GEO 140 Global Geophysics 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): GEO 001 with a grade of "C-" or better; MATH 046, PHYS 002C or PHYS 02HC or PHYS 040C or PHYS 040HC; or consent of instructor. Introduces central concepts of solid earth geophysics as applied at the global or planetary scale. Includes plate tectonics and dynamics of the lithosphere; seismology and earth structure; geothermal behavior and heat flow; and geodynamics and planetary geophysics.

GEO 144 Earthquake Seismology 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): MATH 010A, MATH 010B, MATH 046, PHYS 002C or PHYS 02HC or PHYS 040C or PHYS 040HC; or consent of instructor. Introduction to the theories and observations of earthquake seismology. Student utilizes physical principles and mathematical techniques to study the earthquake process, wave propagation, and ground motion. Laboratory emphasizes computer-assisted analysis of various types of seismic data as well as simple modeling techniques.

GEO 145 Applied and Exploration Geophysics 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): GEO 001 with a grade of "C-" or better; MATH 007B or MATH 009B or MATH 09HB; PHYS 002C or PHYS 02HC; or PHYS 040C or PHYS 040HC; or consent of instructor. Introduces applied geophysical methods used to explore and characterize the shallow subsurface. Topics include gravity, magnetism, seismic reflection and refraction, electrical resistivity, electromagnetism, and ground penetrating radar. Explores techniques to solve problems related to groundwater, as well as environmental, mineral, and petroleum exploration and engineering issues. Requires a weekend field trip.

GEO 147 Active Tectonics and Remote Sensing 4 Lecture, 2 hours; discussion, 1 hour; laboratory, 3 hours. Prerequisite(s): GEO 001, GEO 115; or consent of instructor. A computer-based course that introduces active tectonics and the earthquake cycle and how they are studied using remote sensing data. Explores examples of actively deforming areas from around the world using computer visualization software and freely available data sources (satellite imagery, digital topography, GPS and earthquake data).

GEO 150 Your Future in the Earth and Planetary Sciences 1 Seminar, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior. An exploration of potential careers and futures in the Earth and Planetary Sciences. Topics include career planning, exploring different job possibilities in the public and private sectors, applying for jobs and internships, undergraduate and graduate research, the graduate school application process, academic careers, and fellowships. Graduated Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 3 units.

GEO 151 Principles of Paleontology 4 Lecture, 3 hours; laboratory, 3 hours; one 1-day field trip. Prerequisite(s): BIOL 010/GEO 003 with a grade of "C-" or better or BIOL 085C. Emphasis is on understanding fossils as living organisms. Topics include fundamentals of evolution and the fossil record, introductory morphometrics and biosystemic theory, functional morphology, and metazoan organization and classification.

GEO 152 Principles of Invertebrate Paleobiology and Paleoecology 4 Lecture, 2 hours; laboratory, 3 hours; three 1-day field trips. Prerequisite(s): BIOL 005C with a grade of "C-" or better or BIOL 010/GEO 003 with a grade of "C-" or better. Topics include evolution and the fossil record, paleoecology, classification theory; the nature of adaptive radiations, and extinctions. Cross-listed with BIOL 152.

GEO 157 Introduction to Geographical Information Science 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): upper-division standing. Introduction to the fundamental theory and application of geographical information science. Topics include geographic information system systems, data structures, databases, and spatial data models. Explores various spatial data, including their coordinate systems, data acquisition, and associated errors. Introduces data analysis methods within geographical information systems.

GEO 158 Advanced Geographic Information System 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): GEO 157 or consent of instructor. Multidisciplinary applications of GIS analysis techniques including vector, grid, image, surface, and network systems. Covers photogrammetry and processing of remotely sensed imagery emphasizing data quality and error assessment. Introduction to graphical programming tool, ModelBuilder, and Python scripting language for automation and customization of tasks. No previous programming experience assumed.

GEO 160 Global Climate Change 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor; PHYS 002B or PHYS 02HB or PHYS 040B or PHYS 040HB recommended. Surveys historical and paleoclimate change using basic principles on gas laws, radiant energy exchange, atmospheric circulation and oceanography, and proxy data. Topics include variability in modern climate, greenhouse gases, global warming, El Nino, Pacific decadal oscillation, ozone hole, volcanism, ice age climate, and Milankovitch cycles. Also covers stable isotope profiles, plate tectonics, greenhouse climates, paleovegetation, modern species diversity, and snowball Earth.

GEO 161 Cenozoic Climate Change 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): one of the following courses with a grade of "C-" or better; GEO 001 or GEO 002 or GEO 009 or GEO 011. Examines physical, chemical, and biological evidence of climatic and environmental change throughout the Cenozoic Era (last 65 million years) to provide a framework for understanding natural environmental change and for predicting future change. Introduces students to computer-based numerical methods of data analysis for interpreting past records of environmental change.

GEO 162 Geomorphology 4 Lecture, 2 hours; laboratory, 6 hours; one 2-day field trip. Prerequisite(s): ENSC 100 or GEO 115 (ENSC 100 or GEO 115 may be taken concurrently); or consent of instructor. A study of surficial processes related to the development and evolution of landforms and landscapes at the Earth's surface. Examines weathering, erosion, and depositional processes in a variety of landscapes (tectonic, volcanic, arid, karst, fluvial, glacial, coastal, anthropogenic, planetary, etc.). An emphasis is placed on processes and landscapes important to California.
life-habitat relationships. The consequences of land development, and wild habitats are designed to include biological preserve design, ecological theories in the conservation of plants, animals, and wildlands. Topics include biological preserve design, ecological consequences of land development, and wild-life/habitat relationships.

GEO 167 Conservation Biogeography 4 Lecture, 3 hours; laboratory and field, 3 hours. Prerequisite(s): B IOL 005C with a grade of “C” or better or B IOL 010/ G EO 003 with a grade of “C” or better. Application of biogeographic and ecological theories in the conservation of plants, animals, and wildlands. Topics include biological preserve design, ecological consequences of land development, and wild-life/habitat relationships.

GEO 169 California Vegetation 4 Lecture, 3 hours; laboratory, 3 hours; two 1-day field trips. Prerequisite(s): B IOL 005C with a grade of “C” or better or B IOL 010/ G EO 003 with a grade of “C” or better. Survey of the flora, distribution, and ecology of California ecosystems, including Mediterranean shrubland, conifer forests, desert scrub, valley for fields, and exotic grasslands. Discusses vegetation in relation to climate, physiography, fire, landscape steady states, biological invasions, paleobotany, and broad-scale change due to land development, invasive species, grazing, and fire suppression.

GEO 180 Exoplanetary Science Detection Tech 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 007B or MATH 009B or MATH 09HB; PHYS 040B or PHYS 002B; PHYS 117 or GEO 111; Restricted to class level standing of junior, or senior; or consent of instructor. Covers the rapid expansion of the subject of exoplanets, the discoveries of which now number in the thousands and include planets smaller than Earth. Topics include solar system formation, the history of exoplanetary science, orbital mechanics, detection methods, orbital ephemerides, host stars, and future exoplanet space missions.

GEO 181 Exoplanetary Science Characterization 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 007B or MATH 009B or MATH 09HB; PHYS 040B or PHYS 002B; PHYS 117 or GEO 111; GEO 180; Restricted to class level standing of junior, or senior; or consent of instructor. Covers the detailed characterization of exoplanets including new discoveries that are being made from past and present exoplanet missions. Topics include orbital dynamics and architectures, tidal effects, planet formation, circumbinary planets, phase variations, planetary atmospheres, exomoons, and future exoplanet space missions.

GEO 182 Planetary Astrobiology For Science Majors 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 001B or CHEM 011B; MATH 007B or MATH 009B or MATH 09HB; PHYS 002B or PHYS 02HB or PHYS 040B or PHYS 040HB; or consent of instructor. An overview of the origin, evolution, distribution, and future of life in the universe. Explores the physics and chemistry of life; formation and evolution of planets; origin of life; habitable environments in the solar system (Mars, Venus, icy moons); exoplanet biosignatures; and the search for extraterrestrial intelligence.

GEO 184 Planetary Atmospheres 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 007B or MATH 009B or MATH 09HB; PHYS 002B or PHYS 02HB or PHYS 040B or PHYS 040HB; restricted to class level standing of junior, or senior; or consent of instructor. A quantitative overview of the atmospheric structure, composition, climate, evolution, and circulation of planets within and outside the solar system. Focus areas include hydrostatic equilibrium, convection and lapse rates, photochemistry, escape processes, radiative transfer and spectroscopy, atmospheric formation, and basic fluid mechanics applied to circulation. Credit is awarded for one of the following GEO 184 or GEO 284.

GEO 190 Special Studies 1 to 5 Individual Study, 3 to 15 hours. Prerequisite(s): upper-division standing, consent of instructor and department chair. Individual study to meet special curricular needs. Course is repeatable to a maximum of 9 units.

GEO 191 Undergraduate Seminar in Geological Sciences 4 Seminar, 1 hour. Prerequisite(s): open to upper division Geological Sciences majors only. For undergraduate students who desire formal participation in the weekly departmental seminar. In addition to attending the seminar, students must write abstracts describing two of the presentations. May be repeated to a total of 6 units.

GEO 195A Senior Thesis 3 to 5 Hours per week to be established by supervisor, Prerequisite(s): senior status, consent of instructor. Preparation of a thesis based upon supervised field and/or laboratory research and literature review in the geological sciences. The thesis may be undertaken as a one-, two-, or three-quarter sequence. In the case of a two- or three-quarter sequence, the final grade will be deferred until completion of the last quarter. Total credits for GEO 195A, GEO 195B, and GEO 195C may not exceed 9 units.

GEO 195B Senior Thesis 3 to 5 Hours per week to be established by supervisor, Prerequisite(s): senior status, consent of instructor. Preparation of a thesis based upon supervised field and/or laboratory research and literature review in the geological sciences. The thesis may be undertaken as a one-, two-, or three-quarter sequence. In the case of a two- or three-quarter sequence, the final grade will be deferred until completion of the last quarter. Total credits for GEO 195A, GEO 195B, and GEO 195C may not exceed 9 units.

GEO 195C Senior Thesis 3 to 5 Prerequisite(s): senior status, consent of instructor. Preparation of a thesis based upon supervised field and/or laboratory research and literature review in the geological sciences. The thesis may be undertaken as a one-, two-, or three-quarter sequence. In the case of a two- or three-quarter sequence, the final grade will be deferred until completion of the last quarter. Total credits for GEO 195A, GEO 195B, and GEO 195C may not exceed 9 units.

GEO 198I Independent Internship 1 to 12 Field, 3 to 36 hours. Prerequisite(s): consent of instructor, undergraduate advisor, and department chairman. Independent study in a surrogate job condition under non-university supervision. Internships are normally in public or private institutions such as planning departments, research labs, or industry. Position, task, method of reporting completion and accomplishments, and units must have prior agreement among student, instructor, and supervisor. One unit for every three hours per week spent in internship. Graded Satisfactory (S) or No Credit (NC).

Graduate Courses

GEO 201A Research and Proposal Design 2 Seminar, 1 hour; written work, 3 hours. Prerequisite(s): graduate standing. Teaches the fundamentals of research topic selection and development of hypotheses. Addresses presentation techniques and design of research projects, experiments, and field campaigns. Includes preparation and discussion of small grant proposals, as well as short oral presentations related to applicable areas of study. Graded Satisfactory (S) or No Credit (NC).

GEO 201B Proposal Writing and Review 2 Seminar, 1 hour; written work, 3 hours. Prerequisite(s): graduate standing, GEO 201A; or consent of instructor. Covers the writing and review processes for major grant proposals. Includes the preparation, review, ranking, and summarizing of full-length federal grant proposals in accordance with federal panel guidelines. Graded Satisfactory (S) or No Credit (NC).

GEO 203 Mineral Equilibria 4 Lecture, 4 hours. Prerequisite(s): GEO 137 or consent of instructor. Applications of thermodynamics and kinetics to evaluating equilibria among minerals and fluids in geological environments. Emphasis placed on equilibria in geo-thermal systems, ore deposits, metamorphic and igneous rock, and groundwater.

GEO 205 Geohydrology 4 Lecture, 3 hours; laboratory, 3 hours; one 1-day field trip. Prerequisite(s): GEO 132 or ENSC 163. Fluid flow in geologic media; resource evaluation; and relevant geologic hazards and geotechnical problems.

GEO 206A Stratigraphy 4 Lecture, 2 hours; laboratory, 6 hours. Prerequisite(s): GEO 118; consent of instructor. Covers rock stratigraphy and time stratigraphy with an emphasis on their principles, history, and methods. Includes reading and analysis of pertinent literature and field trips.
**GEO 206B Stratigraphy** 4 Lecture, 2 hours; laboratory, 6 hours. Prerequisite(s): GEO 118; consent of instructor. Covers time stratigraphy and biostratigraphy with an emphasis on their principles, history, and methods. Includes reading and analysis of pertinent literature and field trips.

**GEO 212 Ecological Systems in Space and Time** 4 Lecture, 3 hours; field, 30 hours per quarter. Prerequisite(s): one upper-division undergraduate course in population or community ecology or paleoecology; or consent of instructor. Focuses on how ecological systems are interpreted and reconciled at the community, landscape, and paleontological scales. Addresses the role of extrinsic factors operating at each of these scales. Also examines the historical development of our understanding of ecological systems at various scales. Cross-listed with EEOB 212, and ENTM 212.

**GEO 219 Theory of Systematics** 4 Lecture, 4 hours. Prerequisite(s): BIOL 112/BPSC 112/EMTM 112 or equivalent or consent of instructor. Examines topics developed around a series of classical and recent papers on the principles, philosophy, and methodology of modern systematics and phylogenetic methods. Cross-listed with EEOB 219, and ENTM 219.

**GEO 221 Electron Microscopy and Microanalysis** 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduction to electron microscopy and microanalysis of inorganic solids including minerals and synthetic materials. Students learn the physical principles, strengths, and limitations of the method. Laboratory provides hands-on experience with scanning and transmission electron microscopes and interpretation of images and data.

**GEO 223 Seminar in Geobiology** 1 Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Lectures, discussions and demonstrations by students, faculty and invited scholars on current research topics in Geobiology. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

**GEO 224 Sierran Studies: the Paleoclimate Record of the Sierra** 4 Field, 90 hours per quarter; term paper, 3 hours. Prerequisite(s): graduate standing. A study of climate change in the Sierra Nevada Mountains, extending from Precambrian glaciogenic sediments to modern glaciers. Utilizes field evidence to access the controls of climate and determine the resolution and limitations of the physical record. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as topics change to a maximum of 8 units.

**GEO 225A Geology of Carbonate Rocks** 4 Lecture, 2 hours; laboratory, 6 hours. Prerequisite(s): GEO 118; consent of instructor. Covers characterization, recognition, and interpretation of carbonate rocks. Laboratory work includes study of polished and thin sections of selected suites of rocks.

**GEO 225B Geology of Detrital Rocks** 4 Lecture, 2 hours; laboratory, 6 hours. Prerequisite(s): GEO 118; consent of instructor. Covers characterization, recognition, and interpretation of detrital rocks. Laboratory work includes study of polished and thin sections of selected suites of rocks.

**GEO 240 Seminar in Earthquake Processes and Geophysics** 1 Seminar, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Explores selected contemporary topics in the areas of earthquake and fault processes, geophysics, active tectonics, and seismology. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

**GEO 241 Advanced Field Geophysics** 14 Lecture, 10 hours; laboratory, 1 hours; field, 14 hours. Prerequisite(s): GEO 140; proficiency in a word processing, spreadsheet, or programming language. Advanced applications of modern geophysical field techniques to the solution of complex geological problems, using seismic reflection and refraction, electrical and electromagnetic, potential field, and well-logging methods.

**GEO 242 Numerical Methods and Modeling in the Geosciences** 4 Lecture, 3 hours; laboratory, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Covers numerical computing methods and their application to problems of geological and geophysical interest. Methods include linear least-squares, matrix factorization, decomposition and inversion, nonlinear optimization, and Monte Carlo analysis and data visualization and their implementation in the MATLAB language. Applications include time series analysis, seismic tomography, and geodetic data inversion. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

**GEO 243A Earthquake Physics** 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): GEO 144, MATH 010B, PHYS 040C, basic computer programming experience; or consent of instructor. MATH 046 is recommended. An exploration of the physics of the earthquake process. Focuses on processes controlling fault slip and friction mechanics, as well as modeling the space/time characteristics of earthquake occurrence. Utilizes theoretical/analytical tools and numerical models. Includes an independent project in computer modeling.

**GEO 243B Earthquake Physics** 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): GEO 144, MATH 010B, PHYS 040C or PHYS 040HC, basic computer programming experience; or consent of instructor. MATH 046 is recommended. An exploration of the physics of the earthquake process. Focuses on fault dynamics during the earthquake rupture and slip processes and its relationship to ground motion. Utilizes theoretical/analytical tools and numerical models. Includes an independent project in computer modeling.

**GEO 244 Space Geodesy** 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Covers the study of the shape and deformation of the Earth’s surface using satellite data (InSAR and GPS). Includes measuring topography and surface deformation; processing, visualization and interpretation of data; simple analytical and numerical deformation models; and applications of techniques to tectonic, volcanic, and non-tectonic problems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

**GEO 247 Structure, Composition and Evolution of the Solid Earth** 4 Lecture, 4 hours. Prerequisite(s): graduate standing or consent of instructor. Combines geophysical and geochemical principles to constrain formation, composition, structure, and dynamics of solid Earth from core to crust. Begins with building Earth from solar system materials. Investigates core formation and continental crust creation. Explores geophysical and geochemical consequences of plate tectonic processes. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

**GEO 248 Modern Field & Visualization Methods** 4 Lecture, 3 hours; laboratory, 2 hours; field, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Provides an introduction to state-of-the-art field and 3D visualization techniques with a multidisciplinary emphasis. Teaches digital field mapping methods exportable to geographic information system (GIS) and range imaging techniques to create 3D models. Includes opportunities to utilize student-collected UAV data and a 3D printer. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

**GEO 249 Tectonic Geomorphology and Quaternary Field Techniques** 4 Lecture, 2 hours; discussion, 1 hour; field, 30 hours per quarter. Prerequisite(s): GEO 101A or GEO 101B or GEO 162; graduate standing; or consent of instructor. Examines topics in tectonic geomorphology. Includes paleoseismology, geodesy, geochronology, landscape response, numerical modeling, and terrain analysis. Covers field techniques such as relative and calibrated dating analyses, section measurements, morpho- and lithostratigraphic analysis, and reconstruction of Quaternary events from landforms. Addresses map constructions in fluvial, lacustrine, glacial, coastal, and eolian environments.

**GEO 250 Graduate Seminar in Geological Sciences** 1 Seminar, 1 hour. Prerequisite(s): graduate student status. Oral reports by graduate students, faculty, and visiting scholars on current research topics in geological sciences. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.
GEO 251 (E-Z) Advanced Topics in Paleontology 3 to 5 Seminar, 3 hours; laboratory, hour. Prerequisite(s): graduate standing. Selected advanced topics in paleontology. Content varies from quarter to quarter. After consultation with the instructor, students enroll in only the seminar (3 units) or in both the seminar and laboratory (4-5 units). May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 12 units.

GEO 251I Advanced Topics in Invertebrate Paleontology 3 to 5 Seminar, 3 hours; laboratory, 0 to 6 hours. Prerequisite(s): consent of instructor. Selected advanced topics in invertebrate paleontology. Content varies from quarter to quarter. After consultation with the instructor, students enroll in only the seminar (3 units) or in both the seminar and laboratory (4-5 units). May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable.

GEO 252 Marine Paleocology 3 Lecture, 1 hour; discussion, 1 hour; two 1-day field trips. Prerequisite(s): graduate standing. Examines fundamental principles of paleoecology and the measurement of biodiversity, abundance, and biomass from the fossil record. Covers the significance of mass extinctions, diversification events, and environments on the Earth's changing marine ecosystem. Includes taphonomy, ichnology, and field studies. Course is repeatable to a maximum of 6 units.

GEO 253 Advanced Topics in Petrology and Geochemistry 3 to 5 Seminar, 3 hours; laboratory, 0 to 6 hours. Prerequisite(s): consent of instructor. Selected advanced topics from petrology and geochemistry of igneous, metamorphic, and sedimentary rocks. Course content varies from year to year. Course is repeatable to a maximum of 6 to 10 units.

GEO 254 Topics in Paleobiology 1 Seminar, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Explores selected contemporary topics in the area of paleobiology including evolutionary radiations, mass extinctions, paleoecology, biotic response to climate change, and the evolution of animals on planet Earth. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

GEO 255 Advanced Topics in Sedimentary Petrology 4 Seminar, 2 hours; laboratory, 6 hours. Prerequisite(s): GEO 225A, GEO 225B. Selected advanced topics from sedimentary petrology and physical stratigraphy. Course content varies from year to year. Course is repeatable.

GEO 256 Data Analysis For Geoscientists 4 Discussion, 3 hours; lecture, 1 hour. Prerequisite(s): graduate standing. A computer-based course that introduces Python with applications to Earth and Planetary Sciences. Topics include variables, data structures, loop, modules, object oriented programming, and the use of Python packages such as NumPy, Matplotlib, Pandas, ObsPy, and PyGMT to analyze and plot geophysical, geological, and climate data.

GEO 257 (E-Z) Advanced Topics in Geophysics 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing. Selected advanced topics from geophysics. Course content varies from quarter to quarter. Course is repeatable to a maximum of 12 units.

GEO 257E Geomagnetic Fields 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): consent of instructor. Covers issues in the study of geomagnetic fields from a geophysical perspective, including fundamentals of magnetohydrodynamics and plasma physics, internal and external sources of geomagnetic fields, structure and variability of the field, dynamo theory, and deep geomagnetic soundings. Course is repeatable to a maximum of 12 units.

GEO 257G Earthquake Prediction 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): consent of instructor. Reviews past and current efforts to predict earthquakes and the physics underlying those efforts. Covers laboratory experiments on rocks near failure, focused monitoring studies, probabilistic hazards modeling, and earthquake precursors. Course is repeatable to a maximum of 12 units.

GEO 257H Finite Element Methods 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): consent of instructor. Covers finite element methods to model geophysical phenomena. Topics include wave propagation, numerical fault dynamics, and hydrodynamics. Students complete a final project, which consists of writing a finite element code that solves a geophysical problem. Course is repeatable to a maximum of 12 units.

GEO 257I Inversion Theories 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): consent of instructor. Presents methods of parameter estimation applied to geophysical systems, with emphasis on underdetermined systems in earth sciences. Covers applications of network theory to inverse problems, Backus-Gilbert inversion, applications of geological information as constraints, regularization of inverse problems, least squares inversion, maximum likelihood inversion, tomography, and applications of inversion theory to potential fields, seismonology, and electromagnetic problems. Course is repeatable to a maximum of 12 units.

GEO 257K Rock Mechanics 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): consent of instructor. Covers the flow and fracture of rocks, including stress and deformation, brittle failure, frictional sliding, and high- and low-temperature flow in the laboratory or field. Course is repeatable to a maximum of 12 units.

GEO 259 Tectonics of California 4 Lecture, 2 hours; seminar, 2 hours. Prerequisite(s): consent of instructor. Geological, geophysical, and paleontological bases of interpreting tectonic development of California, with special emphasis on southern California. Interdisciplinary approach will be emphasized. Weekly reading assignments, active participation in discussions, and appropriate field and library research will be required. Participants will prepare two papers and give presentations.

GEO 260 Global Climate Change 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): PHYS 002C or PHYS 02HC or PHYS 040C or PHYS 040HC; or consent of instructor. Explores global climate change in historic and geologic time scales. Topics include ocean-atmosphere feedbacks, El Niño, Pacific decadal oscillation, anthropogenic CO2, volcanism, cosmic rays, polar ozone depletion, global climate modeling, stable isotopes. Ice house” Pleistocene climates, “greenhouse” climates of the Mesozoic and Tertiary, plate tectonics, and the “snowball” Earth.

GEO 261 Atmosphere, Ocean and Climate Dynamics Seminar 1 Discussion, 1 hour; extra reading, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Explores selected contemporary topics in the areas of atmospheric science, oceanography, climate dynamics, aerosol physics, and climate change through the twentieth and twenty-first centuries. Graded Satisfactory (S) or No Credit (NC).

GEO 262 Precambrian Geology 5 Lecture, 3 hours; seminar, 1 hour; field, 30 hours per quarter. Prerequisite(s): GEO 118 with a grade of C- or better; or equivalent; graduate standing; or consent of instructor. Explores the history of Earth from its origin to the late Neoproterozoic when animals evolved. Emphasizes sedimentary and geochemical records. Also discusses magmatic and tectonic evolution to provide an Earth Systems perspective. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

GEO 263 Organic and Petroleum Geochimistry 4 Lecture, 3 hours; seminar, 1 hour. Prerequisite(s): graduate standing; BIOL 010/GEO 003; CHEM 001C or equivalent; or consent of instructor. Explores the geologic fate of organic molecules in the sedimentary record, from fossil DNA to lipids. Addresses current analytical techniques used for detecting molecular fossils and for characterizing sedimentary organic matter. Covers topical applications of organic geochemical tools to archaeology, geobiology, paleoclimate and paleoenvironmental reconstruction, petroleum exploration, and cosmochemistry research. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

GEO 264 Biogeochemical Cycles Through Time 3 Lecture, 3 hours; two to three 2-day field trips. Prerequisite(s): BIOL 010/GEO 003; CHEM 001C or equivalent; GEO 001; GEO 002; or consent of instructor. A comprehensive exploration of the major biogeochemical cycles at and near Earth's surface. Emphasis is on microbially mediated cycling of elements and isotopes within diverse sedimentary environments and the cause-and-effect relationships with the ocean and atmosphere. Explores 4 billion years of biospheric evolution in light of these cycles. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.
GEO 265 Special Topics in Earth and Environmental Sciences 1 to 3 Seminar, 1 to 3 hours. Prerequisite(s): graduate standing. Involves oral presentations and small-group discussions of selected topics in the areas of biogeochemistry, global climate change, geomicrobiology, earth surface processes, and interplanetary life. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as content changes to a maximum of 10 units. Cross-listed with ENSC 265.

GEO 266 A Practical Introduction to Earth System Modeling and Dynamics 4 Lecture, 1 hour; discussion, 2 hours; laboratory, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduction to, and practical hands-on learning in, Earth system modelling and dynamics. Development of a variety of new computer skills and experience with data analysis and visualization techniques, and an understanding of climate, global carbon cycling, and marine ecology, plus past and future global change.

GEO 268 Seminar in Biogeography 4 Seminar, 2 hours; research, 6 hours. Prerequisite(s): graduate standing. Topics include Mediterranean ecosystems, fire ecology, naturalization of exotic species, succession and ecosystem steady state theory, and mapping of vegetation.

GEO 270 Fundamentals of Digital Signal Processing in Geosciences 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Introduction to the central concepts of digital signal processing that are routinely used in a range of disciplines in geosciences. Emphasizes understanding and implementations of theoretical concepts, methods, and algorithms. Includes Fourier series of periodic and non-periodic signals; linear systems; convolution; windowing; sampling; zero-padding; auto and cross-correlation; and digital filtering.

GEO 271 Global Seismology 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces the fundamentals of global earthquake seismology. Covers basic theory and concepts in seismology, seismic waves, and their applications to understand earthquake source and earth structure. Includes concepts and applications of observational seismology, earthquake imaging, foreshocks, aftershocks, and earthquake triggering.

GEO 272 Array Seismology 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces fundamentals of array techniques. Covers concepts and design of seismic array, techniques of array data processing, and applications. Includes hands-on training with state-of-the-art seismometers. Emphasizes the array methods and their applications to image earthquake source leading to the understanding of earthquake dynamics and underlying physics.

GEO 280 Planetary Habitability 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Covers terrestrial planet discoveries and studies of what makes a planet habitable. Topics include habitability factors, planetary atmospheres and interiors, the role of magnetic fields, Milankovitch and geological cycles, biosignatures, and a detailed look at what can be learned from solar system bodies.

GEO 283 Graduate Seminar in Astrobiology 1 Seminar, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Offers lectures, discussions, and reports by students, faculty, and invited scholars on current research topics in Astrobiology. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

GEO 284 Planetary Atmospheres 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. A quantitative overview of the atmospheric structure, composition, climate, evolution, and circulation of planets within and outside the solar system. Focus areas include hydrostatic equilibrium, convection and lapse rates, photochemistry, escape processes, radiative transfer and spectroscopy, atmospheric formation, and basic fluid mechanics applied to circulation. Credit is awarded for one of the following GEO 284 or GEO 184.

GEO 290 Directed Studies 1 to 6 Prerequisite(s): consent of instructor. Research and special studies in the geological sciences. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

GEO 297 Directed Research 1 to 6 Prerequisite(s): consent of instructor. Research for individual graduate students in geological sciences. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

GEO 299M Research For Master’s Thesis 1 to 12 Research, 3 hours per unit. Prerequisite(s): consent of instructor. Thesis research. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

GEO 299P Research For Dissertation 1 to 12 Research, 3 hours per unit. Prerequisite(s): consent of instructor. Research for dissertation, arranged in consultation with the staff. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

GEO 301 Teaching of Geosciences at the College Level 1 Seminar, 1 hour. Prerequisite(s): graduate standing in Geological Sciences. A program of weekly meetings and individual formative evaluation required of new Teaching Assistants for Geosciences courses. Covers instructional methods and classroom/section activities most suitable for teaching Geosciences. Conducted by the Teaching Assistant Development Program. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

GEO 302 Teaching Practicum 1 to 4 Seminar, 1 to 4 hours; practicum, 2 to 8 hours. Prerequisite(s): restricted to those graduate students appointed as Teaching Assistants. Supervised teaching of upper and lower-division courses in Geosciences. Required of all Teaching Assistants. Graded Satisfactory (S) or No Credit (NC). Course is repeatable for credit, but units not applicable toward degree unit requirements.

Economics

Subject abbreviation: ECON
College of Humanities, Arts, and Social Sciences
Marcelle Chauvet, Ph.D., Chair
Department Office, 4133 Sproul
(951) 827-1470; economics.ucr.edu

Professors
Richard Arnott, Ph.D., Distinguished Professor (in memoriam)
Marcelle Chauvet, Ph.D.
Anil B. Deolalikar, Ph.D.
Ozkan Eren, Ph.D.
Gloria González Rivera, Ph.D.
Jang-Ting Guo, Ph.D.
Steven M. Helfand, Ph.D.
Tae-Hwy Lee, Ph.D.
Siyang Xiong, Ph.D.

Professors Emeriti
Taradas Bandopadhyay, Ph.D.
Susan B. Carter, Ph.D.
Ronald H. Chilcote, Ph.D.
Gary A. Dymski, Ph.D.
David H. Fairris, Ph.D.
Keith B. Griffin, Ph.D., Distinguished Professor
Azizur R. Khan, Ph.D.
Victor D. Lippit, Ph.D.
David Malueg, Ph.D.
Prasanta K. Patlanaik, Ph.D.
Roger L. Ransom, Ph.D., Distinguished Professor
Howard J. Sherman, Ph.D., Jur.D.
Aman Ullah, Ph.D., Distinguished Professor

Associate Professors
Urmee Khan, Ph.D.
Dongwon Lee, Ph.D.
Hirokichi Nishimura, Ph.D.
Victor Ortego-Marti, Ph.D.
Ugo Antonio Troiano, Ph.D.
Yang Xie, Ph.D.

Assistant Professors
Michael D. Bates, Ph.D.
Joseph Cummins, Ph.D.
Sarojini Hirshleifer, Ph.D.
Ruoyao Shi, Ph.D.

Professors of Teaching
Bree J. Lang, Ph.D.
Matthew D. Lang, Ph.D.

Associate Professor of Teaching
Joab N. Corey, Ph.D.

Assistant Professor of Teaching
Veronica T. Sobero, Ph.D.

Cooperating Faculty
Kenneth A. Baerenklau, Ph.D.
(Environental Sciences)
Ariel Dinar, Ph.D. (Environmental Sciences)
Kurt A. Schwabe, Ph.D.
(Environental Sciences)
### Majors
Economics studies the production and distribution of goods and services, as well as the way in which productive activity helps shape social existence. Economists are concerned with the factors determining national income, inflation, unemployment, output, growth and inequality (macroeconomics), as well as the behavior of individual decision-making units such as households and firms (microeconomics). Economists are also concerned with the role of markets, money and interest rates, the forces affecting international trade, and many other problems of production and distribution.

Economics is the basis for many careers, some of which require only a B.A. degree while others require more advanced work. Possible careers include, but are not limited to, business, government, education and law.

Students in the Economics Department can choose from four degree programs. The B.A. is the most general degree offered. It is appropriate background for a wide variety of purposes, including graduate study and professional schools. However, those planning to attend a graduate program in economics may need more quantitative training than the B.A. requires. Students who are considering attending a graduate program in economics should consult with their undergraduate advisor. The department offers the B.A. degree in a joint program with Administrative Studies for students that would like to partner their economics training with courses in general business fields. The department also offers the B.A. degree in a joint program with Law & Society for students who would like to prepare to attend law school or work in the public sector. The Business Economics B.A. degree guides students to take economic courses that will provide more specific preparation for careers in business administration or management or for graduate work in business.

### Transfer Admissions
Students transferring as juniors or seniors to UCR into any of the Economics majors must have completed a calculus course equivalent to UCR’s Math 9A.

### University Requirements
See Undergraduate Studies section.

### College Requirements
See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

MATH 009A and MATH 009B may also be used to meet breadth requirements.

### Major Requirements
The Economics Department offers B.A. degrees in Economics, Business Economics, Economics/Administrative Studies, and Economics/Law and Society.

### Change of Major Criteria for ECON and BSEC:
Students must be in good academic standing at the time the Change of Major Petition is filed. AP/IB units are excluded from the maximum unit calculation. All courses listed below must be completed with grades of C- or better.

- **0 – 45 earned units:**
  - MATH 006A or higher

- **45 – 89 earned units:**
  - ECON 002 or ECON 003 and MATH 006B or MATH 005A or higher

- **90+ earned units:**
  - ECON 002, ECON 003, and MATH 009A or equivalent

### Change of Major Criteria for ECAT:
Students must be in good academic standing at the time the Change of Major Petition is filed. AP/IB units are excluded from the maximum unit calculation.

- **0 – 45 earned units:**
  - MATH 006A or higher with a grade of C- or better

- **45 – 89 earned units:**
  - ECON 002 or ECON 003 and MATH 006B or MATH 005 or higher with grades of C- or better

- **90+ earned units:**
  - ECON 002 and ECON 003 with grades of C- or better, and MATH 009A or equivalent

### Change of Major Criteria for ECLW:
Students must be in good academic standing at the time the Change of Major Petition is filed.

- **ECON 002 and ECON 003 with grades of C- or better, MATH 009A or equivalent, and LWSO 100 with a grade of “C” or better**

### Business Economics Major
The major requirements for a B.A. degree in Business Economics are as follows:

1. **Lower-division requirements (five courses [at least 22 units]):**
   - BUS 010, BUS 020
   - STAT 008 or equivalent (may be used to satisfy breadth requirements)

2. **Upper-division requirements (20 courses [at least 66 units]):**
   - Two courses (8 units) from the list below:
     - ECON 102 or ECON 103 or ECON 104A or ECON 130 or ECON 162/BUS 162
     - PSYC 140 or PSYC 142

### Economics/Administrative Studies Major
In order to receive a B.A. degree in Economics/Administrative Studies students must fulfill the following requirements:

- **Economics requirements (12 courses, 55 units):**
  - ECON 002 or ECON 002H, ECON 003 or ECON 003H with grades of C- or better
  - ECON 104A, ECON 104B, ECON 105A

- **Four additional upper-division courses in Economics worth 4 or 5 units each, including at least two that have either ECON 104A or ECON 105A or ECON 107 as a prerequisite. ECON 102, 103, and 190 cannot be used to meet this requirement.**

- **ECON 101, ECON 107
  - One of MATH 009A, MATH 009HA, or equivalent**

### Note:
- Up to 4 units of internship credit may be counted toward the upper-division electives in Business Economics.

### Economics/Administrative Studies Major Requirements (37 units)

1. **Lower-division courses (17 units):**
   - BUS 010, BUS 020
   - STAT 008 or equivalent (may be used to satisfy breadth requirements)

2. **Upper-division requirements (20 units):**
   - Two courses (8 units) from the list below:
     - ECON 102 or ECON 103 or ECON 104A or ECON 130 or ECON 162/BUS 162
     - PSYC 140 or PSYC 142
(3) SOC 150 or SOC 151
(4) POCS 181 or POCS 182 or POCS 183 or POCS 186
(5) ANTH 127 or ANTH 127S or ANTH 131

These two courses must be outside the discipline of Economics and cannot be courses included as part of the three-course Business Administration track or their cross-listed equivalents.

b) A three-course track (12 units) in Business Administration courses from one of the following:
   (1) Organizations (General): BUS 100 or BUS 100W, BUS 107, BUS 158/ANTH 105, BUS 176/SOC 176, SOC 150, SOC 151
   (2) Human Resources Management/Labor Relations: BUS 100 or BUS 100W, BUS 107, BUS 121, BUS 144, BUS 145, BUS 153/ECON 153, BUS 155, BUS 156, BUS 157, PSYC 142
   (3) Business and Society: BUS 100 or BUS 100W, BUS 102, BUS 107, PHIL 116, POSC 182, POSC 186
   (4) Marketing: BUS 103, and two from BUS 111, BUS 112, BUS 113, BUS 114, BUS 115, BUS 116, BUS 117, BUS 118, BUS 119, BUS 124, BUS 126, BUS 151, BUS 152, BUS 159, BUS 164
   (5) Managerial Accounting/Taxation: BUS 108, and two from BUS 166, BUS 168A, BUS 168B
   (7) Finance: BUS 106/ECON 134 and two from BUS 131, BUS 132, BUS 134, BUS 135, BUS 136, BUS 137, BUS 138, BUS 139 BUS 140E, BUS 141, BUS 147
   (8) Management Information Systems: BUS 101, BUS 110, BUS 125, BUS 128, BUS 171, BUS 172, BUS 173, BUS 174, BUS 175, BUS 179
   (9) Production Management: BUS 104/STAT 104, and two from BUS 105, BUS 122, BUS 127/STAT 127

Note: In filling the dual requirements of the major students may not count more than two courses toward both parts of their total requirements. (This limitation applies to specified Economics requirements and specified Administrative Studies requirements, but does not apply to the required Mathematics and Statistics courses.)

Economics/Law and Society Major
The Law and Society major is open to undergraduate students with junior standing who have completed LWSO 100 with a grade of “C” or higher. The major requirements for the B.A. degree in Economics/Law and Society are as follows:

1. Economics requirements (11 courses (at least 49 units))
   a) ECON 002 or ECON 002H, ECON 003 or ECON 003H with grades of C- or better
   b) ECON 119
   c) ECON 104A, ECON 104B, ECON 105A
   d) Five additional upper-division courses in Economics worth 4 or 5 units each, including at least two that have either ECON 104A or ECON 105A or ECON 107 as a prerequisite. ECON 107 may be chosen as an advanced elective. ECON 102, 103, and 190 cannot be used to meet this requirement.

Note: Up to 4 units of internship credit may be counted toward the upper-division elective courses in Economics.

2. Law and Society requirements (36 units)
   a) PHIL 007 or PHIL 007H
   b) LWSO 100 (with a grade of “C” or better)
   c) One course chosen from POSC 114, PSYC 012, SOC 004 (or equivalent course in research methods)
   d) Three courses chosen from ANTH 127, ECON 119, HISE 153, PHIL 165, POSC 167, PSYC 175, SOC 159
   e) Two courses chosen from HISA 120A, HISA 120B, HISE 123, LWSO 175 (E-Z), PHIL 164, POSC 111, POSC 166, POSC 168, POSC 186, SOC 147, SOC 149, SOC 180
   f) LWSO 193, Senior Seminar

Note: For sections 2.d) and 2.e) combined, not more than two courses may be taken from the same department. In filling the dual requirements of the major, students may not count more than two courses toward both parts of their total requirements. (This limitation applies to specified Economics requirements and Law and Society requirements.)

Minor
The minor in Economics provides a background in this discipline. Students take basic microeconomic and macroeconomic theory courses, and then are given freedom of choice in pursuing upper-division courses of great interest.

All candidates for the minor in Economics must take

1. Lower-division requirements (14 units):
   a) ECON 002 or ECON 002H and ECON 003 or ECON 003H with grades of C- or better
   b) One of MATH 009A, MATH 009HA, or equivalent

2. Upper-division requirements (at least 26 units):
   a) ECON 102 or ECON 104A, ECON 103 or ECON 105A
   b) Four additional upper-division courses (at least 16 units) in Economics

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Graduate Program
The Department of Economics offers the M.A. and Ph.D. degrees in Economics.

The graduate Economics program is designed to prepare students for research and teaching in academic institutions as well as for positions in government, international agencies, and the private sector.

Admission
Students are normally admitted only in the fall quarter. Applicants should apply electronically, at graduate.ucr.edu. Students submit the completed application, GRE scores, three letters of recommendation (from persons familiar with the student’s academic work), and transcripts in duplicate of previous academic work.

Master’s Program
There are two tracks to the M.A. degree. Track I (applied economics) has a capstone project requirement. Track II (economic theory) has a cumulative examination requirement. Students interested in Track I (applied economics) should apply for admission to the M.A. degree program. Students should have at least two courses in calculus, a course in statistics, and some upper-division economics courses, but exceptions will be considered for students whose applications have offsetting strengths. Admission to the Master of Arts degree program does not guarantee later admission to the Ph.D. program. Those interested in Track II (economic theory) should apply for admission to the Ph.D. program.

Doctoral Program
The department encourages applicants from a variety of backgrounds, but a good understanding of intermediate microeconomics, intermediate macroeconomics, multivariate calculus, and elementary linear algebra is necessary to begin taking the core requirements, described below. In addition, two courses in basic probability and statistics or econometrics are required before beginning the core econometrics sequence. Students who do not satisfy the requirements, or who have been out of school for several years, should consider enrolling in the one-year M.A. program.

Master of Arts Degree
Master of Arts, Track I: Applied Economics
The M.A. with a concentration in applied economics is a one-year program designed primarily for students who intend to work as economists immediately after receiving the degree. It requires 42 quarter units of graduate (200-level) or upper-division undergraduate coursework, which includes a capstone project, as detailed below, with an overall GPA of 3.0.

Core Requirements

Professional Development Requirements
(2 units) Students must complete ECON 217 (Professional Development).

Capstone Project (4 units)
Students must complete a capstone project, taken as two courses ECON 218A, 218B (Capstone 1 and 2).
Field Requirements
Students must complete at least three 4-unit field courses from any of the fields, with at least two from ECON, from among the following:

1. Business and Finance:
   a) ECON 219 (Financial Economics)
   and one from
   b) MGT 202 (Financial Management) or
   c) MGT 227 (Fixed-Income Securities and Markets)

2. Applied Econometrics and Data Analysis:
   a) ECON 220 (Big Data in Economics)
   b) ECON 221 (Forecasting for Economics Finance, and Business)
   c) STAT 208 (Statistical Data Mining Methods)
   d) PBPL 273 (Geographic Information Systems (GIS) For Public Policy)

3. Economics and Public Policy:
   a) ECON 222 (Public Economics)
   b) ECON 225 (Urban Economics)
   c) ECON 226 (Applied Environmental Economics)
   d) ECON 227 (Cost-Benefit Analysis)
   e) ECON 228 (Behavioral and Experimental Economics)
   f) PBPL 224 (Global-Local Policy Connections: Case Studies in Poverty, Water, and Sustainable Development)
   g) PBPL 233 (Environmental Economics)
   h) PBPL 236 (E-Z) (Urban and Spatial Analyses)

4. Mathematical Economics:
   a) ECON 229 (Mathematical Economics)
   and one from
   b) MATH 120 (Optimization) or
   c) MATH 121 (Game Theory) or
   d) MATH 144 (Introduction to Set Theory)

5. Development Economics:
   a) ECON 230 (Economic Development Theory, Applications, and Policy)
   b) ECON 231 (Randomized Evaluation in Development Policy)

Students who complete two courses within one of the five fields may choose to add the corresponding concentration to their degree in addition to the concentration in Economic Theory. The Ph.D. is designed for students who aim to pursue research careers in academic institutions, government, international agencies, and the private sector. Students first complete a core curriculum in economic theory and quantitative methods. These courses provide training in the fundamental concepts and research methods of the discipline. Following demonstration of professional competence in the core areas, students specialize in theoretical or applied areas of economics. This leads to the development of independent research and the writing of the Ph.D. dissertation.

Core Requirements
Students must complete the following six courses:

1. Econometrics:
   a) ECON 285E (Advanced Econometric Methods)
   b) ECON 285F (Topics in Econometrics)
   c) ECON 285G (Applied Econometrics)
   d) ECON 285I (Macroeconometrics)
   e) ECON 285J (Rational Choice Theory)
   f) ECON 285K (Microeconometrics)

2. Macroeconomic Theory:
   a) ECON 282E (Foundations of Macroeconomics)
   b) ECON 282F (Advanced Monetary Theory)
   c) ECON 282G (Special Topics in Macroeconomic Theory)

3. Microeconomic Theory:
   a) ECON 283E (Rational Choice Theory)
   b) ECON 283F (Measurement and Aggregation in Economics)
   c) ECON 283G (General Equilibrium)
   d) ECON 283I (Social Choice and Welfare)
   e) ECON 283J (Uncertainty and Information)
   f) ECON 283K (Special Topics in Microeconomic Theory)
   g) ECON 283N (Application of Games and Information Economics)

4. Development Economics:
   a) ECON 260 (Theories of Economic Development)
   b) ECON 261 (Contemporary Development Strategies)
   c) ECON 262 (Investment, Productivity, and Organizations in Developing Countries)
   d) ECON 263 (Health, Labor and Human Capital in Developing Countries)
   e) ECON 264 (Topics in Economic Development)
   f) ECON 265 (Agricultural and Rural Development)

5. International Trade Theory/International Finance:
   a) ECON 234 (International Trade Theory)
   b) ECON 235 (Topics in International Trade Theory)
   c) ECON 236/POSC 215 (Political Economy of International Finance)
   d) ECON 237 (Topics in International Finance)

6. Labor Economics:
   a) ECON 240 (Labor Demand)
   b) ECON 241 (Labor Supply)
   c) ECON 242 (Labor Market Equilibrium)
   d) ECON 243 (Topics in Labor)
   e) ECON 244 (Empirical Research Methods)

7. Money, Credit and Business Cycles:
   a) ECON 250 (Money, Credit, and the Macroeconomy)
   b) ECON 251 (Business Cycle Theory)
   c) ECON 254 (Topics in Money, Credit, and Business Cycles)

8. Resource and Environmental Economics:
   a) ECON 207 (Environmental Economics)
   b) ECON 208 (Natural Resource Economics)
   c) ECON 209 (Nonmarket Valuation and Environmental Policy)
   d) ECON 210 (E-Z) (Topics in Environmental Economics)

9. Public Economics:
   a) ECON 246 (Introduction to Public Economics)
   b) ECON 247 (Topics in Public Economics)
   c) ECON 248 (Topics in Political, Comparative, and Institutional Economics)

Doctoral Degree

The M.A. with a concentration in economic theory is awarded to students who have made sufficient progress towards meeting the core coursework and cumulative examination requirements of the Ph.D. program. It is awarded only to students admitted to the Ph.D. program. It requires 42 quarter units of coursework, 28 of which must be at the graduate (200) level, as detailed below, with an overall GPA of 3.0 and at least a master's level pass on a Ph.D. cumulative examination in either microeconomic theory or macroeconomic theory.

Master of Arts, Track II:
Economic Theory

The M.A. with a concentration in economic theory is awarded to students who have made sufficient progress towards meeting the core coursework and cumulative examination requirements of the Ph.D. program. It is awarded only to students admitted to the Ph.D. program. It requires 42 quarter units of coursework, 28 of which must be at the graduate (200) level, as detailed below, with an overall GPA of 3.0 and at least a master's level pass on a Ph.D. cumulative examination in either microeconomic theory or macroeconomic theory.

Core Requirements
Students must complete the following:

1. Economic Theory
   a) ECON 200A, ECON 200B, ECON 200C (Microeconomic Theory)
   b) ECON 201A, ECON 201B, ECON 201C (Macroeconomic Theory)
All students must pass two cumulative examinations: one in microeconomic theory (covering topics encompassed in the course sequence ECON 200A, ECON 200B, and ECON 200C) and one in macroeconomic theory (covering the topics in ECON 201A, ECON 201B, ECON 201C). Both examinations are given at the end of the first year, and at the beginning of the fall quarter. After completing the sequence of courses, students must sit for each examination at each offering until they have passed the requirement. An unexcused failure to sit for a required examination will be regarded as a failure. All students can have two attempts. Only students who pass at least one of the exams in the first or second attempts can have a third attempt in the other failed exam. No student will be given more than three attempts to achieve a satisfactory grade on each one of the two examinations.

2. Quantitative Methods

Students must complete the following: ECON 205A, ECON 205B, ECON 205C (Econometric Methods I, II, III). To satisfy these course requirements, students must attain a “B” average in the sequences.

Colloquium and Paper Requirement

Students must enroll in at least one offering of ECON 289A (Colloquium in Economics) each quarter of their first year and at least one offering of ECON 289B each quarter of their formal residence from the second year on. In addition, students must write a well-rounded research paper before the beginning of their fourth year. The research paper will be evaluated by members of the oral qualifying examination committee or members of the dissertation committee, if already formed. Students must give a presentation on their thesis research by the end of Spring of their fourth year. Students must also present their job market paper in the Fall or Winter of their fifth year.

Field Requirements

By the end of the second year of the program, All students must:

i. complete course work in a major field consisting of three courses.

and

ii. take six additional field courses in any of the fields.

Students must pass a comprehensive examination in their field. Comprehensive examinations in each major field are given twice a year. After completing the major field courses, students must take the next scheduled examination. The exams are given by the end of Summer and if necessary, at the end of Fall quarter. All students can have a maximum of two attempts in a given field, and can take field exams in no more than two fields, after completing their respective field courses.

1. Advanced Econometrics

Students must complete the courses a) and b) and one of the courses from c), d), e), or f) listed below.

- a) ECON 285E (Advanced Econometric Methods)
- b) ECON 285F (Topics in Econometrics)
- c) ECON 285G (Applied Econometrics)
- d) ECON 285I (Macroeconomics)
- e) ECON 285J (Nonparametric Econometrics)
- f) ECON 285K (Microeconomics)

2. Advanced Macroeconomic Theory

Students must complete the following:

- ECON 282A (Foundations of Macroeconomics)
- ECON 282B (Advanced Monetary Theory)
- ECON 282C (Special Topics in Macroeconomic Theory)

3. Advanced Microeconomic Theory

Students must complete three of the following with at most one from ECON 246, 247, and 248:

- ECON 246 (Introduction to Public Economics)
- ECON 247 (Topics in Public Economics)
- ECON 248 (Topics in Political, Comparative, and Institutional Economics)
- ECON 283A (Rational Choice Theory)
- ECON 283B (Measurement and Aggregation in Economics)
- ECON 283C (General Equilibrium)
- ECON 283D (Social Choice and Welfare)
- ECON 283E (Uncertainty and Information)
- ECON 283F (Special Topics in Microeconomic Theory)
- ECON 283G (Application of Games and Information Economics)

4. Development Economics

Students must complete three of the following:

- ECON 260 (Theories of Economic Development)
- ECON 261 (Contemporary Development Strategies)
- ECON 262 (Investment, Productivity, and Organizations in Developing Countries)
- ECON 263 (Health, Labor and Human Capital in Developing Countries)
- ECON 264 (Topics in Economic Development)
- ECON 265 (Agricultural and Rural Development)

5. International Trade Theory/International Finance

Students must complete three of the following:

- ECON 234 (International Trade Theory)
- ECON 235 (Topics in International Trade Theory)
- ECON 236/POSC 215 (Political Economy of International Finance)
- ECON 237 (Topics in International Finance)

6. Labor Economics

Students must complete the following two courses:

- ECON 240 (Labor Demand)
- ECON 241 (Labor Supply)

And one of the following:

- ECON 242 (Labor Market Equilibrium)
- ECON 243 (Topics in Labor)
- ECON 244 (Empirical Research Methods)

7. Money, Credit, and Business Cycles

Students must complete three of the following:

- ECON 250 (Money, Credit, and the Macroeconomy)
- ECON 251 (Business Cycle Theory)
- ECON 254 (Topics in Money, Credit, and Business Cycles)

8. Resource and Environmental Economics

Students must complete three of the following:

- ECON 207 (Environmental Economics)
- ECON 208 (Models of Nonrenewable Resource Management)
- ECON 209 (Models of Renewable Resource Management)
- ECON 210 (Topics in Environmental Economics)

9. Public Economics

Students must complete either the following three courses:

- ECON 246 (Introduction to Public Economics)
- ECON 247 (Topics in Public Economics)
- ECON 248 (Topics in Political, Comparative, and Institutional Economics)

or two of the above and any one of the following courses:

- ECON 283A (Rational Choice Theory)
- ECON 283B (Measurement and Aggregation in Economics)
- ECON 283C (General Equilibrium)
- ECON 283D (Social Choice and Welfare)
- ECON 283E (Uncertainty and Information)
- ECON 283F (Special Topics in Microeconomic Theory)
- ECON 283G (Application of Games and Information Economics)

Not all of these fields and courses are offered every year; offerings depend primarily on student demand. As the department faculty expands, other fields may be added.
Oral Qualifying Examination
Students must pass an oral qualifying examination, which covers a dissertation prospectus and subject matter related to the student’s major field and other field courses. It is given by a committee of five faculty members, at least one of whom is not a Department of Economics faculty member. Students are required to take the examination by the end of the third year.

Dissertation and Final Examination
The final requirement is the completion of a dissertation, under the direction of a dissertation committee, and passing a final examination on the dissertation. The dissertation committee is normally composed of three Department of Economics faculty members (including cooperating faculty), usually chosen from the oral qualifying examination committee. Students who enter the program fully prepared normally complete the dissertation by the end of the fifth year. Students are encouraged to present a dissertation prospectus to a meeting of ECON 289 in their third year.

Lower-Division Courses
ECON 002 Introduction to Macroeconomics
Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): None. An introduction to the study of the economic system from a macro, or aggregate, perspective. Includes analysis of business cycles, economic growth, unemployment, inflation, and the impact of government policies on the level of economic activity. Credit is awarded for one of the following ECON 002 or ECON 002H.

ECON 002H Honors Introduction to Macroeconomics
Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): None. An introduction to the study of the economic system from a macro, or aggregate, perspective. Includes analysis of business cycles, economic growth, unemployment, inflation, and the impact of government policies on the level of economic activity. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of ECON 002 or ECON 002H.

ECON 003 Introduction to Microeconomics
Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): None. An introduction to the study of the economic system from the micro, or individual decision-maker’s, perspective. Includes the study of opportunity cost, markets, consumption, production, and competition. Credit is awarded for one of the following ECON 003 or ECON 003H.

ECON 003H Honors Introduction to Microeconomics
Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): Permission to University Honors or consent of instructor. An introduction to the study of the economic system from a micro, or individual decision-maker’s, perspective. Includes the study of opportunity cost, markets, consumption, production, and competition. Satisfactory (S) or No Credit (NC) grading is not available. Credit is only awarded for one of ECON 003 or ECON 003H.

ECON 005 Data Analysis For Economics and Business
Lecture, 3 hours; research, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 002 or ECON 002H; ECON 003 or ECON 003H; or consent of instructor. Introduction to the sources of economic and business data and data analysis using graphs, plots, computers, and descriptive statistics. Also covers index numbers, measures of inequality, and simple regression analysis.

ECON 006 Introduction to Environmental Economics
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): None. An introduction to the basic principles of economics and their application to problems of environmental quality and natural resource utilization. Emphasis is on the failure of markets as a cause of environmental degradation and the role of government in resolving problems of resource scarcity. Does not satisfy the Natural Science breadth requirement for the College of Humanities, Arts, and Social Sciences. Cross-listed with ENSC 006.

ECON 060 Engineering Economics 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 09HA. Covers economic decisions involving engineering alternatives. Topics include time value of money, annual cost, present worth, rate of return, and benefit-to-cost. Addresses before and after tax replacement economy, organizational financing, break-even analysis, risk analysis, and capital budgets. Cross-listed with ENGR 060.

ECON 101 Statistics For Economics
Lecture, 3 hours; discussion, 1 hour; laboratory, 1 hour; individual study, 2 hours. Prerequisite(s): MATH 005B or MATH 007A or MATH 009A or MATH 022; or equivalent. An introduction to the basic statistical methods for economics. Topics include economic data analysis, index numbers, univariate and bivariate probability distributions, correlation and regression, sampling distributions, properties of estimators, and hypothesis testing.

ECON 102 Intermediate Microeconomics
Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ECON 003 or ECON 003H; MATH 007A or MATH 009A or MATH 09HA or MATH 022. A comprehensive overview of the competitive market system. Includes the modern utility theory of consumer behavior, firm behavior in product and factor markets, and monopoly. Emphasizes theoretical applications to business enterprises. Intended for students planning to major in Business Administration. Credit is awarded for one of the following ECON 102 or ECON 104A.

ECON 103 Intermediate Macroeconomics
Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ECON 002 or ECON 002H. Covers the theory of income, employment, price level and the role of the international environment. Includes fiscal and monetary policy. Intended for students planning to major in Business Administration. Credit is awarded for one of ECON 103 or ECON 105A.

ECON 104A Intermediate Microeconomic Theory
Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ECON 003 with a grade of C- or better or ECON 003H with a grade of C- or better, MATH 007A or MATH 009A or MATH 09HA. A calculus-based course that develops theories of consumers and firms. Provides the foundation for partial equilibrium study of competitive markets. Explores welfare properties of competitive markets. Credit is awarded for one of the following ECON 104A or ECON 102.

ECON 104B Intermediate Microeconomic Theory
Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ECON 102 with a grade of C- or better or ECON 104A; MATH 005B or MATH 007A or MATH 009A or MATH 09HA; or consent of instructor. A continuation of ECON 104A that covers monopoly, oligopoly, externalities, and public goods. Develops elementary concepts of game theory. May also cover information economics and economics of uncertainty.

ECON 104C Intermediate Microeconomic Theory
Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ECON 104B with a grade of C- or better; or consent of instructor. Extends the partial equilibrium theories of markets and market failure developed in ECON 104A and ECON 104B to factor markets, other market structures, uncertainty and asymmetric information, and time. Develops general equilibrium analysis of the entire economy including welfare economics. Includes many illustrative policy applications.

ECON 105A Intermediate Macroeconomic Theory
Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ECON 002 with a grade of C- or better or ECON 002H with a grade of C- or better. Examines the determination of the equilibrium level of national income and its allocation among households, firms, and government. Develops theoretical models that describe how employment, production, and inflation are determined. Focuses on the impact of government policies, as well as the current developments on these issues. Credit is awarded for one of the following ECON 105A or ECON 103.

ECON 105B Intermediate Macroeconomic Theory
Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ECON 103 with a grade of "C" or better or ECON 105A. ECON 104A is recommended. A continuation of ECON 103 or ECON 105A. Investigates developments in macroeconomic theory and events. Presents models that explain economic growth and business cycle fluctuations. Explores their empirical relevance and policy implications.

ECON 106 Data Analysis in Economics
Lecture, 3 hours; laboratory, 1 hour; individual study, 2 hours; term paper, 1 hour. Prerequisite(s): ECON 101. An introduction to data analytics, visualization, and interpretation. Includes collecting, cleaning, and preparing data for analysis. Uses data to generate and interpret meaningful displays of quantitative and qualitative data. Emphasizes data visualization.
ECON 107 Introductory Econometrics 5
Lecture, 3 hours; discussion, 1 hour; laboratory, 1 hour; research, 1 hour; written work, 1 hour. Prerequisite(s): ECON 002 or ECON 002H; ECON 003 or ECON 003H; ECON 101; or consent of instructor. An introduction to the basic tools of econometrics. Focuses on the issues relating to the linear regression model, including heteroskedasticity, serial correlation, and multicollinearity.

ECON 108 Introductory Econometrics 5
Lecture, 3 hours; discussion, 1 hour; laboratory, 1 hour; written work, 1 hour; research, 1 hour. Prerequisite(s): ECON 107; or consent of instructor. A continuation of ECON 107. Covers, at an introductory level, the basic concepts related to regression and probit models, panel data methods, instrumental variables, treatment effects, differences in difference models, and simultaneous equations models, among others. Extensive use of econometrics computer software.

ECON 109 Forecasting in Business and Economics 5
Lecture, 3 hours; discussion, 1 hour; laboratory, 1 hour; written work, 2 hours. Prerequisite(s): ECON 002 or ECON 002H or ECON 003 or ECON 003H; ECON 107; or consent of instructor. Provides a basic knowledge of forecasting and its applications, particularly by using business and economic data. Covers basic methods of forecasting such as regression methods, exponential smoothing algorithms, and autoregressive integrated moving average (ARIMA) methods. Also explores how to combine and evaluate various forecasts. Uses computer analysis extensively.

ECON 110 Mathematical Economics 5
Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ECON 104B, MATH 010A, MATH 031. Covers calculus-based and set-theoretic-based mathematical concepts and techniques used in advanced economic analysis, such as optimization theory, probability, expected utility theory, and their applications.

ECON 116 Foundations of Political Economy 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): restricted to class level standing of junior or senior. Examines the economic roles of the public sector. Pays particular attention to issues of market failure; government challenges in overcoming market failures; redistributing income; the financing of public sector activities; relationships between federal, state, and local governments; and public choice.

ECON 117 Economics and Philosophy 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 104B or consent of instructor. Examines issues on the boundary of economics and philosophy. Topics include social choice theory and economic justice; foundations of utility theory, rational choice, and economic welfare; and epistemology and the philosophies of science of Popper, Kuhn, and others. Cross-listed with PHIL 119.

ECON 119 Law and Economics 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 003 or ECON 003H; or consent of instructor. Examines issues at the intersection of law and economics. Presents the tools needed for an economic analysis of law. Applies the tools to understand the economic logic of the law, especially property, contract, tort, and antitrust law.

ECON 123 American Economic History 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 002 or ECON 002H; ECON 003 or ECON 003H. Examines the economic history of the United States with an emphasis on the incentives and events surrounding the colonization of modern day United States, the American Revolution, economic growth and expansion throughout the 1800’s, the American Civil War, and other major historical events leading up to the present. Cross-listed with HISA 123.

ECON 124 World Economic History 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 002 or ECON 002H; ECON 003 or ECON 003H. Examines economic history with a focus on the innovations, institutions, and events that have helped shape the modern day world.

ECON 125 History of Economic Thought 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 002 or ECON 002H; ECON 003 or ECON 003H. Study of the development of major economic theories, including those of Adam Smith, Karl Marx, and John Maynard Keynes. Focus is on how alternative theories define and address economic problems differently and the policy implications that follow.

ECON 129 Health Economics 4
Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): ECON 102 or ECON 104A. Analyzes the demand and supply of health care. Uses economic models to analyze health care choices of individuals. Covers the market for health insurance and the behavior of for-profit and not-for-profit health care providers regarding price, quantity, and service quality under various market structures.

ECON 130 Introduction to Money, Banking, and Credit 4
Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): ECON 103 or ECON 105A. Covers the basics of modern monetary systems. Explores money, credit, and interest rate behavior; financial intermediation and central banking, and methods and objectives of monetary and regulatory policy.

ECON 132 Public Economics 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A. Considers the economics of current policy debates including healthcare, social security, tax policy, and private support for public schools. Focuses on government as an institution that corrects market inefficiencies and inequities. Examines government decision making from the perspectives of social choice theory, cost-benefit analysis, and the financing of government expenditures.

ECON 134 Introduction to Financial Management 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BUS 020; ECON 003 or ECON 003H; STAT 008 or ECON 101; or equivalent; or consent of instructor. An introduction to financial management and financial institutions. Includes time value of money, stock and bond valuation, risk and return, portfolio theory, capital budgeting, capital structure, dividend policy, and financial databases. Cross-listed with BUS 106. Credit is awarded for one of the following BUS 106, ECON 134, or BUS 133.

ECON 135 The Stock Market 5
Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ECON 002 or ECON 002H; ECON 003 or ECON 003H. ECON 103 or ECON 105A is strongly recommended. An analysis of the history of the stock market and its role in the macroeconomy. Topics include factors governing stock prices, fundamental and technical analysis, the impact of inflation and interest rates, International investing, and the role of social institutions in the determination of stock prices.

ECON 136 Empirical Financial Economics 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 107 or consent of instructor. Discusses various empirical aspects of financial economics and financial risk management. Addresses both theoretical and applied issues in finance, risk management, and econometrics. Also discusses quantitative analysis, simulation methods, and case studies.

ECON 137 Economic Growth and Unemployment 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 103 or ECON 105A; restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Studies two central issues in macroeconomics: economic growth and unemployment. Begins with understanding the historical data and stylized facts in the U.S. economy. Examines theoretical models that analyze economic growth and unemployment. Investigate the empirical relevance and policy implications of these models.

ECON 138 Economics of Financial Investments 4
Lecture, 3 hours; written work, 1.5 hours; individual study, 1.5 hours. Prerequisite(s): ECON 002 with a grade of C- or better or ECON 002H with a grade of C- or better; ECON 003 with a grade of C- or better or ECON 003H with a grade of C- or better. Applies economic tools to debt obligations such as student loans and mortgages. Discusses utility-maximizing investment strategies and traditional retirement plans. Studies the economics of emerging asset classes such as cryptocurrencies and blockchain technology. Focuses on navigating web 3.0 and decentralized cryptocurrency exchanges.

ECON 143 Environmental Economics 4
Lecture, 3 hours; written work, 3 hours. Prerequisite(s): ECON 003 or ECON 003H; or equivalent; or consent of instructor. An introduction to economic analysis of natural resources, the environment, and environmental quality. Topics include interactions between the environment and the economy, social choice theory, source control costs, damage valuation, efficient pollution control, and design of efficient and equitable environmental policy.

ECON 146 Urban Economics 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A. Applies basic microeconomic principles to the spatial concentration of economic activity, the operation of the urban land, housing, transportation, and labor markets, the role of government in the urban economy, and urban economic problems, including pollution, crime, and homelessness. Cross-listed with URST 146.
ECON 148 Land and Resource Economics 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A. Explores distinctive qualities of land and its rent, as well as valuation of land as an investment. Addresses assembly, division, and development of land, efficiency of the land market and the effects of taxation. Covers concentrated ownership, separation of ownership and management, rent and taxable surplus, and origins and kinds of tenure.

ECON 150 Rockonomics: Topics in Applied Microeconomics Through the Lens of the Music Industry 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 003 or ECON 003H; or consent of instructor. Covers topics in applied microeconomics as they relate to the music industry. Explores questions related to consumption, pricing and price discrimination, market structure and competition, technological change, labor supply of musicians, superstar markets, uncertainty and portfolio theory, and human capital. Also addresses behavioral economics topics including preference formation and durability.

ECON 151 Economics of Education 4 Lecture, 3 hours; individual study, 6 hours; written work, 3 hours. Prerequisite(s): ECON 003 with a grade of C- or better or ECON 003H with a grade of C- or better; ECON 101 with a grade of C- or better. Focuses on the benefits and costs of education, educational inputs, and educational policy. Applies economic theory to the study of education. Evaluates empirical evidence of issues relating to education. Develops communicating reasoned and informed prescriptions and/or evaluations of education policy.

ECON 152 Cost-Benefit Analysis With Applications to Public Policy 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 104A; restricted to class level standing of junior, or senior; or consent of instructor. Provides the economic foundations and practical tools to conduct cost-benefit analysis. Discusses predicting and monetizing impacts of economic policies, as well as discounting future impacts. Also focuses on dealing with uncertainty, value of information, and social welfare.

ECON 153 Labor Economics 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A. An analysis of labor demand, labor supply, market equilibrium, and policies affecting each. Topics include labor supply, labor demand, minimum wages, government transfers, education, job training, and discrimination. Cross-listed with BUS 153.

ECON 155 Women's Labor and the Economy 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A. A special-topics based labor economics course. Focuses on one important dimension of worker differences: gender. Covers the topics of human capital, wages and employment, occupational choice, discrimination, the family as an economic unit, and public policy. Cross-listed with GSST 155, and PBPL 155.

ECON 157 Labor in the Public Sector 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A. A labor economics course on employment in the public sector. Explores questions of wages and contract structuring, recruitment, training, risk, collective bargaining, licensing, rent-seeking and corruption, and influence in the public sector. Cross-listed with PBPL 157.

ECON 158 Economic Mobility in the United States 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 101. Exploration of economic mobility in the United States. Topics include measures of economic mobility, regional variation in economic mobility, and policies intended to increase economic mobility.

ECON 160 Industrial Organization 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 104B. A study of the organization and structure of the American industrial system. Emphasizes production and pricing behavior and policies. Also addresses market structure and public policies regulating or influencing market behavior. Cross-listed with BUS 160.

ECON 162 Managerial Economics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ECON 102 or ECON 104A. Examines applications of economic analysis to problems of management, especially of capital. Emphasis is on production economics and cost analysis. Cross-listed with BUS 162.

ECON 163 Introduction to Game Theory 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 101; ECON 104B. Introduces and develops basic concepts of game theory to study strategic interactions, with examples and applications drawn from Economics and other social sciences.

ECON 164 Behavioral Economics 4 Lecture, 3 hours; extra reading, 1 hour; individual study, 1.5 hours; term paper, 0.5 hour. Prerequisite(s): ECON 002 or ECON 002H; ECON 104B. An introduction to core concepts in behavioral economics. Includes choice under uncertainty, choice over time, social preferences, and transaction utility. Outlines the role of lab and field experiments in the discipline. Discusses applications to management, marketing and charitable giving, and the use of behavioral economics in designing policy.

ECON 171 International Finance 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 103 or ECON 105A. Covers international monetary theory and its applications. Topics include balance of payments, exchange rates, open-economy macroeconomics, and international monetary institutions. Addresses selected policy issues.

ECON 173 Global Poverty 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): ECON 002 or ECON 002H; ECON 003 or ECON 003H. Examines poverty around the world in a comparative perspective. Topics include concepts of poverty, measurement of poverty, and policies intended to reduce poverty. The regions studied include the U.S., other developed countries, and developing countries. Credit is awarded for one of ECON 173 or ECON 173S.

ECON 175 Comparative Economics 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A. A study of the pure theory of trade, trade policy, and international factor movements. Includes illustrative applications to current issues and problems. Cross-listed with BUS 178.

ECON 182 Trade, Globalization, and Development 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A; or consent of instructor. A study of interactions between population growth and economic development. Covers the history of demographic thought, models for developing countries based on the demographic experience of currently developed countries. Explores household production models, demand for children, mortality, health and nutrition, migration, and human capital. Traces macroeconomic economic-demographic linkages in developing countries.

ECON 183 Population and Development 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A; ECON 107; or consent of instructor. A study of interactions between population growth and economic development. Covers the history of demographic thought, models for developing countries based on the demographic experience of currently developed countries. Explores household production models, demand for children, mortality, health and nutrition, migration, and human capital. Traces macroeconomic economic-demographic linkages in developing countries.

ECON 185 Economic Development in Latin America 4 Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A or ECON 105A. A comparative analysis of the major trends in Latin American economies in the twentieth century. Includes historical legacies, primary export economies, the theory and practice of import substitution industrialization, and the debt crisis. Also covers stabilization and structural adjustment, poverty and income distribution, the informal and agricultural sectors, and the environment. Cross-listed with LNST 185.
ECON 186 Policy Evaluation in Development Economics 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): ECON 003 or ECON 003H; or consent of instructor. An overview of randomized impact evaluation as a tool of the causal revolution in development economics. Introduces experimental methods and covers the application of those methods to conducting impact evaluations in a range of development settings including education, health, labor, and economics of the firm, microfinance, environment, and political economy. Cross-listed with PBPL 186.

ECON 187 Contemporary Public Policy Challenges in Latin America 4 Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours. Prerequisite(s): ECON 002 or ECON 002H; ECON 003 or ECON 003H; consent of instructor. A survey of the wide-sweeping policy reforms since the 1980s and of contemporary public policy challenges in Latin America. Challenges discussed include extremely high levels of poverty and inequality; inadequate educational and healthcare systems; pressures for land reform; problems of trade competitiveness; and recurring currency crises. Cross-listed with LNST 187.

ECON 188 The Chinese Economy 4 Lecture, 3 hours; individualized study, 3 hours. Prerequisite(s): ECON 002 or ECON 002H or ECON 003 or ECON 003H; Restricted to class level standing of junior, or senior. An introduction to the Chinese economy, with a focus on the economic reform since 1978. Topics include the economic and political logic behind the reform, the lessons learned from the reform, China’s evolving role in the world economy, and the challenges that China is currently facing.

ECON 189 Economic Development in Brazil 4 Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A; ECON 103 or ECON 105A. An analysis of the successes and failures of economic development in the largest country in Latin America. Reviews current issues facing Brazilian policy makers. Topics include historical legacies, import substitution and industrialization, poverty and inequality, agriculture and land reform, and the environmental impact of development. Cross-listed with LNST 189.

ECON 190 Special Studies 1 to 5 Activity, 3 to 15 hours. Prerequisite(s): upper-division standing; consent of instructor and program chair A project to be undertaken under faculty supervision. Course is repeatable to a maximum of 12 units.

ECON 193A Senior Seminar 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 101, ECON 104A with a grade of B+ or better or ECON 105A with a grade of B+ or better; or consent of instructor. Advanced research in various fields of faculty interest. Includes completion of a research paper and presentation. Topics vary from year to year.

ECON 193B Senior Seminar 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 193A; or consent of instructor. Advanced research in various fields of faculty interest. Students complete a research paper and present their results in the seminar. Topics vary from year to year.

ECON 198I Individual Internships in Economics 1 to 12 Internship, 3 to 36 hours. Prerequisite(s): Restricted to class level standing of junior, or senior; and consent of instructor. Active participation in the work of a public or quasi-public agency or business concern in matters relating to general or business economics. Academic requirements set by the instructor. Course is repeatable as content or topic changes to a maximum of 16 units.

ECON 199H Senior Honors Research 1 to 4 Research, 3 to 12 hours. Prerequisite(s): upper-division standing in Economics; admission to University Honors or consent of instructor. Offers the opportunity for directed research at an honors level. Satisfactory (S) or No Credit (NC) grading is not available. Course is repeatable to a maximum of 12 units.

Graduate Courses
ECON 200A Microeconomic Theory 6 Lecture, 4.5 hours; discussion, 2 hours. Prerequisite(s): ECON 104B; or equivalent; graduate standing. Focuses on consumer and producer theory under conditions of certainty. Covers required mathematics including real analysis and static optimization theory. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

ECON 200B Microeconomic Theory 4 Lecture, 3 hours; discussion, 1.5 hours. Prerequisite(s): ECON 200A; or equivalent; graduate standing. Focuses on decision making under uncertainty, economics of information, applications of game theory, and models of imperfect competition.

ECON 200C Microeconomic Theory 4 Lecture, 3 hours; discussion, 1.5 hours. Prerequisite(s): ECON 200B; or equivalent; graduate standing. Focuses on general equilibrium theory including existence and stability. Also covers welfare economics and social choice.

ECON 201A Macroeconomic Theory 4 Lecture, 3 hours; discussion, 1.5 hours. Prerequisite(s): ECON 105B, ECON 200A, may be taken concurrently; or equivalent; graduate standing. Examines the basic issues and models of macroeconomics.

ECON 201B Macroeconomic Theory 4 Lecture, 3 hours; discussion, 1.5 hours. Prerequisite(s): ECON 201A; or equivalent; graduate standing. Covers, but is not limited to, investment and consumption, labor and monetary economics, tax and debt policy, and mathematics for macroeconomists.

ECON 201C Macroeconomic Theory 4 Lecture, 3 hours; discussion, 1.5 hours. Prerequisite(s): ECON 201B; or equivalent; graduate standing. Focuses on the phenomena of business cycles including the empirical characteristics and the theoretical models.

ECON 202 Topics in Economic Theory: Critiques and Alternative Approaches 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing. Critiques of conventional economic theories and consideration of alternative theories and approaches to issues of aggregate economic growth and instability from Marx to the present.

ECON 205A Econometric Methods I 4 Lecture, 3 hours; discussion, 15 hours. Prerequisite(s): ECON 104A; ECON 105A; MATH 009A; MATH 009B; STAT 011; or equivalents; graduate standing. Examines econometric methods for the analysis of economic data and the construction of econometric models with applications to microeconomics and macroeconomics. Covers the linear regression model and related techniques of matrix algebra. Also addresses statistical estimation and inference.

ECON 205B Econometric Methods II 4 Lecture, 3 hours; discussion, 1.5 hours. Prerequisite(s): ECON 205A; or equivalent; graduate standing. Examines econometric methods covering extensions of the basic regression model, nonlinear models, and limited dependent variable models.

ECON 205C Econometric Methods III 4 Lecture, 3 hours; discussion, 1.5 hours. Prerequisite(s): ECON 205B; or equivalent; graduate standing. Examines econometric methods for the analysis of economic data and the construction of econometric models with applications to time-series macroeconomics. Covers univariate time-series models, volatility models, simultaneous equation models, and dynamic econometric models.

ECON 207 Environmental Economics 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 200A or equivalent. Covers the theory and methods of environmental economics. Topics include externality theory, bargaining solutions, property rights, and resource allocation mechanisms. Also covers environmental policy under uncertainty and asymmetric information, as well as dynamic and general equilibrium models of environmental quality.

ECON 208 Natural Resource Economics 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 200A or equivalent. Covers dynamic models of nonrenewable resources. Topics include uncertainty, game theory, and the measurement of resource scarcity. Examines empirical models of nonrenewable and renewable resources.

ECON 209 Nonmarket Valuation and Environmental Policy 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 200A or equivalent. A study of economic valuation of natural resources and the environment. Includes environmental demand theory, travel cost models, random utility models, discrete choice models, the contingent valuation technique, and hedonic wage and pricing models. Also covers theory, empirical methods, and applications.

ECON 210 (E-Z) Topics in Environmental Economics 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 207; graduate standing. An in-depth study in selected areas of environmental and natural resource economics. E. Transport & Envrnmntl Quality; F. Politicl Econ Of Environ Polic. Course is repeatable to a maximum of 8 units.
ECON 214A Applied Microeconomics I 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Provides a foundation in economic theory and empirical tools used by economists to examine economic issues. Emphasizes practical application of economic theory to topics commonly addressed by economists working in government, the private sector, and non-profits.

ECON 214B Applied Microeconomics II 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 214A; graduate standing. Continues to develop a foundation of theory and empirical tools to analyze complex decisions addressed by economists working in government, the private sector, and non-profits. Emphasizes the economic theory of decision making, game theory, and an introduction to cost-benefit analysis.

ECON 215A Applied Macroeconomics I 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 215A; graduate standing; or consent of instructor. Introduces macroeconomics through theory and applied techniques. Topics include the supply and demand of factors of production, business cycles and unemployment, fiscal policy and its effect on the national budget, monetary policy and inflation, and modeling an open economy in the short run.

ECON 215B Applied Macroeconomics II 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 215A; graduate standing. Continues to develop the theoretical and applied foundations of macroeconomic analysis. Topics include exogenous and endogenous growth, determinants of structural unemployment, the influence of institutions on long-term economic development, and an introduction to forecasting.

ECON 216A Applied Econometrics I 4
Lecture, 3 hours; individual study, 2 hours; laboratory. Prerequisite(s): ECON 216A; graduate standing. Extends and refines the econometric techniques used to analyze data in economics, business, and government. Topics include estimating simple and multiple regressions, interval estimation and hypothesis testing, dummy variables, heteroskedasticity, multicollinearity, instrumental variables, and estimation of cross-sectional and panel data models.

ECON 216B Applied Econometrics II 4
Lecture, 3 hours; individual study, 2 hours; laboratory. Prerequisite(s): ECON 216A; graduate standing. Introduces advanced econometric techniques, time series models, diagnostic testing, nonparametric kernel methods, and vector autoregressions.

