hardware and software implementation of database systems; and distributed databases (e.g., query processing, concurrences, and recovery). May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 237 Advanced Topics in Modeling and Simulation 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 177. Covers formal computer simulation models such as Discrete Event Specified Models and differential equation models. Examines current developments in simulation languages. Also addresses integrated model development and its applications to complex, large-scale problems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 238 Algorithmic Techniques in Computational Biology 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 141 or CS 218; graduate standing. A study of fundamental algorithms for solving combinatorial or computational problems in molecular biology and genomics. Includes sequence alignment and multiple alignment; bio-database search; gene and regulatory signal recognition; DNA sequence assembly; physical mapping; and reconstruction of evolutionary trees. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following CS 238 or CS 144.

CS 239 Performance Evaluation of Computer Networks 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 164. Offers models and analytical techniques for evaluating the performance of computer networks. Covers basic and intermediate queuing theory and queuing networks and their application to practical systems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 240 Network Routing 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 141 or CS 204; CS 164. An in-depth study of routing in computer networks. Examines general principles and specific routing protocols and technologies. Topics include Internet, Asynchronous Transfer Mode (ATM), optical, wireless, and ad hoc networks. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 241 Advanced Topics in Network Measurements and Security 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 164 or equivalent. Introduces measuring and building real network systems. Includes hands-on measurement studies and tools. Covers fundamental mathematical and statistical tools; exposure to implementation studies and techniques; principles of network architectures; and challenges in building testbeds and conducting measurements. Explores measurements and modeling of wireless, ad hoc, sensor, and cellular networks. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes to a maximum of 8 units.

CS 242 Information Retrieval and Web Search 4 Lecture, 3 hours; term paper, 1.5 hours; project, 1.5 hours. Prerequisite(s): CS 141 or CS 166. CS 242 online section; enrollment in the online Master of Science in Engineering program. Introduces Information Retrieval (IR) principles and techniques for indexing and searching document collections with special emphasis on Web search. Includes text processing, ranking algorithms, search in social networks, search evaluation, and search engines scalability. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 246 Software Verification 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 111, CS 141, CS 150; or equivalents; graduate standing or consent of instructor. A study of advanced techniques to specify and examine the correctness of complex systems and software. Focuses on concurrent and distributed behavior, formal description languages, temporal logics, model checking and symbolic model checking, partial order reduction, and the use of verification tools. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.
CS 247 Principles of Distributed Computing
Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 010C; graduate standing. Introduces the fundamental problems of distributed computing and the main algorithmic techniques used to solve these problems. Considers crashing processes and also malicious non-cooperating processes. Covers reliable broadcast, causal broadcast, total-order broadcast, distributed shared memory, consensus variants including blockchain consensus, atomic commit and terminating reliable broadcast, and replicated systems.

CS 248 Optimization For Machine Learning
Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 229 or EE 231 or EE 244; graduate standing; or consent of instructor. Explores efficient optimization algorithms for machine learning. Emphasizes fundamental principles, provable guarantees, and contemporary results. Includes fundamentals of optimization (first-order methods, stochastic algorithms, accelerated schemes, non-convex optimization, regularization, and black-box optimization). Also covers connections to statistical learning (empirical risk minimization, finite-sample guarantees, and high-dimensional problems). May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with EE 248.

CS 249 Advanced Program Analysis
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): CS 201, CS 206; restricted to major(s); graduate standing; or consent of instructor. Introduces the key concepts behind modern program analysis techniques focusing on static analysis. Topics include type inference, dataflow analysis, interprocedural analysis, control-flow analysis, and pointer analysis. Provides a foundation for applying program analysis in other domains or researching new analysis techniques. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 250 Software Security
Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 255; graduate standing; or consent of instructor. Discusses concepts, theories, and techniques in software security from both defensive and offensive perspectives. Topics include vulnerability and exploitation, malware, patching and hardening, reverse engineering, and forensics. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 251 Real-Time Embedded Systems
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 120B or EE 120B; graduate standing. Covers fundamentals and principles of real-time embedded systems. Topics include uniprocessor and multiprocessor real-time scheduling, real-time operating systems, synchronization, resource reservation, memory management, and power management. Introduces mathematical techniques for real-time system analysis. Offers hands-on experience with designing, implementing, and evaluating real-time systems on embedded platforms. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with EE 255.

CS 252A Data Analytics and Exploration
Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 141, CS 100; STAT 155 or EE 114 or equivalent; graduate standing; or consent of instructor. Covers important algorithms relevant to the lifetime of data from data collection and cleaning to integration, data mining, and analytics. Topics include: sketch algorithms for computing statistics on data streams; social networks; anonymous, cryptographic variants; community detection and graph partitioning; Data Science life cycle: techniques on data cleaning, data integration, Exploratory Data Analysis, and visualization. Cross-listed with EE 251A.

CS 252B Fundamentals of Data Science
Lecture, 3 hours; research, 3 hours. Prerequisite(s): MATH 010A, MATH 051 or EE 020B; CS 100; STAT 155 or EE 114; graduate standing; or consent of instructor. Explores theoretical tools in data science and their applications in data science data. Introduces and motivates statistical and computational viewpoints on data analysis. Topics include the manipulation of data as vectors, drawing inferences from data as distributions, and quantifying data uncertainty. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with EE 251B.

CS 253 Distributed Systems
Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 153. Integrates the theory and practice of distributed systems with a focus on recent developments in distributed systems. Includes middleware architectures; distributed process management and real-time scheduling; dependability; and group communication protocols. Also covers distributed process management; replication; large-scale peer-to-peer systems; internet content delivery; and Web caching. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 254 Network Security
Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 165. Introduces the security problems in the networking domain, attacks and defenses, vulnerabilities in various network protocols. Topics include protocol security of DNS, TCP/IP, SSL/TLS, applied cryptography, network side channel attacks, firewalls, censorship technology, internet measurement. Guides students to conduct small-scale research projects. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable.

CS 255 Computer Security
Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 153 or CS 164 or CS 165. Discusses the theoretical and practical issues arising in the context of computer systems security and the principles underlying the design of secure computing environments. Topics include cryptography, security models, formal analysis, protocols, network security, intrusion detection, attacks and their countermeasures, and secure systems design. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 256 Modeling and Synthesis of Cyber-Physical Systems
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing. Introduces trends and challenges of modern cyber-physical systems. Reviews state-of-the-art design approaches and tools in both academia and industry. Introduces fundamental concepts in functional modeling, real-time embedded architecture, design synthesis and validation. Introduces emerging design principles and their applications in automotive, avionics, smart buildings, and consumer electronics. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with EE 258.

CS 257 Wireless Networks and Mobile Computing
Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 141; CS 164 or CS 204. Introduces basic and advanced concepts of wireless networks and mobile computing. Covers both wireless cellular and ad hoc networks. Includes protocols for medium access control, resource allocation, and routing, as well as transport layer optimizations for the wireless environment. Also covers standards, Bluetooth, and the IEEE 802.11 for wireless local area networks. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 258 Introduction to Reinforcement Learning
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 215 or EE 244 or CS 224 or EE 228 or CS 228 or EE 251B or CS 252B; graduate standing; or consent of instructor. This course introduces key ideas and algorithms of reinforcement learning (RL). Key topics covered include finite Markov Decision Process (MDP), dynamic programming, Monte Carlo methods, temporal-difference learning, policy gradient methods, safety-constrained RL, batch-constrained RL, multi-agent RL, multi-armed bandits, and imitation learning. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with EE 227.

CS 260 Seminar in Computer Science
Seminar, 4 hours. Prerequisite(s): consent of instructor. Covers current research topics in computer science. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 8 units.

CS 267 Seminar in Databases
Seminar, 4 hours. Prerequisite(s): CS 236 or consent of instructor. Focuses on recent research and development issues in the database area. Includes object-oriented databases, heterogeneous databases, parallel databases, benchmarks, transaction processing, query optimization, and performance evaluation. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 8 units.
CS 269 Software and Hardware Engineering of Embedded Systems 4 Seminar, 4 hours. Prerequisite(s): CS 120A/EE 120A; consent of instructor. Presents state-of-the-art software and hardware design techniques for embedded computing systems. Topics include specification models, languages, simulation, partitioning algorithms, estimation methods, model refinement, and design methodology. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 8 units.

CS 270 Special Topics in Advanced Computer Science 2 Seminar, 2 hours. Prerequisite(s): consent of instructor. Involves presentations and discussions by faculty and students that focus on new research in computer science and concepts learned throughout the program. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CS 277 Data Centric Computer Architecture 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 161; graduate standing; consent of instructor. Addresses the rapid growth of dataset size and the introduction of hardware accelerators, resulting in the data movement overhead becoming the major performance bottleneck. Includes system interconnects, I/O stacks, emerging nonvolatile memory technologies, near-data processing, and data flow architectures. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with EE 277.

CS 279 Capstone Project in Data Science 4 Lecture, 1 hour; research, 6 hours; extra reading, 3 hours. Prerequisite(s): CS 252A or EE 251A; CS 252B or EE 251B; graduate standing; consent of instructor. Covers technical, analytic, and interpretive skills to design and execute a large-scale data science capstone project focusing on real-world applications. Provides an opportunity to integrate all of the core skills and concepts learned throughout the program. Prepares for long-term professional success in the field. Cross-listed with EE 279.

CS 287 Colloquium in Computer Science 1 Colloquium, 1 hour. Prerequisite(s): graduate standing. Lecture on current research topics in computer science and topics relating to professional development presented by faculty members and visitors. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CS 290 Directed Studies 1 to 6 Individual Study, 3 to 18 hours. Prerequisite(s): consent of instructor. Special studies in computer science. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

CS 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor. Directed research on selected projects in computer science under the sponsorship of assigned faculty members. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CS 298I Individual Internship 1 to 12 Written Work, 1 to 12 hours; internship, 2 to 24 hours. Prerequisite(s): graduate standing; consent of instructor. Individual apprenticeship in computer science. Includes fieldwork with an approved professional individual or organization and academic work under the direction of a faculty member. A final written report is required. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

CS 299 Research For Thesis Or Dissertation 1 to 12 Research, 3 to 36 hours. Prerequisite(s): graduate standing and consent of instructor. Research in computer science under the direction of a faculty member. To be included as part of the thesis or dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

CS 302 Apprentice Teaching 1 Activity, 3 hours. Prerequisite(s): enrollment limited to teaching assistants and associates in Computer Science Supervised teaching in upper- and lower-division Computer Science courses. Aids in the learning of effective teaching methods such as the handling of Computer Science discussion sections, preparation and grading of examinations, and student relations. Required each quarter of all Computer Science teaching assistants and associates. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 15 units.

Conservation Biology

Subject abbreviation: BLCN
College of Natural and Agricultural Sciences

Program Office, 1223 Pierce Hall
(951) 827-7294; ccb.ucr.edu

The major in Conservation Biology is not currently accepting new students. Students who are interested in this field should see the academic advisors at the CNAS Undergraduate Advising Office, (951) 827-7294.

Upper-Division Courses

BLCN 190 Special Studies 1 to 4 Individual Study, 3 to 12 hours. Prerequisite(s): consent of instructor and Program Chair. To be taken as a means of meeting special curricular needs. Course content, style, requirements, and grading basis is selected in consultation with the instructor and Program Chair. Course is repeatable to a maximum of 12 units.

BLCN 197 Research For Undergraduates 1 to 2 Research, 3 to 6 hours. Prerequisite(s): sophomore, junior, or senior standing in Conservation Biology; consent of instructor and Program Chair. An introduction to research providing the opportunity, through reading and preliminary laboratory work, to develop a research project suitable for BLCN 199. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 4 units.

BLCN 198I Individual Internship in Conservation Biology 2 to 4 Internship, 6 to 12 hours; consultation, 1 hour; outside reading, 2 to 4 hours. Prerequisite(s): upper-division standing in Conservation Biology. An off-campus practical experience in the public or private sector related to conservation biology that is conducted under the joint supervision of an off-campus sponsor and a faculty mentor from the Conservation Biology Program. A written report on the internship is required. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

BLCN 199 Senior Research 1 to 4 Laboratory, 3 to 12 hours. Prerequisite(s): junior or senior standing in Conservation Biology; consent of instructor and Program Chair. BLCN 197 is recommended. Research in conservation biology performed under the supervision of a faculty member in the Conservation Biology Program. A written research report is required. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

Corporeality and Embodiment Designated Emphasis

College of Humanities, Arts, and Social Sciences

Director: TBD

Overseight Committee:
Iván Aguirre (Hispanic Studies)
Crystal Baik (Gender and Sexuality Studies)
Jennifer Doyle (English)
Anthea Kraut (Dance)
Liz Przybysz (Music)
Judith Rodenbeck (Media and Cultural Studies)

Affiliated Faculty:
Maria Firmino-Castillo (Dance)
Andrea Denny-Brown (English)
Imani Johnson (Dance)
Tamara Ho (Gender and Sexuality Studies)
Sally Ness (Anthropology)
Jose Reynoso (Dance)
Joel Mejia Smith (Dance)
Chikako Takeshita (Gender and Sexuality Studies)
James Tobias (English)

Designated Emphasis Requirements

The Designated Emphasis in Corporeality and Embodiment is a 12-unit course of study requiring two graduate-level seminars across two departments and 4 units of 297 coursework, during which, under the guidance of a faculty mentor, students complete a research project that focuses on some aspect of corporeality and/or embodiment. Courses used for the Designated Emphasis cannot be counted toward a student’s masters or Ph.D. requirements; they must be in addition.

1. Two (2) graduate-level courses (8 units) selected from:
- ANTH 261; DNCE 239-244; DNCE 254; DNCE 255; DNCE 257; DNCE 258; DNCE 260; DNCE 264; DNCE 267; ENG 272; ENGL 277; MUS 254; SPN 276
The writing courses are taught as workshops, so that the subject matter (the students' stories and poems) is different each time the course is offered.

**University Requirements**
See Undergraduate Studies section.

**College Requirements**
See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

**Major Requirements**
The major requirements for the B.A. degree in Creative Writing are as follows:

**Prerequisite courses:** CRWT 056 or equivalent, and ENGL 001A or equivalent.

1. **Lower-division requirements** (20 units; five courses)
   - Two Creative Writing survey courses from CRWT 046S, CRWT 047S, CRWT 046, CRWT 047 or CRWT 048
   - Two Creative Writing introductory courses from CRWT 057A, CRWT 057B, or CRWT 057C
   - One literature survey course from CRWT 021, CRWT 023, CRWT 024, CRWT 025, CRWT 026, or CRWT 027

2. **Upper-division requirements** (36 units)
   - Three workshop courses in primary genre:
     - **Creative Nonfiction**
       - CRWT 130, CRWT 132, CRWT 134
     - **Poetry**
       - CRWT 150, CRWT 152, CRWT 154
     - **Fiction**
       - CRWT 152, CRWT 162, CRWT 172
   - One workshop in second genre: CRWT 173, CRWT 186, CRWT 187, CRWT 189
   - One workshop in third genre: CRWT 180, CRWT 181, CRWT 183
   - Three upper-division courses in Creative Writing: CRWT 136, CRWT 143, CRWT 146, CRWT 151, CRWT 155, CRWT 164A/TFDP 164A, CRWT 164B/TFDP 164B, CRWT 164C/TFDP 164C, CRWT 165, CRWT 171, CRWT 173, CRWT 174, CRWT 175, CRWT 176, CRWT 180, CRWT 182, CRWT 185, CRWT 187/CP 187, CRWT 191 (may be taken twice but used only once for major credit), CRWT 198I (may be taken only once, for 4 units)
   - Four (4) units of CRWT 195 or CRWT 195H (Senior Honors Thesis) or any upper division course in another subject area outside of Creative Writing.

**Minor**

1. **Lower-division requirements** (12 units)
   - a) One introductory writing workshop: CRWT 056
   - b) One introductory reading course: CRWT 040 or CRWT 040S, CRWT 043, CRWT 046S, CRWT 047S, CRWT 048S, CRWT 046, CRWT 047, or CRWT 048.
   - c) Two introductory workshop courses from CRWT 057, CRWT 057B, CRWT 057C.

2. **Upper-division requirements** (20 units)
   - a) Four (4) units from
     - (1) CRWT 176 (or)
     - (2) Any upper-division course in English, Comparative Literature and Foreign Languages, or Theatre (except ENGL 101, ENGL 103; FREN 100, FREN 101A, FREN 101B, FREN 101C; GER 101, GER 103A, GER 103B; RUSN 103; SPN 101A, SPN 101B, SPN 101C, SPN 105, SPN 106A, SPN 106B)
   - b) Sixteen (16) units in one of the following emphases:
      - **Nonfiction Emphasis**
        - (1) CRWT 130, CRWT 132, CRWT 134
        - (2) Four (4) units from CRWT 150, CRWT 152, CRWT 164A/TFDP 164A, CRWT 165, CRWT 166A/MCS 166A/TFDP 166A, CRWT 171, CRWT 187/CP 187
      - **Poetry Emphasis**
        - (1) CRWT 150, CRWT 160, CRWT 170
        - (2) Four (4) units from CRWT 130, CRWT 152, CRWT 164A/TFDP 164A, CRWT 165, CRWT 166A/MCS 166A/TFDP 166A, CRWT 171, CRWT 187/CP 187
      - **Fiction Emphasis**
        - (1) CRWT 152, CRWT 162, CRWT 172
        - (2) Four (4) units from CRWT 130, CRWT 150, CRWT 164A/TFDP 164A, CRWT 165, CRWT 166A/MCS 166A/TFDP 166A, CRWT 187/CP 187
      - **Drama Emphasis**
        - (1) CRWT 164A/TFDP 164A, CRWT 164B/TFDP 164B, CRWT 164C/TFDP 164C
        - (2) Four (4) units from CRWT 130, CRWT 150, CRWT 152, CRWT 165, CRWT 166A/MCS 166A/TFDP 166A, CRWT 166B/MCS 166B/TFDP 166B, CRWT 166C/MCS 166C/TFDP 166C, CRWT 187/CP 187, TFDP 121

   See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs sections of this catalog for additional information on minors. See also Journalism minor.
Education Abroad

Education Abroad is an excellent opportunity to learn more about another country and its culture while taking courses to earn units toward graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit Education Abroad at ea.ucr.edu or call (951) 827-4113.

See Education Abroad in the Educational Opportunities section in the beginning of this catalog.

Graduate Program

See Creative Writing and Writing for the Performing Arts in this catalog for more information on the M.F.A. in this area.