ECON 217 Professional Development 2
Lecture, 1.5 hours; individual study, 2 hours. Prerequisite(s): graduate standing; or consent of instructor. Enhances the usefulness of the economics learned in the program by promoting skills related to leadership, oral and written communication, teamwork, organizing and managing projects, negotiation, conflict resolution, and professional conduct. Course is repeatable to a maximum of 6 units.

ECON 218A Capstone I 2
Lecture, 1.5 hours; individual study, 2 hours. Prerequisite(s): graduate standing; or consent of instructor. First of a two-part sequence that presents the initial steps leading to a final capstone project. Includes defining the problem; assembling the evidence; constructing alternative solutions; and selecting criteria for evaluating the solutions.

ECON 218B Capstone II 2
Lecture, 1.5 hours; individual study, 2 hours. Prerequisite(s): ECON 218A; graduate standing. Second of a two-part sequence that builds on progress made in ECON 218A. Completes the final capstone project by confronting the outcomes; confronting the trade-offs; implementing the concept of Stop-Narrow-Focus-Decide; and telling your story.

ECON 219 Financial Economics 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 214A, ECON 216A; graduate standing. Provides an overview of modern finance including individual investment decisions under uncertainty, mean variance theory, capital market equilibrium, arbitrage pricing theory, incomplete markets, and empirical patterns of risk and return in financial markets.

ECON 220 Big Data in Economics 4
Lecture, 3 hours; individual study, 2 hours; laboratory. Prerequisite(s): ECON 216A; or equivalent; graduate standing. Introduces machine learning tools for big data analysis in economics. Focuses on critical toolkits (methods and software) and applications to big data in economics. Topics include regression and classification, regularization, resampling methods, decision trees, boosting, and deep learning. Credit is awarded for one of the following ECON 220 or STAT 208.

ECON 221 Forecasting for Economics, Finance and Business 4
Lecture, 3 hours; individual study, 3 hours; laboratory. Prerequisite(s): ECON 216B; graduate standing. Introduction to the methods and practice of forecasting. Focuses on the analysis of linear time series models and the construction of optimal forecasts emphasizing forecasting uncertainty and the construction of density forecasts. Illustrates the application of forecasting methods through simulation exercises and exercises with real economic and financial data.

ECON 222 Public Economics 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 214A, ECON 216A; graduate standing. Provides a broad overview of the microeconomics of the public sector. Applies microeconomics and microeconometrics to the study of federal, state, and local tax policy, expenditures, and transfer programs. Also addresses current policy issues.

ECON 225 Urban Economics 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 214A, ECON 216A; graduate standing. An advanced analysis of city formation and spatial equilibrium that applies theoretical characteristics to policy decisions and current events. Applied topics include housing policy, poverty, transportation, labor productivity, and crime. Provides guidance on how to collect and analyze data to understand urban economic issues.

ECON 226 Applied Environmental Economics 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 214A, ECON 216A; graduate standing. Provides the theoretical and empirical foundations for studying environmental issues, data, and policy. Focuses on sources of market failure as it relates to the environment, cost-benefit analysis, sustainable economic development, the economics of renewable and non-renewable resources, and the impact of environmental policy. Credit is awarded for one of the following ECON 226 or PBPL 233.

ECON 227 Cost Benefit Analysis 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 214A, ECON 216A; graduate standing. Introduces the tools and practice of cost-benefit analysis. Focuses on the use of economic theory for conducting public policy assessment. Topics include predicting and monetizing impacts of economic policies, value of information, and social welfare.

ECON 228 Behavioral and Experimental Economics 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 214A, ECON 216A; graduate standing. An introduction to behavioral economics concepts as applied to consumer purchasing decisions, information and uncertainty, intertemporal choice, and strategic interaction. Covers the applications of behavioral economics principles to firms and public policy as well as the growing use of experiments in the field.

ECON 229 Mathematical Economics 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 214A, ECON 216B; graduate standing. Introduction to mathematical methods in economics and their applications for economic theories. Topics include theories of optimization, market equilibria, risk and uncertainty, and strategic games. Also covers formal concepts from mathematics including topology, probability theory, and fixed point theory as fundamental tools to study economic theories.

ECON 230 Economic Development Theory, Applications, and Policy 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 214A, ECON 216A; graduate standing. Provides an understanding of the major theories, key empirical findings, and policy debates in the field of economic development. Covers economic growth, poverty and inequality, population, health, human capital accumulation, institutions, and political economy.
ECON 231 Randomized Evaluation in Development Policy 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 214A, ECON 216A; graduate standing. Covers experimental methods and their application to impact evaluations of programs and policies in developing countries. Examines applications to education, health economics, economics of the firm, microfinance, labor markets, and political economy. Provides an overview of aid in development, policy challenges in developing countries, and other approaches to impact evaluation.

ECON 234 International Trade Theory 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 200A, ECON 200B, ECON 200C, or consent of instructor. Examines the determinants of trade in goods and services, international flow of labor and capital, and the effects of trade policy on welfare and income distribution.

ECON 235 Topics in International Trade Theory 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 234 or consent of instructor. An in-depth study in selected areas of international trade theory. Topics include, but are not limited to, trading blocks, trade agreements and strategic interactions, trade and the environment, and the political economy of international trade.

ECON 236 Political Economy of International Finance 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Conducts a broad theoretical and historical survey of the politics and economics of international money and finance. Topics include monetary and exchange rate regimes, foreign direct investment, capital flows, sovereign debt, financial regulation and international macroeconomic coordination, the role of finance in economic development, and international financial crises. Cross-listed with POSC 215.

ECON 237 Topics in International Finance 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores key topics in international finance and open economy macroeconomics using both theoretical and empirical analysis tools. Topics include the understanding of exchange rate determination, current account, international capital flows, currency crisis, foreign exchange intervention, and sovereign debt/risk.

ECON 240 Labor Demand 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Establishes a theoretical foundation for the study of labor demand. Examines both essential and current research in topics related to labor demand. Begins the process of generating research ideas in labor economics.

ECON 241 Labor Supply 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on the quantity and quality of labor supply. Provides a rich understanding of labor supply and human capital theory; develops econometric skill to evaluate empirical evidence of the predictions that theory affords; and discusses the art of connecting theory to empirical analysis.

ECON 242 Labor Market Equilibrium 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Establishes a theoretical foundation for the study of equilibrium in labor markets and builds exposure to essential and current research in the field. Topics may include crime, migration, market structures, and personnel economics.

ECON 243 Topics in Labor 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. In-depth study in selected areas of labor economics. Topics include, but are not limited to, economic demography and race and gender issues.

ECON 244 Empirical Research Methods 4 Lecture, 3 hours; tutorial, 1 hour; written work, 2 hours. Prerequisite(s): ECON 205B or equivalent. Introduction to empirical techniques used in modern applied economics, with a focus on identification strategies. Topics include natural experiments, instrumental variables, regression discontinuity, and panel data. Emphasis is on practical application of techniques and solutions to problems empirical researchers encounter.

ECON 246 Introduction to Public Economics 4 Lecture, 3 hours; written work, 2 hours; extra reading, 1 hour. Prerequisite(s): ECON 200C. An introduction to public economic theory and its applications. Topics include the theory of economic justice, welfare economics, the theory of market failure, the positive theory of taxation, and cost-benefit analysis.

ECON 247 Recent Advances in Public Economics 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): ECON 200C. An in-depth study of selected topics in public economics. Topics include, but are not limited to, applied general equilibrium analysis and optimal government policy, comparative institutional analysis, political economics, social choice, urban and transportation economics, and empirical public economics. Course is repeatable to a maximum of 8 units.

ECON 248 Topics in Political, Comparative, and Institutional Economics 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ECON 200C or consent of instructor. An in-depth study of selected topics in political, comparative, and institutional economics. Topics include general interest politics, special interest politics, and agency models of politics; comparative analysis of coordination, legal, financial, fiscal, and political institutions; economics of culture and economics of political and economic transitions. Course is repeatable to a maximum of 8 units.

ECON 250 Money, Credit, and the Macroeconomy 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Investigation of the role of money, credit, and financial institutions in influencing growth, distribution, employment, prices, and business cycles in capitalist economies. Fiscal policy, monetary policy, and public investments are addressed from alternative theoretical perspectives.

ECON 251 Business Cycle Theory 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An in-depth treatment of theories of the cycle and empirical data on relations of variables over the cycle.

ECON 254 Topics in Money, Credit, and Business Cycles 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Selected topics in the performance of the macroeconomy, monetary and fiscal theory, and monetary and fiscal policy.

ECON 260 Theories of Economic Development 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A survey of the major theories of development and underdevelopment beginning with the classical model, theories of surplus, and including the models of Lewis, Nurksie, Hirschman, neoclassical schools, structuralist models, and dependency theory.

ECON 261 Contemporary Development Strategies 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A review of the performance of the major strategies of development implemented in the recent past or currently under implementation.

ECON 262 Investment, Productivity, and Organizations in Developing Countries 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Covers the causes of established inefficiencies in firms and public sector organizations in developing countries as well as emerging solutions to address sub-optimal outcomes. Addresses microcredit, savings, capital, employment, management, personnel economics, technology adoption, markets and firm cooperation, compliance with regulation, and corruption. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

ECON 263 Health, Labor and Human Capital in Developing Countries 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Covers the economics of agricultural and rural development in developing countries. Topics examined include technical change, sharecropping and interlinked factor markets, migration, poverty and famine, land reform, environmental aspects of rural development, and structural adjustment within agriculture.
School of Education

Subject abbreviation: EDUC

ECON 272A Political Economy: Marxian Economics
Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A study of Marxian economic theory, including historical materialism, the role of value, class, exploitation, and accumulation in Marxian economics, and a survey of current debates on these issues.

ECON 272B Political Economy: Efficiency, Justice, and Power
Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Reviews the various notions of efficiency used in political economic analysis, as well as their application in historical and comparative institutional contexts. Theories of justice in the distribution of rewards and the extent to which efficiency is separable from justice. Different notions of how power influences economic outcomes.

ECON 275 Health Economics I: Demand
Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Reviews the structure and intuition of economic models used to analyze people’s choices about their health and health care. Emphasizes that health is a cumulative process of investment. Also analyzes the market for health insurance.

ECON 282 (E-Z) Advanced Macroeconomic Theory
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing. Covers advanced topics in macroeconomic theory. Students read state-of-the-art research papers and books. Includes presentations by students and faculty. E. Foundations Of Macroeconomics; F. Advanced Monetary Theory; G. Special Topics In Macroeconomic Theory. Course is repeatable to a maximum of 8 units.

ECON 283 (E-Z) Advanced Microeconomic Theory
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing. Covers advanced topics in microeconomic theory. Involves reading current research papers and books, and presentations by students and faculty. E. Rational Choice Theory; F. Measurement And Aggregation In Economics; G. General Equilibrium; I. Social Choice And Welfare; J. Uncertainty And Information; K. Special Topics In Microeconomic Theory; M. The Microtheoretic Bases Of Development Economics; N. Applications Of Games And Information Economics; O. Measurement Of Productivity And Efficiency; P. Public Economic Theory; Q. Economics Of Contract: Theory And Applications; R. Measurement Of The Standard Of Living, Inequality, And Deprivation. Course is repeatable to a maximum of units.

ECON 288A Colloquium in Economics
Seminar, 1.5 hours; written work, 1.5 hours. Prerequisite(s): graduate standing. Lectures and discussion by students, faculty and invited scholars on specially selected topics. Course is repeatable up to a maximum of 8 units.

ECON 288B Colloquium in Economics
Seminar, 1.5 hours; written work, 1.5 hours. Prerequisite(s): graduate standing. Lectures and discussion by students, faculty and invited scholars on specially selected topics. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ECON 290 Directed Studies 1 to 6
Prerequisite(s): graduate standing and consent of instructor. Directed studies of selected problems of economic analysis. Open to graduate students who desire to do special work in a particular field. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ECON 291 Individual Study in Coordinated Areas 1 to 12
Research, 3 to 36 hours. Prerequisite(s): graduate standing. A program of study designed to advise and assist candidates who are preparing for examination. Graded Satisfactory (S) or No Credit (NC). Repeatable as follows: (1) a student may take up to 12 units prior to the award of the M.A. (these 12 units do not count toward the required M.A. units); (2) a student may take up to 18 additional units after award of the M.A. but prior to successful completion of the Ph.D. qualifying examination.

ECON 292 Concurrent Analytical Studies 2 to 4
Lecture, 1 to 3 hours; research, 6 to 12 hours. Prerequisite(s): consent of instructor. Each 292 course will be taken concurrently with some 100-series course, but on an individual basis. It will be devoted to completion of a graduate paper based on research or criticism related to the 100-series course. Faculty guidance and evaluation will be provided through the quarter. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

ECON 297 Research For Thesis Or Dissertation 1 to 12
Prerequisite(s): graduate standing and consent of instructor. Directed research on selected problems in economics. Designed for graduate students who have not yet passed their qualifying examinations. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ECON 299 Research For Thesis Or Dissertation 1 to 12
Prerequisite(s): graduate standing and consent of instructor. Research in economics under the direction of a staff member to be included as part of the doctoral dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Course
ECON 302 Teaching Practicum 1 to 4
Practicum, 3 to 11 hours; seminar, 1 hour. Prerequisite(s): limited to department TAs; graduate standing. Supervised teaching in upper- and lower-division courses. Required of all economics teaching assistants. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

Professors Emeriti
Irving H. Balow, Ph.D.
Janet B. Blacher, Ph.D.
Steven T. Bossert, Ph.D.
Robert C. Calfee, Ph.D.
Jerry S. Carlson, Ph.D.
James T. Dillon, Ph.D.
Dan M. Donlan, Ph.D.

Michelle L. Stockdale
Nancy Butler Wolf, Ph.D.

Education, Society and Human Development Major
The Education, Society, and Human Development Major builds a theoretical foundation, presents applied understandings in the study of education, and explores the varied contexts of learning over the life course.

Program faculty bring multiple disciplinary perspectives to their research and courses, including cognitive sciences, developmental psychology, understanding of the exceptional child, applied behavior analysis, the relationship between education, society and culture, educational policy and leadership, measurement and assessment, and issues in higher education.

Students will benefit from completing the major because they will be exposed to critical theories that investigate how education has been used to create, maintain, and reinforce social stratification. In addition, students will develop a historical and contemporary awareness of different learning settings, and gain a strong foundation in human development, assessment and interventions in the education context. Students who are interested in teaching elementary, middle, or high schools should consult an academic advisor in the SOE Undergraduate Programs Office about combining an appropriate major and minor or completing a double major in order to develop appropriate expertise in the subject they plan to teach.

Education, Society, and Human Development majors are also prepared for other types of instructional, administrative or advocacy positions in programs or organizations such as those focused on early childcare, out-of-school learning, or adult learning. Additionally, students who complete the major are prepared to enter education-related career fields in the private, non-profit, and public sectors including working with special populations, in legal fields, medical environments, and the arts. Students interested in graduate study will be well prepared to pursue advanced degree programs in education or related fields. Undergraduates enrolled in the Education, Society, and Human Development degree are encouraged to complete courses inside and outside of the major to enhance career preparation and pursue personal interests. With advanced planning, students in the major can complete a minor or a second major in another discipline. The B.A. in Education, Society, and Human Development is not a teacher credential program. (See School of Education section on Teaching Credentials and Masters programs.)

First-Year Student Seminars
The EDUC 093A, EDUC 093B, and EDUC 093C courses are a year-long seminar series designed for first-year students that meets weekly with several aspirations including community building, orientation to the campus and the major, and academic support. The long-term goal of this seminar series is to not only set the foundation for the major but to build an experience that evolves over the course of students’ experience at UCR. The seminars are for first-year students in the Education, Society, and Human Development major; first-year students are given enrollment priority. The fall seminar carries 2 units of academic credit. The winter and spring courses carry 1 unit of academic credit each. The units are not applied toward major requirements, however the units count toward overall degree completion. The seminar series is recommended, but not required for completion of the degree. The seminars are graded on an “S/NC” basis.

Transfer Student Seminar
The EDUC 094 course is a 2-unit seminar (designed for new, incoming transfer students) that meets weekly for the purpose of community building, orientation to the campus and the Education major, and academic support. The long-term goal of this seminar is to not only set the foundation for the major, but to build a learning community experience that follows students over the course of their program at UCR. New, incoming transfer students are given enrollment priority into this course which carries 2 units of academic credit. These units are not applied toward major requirements. The seminar is recommended, but not required for completion of the degree. The seminars are graded on an “S/NC” basis.

Transfer Students
Admission is selective and based on all transferable coursework with a minimum GPA of 2.4 (2.8 for non-residents). There is no prerequisite “Major” coursework required. Meeting the minimum eligibility requirements does not guarantee admission.

University Requirements
See Undergraduate Studies section.

College Requirements
See the School of Education section.

Major Requirements
The major requirements for the B.A. degree in Education, Society, and Human Development, with concentrations in Education for Social Justice and Learning and Behavioral Studies.

Change of Major
Students switching to the Education, Society, and Human Development Major must be in good academic standing at time of major change and have completed at least one Education course with a grade of “C” of better, excluding EDUC 100A, EDUC 100B, EDUC 102, and EDUC 190-198.

Education for Social Justice Concentration
1. Lower-division requirements (5 courses [at least 20 units])
   (a) EDUC 005
   (b) EDUC 010 or EDUC 010H
   (c) At least 3 of the following lower-division courses (at least 12 units):
      EDUC 001, EDUC 002, EDUC 019 (E-Z), EDUC 023, EDUC 024, EDUC 032A, EDUC 032B, EDUC 032C, EDUC 041, EDUC 042, EDUC 043, EDUC 050, EDUC 051, EDUC 052, EDUC 061

2. Upper-division requirements (7 courses [at least 28 units])
   (a) Educational Research Methods
      (1 course [at least 4 units])
      (1) EDUC 118
   (b) Concentration courses
      (4 courses [at least 16 units])
      (1) EDUC 122, EDUC 123, EDUC 141, EDUC 142, EDUC 144, EDUC 145/BLKS 145, EDUC 146/ETST 146, EDUC 147, EDUC 148, EDUC 149, EDUC 150, EDUC 151, EDUC 152, EDUC 153, EDUC 154
   (c) Elective courses (2 courses [at least 8 units])
      (1) EDUC 111 (E-Z), EDUC 112, EDUC 119 (E-Z), EDUC 132, EDUC 134, EDUC 160, EDUC 161, EDUC 162, EDUC 171 or EDUC 172, EDUC 179A, EDUC 181, EDUC 182, EDUC 183, EDUC 184, EDUC 190

A maximum of 8 units of EDUC 190 may be taken to satisfy elective degree requirements.
3. Community Engaged Learning (40 hours minimum)
   (a) A minimum of 40 hours of field experiences, research, internship, and/or service-learning (activity) in an approved education setting.
   (1) For a list of field experiences, research, internship, and/or service-learning opportunities and how to demonstrate completion of the minimum 40 hours, please consult with the Community Engaged Learning Coordinator or academic advisor in the Undergraduate Programs Office in the School of Education and/or the Undergraduate programs Community Engaged Learning section of School of Education's website.

Learning and Behavioral Studies Concentration

1. Lower-division requirements (5 courses [at least 20 units])
   (a) EDUC 005
   (b) EDUC 010 or EDUC 010H
   (c) At least 3 of the following lower-division courses (at least 12 units):
       EDUC 001, EDUC 002, EDUC 019 (E-Z), EDUC 023, EDUC 024, EDUC 032A, EDUC 032B, EDUC 032C, EDUC 041, EDUC 042, EDUC 043, EDUC 050, EDUC 051, EDUC 052, EDUC 061

2. Upper-division requirements (7 courses [at least 28 units])
   (a) Education Research Methods
       (1 course [at least 4 units])
       (1) EDUC 118
   (b) Concentration courses
       (4 courses [at least 16 units])
       (1) EDUC 132, EDUC 134, EDUC 160, EDUC 161, EDUC 162, EDUC 179A, EDUC 181, EDUC 182, EDUC 183, EDUC 184
   (c) Elective courses
       (2 courses [at least 8 units])
       (1) EDUC 104, EDUC 105, EDUC 111 (E-Z), EDUC 112, EDUC 119 (E-Z), EDUC 122, EDUC 123, EDUC 141, EDUC 142, EDUC 144, EDUC 145/BLKS 145, EDUC 146/ETST 146, EDUC 147, EDUC 148, EDUC 149, EDUC 150, EDUC 151, EDUC 152, EDUC 153, EDUC 154, EDUC 171 or EDUC 172, EDUC 190
       A maximum of 8 units of EDUC 190 may be taken to satisfy elective degree requirements.

3. Community Engaged Learning (40 hours minimum)
   (a) A minimum of 40 hours of field experiences, research, and/or service-learning (activity) in an education setting.

   Education Abroad
   Education Abroad is an excellent opportunity to learn more about another country and its culture while taking courses to earn units toward graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit Education Abroad at education.ucr.edu or call (951) 827-4113.
   See Education Abroad in the Educational Opportunities section in the beginning of this catalog.

   Athletic Leadership Minor
   1207 Sproul Hall
   (951) 827-4633
   education.ucr.edu

   Committee in Charge
   Eddie Comeaux, Professor of Higher Education (Education)
   Uma Jayakumar, Associate Professor of Higher Education (Education)
   Rita Kohli, Associate Professor of Education, Society, and Culture (Education)
   Austin H. Johnson, Associate Dean of Undergraduate Education in SOE (Education)
   Rican Vue, Assistant Professor of Higher Education (Education)
   Joi A. Spencer, Dean, ex officio

   The Athletic Leadership Minor is to prepare students for leadership careers in athletics, particularly at the intercollegiate level. It is designed to provide students with a solid understanding of the administration of student affairs and athlete development. Students will advance their understanding of the role athletics leaders’ play in the larger university and college systems environments.
   Program Requirements
   Student petitions require the approval of the Undergraduate Education Programs advisor in the School of Education. College approval from both the School of Education and the major college is required. Please see education.ucr.edu for the minor petition process. Minor in Education candidates must maintain a minimum cumulative GPA of 2.0.

   Course Work
   Students will have the option to select from a menu of electives to complete the course work:
   EDUC 001, EDUC 002, EDUC 003, EDUC 004, EDUC 005, EDUC 010 or EDUC 010H, EDUC 019 (E-Z), EDUC 023, EDUC 024, EDUC 032A, EDUC 032B, EDUC 032C, EDUC 041, EDUC 042, EDUC 043, EDUC 044, EDUC 050, EDUC 051, EDUC 052, EDUC 061, EDUC 100A, EDUC 100B, EDUC 104, EDUC 105, EDUC 111 (E-Z), EDUC 112, EDUC 118, EDUC 119 (E-Z), EDUC 122, EDUC 123, EDUC 132, EDUC 134, EDUC 136, EDUC 141, EDUC 142, EDUC 144, EDUC 145/BLKS 145, EDUC 146/ETST 146, EDUC 147, EDUC 148, EDUC 149, EDUC 150, EDUC 151, EDUC 152, EDUC 153, EDUC 154, EDUC 160, EDUC 161,
EDUC 162, EDUC 171 or EDUC 172, EDUC 177 or EDUC 178, EDUC 179A, EDUC 179B, EDUC 181, EDUC 182, EDUC 183, EDUC 184

Additional courses may be added to this list by proposals of academic units, or by petitions of students to take a suitable alternative course.

**Graduate Programs**

The School of Education offers three degree programs—Doctor of Philosophy, Master of Arts and Master of Education—as well as a variety of teacher credential programs. Each of these programs is described in detail below.

General university requirements, such as residence and unit requirements, are in the Graduate Studies section of this catalog. Policies and Procedures for Graduate Degree Programs may be obtained from the Graduate Programs Office.

**Admission**

Admission is based upon GPA and letters of recommendation from writers knowledgeable about the candidate's ability to succeed in graduate study. In addition, M.A. and Ph.D. applicants must submit scores from the GRE General Test (verbal, quantitative, analytical), no more than five years old from the date of their matriculation. Ph.D. applicants must submit a writing sample. The GRE is not required of applicants seeking admission to credential programs or to the M.Ed. program. The Ph.D. program admits students in the fall quarter only.

Admission for the doctoral degree is based on strong academic preparation at the baccalaureate level. A master's degree in education such as that offered at UCR or a master's degree in an ancillary field is desirable but not required. Doctoral students begin their programs in the fall quarter.

**Master of Arts**

Candidates enrolled in this program normally have completed an undergraduate major or its equivalent in a subject field other than education.

**Specialization**

Areas of specialization include Education, Society, and Culture; Educational Psychology; Neuroscience and Education; Research, Evaluation, Measurement and Statistics; Special Education and Autism; and School Psychology (for students working toward the Ph.D.). Only students matriculating in a School of Education Ph.D. program in School Psychology, may earn a M.A. degree in Education with specialization in School Psychology. Before the end of the first quarter, the student's advisor develops a program plan that specifies the courses the student will take.

The M.A. with specialization in Education, Society, and Culture; Educational Psychology, or Special Education and Autism gives students the option of completing Plan I (Thesis) or Plan II (Comprehensive Examination).

The M.A. with specialization in School Psychology or Neuroscience and Education only allows students to complete the Plan I (Thesis) option. The M.A. specialization in Research, Evaluation, Measurement and Statistics only allows students to take Plan II (comprehensive examination option).

Information about each area of specialization is available at [education.ucr.edu](http://education.ucr.edu).

**Plan I (Thesis)**

Students complete a minimum of 36 upper-division and graduate units. At least 24 of these units are in graduate courses.

A maximum of 12 units may be in graduate research for the thesis.

At the beginning of the second, and generally not later than the third quarter of full-time work, candidates submit a plan for the thesis to their committee. Candidates also list courses to be taken for developing competence in their area of specialization. The plan is reviewed and approved by a committee of three faculty members. The candidate submits the final thesis to the committee for approval. Upon successful completion and approval of the thesis, the student is recommend to the Graduate Division for the MA degree.

**Plan II (Comprehensive Examination)**

Students must complete a minimum of 36 quarter units in upper-division and graduate courses in Education and related fields as defined in existing programs. At least 18 of the 36 units must be in graduate courses, and none in graduate research for the thesis.

A faculty member from the program area specialization is appointed by the graduate advisor to guide the candidate. A program plan must be filed with the graduate advisor by the end of the first quarter of residency. Upon or near completion of course work, the student applies to take a comprehensive written examination. Upon successful completion of the examination, the candidate is recommended to the Graduate Division for the MA degree.

**Coursework**

Candidates entering the M.A. program take a series of courses based on their area of specialization.

**Education, Society, and Culture**

**Professional Development requirement:**

EDUC 259

Other courses may be used to complete degree and elective requirements, in consultation with the Faculty Advisor and approval by the Graduate Advisor.

**Neuroscience and Education**

**Elective Courses - two (2) or more courses:** EDUC 211B, EDUC 246I, EDUC 246K, EDUC 263, EDUC 267, EDUC 269 (E-Z), EDUC 270

**Professional Development requirement:**

EDUC 259

Other courses may be used to complete degree and elective requirements, in consultation with the Faculty Advisor and approval by the Graduate Advisor.

**Research, Evaluation, Measurement, and Statistics (REMS)**

**Required Methodology Courses:**

EDUC 214A, EDUC 214B, EDUC 214C, EDUC 218, EDUC 223A, EDUC 242A

**Elective Methodology**

A minimum of one course from the following list of quantitative courses or from courses offered in other departments that are approved by the student's program committee:

EDUC 211A, EDUC 211B, EDUC 241B, EDUC 242B

**Internship**

Minimum of 5 units of EDUC 298I required.

**Professional Development requirement:**

EDUC 298I

Other courses may be used to complete degree and elective requirements, in consultation with the Faculty Advisor and approval by the Graduate Advisor.

**School Psychology**

**Required Methodology Courses:**

EDUC 214A, EDUC 214B, EDUC 214C

**Psychological Consultation, Assessment, and Intervention**

Required courses: EDUC 254A, EDUC 254B, EDUC 255B

**Application of Scientific Psychology**

Required courses: EDUC 265A, EDUC 265B, EDUC 265C

**History and Systems of Psychology and Basic Content Areas in Scientific Psychology**

Required courses: EDUC 231A, EDUC 239, EDUC 246S, EDUC 250, EDUC 264

**Professional Development requirement:**

EDUC 259

Other courses may be used to complete degree and elective requirements, in consultation with the Faculty Advisor and approval by the Graduate Advisor.

**Special Education and Autism**

**Required Course**

EDUC 214A

**Elective Courses**

Students must complete one of the following courses: EDUC 200, EDUC 246I, EDUC 246M

**Additional Elective Course Options**

Students take at least one course from the following group according to their individualized program: EDUC 239, EDUC 242A, EDUC 242B, EDUC 246 (E-Z), EDUC 267, EDUC 270
Area elective course options
Students must take at least one course from Area I and Area II:

Area I - Autism Spectrum Disorder and other
Cognitive, Behavioral, and Emotional Dis-
abilities: EDUC 239, EDUC 246E, EDUC 246K,
EDUC 246L, EDUC 255A, EDUC 255C

Area II - Learning Disabilities: EDUC 211A,
EDUC 246I, EDUC 246S, EDUC 255A, EDUC
255B, EDUC 256, EDUC 270

Professional Development requirement:
EDUC 259

Other courses may be used to complete
degree and elective requirements, in
consultation with the Faculty Advisor and
approval by the Graduate Advisor.

Normative Time to Degree
6 quarters from admission to the M.A. program

Master of Education
A Master of Education (M.Ed.) degree program
is offered that allows students to select from
five emphases. The GRE is not required for
admission to the M.Ed. program. No thesis or
comprehensive examination is required. In-
stead, students complete an analytical project
that builds on course work and links educa-
tional theory and research with the dynamics
of teaching, learning, and leadership.

Diversity and Equity Emphasis
This M.Ed. emphasis is designed for indi-
viduals who are interested in developing a
critical lens for engaging educational inequity
in careers across the K-16 pipeline and in
community-based educational contexts. The
emphasis provides students with rigorous
theoretical and applied frameworks to support
movements of change using social, historical,
cultural, linguistic, and race analyses.

The program can also be completed through
a collaboration between the School of Educa-
tion and University Extension by completing an
approved Extension certificate program that ad-
dresses issues of student diversity and equity.
Up to 9 units of 400 level Extension
certificate courses can be used toward the
minimum 36-unit total required for the degree.
The student must have completed the approved
Extension certificate prior to admission to this
program. Please see the School of Education
website at education.ucr.edu for an approved
list of Extension certificates that can be used for
the collaboration.

Admission
Candidates for this program must meet the
Graduate Division and Graduate School of
Education admission requirements. Detailed
admission information is available at education.ucr.edu.

Course Work
This M.Ed. emphasis requires a minimum of 36
units; Students will be expected to complete
the course work in three academic quarters.

Students complete coursework from the following
menu: EDUC 201A, EDUC 201B, EDUC 203 or
EDUC 281, EDUC 210, EDUC 225, EDUC 226,
EDUC 233, EDUC 238, EDUC 245G, EDUC 248E,
EDUC 248I, EDUC 248P or EDUC 248U, EDUC
257, EDUC 260, EDUC 266, EDUC 269I, EDUC 273,
EDUC 275A or EDUC 275B, EDUC 276, EDUC 277,
EDUC 278, EDUC 279, EDUC 284, EDUC 297

Other courses may be used to complete degree
and elective requirements, in consultation
with the Faculty Advisor and approval by the
Graduate Advisor.

Analytical Report

Students will complete a final written project that
addresses a specific concern or issue regarding
diversity and educational equity in classrooms,
schools, districts, community or non-profit or-
ganizations, or school policy at the state or federal
level. A final version of the project will be submit-
ted to the School of Education and evaluated by
faculty in the Education, Society, and Culture area.

Education Policy Analysis
and Leadership Emphasis

This M.Ed. emphasis prepares students for work
examining school and campus reform and policy
at the local, state, and national levels.

Students may have the opportunity to complete
an internship of up to 8 units in consultation with
their faculty advisor. The internship is
an optional component and not required for
degree completion.

The emphasis can also be completed through
a collaboration between the School of Educa-
tion and the University Extension by completing an
approved Extension certificate program that ad-
dresses issues of educational policy and
leadership. Up to 9 units of 400 level Extension
certificate courses can be used toward the
minimum 36-unit total required for the degree.
The student must have completed the approved
Extension certificate prior to admission to this
program. Please see the School of Education
website at education.ucr.edu for an approved
list of Extension certificate(s) that can be used for
the collaboration.

Admission
Candidates for this program must meet the
School of Education admission requirements. Detailed
admission information is available at education.ucr.edu.

Course Work
This M.Ed. emphasis requires a minimum of 36
units.

Foundational Courses – Students complete at
least three (3) of the following courses for a
minimum of 12 units from: EDUC 202, EDUC 209,
EDUC 210, EDUC 245G

Research Methods – Students must complete
two courses, for a minimum of eight (8) units:
Part 1: EDUC 214A
Part 2: EDUC 241B or EDUC 223A

Elective Courses – Students complete at least
two (3) courses for a minimum of 12 units, in
consultation with faculty advisor, from: EDUC
203 or EDUC 281, EDUC 225, EDUC 226, EDUC
233, EDUC 238, EDUC 248E, EDUC 248I, EDUC
248O, EDUC 257, EDUC 260, EDUC 266, EDUC
269M, EDUC 275A, EDUC 276, EDUC 278,
EDUC 279, EDUC 284, EDUC 298I*

*Maximum of 4-units of EDUC 298I.

Directed Research – Students must complete
at least four (4) units of EDUC 297 directed
research with their faculty advisor in the final
term of their coursework.

Other courses may be used to complete degree
and elective requirements, in consultation
with the Faculty Advisor and approval by the
Graduate Advisor.

Analytical Report

Students will be required to complete a culmi-
nating policy report. The report will either be
organized as a literature review or as a policy
analysis. The project is expected to take at
least two regular academic terms to complete
and may well include one or more of the fol-
lowing: research, service learning, or program
internship opportunities, tied to an in-depth
investigation of the topic of study. The goal of
the project is to enable the student to explore
work in an area in significant depth and to
help prepare that student for the work they
wish to do upon graduation. A final version of
the project will be submitted to the School of
Education and evaluated by faculty in the Edu-
cation Policy Analysis and Leadership area.

General Education Teaching
Emphasis

M.Ed. and California Preliminary Teaching
Credential in Multiple Subjects or Single
Subject

This emphasis allows qualified students to
complete requirements for a California
Preliminary teaching credential and a master’s
degree in one academic year and one summer.
The program goes beyond best practice by
preparing students to critically evaluate the
literature on current and future practices in
the field of education.

Prospective students must submit an application
to the Graduate Division.

Concurrent admission into the California
Preliminary Multiple Subject or Single Subject
Teaching Credential program is required for
this emphasis. Students not admitted to the
M.Ed. degree can be considered for a credential
only program. Those who already possess
California teaching credentials are not eligible
for this program but may apply for admission
to the other graduate degree programs offered
by the SOE.

Admission

In addition to the Graduate Division admission
requirements, candidates for this program
must be admitted to one of the following
programs: California Preliminary Multiple
Subject or California Preliminary Single Subject
Teaching Credential
Please see the Teacher Education section of the School of Education’s website at education.ucr.edu to learn about the requirements, in addition to the coursework, listed that must be completed to earn any of the credentials with the California Commission on Teacher Credentialing.

Course Work
This M.Ed. emphasis requires up to 74 units, 36 units are in upper division and graduate level courses; SOE requires at least 28 of the 36 units must be completed in graduate level courses (Plan II). Students must successfully complete their credential requirements to earn the degree. This program requires courses taken during summer sessions.

M.Ed. General Education Teaching Emphasis and California Preliminary Multiple Subject Teaching Credential

1. The following courses are required for the teaching credential: EDUC 132*, EDUC 147*, EDUC 171* or EDUC 172*, EDUC 179A*
   *This course can be waived if completed as part of an undergraduate program and approved by the Graduate Advisor.

2. Up to 8 units can be applied to the master’s degree if the courses were not applied to a previous degree: EDUC 132, EDUC 147, EDUC 171 or EDUC 172, EDUC 179A*

3. The following courses are required for teaching credential and the master’s degree:
   a. EDUC 280L
   b. One from EDUC 285 (E-Z)

5. Analytical Project Course: EDUC 283

6. Seminar Courses: EDUC 333 or EDUC 334, EDUC 348A, EDUC 348B, EDUC 348C

7. Supervised Teaching Experience Courses: EDUC 376A or EDUC 376B, EDUC 376B*, EDUC 376C or EDUC 376C*
   * Only approved intern teachers can enroll in EDUC 378 sections. Information on intern teacher eligibility requirements, visit: education.ucr.edu.

8. Teaching Performance Courses: EDUC 377A, EDUC 377B, EDUC 377C

Other courses may be used to complete degree requirements, if approved by the Graduate Advisor.

Analytical Project
The analytical project centers on comprehensive, critical self-analyses of instructional practice in K-12 classrooms.

A final version of the analytical project is submitted to the School of Education in electronic form for faculty committee review.

Higher Education Administration and Policy Emphasis
This M.Ed. emphasis examines scholarship and research on institutions, policy, systems, and demographic, historical, political, social, and economic contexts. It emphasizes reflective practice and prepares practitioners for careers in higher education institutions so that they can be knowledgeable scholars and expert professionals.

Admission
Candidates for this program must meet the Graduate Division and Graduate School of Education admission requirements. Detailed admission information is available at education.ucr.edu

Course Work
36 units are required. The majority of courses are offered in the School of Education (SOE) and focus on higher education, but program plans may substitute up to 12 units of relevant graduate level courses offered in SOE and other departments.

Required Course: EDUC 248T (4 units)

Analytical Report
After students complete their course work they will complete a case study report that integrates content from higher education courses with practice.

A final version of the report is submitted to the Higher Education faculty committee in the School of Education for review and approval.

Special Education Teaching Emphasis
M.Ed. and California Preliminary Education Specialist Credentials
This degree emphasis is designed to provide a pathway to complete requirements for the dual California Preliminary Education Specialist Credentials of Mild/Moderate Support Needs and Extensive Support Needs Credentials and Master of Education degree, Special Education Teaching Emphasis. The program goes beyond best practice by preparing students to critically evaluate the literature on current and future practices in education.

Prospective students must submit an application to the Graduate Division.

Admission is required into the dual California Preliminary Education Specialist Credentials of Mild/Moderate Support Needs and Extensive Support Needs Credentials. Students not admitted to the M.Ed. degree emphasis can be considered for a credential only program. Those who already possess the dual California Preliminary Education Specialist Credentials of Mild/Moderate Support Needs and Extensive Support Needs Credentials are not eligible for this program, but may apply for admission to the other graduate degree programs offered by the SOE.

Admission
In addition to the Graduate Division admission requirement, candidates for this program must be admitted to the dual California Preliminary Education Specialist Credentials of Mild/Moderate Support Needs and Extensive Support Needs Credentials.

Please see the Teacher Education section of the School of Education’s website at education.ucr.edu to learn about the requirements, in addition to the coursework, listed that must be completed to earn any of the credentials with the California Commission on Teacher Credentialing.
Course Work
The M.Ed. emphasis requires up to 83 units, 36 units are in upper division and graduate level courses; SOE requires at least 28 of the 36 units must be completed in graduate level courses (Plan II). Students must successfully complete their credential requirements to earn the degree. This program requires courses taken during summer sessions.

M.Ed. Special Education Teaching and California Preliminary Education Specialist Credentials
California Preliminary Education Specialist - Mild/Moderate Support Needs and Extensive Support Needs Credentials:

1. The following courses are required for the teaching credential: EDUC 132*, EDUC 136*, EDUC 147*, EDUC 171* or EDUC 172*, EDUC 179A*
   *This course can be waived if completed as part of an undergraduate program and approved by the Graduate Advisor.
2. Up to 8 units can be applied to the master’s degree if the courses were not applied to a previous degree: EDUC 132, EDUC 136, EDUC 147, EDUC 171 or EDUC 172, EDUC 179A
3. The following courses are required for the teaching credential and the master’s degree: EDUC 280L, EDUC 282A, EDUC 282B, EDUC 287A, EDUC 287B
4. Minimum of three (3) elective courses:
   a. One (1) course from: EDUC 246 (E-Z)
5. Seminar Courses: EDUC 331 or EDUC 334, EDUC 381A, EDUC 381B, EDUC 381C
7. Teaching Performance Courses: EDUC 382A, EDUC 382B, EDUC 382C
8. Analytical Project

Other courses may be used to complete degree requirements, if approved by the Graduate Advisor.

Analytical Project
Students will complete a final written project that integrates the content of theory and teaching methods courses. A final version of the report will be submitted to the School of Education and evaluated by faculty in the Special Education area.

Doctoral Degree
The doctoral program in Education is designed to prepare scholars for teaching and research in the area of education. More information about graduate programs in Education is available by contacting the graduate advisor, School of Education, (951) 827-6362, or visit education.ucr.edu.

Specialization
The School of Education has six areas of specialization: Education, Society, and Culture; Education Policy Analysis and Leadership; Educational Psychology; Higher Education Administration and Policy; School Psychology; and Special Education. The School Psychology Program is accredited by the American Psychological Association (APA) and approved by the National Association of School Psychologists (NASP). School Psychology Ph.D. students can also obtain a Pupil Personnel Services Credential.

Information about each area of specialization is available at education.ucr.edu.

Following admission to the program, students are assigned a preliminary faculty advisor who guides them during the initial phase of their program. Students work closely with a faculty advisor during their doctoral program. In addition, three faculty committees — a program guidance committee, an oral qualifying examination committee, and a dissertation committee — may be formed at various stages of the program.

Course Work
Candidates entering the Ph.D. program take a series of courses based on their area of specialization. Number of units vary by specialization. The student and his or her program guidance committee identify and document a program plan. Coursework in each specialization consists of sufficient study to allow the student to master the essential concepts and inquiry methods of that field.

Education, Society, and Culture

Required core and methods courses: EDUC 214A, EDUC 223A, EDUC 223B, EDUC 241B

Theory - complete a minimum of two (2) courses from: EDUC 220A, EDUC 220B, EDUC 273, EDUC 277, EDUC 278, EDUC 284

Electives - complete a minimum of five (5) courses from the following list:

Teaching Requirement: EDUC 302

Professional Development requirement: EDUC 259

Other courses may be used to complete degree and elective requirements, in consultation with the Faculty Advisor and approval by the Graduate Advisor.

Educational Psychology
This specialization offers two tracks. Track 1 is Cognition, Instruction, and Student Learning; Track 2 is Quantitative Methods. Students choose one track in consultation with faculty advisor.

Students choose Track 1 or Track 2 and take a minimum of two courses from that Track in consultation with faculty advisor:

Track 1 - Cognition, Instruction, and Student Learning:
EDUC 200, EDUC 251, EDUC 256, EDUC 269E

Track 2 - Quantitative Methods:
EDUC 216A, EDUC 216B, EDUC 216C, EDUC 218, EDUC 269E

Directed Research: EDUC 297 - A student will engage in pre-dissertation research with at least one faculty member. Directed research lasts three quarters, minimum of four units each quarter, resulting in a research article submitted for presentation or publication.

Teaching Requirement: EDUC 302

Professional Development requirement: EDUC 259

Other courses may be used to complete degree and elective requirements, in consultation with the Faculty Advisor and approval by the Graduate Advisor.

Higher Education Administration and Policy

Research Methodology
In consultation with the faculty advisor, a student selects the Quantitative or the Qualitative Methods Strand to complete, plus one course from the strand they did not select.
Quantitative Methods Strand - three (3) courses: EDUC 214A, EDUC 214B, EDUC 214C
and
One course from: EDUC 241B, EDUC 223A, EDUC 223B
or
Qualitative Methods Strand - three (3) courses: EDUC 241B, EDUC 223A, EDUC 223B
and
One course from: EDUC 214A, EDUC 214B, EDUC 214C
Specialization and Elective Courses - two (2) or more courses: EDUC 248E, EDUC 248G, EDUC 248L, EDUC 248M, EDUC 248Q, EDUC 248R, EDUC 248S, EDUC 248V, EDUC 248W, EDUC 269N
Teaching Requirement: EDUC 302
Professional Development requirement: EDUC 259
Other courses may be used to complete degree and elective requirements, in consultation with the Faculty Advisor and approval by the Graduate Advisor.

School Psychology
Research Design and Methodology Courses
Required Courses: EDUC 214A, EDUC 214B, EDUC 214C, EDUC 216A or EDUC 216B, EDUC 217A, EDUC 242B, EDUC 299
Psychological Consultation and Intervention
Required courses: EDUC 255A, EDUC 255B, EDUC 255C, EDUC 255D, EDUC 261, EDUC 267
Psychological and Behavior Assessment
Required courses: EDUC 231A, EDUC 254A, EDUC 254B, EDUC 254C
Application of Scientific Psychology
Required courses: EDUC 265A, EDUC 265B, EDUC 265C, EDUC 265D, EDUC 265E, EDUC 265F, EDUC 268A, EDUC 268B, EDUC 268C
History and Systems of Psychology and Basic Content Areas in Scientific Psychology
Required courses: EDUC 211A, EDUC 239, EDUC 262, EDUC 2465, EDUC 2467, EDUC 250, EDUC 263, EDUC 264
Internship: Minimum of 12 units of EDUC 298I required. Students must complete and pass the oral qualifying examination before starting the required 1500-hour internship.
Teaching Requirement: EDUC 302
Professional Development requirement: EDUC 259
Other courses may be used to complete degree and elective requirements, in consultation with the Faculty Advisor and approval by the Graduate Advisor.

Special Education
Elective Courses - students must take at least one (1) course in each of the two elective areas:
- Area I – Autism Spectrum Disorder and other Cognitive, Behavioral, Emotional Disabilities: EDUC 239, EDUC 246K, EDUC 246L, EDUC 246M, EDUC 254C, EDUC 255A
- Area II – Learning Disabilities: EDUC 246I, EDUC 246S, EDUC 256
Specialization Courses: A student will take
- a minimum of three (3) additional graduate level courses from SOE or other academic departments in consultation with their faculty advisor.
Teaching Requirement: EDUC 302
Professional Development requirement: EDUC 259
Other courses may be used to complete degree and elective requirements, in consultation with the Faculty Advisor and approval by the Graduate Advisor.

Written Qualifying Examination
Near completion of the second year of study or after 60 units of graduate level course work, students take the written qualifying examination. The student’s faculty advisor, in consultation with faculty associated with the student’s area of specialization, coordinates the construction of the written examination. Students must:
1. Review critical literature in an assigned field
2. Demonstrate competence in research methodologies, and
3. Demonstrate competence over content in fields of specialization.

The faculty associated with the student’s area of specialization evaluate the written qualifying examination to determine the outcome. In the event students do not pass one or more sections, they will have one more opportunity to pass to continue in the program.

Pre-proposal and Oral Qualifying Exam
Following the successful completion of the written examination and before the oral qualifying examination, the Graduate Dean approves an oral qualifying committee nominated by the program. The committee consists of the student’s faculty advisor, three additional faculty members from the School of Education, and one faculty member from outside the school. In preparation for the oral qualifying examination, students develop a pre-proposal, setting forth the direction of their dissertation. Once the faculty advisor determines that the pre-proposal is ready for the oral examination, it is distributed to the oral qualifying committee. The committee uses the pre-proposal as a focus for examining the student, but the questioning may go beyond the pre-proposal. Students pass the oral qualifying examination when the committee is satisfied that 1) the pre-proposal, as well as the student’s grasp of the theoretical

and empirical issues at its core, leads in a productive direction toward a competent dissertation, and 2) the student has demonstrated competence in areas covered by the written examination that are also addressed in the oral examination.

Proposal
Prior to commencing the dissertation research, students must have a dissertation proposal approved by the dissertation committee.

Teaching Requirement
EDUC 302 is taken for a minimum of one quarter. Units are determined by supervising course instructor.

Foreign Language Requirement
None

Dissertation
Following the approval of the dissertation proposal, students will complete a dissertation and schedule an oral defense with the approval of the committee chair. The dissertation must be approved by the dissertation committee and submitted to the Graduate Division before the candidate is recommended for the degree.

Professional Development Requirement
All students must enroll in EDUC 259.

Normative Time to Degree
15 quarters from admission to the Ph.D. program

Credential Programs
The School of Education offers teaching credential programs, and a credential for school psychologists. These programs are accredited by the California Commission on Teacher Credentialing. Combined teacher credential programs with a Master of Education degree (M.Ed.) are described in the Master of Education section.

Admission
Admission to a credential program is based upon GPA and letters of recommendation from individuals knowledgeable about the candidate’s ability to succeed in professional study. Most programs also require an interview. Admission also requires candidates to pass exams in basic skills and subject matter. Detailed admission information is available at education.ucr.edu.

Programs for the Preparation of Teachers

Post baccalaureate Teaching Credential

Programs
The School of Education offers credential programs that result in teacher certification and do not require admission to a master degree program. The following programs are offered:

- California Preliminary Multiple Subject Teaching Credential
- California Preliminary Multiple Subject Teaching Credential Internship
- California Preliminary Single Subject Teaching Credential
- California Preliminary Single Subject Teaching Credential Internship
- California Preliminary Education Specialist - Mild/Moderate Support Needs and Extensive Support Needs Credentials
California Preliminary Multiple Subject Teaching Credential
This credential program allows students to complete the requirements for a California Preliminary Multiple Subject Teaching Credential in one academic year and one summer. The California Preliminary Multiple Subject Teaching Credential is for the elementary setting. A bilingual emphasis in Spanish is available to qualified candidates who want to be authorized to deliver instruction in Spanish as well as English. Students must successfully complete their credential requirements to earn the certification. This program requires courses that are taken during summer sessions.

Course Work
The California Preliminary Multiple Subject Teaching Credential requires at least 32 to 52 units. Students will complete at least 32 units and an additional 4 to 20 units are required if a student has not previously completed the courses noted below with an asterisk.

Required Courses:

* This course can be recognized if completed as part of an undergraduate program and approved by the Graduate Advisor.

California Preliminary Multiple Subject Teaching Credential Internship
This credential program allows students to complete the requirements for a California Preliminary Multiple Subject Teaching Credential Internship in one academic year and one summer. The California Preliminary Multiple Subject Teaching Credential Internship is for the elementary setting. A bilingual emphasis in Spanish is available to qualified candidates who want to be authorized to deliver instruction in Spanish as well as English. This program requires courses taken during summer sessions.

Course Work
The California Preliminary Multiple Subject Teaching Credential Internship requires at least 46 units.

Required Courses:

The following courses are required for teaching certification and are taken prior to admission to this program: EDUC 132, EDUC 147, EDUC 162, EDUC 171 or EDUC 172, EDUC 179A

Please see the Teacher Education section of the School of Education’s website at education.ucr.edu to learn about the requirements, in addition to the coursework, listed that must be completed to earn the credential with the California Commission on Teacher Credentialing.

California Preliminary Single Subject Teaching Credential
This credential program allows students to complete the requirements for a California Preliminary Single Subject Teaching Credential in one academic year and one summer. The California Preliminary Single Subject Teaching Credential is for the middle school or high school setting. The School offers the following single subject areas: English, Mathematics, Sciences (e.g. Biology, Chemistry, Geoscience, Physics) Social Science, and World Language (Spanish). Students must successfully complete their credential requirements to earn the certification. This program requires courses that are taken during summer sessions.

Course Work
The California Preliminary Single Subject Teaching Credential requires at least 30 to 50 units. Students will complete at least 30 units and an additional 4 to 20 units are required if a student has not previously completed the courses noted below with an asterisk.

Required Courses:
1. EDUC 132*, EDUC 147*, EDUC 162*, EDUC 177* or EDUC 179*, EDUC 179A*, EDUC 333 or EDUC 334, EDUC 348A, EDUC 348B, EDUC 348C, EDUC 376A, EDUC 376B, EDUC 376C, EDUC 377A, EDUC 377B, EDUC 377C
2. One course from: EDUC 285 (E-Z)

* This course can be recognized if completed as part of an undergraduate program and approved by the Graduate Advisor.

California Preliminary Single Subject Teaching Credential Internship
This credential program allows students to complete the requirements for a California Preliminary Single Subject Teaching Credential Internship in one academic year and one summer. The California Preliminary Single Subject Teaching Credential Internship is for the middle school or high school setting. The School offers the following single subject areas: English, Mathematics, Sciences (e.g. Biology, Chemistry, Geoscience, Physics) Social Science, and World Language (Spanish). Students must successfully complete their credential requirements to earn the credential with the California Commission on Teacher Credentialing.

California Preliminary Education Specialist - Mild/Moderate Support Needs and Extensive Support Needs
This dual credential program allows students to complete the requirements for the California Preliminary Education Specialist - Mild/Moderate Support Needs and Extensive Support Needs Credentials in one academic year and one summer. The California Preliminary Education Specialist Mild/Moderate Support Needs and Extensive Support Needs Credentials are generally for those who want to be special education teachers. Students must successfully complete their credential requirements to earn the certifications. This program requires courses that are taken during summer sessions.

Course Work
The California Preliminary Education Mild/Moderate Support Needs and Extensive Support Needs Credentials requires 47 to 71 units. Students will complete at least 47 units and an additional 4 to 24 units are required if a student has not previously completed the courses noted below with an asterisk.

Required Courses:

* This course can be recognized if completed as part of an undergraduate program and approved by the Graduate Advisor.

Lower-Division Courses
EDUC 001 Imagining Teaching 2 Lecture, 2 hours. Prerequisite(s): none. Considers images of teaching produced in popular culture, professional writing, and personal recollections, and how the images impact and reflect teaching in schools. Designed for lower-division students considering teaching as a career.

EDUC 002 Looking in Classrooms 3 Lecture, 2 hours; field, 3 hours. Prerequisite(s): EDUC 001 or EDUC 003. Involve observation in classrooms in local schools identified as having exemplary programs. Students record and interpret their observations and compare them to published studies of classrooms. Credit is awarded for only one of EDUC 002 or EDUC 004.
EDUC 003 Imagining Teaching: Science/Mathematics Emphasis 3 Lecture, 2 hours; field, 3 hours. Prerequisite(s): admission to the California Teach program; and consent of instructor. Considers images of teaching and how they impact teaching in schools. Addresses topics related to teaching mathematics and science in the K-12 classroom. Includes three hours per week of classroom observations, some of which takes place in public school classrooms.

EDUC 004 Looking in Classrooms: Science/Mathematics Emphasis 3 Lecture, 2 hours; field, 3 hours. Prerequisite(s): EDUC 003; admission to the California Teach program; consent of instructor. Involves observation in classrooms in local schools identified as having exemplary programs in mathematics and science. Students record and interpret their observations and compare them to published studies of classrooms. Designed for lower-division students who plan to teach mathematics or science in the public schools. Credit is awarded for only one of EDUC 002 or EDUC 004.

EDUC 005 Introduction to Education Studies 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An overview of the field of education and learning inside and outside of the classroom. Introduces public policy and a critical perspective on the ideological and social construction of schools in the United States. Includes interpretations of learning conditions through student observations and experiences in varied educational and learning contexts.

EDUC 010 Principals of Learning Strategies 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduces attitudes and behaviors associated with successful learning and achievement. Compares research-based learning strategies in school, home, and multimedia with regard to different types of learners and topic areas. Credit is awarded for one of the following EDUC 010 or EDUC 010H.

EDUC 010H Honors Principals of Learning Strategies 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): admission to University Honors; or consent of instructor. Honors course corresponding to EDUC 010. Introduces attitudes and behaviors associated with successful learning and achievement. Compares research-based learning strategies in school, home, and multimedia with regard to different types of learners and topic areas. Credit is awarded for one of the following EDUC 010H or EDUC 010.

EDUC 019 (E-Z) Topics in Education 4 Lecture, 3 hours; discussion, 1 hour. Explores a topic of current theory, research, and issues in areas of education, society, and human development. Debate and dialog are the distinguishing features of this course. Topics are announced in the Schedule of Classes. E. Educational Psychology; I. Education, Society, And Culture; M. Education Policy Analysis And Leadership; N. Higher Education; P. School Psychology; S. Special Education. Course is repeatable as content or topic changes to a maximum of 16 units.

EDUC 023 Introduction to Education Policy 4 Lecture, 3 hours; discussion, 1 hour. An overview of federal and state policy frameworks governing public education. Explores the political dynamics of policy making. Focuses on centralized policy making authority and on efforts to reform and improve public schools. Explores competing values guiding policy debates and dilemmas of centralized policy control.

EDUC 024 Inequality in Educational Opportunity and Achievement 4 Lecture, 3 hours; discussion, 1 hour. Examines existing theories, research, and policies addressing disparities in educational opportunities and achievement among racial/ethnic, social class, and language groups—a problem now continuously designated as the “achievement gap.” Explores the incidences, consequences, and causes of these gaps and society’s interest in eliminating the gaps.

EDUC 032A Introduction to Children With Special Needs 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): permission by department. Introduces variations in the development of children with special needs from birth through pre-adolescence and the resulting impact on families. Includes historical and societal influences, laws relating to children with special needs, and the identification and referral process for special education and related services. Includes field observations.

EDUC 032B Childhood Stress and Trauma 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Provides a comprehensive overview of concepts and issues related to childhood stress and trauma. Emphasizes the short- and long-term effects that stress and trauma have on the physical, cognitive, language, social, and emotional development of a child. Examines methods that support the child’s coping skills and healing process and reviews how parents and practitioners can assist them.

EDUC 032C Sources and Treatments of Socio Emotional, Behavior, Or Conduct Problems in Young Children 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduces intercollegiate athletics as an organization including its structure and function. Explores the role of intercollegiate athletics in higher education from historical, sociological, economic, and administrative perspectives. Focuses on contemporary issues including student-athlete experience as well as the roles of faculty, students, coaches, and administrators and the various emerging challenges.

EDUC 051 Introduction to Higher Education: Current Issues and Debates 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduces critical issues confronting contemporary U.S. higher education. Focuses on three major themes: debates over the purpose of higher education; the context and main challenges institutions and students currently face; and how the current environment is likely to shape the future of higher education.

EDUC 052 Black Brilliance Matters: the History, Experience, and Scholarship of Blacks in Higher Education 4 Lecture, 3 hours; discussion, 1 hour. Explores historical and contemporary issues faced by Black students, faculty, staff, and administrators in higher education. Topics include history and importance of, theoretical and conceptual frameworks related to, and challenges and opportunities experienced by Black institutional stakeholders in higher education.
EDUC 061 Introduction to Human Development 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Discusses the development of physical, social, and cognitive processes from infancy to young adulthood. Physical topics include genetics, prenatal, and motor development. Cognitive processes include perception, attention, and memory and language development. Social processes include topics such as attachment, moral development, aggression, peer relationships, and the family.

EDUC 093A First-Year Seminar: Introduction to the Major and University 2 Seminar, 2 hours. Prerequisite(s): Restricted to class level standing of freshman; Restricted to major(s) Education, Society, Human Dev. Introduces the Education major. Provides opportunities to engage with Education faculty and learn about research. Introduces community learning options. Explores the structure and culture of university environment and the various support systems in place. Learn about student success strategies and consult with advisors for support. Graded Satisfactory (S) or No Credit (NC).

EDUC 093B First Year Seminar: Exploring Opportunities For Success 1 Workshop, 1 hour. Prerequisite(s): EDUC 093A with a grade of S or better; restricted to major(s) Education, Society, Human Dev. Delves deeper into the support structures and opportunities on campus. Engages in short- and long-term goal setting. Explores student success strategies and building community in the cohort. Continues the opportunities to receive structured support and consultation from advisors. Graded Satisfactory (S) or No Credit (NC).

EDUC 093C First Year Seminar: Community of Learners 1 Workshop, 1 hour. Prerequisite(s): EDUC 093B with a grade of S or better; restricted to major(s) Education, Society, Human Dev. Explores learning options during the academic year and summers. Discusses the significance of on- and off-campus research and community engagement opportunities. Continues discussions of student success strategies, building community, and the structured opportunities to receive support and consultation with advisors. Graded Satisfactory (S) or No Credit (NC).

EDUC 094 Transfer Seminar: Exploring the Tools and Opportunities For Student Success 2 Seminar, 2 hours. Prerequisite(s): restricted to major(s) Education, Society, Human Dev; or consent of instructor. Introduces transfer students to the Education major. Provides opportunities for engaging with Education faculty and learn about research. Explores university environment and opportunities for student success. Explores student success strategies and introduces opportunities to consult with advisors for support. Explores opportunities to broaden intellectual and professional opportunities in education. Graded Satisfactory (S) or No Credit (NC).

Upper-Division Courses

EDUC 100A Tutorial Teaching: Community Outreach 2 Lecture, 5 hours per quarter; field, 3 hours; research, 15 hours per quarter. Prerequisite(s): upper-division standing; consent of instructor. Graded Satisfactory (S) or No Credit (NC).

EDUC 100B Tutorial Teaching: Professional Development 2 Lecture, 5 hours per quarter; field, 3 hours; research, 15 hours per quarter. Prerequisite(s): upper-division standing; consent of instructor. Graded Satisfactory (S) or No Credit (NC).

EDUC 102 Democratic Pedagogy: Developing R’courses 1 Workshop, 1 hour. Prerequisite(s): restricted to class level standing of sophomore, junior, or senior; and consent of instructor. Supports the R’Course process of student-facilitated, shared, active learning. Provides opportunities for student facilitators to discuss pedagogical theory and prepare meaningful resources to put into practice. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as content or topic changes to a maximum of 4 units.

EDUC 104 Mathematics Education 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): restricted to class level standing of sophomore, junior, or senior. Examines contemporary instructional strategies relating to mathematics education. Includes thinking skills and problem solving strategies applicable to number theory, logic patterns and functions, statistics, probability, geometry, and algebra.

EDUC 105 Introduction to Science Pedagogy 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Introduction to contemporary theoretical pedagogical teaching strategies. Includes the application to teaching science education in the classroom for the twenty-first century. Covers the understanding of required Common Core State Standards (CCSS) and integration with Next Generation Science Standards (NGSS).

EDUC 111 (E-Z) Educational Psychology 4 Seminar, 3 hours; activity, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Explores a topic of current theory, research, and issues in areas of education, society, and human development. Includes the distinguishing features of debate and dialog in a smaller group setting. E. Educational Psychology; I. Education, Society, And Culture; M. Education, Policy, Analysis & Leadership; N. Higher Education Administration And Policy; P. School Psychology; S. Special Education. Course is repeatable as content or topic changes to a maximum of 8 units.

EDUC 112 Understanding Assessment in Education 4 Lecture, 3 hours; individualized study, 3 hours. Prerequisite(s): Restricted to class level standing of junior, or senior; or consent of instructor. Introduces principles of educational assessment including reliability and validity to help interpret test-based information in educational settings.

EDUC 118 Educational Research Methods 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; restricted to major(s) Education, Education, Society, Human Dev; Minor in Education; or consent of instructor. Explores preliminary considerations that go into selecting a qualitative, quantitative, and mixed methods research design. Examines educational research from various paradigms.

EDUC 119 (E-Z) Topics in Education 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior. Explores a topic of current theory, research, and issues in areas of education, society, and human development. Debate and dialog are the distinguishing features of this course. Topics are announced in the Schedule of Classes. E. Educational Psychology; I. Education, Society, And Culture; M. Education Policy Analysis And Leadership; N. Higher Education; P. School Psychology; S. Special Education. Course is repeatable as content or topic changes to a maximum of 16 units.

EDUC 122 Education, Digital Media, and Democratic Engagement 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EDUC 005 with a grade of C- or better or EDUC 010 with a grade of C- or better or EDUC 010H with a grade of C- or better; restricted to class level standing of junior, or senior; or consent of instructor. Examines studies of youth civic and political engagement and how such engagement is changing in the digital age. Presents and evaluates varied ways educators can support more, more equitable, and effective democratic engagement in the digital age.

EDUC 123 School Effectiveness and Educational Equity 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Introduction to the research literature on teacher and school factors that impact student achievement and educational equity. Covers a multitude of factors and seeks to gauge the relative effect of each factor. Credit is awarded for one of the following EDUC 123 or EDUC 245K.

EDUC 132 The Exceptional Child 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to class level standing of junior, senior, credential only, or masters. Explores characteristics of individuals with physical and mental disabilities. Includes emotional disturbance, visual or hearing impairments, gifted and talented students, and children with characteristics of autism. Emphasizes educational programs and considers the effect of gender, socioeconomic, ethnic, and linguistic factors.
EDUC 134 Abnormal Psychology For Educators 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EDUC 010 with a grade of C- or better or EDUC 010H with a grade of C- or better; restricted to class level standing of junior, or senior; or consent of instructor. A study of abnormal psychology for educators. Topics include how psychologists categorize and diagnose a variety of disorders in school-aged children, how to support these students in the classroom, and potential difficulties that may be faced in the classroom or educational setting.

EDUC 136 Educational Assessment of Individuals With Disabilities 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): EDUC 132 with a grade of C- or better; Restricted to class level standing of junior, senior, credential only, or masters; or consent of instructor. Teaches the principles and techniques of assessment and educational planning for children with disabilities. Examines the value and usefulness of a broad range of assessment and record-keeping tools in general and special education.

EDUC 141 Historical and Contemporary Perspectives On Lgbtq Students and Faculty 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines historical and cultural meanings of homosexuality, heterosexuality, sex, and gender. Explores the historical experiences of LGBTQ students, teachers, and faculty from the early 20th century to the present. Explores current issues regarding LGBTQ students and teachers, including the California requirement to incorporate LGBTQs into the K-12 curriculum.

EDUC 142 Language and Society 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EDUC 005 with a grade of C- or better or EDUC 043 with a grade of C- or better; restricted to class level standing of junior, or senior; or consent of instructor. Focuses on the relationships between language and society: the connections between language and cultural values; the intersection between language and social structure; the ways in which power relationships are reflected, reinforced and resisted by language practices; and how language is used to construct social identities.

EDUC 144 Constructing Success and Failure in K-12 Schools 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EDUC 005 with a grade of C- or better; restricted to class level standing of junior, or senior; or consent of instructor. Examines educational research addressing how structural arrangements and cultural processes in schools contribute to the academic success and failure of students based on racial, ethnic, class, gender, and linguistic differences.

EDUC 145 Black Language in Schools and Society 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Explores linguistic, sociolinguistic, and sociopolitical dimensions of Black language in the United States. Considers the relationship between Black language and Blackness. Critically interrogates the role of Black language in classroom instruction, schools, and society. Encourages liberatory learning engagements and centers the lived experiences of Black language speakers. Cross-listed with BLKS 145.

EDUC 146 Educational Perspectives On the Chicano 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An examination of educational policy issues concerning Chicano students, such as testing and testing procedures, learning styles, socialization, and language acquisition. Other topics will deal with the impact of significant legislative acts related to the education of Chicanos. Cross-listed with ETST 146.

EDUC 147 Education in A Diverse Society 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to class level standing of junior, senior, credential only, or masters. An analysis of the classroom as a microcosm of society. Focuses on issues related to meeting the educational needs of students with diverse backgrounds and characteristics including gender, religion, ability, ethnicity, culture, socio-economic status, class, exceptionality, and language.

EDUC 148 Critical Race Theory and K-12 Schools 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): EDUC 147 with a grade of C- or better; restricted to class level standing of junior, or senior; or consent of instructor. Introduces the framework of Critical Race Theory. Guidance through a comprehensive analysis of racism and racial justice in schools and learning to develop racial literacies and research capacities.

EDUC 149 Ethnic Studies in K12 Contexts 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EDUC 147 with a grade of C- or better; restricted to class level standing of junior, or senior; or consent of instructor. Examines a brief historical genealogy of Ethnic Studies as a field of study. Provides opportunities to broaden content and pedagogical knowledge of Ethnic Studies approaches in K-12 school settings. Reviews the existing empirical research of the inclusion of Ethnic Studies literacies and pedagogies in U.S. public schools.

EDUC 150 Policy and Legal Issues in Intercollegiate Athletics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines policy and legal issues associated with intercollegiate athletics. Emphasis will be placed on NCAA and member policies and principles as well as ongoing litigations and landmark judicial decisions affecting athletics. Students will approach these issues from the perspective of various stakeholders, including researchers, university leaders, regulatory bodies, and athletes.

EDUC 151 Wo/Men Who Control Our Universities: Leadership, Administration, and Governance in Higher Education 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EDUC 051 with a grade of C- or better; restricted to class level standing of junior, or senior; or consent of instructor. Introduces an overview of the leadership, administration, and governance required for the control of higher education institutions. Provides an opportunity to better understand the people in charge of higher education and how they lead.

EDUC 152 Education, Hip-Hop, and Sport 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Draws connections between education, hip-hop culture, and sport. Special emphasis is placed on the ways in which education and sport are inextricably linked to hip-hop culture. Consideration is also given to the complex, interconnected relationships between sport and hip-hop and topics such as race, inequality, and politics within institutional settings.

EDUC 153 Whiteness, Power, and Privilege 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EDUC 147 with a grade of C- or better; restricted to class level standing of junior, or senior; or consent of instructor. Explores race, racialization, and racism through the lens of critical whiteness studies and critical race theory. Sheds light on white racial identity development and reveals how racism and white supremacy render us un-whole. Includes a diverse range of topics related to whiteness, power, and privilege.

EDUC 154 Educational Leadership in A Diverse Society 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Examines issues impacting leadership in diverse educational contexts. Inquiries into demographic shifts, globalization, technology, evidence-based decision-making, organizational culture, community engagement, and equity and inclusion of diverse learners.

EDUC 160 Cognitive Development and Education 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EDUC 010 with a grade of C- or better or EDUC 010H with a grade of C- or better; restricted to class level standing of junior, or senior; or consent of instructor. Presents an overview of the major themes of cognitive development within the educational context. Include the development of memory, abilities, motivation, language, and math skills. Explores the use of cognitive developmental changes within a variety of educational contexts.

EDUC 161 Social Development in Education 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EDUC 010 with a grade of C- or better or EDUC 010H with a grade of C- or better; restricted to class level standing of junior, or senior; or consent of instructor. Discusses the processes involved in the development of social behaviors from birth to young adulthood. Discusses issues concerning attachment, family systems, peer relationships, aggression, prosocial behavior, and self-concept within the educational context. Presents theories and scientific research in a context of practical application.
EDUC 162 Learning Theory and Psychology in Education 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to class level standing of junior, senior, credential only, or masters. Covers the study of stages of intellectual development; principles of learning; the dynamics of human behavior; learner and cultural differences as they relate to modern curricula and instruction; and the role of motivation and self-concept in the learning process.

EDUC 171 Reading and Language Development 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to class level standing of junior, senior, credential only, or masters; permission by department. An introduction to reading and language development. Addresses theoretical models of reading; linguistics and language development; methods and materials; children’s and adolescents’ literature; reading in the content areas; individual differences; and measurement and evaluation in reading. Includes observation and participation in assigned schools. Credit is awarded for one of the following EDUC 171 or EDUC 172.

EDUC 172 Reading and Language Development 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): restricted to class level standing of junior, senior, credential only, or masters; permission by department. An introduction to reading and language development. Addresses theoretical models of reading; linguistics and language development; methods and materials; children’s and adolescents’ literature; reading in the content areas; individual differences; and measurement and evaluation in reading. Includes observation and participation in assigned schools. Credit is awarded for one of the following EDUC 172 or EDUC 171.

EDUC 177 Reading and Writing in the Content Areas 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to class level standing of junior, senior, credential only, or masters; permission by department. An examination of reading, writing, academic language, and English language development strategies for teaching at the middle and high school levels. Covers all areas of the curriculum. Includes observation and participation in public schools. Credit is awarded for one of the following EDUC 177 or EDUC 178.

EDUC 178 Reading and Writing in the Content Areas 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): restricted to class level standing of junior, senior, credential only, or masters; permission by department. An examination of reading, writing, academic language, and English language development strategies for teaching at the middle and high school levels. Covers all areas of the curriculum. Includes observation and participation in public schools. Credit is awarded for one of the following EDUC 178 or EDUC 177.

EDUC 179A Language Development in Content Areas 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to class level standing of junior, senior, credential only, or masters. Examines materials, teaching strategies, and remedial approaches designed to enhance reading skills and promote English language development of students experiencing difficulties in acquiring reading and language skills. Content area literacy and academic language for special needs population. Focuses on assessments and interventions used in both specialized and general education settings.

EDUC 179B Language Development in Content Areas: ESL Instruction Emphasis 3 Lecture, 2 hours; research, 1 hour; field, 2 hours. Prerequisite(s): EDUC 179A with a grade of C- or better; restricted to class level standing of junior, senior, credential only, or masters; permission of department. Analysis, planning, execution, and evaluation of empirical and theoretical foundations of programs and strategies for English-as-a-second-language instruction and English language development in content area instruction. Includes observation and participation in assigned schools. Satisfactory(S) or No Credit(N/C) is not available.

EDUC 181 Introduction to Applied Behavior Analysis 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EDUC 005 with a grade of C- or better or EDUC 010 with a grade of C- or better or EDUC 010H with a grade of C- or better; restricted to class level standing of junior, or senior; consent of instructor. Introduction to the foundational knowledge and skills in Applied Behavior Analysis. Topics include the roots of Applied Behavior Analysis, key concepts in respondent and operant behavior, and their relevance to school and clinical settings. Discusses basic principles of prevention and intervention for mild to severe problem behaviors.

EDUC 182 Behavioral Interventions in the Schools 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EDUC 010 with a grade of C- or better or EDUC 010H with a grade of C- or better; restricted to class level standing of junior, or senior; consent of instructor. An introduction to the professional practice of applied behavior analysis (ABA) in K-12 school settings. Topics include ethical practice, assessment, and intervention. Presents relevant behavior principles and procedures focusing on their incorporation in educational programming for children and adolescents.

EDUC 183 Psychology in the Schools 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EDUC 010 with a grade of C- or better or EDUC 010H with a grade of C- or better; restricted to class level standing of junior, or senior; consent of instructor. Examines psychological phenomena in schools. Includes the interplay between students, teachers, and schools; the work of school psychologists and other school-based professionals; and special topics such as exceptional children, bullying, crisis intervention, and school violence prevention.

EDUC 184 Social Emotional Learning in the Schools 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EDUC 010 with a grade of C- or better or EDUC 010H with a grade of C- or better; restricted to class level standing of junior, or senior; consent of instructor. An overview of fostering social emotional competence in PK-12 settings. Topics include cultural adaptations, generalization and maintenance, and trauma in the schools.

EDUC 190 Special Studies 1 to 5 Research, 3 to 15 hours. Prerequisite(s): restricted to class level standing of junior, or senior; consent of the Associate Dean of Undergraduate Education Programs of the School of Education; and consent of instructor. Independent study and research in education. Course is repeatable as content or topic changes to a maximum of 12 units.

EDUC 198 R’course: Variable Topics 1 Activity, 3 hours. Prerequisite(s): permission needed from department; sophomore standing or better. An opportunity for UCR undergraduates to develop leadership skills, innovate the undergraduate curriculum, and promote democratic, experiential education. Original course topics are variable and unique from other departmental course offerings, designed to highlight the student facilitators’ expertise while working closely with a faculty mentor. Graded Satisfactory(S) or No Credit(NC). Course is repeatable as topics change to a maximum of 8 units.

EDUC 198G Group Internship 1 to 12 Seminar, 1 hour; internship, 2 to 32 hours; written work, 1 hour. Prerequisite(s): upper-division standing; consent of instructor. On- or off-campus group internship related work in a community organization/district under the joint direction of an on- or off-campus supervisor and an Education faculty member. Requires a report based on the experience. Course is repeatable to a maximum of 16 units.

EDUC 198I Individual Internship 1 to 12 Seminar, 1 hour; internship, 2 to 32 hours; written work, 1 hour. Prerequisite(s): upper-division standing; consent of instructor. On- or off-campus individual internship related work in a community organization/district under the joint direction of an on- or off-campus supervisor and an Education faculty member. Requires a report based on the experience. Course is repeatable to a maximum of 16 units.

Graduate Courses

EDUC 200 Human Differences 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): EDUC 212 or equivalent. Covers dimensions of individual differences, varieties of group differences, and factors producing differences in development.

EDUC 201A Research in Reading and Writing 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A critical evaluation of linguistic, cognitive, social, and cultural aspects of reading and writing, as gleaned from research, and reading and writing research methods.
EDUC 201B Theories and Issues in Literacy 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): EDUC 201A or consent of instructor. Examination of literacy development in individuals and in society; definitions of literacy; development of structural knowledge; development of communication skills; role of language differences in the problems of learning to read and write; oral language arts; emergent literacy; and writing development.

EDUC 202 Democracy and Education 4 Seminar, 3 hours; activity, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. An introduction to the democratic purposes of education. Focuses on education’s role in preparing youth for active, thoughtful, equitable, and effective participation in a democratic society. Highlights the challenges and opportunities associated with societal changes such as the digital revolution, increasing student diversity, and sizable partisan divisions.

EDUC 203 History of American Education 4 Lecture, 3 hours. Prerequisite(s): consent of instructor. A study of American educational history from 1830 to the present.

EDUC 205 Economics of Education 4 Seminar, 3 hours; activity, 3 hours. Prerequisite(s): EDUC 214B or equivalent; consent of instructor. Examines the insights economists have brought to the education policy debate. Covers basic microeconomic theory and its application to private and social returns to education, education production, costs, and financing of education, teachers and teacher labor markets, and education markets, school choice, and incentives.

EDUC 209 Education Policy Analysis 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Examines major issues and reform movements in public education that are at the forefront of the national policy agenda today. Views each educational reform issue in light of its connection to four themes driving reform efforts: equity, adequacy, autonomy, and accountability. Credit is awarded for one of the following EDUC 209 or PBPL 260.

EDUC 210 Sociology of Education 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing. Introduces students to key sociological theories and empirical research on schooling and social inequality. This is a diverse subfield of sociology, focusing on how social forces create variation in school practices, and how variation in school practices affects individual student achievement, behavior, and life course outcomes.

EDUC 211A Cognitive Development 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Survey course on theories, issues, applications, and contemporary research related to cognitive development across several major developmental periods, including childhood, adolescence, and early adulthood.

EDUC 211B Social Development 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Surveys social development during childhood and adolescence. Topics include individuality and self, peer relations, adult-child relations, self-system beliefs and attitudes, and achievement motivation. Special attention is paid to issues as they relate to socialization at school.

EDUC 212 Research Methods 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Covers principles of scientific research including historical, survey, descriptive, correlational, experimental, and quasi-experimental methods, as well as internal and external threats to validity. Credit is awarded for only one of EDUC 212 or EDUC 248T.

EDUC 214A Introduction to Quantitative Methods 4 Lecture, 3 hours; extra reading, 1.5 hours; written work, 1.5 hours. Prerequisite(s): restricted to major(s) Education; first-year standing in the Ph.D. program in Education; graduate standing or consent of instructor. Introduces descriptive statistics and fundamentals of statistical inference in educational research. Topics include sampling theory, normal and z-distributions, hypothesis testing, confidence intervals, central limit theorem, t-tests, correlation, simple regression, and chi-square.

EDUC 214B Multiple Regression Analysis 5 Lecture, 3 hours; laboratory, 3 hours; written work, 3 hours. Prerequisite(s): EDUC 214A; graduate standing; or consent of instructor. Introduces techniques and assumptions of regression models and analysis. Topics include ordinary least squares, logistic regression, continuous and categorical predictors, interaction effects, and effect size.

EDUC 214C Experimental Design 5 Lecture, 3 hours; laboratory, 3 hours; research, 3 hours. Prerequisite(s): EDUC 214B; graduate standing; or consent of instructor. Introduces experimental and quasi-experimental designs. Topics include factorial, repeated measures, analysis of covariance, and mixed designs.

EDUC 216A Structural Equation Modeling 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): EDUC 216C with a grade of B or better; graduate standing; or consent of instructor. Introduction to structural equation modeling (SEM) techniques. Emphasizes theory, application, and interpretation of techniques. Addresses development in the use and interpretation of specialized software. Topics include confirmatory factor analysis, covariance structure analysis, structural regression models, and latent change analysis. Considers model definition and specification, identification, estimation, and testing.

EDUC 216B Multilevel Modeling 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): EDUC 216B with a grade of B or better; graduate standing; or consent of instructor. Covers the processes involved in conceptualizing, conducting, interpreting, and composing multilevel analyses. Includes ANOVA and ANCOVA with random effects, means-as-outcomes, random-coefficients, intercepts and slopes as outcomes, and growth models. Also addresses model building and assessment, centering, estimation, hypothesis testing, contextual and compositional effects, and other related topics. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

EDUC 216C Causal Modeling in Education 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): EDUC 214B with a grade of B or better; graduate standing; or consent of instructor. Overview of methods for estimating causal effects in social research. Topics include randomized experiments, regression discontinuity, interrupted time series, difference-in-differences, instrumental variables, matching, and fixed effects. Focuses on statistical theory, data requirements, and appropriate applications. Applies methods through assignments analyzing real data.

EDUC 217A Single-Case Experimental Design 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): admission to the M.A. or Ph.D. program in School Psychology or Special Education or M.Ed. emphasis in Applied Behavior Analysis; graduate standing; or consent of instructor. Covers methodological considerations for engaging in defensible causal inference using single-case design. Discusses applicable issues in causality, design, measurement, analysis, and synthesis. Emphasizes skills in independently designing and conducting single-case research.

EDUC 217B Research Methods in Applied Behavior Analysis 2 Lecture, 2 hours. Prerequisite(s): EDUC 217A, may be taken concurrently; graduate standing; or consent of instructor. Engages in practical readings and exercises to further develop ability to design research studies; measure behavior; interpret single-case designs and graphical displays of behavioral data; and create graphical displays of behavioral data.

EDUC 218 Problems in Evaluation 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing. A study of policies and procedures that define program evaluations in education. Topics include evaluation models, formative and summative strategies, evaluation designs and analyses, and ethical issues.

EDUC 219 Classroom and School Assessment 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Survey course in classroom and school assessment. Covers basic principles of measurement including test administration, construction, scaling, norming, reliability, validity, and interpretation of individual and group tests.

EDUC 220A Sociocultural Theory and Education 4 Seminar, 3 hours; term paper, 1 hour; extra reading, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Explores sociocultural perspectives in relation to teaching, learning, students, teachers, and others in schools and other learning environments. Considers issues of knowledge, skills, values, power, and privilege as seen through sociocultural theory and research.
EDUC 220B Sociocultural Theory and Education 4 Seminar, 3 hours; term paper, 1 hour; extra reading, 2 hours. Prerequisite(s): EDUC 220A or consent of instructor. Continues the exploration of sociocultural perspectives in relation to teaching, learning, students, teachers, and others in schools and other learning environments. Considers issues of knowledge, skills, values, power, and privilege as seen through sociocultural theory and research.

EDUC 223A Qualitative Research Methodologies in Education 5 Seminar, 3 hours; research, 6 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on the theoretical underpinnings of qualitative research methodologies and their use in designing, conducting, and representing research.

EDUC 223B Qualitative Research Methodologies in Education 5 Seminar, 3 hours; research, 6 hours. Prerequisite(s): EDUC 223A; graduate standing; consent of instructor. Focuses on the collection, analysis, and representation of data in interpretive research. Course is repeatable as content or topic changes to a maximum of 15 units.

EDUC 225 Chicana/O Curricula K-12: Theory Into Praxis 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing; consent of instructor. Overview of academic literatures in critical pedagogy, critical race theory, bilingual, multicultural, and Chicana/o education. Contextualizes theory with K-12 practice. Includes collaborative creation of grade-level standards-aligned curricula focused on Chicana/o communities and engaging critical theories in praxis.

EDUC 226 Ethnic Studies and Education 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces a brief historical genealogy of Ethnic Studies as an interdisciplinary academic field. Presents content and pedagogical knowledge of Ethnic Studies in K-12 school settings. Reviews the existing research of Ethnic Studies literacies in U.S. public schools.

EDUC 227 Educational Change and Innovation 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. The study of change and innovation in the public school. Emphasis is placed on (a) the organizational environment of the school which must accommodate the innovation, (b) specific strategies of change, and (c) contemporary educational innovations.

EDUC 231A Introduction to Applied Behavior Analysis 4 Lecture, 3 hours; term paper, 1.5 hours; extra reading, 1.5 hours. Prerequisite(s): graduate standing or consent of instructor. Introduction to the foundational knowledge and skills in Applied Behavior Analysis. Topics will include the roots of Applied Behavior Analysis, key concepts in respondent and operant behavior, and their relevance to school and clinical settings. Basic principles of prevention and intervention for mild to severe problem behaviors will be discussed.

EDUC 231B Behavioral Interventions in the Schools 4 Lecture, 3 hours; extra reading, 1.5 hours; term paper, 1.5 hours. Prerequisite(s): graduate standing; consent of instructor. An introduction to the professional practice of applied behavior analysis (ABA) in K-12 school settings. Topics include ethical practice, assessment, and intervention. Students will learn relevant behavior principles and procedures, with a focus on their incorporation in educational programming for children and adolescents.

EDUC 231C Foundational Principles of Applied Behavioral Analysis 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): EDUC 231A; graduate standing or consent of instructor. Explores the fundamental principles of applied behavior analysis in schools and clinics that are foundational to the professional practice. Topics include advanced coverage of behavioral concepts and principles and their effects on behavior through the use of a variety of treatment procedures.

EDUC 233 Differential Achievement and the School Learning Environment 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing. Explores how racial, ethnic, linguistic, cultural, and socioeconomic differences in educational achievement are a product of the learning environments experienced in schools and classrooms.

EDUC 235 Ethics For Applied Behavior Analysis 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): graduate standing. Focuses on the ethical considerations from the field of applied behavior analysis and using behavioral approaches to treat individuals demonstrating problem behaviors. Covers the Behavior Analyst Certification Board’s Professional and Ethical Standards and the Guidelines for Responsible Conduct for Behavior Analysts.

EDUC 236A Behavior Analytic Skills Development: Level 1 4 Seminar, 3 hours; activity, 3 hours. Prerequisite(s): concurrent enrollment in EDUC 237; restricted to major(s) Applied Behavior Analysis; admission to the Master of Education emphasis in Applied Behavior Analysis; graduate standing or consent of instructor. A study of the basic-level professional and ethical practice of behavior-analytic skills. Includes supervised fieldwork to apply concepts and skills.

EDUC 236B Behavior Analytic Skills Development: Level 2 4 Seminar, 3 hours; activity, 3 hours. Prerequisite(s): concurrent enrollment in EDUC 237; EDUC 236A; graduate standing. A study of how to assess behavior. Includes applying applied analytic methods for collecting indirect and direct observation data.

EDUC 236C Behavior Analytic Skills Development: Level 3 4 Seminar, 3 hours; activity, 3 hours. Prerequisite(s): concurrent enrollment in EDUC 237; EDUC 236B; graduate standing. A study of intermediate-level professional and ethical practice of behavior-analytic skills. Includes supervised fieldwork to apply concepts and skills.

EDUC 236D Behavior Analytic Skills Development: Level 4 4 Seminar, 3 hours; activity, 3 hours. Prerequisite(s): concurrent enrollment in EDUC 237; EDUC 236C; graduate standing. A study of how to experimentally analyze behavior. Topics include using a range of single case designs to evaluate behavior and using data to interpret intervention results.

EDUC 237 Concentrated Fieldwork in Applied Behavior Analysis 1 to 10 Field, 3 to 30 hours. Prerequisite(s): taken concurrently with EDUC 236A or EDUC 236B or EDUC 236C or EDUC 236D. Concentrated fieldwork in applied behavior analysis will provide students with the supervised experience necessary for the development of their professional and ethical practice of behavior-analytic skills. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 40 units.

EDUC 238 Education and Gender 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the multiple and complex relationships of gender and education in U.S. society. Analyzes theoretical perspectives on gender and schooling. Topics include cultural constructions of identity, male and female experiences of schooling, and concepts of gender neutrality in the curriculum.

EDUC 239 Developmental Psychopathology 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing in Education or Psychology or consent of instructor. Examines the origins of psychopathology from multiple theoretical perspectives with a specific focus on childhood disorders. Topics include biological and environmental contributions to disorder development and treatment paradigms.

EDUC 240 Educational Psychology 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): EDUC 162; or equivalent; graduate standing; consent of instructor. Overview of the major empirical and theoretical bases of educational psychology, followed by detailed analysis of the following topics: (a) cognition and metacognition as applied to school learning and instruction; (b) motivation, student perceptions, teacher perceptions, classroom processes; (c) effective teaching; and (d) evaluation.

EDUC 241A Inquiry and Research Methods 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): first-year standing in the Ph.D. program in Education. Examines the nature of inquiry and research in educational studies, including the formation of questions.

EDUC 241B Introduction to Qualitative Methods 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): EDUC 241A; first-year standing in the Ph.D. program in Education. Introduces qualitative research studies. Covers the design, collection, analysis, and interpretation of qualitative data in educational research.
EDUC 242A Educational and Psychological Measurement and Evaluation 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): EDUC 214B; consent of instructor. Examines topics in measurement and evaluation including classical test theory and program evaluation design. Focus is on application in educational and psychological settings and critical examination of norm-referenced and criterion-referenced testing.

EDUC 242B Advanced Educational and Psychological Measurement and Evaluation 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): EDUC 242A or equivalent or consent of instructor. Examines advanced topics in measurement and evaluation including generalizability theory and item response theory. Emphasis is on the statistical basis of these theories and their application in educational and psychological settings.

EDUC 245 (E-Z) Review of Research Literature in Education 4 Prerequisite(s): graduate standing. Critical analyses of research in the various areas of education.

EDUC 245E History of Church, State, and Schooling 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Overview of the historical roles of religion in the origins and development of public schooling in the United States and the establishment of private religious schooling. Examines the historical roots of contemporary issues of schooling, church, and state, including school prayer, creationism and evolution debates, and censorship.

EDUC 245G The Opportunity/Achievement Gap 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines theoretical and empirical research on the “achievement gap” from a variety of social science disciplines. Explores causes and consequences of racial or ethnic, linguistic, cultural, and socioeconomic differences in educational achievement.

EDUC 245J School Effects 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing. A review of the research literature on effective schools. Covers historical background, practices, resources, structures, student body characteristics, sources of socioeconomic and racial inequality, and assessing school performance.

EDUC 245K School Effects and Equity 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): restricted to major(s) Education; graduate standing; or consent of instructor. A review of the research of school and teaching factors contributing to student achievement and inequity. Topics include teacher characteristics, instructional practices, school finance and resources, curriculum, and sources of opportunity gaps. Offered online only. Credit is awarded for one of the following EDUC 245K or EDUC 123.

EDUC 246 (E-Z) Research On Education of Exceptional Children 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Intensive study of current research on the education of exceptional children. E. Autism Spectrum Disorders In The Classroom; F. Emotional And Behavior Disorders; I. Learning Disabilities; J. Contemporary Issues And Trends; K. Autism Spectrum Disorders; L. Behavioral Phenotypes; M. Multicultural Education; N. Early Intervention; O. Family Influence On Development; P. Adolescent Literacy Interventions; R. History Of Special Education; S. Sources And Treatments Of The Reading Difficulties Of Students With Disabilities; T. Brain And Behavior.

EDUC 248 (E-Z) Higher Education 4 Prerequisite(s): graduate standing. For hours and prerequisites, see segment descriptions. A selection of courses for studies on higher education.

EDUC 248E Race, Meritocracy, and Dilemmas of Diversity in Higher Education 4 Seminar, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): graduate standing or consent of instructor. An introduction to theoretical perspectives of diversity in U.S. higher education. Explores the implications of demographic shifts on U.S. postsecondary educational practice and policy. Reviews the research literature on the impact of diversity on educational outcomes for college students, faculty, and administrators.

EDUC 248F Financing Higher Education 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Provides an overview of finance and economics of higher education in the United States. Examines economic theories as they apply to higher education finance and the distributive implications of various financing strategies. Covers main trends and current debates and how to identify political-economic rationales behind financing policy choices in higher education.

EDUC 248G Higher Education Governance 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the organization and governance of higher education. Covers diverse forms of organization and governance in contemporary public and private higher education in the United States. Also addresses alternative theoretical frames through which to view postsecondary governance structures (both internal and external to institutions).

EDUC 248H Critical Issues in Higher Education 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines internal and external issues that face higher education institutions.

EDUC 248J Higher Education Policy 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces a range of contemporary higher education policy issues and the conceptual and theoretical frameworks used to understand these issues. Develops fluency in using political-economic analysis, economics, and political science papers in higher education.

EDUC 248K The Dissertation and the Proposal in Education 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines internal and external issues that face higher education institutions. Addresses critical understanding of policy analysis, economics, and political science papers in higher education.

EDUC 248L Administration and Governance of the Community College 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines internal and external issues that face higher education institutions. Addresses critical understanding of policy analysis, economics, and political science papers in higher education.

EDUC 248M The Community College 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines current literature on community colleges.

EDUC 248N Higher Education Scholarship and Literature Review 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines current literature on community colleges.

EDUC 248P Historical Perspectives On Campus Life 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines historical perspectives on campus life in the United States from the view of the students, faculty, administrators, and employees. May address the general environment, curriculum, student activities and clubs, athletics, town-gown relationships, or other aspects.
EDUC 248Q Foundations of Student Services 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the field of student services and student affairs in higher education institutions. Focuses on the historical and philosophical foundations of the field, as well as guiding theories and models of practice. Addresses contemporary challenges for student services practitioners.

EDUC 248R College Student Development 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Addresses student development in higher education institutions. Focuses on developmental theories applicable to college students. Examines institutional behaviors and actions (including policy) related to student development.

EDUC 248S The College Student 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Analysis of current literature on diverse populations of students in colleges and universities. Examines contextual and personal factors shaping the college experience. Focuses on students’ multiple identities and challenges.

EDUC 248T Understanding Research in Higher Education 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the strengths and limitations of research methods used in higher education research. Explores data collection and research design. Also evaluates scholarly research publications. Credit is awarded for only one of EDUC 212 or EDUC 248T.

EDUC 248U History of Higher Education in the United States 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Overview of the growth and development of institutions of higher learning in the United States, from the colonial colleges to the multipurpose research institutions of today, including academies, community colleges, and professional schools.

EDUC 248V Campus Environments 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces the study of how institutions impact students through the environments, cultures, and climates they make available. Topics include organizational and higher educational theories of how universities structure environments and campus cultures and the manner in which climates shape experiences, behaviors, and outcomes.

EDUC 248W Whiteness, Power, and Privilege 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores race, racialization, and racism through the lens of critical whiteness studies and critical race theory. Sheds light on white racial identity development and reveals how racism and white supremacy render us un-whole. Includes a diverse range of topics related to whiteness, power, and privilege.

EDUC 250 Professional Issues and Responsibilities in School Psychology 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): restricted to major(s) School Psychology; graduate standing or consent of instructor. Provides a comprehensive overview of the field of school psychology, the roles and functions of school psychologists, ethical standards, federal and state legal standards, and supervision models and theory in psychology.

EDUC 251 Seminar in Cognitive Development 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): EDUC 211A or equivalent or consent of instructor. Seminar on current issues in cognitive development. Topics include metacognition, Vygotskyan theory, and cultural factors in cognitive development. Special attention will be paid to issues as they relate to the learning and teaching of school subjects.

EDUC 254A Cognitive Assessment For School Psychologists 4 Seminar, 3 hours; practicum, 3 hours. Prerequisite(s): admission to the M.A. or Ph.D. program in School Psychology; graduate standing or consent of instructor. Covers administration, scoring, and interpretation of individual measures of intelligence and academic aptitude. Emphasizes the use of these measures for screening and classification decisions, as well as psychological report writing.

EDUC 254B Academic Assessment 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): admission to the M.A. or Ph.D. program in School Psychology or Special Education; graduate standing or consent of instructor. Covers the administration, scoring, and interpretation of individual norm-referenced measures of academic achievement, perceptual-motor skills, and adaptive behavior. Emphasizes the use of these instruments for screening and classification decisions, as well as psychological report writing.

EDUC 254C Social, Emotional, and Behavioral Assessment 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): admission to the M.A. or Ph.D. program in School Psychology or Special Education; graduate standing or consent of instructor. Covers procedures and techniques of behavioral assessment, including systematic behavioral observations, curriculum-based assessment, behavior rating scales, behavioral interviews, and self-monitoring. Includes conceptual issues in applying traditional psychometric theories to behavioral assessment data, as well as methods for integrating multimodal behavioral assessment information.

EDUC 255A Principles of Social Behavior Intervention 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the M.A. or Ph.D. program in School Psychology or Special Education; or consent of instructor. Covers the principles and procedures for developing social competencies in school-age children and youth. Topics include social skills assessment, sociometric assessment, and strategies for promoting acquisition, performance, and maintenance of social skills.

EDUC 255B Principles of Academic Behavior Intervention 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the M.A. or Ph.D. program in School Psychology or Special Education; or consent of instructor. Covers the principles and procedures for prevention and remediation of academic learning problems and performance. Topics include functional analysis, stimulus control, generalization, and methods for summarizing trends in academic performance.

EDUC 255C Child Behavior Therapy 4 Seminar, 3 hours; field, 3 hours. Prerequisite(s): admission to the M.A. or Ph.D. program in School Psychology or Special Education; graduate standing; or consent of instructor. Covers principles derived from neobehavioristic and social learning theories applied to treat children’s problems. Discusses professional ethics, practice, and responsibility in clinical child behavior therapy.

EDUC 255D Advanced Child Behavior Therapy 4 Lecture, 3 hours; extra reading, 9 hours. Prerequisite(s): EDUC 255C or written consent of the instructor. Introduces advanced child behavior therapy techniques for individual, family, and group therapy. Emphasizes different evidence-based therapy approaches in school settings.

EDUC 255E Advanced Topics in Applied Behavior Analysis 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): EDUC 255A. A study of advanced topics in the applied behavior analysis (ABA), including those related to programming, skills acquisition, severe problem behaviors, and working with special populations.

EDUC 256 Advanced Seminar in Learning Disabilities 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): EDUC 212 or equivalent or consent of instructor. Critical evaluation of theory and research in the field of learning disabilities. Requires a data-based project reflecting original research.

EDUC 257 Language, Culture, and Education 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines how culture and language influence educational processes and outcomes, by focusing on issues such as testing, gendered pedagogies, cultural adaptations of minority groups, social uses of literacy, Ebonics, bilingual education, and cultural capital.

EDUC 259 Research Seminar 2 Seminar, 2 hours. Prerequisite(s): first-year standing in the Ph.D. program in Education or consent of instructor. Introduces opportunities and requirements for successful graduate study. Emphasizes effective strategies for developing and implementing a program of professional development and graduate research. Involves research reports on topics in educational psychology, special education, curriculum and instruction, and/or educational administration. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.
EDUC 260 History of Curriculum 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): consent of instructor. Investigates the historical construction of schooling in general and specifically the curriculum -- formal, informal, and hidden. Explores the purposes of schooling, the relation between schooling and U.S. culture, and the sociocultural contexts for changes and continuities in curriculum.

EDUC 261 School Psychological Consultation 4 Seminar, 3 hours; practicum, 3 hours. Prerequisite(s): admission to Ph.D. specialization in School Psychology or Special Education or M.Ed. emphasis in Applied Behavior Analysis; graduate standing; or consent of instructor. Covers theoretical and applied issues of problem solving conducted in school settings. Addresses principles derived from behavioral systems and organizational theories and how these principles are used in an indirect service-delivery model to facilitate changes in students’ behavior.

EDUC 262 Diversity, Equity, and Inclusion in K12 Schools 4 Seminar, 3 hours; written work, 3 hours. Prerequisite(s): restricted to major(s). Education, School Psychology; graduate standing; or consent of instructor. Introduces historical and current issues of diversity, equity, and inclusion in K-12 schools. Focuses on improving the awareness of values, biases, and perspectives associated with various identities of diverse children and families. Focuses on developing culturally sensitive interventions through in-class exercises, videos, discussions, and experiential exercises.

EDUC 263 Social Psychology: Theories, Concepts, Applications 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing. Provides an advanced overview of major theories and concepts in social psychology and, to a lesser extent, their application to selected issues in school and clinical psychology. Special attention is given to the construct of social influence.

EDUC 264 History and Systems of Psychology: Implications For School Psychologists 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing. Describes various sub-disciplines of psychology: key issues and events in the history of the field, prominent individuals whose contributions have made a significant impact on the development of psychology, and major schools of thought within psychology, as well as issues related to the graduate-level specialty of school psychology.

EDUC 265B Beginning Practicum in School Psychology: Level 2 1 Seminar, 1 hour; practicum, 2 hours. Prerequisite(s): EDUC 265A; graduate standing. Orient the school psychology student to the roles, functions, and practices of the school psychologist. Focuses on observing day-to-day activities of school psychologists and emphasizes issues around professional identity within school psychology as a scientist-practitioner. Introduces the foundational cognitive and academic and intervention activities conducted by school psychologists. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

EDUC 265C Beginning Practicum in School Psychology: Level 3 1 Seminar, 1 hour; practicum, 2 hours. Prerequisite(s): EDUC 265B; graduate standing. Introduces the school psychology student to the role of the school psychologist as a behavioral and mental health service provider in school settings. Focuses on social, emotional, and behavioral assessment and intervention activities. Includes supervised assessment and intervention activities. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

EDUC 265D Intermediate Practicum in School Psychology: Level 2 2 Seminar, 2 hours; practicum, 6 hours. Prerequisite(s): EDUC 265C; graduate standing. Expands the scope, proficiency, and independent application of technical and conceptual competencies. Revisits the ethical and legal mandates for school psychologists. Focuses on data-based decision-making, administration, and interpreting common assessment measures. Emphasizes organizing and disseminating formal and informal assessment results. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 4 units.

EDUC 265E Intermediate Practicum in School Psychology: Level 2 2 Seminar, 2 hours; practicum, 6 hours. Prerequisite(s): EDUC 265D; graduate standing. Emphasizes prevention and early intervention of school-based difficulties for students. Explores best practices in implementing tiered systems of school-based behavioral supports. Includes direct work with students or indirect work through teachers on necessary academic and behavioral assessment and intervention. Introduces school-based decision making processes. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 4 units.

EDUC 265F Intermediate Practicum in School Psychology: Level 3 2 Seminar, 2 hours; practicum, 6 hours. Prerequisite(s): EDUC 265E; graduate standing. Focuses on integrating individual components of school-based practice. Emphasizes pre-referral intervention activities, consultation, integrated report writing, eligibility determinations, and IEP activities. Requires completion of paperwork, assessment, intervention, and individual psycho-educational evaluation components more independently. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 4 units.

EDUC 266 Language, Schooling, and Identity 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the M.A. or Ph.D. program or consent of instructor. Examines how formal and informal educative institutions use language for identity formation and how students/novices respond to those institutional practices.

EDUC 267 Introduction to Implementation Science and Practice: Reducing the Research to Practice Gap in School 4 Seminar, 3 hours; written work, 3 hours. Prerequisite(s): restricted to major(s) Education; graduate standing; or consent of instructor. Introduces and applies implementation science and practice to school systems. Explores core implementation science theories, models, frameworks, outcomes, measurement, and research design and methods to inform implementation practice. Concepts applicable to research and practice interests.

EDUC 268A Advanced Practicum in School Psychology: Level 1 2 Seminar, 2 hours; practicum, 10 hours. Prerequisite(s): EDUC 265F; graduate standing. Continues to build upon and solidify the skills learned from the previous practica. Engages in all aspects of school psychological practice. Helps develop higher level skills in the area of systems change. Supports internship application activities. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

EDUC 268B Advanced Practicum in School Psychology: Level 2 2 Seminar, 2 hours; practicum, 10 hours. Prerequisite(s): EDUC 268A; graduate standing. Facilitates further autonomy in developing, implementing, and evaluating clinical and systems-level, classroom, group, or individual interventions. Includes operating at a more independent level and engaging in progressively more and more complex responsibilities while continuing to work within the limits of professional competence. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

EDUC 268C Advanced Practicum in School Psychology: Level 3 2 Seminar, 2 hours; practicum, 10 hours. Prerequisite(s): EDUC 268B; graduate standing. Addresses functioning almost independently in day-to-day service provision activities for students, families, and systems. Provides opportunity to demonstrate independence in all aspects of professional practice appropriate for clinical or school placement. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

EDUC 269 (E-Z) Topics in Education 2 or 4 Seminar, 2 or 3 hours; research, 1 or 3 hours. Prerequisite(s): graduate standing; or consent of instructor. A critical analysis of current theory and research in special areas of education. Covers a single topic not contained in a regular course. Announcement of each topic will be made when the course is offered and designated as either a 2- or 4-unit course. E. Educational Psychology; I. Education, Society, And Culture; M. Education, Policy, Analysis, And Leadership; N. Higher Education Administration And Policy; P. School Psychology; S. Special Education. Course is repeatable as content or topic changes to a maximum of 16 units.
EDUC 270 Reading Development and Intervention 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces the findings from national panels on reading development, instruction, and intervention. Topics include practical application of these findings to the development of reading intervention programs for students across grades.

EDUC 273 Critical Pedagogy 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduction to pedagogies that interrogate inequities and promote social transformation. Surveys traditional approaches to critical pedagogy, anticolonial education, and ethnic studies. Topics include examination of theoretical approaches and practices within educational institutions and how they prevent and advance equity and justice.

EDUC 275A Race and Educational Inequity 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores issues of race, racism, and racial justice in the context of K-12 schools. Pairs analyses of race and racism in K-12 schools with the power and transformative possibilities of racial justice pedagogy and practice. Credit is awarded for one of the following EDUC 275A or EDUC 275B.

EDUC 275B Pedagogies of Racial Justice 4 Seminar, 3 hours; written work, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines how race and racism and its impact on the U.S. education system and beyond. Situates today’s educational inequity in a historical perspective while encouraging a connection between research, theory, and practice. Credit is awarded for one of the following EDUC 275B or EDUC 275A.

EDUC 276 Diversity and Curriculum 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate or professional standing. Describes and analyzes the controversy surrounding efforts to develop curriculum that addresses diversity in U.S. society. Examines changing theoretical perspectives on multicultural education and key concepts such as race, identity, and culture. Reviews research on multicultural education.

EDUC 277 Critical Theories of Teaching and Teacher Education 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): admission to the M.A. or Ph.D. program in Education; graduate standing or consent of instructor. Examines a range of theoretical perspectives used in studying the practice of teaching. Covers psychological, historical, anthropological, sociological, and philosophical perspectives.

EDUC 278 Critical Race Theory in Education 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces and explores the framework of Critical Race Theory. Provides guidance through a comprehensive analysis of racism and racial justice in the K-16 education system.

EDUC 279 Politics of School Knowledge 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines how existing power relations and conflicts among social and cultural groups shape the content of curriculum and the production of school knowledge. Topics include the ideological aspects of curriculum, textbook controversies and battles over school curriculum, and representational issues in curriculum and knowledge production.

EDUC 280 (E-Z) Foundations in Education 4 Prerequisite(s): graduate standing. For hours and prerequisites, see segment descriptions. Foundation core courses that introduce students to theory and research in education.

EDUC 280L The Learner 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Considers learning from psychological, cognitive, and social perspectives. Draws on recent research on the learning process in schools and other contexts. Emphasizes the relationship between teaching and learning.

EDUC 281 History of Educational Policy and Reform 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate or professional standing. Introduces a historical context for understanding education policy and reform in the United States. Topics include the ideological forces that shaped the institutional context and character of American education at different periods in the nation’s history and how ideas shaped the educational system by institutionalizing certain norms and values.

EDUC 282A Curriculum Theory and Instructional Processes: Mathematics and Science 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): EDUC 171 with a grade of C- or better, may be taken concurrently or EDUC 172 with a grade of C- or better, may be taken concurrently; admission to a teaching credential program; graduate standing; or consent of instructor. Introduces curriculum theory and instructional processes as they relate to the single subject classroom. E. Secondary Social Studies; I. Secondary English; L. Secondary Foreign Language; M. Secondary Mathematics; N. Secondary Mathematics and Science; R. Secondary Visual And Performing Arts; S. Secondary Science; T. Portraits Of Teaching.

EDUC 282B Curriculum Theory and Instructional Processes: Social Studies, Visual and Performing Arts, and Physil 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): EDUC 171 with a grade of C- or better, may be taken concurrently or EDUC 172 with a grade of C- or better, may be taken concurrently; admission to a teaching credential program; graduate standing. Introduces curriculum theory and instructional processes as they relate to mathematics and science in the multiple subject and education specialist classroom.

EDUC 282B Curriculum Theory and Instructional Processes: Social Studies, Visual and Performing Arts, and Physil 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): EDUC 171 with a grade of C- or better, may be taken concurrently or EDUC 172 with a grade of C- or better, may be taken concurrently; admission to a teaching credential program; graduate standing; or consent of instructor. Introduces curriculum theory and instructional processes as they relate to social studies, visual and performing arts, and physical education in the multiple subject and education specialist classroom.

EDUC 283 Analyzing the Practice of Teaching 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): admission to the M.Ed. program; graduate standing. Focuses on analysis of classroom teaching and examines how curriculum and instruction influence student understanding. Introduces how to conduct comprehensive analyses of K-12 instructional practice.

EDUC 284 Theory and Research On Schooling and Social Inequality 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): admission to the Ph.D. program in Education or consent of instructor. Analyzes the social and cultural organization of schools and the relationship between schooling and social inequality. Draws upon research in sociology, anthropology, and education to examine theoretical perspectives on the relationship between schooling and social stratification, with special attention to the influence of class, race, and ethnicity on academic achievement.

EDUC 285 (E-Z) Curriculum Theory and Instructional Processes 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): EDUC 147 with a grade of C- or better; EDUC 162 with a grade of C- or better or EDUC 280L with a grade of C- or better; EDUC 132 with a grade of C- or better; EDUC 171 with a grade of C- or better, may be taken concurrently or EDUC 178 with a grade of C- or better, may be taken concurrently; admission to a teaching credential program; graduate standing; or consent of instructor. Introduces curriculum theory and instructional processes as they relate to the single subject classroom. E. Secondary Social Studies; I. Secondary English; L. Secondary Foreign Language; M. Secondary Mathematics; N. Secondary Mathematics and Science; R. Secondary Visual And Performing Arts; S. Secondary Science; T. Portraits Of Teaching.

EDUC 287A Curriculum, Instruction, and Functional Communication For Students With Extensive Support Needs 4 Lecture, 3 hours; activity, 3 hours. Prerequisite(s): admission to the Education Specialist Credential program; graduate standing; or consent of instructor. Explores the rationale and design of instructional programs for individuals with moderate to severe disabilities. Examines the support systems in place to assist students with extensive needs to become as independent and productive as possible. Examines methods to enhance verbal and non-verbal communication and how to develop fundamental social skills.

EDUC 287B Adapting Core Curriculum and Standards-Based Instruction (Mild–Moderate Disabilities) 4 Lecture, 3 hours; activity, 3 hours. Prerequisite(s): admission to the Education Specialist Credential program; graduate standing; or consent of instructor. Describes and analyzes the approaches, materials, and practices that enable students with mild/moderate disabilities to gain access to core curriculum and make progress toward state standards. Emphasizes research-based instructional approaches and discusses ways to support special needs students, including English learners, in mainstream classes. Examines the IEP.

EDUC 290 Directed Studies 1 to 6 Prerequisite(s): graduate status and consent of instructor. Research and special studies in education. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.
EDUC 291 Individual Studies in Coordinated Areas 1 to 12 Individual Study, 3 to 36 hours. Prerequisite(s): graduate standing. A program of studies designed to assist students who are preparing for graduate degree examinations that includes dissertation pre-proposal preparation and capstone projects. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

EDUC 292 Concurrent Studies in Education 1 to 4 Practicum, 3 to 12 hours. Prerequisite(s): graduate standing; consent of instructor and department. Each EDUC 292 course will be taken concurrently with some 100-series course in Education on an individual basis. It will be devoted to research, criticism, and/or written work of graduate order commensurate with the number of units elected. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

EDUC 294A Introduction to Assessment of Autism Spectrum Disorder 1 Seminar, 1 hour, practicum, 3 hours. Prerequisite(s): graduate standing and consent of instructor. Fundamentals of screening and assessment for autism spectrum disorder, within the context of the neurodiversity movement. Topics include how to recognize the disorder, considerations and requirements of screening, assessment, and diagnosis of autism, and challenges for families, adolescents, and adults with the disorder. Graded Satisfactory (S) or No Credit (NC).

EDUC 294B Assessment of Autism Spectrum Disorder: Neurodiversity 2 Seminar, 1 hour; practicum, 3 hours. Prerequisite(s): EDUC 294A with a grade S or better; graduate standing; and the consent of instructor. Fundamentals of screening and assessment for autism spectrum disorder within the context of the neurodiversity movement. Topics include how to recognize the disorder, considerations and requirements of screening, assessment, and diagnosis of autism, and challenges for families, adolescents, and adults with the disorder. Graded Satisfactory (S) or No Credit (NC).

EDUC 294C Assessment of Autism Spectrum Disorder: Family 2 Seminar, 1 hour; practicum, 3 hours. Prerequisite(s): EDUC 294B with a grade S or better; graduate standing; and the consent of instructor. Fundamentals of screening and assessment for autism spectrum disorder within the context of the neurodiversity movement. Topics include how to recognize the disorder, considerations and requirements of screening, assessment, and diagnosis of autism, and challenges for families, adolescents, and adults with the disorder. Graded Satisfactory (S) or No Credit (NC).

EDUC 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): advanced graduate standing and consent of instructor. Directed research on selected issues in education. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 36 units.

EDUC 298I Individual Internship 1 to 12 Internship, 2 to 24 hours; written work, 1 to 12 hours. Prerequisite(s): graduate student standing consent of instructor and graduate supervisor. Supervised internship with an approved professional individual or organization based on a written plan approved by the field supervisor and internship coordinator and/or faculty member. Includes two hours per week of direct supervision by the field supervisor. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

EDUC 299 Research For Thesis Or Dissertation 1 to 12 Directed independent studies, 1-6 hours. Prerequisite(s): advancement to candidacy for the master’s or doctoral degree. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

EDUC 302 College Teaching Practicum 1 to 6 Practicum, 3 to 18 hours. Prerequisite(s): advanced Ph.D. standing and consent of instructor. A minimum of one quarter supervised teaching in college level classes under the supervision of the course instructor. Required of all doctoral candidates in the Graduate School of Education. Fulfills teaching portion of Ph.D. requirements. Graded Satisfactory (S) or No Credit (NC). May be taken for a maximum of three quarters.

EDUC 320A Integrating Technology Into Classroom Practice 1 Lecture, 8 hours per quarter; laboratory, 3 hours per quarter; field, 3 hours per quarter. Prerequisite(s): admission to a teaching credential program. Introduction to technology in education. Prepares future teachers to effectively utilize computers and related technology for information management, presentations, and classroom instruction. Topics include software, the Internet, and basic operations of educational technology. Includes field observations in schools. Graded Satisfactory (S) or No Credit (NC).

EDUC 320B Integrating Technology Into Classroom Practice 1 Lecture 8 hours per quarter; laboratory 3 hours per quarter, field 3 hours per quarter. Prerequisite(s): EDUC 320A. Focuses on the application of computer technology to curriculum and instruction. Topics include Internet applications, non-computer technology, and use of technology to enhance problem solving skills. Includes field observations in schools. Graded Satisfactory (S) or No Credit (NC).

EDUC 320C Integrating Technology Into Classroom Practice 1 Lecture, 4 hours per quarter; laboratory, 15 hours per quarter; field, 3 hours per quarter. Prerequisite(s): EDUC 320A, EDUC 320B. Addresses issues related to the use of technology in schools. Using presentation software, the Internet, and other computer-based technology, students develop and teach a curriculum unit appropriate to their teaching subject area and/or grade level. Emphasis is on integrating the use of computer-based applications with instruction. Graded Satisfactory (S) or No Credit (NC).

EDUC 330 Education Specialist and Multiple Subject Seminar 2 Seminar, 20 hours per quarter. Prerequisite(s): admission to a teaching credential program; graduate standing. Analyzes instructional strategies for a combined cohort of credential candidates working with students with disabilities and multiple subject classrooms. Topics include basic curriculum, classroom management, interpersonal relationships, self-evaluation, and professional competencies.

EDUC 331 Education Specialist Credential Seminar 2 Seminar, 20 hours per quarter. Prerequisite(s): admission to a teaching credential program; graduate standing. Analyzes instructional strategies for working with students with disabilities. Topics include basic curriculum, classroom management, interpersonal relationships, self-evaluation, and professional competencies.

EDUC 332 Multiple Subject Credential Seminar 2 Seminar, 20 hours per quarter. Prerequisite(s): admission to a teaching credential program; graduate standing. Analyzes instructional strategies for students with disabilities, multiple subject, or single subject classrooms. Topics include curriculum planning, classroom management, instructional strategies, oral and written communication skills, interpersonal relationships, self-evaluation, and professional competencies.

EDUC 333 Single Subject Credential Seminar 2 Seminar, 20 hours per quarter. Prerequisite(s): admission to a teaching credential program; graduate standing. Analyzes instructional strategies for the single subject classroom. Topics include curriculum planning, classroom management, oral and written communication skills, interpersonal relationships, self-evaluation, and professional competencies.

EDUC 334 Combined Credential Seminar 2 Seminar, 20 hours per quarter. Prerequisite(s): admission to a teaching credential program; graduate standing. Analyzes instructional strategies for a combined cohort of credential candidates working with students with disabilities, multiple subject, and single subject classrooms. Topics include basic curriculum, classroom management, interpersonal relationships, self-evaluation, and professional competencies.

EDUC 335A Supervised Teaching in Special Education 4 Seminar, 2 hours; field, 9 hours. Prerequisite(s): EDUC 132 with a grade of C- or better, may be taken concurrently; EDUC 162 with a grade of C- or better, may be taken concurrently or EDUC 280L with a grade of C- or better, may be taken concurrently; EDUC 171 with a grade of C- or better, may be taken concurrently or EDUC 172 with a grade of C- or better, may be taken concurrently; admission to the Education Specialist Credential program; graduate standing. Supervised teaching in special education. Consists of supervised field experience and seminar for special education candidates. Graded Satisfactory (S) or No Credit (NC).
EDUC 335B Supervised Teaching in Special Education 2 Seminar, 2 hours; field, 18 hours. Prerequisite(s): EDUC 335A Supervised teaching in special education. Consists of supervised observation, field experience, and seminar for special education candidates. Graded Satisfactory (S) or No Credit (NC).

EDUC 335C Seminar in Special Education 2 Seminar, 2 hours. Prerequisite(s): EDUC 335B; concurrent enrollment in EDUC 345A or EDUC 345B. Analyzes the instructional processes used in special education settings. Includes assessing students, developing an individualized educational plan (IEP), and collaborating with parents, teachers, and special services personnel. Course is repeatable as content changes to a maximum of 4 units.

EDUC 336A Supervised Teaching in the Elementary School 4 Field, 160 hours per quarter. Prerequisite(s): EDUC 337A, may be taken concurrently, EDUC 344A, may be taken concurrently; admission to a teaching credential program; graduate standing. Supervised teaching in the multiple subject classroom. Required of all candidates for the Multiple Subject Credential. Graded Satisfactory (S) or No Credit (NC). Credit is awarded for one of the following EDUC 336A or EDUC 338A.

EDUC 336B Supervised Teaching in the Elementary School 4 Field, 160 hours per quarter. Prerequisite(s): EDUC 336A with a grade of C- or better, EDUC 171 with a grade of C- or better; concurrent enrollment in EDUC 344B; concurrent enrollment in or completion of EDUC 337B; graduate standing. Supervised teaching in the multiple subject classroom. Required of all candidates for the Multiple Subject Credential. Graded Satisfactory (S) or No Credit (NC). Credit is awarded for one of the following EDUC 336B or EDUC 338B.

EDUC 336C Supervised Teaching in the Elementary School 4 Field, 160 hours per quarter. Prerequisite(s): EDUC 336C with a grade of S or better; concurrent enrollment in EDUC 344C; concurrent enrollment in or completion of EDUC 337C; graduate standing. Supervised teaching in the multiple subject classroom. Required of all candidates for the Multiple Subject Credential. Graded Satisfactory (S) or No Credit (NC). Credit is awarded for one of the following EDUC 336C or EDUC 338C.

EDUC 337A Teaching Performance For Multiple Subject Candidates 2 Field, 40 hours per quarter; written work, 20 hours per quarter. Prerequisite(s): EDUC 337A; graduate standing. Teaching performance for California teachers. Topics include teaching performance assessment, lesson design, and classroom instruction in public schools. Fieldwork hours completed in regular placement as assigned for EDUC 336B or EDUC 338B. Required of all candidates for the Multiple Subject Credential. Graded Satisfactory (S) or No Credit (NC).

EDUC 337B Teaching Performance For Multiple Subject Candidates 2 Field, 40 hours per quarter; written work, 20 hours per quarter. Prerequisite(s): EDUC 337A; graduate standing. Teaching performance for California teachers. Topics include teaching performance assessment, lesson design, and classroom instruction in public schools. Fieldwork hours completed in regular placement as assigned for EDUC 336B or EDUC 338B. Required of all candidates for the Multiple Subject Credential. Graded Satisfactory (S) or No Credit (NC).

EDUC 337C Teaching Performance For Multiple Subject Candidates 2 Field, 40 hours per quarter; written work, 20 hours per quarter. Prerequisite(s): EDUC 337B; concurrent enrollment in or completion of EDUC 336C or EDUC 338C; graduate standing. Teaching performance for California teachers. Topics include teaching performance assessment, lesson design, and classroom instruction in public schools. Fieldwork hours completed in regular placement as assigned for EDUC 336C or EDUC 338C. Required of all candidates for the Multiple Subject Credential. Graded Satisfactory (S) or No Credit (NC).

EDUC 338A Intern Teaching in the Elementary School 8 Field, 260 hours per quarter. Prerequisite(s): EDUC 162 with a grade of C- or better, EDUC 171 with a grade of C- or better; concurrent enrollment in EDUC 344A; concurrent enrollment in or completion of EDUC 337A; admission to intern teaching credential program; graduate standing. Intern teaching in the multiple subjects classroom. Required for the Multiple Subject Internship Credential. Graded Satisfactory (S) or No Credit (NC). Credit is awarded for one of the following EDUC 338A or EDUC 336A.

EDUC 338B Intern Teaching in the Elementary School 8 Field, 260 hours per quarter. Prerequisite(s): EDUC 338B; concurrent enrollment in EDUC 344B; concurrent enrollment in or completion of EDUC 337B; admission to intern teaching credential program; graduate standing. Intern teaching in the multiple subject classroom. Required for the Multiple Subject Internship Credential. Graded Satisfactory (S) or No Credit (NC). Credit is awarded for one of the following EDUC 338B or EDUC 336B.

EDUC 338C Intern Teaching in the Elementary School 8 Field, 260 hours per quarter. Prerequisite(s): EDUC 338C; concurrent enrollment in EDUC 344C; concurrent enrollment in or completion of EDUC 337C; admission to intern teaching credential program; graduate standing. Intern teaching in the multiple subject classroom. Required for the Multiple Subject Internship Credential. Graded Satisfactory (S) or No Credit (NC). Credit is awarded for one of the following EDUC 338C or EDUC 336C.

EDUC 344A Multiple Subjects Credential Seminar 2 Seminar, 2 hours. Prerequisite(s): concurrent enrollment in EDUC 336A or EDUC 338A or consent of instructor. Analyzes instructional processes used in multiple subjects classrooms. Topics include classroom management, curriculum planning, instructional strategies, and oral and written communication skills.
EDUC 346C Supervised Intern Teaching in A Special Class For Individuals With Mild/ Moderate Disabilities 9 Seminar, 2 hours; field, 30 hours. Prerequisite(s): admission to an internship program in mild/moderate disabilities; EDUC 346B. Consists of intern teaching in a special education day class for individuals with mild/moderate disabilities. Required for the Education Specialist Internship Credential in Mild/Moderate Disabilities. Graded Satisfactory (S) or No Credit (NC).

EDUC 347A Supervised Intern Teaching in A Special Class For Individuals With Moderate/Severe Disabilities 9 Seminar, 2 hours; field, 30 hours. Prerequisite(s): admission to an internship program in moderate/severe disabilities. Intern teaching in a special education day class for individuals with moderate/severe disabilities. Required for the Education Specialist Internship Credential in Moderate/Severe Disabilities. Graded Satisfactory (S) or No Credit (NC).

EDUC 347B Supervised Intern Teaching in A Special Class For Individuals With Moderate/Severe Disabilities 9 Seminar, 2 hours; field, 30 hours. Prerequisite(s): admission to an internship program in moderate/severe disabilities; EDUC 347B. Intern teaching in a special education day class for individuals with moderate/severe disabilities. Required for the Education Specialist Internship Credential in Moderate/Severe Disabilities. Graded Satisfactory (S) or No Credit (NC).

EDUC 347C Supervised Intern Teaching in A Special Class For Individuals With Moderate/Severe Disabilities 9 Seminar, 2 hours; field, 30 hours. Prerequisite(s): admission to an internship program in moderate/severe disabilities; EDUC 347C. Intern teaching in a special education day class for individuals with moderate/severe disabilities. Required for the Education Specialist Internship Credential in Moderate/Severe Disabilities. Graded Satisfactory (S) or No Credit (NC).

EDUC 348A Single Subject Credential Seminar 2 Seminar, 2 hours. Prerequisite(s): EDUC 162 with a grade of C- or better, may be taken concurrently or EDUC 280L with a grade of C- or better, may be taken concurrently, EDUC 177 with a grade of C- or better, may be taken concurrently or EDUC 178 with a grade of C- or better, may be taken concurrently; concurrent enrollment in EDUC 376A or EDUC 378B; concurrent enrollment in EDUC 376B or EDUC 378B, graduate standing. Required of all candidates for the Single Subject Credential. Graded Satisfactory (S) or No Credit (NC).

EDUC 348B Single Subject Credential Seminar 2 Seminar, 2 hours. Prerequisite(s): EDUC 348A; concurrent enrollment in EDUC 376B or EDUC 378B. Analyzes instructional problems encountered by candidates in the single subject classroom. Topics include basic curriculum, classroom management, interpersonal relationships, self-evaluation, and professional competencies.

EDUC 348C Single Subject Credential Seminar 2 Seminar, 2 hours. Prerequisite(s): EDUC 348B; concurrent enrollment in EDUC 376C or EDUC 378C. Analyzes instructional problems encountered by candidates in the single subject classroom. Topics include basic curriculum, classroom management, interpersonal relationships, self-evaluation, and professional competencies.

EDUC 376A Supervised Teaching in the Secondary School 4 Field, 160 hours per quarter. Prerequisite(s): EDUC 162 with a grade of C- or better, may be taken concurrently or EDUC 280L with a grade of C- or better, may be taken concurrently, EDUC 177 with a grade of C- or better, may be taken concurrently or EDUC 178 with a grade of C- or better, may be taken concurrently; concurrent enrollment in EDUC 348A and EDUC 377A; admission to a teaching credential program; graduate standing. Supervised teaching in the single subject classroom. Required of all candidates for the Single Subject Credential Candidates. Graded Satisfactory (S) or No Credit (NC). Credit is awarded for one of the following EDUC 376A or EDUC 378A.

EDUC 376B Supervised Teaching in the Secondary School 4 Field, 160 hours per quarter. Prerequisite(s): EDUC 376A; completion of or concurrent enrollment EDUC 348B and EDUC 377B; graduate standing. Supervised teaching in the single subject classroom. Required of all candidates for the Single Subject Credential. Graded Satisfactory (S) or No Credit (NC). Credit is awarded for one of the following EDUC 376B or EDUC 378B.

EDUC 376C Supervised Teaching in the Secondary School 4 Field, 160 hours per quarter. Prerequisite(s): EDUC 376C; concurrent enrollment in EDUC 348C and EDUC 377C; graduate standing. Supervised teaching in the single subject classroom. Required of all candidates for the Single Subject Credential. Graded Satisfactory (S) or No Credit (NC). Credit is awarded for one of the following EDUC 376C or EDUC 378C.

EDUC 377A Teaching Performance For Single Subject Candidates 2 Field, 40 hours per quarter; written work, 20 hours per quarter. Prerequisite(s): admission to a teaching credential program; concurrent enrollment in or completion of EDUC 376A or EDUC 378A; graduate standing. Teaching performance for California teachers. Topics include teaching performance assessment, lesson design, and classroom instruction in public schools. Fieldwork hours completed in regular placement as assigned for EDUC 376A or EDUC 378A. Required of all candidates for the Single Subject Credential. Graded Satisfactory (S) or No Credit (NC).

EDUC 377B Teaching Performance For Single Subject Candidates 2 Field, 40 hours per quarter; written work, 20 hours per quarter. Prerequisite(s): concurrent enrollment in or completion of EDUC 376B or EDUC 378B; graduate standing. Teaching performance for California teachers. Topics include teaching performance assessment, lesson design, and classroom instruction in public schools. Fieldwork hours completed in regular placement as assigned for EDUC 376B or EDUC 378B. Required of all candidates for the Single Subject Credential. Graded Satisfactory (S) or No Credit (NC).

EDUC 377C Teaching Performance For Single Subject Candidates 2 Field, 40 hours per quarter; written work, 20 hours per quarter. Prerequisite(s): concurrent enrollment in or completion of EDUC 376C or EDUC 378C; graduate standing. Teaching performance for California teachers. Topics include teaching performance assessment, lesson design, and classroom instruction in public schools. Fieldwork hours completed in regular placement as assigned for EDUC 376C or EDUC 378C. Required of all candidates for the Single Subject Credential. Graded Satisfactory (S) or No Credit (NC).

EDUC 378A Intern Teaching in the Secondary School 8 Field, 260 hours per quarter. Prerequisite(s): EDUC 162 with a grade of C- or better or EDUC 280L with a grade of C- or better; EDUC 177 with a grade of C- or better or EDUC 178 with a grade of C- or better; EDUC 179A with a grade of C- or better; concurrent enrollment in or completion of EDUC 348A and EDUC 377A; admission to intern teaching credential program; graduate standing. Intern teaching in the single subject classroom. Required for the Single Subject Internship Credential. Graded Satisfactory (S) or No Credit (NC). Credit is awarded for one of the following EDUC 378A or EDUC 376A.

EDUC 378B Intern Teaching in the Secondary School 8 Field, 260 hours per quarter. Prerequisite(s): EDUC 378B; concurrent enrollment in or completion of EDUC 348B and EDUC 377B; admission to intern teaching credential program; graduate standing. Intern teaching in the single subject classroom. Required for the Single Subject Internship Credential. Graded Satisfactory (S) or No Credit (NC). Credit is awarded for one of the following EDUC 378B or EDUC 376B.

EDUC 378C Intern Teaching in the Secondary School 8 Field, 260 hours per quarter. Prerequisite(s): EDUC 378C; concurrent enrollment in or completion of EDUC 348C and EDUC 377C; admission to intern teaching credential program; graduate standing. Intern teaching in the single subject classroom. Required for the Single Subject Internship Credential. Graded Satisfactory (S) or No Credit (NC). Credit is awarded for one of the following EDUC 378C or EDUC 376C.

EDUC 380A Supervised Teaching For Education Specialists 4 Field, 160 hours per quarter. Prerequisite(s): EDUC 380A, EDUC 381B; concurrent enrollment in or completion of EDUC 348A and EDUC 377A; admission to intern teaching credential program; graduate standing. Supervised teaching in the education specialist classroom. Required of all candidates for the Education Specialist Credential. Graded Satisfactory (S) or No Credit (NC).

EDUC 380B Supervised Teaching For Education Specialists 7 Field, 240 hours per quarter. Prerequisite(s): EDUC 380A, EDUC 381B, may be taken concurrently, EDUC 382B, may be taken concurrently; admission to the Education Specialist Credential program; graduate standing. Supervised teaching in the education specialist classroom. Required of all candidates for the Education Specialist Credential. Graded Satisfactory (S) or No Credit (NC).
EDUC 380C Supervised Teaching For Education Specialists 6 Field, 212 hours per quarter. Prerequisite(s): EDUC 380B, EDUC 381C, may be taken concurrently, EDUC 382C, may be taken concurrently; admission to the Education Specialist Credential program; graduate standing. Supervised teaching in the education specialist classroom. Required of all candidates for the Education Specialist Credential. Graded Satisfactory (S) or No Credit (NC).

EDUC 382C Teaching Performance For Education Specialists 2 Field, 40 hours per quarter; written work, 20 hours per quarter. Prerequisite(s): EDUC 382B, EDUC 380C, may be taken concurrently; admission to the Education Specialist Credential program; graduate standing. Teaching performance for California teachers. Topics include analyzing and evaluating student teaching performance, lesson design, classroom management, and instructional strategies with students with special needs. Fieldwork hours completed in assigned placement. Required of all candidates for the Educational Specialist Credential. Graded Satisfactory (S) or No Credit (NC).

Electrical and Computer Engineering

Subject abbreviation: EE

The Marlan and Rosemary Bourns College of Engineering

Ertem Tuncel, Ph.D., Department Chair
Department Office, Winston Chung Hall, Suite 343
(951) 827-2484; www.ece.ucr.edu

Professors

Matthew J. Barth, Ph.D., BCOE Associate Dean for Research and Graduate Education
Bir Bhanu, Ph.D., Distinguished Professor
Amir Roy-Chowdhury, Ph.D., Bourns Family Faculty Fellow, C.R.I.S. Director, Robotics Program Chair
Jay A. Farrell, Ph.D., KA Endowed Chair
Yingbo Hua, Ph.D.
Alexander Korotkov, Ph.D.
Roger Lake, Ph.D., Department Vice-Chair
Jianlin Liu, Ph.D.
Hamed Mohsenian-Rad, Ph.D., Bourns Family Faculty Fellow
Mihri Ozkan, Ph.D.
Wei Ren, Ph.D.
Sheldon Tan, Ph.D.
Ertem Tuncel, Ph.D., Department Chair
Albert Wang, Ph.D., UC-LIGHT Director

Professors Emeriti

Gerardo Beni, Ph.D.
Illya Dumer, Ph.D.
Susan Hackwood, Ph.D.
Ping Liang, Ph.D.

Associate Professors

Roman Chomko, Ph.D.
Shane A. Cybart, Ph.D.
Elaine D. Haberer, Ph.D.
Hyoseung Kim, Ph.D., CEN Program Director
Cong Liu, Ph.D.
Ming Liu, Ph.D.
Anastasios I. Mourikis, Ph.D.
Shaolei Ren, Ph.D.
Nanpeng Yu, Ph.D., Vice Chair of Graduate Affairs

Assistant Professors

Salman Asif, Ph.D.
Jia Chen, Ph.D.
Xi Chen, Ph.D.
Ran Cheng, Ph.D.
Basak Guler, Ph.D.
Konstantinos Karydis, Ph.D.
Hang Qiu, Ph.D.
Hung-Wei Tseng, Ph.D.
Daniel Wong, Ph.D.
Yinglun Zhu, Ph.D.

Adjunct Professor

Alexander Balandin, Ph.D., Distinguished Professor, P.O.E.M. Director

Associate Adjunct Professors

Gang Chen, Ph.D.
Aleksander Khitun, Ph.D.
Guoyuan Wu, Ph.D.

Assistant Adjunct Professors

Seyed Hossein Akhavan-Hejaiz, Ph.D.
Fariborz Kargar, Ph.D.
Alfredo Martinez-Morales, Ph.D.
Hamidreza Nazari-Pooya, Ph.D.
Mahesh R. Neupane, Ph.D.
Samet Oymak, Ph.D.

Cooperating Faculty

Boris Bar, Ph.D. (Entomology)
Ludwig Bartels, Ph.D. (Chemistry)
Laxmi Bhuyan, Ph.D. (Computer Science and Engineering)
Philip L. Brisk, Ph.D. (Computer Science and Engineering)
Michalis Faloutsos, Ph.D. (Computer Science and Engineering)
Xiaoping Hu, Ph.D. (Bioengineering)
Wald Najjar, Ph.D. (Computer Science and Engineering)
Erfan Nozari, Ph.D. (Mechanical Engineering)
Cengiz Ozkan, Ph.D. (Mechanical Engineering)
Hylke Park, Ph.D. (Bioengineering)
Fabio Pasqualetti, Ph.D. (Mechanical Engineering)
Luat T. Vuong, Ph.D. (Mechanical Engineering)
Ran Wei, Ph.D. (School of Public Policy)
Bryan M. Wong, Ph.D. (Chemical and Environmental Engineering)

Affiliated Emeritus

J. Keith Oddson, Ph.D. (Mathematics)

Lecturers

Hossny El-Shereif, Ph.D.
Tofgh Heidarzadeh, Ph.D.
Aleksander Khitun, Ph.D.
Matt Vaezi, Ph.D.

Major

The Department of Electrical and Computer Engineering offers B.S., M.S., and Ph.D. degrees in Electrical Engineering and with the Department of Computer Science and Engineering jointly offers B.S. and M.S. degrees in Computer Engineering. For more information on the Computer Engineering degree programs, see Computer Engineering in this catalog.

Graduates of UCR’s BS degree program in Electrical Engineering will meet high professional, ethical, and societal goals as demonstrated by accomplishing, at least one different item in each of two different categories:

success in post-graduation studies as evidenced by:

- satisfaction with the decision to further their education
- advanced courses completed or advanced degrees earned
- professional visibility (e.g., publications, presentations, patents, inventions, awards)
success in a chosen profession or vocation as evidenced by:
• career satisfaction
• promotions/raises (e.g. management leadership, positions or distinguished technical positions)
• professional visibility (e.g. publications, presentations, patents, inventions, awards)
• professional responsibilities (e.g. professional registration, professional mentoring, professional society membership and offices)
• entrepreneurial activities
• consulting activities

contributions to society and profession as evidenced by:
• leadership roles
• public service
• mentoring / outreach activities
• volunteer service
• establishment and maintenance of professional networks

All undergraduates in the College of Engineering must see an advisor at least annually. Visit student.engr.ucr.edu for details.

The Electrical Engineering B.S. degree program at UCR is accredited by the Engineering Accreditation Commission of ABET, abet.org. For more details see https://www.ece.ucr.edu/academics/abet/vopeo.

Undergraduate Program Focus Areas
The electrical engineering undergraduate program offers the following focus areas:

1. Communications, Signal Processing and Networking: Fundamental and state-of-the-art theory and applications of acquisition, processing, and transmission of digital signals and images over wire, wireless (radio frequency), fiber optics, etc. Example applications include speech processing and recognition, mobile communication using smartphones, fiber optical communication, image enhancement and compression.

2. Control and Robotics: Fundamental theory, design and applications of feedback control systems and autonomous robots capable of making intelligent decisions. Example applications include automotive, marine, aircraft, and satellite control systems; motion planning, control and decision making for autonomous unmanned aerial, ground, surface, and underwater vehicles; autonomous positioning and navigation; advanced robotic manufacturing and machine vision.

3. Embedded Systems and VLSI: Theory, design and methodologies of embedded system using microcontrollers, very large scale, nanometer integrated circuits. Example applications include smart home appliances, Internet of Things, microprocessors, analog and mixed signal circuits, RF circuits for cell phones and wireless networks, system-on-chip and wireless networks, system-on-chip.

4. Intelligent Systems: Foundations and applications for acquisition and analysis of multimodal data, and inference for intelligent pattern recognition, machine learning, and decision making. Examples include, learning from sensor data; pattern recognition, computer vision, and image processing; system approximation and modeling; decision-making under uncertainty; probabilistic robotics; and intelligent transportation systems.

5. Nanotechnology, Advanced Materials, and Devices: Synthesis and characterization of advanced materials at nanometer scale, theory, design and fabrication of electronic and optoelectronic devices. Example applications include creation of ultra-fast low-power transistors, efficient solar cells for energy generation, highdensity memory for smart phones and mobile services, and tiny devices for medical applications.

6. Power Systems and Smart Grid: Power electronics, AC and DC power and their conversion, electro-mechanical energy conversion, electric motors, large-scale power generation and transmission systems, long-distance transmission and distribution of electric power, design of motion control drive circuits for robotic and industrial automation systems, and other related topics.

All undergraduates in the College of Engineering must see an advisor at least annually. For details, visit student.engr.ucr.edu.

Change of Major Criteria
All students who request a change of major to Electrical Engineering must meet the following requirements:
• Be in good academic standing
• Have no less than a C- in any Math, Science and Engineering coursework
• Have a minimum 2.0 GPA in all Math, Science and Engineering required coursework
• Be able to complete major within maximum allowable units
• Complete all the courses listed below, based on the total number of units earned, prior to submitting the major change request
• UCR transfer students interested in changing to a BCOE major must have been admitted to the major at point of entry, or must satisfy transfer admission and change of major requirements before earning 120 units
• If changing in the 90-119 units category student must have the ability to complete major within 5 years of entry as a freshman or 3 years after entry as a transfer student

• Students who have earned 120 or more units are not eligible for a change of major in BCOE. NOTE: AP/IB units are excluded from maximum unit calculation

Completed 0 to less than 45 units
Completion of ENGL 001A with C or better and completion of the following with at least 2.7 GPA in:
• MATH 009A or MATH 09HA
• MATH 009B or MATH 09HB
• PHYS 040A

Completed 45 to less than 90 units
Completion of ENGL 001A with C or better and completion of the following with at least 2.500 GPA
• C or better in CS 010A
• MATH 009A or MATH 09HA
• MATH 009B or MATH 09HB
• MATH 009C or MATH 09HC
• PHYS 040A

Completed 90 to less than 120 units
Completion of ENGL 001A and ENGL 001B with C or better and completion of the following with at least 2.500 GPA:
• C or better in CS 010A
• EE 030A
• EE 030LA
• MATH 009A or MATH 09HA
• MATH 009B or MATH 09HB
• MATH 009C or MATH 09HC
• PHYS 040A
• PHYS 040B

University Requirements
See Undergraduate Studies section.

College Requirements
See The Marlan and Rosemary Bourns College of Engineering, Colleges and Programs section.

The Electrical Engineering major uses the following major requirements to satisfy the college’s Natural Sciences and Mathematics breadth requirement.

1. One course in the biological sciences chosen from an approved list
2. MATH 009A
3. PHYS 040A, PHYS 040B, PHYS 040C

Major Requirements
1. Lower-division requirements (73 units)
   a) One course in the biological sciences chosen from an approved list
   b) CS 010A, CS 010B, CS 061
   c) EE 016
   d) EE 010, EE 020A, EE 020B, EE 030A, EE 30LA, EE 030B
   e) MATH 009A, MATH 009B, MATH 009C, MATH 010A, MATH 010B
   f) PHYS 040A, PHYS 040B, PHYS 040C
2. Upper-division requirements (77 units)
   a) EE 100A, EE 110A, EE 110B, EE 114, EE 116, CS 120A/EE 120A, CS 120B/EE 120B, EE 132, EE 133, EE 142, EE 175A, EE 175B
   b) ENGR 181W
   c) Twenty-four (24) units of technical electives chosen from CS 161, CS 162, CS 168/EE 168, EE 103, EE 106, EE 100B, EE 115, EE 117, EE 118, EE 123, EE 128, EE 135, EE 136, EE 137, EE 138, EE 139, EE 141, EE 144, EE 145/M 145, EE 146, EE 147, EE 148, EE 150, EE 151, EE 152, EE 153, EE 155, EE 162, EE 165, EE 168, ENGR 160

To ensure depth, the choice of technical electives must include at least one coherent sequence of at least four (4) courses (two required courses plus two additional) in one focus area of electrical engineering, and two (2) other technical elective courses, as defined below.

- **Communications, Signal Processing and Networking**. Required courses: EE 115, EE 141. Sequence Courses: EE 100B, EE 117, EE 118, EE 146, EE 150, EE 152, ENGR 160
- **Control and Robotics**. Required Courses: EE 105, EE 144. Sequence Courses: EE 106, EE 141, EE 145/M 145, EE 146, EE 151, EE 152, ENGR 160
- **Embedded Systems and VLSI**. Required Courses: EE 128, EE 168. Sequence Courses: EE 100B, EE 117, EE 118, EE 135, EE 141, EE 147, EE 165, CS 161, CS 162
- **Intelligent Systems**. Required Courses: EE 144, EE 146. Sequence Courses: EE 105, EE 106, EE 115, EE 128, EE 141, EE 145, EE 147, EE 150, EE 151, EE 152, ENGR 160
- **Nanotechnology, Advanced Materials, and Devices**. Required Courses: EE 136, EE 137. Sequence Courses: EE 100B, EE 117, EE 118, EE 135, EE 138, EE 139, EE 162, EE 168
- **Power Systems and Smart Grid**. Required Courses: EE 123, EE 155. Sequence Courses: EE 100B, EE 117, EE 128, EE 153, ENGR 160

Example course sequences are available through the Student Affairs Office in the College of Engineering or student.engr.ucr.edu

Graduate Program
The Department of Electrical and Computer Engineering offers programs leading to M.S. and Ph.D. degrees.

University requirements for the M.S. and Ph.D. degrees in Electrical Engineering are given in the Graduate Studies section of this catalog.

Research focus areas currently include communications, computer vision, control, detection and estimation, distributed systems, electronic materials, error-correcting codes, image processing, information theory, intelligent sensors, intelligent systems, machine learning, modeling and simulation, multimedia, advanced materials, nanostructures and nanodevices, navigation, neural networks, pattern recognition, robotics and automation, signal processing, solid-state devices and circuits, system identification, and transportation systems.

Combined B.S. + M.S. Five-Year Program
The college offers a combined B.S. + M.S. program in Electrical Engineering designed to lead to a Bachelor of Science degree as well as a Master of Science degree in five years. Applicants for this program must have a high school GPA above 3.6, a combined SAT Reasoning score above 1950 (or ACT plus Writing equivalent), complete the Entry Level Writing Requirement before matriculation, and have sufficient mathematics preparation to enroll in calculus in their first quarter as freshmen.

Students in the B.S. + M.S. program are allowed to count up to 12 units of undergraduate technical electives taken as UCR undergraduates towards the 36-unit requirements of the M.S. degree.

Interested students who are entering their junior year should check with their academic advisor for information on eligibility and other details.

Admission
All applicants for the M.S. and Ph.D. programs must submit official scores for the GRE General Test. All applicants whose native language is not English and who do not have a degree from an institution where English is the exclusive language of instruction must complete the Test of English as a Foreign Language (TOEFL) with a minimum score of 550 (paper-based), 220 (computer-based), or 90 (Internet-based).

Applications must meet the general admission requirements of the Riverside Division of the Academic Senate and the UCR Graduate Council as set forth in the UC Riverside Graduate Student Application. In addition, **Master’s Degree** Applicants should have completed a program equivalent to UCR’s B.S. in Electrical Engineering or demonstrate the required knowledge and proficiency in the following subjects:

1. Mathematics, including calculus, differential equations, and complex variables
2. Circuits and electronics (equivalent of EE 100A and EE 100B)
3. Signals and systems (equivalent of EE 111, or both EE 110A and 110B)
4. Logic design, digital systems, and microcomputers (equivalent of EE 120A and 120B)
5. Control systems (equivalent of EE 132)
6. At least one major high-level programming language and associated programming techniques (equivalent of CS 010)

Students with background in other scientific fields are encouraged to apply. Applicants lacking minimum undergraduate preparation in the above areas may be admitted, but must take the appropriate undergraduate courses as approved by the Graduate Advisor. If admitted, these students must correct all deficiencies within the first year of graduate study. Courses taken for this purpose do not count towards an advanced degree.

Master of Science
The Department of Electrical and Computer Engineering offers the M.S. degree in Electrical Engineering.

General university requirements are listed in the Graduate Studies section of this catalog. Students may obtain an M.S. degree in Electrical Engineering through either Plan I (Thesis) or Plan II (Comprehensive Examination). The normative time for a student to complete the M.S. degree under both Plan I or Plan II is six quarters (two years). Students who are admitted with deficiencies may require up to three additional quarters.

Plan I (Thesis)
Students must complete 36 units of approved graduate work in Electrical Engineering and related areas such as Computer Science and Materials Science and Engineering. At least 24 of these units must be courses numbered between 200 and 279. At least 12 units must be in graduate research (courses numbered 297 or 299). Colloquium units (CS 287, EE 259, MSE 250, MSE 251) and courses numbered 291 are not counted towards the 36 unit requirement.

Students choosing Plan I must submit a master’s thesis in accordance with the general requirements of the University. The thesis must be original research work, and demonstrate the student’s ability to explore a research area, acquire in-depth knowledge of the chosen research topic, and make a research contribution. The thesis must be approved by a committee of at least three faculty members. The thesis must be defended in a two-hour examination open to the public, beginning with a brief presentation by the candidate, and followed by a question-and-answer session.

Plan II (Comprehensive Examination)
Students must complete 36 units of approved graduate or upper-division undergraduate coursework in Electrical Engineering and related areas such as Computer Science and Materials Science and Engineering. At least 24 of these units must be graduate-level courses numbered between 200 and 279. To satisfy the remaining 12 units, students may use only EE courses numbered between 200 and 289 excluding colloquium units (CS 287, EE 259, MSE 250, and MSE 251), upper-division undergraduate EE courses numbered 115 and above (with the exception of EE 116, 120, and 132) and up to 8 units of Directed Studies (290). Colloquium units (CS 287, EE 259, MSE 250, and MSE 251) and courses numbered 291 and higher are not counted towards the 36-unit requirement.

In addition to the course requirements of Plan II, students must pass a comprehensive examination administered by the program.

Normative Time to Degree
Six quarters (two years)

Doctoral Degree
The Department of Electrical and Computer Engineering offers the Ph.D. degree in Electrical Engineering.
Admission
Students with backgrounds in Electrical Engineering or other related areas are encouraged to apply. An M.S. degree is not required for admission to the Ph.D. program. Under special circumstances, applicants lacking undergraduate preparation in core Electrical Engineering areas related to their field of research may be admitted, but must take the appropriate undergraduate courses to correct the deficiencies within the first year of graduate study. Courses taken for this purpose do not count towards an advanced degree.

Course Work
Students must complete at least 36 units of approved graduate coursework in Electrical Engineering and related areas such as Computer Science, Materials Science and Engineering, or other approved subject areas. Only courses numbered between 200 and 279, excluding Colloquium courses (CS 287, EE 259, MSE 250, and MSE 251), may be counted towards this requirement. With Graduate Advisor approval, graduate courses taken and completed as part of a related M.S program at UCR may count towards the 36 units of coursework required for the Electrical Engineering Ph.D program. Students who are admitted with an M.S. degree from a different institution may use up to 16 units of equivalent courses taken during their M.S. study to count towards the requirement.

Students must complete a minimum of six quarters (two years) in residence at UCR with a GPA of 3.00 or better. Students must establish a course plan in coordination with their research advisor or the program Graduate Advisor. The course plan should lend support to the students’ research area, while adding breadth to their overall program. Students may need to take considerably more than 36 units to establish breadth and depth of knowledge in their area of research.

Advancement to Candidacy
A student advances to candidacy after he/she has passed the preliminary examination and the oral qualifying examination, as described below.

Preliminary Examination
The purpose of the preliminary examination is to screen candidates for continuation in the doctoral program. The examination is administered by the graduate program committee. Students must solve problems from five courses in one of the three Exam Areas:

- signals, systems, and machine intelligence
- nano materials and devices, or
- VLSI Circuits and Systems

At least two of these five problems must be from the “basic” courses and two must be from the “advanced” courses. The fifth problem can be either from the “basic” or the “advanced” courses designated for each Exam Area. Students who did not pass at the Ph.D. level in their first trial will be given a second chance. In the second attempt, they will be required to solve problems only from courses they did not pass at the Ph.D. level in their first attempt.

Plan II M.S. candidates who took the M.S. comprehensive examination and successfully passed at the Ph.D. level are given credit for having passed the Ph.D. preliminary examination.

Oral Qualifying Examination
Students are expected to demonstrate that they have a thorough understanding of their research field, and are capable of doing cutting-edge research. For that purpose, students must choose a research topic under the guidance of their faculty major professor and orally present to a Qualifying Committee, which is appointed by the Graduate Division based on nominations from the department.

The presentation must be accompanied by an Oral Exam Report, written in proper technical English and in the style of a typical Electrical Engineering conference or journal publication. This report should clearly describe the proposed problem under study, demonstrate substantial knowledge of the topic and related issues, present the research results the student has obtained, and indicate the plans for future work. Students must demonstrate ability to carry out a program of independent advanced research and to report the results in accordance with standards observed in recognized technical journals.

The Oral Qualifying examination is closed to the public.

The student must complete this requirement in no more than two attempts. The normative time for taking the Oral Qualifying Exam is by the end of the third year.

Dissertation Examination and Defense
After advancement to candidacy, the student must form a Doctoral Dissertation Committee chaired by his or her major professor. The committee will consist of at least three senate faculty members with at least two members from the Electrical and Computer Engineering department.

When the Doctoral Dissertation Committee determines that a suitable draft of the dissertation has been presented, a dissertation examination and defense for the student is scheduled. The defense consists of a public seminar followed by questions from the committee members and the audience.

Normative Time to Degree
12 quarters (15 quarters for students without an M.S. in Electrical Engineering)

Preparation for Careers in Teaching
All doctoral students are recommended to be employed as teaching assistants for at least three quarters during their graduate career. The department is developing special courses to aid in the learning of effective teaching methods, such as handling discussion/lab sessions and preparing and grading examinations.

Contact the Graduate Student Affairs Officer at the Department of Electrical and Computer Engineering (951) 827-2684, or visit ece.ucr.edu for information on graduate courses.

Professional Development Requirement
All incoming M.S. and Ph.D. students must satisfactorily complete the Fall, Winter, and Spring offerings of EE 259, Colloquium in Electrical Engineering.

Additionally, students in the Ph.D. program must submit a Professional Development Report that details the students’ efforts in developing their technical writing and presentation skills. This report should be submitted to and approved by the Graduate Committee, as a prerequisite for filing the Oral Qualifying Committee nomination form. Specific requirements for the Professional Development Report are determined by the Graduate Committee.

Lower-Division Courses
EE 003 Electronics, Smartphones and Mobile Internet 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none Introduces basic concepts and understanding of electronic products, wireless communications, industrial control, and robotics that are important for citizens and leaders in the information age. Highlights examples including smartphones, mobile Internet, robots etc. as examples. Does not confer credit towards a degree in the Bourns College of Engineering.

EE 004 Nanotechnology: Science, Applications and Future 4 Lecture, 3 hours; discussion, 1 hour. Introduces concepts and understanding of nanotechnologies in electronics, energy, medicine, and environment that are important for citizens and leaders in the technology economy. Discusses applications in cancer treatments, cosmetics, nanorobots, solar energy, and environmental protection. Does not confer credit towards a degree in the Bourns College of Engineering.

EE 005 Circuits and Electronics 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): PHYS 040C or PHYS 040HC, or consent of instructor. Introduction to linear circuit elements and analysis, operational amplifiers, semiconductor diodes and transistors, analog amplifiers, and digital circuits. Provides hands-on experience in designing and analyzing electronic circuits. Does not confer credit towards a degree in Electrical Engineering and Computer Engineering.

EE 010 Introduction to Electrical Engineering 2 Lecture, 2 hours. Prerequisite(s): none. Introduces electrical engineering applications, career options, and the electrical engineering curriculum. Provides motivation and context for the mathematics and science courses that are prerequisites to most electrical engineering courses. Discusses contemporary engineering issues, social and environmental impact of engineering solutions, professional ethics, and need for life-long learning.
EE 016 Data Analysis For Engineering Applications 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 010B. Covers essential algorithms and data structures, elements of numerical data processing, linear algebra, and statistical analysis. Encompasses multiple engineering areas such as sensor interfacing, signal and image processing, pattern recognition, robotics, and intelligent systems. Introduces the use of Python programming language.

EE 020A Introduction to Ordinary Differential Equations For Physical Sciences and Engineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 007B with a grade of C- or better or MATH 009B with a grade of C- or better or MATH 09HB with a grade of C- or better, or equivalent; or consent of instructor. Introduction to ordinary differential equations; complex numbers; trigonometric, compact and exponential Fourier Series; frequency spectrum; and Laplace transform, Fourier transform, and their application to the solution of integro-differential equations as they appear in the physical sciences and engineering. Cross-listed with MATH 045. Credit is awarded for one of the following EE 020A, MATH 045, or MATH 046.

EE 020B Linear Methods For Engineering Analysis and Design Using Matlab 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 010A; MATH 009A or MATH 09HA. Introduces MATLAB programming and linear methods for engineering analysis and design. Topics include formulating engineering problems as linear systems of equations; methods for finding their solutions; vector and matrix representations of signals and systems; matrices computations; and linear programming for system analysis and design. Credit is awarded for one of the following EE 020B or MATH 031.

EE 030A Fundamentals of Electric Circuits I 3 Lecture, 3 hours. Prerequisite(s): concurrent enrollment in EE 030A; PHYS 040HC with a grade of B or better, may be taken concurrently or PHYS 040C with a grade of C- or better, may be taken concurrently, 2 of the following: MATH 045, MATH 046, EE 020A, EE 020. Covers Ohm’s law and Kirchhoff’s laws; nodal and mesh analysis; network theorems; properties of capacitors and inductors; transient analysis of RC, RL, and RLC circuits; and modeling of electronic circuits with Spice.

EE 030B Fundamentals of Electric Circuits II 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): EE 030A, EE 030LA. Covers steady-state analysis of electric circuits using phasors and Laplace transform. Discusses Fourier series, frequency response, Bode plots, and passive filters. Also includes current-voltage characteristics and small-signal approximations of non-linear devices such as diodes, bipolar-junction transistors, and field-effect transistors. Addresses modeling of electric circuits with Spice.
EE 118 Radio Frequency Circuit Design 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): EE 100A, may be taken concurrently; EE 116, may be taken concurrently. Studies design and analysis of radio frequency (RF) circuits. Topics include multiport networks; scattering matrix and S-parameters; transmission lines; matching networks; Smith Chart; RF electro-magnetic analysis of waveguides, antennas, filters, and couplers; RF transistor equivalent modeling; low-noise amplifier design; noise figure; oscillators and mixers; and phase locked loop. Credit is awarded for one of the following EE 118 or EE 282B.

EE 120A Logic Design 5 Lecture, 3 hours; laboratory, 3 hours; individual study, 3 hours. Prerequisite(s): CS 061 with a grade of C- or better. Covers design of digital systems. Includes Boolean algebra; combinational and sequential logic design; design and use of arithmetic logic units, carry-lookaheadadders, multiplexers, decoders, comparators, multipliers, flip-flops, registers, and simple memories; state-machine design; and basic register-transfer level design. Uses hardware description languages, synthesis tools, programmable logic, and significant hardware prototyping. Cross-listed with CS 120A.

EE 120B Introduction to Embedded Systems 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 010B, CS 120A or EE 120A. Introduction to hardware and software design of digital computing systems embedded in electronic devices (e.g., digital cameras or portable video games). Includes embedded processor programming, custom processor design, standard peripherals, memories, interfacing, and hardware/software tradeoffs. Includes use of synthesis tools, programmable logic, microcontrollers, and designing working embedded systems. Cross-listed with CS 120B.

EE 123 Power Electronics 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): EE 030B; UCR undergraduate majors for summer only; For MSOE EE 123 online sections: enrollment in the Online Master of Science in Engineering. Covers the study of power semiconductor devices. Includes magnetic circuits and components; switch mode converters and power supplies; and single, three-phase, pulse width modulation, and resonant pulse inverters. Addresses voltage controllers; direct current and induction motor drives; and design of motion control drive circuits for robotic and industrial automation systems. Credit is awarded for one of the following EE 123 or EE 286C.

EE 128 Sensing and Actuation For Embedded Systems 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): EE 005, may be taken concurrently or EE 030B, may be taken concurrently; EE 120B, may be taken concurrently or CS 120B, may be taken concurrently; or consent of instructor. Covers embedded system design for sensor data acquisition, signal processing, control, and actuation. Explores sensor and motor interface protocols (analog-to-digital and digital-to-analog conversion, Nyquist sampling rate, power constraints, and communication with peripherals). Also addresses design principles for instrumentation, embedded software programming, and real-time systems for sensing and control tasks.

EE 131 Edge Computing 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 100 or EE 120B or CS 120B. Covers industry standards for quality of service and security while leveraging performance constraints. Develops skills in deploying real-world applications using embedded artificial intelligence. Cross-listed with CS 131.

EE 132 Automatic Control 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): EE 110A or EE 111; or equivalent; or consent of instructor. Covers mathematical modeling of linear systems for time and frequency domain analysis. Topics include transfer function and state variable representations for analyzing stability, controllability, and observability; and closed-loop control design techniques by Bode, Nyquist, and root-locus methods. Laboratories involve both simulation and hardware exercises. Credit is awarded for one of the following EE 132 or EE 212.