Lower-Division Courses

CRWT 012 The Writer in Writing 4 Lecture, 3 hours; written work, 2 hours; research, 1 hour. Prerequisite(s): none. Targets at the fledgling creative writer and apprentice literary critic, surveys the complex legacy surrounding the figure of the writer in world literature. Discussion and weekly writing exercises demonstrate the use of brainstorming in creating and critiquing literature. Cross-listed with CPLT 012.

CRWT 040 Fiction and Film 4 Lecture, 3 hours; screening, 3 hours; written work, 1 hour. Prerequisite(s): none. A study of twentieth-century fiction and film from the writer’s point of view. Emphasizes narrative elements and literary techniques found in both forms. Explores how novels are translated into film. Credit is awarded for one of the following CRWT 040 or CRWT 040S.

CRWT 040S Fiction and Film 5 Lecture, 3 hours; discussion, 1 hour; screening, 3 hours; written work, 1 hour. Prerequisite(s): none. A study of twentieth-century fiction and film from the writer’s point of view. Emphasizes narrative elements and literary techniques found in both forms. Explores how novels are translated into film. Credit is awarded for one of the following CRWT 040S or CRWT 040.

CRWT 041 Poetry and Fiction: A Reading Course For Writers 4 Lecture, 3 hours; activity, 3 hours. Prerequisite(s): none. Analytical reading of contemporary poetry and fiction in order to broaden and deepen students’ understanding of the craft of writing. Students analyze and practice poetic and fictional techniques.

CRWT 043 Creative Writing and Ancestry 4 Lecture, 3 hours; outside writing, 3 hours. Prerequisite(s): none. A study of creative writing that explores personal experience and ancestry. Genres studied may include nonfiction, autobiography, fiction, and visual media. Students are required to write in one or more of these genres.

CRWT 044 Ghosts, Gods, and Monsters: Children’s Literature For Writers 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. A survey of children’s literature, with emphasis on how the craft of tales and fables contributes to their meaning. Explores techniques the beginning writer can learn from children’s literature.

CRWT 045 The Prose Poem and “Short-Short” Story 4 Lecture, 3 hours; extra reading, 1.5 hours; written work, 1.5 hours. Prerequisite(s): none. Explores what distinguishes prose poems from “sudden” or “short-short” fiction. Investigates the use of narrative and figurative language and the tapping of the unconscious mind.

CRWT 046 Craft of Writing: Survey in Contemporary Fiction 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. A survey of selected works of contemporary fiction and related texts. Emphasizes the craft of fiction and how craft contributes to meaning. Course is repeatable as content or topic changes to a maximum of 8 units.

CRWT 046S Craft of Writing: Survey in Contemporary Fiction 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. A survey of selected works of contemporary fiction and related texts. Emphasizes the craft of fiction and how craft contributes to meaning. Course is repeatable as content or topic changes to a maximum of 8 units.

CRWT 047 Craft of Writing: Survey in Contemporary Poetry 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. A survey of selected works of contemporary poetry and related texts. Emphasizes the craft of poetry and how craft contributes to meaning. Course is repeatable as content or topic changes to a maximum of 8 units. Credit is not awarded for CRWT 047S if it has already been awarded to CRWT 046 if the content or topic is the same.

CRWT 047S Craft of Writing: Survey in Contemporary Poetry 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. A survey of selected works of contemporary poetry and related texts. Emphasizes the craft of poetry and how craft contributes to meaning. Course is repeatable as content or topic changes to a maximum of 8 units.

CRWT 053 Beginning Creative Nonfiction 4 Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours. Prerequisite(s): none. A survey of select-ed works of contemporary nonfiction and related texts. Emphasizes the craft of nonfiction and how craft contributes to meaning. Course is repeatable as content or topic changes to a maximum of 10 units. Credit is awarded for one of the following Credit is awarded for only one of CRWT 048 or CRWT 048S with the same content/topic.

CRWT 056 Introduction to Creative Writing 4 Lecture, 3 hour; discussion, 1 hour. An introduction to the craft of creative writing. Focuses on the elements of a number of genres, including poetry, fiction, nonfiction, journalism, drama, and the graphic novel.

CRWT 057A Introduction to Fiction 4 Workshop, 3 hours; written work, 3 hours. Prerequisite(s): CRWT 056; ENGL 001A with a grade of C or better. Introduction to the elements and the craft of fiction. Credit is awarded for one of the following CRWT 057A or CRWT 057S.

CRWT 057B Introduction to Poetry 4 Workshop, 3 hours; written work, 3 hours. Prerequisite(s): CRWT 056 ENGL 001A. Introduction to the elements and craft of poetry.

CRWT 057C Introduction to Creative Nonfiction 4 Workshop, 3 hours; written work, 3 hours. Prerequisite(s): CRWT 056, ENGL 001A. Introduction to the elements and craft of nonfiction.

CRWT 057SA Introduction to Fiction 5 Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): CRWT 056, ENGL 001A with a grade of C or better. Introduction to the elements and the craft of fiction. Credit is awarded for one of the following CRWT 057SA or CRWT 057A.

CRWT 056 Screenwriting: How Movies Work 4 Lecture, 3 hours; discussion, 1 hour; screening, 8 hours per quarter. Prerequisite(s): none. An introduction to writing for stage and screen. Addresses structure, character, dialogue, theme, and story. Cross-listed with MCS 066, and TFDP 066.

CRWT 076 The Verbal Coliseum: Spoken Word Workshop 5 Workshop, 3 hours; discussion, 1 hour; written work, 1 hour; extra reading, 2 hours. Explores forms and issues in contemporary spoken word poetics, including performance and writing, multimedia and audience, community relations, media culture and power, music and art, and cultural production. Course is repeatable to a maximum of 8 units.

Upper-Division Courses

CRWT 130 Beginning Creative Nonfiction 4 Workshop, 3 hours; extra reading, 3 hours. Prerequisite(s): two of the following courses: CRWT 057SA, CRWT 057A, CRWT 057B, CRWT 057C, or consent of instructor. Introduction to creative nonfiction. Covers its history and strategies for writing and critically evaluating creative nonfiction essays. Focuses on writing creative nonfiction essays based on personal experience. Includes readings in current nonfiction. Course is repeatable to a maximum of 8 units.
CRWT 132 Intermediate Creative Nonfiction 4
Workshop, 3 hours; research, 3 hours. Prerequisite(s): CRWT 056, CRWT 130; or consent of instructor. Reviews the essential strategies for writing and critically evaluating creative non-fiction essays. Focuses primarily on memoir, personal experience, and nature and science writing. Course is repeatable to a maximum of 8 units.

CRWT 134 Advanced Creative Nonfiction 4
Workshop, 3 hours; research, 3 hours. Prerequisite(s): CRWT 056, CRWT 130, CRWT 132; or consent of instructor. Explores strategies for writing and critically evaluating creative non-fiction essays. Focuses primarily on memoir, autobiography, history, and interview writing and how to work toward a sequence of longer work of nonfiction in that mode, as well as the “fact” or “immersion” essay. Course is repeatable to a maximum of 8 units.

CRWT 136 Professional Creative Nonfiction Workshop 5
Workshop, 3 hours; research, 3 hours; extra reading, 3 hours. Prerequisite(s): CRWT 056, CRWT 130, CRWT 132, CRWT 134; or consent of instructor. A workshop in creative nonfiction writing for students who want to study creative nonfiction at the graduate and professional level. Focuses on producing and polishing work and discusses the professional aspect of writing, such as submitting and publishing.

CRWT 146 Special Topics: Fiction 4
Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): CRWT 056; or consent of instructor. Explores specific topics of style and craft in fiction. Course is repeatable as content or topic changes to a maximum of 8 units. Credit is awarded to a maximum of 10 units for either or both CRWT 146 or CRWT 1465 with different titles.

CRWT 1465 Special Topics: Fiction 5
Seminar, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): CRWT 056; or consent of instructor. Explores specific topics of style and craft in fiction. Course is repeatable as content or topic changes to a maximum of 10 units. Credit is awarded to a maximum of 10 units for either or both CRWT 146 or CRWT 1465 with different titles.

CRWT 150 Beginning Poetry Workshop 4
Workshop, 3 hours; research, 3 hours. Prerequisite(s): two of the following: CRWT 057A, CRWT 057A, CRWT 057B, CRWT 057C. Consists of writing poetry which is analyzed by the class. Requires substantial original work and outside reading.

CRWT 152 Beginning Fiction Workshop 4
Workshop, 3 hours; research, 3 hours. Prerequisite(s): two of the following: CRWT 057A, CRWT 057A, CRWT 057B, CRWT 057C; or consent of instructor. Discusses and analyzes outside texts and original work from the class. Requires substantial original work.

CRWT 155 The Graphic Novel 4
Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): CRWT 046 or CRWT 0465 or CRWT 047 or CRWT 047S or CRWT 048 or CRWT 048S; CRWT 056; or consent of instructor. Explores the chronological development of the graphic novel. Focuses on theme, style, and artistic presentation. Course is repeatable as content or topic changes to a maximum of 8 units.

CRWT 160 Intermediate Poetry Workshop 4
Workshop, 3 hours; research, 3 hours. Prerequisite(s): CRWT 056, CRWT 150; or consent of instructor. Students produce and bring to class for analysis and commentary, a large quantity of original work in poetry. Course is repeatable to a maximum of 8 units.

CRWT 162 Intermediate Fiction Workshop 4
Workshop, 3 hours; research, 3 hours. Prerequisite(s): CRWT 056, CRWT 152; or consent of instructor. Class work consists of intensive analysis of students’ work. Course is repeatable to a maximum of 8 units.

CRWT 164A Beginning Playwriting 4
Seminar, 3 hours; discussion, 1 hour. Prerequisite(s): CRWT 056 or TFDP 100 or consent of instructor. Seminar in the practice of playwriting centering on the construction of a plot. Cross-listed with TFDP 164A.

CRWT 164B Intermediate Playwriting 4
Seminar, 3 hours; discussion, 1 hour. Prerequisite(s): CRWT 164A/TFDP 164A. Seminar in the practice of playwriting. Revisions of works in progress emphasizing character development and techniques for writing dialogue. Cross-listed with TFDP 164B.

CRWT 164C Advanced Playwriting 4
Seminar, 3 hours; discussion, 1 hour. Prerequisite(s): CRWT 164B/TFDP 164B. Seminar in the practice of playwriting. Includes playwrights’ participation in staged readings of their work. With consent of instructor, course is repeatable to a maximum of 8 units. Cross-listed with TFDP 164C.

CRWT 170 Advanced Poetry Workshop 4
Workshop, 3 hours; research, 3 hours. Prerequisite(s): CRWT 056, CRWT 150, CRWT 160; or consent of instructor. A workshop in poetry writing for students who wish to attempt, with criticism from class members, to fashion a significant long poem or group of poems. Course is repeatable.

CRWT 171 Anatomy of Poetry 4
Lecture, 3 hours; creative writing, 3 hours. Prerequisite(s): CRWT 160 or consent of instructor. An introductory study of poetics, including traditional and contemporary forms. Students write in the various poetic forms studied.

CRWT 172 Advanced Fiction Workshop 4
Workshop, 3 hours; research, 3 hours. Prerequisite(s): CRWT 056, CRWT 152, CRWT 162; or consent of instructor. A workshop in fiction writing for students who wish to attempt, with criticism from class members, to fashion a collection of stories or a novel. Course is repeatable.

CRWT 173 Prose Poem Workshop 4
Workshop, 3 hours; written work, 2 hours; extra reading, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Students produce and bring to class for analysis and commentary, a large quantity of original work in prose poetry. Course is repeatable as content changes to a maximum of 8 units.

CRWT 174 Issues in Journalism 4
Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Explores issues in contemporary news media, including credibility and bias, press freedom and responsibility, press-government relations, media coverage of politics, news media economics and influence on content, and race, gender, class, and news media. Course is repeatable to a maximum of 8 units.

CRWT 176 Topics in Craft of Writing 4
Lecture, 3 hours; extra reading, 1 hour; practice writing, 2 to 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Covers the formal study and practice of the craft of writing, its technical aspects, and development through the contemporary period in the genres of poetry, fiction, and non-fiction. Course is repeatable as content changes to a maximum of 12 units.

CRWT 182 Professional Fiction Workshop 5
Workshop, 3 hours; research, 3 hours; extra reading, 3 hours. Prerequisite(s): CRWT 056, CRWT 152, CRWT 162, CRWT 172; or consent of instructor. A workshop in fiction writing for students who want to study fiction at the graduate and professional level. Focuses on producing and polishing work and discusses the professional aspect of writing, such as submitting and publishing.

CRWT 185 Special Topics in Nonfiction 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores specific topics in non-fiction. Course is repeatable as content changes to a maximum of 8 units.

CRWT 186A Beginning Book Arts 4
Lecture, 1 hour; consultation, 1 hour; laboratory, 6 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the elements of press operation. Using traditional letterpresses, students learn hands-on typesetting, design, material and text selection, editing, printing, and binding skills, as well as the history of the book and book design.

CRWT 186B Intermediate Book Arts 4
Workshop, 1 hour; consultation, 1 hour; laboratory, 6 hours. Prerequisite(s): CRWT 186A; upper-division standing or consent of instructor. An expanded discussion of the techniques and styles in press operation. Students build on the techniques acquired in CRWT 186A and demonstrate finished projects.

CRWT 187 Metafiction 4
Lecture, 3 hours; creative writing, take-home midterm, or term paper, 30 hours per quarter. Prerequisite(s): upper-division standing or consent of instructor. Explores postmodernism, metafiction, and the new novel in Europe and America. Creative writers submit fiction in lieu of a term paper or midterm. Cross-listed with CPLT 187.

CRWT 190 Special Studies 1 to 5
Prerequisite(s): To be taken with the consent of the chair of the department as a means of meeting special curricular problems. Course is repeatable to a maximum of 16 units.

Graduate Program

Master of Fine Arts
The Master of Fine Arts (M.F.A.) degree in Creative Writing and Writing for the Performing Arts (CWPA) offers writers the ability to move fluidly within various arenas of creative writing, including the genres of poetry, fiction, nonfiction, playwriting, and screenwriting, as well as in multimedia studies. The program integrates scholarly studies of narrative, style, voice, structure, and history of these writing disciplines with traditional workshop formats, forming writers who can actively direct the literature of the 21st century.

For students in the Main Campus
Traditional M.F.A. program, financial assistance may include teaching assistantships and fellowships, as well as fellowships for community projects through the Gluck Fellows Program of the Arts.

UCR Palm Desert Center (PDC)
An M.F.A. in Creative Writing and Writing for the Performing Arts is offered at UCR’s Palm Desert Center, in the Low Residency program. Students in the Low Residency program can receive limited financial assistance through editorial positions on The Coachella Review, the student run literary journal of the program.

Palm Desert Low Residency Program
Students enroll in a prescribed number of units each term. Requirements are similar to the full-time program at UC Riverside, but courses are modified to fit low residency requirements. Low Residency MFA students come to Rancho Mirage, California for two ten-day sessions in the Fall and Spring quarters that include lectures, seminars, workshops and readings (please refer to website palmdesertmfa.ucr.edu for specific dates). Students also attend a final thesis or manuscript residency their last quarter to file. Students also enroll in a one unit Professional Development Course during this quarter. During the rest of the academic year, students participate in online workshops and seminars and work individually with faculty. Cross-enrollment between programs is not allowed. Full time enrollment in this program is 8 units per quarter for 7 quarters, and students pay a per unit fee.

Admission
Applicants to either program should demonstrate significant professional skill by submitting in thesis or manuscript form one of the following: 10-15 pages of poetry, a maximum of 25 pages of fiction or nonfiction, or the first act or a maximum of 25 pages of a screen play or play. Applicants must have a B.A. or B.S. degree from an accredited institution and submit 3 letters of recommendation, a self-statement, and original transcripts. Applications for the Main Campus Traditional Program are accepted for Fall quarter only; applications for the Palm Desert Low Residency program are accepted for the Fall and Spring quarters.

Plan I (Thesis or Manuscript) Both M.F.A. programs (Main Campus and PDGC Low Residency) require completion of a thesis or manuscript, the requirements of which are the same. Each student will decide which title - thesis or manuscript - best suits their work.

Main Campus Traditional Program
Consists of workshops in chosen genres, culminating in a final project (the master’s thesis or manuscript) that showcases the writer’s cultivated talents, in the form of a poetry collection, novel, memoir, screenplay, or full-length play. The M.F.A. requires students to major in one genre but encourages them to explore the other genres as well, allowing for creative movement within disciplines. Structure and focus in screenwriting and playwriting can also be applied to fiction and nonfiction, and lyricism and metaphor in poetry can also enhance description and dialogue in the other genres, for example. Students can also engage in course work in varied areas of directing and acting, film history and literature, in literary criticism and translation, with supplemental courses selected from departments such as Comparative Literature and Foreign Languages, English, Hispanic Studies, and Media and Cultural Studies. Students can gain practical aspects of filmmaking from courses in Studio Art and Theatre.

Course Requirements
Minimum requirements consist of 56 units of course work (14 courses) and 8 units of master’s thesis or manuscript project. The core curriculum includes the following:

1. Students in the Creative Writing Track (fiction, nonfiction and poetry) are required to take six workshop courses in their chosen genre. (24 units total). Students in the Writing for Performing Arts Track (playwriting and screenwriting) are required to take five workshop courses in their chosen genre (20 units). Requisite courses include CWPA 230 for
1. Palm Desert Low Residency Program

Consists of workshops in chosen genres and course work culminating in a final project (the master’s thesis or manuscript) which showcases the writer’s cultivated talents, in the form of a poetry collection, novel, short story collection, essay collection, memoir, full-length work of nonfiction, screenplay, or full-length play. The M.F.A. requires students to write in two genres, allowing for creative movement within disciplines. Structure and focus in screenwriting and playwriting can also be applied to fiction and nonfiction, and lyricism and metaphor in poetry can also enhance description and dialogue in the other genres, for example. Students engage in course work in varied areas of directing and acting, in film history and literature, in literary criticism and translation. Requirements consist of 56 units of course work.

Course Requirements
1. Six low residency genre workshop courses.
2. Six low residency literature, poetry, and film seminars.
3. Six low residency cross genre workshops.
4. Thesis or manuscript. In the areas of playwriting and screenwriting, the final written project is a full-length play or screenplay or teleplay (approximately 120 pages). In the areas of poetry, fiction, and nonfiction, the final written project is a poetry collection (approximately 60 pages), novel, short story collection, essay collection, memoir or full-length nonfiction work (between 100-200 pages). Each student is paired with three faculty members, who serve as the thesis advisor(s).
5. One unit Professional Fundamentals Course.