EE 133 Solid-State Electronics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 005 or EE 030B. Presents the fundamentals of solid-state electronics. Topics include electronic band structure; Fermi and quasi-Fermi levels; doping; contacts; junctions; field-effect, bipolar, and metal-oxide-semiconductor (MOS) transistors; and charge-coupled devices. Also reviews device fabrication concepts.

EE 135 Analog Integrated Circuit Layout and Design 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): EE 100A or equivalent of instructor. Covers analog circuit design, layout, and verification of complementary metal oxide semiconductors (CMOSs) with use of computer-aided design tools. Topics covered include analog metal oxide semiconductor field effect transistor (MOSFET) models, current sources, references, amplified design, nonlinear analog circuits, dynamic analog circuits, analog-to-digital converters (ADCs), and digital-to-analog converters (DACs). Credit is awarded for one of the following EE 135 or EE 282C.

EE 136 Semiconductor Device Processing 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): EE 133; or equivalent. Presents device simulations and hands-on experience in integrated-circuit fabrication techniques and device characterization. Uses four-mask metal-oxide semiconductor (MOS) technology to fabricate resistors, junctions, capacitors, and MOS transistors as well as to perform electrical evaluation. Credit is awarded for one of the following EE 136 or EE 285A.

EE 137 Introduction to Semiconductor Optoelectronic Devices 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 133. An introduction to semiconductor optoelectronic devices for optoelectronic communications and signal processing. Topics include basic optical processes in semiconductors; semiconductor light-emitting diode, semiconductor heterojunction lasers, photodetectors, solar cells, optoelectronic modulation, and switching devices. Credit is awarded for one of the following EE 137 or EE 285B.

EE 138 Electrical Properties of Materials 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 040C or PHYS 040HC; or equivalent; restricted to class level standing of junior, or senior. Introduces the electrical properties of materials. Includes the electron as a particle and a wave; hydrogen atom and the periodic table; chemical bonds; free-electron theory of metals; band theory of solids; semiconductors and dielectrics; measurements of material properties; and growth and preparation of semiconductors. Credit is awarded for one of the following EE 138 or EE 285C.

EE 139 Magnetic Materials 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 040C or PHYS 040HC; or equivalent; restricted to class level standing of junior, or senior. Introduces fundamentals of magnetic materials for the next-generation magnetic, magnomagnetic, and spintronics-related technologies. Includes basics of magnetism, models of the equivalent magnetic charge and current, paramagnetic and diamagnetic materials, soft and hard magnetic materials, equivalent magnetic circuits, and magnetic system design foundations. Credit is awarded for one of the following EE 139 or EE 285D.

EE 140 Foundations and Applications of Intelligent and Autonomous Systems 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 114 or STAT 155; or equivalent. Explores intelligent systems which make decisions based on analysis of uncertain sensed data while interacting with the physical world. Focuses on foundational principles for modeling such uncertainty to enable the design of optimal decision-making algorithms. Includes sensor data processing projects.

EE 141 Digital Signal Processing 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): EE 110B or EE 111. Transform analysis of Linear Time-Invariant (LTI) systems; discrete Fourier Transform (DFT) and its computation; Fourier analysis of signals using the DFT; filter design techniques; and structures for discrete-time systems. Laboratory experiments on DFT, fast Fourier transforms (FFT), infinite impulse response (IIR), finite impulse response (FIR) filter design, and quantization effects.

EE 142 Introduction to Machine Learning and Data Mining 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 010A; MATH 031 or EE 020B; STAT 155 or EE 114 or STAT 156A; CS 100 or CS 120B or EE 120B. Introduces formalisms and methods in data mining and machine learning. Topics include data representation, supervised learning, and classification. Covers regression and clustering. Also covers rule learning, function approximation, and margin-based methods. Cross-listed with CS 171.
EE 144 Foundations of Robotics 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): EE 020B or MATH 031 or ME 018B; EDUC 016 or CS 010B or ME 118; EE 106 or CS 141 or ME 120; restricted to class level standing of junior, or senior; or consent of instructor. Provides foundational knowledge on analysis, control, and programming of robots. Considers configuration space; rigid body motion; forward, inverse, and velocity kinematics; dynamics; trajectory planning; robot motion control; localization and mapping; and robot ethics. Integrates hands-on labs to program robots in simulation and experimentally by reading and interpreting sensor data. Cross-listed with ME 144. Credit is awarded for one of the following EE 144, ME 144, or EE 283A.

EE 145 Robotic Planning and Kinematics 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): ME 120 or equivalent; or consent on instructor. Motion planning and kinematics topics with an emphasis in geometric reasoning, programming, and matrix computations. Motion planning includes configuration spaces, sensor-based planning, decomposition and sampling methods, and advanced planning algorithms. Kinematics includes reference frames, rotations and displacements, and kinematic motion models. Cross-listed with ME 145.

EE 146 Computer Vision 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): restricted to class level standing of senior; restricted to major(s) Computer Engineering, Computer Science, Electrical Engineering; or consent of instructor. Covers imaging formation, early vision processing, boundary detection, region growing, two-dimensional and three-dimensional object representation, and recognition techniques. Credit is awarded for one of the following EE 146 or EE 284B.

EE 147 Graphics Processing Unit Computing and Programming 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 120B or CS 120B. Introduces principles and practices of programming graphics processing units (GPUs) using the parallel programming environment. Covers memory/threading models, common data-parallel programming patterns and libraries needed to develop high-performance parallel computing applications. Examines computational thinking; a broader range of parallel execution models; and parallel programming principles. Cross-listed with CS 147.

EE 148 Robotics and Artificial Intelligence 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): EE 114 or STAT 155; or consent of instructor. Covers fundamentals of intelligent robot behavior. Discusses reactive, deliberative, and interactive functionality for safe interaction with the environment, other robots, and humans. Describes plans, actions, models, and knowledge representation. Addresses action-perception loops, behavioral coordination, decision-making under uncertainty, task allocation, semantic planning, and robot learning. Discusses ethics of building autonomous robots.

EE 150 Digital Communications 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 114, EE 115. Topics include modulation, probability and random variables, correlation and power spectra, information theory, errors of transmission, equalization and coding methods, shift and phase keying, and a comparison of digital communication systems. Credit is awarded for one of the following EE 150 or EE 281A.

EE 151 Introduction to Digital Control 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): EE 132; EE 141. Reviews continuous-time control systems, 2-transform and properties, sampled-data systems, stability analysis and criteria, and frequency domain analysis and design. Addresses transient and steady-state response, state-space techniques, controllability and observability, pole placement, observer design, and Lyapunov stability analysis. Laboratory experiments complementary to these topics include simulations and hardware design. Credit is awarded for one of the following EE 151 or EE 283B.

EE 152 Image Processing 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): EE 110B or EE 111; or consent of instructor. Covers digital image acquisition, image enhancement and restoration, image compression, and computer implementation and testing of image processing techniques. Provides hands-on experience of complete image processing systems, including image acquisition, processing, and display. Credit is awarded for one of the following EE 152 or EE 281B.

EE 153 Electric Drives 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): EE 116; or consent of instructor for graduate students. For EE 153 online section: enrollment in the Online-Master-in-Science in Engineering program. Topics include the study of electro-mechanical energy conversion, magnetic circuits, and magnetic components. Also explores linear motors, direct-current motors, induction motors, reluctance motors, and synchronous motor drives. Addresses space vectors in alternating current machines and the analysis and design of feedback controllers. Credit is awarded for one of the following EE 153 or EE 286B.

EE 155 Power System Analysis 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 030B; EE 116; or consent of instructor; EE 155 online section: enrollment in the Online Master-in-Science in Engineering program. Covers long-distance transmission of electric power. Emphasizes admittance and impedance modeling of components and systems; optimal power flow calculations and applications; symmetrical and asymmetrical fault calculations; economic operation of large-scale generation and transmission systems; and analysis of transmission and distribution networks. Credit is awarded for one of the following EE 155 or EE 286A.

EE 161 Analytical Materials Characterization 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): MSE 160. Analysis of the surfaces of materials via ion, electron, and photon spectroscopies. Covers Rutherford back scattering; secondary ion mass spectroscopy; electron energy loss spectroscopy; Auger electron spectroscopy; X-ray photoelectron spectroscopy; photoluminescence; extended X-ray absorption fine structure; Fourier transform infrared spectroscopy; Raman spectroscopy; sputtering; high-vacuum generation; and focused ion beam milling. Cross-listed with MSE 161.

EE 162 Introduction to Nanoelectronics 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): EE 133; or consent of instructor; familiarity with MATLAB or equivalent and with basic matrix algebra is recommended. Presents the basic concepts of nanoelectronics focusing on current flow through nanostructured devices. Topics include new paradigms of nanoelectronics, an atomic view of electrical resistance, Schroedinger’s equation, Coulomb blockade, basis functions, bandstructure, quantum capacitance, level broadening, and coherent transport. Credit is awarded for one of the following EE 162 or EE 285E.

EE 165 Design For Reliability of Integrated Circuits and Systems 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): EE 100A; restricted to class level standing of senior; or graduate standing, or consent of instructor. Covers essentials of electrical transient induced failures to integrated circuits (IC) and systems. Addresses basics for different failure and testing models including electrostatic discharge (ESD). Discusses design-for-reliability (DFR) techniques such as ESD protection designs at IC, module, and system levels. Enhances learning with computer aided design (CAD) laboratories. Credit is awarded for one of the following EE 165 or EE 282D.

EE 168 Introduction to Very Large Scale Integration Design 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 120A or EE 120A; or consent of instructor. Studies integrated circuit fabrication, device characterization, and circuit simulation. Introduces basic device physics and physical design rules, MOS logic design, and timing and clock schemes. Covers layout generation, subsystem designs, and circuits for alternative logic styles. Also covers design and simulation using hardware description language and CAD tools. Cross-listed with CS 168. Credit is awarded for one of the following EE 168, CS 168, or EE 282A.

EE 175A Senior Design Project 4 Lecture, 1 hour; laboratory, 3 hours; practicum, 6 hours. Prerequisite(s): CS 010C or EE 016; CS 120B or EE 120B; restricted to class level standing of senior; restricted to major(s) Computer Engineering, Computer Engineering BS + MS, Electrical Engineering, Electrical Engineering BS + MS; or consent of instructor. Proposal of design of electrical engineering devices or systems under the direction of the instructor. Develops technical specification; considers design constraints and industry standards; emphasizes ethical responsibilities; and promotes staying current on technology and its socioeconomic and environmental impact. Graded In Progress (IP) until EE 175A and EE 175B are completed, at which time, a final letter grade is assigned.
Graduate Courses

EE 201 Applied Quantum Mechanics 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): MATH 046, PHYS 040A; or consent of instructor. Covers topics in quantum mechanics including Schrödinger equation; operator formalism; harmonic oscillator; quantum wells; spin, bosons, and fermions; solids; perturbation theory; Wentzel-Kramers-Brillouin approximation; tunneling; tight-binding model; quantum measurements; quantum cryptography; and quantum computing. Cross-listed with MSE 207.

EE 202 Fundamentals of Semiconductors and Nanostructures Lecture, 3 hours; research, 3 hours. Prerequisite(s): EE 133, EE 201/ MSE 207; or consent of instructor. Examines principles of semiconductor materials and nanostructures. Topics include periodic structures, electron and phonon transport, defects, optical properties, and radiative recombination. Also covers absorption and emission of radiation in nanostructures and nonlinear optics effects. Emphasizes properties of semiconductor superlattices, quantum wells, wires, and dots. Cross-listed with MSE 217.

EE 203 Solid-State Devices 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): EE 133 or consent of instructor. Covers electronic devices including p-n junctions, field-effect transistors, heterojunction bipolar transistors, and nanostructure devices. Explores electrical and optical properties of semiconductor heterostructures, superlattices, quantum wires, and dots, as well as devices based on these structures. Cross-listed with MSE 237C.

EE 204 Advanced Electromagnetics 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): EE 117 or consent of instructor. Presents selected topics in electromagnetic theory and antenna design. Topics include power transmission and attenuation in microstrip transmission lines (TL) and waveguides (WG); transient analysis and applications of TL and WG; radiation of electromagnetic waves; antenna design; electromagnetic interference and compatibility; and numerical methods in electromagnetic theory.

EE 205 Optoelectronics and Photonic Devices 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): EE 203/ MSE 237C, EE 204; or consent of instructor. A study of the physical optical and photonic devices and their use in an optical communication system. Covers silica fibers, light-emitting diodes (LEDs), heterojunction lasers, p-i-n photodiodes, and avalanche photodiodes.

EE 206 Nanoscale Characterization Techniques 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): EE 201 or MSE 207; graduate standing; or consent of instructor. An in-depth study of nanoscale materials and device characterization techniques. Emphasizes atomic force microscopy (AFM) and scanning tunneling microscopy (STM). Includes semiconductor fabrication fundamentals; metrology requirements; in situ monitoring; interconnects and failure analysis; principles of AFM, STM, and scanning electron microscopy; X-ray methods; optical and infrared techniques; and electrical characterization. Cross-listed with MSE 227A.

EE 208 Semiconductor Electronic and Optical Properties 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 221B, may be taken concurrently or EE 202, may be taken concurrently or MSE 217, may be taken concurrently; graduate standing. Introduction to electronic bandstructure. Topics include electronic structure of semiconductors, graphene, localized orbital models, k dot p models, spin-orbit coupling, and optical generation of spin. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with MSE 227B.

EE 209 Semiclassical Electron Transport 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 201/ MSE 207, EE 203/ MSE 237C, EE 208. Covers the Boltzmann transport equation as applied to semiconductor device modeling. Topics include the physics of carrier scattering in common semiconductors, theoretical treatments of low and high field transport, balance equations, and Monte Carlo solutions. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

EE 210 Advanced Digital Signal Processing 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 110B, EE 141. Provides in-depth coverage of advanced techniques for digital filter and power spectral estimation. Topics include digital filter design, discrete random signals, finite-word length effects, nonparametric and parametric power spectrum estimation, multirate digital signal processing, least square methods of digital filter design, and digital filter applications.

EE 211 Adaptive Signal Processing 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 215. Provides an in-depth understanding of adaptive signal processing techniques. Covers Wold decomposition; Yule-Walker equations; spectrum estimation; Weiner filters; linear prediction; Kalman filtering; time-varying system tracking; nonlinear adaptive filtering; and performance analysis of adaptive algorithms and their variations including stochastic gradient, least mean square, least squares, and recursive least squares.

EE 212 Quantum Electron Transport 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 208 or MSE 227B; graduate standing; or consent of instructor. Covers the theory and methods used to model quantum electron transport in ultrascaled traditional semiconductor devices such as transistors, nanoscaled research semiconductor devices (such as quantum dots), and novel electronic material systems (such as carbon nanotubes and molecular wires.) May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with MSE 212.
EE 213 Computer-Aided Electronic Circuit Simulation 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): EE 303A, EE 303B, EE 133; graduate standing. Introduction to numerical algorithms and computer-aided techniques for the simulation of electronic circuits. Covers theoretical and practical aspects of important analyses; circuit formulation methods; large-signal nonlinear direct current, small-signal alternating current, and moment-matching transient; sensitivity; and noise. Discusses recent advances in timing analysis, symbolic analysis, and radio frequency circuit analysis.

EE 214 Quantum Computing 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 201/MSE 207 or equivalent; graduate standing or consent of instructor. An introduction to quantum computing. Topics include qubits, entanglement, quantum gates, quantum circuit diagrams, simple quantum algorithms, quantum teleportation, quantum cryptography, Shor’s factorization algorithm, Grover’s search algorithm, and quantum error correction. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with PHYS 220.

EE 215 Stochastic Processes 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. A study of probability and stochastic processes. Topics include discrete and continuous random variables; probability densities; characteristic functions; convergence of random sequences; central limit theorem; autocorrelation functions and spectral densities; wide-sense and strict-sense stationarity; Markov chains and processes; and response of linear time-invariant systems to random signals.

EE 216 Nanoscale Phonon Engineering 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): EE 202/MSE 217. Studies acoustic and optical phonons that affect electrical, thermal, and optical properties of materials. Focuses on the confinement-induced changes of phonon properties in nanostructures and their implications for performance of electronic, thermoelectric, and optoelectronic devices. Explores photoacoustic, ultrasonic spectroscopy, and other phonon characterization techniques, thermal conductivity, and related measurements. Cross-listed with MSE 237B.

EE 217 Graphics Processing Unit Architecture and Parallel Programming 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 160 with a better or consent of instructor. Introduces the popular CUDA based parallel programming environments based on Nvidia GPUs. Covers the basic CUDA memory/threading models. Also covers the common data-parallel programming patterns needed to develop a high-performance parallel computing applications. Examines computational thinking; a broader range of parallel execution models; and parallel programming principles. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CS 217.

EE 218 Power System Steady State and Market Analysis 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): EE 155; EE 132; ENGR 160 or EE 231. EE 218 online section; enrollment in the Online Master-in-Science in Engineering program. Introduces power system steady state and market analysis. Topics include system security criteria and security assessment; state estimation; automatic generation control; contingency screening and security constrained optimal power flow; the electricity market structure; security constrained economic dispatch and unit commitment; financial transmission rights; forward markets; and market power. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

EE 219 Advanced Complementary Metal Oxide Semiconductor (CMOS) Technology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 203/MSE 237C. Introduces advanced complementary metal oxide semiconductor (CMOS) technology. Topics include MOS field effect transistor (MOSFET) scaling; short and narrow channel effects; high field effects; vertical MOSFET transistors; single electron transistors; MOSFET nonvolatile memory devices; and small- and large-signal MOSFET models. Covers CMOS process integration. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

EE 220A Quantum Magnetism 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; consent of instructor. Introduces fundamental physical properties of magnetism and quantum behavior of magnetic materials for the understanding of modern magnetic devices. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with MSE 237A.

EE 220B Advanced Spintronics and Nanomagnetic Devices 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 220A; graduate standing; consent of instructor. Explores recent developments in spintronics, magnetism, and magnetic materials. Introduces magnetic devices widely used in real applications and a variety of emerging device concepts under active research. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

EE 221 Radio-Frequency Integrated Circuit Design 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 100B; senior or graduate standing. Covers the essentials of contemporary radio frequency (RF) complementary metal oxide semiconductor (CMOS) integrated circuit (IC) analysis and design. Addresses typical RF building blocks in CMOS and bipolar/CMOS (BiCMOS) technologies, including passive IC components, transistors, distributed networks, voltage reference and biasing circuits, power amplifiers, and feedback networks. Also covers RF device modeling, bandwidth estimation, and stability analysis techniques.

EE 222 Advanced Radio-Frequency Integrated Circuit Design 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 100B; senior or graduate standing. Covers analysis techniques for nonlinear effects and noise in RF integrated circuit design. Addresses nonlinear, and distortion behavior, including inter-modulation, cross-modulation, harmonics, gain compression, and desensitization. Also explores noise effects, including thermal, shot, flicker, and burst noises. Includes single-stage and multiple-stage networks.

EE 223 Numerical Analysis of Electromagnetic Devices 4 Lecture, 4 hours. Prerequisite(s): EE 117, MATH 151C. Covers in depth the numerical and mathematical foundations of the contemporary computer modeling techniques used in the design and analysis of electromagnetic devices and systems. Provides hands-on experience in modeling systems such as radio frequency devices, magnetic systems, and electromagnetic motors.

EE 224 Digital Communication Theory and Systems 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 115; graduate standing; consent of instructor. Provides overview of basic communication techniques and introduction to optimum signal detection and correction. Topics include sampling and bandwidth; pulse code modulation; line coding and pulse shaping; delta modulation; stochastic approach to bandwidth and noise corruption; white Gaussian noise; matched filter; optimum signal detection; Shannon theorems; and error correction. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

EE 225 Error-Correcting Codes 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 215 or consent of instructor. Provides an overview of basic error-correcting techniques used in data transmission and storage. Topics include groups and Galois fields, error-correction capability and code design of Hamming codes, cyclic codes, Bose-Chaudhuri-Hocquenghem (BCH) codes, and Reed-Solomon codes. Also considers concatenated design and decoding techniques.

EE 226 Wireless Communications 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 215; graduate standing; consent of instructor. Presents fundamental cellular concepts and new techniques in wireless communications. Topics include cellular systems and standards, frequency reuse, system capacity, channel allocation, cellular radio propagation, fading channel modeling and equalization, spread spectrum communications and other multiple access techniques, and wireless networking.
EE 227 Introduction to Reinforcement Learning 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 215 or EE 244 or CS 224 or EE 228 or EE 251B or CS 252B; graduate standing; or consent of instructor. This course introduces key ideas and algorithms of reinforcement learning (RL). Key topics covered include finite Markov Decision Process (MDP), dynamic programming, Monte Carlo methods, temporal-difference learning, policy gradient methods, safety-constrained RL, batch-constrained RL, multi-agent RL, multi-armed bandits, and imitation learning. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CS 258.

EE 228 Introduction to Deep Learning 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 224 or EE 231 or EE 236 or EE 244 or CS 171 or EE 142; graduate standing; or consent of instructor. Explores fundamentals of deep neural networks and their applications in various machine learning tasks. Includes the fundamentals of perception, approximation, neural network architectures, loss functions, and generalization. Addresses optimization methods including backpropagation, automatic differentiation, and regularization. Covers non-standard problems including auto-encoders and probabilistic models. Presents applications in machine learning/computer vision. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CS 228.

EE 229 Video Processing and Communication 4 Lecture, 3 hours; laboratory, 1 hour; extra reading, 2 hours. Prerequisite(s): EE 150, EE 210. Covers the fundamental principles and technologies in the compression and transmission of coded video streams over wired and wireless networks, including wireless network protocols, compression standards, digital signal processor architectures, network traffic management, quality of service, rate control schemes, and error resilience.

EE 230 Mathematical Methods For Electrical Engineers 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Covers fundamental theoretical concepts and computational tools for Electrical Engineering graduate students. Presents material relevant to electrical engineering applications. Topics include vector spaces; partitioned, unitary, and positive definite matrices; differential calculus with matrices; matrix decompositions; linear system solution; convex optimization; the Lagrangian method; KKT conditions; and nonlinear optimization methods. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

EE 231 Convex Optimization in Engineering Applications 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): EE 230, may be taken concurrently; graduate standing; or consent of instructor. Covers recognizing and solving convex optimization problems in engineering applications. Explores convex sets, functions, and optimization problems. Includes basics of convex analysis, least-squares, linear and quadratic programs, semidefinite programming, minimax, and other problems. Addresses optimality conditions, duality theory, theorems of alternative and applications, interior-point methods, and applications in engineering.

EE 232 Introduction to Smart Grid 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): EE 227. Section; enrollment in the Online Master-in-Science in Engineering program. An introduction to smart power grid. Covers the basics of power systems; definition and applications of smart grid; demand response and demand side management; renewable power generation and integration; smart grid communications; wide area measurement; smart grid cyber security and privacy; and economics and market issues. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

EE 233 Optimal Control and Estimation 4 Lecture, 4 hours; term paper, 1 hour. Prerequisite(s): ME 120, ME 121 or equivalent; or consent of instructor. Introduces optimal control and estimation with specific focus on discrete time linear systems. Topics include analysis of discrete Riccati equations; asymptotic properties of optimal controllers; optimal tracking; an introduction to Receding Horizon control; derivation of the Kalman filter; Extended Kalman Filter; and Unscented Kalman filter. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with ME 220.

EE 234 Smart Grid Sensors and Data Driven Applications 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. For EE 234 online section; enrollment in the Online Master-of-Science in Engineering program; graduate standing. Covers state-of-the-art and emerging sensor technologies; data-driven and intelligent methods for using sensor data in innovative smart grid applications; instrumentation; time-synchronization; phasor measurements; waveform measurements; smart meters; building sensors; probing; imaging; off-domain data; metadata; and data-driven techniques for applications such as asset monitoring, situational awareness, disaggregation, and power quality assessment. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with ME 220.

EE 235 Linear System Theory 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 132. Provides a review of linear algebra. Topics include the mathematical description of linear systems; the solution of state-space equations; controllability and observability; canonical and minimal realization; and state feedback, pole placement, observer design, and compensator design. Cross-listed with ME 235.

EE 236 State and Parameter Estimation Theory 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 215 with a grade of C or better; graduate standing. Covers Fisher information, Cramer-Rao lower bound, efficiency, and sufficient statistics. Addresses minimum variance unbiased, best linear unbiased, maximum likelihood, least squares, maximum a posteriori, and mean-squared estimation. Also covers Weiner and Kalman filtering as well as applications in navigation, signal processing, machine learning, and dynamical systems. Cross-listed with ME 236.

EE 237 Nonlinear Systems and Control 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 235/ME 235. Explores nonlinear systems and control. Topics include non-linear differential equations, second order nonlinear systems, equilibrium and phase portrait, limit cycle, harmonic analysis and describing function, Lyapunov stability theory, absolute stability, Popov and circle criterion, input-output stability, small gain theorem, averaging methods, and feedback linearization. Cross-listed with ME 237.

EE 238 Linear Multivariable Control 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 235/ME 235. Investigates multivariable feedback systems, stability, performance, uncertainty, and robustness. Topics include analysis and synthesis via matrix factorization; Q-parameterization and all stabilizing controllers; frequency domain methods; and H(infinity) design and structured singular value analysis. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with ME 238.

EE 239 Optimal Control 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 215, EE 235/ME 235. Presents the theory of stochastic optimal control systems and methods for their design and analysis. Covers principles of optimization; Lagrange’s equation; linear-quadratic-Gaussian control; certainty-equivalence; the minimum principle; the Hamilton-Jacobi-Bellman equation; and the algebraic Ricatti equation. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with ME 239.

EE 240 Pattern Recognition 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): EE 141; or consent of instructor. For the EE 240 online section; enrollment in the Online Master-in-Science in Engineering program; graduate standing. Covers basics of pattern recognition techniques. Topics include hypothesis testing, parametric classifiers, parameter estimation, nonparametric density estimation, nonparametric classifiers, feature selection, discriminant analysis, and clustering. Credit is awarded for one of the following EE 240 or CS 229.

EE 241 Advanced Digital Image Processing 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): EE 152 or consent of instructor. Covers advanced topics in digital image processing. Examines image sampling and quantization, image transforms, stochastic image models, image filtering and restoration, and image data compression.
EE 243 Advanced Computer Vision Lecture, 3 hours; research, 3 hours. Prerequisite(s): EE 146 or EE 152 or EE 142 or CS 171 or CS 224 or EE 228 or CS 228 or EE 241 or EE 244; graduate standing or consent of instructor. For the EE 243 online section: enrollment in the Online Master-of-Science in Engineering program; graduate standing; or consent of instructor. Study of advanced computer vision including classical- and learning-based approaches. Topics include feature extraction, segmentation, motion analysis and tracking, object and activity recognition, projective geometry, modeling and calibrating cameras, and three-dimensional reconstruction. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

EE 244 Computational Learning Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores fundamental computational learning techniques. Topics include elements of learning systems, inductive learning, analytic learning, case-based learning genetic learning, connectionist learning, reinforcement learning and integrated learning techniques, and comparison of learning paradigms and applications.

EE 245 Robot Sensing and Navigation Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 236 or ME 236; ME 120; or equivalent; graduate standing; or consent of instructor. Topics include robot navigation; description of robot sensors and their characteristics; sensor data processing; feature extraction; and matching. Also covers representations of space for mapping; map-based localization; simultaneous localization and mapping; and image-based motion estimation. Cross-listed with ME 222.

EE 246 Intelligent Transportation Systems Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor; EE 115 and EE 132 are recommended. For the EE 246 online section: enrollment in the Online Master of Science in Engineering program; graduate standing. Focuses on the control, communications, and computer-aspects of intelligent transportation systems. Topics include traffic flow theory fundamentals, intelligent transportation system user services, travel and traffic management, advanced vehicle safety systems, intelligent transportation system applications, architectures, standards, strategic needs assessment and deployment, and evaluation.

EE 247 Current Topics in Computer Vision and Pattern Recognition Lecture, 3 hours; research, 3 hours. Prerequisite(s): EE 243; graduate standing; or consent of instructor. Study of current topics in computer vision focused on machine learning in computer vision. Topics include machine learning approaches for image classification, segmentation, object detection, recognition, depth estimation, multi-modal analysis, and multi-sensor analysis. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

EE 248 Optimization For Machine Learning Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 229 or EE 231 or EE 244; graduate standing or consent of instructor. Explores efficient optimization algorithms for machine learning. Emphasizes fundamental principles, provable guarantees, and contemporary results. Includes fundamentals of optimization (first-order methods, stochastic algorithms, accelerated schemes, non-convex optimization, regularization, and black-box optimization). Also covers connections to statistical learning (empirical risk minimization, finite-sample guarantees, and high-dimensional problems). May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CS 248.

EE 249 Power System Dynamics Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): EE 218 or EE 232; EE 153 or EE 155. Introduces dynamic phenomena in power systems following disturbances. Topics include synchronous machines, voltage stability, power system reliability criteria, synchronous machine modeling, power system stability criterion under classical models, and time-domain simulation. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

EE 250 Information Theory Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): EE 215. An overview of fundamental limitations imposed on communication systems. Topics include Shannon’s information measures, weak and strong typicality, lossless data compression, source and channel models and Shannon’s coding theorems, channel capacity and the rate-distortion function, Gaussian sources and channels, and limits of communication between multiple terminals.

EE 251A Data Analytics and Exploration Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 141, CS 100; STAT 155 or EE 114 or equivalent; graduate standing; or consent of instructor. Covers important algorithms relevant to the lifetime of data from data collection and cleaning to integration, data mining, and analytics. Topics include: sketch algorithms for computing statistics on data streams; mining social graphs including community detection and graph partitioning; Data Science life cycle: techniques on data cleaning, data integration, Exploratory Data Analysis, and visualization. Cross-listed with CS 252A.

EE 251B Fundamentals of Data Science Lecture, 3 hours; research, 3 hours. Prerequisite(s): MATH 010A, MATH 031 or EE 020B; CS 100; STAT 155 or EE 114; graduate standing; or consent of instructor. Explores theoretical tools in data science and their applications in data science. Introduces and motivates statistical and computational viewpoints on data analysis. Topics include the manipulation of data as vectors, drawing inferences from data as distributions, and quantifying data uncertainty for data analysis. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CS 252B.

EE 252 Data Center Architecture Lecture, 3 hours; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): CS 161 or consent of instructor. Introduces recent trends and challenges of warehouse-scale computing and data center systems. Topics include virtualization, resource management, data market, power management, sustainable computing, and demand response.

EE 253 Electric Power Distribution Systems Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): EE 155, graduate standing; or consent of instructor. Covers fundamentals of the operation and planning of electric power distribution systems. Topics include electric load modeling, overhead and underground lines, three-phase transformers, voltage regulation, three-phase unbalanced power flow, three-phase optimal power flow, and system protection. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

EE 254 Fundamentals of Lithographic Process Development Lecture, 1 hour; laboratory, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A detailed and practical discussion of lithographic process development. Topics include photolithography, mask design, extreme ultraviolet lithography, electron beam lithography, focused ion beam lithography, nanoimprint lithography, and patterning via directed self-assembly. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

EE 255 Real-Time Embedded Systems Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 120B or EE 120B; graduate standing. Covers fundamentals and principles of real-time embedded systems. Topics include uniprocessor and multiprocessor real-time scheduling, real-time operating systems, synchronization, resource reservation, memory management, and power management. Introduces mathematical techniques for real-time system analysis. Offers hands-on experience with designing, implementing, and evaluating real-time systems on embedded platforms. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CS 251.

EE 256 Superconductive Quantum Electronics Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 201 or MSE 207; or equivalent; graduate standing; or consent of instructor. Studies superconductivity and superconductive electronic devices. Introduces the electrodynamics of superconducting materials, as well as unconventional superconductivity and Josephson junctions. Explores applications of superconducting quantum interference devices, superconducting digital logic, quantum bits, and high frequency THz electronics. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.
EE 257 Global Navigation Satellite System Signal Processing and Receiver Design 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 215 or consent of instructor. Develops a comprehensive understanding of Global Navigation Satellite System (GNSS) signal structure, GNSS communication channel, received power, radio frequency (RF) front-end receiver design, sampling, correlation, acquisition techniques, tracking loop theory, noise and bandwidth concepts, generation of GNSS observables, and software-defined radio (SDR) implementation. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

EE 258 Modeling and Synthesis of Cyber-Physical Systems 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing. Introduces trends and challenges of modern cyber-physical systems. Reviews state-of-the-art design approaches and tools in both academia and industry. Introduces fundamental concepts in functional modeling, real-time embedded architecture, design synthesis and validation. Introduces emerging design principles and their applications in automotive, avionics, smart buildings, and consumer electronics. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CS 256.

EE 259 Colloquium in Electrical Engineering 1 Colloquium, 1 hour. Prerequisite(s): graduate standing. Lectures on current research topics in electrical engineering relating to professional development presented by faculty members and visiting scientists. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

EE 260 Seminar in Electrical Engineering 1 to 4 Seminar, 1 to 4 hours. Prerequisite(s): consent of instructor. Seminar on current research topics in electrical engineering, including areas such as signal processing, image processing, control, robotics, intelligent systems, computer vision, and pattern recognition. Course is repeatable to a maximum of 16 units.

EE 266 Advanced Topics in Connected and Automated Transportation Systems 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): recommend EE 115, EE 132, and EE 246; graduate standing or consent of instructor. For the CS 266 online sections; enrollment in the Online Master-in-Science in Engineering program; graduate standing. Focuses on the emerging topics in connected and automated transportation systems (CATS). Topics include powertrain control; vehicle dynamics; cooperative automated driving in mixed traffic; personalized human-behavior modeling; vehicle-infrastructure collaborative perception and management; advanced Analysis/Modeling/Simulation platform; and cyber-security. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

EE 270 Introduction to Video Bioinformatics 3 Lecture, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to video bioinformatics. Includes microscopic techniques, live imaging, video computing, structure and function of cells, spatiotemporal dynamics, multi-scale analysis, disk and data storage, indexing and queries, image and video databases, and medical image and analysis techniques. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with GEN 270.

EE 272 Introduction to Imaging Bioinstrumentation and Analysis 2 Lecture, 1 hour; laboratory, 3 hours; extra reading, 2 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to the instrumentation used to collect video images of cells and the methods used to analyze video data. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with GEN 272.

EE 273 Live Imaging and Analysis of Cellular and Molecular Behaviors 2 Lecture, 1 hour; laboratory, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to video imaging methodologies used to capture the cellular and molecular dynamics and interactions in living cells. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with GEN 273.

EE 274 Introduction to Medical Imaging and Analysis 2 Lecture, 1 hour; laboratory, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to medical imaging. Includes associated computational techniques for x-ray imaging, computed tomography, magnetic resonance imaging, positron emission tomography, ultrasound, radiotherapy, and molecular imaging. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with GEN 274.

EE 275 Project in Video Bioinformatics 2 Lecture, 1 hour; laboratory, 4 hours. Prerequisite(s): graduate standing; consent of instructor. Explores video bioinformatics research techniques. Emphasizes critical thinking and advanced planning and understanding of hypothesis, computational approaches, and experimental tradeoffs. Includes an interdisciplinary video bioinformatics research project. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

EE 276 Colloquium in Video Bioinformatics 1 Colloquium, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Covers current research topics in video bioinformatics. Includes presentations by faculty members and visiting researchers. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

EE 277 Data Centric Computer Architecture 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 161; graduate standing; or consent of instructor. Addresses the rapid growth of dataset size and the introduction of hardware accelerators, resulting in the data movement overhead becoming the major performance bottleneck. Includes system interconnects, I/O stacks, emerging nonvolatile memory technologies, near-data processing, and data flow architectures. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CS 277.

EE 279 Capstone Project in Data Science 4 Lecture, 1 hour; research, 6 hours; extra reading, 3 hours. Prerequisite(s): CS 252A or EE 251A; CS 252B or EE 251B; graduate standing; or consent of instructor. Covers technical, analytic, and interpretive skills to design and execute a large-scale data science capstone project focusing on real-world applications. Provides an opportunity to integrate all of the core skills and concepts learned throughout the program. Prepares for long-term professional success in the field. Cross-listed with CS 279.

EE 281A Digital Communications 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; or consent of instructor. Topics include modulation, probability and random variables, correlation and power spectra, information theory, errors of transmission, equalization and coding methods, shift and phase keying, and a comparison of digital communication systems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following EE 281A or EE 150.

EE 281B Image Processing 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Covers digital image acquisition, image enhancement and restoration, image compression, and computer implementation and testing of image processing techniques. Provides hands-on experience of complete image processing systems, including image acquisition, processing, and display. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following EE 281B or EE 152.

EE 282A Introduction to Very Large Scale Integration Design 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Studies integrated circuit fabrication, device characterization, and circuit simulation. Introduces basic device physics and physical design rules, MOS logic design, and timing and clock schemes. Covers layout generation, subsystem designs, and circuits for alternative logic styles. Also covers design and simulation using hardware description language and CAD tools. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following EE 282A, CS 168, or EE 168.
EE 282B Radio Frequency Circuit Design 4
Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Studies design and analysis of radio frequency (RF) circuits. Topics include multi-port networks; scattering matrix and S-parameters; transmission lines; matching networks; Smith Chart; RF electromagnetic analysis of waveguides, antennas, filters, and couplers; RF transistor equivalent modeling; low-noise amplifier design; noise figure; oscillators and mixers; and phase lock loop. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following EE 282B or EE 118.

EE 282C Analog Integrated Circuit Layout and Design 4
Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Covers analog circuit design, layout, and verification of complementary metal oxide semiconductors (CMOSs) with use of computer-aided design tools. Topics covered include analog metal oxide semiconductor field effect transistor (MOSFET) models, current sources, references, amplification design, non-linear analog circuits, dynamic analog circuits, analog-to-digital converters (ADCs), and digital-to-analog converters (DACs). May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following EE 282C or EE 135.

EE 282D Design For Reliability of Integrated Circuits and Systems 4
Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Covers essentials of electrical transient induced failures to integrated circuits (IC) and systems. Addresses basics for different failure and testing models including electrostatic discharge (ESD). Discusses design-for-reliability (DFR) techniques such as ESD protection designs at IC, module, and system levels. Enhances learning with computer aided design (CAD) laboratories. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following EE 282D or EE 165.

EE 283A Foundations of Robotics 4
Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Provides foundational knowledge on analysis, control, and programming of robots. Considers configuration space, rigid body motion, forward, inverse and velocity kinematics, dynamics, trajectory planning, robot motion control, localization and mapping, and robot ethics. Integrates hands-on labs to program robots in simulation and experimentally by reading and interpreting sensor data. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following EE 283A, EE 144, or ME 144.

EE 283B Introduction to Digital Control 4
Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Reviews continuous-time control systems, Z-transform and properties, sampled-data systems, stability analysis and criteria, and frequency domain analysis and design. Addresses transient and steady-state response, state-space techniques, controllability and observability, pole placement, observer design, and Lyapunov stability analysis. Laboratory experiments complementary to these topics include simulations and hardware design. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following EE 283B or EE 151.

EE 284A Intro to Engineering Optimization Techniques 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; or consent of instructor. Introduction to formulating and solving optimization problems in engineering. Includes single-variable and multi-variable optimization; linear programming-simplex method; nonlinear unconstrained optimization-gradient, steepest descent, and Newton methods; and nonlinear constrained optimization-gradient projection methods. Addresses applications of optimization in engineering design problems. Solves various engineering optimization examples using MATLAB. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following EE 284A or ENGR 160.

EE 284B Computer Vision 4
Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Covers imaging formation, early vision processing, boundary detection, region growing, two-dimensional and three-dimensional object representation, and recognition techniques. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following EE 284B or EE 146.

EE 285A Semiconductor Device Processing 4
Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Presents device simulations and hands-on experience in integrated-circuit fabrication techniques and device characterization. Uses four-mask metal-oxide semiconductor (MOS) technology to fabricate resistors, junctions, capacitors, and MOS transistors as well as to perform electrical evaluation. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following EE 285A or EE 136.

EE 285B Introduction to Semiconductor Optoelectronic Devices 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; or consent of instructor. An introduction to semiconductor optoelectronic devices for optoelectronic communications and signal processing. Topics include basic optical processes in semiconductors, semiconductor light-emitting diode, semiconductor hetero-junction lasers, photodetectors, solar cells, optoelectronic modulation, and switching devices. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following EE 285B or EE 137.

EE 285C Electrical Properties of Materials 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; or consent of instructor. Introduces the electrical properties of materials. Includes the electron as a particle and a wave; hydrogen atom and the periodic table; chemical bonds; free-electron theory of metals; band theory of solids; semiconductors and dielectrics; measurements of material properties; and growth and preparation of semiconductors. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following EE 285C or EE 138.

EE 285D Magnetic Materials 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; or consent of instructor. Introduces fundamentals of magnetic materials for the next-generation magnetic, nanomagnetic, and spintronics-related technologies. Includes basics of magnetism, models of the equivalent magnetic charge and current, paramagnetic and diamagnetic materials, soft and hard magnetic materials, equivalent magnetic circuits, and magnetic system design foundations. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following EE 285D or EE 139.

EE 285E Introduction to Nanoelectronics 4
Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Presents the basic concepts of nanoelectronics focusing on current flow through nanostructured devices. Topics include new paradigms of nanoelectronics, an atomistic view of electrical resistance, Schroedinger’s equation, Coulomb blockade, basis functions, bandstructure, quantum capacitance, level broadening, and coherent transport. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following EE 285E or EE 162.

EE 286A Power System Analysis 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; or consent of instructor. Covers long-distance transmission of electric power. Emphasizes admittance and impedance modeling of components and systems; optimal power flow calculations and applications; symmetrical and asymmetrical fault calculations; economic operation of large-scale generation and transmission systems; and analysis of transmission and distribution networks. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following EE 286A or EE 155.
EE 286B Electric Drives 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): graduate standing; consent of instructor. Topics include the study of electro-mechanical energy conversion, magnetic circuits, and magnetic components. Also explores linear motors, direct-current motors, induction motors, reluctance motors, and synchronous motor drives.

EE 286C Power Electronics 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): graduate standing; consent of instructor. Covers the study of power semiconductor devices. Includes magnetic circuits and components; switch mode converters and power supplies; and single, three-phase, pulse width modulation, and resonant pulse inverters. Addresses voltage controllers; direct current and induction motor drives; and design of motion control drive circuits for robotic and industrial automation systems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following EE 286C or EE 123.

EE 290 Directed Studies 1 to 6 Individual Study, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor and Graduate Advisor. Individual study, directed by a faculty member, of selected topics in electrical engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

EE 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor. Research conducted under the supervision of a faculty member on selected problems in electrical engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

EE 298 Individual Internship in Electrical Engineering 1 to 12 Internship, 2 to 24 hours; written work, 1 to 12 hours. Prerequisite(s): graduate standing; consent of instructor. Provides the Electrical Engineering graduate student with career experience as an electrical engineer in an industry or a research unit. Includes fieldwork with an approved professional individual or organization and academic work under the direction of a faculty member. Requires a final report. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

EE 299 Research For the Thesis Or Dissertation 1 to 12 Research, 3 to 36 hours. Prerequisite(s): graduate standing; consent of instructor. Research in electrical engineering for the M.S. thesis or Ph.D. dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ENGR 060 Engineering Economics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 009A. Covers economic decisions involving engineering alternatives. Topics include time value of money, annual cost, present worth, rate of return, and benefit-to-cost. Addresses before and after tax replacement economy, organizational financing, break-even analysis, risk analysis, and capital budgeting. Cross-listed with ECON 060.

ENGR 092 First-Year Seminar in Engineering 1 Seminar, 10 to 15 hours per quarter. Prerequisite(s): freshman standing; sophomores may enroll on a space-available basis with consent of instructor. Introduction to one of the many areas of study explored by the faculty of the College of Engineering in a small-group, highly interactive format. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as topics change to a maximum of 3 units of any combination of ENGR 092, HASS 092, and NASC 092; students may enroll in only 1 unit of ENGR 092, HASS 092, or NASC 092 per quarter.

ENGR 096 Environment and Society 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): lower-division standing or consent of instructor. Presents major environmental issues facing society from an interdisciplinary perspective. Topics may include water, energy, climate change, and urbanization. Cross-listed with NASC 096, and HASS 096.

Upper-Division Courses

ENGR 101 (E-Z) Professional Development 1 Activity, 30 hours per quarter. Prerequisite(s): restricted to class level standing of sophomore; restricted to major(s) Bioengineering, Bioengineering BS + MS, Chemical Engineering, Chemical Engineering BS + MS, Computer Engineering, Computer Science, Computer Science BS + MS, Electrical Engineering, Electrical Engineering BS + MS, Environmental Engineering, Environmental Engr BS + MS, Materials Science and Engineer, Mechanical Engineering, Mechanical Engineering BS + MS. Provides sophomores with involvement in professional development activities. Activities to be performed are program-specific, and may include projects, industry overviews and interactions, involvement with professional societies and clubs, team building, career guidance, and coverage of ethics and lifelong learning issues. E. Bioengineering; F. Chemical Engineering; G. Computer Engineering; I. Computer Science; J. Electrical Engineering; K. Environmental Engineering; M. Computer Science With Business Applications; N. Mechanical Engineering.

ENGR 102 (E-Z) Professional Development and Mentoring 1 Activity, 30 hours per quarter. Prerequisite(s): restricted to class level standing of sophomore; restricted to major(s) Bioengineering, Bioengineering BS + MS, Chemical Engineering, Chemical Engineering BS + MS, Computer Engineering, Computer Science, Computer Science BS + MS, Electrical Engineering, Electrical Engineering BS + MS, Environmental Engineering, Environmental Engr BS + MS, Materials Science and Engineer, Mechanical Engineering, Mechanical Engineering BS + MS. Provides sophomores with involvement in professional development activities. Activities to be performed are program-specific, and may include projects, industry overviews and interactions, involvement with professional societies and clubs, team building, career guidance, and coverage of ethics and lifelong learning issues. E. Bioengineering; F. Chemical Engineering; G. Computer Engineering; I. Computer Science; J. Electrical Engineering; K. Environmental Engineering; M. Computer Science With Business Applications; N. Mechanical Engineering.

ENGR 108 Technology in the Premodern World 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): restricted to class level standing of junior; or senior; or consent of instructor. Survey of technological developments in ancient and early-modern Japan, China, India, the Middle East, Africa, Central and South America, and Europe. Focuses on key mechanical and civil technologies and the role of the state in their development. Cross-listed with HIST 108.

Subject abbreviation: ENGR
The Marlan and Rosemary Bourns College of Engineering

Advising Office, 310 Sky Hall
(951) 827-ENGR (3647);
student-engr.ucr.edu

Courses in Engineering are a multidisciplinary approach to providing students with training in concepts common to multiple engineering fields. The courses support the undergraduate programs in all disciplines in the Marlan and Rosemary Bourns College of Engineering. Refer to these programs in this section of the catalog for information on course application.

Lower-Division Courses

ENGR 001 (E-Z) Professional Development and Mentoring 1 Activity, 30 hours per quarter. Provides freshmen with involvement in professional development activities. Activities to be performed are program-specific, and may include projects, industry overviews and interactions, involvement with professional societies and clubs, team building, career guidance, and coverage of ethics and lifelong learning issues. E. Bioengineering; F. Chemical Engineering; G. Computer Engineering; I. Computer Science; J. Electrical Engineering; K. Environmental Engineering; M. Computer Science With Business Applications; N. Mechanical Engineering.

ENGR 002 (E-Z) Professional Development and Mentoring 1 Activity, 30 hours per quarter. Prerequisite(s): restricted to class level standing of senior; or consent of instructor. May include projects, industry overviews and interactions, involvement with professional societies and clubs, team building, career guidance, and coverage of ethics and lifelong learning issues. E. Bioengineering; F. Chemical Engineering; G. Computer Engineering; I. Computer Science; J. Electrical Engineering; K. Environmental Engineering; M. Information Systems.

ENGR 010 Introduction to Engineering 2 Discussion, 1 hour; laboratory, 3 hours. Prerequisite(s): none. Introduction to and experience with common everyday engineering and technology devices. Aims to enrich students’ appreciation of technology and the application of simple science and engineering concepts in the design and operation of these devices, and to provide students with an early positive engineering experience and interaction with College of Engineering faculty. Graded Satisfactory (S) or No Credit (NC).
ENGR 109 Technology in Modern Europe and America, 1700–Present 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the emergence of modern Europe through the first and second industrial revolutions in Europe and America. Explores the development of device commodities as the typical form of consumer technology in the nineteenth and twentieth centuries, as well as addresses philosophical issues in understanding technology. Cross-listed with HST 109.

ENGR 118 Engineering Modeling and Analysis 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CHEM 001A or CHEM 010A; CS 010A; MATH 046; PHYS 040B or PHYS 040HB. Covers the formulation of mathematical models for engineering systems. Includes applying mass, momentum, and energy balances to derive governing differential equations; solving equations with the use of spreadsheets and other software packages; and fitting linear and nonlinear models to experimental data. Credit is awarded for one of the following ENGR 118 or ME 118.

ENGR 160 Introduction to Engineering Optimization Techniques 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 010A; CS 010A or EE 020B or ME 018A, ME 018B; for the ENGR 160 online section; enrollment in the Master-in-Science in Engineering program. Introduction to formulating and solving optimization problems in engineering. Includes single-variable and multi-variable optimization; linear programming - simplex method; nonlinear unconstrained optimization; gradient, steepest descent, and Newton methods; and nonlinear constrained optimization - gradient projection methods. Addresses applications of optimization in engineering design problems. Solves various engineering optimization examples using MATLAB. Credit is awarded for one of the following ENGR 160 or EE 284A.

ENGR 170 Technology, Policy, and Ethics 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): upper-division standing. Provides contemporary perspectives on interplays between technology, public policy, and ethics. Covers social, legal, and ethical issues such as liability, as well as environmental, political, and copyright law. Cross-listed with PBPL 170.

ENGR 171 Globalization 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): junior standing. Covers technological drivers of globalization. Includes social, economic, and political consequences. Explores the cultural aspects of globalization, including barriers and drivers for economic and cultural interdependency and integration, as well as virtual global organizations. Cross-listed with PBPL 171.

ENGR 180W Technical Communications 4 Lecture, 3 hours; workshop, 3 hours. Prerequisite(s): ENGL 001B with a grade of C or better, ENGL 007, may be taken concurrently; for concurrent enrollment in ENGL 007, review the course titles or topics in the current online Schedule of Classes to find the corresponding ENGL 007 writing workshop; restricted to class level standing of junior, or senior. Develops oral, written, and graphical communication skills. Includes preparing and critiquing reports, proposals, instructions, and business correspondence. Emphasizes professional and ethical responsibilities and the need to stay current on technology and its global impact on economics, society, and the environment. Fulfills the third-quarter writing requirement for students who earn a grade of "C" or better for courses that the Academic Senate designates, and that the student’s college permits, as alternatives to English 001C.

ENGR 181W Technical Communications and Documentaion 4 Lecture, 3 hours; workshop, 3 hours. Prerequisite(s): ENGL 001B with a grade of C or better, ENGL 007, may be taken concurrently; for concurrent enrollment in ENGL 007, review the course titles or topics in the current online Schedule of Classes to find the corresponding ENGL 007 writing workshop; restricted to class level standing of senior. Develops technical communication and documentation skills. Includes writing and critiquing design documentation and technical reports. Uses the capstone design project in an engineering discipline as a case study. Considers professional and ethical responsibilities, as well as contemporary issues in engineering and global impact on economics, society, and the environment. Fulfills the third-quarter writing requirement for students who earn a grade of "C" or better for courses that the Academic Senate designates, and that the student’s college permits, as alternatives to English 001C.

ENGR 190 Special Studies 1 to 5 Individual Study, 3 to 15 hours. Prerequisite(s): upper-division standing or consent of instructor. To be taken with the consent of the chair of the appropriate Engineering program as a means of meeting special curricular problems. Units in this course may not be used to meet requirements for the major unless so designated as a replacement for a requirement not being offered during the student’s remaining tenure. Course is repeatable to a maximum of 9 units.

ENGR 191S Seminar in Sacramento 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor; admission to the UCR Center at Sacramento Program. Examines aspects of the Sacramento area, including cultural, political, and governmental institutions and the sciences, arts, and media. Requires a substantial research paper or project, the result of guided independent work drawing on the unique aspects of Sacramento. Required of participants in the UCR Center at Sacramento Program. Cross-listed with HASS 191S, and NASC 191S.

ENGR 198I Individual Internship 1 to 12 Internship, 3 to 36 hours. Prerequisite(s): upper-division standing or consent of instructor; consent of off-campus supervisors and appropriate Engineering program chair. Designed to provide experience as a practicing engineer in a governmental, industrial, or research unit. Jointly supervised by an off-campus sponsor and an Engineering faculty member. Requires a written final report. Units may not be used to satisfy major requirements.

Graduate Program
The Bourns College of Engineering (BCOE) offers an online Master of Science (M.S.) degree in Engineering.

Online M.S. Graduate Program Assistant
(951) 827-5196, MSE 313
Kambiz Vafai, Ph.D., Program Director

Online M.S. Committee
Evangelos Christidis, Ph.D. (Computer Science)
Thomas Fryer Ph.D. (Online Engineering)
Heejung Jung, Ph.D. (Mechanical Engineering)
Bahram Mobasher, Ph.D. (Physics and Astronomy)
Hamed Mohsenian-Rad, Ph.D. (Electrical and Computer Engineering)
Cengiz Ozkan, Ph.D. (Mechanical Engineering)
Victor Rodgers, Ph.D. (Bioengineering)
Bryan Wong, Ph.D. (Chemical and Environmental Engineering)

Online Master’s Degree
The online (M.S.) degree program is designed for working professional engineers who wish to advance their knowledge in a field and enhance their value in the workplace. Students in the program receive course materials including lectures, notes, assignments, and announcements over the internet. Exams are given by proctors at regional locations.

The BCOE online master’s program combines engineering and professional development classes. Another key component is a significant design experience, incorporating additional readings and knowledge of the courses taken.

Admission
The following criteria are considered during the admission process for the MSOL program:

1. A bachelor’s degree in engineering or related field from an accredited institution
2. Official transcripts
3. Grade Point Average (GPA)
4. Graduate Record Examination (GRE)/Fundamentals of Engineering (FE) scores*
5. TOEFL or IELTS scores (for international applicants)
6. Evidence of significant professional engineering experience
7. Professional certifications
8. Reference letters

*The GRE may be waived with an appeal made by a student with verified and substantial work experience (two years or more) in an Engineering company with a BS in Engineering or Natural Sciences (such as Physics, Mathematics or Chemistry) or if the student has passed the Fundamentals of Engineering (FE) exam.

*The GRE may be waived for incoming students with a GPA of 3.2 or higher.
Course Requirements
Students must complete 36 units (9 courses), six of which must be at the 200 level, including:

2. Four specialization courses in an engineering concentration area are listed for each specialization below. If necessary, students may substitute a total of one course from another specialization with approval of the MSOL director. Additionally, students may substitute a total of one core course with an additional specialization course, making it a total of five specialization courses with the approval of the MSOL Director.

3. Four units of ENGR 296V

MSOL Specializations

Bioengineering
This specialization emphasizes principles and application of bioengineering based on a solid fundamental foundation in biological science and engineering to equip students with diverse communications skills and training in the most quantitative bioengineering so that they can become leaders in their respective fields. Students can substitute a total of one course from the Environmental Engineering Systems or Mechanical Engineering specializations.

BIEN 201: Mathematical Methods for Bioengineering
BIEN 223: Engineering Analysis of Physiological Systems
BIEN 224: Cellular and Molecular Engineering
BIEN 249: Integration of Computational and Experimental Biology
BIEN 264: Biotransport Phenomena
BIEN 270: Transport with Reactions in Biological Systems

Chemical
Chemical engineering applies its unique skills to improve healthcare, energy availability, chemicals and materials, and public safety.

CEE 200: Advanced Engineering Computation
Develops problem-solving techniques for basic engineering systems including heat and mass transfer, coupled reactions, fluid flow potential, and control.

CEE 202: Transport Phenomena
Topics include transport phenomena, potential flow, and boundary layer theories with applications to simultaneous heat, momentum, and mass transfer. Introduces numerical techniques used to solve advanced transport phenomena problems.

CEE 204: Advanced Kinetics and Reaction Engineering
Emphasizes kinetics and mechanisms of heterogeneous reactions in different types of reactors. Specific topics include gas-solid noncatalytic reactions; catalytic surfaces and catalyst characterization; and adsorption, diffusion, reaction, and heat transfer in porous catalysts.

CEE 206: Advanced Chemical Engineering Thermodynamics
Application of the laws of thermodynamics to phase and chemical reaction equilibrium. Introduction to statistical thermodynamics, molecular simulations, and the evaluation of thermodynamic properties from molecular simulations.

Data Science
Any four of the following courses will fulfill the specialization course requirements for this specialization.

STAT 206: Statistical Computing
STAT 208: Statistical Data Mining Methods
CS 167: Introduction to Big-Data Management
CS 224: Fundamentals of Machine Learning
CS 229: Machine Learning
CS 230: Computer Graphics
CS 235: Data Mining Techniques
CS 236: Database Management Systems
CS 242: Information Retrieval and Web Search
EE 240: Pattern Recognition
EE 241: Advanced Digital Image Processing
EE 243: Advanced Computer Vision
PHYS 243: Foundation of Applied Machine Learning
PHYS 244: Application of Visualization in Data Science
PHYS 247: Introduction to Applied Data Science

Electrical Engineering – Power Systems:
This specialization emphasizes the principles and common research trends in electric power systems analysis and operation and smart grid applications.

EE 123: Power Electronics; (or EE153: Electric Drives)
EE 155: Power Systems Analysis
EE 218: Power System Steady State and Market Analysis
EE 232: Introduction to Smart Grid

* A prerequisite for EE 218 is required. EE 155 and ENGR 160 must be taken first.

The students for the EE specialization will also need to take ENGR160 (Introduction to Engineering Optimization Techniques) in addition to three other core professional courses. That is the core professional courses for EE specialization will be ENGR160 plus three of the four core professional courses which are ENGR 200: Engineering in the Global Environment; ENGR 201: Technology Innovation and Strategy for Engineers; ENGR 202: Introduction to Systems Engineering and ENGR 203: Principles of Engineering Management.

Engineer Management:
The Engineering Management specialization prepares engineers to lead and manage teams, projects, and organizations with technical workforces to meet strategic objectives. This specialization emphasizes applying the management function in the technological setting while recognizing engineering systems’ basic and applied sciences. Students will increase their engineering and management knowledge to develop and deliver new products and services while creating value for their organization and customers.

2. Four specialization courses in the Engineering Management concentration:

ENGR 204: Projects Portfolio Management
ENGR 205: Quality Management
ENGR 206: Engineering Economics
ENGR 207: Engineering Leadership and Organizational Behavior

3. Four units of ENGR 296V

ENGR 200: Engineering in the Global Environment
ENGR 201: Technology Innovation and Strategy for Engineers
ENGR 202: Introduction to Systems Engineering
ENGR 203: Principles of Engineering Management
ENGR 204: Projects Portfolio Management
ENGR 205: Quality Management
ENGR 206: Engineering Economics
ENGR 207: Engineering Leadership and Organizational Behavior

Environmental Engineering Systems (Water):
Through a series of professional development and technical courses, this specialization will equip students with knowledge and insights that are needed for leadership in a water-related environmental engineering career at a consulting firm, water/wastewater agency, federal/state regulatory agency, or a large company. Students can substitute a total of one course from the Bioengineering or Mechanical Engineering specialization.

CEE 225: Physical and Chemical Separation Processes
CEE 226: Biological Treatment Processes
CEE 241: Water Chemistry in Natural and Engineered Systems
CEE 243: Advanced Water Treatment Technologies
CEE 249: Integration of Computational and Environmental Engineering
Materials at the Nanoscale
In addition to course work on engineering management, systems, innovation and strategy, and working in a global environment, this program will focus on a broad range of nanoscale processes and applications through courses from UCR’s interdisciplinary Materials Science and Engineering program. Students can substitute a total of one course from the Mechanical Engineering specialization.

MSE 201: Thermodynamic Foundations of Materials
MSE 210: Crystal Structure and Bonding
MSE 238: Introduction to Microelectromechanical Systems
MSE 248: Nanoscale Science and Engineering

Mechanical Engineering
In addition to course work on engineering management, systems, innovation and strategy, and working in a global environment, this program will focus on a broad range of courses in Sustainable Product Design, Fluid Systems, Secure and Reliable Control Systems and Manufacturing and Materials Processing. Students can substitute a total of one course from the Bioengineering or Materials at the Nanoscale specialization.

ME 203: Design and Analysis of Engineering Experiments
ME 210: Sustainable Product Design
ME 223: Secure and Reliable Control Systems
ME 226: Vehicle Dynamics
ME 230: Computer-Aided Engineering Design
ME 240A: Fundamentals of Fluid Mechanics
ME 270: Introduction to Microelectromechanical Systems
ME 272: Nanoscale Science and Engineering
ME 274: Plasma-aided Manufacturing and Materials Processing

Specialization courses are offered by the participating departments, whereas core courses are offered at the college level to all students. Specialization courses are taught by BCOE faculty as traditional classes to on-campus M.S. and Ph.D. students while also being delivered to online students. Online students are expected to satisfy the same requirements as on-campus students.

Mobility Engineering: The program combines conventional and emerging areas of automotive and transportation engineering which are interconnected with advent of electrification of vehicles. The program emphasizes internal combustion engines, fuels, emissions, connected transportation systems, shared mobility, autonomous vehicles, zero emission vehicles, and intelligent transportation system.

1. **Two technical core courses:** EE 246: Intelligent Transportation Systems, ME 248: Internal Combustion Engines.

For areas of specialization and further information, see [msol.ucr.edu](http://msol.ucr.edu).

**Graduate Courses**

**ENGR 200 Engineering in the Global Environment** 4 Lecture, 4 hours. Prerequisite(s): graduate standing in Engineering. ENGR 200 online section; enrollment in the Online Master-in-Science in Engineering program. Addresses the adaptive challenges facing engineers in a global environment. Covers relevant business dynamics, national and international requirements, and less formal elements beyond the realm of core technical competence. Designed to widen the engineering practice framework to incorporate necessary added skills to succeed in an increasingly global environment.

**ENGR 201 Technology Innovation and Strategy For Engineers** 4 Lecture, 4 hours. Prerequisite(s): graduate standing in Engineering. ENGR 201 online section; enrollment in the Online Master-in-Science in Engineering program. Provides coverage of innovation, innovation project management, innovation protection, management, organizational structuring and collaboration, and human resource management of technical professions. Brings together business models, leading academic research, and current organizational concerns in a blended learning environment that explores real companies and their strategies.

**ENGR 202 Introduction to Systems Engineering** 4 Lecture, 4 hours. Prerequisite(s): graduate standing in Engineering. ENGR 202 online section; enrollment in the Online Master-in-Science in Engineering program. An introduction to systems, the designs process, systems analysis and design evaluation, design for operational feasibility, and systems engineering management. Describes subjects such as requirements analysis, concept definition, system synthesis, design analysis, design tradeoffs, risk tradeoffs, interface definition, engineering design, and systems integration.

**ENGR 203 Principles of Engineering Management** 4 Lecture, 4 hours. Prerequisite(s): graduate standing in Engineering. ENGR 203 online section; enrollment in the Online Master-in-Science in Engineering program. Covers the essential managerial skills engineers need for managing in today’s global economy. Exposes approaches to management that reveal constraints that guide business decisions. Topics include the functions of management, planning, organizing, leading, and controlling. Designed for engineers who manage people, projects, and technical innovation.

**ENGR 204 Projects Portfolio Management** 4 Lecture, 4 hours. Prerequisite(s): ENGR 204 online section: enrollment in the Online Master-in-Science in Engineering program. In-Person section; graduate standing. Covers assessment, planning, implementation, management, and monitoring of human resources across multiple projects, including communications and leadership roles. There will be a strong focus on Engineering topics.

**ENGR 205 Quality Management** 4 Lecture, 4 hours. Prerequisite(s): graduate standing in Engineering. For the ENGR 205 online section; enrollment in the Master of Science in Engineering program; graduate standing. Provides a competitive advantage to organizations that successfully integrate quality management principles. Covers current best practices, business models, leading academic research, and current challenges, bringing them together in a blended learning environment. Explores real companies and their strategies for implementing quality management principles that enhance their value.

**ENGR 206 Engineering Economics** 4 Lecture, 4 hours. Prerequisite(s): graduate standing in Engineering. For the ENGR 206 online section; enrollment in the Master of Science in Engineering program; graduate standing. Presents the techniques and methods that enable the engineer manager to make better informed decisions that improve the value of organizations. Integrates leading academic research and current organizational concerns. Explores real companies and their strategies for evaluating the economic potential of engineering managerial decisions.

**ENGR 207 Engineering Leadership and Organizational Behavior** 4 Lecture, 4 hours. Prerequisite(s): graduate standing in Engineering. For the ENGR 207 online section; enrollment in the Master of Science in Engineering program; graduate standing. Presents the techniques and methods that enable the engineer manager to evaluate, team-build, and manage high-performing, cross-functional teams to create a highly functional organizational culture. Brings together leading academic research and current organizational concerns in a blended learning environment to explore current challenges.

**ENGR 296 Professional Project Design 1 to 4** Individual Study, 3 to 12 hours; written work, 3 to 12 hours. Prerequisite(s): enrollment in the Online Master in Science in Engineering program and consent of the instructor. A directed specialized professional written design project. The design project will have a literature review, abstract, introduction, discussion and conclusion along with references. The design project topic will be determined between the instructor and student. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 4 units.

Major
The English major offers a well-balanced, thought-provoking program for students with a serious interest in the study of literature and culture. Courses emphasize literature and literary theory from a wide range of perspectives. Questions concerning race and ethnicity, gender and sexuality, rhetoric and politics are included in most classes for the major. Non-majors are welcome in English classes, especially at the lower division.

University Requirements
See Undergraduate Studies section.

College Requirements
See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

Major Requirements
The major requirements for the B.A. in English are as follows:

1. Lower-division requirements (at least 13 units, but no more than 20 units):
   a) English 020A, ENGL 020B, and ENGL 020C or their equivalent. These courses are normally required of all English majors as a prerequisite to upper-division courses.

2. Upper-division requirements (35-46 units):
   a) ENGL 102, or 102W. This course should normally be taken prior to or concurrently with the student’s first upper-division English course.
   b. Four courses; one course from each of the following areas:
      i. English Literature to 1660: ENGL 117A, ENGL 117B, ENGL 117C, ENGL 117T, ENGL 149, ENGL 151A, ENGL 151B, ENGL 151C, ENGL 152, ENGL 153, ENGL 154
      ii. English Literature 1660-1900: ENGL 125A, ENGL 125B, ENGL 161A, ENGL 161B, ENGL 161T, ENGL 166A, ENGL 166B, ENGL 166T, ENGL 172A, ENGL 172B, ENGL 172T
      iii. American Literature to 1900: ENGL 120A, ENGL 126A, ENGL 127A, ENGL 130, ENGL 131, ENGL 132, ENGL 138A
      iv. Literature after 1900: ENGL 120B, ENGL 120T, ENGL 125C, ENGL 126B, ENGL 127B, ENGL 127C, ENGL 129C, ENGL 133, ENGL 134, ENGL 135, ENGL 136, ENGL 136T, ENGL 138B, ENGL 138T, ENGL 139, ENGL 139T, ENGL 176A, ENGL 176B, ENGL 176C
   c. One course on literature and related fields, including theory, or on a literary theme or genre, postcolonial literature, literature and gender, or literature and sexuality, to be chosen from among the following: ENGL 100, ENGL 101, ENGL 104, ENGL 121, ENGL 122 / LGBS 122, ENGL 124A, ENGL 124B, ENGL 127T, ENGL 140, ENGL 141, ENGL 142, ENGL 143, ENGL 144 (E-Z), ENGL 145 (E-Z) / MCS 145 (E-Z), ENGL 146/MCS 146, ENGL 179A, ENGL 179A5, ENGL 179B
   d. Race and Ethnicity Requirement: This course can also count towards requirements 2b or 2c or 2f. This course is to be chosen from among the following: ENGL 120A, ENGL 120B, ENGL 120T, ENGL 121, ENGL 122, ENGL 136, ENGL 136T, ENGL 138A, ENGL 138B, ENGL 138T, ENGL 139, ENGL 139T, ENGL 140, ENGL 144 (E-Z), ENGL 145K
   e. English 188: Literature and the Professions or English 189: Capstone Research Seminar.
   f. Additional Upper Division Courses: Four additional upper-division English courses worth 4 units each. Only 4 units from either ENGL 103 or any upper-division 4 unit Creative Writing course will be accepted toward the fulfillment of this requirement. One course worth 4 units of ENGL 190 may be counted toward this requirement. Proposals for ENGL 190 must be approved by a sponsoring faculty member and the department chair. If the student wishes to offer units from ENGL 190 as part of the additional upper-division courses, a copy of an approved petition will be placed in the student’s file.

Students are not allowed more than 20 units at the lower-division level.

Students are encouraged to take at least one of the following as a college breadth requirement or as an elective: CLA 027A, CLA 027B, CLA 040; CPLT 017A, CPLT 017B, CPLT 017C; ETST 114, ETST 120, ETST 124, ETST 138, ETST 170, ETST 183; or any literature course in a language other than English. Students are also encouraged to take a course in British or American history, such as HIST 017A, HIST 017B, HISE 150, HISE 151, HISE 152.

Each student works with the Undergraduate Academic Advisor and the Faculty Advisor for help in shaping a program and following it through to graduation. Students should see the advisors on a regular basis, normally once per quarter prior to registration. Information about times and meeting places for advisors is posted online and is available in the department office from the undergraduate academic advisor.

Minor
The English minor is designed to provide an overview of English and American literature, an opportunity for the exercise of disciplined literary analysis, and a varied experience of the best literature in English.

1. Lower-division requirements (14 units)
   a) Two courses chosen from ENGL 020A, ENGL 020B, ENGL 020C
   b) One course chosen from ENGL 012, ENGL 014, ENGL 015, ENGL 022, ENGL 033/MCS 033

2. Upper-division requirements (16 units)
   a) Four courses of upper-division English. Only four (4) units from ENGL 103 or ENGL 190 will be accepted toward fulfillment of this requirement. Proposals for ENGL 190 must be approved by a sponsoring faculty member and the department chair. If the student wishes to offer units from ENGL 190 as part of the 16 units, a copy of the approved petition will be placed in the student’s file.

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.
University of California Entry-Level Writing Requirement

For regulations governing the University of California Entry-Level Writing Requirement, see Requirements for the Bachelor’s Degree in the Undergraduate Studies section of this catalog. Students who have fulfilled the requirement may enroll in ENGL 001A. Students who are held for the requirement must take the University of California Analytical Writing Placement Exam. Results determine which course(s) a student should take to satisfy university requirements. Visit elwr.ucr.edu for more information. You may also contact the University Writing Program at (951) 827-1384.

Teaching Credential Preparation Programs

Students interested in becoming teachers at the elementary or secondary school level may combine the English major with a program of study leading to the multiple subjects (elementary) or single subject (secondary) credential preparation program. Details and counseling on the Prepare to Teach Program, a preparation program for the multiple subjects credential, are available in the Office of Interdisciplinary Programs, 3111 INTS, (951) 827-1801. Details and counseling on other programs are available in the Department of English or the School of Education.

Education Abroad

Education Abroad is an excellent opportunity to learn more about another country and its culture while taking courses to earn units toward graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit Education Abroad at ea.ucr.edu or call (951) 827-4113. See Education Abroad in the Educational Opportunities section in the beginning of this catalog.

Graduate Program

The Department of English offers the Ph.D. degree in English.

Admission

All domestic and international applicants must supply GRE General Test scores (quantitative and verbal) earned within the past five years.

Doctoral Degree

The Department of English offers the Ph.D. degree in English.

The doctoral program in English prepares students to become informed teachers and scholar-critics capable of significant original literary scholarship.

Admission

Admission is open to qualified candidates with a B.A. or M.A. degree, preferably in English or a related field. Students with an M.A. in another field may be required to take additional course work.

Course Work

ENGL 200 is required for all new graduate students. Students entering the program without an M.A. must complete (with a grade of “B” or better) a minimum of 52 units of course work, including ENGL200. Prior to taking Qualifying Examination I, students must meet the course work requirement of the M.A. Degree (36 units). Upon successfully passing Qualifying Examination I, students must complete at least an additional four seminars (16 units) in 200-level course work. The candidate with an M.A. from another institution must complete (with a grade of “B” or better) a minimum of 36 units of course work in 200-level courses, including ENGL200. No courses graded S/NC may be used for these required doctoral units, including ENGL 280, ENGL 292, ENGL 297, and ENGL 299. When coursework is drawing to a close, all students, in consultation with the graduate advisor, and upon approval by the graduate committee, select three fields of study to prepare for their Qualifying Exam II. Once course work requirements are satisfied, all students take the Qualifying Examination II and complete a dissertation.

Language Requirement

All graduate students must demonstrate proficiency in one language other than English before advancement to candidacy. Students entering with an M.A. from institutions that required proficiency in a language other than English for the master’s degree must provide official documentation to show they fulfilled their language requirement. The department recognizes American Sign Language (ASL) as a language. For details consult the graduate advisor or english.ucr.edu.

Qualifying Examinations I and II

At the end of the sixth quarter, students who have entered the program with a B.A. become eligible to receive an M.A. upon completion of the Qualifying Examination I. For this examination, students submit a portfolio of two essays, that have been substantially revised in consultation with the examining committee, and a 1000- to 1500- word metacommentary explaining the aims and achievements of the essays and their contributions to a coherent research agenda. The student is then examined orally for one hour on the portfolio and two distinct fields related to the two essays. Following successful completion of this examination and a review of the entire student file, the graduate committee recommends the awarding of the M.A. degree. (The Qualifying Examination I is waived for students with an M.A. from another institution.)

After the completion of all course work, students take the Qualifying Examination II to be advanced to candidacy. The Qualifying Exam II is an oral exam of up to three hours. The oral examination includes a short presentation by the student followed by questions and comments from the examining committee based on portfolio materials the student has submitted and the oral presentation. Following the successful completion of this examination, the student will be advanced to candidacy if all coursework and language requirements are also completed.

Professional Development

The English department is aware of the current challenges facing our graduate students when they apply for academic and non-academic jobs while ABD or right after graduating. We have implemented a professionalization program consisting of information sessions, invited speakers, and seminars/workshops to address these challenges. This program will help make our graduate students more competitive on the academic job market and help them explore career options outside the academy. We wish to highlight ENGL410 Seminar in Professional Development, a 2-unit course designed to help students develop their teaching skills, academic publishing, and job application documents. Graduate students will need to take at least one ENGL410 (2 units), graded S/NC, to fulfill their professional development requirement and can take up to 6 units because course content may change each quarter.

Dissertation and Final Defense

The dissertation should be related to the individualized course of study preceding it and should draw out the best research and critical talents of the candidate.

Before the dissertation is given final approval, a public dissertation defense is required. The defense must be advertised to the campus community and is open to all who wish to attend. Following the public defense, the student meets with the dissertation committee to discuss the student’s dissertation in accordance with the regulations of the Graduate Division.

For a more detailed description of the requirements for the Ph.D. contact the Graduate Assistant, Department of English.

Normative Time to Degree including UCR M.A. Work

18 quarters (or 15 quarters for students with an M.A. from another institution)

Basic Writing Lower-Division Courses

BSWT 001 Immersive English 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): an appropriate score on the University of California Analytical Writing Placement Examination; concurrent enrollment in BSWT 002. An intensive introduction to oral communication in the academic setting, focusing on academic conversation, dialogue, discussion, group-work, and presentations. Emphasizes active listening and speaking. Designed for students who need immersive instruction in English as a second language before going on to Basic Writing 3 (BSWT 003). Graded Satisfactory (S) or No Credit (NC).

BSWT 002 Oral Communication 2 Lecture, 1.5 hours; extra reading, 1.5 hours. Prerequisite(s): an appropriate score on the University of California Analytical Writing Placement Examination; concurrent enrollment in BSWT 001. Training in oral communication for the sake of improving academic speech, comprehension, and writing in English. Includes reports, talks, academic discussions, and dialogues. For second-language students in need of immersive training. Graded Satisfactory (S) or No Credit (NC).
BSWT 003 Basic Writing For Second-Language Students 2 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): an appropriate score on the University of California Analytical Writing Placement Exam or a Satisfactory (S) grade in BSWT 003; concurrent enrollment in BSWT 003L and BSWT 004. An introductory course designed for students who need instruction in English as a second language. Helps to develop writing proficiency by means of regular written assignments and intensive individual interaction between student and instructor. Students who pass the course with a grade of “S” should enroll in ENGL 004. Students should be formally enrolled prior to the beginning of instruction and should attend the first meeting to avoid being dropped from the class. Graded Satisfactory (S) or No Credit (NC).

BSWT 003D Basic Writing For Second-Language Students 2 Discussion, 2 hours; activity, 6 hours. Prerequisite(s): concurrent enrollment in BSWT 003. Focuses on reading literature with close attention to grammar and style, organizing essays, honing syntax, and asking and answering academic questions. Students should be formally enrolled prior to the beginning of instruction and should attend the first meeting to avoid being dropped from the class. Offered in summer only. Graded Satisfactory (S) or No Credit (NC).

BSWT 003L Basic Writing For Second-Language Students 1 Laboratory, 3 hours. Prerequisite(s): concurrent enrollment in BSWT 003 and BSWT 004. Focuses on mastery of principles and applications of English grammar and idiomatic expression, as well as critical reading, which are pertinent to second-language students. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as content changes to a maximum of 3 units.

BSWT 004 Basic Writing Journal Workshop 1 Activity, 3 hours. Prerequisite(s): concurrent enrollment in BSWT 003 and BSWT 003L. Instruction in and performance of oral discourse: summaries, analyses, and original arguments. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as content changes to a maximum of 3 units.

Lower-Division Courses

ENGL 001A Beginning Composition 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): ENGL 004 with a grade of C or better or ENGL 005 with a grade of C or better; fulfillment of the University of California Entry Level Writing Requirement. Introduces students to the strategies of personal writing in a multicultural context. Students must be formally enrolled prior to the beginning of instruction and must attend the first day to avoid being dropped from the class. Credit is awarded for only one of ENGL 001A or ENGL 01PA.

ENGL 001B Intermediate Composition 4 Lecture, 3 hours; extra writing and rewriting, 3 hours. Prerequisite(s): ENGL 001A with a grade of “C” or better or ENGL 01PA with a grade of “C” or better. Emphasizes the transition from personal to public writing in a multicultural context. Students must be formally enrolled prior to the beginning of instruction and must attend the first day to avoid being dropped from the class.

ENGL 001C Applied Intermediate Composition 4 Lecture, 3 hours; extra reading, 3 hours; extra writing and rewriting, 3 hours. Prerequisite(s): ENGL 001B with grade of “C” or better. Addresses the function of writing in a range of contemporary situations, including that of the academy, from a critical and theoretical perspective. Students must be formally enrolled prior to the beginning of instruction and must attend the first day to avoid being dropped from the class. Credit is awarded for only one of ENGL 001C, ENGL 01HC, or ENGL 015C.

ENGL 01HC Honors Applied Intermediate Composition 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ENGL 001B with grade of “C” or better; admission to University Honors or consent of instructor. Honors course corresponding to ENGL 001C and ENGL 015C. Covers extended expository prose with emphasis on principles of explanation, interpretation, and argument. Focuses on the theoretical implications of various modes of academic inquiry. Satisfactory (S) or No Credit (NC). Credit is awarded for only one of ENGL 001HC, ENGL 01HC, or ENGL 015C.

ENGL 01PA Beginning Composition: Intensive 4 Lecture, 3 hours; tutorial, 0.5 hour; written work, 3 hours. Prerequisite(s): concurrent enrollment in ENGL 001L; an appropriate score on the University of California Entry Level Writing Requirement and are eligible to enroll in ENGL 001B. Credit is awarded for only one of ENGL 001A or ENGL 01PA.

ENGL 01SC Applied Intermediate Composition For Science and Engineering Majors 4 Lecture, 3 hours; extra reading, 3 hours; extra writing and rewriting, 3 hours. Prerequisite(s): ENGL 001B with grade of “C” or better. A course for science and engineering majors corresponding to ENGL 001C and ENGL 01HC. Assists in building the writing skills most relevant to future work in science or engineering fields. Credit is awarded for only one of ENGL 001C, ENGL 01HC, or ENGL 015C.

ENGL 004 English Writing 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): an appropriate score on the University of California Analytical Writing Placement Exam or a grade of “S” in BSWT 003; concurrent enrollment in ENGL 004L for Fall, Winter, Spring, and Summer for the online section only; concurrent enrollment in ENGL 004D for Summer in-person sections. Covers ground rules of academic inquiry and exchange in English writing. Students who pass the course with a grade of “C” or better have completed the University of California Entry Level Writing Requirement and are eligible to enroll in ENGL 001A. Students should be formally enrolled prior to the beginning of instruction and should attend the first meeting to avoid being dropped from the class. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of ENGL 004 or ENGL 004E.

ENGL 004D English Writing 1 Discussion, 1 hour. Prerequisite(s): concurrent enrollment in ENGL 004. Focuses on critical reading of assigned texts, organizing essays, honing syntax, and asking and answering academic questions. Students should be formally enrolled prior to the beginning of instruction and should attend the first meeting to avoid being dropped from the class. Graded Satisfactory (S) or No Credit (NC). Credit is awarded for only one of ENGL 004D, ENGL 004L or ENGL 04DE.

ENGL 04DE English Writing Hybrid 1 Discussion, 1.5 hours; workshop, 1.5 hours. Prerequisite(s): concurrent enrollment in ENGL 004E. Focuses on critical reading of assigned texts, organizing essays, honing syntax, and asking and answering academic questions. Offered in summer only. Graded Satisfactory (S) or No Credit (NC).

ENGL 004E English Writing Hybrid 4 Lecture, 6 hours; extra reading, 3 hours; activity, 3 hours; hard-copy reading journals and online discussion with peers, followed by reporting to the class, 3 hours per week. Prerequisite(s): an appropriate score on the University of California Analytical Writing Placement Exam or a grade of “S” in BSWT 003; concurrent enrollment in ENGL 04DE. Covers ground rules of academic inquiry and exchange in English writing. Fifty percent of the course will be taught online. Requires access to Adobe Flash Player and Broadband connection. Students who pass the course with a grade of “C” or better have completed the UC Entry Level Writing Requirement. Offered in summer only. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of ENGL 004 or ENGL 004E.

ENGL 004L English Writing 1 Laboratory, 3 hours. Prerequisite(s): concurrent enrollment in ENGL 004. Focuses on mastery of principles and applications of English grammar and idiomatic expression, as well as critical reading for students who do not need, or have advanced beyond, second-language instruction. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 3 units. Credit is awarded for only one of ENGL 004D, ENGL 004L, or ENGL 04DE.
ENGL 005 Ideas in Conflict 4 Lecture, 3 hours; extra writing and revising, 5 hours. Prerequisite(s): an appropriate score on the University of California Analytical Writing Placement Exam; concurrent enrollment in ENGL 005D or ENGL 005L. Examines elements of academic argument in the context of major, conflicting texts. Particular attention is given to identifying, analyzing, and framing debatable questions and issues; finding and developing appropriate, persuasive arguments; and tapping the syntactic resources of standard English. Includes extensive readings and numerous writing assignments along with formal oral presentations. Students who pass the course with a grade of “C” or better have completed the University of California Entry Level Writing Requirement and are eligible to enroll in ENGL 005A. Students should be formally enrolled prior to the beginning of instruction and should attend the first meeting to avoid being dropped from the class. Satisfactory (S) or No Credit (NC) grading is not available.

ENGL 005D Ideas in Conflict 1 Discussion, 1 hour. Prerequisite(s): concurrent enrollment in ENGL 005. Focused on formalizing assigned texts with close attention to grammar and style, organizing essays, honing syntax, and asking and answering academic questions. Students should be formally enrolled prior to the beginning of instruction and should attend the first meeting to avoid being dropped from the class. Graded Satisfactory (S) or No Credit (NC).

ENGL 005L English Writing 1 Laboratory, 3 hours. Prerequisite(s): concurrent enrollment in ENGL 005. Focuses on advanced mastery of principles and applications of English grammar and idiomatic expression, as well as critical reading. Graded Satisfactory (S) or No Credit (NC).

ENGL 006D Qualifier Course Adjunct 1 or 2 Discussion, 1 or 2 hours. Prerequisite(s): concurrent enrollment in a qualifier course. Provides individual and group instruction in support of writing-intensive courses designated as qualifier courses. Focuses on interpreting the qualifier course’s assignments; developing topics; preparing, editing, and revising drafts. Qualifier courses are offered by various departments to give eligible students an opportunity to meet the University of California Entry Level Writing Requirement while earning baccalaureate credit. Students may obtain information about qualifier courses by contacting the Writing Resource Center. Students should be formally enrolled prior to the beginning of instruction and should attend the first meeting to avoid being dropped from the class. Graded Satisfactory (S) or No Credit (NC).

ENGL 007 Workshop in Writing Across the Curriculum 0.5 Workshop, 0.5 hour. Prerequisite(s): concurrent enrollment in the corresponding WAC (Writing Across the Curriculum) course. Review the titles or topics in the current online Schedule of Classes to find the corresponding ENGL 007 lecture or laboratory course. Focuses on exploring and practicing strategies for writing assignments in W-courses: close reading of prompts, forming a relevant thesis, and finding, selecting, and organizing evidence. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 2 units.

ENGL 008 Oral Communication 4 Discussion, 3 hours; activity, 3 hours. An introduction to public speaking in genres and for occasions appropriate in the academy and in public forums: classroom and seminar presentations, conference presentations including poster talks and speeches appropriate for public assemblies, debate, and special occasions.

ENGL 012 Special Topics in Introduction to Literature 4 Lecture, 3 hours; extra reading, 3 hours. An introduction to the study of topics, themes, or types of literature. Texts may be selected from any one or a combination of several time periods, genres, or forms. Topics include various national and ethnic literatures, LGBTQ+ literature, disability literature, and children’s literature. Intended primarily for non-majors. Course is repeatable as content or topic changes to a maximum of 8 units. Credit is awarded to a maximum of 10 units for either or both ENGL 012 or ENGL 012S with different titles.

ENGL 012S Special Topics in Introduction to Literature 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. An introduction to the study of topics, themes, or types of literature. Texts may be selected from any one or a combination of several time periods, genres, or forms. Topics include various national and ethnic literatures, LGBTQ+ literature, disability literature, and children’s literature. Intended primarily for non-majors. Course is repeatable as content or topic changes to a maximum of 10 units for either or both ENGL 012 or ENGL 012S with different titles.

ENGL 014 Topics: North American Writers 4 Lecture, 3 hours; extra reading, 3 hours. Explores key works by important writers in North American literary expression. Course is repeatable as content or topic changes to a maximum of 8 units.

ENGL 020A Introduction to British Literary Tradition 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours; written work, 2 hours. Explores British literature from its beginnings. Explores literary forms, genres, and periods. Introduces students to the basics of literary theory and the literary history of Britain.

ENGL 020B Introduction to American Literary Tradition 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours; written work, 2 hours. Introduces American literature from its beginnings focusing on historical and cultural contexts.

ENGL 020C Introduction to Alternative Critical Perspectives On Literature and Culture 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours; written work, 2 hours. Introduces work associated with alternative critical traditions. Includes one or more of the following perspectives on culture: feminist, Marxist, critical ethnic, decolonial, disability, queer, and techno-cultural.

ENGL 022 Writing Red: Native American Literature 4 Lecture, 3 hours; extra reading, 3 hours. Acquaints students with a range of Native American literatures. Discusses mass-mediated images of Native Americans and how “Indianness” is constructed, contested, and embodied in poetry, film, autobiography, fiction, and photography.

ENGL 023 African American Autobiography 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): fulfillment of the University of California Entry Level Writing Requirement. An introduction to African American literature, focusing on how black literature in the United States has been shaped by self-narrated responses to terror and oppression. Examines autobiographies by Frederick Douglass, Harriet Jacobs, Langston Hughes, Ida Wells-Barnett, and Malcolm X.

ENGL 033 Literacies For Multimedia Contexts 4 Lecture, 3 hours; discussion, 1 hour; research, 1.5 hours; written work, 1.5 hours. Studies information and its graphical, auditory, or interactive presentation in interdisciplinary, multimedia, and multimodal contexts. Analyzes information, sampling, and simulation as narrative, poetry, rhetoric, style, archive, or source. Utilizes hypertext or hypermedia criticism; information aesthetics; cyberfeminisms; Black software critique; queer technics; indigenous technologies; design discourse; digital activism; and other methods.

Upper-Division Courses

ENGL 100 (E-Z) Scriptures, Myths, and Interpretation 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Focuses on issues of scriptural and mythical analysis. Explores the impact of scripture and myth on literature written in English; textual development of the Hebrew scripture including the development of the King James version; major authors’ uses of scripture and myth; exegesis; scripture and myth in current criticism and theory.

ENGL 100E The King James Bible as Literature 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. Readings from the Old Testament, New Testament, and Apocrypha; literary analysis of historiography; poetry, prophecy, philosophy, proverbs, letters, visions, with some consideration of problems of translation.

ENGL 100F Ancient Scriptures and the Literature of the African Diaspora 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. Focuses on issues of scriptural and mythical analysis. Explores the impact of scripture and myth on literature written in English; the textual development of the Hebrew scripture; major authors’ uses of scripture and myth; exegesis; and the place of scripture and myth in current criticism and theory.
ENGL 101 Critical Theory 4 Lecture, 3 hours; consultation, 1 hour. A study of major theoretical issues in representative critical and scholarly works.

ENGL 102 Introduction to Critical Methods 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): a major in English or consent of instructor. An in-depth analysis of the formal features of several genres, as well as an introduction to theoretical and critical approaches. Credit is awarded for only one of ENGL 102 or ENGL 102W.

ENGL 102W Introduction to Critical Methods 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): a major in English; ENGL 001B with a grade of “C” or better; one of the following courses: ENGL 020A, ENGL 020B, ENGL 020C. An in-depth analysis of the formal features of several genres, as well as an introduction to theoretical and critical approaches. Fulfills the third-quarter writing requirement for students who earn a grade of “C” or better for courses that the Academic Senate designates, and that the student’s college permits as alternatives to English 001C. Credit is awarded for only one of ENGL 102 or ENGL 102W.

ENGL 103 Advanced Composition 4 Lecture, 3 hours; discussion/consultation, 1 hour. Prerequisite(s): ENGL 001C or the equivalent. Principles of expository prose, with intensive practice. Advanced course in composition, not remedial. May be repeated for credit up to a maximum of 12 units.

ENGL 104 Film and Media Theory 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Covers different types of film and media theory. Addresses formalist, psychoanalytic, Marxist, feminist, and other approaches to the cinema and other media. Cross-listed with MCS 104.

ENGL 105 Slow Reading 2 Lecture, 2 hours; extra reading, 2 hours. Prerequisite(s): ENGL 102W or consent of instructor. Focused on the activity and experience of reading literature through sustained attention to a single work and individual reading practices. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 4 units.

ENGL 112 History of the English Language 4 Lecture, 3 hours; consultation/discussion, 1 hour. An introductory survey of the history of English, including its Indo-European ancestry, its vocabulary and etymologies, changes in pronunciation, spelling, and grammar, development of dictionaries, and changing attitudes toward the language and usage.

ENGL 114 Rhetorical Studies 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or lower division English course (other than composition) or consent of instructor. An introduction to and re-understanding of the place of rhetoric and language in culture. Includes topics such as reality and meaning, ethnic/American knowledge and identities, teaching practices, and the revival of historical traditions.

ENGL 117A Shakespeare: History 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A close analytical study of plays selected from one of Shakespeare’s dramatic genres as they are designated in the First Folio.

ENGL 117B Shakespeare: Comedy 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A close analytical study of plays selected from one of Shakespeare’s dramatic genres as they are designated in the First Folio.

ENGL 117C Shakespeare: Tragedy 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A focused study of works by Shakespeare selected from different genres.

ENGL 120A Native American Literature to 1900 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. A critical study of Native American literature from the era of oral narrative to 1900, with special attention to autobiography and fiction, as well as criticism and theory.

ENGL 120B Native American Literature After 1900 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. A critical study of Native American literature from 1900 to the present, with special attention to poetry, visual culture, fiction, and self-life-narration, as well as criticism and theory.

ENGL 120T Studies in Native American Literature 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. A focused study of a topic, genre, period, or author in Native American literature. Examples include visual culture, oral narrative, collaborative autobiography, ethnography, or poetry.

ENGL 121 Special Topics in Postcolonial Literatures 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or lower-division English course (other than composition); or consent of instructor. Analyzes colonial discourse and the postcolonial condition of Asia, Africa, or the Caribbean. Topics may include historiography and subalternity; nationalism, gender, and sexuality; neocolonialism and trans-nationality; and theorizing resistance and the postcolonial identity. Course is repeatable as content or topic changes to a maximum of 8 units.

ENGL 122 Queer Texts and Bodies 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. A study of topics on gender, sexuality and sexual identity. Covers issues such as gay and lesbian texts and contexts; sexual ideologies and literature; marginalized writers and texts; and the uses of theories of sexualities in the study of literature. Course is repeatable as content or topic changes to a maximum of 12 units. Cross-listed with LGBS 122.

ENGL 124A Female Novelistic Traditions: Eighteenth- and Nineteenth-Centuries 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. A study of the works of women novelists, writing at different historical moments and in different cultural milieus. Attention is given to the psychological, political, and technical features of the tradition; the connections and contrasts within it; and the problematics of female literary influence.

ENGL 124B Female Novelistic Traditions: Twentieth-Century 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. A study of the works of women novelists, writing at different historical moments and in different cultural milieus. Attention is given to the psychological, political, and technical features of the tradition; the connections and contrasts within it; and the problematics of female literary influence.

ENGL 125A The Development of the English Novel: Eighteenth-Century 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A critical study of British fiction, with some attention to the criticism and theory of the novel.

ENGL 125B The Development of the English Novel: Nineteenth-Century 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A critical study of British fiction, with some attention to the criticism and theory of the novel.

ENGL 125C The Development of the English Novel: Twentieth-Century 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A critical study of British fiction, with some attention to the criticism and theory of the novel.

ENGL 126A The American Novel: Nineteenth-Century 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. A critical study of American long fiction in the nineteenth century, focusing such themes as romance, realism, and naturalism. Credit is awarded for one of the following ENGL 126A or ENGL 126SA.
ENGL 126B The American Novel: Since 1900 4
Lecture, 3 hours; extra reading, 3 hours.
Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. A critical study of American long fiction since 1900 focusing on such modes as realism, modernism, and postmodernism. Credit is awarded for one of the following ENGL 126B or ENGL 126SB.

ENGL 126SA The American Novel: Nineteenth–Century 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours.
Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. A critical study of American long fiction in the nineteenth century focusing on such modes as romance, realism, and naturalism. Credit is awarded for one of the following ENGL 126SA or ENGL 126A.

ENGL 126SB The American Novel: Since 1900 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours.
Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. A critical study of American long fiction in the nineteenth century focusing on such modes as realism, modernism, and postmodernism. Credit is awarded for one of the following ENGL 126SB or ENGL 126B.

ENGL 127A American Poetry: Before 1900 4
Lecture, 3 hours; extra reading, 3 hours.
Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. A critical study of American poetry focusing on the evolutionary and revolutionary aspects of its forms and themes. Credit is awarded for one of the following ENGL 127A or ENGL 127SA.

ENGL 127B American Poetry From Early to Mid Twentieth-Century 4
Lecture, 3 hours; extra reading, 3 hours.
Prerequisite(s): a lower-division English course (other than composition); restricted to class level standing of junior, or senior; or consent of instructor. A critical study of American poetry focusing on the evolutionary and revolutionary aspects of its forms and themes. Credit is awarded for one of the following ENGL 127B or ENGL 127SB.

ENGL 127C American Poetry: Later Twentieth-Century to the Present 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours.
Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. A critical study of American poetry focusing on the evolutionary and revolutionary aspects of its forms and themes. Credit is awarded for one of the following ENGL 127C or ENGL 127SC.

ENGL 127SA American Poetry: Before 1900 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours.
Prerequisite(s): a lower-division English course (other than composition); restricted to class level standing of junior, or senior; or consent of instructor. A critical study of American poetry focusing on the evolutionary and revolutionary aspects of its forms and themes. Credit is awarded for one of the following ENGL 127SA or ENGL 127A.

ENGL 127SB American Poetry From Early to Mid Twentieth-Century 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours.
Prerequisite(s): a lower-division English course (other than composition); restricted to class level standing of junior, or senior; or consent of instructor. A critical study of American poetry focusing on the evolutionary and revolutionary aspects of its forms and themes. Credit is awarded for one of the following ENGL 127SB or ENGL 127B.

ENGL 127SC American Poetry: Later Twentieth-Century to the Present 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours.
Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. A critical study of American poetry focusing on the evolutionary and revolutionary aspects of its forms and themes. Credit is awarded for one of the following ENGL 127SC or ENGL 127B.

ENGL 127T Studies in American Poetry 4
Lecture, 3 hours; extra reading, 1 hour.
Prerequisite(s): a lower-division English course (other than composition); consent of instructor. A focused study of a topic, motif, genre, period, or movement in American poetry. Examples might include political or regional poetry, the epic or lyric, or Beat poetry or Language poetry.

ENGL 128 Major Authors 4
Lecture, 3 hours; extra reading, 3 hours.
Prerequisite(s): restricted to class level standing of junior, or senior. Intensive study of a single major author. Course is repeatable as content or topic changes to a maximum of 12 units.

ENGL 129A English and American Drama: Elizabethan and Jacobean Drama 4
Lecture, 3 hours; extra reading, 3 hours.
Prerequisite(s): upper-division standing or consent of instructor. A critical study of British and American drama. Each segment may be taken independently of the others.

ENGL 129B English and American Drama: Restoration and Eighteenth-Century Drama 4
Lecture, 3 hours; extra reading, 3 hours.
Prerequisite(s): upper-division standing or consent of instructor. A critical study of British and American drama. Each segment may be taken independently of the others.

ENGL 130 American Literature, 1620–1830 4
Lecture, 3 hours; extra reading, 3 hours.
Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. A critical study of American poetry focusing on the evolutionary and revolutionary aspects of its forms and themes. Credit is awarded for one of the following ENGL 130 or ENGL 130S.

ENGL 131 American Literature, 1830 to the Civil War 4
Lecture, 3 hours; extra reading, 3 hours.
Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. A study of innovation and conflict in the American Renaissance, as represented in such writers as Emerson, Hawthorne, Poe, Melville, Stowe, Thoreau, Douglass, and Whitman.

ENGL 132 American Literature From the Civil War to 1914 4
Lecture, 3 hours; extra reading, 3 hours.
Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. New departures in the American literary consciousness as registered in the works of such writers as Emily Dickinson, Mark Twain, Charles W. Chesnutt, Kate Chopin, Henry James, Henry Adams, and Edith Wharton.

ENGL 133 American Literature, 1914–1945 4
Lecture, 3 hours; extra reading, 3 hours.
Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. Modern perspectives and literary innovations in the work of such writers as William Faulkner, F. Scott Fitzgerald, Zora Neale Hurston, Wallace Stevens, William Carlos Williams, Gertrude Stein, and Eugene O’Neill.

ENGL 134 American Literature, 1945 to the Present 4
Lecture, 3 hours; extra reading, 3 hours.
Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. A critical study of modern literature, set against the background of the political and religious conflicts of Irish history.

ENGL 135 Modern Irish Literature 4
Lecture, 3 hours; extra reading, 3 hours.
Prerequisite(s): upper-division standing or consent of instructor. A critical study of modern Irish literature, set against the background of the political and religious conflicts of Irish history.

ENGL 136 Latina and Latino Literature 4
Lecture, 3 hours; extra reading, 3 hours.
Prerequisite(s): restricted to class level standing of junior, or senior; or lower-division English course (other than composition); or consent of instructor. A critical survey of U.S. Latina/o literature focusing on aesthetic achievements, recurrent forms and themes, and interrelations with other American literature. Credit is awarded for one of the following ENGL 136 or ENGL 136S.

ENGL 136S Latina and Latino Literature 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours.
Prerequisite(s): restricted to class level standing of junior, or senior; or lower-division English course (other than composition); or consent of instructor. A critical survey of U.S. Latina/o literature focusing on aesthetic achievements, recurrent forms and themes, and interrelations with other American literature. Credit is awarded for one of the following ENGL 136S or ENGL 136.
ENGL 136T Studies in Latina and Latino Literature 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. An intensive study of the development of an African American literary tradition and the challenge posed to the traditional canon of American literature.

ENGL 138A African American Literature Through the Harlem Renaissance 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. A critical survey of African American literature with particular attention to the development of an African American literary tradition and the challenge posed to the traditional canon of American literature.

ENGL 138B African American Literature Since the Harlem Renaissance 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. An intensive survey of African American literature with particular attention to the development of an African American literary tradition and the challenge posed to the traditional canon of American literature.

ENGL 138T Studies in African American Literature 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. A focused study of ideas, forms, or movements in African American literature such as autobiography, conjure, the blues tradition, the Black Aesthetic, and literary vernacular.

ENGL 139 Asian American Literature 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. A critical survey of Asian American literature, with particular attention to aesthetic achievements, recurrent forms and themes, and interrelationships with other American literatures.

ENGL 139T Studies in Asian American Literature 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): a lower-division course in English (other than composition); restricted to class level standing of junior, or senior; or consent of instructor. A focused study of a genre, medium, or topic in Asian American literature such as poetry, autobiography, women’s writing, nationalism, mobility narratives, gender, and sexuality.

ENGL 140 Special Topics in Literary Genres 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. A practical and theoretical study of literary genres. Topics may include the lyric, the epic, the romance, tragedy, comedy, satire, autobiography, poetry, war literature, and children’s literature. Course is repeatable as content or topic changes to a maximum of 12 units.

ENGL 141 Special Topics in Interdisciplinary Literary Studies 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. A critical, interdisciplinary survey of literature in relation to other areas of study. Topics may include medical humanities, public humanities, science and technology, legal studies, archive and manuscript studies, performance studies, and visual media. Course is repeatable as content or topic changes to a maximum of 12 units.

ENGL 142 Special Topics in Cultural Studies 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. A focused study of ideas, forms, or movements in African American literature such as autobiography, poetry, war literature, and cinema.

ENGL 143 Special Topics in Gender, Sexuality, and Visual Cultures 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. An intensive formal, historical, and theoretical analysis of gender and sexuality in film, television, and visual culture. Course is repeatable as content or topic changes to a maximum of 12 units. Cross-listed with LGBS 143, and MCS 143.

ENGL 143E Feminist Film Theory and Practice 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Intensive formal, historical, and theoretical analysis of gender and sexuality in film, television, and visual culture. E. Feminist Film Theory and Practice; F. Film and Gender; G. Screening the Lesbian; K. Queers that Kill. Cross-listed with MCS 143 (E-Z) and LGBS 142 (E-Z).

ENGL 143F Film and Gender 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Intensive formal, historical, and theoretical analysis of gender and sexuality in film, television, and visual culture. E. Feminist Film Theory and Practice; F. Film and Gender; G. Screening the Lesbian; K. Queers that Kill. Cross-listed with MCS 143 (E-Z) and LGBS 142 (E-Z).

ENGL 143G Screening the Lesbian 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Intensive formal, historical, and theoretical analysis of gender and sexuality in film, television, and visual culture. E. Feminist Film Theory and Practice; F. Film and Gender; G. Screening the Lesbian; K. Queers that Kill. Cross-listed with MCS 143 (E-Z) and LGBS 142 (E-Z).

ENGL 143K Queers That Kill 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Intensive formal, historical, and theoretical analysis of gender and sexuality in film, television, and visual culture. E. Feminist Film Theory and Practice; F. Film and Gender; G. Screening the Lesbian; K. Queers that Kill. Cross-listed with MCS 143 (E-Z) and LGBS 142 (E-Z).

ENGL 144 (E-Z) Race, Ethnicity, and Visual Culture 4 Lecture, 3 hours; screening, 3 hours. Intensive formal, historical, and theoretical analysis of race and ethnicity in film, television, and visual culture. Weekly screenings and readings. I. Racial Difference And Visual Culture In The Postcolonial World Context; J. Film, Race, And Ideology; The Case Of The Vietnam War; K. Decolonizing The Screen.

ENGL 145 (E-Z) Special Topics in Film and Visual Culture 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. An intensive formal, historical, and theoretical analysis of a theme or issue in film, media, television, and visual culture. E. Hollywood In The 1960s; F. Television And American Culture; G. Film As Writing And Writing As Film; I. Liberal Hollywood And Social “problems”; J. The Horror Film; K. African American Visual Culture; M. The Male Nude In Photography And Film. Cross-listed with MCS 145 (E-Z).

ENGL 146 (E-Z) Special Topics in Technoculture and Digital Media 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Advanced study of theories and practices of reader and audience interaction with technologies of cultural production in general and digital media in particular. Includes praxis-oriented composition or research. Cross-listed with MCS 146 (E-Z).

ENGL 147 Studies in A Major Work 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. A concentrated study of a single major work from a given area of cultural production. Affords an opportunity for thorough explication of the work, exploration of historical backgrounds, and implementation of relevant critical approaches. Works include Moby Dick, Beloved, There There, No-No Boy, and The House on Mango Street. Course is repeatable as content or topic changes to a maximum of 12 units.

ENGL 149 Old English Literature 4 Lecture, 3 hours; extra reading, 3 hours. English literature of the Anglo-Saxon period: such works as Beowulf, “The Seafarer,” and “The Wanderer.”

ENGL 151A Middle English Literature: 1066-1500 4 Lecture, 3 hours; extra reading, 3 hours. English literature of the Anglo-Saxon period: such works as Beowulf, “The Seafarer,” and “The Wanderer.”

ENGL 151B Middle English Literature: Later Fourteenth Century 4 Lecture, 3 hours; extra reading, 3 hours. Covers the great works of the later fourteenth century—Chaucer’s Troilus, Piers Plowman, and the poems of the Gawain poet.
ENGL 151C Studies in Medieval Literature 4
Lecture, 3 hours; extra reading, 4 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or lower-division English course (other than composition); or consent of instructor. Analyzes English literature of the Middle Ages. Focuses on its continental backgrounds as needed with the latter read in translation. Examines selected major literary works that illuminate topics such as Christian theology, monasticism, chivalry, and courtly love. Course is repeatable to a maximum of 8 units.

ENGL 152 Renaissance Revolutions 4
Lecture, 3 hours; extra reading, 3 hours. Studies in some of the major ideas and movements of the English Renaissance (1500–1600), such as Christian humanism, neo-Platonism, syncretism, puritanism, rational theology, science, republicanism, centering on such figures as More, Elyot, Castiglione, Ascham, Sidney, Jonson, Bacon, Hobbes, and Milton.

ENGL 153 Studies in Early Renaissance Literature 4
Lecture, 3 hours; extra reading, 3 hours. Studies in some of the major literary works of the period (excluding The Faerie Queene). Topics may center on comparisons with other art forms, on genres like the lyric, the pastoral, the romance, etc., or on ideas or topics of importance as they are reflected in the literary forms of the period.

ENGL 154 Studies in Late Renaissance Literature 4
Lecture, 3 hours; extra reading, 3 hours. Studies of some of the major literary figures of the period (excluding Milton). Topics may center on major late English renaissance ideas or themes such as the political, philosophical, or religious questions, or on other ideas or topics of importance as they are reflected in the literary forms of the period (metaphysical or Cavalier poetry, the character, etc.).

ENGL 161A Restoration and Eighteenth-Century English Literature: 1600–1730 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. Emphasizes drama (Wycherley, Congreve, Behn, etc.) and satire (Dryden, Rochester, Pope, Gay, Swift).

ENGL 161B Restoration and Eighteenth-Century English Literature: 1730–1790 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. Emphasizes the political, philosophical, and social order of the period through the work of Dryden, Pope, and Swift.

ENGL 161T Studies in Eighteenth-Century literature 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. A study of the relation of Restoration and early eighteenth-century literature to its social and intellectual contexts: the rise of the bourgeoisie, the growth of British imperialism, the Industrial Revolution, the triumph of Newtonian science, philosophical empiricism, classicism, primitivism, antiquarianism, etc.

ENGL 166A Literature of the Romantic Period 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): or lower-division English course (other than composition); restricted to class level standing of junior, or senior; or consent of instructor. Covers the works of writers such as Barbauld, Blake, Coleridge, Helen Williams, Wollstonecraft, and Wordsworth. Credit is awarded for one of the following ENGL 166A or ENGL 166SA.

ENGL 166B Literature of the Romantic Period 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. Covers the works of writers such as Byron, Hazlitt, Keats, Scott, Mary Shelley, and Percy Shelley.

ENGL 166SA Literature of the Romantic Period 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): or lower-division English course (other than composition); restricted to class level standing of junior, or senior; or consent of instructor. Covers the works of writers such as Barbauld, Blake, Coleridge, Helen Williams, Wollstonecraft, and Wordsworth. Credit is awarded for one of the following ENGL 166SA or ENGL 166A.

ENGL 166T Studies in English Romanticism 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. A study of the relationship between the literature of the period and intellectual interests such as antiquarianism, primitivism, perfectibility, transcendentalism, and organicism.

ENGL 172A Literature of the Early Victorian Period 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. Covers Tennyson, Browning, Carlyle, Mill, and Newman.

ENGL 172B Literature of the Late Victorian Period 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. Covers Arnold, Ruskin, Swinburne, Pater, and Hopkins; the Pre-Raphaelites, the Aesthetic Movement, and Decadence.

ENGL 172T Studies in Victorian Literature 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. A study of such ideas and movements as Romanticism, Utilitarianism, the Search for Standards, Evolution, Aestheticism, the New Naturalism, and Utopian theories, organized by areas or themes, as these ideas are reflected in the literature of the age.

ENGL 176C Twentieth-Century British and American Literature: 1950 to Present 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. Study of representative literary works: fiction, non-fiction, poetry, and drama.

ENGL 176T Studies in Twentieth-Century British and American Literature 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or lower-division English course (other than composition) or consent of instructor. Study of representative literary works: fiction, non-fiction, poetry, and drama.

ENGL 179A History of Speculative Fiction 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or lower-division English course (other than composition); or consent of instructor. A historical survey of speculative fiction literature from the nineteenth century to the present. Credit is awarded for one of the following ENGL 179A or ENGL 179SA.

ENGL 179B Studies in Speculative Fiction 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): a lower-division course in English (other than composition): restricted to class level standing of junior, or senior; or consent of instructor. A study of the subgenre, period, movement, or major author within the field of speculative fiction.

ENGL 179C Screen Speculative Fiction 4
Lecture, 3 hours; screening, 3 hours. Prerequisite(s): a lower-division course in English (other than composition); restricted to class level standing of junior, or senior; or consent of instructor. A historical survey of speculative fiction film and television from the twentieth century to the present. Includes readings in film and television criticism. Course is repeatable to a maximum of 8 units. Credit is awarded to a maximum of 10 units for either or both ENGL 179C or ENGL 179CC.
ENGL 179SA History of Speculative Fiction 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): restricted to class standing of junior, or senior; or lower-division English course (other than composition); or consent of instructor. A historical survey of speculative fiction literature from the nineteenth century to the present. Credit is awarded for one of the following ENGL 179SA or ENGL 179A.

ENGL 179SC Screen Speculative Fiction 5
Lecture, 3 hours; discussion, 1 hour; screening, 2 hours; extra reading, 2 hours. Prerequisite(s): a lower-division course in English (other than composition); restricted to class standing of junior, or senior; or consent of instructor. A historical survey of speculative fiction film and television from the twentieth century to the present. Includes readings in film and television criticism. Course is repeatable to a maximum of 10 units. Credit is awarded to a maximum of 10 units for either or both ENGL 179C or ENGL 179SC.

ENGL 188 English Capstone: Literature and the Professions 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): ENGL 102 with a grade of C or better or ENGL 102W with a grade of C or better; restricted to class standing of junior, or senior; restricted to major(s) English; or consent of instructor. Studies of literature about or in relation to a profession.

ENGL 189 English Capstone Seminar 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): ENGL 102 or ENGL 102W. Advanced undergraduate study of a specific topic proposed by instructor.

ENGL 190 Special Studies 1 to 5 To be taken with the consent of the Chair of the department as a means of meeting special curricular problems.

ENGL 193A Senior Seminar 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): senior standing or consent of instructor. Advanced undergraduate study of a specific topic proposed by instructor.

ENGL 193B Senior Seminar 2 Seminar, 1 hour; research, 2 hours; term paper, 2 hours. Prerequisite(s): ENGL 193A; senior standing with a major in English. Advanced research and revision methods of continuing and expanding research begun in ENGL 193A.

ENGL 196 Senior Research Paper 1 to 4 Research, 3 to 12 hours. Prerequisites: ENGL 189. A continuation of the research project begun in ENGL 189. Conducted under the supervision of a faculty advisor in the applicable field of study.

ENGL 198 R’Course - Variable Topics 1 Activity hours vary per R’Course proposal. Prerequisite(s): permission needed from department. An opportunity for UCR undergraduate students to develop leadership skills, innovate the undergraduate curriculum, and promote democratic, experiential education. Original course topics are variable and unique from other departmental course offerings, designed to highlight the student facilitators’ expertise while working closely with a faculty mentor. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

ENGL 198I Individual Internship in English 1 to 12 Internship, 3 to 36. Prerequisite(s): consent of instructor or upper division standing. Introduces the operations of professional societies, journals, archives, and cooperating agencies related to the study and management of literature and language. Explores the ongoing operations of these organizations. Includes researching and writing analyses and/or histories under faculty supervision. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

Graduate Courses

ENGL 200 Introduction to Graduate Study in English 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A team-taught introduction to a range of critical and theoretical issues of concern to entering graduate students, including canon formation, field organization, critical and theoretical assumptions behind the establishment of various fields, and the uses of theory.

ENGL 246 Seminar in Digital Media and Technocultural Studies 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores the history, theories, and practices of technoculture. Includes studies of computational or combinatory texts and media. Brings together issues and contexts related to technological innovation, including the industrial production, refraction in aesthetic practices or popular cultural texts and sociopolitical deployment. Course is repeatable as content changes.

ENGL 247 Seminar in Science, Literature and Media 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Combines perspectives from the cultural study of technology and the social study of science with an analysis of the cultural texts. Includes readings from significant primary texts alongside work from the history of science, technology, and medicine. Course is repeatable to a maximum of 16 units.

ENGL 248 Seminar in Science Fiction 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Intensive research in the history and theory of science fiction. Includes readings of significant primary texts and examinations of the genre from various critical perspectives (e.g. structuralist, Marxist, feminist). Course is repeatable to a maximum of 16 units.

ENGL 250 Seminar in Native American Literary and Cultural Studies 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Combines perspectives from the cultural study of technology and the social study of science with an analysis of the cultural texts. Includes readings from significant primary texts and examinations of the genre from various critical perspectives (e.g. structuralist, Marxist, feminist). Course is repeatable to a maximum of 16 units.

ENGL 251 Seminar in Black Literary and Cultural Studies 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines black literary and cultural expression within a framework of interdisciplinary black studies and literary and cultural theory. Examines the ways in which African American literature and/or the literatures of the African diaspora engage the histories of slavery, colonization, and freedom-making in the black Atlantic world. Course is repeatable to a maximum of 16 units.

ENGL 252 Seminar On Latinidades 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on Latinidades shifting the study of Latina/o literature toward comparative, transnational, and situational approaches and theories. Latinidades expands the national, geographical, and political borders of Latina/o literature, allowing the narratives and texts that constitute ethnic-specific structures of the field to be reimagined. Course is repeatable to a maximum of 16 units.

ENGL 253 Seminar in Asian/ American Literary and Cultural Studies 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the ongoing operations of these organizations. Includes researching and writing analyses and/or histories under faculty supervision. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

ENGL 254 Seminar in Medieval Literature 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores the history, theories, and practices of technoculture. Includes studies of computational or combinatory texts and media. Brings together issues and contexts related to technological innovation, including the industrial production, refraction in aesthetic practices or popular cultural texts and sociopolitical deployment. Course is repeatable as content changes.

ENGL 262 Seminar in Renaissance Literature 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Studies in Renaissance literature and its literary, cultural, or historical contexts. Intensive readings in a major author; historical subperiod, or special topic. Includes critical and theoretical approaches important to the field. Course is repeatable as content changes.

ENGL 264 Seminar in Restoration and Eighteenth-Century Literature 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Intensive research in particular areas of Restoration and eighteenth-century literature and society such as the “rise” of the novel; women writers and readers; interactions of “high” and “low” cultures; ideologies of gender and sexuality; capitalism, colonialism, and literature; autobiographical and historical representations of self and others. Course is repeatable as content changes.
ENGL 265 Seminar in Romantic Literature 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Research in late eighteenth- and early nineteenth-century literature and its legacy in modern critical configurations of romanticism. Course is repeatable as content changes.

ENGL 267 Seminar in Victorian Literature 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Concentrated research and discussion of topics, issues, and figures in Victorian literature and culture. Rubrics may include, but are not limited to, theoretical approaches to Victorian studies; questions of race, class, gender, and sexuality in Victorian culture; problems of aesthetics and genre; the politics of Empire; as well as author or text focused offerings. Course is repeatable as content changes.

ENGL 268 Seminar in British Literature Since 1900 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Intensive analysis of figures, genres, movements, and issues in twentieth-century British literature and culture. May include topics such as Bloomsbury and the Politics of art; Joyce and Empire; Modernism, Modernity, and Gay Identities; British Postmodernism; Virginia Woolf and Feminist Theory. Course is repeatable as content changes.

ENGL 269 Seminar in American Literature to 1900 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Intensive research in American literature and culture to 1900. Topics may include nineteenth-century novel; slavery and narrative; gender and colonial literary culture; Whitman and Dickinson; or other historical, gender-centered or theoretical issues. Course is repeatable as content changes.

ENGL 270 Seminar in American Literature Since 1900 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Study of representative literary texts and of current theories about the field. May focus on such topics as Modernism, Postmodernism, regionalism, alternative canons, interrelations among texts, and connections between texts and cultures. Course is repeatable as content changes.

ENGL 272 Seminar in Critical Theory 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Study of theoretical movements. May emphasize historical or thematic relations among various theoreticians. Course is repeatable as content changes.

ENGL 273 Seminar in Cultural Studies 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Intensive formal, historical, and theoretical research into the history and theory of culture in its broadest sense: popular literature, the mass media, and the interplay between peasant and elite or “low” and “high” cultural forms. Course is repeatable as content changes.

ENGL 274 Seminar in Feminist Discourses 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on theories and histories of gender and sexuality and analyzes the effects, in literary and other discourses, of foregrounding these categories. May involve special emphasis on “women” as writers and theorists and/or on feminist issues. Course is repeatable as content changes.

ENGL 275 Seminar in Film and Visual Cultures 4
Seminar, 3 hours; screening, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Analysis of film, television, and other forms of visually-oriented textuality. Approaches may include cultural criticism; media theory; structural and poststructural analysis; feminist, gender, gay and lesbian theory; semiotics. Course is repeatable as content changes.

ENGL 276 Seminar in Colonialism and Postcoloniality 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Analysis of colonial discourse and the postcolonial condition. Issues addressed include, among others, historiography and subalternity; nationalism, gender, and sexuality; neocolonialism and transnationality; theorizing resistance; mimicry in colonial discourse; the academy, pedagogy, and the postcolonial intellectual. Course is repeatable as content changes.

ENGL 277 Seminar in Sexualities and Genders 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examine representations in a variety of literary, media, and critical genres by or of lesbians, gay men, transgenders, and others marginalized because of their sexuality or gender expression. Topics may include the history of sexuality, camp, posthuman genders and sexualities, queer theory, and lesbian and gay literature and film. Course is repeatable as content changes.

ENGL 278 Seminar in Minority Discourse 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Intensive study and research in cultural traditions formerly excluded from literary history, such as African American, Asian American, Chicano, and Native American. Includes cross-cultural studies in the representations of such marginalized groups. Topics may include the African American novel; border culture; nineteenth-century Black bodies; oral history, and literature. May be taken Satisfactory (S) or No Credit (NC). May be repeated for credit.

ENGL 279 Seminar in Rhetorical Studies 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Intensive research and study in rhetoric or composition theory. Topics may include the rhetorical dimensions of literature, literary theory, and civic discourse; the ethics or history of rhetoric; competing conceptions of the writing process; and the relations between rhetorical, literary, and cultural criticisms. Course is repeatable as content changes.

ENGL 280 Colloquium in English and American Literature 2
Seminar, 2 hours. Prerequisite(s): graduate standing. Colloquia of both a formal and informal order on current research topics for students, faculty, and visiting scholars. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

ENGL 281 Seminar in Comparative Studies 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Intensive study of two or more ostensibly distinct fields, periods, disciplines, or arts. Course is repeatable as content changes.

ENGL 282 Seminar in Bibliography and Textual Criticism 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Advanced research in the history of the book and textual production, including such topics as analytical bibliography, editorial theory and practice, and the economics of textual dissemination. Course is repeatable as content changes.

ENGL 283 Seminar in Genres 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examination of significant literary genres (poetry, the novel, drama, etc.) and subgenres (epic, romance, lyric, comedy, etc.) in terms of current or historical genre theories. Course is repeatable as content changes.

ENGL 284 Directed Studies 1 to 4
Consultation, 1 to 3 hours; individual study, 12 hours. Prerequisite(s): consent of instructor and graduate advisor. Advanced research study culminating in written work. Course is repeatable.

ENGL 285 Individual Study in Coordinated Areas 1 to 12
Outside research, variable. Prerequisite(s): graduate standing. A program of study designed to advise and assist candidates who are preparing for examinations. Repeatable under the following rules: (1) a student may take up to 12 units prior to the award of the M.A.; (2) a student may take up to 24 additional units after award of the M.A. but prior to successful completion of the Ph.D. qualifying examination. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

ENGL 286 Concurrent Analytical Studies 1 to 4
Research, 3 to 12 hours. Prerequisite(s): instructor approval, or approval of instructor in the field under whom the work will be carried out. Each 292 course will be taken concurrently with some 100 series course but on an individual basis. It will be devoted to research, criticism, and written work of a graduate order commensurate in amount with the number of units elected. ENGL 105 and ENGL 103 may not be used for this arrangement. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

ENGL 287 Master’s Portfolio 2 Research, 6 hours; consultation, 2 to 3 hours. Prerequisite(s): completion of five quarters of master’s study in English; consent of the Graduate Advisor. Students revise, extend, and develop essays written during their master’s program in preparation for the master’s portfolio examination. Graded Satisfactory (S) or No Credit (NC).
ENGL 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing or consent of instructor. Individual research by graduate students directed by a particular faculty member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ENGL 298I Individual Internship 1 to 12 Term paper, 1 to 6 hours; extra reading, 1 to 6 hours; internship, 1 to 24 hours. Prerequisite(s): graduate standing, and consent of instructor. Individual study or apprenticeship in a professional setting such as a Library, Museum, Archive, or Media and Arts Organization to gain practical experience and skills for future career. The number of units enrolled will depend upon the amount of internship hours per week. Graded Satisfactory (S) or No Credit (NC). Course is repeatable; students may receive either a letter grade or Satisfactory (S) or No Credit (NC) grade. See instructor for grading basis; no petition is required.

ENGL 299 Research For Thesis Or Dissertation 1 to 12 Thesis, 3 to 36 hours. Prerequisite(s): graduate standing or consent of instructor. Research, under the direction of a faculty member, for preparation of the thesis or dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable; students may enroll in a maximum of 12 units per quarter.

Professional Courses
ENGL 301 Introduction to the Teaching of English 1 Individual and group conferences, 1 hour. Prerequisite(s): graduate standing. A flexible program of meetings and workshops specifically devoted to orienting apprentices and transfer TAs to the writing program at UC Riverside. Concentrates on the problem of organizing and teaching ENGL 001A, ENGL 001B, and ENGL 001C or its equivalent. Required of all apprentices and transfer TAs. Students must enroll concurrently in ENGL 302. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit for a maximum of 2 units.

ENGL 302 Teaching Practicum 1 to 4 Seminar, 1 to 4 hours. Prerequisite(s): graduate standing. A flexible program of meetings and conferences on the problems and techniques of writing instruction most pertinent to Basic Writing or to ENGL 001. Required of all TAs for at least five quarters, after which the TA may, with the permission of the Director of ENGL 001, elect to take ENGL 304 instead. Open to all graduate students. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

ENGL 303 Advanced Teaching Practicum 1 to 2 Discussion, 1 hour; practicum, 1 to 3 hours. Prerequisite(s): graduate standing or consent of instructor. A flexible program of meetings and conferences on the problems and techniques of teaching literature, cultural studies, film studies, and related courses. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ENGL 304 Professional Research Preparations 4 Seminar, 3 hours; research, 3 hours; consultation, 5 hours. Prerequisite(s): consent of instructor. Covers the procedures, preparation, and presentation of oral and written research materials, including prospectus, with individual direction from instructor. Graded Satisfactory (S) or No Credit (NC).

ENGL 305 Directed Research 1 to 6 Research, 1 to 6 hours. Prerequisite(s): consent of instructor. Provides a flexible program of meetings and workshops on the development of skills and practices of the professional literary scholar. Includes conference presentations, academic publishing, pedagogy, grant writing, and other career-building practices. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 6 units.

ENGL 350 Introduction to the Teaching of Writing 4 Seminar, 3 hours; research, 1 hour. Prerequisite(s): graduate standing or consent of instructor. A flexible program of meetings and workshops on the development of skills and practices of the professional literary scholar. Includes conference presentations, academic publishing, pedagogy, grant writing, and other career-building practices. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit for a maximum of 6 units.

ENGL 380 The Teaching of Written Composition 4 Seminar, 8 hours. Prerequisite(s): consent of instructor; participation in the Inland Area Writing Project Summer Workshop. A study of research and practice in the teaching of written composition in the elementary and secondary schools. Offered in summer only. Students may receive either a letter grade or Satisfactory (S) or No Credit (NC) grade. See instructor for grading basis; no petition is required.

ENGL 381 Preparing to Teach Teachers 1 to 4 Seminar, 2 to 8 hours. Prerequisite(s): consent of instructor; concurrent enrollment in ENGL 380. Participation in the Inland Area Writing Project Summer Workshop. Preparation and presentation of inquiry projects. Emphasis on inquiry into pedagogical assumptions and the way they contribute to expert teaching practices. Offered in summer only. Students may receive either a letter grade or Satisfactory (S) or No Credit (NC) grade. See instructor for grading basis; no petition is required.

ENGL 410 Seminar in Professional Development 2 Workshop, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Provides a flexible program of meetings and workshops on the development of skills and practices of the professional literary scholar. Includes conference presentations, academic publishing, pedagogy, grant writing, and other career-building practices. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 6 units.

Richard Cardullo, Ph.D., Evolution, Ecology, and Organismal Biology
Anupama Dahanukar, Ph.D., Molecular, Cell and Systems Biology
Paul Nably, Ph.D., Botany and Plant Sciences
Nicole Rafferty, Ph.D., Evolution, Ecology, and Organismal Biology
Marko J. Spasojevic, Ph.D., Plant Sciences
Major
The Department of Entomology offers undergraduate programs leading to either the B.S. or the B.A. degree. The B.S. degree offers students with a strong interest in the natural sciences an opportunity to emphasize this aspect of their education. The B.A. degree is available to students who wish to obtain a broader background in the humanities and social sciences than is required of students in the B.S. program.

Information on the programs and course requirements is available at CNAS Academic Advising Center, 1223 Pierce Hall. Counseling, course recommendations, and information on education and career goals are provided by the Undergraduate Faculty Advisors, Dr. Dong-Hwan Choe, 382 Entomology and Dr. John Heraty, 138 Entomology.

Transfer Selection Criteria
Applicants to majors in the College of Natural and Agricultural Sciences are selected on the basis of academic preparation, as assessed by their GPA and the strength of preparation for the intended major. A GPA of at least 2.70 is required. (This is a baseline GPA for consideration and not a guarantee of admission.) The GPA cutoff for Transfer admissions will be set each year by the appropriate Divisional Dean in consultation with the Executive Committee and the Chairs, and may differ by program depending on Transfer enrollment capacity.

In addition, applicants will need to complete college courses comparable to at least two of the following UCR year-long sequences in order to meet selection criteria for this major. Courses must be completed with "C" grades or better:

- MATH 009B (mandatory)
- MATH 007A or MATH 009A, MATH 007B or MATH 009B
- CHEM 001A, CHEM 001B, CHEM 001C, CHEM 011A, CHEM 011B, CHEM 011C
- CHEM 008A or CHEM 008HA, CHEM 008B or CHEM 008HB, CHEM 008C or CHEM 008HC, CHEM 011A or CHEM 011LA, CHEM 011B or CHEM 011LB, CHEM 011C or CHEM 011LC
- STAT 010

2. Upper-division requirements (46 units)
   a) ENTM 100/Biol 100, ENTM 107, ENTM 173/Biol 173, ENTM 180, and 4 units in any combination of ENTM 190, ENTM 197, ENTM 199, or ENTM 199H
   b) Sixteen (16) additional units of entomology electives, which may include up to 2 additional units of ENTM 190, ENTM 197, ENTM 199 or ENTM 199H
   c) BCH 100
   d) BIOL 102
   e) BIOL 107A

Upper division courses in BIOL, BPSC, and related programs including but not limited to BIOL 151 and BPSC 133 are suggested to acquire a background in the life sciences appropriate for an Entomology major.

For students intending to specialize in the graduate level in insect toxicology or insect physiology, biochemistry, and molecular biology, it is recommended that the BCH 110A, BCH 110B, and BCH 110C sequence and BCH 102 be substituted in place of an equal number of upper-division course units in life sciences. Due to course content overlap, credit is not awarded for BCH 110A, BCH 110B, or BCH 110C if it has already been awarded for BCH 100.

University Requirements
See Undergraduate Studies section.

College Requirements
See College of Natural and Agricultural Sciences, Colleges and Programs section.

Some of the following requirements for the major may also fulfill some of the college’s breadth requirements. Consult with a department advisor for course planning.

Major Requirements
The major requirements for both the B.A. and the B.S. degrees in Entomology are as follows:

1. Lower-division requirements (64 units)
   a) BIOL 005A, BIOL 05LA or BIOL 020, BIOL 005B, BIOL 005C
   b) PHYS 002A, PHYS 002B, PHYS 002C, PHYS 02LA, PHYS 02LB, PHYS 02LC
   c) MATH 007A or MATH 009A, MATH 007B or MATH 009B
   d) CHEM 001A, CHEM 001B, CHEM 001C, CHEM 011A, CHEM 011B, CHEM 011C
   e) STAT 010

2. Upper-division requirements (46 units)
   a) ENTM 100/Biol 100, ENTM 107, ENTM 173/Biol 173, ENTM 180, and 4 units in any combination of ENTM 190, ENTM 197, ENTM 199, or ENTM 199H
   b) Sixteen (16) additional units of entomology electives, which may include up to 2 additional units of ENTM 190, ENTM 197, ENTM 199 or ENTM 199H
   c) BCH 100
   d) BIOL 102
   e) BIOL 107A

Minor
The Department of Entomology offers a minor in Entomology designed to allow the student the freedom to pursue areas of particular interest.

The minor consists of no less than 20 and no more than 28 units of Entomology courses to be selected as follows:

1. ENTM 100/BIOL 100
2. Select from the following upper-division Entomology courses to complete unit requirement: ENMT 106, ENMT 107, ENMT 109, ENMT 112/BIOL 112/BPSC 112, ENMT 114, ENMT 124, ENMT 125, ENMT 126, ENMT 127/BIOL 127, ENMT 129, ENMT 129L, ENMT 133, ENMT 154, ENMT 162/BIOL 162, ENMT 173/BIOL 173, ENMT 180, ENMT 190, ENMT 197, ENMT 199, ENMT 199H.
3. No more than 4 units of ENMT 190, ENMT 197, ENMT 199, or ENMT 199H, either solely or in combination, may be applied toward the unit requirement.
4. Of the specified upper-division units, a minimum of 16 must be unique to the minor and may not be used to satisfy major requirements.

See Minors under the College of Natural and Agricultural Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Combined Entomology B.S. + Entomology M.S. Program
The College of Natural and Agricultural Science offers a combined five-year B.S.+M.S. program in Entomology, designed to allow successful UCR Entomology B.S. graduates to complete the Master of Science degree in Entomology in one year (Plan I, Thesis).

Applicants to the Combined Entomology B.S.+M.S. program (including transfer students) should apply by the end of their junior year, providing that the student is a UCR Entomology B.S. student with cumulative GPA at least 3.0 overall and 3.3 GPA in the Entomology major. The application to the Combined B.S.+M.S. program must include a Statement of Interest and Eligibility, at least two recommendation letters from UCR Academic Senate faculty members, one of which should include the prospective thesis advisor and at least one of which must be Entomology faculty. Matriculation into the graduate portion of the combined degree program occurs in the Fall term following senior year, provided: (a) the M.S. application is accepted, (b) throughout senior year, the student is an Entomology B.S. major with cumulative GPA 3.0 or higher, (c) by the end of senior year, the student completes the Entomology B.S. degree requirements.

Incoming freshman students who apply to the Entomology B.S. program may simultaneously apply for preliminary admission into the combined degree program provided their high-school GPA is at least 3.6, their SAT-I combined score is at least 1250, they satisfy the Entry-Level Writing requirement prior to matriculation, and they have sufficient math preparation to enroll in MATH 7A (Calculus for the Life Sciences) or 9A (First-Year Calculus Part 1) upon arrival. Preliminary conditional admission status is maintained as long as the student is an Entomology B.S. student in good standing with a cumulative GPA of at least 3.0. Conditionally admitted students still need to apply for full admission by the end of their junior year as described above.

Overall Requirements
A total of 36 units are required to complete the MS portion. 24 units must be 200-level. No more than 12 units may come from 297 or 299 research units. No more than 12 units of ENMT 100-level courses earned prior to matriculation to graduate status can be applied toward the MS degree requirements.

Course Requirements
1. While in the Combined Entomology B.S.+M.S. Program, students must complete a minimum of 24 units of research (a combination of ENMT 190/197/199 and ENMT 297/299) over 6 consecutive quarters. Students receive credit towards this requirement by completing up to 12 units of ENMT 190/197/199/199H as an undergraduate student and a minimum of 12 units of ENMT 297/299 as a graduate student. Only 12 units of ENMT 297/299 will count toward the 36 unit requirement.
2. A minimum of 9 units of graduate courses and graded 2-unit graduate seminars from this list of courses: ENMT 201, ENMT 202, ENMT 203, ENMT 207, ENMT 209, ENMT 210, ENMT 212, ENMT 219, ENMT 227, ENMT 229, ENMT 230, ENMT 240, ENMT 241, ENMT 242, ENMT 249, ENMT 251, ENMT 252, ENMT 254, ENMT 255, ENMT 256, ENMT 257, ENMT 258, ENMT 262, ENMT 267, ENMT 289, ENMT 290, BPSC 230, BPSC 234, BPSC 246, BPSC 247, EEOB 215, EEOB 217, EEOB 230, EEOB 282, EEOB 283, STAT 231A, STAT 231B.
3. Up to 6 units of upper division 100 level ENMT courses may be taken during the M.S. portion of the program.
4. Enrollment in ENMT 250, is required during all quarters of M.S. study (3 units total).
5. Thesis and Final Oral Examination: Following completion of their research, students submit a written thesis and conclude their studies with an oral public defense of the thesis.

Interested students should check with the Department of Entomology’s Undergraduate Advisors and their Academic Advisor for additional details.

Professional Development
Students in the Entomology B.S.+M.S. Program must participate in the departmental seminar (ENMT 250) for the three quarters of their master’s year and present at the Annual Graduate Student Seminar Day.

Graduate Program
Graduate Program The Department of Entomology offers programs leading to the M.S. (thesis plan) and Ph.D. degrees with specialization in, but not restricted to, the following areas of study:

- Arthropod vectors of human, animal, and plant pathogens
- Behavior
- Biochemistry and Physiology
- Chemical Ecology
- Conservation Biology and Global Change
- Endocrinology and Development
- Ecology and Evolution
- Genetics, Genomics, and Molecular Biology
- Insect Pathology
- Integrated Pest Management
- Invasive Species and Biological Control
- Medical and Veterinary Entomology
- Nematology
- Neuroscience
- Plant-Herbivore Interactions
- Social Insects and Pollination Biology
- Systematics
- Urban Entomology

Information on participating faculty and their research specializations may be found at insects.ucr.edu. University requirements for the M.S. and Ph.D. degrees are given in the Graduate Studies section of this catalog.

Admission
For admission to the graduate program, prospective applicants must have a bachelor’s degree with a major in Entomology, a biological science, Chemistry, Biochemistry, or a suitable equivalent. Regardless of undergraduate major, students must have strength in life sciences. Recommended (but not required for admission) courses vary depending on research focus and include biochemistry, chemistry and organic chemistry, data sciences, entomology, genetics, physics, statistics and other courses specific to research areas.

Credit from these courses does not count toward the unit requirement of the M.S. degree. All applicants whose first language is not English and do not have an undergraduate or graduate degree from an accredited institution where English is the exclusive language of instruction are required to provide a valid and passing English Proficiency exam score. Overall minimum scores are: TOEFL: 80 (iBT); 550 for pBT. IELTS: overall score of 7.0, with no individual component score less than 6.0.

Course Work
All students must take ENMT 201, ENMT 202, and ENMT 203 (14 units).
Seminar Requirements
1. All full-time students must enroll in the ENTM 250 seminar during each quarter in which it is offered. (units vary)
2. Students in the second year and beyond must present a seminar or a poster presentation of their research at the Annual Graduate Student Seminar Day.

Professional Development
Entomology students must complete an annual Individual Development Plan along with their annual progress report and present an annual seminar or poster presentation covering their research investigations at the Annual Graduate Student Seminar Day, and complete ENTM 201.

Doctoral Degree
Each student, with the advice of their Ph.D. Guidance Committee, will select courses that complement their research program and help the student prepare for the qualifying examination (units vary).

Students must take at least four Entomology 2-unit seminar courses for a letter grade from the following list: ENTM 249, ENTM 251, ENTM 252, ENTM 253, ENTM 254, ENTM 255, ENTM 256, ENTM 257, ENTM 258, ENTM 262, ENTM 289 (8 units).

Written and Oral Qualifying Examinations
Advancement to candidacy depends on the student passing written and oral qualifying examinations.

Dissertation and Final Oral Examinations
Following completion of their research, students submit a written dissertation and conclude their studies with an oral public defense of the dissertation.

Teaching Requirement
Ph.D. students must fulfill a three quarter teaching requirement.

Normative Time to Ph.D.
17 quarters

Master’s Degree
Students should refer to the Graduate Studies section of the catalog for the minimum master’s degree requirements.

Each student, with the advice of their M.S. Guidance Committee, will select courses that complement their research program (units vary).

Students must take at least two Entomology 2-unit seminar courses for a letter grade from the following list: ENTM 249, ENTM 251, ENTM 252, ENTM 253, ENTM 254, ENTM 255, ENTM 256, ENTM 257, ENTM 258, ENTM 262, ENTM 289 (4 Units).

Thesis and Final Oral Examination
Following completion of their research, students submit a written thesis and conclude their studies with an oral public defense of the thesis.

Normative Time to M.S.
6 quarters

Opportunities for Interdisciplinary Graduate Study
Faculty from the Department of Entomology also participate in the following additional graduate programs:
- Biochemistry and Molecular Biology
- Cell, Molecular, and Developmental Biology (CMDB)
- Neuroscience
- Chemistry
- Environmental Toxicology
- Evolution, Ecology, and Organismal Biology (EEOB)
- Genetics, Genomics and Bioinformatics

These interdepartmental programs draw on the strengths of distinguished scientists from several units. For further information concerning work in these areas, see the respective program descriptions in the Programs and Courses section of this catalog or contact the CNAS Graduate Student Affairs Center, at (800) 735-0717.

Lower-Division Courses
ENTM 010 Natural History of Insects 4 Lecture, 3 hours; discussion, 1 hour. A study of the world of insects and their impact on humankind. Designed for non-entomology majors. Utilizes living and preserved insects and other visual aids.

ENTM 020 Bees and Beekeeping 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Fundamentals of keeping honey bees, their fascinating social behavior, and their economic importance as pollinators of agricultural crops and as producers of honey and other products. Demonstrations of bee biology and behavior, with colonies of bees, and of beekeeping techniques, equipment, and extraction of honey.

ENTM 050 The Evidence For Evolution 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. Introduces and explores the extensive evidence supporting evolution as the driver of biological diversity. Designed for non-science majors and/or those with limited prior knowledge about biology. Includes the scientific method, paleontology, natural selection, genetics, speciation, and the importance of sex. Addresses the broader need for scientific literacy in society. Cross-listed with BPS 150.

ENTM 060W SciComm: Exploring Effective Communication Methods in the Life Sciences 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENGL 001B with a grade of C- or better, BIOL 005A with a grade of C- or better, ENGL 007, may be taken concurrently; for concurrent enrollment in ENGL 007, review the course titles or topics in the current online Schedule of Classes to find the corresponding ENGL 007 writing workshop. Teaches the process of analyzing and translating scientific research into popular science stories. Introduces the art of science communication through written narratives. Provides resources and guidance on interpretation of scientific literature; interviewing scientists, and pursuing careers in entomology, the broader life sciences, and science writing. Fulfills the third-quarter writing requirement for students who earn a grade of “C” or better for courses that the Academic Senate designates, and that the student’s college permits, as alternatives to ENGL 001C.

Upper-Division Courses
ENTM 100 General Entomology 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005C with a grade of C- or better; restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Introduces the study of insects. Earth’s most diverse group of animals (75 percent of animal species are insects). Covers the anatomy, physiology, ecology, behavior, and diversity of insects. Focuses on insect identification. Cross-listed with BIOL 100.

ENTM 101 Evolution of Insect Genomes 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): BIOL 005C with a grade of C- or better; restricted to class level standing of sophomore, junior, or senior. Introduces the field of insect genomics and bioinformatics. Provides hands-on bioinformatic instruction of structural and functional aspects of insect genomes within an evolutionary framework. Topics include the genomic basis of key insect innovations, insect phenotypes such as pesticide resistance, and host plant specialization. Prior knowledge of coding not required.

ENTM 106 Insect Evolution 3 Lecture, 2 hours; laboratory, 3 hours. Prerequisite(s): BIOL 100/ENTM 100 or consent of instructor. Introduces principles of insect morphology, with emphasis on characters of phylogenetic and adaptive significance and insect evolution. Topics include the comparative anatomy and phylogenetic relationships of extinct and living insect groups. Laboratory emphasizes principles of comparative morphology and evolutionarily important character complexes.

ENTM 107 Insect Biodiversity 4 Lecture, 3 hours; discussion, 1 hour; laboratory, 3 hours. Prerequisite(s): BIOL 100/ENTM 100 or consent of instructor. Introduces the science of insect systematics. Emphasizes the diagnostic characters of the major taxa and insect biodiversity. Laboratories focus on developing skills in insect identification to the family level.

ENTM 108 Biology of Social Insects 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005C with a grade of C- or better. Introduces the diversity of social lifestyles found in insects and the ecological and evolutionary mechanisms that generated this diversity. Emphasizes an integration between classical theoretical studies and modern molecular research on the social insects.

ENTM 109 Field Entomology 4 Laboratory, 4 hours; field, 8 hours. Prerequisite(s): BIOL 100/ENTM 100 or equivalents or consent of instructor. Study and field collection of insects in selected ecological communities from the diversity of life zones comprising Southern California. Students prepare specimens collected to professional standards, identify specimens, and submit their collections for grading and incorporation into the Department of Entomology’s teaching and research collections.
ENTM 111 Molecular Biology and Genomics of Human Disease Vectors Lecture, 2 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A with a grade of C or better; BIOL 051A with a grade of C or better. Introduces human diseases transmitted by insects/arthropods (insect vectors) that claim about a million deaths annually and cause enormous suffering globally. Highlights adaptations that have contributed to the evolutionary success of disease vectors as well as biotechnological advances in vector control.

ENTM 112 Systematics Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005C or equivalent. Principles and philosophy of classification: phylogenetic and phenetic methods, species concepts, taxonomic characters, evolution, hierarchy of categories, and nomenclature. Cross-listed with BIOL 112, and BPSC 112.

ENTM 114 Aquatic Insects Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, or consent of instructor. Investigates aquatic insects as nutrient cyclers, pollution indicators, disease vectors, and fish food. Involves identification of major orders and families, morphological and physiological adaptations, and life history strategies. Laboratory emphasizes identification (collection) and includes a group field ecology project and two weekend field trips.

ENTM 123 Outreach and Science Communication in Entomology Lecture, 2 hours; laboratory, 3 hours; workshop, 1 hour. Prerequisite(s): ENTM 100 with a grade of C- or better; restricted to class level standing of junior, or senior; or consent of instructor. Covers theory, principles, and practice of science communication using insects as models. Addresses the history of outreach, planning and conducting outreach events, and science communication. Focuses on digital outreach content. Includes designing displays, classroom/public presentation training and practice, interpersonal communication skills, and participation in the Insect Fair. Credit is awarded for one of the following ENTM 123 or ENTM 423.

ENTM 124 Agricultural Entomology Laboratory, 4 hours; field, 8 hours. Prerequisite(s): BIOL 100/ENTM 100 or equivalent or consent of instructor. Identification, life history, ecology, distribution, and management of key pest and beneficial species learned through field observation, discussions with industry representatives, and laboratory study. Detailed notes and collections from field trips to all major growing regions of Southern California form the basis for laboratory discussion.

ENTM 125 Pesticides, Biological Organisms, and the Environment Lecture, 3 hours. Prerequisite(s): two of the following courses: BIOL 005A; BIOL 005B; BIOL 005C; CHEM 008A and CHEM 08LA or CHEM 08HA and CHEM 08HLA; CHEM 008B and CHEM 08LB or CHEM 08HB and CHEM 08HBLB; CHEM 008C and CHEM 08LC or CHEM 08HC and CHEM 08HLC. An introduction to the chemistry, mode of action, and use of insecticides, acaricides, herbicides, and biopesticides from discovery to environmental interactions. Includes genetics of pesticide resistance development and government regulation. Cross-listed with ENTX 125, and PLPA 125.

ENTM 126 Medical and Veterinary Entomology Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005B, BIOL 005C, or consent of instructor. Covers biology, ecology, and management of arthropods that affect human and animal health. Considers arthropods as direct pests and vectors of notorious diseases (e.g., malaria, plague). Also addresses disease epidemiology and prevention, as well as control of pests and associated diseases.

ENTM 127 Insect Ecology Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 051A or BIOL 020, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 008C or CHEM 08HC, MATH 007B or MATH 009B or MATH 09HB, PHYS 002C or PHYS 02HC, PHYS 02LC or PHYS 02HLC, BCH 100 or BCH 110A or BCH 110HA, one course in statistics; or consent of instructor. Introduces principles of insect ecology with examples emphasizing the Arthropoda. Topics include factors governing population growth; ecological and evolutionary interactions with hosts, competitors, and natural enemies; adaptations of ecological communities; and adaptations to different environments. Cross-listed with BIOL 127.

ENTM 128 Principles of Insect Pest Management Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENTM 100 with a grade of C- or better. Covers factors influencing insect pest populations and various control methods (biological, chemical, cultural, genetics, host-plant resistance, mechanical, physical, and quarantine). Discusses the principle of integrated pest management (IPM) and highlights examples in agricultural, public health, urban, and veterinary IPM.

ENTM 129 Introduction to Biological Control 2 Lecture, 2 hours. Prerequisite(s): BIOL 100/ENTM 100 or consent of instructor. Principles and methods of biological control; biology and behavior of entomophagous insects; historical and critical review of important world projects.

ENTM 129L Introduction to Biological Control Laboratory 2 Laboratory, 6 hours. Prerequisite(s): ENTM 129L (it is strongly recommended that ENTM 129L be taken concurrently with ENTM 129). Laboratory identification of entomophagous insects; experiments designed to illustrate various types of parasitism; familiarization with mass rearing and culture techniques for entomophagous insects.

ENTM 130 Invasion Ecology Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005C with a grade of C- or better, BIOL 102 with a grade of C- or better; or consent of instructor. Explores the introduction, establishment, and impact of non-native, invasive species. Considers how invasions differ across taxonomic groups from pathogens to plants to insects.

ENTM 133 Urban Entomology Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 100/ENTM 100 or consent of instructor. Biology and management of arthropod pests of the urban-industrial community with an emphasis on structural, household, and stored product pests. Exercises on the recognition and identification of these pests, their life histories, and strategies for their control.

ENTM 139 The Evolution of Conflict and Cooperation: Cheaters and Altruists Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005C, or consent of instructor. Explores the evolution of selfish and selfless behavior. An analysis of the evolutionary forces that create either conflict or cooperation among genes, microorganisms and their hosts, and kin. Cross-listed with MCBL 139.

ENTM 149 Special Topics Undergraduate Entomology 1 to 4 Lecture, 1 to 4 hours; laboratory, 0 to 12 hours. Prerequisite(s): BIOL 005C with a grade of C- or better; or consent of instructor. Explores topics in entomology within the area of specialization of the instructor(s). Content emphasizes recent advances in the special topic area and varies accordingly. Course is repeatable as content or topic changes to a maximum of 12 units.

ENTM 154 Forensic Entomology Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005C with a grade of C- or better; restricted to class level standing of sophomore, or junior, or senior; or consent of instructor. Introduces the application of entomological principles and collection of entomological data to be used as evidence in courts of law. Explores the basis of using insects to determine time and place of death in criminal cases including the collection, handling, and identification of insects of forensic importance. Cross-listed with BIOL 154.

ENTM 162 Insect Behavior Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005C with a grade of C- or better; or BIOL 100 with a grade of C- or better; or ENTM 100 with a grade of C- or better; restricted to class level standing of sophomore, or junior, or senior; or consent of instructor. An analysis of the mechanisms that cause and control behavioral reactions of insects. Emphasizes ethological and physiological knowledge concerning orientation mechanisms, communication systems, learning, and the role of the nervous system in integrating behavior in insects. Cross-listed with BIOL 162.

ENTM 173 Insect Physiology Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005A, BIOL 005B; CHEM 008A or CHEM 08HA; CHEM 008B or CHEM 08HB; CHEM 008C or CHEM 08HC; CHEM 08LA or CHEM 08HLA; CHEM 08LB or CHEM 08HBLB; CHEM 08LC or CHEM 08HLC; restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Introduction to principles of insect physiology. Covers growth, development and hormones, cuticle, nervous system, circulation, respiration, digestion, nutrition, excretion, reproduction, water balance, and temperature relations. Prior knowledge of insects not required. Cross-listed with BIOL 173.

ENTM 180 Capstone Research Seminar in Entomology Seminar, 1 hour; discussion, 1 hour. Prerequisite(s): ENTM 107, upper-division standing in Entomology; or consent of instructor; ENTM 173 is recommended. Capstone course that provides undergraduate students majoring in Entomology with the experience of synthesizing and integrating knowledge and skills gained throughout the Entomology program. Satisfactory (S) or No Credit (NC) grading is not available.
ENTM 190 Special Studies 1 to 4 Individual Study, 3 to 12 hours. Prerequisite(s): upper-division standing and consent of instructor. Directed studies by a faculty member to address specific curricular needs. A written proposal signed by the supervising faculty member and the undergraduate advisor is required. Course is repeatable to a maximum of 4 units.

ENTM 197 Research For Undergraduates 1 to 4 Research, 3 to 12 hours. Prerequisite(s): upper-division standing and consent of instructor. Original research conducted under faculty supervision. A written proposal signed by the supervising faculty member and the undergraduate advisor is required. Requires a formal oral presentation, poster project, or a written report. Course is repeatable to a maximum of 6 units.

ENTM 198I Individual Internship in Entomology 1 to 12 Written work, 1 to 12 hours; internship, 2 to 24 hours. Prerequisite(s): restricted to class level standing of sophomore, junior, or senior; and consent of instructor. Provides an off-campus internship related to entomology. Internship conducted in the public or private sector but is jointly supervised by an off-campus sponsor and a faculty member in Entomology. Requires an initial written proposal, journal or lab notebook and a final written report. Course is repeatable to a maximum of 16 units.

ENTM 199 Senior Research 1 to 4 Research, 3 to 12 hours. Prerequisite(s): senior standing and consent of instructor. Research in entomology performed under supervision of a faculty member. A written proposal signed by the supervising faculty member and the undergraduate advisor is required. Requires a formal written report in the format of a research publication. Course is repeatable to a maximum of 6 units. Credit is awarded for only one of ENTM 199 or ENTM 199H.

ENTM 199H Senior Honors Research 1 to 5 Laboratory, 3 to 15 hours. Prerequisite(s): senior status; consent of instructor; a GPA of 3.5 or better in Entomology courses and 3.2 in all University course work. Honors course corresponding to ENTM 199. Research in entomology under supervision of a faculty member in entomology. A written proposal signed by the supervising faculty member and the undergraduate advisor is required. The student will submit a written report. Satisfactory (S) or No Credit (NC) grading is not available. Course is repeatable to a maximum of 6 units. Credit is awarded for only one of ENTM 199 or ENTM 199H.

Graduate Courses

ENTM 201 Core Areas of Entomology I: Subcellular-Cellular Disciplines 5 Lecture, 3 hours; discussion, 1 hour; laboratory, 3 hours. Prerequisite(s): BCH 100, may be taken concurrently or BCH 109, may be taken concurrently or BCH 110HA, may be taken concurrently; graduate standing. Introduces principles of molecular biology and insect physiology. Topics include genetic material and mechanisms, genomics, bioinformatics, gene control, genetic manipulations, endocrine and hormonal signaling, ecodysis, reproduction, and the muscle, nervous, and sensory systems.

ENTM 202 Core Areas of Entomology II: Suborganismal-Organismal Disciplines 5 Lecture, 3 hours; discussion, 1 hour; laboratory, 3 hours. Prerequisite(s): ENTM 201; graduate standing or consent of instructor. Introduces principles of insect morphology, insect evolution, and insect behavior. Topics include morphology, systematic theory, evolution, insect identification, and behavior.

ENTM 203 Core Areas of Entomology III: Supraorganismal Disciplines 5 Lecture, 4 hours; laboratory, 3 hours. Prerequisite(s): ENTM 202; undergraduate course in ecology; graduate standing; or consent of instructor. Introduces principles of insect ecology, genetics, evolution, and pest management. Addresses insect population dynamics and community interactions, genetics of geographic variation, insect behavior, and the management and control of pestiferous species. Includes computer simulations and use of molecular tools applied to supraorganismal phenomena.

ENTM 210 Molecular Biology of Human Disease Vectors 3 Lecture, 2 hours; seminar, 1 hour. Prerequisite(s): consent of instructor. Covers the molecular aspects of vectors transmitting most dangerous human diseases. Involves lectures and student presentations about current issues in molecular biology and genomics of vector insects and pathogens they transmit. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CMDB 210, and MCBL 210.

ENTM 211 Genetic Technologies in Pest Insects 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Introduces the concepts, history, theory, application, and regulatory and societal issues of insect genetic control. Includes laboratory instruction in contemporary insect genetic techniques of CRISPR-mediated gene editing, transposon-mediated insect transgenesis, and site-specific recombination as applied to insect control.

ENTM 212 Ecological Systems in Space and Time 4 Lecture, 3 hours; field, 30 hours per quarter. Prerequisite(s): one upper-division undergraduate course in population or community ecology or paleoecology; or consent of instructor. Focuses on how ecological systems are interpreted and reconciled at the community, landscape, and paleontological scales. Addresses the role of extrinsic factors operating at each of these scales. Also examines the historical development of our understanding of ecological systems at various scales. Cross-listed with EEOB 212, and GEO 212.

ENTM 219 Theory of Systematics 4 Lecture, 4 hours. Prerequisite(s): BIOL 112/BPSC 112/ENTM 112 or equivalent or consent of instructor. Examines topics developed around a series of classical and recent papers on the principles, philosophy, and methodology of modern systematics and phylogenetic methods. Cross-listed with EEOB 219, and GEO 219.

ENTM 220 Entomophagous Insects 4 Lecture, 2 hours; laboratory, 6 hours. Prerequisite(s): BIOL 100/ENTM 100 or equivalent, graduate standing or consent of instructor. Introduces the biology and identification of entomophagous insects. Students collect and rear parasites and prepare specimens according to professional standards. Laboratory identification focuses on the family level for parasitic insects. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

ENTM 240 Research Methods in Insect Chemical Ecology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): consent of instructor. Survey of the methods used in the isolation, identification, and bioassay of biologically active natural products. Topics include bioassay design and execution, and microscale chemical separation and identification techniques. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade.

ENTM 241 Insect-Plant Interactions 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 127/ENTM 127 or consent of instructor. Concepts of the development and maintenance of ecological associations between plants and arthropod herbivores in ecological and evolutionary time; organization of arthropod communities on plants; phytochemical basis for the mediation of plant-arthropod associations; coevolution of plants and herbivorous insects; manipulation of plant-arthropod associations in arthropod pest management programs.

ENTM 242 Development of Hypotheses and Research Design 3 Lecture, 1 hour; discussion, 1 hour; written work, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Teaches fundamentals of research topic selection, development of hypotheses, and selection of experimental designs. Students prepare full-length federal grant proposals, then review and rank them in grant panel review format.

ENTM 249 Special Topics in Entomology 1 to 6 Lecture, 1 to 6 hours; laboratory, 0 to 15 hours. Prerequisite(s): graduate standing or consent of instructor. Explores topics in entomology within the area of specialization of each faculty member. Content emphasizes recent advances in the special topic area and varies accordingly. Course is repeatable as content changes.

ENTM 250 Seminar in Entomology 1 Seminar, 1 hour. Prerequisite(s): graduating standing. A series of lectures by visiting scientists, staff and advanced graduate students on research topics in entomology and allied fields. Graded Satisfactory (S) or No Credit (NC).

ENTM 251 Seminar in Insect-Plant Interactions 2 Seminar, 2 hours. Prerequisite(s): graduate standing; or consent of instructor. Provides rigorous examinations and interpretation of recent publications in the area of insect-plant interactions. Subject matter varies from year to year. Course is repeatable.
ENTM 252 Seminar in Insect Behavior 2 Seminar, 2 hours. Prerequisite(s): BIOL 162/ENTM 162 or consent of instructor. An analysis and interpretation of published experimental data dealing with insect behavior, and an attempt to derive general principles underlying behavior. Subject matter varies from year to year. Course is repeatable as content changes.

ENTM 253 Seminar in Urban and Industrial Entomology 2 Seminar, 2 hours. Prerequisite(s): graduate standing; or consent of instructor. Reviews and analyzes advanced and timely topics in urban and industrial entomology. Students who present a seminar receive a letter grade; other students receive a Satisfaction (S) or No Credit (NC) grade. Course is repeatable.

ENTM 254 Seminar in Biological Control 2 Seminar, 2 hours. Prerequisite(s): BIOL 127/ENTM 127, ENTM 129; or consent of instructor. Addresses concepts, questions, and hypotheses in biological control. Students who present a seminar receive a letter grade; other students receive a Satisfaction (S) or No Credit (NC) grade. Course is repeatable.

ENTM 255 Seminar in Medical and Veterinary Entomology 2 Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Rigorous review and analysis of advanced topics in medical and veterinary entomology and related disciplines. Students who present a seminar receive a letter grade; other students receive a Satisfaction (S) or No Credit (NC) grade. Course is repeatable as content changes.

ENTM 256 Seminar in Systematic Entomology 2 Seminar, 2 hours. Prerequisite(s): BIOL 112/BPSC 112/ENTM 112 or consent of instructor. Selected topics in insect systematics. Students who present a seminar receive a letter grade; other students receive a Satisfaction (S) or No Credit (NC) grade. Course is repeatable as content changes.

ENTM 257 Pollinators and Pollination Seminar 2 Seminar, 2 hours. Prerequisite(s): graduate standing; or consent of instructor. Selected topics in pollinator health and pollination. Students who present a seminar receive a letter grade; other students receive a Satisfaction (S) or No Credit (NC) grade. Course is repeatable.