Normative Time to Degree
7 quarters

Creative Writing Program

Graduate Courses

CWL 200 Professional Fundamentals 1
Colloquium, 5 hours; consultation, 5 hours; practicum, 5 hours. Prerequisite(s): graduate standing. Focuses on the production of original work. Includes introductory study of chosen cross-genres. Emphasizes technique, structure, style, and form. F. Fiction; N. Nonfiction; P. Poetry; S. Screenwriting; T. Playwriting. Course is repeatable.

CWL 201 (E-Z) Low Residency Seminar in Literature, Theatre, and Film 4 to 6
Seminar, 21 hours per quarter; activity, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing. A study of a period, style, author, or issue in relation to literary, theatrical, or film history. F. Fiction; N. Nonfiction; P. Poetry; S. Screenwriting; T. Playwriting. Course is repeatable.

CWL 202 (E-Z) Low Residency Seminar in Literature, Theatre, and Film 2 to 4
Seminar, 1 hour; extra reading, 3 hours. Prerequisite(s): graduate standing. A study of a period, style, author, or issue in relation to literary, theatrical, or film history. F. Fiction; N. Nonfiction; P. Poetry; S. Screenwriting; T. Playwriting. Course is repeatable.

CWL 211 (E-Z) Low Residency Genre Workshop 2 to 4
Activity, 3 hours; workshop, 10 hours per quarter. Prerequisite(s): graduate standing. Focuses on the production of original work. Involves study of chosen genre(s), emphasizing technique, structure, style, and form. F. Fiction; N. Nonfiction; P. Poetry; S. Screenwriting; T. Playwriting. Course is repeatable.

CWL 221 (E-Z) Low Residency Cross-Genre Workshop 2 to 4
Extra reading, 3 hours; workshop, 10 hours per quarter. Prerequisite(s): graduate standing. Focuses on the production of original work. Includes introductory study of chosen cross-genres. Emphasizes technique, structure, style, and form. F. Fiction; N. Nonfiction; P. Poetry; S. Screenwriting; T. Playwriting. Course is repeatable.

CWL 222 (E-Z) Low Residency Cross-Genre Workshop 2 to 4
Extra reading, 3 hours; workshop, 1 hour. Prerequisite(s): graduate standing. Focuses on the production of original work. Includes introductory study of chosen cross-genres. Emphasizes technique, structure, style, and form. F. Fiction; N. Nonfiction; P. Poetry; S. Screenwriting; T. Playwriting. Course is repeatable.

CWL 200 Advanced Play Analysis 4
Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An analysis of dramatic structure from a sophisticated perspective. Covers strategies for dealing with openness, ambiguity, and metatheater. Also discusses tied versus gratuitous elements, archetypes, motifs, and symbolism. Course is repeatable to a maximum of 12 units.

CWL 201 The Writer’s Life: Literary Strategies and Structures 4
Seminar, 3 hours; extra reading, 1 hour; research, 1 hour; written work, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Explores the artistic, practical, and professional aspects of life as a working novelist, poet, playwright, screenwriter, or essayist. Topics include: publishing, literary journals, commercial magazines, the film industry, the theatre industry, agents, and overviews of genre and art.

CWL 210 Literature and Improvisation: the Intersection of Culture and Performance 4
Lecture, 3 hours; studio, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the literary and performative tools needed to construct original, language-based plays. Combines improvisational performance with storytelling to challenge students to develop and explore the connectivity between cultural history, oral traditions passed on through personal narratives, and public discourse.
CWPA 214 Acting For Writers 4 Lecture, 2 hours; discussion, 2 hours; research, 2 hours. Prerequisite(s): CWPA 264 or CWPA 266. Examines the theory and practice of acting to enable writers to better understand how language reflects character, as well as how actors turn the written word into spoken language. Includes text work and improvisation. Credit is awarded for only one of CWPA 214 or TFDP 114.

CWPA 226 Contemporary American Theatre 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Investigates contemporary American theatre through frequently produced plays, critical discussions, economics, gender and racial dynamics, and behind-the-scenes institutional operations. Course is repeatable to a maximum of 12 units.

CWPA 227 Theories of the Modern Theatre 4 Seminar, 4 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the major theories underlying twentieth-century theatre practice. Emphasizes the wide range of styles in modern theatre, including realism, symbolism, expressionism, surrealism, absurdism, Epic Theatre, and Theatre of Cruelty.

CWPA 230 Creative Nonfiction 4 Workshop, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor; consent of program chair is required for students with credit for CWLR 211N, CWLR 212N, CWLR 221N, or CWLR 222N; A formal study of contemporary creative nonfiction. Emphasizes style, structure, and form. Focuses on the production of original work. Course is repeatable to a maximum of 36 units.

CWPA 231 Directing For Writers 4 Seminar, 3 hours; extra reading, 1 hour; research, 1 hour; written work, 1 hour. Prerequisite(s): graduate standing or consent of instructor. An examination of the theory and practice of directing for the stage. Enables writers to better understand how to produce their own work and to interact more effectively with directors.

CWPA 246 Special Topics in Fiction 4 Seminar, 3 hours; extra reading, 3 hours; term paper, 1 hour. Prerequisite(s): graduate standing. Explores various movements and themes in literature. Course is repeatable to a maximum of 24 units.

CWPA 250 Theory For Writers 4 Workshop, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A survey of literary theory designed especially for creative writers. Focuses on aspects of various theories that might be useful for creative work. Involves a close reading of theoretical texts with a strong emphasis on issues of form.

CWPA 251 Hollywood and the Novel: The Transformation of Fiction Into Film 4 Lecture, 3 hours; screening, 1 hour; extra reading, 2 hours; research, 2 hours; written work, 1 hour. Prerequisite(s): graduate standing. Explores the transformation of novels into screenplays and films. Examines four novels and their corresponding screenplays and films. Focuses on differences in style, content, and format. Course is repeatable as content changes to a maximum of 8 units.

CWPA 252 (E-2) Theory and Craft of Writing 4 Seminar, 3 hours; extra reading, 1 hour; research, 2 hours. Prerequisite(s): graduate standing. Analyzes writing techniques, structures, and approaches to the craft in traditional, contemporary, and avant-garde literary works. E. Fiction; F. Poetry; G. Nonfiction; I. Playwriting. J. Screenwriting. K. First Person. Course is repeatable to a maximum of 36 units.

CWPA 253 Stories as Collections 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing in Creative Writing and Writing for the Performing Arts. An analysis of the order, shape, and structure of story collections to aid in an appreciation of characters, conflicts, and themes. Course is repeatable as content changes to a maximum of 8 units.

CWPA 255 The Graphic Novel 4 Seminar, 3 hours; studio, 3 hours; extra reading, 1.5 hours; research, 1.5 hours. Prerequisite(s): graduate standing. An in-depth consideration of the historical development and craft of graphic novels. Examines the intellectual, literary, and artistic evolution of this narrative form.

CWPA 256 Contemporary Literature of the Middle East 4 Seminar, 3 hours; extra reading, 3 hours; term paper, 1 hour. Prerequisite(s): graduate standing. An overview of contemporary literature from the Middle East. Proposes some of the ways in which the historical and cultural aspects of Islamic literature differ from that of Western culture. Includes English translations of works in Arabic, Persian, Turkish, Dari, and Urdu. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CWPA 257 The Sufis 4 Seminar, 3 hours; term paper, 2 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to sufism through an in-depth reading of the great Sufi poets. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with RLST 257.

CWPA 260 Shakespeare and Film 4 Seminar, 3 hours; research, 1 hour; screening, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the influence of Shakespeare on film from faithful adaptations to broad reinventions of his works. Compares Shakespeare in his period and the present; the wide range of movies that Shakespeare inspired; and how modern filmmakers deal with issues of language and structure.

CWPA 261 Directing For Writers 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CWPA 266; graduate standing. Examines the methods used by directors to break down a screenplay. Develops the skills to write scripts that are realistically doable and attract directors, producers, and actors. Includes learning the directing responsibilities of casting, directing actors, working within a budget, choosing locations, and working with producers.

CWPA 262 Fiction 4 Workshop, 3 hours; extra reading, 4 hours. Prerequisite(s): graduate standing or consent of instructor; consent of program chair is required for students with credit for CWLR 211F, CWLR 212F, CWLR 221F, or CWLR 222F. A formal study of contemporary fiction. Emphasizes style, structure, and form. Focuses on production of original work. Course is repeatable to a maximum of 36 units.

CWPA 263 Fiction Workshop 4 Workshop, 3 hours; extra reading, 1.5 hours; written work, 1.5 hours. Prerequisite(s): graduate standing. A comprehensive introduction to the craft of fiction writing. Develops fiction writing abilities and critiquing skills of the genre. Intended for students whose primary emphasis is not fiction. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CWPA 264 Playwriting 4 Workshop, 3 hours; consultation, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Intensive formal study of playwriting with emphasis on plot, character, theme, dialogue, and style. Course is repeatable.

CWPA 265A Four Forms 4 Workshop, 3 hours; research, 3 hours. Prerequisite(s): graduate standing. Explores similarities and differences of three kinds of creative writing: fiction, playwriting, and screenwriting. Includes participation in live staging and video shoots, translating stories from one form to another to highlight the unique qualities of each form as well as areas of commonality. Course is repeatable.

CWPA 265B Four Forms 4 Workshop, 3 hours; research, 3 hours. Prerequisite(s): CWPA 265A; graduate standing. Includes adaptation of a one-act play into a screenplay not longer than 15 pages. Demonstrates how to develop work dependent on dialogue into work dependent on visuals and action. Covers shooting, editing, and screening of short films. Course is repeatable.

CWPA 266 Screenwriting 4 Workshop, 3 hours; consultation, 1 hour; screening, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Involves outline and completion of an initial draft of a feature-length screenplay. Also includes a comparison study of two movies in the same genre. Course is repeatable.

CWPA 267 Writing For Television 4 Workshop, 3 hours; consultation, 1 hour. Prerequisite(s): graduate standing or consent of instructor; consent of program chair is required for students with credit for CWLR 211S, CWLR 221S, CWLR 222S, or CWLR 223S. Provides intensive formal study of writing for television. Emphasizes creating guidelines for a one-hour pilot and a 13-episode series. Course is repeatable to a maximum of 24 units.

CWPA 268 Writing the Half-Hour Television Comedy 4 Workshop, 3 hours; written work, 3 hours. Prerequisite(s): graduate or professional standing or written consent of instructor. Introduction to the style, form, content, and creation of a half-hour television comedy series. Course is repeatable to a maximum of 8 units.
CWA 269 Rewriting the Script 4 Workshop, 4 hours. Prerequisite(s): CWA 264 or CWA 266 or consent of instructor; consent of instructor is required for students repeating the course. Addresses the processes involved in rewriting a full-length script (screenplay or play). Credit is awarded for only one of CWA 269 or TFDP 169.

CWA 270 Poetry Workshop 4 Workshop, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Intensive formal study of contemporary poetry with emphasis on style, structure, and form. Focuses on production of original work. Course is repeatable to a maximum of 36 units.

CWA 275 Modern American Poetry 4 Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): graduate standing. Focuses on various modern poets. Explores their contributions to the evolution of an American poetic tradition and aesthetic. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes to a maximum of 8 units.

CWA 276 Poetry and Translation 4 Workshop, 3 hours; extra reading, 1.5 hours; research, 1.5 hours. Prerequisite(s): graduate standing; reading proficiency in Spanish. Discusses the efficacy and difficulty of translating poetry from the Spanish language into English. Explores the works of twentieth- and twenty-first century major Spanish language poets. Provides a forum to render and compare translations. Cross-listed with SPN 277.

CWA 277 Poetry and the Sacred 4 Seminar, 2 hours; extra reading, 2 hours; research, 2 hours; written work, 2 hours. Prerequisite(s): graduate standing. An in-depth introduction to sacred poetic texts from antiquity to the present. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CWA 278 Contemporary American Poetry 4 Workshop, 3 hours; extra reading, 3 hours; written work, 1 hour. Prerequisite(s): graduate standing. Focuses on influential contemporary American poets. Discusses their styles and the evolution of poetry over the last fifty years. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes to a maximum of 8 units.

CWA 279 The Fire This Time: Twentieth-Century Poetry of Witness 4 Seminar, 3 hours; extra reading, 1 hour; research, 1 hour; written work, 1 hour. Prerequisite(s): graduate standing. Examines the poetry of crises and witness written by poets in the twentieth and twenty-first centuries from America and around the world. Topics may include war; genocide; religious, ethnic, and political persecution; exile; imprisonment; ecological degradation; and domestic and urban violence in the United States.

CWA 280 Writers’ Colloquium 1 Colloquium, 1 hour. Prerequisite(s): graduate standing. Colloquium featuring writers in fiction, nonfiction, poetry, playwriting, and screenwriting. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 6 units.

CWA 281 Oscar Wilde and Late Victorian Theatre 4 Seminar, 4 hours. Prerequisite(s): graduate standing or consent of instructor. A study of late Victorian theatre and culture through the works of Oscar Wilde (1854-1900), an Irish, feminist, aesthete, socialist, homosexual Victorian author. Includes readings of Wilde’s plays and nondramatic writings as well as plays by contemporaries such as Ibsen and Shaw.

CWA 282 Film Noir: Stories and Cinema From the Shadows 4 Seminar, 2 hours; screening, 2 hours; research, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Examines the genre of fiction and cinema known as “film noir.” Looks at films, writing, and art to understand how “film noir” reshapes the way America looks at itself. Each week examines a different aspect of the genre, combining readings and films to understand its roots and rules.

CWA 283 Multigenre Workshop 4 Workshop, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A peer-review workshop for students with ongoing projects in any and all genres. Focuses on student work that can profit from exposure to readings by people working in a number of different genres. Course is repeatable to a maximum of 16 units.

CWA 284 Intensive Workshop 1 to 2 Workshop, 10 to 12 hours per quarter; discussion, 10 to 12 hours per quarter. Prerequisite(s): graduate standing or consent of instructor. Explores the work of contemporary writers and provides an opportunity for those same writers to respond to the students’ work. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

CWA 285 The Literary Memoir 4 Workshop, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing. An in-depth survey of the literary memoir. Explores how memoirists employ craft and memory to create meaning. Addresses what obligation memoirists have to drama and to real lives and places. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CWA 288 Thesis/Manuscript Workshop 4 Workshop, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Designed for M.F.A. students working on their thesis or manuscript, usually in the last two quarters of the program. Open to any and all genres. Focuses on student work, emphasizing the completion of the thesis and manuscript projects.

CWA 290 Directed Studies 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor and graduate advisor. Literature studies directed by a faculty member on special topics. Course is repeatable.

CWA 292 Concurrent Analytical Studies in Creative Writing and Writing For the Performing Arts 1 to 4 Research, 3 to 12 hours. Prerequisite(s): graduate standing; consent of instructor and graduate advisor. Taken concurrently with a 100-series course but on an individual basis. Devoted to research, criticism, and written work related to the 100-series course. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CWA 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor and graduate advisor. Develops a creative writing project with possibility of publication or production, and not specifically intended for thesis, final project manuscript, or dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

CWA 299 Research For the Thesis Or Manuscript 1 to 12 Thesis, 3 to 36 hours Prerequisite(s): consent of thesis or manuscript director. Research and preparation for the Master of Fine Arts thesis or manuscript. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 24 units.

Professional Courses
CWA 301 Directed Studies in the Teaching of Creative Writing and Writing For the Performing Arts 4 Lecture, 2 hours; practicum, 1 hour; research, 2 hours; written work, 3 hours. Prerequisite(s): enrollment in the M.F.A. program in Creative Writing and Writing for the Performing Arts. Prepares for teaching introductory undergraduate Creative Writing courses by offering a flexible curriculum of meetings and conferences on effective pedagogical methodology. Includes creating course syllabi and lesson plans and discussing a range of practical teaching issues. Required of all TAs for at least one quarter. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

CWA 302 Teaching Practicum 1 to 4 Consultation, 1 to 4 hours; practicum, 2 to 8 hours. Prerequisite(s): graduate standing. Supervised teaching in undergraduate Creative Writing courses. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.
Palm Desert
Low Residency
Program

Graduate Courses
See also graduate courses in the Theatre, Film
and Digital Production section of this catalog.

CWLR 200 Professional Fundamentals 1
Colloquium, .5 hours; consultation, .5 hours;
practicum, .5 hours. Prerequisite(s): graduate
standing. Focuses on professional development.
Involves mechanics of industry queries, book
proposals, contracts, rights, and agent interviews.
Culminates in craft lecture during residency.
Graded Satisfactory (S) or No Credit (NC). Course
is repeatable to a maximum of 2 units.

CWLR 201 (E-Z) Low Residency Seminar in
Literature, Theatre, and Film 4 to 6
Seminar, 21 hours per quarter; activity, 3 hours; extra read-
ing, 3 hours. Prerequisite(s): graduate standing. A
study of a period, style, author, or issue in relation
to literary, theatrical, or film history. F. Fiction; N.
Nonfiction; P. Poetry; S. Screenwriting; T. Playwrit-
ing. Course is repeatable.

CWLR 202 (E-Z) Low Residency Seminar in
Literature, Theatre, and Film 2 to 4
Seminar, 1 hour; extra reading, 3 hours.
Prerequisite(s): graduate standing. A study of
a period, style, author, or issue in relation to
literary, theatrical, or film history. F. Fiction; N.
Nonfiction; P. Poetry; S. Screenwriting; T.
Playwriting. Course is repeatable.

CWLR 211 (E-Z) Low Residency Genre
Workshop 2 to 4
Activity, 3 hours; workshop, 10 hours per quarter. Prerequisite(s): graduate
standing. Focuses on the production of original
work. Includes introductory study of chosen genre(s). Em-
phasizes technique, structure, style, and form.
F. Fiction; N. Nonfiction; P. Poetry; S. Screenwriting; T. Playwriting. Course is repeatable.

CWLR 212 (E-Z) Low Residency Genre
Workshop 4 to 6
Extra reading, 3 hours;
workshop, 3 hours. Prerequisite(s): graduate
standing. Focuses on the production of original
work. Includes introductory study of chosen genre(s). Em-
phasizes techniques, structure, style, and form.
F. Fiction; N. Nonfiction; P. Poetry; S. Screenwriting;
T. Playwriting. Course is repeatable.

CWLR 221 (E-Z) Low Residency Cross-
Genre Workshop 2 to 4
Activity, 3 hours;
workshop, 10 hours per quarter. Prerequisite(s): graduate
standing. Focuses on the production of original
work. Includes introductory study of chosen cross-genres. Emphasizes technique, structure,
style, and form. F. Fiction; N. Nonfiction; P. Poetry; S.
Screenwriting; T. Playwriting. Course is repeatable.