ENTM 258 Seminar in Insect Pest Management 2 Seminar, 2 hours. Prerequisite(s): consent of instructor. Selected topics in insect pest management. Students who present a seminar receive a letter grade; other students receive a Satisfaction (S) or No Credit (NC) grade. Course is repeatable as content changes.

ENTM 261 Seminar in Genetics, Genomics, and Bioinformatics 1 Seminar, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Oral reports by visiting scholars, faculty, and students on current research topics in Genetics, Genomics, and Bioinformatics. Graded Satisfaction (S) or No Credit (NC). Course is repeatable. Cross-listed with BCH 261, BIOL 261, BPSC 261, PLPA 261, and GEN 261.

ENTM 262 Molecular Biology of Arthropod Disease Vectors 2 Seminar, 1 hour; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Seminar series sponsored by the Center for Disease-Vector Research at the Institute for Integrative Genome Biology. Provides an opportunity for graduate students to discuss current issues of molecular biology and genomics of vector insects and pathogens they transmit with guest speakers. Course is repeatable to a maximum of 4 units. Cross-listed with MCBL 262.

ENTM 271 Research Seminar in Management of Vegetable Crop Pests 1 Seminar, 1 hour. Prerequisite(s): consent of instructor. Seminar and critical discussion emphasizing current research and advances in management of vegetable crop pests. Graded Satisfaction (S) or No Credit (NC). Course is repeatable.

ENTM 272 Research Seminar in Insect Communication and Behavior 1 Seminar, 1 hour. Prerequisite(s): consent of instructor. Seminar and critical discussion emphasizing current research and advances in insect communication and behavior. Graded Satisfaction (S) or No Credit (NC). Course is repeatable.

ENTM 276 Research Seminar in Medical, Urban, and Veterinary Entomology 1 Seminar, 1 hour. Prerequisite(s): consent of instructor. Seminar and critical discussion emphasizing current research and advances in medical, urban, and veterinary entomology. Graded Satisfaction (S) or No Credit (NC). Course is repeatable.

ENTM 277 Research Seminar in Insect Biochemistry and Toxicology 1 Seminar, 1 hour. Prerequisite(s): consent of instructor. Seminar and critical discussion emphasizing current research and advances in insect biochemistry and toxicology. Graded Satisfaction (S) or No Credit (NC). Course is repeatable.

ENTM 289 Special Topics in Neuroscience 2 Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. An interdisciplinary seminar consisting of student presentations and discussion of selected topics in neuroscience. Content and instructor(s) vary each time course is offered. Students who present a seminar receive a letter grade; other students receive a Satisfaction (S) or No Credit (NC) grade. Course is repeatable. Cross-listed with BCH 289, BIOL 289, CHEM 289, NRSC 289, and PSYC 289.

ENTM 290 Directed Studies 1 to 6 Prerequisite(s): graduate standing. Literature studies on special topics under direction of a member of the staff. Graded Satisfaction (S) or No Credit (NC). Course is repeatable.

ENTM 291 Individual Study in Coordinated Areas 1 to 6 Prerequisite(s): graduate standing. Faculty assisted programs of individual study for candidates who are preparing for examinations. The following rules apply: 1) Up to 6 units may be taken prior to award of the Master's degree, such units to be in addition to minimum unit requirements for the degree; 2) Up to 12 additional units may be taken prior to advancement to candidacy for the Ph.D.; 3) The course may be repeated within these limits. Graded Satisfaction (S) or No Credit (NC).

ENTM 297 Directed Research 1 to 6 Prerequisite(s): graduate standing. Exploratory research toward the development of the dissertation problem or other research not specifically for thesis or dissertation. Graded Satisfaction (S) or No Credit (NC). Course is repeatable.

ENTM 299 Research For Thesis Or Dissertation 1 to 12 Research, 3 to 36 hours. Prerequisite(s): graduate standing. Original research in an area selected for the advanced degree. Course is repeatable.

Professional Courses

ENTM 301 Teaching Entomology at the College Level 1 Seminar, 1 hour. Prerequisite(s): graduate standing in Entomology. A program of weekly meetings and individual formative evaluation required of new entomology Teaching Assistants. Covers instructional methods and classroom/section activities most suitable for teaching Entomology. Conducted by departmental faculty or the Teaching Assistant Development Program. Graded Satisfaction (S) or No Credit (NC). Course is repeatable.

ENTM 302 College Teaching Practicum 1 to 4 Practicum/Consultation, 3 to 12 hours. Prerequisite(s): graduate standing and consent of instructor. Supervised teaching in college level classes under supervision of the course instructor. Graded Satisfaction (S) or No Credit (NC). Course is repeatable.

ENTM 303 Philosophy and Pedagogy of Teaching Undergraduate Life Sciences 3 Lecture, 1 hour; laboratory, 3 hours; workshop, 1 hour. Prerequisite(s): graduate standing in life sciences. Explores the opportunities and challenges associated with developing an undergraduate course in the life sciences. Emphasizes determining how students learn, as well as exploring contemporary instruction methods that foster student engagement in the classroom. Graded Satisfaction (S) or No Credit (NC). Cross-listed with BIOL 303.

ENTM 423 Outreach and Science Communication in Entomology 4 Lecture, 2 hours; laboratory, 3 hours; workshop, 1 hour. Prerequisite(s): ENTM 202 with a grade of C- or better; graduate standing; or consent of instructor. Covers professional development of science communication using insects as models. Addresses the history of outreach, planning and conducting outreach events, and science communication. Focuses on digital outreach content through different media. Includes designing displays, classroom/public presentation training and practice, communication skills, and participation in the Insect Fair. May be taken Satisfaction (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following ENTM 423 or ENTM 123.
Environmental Sciences

Subject abbreviation: ENSC
College of Natural and Agricultural Sciences

Jianying Gan, Ph.D., Chair
Andrew Gray Ph.D. Vice Chair
CNAS Undergraduate Academic Advising Center, (951) 827-7294;
CNASstudent@ucr.edu
envsci@ucr.edu

Professors
Roya Bahreini, Ph.D. Atmospheric Science
Jianying “Jay” Gan, Ph.D.
Environmental Chemistry
Daniel Schlenk, Ph.D. Aquatic Ecotoxicology
Jiri Simunek, Ph.D. Hydrology
David Volz, Ph.D. Environmental Toxicology

Professors Emeriti
Michael A. Anderson, Ph.D. Environmental Chemistry
Christopher Amrhein, Ph.D. Soil Chemistry
Janet T. Arey, Ph.D. Atmospheric Chemistry
Roger Atkinson, Ph.D. Atmospheric Chemistry
Andrew C. Chang, Ph.D. Agricultural Engineering
David M. Crohn, Ph.D. Biosystems Engineering
David E. Crowley, Ph.D. Soil Microbiology
Robert C. Graham, Ph.D. Soil Mineralogy
William A. Jury, Ph.D. Soil Physics
Lanny J. Lund, Ph.D. Soil Morphology, Genesis, and Classification
Albert L. Page, Ph.D. Soil Chemistry
David R. Parker, Ph.D. Soil Biogeochemistry
Roberto Sánchez-Rodríguez, Ph.D. Environmental Policy
James Sickman, Ph.D. Watershed Hydrology and Biochemistry
Henry J. Vaux, Jr., Ph.D. Natural Resource Economics
Laosheng Wu, Ph.D. Soil Physics
Marylynn V. Yates, Ph.D. Environmental Microbiology
Paul J. Ziemann, Ph.D. Atmospheric Science

Associate Professors
Hoari Ajami, Ph.D. Groundwater Hydrology
Andrew Gray, Ph.D. Watershed Hydrology
Amir Haghverdi, Ph.D. Agricultural and Urban Water Management
Francesca Hopkins, Ph.D. Climate Change and Sustainability
Ying-Hsuan Lin, Ph.D. Environmental Toxicology

Assistant Professors
Pete Homay, Ph.D. Ecosystem and Soil Microbial Processes
King-Fai Li, Ph.D. Environmental Science/Statistics
William Porter, Ph.D. Environmental Sciences
Samantha C. Ying, Ph.D. Soil Biogeochemistry

Cooperating Faculty
Emma Aronson, Ph.D. (Plant Pathology and Microbiology)
Ariel Dinar, Ph.D. (School of Public Policy)
Darrel Jenerette, Ph.D. (Botany and Plant Sciences)
Kurt A. Schwabe, Ph.D. (School of Public Policy)
Haofei Zhang, Ph.D. (Chemistry)

Major
The Department of Environmental Sciences offers B.A. and B.S. degrees in Environmental Sciences. Students are encouraged to concentrate their studies in one of five specialization areas: Soil Sciences, Hydrologic Sciences, Atmospheric Sciences, Environmental Toxicology, and Environmental Management.

Modern human activities related to natural resource development, agriculture, urbanization, industry, and transportation are placing unprecedented pressure on the earth’s life support systems. Changes taking place in atmospheric physics and chemistry, land cover, freshwater and marine resources, and chemical cycling threaten the ability of human society to sustainably meet current and future needs. Science-based solutions are needed to sustainably manage our natural resources and improve public health. To help meet these challenges, our program emphasizes training for students in the biological, chemical, and physical aspects of environmental sciences and health, centered on the major environmental media of air, soil, water, and the biosphere.

The structure of the Environmental Sciences curriculum provides a broad scope of instruction that enables students to explore various disciplines and professions focused on solving environmental problems. All students majoring in Environmental Sciences must complete a set of “core requirements” consisting of courses that provide a basic understanding of the physical, biological, and social sciences and their application to the analysis of environmental processes and management issues. In addition to the core requirements, students must complete 8 units of lower-division and 20 units of upper-division elective courses.

Students have the option to select their electives from different specialization areas or to focus their training in one of the five specialization areas based on their own educational and career objectives. The specialization areas of Soil Sciences, Hydrologic Sciences, or Atmospheric Sciences are suitable for students wishing to maintain a broad range of choices in technically-oriented environmental professions such as pollution control, hazardous materials management, public health, natural resource management, environmental monitoring, and impact analysis. These options also provide the necessary background for graduate study in soil science, water resources, or atmospheric sciences as well as interdisciplinary areas such as ecosystem science and forestry. The Environmental Toxicology specialization area emphasizes the chemistry and biochemistry of toxic substances in the environment, preparing students for careers dealing with the control of contaminants in various environmental media as well as related fields such as public health and industrial hygiene. The Environmental Management specialization area is oriented for the social context of environmental sciences and prepares students for careers dealing with environmental regulation, land-use planning, environmental impact analysis, and administration of environmental protection programs.

Environmental Internship Program
The Environmental Internship Program offers students opportunities to work with government agencies, private firms, and nonprofit organizations involved in environmental affairs. As excursions into professional life, internships provide “hands-on” experience in applying the principles presented in courses. Beyond the highly specialized training associated with on-the-job activities, students can gain insights into their aptitudes, aspirations and work habits that enable them to clarify their academic and career objectives. Professional acquaintances established during internships can continue to serve as important contacts for students after the internship is completed.

Although most internships are part-time (12-15 hours per week) positions in the Riverside area, organizations that host student interns are located throughout the United States, including Washington, D.C. and Sacramento, CA. Students working as interns may receive stipends, hourly wages, or serve as volunteers, depending upon the specific appointment. Up to 16 units of credit toward the bachelor’s degree may be earned by developing an academic component of the internship in consultation with a faculty supervisor and enrolling in ENSC 198-1.

Undergraduate Research
Students interested in enhancing the status of knowledge about environmental processes or seeking new solutions to environmental problems may gain training and experience as part-time employees in the department’s research laboratories and other research facilities, such as the U.S. Salinity Laboratory, located on campus, and the USDA Pacific Southwest Research Station, located on Canary Crest Drive. Those wishing to conduct their own research under faculty supervision may earn academic credit by enrolling in ENSC 197. Expenses for research laboratory and field experiments are eligible for funding by the campus mini-grant program which supports undergraduate research and creative activity.

California Teach-Science and Mathematics Initiative (CalTeach-SMI)
California Teach-Science and Mathematics Initiative (CalTeach-SMI) has a goal of addressing the critical need of highly qualified K-12 science and mathematics teachers in California. With an economy increasingly reliant on science, technology, engineering, and mathematics (STEM) and the anticipated large scale retirement of qualified teachers, this is an essential time to explore and prepare for a career in teaching science or mathematics.
CalTeach-SMI at UCR offers undergraduate students opportunities to explore STEM teaching as a career option. Through CalTeach-SMI, students receive advising and mentoring to prepare for entrance into an intern teaching credential program while diligently coordinating with academic advisors to ensure completion of STEM degree requirements. The CalTeach-SMI Resource Center provides future STEM teachers opportunities to promote planning and professional development towards a science/mathematics education career.

For more information about the CalTeach-SMI program, please visit smi.ucr.edu, the Resource Center at 1114 Pierce Hall, or on Facebook at facebook.com/ScienceMathInitiativeAtUcr and on Instagram at instagram.com/smiatucr/.

Transfer Selection Criteria

Applicants to majors in the College of Natural and Agricultural Sciences are selected on the basis of academic preparation, as assessed by their GPA and the strength of preparation for the intended major. A GPA of at least 2.70 is required. (This is a baseline GPA for consideration and not a guarantee of admission.)

In addition, applicants will need to complete course courses comparable to at least two of the following UCR year-long sequences in order to meet selection criteria for this major. Courses must be completed with grades of "C" or better:

- MATH 007A or MATH 009A; MATH 007B or MATH 009B (mandatory)
- At least one sequence from:
  - BIOL 005A/BIOI 05LA or BIOL 020 and BIOL 005B (and BIOL 005C, if articulated)
  - CHEM 001A, CHEM 01LA, CHEM 01B, CHEM 01LB, CHEM 001C, and CHEM 01LC
- Organic chemistry (one-year lower-division), each course completed with a grade of "B" or better
  - PHYS 002A, PHYS 021A, PHYS 002B, PHYS 021B, PHYS 002C, and PHYS 021C
  - PHYS 040A, PHYS 040B, and PHYS 040C
  - MATH 009C, MATH 010A, MATH 010B, and MATH 046

Courses must be completed with a letter grade with no grade lower than a "C." Students should visit assist.org for updated and comprehensive major preparation requirements.

University Requirements

See Undergraduate Studies section.

College Requirements

See College of Natural and Agricultural Sciences, Colleges and Programs section.

Some of the following requirements for the major may also fulfill some of the College's breadth requirements. Consult with a department advisor for course planning.

Major Requirements

The major requirements for both the B.A. and the B.S. degrees in Environmental Sciences are as follows: Students must fulfill all required core courses in environmental science, biology, chemistry, math, physics, and statistics with a grade point average of 2.0 or better and no grade lower than a C-. If a grade lower than a C- is received in 2 or more core courses required for the major, either in separate courses or repetitions of the same course, the student may be discontinued from the major. Students must, under such circumstances, petition the department to remain in the major. Students in Environmental Sciences are required to demonstrate adequate progress towards earning the degree. Adequate progress is defined as completion of MATH 009B or MATH 09HB or MATH 007B prior to the beginning of the Winter Quarter of the second year of residence or Junior standing (>90 units) and at least one course from ENSC 100, ENSC 101, or ENSC 102 must be completed prior to the end of the third year of residence or senior standing (>135 units).

Note

To gain maximum benefit from participating in the Undergraduate Research and Environmental Internship Programs, students intending to enroll in EN 197 and EN 198-I should contact their advisor during the quarter prior to enrollment in these courses.

Core Requirements

1. Lower-division requirements (77–79 units):
   - a) ENSC 001 and ENSC 002
   - b) BIOL 005A, BIOL 05LA or BIOL 020, BIOL 005B
   - c) CHEM 001A or CHEM 01HA, CHEM 001B or CHEM 01HB, CHEM 001C or CHEM 01HC, CHEM 01LA or CHEM 01LB, CHEM 01LC or CHEM 01LC
   - d) CHEM 008A and CHEM 01LA or CHEM 08HA and CHEM 08HLA; CHEM 008B and CHEM 08LB or CHEM 08HB and CHEM 08HLB
   - e) MATH 007A or MATH 009A or MATH 09HA; MATH 007B or MATH 009B or MATH 09HB
   - f) PHYS 002A or PHYS 021A, PHYS 002B or PHYS 021B, PHYS 002C or PHYS 021C
   - g) POSC 010
   - h) STAT 010
   - i) One course from ENSC 006, ECON 006, PUBL 001, ECON 003, or POSC 020

2. Upper-division requirements (18 units):
   - ENSC 100, ENSC 101, ENSC 102, ENSC 110, ENSC 191

Electives

Students are free to choose from the lists below to fulfill their lower-division and upper-division elective requirements:

1. Lower-division electives (8 units):
   - At least two electives from BIOL 005C, CHEM 005, CHEM 008C and CHEM 08LC, CHEM 08HC and CHEM 08HLC, MATH 009C or MATH 09HC or MATH 010A, GEO 001 or GEO 002
   - 2. Upper-division electives (20 units):
     - At least 20 units of electives from the following list, with a minimum of 16 units from Environmental Sciences or Environmental Toxicology:
       - ENTX 101, ENTX 154, ENSC 103/ENTX 103, ENSC 104, ENSC 105, ENSC 107, ENSC 120/ NEM 120, ENSC 127, ENSC 130, ENSC 133/ MCBL 133, ENSC 134/BPS 134, ENSC 135/ CHEM 135/ENTX 135, ENSC 136/CHEM136, ENSC 138/GE 138, ENSC 139/GE 139, ENSC 140, ENSC 141/GE 141, ENSC 163, ENSC 165, ENSC 175, ENSC 177, GEO 157, GEO 160

Suggested courses of study are also provided below for specialized areas in environmental sciences to assist students to meet minimum employment requirements for entry-level positions in government agencies, nongovernment organizations (NGO), and environmental consulting firms. Students are strongly encouraged to schedule a meeting with a Faculty in their specialization area of interest for curriculum and career advice. A list of core Faculty in each specialization area is available at envisci.ucr.edu/undergrad.

Soil Sciences:

Recommended to meet lower-division electives: BIOL 005C, GEO 001 or GEO 002, MATH 009C or MATH 09HC or MATH 010A; Recommended to meet upper-division electives: ENSC 104, ENSC 107, ENSC 120/NEM 120, ENSC 127, ENSC 133/ MCBL 133, ENSC 134/BPS 134, ENSC 138/GE 138, ENSC 139/GE 139, ENSC 144, ENSC 175, ENSC 177, BPS 146

Hydrologic Sciences:

Recommended to meet lower-division electives: MATH 009C or MATH 09HC or MATH 010A, GEO 001 or GEO 002; Recommended to meet upper-division electives: ENSC 105, ENSC 107, ENSC 116/CHEM 136, ENSC 140, ENSC 163, ENSC 165, ENSC 175, ENSC 177

Atmospheric Sciences:

Recommended to meet lower-division electives: CHEM 005, CHEM 08C and CHEM 08LC, CHEM 08HC and CHEM 08HLC, MATH 009C or MATH 09HC or MATH 010A; Recommended to meet upper-division electives: ENSC 103/ENTX 103, ENSC 130, ENSCI 135/CHEM 135/ENTX 135, ENSC 136/CHEM 136, ENSC 175, ENSC 177, GEO 160

Environmental Toxicology:

Recommended to meet lower-division electives: BIOL 005C, CHEM 005, CHEM 008C and CHEM 08HC and CHEM 08HLC; Recommended to meet upper-division electives: ENTX 101 required + at least 3 electives from ENSC or ENTX: ENSC 103/ENTX 103, ENSC 135/CHEM 135/ENTX 135, ENSC 136/CHEM 136, ENSC 177, CBNS 150/ENTX 150, ENTX 154, BCH 100 or both BCH 110A or BCH 110B or BCH 110B or BCH 110B or BCH 110H or BCH 110H or BCH 110H or BCH 110A or BCH 110B or BCH 110B or BCH 110B or BCH 110H or BCH 110H or BCH 110H or BCH 110H. 
Environmental Management:
Recommended to meet lower-division electives: BIOL 005C, GEO 001 or GEO 002, MATH 009C or MATH 094C or MATH 010A; Recommended to meet upper-division electives: ENSC 103/ENTX 103, ENSC 144, ENSC 153, ENSC 172, ENSC 174, ENSC 175, ENSC 177

Minor
The minor in Environmental Sciences consists of the following.

1. Lower-division requirements (23 or 24 units)
   a) ENSC 002
   b) CHEM 001A, CHEM 001B, CHEM 001C, CHEM 010A, CHEM 011B, CHEM 011C
   c) One course from ENSC 006, ECON 006, PBPL 001, ECON 003, or POSC 020
2. Upper-division requirements (20 units)
   a) ENSC 100, ENSC 101, ENSC 102
   b) Eight (8) units of additional upper-division courses in Environmental Sciences, no more than 4 units of which are in courses numbered 190-198

Of the specified upper-division units, a minimum of 16 units must be unique to the minor and may not be used to satisfy major requirements.

See Minors under the College of Natural and Agricultural Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Environmental Sciences Graduate Program

Subject abbreviation: ENSC
College of Natural and Agricultural Sciences
Jianying Gan, Ph.D., Director
Francesca Hopkins, Ph.D., Graduate Advisor for Continuing Students
Amir Haghverdi, Ph.D., Graduate Advisor for Admission
John Herrings Jr., Student Services Advisor
(800) 735-0717 or (951) 827-2441
envisci@ucr.edu
envisci.ucr.edu

The Environmental Sciences Graduate Program offers the M.S. and Ph.D. degrees in Environmental Sciences.

Advanced training in Environmental Sciences is becoming increasingly necessary to address complex problems involving natural resources and environmental quality. Although this task frequently requires specialized knowledge in various fields of science, it also requires understanding and integration of a wide variety of interacting physical, chemical, biological, and societal influences. This interaction makes graduate study in environmental sciences distinct from many other scientific fields.

We have designed our program to offer advanced training in a number of specialized field areas within environmental sciences, operating within a single graduate degree program administered by the Department of Environmental Sciences. Students trained in the Environmental Sciences Graduate Program can fill many areas of expertise needed in the state and nation. Potential career opportunities exist at regulatory agencies, consulting firms, government and academic research institutions, and industrial research facilities.

Admission
Entry to the program requires completion of a baccalaureate degree in a field appropriate for preparation for graduate study in environmental sciences. Students normally will come to the program from an environmental sciences related discipline such as atmospheric science, aquatic science, earth science, environmental chemistry, hydrology, or soil science; or a basic science such as biology, chemistry, or physics.

Students may conduct research under the supervision of a sponsoring faculty member in any of the following field areas.

In addition to the following requirements, all applicants must meet the general requirements as set forth in this catalog under the Graduate Studies section.

Atmospheric Sciences
The Atmospheric Sciences field area encompasses diverse topics such as atmospheric chemistry and air quality, health effects of air pollution, drivers of radiative forcing and global warming, remote sensing of the atmosphere, and atmosphere-ocean interactions. Students will receive training in observing, modeling, and understanding atmospheric circulation and the fate of atmospheric chemical species. Much of the research being conducted addresses the societal impacts of air pollution and climate change.

Entrance requirements
There are no entrance requirements for the Atmospheric Sciences area beyond the general requirements for admission to the ESQP. It is recommended that students have completed one year of chemistry, as well as courses in general physics, organic chemistry, calculus through integrals, and statistics. Students who have not completed courses required for their research may need to complete additional courses to remedy deficiencies.

Environmental Chemistry and Ecotoxicology
The Environmental Chemistry and Ecotoxicology field area focuses on the sources, physical and chemical transformations, and removal processes of chemicals in soil, water, and air, and their impacts on ecological systems.

Entrance Requirements
There are no entrance requirements for the Environmental Chemistry area beyond the general requirements for admission to the ESQP. For Ecotoxicology, prospective students would be expected to have had courses in General Biology/Zoology and Organic Chemistry. Students who do not have sufficient background to take the core course or specific elective courses may, however, need to first take prerequisite courses.

Environmental Microbiology
The Environmental Microbiology field area encompasses the study of microbial processes in natural and agricultural ecosystems and the effects of microorganisms on environmental processes and environmental quality. Research topics include fundamental research on microbial physiology, genetics, and ecology as related to the environment, applied research on microbial effects on the fate and transport of pollutants, anthropogenic effects on microbial communities, fate and transport of human pathogenic microorganisms in the environment, and the application of microorganisms and microbial assays as indicators of soil and water quality.

Entrance Requirements
Students admitted to the Environmental Microbiology field area are expected to have a baccalaureate degree in biology, microbiology, or closely related field or demonstration of extensive background in biology and microbiology. Recommended prior course work includes chemistry (general, organic, and biochemistry), biology (general and advanced course work), microbiology (general), and statistics (general). Deficiencies in these areas must be remedied during the first year of graduate school.

Environmental and Natural Resource Economics and Policy
The economics and policy field area is not currently accepting new students. Students seeking advanced training in environmental and natural resource economics and policy should contact the Graduate Advisors in the Department of Economics and the School of Public Policy at UC Riverside for alternative programs of study.

Hydrologic Sciences
The Hydrologic Sciences field area offers comprehensive training in the understanding and quantification of physical and biogeochemical processes that govern movement, storage, and quality of water in the environment. Students can specialize in a variety of areas including catchment hydrology, ecohydrology, vadose zone and groundwater hydrology, hydrologic modeling, irrigation and water management in agricultural fields and urban landscapes, catchment biogeochemistry, contaminant fate and transport, earth surface processes, and related areas.

Entrance requirements
There are no entrance requirements for the Hydrologic Sciences area beyond the general requirements for admission to the ESQP. It is recommended that students have completed one year of general chemistry, general physics, organic chemistry, calculus through differential equations, statistics, and physical geology or physical geography.

Soil and Water Sciences
The Soil and Water Science field area offers comprehensive training in the chemistry, physics, biology, and ecology of soils, surface waters and wetlands. Students can specialize in a variety of areas, including soil and aquatic chemistry, limnology, soil-plant relations, biogeochemistry, bioremediation, geomicrobiology, contaminant fate and transport, water resources management, hillslope processes, soil genesis, soil mineralogy and geomorphology, and related areas.
Entrance Requirements
Admission to the Soil and Water Sciences field area requires a baccalaureate degree with preparation in both physical and life sciences. It is recommended that students have completed one year of general chemistry, as well as courses in general physics, organic chemistry, calculus through integrals, general biology, statistics, and physical geology or physical geography.

Environmental Sciences and Management
The Environmental Sciences and Management field area is not currently accepting new students. Students seeking advanced training in environmental management and policy should contact the Graduate Advisors in the Department of Economics and the School of Public Policy at UC Riverside for alternative programs of study.

Course Work
The Ph.D. and M.S. degree programs both require completion of the following courses.
- Each student must complete ENSC 227.
- Each student must complete either ENSC 200 or ENSC 232.
- Each student must complete at least one additional graduate-level, four-unit elective within or outside of the Department of Environmental Sciences. This requirement can also be met by taking an upper division ENSC course concurrently with ENSC 292.
Each student may complete additional upper-division undergraduate courses and/or graduate-level courses depending on the student’s field area and research focus.

Students with a M.S. objective may need to take additional courses to fulfill the requirements of the Plan I (Thesis) or Plan II (Comprehensive Examination) options. Upon acceptance to the program, the student will select an Advisory Committee made up of three members of the participating faculty in the ESGP to assist in the planning of the individualized curriculum. Electives are chosen in consultation with the Advisory Committee.

Students are encouraged to attend a seminar each quarter (to be chosen in consultation with the major advisor). Students must complete 2 units of ENSC 401 (Professional Development in Environmental Sciences) within their first year of entering the ESGP. There is no foreign language requirement for the program.

Master’s Degree
The Department of Environmental Sciences offers the M.S. degree in Environmental Sciences under the Plan I (Thesis) and Plan II (Comprehensive Examination) options. The general requirements for the M.S. degree are found in the Graduate Studies section of the General Catalog.

Course Work
Students must complete the course requirements given above. All students are required to give a presentation annually at the Environmental Sciences Graduate Program Student Symposium.

Plan I (Thesis)
Plan I (Thesis) Students must complete a minimum of 36 quarter units of graduate and upper-division undergraduate courses in, or significantly related to, Environmental Sciences. These must include the course requirements given above. At least 24 of the 36 units must be in graduate courses. A maximum of 12 of these units may be in graduate research for the thesis. No more than 4 units of ENSC 290 and 2 units of graduate seminar courses may be applied toward the degree. A thesis must be written and accepted by the M.S. thesis committee members, and a final oral defense of the thesis must be passed.

Plan II (Comprehensive Examination)
Students must complete a minimum of 36 quarter units of graduate and upper-division undergraduate courses in, or significantly related to, Environmental Sciences. These must include the course requirements given above. At least 18 units must be in graduate courses. Students may count no more than 2 units of graduate seminar courses and 6 units of graduate internship courses toward the required 18 units and no units from graduate research for thesis or dissertation.

Students must take a comprehensive written examination that covers fundamental topics in environmental sciences. The written examination, which is three to four hours long, is prepared and evaluated by a committee appointed by the field director. The examination is taken during the latter part of the final quarter in the M.S. program. Students must wait at least eight weeks before retaking a failed examination. Students failing the examination twice are dismissed from the program.

Normative Time to Degree 2 years

Doctoral Degree
The Department of Environmental Sciences offers the Ph.D. degree in Environmental Sciences. The general requirements for the Ph.D. degree are found in the Graduate Studies section of the General Catalog.

Course Work
Students must complete the course requirements given above. All students are required to give a presentation annually at the Environmental Sciences Graduate Program Student Symposium.

Ph.D. Written Qualifying Examination
Following completion of all course work prescribed by the student’s Advisory Committee, a Ph.D. Written Qualifying Examination will be prepared and administered to the student by a Ph.D. Written Qualifying Examination Committee. The Ph.D. Written Qualifying Examination Committee will consist of at least three faculty members with interests in the student’s line of research. The purpose of this examination is to determine that the student has gained sufficient knowledge in the chosen field to perform professionally and competently. This exam may be attempted only twice. If this exam is failed twice, the student may be redirected to the M.S. degree if the student does not already hold an M.S. in Environmental Sciences or terminated from the program.

Ph.D. Oral Qualifying Examination
A student who satisfactorily passes the Ph.D. Written Qualifying Examination may proceed with the Ph.D. Oral Qualifying Examination, which will focus on the dissertation proposal. This examination is conducted before the Oral Qualifying Examination Committee, consisting of five faculty members, one of whom must be from outside the ESGP. This examination may be attempted only twice. If this exam is failed twice, the student will be redirected to the M.S. degree if the student does not already hold an M.S. in Environmental Sciences or terminated from the program. The Ph.D. Written and Oral Qualifying Examinations will normally be taken at the end of the second year of graduate study and before the start of the third year.

Dissertation
All Ph.D. students must write a doctoral dissertation, which must be read and accepted by all members of the Doctoral Dissertation Committee, comprised of at least three faculty members from the ESGP. A final oral dissertation defense in front of at least three Doctoral Dissertation Committee members is required.

Relationship between Master’s and Doctoral Programs
The M.S. and Ph.D. programs are separate. Students who enter the Ph.D. program do not need to acquire a M.S. degree first, although students may elect to take both.

Normative Time to Degree 5 years

Lower-Division Courses
ENSC 001 Introduction to Environmental Science: Natural Resources 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to environmental science, focusing on natural resource description, management, and conservation. Covers ecosystem characteristics and function; material and energy flows; population dynamics and influence of population on the environment; energy resources and conservation; and mineral and soil resources and their management.

ENSC 002 Introduction to Environmental Science: Environmental Quality 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to environmental science, focusing on the impact of human development and technology on the quality of natural resources and living organisms. Topics include soil, water, and air pollution; water, land, and food resources; wildlife management and species endangerment; toxicology and risk management; and solid and hazardous waste management.

ENSC 003 Contemporary Issues in the Environmental Sciences 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An issue-oriented approach to understanding the scientific principles behind environmental issues. Case studies of environmental issues appearing in the mass media provide the context for assessing the status of scientific knowledge and its role in human decision making.
ENSC 004 Climate Change in California 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduction to the science of contemporary climate change including the drivers and impacts of change to date and into the future focusing on inland Southern California. Addresses individuals facing the climate crisis as well as explores possible solutions to the causes and consequences of climate change.

ENSC 006 Introduction to Environmental Economics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to the basic principles of economics and their application to problems of environmental quality and natural resource utilization. Emphasis is on the failure of markets as a cause of environmental degradation and the role of government in resolving problems of resource scarcity. Does not satisfy the Natural Science breadth requirement for the College of Humanities, Arts, and Social Sciences. Cross-listed with ECON 006.

Upper-Division Courses

ENSC 100 Introduction to Soil Science 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CHEM 001C, CHEM 01LC or CHEM 01HC, CHEM 01HLC; ENSC 001, may be taken concurrently or ENSC 002, may be taken concurrently or CEE 010; or consent of instructor. Explores the fundamental principles of soil science and soils as a natural resource. Introduces the morphology, physics, chemistry, microbiology, fertility, classification, development, and management of soils in relation to the environment.

ENSC 101 Water Resources 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CHEM 001C, CHEM 01LC or CHEM 01HC, CHEM 01HLC; ENSC 001, may be taken concurrently or ENSC 002, may be taken concurrently; or consent of instructor. An introduction to the hydrologic cycle. Covers water sources, distribution, and conveyance, physical, chemical, and biological properties of water, water treatment and reuse; and regulatory framework.

ENSC 102 Introductory Atmospheric Science 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CHEM 001C, CHEM 01LC or CHEM 01HC, CHEM 01HLC; ENSC 001, may be taken concurrently or ENSC 002, may be taken concurrently; or consent of instructor. An introduction to the atmospheric sciences such as wind, the radiation budget, cloud formation, precipitation, pollution, and climate change.

ENSC 103 Environmental Pollution and Health 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENSC 001, ENSC 002. Focuses on the history, theory, and practice of assessing, understanding, and mitigating impacts of the natural and built environment on human health. Reviews core disciplines that underpin the field of environmental health as well as case studies from industrialized, emerging, and developing countries around the world. Cross-listed with ENTX 103.

ENSC 104 Environmental Soil Chemistry 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 005 or ENSC 100 or consent of instructor. Quantitative study of the chemistry of the solid, liquid, and gas phases in soils and sediments. Topics include solid and solution speciation, mineral solubility, ion exchange and adsorption reactions, oxidation-reduction, and the chemistry of organic contaminants and toxic trace elements in soils.

ENSC 105 Ecosystems 4 Lecture, 3 hours; discussion, 1 hour; field trip, 4 hours per quarter. Prerequisite(s): ENSC 002. Introduction to the role of water in ecosystems. Explores the movement of water through ecosystems and interactions with biota across a range of climatic and ecological zones. Examines the major human impacts on hydrology and their ecological and environmental implications. Field trips to representative hydrological systems.

ENSC 107 Soil Physics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 007B or MATH 009B or MATH 09HB; PHYS 002MA, PHYS 002HA; ENSC 100; or consent of instructor. Topics include physical properties of soils and methods of evaluation. Emphasizes movement of water, heat, gases, and chemicals through soil.

ENSC 110 Environmental Statistics 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): MATH 007B or MATH 009B or MATH 09HB, STAT 008B or STAT 010; or consent of instructor. Introduces the use of computers to solve mathematical problems arising in environmental sciences. Applies various computational methods (such as linear regression, optimization, Monte Carlo simulation, and data assimilation) to environmental problems using R.

ENSC 120 Soil Ecology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 002 or BIOL 005A, BIOL 05LA; CHEM 001C, CHEM 01LC or CHEM 01HC, CHEM 11HC; ENSC 100; or consent of instructor. A study of soil biota and their relationships with plants and the soil environment. Emphasizes life strategies of soil organisms and methods to study them. Examines importance of microbial and faunal groups from the rhizosphere to the ecosystem. Explores impact on soil fertility, carbon and nitrogen cycles, and Earth's climate. Cross-listed with NEM 120.

ENSC 127 Fate and Transport of Contaminants in the Environment 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENSC 100; MATH 007B or MATH 009B or MATH 09HB; or consent of instructor. Topics include interactions of environmental conditions with abiotic and biotic transformation and transport of major organic and inorganic contaminants in the environment.

ENSC 130 Weather and Climate 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENSC 001; or consent of instructor. Introduces basic principles of atmospheric dynamics on both short- and long-term time scales focusing on current examples and in-class demonstrations. Covers basic concepts related to atmospheric dynamics such as wind, the radiation budget, precipitation, and natural disasters. Includes core principles of long-term changes.

ENSC 133 Environmental Microbiology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 05LA or BIOL 020, BIOL 005B, BIOL 005C; or consent of instructor. Introduction to nonpathogenic microbial organisms in the environment. Topics include an introduction to microbial biogeochemical cycles and the metabolic genetic diversity, methods, symbiotic interactions, biofilms, and geomicrobiology and biogeochemistry. Explores life in extreme environments and the effects of the physical and chemical environment on microbes. Cross-listed with MCBL 133.

ENSC 134 Soil Conditions and Plant Growth 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 104/BPCS 104 or ENSC 100; or consent of instructor. A study of the chemical, physical, and biological properties of soils and their influence on plant growth and development. Topics include soil-plant water relations; fundamentals of plant mineral nutrition; soil nutrient pools and cycles; soil acidity, alkalinity, salinity, and sodicity; root symbioses; and rhizosphere processes. Cross-listed with BPCS 134.

ENSC 135 Atmospheric Chemistry 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 008A and CHEM 08LA or CHEM 08HA and CHEM 08HLA, CHEM 008B and CHEM 08LB or CHEM 08HB and CHEM 08HLB, or consent of instructor; ENSC 102 recommended. Structure of the troposphere and stratosphere; formation of atmospheric ozone, tropospheric NOx chemistry; methane oxidation cycle; phase distributions of chemicals; wet and dry deposition; chemistry of volatile organic compounds; formation of photochemical air pollution; modeling of air pollution and control strategies; stratospheric ozone depletion and global warming. Cross-listed with CHEM 135, and ENTX 135.

ENSC 136 Chemistry of Natural Waters 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 005 with a grade of “C-” or better or ENSC 101 with a grade of “C-” or better or consent of instructor. Introduction to processes controlling the chemical composition of natural waters. Topics include chemical equilibria, acid-base and coordination chemistry, oxidation-reduction reactions, precipitation-dissolution, air-water exchange, and use of equilibrium and kinetic models for describing marine nutrient, trace metal, and sediment chemistry. Cross-listed with CHEM 136.

ENSC 138 Pedology 4 Lecture, 3 hours; laboratory, 6 hours per quarter; field, 24 hours per quarter. Prerequisite(s): ENSC 100; GEO 001; or consent of instructor. Covers the study of soils in natural environments. Examines how soils form and their roles within ecosystems and landscapes. Topics include soil variability, soil classification, and soils as indicators of environmental conditions. Field trips emphasize description and interpretation of soils. Requires two 3-hour Laboratory activities and four 6-hour Field Trips. Cross-listed with GEO 138.
ENSC 139 Soils and Landforms of California 1 Term paper, 6 hours; field, 24 hours. Prerequisite(s): ENSC 138, may be taken concurrently or GEO 138, may be taken concurrently; or consent of instructor. Explores the genesis, morphology, and classification of California soils with an emphasis on soil-landform relationships. One three-day field trip focuses on soils and landforms within selected regions of California. Cross-listed with GEO 139.

ENSC 140 Limnology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENSC 101; or consent of instructor. A study of surface waters. Considers in detail the physical and chemical processes in surface waters, aquatic biology, ecosystem dynamics, and aspects of surface water quality and modeling.

ENSC 144 Solid Waste Management 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 002 or BIOL 005A, BIOL 051A, CHEM 011C or CHEM 01HC, CHEM 01HLC, ENSC 001, ENSC 002 or ENVE 171; MATH 007B or MATH 009B or MATH 09HB; or consent of instructor. A study of the characterization, collection, transportation, processing, disposal, recycling, and composting of municipal solid waste. Emphasizes accepted management strategies and design procedures for recovering or disposing solid wastes while protecting public and environmental well-being. Cross-listed with ENVE 144.

ENSC 163 Hydrology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENSC 100; ENSC 101; ENSC 110; MATH 007B or MATH 009B or MATH 09HB; or consent of instructor. Introduction to the scientific study of the hydrologic cycle. Covers the measurement and evaluation of hydrologic phenomena including the use of statistical methods. Explores computer techniques in hydrology with applications to water resource development and water quality problems, particularly those in California.

ENSC 165 Principles of Groundwater Science 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 001B, ENSC 101; MATH 007B or MATH 009B or MATH 09HB. Covers the fundamental understanding of groundwater resources and aquifer properties. Explores physical principles of fluid flow in sediments and rocks, surface water-groundwater interactions, and contaminant transport. Discusses current issues in groundwater management and sustainability with an emphasis on California water resources. Students present topics related to groundwater science and management.

ENSC 175 Spatial Analysis and Remote Sensing For Environmental Sciences 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): ENSC 110; or consent of instructor. Explores the principles of spatial data analysis in environmental sciences. Provides comprehensive and systematic understanding of spatial analysis methods. Covers theory of remotely sensed data acquisition from satellites and UAVs and discusses image analysis techniques. Utilizes Geographic Information Systems (GIS) and statistical and image classification software.

ENSC 177 Environmental Sampling and Analysis 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): two of the following courses ENSC 100, ENSC 101, ENSC 102; or consent of instructor. Introduces sampling, preparation and quantitative analysis of environmental samples. Topics include environmental sampling design; sampling techniques; quality assurance/quality control (QA/QC); data collection and reporting; sample preparations; extraction and cleanup; chemical separations (chromatography); and instrumental detection methods relevant to quantitative environmental analysis.

ENSC 190 Special Studies 1 to 5 variable hours. Prerequisite(s): upper-division standing and consent of instructor. Special studies as a means of meeting special curricular problems. Graded Satisfactory (S) or No Credit (NC); however, students may petition the instructor for a letter grade. Course is repeatable.

ENSC 191 Seminar in Professional Development in Environmental Sciences 2 Seminar, 2 hours. Prerequisite(s): upper-division standing in Environmental Sciences or consent of instructor. Lectures and discussions on scientific writing, critical analysis in reading, public speaking, job interview and resume preparation, and professional conduct. Students make both written and oral presentations on topics in Environmental Sciences.

ENSC 197 Research For Undergraduates 1 to 4 Research, 3 to 12 hours. Prerequisite(s): Restricted to class level standing of junior, or senior; and consent of instructor. Individual research on a problem relating to environmental science to be conducted under the guidance of an instructor. Maximum of 4 units (with a letter grade) may count toward the upper-division elective requirement. Course is repeatable to a maximum of 8 units.

ENSC 198I Internship in Environmental Sciences 1 to 12 Field, 3 to 36 hours. Prerequisite(s): upper-division standing and consent of instructor. An academic internship involving participation in a functional capacity in the enhancement or maintenance of environmental quality conducted under the joint supervision of an off-campus sponsor and a faculty member in Environmental Sciences. One unit of credit for every three hours per week spent in internship. Graded Satisfactory (S) or No Credit (NC), but in exceptional cases student may petition for a letter grade. Course is repeatable to a maximum of 16 units.

ENSC 204 Fluvial Geomorphology 4 Lecture, 4 hours; two four-hour field trips. Prerequisite(s): graduate standing or consent of instructor. Advanced inquiry into the processes that produce fluvial landforms. The topics of erosion, sediment transport and deposition and their roles in the creation and evolution of river channels, wetlands and floodplains are explored from first principles. Field trips to representative fluvial geomorphic systems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

ENSC 208 Ecotoxicology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A; BIOL 005B; CHEM 008A, CHEM 08LA or CHEM 08HA, CHEM 08HLA; CHEM 008B, CHEM 08LB or CHEM 08HB, CHEM 08HLB; graduate standing; or consent of instructor. Introduction to the impact of chemicals upon ecological systems. Examines the fate and effects of environmental chemicals in various hierarchies of biological organization to learn how to carry out precise and accurate assessments of ecological risk. Cross-listed with ENTX 208.

ENSC 210 Integrated Hydrologic Modeling 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENSC 107; ENSC 163 or ENSC 165; graduate standing; or consent of instructor. Explores the principles of surface and subsurface flow for water resources modeling. Provides comprehensive and systematic understanding of hydrologic modeling process, model implementation, optimization, and evaluation. Emphasizes integrated surface water-subsurface water models and movement of water, heat, gases, and chemicals through soil.

ENSC 217 Vadose Zone Processes 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENSC 107; or consent of instructor. Studies physical and mathematical descriptions of transient flow and transport processes in the vadose zone. Emphasizes numerical solutions to equations describing the movement of water, gas, contaminants, and heat including chemical and biological reactions. Explores mathematical models for direct and inverse solutions, spatial heterogeneity, and determination of soil hydraulic properties.

Graduate Courses

ENSC 200 Fate and Transport of Chemicals in the Environment 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): one year of organic chemistry; graduate standing or consent of instructor. Covers identification of toxicants and their sources in the environment; equilibrium partitioning of chemicals between air, water, soil, sediment, and biota using physico-chemical properties; and the transport and transformations of chemicals in air, water, and soil media. Includes case studies of fate and transport of selected toxic chemicals. Cross-listed with CHEM 246, and ENTX 200.
ENSC 218 Isotopes in Ecology and Environmental Science 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; both CHEM 001C and CHEM 01LC or both CHEM 01HC and CHEM 1HLC. Explores the principles and techniques of isotope tracer fractionation and mixing commonly used in ecology and environmental science. Introduces isotope notation, mixing models, and kinetic and equilibrium fractionation concepts. Includes case studies involving stable- and radioisotopes of carbon, nitrogen, oxygen, and sulfur. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 4 units.

ENSC 227 Global Change and the Earth System 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; or consent of instructor. Examines the fundamental principles of Earth system science in the context of global change. Topics include the preindustrial and modern-day Earth system, responses of the Earth's support machinery to human activities, consequences of global change for human well-being, and pathways towards global sustainability.

ENSC 232 Biogeochemistry 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; consent of instructor. A study of the biogeochemical cycling and exchange of carbon and important nutrients (N, S, base cations) between the lithosphere, hydrosphere, and atmosphere. Quantitatively describes processes at scales ranging from local to global. Addresses modern concerns about water and atmospheric quality, including global climate change.

ENSC 240 Multiphase Atmospheric Chemistry 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 135/ENSC 135/ENTX 135; or consent of instructor. Explores chemical transformation of inorganic and organic trace gases in the atmosphere and multiphase processes leading to production and aging of atmospheric aerosols. Also discusses recent literature in the field of tropospheric chemistry and aerosol formation. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

ENSC 245 Chemistry and Physics of Aerosols 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 109, CHEM 110B; or consent of instructor. Fundamentals of chemical and physical processes controlling behavior and properties of airborne particles. Topics include particle mechanics, electrical, optical, and thermodynamic properties; nucleation; surface and aqueous-phase chemistry; gas-particle partitioning; sampling; size and chemical analysis; atmospheric aerosols; and environmental effects. Cross-listed with CHEM 245 and ENTX 245.

ENSC 265 Special Topics in Earth and Environmental Sciences 1 to 3 Seminar, 1 to 3 hours. Prerequisite(s): graduate standing. Involves oral presentations and small-group discussions of selected topics in the areas of biogeochemistry, global climate change, geomicrobiology, earth surface processes, and interplanetary life. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as content changes to a maximum of 10 units. Cross-listed with GEO 265.

ENSC 275 Research Seminar in Environmental Sciences 1 Seminar, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Involves seminars by faculty, visiting scholars, environmental professionals, and advanced graduate students on current research topics in Environmental Sciences. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ENSC 290 Directed Studies 1 to 6 Consultation, 1 to 3 hours; individual study, 1 to 15 hours. Prerequisite(s): graduate standing; consent of instructor and graduate advisor. Individual study of selected topics in Environmental Sciences under faculty direction. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ENSC 292 Concurrent and Advanced Studies 1 to 4 written work, 1 to 4 hours; individual study, 1 to 4 hours; research, 1 to 4 hours. Prerequisite(s): graduate standing or consent of instructor; Designated to allow graduate students to receive specialized training in fields not covered by current graduate courses. Elects concurrently with 100-series courses in Environmental Sciences, or other upper division courses on an individual basis. Devoted to one or more graduate projects expanding on materials covered in the 100-series course. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 12 units.

ENSC 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor. Individual research performed under the direction of a faculty member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ENSC 299 Research for the Thesis Or Dissertation 1 to 12 Research, 3 to 36 hours. Prerequisite(s): graduate standing or consent of instructor. Research in environmental sciences for the M.S. thesis or Ph.D. dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

**Professional Courses**

ENSC 302 Teaching Practicum 1 to 4 Practicum, 3 to 12 hours. Prerequisite(s): graduate standing. Supervised teaching in Environmental Sciences or related courses. Required of all teaching assistants in Environmental Sciences. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ENSC 401 Professional Development in Environmental Sciences 2 Lecture, 1 hour; discussion, 1 hour. Prerequisite(s): graduate standing; consent of instructor. Introduces students to strategies for successful graduate study and early career development. Consists of lectures, discussions and presentations covering research and professional ethics, grant/fellowship writing, and preparation of technical journal articles. Addresses effective job search skills, including preparation of curriculum vitae, networking, effective oral presentations, and job interviews. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 4 units.

**Environmental Toxicology**

Subject abbreviation: ENTX

College of Natural and Agricultural Sciences

Wenwan Zhong, Ph.D., Program Director and Graduate Advisor for Enrolled Students

Ying-Hsuan Lin, Ph.D., Graduate Advisor for Admissions

Program Office, 1140 Batchelor Hall
(800) 735-0717 or (951) 827-6746
etox.ucr.edu

**Professors**

Michael E. Adams, Ph.D. Neurosciences (Entomology/Cell Biology and Neuroscience)

Julia Bailey-Serres, Ph.D. Distinguished Professor, Genetics (Botany and Plant Sciences)

Roya Bahreini, Ph.D., Air Quality (Environmental Sciences)

Chia-en Chang, Ph.D., Bioinformatics (Chemistry)

Quan "Jason" Cheng, Ph.D. Analytical Materials (Chemistry)

Carl F. Cranor, Ph.D. Distinguished Professor, Regulation of Toxic Substances (Philosophy)

Margarita C. Currais-Collazo, Ph.D. Neurosciences (Molecular, Cell & Systems Biology)

Adler R. Dillman, Ph.D., Evolutionary Biology and Microbiology (Nematology)

Jianying "Jay" Gan, Ph.D. Distinguished Professor, Water Quality (Environmental Sciences)

Russ Hille, Ph.D., Biochemistry

Richard J. Hooley, Ph.D., Chemistry

Ryan Julian, Ph.D. Chemistry (Chemistry)

Xuan Liu, Ph.D. Transcription Regulation (Biochemistry)

Ernest Martinez, Ph.D. Molecular Biology (Biochemistry)

Manuel Cartes-Green, Ph.D. (Molecular, Cell & Systems Biology)

Ashok K. Mulchandani, Ph.D. Distinguished Professor, Biosensors (Chemical and Environmental Engineering)

Mihr Ozkan, Ph.D. Nanoelectronics and Nanoprobes (Electrical and Computer Engineering)

Daniel Schlenk, Ph.D. Aquatic Ecotoxicology (Environmental Sciences)

Mario Sims, Ph.D., Epidemiology (Social Medicine, Population and Public Health)

Frances M. Sladek, Ph.D. Transcriptional
Regulation (Molecular Cell & Systems Biology)
Jikui Song, Ph.D. Biophysics (Biochemistry)
Prudence Talbot, Ph.D. Cell Biology
(Molecular, Cell & Systems Biology)
John Trumble, Ph.D. Distinguished
Professor, Integrated Pest
Management (Entomology)
David Voit, Ph.D. Developmental Toxicology
(Environmental Sciences)
Yinsheung Wang, Ph.D. Distinguished
Professor, Biological Mass
Spectrometry (Chemistry)
Wenwan Zhong, Ph.D. Analytical
Chemistry (Chemistry)
Changcheng Zhou, Ph.D., Molecular Biology
(Biomedical Sciences)

Graduate Program
The program offers the M.S. and Ph.D. degrees in Environmental Toxicology.

The interdepartmental graduate program in Environmental Toxicology has participating faculty from the departments of Biochemistry, Biomedical Sciences, Botany and Plant Sciences, Molecular, Cell, and Systems Biology, Chemical and Environmental Engineering, Chemistry, Entomology, Electrical and Computer Engineering, Environmental Sciences, Philosophy, and Microbiology and Plant Pathology.

The goal of the program is to train toxicologists capable of directing research in areas of environmental toxicology. Areas of specialization include biochemical toxicology and chemical toxicology. To attain this goal, a three-tiered curriculum has been designed whereby students must complete:

1. A core of courses in environmental toxicology: ENSC 200/ENTX 200/CHEM 246, ENTX 201, ENTX 201L, ENTX 202, ENTX 270
2. A selection of elective courses in environmental toxicology and other relevant fields chosen in consultation with the student’s major professor and the Guidance Committee to develop depth in particular areas of specialization
3. Research training in specific areas of environmental toxicology

The program stresses the importance of innovative and independent laboratory research as the major component of the student’s education.

Admission
Students must have a B.A. or B.S. degree from an accredited institution and an academic record that satisfies the minimum admission standards established by the UCR Graduate Division. In addition, results from the GRE General Test (verbal, quantitative, analytical) must be submitted at the time of application. Although no specific undergraduate degree specialization is required, applicants should have adequate backgrounds in the basic physical sciences such as chemistry, physics, and mathematics as well as in the biological sciences.

Course Work
Normally, students admitted to regular standing have satisfied all prerequisite course work. Under special circumstances, students who have not completed all undergraduate requirements may be admitted provided that these deficiencies are corrected early in their graduate studies. Deficiencies must be corrected by taking the appropriate course work if undergraduate or other previous training has not included the following:

- One year of general biology
- One year of general physics
- One year of calculus
- One year of general chemistry
- One year of organic chemistry
- One upper division course in general biochemistry
- One upper division course in molecular biology
- One upper division course in statistics

Students who meet all the undergraduate entrance requirements should be able to complete the core Environmental Toxicology requirements in the first year and most electives by the end of the second year.

Professional Development
Students receive trainings on writing and oral presentation by completing an annual progress report, and giving an oral presentation on their research at the Annual Student Symposium (part of the ENTX 271 course). Students in their fourth year of the program give an oral presentation as part of the ENTX 270 seminar series. They complete Teaching Assistant Training through a workshop offered by Graduate Division. They attend special seminars (part of the ENTX 270) given by speakers from industry, government agencies, or other professions on career and professional development, and other special topics relevant to professional development, including research integrity and lab safety.

Laboratory Rotation
All students participate in laboratory rotation through enrollment in ENTX 201L. Students spend time in one laboratory per quarter familiarizing themselves with research techniques utilized in the laboratory of an Environmental Toxicology faculty member. Rotation laboratories are chosen in consultation with the graduate advisor and individual faculty members. Students may enroll in up to three quarters of laboratory rotation before declaring a major professor. Students who wish to declare a major professor after one quarter are not required to enroll for additional laboratory rotation. The major professor serves as chair of the student’s Guidance and Dissertation committees.

Guidance Committee
Each graduate student establishes a guidance committee which participates in the annual student progress evaluation procedure and advises the student on curriculum and research. The committee consists of the major professor plus at least two other faculty, one of whom must be a member of the Environmental Toxicology Program. Each student, in consultation with the major professor, nominates the members of the guidance committee. The committee must be named by the end of the second year. The student selects a major professor. The composition of the guidance committee must be approved by the curriculum and student affairs committee.

Master’s Degree
The program offers the M.S. degree in Environmental Toxicology.

Students enrolling in the master’s degree program must meet the requirements for the Plan I or Plan II of the UCR Graduate Council, and take core courses as described above. Plan I also requires submission of an acceptable thesis and an oral examination as described in details below.
Plan I (Thesis)
Thirty-six (36) units, of which 24 must be in graduate-level courses, are required. No more than 12 units of ENTX 290, ENTX 297, and ENTX 299 may be used to satisfy the unit requirement. All students must enroll in the Environmental Toxicology seminar (ENTX 270 and ENTX 271) each quarter offered, although no more than 3 units from seminar courses can be accrued towards degree credit. A final draft of the thesis is to be given to the thesis committee two weeks before the final oral examination. A final oral examination consists of an open research seminar, presented by the candidate and advertised to all the students and faculty in the Environmental Toxicology Program. Following the seminar, the student is questioned by the guidance committee on the thesis research and on matters related to the general field of the thesis research.

Plan II (Comprehensive Examination)
Thirty-six (36) units, of which 18 must be in graduate-level courses, are required. No more than 12 units of ENTX 290 and ENTX 297 may be used to satisfy the unit requirement. All students must enroll in the Environmental Toxicology seminar (ENTX 270 and ENTX 271) each quarter offered. A comprehensive examination is also required, with the content determined and approved by both the Graduate Advisor and the Director of the program.

Normative Time to Degree
6 quarters

Doctoral Degree
The program offers the Ph.D. degree in Environmental Toxicology.

Students must meet general university requirements of the Graduate Division as found in the Graduate Studies section of this catalog.

Course Work
Beyond the required core sequence, all students must enroll in the Environmental Toxicology seminar (ENTX 270 and ENTX 271) each quarter offered and complete a program of courses to be approved by the guidance committee. With the approval of the Graduate Advisor, students defending in spring will be allowed to waive the ENTX 271 registration requirement since this seminar is only offered each spring quarter. All course work schedules are submitted to the graduate advisor for approval. The Ph.D. degree is awarded when the student passes the preliminary and qualifying examinations and demonstrates an ability to do original research by preparation and submission of an acceptable dissertation.

Preparatory Examination
The preliminary examination is a standardized, written test generally offered once a year prior to the beginning of the fall quarter. Students normally take it following the completion of the core curriculum. The examination must be satisfactorily completed in order to enroll for the seventh academic quarter in the Ph.D. program. The examination consists of questions related to environmental, organismal and suborganismal aspects of toxicology. These questions are designed to test the student's ability to synthesize and integrate concepts in toxicology, rather than merely reiterate the material covered in the Environmental Toxicology core curriculum. The examination is administered by a committee consisting of the faculty members involved in teaching the core curriculum. On the basis of the results of this examination, the committee recommends appointment of a faculty qualifying committee, additional course work in specific area(s) of weakness, transfer to a terminal master's program, or withdrawal from the program. In exceptional circumstances, the preliminary examination can be taken a second time.

Oral Qualifying Examination
The qualifying examination is an oral examination conducted by the qualifying committee. The qualifying committee, appointed by the graduate dean from nominations made by the faculty, is composed of the student's major professor and four additional members, one of whom must be from outside the Graduate Environmental Toxicology group. It covers the student's area of specialization and research field as well as general subjects at the discretion of the qualifying committee. The qualifying examination must be successfully completed by the end of the ninth quarter of full-time enrollment in the Ph.D. program. Under exceptional circumstances, the qualifying examination may be taken a second time. Upon successful completion of the qualifying examination, the student is advanced to candidacy.

Dissertation and Final Oral Examination
A dissertation committee composed of at least three members is appointed by the graduate dean shortly after advancement to candidacy. Students must submit a dissertation based on independent, original research acceptable to all dissertation committee members. A final draft of the dissertation is to be given to the committee two weeks before the dissertation defense seminar. Before approval of the dissertation, students must present their research orally at a thesis defense seminar. The seminar must be advertised to the campus community and is open to all who wish to attend. Following the seminar, the student is questioned by the dissertation committee on the thesis research and on matters related to the general field of the thesis research.

Teaching Requirement
Ph.D. students in our program are required to fulfill a two-quarter teaching requirement, which is an important training to prepare our students for teaching and research professions. Under special circumstances, and with the approval of the major professor and program advisor, the student can apply to have this requirement waived.

Normative Time to Degree
15 quarters

Upper-Division Courses

ENTX 101 Fundamental Toxicology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A; BIOL 005B; CHEM 008A and CHEM 08B or CHEM 08HA and CHEM 08HLA; CHEM 08B and CHEM 08LB or CHEM 08HB and CHEM 08HLB; CHEM 008C and CHEM 08LC or CHEM 08HC and CHEM 08HLC; or consent of instructor. Fundamental concepts relating to the adverse effects of chemical agents. Topics covered include dose-response relationships, absorption, distribution, metabolism, excretion, mechanisms of toxicity, and the effects of selected environmental toxicants on various organ systems. Characterization and assessment of risks are also covered.

ENTX 103 Environmental Pollution and Health 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENSC 001, ENSC 002. Focuses on the history, theory, and practice of assessing, understanding, and mitigating impacts of the natural and built environment on human health. Reviews core disciplines that underpin the field of environmental health as well as case studies from industrialized, emerging, and developing countries around the world. Cross-listed with ENSC 103.

ENTX 125 Pesticides, Biological Organisms, and the Environment 3 Lecture, 3 hours. Prerequisite(s): two of the following courses: BIOL 005A; BIOL 005B; BIOL 005C; CHEM 008A and CHEM 08B or CHEM 08HA and CHEM 08HLA; CHEM 008B and CHEM 08LB or CHEM 08HB and CHEM 08HLB; CHEM 008C and CHEM 08LC or CHEM 08HC and CHEM 08HLC. An introduction to the chemistry, mode of action, and use of insecticides, acaricides, herbicides, and biopesticides from discovery to environmental interactions. Includes genetics of pesticide resistance development and government regulation. Cross-listed with ENTM 125, and PLPA 125.

ENTX 135 Atmospheric Chemistry 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 008A and CHEM 08B or CHEM 08HA and CHEM 08HLA, CHEM 008B and CHEM 08LB or CHEM 08HB and CHEM 08HLB, or consent of instructor; ENSC 102 recommended. Structure of the troposphere and stratosphere; formation of atmospheric ozone; tropospheric NOx chemistry; methane oxidation cycle; phase distributions of chemicals; wet and dry deposition; chemistry of volatile organic compounds; formation of photochemical air pollution; modeling of air pollution and control strategies; stratospheric ozone depletion and global warming. Cross-listed with CHEM 135, and ENSC 135.

ENTX 150 Cancer Biology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110C or BCH 110HC or BIOL 107A or CBNS 101 (may be taken concurrently with consent of instructor). Explores the origin, development, and treatment of cancer with emphasis on molecular mechanisms. Covers topics such as oncogenes, tumor suppressors, cell cycle and differentiation, AIDS, and hereditary and environmental factors in the development of cancer. Cross-listed with CBNS 150.
ENTX 154 Risk Assessment 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENTX 101; STAT 010; or equivalent; or consent of instructor. An introduction to the basic principles and methods by which health risks associated with exposure to chemical and physical agents are determined. Topics include hazard identification, dose response and exposure assessments, as well as risk characterization and management.

Graduate Courses

ENTX 200 Fate and Transport of Chemicals in the Environment 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): one year of organic chemistry; graduate standing; or consent of instructor. Covers identification of toxicants and their sources in the environment; equilibrium partitioning of chemicals between air, water, soil, sediment, and biota using physico-chemical properties; and the transport and transformations of chemicals in air, water, and soil media. Includes case studies of fate and transport of selected toxic chemicals. Cross-listed with CHEM 246, and ENSC 200.

ENTX 201 Principles of Toxicology 4 Lecture, 3 hours; seminar, 1 hour. Prerequisite(s): BCH 110A or BCH 110HA, BCH 110B or BCH 110HB; or consent of instructor. The structure-activity and dose-response relationships of environmental toxicants; their absorption, distribution, metabolism, and excretion; and evaluation of their toxicity and factors that influence toxicity. Quantitative methods in measuring acute and chronic toxicity.

ENTX 201L Laboratory Rotation 2 Laboratory, 6 hours. Prerequisite(s): restricted to major(s) Environmental Toxicology; graduate standing. Introduction to research techniques in biochemical and chemical toxicology. Includes laboratory time to explore research topics and techniques. Students who present an oral project in the laboratory receive a letter grade; others receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 6 units.

ENTX 202 Mechanisms of Toxicity 4 Lecture, 3 hours; seminar, 1 hour. Prerequisite(s): BCH 110C or BCH 110HC or BIOL 107A; ENTX 201; or consent of instructor. Biochemical and physiology mechanisms underlying the toxicity of environmental toxicants. The interaction of toxicants with subcellular components and macromolecules with emphasis on mechanism of action, in particular neurotoxicity of pesticides, chemical carcinogenesis, mutagenesis, and teratogenicity.

ENTX 204 Genome Maintenance and Stability 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110C or BCH 110HC or BIOL 107A; BIOL 113 or BIOL 114 or CBNS 101; BIOL 102 is strongly recommended. Emphasizes chromosome-based processes that maintain genome integrity and ensure accurate genome transmission during cell division. Topics are drawn from the primary literature and include chromatin structure and composition, DNA repair and recombination, telomere function and chromosome maintenance, mitotic chromosome segregation, and checkpoint surveillance mechanisms. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CMDB 204, and BCH 204.

ENTX 205 Biotransformation of Organic Chemicals 4 Lecture, 4 hours. Prerequisite(s): CHEM 008A and CHEM 08LA or CHEM 08HA and CHEM 08HLA; CHEM 008B and CHEM 08LB or CHEM 08HB and CHEM 08HLB; BCH 110A; BCH 110B; or BCH 110C or equivalents; or consent of instructor. Explores the catalytic activities and regulatory pathways of Phase I (e.g., cytochromes P450) and Phase II (e.g., Uridine Diphosphate Glucuronyl-Transferase) enzymes involved in organic chemical biotransformation. Demonstrates the contribution of biotransformation in toxicology.

ENTX 208 Ecotoxicology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A; BIOL 005B; CHEM 008A, CHEM 08LA or CHEM 08HA, CHEM 08HLA; CHEM 008B, CHEM 08LB or CHEM 08HB, CHEM 08HLB; graduate standing; or consent of instructor. Introduction to the impact of chemicals upon ecological systems. Examines the fate and effects of environmental chemicals in various hierarchies of biological organization to learn how to carry out precise and accurate assessments of ecological risk. Cross-listed with ENSC 208.

ENTX 245 Chemistry and Physics of Aerosols 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 109, CHEM 110B; or consent of instructor. Fundamentals of chemical and physical processes controlling behavior and properties of airborne particles. Topics include particle mechanics; electrical, optical, and thermodynamic properties; nucleation; surface and aqueous-phase chemistry; gas-particle partitioning; sampling: size and chemical analysis; atmospheric aerosols; and environmental effects. Cross-listed with CHEM 245, and ENSC 245.

ENTX 252 Special Topics in Environmental Toxicology 1 to 3 Seminar, 1 to 3 hours. Prerequisite(s): graduate standing. Involves oral presentations and intensive small-group discussions of selected topics in the area of special competence of each participant Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 20 units.

ENTX 270 Seminar in Environmental Toxicology 1 Seminar, 1 hour. Prerequisite(s): restricted to major(s) Environmental Toxicology; graduate standing. Addresses current research topics in Environmental Toxicology. Includes lectures, oral reports, and discussion by students, faculty, staff and visiting scholars. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC). Course is repeatable.

ENTX 271 Seminar in Environmental Toxicology 2 Seminar, 15 hours per quarter; individual study, 15 to 20 hours per quarter. Prerequisite(s): graduate standing in Environmental Toxicology. An interdisciplinary seminar consisting of student presentations of original research and discussion of current research topics in environmental toxicology. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as content changes to a maximum of 14 units.

ENTX 290 Directed Studies 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate status in Environmental Toxicology. Directed research performed towards the development of a dissertation problem or other research performed under the direction of the staff. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

ENTX 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate status in Environmental Toxicology Directed research performed towards the development of a dissertation problem or other research performed under the direction of the staff. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

ENTX 298I Individual Internship 1 to 12 Written work, 1 to 12 hours; internship, 2 to 24 hours. Prerequisite(s): graduate standing; or consent of instructor. An individual apprenticeship in environmental toxicology or related fields with an approved professional individual or organization and academic work under the direction of an ETOX faculty member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

ENTX 299 Research For Thesis Or Dissertation 1 to 12 Research, 3 to 36 hours. Prerequisite(s): graduate status in Environmental Toxicology. Research performed under the direction of a faculty member towards a thesis or dissertation. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.
Ethnic Studies

Edna M. Bonacich, Ph.D.
(ETHNIC STUDIES/SOCIOLOGY)
Victoria Bomberry, Ph.D.

Associate Professors
Adrian Felix, Ph.D.
Alfonso Gonzales, Ph.D.
Paul Green, Ph.D.
Wesley Leonard, Ph.D.
Jennifer Nájera, Ph.D.
Robert Perez, Ph.D.

Assistant Professors
Emily Hue, Ph.D.
Keith Miyake, Ph.D.
Jasmin Young, Ph.D.

majors
Ethnic Studies is the systematic, relational and critical study of the social construction of race, 
racism, and racial or ethnic subordination, and the history, culture, and contemporary 
experiences of racial or ethnic groups who have not been fully incorporated into U.S. 
society. Ethnic Studies is the interdisciplinary social and historical study of how different 
populations have experienced, survived, and critically engaged the United States nation-
building project. We analyze the social dynamics of race, racism, and various forms of 
institutionalized violence, including land conquest, racist state violence, Spanish and 
Euroamerican colonialisms, U.S. imperialism, systemic sexual violence, racial genocide, 
chattel slavery, gendered militarization, legalized discrimination (apartheid and 
segregation), white supremacy, and the internalized logics of gender/racial domination 
and assimilation. We are especially engaged with the creative historical work of social 
movements, cultural and artistic productions, legal and public policy activism, indigenous 
and liberationist epistemologies, community and identity formation, and radical social 
and political thought. We examine how these different kinds of resistance, persistence, 
liberation struggle, and radical knowledge production both confront and transform 
oppressive conditions and create new possibilities for social change.

Individually and collectively, courses in 
Ethnic Studies forge strong scholarly and 
intellectual connections between the related 
fields of Native American, African American, 
Chicana/o, and Asian American Studies. Ethnic Studies is committed to scholarly excellence, 
intellectual rigor, and making critical contributions to global discourses regarding 
the meaning of human freedom. As part of our 
pedagogical philosophy, we strive to provide 
an empowering literacy that expands students' social and political horizons, as well as the 
creative, critical thinking skills necessary to participate fully in society and the world.

The Department of Ethnic Studies offers ma-
jors leading to a B.A. degree in Ethnic Studies, 
African American Studies, Chicano Studies, and Native American 
Studies. Students may develop either a general emphasis in Ethnic Studies or a 
concentration on a specific group. The major 
enables students to study race and ethnicity in comparative perspective, to gain greater 
multicultural insight and understanding, and to prepare them to enter the workforce and 
function effectively and critically as informed 
citizens in a diverse multicultural society.

With the changing ethnic composition of 
society is a growing demand for individuals 
in education, government, and the private 
sector with knowledge and expertise in race and 
ethnic relations. An Ethnic Studies major also helps to prepare students for graduate or 
professional school and careers in a number of areas including education, law, human 
services, organizing and advocacy, social welfare, urban planning, and state and county 
government.

University Requirements
See Undergraduate Studies section.

College Requirements
See College of Humanities, Arts, and Social 
Sciences, Colleges and Programs section.

Major Requirements
The Ethnic Studies Department offers a B.A. 
degree in Ethnic Studies, African American 
Studies, Chicano Studies, and Native American 
Studies.

Ethnic Studies Major
The major requirements for the B.A. degree in 
Ethnic Studies are as follows:

Core courses required of all majors

Lower-division requirements (12 units)

a) ETST 001
b) Two courses chosen from ETST 002, 
ETST 003, ETST 005, or ETST 007

Upper-division requirements (40 units)

a) ETST 101A or ETST 101B
b) ETST 100 or ETST 131

c) ETST 101I and ETST 191R

d) Sixteen (16) additional upper-division 
units in Ethnic Studies chosen from 
courses focusing on the African American 
experience

e) A minimum of one Ethnic Studies 
course chosen from two of the following 
four areas of emphasis (8 units)

(1) African American Studies
(2) Chicano Studies
(3) Native American Studies
(4) Comparative Issues

Note
No internship courses may be counted toward 
the upper-division electives in Ethnic Studies.

African American Studies 
Major
The major requirements for the B.A. degree in 
African American Studies are as follows:

Core courses required of all majors

Lower-division requirements (12 units)

a) ETST 001
b) ETST 005
c) One chosen from ETST 002, ETST 003 or 
ETST 007

Upper-division requirements (40 units)

a) ETST 101A or ETST 101B
b) ETST 100 or ETST 131

c) ETST 101 or ETST 191R

d) Sixteen (16) additional upper-division 
units in Ethnic Studies chosen from 
courses focusing on the African American 
experience

e) A minimum of one Ethnic Studies 
course chosen from two of the following 
four areas of emphasis (8 units)

(1) African American Studies
(2) Chicano Studies
(3) Native American Studies
(4) Comparative Issues

Note
No internship courses may be counted toward 
the upper-division electives in Ethnic Studies.

Asian American Studies 
Major
The major requirements for the B.A. degree in 
Asian American Studies are as follows:

Core courses required of all majors

Lower-division requirements (12 units)

a) ETST 001
b) ETST 005
c) One chosen from ETST 002, ETST 003 or 
ETST 007

Upper-division requirements (40 units)

a) ETST 101A or ETST 101B
b) ETST 100 or ETST 131

c) ETST 101 or ETST 191R

d) Sixteen (16) additional upper-division 
units in Ethnic Studies chosen from 
courses focusing on the Asian American 
experience

e) A minimum of one Ethnic Studies 
course chosen from two of the following 
four areas of emphasis (8 units)

(1) African American Studies
(2) Chicano Studies
(3) Native American Studies
(4) Comparative Issues

Note
No internship courses may be counted toward 
the upper-division electives in Ethnic Studies.
Chicano Studies Major
The major requirements for the B.A. degree in Chicano Studies are as follows:

Core courses required of all majors
1. Lower-division requirements (12 units):
   ETST 001, ETST 002 and ETST 004/HIST 004
2. Upper-division requirements (40 units)
   a) ETST 100A or ETST 101B
   b) ETST 100 or ETST 131
   c) ETST 191R
   d) Four courses selected from two of the following areas of emphasis (16 units):
      (1) Law
         ETST 145/SOC 145, ETST 126, ETST 128/SOC 128, ETST 183, ETST 108-I
      (2) Politics
         ETST 123, ETST 125, ETST 111, ETST 132, ETST 142, ETST 156
      (3) History and Culture
         ETST 155, ETST 108E, ETST 108F, ETST 108-I, ETST 108P, ETST 122, ETST 125,
         ETST 128/SOC 128, ETST 146/EDUC 146, ETST 153/LNST 153, ETST 154,
         ETST 161, ETST 166
      (4) Gender
         ETST 124, ETST 114, ETST 127, ETST 175/GSST 175
   e) One Senior Research Seminar (4 units)
   f) One Internship course (4 units)
   g) One additional elective upper-division course in Ethnic Studies

Note
No internship courses may be counted toward the upper-division electives in Ethnic Studies.

Native American Studies Major
The major requirements for the B.A. degree in Native American Studies are as follows:

Core courses required of all majors
1. Lower-division requirements (12 units)
   a) ETST 001
   b) ETST 007
   c) One chosen from ETST 002, ETST 003 or ETST 005
2. Upper-division requirements (40 units)
   a) ETST 101A or ETST 101B
   b) ETST 100 or ETST 131
   c) ETST 157, ETST 158 and ETST 191R
   d) Sixteen (16) additional upper-division units in Ethnic Studies chosen from courses focusing on the Native American experience
   e) One Ethnic Studies course chosen from one of the following four areas of emphasis (4 units)
      (1) African American Studies
      (2) Asian American Studies
      (3) Chicano Studies
      (4) Comparative Issues

Note
No internship courses may be counted toward the upper-division electives in Ethnic Studies.

Minors
The Ethnic Studies minor consists of 4 lower-division units, 20 upper-division units, and appropriate prerequisites as needed.

1. Lower-division requirement (4 units):
   ETST 001
2. Upper-division requirements (20 units)
   a) ETST 100, ETST 131
   b) Twelve (12) additional upper-division units in Ethnic Studies courses that are either comparative in nature or focus on African Americans, Asian Americans, Chicanos, or Native Americans (Courses must be approved by Ethnic Studies advisor.)

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

African American Studies Minor
The African American Studies minor consists of 4 lower-division units, 20 upper-division units, and appropriate prerequisites as needed.

1. Lower-division requirement (4 units):
   ETST 003
2. Upper-division requirements: 20 additional upper-division units in Ethnic Studies chosen from courses focusing on African Americans

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Asian American Studies Minor
The Asian American Studies minor consists of 4 lower-division units, 20 upper-division units, and appropriate prerequisites as needed.

1. Lower-division requirement (4 units):
   ETST 005
2. Upper-division requirements: 20 additional upper-division units in Ethnic Studies chosen from courses focusing on Asian Americans

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Chicano Studies Minor
The Chicano Studies minor consists of 4 lower-division units, 20 upper-division units, and appropriate prerequisites as needed.

1. Lower-division requirement (4 units):
   ETST 006 or ETST 004/HIST 004
2. Upper-division requirements: 20 additional upper-division units in Ethnic Studies chosen from courses focusing on Chicanos

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Native American Studies Minor
The Native American Studies minor consists of 4 lower-division units, 20 upper-division units, and appropriate prerequisites as needed.

1. Lower-division requirement (4 units):
   ETST 007
2. Upper-division requirements: 20 additional upper-division units in Ethnic Studies chosen from courses focusing on Native Americans

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Education Abroad
Education Abroad is an excellent opportunity to learn more about another country and its culture while taking courses to earn units toward graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit Education Abroad at ea.ucr.edu or call (951) 827-4113.

See Education Abroad in the Educational Opportunities section in the beginning of this catalog.

Graduate Program
The Department of Ethnic Studies offers M.A. and Ph.D. degrees in the interdisciplinary field of Ethnic Studies.

Admission
For the M.A. and Ph.D. degrees, students are admitted for the fall quarter of each academic year only. The basic requirement for admission into the programs is a bachelor’s degree or its equivalent from an accredited institution with a major in any subject field.

Admission to the graduate program is based on the following criteria:
1. Prior academic performance, especially in undergraduate or graduate classes in Ethnic Studies or related fields.
2. Performance on the Graduate Record Examination.
3. Letters of recommendation from at least three persons familiar with an applicant’s potential for achieving academic excellence. Two of the letters must be from professors in the applicant’s major subject.
4. Compatibility between applicant’s areas of interest and department's research and teaching emphases.
5. Quality of the writing sample. Applicants must submit a scholarly paper not to exceed 15-double spaced pages, such as a term paper, section of a thesis, or published work.
6. Completed application and materials (including transcripts) required from Graduate Division.
The Ethnic Studies website at ethnicstudies.ucr.edu provides more details on the Ph.D. program, degree requirements, and application procedures. General Graduate Division university requirements are available on the Graduate website at graduate.ucr.edu/ and in the Graduate Studies section of this catalog.

**Master's Degree**

The M.A. degree program is designed for students whose goal is to complete the M.A. as their ultimate objective. While completion of the M.A. degree does not lead to automatic admission into the Ph.D. program, successful students may be encouraged to apply to the Ethnic Studies Ph.D. program at UCR or to similar programs at peer campuses. The M.A. program is designed for students who wish to enhance their existing scholarly training and enhance their professional qualifications, or who hope to prepare themselves for admission into a relevant Ph.D. program.

**Coursework**

All students must complete the M.A. core curriculum. The minimum course unit requirement for completion of the M.A. is 36.

**Course Requirements**

The core Ethnic Studies M.A. graduate curriculum consists of two theory courses (ETST 200 and 201), and one methodology course (ETST 203). The remainder of each M.A. student's specific curricular program is structured in consultation with his or her assigned faculty mentor. The candidate must complete a minimum of 36 units of course work with a cumulative grade point average of 3.0 or better, which include the three core courses and at least 24 additional units in 200-series courses. At least 12 of these 24 additional units must be in Ethnic Studies. These courses cannot include ETST 297 or ETST 299. Eight (8) units of 100-series courses may be counted toward the unit requirement with the permission of the graduate advisor.

**M.A. Completion**

**Plan II (Comprehensive Examination)**

Graduate students are required to successfully complete a Written M.A. Examination by the end of their second year. The exam will test the student's knowledge of the methodological and theoretical foundations of the field of Ethnic Studies and will cover material from the required core courses as well as courses in the student's area(s) of specialization. This exam is evaluated by a faculty committee of the candidate's choosing. If the student passes this exam, the committee will recommend awarding of the M.A. degree in Ethnic Studies.

**Normative Time to Degree:**

Six quarters.

**Doctoral Degree**

The Department of Ethnic Studies offers the Ph.D. degree in the interdisciplinary field of Ethnic Studies. Students proceed through the graduate program from coursework to exams to fieldwork and writing the dissertation. The Ph.D. program prepares students for teaching and research careers in the private and public sector.

**Coursework**

All students, including those who have a master's degree at the time of admission, must complete the basic core curriculum.

**Course Requirements**

The core Ethnic Studies graduate curriculum consists of two theory courses (ETST 200 and 201), one methodology course (ETST 203), and a graduate proseminar on professionalization (ETST 405). Where appropriate, students are encouraged to take an additional course in methodology (quantitative or qualitative), in addition to ETST 203. Students are also required to enroll in and attend the Ethnic Studies Colloquium during each quarter of the first two years of graduate work.

During the second year students will begin to select courses that are relevant to one or more of the following areas of specialization:

- **Area I: Theories of Race and Power**
- **Area II: Cultural Politics and Production**
- **Area III: The State, Law, and Social Transformation**

Students are also encouraged to supplement regular curricular offerings by initiating individual or small-group reading courses with appropriate Ethnic Studies faculty (ETST 290's etc.) or with cooperating faculty in other CHASS departments.

**First-year core requirements:**

- ETST 200 (Fall) History of Ideas in Ethnic Studies
- ETST 201 (Winter) Contemporary Theories in Ethnic Studies
- ETST 203 (Spring) Methodologies in Ethnic Studies
- ETST 289 (Fall, Winter, Spring) Departmental Colloquium

**Second-year core requirements:**

- ETST 289 (Fall, Winter, Spring) Departmental Colloquium
- ETST 405 (Fall) Graduate Proseminar on Professionalism

**Research and Teaching Requirements**

A student's program must include at least one academic quarter of supervised research through enrollment in ETST 297 and/or by working as a research assistant. The equivalent of at least one academic quarter of college classroom teaching is also required of all students.

**Grades**

A student must complete courses in the core curriculum and the specialization areas with a grade of "B" or better in each course.

**Ph.D. Written and Oral Qualifying Examinations**

**Written Qualifying Examination**

Graduate students are required to successfully complete a Written Qualifying Examination by the end of the spring quarter of their second year. The exam will test the student's knowledge of the methodological and theoretical foundations of the field of Ethnic Studies and will cover material from the required core courses as well as courses in the student's area(s) of specialization. This exam is evaluated by a faculty committee. If the student passes this exam, the committee will recommend awarding of the M.A. degree in Ethnic Studies. If the M.A. is awarded, or if the student already has an M.A. in Ethnic Studies, the faculty then votes on whether or not the student should continue in the Ph.D. program.

**Oral Qualifying Examination**

Students must compose, in consultation with a committee consisting of three to four faculty members, three written field statements that pertain to theoretical, methodological, and substantive foci related to the preparation of their dissertation.

Graduate students are required to successfully complete an Oral Qualifying Examination by the end of the winter quarter of their third year in which the student must display mastery over his/her three fields. If the oral exam is passed, the student will advance to candidacy.

**Dissertation Prospectus**

The Ph.D. candidate must also submit, no later than the fall quarter of their fourth year, a written prospectus outlining the topic, thesis, methods, resources, and timeline for the completion of the dissertation. The candidate must hold a Prospectus Meeting with Dissertation Committee members for final approval of the dissertation prospectus.

**Foreign Language**

Requirement There is no formal language requirement. However, in certain research areas a language requirement may be required if it is deemed that the language is germane to the student's research. In those cases where foreign language is required, competency can be established either by presenting evidence of satisfactory completion of the UCR Language Placement Exam, or by means of a translation test administered by the Graduate Affairs Committee.

**Dissertation and Presentation**

Doctoral students who have advanced to candidacy will research and write a dissertation under the guidance of a Dissertation Committee. The dissertation should focus on a specific aspect of the candidate's fields of study, and must conform to the format prescribed by the Graduate Council. After the Dissertation Committee approves the completed dissertation, the candidate must formally present his/her dissertation as part of the Departmental Colloquium series.

**Normative time to degree:**

The normative time for completion of the Ph.D. degree is six years.

**Lower-Division Courses**

ETST 001 Introduction to the Study of Race and Ethnicity 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. ETST 001 will introduce students to major concepts and controversial issues in the study of race and ethnicity and shall provide a general overview of topics to be covered in more specialized Ethnic Studies courses. Credit is awarded for only one of ETST 001 or ETST 001H.
ETST 001H Honors Introduction to the Study of Race and Ethnicity 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to ETST 001. Introduces students to major concepts and controversial issues in the study of race and ethnicity. Provides a general overview of topics covered in more specialized Ethnic Studies courses as well as an introduction to the methodology of scholarly research. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of ETST 001 or ETST 001H.

ETST 002 Introduction to Chicano Studies in Comparative Perspective 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Provides an overview of the Chicano experience from 1848 to the present, comparing and contrasting with the experiences of the dominant society and those of other racial and ethnic groups. Credit is awarded for only one of ETST 002 or ETST 002H.

ETST 002H Honors Introduction to Chicano Studies in Comparative Perspective 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to ETST 002. Provides an overview of the Chicano experience from 1848 to the present, comparing and contrasting with the experiences of the dominant society and those of other racial and ethnic groups. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of ETST 002 or ETST 002H.

ETST 003 Introduction to African American Studies in Comparative Perspective 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. This course is designed to provide an overview of the African American experience in the United States from antiquity to the present. It employs comparative and interdisciplinary perspectives. Emphasis is placed on examining the African American experience in a world context and comparing the African American experience to the experiences of other racial and ethnic groups.

ETST 004 Introduction to Chicano History 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. Covers the historical heritage of the Chicano from Spanish and Indian origins to the Chicano movement. Emphasizes the period since 1845. Cross-listed with HIST 004.

ETST 005 Introduction to Asian American Studies in Comparative Perspective 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. This course provides an overview of the Asian experience in the United States from the mid-nineteenth century immigration to Hawaii and the U.S. Pacific coast to the present. The Asian experience is compared and contrasted with that of African Americans and Chicanos/Latinos.

ETST 005H Honors Introduction to Asian American Studies in Comparative Perspective 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to ETST 005. Introduces students to major concepts and controversial issues in Asian American Studies. Provides a general overview of topics covered in more specialized Ethnic Studies courses as well as an introduction to the methodology of scholarly research. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of ETST 005 or ETST 005H.

ETST 007 Introduction to Native American Studies in Comparative Perspective 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. This course provides an overview of the Native American experience in the United States from antiquity to the present. The Native American experience is compared and contrasted with the experiences of the dominant society and those of other racial and ethnic groups.

ETST 007H Honors Introduction to Native American Studies in Comparative Perspective 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to ETST 007. Provides an overview of the Native American experience in the United States from antiquity to the present. Compares and contrasts the Native American experience with the experiences of the dominant society and those of other racial and ethnic groups. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of ETST 007 or ETST 007H.

ETST 008 Introduction to Chicano Cultural Studies 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): none. Identifies the cultural process of the Chicano experience, beginning with the Chicano Movement, and discusses the ideas, beliefs, values, and the forms of consciousness that shaped this process. Introduces literary and cultural works such as essays, film, theatre, music, poetry, and art.

ETST 011 Language and Ethnicity in the USA 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduces the changing demographic, sociopolitical, and ideological issues surrounding language in the United States through an ethnic studies lens. Topics include the history of languages in the United States; language usage patterns; language policy; language and power; language rights; and how language is linked to individual, ethnic, and national identities.

ETST 012 Religious Myths and Rituals 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to the meanings, origins, and functions of religion; the roles of myths, rituals, and symbols; and images of transcendence. Examines religious beliefs and expressions from diverse cultural perspectives. Utilizes materials from indigenous Native (North and South) American, African American, and/or Asian American religions. Cross-listed with RLST 012. Credit is awarded for only one of ETST 012/RLST 012 or ETST 012H/RLST 012H.

ETST 012H Honors Religious Myths and Rituals 4 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to ETST 012/RLST 012. An introduction to the meanings, origins, and functions of religion; the roles of myths, rituals, and symbols; images of transcendence; and understanding religious beliefs and expressions from diverse cultural perspectives. Utilizes source materials from indigenous Native (North and South) American, African American, and/or Asian American religions. Satisfactory (S) or No Credit (NC) grading is not available. Cross-listed with RLST 012H. Credit is awarded for only one of ETST 012/RLST 012 or ETST 012H/RLST 012H.

ETST 014 Popular Musics of the World 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduction to issues surrounding popular and urban musics of the world, focusing on three major geocultural areas: Africa, Asia, and the Americas. Emphasizes the relationship between mass-mediated music and issues of cultural hegemony, resistance, and subversion. Analyzes the cultural impact of media technology on music performance and reception. Cross-listed with MUS 014, and URST 014.

ETST 098 Introduction to Arab/Muslim American Studies 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Provides an overview of themes in Arab and Muslim American studies. Includes immigration and racism; family, gender, and sexuality; socio-economic class; religious affiliations; arts and cultures; and politics and political activism. Utilizes with interdisciplinary materials from social media and film to anthropological, historical, socio-cultural, and literary texts.

Upper-Division Courses
ETST 100 Race and Ethnicity in a Comparative Perspective 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ETST 001. Explores the interrelationships between race, class, ethnicity, and the operation of social processes. Accordingly, readings for this course center on the comparative well-being of African Americans, Hispanics (especially Chicanos), Native Americans, and Asian Americans.

ETST 101A Historical Development of Race and Power 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): ETST 001 or ETST 001H or ETST 002 or ETST 002H or ETST 003 or ETST 004 or HIST 004 or ETST 005 or ETST 005H or ETST 007 or ETST 007H or ETST 008 or ETST 011 or ETST 012 or RLST 012 or ETST 012H or RLST 012H or ETST 014 or ETST 098 or ETST 102; restricted to class level standing of junior; or senior; or consent of instructor. Focuses on a critical historical charting of the political, economic, and cultural development of race and power.
ETST 108 (E-Z) Special Topics in Chicano Studies 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Selected topics in: E. Culture, Ethnicity, And Social Change; F. The Conditions Of Education For Chicanos; I. Mexican Immigration And The Chicano Community; L. The Labor And Legal History Of The Chicano; P. Chicano Poetry And Theatre.

ETST 109 (E-Z) Special Topics in African American Studies 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ETST 003; restricted to class level standing of junior, or senior. Selected topics addressing the issues of the African American experience. Includes reading, research, and discussion on the African American experience.

ETST 111 Ethnic Politics: Practicum in Political Change 4 Lecture, 3 hours; practicum, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Studies theories and practices of comparative ethnic political change. Examines topics intrinsic to the understanding of how to effect political change within the Chicano, African American, Asian American, Native American, and other ethnic communities, as well as the dominant societies.

ETST 112 The Civil Rights Movement, 1950–1970 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. The Civil Rights Movement of the 1950s and 1960s. The main focus will be on the “grass roots.” African American aspects of “The Movement,” as it was popularly known, from school desegregation to voting rights and beyond. Cross-listed with HISA 135.

ETST 113 Black Feminist Theory and Activism 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Considers the writings and collective organizational strategies of African American women intellectuals and activists developed in response to the ways racial, sexual, and economic oppression work interdependently and are institutionalized. Follows black women’s agendas for social change from the early women’s slave narratives to the present. Cross-listed with HISA 134.

ETST 114 Contemporary Latina Writing in the United States 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Critical readings of Chicana, Puerto Rican, and Cuban American authors. Overview of contemporary literature (1970 to present) written by Latinas who reside permanently in the United States. Theatre, poetry, and narrative is closely examined and compared. Focuses on the political, historical, social, and cultural processes that give rise to this literature.

ETST 115 (E-Z) Topics in Native American History 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Selected topics addressing the issues of the Native American. Includes reading, research, and discussion on the Native American experience. F. Erly Amercemerging Interpretns. Cross-listed with HISA 144 (E-Z).

ETST 116 Medicine Ways of Native Americans 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the medical history of Native Americans. Focuses on traditional Native American medicine and how Western diseases, medical practices, health care, and policies influenced American Indian health. Topics include medicine people, rituals, ceremonies, smallpox, measles, influenza, anomie, accidents, diabetes, suicides, mental illness, and murders. Cross-listed with HISA 147.
ETST 117 (E-Z) Themes and Topics in African History 4 Lecture, 3 hours; term paper, 3 hours. A thematic and topical approach to the study of African history from the early Nile Valley civilizations to the twentieth century. Examines the temporal and spatial development of African societies—including their social, political, economic, and ideological systems—during the precolonial, colonial, and postcolonial periods. F: West African History To 1800; I: Nineteenth- And Twentieth-century Africa And European Imperialism; J: Ancient Africa; K: Africa From 1000-1880; M: Twentieth-century Africa.

ETST 118 American Indian Identities 4 Lecture, 3 hours; written work, 2 hours; field, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior. Provides a multidisciplinary perspective on the development and diversity of contemporary American Indian identities including the question of who or what counts as “Indian,” and why. Topics include historical and contemporary perspectives from political, ethnic, cultural, and legal standpoints from both American Indian communities and wider United States society.

ETST 119 Issues in Twentieth-Century and Contemporary Native American Art 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. An introduction to twentieth-century and contemporary Native American art. Includes an examination of outside forces that have impacted Native American artists and their work. Topics include colonialist attitudes toward “authenticity”, as well as paternalist government policies and economic factors combined with romanticized ideas of the “noble savage”.

ETST 120 Contemporary Native American Literature 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Study of representative works of fiction, nonfiction, and poetry from the 1960s to the present. Emphasis upon the works of Louise Erdrich, Joy Harjo, N. Scott Momaday, Simon Ortiz, Leslie Silko, Gerald Vizenor, and James Welch, among others.

ETST 121 California Native Cultures 4 Lecture, 3 hours; activity, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Introduces the culture and history of the diverse Indigenous peoples of California. Topics explored include oral histories, traditional ecological knowledge (TEK), material culture, and kinship practices. Discusses contemporary activities of cultural preservation and resistance to assimilation.

ETST 123 Chicano Politics in Comparative Perspective 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Analysis of contemporary Chicano politics, political movements, ideologies, relations with intergovernmental agencies, political attitudes, and participation in the political process. Comparison of the Chicano political experience to that of other racial and ethnic groups in American politics.

ETST 124 The Chicana 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. The unique experience of the Chicana viewed from social, intellectual, historical, and artistic perspectives.

ETST 126 The Chicano and the Law 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Analysis of the relationship of the Chicano to the U.S. legal and judicial system. Topics include traditional sociological and criminological theories; history of the Chicano and the law; the Pachuco image and the Chicano; and police and correctional institutions.

ETST 127 Latino Men and Masculinity 5 Lecture, 3 hours; term paper, 3 hours; written work 3 hours. Prerequisite(s): ETST 001 or ETST 001H or ETST 002 or ETST 002H or ETST 003 or ETST 005 or ETST 005H or ETST 007 or consent of instructor. Analysis of Chicano/Latino men and masculinity in historical and comparative perspective. Examines social construction and expression of manhood and masculinity in a cross-national context and the range and varieties of masculinities in Latino America. Critically evaluates and deconstructs common myths, stereotypes, and misconceptions about men, machismo, and masculinity.

ETST 128 Chicano Sociology 4 Lecture, 3 hours; individual study, 3. Prerequisite(s): upper-division standing or consent of instructor. Analysis of the Mexican experience in U.S. society. Examines the history as a minority; mass immigration in the twentieth century; relationships with American institutions; present socioeconomic status; variations in social status from region to region; political emergence and variations in values; and social relations and integration with non-Mexicans. Cross-listed with SOC 128. Credit is awarded for only one of ETST 128/SOC 128 or ETST 128S/SOC 128S.

ETST 128S Chicano Sociology 4 Lecture, 3 hours; discussion, 1 hour; extra reading, 4 hours; individual study, 4 hours; written work, 4 hours. Prerequisite(s): upper-division standing or consent of instructor. Analysis of the Mexican experience in U.S. society. Examines the history as a minority; mass immigration in the twentieth century; relationships with American institutions; present socioeconomic status; variations in social status from region to region; political emergence and variations in values; and social relations and integration with non-Mexicans. Cross-listed with SOC 128S. Credit is awarded for only one of ETST 128/SOC 128 or ETST 128S/SOC 128S.

ETST 129 Theories in Chicano Studies 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ETST 001 or ETST 001H; ETST 002 or ETST 002H; ETST 004/HIST 004; upper-division standing or consent of instructor. Analyzes prevailing and emerging theories, paradigms, and perspectives in Chicano Studies. Examines and applies traditional social science theories of race and ethnicity such as the order/pluralistic, assimilationist, and functionalist models, as well as Marxism, internal colonialism, feminism, postmodernism, and critical race theory to the experiences of Chicanos and other Latinos.

ETST 130 History of Public Education in Communities of Color 4 Seminar, 3 hours; term paper, 1 hour; research, 2 hours. Prerequisite(s): upper-division standing; consent of instructor. An introduction to a comparative analysis of public education as it relates to Native Americans, African Americans, Latinos/os, Chicanas/os, and Asian Americans. Focuses on experiences within the United States. Compares and contrasts experiences within these groups, as well as identifies major policy disagreements.

ETST 131 Race, Class, and Gender 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ETST 001 or ETST 001H or ETST 002 or ETST 002H or ETST 003 or ETST 005 or ETST 005H or ETST 007 or ETST 007H or ETST 004 or HIST 004 or ETST 008 or ETST 012 or ETST 012H or RLST 012 or RLST 012H or ETST 014 or ETST 011 or ETST 098; or consent of instructor. Considers the interdependency of race, class, gender, and sexuality in relation to social inequality and oppression. Focuses on the intersection of components, as well as examines the experiences and strategies of resistance of poor, working class women of color and/or queer people of color.

ETST 132 Chicano Contemporary Issues 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Provides students with demographic and historical overview of the status of Latinos in the United States today, and of the salient issues plaguing them. Utilizing an interdisciplinary approach, analyzes strategies, tactics, and policies that may effectively deal with these issues.

ETST 133 Asian Diaspora: Historical, Contemporary, and Comparative Perspectives 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of the dispersal, transplantation, and transformation of Asian populations in selected regions of the world—the Americas, Europe, the Middle East, and Asia Pacific—as viewed from the historical and contemporary experiences of the Chinese, Japanese, Filipinos, Koreans, Vietnamese, and other Asian groups in the contexts of colonization, cultural and political domination, and an emerging global economy.

ETST 136 The Korean American Experience 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the history of Koreans in the United States to analyze a wide range of contemporary social and identity issues. Students are encouraged to do original research, develop writing and communication skills, and devise research projects that address the immigrant Korean community’s needs.

ETST 137 The Vietnamese Americans: the Refugee and Immigrant Experience 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on the Vietnamese American experience in contemporary society. Emphasizes the relationship of Vietnamese Americans to the larger society and on intergenerational strains and conflicts. Topics include socioeconomic and educational problems, family, religion, and the relationship between Vietnamese Americans and other ethnic groups. Cross-listed with SEAS 137.
ETST 139 Contemporary Issues in the Asian American Community 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Analyzes contemporary issues facing Asian Americans: Asian American identity and images, education, employment, housing, dual oppression, interethnic conflicts, juvenile delinquency, generational conflicts, and anti-Asian violence.

ETST 140 Asian American Feminist Theory and Politics 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Addresses the shifting role of Asian American women in the United States as they struggle to define their identities between and within diverse and often opposing cultures. Explores and analyzes the myths and realities of being an Asian American woman through literature, art, documents, films, and first-person accounts.

ETST 141A Black Literature I 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on African American writers and literary movements. Emphasizes African slave narratives, protest literature, and the Harlem Renaissance.

ETST 141B Black Literature II 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): ETST 141A. Considers significant African American writers and literary movements. Focuses on the Black Arts Movement, Black Women's Feminist literature, and Diasporan literature.

ETST 143 Critical Filipino(a) Studies: Histories and Legacies of United States Conquest, Colonialism, & Empire 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): ETST 001 or ETST 001H or ETST 002 or ETST 002H or ETST 003 or ETST 004 or HIST 004 or ETST 005 or ETST 005H or ETST 007 or ETST 007H or ETST 008 or ETST 012 or ETST 012H or RLST 012 or RLST 012H or ETST 014; or consent of instructor. Focuses on the origins of Filipino American civic existence and its links to histories of U.S. racial formation, racialized industrialization, and racialized frontier warfare. Cross-listed with SEAS 143.

ETST 144 Race and Indigeneity in Hawai‘i 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ETST 001 or ETST 001H. A comparative and historical survey of the racial dynamics of Hawai‘i’s multicultural community. Explores the intersections between Hawai‘i’s ethnic groups including the native Hawaiians, the white (‘haole’) population, and the plantation immigrant groups (Chinese, Japanese, Filipino, and Portuguese). Also addresses the Pacific Islander population in contemporary Hawai‘i.

ETST 145 Law and Subordination 5 Lecture, 3 hours; field, 6 hours. Prerequisite(s): upper-division standing in Ethnic Studies or Sociology. ETST 128/SOC 128 or ETST 128S/SOC 128. A comparative and historical analysis of subordinated communities and law emphasizing integrating theoretical understanding of racial, class, and gender subordination. Includes field experience working directly with groups that have traditionally lacked equal access to the legal and judicial system. Cross-listed with SOC 145.

ETST 146 Educational Perspectives On the Chicano 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An examination of educational policy issues concerning Chicana/o students, such as testing and testing procedures, learning styles, socialization, and language acquisition. Other topics will deal with the impact of significant legislative acts related to the education of Chicanos. Cross-listed with EDUC 146.

ETST 147 History of Black Education 4 Lecture, 3 hours; individual study, 4 hours. Prerequisite(s): upper-division standing. This course examines major themes in Black education: the education of slave and free Blacks; role of missionaries and philanthropists in Black education; the growth of Black colleges; curricular debates; and the NAACP challenge of the “separate but equal” doctrine.

ETST 148 Caribbean Culture and Society 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. An overview of the Caribbean region from a historical, cultural, and political perspective. Emphasizes contemporary issues affecting the Caribbean and the struggle of its people to maintain their identities. Cross-listed with ANTH 142G, and LNST 168.

ETST 149 Political Violence in Mexico 4 Lecture, 3 hours; term paper, 2 hours; extra reading, 1 hour. Prerequisite(s): ETST 001 or ETST 001H or ETST 002 or ETST 002H or ETST 003 or ETST 004 or HIST 004 or ETST 005 or ETST 005H or ETST 007 or ETST 007H or ETST 008 or ETST 012 or ETST 012H or RLST 012 or RLST 012H or ETST 014; or consent of instructor. Examines the historical and legacies of U.S. conquest and colonialism in the Philippines. Analyzes the origins of Filipino American civic existence and its links to histories of U.S. racial formation, racialized industrialization, and racialized frontier warfare. Cross-listed with ANTH 142, and LNST 168.

ETST 150 Chicana/o California: A Social and Cultural History 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An overview of the Chicana/o impact on regional culture and American society as a whole.

ETST 151 Contemporary Asian American Literature 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Survey of contemporary Asian American literature and culture. Explores identity politics, cultural nationalism, feminism, sexuality, postmodernism, postcolonialism, diaspora, and transnationalism.

ETST 152 Asian American Film and Video 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): ETST 001 or ETST 001H. A comparative and historical analysis of cinematic works by and/or about Asian Americans. Topics include studies of forms and genres; viewing and interpretive practices; the conditions of production, distribution, and reception; as well as thematic concerns such as history and memory, the politics of identity, community, social justice, gender, and sexuality.

ETST 153 Native American Language Revitalization 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Provides an overview of Native American language endangerment and revitalization efforts. Includes the changing social contexts in which they occur, focusing on social and political implications. Topics include methods of revitalization, the changing role of linguists and other specialists, and implications of language efforts for identity.

ETST 154 Chicanos and Popular Music in the Twentieth-Century: From Pachuco Boogie to Latin Jazz 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examination of musical styles and expressive cultures of everyday Mexican Americans in primarily Southern California to understand their social consciousness and cultural politics. Covers the historical evolution of diverse Chicano cultural identities, musical tastes, and communities. Focuses on cultural hybridity, subcultural style, identity formation, class mobility, gender, sexuality, racialization, and assimilation.

ETST 155 Chicana/O California: A Social and Cultural History 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the historical evolution of Mexican and Mexican American social and cultural experience in California from the Spanish colonial period through the late twentieth century. Analysis of the Chicana/O impact on regional culture and American society as a whole.

ETST 156 Politics of the Chicano Movement 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the various aspects of the politics of the Chicano movement from 1965 to 1974. Focuses on in-depth analysis of the movement’s historical genesis, leadership, ideology, organizations, strategy, and tactics, as well as the issues that brought it into being. Also examines the forces that contributed to its demise.

ETST 157 Native American Diaspora 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): ETST 007, upper-division standing; or consent of instructor. Analyzes historical and contemporary Native American migrations. Explores involuntary Native American diaspora throughout America forced by interaction with Spanish, French, Dutch, and English colonists. Examines nineteenth- and twentieth-century reservations and forced and voluntary removals and relocations.

<tr>
<td>ETST 158</td>
<td>American Indian Intellectual Traditions 4</td>
<td>Lecture, 3 hours; term paper, 3 hours.</td>
<td>4</td>
<td>Upper-division standing or consent of instructor. Analyzes selected spiritual beliefs of America’s native peoples. Examines sacred beliefs, oral histories, ceremonies, customs, and the historical significance of selected tribes and bands. Explores the conditions and forces which shaped American Indians and influence them today.</td>
</tr>
<tr>
<td>ETST 159</td>
<td>Texas Indian History 4</td>
<td>Lecture, 3 hours; term paper, 3 hours.</td>
<td>4</td>
<td>Upper-division standing or consent of instructor. Seeks to understand the Native American past through a study of the history of the indigenous peoples of Texas from the earliest times to the present. Examines pre-colonial eras, European invasion, and colonialism under Mexico, the Republic of Texas, and the United States. Discusses the effects of treaties, laws, and federal and state policies on modern Texas Indians. Emphasizes the survival and adaptation of native peoples of Texas.</td>
</tr>
<tr>
<td>ETST 160</td>
<td>Community Research and Advocacy 4</td>
<td>Seminar, 3 hours; written work, 1 hour; field, 8 to 10 hours.</td>
<td>4</td>
<td>Upper-division standing or consent of instructor. Describes the effects of treaties, laws, and federal and state policies on modern Texas Indians. Emphasizes the survival and adaptation of Native Americans.</td>
</tr>
<tr>
<td>ETST 161</td>
<td>United States Latinos: Crossing Borders, Crossing Cultures 4</td>
<td>Lecture, 3 hours; term paper, 3 hours.</td>
<td>4</td>
<td>Upper-division standing or consent of instructor. Introduces the idea of Latino identity as a way to study heterogeneity of ethnic group identification. Focuses on historical chronology, literacy tradition, and other cultural practices. Emphasis is on the experience of diversity and pluralism within the Latino experience.</td>
</tr>
<tr>
<td>ETST 162</td>
<td>Learning Native American Languages 5</td>
<td>Lecture, 4 hours; individual study, 3 hours; research, 1 hour.</td>
<td>4</td>
<td>Upper-division standing or consent of instructor. Provides a social situation in which students learn to speak a Native American language of their choice through individual study of reference materials, training in linguistic analysis, and class presentations. Examines the social implications of learning and speaking these languages. Students must obtain learning materials for their language of study. Course is repeatable to a maximum of 10 units.</td>
</tr>
<tr>
<td>ETST 163</td>
<td>(E-2) Special Topics in Gender, Sexuality, and Race 4</td>
<td>Lecture, 3 hours; extra reading, 3 hours.</td>
<td>3</td>
<td>Upper-division standing or consent of instructor. Introduces the intersections between the social construction of sexuality and the political economy of capitalism. Focuses on the United States. Includes the legacies of queer social movement and coalition building as well as the role of the contemporary United States where capital circulates and sexual identities are produced, contested, and negotiated.</td>
</tr>
<tr>
<td>ETST 163E</td>
<td>Introduction to Queer Studies 4</td>
<td>Lecture, 3 hours; extra reading, 3 hours.</td>
<td>3</td>
<td>Upper-division standing or consent of instructor. Introduces the intersections between the social construction of sexuality and the political economy of capitalism. Focuses on the United States. Includes the legacies of queer social movement and coalition building as well as the role of the contemporary United States where capital circulates and sexual identities are produced, contested, and negotiated.</td>
</tr>
<tr>
<td>ETST 164</td>
<td>History of African American Education: 1950–Present 4</td>
<td>Lecture, 3 hours; individual study, 3 hours.</td>
<td>4</td>
<td>Upper-division standing or consent of instructor. Introduces the major themes in African American education. Focuses on the intersection of public education, politics, policies in circumventing desegregation, and churches and community organizations advancing desegregated education. Also explores poverty and urban schools, social programs, the Afrocentric pedagogy of failure, separate schools for blacks, resegregation, and the achievement promise.</td>
</tr>
<tr>
<td>ETST 165</td>
<td>Latinos, Asylum, and Migrant Detention 4</td>
<td>Seminar, 3 hours; clinic, 2 hours; written work, 1 hour.</td>
<td>4</td>
<td>Upper-division standing or consent of instructor. Seminar to study the politics of asylum and migrant detention practices in the United States in a global perspective. Students will gain knowledge on asylum and detention regime through both the lens of global political economy, critical race theory, and through practical engagement with refugee and migrant organizations/official practitioners.</td>
</tr>
<tr>
<td>ETST 166</td>
<td>Issues in Bilingual/Bicultural Education 4</td>
<td>Lecture, 3 hours; individual study, 3 hours.</td>
<td>3</td>
<td>Upper-division standing or consent of instructor. An intensive analysis of issues involved in developing and implementing bicultural/bilingual programs for Chicano children.</td>
</tr>
<tr>
<td>ETST 167</td>
<td>Psychological Development of Black Children 4</td>
<td>Lecture, 3 hours; extra reading, 3 hours.</td>
<td>4</td>
<td>Upper-division standing or consent of instructor. This course will analyze both the traditional theoretical approaches to the study of Black children and innovative approaches that are currently being developed by Black psychologists. The course will cover topics in the areas of cognitive, social, and personality development. Cross-listed with PSYC 167.</td>
</tr>
<tr>
<td>ETST 168</td>
<td>Psychological Aspects of the Black Experience 4</td>
<td>Lecture, 3 hours; extra reading, 3 hours.</td>
<td>4</td>
<td>Upper-division standing or consent of instructor. This course examines the interdependence between personal characteristics. African American culture, and the social conditions which foster the Black experience. Group membership, life styles, role factors, and situational settings as social norms will be explored in order to understand the uniqueness of the Black experience. Cross-listed with PSYC 168.</td>
</tr>
<tr>
<td>ETST 169</td>
<td>The Politics of Race and Performance 4</td>
<td>Lecture, 3 hours; extra reading, 3 hours.</td>
<td>3</td>
<td>Upper-division standing or consent of instructor. Considers the complex practice of dance, music, and performance art by expressive artists of color and asks questions about address, audience, white uses of black performance techniques, dance in relation to self-conscious historical memory, and the politics of authenticity and commodification. Investigates performances from different locations, from explicitly political to heavily commercialized.</td>
</tr>
<tr>
<td>ETST 170</td>
<td>Third World Literature 4</td>
<td>Lecture, 3 hours; extra reading, 3 hours.</td>
<td>4</td>
<td>Upper-division standing or consent of instructor. Restricted to class level standing of junior, or senior. Analysis of some major works associated with Third World literature and film. Emphasis on African, Latin American, Caribbean, African American, and Chicano Literature.</td>
</tr>
<tr>
<td>ETST 171</td>
<td>Black Music 4</td>
<td>Lecture, 3 hours; term paper, 3 hours.</td>
<td>3</td>
<td>Upper-division standing or consent of instructor. Considers black music from Congo Square to blues and jazz and hip hop as key sites for African Diasporic cultural and political formation. Focuses on black musical production and circulation.</td>
</tr>
<tr>
<td>ETST 172</td>
<td>Music Cultures of Southeast Asia 4</td>
<td>Lecture, 3 hours; extra reading, 3 hours.</td>
<td>3</td>
<td>Upper-division standing or consent of instructor. A survey of music, dance, theatre, and ritual in the Philippines, Indonesia, Malaysia, Thailand, Myanmar (Burma), Laos, Cambodia, and Vietnam. Designed for the student interested in the performing arts and cultures of mainland and insular Southeast Asia. No Western music background is required. Cross-listed with ANTH 176, AST 127, DNCE 127, MUS 127, and SEAS 127.</td>
</tr>
<tr>
<td>ETST 173</td>
<td>Black Art in America 4</td>
<td>Lecture, 3 hours; field, 3 hours.</td>
<td>3</td>
<td>Upper-division standing or consent of instructor. Discusses Black artists in the visual arts from slavery until the end of the Negro Renaissance (mid-1930s).</td>
</tr>
<tr>
<td>ETST 174</td>
<td>Race, Law, and Education in the United States 4</td>
<td>Lecture, 3 hours; extra reading, 3 hours.</td>
<td>4</td>
<td>Upper-division standing or consent of instructor. Examines the role legal decisions, judicial policymaking, and race play in education. Studies the impact on schools, their communities, students, teachers, administrators, and disenfranchised groups.</td>
</tr>
<tr>
<td>ETST 175</td>
<td>Gender, Ethnicity, and Borders 4</td>
<td>Lecture, 3 hours; extra reading, 3 hours.</td>
<td>4</td>
<td>Upper-division standing or consent of instructor. Examines the role of gender and ethnicity in education. Cross-listed with ETST 175.</td>
</tr>
<tr>
<td>ETST 176</td>
<td>The United States Prison Industrial Complex: Race, Gender, and Citizenship 4</td>
<td>Lecture, 3 hours; extra reading, 3 hours.</td>
<td>4</td>
<td>Upper-division standing or consent of instructor. Examines the role of gender and ethnicity in education. Cross-listed with ETST 175.</td>
</tr>
</tbody>
</table>
ETST 178 Disability and Race 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior, or consent of instructor. Explores intersections of disability and race in law and policy, critical theory, and media and culture. Themes include how disability discrimination intersects with racial discrimination, how disability and racial justice movements inform each other, and how cultural production emerges from the intersections of race and disability.

ETST 179 Race and Environment: Nature, Colonialism, and Justice 4 Seminar, 3 hours; term paper, 2 hours; extra reading, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior. Explores the interdependent relationships between race and environment through law, policy, culture, geography, (settlement) colonialism, and (racial) capitalism, focused on the United States. Topics include environmental and climate justice, decolonial and abolitionist thought, urban political ecology, and the social constructions of human, nonhuman, and “nature.”

ETST 180 California Indian History 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Provides students with a broad understanding of the rich and varied heritage and history of California Indians from the invasion of the Spanish to the twentieth century. Examines geographically and culturally diverse groups as a means of illustrating the various Euro-American Indian policies that affected native Californians. Course is comparative and thematic. Cross-listed with HISA 140.

ETST 181 Southwestern Indian History 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Presents a historical examination of selected Native American groups in the Southwest. Examines the relationship of Southwestern Indians to the Spanish, Mexican, and United States governments. Focuses on Quechans, Tohono O’odam, Yavapai, Chiricahuas, Navajos, Zunis, Hopis, Comanches, and selected Pueblos along the Rio Grande. Cross-listed with HISA 141.

ETST 182 Northwestern Indian History 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines selected aspects of Northwestern Indian History, from approximately the 1750s to the twentieth century. Deals with several native groups along the Northwest coast from Alaska to Oregon. Compares policies of the Russian, Spanish, English, and United States governments. Particular emphasis on the 1850s when the U.S. negotiated a number of treaties with Native Americans in the Washington and Oregon territories. Cross-listed with HISA 142.

ETST 183 Native American Oral Literature 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ETST 007; upper-division standing or consent of instructor. Comparative examination of Native American oral literature of tribes in the United States, Canada, and Mexico. Enhances the student’s understanding of Native American language, literature, drama, geography, geology, biology, history, and culture. Cross-listed with HISA 143.

ETST 184 American Indian Policy in the Twentieth-Century 4 Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. This course will begin with the end of the treaty-making period and the point in time that the United States emerged as a colonial power (1871). The history of the relationship between the United States government and the American Indian tribes from the year 1871 to 1988 will be presented phase by phase. In addition, it will explore the position and role of the American Indian during the last twenty years.

ETST 185 Native American Law 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Emphasis on traditional law, civil and criminal rights, water rights, First Amendment religious freedom, and gaming on reservations.

ETST 186 Policing and the Hegemony of “Law and Order”: Race, Gender, Sexuality, Citizenship, and the Politics 4 Lecture, 3 hours; activity, 3 hours. Prerequisite(s): ETST 001 or ETST 001H or ETST 002 or ETST 002H or ETST 003 or ETST 004 or HIST 004 or ETST 005 or ETST 005H or ETST 007 or ETST 007H or ETST 008 or ETST 012 or ETST 012H or RLST 012 or RLST 012H or ETST 014 or ETST 011 or ETST 098; or consent of instructor. Provides a critical approach to the interdisciplinary study of state violence and militarized policing. Examines ways in which policing technologies and tactics are organized through racialized, gendered, and classed hierarchies.

ETST 187 Anticolonialist Thought 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the political-intellectual work of anticolonialist struggle and independence movements.

ETST 188 Native American Women 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to Native American gender systems and the changing roles of women. Examines the cultural productions of indigenous women that make important interventions in our understanding of gender and social justice in contemporary Native America. Materials include testimonial literature, autobiographies, films, novels, and popular culture.

ETST 189 Popular Culture and the Production of Race 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): ETST 001 or ETST 001H or ETST 002 or ETST 002H or consent of instructor. Offers an interdisciplinary and theoretical approach to the study of various popular film and television genres in relation to the production—and contestation—of racial meaning. Concerned with the material significance of film and television as, simultaneously, “entertainment,” “pleasure,” “mass culture,” “(self-)representation,” and “cultural resistance or insurgency.”

ETST 190 Special Studies 1 to 5 Individual Study, 3 to 15 hours. Prerequisite(s): upper-division standing and consent of instructor. Independent study and research by qualified undergraduate students under the supervision of a particular faculty member. Course is repeatable to a maximum of 16 units.

ETST 191 (E-Z) Seminar in Ethnic Studies 4 Seminar, 3 hours; term paper, 3 hours. Selected topics in the ethno histories and cultures of African American, Asian American, Chicano / Latino, and Native American ethnic groups. E. Native American History And Research; F. Asian American Studies; G. Chicano Psychology; K. Chicano Sociology; N. Chicano Literature: A Comparative Approach; R. Research Methodology; S. Black Aesthetics.

ETST 198 R’course: Variable Topics 1 Activity, 3 hours. Prerequisite(s): permission needed from department. An opportunity for UCR undergraduate students to develop leadership skills, innovate the undergraduate curriculum, and promote democratic, experiential education. Original course topics are variable and unique from other departmental course offerings, designed to highlight the student facilitators’ expertise while working closely with a faculty mentor. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as topics change to a maximum of 8 units.

ETST 198G Group Internship 1 to 12 Internship, 2 to 24 hours; research, 1 to 12 hours. Prerequisite(s): upper-division standing; consent of instructor. On- or off-campus internships related to the interests of core ethnic-group students under the joint direction of an on- or off-campus supervisor and an Ethnic Studies faculty member. Course is repeatable to a maximum of 16 units.

ETST 198I Individual Internship 1 to 12 Internship, 2 to 24 hours; research, 1 to 12 hours. Prerequisite(s): upper-division standing; consent of instructor. On- or off-campus internships related to the ethnic community, conducted under the joint direction of an on- or off-campus supervisor and an Ethnic Studies faculty member. Requires a report based on the experience. Course is repeatable to a maximum of 16 units.

Graduate Courses

ETST 200 History of Ideas in Ethnic Studies 4 Seminar, 3 hours; written work, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the foundational ideas critical for understanding the historical evolution of race and ethnic issues in the United States and within international relations. Prepares graduate students to conceptualize multidisciplinary and comparative ethnic studies research. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes to a maximum of 12 units.

ETST 201 Sociocultural Theories in Ethnic Studies 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing. Examines theoretical approaches to the study of race and ethnicity in the United States. Assesses the relative strengths and weaknesses of key theoretical paradigms. Perspectives may include symbolic interaction, phenomenology, class analysis, sovereignty, literary criticism, feminism, psychoanalysis, racial formation, critical race theory, postmodernism, and global or transnational. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes to a maximum of 12 units.
ETST 203 Research Methods in Ethnic Studies 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing; consent of instructor. Examines some of the foundational theories and methods employed in the field of ethnic studies. Provides basic knowledge in designing and implementing a research project utilizing multiple methods. Course is repeatable as content changes to a maximum of 12 units.

ETST 204 Critical Race Perspectives in Latino Education 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing. Examines the social, economic, and political factors that impact contemporary Latino/a education. Explores alternative epistemologies that challenge traditional modes of schooling as well as alternative pedagogies - both in and outside public school classrooms - that are rooted in community-based knowledge.

ETST 205 Feminism, Race, and the Politics of Knowledge 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores how race and gender are produced and institutionalized in U.S. social arrangements, emphasizing the social construction of race and gender in science, culture, and the law. Surveys a collection of nineteenth- and twentieth-century scientific and legal texts alongside feminist of color writings that analyze the relationship between knowledge, empowerment, and social justice. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

ETST 215 Asylum Policy and Migrant Detention 4 Seminar, 3 hours; clinic, 3 hours; written work, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Covers the politics of asylum and migrant detention practices in the United States in a global perspective. Includes knowledge on asylum and detention regime through both the lens of global political economy, critical race theory, and through practical engagement with refugee and migrant organizations/legal practitioners. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

ETST 221 Race, Gender, Law, and Equal Protection 4 Seminar, 3 hours; field, 3 hours. Prerequisite(s): graduate standing; consent of instructor. Examines the interrelationships among law, race, gender, equal protection doctrine, and the state. Addresses contemporary theoretical challenges to concepts such as critical legal studies, critical race theory, “LatCrit,” and feminist jurisprudence. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable as content changes to a maximum of 12 units.

ETST 222 Intersectionalities 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines theory of intersectionality in transnational framework and historical perspective. Addresses problems of social identity construction and the body. Considers analyses in relation to people of color and issues of race, sex, economic oppression, homophobia, trans-gender possibilities, ageism, militarization, nationalism, and globalization. Focuses on collective strategies of resistance and revolution. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes to a maximum of 12 units.

ETST 223 Chicana/O Expressive Culture: Theory and Practice 4 Seminar, 3 hours; written work, 2 hours; term paper, 1 hour. Prerequisite(s): graduate standing; consent of instructor. Examines Chicana/o cultural studies theories while tracing the history of diverse communities and expressive cultures from Spanish colonial period through turn of the twenty-first century. Assesses role of popular culture in Mexican American life. Explores the Chicanas/os’ impact upon the development of popular culture and academia in American life. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes to a maximum of 12 units.

ETST 224 Race and State Violence 4 Seminar, 3 hours; term paper, 2 hours; written work, 1 hour. Prerequisite(s): ETST 201 or consent of instructor. Engages critical social theories of race. Focuses on state-mediated technologies of power and domination. Emphasizes analyses of race, racism, and white supremacy that conceptualize their historical constitution of statecraft and nation-building processes. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes to a maximum of 12 units.

ETST 225 Imperialism, Colonialism, and Racism: Global Historical Perspectives 4 Seminar, 3 hours; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): graduate standing consent of instructor. Charts a critical interdisciplinary genealogy of imperialism, colonialism, and racism within the global context of capitalist modernity. Explores the characteristics of imperialism, colonialism, and racism, as well as their relation to each other and to nationalism, decolonization, and globalization. Addresses how these complex articulations have been theorized. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes to a maximum of 12 units.

ETST 226 Cultural Politics and Production 4 Seminar, 2 hours; screening, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing; consent of instructor. Considers the discursive and expressive cultural forms produced by racialized subjects. Covers a range of literatures, music, dance, song, and performance forms; the works of individuals and collectives; and social movements. Course is repeatable as content changes to a maximum of 12 units.

ETST 227 Anticolonialism and its Aftermath 4 Seminar, 3 hours; term paper, 1 hour; written work, 2 hours. Prerequisite(s): ETST 201 or consent of instructor. Examines anticolonialist political thought in the context of contemporary and subsequent critical work in interdisciplinary fields. Engages these thoughts through frameworks of critical race studies, feminist thought, queer studies, postcolonial studies, and cultural studies. Discusses relevance of anticolonialist theorizations and insights to contemporary social and political problems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes to a maximum of 12 units.

ETST 228 Race, Law, and Educational Policy 4 Lecture, 3 hours; term paper, 1.5 hours; extra reading, 1.5 hours. Prerequisite(s): graduate standing or consent of instructor. Explores how law and race shape educational policies, as well as how educational policies and practices shape race and law. Examines how decisions made at the federal, state, and local levels influence public education opportunities and access. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes to a maximum of 12 units.

ETST 230 Gramscian Thought & Subaltern Struggles 4 Seminar, 3 hours; written work, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Covers Antonio Gramsci’s primary writings as well as select texts by scholars that have applied his theoretical insights to the study of struggles between subaltern groups and states in multiple contexts. Includes the application of Gramscian theory and methods to advanced projects in the social sciences and humanities. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

ETST 231 Racial Capitalism and the Black Radical Tradition 4 Seminar, 3 hours; term paper, 2 hours; extra reading, 1 hour. Prerequisite(s): graduate standing; consent of instructor. Examines race as a structural mechanism and ideological terrain that manifests inequalities foundational to capitalism. Explores radical traditions of resistance, revolt, abolition, and survival that have emerged from (Queer) Black, Indigenous, and People of Color communities. Emphasizes on the state, political economy, and cultural studies. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

ETST 243 (E-Z) Special Topics in Ethnic Studies 4 Lecture, 3 hours; activity, 3 hours. Prerequisite(s): graduate standing. A critical analysis of current theory and research in special areas of Ethnic Studies. Covers a single topic not addressed in a regular course. Topics vary from quarter to quarter. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of units.
ETST 243E White Reconstruction 4 Lecture, 3 hours; activity, 3 hours; weekly writing assignments, 2 hours; biweekly presentations; 3 hours. Prerequisite(s): graduate standing and consent of instructor. Examines the political agendas, socio-historical assumptions, and mundane structures of racial violence that constitute the announcement and canonization of a post-civil rights period occurring after the 1960s. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as topic changes to a maximum of 12 units.

ETST 243F Race, Utopia, the Human in Sci-Fi 4 Lecture, 3 hours; activity, 3 hours; short paper, weekly presentations, final paper. Prerequisite(s): graduate standing; consent of instructor. Explores through an Afrofuturist lens how the concepts of utopia and of human life (collective and individual) have been imagined and practiced in science fiction literature and music. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as topic changes to a maximum of 12 units.

ETST 243G Racial and Racial-Colonial Genocide 4 Lecture, 3 hours; activity, 3 hours; weekly writing assignments, 2 hours; biweekly presentations, 3 hours; final paper. Prerequisite(s): graduate standing; consent of instructor. Attempts to generate a radical conceptualization and theorization of racial genocide as a historically continuous, distended apparatus of social determination and systemic violence. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as topic changes to a maximum of 12 units.

ETST 244 Borders, Borderlands, and Chicana/O Studies 4 Seminar, 3 hours; research, 3 hours; extra reading, 1 hour. Prerequisite(s): graduate standing; consent of instructor. Examines the borderlands as a site of social and political negotiation over space and within cultural studies. Topics include race, gender, activism, and culture. May be taken Satisfactory (S) or No Credit (NC) by students advanced to candidacy for the Ph.D. Course is repeatable as content changes to a maximum of 12 units.

ETST 245 Theories in Chicana/O Studies 4 Seminar, 3 hours; written work, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduction to the historical development of theoretical paradigms and models in Chicana/o studies. Covers 1960s protest literature, critical race theory, Chicana feminist theory, "LatCrit," and cultural citizenship. Addresses critical evaluation and application of these paradigms in order to understand the experiences of Chicanas/os and other subordinated communities. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes to a maximum of 12 units.

ETST 246 Chicano Historiography: Identity, Politics, and the Writing of Chicana/O History 4 Seminar, 3 hours; written work, 2 hours; term paper, 1 hour. Prerequisite(s): graduate standing; consent of instructor. Surveys approaches and genres in the field of Chicano history from classic works to cutting-edge topics. Analyzes methods employed as well as theoretical underpinnings. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes to a maximum of 12 units.

ETST 247 Policy and Politics: Grass Roots Versus Coercive State 4 Seminar, 3 hours; discussion, 1 hour, written work, 2 hours. Prerequisite(s): graduate standing; consent of instructor. Provides a current examination of the status of Chicana(o)/Latina(o) politics from both a grass roots and coercive state perspective. Examines divergent theoretical approaches within the contexts of liberal capitalism, pluralist versus elite theory, and identity politics. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes to a maximum of 12 units.

ETST 248 Race and Critical Educational Policy 4 Seminar, 3 hours; written work, 1 hour; extra reading, 2 hours; Prerequisite(s): graduate standing; consent of instructor. Examines a set of diverse, discipline-based conceptual perspectives and analytic frameworks used to interpret policy purposes, processes, contents, and outcomes. Focuses on the political dimensions of educational policies. Also explores the conceptual frameworks and skills required in studying politics and exercising leadership in organizational settings. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes to a maximum of 12 units.

ETST 249 Race and Critical Educational Politics 4 Seminar, 3 hours; written work, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on the political dimensions of education policy issues, processes, and choices pertaining to governmental arrangements, community contexts, and interest group pressure. Provides conceptual frameworks and perspectives that examine political decision making. Utilizes case studies of educational policy making in educational institutions at the local and state levels. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes to a maximum of 12 units.

ETST 254 Asian American Cultural Critique and Theory 4 Seminar, 3 hours; written work, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines major critical developments, interventions, and issues in Asian American cultural critique and theory. Charts the historical development of the field of Asian American literary and cultural studies. Interrogates the contexts and constraints of the field’s institutional formation and recognition. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes to a maximum of 12 units.

ETST 255 Critical Issues in Asian American Studies 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing and consent of instructor. Examines and seeks to develop a critical appreciation of research literature on Asians in America and to develop alternative interpretations of the Asian American experience. Topics include Asian American historic, economic, political, social, and psychological issues. Course is repeatable as content changes to a maximum of 12 units.

ETST 256 Critical Issues in Asian Pacific American Communities 4 Seminar, 3 hours; practicum, 3 hours. Prerequisite(s): graduate standing. Examines contemporary issues facing Asian Pacific American communities. Students engage in active research in these communities.

ETST 289 Colloquium in Ethnic Studies 1 Colloquium, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Lectures and discussions by students, faculty, and invited scholars on selected topics. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 6 units.

ETST 290 Directed Studies 1 to 6 Scheduled research, 3-18 hours. Prerequisite(s): graduate status and consent of instructor. Research and special studies in Ethnic Studies. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ETST 291 Individual Study in Coordinated Areas 1 to 12 Individual Study, 3 to 36 hours. Prerequisite(s): graduate standing; consent of instructor. A program of study designed to advise and assist candidates who are preparing for doctoral examinations. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ETST 292 Concurrent Analytical Studies in Ethnic Studies 1 to 4 Individual Study, 3 to 12 hours. Prerequisite(s): consent of instructor. Taken concurrently with a 100-series course in Ethnic Studies, but on an individual basis. Devoted to completion of a graduate-level paper based on research or criticism related to the 100-series course. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ETST 293 Research Topics in Ethnic Studies 2 Seminar, 3 hours. Prerequisite(s): graduate standing; consent of instructor. A series of seminars by guests, faculty, and advanced graduate students that addresses research topics in ethnic studies. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

ETST 297 Directed Research 1 to 2 Research, 3 to 6 hours. Prerequisite(s): graduate standing; consent of instructor. Individualized research in topics outside the dissertation area. Conducted under the sponsorship of specific faculty members. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ETST 299 Research For the Dissertation 1 to 12 Research, 3 to 36 hours. Prerequisite(s): satisfactory completion of the Ph.D. qualifying examination. Faculty-directed research for preparation of the dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.
Evolution, Ecology, and Organismal Biology

Gender and Sexuality Studies

(Formerly Women’s Studies)

Subject abbreviation: GSST
College of Humanities, Arts, and Social Sciences

Brandon Robinson, Ph.D., Chair
brandon.robinson@ucr.edu
genderandsexualitystudies.ucr.edu

Professors
Katja M. Guenther, Ph.D.
Sherine Hafez, Ph.D.

Professor Emeriti
Alicia Arriézón, Ph.D.

Associate Professors
Julian Emmons Allison, Ph.D.
Crystal Baik, Ph.D.
Tamara Ho, Ph.D.
Victoria Reyes, Ph.D.
Brandon Robinson, Ph.D.
Jade Sasser, Ph.D.
Chikako Takeshita, Ph.D.

Assistant Professor
Jack Caraves, Ph.D.

Majors
The Department of Gender and Sexuality Studies offers the B.A. in Gender and Sexuality Studies and the B.S. in Sustainability Studies.

Minors
The Department of Gender and Sexuality Studies offers two minors: a minor in Feminist Studies that emphasizes feminist history, theory, and practice, and a minor in Queer Studies (formerly Lesbian, Gay, Bisexual, Intersex, and Transgender Studies) that emphasizes queer history, theory, and practice.

University Requirements
See Undergraduate Studies section.

College Requirements
See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

Gender and Sexuality Studies Major

The major in Gender and Sexuality Studies is committed to providing undergraduate students with intersectional feminist perspectives on gender and sexuality and to fostering critical feminist and queer research. The major integrates interdisciplinary and transnational approaches to theorizing and study of gender and sexuality. The major offers a range of courses that facilitate student learning about the diversity of genders and sexualities in the United States and globally.

Majors learn about the history and contemporary structures of cisheptorapatriarchy and white supremacy and engage with strategies for resistance. Students completing the major are exposed to a wide range of feminist theories and epistemologies through required core courses and electives. This major educates students to be global citizens who are prepared for future feminist and queer activism, for graduate-level study in gender and sexuality studies, and/or for careers in education, law, non-profit work, public policy, social justice, social work, health care, and related fields. This major also encourages students to participate in internships with local feminist and queer social justice organizations and/or to enrich and enhance their undergraduate experience and learning through study abroad.

The major requirements for the B.A. degree in Gender and Sexuality Studies are as follows:

Major Requirements
1. Lower-division requirements (three courses [at least 12 units])
   a) GSST 001 or GSST 001H or GSST 001S
   b) One of the following: GSST 010, GSST 020, GSST 020H, GSST 020S, GSST 030 or GSST 030H
   c) One additional lower-division GSST course
2. Upper-division requirements (ten courses [at least 40 units])
   a) GSST 100
   b) GSST 191A and GSST 191B
   c) Seven courses of electives chosen from the list below with the following distribution requirements:
      (1) One course focusing on African American women, Asian American women, Chicanas/Latinas, or Native American women in the United States or on women from societies in Latin America, Asia, the Middle East, or Africa
      (2) One course focusing on issues of sexuality, sexual orientation, sexual identification, or masculinity and femininity

(3) The following courses may only be counted one time towards the major: GSST 190, GSST 195, GSST 198G

Elective Course Work

Upper-division Gender and Sexuality Studies courses or courses in another department that are cross-listed with Gender and Sexuality Studies. Closely related upper-division courses from other programs or departments may be substituted upon approval.

Sustainability Studies Major

The Sustainability Studies Bachelor of Science degree offered by the Gender and Sexuality Studies Department offers a comparative, interdisciplinary, transnational approach to the theories and practices of building a sustainable future. Major coursework focuses on a range of social and scientific challenges to sustainability including: climate change, air and water pollution, toxic contamination, energy demands, economic growth, agricultural production, and environmental injustices associated with differences in advantages due to race and ethnicity, socio-economic class, gender, sexuality, religion and ability. Courses in gender and sustainability, cultural studies, policy, media, and social sciences, natural and earth sciences, engineering, and health and medicine prepare students to respond to challenges to local, regional, and global sustainability. Students will be trained in feminist paradigms and methodologies associated with intersectionality, dialogue, and relation. Through in-depth, engaged learning experiences, this major educates global citizens who will be prepared for careers in industry, health care, public service, policy advocacy, education, and social activism relevant to sustainability.

Majors are strongly encouraged to complete internships with local environmental organizations, health advocates, and other institutions as well as to broaden their perspectives through the study abroad program. This major may accommodate CNAS transfers who have considerable amounts of training in science, yet desire an interdisciplinary education in sustainability that recognizes environmental change is gendered.

Major Requirements
1. Lower-Division Requirement (4 courses, 14–16 units)
   a) GSST 001
   b) GSST 021
   c) Two courses from the following list of courses in natural, earth, and environmental sciences. (Cannot double count with the CHASS math and science 20 unit requirement): BIOL 003, BIOL 005C, BIOL 040, BPSG 011, BPSG 021, ENTM 010, ENTM 020, ENT M 050/BPSC 050, GEO 002, GEO 004, GEO 009, GEO 010, GEO 011, GEO 012, CEE 010 (2 units), ENGR 096/NASC 096/HASS 096, ENSC 001, ENSC 002, ENSC 006/ECON 006, ME 004, PHYS 007, PHYS 010, PHYS 016, PHYS 024, PHYS 037
Quantitative Method Requirement (one course, 4 units)
One of the following courses or sequences OR an additional science course with a lab: SOC 001/SOC 004/SOC 005, STAT 008, STAT 100A, PSYC 011, POSC 114, ECON 101, GEO 157

Upper-Division Requirements (9 courses, 36 units)
- **a)** GSST 100
- **b)** Two GSST courses, of which at least one is from the following courses on gender & sustainability: GSST 131, GSST 161, GSST 171, GSST 173, GSST 181, GSST 183
- **c)** Four courses from any of the following lists: Students may concentrate in one or two areas or take courses from all areas. Up to two courses for this requirement may be replaced by any of the following CNAS courses. Students are responsible for fulfilling the relevant prerequisites: BIOL 100/ENTM 100, BIOL 165/BPS 165, ECON 143A/ENSC 143A, ENSC 101, ENSC 102, ENSC 141, ENTM 124, ENTM 125, ENSC 126, GEO 160, GEO 161, GEO 167, GEO 169.

Environmental policy and politics: PBPL 129, POSC 106, POSC 127, POSC 137, POSC 139, POSC 160, POSC 180, POSC 189

Health & medicine: ANTH 144E, ANTH 144F/GRST 185, ANTH 144H, ANTH 144M, ANTH 144N, ETST 116, HIST 107

Science, technology, and related topics: ANTH 110, ANTH 132, ANTH 140T, AST 107, ETST 183, HIST 105, HIST 106, HIST 109/ENGR 109, MCS 122, PHIL 117, RLST 164, SOC 137, SOC 161, SOC 184

Internship or Honors Thesis focusing on sustainability: GRST 195, GRST 198-1

Capstone course sequence, required for all seniors: GSST 191A + GSST 191C

**Minor Feminist Studies**

The minor in Feminist Studies exposes students to critical feminist and intersectional theory and research. The minor welcomes students engaged in interdisciplinary learning and offers an outstanding opportunity for students in other majors to develop expertise in the field of feminist studies. Minors are encouraged to participate fully in the activities and offerings in the Department of Gender & Sexuality Studies, including the department’s internship program and study abroad.

The minor in Feminist Studies consists of six courses (at least 24 units) distributed as follows:

1. Lower-division requirements (two courses [at least 8 units])
   - **a)** GSST 001 or GSST 001H or GSST 001S
   - **b)** One GSST lower-division course
2. Upper-division requirements (four courses [at least 16 units])
   - **a)** GSST 100
   - **b)** Three upper-division GSST courses.

**See Minors under the College of Humanities, Arts, and Social Sciences.**

**Queer Studies Minor**

**Subject abbreviation:** LGBS

**College of Humanities, Arts, and Social Sciences**

Brandon Robinson, Ph.D., Chair
Department Office, INTN 2017 (951) 827-4843
brandon.robinson@ucr.edu
gsst.ucr.edu/queer-studies-minor

Established in 1996, UCR’s queer studies minor was the first of its kind in the University of California system. The minor reflects current critical, theoretical, and methodological developments in queer studies across several disciplines that focus on lesbian, gay, bisexual, intersex, and transgender issues. The field of queer studies is by nature interdisciplinary, and this minor is meant to encourage new crossdisciplinary research in the field for interested students in the College of Humanities, Arts, and Social Sciences. The curriculum addresses such issues as sexual identity and orientation; queer and trans representation; queer and trans perspectives on the arts; retheorizations of gender; sexuality and cultural diversity; intersections of sexualities and ethnic identities.

**Requirements for the minor (24 units)**

1. Lower-division requirements (4 units) chosen from LGBS 001 or GSST 001
2. Upper-division requirements (5 courses [at least 20 units]) chosen from the approved list of courses:
   - **a)** Humanities: at least one of the five from ENGL 122 (E-Z)/LGBS 122 (E-Z), ENGL 143 (E-Z)/LGBS 143 (E-Z)/MCS 143 (E-Z), MCS 143 (E-Z), LGBS 105, GSST 139/LGBS 139
   - **b)** Fine Arts: at least one of the five from DNCE 135, ENGL 143 (E-Z)/LGBS 143 (E-Z)/MCS 143 (E-Z), LGBS 153/MUS 153
   - **c)** Social Sciences: at least one of the five from ANTH 145/GSST 103, ETST 175/GSST 175, GSST 128/LGBS 128, GSST 134/LGBS 134, GSST 135/LGBS 135, GSST 137/LGBS 137, GSST 139/LGBS 139, GSST 152/LGBS 152, GSST 100

Students may petition to have a course not on the approved list counted towards the five upper-division requirements provided they can demonstrate that LGBT issues play a significant role in the course and that they will focus their own work for the course (amounting to 30% of the final grade) on an LGBT topic.

Students may use 4 units of LGBS 190 and up to 8 units of LGBS 193 to count towards the five upper-division requirements.

**Lower-Division Courses**

- LGBS 001 Introduction to Lesbian, Gay, Bisexual, and Transgender Studies 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. Introduces students to basic issues in lesbian, gay, bisexual, and transgender studies. Topics include the history of sexuality, identity politics and community activism, the relation between sexuality and gender, the theories of sexual identity, and the globalization of lesbian, gay, bisexual, intersex, and transgender issues.

- LGBS 105 Topics in Queer Art, Culture, or Literature 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to topics of contemporary importance in the field of Lesbian, Gay, Bisexual, Intersex, and Transgender Studies. Emphasizes different areas of study in the humanities, arts, and social sciences. Course is repeatable as topics change to a maximum of 8 units. Credit is awarded for only one of LGBS 105 or LGBS 105W.

- LGBS 105W Topics in Queer Art, Culture, or Literature 4 Lecture, 3 hours; written work, 1.5; extra reading, 1.5. Prerequisite(s): ENGL 001B with a grade of “C” or better or consent of instructor. An introduction to topics of contemporary importance in the field of Lesbian, Gay, Bisexual, Intersex, and Transgender Studies. Emphasizes different areas of study in the humanities, arts and social sciences. Fulfills the third-quarter writing requirement for students who earn a grade of "C" or better for courses that the Academic Senate designates, and that the student's college permits, as alternatives to English 001C. Credit is awarded for only one of LGBS 105 or LGBS 105W.
LGBS 112 History of Queer Cinema 4 Lecture, 3 hours; screening, 3 hours; activity 2 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the aesthetic hallmarks, political impulses, and theoretical responses that distinguish queer cinema as a unique, important tradition within film history. Provides a historical overview of global, independent, Hollywood, and alternative queer production from the 1900s to the present. Cross-listed with MCS 112, and GSST 112.

LGBS 122 Queer Texts and Bodies 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. A study of topics on gender, sexuality and sexual identity. Covers issues such as gay and lesbian texts and contexts; sexual ideologies and literature; marginalized writers and texts; and the uses of theories of sexualities in the study of literature. Course is repeatable as content or topic changes to a maximum of 12 units. Cross-listed with ENGL 122.

LGBS 122 (E-Z) Queer Texts and Bodies 4 Lecture, 3 hours. A study of English and American literature from the perspective of sexuality and sexual identity. Covers issues such as gay and lesbian texts and contexts; sexual ideologies and literature; marginalized writers and texts; and the uses of theories of sexualities in the study of literature. Cross-listed with ENGL 122 (E-Z).

LGBS 128 Critical Approaches to Heterosexuality 4 Lecture, 3 hours; extra reading, 2 hours; written work, 3 hours. Prerequisite(s): one of the following courses: GSST 001, GSST 001H, GSST 001S, LGBS 001. Examines the late nineteeth-century origins and twentieth-century evolution of the meaning of heterosexuality in the United States. Includes the medical, psychological, and political history of heterosexuality; the race and gender components of heterosexuality; and the intersections of heterosexuality and queerness. Satisfactory (S) or No Credit (NC) grading is not available. Cross-listed with GSST 128.

LGBS 134 Queer Identities and Movements in the United States 4 Lecture, 3 hours; extra reading, 1 hour; individual study, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines important twentieth- and twenty-first century developments in queer culture and activism in the United States. Focuses on the origins of sexual identity; the relationship between sexuality, race, and gender; queer representation in art and media; and central issues in queer theory. Cross-listed with GSST 134.

LGBS 135 Love, Desire, and Lesbian Sexuality 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Expands upon the notion of lesbian identification and sexuality. Emphasizes the influence of feminism on the interdisciplinary of lesbian studies and the complexity of lesbianism across class, race, ethnic, age, and national and international differences. Cross-listed with GSST 135.

LGBS 137 Critical Queer Politics 4 Lecture, 3 hours; individual study, 2 hours, written work, 1 hour. Prerequisite(s): one of the following courses: GSST 001, GSST 001H, GSST 001S; or consent of instructor. Presents Euro-American configurations of modern sexuality to map queer communities and homosexual presence across time and space. Critically explores the invisibilities, injustices, erasures, distortions, silences, and voices produced as a result of queer mobility, global gay, and global queer liberation. Cross-listed with GSST 137.

LGBS 139 Coming Out and Sexual Identity 4 Lecture, 3 hours; individual study, 1 hour; extra reading, 2 hours. Prerequisite(s): one of the following courses: GSST 001, GSST 001H, GSST 001S, LGBS 001; or consent of instructor. Examines speech acts, secrecy, and silence to understand the significance of the closet. Explores perspectives on resistance movements and modes of communication related to coming out. Considers coming out stories, biographies, and examinations of the social construction of heterosexual identities and formation of public space. Cross-listed with GSST 139.

LGBS 143 (E-Z) Gender, Sexuality, and Visual Cultures 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Intensive formal, historical, and theoretical analysis of gender and sexuality in film, television, and visual culture. Cross-listed with ENGL 143 (E-Z), and MCS 143 (E-Z).

LGBS 152 Theory of Gender Inequality 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): one of the following courses: GSST 001, GSST 001S, GSST 001H. Studies theoretical debates regarding sex and gender differences; the origins and institutionalization of gender inequality; and the intersection of sexism, racism, and heterosexism. Cross-listed with GSST 152.

LGBS 153 Homosexuality and Music 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Uses a topical rather than a chronological approach to investigate homosexuality on the part of composers, performers, critics, theorists, and historians and how this has shaped the history of music in the West. Cross-listed with MUS 153.

LGBS 190 Special Studies 1 to 5 Consultation, 1 hour; individual study, 2 to 14 hours. Prerequisite(s): upper-division standing; consent of instructor and program chair. Individual study, directed by a faculty member, to meet special curricular needs. Course is repeatable to a maximum of 14 units.

LGBS 193 Senior Seminar 4 Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): senior standing or consent of instructor. Current topics in lesbian, gay, bisexual, intersexual, and transgender studies. Students develop and present a research paper on an interdisciplinary theme or problem that has been selected by the instructor.

LGBS 198I Individual Internship 1 to 4 Consultation, 1 hour; term paper, 1 to 3 hours; internship, 2 to 8 hours. Prerequisite(s): upper-division standing or consent of instructor. Internship in a community or campus outreach program related to lesbian, gay, and bisexual studies. The internship is supervised by a faculty member teaching in the Lesbian, Gay, and Bisexual Studies minor and the agency or program coordinator. A final paper is required. Course is repeatable to a maximum of 12 units. See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Education Abroad

Education Abroad is an excellent opportunity to learn more about another country and its culture while taking courses to earn units toward graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit Education Abroad at ea.ucr.edu or call (951) 827-4113.

See Education Abroad in the Educational Opportunities section in the beginning of this catalog.

Lower-Division Courses

GSST 001 Gender and Sexuality 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): none. An introduction to theories of sex and gender differences, the origins of patriarchy, and variations in sexual behavior and sexual norms. Credit is awarded for one of the following GSST 001, GSST 001H, or GSST 001S.

GSST 001H Honors Gender and Sexuality 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): admission to University Honors and consent of instructor. Honors course corresponding to GSST 001 and GSST 001S. An introduction to theories of sex and gender differences, the origins of patriarchy, and variations in sexual behavior and sexual norms. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of GSST 001 or GSST 001H or GSST 001S.

GSST 001S Gender and Sexuality 5 Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours. Prerequisite(s): none. An introduction to theories of sex and gender differences, the origins of patriarchy, and variations in sexual behavior and sexual norms. Credit is awarded for one of the following GSST 001S, GSST 001, or GSST 001H.

GSST 010 Women and Culture 5 Lecture, 3 hours; written work, 3 hours; individual study, 1 hour; research, 2 hours. Prerequisite(s): none. Topics include the roles of women in cultural creation and production; the relation of women artists to the societies of their time; and the images of women in the art and literature of the modern world. Themes and periods covered vary. Credit is awarded for one of the following GSST 010 or GSST 010S.
GSTT 010S Women and Culture 5 Lecture, 3 hours; discussion, 1 hour; written work, 3 hours; individual study, 1 hour; research, 2 hours. Topics include the roles of women in cultural creation and production; the relation of women artists to the societies of their time; and the images of women in the art and literature of the modern world. Themes and periods covered vary. Credit is awarded for one of the following: GSST 010S or GSST 010.

GSTT 011 Media Imagery of Women and Class 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Examines how mass media portray class as a gendered category. Utilizes a comparative and historical approach, integrating social sciences and humanities to analyze images of women portrayed as poor, working class, middle class, or wealthy.

GSTT 012 Islam and Feminism 4 Lecture, 3 hours; discussion, 1 hour; written work, 1 hour; term paper, 1 hour. Prerequisite(s): none. Focuses on the intersections between Islam and feminism. Topics include feminist interpretations of the Qur’an, Muslim women’s movements and activism in Islamic and non-Islamic societies, and the complex interactions between the nation-state, religion, gender, and sexuality. Cross-listed with MEIS 012, and RLST 011. Credit is awarded for only one of the following: RLST 011, MEIS 012, MEIS 012H, MEIS 012H, or RLST 011H.

GSTT 012H Honors Islam and Feminism 4 Lecture, 3 hours; discussion, 1 hour. Honors course corresponding to GSST 012. Focuses on the intersections between Islam and feminism. Topics include feminist interpretations of the Qur’an, Muslim women’s movements and activism in Islamic and non-Islamic societies, and the complex interactions between the nation-state, religion, gender, and sexuality. Cross-listed with MEIS 012H, and RLST 011H. Credit is awarded for only one of the following: RLST 011H, MEIS 012H, MEIS 012, MEIS 012H, or RLST 011H.

GSTT 013 Gender and Disability 4 Lecture, 3 hours; written work, 1 hour; extra reading, 2 hours. Examines gender and disability from a feminist perspective. Explores how gender and disability shape all aspects of social life including institutions, identities, bodies, and discourses. Introduces feminist and queer theories of disability. Engages with societal responses to disability such as eugenics, exclusion, and institutionalization. Considers possibilities for feminist disability justice. Credit is awarded for one of the following: GSST 013 or GSST 013S.

GSTT 013S Gender and Disability 5 Lecture, 3 hours; discussion, 1 hour; written work, 1 hour; extra reading, 2 hours. Examines gender and disability from a feminist perspective. Explores how gender and disability shape all aspects of social life including institutions, identities, bodies, and discourses. Introduces feminist and queer theories of disability. Engages with societal responses to disability such as eugenics, exclusion, and institutionalization. Considers possibilities for feminist disability justice. Credit is awarded for one of the following: GSST 0135 or GSST 013.

GSTT 016 Sexuality and Religion in Global Perspective 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduces sexuality studies within the comparative study of religion, rooted in the theoretical frameworks of gender and sexuality studies. Transnationalism and global dynamics of power are central themes. Focus is on critical heterosexuality studies, with some LGBT studies and an underlying queer studies perspective. Cross-listed with RLST 016. Credit awarded for only one of: GSST 016/RLST 016 or GSST 016H/RLST 016H.

GSTT 016H Honors Sexuality and Religion in Global Perspective 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): admission to the University’s Honors Program or consent of instructor. Honors course corresponding to GSST 016/RLST 016. Introduces sexuality studies within the comparative study of religion, rooted in the theoretical frameworks of gender and sexuality studies. Transnationalism and global dynamics of power are central themes. Focus is on critical heterosexuality studies, with some LGBT studies and an underlying queer studies perspective. Satisfactory (S) or No Credit (NC) grading is not available. Cross-listed with RLST 016H. Credit awarded for only one of: GSST 016/RLST 016 or GSST 016H/RLST 016H.

GSTT 020 Women, Feminism, and Society in A Global Perspective 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): none. An introduction to the social, political, and legal concerns surrounding women’s issues and feminist movements worldwide. Examines topics such as abortion, contraception, and sexual violence within a comparative and international framework. Credit is awarded for one of: GSST 020, GSST 020H or GSST 020S.

GSTT 020H Honors Women, Feminism, and Society in A Global Perspective 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to GSST 020 and GSST 020S. An introduction to the social, political, and legal concerns surrounding women’s issues and feminist movements worldwide. Examines topics such as abortion, contraception, and sexual violence within a comparative and international framework. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of: GSST 020, GSST 020H or GSST 020S.

GSTT 025 Women, Feminism, and Society in A Global Perspective 5 Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours. Prerequisite(s): none. An introduction to the social, political, and legal concerns surrounding women’s issues and feminist movements worldwide. Examines topics such as abortion, contraception, and sexual violence within a comparative and international framework. Credit is awarded for only one of: GSST 020, GSST 020H, or GSST 020S.

GSTT 021 Gender and Sustainability 5 Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours; extra reading, 1 hour; term paper, 2 hours; written work, 1 hour; research, 1 hour. Introduction to the relationship between gender and sustainability in global context. Draws on science, political ecology, and feminism as analytical lenses. Topics may include gender mainstreaming, economic development, ethics, ecology, population management, water treatment, sanitation, air quality, renewable energy, agriculture, political participation, community development, global capitalism, and environmental health.

GSTT 022A Introduction to World Literature By Women 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduction to world literature by women across many centuries. Covers the creative work of women from ancient to early modern periods, examining both texts and the historical circumstances of the earliest women writers. Emphasizes texts originally written in languages other than English from around the globe. Cross-listed with CPLT 022A.

GSTT 022B Introduction to World Literature By Women 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduction to the increasingly powerful voices of women writers in modernity and postmodernity. Emphasizes texts originally written in languages other than English from around the globe. Topics include the question of feminine writing and feminist theories about literature by women. Cross-listed with CPLT 022B.

GSTT 026 Introduction to Literature, Film, and Art By French and Francophone Women 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. Analyzes literature, art, and film by French and Francophone women from the 1400s to the present. Topics include marriage, motherhood, war, postcolonial conditions, space, sexual identity, fashion, feminism, and modernity. Studies transnational points of view of French-speaking women from and in Europe, Africa, and Asia. Course taught entirely in English. Cross-listed with CPLT 026, and FREN 026.

GSTT 030 Violence Against Women 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): none. Addresses structural and interpersonal forms of violence against women and girls. Topics include sexual and physical abuse, rape and sexual assault, battering, body mutilation, forced sterilization or reproduction, sex selection, medical “silences,” political torture, and gender-specific socialization for victimization and aggression. Also discusses state and economic policies. Credit is awarded for only one of: GSST 030 or GSST 030H or GSST 030S.
GSST 030H Violence Against Women 4
Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to GSST 030. Addresses structural and interpersonal forms of violence against women and girls. Topics include sexual and physical abuse, rape and sexual assault, battering, body mutilation, forced sterilization or reproduction, sex selection, medical “silences,” political torture, and gender-specific socialization for victimization and aggression. Also discusses state and economic policies. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of GSST 030 or GSST 030H or GSST 030S.

GSST 030S Violence Against Women 5
Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours. Prerequisite(s) none. Addresses structural and interpersonal forms of violence against women and girls. Topics include sexual and physical abuse, rape and sexual assault, battering, body mutilation, forced sterilization or reproduction, sex selection, medical “silences,” political torture, and gender-specific socialization for victimization and aggression. Also discusses state and economic policies. Credit is awarded for only one of GSST 030 or GSST 030H or GSST 030S.

GSST 031H Latina Women in Literature and Culture 4
Seminar, 3 hours; extra reading, 1 hour; research, 1 hour; term paper, 1 hour. Prerequisite(s): admission to University Honors or consent of instructor. Analyzes the literatures and cultures of Latin American women and U.S. Latinas. Examines the roles prescribed for women and the relationship of those roles to issues of power and authority. Utilizes texts that acknowledge a tradition of feminine or feminist expression. Satisfactory (S) or No Credit (NC) grading is not available.

GSST 040 Women, Aids, and the Global Economy 4
Lecture, 3 hours; research, 2 hours; individual study, 1 hour. Prerequisite(s) none. Examines the relationship between poverty, inequality, gender, and HIV/AIDS. Analyzes gender and other forms of social inequality that place women at higher risk for the virus. Explores how global structural inequalities impact the lives of women in the global south, as well as considers the conditions of marginal groups in the global north.

GSST 099 Reading and Writing in Gender & Sexuality Studies 4
Seminar, 3 hours; written work, 3 hours; extra reading, 1 hour; term paper, 1 hour. Prerequisite(s): GSST 001 or GSST 001S; restricted to major(s) Feminist Studies, Gender and Sexuality Studies, Queer Studies. Develops skills in reading and writing feminist scholarship. Engages with feminist perspectives on reading and writing including autobiography and autotheory. Centers deep reading of texts with drafting and revision of written work. Prepares for upper-division work in Gender & Sexuality Studies.

Upper-Division Courses

GSST 100 Gender Theory 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. A cross-cultural, multidisciplinary course investigating the development of feminist theory and exploring the construction of gender and sexuality. Emphasizes the “female” and the “feminine” in a variety of cultural contexts. Credit is awarded for only one of the following: GSST 100 or GSST 100S.

GSST 100S Gender Theory 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): GSST 001 or GSST 001S or GSST 001H; restricted to class level standing of junior, or senior. A cross-cultural, multidisciplinary course investigating the development of feminist theory and exploring the construction of gender and sexuality. Emphasizes the “female” and the “feminine” in a variety of cultural contexts. Credit is awarded for one of the following: GSST 100 or GSST 100S.

GSST 101 Women, Work, and Capitalism 4
Lecture, 3 hours; research, 3 hours. Prerequisite(s): GSST 001 or GSST 001S or GSST 001H or consent of instructor. Examines how class, race, and sexual inequalities impact, contest, and shape gender identities and relations. Analyzes patterns of women’s work in the new international division of labor through case studies of export processing zones, reproductive labor, and sex tourism.

GSST 103 Sexualities and Culture 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): one of the following courses: GSST 001, GSST 001H, GSST 001S, or consent of instructor. Examines the field of sexuality studies using a comparative, cross-cultural approach. Emphasizes the relation between culture, history, and political economy in the emergence of sexual practices and sexualized identities. Examines theories of sexuality and identity focusing on violence, human rights, and political agency. Cross-listed with ANTH 145.

GSST 104 Witches, Magic, and Religion 4
Lecture, 3 hours; activity 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines magic and witchcraft as distinctive forms of epistemology articulated by women throughout history. Traces the position of religion and science versus these intellectual fields led by women in various settings around the world. Investigates how masculinization of the knowledge production process enabled male dominance.

GSST 105 Women, Race, and Violence: Intersectional and Transnational Perspectives 4
Lecture, 3 hours; screening, 8 hours per quarter; extra reading, 2 hours written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Introduces the theories of violence against women through intersectional feminist perspectives. Involves the analysis of violence simultaneously marked by race, ethnicity, nation, class, and sexual orientation. Compares cross-cultural and transnational perspectives.