CWLR 222 (E-Z) Low Residency Cross-
Genre Workshop 2 to 4
Extra reading, 3 hours;
workshop, 1 hour. Prerequisite(s): graduate
standing. Focuses on the production of original
work. Includes introductory study of chosen cross-genres. Emphasizes technique, structure,
style, and form. F. Fiction; N. Nonfiction; P. Poetry; S.
Screenwriting; T. Playwriting. Course is repeatable.
DON’T JUST TAKE COURSES. CHART ONE.
In addition, visiting professional dancers, choreographers, and scholars come to UCR frequently to give special workshops, master classes, and lectures.

Opportunities to perform include "UCR is Dancing," MFA students' final projects, and the Gluck Fellows Arts Outreach Touring programs.

Dance majors are eligible for the Marius de Brabant (formally Chancellor's Performance) Award, a scholarship of up to $3,000. Majors may apply for research grants and stipends for summer dance studies, as well as the Maxwell H. Gluck Fellowship, which awards $1000 in addition to pre-professional performance opportunities Student assistantships and other forms of financial aid are also available.

University Requirements
See Undergraduate Studies section.

College Requirements
See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

Major Requirements
The Dance major focuses on two broad areas of study: Dance Making and Dance Studies.

After completing a number of shared required courses, Dance majors will choose an emphasis in either Dance Making or Dance Studies and complete a Capstone Research Seminar.

1. Lower-division requirements (8 units):
   - DNCE 014, DNCE 019

3. Dance Studies: (8 units), 2 courses from the following: DNCE 131/ GSST 127, DNCE 132, DNCE 133, DNCE 134, DNCE 135, DNCE 136

4. Movement Practice (up to 24 units)
   - Dance majors must enroll in at least one movement practice course per quarter, and must pursue a concentration in two different dance genres of at least 6 units each. Up to 24 units may be counted towards the major from:
     a) DNCE 066A, DNCE 066B (West African Dance)
     b) DNCE 067A, DNCE 067B, DNCE 067C (Modern Technique)
     c) DNCE 068 (Somatics)
     d) DNCE 069A, DNCE 069B (18th Century Dance)
     e) DNCE 070A, DNCE 070B, DNCE 070C (Hip Hop Dance)
     f) DNCE 071A, DNCE 071B (Ballet)
     g) DNCE 073A, DNCE 073B (Jazz Dance)
     h) DNCE 074A, DNCE 074B (Yoga for Dancers)
     i) DNCE 075A, DNCE 075B (Dance Techniques and Practices)
     j) DNCE 081, DNCE 181 (Dance Cultures, Culture in Dance)

Dance Making Emphasis:
1. Eight units from Dance Making/Practice Electives:
   - DNCE 167, DNCE 168, DNCE 180(E-Z), DNCE 181*, or any DNCE 115(E-Z) not used to fulfill requirement #2 above.

No more than 4 units may be drawn from the following movement practice courses to fulfill this eight unit elective requirement:

2. Four units from Dance Studies Electives:
   - DNCE 155 (E-Z), DNCE 161/MCS 161, DNCE 162/MCS 162, DNCE 171 (E-Z)/MCS 151 (E-Z), DNCE 172 (E-Z), DNCE 173 (E-Z), DNCE 181* or any of DNCE 131/ GSST 127, DNCE 132, DNCE 133, DNCE 134, DNCE 135, DNCE 136 not used to fulfill requirement #3 above;

*DNCE 081 and 181 may be used to fulfill either the Dance Making or the Dance Studies requirement, but not both.

3. Production: DNCE 140

4. Dance Making Capstone:
   a) DNCE 188
   b) DNCE 189E

Dance Studies Emphasis:
1. Eight units from Dance Studies Electives:
   - DNCE 155 (E-Z), DNCE 161/MCS 161, DNCE 162/MCS 162, DNCE 171 (E-Z)/MCS 151 (E-Z), DNCE 172 (E-Z), DNCE 173 (E-Z), DNCE 181* or any of DNCE 131/ GSST 127, DNCE 132, DNCE 133, DNCE 134, DNCE 135, DNCE 136 not used to fulfill requirement #2 above;

2. Four units from Dance Making/Practice Electives:

*DNCE 081 and 181 may be used to fulfill either the Dance Making or the Dance Studies requirement, but not both.

3. Dance Studies Capstone: DNCE 189F

Minor
Students who minor in Dance receive introductions to dance making, movement practices, and critical dance studies that enable them to pursue upper-division courses germane to a particular focus in dance.

1. Lower-division preparation (14 units)
   a) DNCE 014, DNCE 019
   b) Six (6) units from movement practice courses:

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

### Graduate Program

The Department of Dance offers a Master of Arts (M.A.) in Critical Dance Studies, a Master of Fine Arts (M.F.A.) in Experimental Choreography, and a Ph.D. in Critical Dance Studies.

### Master’s Degrees

#### M.A. in Critical Dance Studies

**Admission**

Students gaining admission to the Ph.D. program in Critical Dance Studies may, after advisement and with the approval of the faculty committee, elect to pursue an M.A. degree in Critical Dance Studies.

**Plan I (Thesis)**

Students must complete a minimum of 36 quarter units of undergraduate (100 series) and graduate (200 series) courses. At least 24 of these units must be in graduate courses and must include the following UCR courses:

- DNCE 239 (Introduction to Graduate Study of Dance)
- DNCE 254 (Political Approaches to Dance Studies)
- DNCE 255 (Historical Approaches to Dance Studies)
- DNCE 257 (Rhetorical Approaches to Dance Studies)
- DNCE 258 (Cultural Approaches to Dance Studies)
- DNCE 297 or DNCE 299 for independent creative work

A minimum of 12 units of DNCE 299 (thesis research) can be counted towards the 36-unit minimum. Other courses (to fulfill the 36-unit requirement) should be selected, with the consent of the program graduate advisor, from relevant upper-division and graduate courses.

The units must be taken for a letter grade and can include, but are not limited to: DNCE 200-level seminar courses (DNCE 239-244, 254-255, 257-258, 260 (E-Z), 264-265 (E-Z), 267); DNCE 280; an upper-division undergraduate-level course paired with 2 units of 292 (Concurrent Analysis).

Candidates for the degree must prepare and present an acceptable thesis to the Department of Dance.

#### M.F.A. in Experimental Choreography

offers emerging and established artists a site for intense investigation in dance making, performance, and interdisciplinary embodied practice. Over the course of six quarters, students engage in a series of core composition courses and select critical dance studies courses that focus on and address current and urgent questions in the field, and that center experimentation and interdisciplinary in their approaches. Each quarter students pair with a faculty mentor, four quarters of which are for the Graduate Critique Panels (GCP), to engage intimately with their independent creative practices and show their work for critical feedback and progress evaluation. During the second year of the program students are required to share their work publicly as part of the MFA Fourth Quarter Showings (4QS) from which they begin to develop their final projects and form their committees. The final project demonstrates a thorough investigation and committed execution of a specific set of critical questions unique to their cumulative research, and includes a public artist talk and a written reflective/theoretical document.

UCR’s M.F.A. program is unique for the close relationship it maintains with the Ph.D. in Critical Dance Studies, one of the preeminent programs for intellectual inquiry in the field of cultural, political, and historical studies of dance. Cooperation between these two programs, both conceptually and through intersecting curricula, contributes to the department’s embrace of dance making and scholarship as complementary modes of investigation. M.F.A. students are equally enriched by the professional relationships they develop with our undergraduate population through teaching, directing, producing, and community engagement. Several venues on and off campus, including our Performance Lab, Studio Labs, and the Culver Center of the Arts downtown, are available for students to share their research.

Financial assistance includes teaching assistantships and fellowships for community projects through the Gluck Fellows Program of the Arts. Students are also eligible to apply for fellowship support from Graduate Division to help fund a portion of their second year of study.

#### Admission

The program is especially designed for established practicing artists who desire to return to university as a site for deeper engagement and reflection, individuals who demonstrate an invested creative practice and readiness to expand and challenge their established research.

Applicants to the program should demonstrate significant professional experience as an active dance, visual or performance artist making and producing work, and who desire to contextualize their aesthetic inquiry through the study of historical, cultural, and political perspectives.

Three digital samples of original creative work that exemplify the applicant’s research and point of view of their embodied praxis, are required.

Applicants must have a B.A. or B.F.A. degree from an accredited institution.

Contact the department for specific details.

### Course Work

Requirements consist of 40 units of course work (as set out below) and 12-14 units of independent research for a final project. Students’ total number of units of graduate and upper-division undergraduate courses must equal at least 54. The core curriculum, normally to be completed in the first two years of residency, shall comprise the following 16 units:

- DNCE 240 (Improvising Choreography: Scores, Structures, and Strategies)
- DNCE 241 (Creating the Experiment: Identifying the New)
- DNCE 242 (Dancing Representation: Figures, Forms, and Frames)
- DNCE 243 (Collaborating in Dance Making: Materials, Methods, and Interactions)

Students must also take 4 units in each of the following:

- DNCE 180R (Dance Practicum: Pedagogy)
- DNCE 239 (Introduction to Graduate Study of Dance)
- DNCE 244 (Special Topics in Dance Making)

In addition, students must complete 8 units from the following Critical Dance Studies courses:

- DNCE 254 (Political Approaches to Dance Studies)
- DNCE 255 (Historical Approaches to Dance Studies)
- DNCE 257 (Rhetorical Approaches to Dance Studies)
- DNCE 258 (Cultural Approaches to Dance Studies)
- DNCE 260 (Special Topics in Critical Dance Studies)
- DNCE 264 (Oral History and Ethnographic Methods)
- DNCE 267 (Choreographies of Writing)

Students must also take Dance 301, which does not count toward the total 54 units required for the degree plus 4–6 graduate-level units of electives either within or outside the Dance Department. These units must be taken for a letter grade and can include, but are not limited to: any of the core PhD courses (DNCE 254, 255, 257 & 258) not previously taken; a Dance 200-level seminar course in critical dance studies (DNCE 260, 264 & 267); DNCE 280 (Colloquium); the bundling of an upper-division undergraduate-level course with 2 units of 292 (Concurrent Analysis).

An additional 12-14 units are taken through DNCE 297 or DNCE 299 for independent creative research work with faculty mentors on their Graduate Critique Panels, and on phases of the final project. During the second year, students form a committee consisting of three-four faculty members, one of whom may be outside the department. The committee approves the project proposal and supervises the final project.

#### Foreign Language Requirement

None

#### Written and/or Oral Qualifying Examination

During the second year, the student writes a 10–15-page proposal for the final project to be approved by the committee.
Final Project
The final project may take shape in many forms in which the student’s research is made evident. For example, students may 1) undertake to create site-specific performances occurring in different locales over several months, 2) organize opportunities for interactive choreography with distinct groups of performers, 3) develop a digital media or film project, or 4) create a portfolio of many distinct but connected projects. Whatever its final form, the project must demonstrate a thorough investigation and committed execution of a defined aesthetic concern. Students are also required to give a 30-minute public artist talk followed by Q&A, and produce a 20-40 page written document to be completed within one quarter of the performance/project event, which outlines the aesthetic focus of the student’s research, reflects on the creative process, and provides a historical and philosophical contextualization for the project.

Normative Time to Degree 7 quarters

Doctoral Program
Ph.D. in Critical Dance Studies

The Ph.D. program in Critical Dance Studies provides an advanced interdisciplinary base for innovative research in the field of cultural, political, and historical studies of dance. The program of study embraces a theoretical consideration of all dimensions of the practice of dance. These dimensions include, but are not limited to, body politics; media and digital cultures; globalization and cultural translation; race, ethnicity, sexuality, and gender; mobilization and class; and corporeal knowledges and choreography. In addition to theoretical and historical concerns, the program promotes the articulation of a variety of methodological approaches to the analysis of bodily performance.

UCR faculty put into motion various modes of production: performance studies, history, ethno-ography, critical race theory, feminist studies/ masculinities & queer studies, Marxism or post-Marxism, and other specific area studies related to, for example, South Asian, Asian Diaspora and Asian American studies, African Diaspora studies, Indigenous studies, Latina/Latin American studies, and Global South studies. The program provides a provocative environment for investigating cutting-edge strategies for original scholarly work in dance.

Admission
Students must meet the general requirements for admission to the Graduate Division as shown in the Graduate Studies section of this catalog. Students may submit a statement of experience in dance.

Deficiencies may be corrected with appropriate course work.

Course Work
Core curriculum normally to be completed in the first two years of residency includes the following:

DNCE 239 (Introduction to Graduate Study of Dance)
DNCE 254 (Political Approaches to Dance Studies)
DNCE 255 (Historical Approaches to Dance Studies)
DNCE 257 (Rhetorical Approaches to Dance Studies)
DNCE 258 (Cultural Approaches to Dance Studies)
DNCE 301 (Seminar in Dance Studies Pedagogy and Professional Development)

Two additional graduate-level courses (minimum 8 units) are required from other disciplines (not DNCE) related to the student’s research interest. Courses must be taken for a letter grade and can include an upper-division undergraduate-level course paired with 2 units of 292 (Concurrent Analysis).

Four additional graduate-level courses (minimum 16 units) from Dance must be taken for a letter grade and can include, but are not limited to: DNCE 200-level seminar courses (DNCE 260 (E-Z), 264 & 267) in critical dance studies; DNCE 280; an upper-division undergraduate-level course paired with 2 units of 292 (Concurrent Analysis).

A maximum of one Dance MFA core course (DNCE 240 to 243) may be included as one of the four additional graduate-level dance courses required.

Language Requirement
All students must show competence in at least one language other than English. Further requirements in specific forms of dance or music notation or ancient or contemporary languages may be determined for each student in consultation with relevant faculty and the graduate advisor of the program.

Written Qualifying Examination
Students must prepare qualifying essay and sit for an oral exam. The written essay should consist of a five-page statement on a topic related to the student’s research interest. The essay should demonstrate the student’s ability to articulate a viable dissertation project. A sufficient written essay must be submitted with the approval of the relevant committee and the graduate advisor.

Oral Qualifying Examination
Students must prepare qualifying essay and be examined by a five-person oral qualifying examination committee. The committee, nominated by the department and appointed by the dean of the Graduate Division, consists of all four written examination committee members, plus a fifth member chosen so that the five-person committee would be comprised of no more than two “outside faculty members,” and no fewer than one “outside faculty member.”

Dissertation and Final Oral Examination
A dissertation committee is composed of three members: a chair from Dance, a Dance faculty member, and either a Dance faculty member, or an outside faculty member. The committee directs and approves the research and writing of the dissertation. The dissertation must be written and submitted to the appropriate committee before the student takes the final oral examination. Students must have satisfactory performance on a final oral examination, conducted by the dissertation committee and open to all members of the faculty. The examinee may include other forms of video or film productions with the approval of the relevant committee and the graduate advisor. It must present original scholarly work and be approved by the dissertation committee before the student takes the final oral examination.

Dissertation and Final Oral Examination
A dissertation committee is composed of three members: a chair from Dance, a Dance faculty member, and either a Dance faculty member, or an outside faculty member. The committee directs and approves the research and writing of the dissertation. The dissertation must be written and submitted to the appropriate committee before the student takes the final oral examination. Students must have satisfactory performance on a final oral examination, conducted by the dissertation committee and open to all members of the faculty. The examinee may include other forms of video or film productions with the approval of the relevant committee and the graduate advisor. It must present original scholarly work and be approved by the dissertation committee before the student takes the final oral examination.

Normative Time to Degree 18 quarters

Lower-Division Courses
DNCE 005 Introduction to Dance 4 Seminar, 3 hours; individual study, 1 hour; extra reading 1 hour; several short essays. Prerequisite(s): none. As a survey of approaches to dancing and dance making, this course introduces students to dance technique, performance, and composition as fundamental components in the art of dance. Students will cultivate the ability to enact and remember patterns of rhythm, effort, and visual design in movement and will become acquainted with various procedures for organizing movement. Especially designed for students with no experience in dance.
DNCE 007 Dance: Cultures and Contexts 4
Lecture, 3 hours; discussion, 1 hour. Provides historical and cultural context for selected dance forms and practices. Explores dance as an art form, cultural practice, and meaning-making activity focusing on histories of race, gender, sexuality, class, and nation. Credit is awarded for one of the following DNCE 007 or DNCE 007W.

DNCE 007W Dance: Cultures and Contexts 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENGL 019 with a grade of C or better, ENGL 007, may be taken concurrently; for concurrent enrollment in ENGL 007, review the course titles or topics in the current online Schedule of Classes to find the corresponding ENGL 007 writing workshop. Provides historical and cultural context for selected dance forms and practices. Explores dance as an art form, cultural practice, and meaning-making activity focusing on histories of race, gender, sexuality, class, and nation. Intended for non-majors. Fulfills the third-quarter writing requirement for students who earn a grade of "C" or better for courses that the Academic Senate designates and that the student's college permits, as alternatives to ENGL 001. Credit is awarded for one of the following DNCE 007W or DNCE 007.

DNCE 012 Dance and Popular Culture 4
Lecture, 3 hours; discussion, 1 hour; written work, 2 hours. Prerequisite(s): none. Introduces students to dance in popular culture and explores its various social, political, and cultural functions and impacts. Examines popular dance practices across various sites including screens both big and small, fitness studios, dance competitions, dance clubs, and protests.

DNCE 014 Introduction to Choreography 4
Lecture, 4.5 hours; individual study, 1.5 hours. Prerequisite(s): restricted to class level standing of sophomore, junior, or senior; restricted to major(s) Dance, or consent of instructor. Analysis of basic problems and issues of choreography. Emphasizes improvisational methods as an approach to the investigation of space, time, and energy in motion as the fundamental elements of a dance. Course is repeatable as content or topic changes to a maximum of 8 units.

DNCE 019 Introduction to Dance Studies 4
Lecture, 3 hours; research, 1 hour; term paper, 1 hour; written work, 1 hour. Prerequisite(s): a major or minor in dance, restricted to class level standing of sophomore, junior, or senior, or consent of instructor. Introduces major concepts, approaches, and issues in the study of dance as a cultural, historical, and artistic practice. Uses text, video, studio, demonstration, and performance to expose students to ways of writing, speaking, researching, and thinking clearly and critically about dance.

DNCE 056A Beginning Latin American Social Dances 2
Studio, 3 hours; extra reading, 1 hour; individual study, 1 hour; screening, 1 hour. Prerequisite(s): none. Explores the fundamentals of various Latin American social dances at the beginning level. Outside-of-class assignments may include assigned readings, attending dance events, viewing dance videos, and regular individual practice sessions. Course is repeatable.

DNCE 056B Intermediate Latin American Social Dances 2
Studio, 3 hours; extra reading, 1 hour; individual study, 1 hour; screening, 1 hour. Prerequisite(s): none. Explores the fundamentals of various Latin American social dances at the intermediate level. Outside-of-class assignments may include assigned readings attending dance events, viewing dance videos, and regular individual practice sessions. Course is repeatable.

DNCE 056A Beginning West African Dance 2
Studio, 3 hours; screening, 1 hour; extra reading, 1 hour; individual study, 1 hour. Prerequisite(s): none. West African dance technique at beginning level. Vigorous class with focus on rhythm, songs, and culture as well as dance choreographies traditionally performed for rites of passage, courtship, coming of age, and storytelling. Emphasizes community building and individual potential. Course is repeatable.

DNCE 056B Intermediate West African Dance 2
Studio, 3 hours; screening, 1 hour; extra reading, 1 hour; individual study, 1 hour. Prerequisite(s): none. West African dance technique at intermediate level. Outside-of-class assignments include attending dance concerts, viewing dance videos, and regular individual practice sessions. Course is repeatable.

DNCE 066A Beginning Intermediate Modern Dance Technique 2
Studio, 3 hours; individual study, 1 hour; extra reading, 1 hour. Prerequisite(s): none. Modern dance technique at the beginning level. Outside-of-class assignments include attending dance concerts, viewing dance videos, and regular individual practice sessions. Recommended for nondancers and dancers. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable.

DNCE 066B Intermediate Modern Dance Technique 2
Studio, 3 hours; individual study, 1 hour; extra reading, 1 hour. Prerequisite(s): DNCE 066A recommended. Modern dance technique at the intermediate level. Outside-of-class assignments include attending dance concerts, viewing dance videos, and regular individual practice sessions. Course is repeatable.

DNCE 067C Advanced Modern Dance Technique 2
Studio, 3 hours; individual study, 1 hour; extra reading, 1 hour. Prerequisite(s): DNCE 066C recommended. Modern dance technique at the advanced level. Outside-of-class assignments include attending dance concerts, viewing dance videos, and regular individual practice sessions. Course is repeatable.

DNCE 068 Somatic Techniques and Experiential Anatomy 2
Studio, 3 hours; extra reading, 1 hour; individual studio, 2 hours. Prerequisite(s): none. Introduces physical practices and concepts from a variety of somatic techniques. Explores how the body functions through actions and interactions of its structures. Utilizes a possibilities-in-the-field approach to study and embody some of the varied interpretations that can arise from the same set of anatomical facts. Course is repeatable to a maximum of 16 units.

DNCE 069A Beginning Eighteenth-Century Dance 2
Studio, 3 hours; extra reading, 1 hour; individual study, 1 hour; screening, 1 hour. Prerequisite(s): none. Eighteenth-century dance technique at the beginning level. Focuses on movement practices, corporeality, spatial navigation, and relationships with music. Explores dances in historical, cultural, and political frameworks. Outside-of-class assignments include attending dance concerts, viewing dance videos, and regular individual practice sessions. Recommended for non-dancers and dancers. Course is repeatable.

DNCE 069B Intermediate Eighteenth-Century Dance 2
Studio, 3 hours; extra reading, 1 hour; individual study, 1 hour; screening, 1 hour. Prerequisite(s): none. Eighteenth-century dance technique at intermediate level. Focuses on movement practices, corporeality, spatial navigation, and relationships with music. Explores dances in historical, cultural, and political frameworks. Outside-of-class assignments include attending dance concerts, viewing dance videos, and regular individual practice sessions. Recommended for non-dancers and dancers. Course is repeatable.

DNCE 070A Beginning Hip Hop Dance 2
Studio, 3 hours; extra reading, 1 hour; individual study, 1 hour; screening, 1 hour. Prerequisite(s): none. Hip Hop dance technique at beginning level. High-energy class with focus on dance steps, isolation techniques, rhythm, confidence, and bringing style and personality to movements. Stress Hip Hop dance as fun, diverse, self-expressive, innovative, and transformative. Grounded in histories of Hip Hop as a cultural movement. Course is repeatable.

DNCE 070B Intermediate Hip Hop Dance 2
Studio, 3 hours; extra reading, 1 hour; individual study, 1 hour; screening, 1 hour. Prerequisite(s): none. Hip Hop dance technique at intermediate level. Outside-of-class assignments include attending dance concerts, viewing dance videos, and regular individual practice sessions. Recommended for non-dancers and dancers. Course is repeatable.

DNCE 070C Advance Hip Hop Dance 2
Studio, 3 hours; extra reading, 1 hour; individual study, 1 hour; screening, 1 hour. Prerequisite(s): none. Hip Hop dance technique at advanced level. Outside-of-class assignments include attending dance concerts, viewing dance videos, and regular individual practice sessions. Course is repeatable.

DNCE 071A Beginning Ballet Technique 2
Studio, 3 hours; individual study, 1 hour; extra reading, 1 hour; screening, 1 hour. Prerequisite(s): none. Ballet technique at the beginning level. Assignments include attending dance concerts and other dance showings. Recommended for nondancers and dancers. Course is repeatable.

DNCE 071B Intermediate Ballet Technique 2
Studio, 3 hours; individual study, 1 hour; extra reading, 1 hour; screening, 1 hour. Prerequisite(s): DNCE 071A recommended. Ballet technique at the intermediate level. Assignments include attending dance concerts and other dance showings. Course is repeatable.
DNCE 073A Beginning Jazz Dance 2
Studio, 3 hours; extra reading, 1 hour; individual study, 1 hour; screening, 1 hour. Prerequisite(s): none. Jazz dance technique at beginning level. Focuses on rhythms, isolations, syncopation, and performance quality. Students learn a variety of jazz styles from lyrical to funk and classical to musical theater. Outside-of-class assignments include readings, video viewings, and written assignments in historical, cultural, and aesthetic issues pertaining to jazz dancing. Course is repeatable.

DNCE 073B Intermediate Jazz Dance 2
Studio, 3 hours; extra reading, 1 hour; individual study, 1 hour; screening, 1 hour. Prerequisite(s): none. Jazz dance technique at intermediate level. Focuses on rhythms, isolations, syncopation, and performance quality. Students learn a variety of jazz styles from lyrical to funk and classical to musical theater. Outside-of-class assignments include readings, video viewings, and written assignments in historical, cultural, and aesthetic issues pertaining to jazz dancing. Course is repeatable.

DNCE 074A Beginning Yoga For Dancers 2
Studio, 3 hours; extra reading, 1 hour; individual study, 1 hour; screening, 1 hour. Prerequisite(s): none. Yoga for dancers at beginning level. Focuses on alignment; understanding how to practice safely; increasing strength, flexibility, and balance; developing focus and bodily awareness; and exploring yoga’s relation to dance. Coursework includes reading and discussion of yoga texts, concepts, and philosophy. Recommended for non-dancers and dancers. Course is repeatable.

DNCE 074B Intermediate Yoga For Dancers 2
Studio, 3 hours; extra reading, 1 hour; individual study, 1 hour; screening, 1 hour. Prerequisite(s): none. Yoga for dancers at intermediate level. Focuses on alignment; understanding how to practice safely; increasing strength, flexibility, and balance; developing focus and bodily awareness; and exploring yoga’s relation to dance. Coursework includes reading and discussion of yoga texts, concepts, and philosophy. Recommended for non-dancers and dancers. Course is repeatable.

DNCE 075A Beginning Dance Techniques and Practices 2
Studio, 3 hours; individual study, 1 hour; extra reading, 1 hour; screening, 1 hour. Prerequisite(s): none. Dance Techniques and Practices at beginning level. Focus varies each quarter. Outside-of-class assignments may include attending dance concerts, writing assignments in historical, cultural and aesthetic issues relating to the quarter’s dance form, and regular individual practice sessions. Course is repeatable.

DNCE 075B Intermediate Dance Techniques and Practices 2
Studio, 3 hours; individual study, 1 hour; extra reading, 1 hour; screening, 1 hour. Prerequisite(s): DNCE 075A recommended. Dance Techniques and Practices at intermediate level. Focus varies each quarter. Outside-of-class assignments may include attending dance concerts, writing assignments in historical, cultural and aesthetic issues relating to the quarter’s dance form, and regular individual practice sessions. Course is repeatable.

DNCE 081 Dance Cultures, Culture in Dance 4
Lecture, 2 hours; studio, 6 hours. Prerequisite(s): none. Explores non-presentation dance forms that are intricately woven into the culture of a particular society. Focuses on performance integrity and cultural memory. Incorporates videos, books, field trips, and guest lectures in addition to studio time.

**Upper-Division Courses**

DNCE 114A Dance Composition I 4
Lecture, 3 hours; studio, 3 hours. Prerequisite(s): DNCE 007 or DNCE 007W or DNCE 014 and two quarters of dance technique, or equivalent. Analyzes dance as an art form. Emphasizes space, time, and energy in motion as elements in choreographic style. Course content presented at the beginning level.

DNCE 114B Dance Composition II 4
Lecture, 3 hours; studio, 3 hours. Prerequisite(s): DNCE 114A. The continuing analysis of dance as an art form with emphasis on space, time and energy in motion as elements in choreographic style. In DNCE 114B, this is done on the intermediate level.

DNCE 114C Dance Composition III 4
Lecture, 3 hours; studio, 3 hours. Prerequisite(s): DNCE 114B. The continuing analysis of dance as an art form with emphasis on space, time and energy in motion as elements in choreographic style. In DNCE 114C, this is done on the advanced level.

DNCE 115 (E-2) Dance Making 4
Lecture, 3 hours; research, 2 hours; studio, 3 hours. Prerequisite(s): DNCE 014. Advanced analysis of dance-making as an art form with emphasis on storytelling, ritual, political activation, site, media and technology, contact, and materials.

DNCE 115A Dance Making: Dance as Storytelling 4
Lecture, 3 hours; studio, 3 hours; research, 2 hours. Prerequisite(s): DNCE 014, or consent of instructor. Focuses on strategies for telling stories through movement and speaking, specifically gestural movement, sign language, singing, breath control, and expression. Addresses how meaning is made and relates to gender, sexuality, race, class and power.

DNCE 115F Dance Making: Dance as Scores 4
Lecture, 3 hours; studio, 3 hours; research, 2 hours. Prerequisite(s): DNCE 014, or consent of instructor. Advanced analysis of dance-making as an art form with emphasis on storytelling, ritual, political activation, site, media and technology, contact, and materials.

DNCE 115G Dance Making: Dance as Political Activation 4
Lecture, 3 hours; studio, 3 hours; research, 2 hours. Prerequisite(s): DNCE 014 or consent of instructor. Advanced analysis of dance-making as an art form with emphasis on storytelling, ritual, political activation, site, media and technology, contact, and materials.

DNCE 123 Southeast Asian Performance 4
Lecture, 3 hours; screening, 2 hours; extra reading, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Introduction to the roles and genres of expressive culture in Southeast Asia, including dance, music, theater, film, and digital culture. Performance is discussed as both a time-honored and a contemporary medium for cultural production, from the courts to everyday experience. Cross-listed with MUS 123, AST 123, ANTH 126 and SEAS 123.

DNCE 127 Music Cultures of Southeast Asia 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of music, dance, theatre, and ritual in the Philippines, Indonesia, Malaysia, Thailand, Myanmar (Burma), Laos, Cambodia, and Vietnam. Designed for the student interested in the performing arts and cultures of mainland and insular Southeast Asia. No Western music background is required. Cross-listed with ANTH 176, AST 127, ETST 172, MUS 127, and SEAS 127.

DNCE 128 Performing Arts of Asia 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of music, dance, theatre, and ritual in four major geographical regions of Asia: Central, East, South and Southeast Asia. No Western music training is required. Course is repeatable to a maximum of 8 units. Cross-listed with ANTH 128, AST 128, and TDFP 176.

DNCE 131 Dance, Gender, Sexuality 4
Lecture, 3 hours; research, 1 hour; term paper, 1 hour; written work, 1 hour. Prerequisite(s): DNCE 019 (may be taken concurrently) or consent of instructor. Explores some of the ways that studying dance (an art form whose medium is the body) illuminates feminist, gender, and sexuality studies --- and vice versa. No previous dance experience required. Cross-listed with GSST 127.

DNCE 132 Dance, Citizenship, Location 4
Lecture, 3 hours; research, 1 hour; term paper, 1 hour; written work, 1 hour. Prerequisite(s): DNCE 019 (may be taken concurrently) or consent of instructor. Explores interconnections between dancing bodies, their geographical, political, cultural locations, and the ways in which they negotiate inclusion or exclusion within state apparatuses of power such as citizenship.
DNCE 133 Dance, Space, Time 4 Lecture, 3 hours; research, 1 hour; term paper, 1 hour; written work, 1 hour. Prerequisite(s): DNCE 019 (may be taken concurrently) or consent of instructor. Explores the flow among non-presentsational and presentational dance forms, state productions and treaties, and design factors that are meant to enable our daily lives such as buildings, parks, and roadways. Students take advantage of video, books, field trips, guest lectures and studio lab time.

DNCE 134 Dance, Genre, Institutions 4 Lecture, 3 hours; research, 1 hour; term paper, 1 hour; written work, 1 hour. Prerequisite(s): DNCE 019 (may be taken concurrently) or consent of instructor. Explores how dance and movement genres interact with and articulate, but also query and contest, structures, institutions, and traditions such as theatrical performance and touring shows, rites of passage, political contests, educational enterprises, and territorial campaigns through which societies frame experience.

DNCE 135 Dance, Race, Property 4 Lecture, 3 hours; research, 1 hour; term paper, 1 hour; written work, 1 hour. Prerequisite(s): DNCE 019 (may be taken concurrently) or consent of instructor. Explores intersections between dancing bodies, questions of race, and notions of cultural property. Investigates issues of embodied identity and racialization, cultural appropriation and cultural exchange, purity and hybridity, and ownership and copyright.

DNCE 136 Hip Hop Dance, Collectivity, & Change 4 Lecture, 3 hours; research, 1 hour; term paper, 1 hour; written work, 1 hour. Prerequisite(s): DNCE 019 (may be taken concurrently) or consent of instructor. Explores street dance as a lens to consider issues of cultural transmission, ritual practices, gender and sexuality, Western and non-Western aesthetic influences, market forces, and local interests. Familiarizes students with hip hop dance scholarship; reconsiders Hip Hop historical narratives through collective enactments; and develops students’ critical analysis skills.

DNCE 140 Production Lab 4 Laboratory, 3 hours; workshop, 2 hours; research, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing in Dance; or consent of instructor. An introduction to key dance production and design strategies and practices through hands-on lab and workshop. Coursework culminates in creative design projects and a production portfolio.

DNCE 155E Seminar in Dance and Music 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Introduces relationships and representations between music and dance. Explores musical and choreographic form, compositional strategies, hybridization of style, cultural meanings and registers in which these were made, the agencies such representations enabled, interpretive communities, and cross-cultural interactions. Cross-listed with MUS 155 (E-Z).

DNCE 155F The Ballets Russes 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the Diaghilev Ballets Russes’ repertoire and collaborative practices challenged the nature of artistic labor; negotiated traditional patronage and new commercial modes; engaged with cultural nationalism, gender role contention, and emerging models of sexuality; and deployed representational strategies that played into period debates about power and social organization. Cross-listed with MUS 155E.

DNCE 155G The Americas from the Eighteenth Through Twentieth Centuries. Cross-listed with MUS 155E.

DNCE 155H The Ballets Russes 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores how the Diaghilev Ballets Russes’ repertoire and collaborative practices challenged the nature of artistic labor; negotiated traditional patronage and new commercial modes; engaged with cultural nationalism, gender role contention, and emerging models of sexuality; and deployed representational strategies that played into period debates about power and social organization. Cross-listed with MUS 155E.

DNCE 161 Choreographing the Screen 4 Lecture, 3 hours; screening, 2 hours; term paper, 1 hour. Prerequisite(s): DNCE 019 (may be taken concurrently) or consent of instructor. Focuses on choreographing for the camera and the screen. Topics include video art, classic film choreography, music video, and digital dance technologies. Students prepare a choreographic piece for the camera as a final project. Cross-listed with MCS 161.

DNCE 162 Tool, Technology, Technique 4 Lecture, 3 hours; screening, 3 hours; laboratory, 3 hours. Prerequisite(s): DNCE 019 or MCS 019 or consent of instructor. Practicum in video and digital production with an emphasis on capturing and editing the moving body. Students are encouraged to bring their own video or digital recording device. Editing equipment will be available. Cross-listed with MCS 162.

DNCE 167 Dance Production 2 Studio, 6 hours. Prerequisite(s): by audition Study, production, and performance of dances. Course may be repeated for credit.

DNCE 168 Dance Touring Ensemble 4 Studio, 6 hours; research, 3 hours. Prerequisite(s): consent of instructor. Dance Touring Ensemble members work with the instructor to create a lecture-demonstration and create and learn repertory which is performed at various sites within the community. Course is repeatable to a maximum of 16 units.

DNCE 171 (E-Z) Filmic Bodies 4 Prerequisite(s): restricted to class level standing of junior, or senior. For hours and prerequisites, see segment descriptions. Assesses a multiplicity of filmic genres through the portals of the dancing and mobilized body as related to race, gender, class, and other identifiers. Explores the politics of movement on film, the mechanics of making film work, and the political economy of dance on film. Dance experience is usually not required. Course is repeatable to a maximum of units. Cross-listed with MCS 151 (E-Z).

DNCE 171F Ethnographic Representation of Dance On Film: “. . . and Then They Danced” 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Analyzes the juncture between representation and presentation in everyday dance genres on film. Explores race, class, tropes of authenticity, and ownership of cultural production through screenings, lectures, and theoretical writings. No previous dance experience required. Course is repeatable. Cross-listed with MCS 151F.

DNCE 171G Gender, Mechanization, and Shape 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Utilizes film, video, and texts to examine the relationship among gender, mechanization, and shape during the twentieth century. Focuses on the performing arts, industrial and technological design, and the relationship of visual culture to changing notions of gender. Course is repeatable. Cross-listed with MCS 151G.

DNCE 171H Spectatorship 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the nature of film studies through the eyes of the audience. Uses film, videos, and texts (in addition to outside viewing of films in cinematic locales) to formulate how viewing film constructs the viewer’s subjectivity and a film’s cultural context. Course is repeatable. Cross-listed with MCS 151H.

DNCE 171I Attractions, Interruptions, Disruptions: Narrative Film: Fight Scenes, Dance Sequences, Special Effects 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Analyzes the way film regulates the movement of bodies on and off screen through narrative and what happens when the movement exceeds that regulations. Utilizes selected films to explore the fight scenes, dance sequences, and computer generated imagery in film. Includes screenings both in class and outside of class. Course is repeatable. Cross-listed with MCS 151K.

DNCE 171M Bollywood 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of the vast corpus of films that constitute the genre called Bollywood. Focuses on the genre’s music and dance styles. Includes weekly film screenings. No previous dance experience required. Course is repeatable. Cross-listed with MCS 151M.

DNCE 172 (E-Z) Televisual Bodies 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Analyzes choreographic practices within television broadcast and marketing and their relation to popular culture. Also examines situational or tactical use and misuse of satellite, cablecast, and broadcast television by unintentional audiences that subsequently reconstitute themselves as communities via the programming. Focuses on video as an archival and/or choreographic tool. J. Corporations And Corporalities: Commercials, Culture, And Choreography; K. Television As Location: The Satellite Feed; M. Music Television (MTV) And Popular Culture. Course is repeatable to a maximum of units. Cross-listed with MCS 152 (E-Z).
DNCE 173 (E-Z) Digitized Bodies 4 Lecture, 3 hours; laboratory, 3 hours; screening, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior. Provides a theoretical approach to digital subjectivities, bodies in motion, products, and realities. Addresses issues of liveness, new media, mediated cultural identities, speed, transfer, telepresence, and coded and encoded sexuality within programming. Focuses primarily on the body-computer interface. J. Digital Games, Violence, And The Body; K. Virtual Subjectivity: Persona, Identity, And Body. Course is repeatable to a maximum of units. Cross-listed with MCS 153 (E-Z).

DNCE 180 (E-Z) Dance Practicum 4 Studio, 8 hours. An investigation of dance production theories and practices. Provides directed experience in a limited topic, with the name of a guest instructor announced in advance if not being taught by UCR staff. E. Cine Dance; F. Folk Forms; G. Advanced Choreography; H. Intermedia Movement; I. Video Dance; J. Repertory; K. Reconstruction Of Dances; L. Theory Of Individual Choreographers; M. Dance For Children; N. Dance In Therapy; O. Improvisation; P. Role Preparation; Q. Dance Notation; R. Pedagogy. Course is repeatable to a maximum of 12 units.

DNCE 181 Dance Cultures, Culture in Dance 4 Lecture, 2 hours; studio, 2 hours; research, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Focuses on ways dance and other movement practices are intricately woven into culture. Incorporates studio practice time as well as videos, books, field trips, and guest lectures; includes completion and presentation of a paper or project.

DNCE 187 Improvisation Studies 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Presents the emergent field of improvisation studies, moving beyond traditional genre boundaries to explore improvisation as a cultural phenomenon and social practice. Draws from jazz studies, ethnomusicology, music theory, musicology, American studies, and the histories of dance, theatre, and the visual arts.

DNCE 188 Individual Projects in Creative Activity 2 Studio, 2 hours; research, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing in Dance; or consent of instructor; Description: Facilitates the discovery and design of a capstone artistic project.

DNCE 189 (E-Z) Capstone Research Seminar 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): DNCE 188; restricted to class level standing of junior, or senior; restricted to major(s) Dance. Capstone course that provides undergraduate students in dance with the experience of synthesizing knowledge and skills gained throughout the dance curriculum. Includes completion and presentation of a paper or project under the guidance of dance faculty.

DNCE 189E Dance Making Project 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): DNCE 188, upper-division standing in Dance; or consent of instructor. Synthesizes the knowledge and skills gained throughout the dance curriculum. Provides dance making experience with the opportunity to complete and present an individualized creative research project under the guidance of dance faculty.

DNCE 189F Dance Studies Capstone 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Capstone course that provides a dance studies emphasis. Includes the experience of synthesizing knowledge and skills gained throughout the dance curriculum. Includes completion and presentation of a paper or project under the guidance of dance faculty.

DNCE 190 Special Studies 1 to 5 To be taken with the consent of the Chair of the Department of Dance to meet special curricular problems. Course is repeatable to a maximum of 12 units.

DNCE 198I Individual Internship in Dance 1 to 12 Prerequisite(s): 1) upper-division standing; 2) evidence of prior arrangement with the professional(s) involved; and 3) approval of the UCR dance faculty sponsor. Work with an appropriate professional individual or organization to gain experience and skill in the student’s chosen dance-related specialty. May be repeated to a total of 16 units.

Graduate Courses

DNCE 239 Introduction to Graduate Study of Dance 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A graduate-level introduction to the field of critical dance studies. Focuses on the foundational works and issues that have shaped the field. Topics include genealogies of dance studies, approaches to embodiment, the influences of cultural studies and critical theory, and the research of Dance Department faculty.

DNCE 240 Improvising Choreography: Scores, Structures, and Strategies 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An evaluation of the use of the score or structure as a predetermining guide to the production of choreography. Students create choreography in ensemble, co-choreographing dances in the moment of performance and assessing immediately the efficacy of a given approach. Course is repeatable to a maximum of 8 units.

DNCE 241 Creating the Experiment: Identifying the New 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An inquiry into what constitutes an experiment in contemporary dance, critically examining how artists bring new dance into existence. Questions the working process in originating movement, sequencing, and images for dance and assesses this process with respect to larger historical and cultural frameworks. Course is repeatable to a maximum of 8 units.

DNCE 242 Dancing Representation: Figures, Forms, and Frames 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An examination of the systems of representation used to create choreographic meaning. Considers the bodily codes and the cultural associations attached to distinct qualities of movement and the conventions of space, time, and narrative through which a dance achieves its meaning. Course is repeatable to a maximum of 8 units.

DNCE 243 Collaborating in Dance Making: Materials, Methods, and Interactions 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An examination of the function of the choreographer as principal director of the dance project. Analysis of various approaches to the making of dance works that involve distinctive forms of collaboration with artists working in allied media. Course is repeatable to a maximum of 8 units.

DNCE 244 Special Topics in Dance Making 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Study of emerging issues in embodied practice, dance creation, and/or dance production. Focus varies by quarter. Topics may include intersections between theoretical and practical approaches to dance; dance and digital technologies; cultural specificity and dance making; curatorial practices; concepts or models of dance production; and embodying dances past. Course is repeatable as content changes.

DNCE 245 Political Approaches to Dance Studies 4 Seminar, 3 hours; consultation, 1 hour. Prerequisite(s): reading knowledge of a language other than English; working knowledge of notation; graduate standing or consent of instructor. The study of power relations reflected in and enacted by dance practice and performance. Topics include nation formation, imperialism, race, commodification, globalization, economic and class relations, gender, and political affiliation and resistance.

DNCE 255 Historical Approaches to Dance Studies 4 Seminar, 3 hours; studio, 2 to 3 hours. Prerequisite(s): reading knowledge of a language other than English; working knowledge of notation; graduate standing or consent of instructor. The study of dances past and how dance practices have changed over time. May include study of changing modes for production and reception of dance, shifting constructions of bodies and movement, theories of dance reconstruction, and conceptualizations of historical evidence.

DNCE 257 Rhetorical Approaches to Dance Studies 4 Seminar, 3 hours; consultation, 1 hour. Prerequisite(s): reading knowledge of a language other than English; graduate standing or consent of instructor. The study of dance structure and of the structure of dance study. May include the analysis of narrative or representational structures in dance; narrative structures in dance writing; dance semiotics; dance philosophy; and the accuracy, reliability, and value of critical studies of dance.
DNCE 258 Cultural Approaches to Dance Studies 4 Seminar, 3 hours; consultation, 1 hour. Prerequisite(s): reading knowledge of a language other than English; graduate standing or consent of instructor. The study of dance in and across cultures including cross-cultural studies of dance; multicultural approaches to dance history; ethnological, ethnographic, and cultural studies approaches to dance analysis; and analysis of the different roles and functions dance plays in cultural systems.

DNCE 260 Special Topics in Critical Dance Studies 4 Seminar, 3 hours; written work, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Examines issues in the field of critical dance studies. Course is repeatable.

DNCE 264 Oral History and Ethnographic Methods 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Theory and practice of oral history and ethnography as research techniques. Cultural and political perspectives on oral history and ethnography; methods for research preparation, interview procedures, transcription, editing, and legal responsibilities. Ethnographic and/or interview project and analytical paper required.

DNCE 267 Choreographies of Writing 4 Seminar, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. An analysis of the types of relationships that may exist between dance and text. Examines the methods and strategies for translating choreographed action into a written description of that action. Students’ writing is a major focus of discussions.

DNCE 280 Colloquium in Current Topics in Dance Research 4 Colloquium, 2 hours; extra reading, 2 hours; written work, 1 hour; practicum, 1 hour; research, 1 hour; screening, 1 hour. Prerequisite(s): graduate standing; or consent of instructor. Presents current research topics in dance, including selected professional development workshops. Conducted by students, faculty, visiting scholars, and artists. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 8 units.

DNCE 290 Directed Studies 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; or consent of instructor. Prepares for the teaching of dance studies in an academic setting and for participating in the dance studies profession. Includes creating course syllabi, discussing a range of practical teaching and professionalization issues, and developing skills necessary to succeed in the academic field of dance. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

DNCE 291 Individual Study in Coordinated Areas 1 to 12 Research, 3 to 36 hours. Prerequisite(s): graduate standing; consent of instructor and graduate advisor. A program of study designed to advise and assist graduate students who are preparing for written and oral qualifying examinations. Does not count toward the unit requirement for the Ph.D. degree. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

DNCE 292 Concurrent Analytical Studies in Dance 1 to 4 Research, 3 to 12 hours. Prerequisite(s): graduate standing; consent of instructor and graduate advisor. To be taken concurrently with some 100-series course, but on an individual basis. Limited to research, criticism, and written work of a graduate order commensurate with the number of units elected. Normally graded Satisfactory (S) or No Credit (NC) only, but students may petition the instructor for a letter grade for specialized topics pursued with close faculty supervision. Course is repeatable.

DNCE 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): consent of instructor and graduate advisor. Individualized studies in specially selected topics in Dance under the direction of a faculty member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

DNCE 298 Individual Internship 1 to 4 Internship, 3 to 12 hours; term paper, 3 hours; written work, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Individual study or apprenticeship with an appropriate professional individual or organization to gain experience and skill in activities related to dance studies. Graded Satisfactory (S) or No Credit (NC). Course is repeatable for a maximum of 12 units.

DNCE 299 Research For the Thesis Or Dissertation 1 to 12 Research, 3 to 36 hours. Prerequisite(s): consent of thesis or dissertation director. Research for and preparation of the thesis or dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

DNCE 301 Seminar in Dance Studies Pedagogy and Professional Development 4 Seminar, 3 hours; consultation, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Prepares for the teaching of dance studies in an academic setting and for participating in the dance studies profession. Includes creating course syllabi, discussing a range of practical teaching and professionalization issues, and developing skills necessary to succeed in the academic field of dance. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

DNCE 302 Teaching Practicum 1 to 4 Lecture, 1 to 4 hours. Prerequisite(s): graduate standing. Supervised teaching in upper-division Dance History and lower-division Dance courses. Must be taken at least once by all teaching assistants. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Data Science

Subject abbreviation: DTSE

Major

Data science studies the collection, management, and analysis of data to extract knowledge. It is a multidisciplinary program with core components from Computer Science and Statistics, and required application study in a variety of empirical disciplines. Courses span the discipline from theory to practice and prepare students for careers or graduate studies in data-intensive fields.

The B.S. in Data Science major is an intercollege major offered by the Marlan and Rosemary Bourns College of Engineering and the College of Natural and Agricultural Sciences. A B.S. degree in Data Science is offered by each college. When students declare the major, they choose from which college they wish to have their degree awarded. Students whose degrees are awarded by the Marlan and Rosemary Bourns College of Engineering are advised in and have their records maintained by the BCSE Office of Student Academic Affairs; students whose degrees are advised by the College of Natural and Agricultural Sciences are advised in and have their records maintained by the CNAS Undergraduate Academic Advising Center. Breadth requirements vary by college; and students must fulfill the breadth requirements of the college they choose.

All undergraduates in the Marlan and Rosemary Bourns College of Engineering must see an advisor at least annually. Visit student.eng.ucr.edu for details.

University Requirements

See Undergraduate Students section.

College Requirements

College breadth requirements vary depending on which college is chosen to award the degree. For details on breadth requirements, see the Colleges and Programs section of this catalog. Students are encouraged to consult their advisor regarding requirements.
Transfer Admissions Requirements of Data Science Major

Minimum 2.80 cumulative GPA
Minimum 2.70 GPA in the calculus series
Minimum 2.5 in one of the following series:
1. Three courses from CS 010A, 010B, 010C and CS/MATH 011
2. MATH 010A, MATH 031, STAT 008

Minimum Preparation for Data Science:
1. CS 010A
2. CS 010B
3. MATH 009A or MATH 09HA, MATH 009B or MATH 09HB, MATH 009C or MATH 09HC

Must complete three of the following:
1. CS010C
2. CS/MATH 011
3. MATH 031
4. MATH 010A
5. STAT 008

Change of Major Criteria for the BCOE track
All students who request a change of major to Data Science in BCOE must meet the following requirements:
• Be in good academic standing
• Have no less than a C- in any Statistics, Math, Science and Engineering coursework
• Be able to complete the major within maximum allowable units
• Complete all the courses listed below, based on the total number of units earned, prior to submitting the major change request
• UCR transfer students interested in changing to a BCOE major must have been admissible to the major at point of entry, or must satisfy transfer admission and change of major requirements before earning 120 units
• If changing in the 90-119 units category, student must have the ability to complete major within 5 years of entry as a Freshmen or 3 years after entry as a Transfer student
• Students who have earned 120 or more units are not eligible for a change of major in BCOE. NOTE: AP/IB units are excluded from maximum unit calculation.

Completed 0 to less than 45 units
Completion of ENGL 001A with C or better, and completion of the following with at least 2.70 GPA:
• CS 010A
• CS 010B
• MATH 007A or MATH 009A or MATH 09HA (MATH 009A is strongly recommended)

Completed 45 to less than 90 units
Completion of ENGL 001A with C or better, and completion of the following with at least 2.70 GPA:
• CS 010A
• CS 010B
• MATH 007A or MATH 009A or MATH 09HA (MATH 009A is strongly recommended)
• MATH 007B or MATH 009B or MATH 09HB (MATH 009B is strongly recommended)
• MATH 009C or MATH 09HC

An introductory statistics course (STAT 010 or equivalent) is recommended.

Completed 90 to less than 120 units
Completion of ENGL 001A and ENGL 001B with C or better, and completion of the following with at least 2.70 GPA:
• CS 010A
• CS 010B
• CS 010C
• MATH 011/CS 011
• MATH 007A or MATH 009A or MATH 09HA (MATH 009A is strongly recommended)
• MATH 007B or MATH 009B or MATH09HB (MATH 009B is strongly recommended)
• MATH 009C or MATH 09HC
• One of MATH 031 or MATH 010A

An introductory statistics course (STAT 010 or equivalent) is recommended.

Completed 0 to less than 45 units
Completion of ENGL 001A with C or better, and completion of the following with at least 2.70 GPA:
• CS 010A
• CS 010B
• MATH 007A or MATH 009A or MATH 09HA (MATH 009A is strongly recommended)

Completed 45 to less than 90 units
Completion of ENGL 001A with C or better, and completion of the following with at least 2.70 GPA:
• CS 010A
• CS 010B
• MATH 007A or MATH 009A or MATH 09HA (MATH 009A is strongly recommended)
• MATH 007B or MATH 009B or MATH 09HB (MATH 009B is strongly recommended)
• MATH 009C or MATH 09HC

An introductory statistics course (STAT 010 or equivalent) is recommended.

Completed 90 to less than 135 units
Completion of ENGL 001A and ENGL 001B with C or better, and completion of the following with at least 2.70 GPA:
• CS 010A
• CS 010B
• MATH 011/CS 011
• MATH 007A or MATH 009A or MATH 09HA (MATH 009A is strongly recommended)
• MATH 007B or MATH 009B or MATH 09HB (MATH 009B is strongly recommended)
• MATH 009C or MATH 09HC
• One of MATH 031 or MATH 010A

An introductory statistics course (STAT 010 or equivalent) is recommended.

Major Requirements
1. Lower-division requirements (47 units):
   a) CS 010A, CS 010B, CS 010C
   b) MATH 007A or MATH 009A or MATH 09HA, MATH 007B or MATH 009B or MATH 09HB, MATH 009C or MATH 09HC, MATH 010A, MATH 031 (MATH 009A and MATH 009B are strongly recommended)
   c) MATH 011/CS 011
   d) STAT 010, STAT 011

2. Upper-division requirements (60 units):
   a) CS 105, CS 141
   b) STAT 107, STAT 156A, STAT 156B, STAT 169, STAT 170
   c) CS 108/STAT 108
   d) CS 166 or CS 167
   e) STAT 167 or CS 171/EE 142
   f) STAT 183 or CS 179 (E-Z)
   g) Four courses (at least 16 units) from the following list, none of which can also be used to satisfy other major requirements: CS 166, CS 167, CS 170, CS 172, CS 180, CS 181, MATH 120, MATH 135A, BUS 104/STAT 104, BUS 127/STAT 127, STAT 130, STAT 140, STAT 146, STAT 157, STAT 171.

Edward W. Schwieterman, Ph.D.

Adjunct Professor
Larissa F. Dobrzhinetskaya, Ph.D.

Adjunct Assistant Professors
Elizabeth Cochran, Ph.D.
Katherine J. Kendrick, Ph.D.
Thomas A. Scott, Ph.D.

Majors
The Department of Earth and Planetary Sciences offers B.S. degrees in Earth and Planetary Sciences, Geology and Geophysics. These degree programs are designed for students with a strong interest in acquiring academic understanding and relevant vocational training in the Earth and Planetary Sciences, and for students interested in secondary teaching with a science emphasis. The B.S. programs include fieldwork with field courses, and field trips in all appropriate courses.

Academic Advising
Undergraduate advising in the Department of Earth and Planetary Sciences is designed to allow close professional contact with faculty and staff. Counseling on graduation, departmental requirements and enrollment is handled by the major’s professional academic advisors housed in the CNAS Undergraduate Academic Advising Center and the faculty undergraduate advisor for each major.

Faculty undergraduate advisors counsel students on career goals and research opportunities. The department recommends that students meet with their faculty advisor at least once each quarter to clarify career objectives and revise the program of study so it is commensurate with the developing interests and objectives of the student.

Teaching Credential
Teachers in the public schools in California must have a credential approved by the State Commission on Teacher Credentialing. The credential requires an undergraduate major, baccalaureate degree, and completion of a graduate credential program such as that offered by the School of Education at UCR.

Before admission and student teaching in a graduate credential program, the candidate must pass the California Basic Education Skills Test (CBEST) and demonstrate subject-matter proficiency by passing an examination. All candidates for a multiple subject credential to teach in the elementary grades must pass the Multiple Subjects, California Subject Exam for Teachers (CSET). Students are urged to start early, preferably as freshmen, selecting courses most helpful for this career. Details and counseling on the Prepare to Teach Program, a program for the multiple subject credential, are available in the Office of Interdisciplinary Programs, 2417 Humanities and Social Sciences, (951) 827-2743. Details and counseling on other programs are available in the Department of Earth and Planetary Sciences or the School of Education.

UCR does not yet have a state-approved subject matter undergraduate program for earth and planetary sciences majors who wish to teach at the secondary level. The Teaching Credential in Science, geoscience authorization, is required for teachers who want to teach earth science/geoscience in middle school and high school. Students who plan to get this credential must take the CSET exams in Geosciences and should make certain their academic program includes preparatory course work. The examination includes geoscience in depth and general science with introductory, college-level biology, chemistry, physics, and geoscience (geology, meteorology, oceanography, astronomy). CSET test guides are available at cset.nesinc.com.

Further information about courses, requirements, and examinations can be obtained in orientation meetings, the CalTeach-SM Office (1104 Pierce Hall) and the School of Education (1124 Sprout Hall).
Earth and Planetary Sciences students interested in a secondary school science teaching career, who intend to obtain a Teaching Credential in Science, geoscience authorization, should pursue both the B.S. in Earth and Planetary Sciences or in Geology as well as the teaching credential from the School of Education. Students who want to have the option to become either a professional geoscientist or to teach earth science in secondary school should pursue the B.S. in Geology as well as the teaching credential from the School of Education.

Students in CNAS who intend to pursue a Teaching Credential in Science, with authorization in another science, should consider pursuing a minor within Earth and Planetary Sciences.

**Earth and Planetary Sciences Major**

Students who choose Earth and Planetary Sciences Major study the past, present, and future of our Earth through the interdisciplinary study of its various systems. Earth and Planetary Sciences majors choose between concentrations in Geosystems, Climate Change, Geobiology, Geophysics, and Planetary Sciences, which are explored from a combination of lab-based, field-based, and computational perspectives.

**Geology Major**

Students who choose the Geology major study the structure, composition, processes, and history of the Earth. In particular, the Geology major stresses features of the Earth's surface and interactions between its atmosphere, hydrosphere, biosphere, rocky crust, and interior. Through an emphasis on developing important skills, one of the goals of this program is to prepare students for Geology careers in the public, private, and academic sectors.

**Geophysics Major**

Students who choose the Geophysics major apply the principles and concepts of physics, mathematics, geology, and engineering to the study of the physical characteristics of the Earth and other planets. They make measurements of gravity and magnetic fields, seismic waves, temperatures, and natural electric current. Geophysicists study these topics from the standpoint of the physics of solid bodies, gases, and fluids. Some geophysicists are field oriented, some laboratory oriented, some theoretical, and some combine these areas.

**Change of Major and Continuation Criteria**

Students wishing to change into or continue in the Earth and Planetary Sciences major must be in good academic standing and show potential to graduate without exceeding 216 units.

**Freshmen (2nd and 3rd quarter)** must demonstrate progress in basic sciences and aptitude for Earth and Planetary Sciences by satisfying the following three criteria by Spring Quarter or Summer Session:

- One of GEO 001, GEO 002 or GEO 009 or GEO 011, or GEO 003 completed with a grade of C- or better

**Sophomores (up to 89.9 cumulative units)** must demonstrate sustained progress in basic sciences and aptitude for geology by satisfying the following three criteria by Spring Quarter or Summer Session:

- CHEM 001B completed with passing grades
- GEO 009C or GEO 046 eligible (e.g. GEO 007B or GEO 009B with grade of C- or better)
- Two of GEO 001, GEO 002 or GEO 009 or GEO 011, or GEO 003 completed with no grade below C- after repeats

**Juniors (90 – 134.9 units)** must demonstrate near completion of basic sciences and aptitude for upper-division geology by satisfying the following three criteria by Spring Quarter or Summer Session:

- CHEM 001B and MATH 009C or MATH 046 completed with passing grades
- GEO 003, GEO 111, and GEO 115 or GEO 157 (and all prerequisites) completed with no grade below C- after repeats

**Seniors (135+ units):** must have completed all but 1 course of the Earth and Planetary Sciences core requirements by Spring Quarter or Summer Session, as follows:

- CHEM 001B, MATH 009C or MATH 046, PHYS 004B or PHYS 002B and PHYS 02LB completed with passing grades.
- GEO 001, GEO 002 or GEO 009 or GEO 011, GEO 003, GEO 111, GEO 115 or GEO 157 (and all prerequisites) completed with no grade below C- after repeats.

Students wishing to change into or continue in the Geology major must be in good academic standing and show potential to graduate without exceeding 216 units.

**Freshmen (2nd and 3rd quarter)** must demonstrate progress in basic sciences and aptitude for geology by satisfying the following three criteria by Spring Quarter or Summer Session:

- MATH 007B or MATH 009B eligible (e.g. completion of MATH 007A or MATH 009A with grades of C- or better)
- CHEM 01B eligible (e.g. completion of CHEM 01A with a grade of C- or better)
- One of GEO 001, GEO 002 or GEO 009 or GEO 011, or GEO 003 completed with a grade of C- or better

**Sophomores (up to 89.9 cumulative units)** must demonstrate sustained progress in basic sciences and aptitude for geology by satisfying the following three criteria by Spring Quarter or Summer Session:

- CHEM 001B completed with passing grades
- GEO 003, GEO 046 eligible (e.g. GEO 007B or GEO 009B with grade of C- or better)
- Two of GEO 001, GEO 002, or GEO 003 completed with no grade below C- after repeats

**Juniors (90 – 134.9 units)** must demonstrate near completion of basic sciences and aptitude for upper-division geology by satisfying the following three criteria by Spring Quarter or Summer Session:

- CHEM 001B and MATH 009C or MATH 046 completed with passing grades
- PHYS 004B or PHYS 002B and PHYS 02LB eligible (i.e. completion of one quarter of college physics with C- or better)
- GEO 002, GEO 003, GEO 111, GEO 115 or GEO 122 (and all prerequisites) completed with no grade below C- after repeats

**Seniors (135+ units):** must have completed all but 1 course of the geology core requirements by Spring Quarter or Summer Session, as follows:

- CHEM 001B, MATH 009C or MATH 046 and PHYS 004B or PHYS 002B and PHYS 02LB completed with passing grades.
- BIOL 020 or BIOL 05LA or BIOL 051A or BIOL 020, completed with passing grades.
- GEO 001, GEO 002, GEO 003, GEO 111, GEO 115, GEO 116 and GEO 122 and GEO 101 or GEO 118 (and all prerequisites) completed with no grade below C- after repeats.

**Transfer Selection Criteria**

Applicants to majors in the College of Natural and Agricultural Sciences are selected on the basis of academic preparation, as assessed by their GPA and the strength of preparation for the intended major. A GPA of at least 2.70 is required. (This is a baseline GPA for consideration and not a guarantee of admission.)

In addition, applicants will need to complete college courses comparable to at least two of the following UCR year-long sequences in order to meet selection criteria for this major. Courses must be completed with a “C” grade or better:

- MATH 007A or MATH 009A, MATH 007B or MATH 009B, and MATH 009C or MATH 046 (mandatory)

And at least one sequence from:

1. BIOL 005A, BIOL 051A or BIOL 020 and BIOL 005B (and BIOL 005C, if articulated)
2. CHEM 001A, CHEM 01LA, CHEM 001B, CHEM 01LB
3. PHYS 040A and PHYS 040B or PHYS 002A and PHYS 002B
4. MATH 010A, MATH 010B, and MATH 046

Courses must be completed with a letter grade, with no grade lower than a “C”. Students should visit assist.org for updated and comprehensive major preparation requirements.
University Requirements
See Undergraduate Studies section.

College Requirements
See College of Natural and Agricultural Sciences, Colleges and Programs section.

Some of the following requirements for the major may also fulfill some of the college’s breadth requirements. Consult with a department advisor for course planning.

Major Requirements
Earth and Planetary Sciences Major

All courses in Geosciences that are prerequisites for other courses in the major must be passed with a grade of "C-" or better before proceeding in the sequence. For example, GEO 001 is a prerequisite for GEO 122.

The department offers five concentrations to majors in Earth and Planetary Sciences: Geosystems, Climate Change, Geobiology, Geophysics, and Planetary Sciences. All students majoring in Earth and Planetary Sciences are normally required to take the core curriculum.

Geosystems, Climate Change, Geobiology, Geophysics, and Planetary Sciences Concentrations

Core Requirements (61-66 units)

1. Lower division core requirements (48-53 units)
   a) GEO 001
   b) GEO 002 or GEO 009 or GEO 011
   c) GEO 003/BIOL 010
   d) GEO 004 or GEO 007 or GEO 008 or GEO 010 or GEO 012 or GEO 013 or GEO 080
   e) BIOL 005A and BIOL 005LA or BIOL 020
   f) Either CHEM 001A and CHEM 011A or CHEM 01HA and CHEM 1HLA, either CHEM 001B and CHEM 011B or CHEM 01HB and CHEM 01LB
   g) MATH 007A or MATH 009A, MATH 007B or MATH 009B, MATH 046
   h) Either PHYS 040A, PHYS 040B or PHYS 002A and PHYS 002A, PHYS 002B and PHYS 002LB
   Students interested in elective classes in Geophysics are recommended to take PHYS 040C or PHYS 002C. Students interested in elective classes in Geochemistry are recommended to take CHEM 001C.

2. Upper division core requirements (13 units)
   a) GEO 111, GEO 115, GEO 157

Geosystems Concentration

1. Upper division requirements (35-38 units)
   a) GEO 101A, GEO 101B, GEO 118
   b) Three of GEO 100, GEO 116, GEO 122, GEO 132, GEO 151, GEO 152, GEO 162

2. Upper division requirements (34-38 units)
   a) GEO 140, GEO 145
   b) Three of GEO 116, GEO 118, GEO 144, GEO 147

Geobiology Concentration

1. Lower division requirements (5 units)
   a) BIOL 005B, BIOL 005C

2. Upper division requirements (5-36 units)
   a) GEO 001 and CHEM 001LC, or CHEM 001HC and CHEM 001HLC
   b) Three of GEO 100, GEO 116, GEO 122, GEO 132, GEO 136, GEO 137, GEO 140, GEO 144, GEO 147, GEO 151, GEO 152, GEO 160, GEO 161, GEO 162, GEO 169, GEO 180, GEO 181, GEO 182, GEO 184, STAT 155

Students interested in pursuing professional licensure through the California Geologist In Training (GIT) are advised to take the Geology Major.

Climate Change Concentration

1. Lower division requirements (5 units)
   a) GEO 101A and GEO 101B, and two of GEO 100, GEO 116, GEO 122, GEO 132, GEO 136, GEO 137, GEO 140, GEO 144, GEO 145, GEO 147, GEO 151, GEO 152, GEO 160, GEO 161, GEO 162, GEO 163, GEO 169, GEO 180, GEO 181, GEO 184, STAT 155
   or
   GEO 101A and GEO 101B, and two of GEO 100, GEO 116, GEO 118, GEO 122, GEO 132, GEO 136, GEO 137, GEO 144, GEO 147, GEO 151, GEO 152, GEO 160, GEO 161, GEO 162, GEO 163, GEO 169, GEO 180, GEO 181, GEO 184, STAT 155

Geophysics Concentration

1. Lower division requirements (5 units)
   a) PHYS 002C and PHYS 002LC, or PHYS 004C

2. Upper division requirements (32-35 units)
   a) Four of GEO 180, GEO 181, GEO 182, GEO 184, PHYS 111
   b) Four of GEO 100, GEO 116, GEO 122, GEO 132, GEO 136, GEO 137, GEO 138, GEO 140, GEO 144, GEO 145, GEO 147, GEO 151, GEO 152, GEO 160, GEO 161, GEO 162, GEO 163, GEO 169

Planetary Sciences Concentration

1. Lower division requirements (5 units)
   a) PHYS 002C and PHYS 002LC, or PHYS 004C

   2. Upper division requirements (32-35 units)
      a) Four of GEO 180, GEO 181, GEO 182, GEO 184, PHYS 111
      b) Four of GEO 100, GEO 116, GEO 122, GEO 132, GEO 136, GEO 137, GEO 138, GEO 140, GEO 144, GEO 145, GEO 147, GEO 151, GEO 152, GEO 160, GEO 161, GEO 162, GEO 163, GEO 169

Geology Major

All courses in Geosciences that are prerequisites for other courses in the major must be passed with a grade of "C-" or better before proceeding in the sequence. For example, GEO 001 is a prerequisite for GEO 122.

All students majoring in Geology are normally required to take the core curriculum.

Geology Major

1. Lower-division requirements (43-44 units)
   a) GEO 001, GEO 002 or GEO 009 or GEO 011, GEO 003/BIOL 010
   b) BIOL 002 or BIOL 005A, BIOL 005LA (or BIOL 020)
   c) Either CHEM 001A and CHEM 011A or CHEM 01HA and CHEM 1HLA, either CHEM 001B and CHEM 011B or CHEM 01HB and CHEM 01LB
   d) MATH 007A or MATH 009A, MATH 007B or MATH 009B, MATH 046
   e) PHYS 040A, PHYS 040B or PHYS 002A, PHYS 002B and PHYS 002LB

   Students interested in elective classes in Geophysics are recommended to take PHYS 040C (if they have previously taken PHYS 040A and PHYS 040B), or PHYS 002C and 02LC (if they have previously taken PHYS 002A and PHYS 02LA PHYS 02LB and PHYS 02LB). Students interested in elective classes in Geochemistry are recommended to take CHEM 001C and CHEM 011C.

2. Upper-division requirements (52-54 units)
   a) GEO 100, GEO 101A, GEO 101B, GEO 102A, GEO 102B, GEO 111, GEO 115, GEO 116, GEO 118, GEO 122
   b) Two of GEO 123, GEO 124, GEO 132, GEO 136, GEO 137, GEO 140 GEO 144, GEO 145, GEO 147 GEO 151, GEO 152, GEO 157, GEO 160, GEO 161, GEO 162, GEO 163, GEO 169, GEO 180, GEO 181, GEO 182, GEO 184, STAT 155
Students interested in pursuing professional licensure through the California Geologist In Training (GIT) examination should consider taking GEO 132 and GEO 162 as their elective classes.

Geophysics Major

The following are major requirements for the B.S. in Geophysics. All students majoring in Geophysics are normally required to take this core curriculum.

1. Lower-division requirements (52-66 units)
   a) GEO 001 and one of GEO 004 or GEO 008
   b) MATH 007A or MATH 009A or MATH 009HA, MATH 007B or MATH 009B or MATH 009HB, MATH009C, MATH 010A, MATH 031, MATH 046
   c) PHYS 040A, PHYS 040B, PHYS 040C (strongly recommended), or PHYS 002A, PHYS 021A, PHYS 002B, PHYS 021B, PHYS 002C, PHYS 02LC
   d) CS 009M or CS 009P or CS 010A
   CHEM 001A, CHEM 001LA, CHEM 001B, CHEM 001LB, MATH 010B are recommended as prerequisites for upper division electives in geology and geophysics, and for students looking to earn a teaching credential for high school science.

2. Upper-division requirements (46-52 units)
   a) GEO 111, GEO 115, GEO 116, GEO 140, GEO 145
   b) One of GEO 144 or GEO 147
   c) Five of GEO 100, GEO 101A, GEO 101B, GEO 118, GEO 122, GEO 132, GEO 144 or GEO 147, GEO 157, PHYS 130A, PHYS 130B, PHYS 132 or PHYS 134, PHYS 135A, PHYS 135B, PHYS 136, PHYS 139L, PHYS 177, MATH 120, MATH 131, MATH 132, MATH 135A, MATH 135B, MATH 146A, MATH 146B, MATH 146C, MATH 147, MATH 169A or STAT 160A, MATH 149B or STAT 160B, or STAT 160C, MATH 168, GEO 163, GEO 180, GEO 181, GEO 184, STAT 155

Students wishing to continue on to graduate school may wish to earn a Minor in Mathematics, Physics, Statistics, or Computer Science, requiring an additional 24 upper division units of study, and/or completion of a Senior Thesis, which includes up to 9 units of independent research.

Minor

Students who wish to Minor in Geology, Geophysics, Global Climate Change or Planetary Sciences must complete 20-28 units of organized upper-division courses in Geosciences. A minimum of 16 of these units must be unique to the minor and cannot be used to satisfy major requirements. To satisfy prerequisites, additional preparatory coursework in Earth and Planetary Sciences and other sciences (Biology, Chemistry, Mathematics, Physics) may be required.

Minor in Geology: GEO 001, GEO 115; plus 15-23 additional upper-division Geosciences units.

Minor in Geophysics: GEO 001; GEO 140; plus 16-24 additional units taken from GEO 115, GEO 116, GEO 132, GEO 144, GEO 145, and GEO 190.

Minor in Global Climate Change: GEO 001 or GEO 002; GEO 011; GEO 160; plus 16-24 additional upper-division Geosciences units.

Minor in Planetary Sciences: GEO 001 or GEO 002 or GEO 006 or GEO 009 or GEO 011; GEO 013 or GEO 080; GEO 180, GEO 181, GEO 182, and GEO 184; plus 4-5 units in any upper-division Geosciences course.

Before submitting a petition for a Minor to the college, students interested in pursuing a Minor in Geology or Geophysics or Global Climate Change or Planetary Sciences must consult with the undergraduate faculty advisor in Earth and Planetary Sciences.

Graduate Programs

Graduate education in the Earth and Planetary Sciences emphasizes all aspects of geology, geophysics and biogeochemistry as applied to understanding the Earth and other planetary bodies. Areas of research include the origin and evolution of life through geological time; astrobiology and the detection and modeling of exoplanets and their atmospheres; the theory, mechanisms and impacts of earthquakes and faulting; observing and modeling current and past climate change; modeling past and future global carbon and other biogeochemical cycles; and geophysical, geochemical and petrological studies of the structure and internal processes of planetary interiors. Integrated field, laboratory and numerical studies are encouraged.

Admission

An undergraduate degree in geology, geochemistry, geophysics or earth/planetary science is the normal preparation for graduate work; however, a degree from a related field of science or engineering or even select non-science disciplines may be appropriate. Applicants to graduate status must supply any standardized test scores required by the Graduate Division before admission.

Master’s Degree

In addition to the general requirements listed under the Graduate Studies section of this catalog, the requirements for the M.S. degree in Earth and Planetary Sciences, under the Plan 1 (Thesis), are as follows.

Admission

Students must make up any deficiency in undergraduate preparation required for their area of study. The background required is determined by the graduate advisor in consultation with their faculty advisor. Courses taken to remedy background deficiencies are not applicable to the graduate degree. Such courses are typically designated in the letter of admission to the program sent by the dean of the Graduate Division to the student.

Biannual Reviews

All students must undergo biannual reviews by the departmental Graduate Progress Committee. A student’s progress is assessed in these reviews, and the committee may recommend changes in a student’s plans after these reviews.

Course Work

All students must enroll each quarter in the Graduate Seminar in Geosciences (GEO 250). Students must attend the weekly Hewett Club lecture series.

Students must complete a minimum of 36 units of course work in the major and related subjects and obtain advance approval of a coherent plan of study from the graduate advisor. A maximum of 12 upper-division units beyond the requirements for the bachelor’s degree may be applied to the 36-unit requirement.

Students must complete a minimum of 12 units of graduate courses, which must include at least four graduate-level instructional courses taught by four different faculty members as approved by the graduate advisor.

All graduate students must complete professional development training by the end of their 9th quarter. This is fulfilled by taking GEO 201 A and GEO 201B before taking their Ph.D. Oral Exam.

Subject to the approval of the graduate advisor, a limited number of upper-division courses in the major and related sciences, if not required for the bachelor’s degree and not taken previously, may be accepted for graduate credit.

Thesis and Final Oral Examination

Before the end of the third quarter of study and before embarking on research, the student must submit a written thesis proposal to the graduate progress committee. After approval of the proposal, the student must submit a thesis based on original work for approval by a thesis committee. A maximum of 12 units of thesis research may be counted toward the 36-unit minimum.

Students present an open research seminar as a final oral examination, which is advertised to all the students and faculty in the Earth and Planetary Sciences Department.

Normative Time to Degree

7 quarters

Global Climate and Environmental Change (GCCE)

The GCCE MS track is a field and laboratory based multidisciplinary program focused on the evidence for and controls of past and present climate change. Candidates must complete the following:

Course Work

Students must complete a minimum of 36 quarter units of graduate and upper-division undergraduate courses, and research credit from 1 and 2 (below). Other upper-division undergraduate and graduate classes outside may be substituted with consent of the Graduate Advisor. 24 of 36 credits must be graduate level.

1) Required Core courses: GEO 224 upon entry into the program, GEO 260 and BIOL 212/ENTM 212/GEOL 212.

2) At least two additional disciplinary courses: GEO 221, GEO 239, GEO 249, GEO 251, GEO 255, GEO 264, GEO 265, GEO 268, GEO 301, OR ENSC 200, ENSC 218, ENSC 224, ENSC 225, ENSC 232.
Thesis Work
Before the end of the third quarter students must nominate a faculty advisor and identify a thesis topic. Before embarking on research the student must submit a thesis proposal based on original work for approval by a thesis committee. A maximum of 8 units of research credit can be counted toward the 36 unit minimum. Students present an open research seminar as a final oral examination.

Doctoral Degree
The Department of Earth and Planetary Sciences offers the Ph.D. in Earth and Planetary Sciences. In addition to the general University requirements of the Graduate Division as found in the Graduate Studies section of this catalog, the Ph.D. in Earth and Planetary Sciences normally requires the following.

Biannual Reviews
All students meet with the Graduate Progress Committee during their first week at UCR to discuss general interests, goals, and plans. The committee recommends courses designed to prepare a student for research and to correct deficiencies in background. This committee also reviews a student’s progress biannually and may recommend transfer to the master’s program if normal progress is not maintained.

Course Work
Students must complete at least four graduate-level instructional courses taught by four different faculty members as approved by the graduate advisor. Up to four 100 level classes can count subject to Graduate Advisor approval. Course work used in satisfaction of the M.S. degree may be accepted with the graduate advisor’s approval. All students must enroll each quarter in the Graduate Seminar in Geosciences (GEO 250). Students are also required to attend the weekly Hewett Club lecture series.

Written and Oral Qualifying Examinations
The written exam will consist of a written research proposal or proposals as detailed in the Graduate Handbook. The proposal topics must be approved by an examination committee to ensure breadth. The committee reviews the proposals and, if acceptable, recommends proceeding to the oral qualifying examination. An oral examination committee appointed by the dean of the Graduate Division examines the adequacy of the student’s preparation to conduct the proposed research. Advancement to candidacy in the Ph.D. program follows successful completion of the oral examination.

All Ph.D. candidates must satisfy the course requirements and have passed their written and oral qualifying exams within two years of entering the program, otherwise they will not be eligible to continue in the Ph.D. track. Exceptions can only be granted by the Graduate Advisor or by the Chair.

Dissertation and Final Oral Examination
A dissertation normally evolves from one of the research proposals. The dissertation must present original scholarly work and be approved by a dissertation committee before the student may take the final oral examination. Students must have satisfactory performance on the final oral examination given by the dissertation committee. Major emphasis in this examination is on the dissertation and related topics.

Normative Time to Degree from the B.S.
17 quarters

Lower-Division Courses
GEO 001 The Earth’s Crust and Interior 4 Lecture, 3 hours; laboratory, 3 hours; one 1-day field trip. Prerequisite(s): none. An introduction to the physical development of the Earth. Emphasis will be on Earth materials (rocks and minerals), processes (weathering, erosion, mountain building), structures (folds and faults), and current theories regarding the Earth’s crust and interior.

GEO 002 Earth’s Climate Through Time 4 Lecture, 3 hours; laboratory, 3 hours; one 2-day field trip. Prerequisite(s): none. An introduction to the history of Earth’s changing climate and its relationship to the evolution of life on human to geologic time scales. Topics include the interrelationships among short- and long-term carbon cycling; plate tectonics; ocean and atmosphere circulation; and greenhouse gases through time.

GEO 003 Headlines in the History of Life 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): none. Evolution of life beginning with precellular life. Topics include the origin of sex, multicellularity, vertebrate classes, morphological specializations, adaptive radiation, extinction dynamics, and the biology of dinosaurs. Cross-listed with BIOL 010.

GEO 004 Natural Hazards and Disasters 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to the natural hazards and their mitigation. Topics include floods, freezes, floods, winds, landslides, volcanic eruptions, earthquakes and tsunamis. Emphasis is on confronting hazards of concern to home-buyers, planners, and conservationists in the western United States, especially southern California.

GEO 005 Geoscience in Movies 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduction to Earth, Atmospheric and Planetary Sciences using movies as support for visual learning. Topics include: Earth structure and tectonic processes, climate change, impact craters and space exploration. Lectures: Earth science concepts and their portrayal in movies. Weekly assignments: reading from the class textbook, scientific magazines and journals; viewing films.

GEO 006 Planets in Science Fiction 4 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): none. Introduces the history of discoveries in planetary science and exoplanets and the influence on popular culture, movies, television, literature, and video games. Topics include planet discovery and exploration, planetary habitability, desert worlds, water worlds, moons, and terraforming in the context of science fiction.

GEO 007 Minerals and Human Health 4 Lecture, 2 hours; discussion, 2 hours. Prerequisite(s): none. Overview of the role of minerals in human life and industrial activities. Topics include the impact of minerals on human health, the role of minerals in modern technologies, asbestos and silica problems, occupational diseases caused by inhalation of mineral dust, and environmental protection in California. May include a field trip.

GEO 008 Earthquake Country 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to the study of earthquakes and the problems of living in earthquake country. Why earthquakes occur, how they are recorded, and what the effects are on man and his structures. The scientific and social consequences of earthquake prediction.

GEO 009 Oceanography 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. A general introduction to the geological, physical, chemical, and biological processes related to the characteristics and evolution of the ocean system. Explores the role oceans play in regulating climate and the cycling of elements on the Earth’s surface. Illustrates how the ocean system has been, and continues to be, one of the most important influences on life. Credit is awarded for only one of GEO 009 or GEO 009H.

GEO 009H Honors Oceanography 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to GEO 009. A general introduction to the geological, physical, chemical, and biological processes related to the characteristics and evolution of the ocean system. Explores the role oceans play in regulating climate and the cycling of elements on the Earth’s surface. Illustrates how the ocean system has been, and continues to be, one of the most important influences on life. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of GEO 009 or GEO 009H.

GEO 010 Earth Resources and Sustainability 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to the occurrence, availability, marketing, and usage of metals, minerals, fossil fuels, nuclear fuels and other geologic resources, including both historic and recent trends. Addresses conflicts between modern society’s need for increasingly scarce resources and mounting environmental problems. Also covers achieving sustainability through conservation, recycling, and substitution.

GEO 011 Global Climate Change 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Provides an understanding of Earth’s feedback systems that regulate the climate over long- and short-term time scales. Includes oceanic and atmospheric circulation patterns, the major reservoirs and global carbon cycle, and the influence and origin of greenhouse gases. Investigates sustainability, climate change policies, adaptation, and mitigation. Credit is awarded for one of the following GEO 011 or GEO 011H.
GEO 011H Honors Global Climate Change
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to GEO 011. Provides an understanding of Earth's feedback systems that regulate the climate over long- and short-term time scales. Includes oceanic and atmospheric circulation patterns, the major reservoirs and global carbon cycle, and the influence and origin of greenhouse gases. Investigates sustainability, climate change policies, adaptation, and mitigation. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of GEO 011 or GEO 011H.

GEO 012 At Home in the Universe
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Considers the place of humans in space and time and the means by which this is discerned. Presents a synopsis of the history of the cosmos, Earth, life, and humanity from a science-based perspective. Discuss the implications of such knowledge for how responsible individuals choose to conduct themselves.

GEO 013 Our Planetary Neighbors: the Solar System and Beyond
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): none. A survey of the planets in the solar system with a focus on comparative planetology. Explores the formation, structure, composition, and evolution of rocky and gas giant planets. Other topics include the night sky, the Moon, gravity, planetary motion, radiation, minor bodies, and exoplanets.

GEO 080 Astrobiology: the Search For Life in the Universe
Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): none. Are we alone in the universe? This basic human question, once solely the domain of philosophy and science fiction, is now a field of considerable scientific research. Lecture and lab topics include the history of life on Earth, habitability in the solar system, and discovery of planets around other stars.

Upper-Division Courses

GEO 100 Igneous and Metamorphic Petrology
Lecture, 3 hours; laboratory, 6 hours; four field trips, Prerequisite(s): GEO 115 and GEO 122 with grades of "C-" or better. An introduction to the nomenclature and classification of igneous and metamorphic rocks. Includes identification of the major rock-forming minerals and common rocks in hand samples and thin sections, as well as interpretation of rock fabrics and textures. Explores tectonic setting and the origins of major rock types.

GEO 101A Field Geology 1
Lecture, 1 hour; laboratory, 3 hours; field, 35 hours per quarter. Prerequisite(s): GEO 115 with a grade of "C-" or better; or consent of instructor. Introduces geologic field mapping, aerial photograph interpretation, scaled vector graphic cartography, and professional report writing for igneous and metamorphic rock terranes.

GEO 101B Field Geology 3
Lecture, 1 hour; laboratory, 3 hours; field, 35 hours per quarter. Prerequisite(s): GEO 115 with a grade of "C-" or better; or consent of instructor. Introduces geologic field mapping, aerial photograph interpretation, scaled vector graphic cartography, and professional report writing for stratified sedimentary rock terranes.

GEO 102A Summer Field Geology 8
Field, 240 hours per quarter. Prerequisite(s): GEO 100 with a grade of "C-" or better; GEO 116 with a grade of "C-" or better; GEO 118 with a grade of "C-" or better, may be taken concurrently; GEO 101A with a grade of "C-" or better; GEO 101B with a grade of "C-" or better, may be taken concurrently; or consent of instructor. Intensive field training in the collection, interpretation, and communication of geologic data. Covers advanced geological mapping, sections, and production of professional geological reports. Requires multi-week fieldwork in summer. Course materials fee charged. GEO 102B the field component is required. Graded In Progress (IP) until GEO 102A and GEO 102B are completed, at which time a final grade is assigned.

GEO 102B Summer Field Geology 1
Field, 240 hours per quarter. Prerequisite(s): GEO 100 with a grade of "C-" or better; GEO 116 with a grade of "C-" or better; GEO 118 with a grade of "C-" or better; GEO 101A with a grade of "C-" or better or GEO 101B with a grade of "C-" or better; or consent of instructor. Intensive field training in the collection, interpretation, and communication of geologic data. Covers advanced geological mapping, sections, and production of professional geological reports. Requires multi-week fieldwork in summer. Course materials fee charged. Graded In Progress (IP) with GEO 102A. Offered in Summer only.

GEO 111 Numerical Skills in Geoscience
Lecture, 3 hours; laboratory, 3 hours; term paper, 1 hour. Prerequisite(s): MATH 007B or MATH 009B or MATH 009HB; or equivalent; or consent of instructor. Introduces the basic principles of how computer programs are written and numerical models are constructed, as well as teaches data processing and visualization skills. Fosters an ability to apply numerical techniques to problems in the Earth and Environmental Sciences.

GEO 115 Geologic Maps and Landforms 5
Lecture, 2 hours; laboratory, 6 hours; field, 30 hours per quarter. Prerequisite(s): GEO 001, may be taken concurrently; MATH 009A or MATH 009B or MATH 009HB or MATH 009HA; or equivalent; or consent of instructor. Introduces the graphical solution of structural problems and laboratory map study, the genesis of rock structures, the physics of rock deformation, and Mohr diagrams and elementary stress analysis.

GEO 116 Structural Geology 5
Lecture, 2 hours; laboratory, 6 Field Trip 8 To 16, Prerequisite(s): GEO 115 with a grade of "C-" or better; PHYS 002A or PHYS 02HA or PHYS 040A or PHYS 040HA; or consent of instructor. Examines geological structures in the field. Covers the graphical solution of structural problems and laboratory map study, the genesis of rock structures, the physics of rock deformation, and Mohr diagrams and elementary stress analysis.

GEO 118 Sedimentology and Stratigraphy
Lecture, 2 hours; laboratory, 6 hours; two 1-day and one 2-day field trips, Prerequisite(s): GEO 115 with a grade of "C-" or better. A study of the principles of sedimentology and the comparative study of the origins of sediments and sedimentary rocks from various modern and ancient clastic, carbonate, and mixed silicilastic-carbonate depositional environments. Emphasizes field and stratigraphic relationships, as well as petrographic and hand specimen identification.

GEO 122 Mineralogy
Lecture, 3 hours; laboratory, 5 hours; field trip, 8 to 16 hours per quarter. Prerequisite(s): both CHEM 001B and CHEM 01LB or both CHEM 01HB and CHEM 1HLB (CHEM 001B, CHEM 01LB, CHEM 01HB, and CHEM 1HLB may be taken concurrently); GEO 001 with a grade of "C-" or better. Provides an introduction to common and important minerals and their identification using structural, crystallographic, and optical microscopy methods. Stresses distinctive structural and chemical features, diagnostic physical and optical properties, anthropogenic uses, commonly associated minerals, and the growth and development of minerals in various geologic environments.

GEO 123 Analytical Mineralogy
Lecture, 3 hours; laboratory, 6 hours. Prerequisite(s): both CHEM 001C and CHEM 01LC or both CHEM 01HC and CHEM 1HLC; GEO 122 with a grade of "C-" or better. Advanced techniques in mineralogy. Covers optical crystallography, with an introduction to X-ray diffraction, electron microscopy, and other analytical techniques.

GEO 124 Advanced Petrogenesis 4
Lecture, 2 hours; laboratory, 6 hours; two 1-day field trips. Prerequisite(s): GEO 100 with a grade of "C-" or better. Explores advanced topics in the petrogenesis of igneous and metamorphic rocks in the Earth's crust and mantle. Examines field and structural relationships of crystalline rocks and how thermodynamics, experimental phase equilibria, and computer modeling are used to study petrogenesis. Each student completes a field and laboratory research project and prepares a written and oral report on the project.

GEO 132 Groundwater Geology
Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CHEM 001B and CHEM 01LB or CHEM 01HB and CHEM 1HLB; MATH 007B or MATH 009B or MATH 009H or MATH 009HA. Examines characteristic patterns of bedrock outcrops, surficial deposits, the related landforms, and their representation on maps. Covers unconformities, folds, faults, intrusions, alluvial fans, river terraces, and landforms indicative of glaciers, volcanoes, landslides, and earthquakes. Applies map information to resource and hazard evaluation.
GEO 136 Introduction to Molecular and Petroleum Geochemistry 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): both CHEM 001C and CHEM 01LC or both CHEM 01HC and CHEM 1HLC or equivalents; a grade of "C-" or better in one of the following courses: GEO 001, GEO 002, GEO 009 or GEO 011. Explores the global carbon cycle and the origin and fate of organic carbon molecules throughout Earth's history. Covers production and composition of biogenic matter and microbial, chemical, and thermal processing of sedimentary organic matter, leading to oil, gas, and coal formation. Addresses important applications to the petroleum and environmental sectors.

GEO 137 Geochemistry of Natural Waters 4 Lecture, 3 hours; laboratory, 30 hours per quarter. Prerequisite(s): both CHEM 001C and CHEM 01LC or both CHEM 01HC and CHEM 1HLC or equivalents; a grade of "C-" or better in one of the following courses: GEO 001, GEO 002, GEO 009 or GEO 011. Examines the chemical principles of geologic processes at and near Earth's surface. Topics include biogeochemical cycles of elements during chemical interactions of the Earth's crust, hydrosphere, and atmosphere; applications of thermodynamics and kinetics to the study of low-temperature geologic systems; and the use of isotopic techniques in tracing geologic processes.

GEO 138 Pedology 4 Lecture, 3 hours; laboratory, 6 hours per quarter; field, 24 hours per quarter. Prerequisite(s): ENSC 100, GEO 001; or consent of instructor. Covers the soil systems and their roles within ecosystems and landscapes. Topics include soil variability, soil classification, and soils as indicators of environmental conditions. Field trips emphasize description and interpretation of soils. Requires two 3-hour Laboratory activities and four 6-hour Field Trips. Cross-listed with ENSC 138.

GEO 139 Soils and Landforms of California 1 Term paper, 6 hours; field, 24 hours. Prerequisite(s): ENSC 138, may be taken concurrently or GEO 138, may be taken concurrently; or consent of instructor. Explores the genesis, morphology, and classification of California soils with an emphasis on soil-landform relationships. One 3-day field trip emphasizes soils and landforms within selected regions of California. Cross-listed with ENSC 139.