GSST 106 Feminist Bioethics 4
Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An exploration of the ways in which feminist theory provides insight on contemporary issues in bioethics. Topics include women in clinical research, cosmetic surgery, abortion, contract gestation, fetal protection policies, and the politics of mental illness. Cross-listed with PHIL 171.

GSST 107 Feminisms, Race, and Antiracisms: Critical Theories and Intersectional Perspectives 4
Seminar, 3 hours; extra reading, 1 hour; individual study, 1 hour; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines how path-breaking scholarship by women of color in the United States and developing countries has been central to rethinking theoretical foundations and developing new ways of knowing, understanding, and practicing politics. Focuses on scholarship that critiques and analyzes issues concerning race, antiracism, human rights, citizenship, empire, globalization, and social justice.

GSST 108 Philosophical Issues of Race and Gender 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Investigates philosophical issues concerning race and gender. Includes the role of cultural and biological criteria in defining these concepts; roles of race and gender in personal identity, nature of racism, sexism, and their variants; and policy implications such as affirmative action and the civil status of homosexual relationships. Cross-listed with PHIL 108.

GSST 109 Women, Politics, and Social Movements 4
Lecture, 3 hours; research, 3 hours. Prerequisite(s): GSST 001 or GSST 001S or GSST 001H or GSST 020 or GSST 020H; consent of instructor. An overview of women’s politics (including participation in social movements) from a global perspective. Considers whether the state can be a site for women’s liberation and gender justice.

GSST 110 Gender, Sexuality, and Islam 4
Lecture, 3 hours; written work, 2 hours; term paper, 1 hour. Prerequisite(s): restricted to class level standing of sophomore, junior, or senior. Focuses on the intersections between gender, sexuality, and religion in Islamic societies. Discusses the ways in which those formations have been shaped by histories of slavery, imperialism, colonialism, human rights discourses, neoliberalism, contemporary practices of Islamophobia, nationalism, and global LGBTQ activism. Cross-listed with MEIS 110, and RLST 105.

GSST 112 History of Queer Cinema 4
Lecture, 3 hours; screening, 3 hours; activity 2 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the aesthetic hallmarks, political impulses, and theoretical responses that distinguish queer cinema as a unique, important tradition within film history. Provides a historical overview of global, independent, Hollywood, and alternative queer production from the 1900s to the present. Cross-listed with MCS 112, and LBGS 112.
GSST 113 Queer Theory  Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): GSST 001 or GSST 001S or GSST 001H or LGBS 001. Examines queer theory’s origins and relation to gender and sexuality studies. Critically explores queer of color critique and the intersections of race, class, and gender with sexuality. Looks at other interventions into the field of queer theory and key concepts and current debates.

GSST 122 Gender in Southeast Asian Diasporic Literature and Film  Lecture, 3 hours; screening, 3; written work, 1 hour; extra reading, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Covers contemporary women’s and feminist film and media productions. Connects the forces of globalization and militarization with gender-related experiences of displacement, migration, immigration, diaspora, trafficking, and refugee status. Focuses on innovative uses of visual language signaling changes in notions of nation, identity, class, race, ethnicity, gender, and sexuality. Cross-listed with MICS 142, and SEAS 172.

GSST 123 Transnational Feminist Film and Media  Lecture, 3 hours; screening, 3; prerequisites: MCS 010, upper-division standing or consent of instructor. Covers contemporary women’s and feminist film and media productions. Connects the forces of globalization and militarization with gender-related experiences of displacement, migration, immigration, diaspora, trafficking, and refugee status. Focuses on innovative uses of visual language signaling changes in notions of nation, identity, class, race, ethnicity, gender, and sexuality. Cross-listed with CPLT 123.

GSST 124 Asian American Women: Writing the Self in Literature and Film  Lecture, 3 hours; screening, 1 hour; written work, 1 hour; extra reading, 1 hour. Prerequisite(s): MCS 010, upper-division standing or consent of instructor. Explores the diversity of women’s issues and women’s experiences in Asian American women’s writings. Examines films to see how women filmmakers contend with memory, gender, and identity. Cross-listed with MICS 123, and SEAS 175.

GSST 125 Gender and Genocide  Lecture, 3 hours; individual study, 2 hours; term paper, 1 hour. Prerequisite(s): one of the following courses: GSST 001, GSST 001H, GSST 001S or consent of instructor. Examines gendered dimensions of contemporary and historical genocides. Analyzes the ways gender ideologies intersect racialization and ethnic marking. Explores how gender shapes selection, forced labor, torture, and murder. Considers gender ideologies in relation to collective, institutional, and individual responses to genocide and genocidal campaigns. Cross-listed with ANTH 106.

GSST 126 Gender, Sexuality, and Music in Cross-Cultural Perspectives  Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An overview of gendered performance genres from a number of cultures. Explores gender-specific music and notions of gender that are often constructed, maintained, transmitted, and transformed through music and performance. Cross-listed with ANTH 177, and MUS 126.

GSST 127 Dance, Gender, Sexuality  Lecture, 3 hours; research, 1 hour; term paper, 1 hour; written work, 1 hour. Prerequisite(s): DNCE 019 (may be taken concurrently) or consent of instructor. Explores some of the ways that studying dance (an art form whose medium is the body) illuminates feminist, gender, and sexuality studies—and vice versa. No previous dance experience required. Cross-listed with DNCE 131.

GSST 128 Critical Approaches to Heterosexuality  Lecture, 3 hours; extra reading, 2 hours; written work, 3 hours. Prerequisite(s): one of the following courses: GSST 001, GSST 001H, GSST 001S, LGBS 001. Examines the late nineteenth-century origins and twentieth-century evolution of the meaning of heterosexuality in the United States. Includes the medical, psychological, and political history of heterosexuality; the race and gender components of heterosexuality; and the intersections of heterosexuality and queerness. Satisfactory (S) or No Credit (NC) grading is not available. Cross-listed with LGBS 128.

GSST 129 Feminist Critiques of Militarization  Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): GSST 001, GSST 100 or GSST 100S or GSST 030 or GSST 105 or GSST 107 or GSST 109 or GSST 136 or GSST 138 or GSST 150 or GSST 175. Examines the relationship between US militarization and imperialism in the modern era. Applies intersectional analysis to interrogate how militarized sexual violence is shaped by racialized and gendered dynamics within the United States and occupied territories. Engages interdisciplinary scholarship and debates in gender and sexuality studies, ethnic studies, and security studies.

GSST 130 The Body in Western Art: Antiquity to Present  Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): Restricted to class level standing of sophomore, junior, or senior. Restricted to major(s) Anthropology, Art History, Art History/Admin Studies, Art History/Religious Studies, Gender and Sexuality Studies, History, History/Administrative Studies, History/Law and Society; or consent of instructor. Presents further questions and study of the human body and how it was depicted and interpreted in works of art from Roman Antiquity to the present. Explores a broad range of artworks in their specific historical, cultural, medical, social, religious, political, and intellectual contexts. Cross-listed with ANTH 161, GSST 130, and HISE 149. Credit is awarded for one of the following AHS 133, ANTH 161, GSST 130, HISE 149, or AHS 016.

GSST 131 Sustainability, Gender, and Development in the Global South  Lecture, 3 hours; activity, 3 hours. Prerequisite(s): GSST 001 or GSST 001H or GSST 001S, GSST 020 or GSST 020H or GSST 020S or GSST 021. Investigates the intersection of sustainable practices, development pressures, and gender in the Global South. Explores how gender ideologies intersect with each other, and the impact of climate change on livelihoods and social organization. Examines how sustainability theory and practice can be transnational and socially inclusive.

GSST 132 United States Women, Gender, and Sexuality: 1620-1850  Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Covers topics in early American women’s lives—work, politics, and sexuality—while charting the developments of gendered systems in the United States. Topics may include masculinity, the rise of the middle class, and the private-public dichotomy. Cross-listed with HISA 132.

GSST 133 Women, Gender, and Sexuality in United States History: 1850-Present  Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces the major themes in the history of U.S. women and gender issues. Drawing upon recent work in the field, explores the relationships between gendered meanings of politics and the politics of gender in the late nineteenth and twentieth centuries in the United States. Cross-listed with HISA 133.

GSST 134 Queer Identities and Movements in the United States  Lecture, 3 hours; extra reading, 1 hour; individual study, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines important twentieth- and twenty-first century developments in queer culture and activism in the United States. Focuses on the origins of sexual identity; the relationship between sexuality, race, and gender; queer representation in art and media; and cultural issues in queer theory. Cross-listed with LGBS 134.

GSST 135 Love, Desire, and Lesbian Sexuality  Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Expands upon the notion of lesbian identification and sexuality. Emphasizes the influence of feminism on the interdisciplinarity of lesbian studies and the complexity of lesbianism across class, race, ethnic, age, and national and international differences. Cross-listed with LGBS 135.

GSST 136 Women and Grassroots Organizing  Seminar, 3 hours; extra reading, 1 hour; individual study, 1 hour; written work, 1 hour. Prerequisite(s): GSST 001 or GSST 001H or GSST 001S or GSST 020 or GSST 020H or GSST 020S. Examines women’s grassroots activism and organizing within the context of political and social structures, culture, and history at the local and global levels. Explores comparative and global perspectives to understand the diversity of women’s issues and women’s activism.

GSST 137 Critical Queer Politics  Lecture, 3 hours; individual study, 2 hours; written work, 1 hour. Prerequisite(s): one of the following courses: GSST 001, GSST 001H, GSST 001S, or consent of instructor. Presents Euro-American configurations of modern sexuality to map queer communities and homosexual presence across time and space. Critically explores the invisibilities, injustices, erasures, distortions, silences, and voices produced as a result of queer mobility, global gay, and global queer liberation. Cross-listed with LGBS 137.
GSST 138 Gender and the Sex Trade 4 Lecture, 3 hours; extra reading, 1 hour; individual study, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Addresses structural issues related to sexualized entertainment including pornography, sex work, escort services, sex tourism, erotic dancing, and strip shows. Discusses how gender, race, class, citizenship, and sexuality shape the industry’s stratification. Analyzes how issues such as HIV/AIDS, traffic in women, forced prostitution, and child prostitution impact the sex trade.

GSST 139 Coming Out and Sexual Identity 4 Lecture, 3 hours; individual study, 1 hour; extra reading, 2 hours. Prerequisite(s): one of the following courses: GSST 001, GSST 001H, GSST 001S, LGBS 001; or consent of instructor. Examines speech acts, secrecy, and silence to understand the significance of the closet. Explores perspectives on resistance movements and modes of communication related to coming out. Considers coming out stories, biographies, and examinations of the social construction of heterosexual identities and formation of public space. Cross-listed with LGBS 139.

GSST 140 Reproduction: Policies, Politics, and Practices 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Examines reproductive policies, politics, and practices from a cross-cultural and historical perspective. Discusses political and economic processes and sociocultural dynamics; population control; sex preference; infanticide and neonatal neglect; adoption and foster parenting; abortion; technologically assisted conception; and gestational surrogacy. Cross-listed with ANTH 144G.

GSST 141 Ethics and Families 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Analyzes ethical issues with regard to families of different kinds such as gender relations in traditional marriages; the ethics of same-sex marriage; the morality of abortion, surrogate mothering, and cloning; the justice of school vouchers; the grounds for universal health care; and possible gender inequalities in divorce. Cross-listed with PHIL 168.

GSST 142 (E-Z) 4 Seminar, 3 hours; extra reading, 3 hours. Covers comparative histories of feminist literary movements, gender and immigration, autobiography, translation, and subjectivity. Asian literature will be circulated in the original language to students with reading ability (not required).

GSST 143 The Sociology of Women 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): GSST 001 or GSST 001H or GSST 001S or SOC 001 or SOC 001H. Analyzes the role women have played in society emphasizing modern American society. Considers some of the social determinants of women’s positions and the efforts made to bring about change. Cross-listed with SOC 140.

GSST 145 Intersectionality, Ecology, and Community Design 4 Lecture, 3 hours; extra reading, 2 hours; research, 4 hours. Prerequisite(s): GSST 021. Introduces theoretical underpinnings of ecological utopias and ecotopias. Examines practical aspects of designing these intentional communities focused on sustainability. Includes discussion and critique of proposed ecotopias, analysis of egalitarian economic systems, inclusive and participatory political institutions, and social mores adopted by existing ecovillages and other sustainable intentional communities.

GSST 146 History of Native American Women 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines selected important aspects of the lives of Native North American women including their political, economic, and religious participation in their societies. Further traces historic changes in Native women’s lives as a result of the colonization of the New World and examines the complex imagery of Native women that developed from colonial contact. Cross-listed with HISA 146.

GSST 147 Feminist Animal Studies 4 Lecture, 3 hours; extra reading, 3 hours; written work, 3 hours. Prerequisite(s): GSST 001 or GSST 001S or LGBS 001; GSST 011 or GSST 020 or GSST 020H or GSST 020S or GSST 020T or GSST 021 or GSST 022A or GSST 022B or GSST 030 or GSST 030H or GSST 030S or GSST 040 or GSST 040H or GSST 040S or GSST 050. Examines human-animal relationships from a feminist perspective. Explores the use of animals as pets, subjects and objects of scientific research, and food sources. Analyzes how these uses relate to the exploitation of women and to feminist ethics. Considers the connections between sexism and speciesism.

GSST 148 Intersectionality, Ecology, and Design Science 4 Lecture, 3 hours; practicum, 3 hours; extra reading, 2 hours; field, 2 hours; written work, 2 hours. Prerequisite(s): GSST 145 (GSST 145 may be taken concurrently). Introduces regenerative design. Emphasizes stability and resiliency of natural systems and intersectional praxis of environmental justice in agricultural and social design. Recognizes sustainable food, water, and shelter requires understanding structures of power that shape and maintain discrimination. Includes: agroecology; climate; health; permaculture; intentional communities; social activism; sustainability.

GSST 149 Gender, Kinship, and Social Change 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): one of the following courses: GSST 001, GSST 001H, GSST 001S. Examines theories of gender and kinship, the formation of gender hierarchies and their uneven development, and the dynamics of family and gender in stratified social formations. Analyzes the relationship between family forms and political and economic processes. Cross-listed with ANTH 149.

GSST 150 Gender and the State 4 Lecture, 3 hours; extra reading, 1 hour; research, 1 hour; written work, 1 hour. Prerequisite(s): GSST 001 or GSST 001S; restricted to class level standing of junior, or senior. Examines the various meanings of gender as it is articulated in, reproduced by, and shaped within the state. Discusses gender-state relations, as well as the engendering of politics, state functions, policy, and politics in various historical, political, cultural, and social contexts.

GSST 151 Islam, Women, and the State 4 Lecture, 3 hours; individual study, 2 hours; extra reading, 1 hour. Prerequisite(s): GSST 167 or GSST 168; restricted to class level standing of junior, or senior. Examines the links between women, Islamic practices, and the politics of state formation and nation building. Explores ways women constitute the terrain of struggle between the traditional and modern, colonialism and nationalism, and religion and politics. Cross-listed with ANTH 188.

GSST 152 Theory of Gender Inequality 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): one of the following courses: GSST 001, GSST 001S, GSST 001H. Studies theoretical debates regarding sex and gender differences; the origins and institutionalization of gender inequality; and the intersection of sexism, racism, and heterosexism. Cross-listed with LGBS 152.

GSST 154 Feminist Oral History: Theory, Methods, Praxis 4 Lecture, 3 hours; extra reading, 1 hour; written work, 1 hour; activity, 1 hour. Prerequisite(s): GSST 001 or GSST 001H or GSST 001S, GSST 100 or GSST 100S or GSST 107 or GSST 123 or GSST 136 or GSST 188 or GSST 191B. Introduces the interdisciplinary methods and theories of feminist oral history. Topics include women of color critique, narration, positionality, listening, affect theory, archival concerns, and sound studies. Examines the relationship between narration, knowledge production, and power through an intersectional lens attentive to race, ethnicity, gender, sexuality, and class.

GSST 155 Women’s Labor and the Economy 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A. A special-topics based labor economics course. Focuses on one important dimension of worker differences: gender. Covers the topics of human capital, wages and employment, occupational choice, discrimination, the family as an economic unit, and public policy. Cross-listed with ECON 155, and PBPL 155.

GSST 156 Women and Citizenship 4 Lecture, 3 hours; extra reading, 1 hour; research, 1 hour; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Explores women’s citizenship in light of global movements of people, capital, and social and political rights. Examines what it means to be a citizen and the ways in which women are included or excluded from that category.
GSST 158 Gender and Sexuality in U.S. Religious History 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): GSST 001 or GSST 001H or GSST 005 or GSST 010 or RLST 001 or RLST 001H or RLST 002 or RLST 003 or RLST 005 or RLST 005H or RLST 007 or RLST 007H or RLST 010 or RLST 012 or ETST 012 or RLST 012H or ETST 012H or RLST 014 or RLST 015 or RLST 015H or RLST 024 or HST 034 or RLST 044 or HST 044; or consent of instructor. Overview and analysis of gender and sexuality in religion from colonial period (including Spanish, French, Russian, and British colonies in what is now the United States) to present day. Combines critical and comparative religious studies approaches with historical methods and the analytical perspectives of intersectional gender, sexuality, and queer studies. Cross-listed with RLST 161.

GSST 159 Queer Religiosities 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): GSST 001 or GSST 001H or GSST 001S or RLST 001 or RLST 001H or RLST 002 or RLST 003 or RLST 005 or RLST 005H or RLST 007 or RLST 007H or RLST 010 or RLST 012 or ETST 012 or RLST 012H or ETST 012H or RLST 014 or RLST 015 or RLST 015H or RLST 024 or HST 034 or RLST 044 or HST 044. A comparative, thematic exploration of religion in the lives of contemporary same sex attracted and gender variant or gender nonconforming people around the world. Topics may include intersections of religion with: neoliberal economic and political strategies; globalization; global North/South inequities; settler colonialism; racial, economic, and gender inequalities; homonormativity/homonationalism; queer activism. Cross-listed with RLST 159.

GSST 160 Religion, Gender, and Sexuality 4 Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examination of attitudes toward and images of women in diverse religious traditions. Includes issues such as the presence and absence of women in leadership roles; women’s spiritual experiences; female founders of religious groups; and recent developments in feminist religious thought. Cross-listed with RLST 160.

GSST 161 Gender and Science 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): GSST 001 or GSST 001H or GSST 001S; GSST 020 or GSST 020H or GSST 020S or GSST 021. Focuses on the intersections of Western constructions of gender and scientific knowledge since the sixteenth century. Considers the cultural and political roles of the scientist in terms of gender; the structuring of objectivity and objects of study; the status of scientific knowledge; and the emergence of feminist science studies. Credit is awarded for one of the following GSST 161 or GSST 161S.

GSST 161S Gender and Science 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): GSST 001 or GSST 001H or GSST 001S; GSST 020 or GSST 020H or GSST 020S or GSST 021. Focuses on the intersections of Western constructions of gender and scientific knowledge since the sixteenth century. Considers the cultural and political roles of the scientist in terms of gender; the structuring of objectivity and objects of study; the status of scientific knowledge; and the emergence of feminist science studies. Credit is awarded for one of the following GSST 161S or GSST 161.

GSST 162 Women’s Issues in Modern Muslim Thought 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): one Religious Studies course or upper-division standing or consent of instructor. Introduces complex religious and social issues related to the role of women in modern Islamic societies ranging from North America to Southeast Asia. Examines Muslim writings produced during the past century. Cross-listed with RLST 162.

GSST 163 The Women of Early Christianity 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the social roles and literary constructs of early Christian women as evidenced in the New Testament, patristic, and Apocryphal writings. Also considers the significance of those textual traditions for later Western ideas about women’s social roles including traditional and feminist theories. Cross-listed with RLST 163.

GSST 165 (E-Z) Themes in Vietnamese Literature 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. An exploration of Vietnamese literature in translation as seen through the lens of a particular theme or issue. Focuses on the implications of gender and sexuality on nation formation. All materials are read or viewed in English. E. Women and War. Cross-listed with AST 165 (E-Z), SEAS 165 (E-Z), and VNM 165 (E-Z).

GSST 166 Chicana/O Cultural Studies and Gender Politics 4 Lecture, 3 hours; individual study, 1 hour; extra reading, 1 hour; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines the field of Chicana/o cultural studies and investigates the gender politics that attest to its intersectional approach. Considers how power and gendered politics have impacted the restructuring of the split subject in Chicana/o cultural studies. Cross-listed with MCS 127.

GSST 167 Women and Gender in Postcolonial Africa 4 Lecture, 3 hours; extra reading, 1 hour; individual study, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines systems of colonialism and globalization, women’s issues, gender identity, and representation in postcolonial Africa. Highlights the impact of these issues on African society and the struggle against systematic practices of oppression that persist at the axis of race, gender, and sexuality.

GSST 168 Gender and Power in Muslim Societies 4 Lecture, 3 hours; extra reading, 1 hour; written work, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the dynamics of gender relations within the context of the Muslim world. Analyzes processes of power which influence concepts of femininity, masculinity, the body, and sexuality. Explores heterogeneity of the Muslim world as well as its unifying cultural and social history. Cross-listed with ANTH 189.

GSST 169 Gendering Revolution: Gender and Sexuality in “The Arab Spring” 4 Lecture, 3 hours; activity, 3 hours. Prerequisite(s): GSST 167 or GSST 168 or GSST 193; restricted to class level standing of junior, or senior. Addresses the gender politics of The Arab Spring focusing on revolutionary gender activism. Examines a world of dissent, chaos, and violence, but also one of beauty, ethics, and artistic expression as individuals come together to fight for “bread, freedom, and social justice.”

GSST 170 Women Artists in Renaissance Europe, 1400–1600 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): restricted to class level standing of sophomore, junior, or senior. Surveys the lives and work of women artists in Renaissance Europe. Considers circumstances under which it was possible for women to become artists; how they evolved from practicing in the cloistered convent to participating in the competitive public market place; what they painted; and who their patrons were. Cross-listed with AHS 165, and HISE 133.

GSST 171 Environmental Health and Social Justice 4 Lecture, 3 hours; activity 3 hours. Prerequisite(s): GSST 001 or GSST 001H or GSST 001S; GSST 020 or GSST 020H or GSST 020S or GSST 021; or consent of instructor. Interdisciplinary examination of the relationship between environmental health and social justice emphasizing gender, race, class, and globalization as analytical lenses. Topics include urban pollution, workplace exposure, industrial catastrophe, invisible environmental hazards, community activism, reproductive health, global capitalism, and new health challenges imposed by climate change.

GSST 172 Contemporary Italian Women Writers in Translation 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on works by Italian women writers addressing issues of gender and sexuality in Italian historical and cultural contexts such as Fascism, the cultures of Sicily and Sardinia, and the North/South divide. Explores intersections of region, class, and gender with emphasis on the undoing of fascist and patriarchal aesthetics. Cross-listed with ITAL 162.

GSST 173 Gender and Climate Change 4 Lecture, 3 hours; activity, 3 hours. Prerequisite(s): GSST 001 or GSST 001H or GSST 001S; GSST 020 or GSST 020H or GSST 020S or GSST 021. Examines the global social impacts of climate change that are magnified based on existing inequalities. Focuses on the disparity between men and women in their vulnerability and ability to cope with the global phenomenon. Investigates both women as “victims” of global warming and their positive roles in climate change mitigation.

GSST 175 Gender, Ethnicity, and Borders 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ETST 001 or ETST 001H or GSST 010 or GSST 010S or upper-division standing. Examines literary, theatrical, and visual sites where the “in-between” space of border cultures is mapped. Materials include autobiographies, testimonial literature, films, novels, performance scripts, and art. Focuses on the interplay of gender and ethnicity. Cross-listed with ETST 175.
GSST 176 Gender, Human Rights, and Transnationalism 4 Lecture, 3 hours; individual study, 2 hours, written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Explores dynamics of gender and power in human rights activism. Examines the history and evolution of human rights discourse, discourses of liberation, and critical responses to the strategy of framing women’s rights as human rights in a comparative, transnational framework.

GSST 178 Gender and Archaeology 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): one of the following courses: ANTH 001, ANTH 001H, ANTH 001W, ANTH 005, GSST 001, GSST 001H, GSST 001S, or consent of instructor. Considers gender roles in ancient and historically recent human societies, as well as how gender has shaped archaeological investigation. Cross-listed with ANTH 178.

GSST 179 Gender, Media, and Latin America 5 Lecture, 3 hours; screening 3 hours; research 3 hours. Prerequisite(s): MCS 020 or upper-division standing or consent of instructor. Explores the ways Latin Americans have thought of and represented gender across a variety of media including essays, film, novel, short story, and performance. Compares the possibilities and limitations of these media for representing gender in the Latin American context. Cross-listed with MCS 179, LNST 109, and SPN 179.

GSST 180 Materialist Feminism 4 Lecture, 3 hours; extra reading, 1 hour; research, 1 hour; term paper, 1 hour. Prerequisite(s): GSST 100 or GSST 100S or consent of the instructor. An advanced study of Karl Marx’s writings as well as feminist and anti-colonial engagement, expansion, and interventions into his texts. Specific focus on how racial and gendered forms of labor are central to the production of global flows of capitalism and anti-capitalist action.

GSST 181 Feminisms and Environmentalisms 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): GSST 001 or GSST 001H or GSST 001S; GSST 020 or GSST 020H or GSST 020S or GSST 020T. Explores women’s and feminist involvement in environmental movements. Examines how gender shapes our relationships with and approaches to environmental problems in the United States and globally. Investigates intersections between feminist concerns (health, reproduction, mothering, gender equity, and social justice) and environmental issues (conservation, pollution and global warming, and sustainability).

GSST 183 Feminist Politics of Food 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): GSST 001 or GSST 001H or GSST 001S; GSST 020 or GSST 020H or GSST 020S or GSST 020T; or consent of instructor. Explores politics of food using gender, race, class, and globalization as analytical lenses. Examines expressions of gender and sexuality in food consumption. Investigates relationships between diet and structural racism and between feminist politics and food movements. Topics include food and advertisement, industrial and sustainable agriculture, food security, health, and bioengineering.

GSST 185 Gender, Race, and Medicine 4 Lecture, 3 hours; written work, 1 hour; extra reading, 1 hour; individual study, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Explores the relationship between Western medicine and women, racial minorities, and non-Western citizens. Investigates how gender ideology, racial inequity, and colonialism shape the medical representation of bodies, sexuality, and pathology. Examines how patients have renegotiated their relationships with medicine through health movements and alternative healing practices. Cross-listed with ANTH 144F.

GSST 186 Gender, Power, and Shifting Identities 4 Lecture, 3 hours; extra reading, 1 hour; term paper, 1 hour; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Explores constructions of various identities (racialized, gendered, sexual, diasporic) in cross-cultural contexts. Examines contemporary issues and theorizations concerning the intersection and politics of race, gender, and identity.

GSST 187 Women, Gender, and Technology 4 Lecture, 3 hours; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): one of the following courses: GSST 001, GSST 001H, GSST 001S. Introduces historical and sociological studies of gender and technology. Examines how women have been affected by technological developments and how gender ideologies informed the design and implementation of various technologies. Explores the relations among technology, material culture, sustainability, and power. Technologies covered include those in the household, the workplace, and cyberspace.

GSST 188 Gender and Performance 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on theoretical debates that construct and inform relations between the concepts of gender and performance. Considers the ways gendered bodies have been represented in performance. A broad definition of performance is applicable, and texts cover photographs, films, dance, performance art, drama, and current events.

GSST 189 Gender, Technology, and the Body 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): one of the following courses: GSST 001, GSST 001H, GSST 001S, LGBS 001. Examines various technologies that alter the body. Investigates how technological interventions in the body reproduce and reshape gender ideologies in contemporary Western culture. Topics include cosmetic, sex-reassignment, and weight loss surgeries; reproductive, contraceptive, and medical technologies; anti-depressants; sex toys; and body piercing.

GSST 190 Special Studies 1 to 4 Individual study, 3 to 12 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Independent study and research by qualified undergraduate students. Course is repeatable to a maximum of 15 units.

GSST 191A Seminar in Gender and Sexuality Studies: Feminist Epistemologies 4 Seminar, 3 hours; extra reading, 2 hours; research, 1 hour. Prerequisite(s): GSST 100 or GSST 100S. Explores what constitutes knowledge in feminist research as well as knowledge production as a process. Examines the epistemological questions that feminist scholars and activists debate. Subject matter represents interdisciplinary feminist approaches.

GSST 191B Seminar in Gender and Sexuality Studies: Feminist Research Methods 4 Seminar, 3 hours; extra reading, 2 hours; research, 1 hour. Prerequisite(s): GSST 100 or GSST 100S, GSST 191A. Explores the development and definitions of feminist research methodologies. Analyzes debates within quantitative and qualitative social science research methods from a feminist perspective. Investigates ethical dilemmas in feminist research. Considers how research and activism are joined.

GSST 191C Seminar in Gender and Sexuality Studies: Research Practicum in Gender and Sustainability 4 Seminar, 3 hours; extra reading, 1 hour; research, 1 hour; term paper, 1 hour. Prerequisite(s): GSST 100 or GSST 100S, GSST 161. Provides interdisciplinary theoretical and practical experience in framing, developing, and implementing projects pertaining to sustainability, gender, and sexuality. Investigates how gender and sexuality shape and are shaped by local, national, and transnational approaches to such issues as climate change, food and water security, species diversity, and renewable resources.

GSST 195 Senior Thesis 4 Thesis 12, Prerequisite(s): GSST 100 or GSST 100S; senior standing consent of instructor. Thesis composition under the guidance of a faculty member. Course is repeatable to a maximum of 8 units.

GSST 198G Grp Internship: Gndr & Sxlty 1 to 12 Seminar, 1 hour; written work, 1 hour; internship, 2 to 32 hours. Prerequisite(s): GSST 001 or GSST 001S; and consent of instructor. Examines issues of gender, sustainability, queer justice, and social justice in non-profit and advocacy organizations. Includes supervised experience in community settings such as women’s and LGBTQ+ advocacy organizations and environmental and environmental justice organizations. Course is repeatable to a maximum of 16 units.

GSST 198I Individual Internship in Gender & Sexuality Studies 1 to 12 Seminar, 1 hour; written work, 1 hour; internship, 2 to 32 hours. Prerequisite(s): upper-division standing; consent of instructor. Examines gender issues in gender/sexualities advocacy organizations. Addresses methods of, support for, outreach by, and practices of gender advocacy workplaces. Includes supervised experience in community settings such as a women’s advocacy organization, a sexualities advocacy organization, or a gender-oriented organization. Course is repeatable to a maximum of 16 units.
Assignment of extra work or examination. Course credit may be granted on a Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable.

GSST 292 Concurrent Analytical Studies in Gender and Sexuality Studies 1 to 4
Research, 3 to 12 hours. Prerequisite(s): graduate standing, consent of instructor and department advisor. Taken concurrently with a 100-series course. Focuses on research, criticism, and resource referrals for students facing gender and sexuality issues; preparation; grading technique and dynamics in the classroom; comparative and historical approaches to teaching about gender and sexuality; techniques for discussing sensitive topics; providing written work; and student relations. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Course
GSST 302 Teaching Practicum 2 to 4
Seminar, 2 hours; research, 1 hour; practicum, 1 to 2 hours; extra reading, 2 to 3 hours. Prerequisite(s): appointment as a teaching assistant in the Department of Gender and Sexuality Studies; supervised training for teaching in lower- and upper-division Gender and Sexuality Studies courses. Considers feminist pedagogy including gender and dynamics in the classroom; comparative and historical approaches to teaching about gender and sexuality; techniques for discussing sensitive topics; providing resource referrals for students facing gender or sexuality issues; preparation; grading written work; and student relations. Graded Satisfactory (S) or No Credit (NC).

Genetics, Genomics, and Bioinformatics

Subject abbreviation: GEN

College of Natural and Agricultural Sciences

Thomas Girke, Ph.D., Director
Program Office, 1140 Batchelor Hall
(800) 735-0717 or (951) 827-7378

Professors
Peter W. Atkinson, Ph.D. (Entomology)
Julia N. Bailey-Serres, Ph.D. (Botany and Plant Sciences)
Katherine A. Borkovich, Ph.D. (Microbiology and Plant Pathology)
James Borneman, Ph.D. (Microbiology and Plant Pathology)
Chia-en Angelina Chang, Ph.D. (Chemistry)
Meng Chen, Ph.D. (Botany and Plant Sciences)
Xuemei Chen, Ph.D. (Botany and Plant Sciences)
Xinping Cui, Ph.D. (Statistics)
Sean Cutler, Ph.D. (Botany and Plant Sciences)
Anupama Dahanukar, Ph.D. (Molecular, Cell and Systems Biology)
Shou-Wei Ding, Ph.D. (Microbiology and Plant Pathology)
Thomas Eulgem, Ph.D. (Botany and Plant Sciences)
Brian A. Federici, Ph.D. (Entomology)
Theodore Garland, Ph.D. (Evolution, Ecology and Organismal Biology)
Thomas Girke, Ph.D. (Botany and Plant Sciences)
Adam Godzik, Ph.D. (Biomedical Sciences)
Venugopala R. Gonehal, Ph.D. (Botany and Plant Sciences)
John M. Heraty, Ph.D. (Entomology)
Tao Jiang, Ph.D. (Computer Science and Engineering)
Hailing Jin, Ph.D. (Microbiology and Plant Pathology)
Howard S. Judelson, Ph.D. (Microbiology and Plant Pathology)
Isgouhi Kaloshian, Ph.D. (Nematology)
Marcus Kaul, Ph.D. (Biomedical Sciences)
Paul B. Larsen, Ph.D. (Biochemistry)
Karine G. Le Roch, Ph.D. (Molecular, Cell and Systems Biology)
Bai-Lian "Larry" Li, Ph.D. (Botany and Plant Sciences)
Xuan Liu, Ph.D. (Biochemistry)
Stefano Lonardi, Ph.D. (Computer Science and Engineering)
Morris F. Maduro, Ph.D. (Molecular, Cell and Systems Biology)
Ernest Martinez, Ph.D. (Biochemistry)
Manuela Martins-Green, Ph.D. (Molecular, Cell and Systems Biology)
Dmitri A. Maslov, Ph.D. (Molecular, Cell and Systems Biology)
David Nelson, Ph.D. (Botany and Plant Sciences)
Leonard P. Nunney, Ph.D. (Evolution, Ecology and Organismal Biology)
Alexander S. Raikhel, Ph.D. (Entomology)
Anandasankar Ray, Ph.D. (Molecular, Cell and Systems Biology)
David Reznick, Ph.D. (Evolution, Ecology and Organismal Biology)
Mikeal L. Roose, Ph.D. (Botany and Plant Sciences)
Caroline Roper, Ph.D. (Microbiology and Plant Pathology)
Joel Sachs, Ph.D., (Evolution, Ecology and Organismal Biology)
Frances M. Sladek, Ph.D. (Molecular, Cell and Systems Biology)
Stephen R. Spindler, Ph.D. (Biochemistry)
Patricia S. Springer, Ph.D. (Botany and Plant Sciences)
Jason E. Stajich, Ph.D. (Microbiology and Plant Pathology)
Linda L. Walling, Ph.D. (Botany and Plant Sciences)
Susan R. Wessler, Ph.D. (Evolution, Ecology and Organismal Biology)
Karine G. Le Roch, Ph.D. (Molecular, Cell and Systems Biology)
Ifor Williams, Ph.D. (Biochemistry)
Wefeng Gu, Ph.D. (Molecular, Cell and Systems Biology)
Rong Hai, Ph.D. (Microbiology and Plant Pathology)
Ansel Hsiao, Ph.D. (Microbiology and Plant Pathology)
Arthur Jia, Ph.D. (Botany and Plant Sciences)
Ted Karginov, Ph.D. (Molecular, Cell and Systems Biology)
Amy Litt, Ph.D. (Botany and Plant Sciences)
Wenxiu Ma, Ph.D. (Statistics)
Patricia Manosalva, Ph.D. (Microbiology and Plant Pathology)
Meera G. Nair, Ph.D. (Biomedical Sciences)
James Ng, Ph.D. (Microbiology and Plant Pathology)
Constance I. Nugent, Ph.D. (Molecular, Cell and Systems Biology)
Sean O’Leary, Ph.D. (Biochemistry)
Martin M. Riccomagno, Ph.D. (Molecular, Cell and Systems Biology)
Naoki Yamana, Ph.D. (Entomology)
Sika Zheng, Ph.D. (Biomedical Sciences)

Assistant Professors
Alan Breisford, Ph.D. (Evolution, Ecology and Organismal Biology)
Sihem Cheloufi, Ph.D. (Biochemistry)
Qi Chen, Ph.D. (Biomedical Sciences)
Patrick Hunt Degnan, Ph.D. (Microbiology and Plant Pathology)
Sydney Glassman, Ph.D. (Microbiology and Plant Pathology)
Simon C. “Niels” Groen, Ph.D. (Nematology)
Erica Heinrich, Ph.D. (Biomedical Sciences)
Daniel Koenig, Ph.D. (Botany and Plant Sciences)
Wei Vivian Li, Ph.D. (Statistics)
Yanran Li, Ph.D. (Chemical and Environmental Engineering)
Yujie Men, Ph.D. (Department of Chemical and Environmental Engineering)
Jernej Murn, Ph.D. (Biochemistry)
Dawn H. Nagel, Ph.D. (Botany and Plant Sciences)
Maria Nitova, Ph.D. (Biochemistry)
Jaimie Van Norman, Ph.D. (Botany and Plant Sciences)
Graduate Program
The Genetics, Genomics, and Bioinformatics Graduate Program (GGB) administers a program leading to the Ph.D. in Genetics, Genomics, and Bioinformatics. GGB is an interdepartmental program that includes faculty from the departments of Biochemistry, Botany and Plant Sciences, Computer Science and Engineering, Entomology, Environmental Sciences, Molecular, Cell, and Systems Biology, Nematology, Plant Pathology and Microbiology, and Statistics, as well as the Division of Biomedical Sciences.

The program is structured to allow maximum flexibility in the design of an individual student course program and research goals. A primary objective is to allow students to develop a capability in research as rapidly as possible, consistent with the student's initial preparation.

Students are expected to meet all general requirements of the Graduate Division as printed in the Graduate Studies section of this catalog.

Admission
Submission of GRE scores (verbal, quantitative and analytical) is mandatory for admission. Applicants with any B.A. or B.S. degree and an adequate background in the biological and/or computational sciences will be considered. The specific entry requirements include courses in genetics, biology, chemistry, calculus, computer science, and statistics. Please refer to the Program Guidelines for details. GGB evaluates applications on a continual basis from October to May, however, it normally considers applications for teaching and research assistantships at the same time as fellowships; therefore, students are strongly encouraged to complete their applications for admission and support as early as possible. Normally, fellowships are awarded in January, for students entering the following fall quarter.

Doctoral Degree
The program offers the Ph.D. degree in Genetics, Genomics, and Bioinformatics.

Course Work
The course curriculum consists of three core classes and one or more elective classes. The core curriculum is composed of one genetics, one genomics and one bioinformatics course, while one or more elective classes can be chosen from an area of a student's specialization.

Core Classes (breadth requirements)
Students will take one course from each of the following three areas (A-C).

(A) Molecular Genetics
- GEN 203 – Advanced Genetic Analysis of Model Organisms or MCBL 221 – Microbial Genetics or BPSC/BCH 231 – Plant Genome
Students may choose other alternatives after approval by their guidance committee and graduate advisor.

(B) Genomics
- GEN 241 (former GEN240A) – Advances in Genomics

(C) Bioinformatics
- GEN 242 (former GEN240B) – Data Analysis in Genome Biology
- GDIV 403 – Research and Scholarship Ethics; must be taken within one year of advancement to candidacy

Elective Classes (areas of specialization)
Students must take one or more classes from the following areas. Students can also choose elective courses other than the ones listed below after approval by their guidance committee and graduate advisor.

Genetics
- CMDB 201 – Molecular Biology
- GEN 206 – Gene Silencing
- CMDB/GEN/BCH 209 – Ribonucleic Acid (RNA) Biology
- BPSC/Biol 148 – Quantitative Genetics
- BPSC/BCH 231 – Plant Genome
- BIOL/MCBL 221 – Microbial Genetics
- EEOB 214 – Evolutionary Genetics
- ENTX 204 – Genome Maintenance and Stability
- EEOB 216 – Theory of Evolution

Computational Biology and Statistics
- BPSC 234 – Statistical Genetics
- CS 141 – Intermediate Data Structures and Algorithms
- CS 100 – Software Construction
- CS 234 – Computational Methods for Biomolecular Data
- CS 238 – Algorithmic Techniques in Computational Biology
- GEN 220 – Computational Analysis of High Throughput Biological Data
- STAT 110 – Biostatistical Methods in Life Sciences
- STAT 155 – Probability and Statistics for Science and Engineering
- STAT 201A/B/C – Theory of Probability and Statistics (replaces 160A/B)
- STAT 201A/B/C – Elements of Probability and Statistical Theory
- STAT 160B – Elements of Probability and Statistical Theory
- STAT 161 – Introduction to Probability Models

Seminars
The GEN 261 seminar (Seminar in Genetics, Genomics, and Bioinformatics) must be taken every quarter.

Supplemental Courses
Students may wish to take additional courses to supplement their graduate training. These courses will be tailored to the specific student’s needs and decided upon in consultation with their major professors.

Classes that emphasize genetics, genomics, bioinformatics and other related areas are given in the List of Potential Courses in the GGB Graduate Student Handbook.

Students should consider some training in the ethics of use of genetically modified organisms, impact of patents on application of bioinformatics/genomics data, and/or use of databases with bioinformatics/genomics information in a clinical setting.

Additional Units taken to maintain 12-unit course load
Graduate students will register for 12 units per quarter to maintain full-time status. These units will include any lecture and seminar courses taken for the quarter. Typically students will also register for Directed Research (GEN 297) prior to advancement to candidacy or Research for Dissertation (GEN 299) after passing the Qualifying Exam.

The Ph.D. is a research degree, and, accordingly, the goal of the program is to train students in the theoretical and experimental foundations of modern genetics. Students are strongly encouraged to participate in lab rotations, select a major professor and begin research work early in their training (during the first year of residence).

Written and Oral Qualifying Examinations
Students are advanced to candidacy following successful completion of a written preliminary examination and an oral qualifying examination.

Dissertation and Final Oral Examination
Successful completion of a final oral dissertation defense is also required.

Foreign Language Requirement
None

Teaching Requirement
Each student must have at least two quarters of teaching experience. This requirement may be satisfied by serving as a teaching assistant in a genetics-related course.

Professional Development Training
Ph.D. graduate students fulfill their professional training requirement through enrollment in GEN 261 and GDIV 403.

Normative Time to Degree
15 quarters

Masters Degree
The multidisciplinary interdisciplinary graduate program in Genetics, Genomics, and Bioinformatics offers instruction and research training leading to the M.S. degree in Genetics, Genomics, and Bioinformatics. A Thesis (Plan I) or Comprehensive Exam (Plan II) M.S. degree in Genetics, Genomics, and Bioinformatics is available under special circumstances, when the work leading to the Ph.D. degree cannot be completed. Whether either of these options is appropriate will be decided by the student’s Guidance Committee either at the end of the first year or the time of the oral qualifying examination. Reference the Minimum Degree Requirements for the Master’s degree (for Plan I and Plan II) in the Graduate Studies section of the General requirements.
**Graduate Courses**

**GEN 203 Advanced Genetic Analysis in Model Organisms** 4 Lecture, 2 hours; discussion, 2 hours. Prerequisite(s): BIOL 102 or equivalent; graduate standing or consent of instructor. Examines essential concepts in modern genetics. Focuses on universal principles of genetic analysis in prokaryotic and eukaryotic model organisms, emphasizing underlying concepts and logic. Develops skills reading primary scientific literature and critical thinking through analysis of landmark papers. Cross-listed with CMDB 203.

**GEN 206 Gene Silencing** 3 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): graduate standing, BIOL 107A or CNBS 101; or consent of instructor. An in-depth coverage of mechanisms, functions, and applications of RNAi and related gene regulatory pathways guided by small RNAs such as siRNAs and miRNAs in plants and animals. Cross-listed with CMDB 206, and MCBL 206.

**GEN 209 Ribonucleic Acid Biology** 3 Lecture, 2 hours; discussion, 1 hour. Prerequisite(s): BIOL 107A or CNBS 101 or equivalent; or consent of instructor. A comprehensive overview of the multiple functions of ribonucleic acid (RNA) in the cell. Topics include mRNA, rRNA, and tRNA function and metabolism; RNA catalysis and the “RNA world”; eukaryotic and bacterial non-coding RNAs; and bacterial riboswitches. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CMDB 209, and BCH 209.

**GEN 220 Computational Analysis of High Throughput Biological Data** 3 Lecture, 2 hours; discussion, 1 hour. Prerequisite(s): graduate students in a life sciences program or consent of the instructors; previous coursework in genetics/genomics, molecular biology, or cell biology. Enables those with no computer science background to handle high throughput biological data. Covers the Perl programming language; program design, implementation, and testing; relational databases; basic data structures and algorithms; and BioPerl. Includes skill building through analysis of real high-throughput biological data. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with EE 270/GEN 270.

**GEN 241 Advances in Bioinformatics and Genomics** 4 Lecture, 4 hours. Prerequisite(s): BCH 110C or BCH 110HC or BIOL 107A; BIOL 102; Strategies for genomic and bioinformatic studies with focus on the tools of the trade. Topics include the sequencing, assembly, and annotation of genomes, transcriptome analysis, similarity searching, pattern recognition, genome evolution, and phylogenetic analysis. Discusses papers from bacterial, fungal, plant, and metazoan systems.

**GEN 242 Data Analysis in Genome Biology** 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): GEN 241; graduate standing. Introduction to algorithms, statistics, and data analysis programming for genomics. Covers the theory of analyzing large-scale genomics, profiling, phylogenetics, and drug discovery data. Introduces the corresponding data analysis programming techniques using command-line tools on a computer cluster and the programming environment R.

**GEN 261 Seminar in Genetics, Genomics, and Bioinformatics** 1 Seminar, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Oral reports by visiting scholars, faculty, and students on current research topics in Genetics, Genomics, and Bioinformatics. Graded Satisfactory (S) or No Credit (NC). Course is repeatable. Cross-listed with BCH 261, BIOL 261, BPSC 261, ENT M261, and PLPA 261.

**GEN 270 Introduction to Video Bioinformatics** 3 Lecture, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to video bioinformatics. Includes microscopic techniques, live imaging, video computing, structure and function of cells, spatiotemporal dynamics, multiscale analysis, disk and data storage, indexing and queries, image and video databases, and medical imaging and analysis techniques. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with EE 270.

**GEN 272 Introduction to Imaging Bioinstrumentation and Analysis** 2 Lecture, 1 hour; laboratory, 3 hours; extra reading, 2 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to the instrumentation used to collect video images of cells and the methods used to analyze video data. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with EE 272.

**GEN 273 Live Imaging and Analysis of Cellular and Molecular Behaviors** 2 Lecture, 1 hour; laboratory, 3 hours. Prerequisite(s): EE 272/GEN 272 or consent of instructor. An introduction to video imaging methodologies used to capture the cellular and molecular dynamics and interactions in living cells. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with EE 273.

**GEN 274 Introduction to Medical Imaging and Analysis** 2 Lecture, 1 hour; laboratory, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to medical imaging. Includes associated computational techniques for x-ray imaging, computed tomography, magnetic resonance imaging, positron emission tomography, ultrasound, radiotherapy, and molecular imaging. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with EE 274.

**GEN 290 Directed Studies 1 to 6 Research** 3 to 18 hours. Prerequisite(s): graduate standing and consent of instructor and graduate advisor. Faculty-directed individual study on specially selected topics in genetics, genomics, and bioinformatics. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

**GEN 292 Concurrent Studies in Genetics, Genomics, and Bioinformatics 1 to 4 Research** 3 To 12, Prerequisite(s): graduate standing or consent of instructor. Explores one or more graduate projects based on content related to an appropriate undergraduate course. Includes faculty guidance and evaluation. Taken concurrently with the undergraduate course.

**GEN 297 Directed Research 1 to 6 Research** 3 to 18 hours. Prerequisite(s): graduate standing. Directed research in genetics, genomics, and bioinformatics. Performed prior to advancement to candidacy in preparation for dissertation projects. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

**GEN 299 Research For the Dissertation 1 to 12 Research** 3 to 36 hours. Prerequisite(s): graduate standing. Original research in genetics, genomics, and bioinformatics for preparation of the dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

**Global Studies**

Juliann Emmons Allison, Chair, (Gender & Sexuality Studies)
Muhamad Ali (Religious Studies)
Christopher Chase-Dunn (Graduate Division)
John Coff (Political Science)
Rob Clark (Sociology)
Ariel Dinar (Environmental Policy)
Kim Yio Dionne (Political Science)
Farah Godrej (Political Science)
Steven Helfand (Economics)
Tabassum “Ruhi” Kahn (Media & Cultural Studies)
Mariam Beevi Lam (Comp Lit & Lang)
Perry Link (Comp Lit & Lang)
Susan Osman (Anthropology, Emeritus)
Fariba Zarinsefat (History)
Dyale Williams, Dean, ex officio
Major

Global Studies is designed to be a challenging,
interdisciplinary, major that provides students
with an understanding of processes and
problems that transcend national boundaries.
Global Studies majors investigate interconnections that have emerged through global
historical processes, transnational mobilities
and identities, supranational norms, laws,
and institutions, as well as the dissemination
of ideas, belief systems, literatures, and arts
across borders. Global studies majors also
investigate global causes and consequences of
division, fragmentation, and conflict.
At UCR, Global Studies majors are expected to
master general theoretical and historical literatures on global cultural and economic processes, while pursuing tailored expertise on a
specific region or thematic area, such as global
heath and the spread of disease, human rights
and the politics of migration, global arts and
media, global economic systems of trade and
finance, or sustainability and environmental
politics.

University Requirements
See Undergraduate Studies section.

College Requirements

See College of Humanities, Arts, and Social
Sciences, Colleges and Programs section.

Major Requirements

The major requirements for the B.A. degree in
Global Studies are as follows:
Students will not be admitted into the major
until they have completed either GBST 001 or
GBST 002 with a “C-“ grade or better.
1. L
 ower-division requirements
(7 courses [at least 24 units] plus foreign
language):
a) GBST 001
b) Two introductory courses (courses
numbered 001–099) in each of two
different disciplines.
c) Proficiency in a foreign language at the
fourth-quarter level
d) Two courses in world history chosen
from HIST 010 or HIST 010W, HIST 015,
HIST 020, or HIST 020W
2 Upper-division requirements (45 units)
Students must select (8) eight courses in
at least two different disciplines and two
courses in a single region, at least one
100-level GBST course. Students may opt
to concentrate on one or two thematic
tracks or to select a range of courses from
different thematic tracks. Please note:
students are responsible for fulfilling any
prerequisites required for upper division
courses. Students must complete GBST
001 before enrolling in any upper division
GBST courses.

3. C
 apstone requirement (4 units)
Students are required to complete their
major with a capstone experience. The
capstone must examine at least one global
issue. Most students will satisfy this requirement by taking the Senior Thesis Seminar
(GBST 193). Students may also conduct an
individual project with the approval of the
chair of Global Studies.

Minor

1. L
 ower-division requirements (21 units)
a) GBST 001
b) Proficiency of a foreign language at the
fourth quarter level
2. U
 pper-division requirements (16 units)
4 Upper-division courses. Students must
select four (4) courses with significant
global content in at least two different
disciplines; two (2) of these courses must
be in a geographic area. Students may opt
to concentrate on one or two thematic
tracks or to select a range of courses from
different thematic tracks. Please note:
students are responsible for fulfilling any
prerequisites required for upper division
courses. Students must complete GBST
001 before enrolling in any upper division
GBST courses.

War, Peace, and Justice

Lower-Division Courses

GBST 001 Global History, Culture, and Ideas 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): none. A survey of the historical and cultural processes that have made the world more interconnected.

GBST 002 Global Socioeconomic and Political Processes 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): GBST 001 with a grade of “B” or better is recommended for freshmen. A survey of the economic, political, and physical processes that have made the world more interconnected.

GBST 003 Crossing Culture 1 Discussion, 1 hour; individual study, 1 hour; work, 1 hour. Prerequisite(s): restricted to class level standing of freshman, sophomore, or junior. Covers logistics for all UCR Education Abroad needs, such as program types, application, funding, resources, and support. Explores intercultural competencies in depth, a key skill for the twenty-first century job force. Promotes transferring of learned skills proactively into the academic career and improves employment competitiveness.

GBST 090 Special Studies 1 to 3 Individual Study, 3 to 9 hours. Prerequisite(s): consent of program chair. Individual study, directed by a faculty member, to meet special curricular needs. Course is repeatable to a maximum of 8 units.

Upper-Division Courses

GBST 100 Global Cities 4 Lecture, 3 hours; field, 3 hours. Prerequisite(s): GBST 001 or GBST 002. A study of urban life as it has emerged in various parts of the world through application of theories of space and the city. Considers how colonialism, urban planning, migration, and trade have influenced contemporary urban environments. Projects explore the city as representation and lived experience in Riverside and Southern California.

GBST 101 (E-2) Special Topics in Global Issues 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Explores current events in relation to Global Studies. Professors, guest speakers, and the topics addressed involve global issues. E. The Arab Spring. Course is repeatable as content or topic changes to a maximum of 8 units.

GBST 102 Global Meditation Practices and the Contemplative Traditions of South Asia 4 Seminar, 3 hours; extra reading, 3 hours; individual study, 3 hours. Prerequisite(s): GBST 001 with a grade of C- or better, GBST 002 with a grade of C- or better. An overview of meditative traditions of South Asia that influenced global meditative practices. Investigates and compares distinct traditions and their global political implications. Topics include the meaning and purpose of meditation, the influence of religious traditions, and the political implications of mediation. Includes regular practice of meditative and contemplative techniques.

GBST 103 Food and Globalization 4 Seminar, 3 hours; extra reading, 3 hours; research, 3 hours; written work, 3 hours. Prerequisite(s): GBST 001; GBST 002. Investigates globalization through the lens of food. Topics include world hunger, food security, agribusiness and health, genetically modified foods, sustainability, labor, migration, fast food, and “slow food.” Introduces various research methods including analysis of statistics, semiotics, and the study of social interaction.

GBST 104 Global Economic Crisis 4 Seminar, 4 hours; research, 3 hours, written work 3 hours, extra reading, 3 hours. Prerequisite(s): GBST 001. Examines crises associated with neoliberal globalization, global finance, and recession beginning in the 1970s. Topics include the political economy of capitalism; variation in governmental response; political instability and crisis; origins of current global political economic crises affecting developed countries; and proposed remedies.

GBST 107 Non Western Political Thought 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Explores some of the key political thinkers, ideas, and cultural-religious legacies of non-Western societies. Addresses pertinent non-Western civilizations and crucial problems in comparative political theory. Provides a detailed analysis of political thinking in regions such as the Middle East, South Asia, and East/Southeast Asia. Cross-listed with POSC 107.

GBST 110 Global Migrations and Movements 4 Lecture, 3 hours; field, 3 hours. Prerequisite(s): GBST 001 or GBST 002. Examines migration and mobility (both global and interregional). Also addresses economic development and displacement of populations and issues of identity and subjectivity in the context of recent theories of mobility and globalization today. Considers how migration is reshaping borders, ideas of self, political and social entities, and transnational issues.

GBST 130 Management of International Water 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores basic concepts of international water law. Examines how these concepts, as well as conflict definitions, negotiation principles, and cooperation principles, are applied to international waters. Includes analysis of several major international water cases utilizing contemporary literature. Cross-listed with PPBL 130.

GBST 140 Haiti: Past, Present and Future 4 Lecture, 3 hours; discussion, 1 hour; research, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Focuses on Haitian history, ecology, earthquakes, political economy, and public health issues in world historical perspective. Incorporates presentations from experts and community activists on topics related to Haitian political, economic, and natural, and health history. Examines leadership skills needed in addressing poverty in the Global South.

GBST 148 Sound Studies and Sound Art 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Introduction to the interdisciplinary field of sound studies and sound art. Explores cultural, social, political, and philosophical issues of sound, listening, and auditory media. Examines the contemporary practices of sound production including the experimental field of sound art. Cross-listed with MUS 148.

GBST 169 From the Maghreb to the Middle East 4 Lecture, 3 hours; written work, 1 hour; individual study, 1 hour; extra reading, 1 hour. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or GBST 001 or GBST 002 or consent of instructor. An introduction to the peoples and societies of North Africa and the Middle East. Follows the travels of Ibn Battutah, Ibn Khaldun, and Rafik al Tahtawi. Topics include religion, migration, gender, political organization, the global Middle East, Orientalism, and cultural production. Cross-listed with ANTH 169.

GBST 190 Special Studies 1 to 5 Individual Study, 3 to 15 hours. Prerequisite(s): consent of program chair. Individual study, directed by a faculty member, to meet special curricular needs. Course is repeatable to a maximum of 15 units.

GBST 191 Seminar in Global Studies 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines contemporary issues and topics in global studies that are not part of the regular curricular offerings. Content of the course varies and is announced as the course is offered. Course is repeatable to a maximum of 16 units.

GBST 193 Senior Seminar 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): senior standing or consent of instructor. Senior capstone course for global studies majors. Examines connections between students’ academic experience and their plans for the future. Includes a research paper, as well as speakers on issues addressing professional choices in a global context.

GBST 195A Senior Thesis 4 Thesis, 12 hours. Prerequisite(s): senior standing; consent of instructor. Preparation of a substantial paper based on original research. The student works independently with a faculty member. May be undertaken as a one-, two-, or three-quarter course (GBST 195A, GBST 195B, GBST 195C).
GBST 195B Senior Thesis 4 Thesis, 12 hours. Prerequisite(s): GBST 195A. Preparation of a substantial paper based on original research. The student works independently with a faculty member. May be undertaken as a one-, two-, or three-quarter course (GBST 195A, GBST 195B, GBST 195C).

GBST 195C Senior Thesis 4 Thesis, 12 hours. Prerequisite(s): GBST 195B. Preparation of a substantial paper based on original research. The student works independently with a faculty member. May be undertaken as a one-, two-, or three-quarter course (GBST 195A, GBST 195B, GBST 195C).

GBST 198I Individual Internship in Global Studies 1 to 12 Internship, 2 to 24 hours; term paper, 1 to 12 hours. Prerequisite(s): consent of instructor. Internship in a public or quasi-public agency or business concern in matters relating to global studies. Requires a summary paper. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

Professional Courses

GBST 302 Teaching Practicum 1 to 4 Practicum, 3 to 12 hours. Prerequisite(s): appointment as a teaching assistant; graduate standing. Supervised teaching in undergraduate Global Studies courses. Required of all Global Studies teaching assistants Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 4 units.

Graduate Division Courses

GDIV 301 Advanced University Level Pedagogy 2 Seminar, 2 hours. Prerequisite(s): graduate standing; and consent of instructor. Instruction in advanced university-level pedagogy. Explores teaching and lecturing strategies, effective teaching philosophies, effective evaluation techniques, and university-level teaching as a profession. Graded Satisfactory (S) or No Credit (NC).

GDIV 302 University Level Pedagogy Practicum 2 Practicum, 6 hours. Prerequisite(s): GDIV 301; graduate standing; and consent of instructor. Assists in developing and practicing effective teaching strategies on the university level through observation and experience. Graded Satisfactory (S) or No Credit (NC).

GDIV 498I Individual Internship 1 to 12 Internship, 3 to 36 hours. Prerequisite(s): graduate student standing; consent of instructor and graduate advisor. An internship in a UCR department or an approved academic institution in order to gain practical experience in academic administration or student services. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as content changes to a maximum of 16 units.

HABLAMoS Medical Spanish, Designated Emphasis

School of Medicine

Ann Cheney (Associate Professor SMPPH), Director
Jacqueline Moreira, Program Coordinator

Advisory Committee & Participating Faculty

Evelyn Vázquez, SMPPH

Designated Emphasis Requirements

The Designated Emphasis in Medical Spanish or HABLAMoS (Hispanic and Bilingual Ambulatory Medical Studies) is a four-year language learning program that includes classroom instruction and experiential learning opportunities in Spanish-speaking clinics, communities, and families in Inland Southern California and urban and rural Spanish-speaking clinics. Students of all language levels can join the program in their first or second year of graduate or medical school. Students must complete a minimum of 200 hours of Spanish-language learning spread out across their graduate or medical education to receive the DE in Medical Spanish.

1. Year one: builds the foundation for Spanish-language learning in medical contexts. Students receive one unit of selective credit on their transcript by completing 16 of 20 available activity hours for the medical Spanish selective.

2. Year two: strengthens students’ language skills and emphasizes oral communication in clinical encounters with Spanish-speaking patients and families. Students participate in a minimum of 14 hours of language learning. This includes 10 hours of case-based learning, taught by native Spanish-speaking physicians, 6 hours of conversational Spanish with community members.

3. Year three: deepens students’ medical Spanish vocabulary and cultural humility in the context of caring for Spanish-speaking patients. Students work independently on their written and oral language skills. Activities include 40 hours of independent completion of online language learning models via CanopyLearn, recipient of the National Institutes of Health (NIH) innovation award recipient.

4. Year four: immerses students in Spanish-speaking clinics and families in Inland Southern California and provides experiential learning into the cultural and structural factors that shape the health of Latino patients, patient-provider dynamics, and patient experiences in clinical spaces. Students can select from two activities: clinical rotation: Four-week stay with a Spanish-speaking Latino family, 30-hour weekly clinic rotation with a preceptor with a Spanish-speaking patient panel, 6 hours of online Spanish grammar instruction, 3 hours of virtual classroom discussion, and can opt into a home-stay with a Spanish-speaking family; scholarly activity: 20-hour weekly independent scholarship, 6 hours of structured Spanish language lessons, 3 hours of seminar or reading circles, 4 hours of conversation practice with community members. Both activities include a final required oral presentation in Spanish on a public health topic.

All requirements for the Designated Emphasis must be satisfied no later than one calendar year from the quarter in which candidate advances to candidacy in their PhD field or the final block in undergraduate medical education; a minimum GPA of 3.0 is required for the Designated Emphasis completion.

Healthcare Leadership Designated Emphasis

School of Medicine
Advisory Committee & Participating Faculty
Kendrick Davis, Director

Designated Emphasis Requirements

The Healthcare Leadership Designated Emphasis builds a foundation of knowledge and wealth of skills for medical students to utilize as they work towards becoming the healthcare system leaders, including deans, CEOs, and CMOs. Students will develop self-awareness, leadership, and communication skills, and will learn to improve efficiency, reduce waste, and foster professional networks with peers, mentors, and community leaders. Any student is welcome to apply. There will be an application and subsequent interview. Up to 10 students will be accepted into the program. Students must complete a total of 304 hours of contact time divided up through the four years of medical school.

1. Year one: students receive one unit of elective credit on their transcript by completing 14-of-20 available activity hours for the school year. These include: Self development and awareness, Improving efficiency and reducing waste in an organization, Guest speakers/class presentations, Leadership speaker series, and Mentorship program.

2. Year two: taking principles from M.B.A., M.P.H. and M.P.P. programs, students receive one unit of selective credit on their transcript by completing 10-of-20 available activity hours for the school year. These include: lectures, case studies, and Mentorship program.

3. Year three: students will receive 12 units of selective credit on their transcript by completing 120 hours during their three-week selective. Students can earn the following grades while on their selective: honors, high pass, pass, or fail. Selectives include: Hands-on experience, Observation and formal report, Resource summaries, Mentorship of MS1 and MS2 students.

4. Year four: Students have the option of a scholarly activity block focused on leadership or participation in the Academic Medicine course. If opting for a scholarly activity, students are responsible for submitting the necessary completed documentation as indicated in the Student Handbook to ensure that they start on time. Students will receive 16 units of selective credit on their transcript by completing 160 hours during their four-week elective. Students can earn the following grades while on their selective: honors, high pass, pass, or fail. The elective includes: Hands-on experience, Capstone project, Resource summaries, Mentorship of MS1 and MS2 students.

Upon successful completion of the program across all four years, students will be given distinction on their Medical Student Performance Evaluation (MSPE) and receive a DE on their transcript. All requirements for the Designated Emphasis must be satisfied no later than one calendar year from the quarter in which candidate advances to candidacy in their PhD field or the final block in undergraduate medical education.

Foreign Language Placement Examination
A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and placementtest.ucr.edu for date and time. Transfer students who have taken a college-level language course cannot take the placement examination and should consult with their advisors. No college-level credit may be duplicated. See college placement examination policy.

Major
The Department of Hispanic Studies offers a B.A. degree in Spanish. It offers the opportunity to double-major in Spanish and any other discipline; and to pursue a Spanish minor. A student may major in Spanish by completing the requirements in one of three areas of specialization, or options.
The **Literature Option** is intended for students who are interested in learning about the literary culture of Latin America and Spain. Students who choose the Literature Option will become versed in the analysis of writing, fiction, poetry, films, essays and criticism in Spanish, across historical periods and locations. This broad, liberal education prepares majors to pursue advanced graduate study in Latin American or Spanish literature. It prepares them for careers in educational policy, high school teaching, international relations, law, and many other professions.

The **Linguistics Option** is designed for students who are interested in bilingualism, Heritage Language or in Hispanic Linguistics. Students follow this option as preparation for advanced study in multiple fields -Hispanic Linguistics, Education, Language Science(s)- as preparation for K-12 teaching, or as a second major in fields where bilingualism or being bilingual is useful such as Ethnic Studies, the medical field(s), Sociology, Psychology or Anthropology, among others. We particularly encourage Heritage Language Speakers of Spanish, from any major, to pursue a specialization in Hispanic Linguistics.

The **Cultural Studies Option** is intended for students with an interest in the intersections of society, power, and culture. It offers an opportunity to acquire critical interdisciplinary skills in cultural analysis from a Hispanic perspective. It explores numerous forms of Spanish, Latin American and transatlantic cultural practices including film, television, philosophy, music, visual arts, performance, literature, testimonials, essays, and cultural critique. The Cultural Studies Option is relevant for students considering graduate study in Spanish, literature generally, history, international relations, or anthropology. It prepares students for careers in high school teaching, media work, advertising, creative arts, multimedia projects, and international studies.

All three options are suitable for double majors in all disciplines. Spanish majors very often double major in the fields of Anthropology, Classics, Comparative Languages and Literatures, Education, English, History, Latin American Studies, Philosophy, Psychology, Linguistics, Media and Cultural Studies, Music, or Sociology.

**Education Abroad**
The Department of Hispanic Studies encourages participation in Education Abroad. The Department regularly offers Faculty Led Education Abroad Programs (FLEAP) that offer UCR credit while learning abroad during Summer Sessions. Please consult with the faculty leader. UCEAP is another opportunity to learn abroad within the UC system. Spanish majors who choose to participate in UCEAP typically travel to Spain or Latin America to study in cities such as Madrid, or Barcelona, Buenos Aires, Santiago, Rio, San José, Mexico City, etc. Students should plan well in advance to ensure that the courses they take outside of the U.S. fit in your overall program at UCR. Consult the departmental student affairs officer for assistance. For details, visit Education Abroad at ea.ucr.edu or call (951) 827-4113.

See Education Abroad in the Educational Opportunities section in the beginning of this catalog. Consult the Education Abroad office at UC Riverside for additional information on international opportunities.

**University Requirements**
See Undergraduate Studies section.

**College Requirements**
See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

**Major Requirements**
The major requirements for the B.A. degree in Spanish are as follows:

**Option Requirements — Choose one option**

**Cultural Studies Option**
Upper-division requirements (11 courses [at least 44 units]):
1. SPN 101A and SPN 101B, or SPN 109A and SPN 109B
2. SPN 110 (prerequisite for all upper-division literature courses)
3. One course from SPN 122A, SPN 122B, SPN 165, SPN 188
4. Two courses from SPN 125 (E-Z)/MCS 171/MLS 125 (E-Z), SPN 145, SPN 171/MLS 171, SPN 172, SPN 179/MCS 179/MLS 179, SPN 185/MCS 185/MLS 185, SPN 187
5. Four upper-division elective courses (At least three of which must be in Spanish. One may be in a related area.)
6. SPN 193

**Linguistics Option**
Upper-division requirements (11 courses [at least 44 units]):
1. SPN 101A and SPN 101B or SPN 109A and SPN 109B
2. SPN 105, SPN 106, SPN 107
3. SPN 110 (prerequisite for all upper-division literature courses)
4. Four upper-division elective courses (At least two of which must be in Spanish; it is highly recommended that students take LING 111 and LING 141)
5. SPN 193

**Literature Option**
Upper-division requirements (11 courses [at least 44 units]):
1. SPN 101A and SPN 101B or SPN 109A and SPN 109B
2. SPN 110 (prerequisite for all upper-division literature courses)
3. SPN 180A or SPN 180B
4. SPN 181A or SPN 181B
5. Five upper-division elective courses in Spanish
6. SPN 193

**Minor Requirements**
See minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

**Graduate Program**
The Department of Hispanic Studies offers the M.A. and Ph.D. degrees in Spanish.

The graduate program in Spanish prepares scholars for university teaching and research in Spanish and Latin American literature, linguistics, and/or cultural studies. It is organized primarily for students seeking the Ph.D. degree, although the M.A. degree is awarded in the course of a student’s progress.

The faculty in Hispanic Studies offers a wide and diverse group of graduate courses in literary, linguistic and cultural studies. Research and teaching interests include all areas of Spanish and Latin American literature from its origins to the present. Faculty also have strong research and teaching profiles in the philosophy and practices of translation; cultural studies, including Latin American film, gender studies, theories of the body, historiography and fiction; psychoanalysis; bilingualism and heritage language studies; Spanish in the US, sociolinguistics; and political philosophy.

**Teaching Assistantships**
Most students in the program are Teaching Assistants in the Department of Hispanic Studies; their normal workload includes language teaching and taking three graduate courses per quarter. Teaching Assistants receive training in language instruction as part of their graduate study and teaching duties.

The Department of Hispanic Studies recommends, for all three of the above options, the study of one of the other languages (besides Spanish) spoken in Latin America, the Caribbean, or Spain, such as Portuguese (PORT 101A, PORT 101B, PORT 101C) and French. Less commonly taught languages such as Aymara, Catalan, Euskera, Galician, Guarani, Haitian Creole, Mapuche, Maya, Nahuatl, and Quechua, among others, are encouraged.

**Minor Requirements for the minor in Spanish are as follows (24 units):**
1. SPN 101A and SPN 101B or SPN 109A and SPN 109B
2. SPN 110
3. Three upper-division courses in Spanish

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.
Master’s Degree
The Department of Hispanic Studies offers the M.A. in Spanish.

The M.A. in Spanish is awarded to students in the Ph.D. program who successfully complete the coursework and examination requirements. As part of their preparation in Hispanic literary and cultural studies and linguistics, students are introduced to current debates in cultural studies, literary theory, bilingualism and second language acquisition. Exceptionally, students may seek a terminal MA degree, when they do not intend to pursue the Ph.D.

Admission
The Department of Hispanic Studies invites highly qualified candidates from any discipline to apply. We welcome applicants with degrees (for example) in linguistics, literature (Hispanophone as well as Comparative or other literatures), philosophy, psychology and art history.

Course Work
Candidates complete a minimum of 48 graduate units in literature, cultural studies and linguistics, with at least five graduate courses in Spanish Peninsular literature and at least five courses in Latin American literature. The Latin American literature courses SPN 257, SPN 273A, SPN 273B, SPN 273C can be substituted for Spanish Language Literature courses. (In addition to Spanish and Latin American literature, students may fulfill their 48-unit requirement by taking courses approved by the graduate advisor in Linguistics or Comparative Literature.)

M.A. Examination
Near the end of this two-year program, students take a four-hour written examination, followed by a one-hour oral examination administered one or two weeks after the written examination. These M.A. examinations (written and oral) are based on the texts in the M.A. reading list and course work. The M.A. reading list consists of approximately 60 major works of Spanish and Latin American literature.

Foreign Language Requirement
In addition to Spanish and English, the candidate must demonstrate a reading knowledge of one other language. Students who select Portuguese as their third language may fulfill the requirement by departmental examination or by satisfactory completion of one literature class. Proficiency in other languages may be established by completion of coursework in that language, or by departmental examination. The choice of language is to be made in consultation with the graduate advisor, and should be guided by the candidate’s research needs and interests.

Doctoral Degree
The Department of Hispanic Studies offers the Ph.D. in Spanish to train students for academic positions as scholars and teachers, and for alternative academic careers in which research, analysis and writing skills at the doctoral level are most useful. (For instance, in editing, publishing, educational policy, foundation governance, arts administration, and so on.)

The program emphasizes advanced coursework and independent research, culminating in the doctoral dissertation. It is designed to provide in-depth coverage of the student’s primary area of study, while also ensuring ample coverage of the broad field of Hispanic Studies.

Admission
Students admitted with the M.A. from other institutions must take an examination at the end of the first year for diagnostic purposes. Candidates who are awarded or hold the M.A. from UCR must be recommended by the faculty to continue for the Ph.D. Approval by the department is not automatic; the department determines whether or not each student has the academic potential to succeed in its Ph.D. program. This requirement for evaluating each student’s potential and academic fitness to proceed toward the Ph.D. is enforced regardless of the student’s initial degree objective at matriculation.

Course Work
There is a minimum course requirement of 24 units beyond the M.A. In practice, doctoral students usually find that more than the minimum is advisable for doctoral training. SPN 220 and SPN 301 are required professional development courses.

Long Paper
As part of their preparation in their major area of specialization, students present a paper of 40 to 50 pages in length, representing scholarly research and analysis in their chosen field of study. The long paper forms the basis of the doctoral dissertation.

Written and Oral Qualifying Examinations
Students choose two areas of concentration as examination areas. One area is the field of major emphasis; a second area or topic is selected in consultation with the chair of the guidance committee.

Language Requirements
In addition to Spanish and English, the candidate must demonstrate a reading knowledge of one other language. Students who select Portuguese as their third language may fulfill the requirement by departmental examination or by satisfactory completion of one literature class. Proficiency in other languages may be established by completion of coursework in that language, or by departmental examination. The choice of language is to be made in consultation with the graduate advisor, and should be guided by the candidate’s research needs and interests.

Dissertation and Final Oral Examination
Students prepare a dissertation presented as prescribed by the Graduate Division under the direction of the candidate’s dissertation committee. After completion of the dissertation, the candidate is examined by the dissertation committee. This examination normally takes the form of a public presentation by the candidate followed by questions from the committee.

Normative Time to Degree
9 quarters (15 quarters for students without an M.A.)

</tbody>
</table>
SPN 012 Myths and Cultures of Latin America, the Caribbean, and Spain: Transatlantic Currents
4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. Examines cultural themes from a transatlantic perspective, through study of literature, film, and visual arts. Topics include chronicles of the conquest, cultures of the baroque, religious traditions and conflicts, the incorporation of popular culture into the literary tradition, contemporary writers, and cinema. Course is conducted in English.

SPN 046 Introduction to Latin American Film
5 Lecture, 3 hours; screening, 3 hours, discussion; 1 hour. Prerequisite(s): none. Provides an historical overview of Latin American film production. Introduces students to film industries, revolutionary cinema, the role of television, and recent international co-productions. Cross-listed with MCS 046.

SPN 090 Special Studies 1 to 3 To be taken with the consent of the Chair of the Department as a means of meeting special curricular problems. Course is repeatable.

Upper-Division Courses
SPN 101A Advanced Oral and Written Composition
4 Lecture, 3 hours; extra reading, 1.5; written work, 1.5 hours. Prerequisite(s): SPN 006. Designed for nonnative speakers to practice speaking and writing in Spanish and to review basic grammar. Emphasis is on composition, editing, and conversation practice. Class is conducted in Spanish. Native speakers without knowledge of college-level grammar should take SPN 109A. Credit is awarded for only one of SPN 101A or SPN 109A.

SPN 101B Advanced Oral and Written Composition
4 Lecture, 3 hours; extra reading, 1.5 hours; written work, 1.5 hours. Prerequisite(s): SPN 101A. Designed for nonnative speakers to practice speaking and writing in Spanish and to review basic grammar. Emphasis is on composition, editing, and conversation practice. Class is conducted in Spanish. Native speakers without knowledge of college-level grammar should take SPN 109B. Credit is awarded for only one of SPN 101B or SPN 109B.

SPN 102A Introduction to Spanish Culture
4 Lecture, 3 hours, extra reading, 3 hours. Prerequisite(s): SPN 101B or SPN 109B or equivalent. Introduction to Spanish culture and civilization from the Roman times to the present. Readings cover history, art, architecture, literatures, and other aspects of culture and civilization. Provides background for courses on the literature of Spain. Course is taught in Spanish.

SPN 102B Introduction to Latin American Culture
4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): SPN 101B or SPN 109B or equivalent. Introduction to Latin American culture and civilization from pre-Columbian times to the present. Emphasis is on the period from postcolonial independence to the present. Readings cover history, art, architecture, literatures, and other aspects of culture and civilization. Provides background for courses on the literature of Latin America. Course is taught in Spanish.

SPN 103 Spanish Culture and Civilization in Spain
4 Lecture, 60 hours per quarter; discussion, 20 hours per quarter. Prerequisite(s): SPN 101B or SPN 109B; consent of instructor. Provides intensive study of Spain within its European and New-World contexts. Emphasizes expansion and retraction, as well as the roles of religion and authority. Course taught in Spanish. Offered in summer only.

SPN 104 An Introduction to the Study of Spanish and Comparative Linguistics
4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. An introduction to the study of Spanish and comparative linguistics. Cross-listed with LNST 104.

SPN 105 The Phonology of the Spanish Language
4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): LING 020; SPN 101A, SPN 101B or SPN 109A, SPN 109B. Provides a descriptive and normative analysis of the phonological system of the Spanish language. Focuses on the phonetic characteristics of contemporary Peninsular and Hispano-American Spanish.

SPN 106 Structure of the Spanish Language
4 Lecture, 3 hours; extra reading, 3, Prerequisite(s): SPN 105. An introduction to descriptive and applied techniques in the morphosyntax of the Spanish language as found in Spain and Spanish America.

SPN 107 Spanish in the United States
4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): SPN 106. A sociolinguistic study of the Spanish language in the United States.

SPN 109A Spanish For the Native Speaker
4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): a sufficiently high test score on the Spanish placement examination, as determined by the Hispanic Studies faculty. Designed for the native speaker with little or no experience with Spanish grammar and composition. Emphasis is on basic grammar, written accents, orthography, and composition. The class is conducted in Spanish. Credit is awarded for only one of SPN 101A or SPN 109A.

SPN 109B Spanish For the Native Speaker
4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): SPN 109A. Designed for the native speaker with little or no experience with Spanish grammar and composition. Emphasis is on basic grammar, written accents, orthography, and composition. The class is conducted in Spanish. Credit is awarded for only one of SPN 101B or SPN 109B.

SPN 110 Spanish For the Native Speaker
4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): SPN 109A. Designed for the native speaker with little or no experience with Spanish grammar and composition. Emphasis is on basic grammar, written accents, orthography, and composition. The class is conducted in Spanish. Credit is awarded for only one of SPN 101B or SPN 109B.

SPN 110 Introduction to Literary Criticism and Analysis
4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): SPN 101A, SPN 101B or SPN 109A, SPN 109B. An introduction to the methods and techniques of literary analysis. Practice in textual explication, with regular writing assignments.

SPN 111 (E-Z) Hispanic Literature in Translation
4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Reading and discussion of works of major Spanish and Spanish American writers. Topic will vary from quarter to quarter. F. Latin American Literature And Film; M. Masterpieces In Spanish American Modernism; Q. Don Quijote; R. Theatre Of Spanish Golden Age; T. Latin American Theatre In Translation; W. Women In Latin American Literature. No knowledge of Spanish required. May Be Counted Toward The Spanish Major With Consent Of Instructor.

SPN 120A Major Topics in Hispanic Literature
4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): SPN 110. Reading and analysis of short texts of authors from Spain, Latin America, and the United States.

SPN 120B Major Topics in Hispanic Literature
4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): SPN 110. Reading and analysis of major texts of authors from Spain.

SPN 120C Major Topics in Hispanic Literature
4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): SPN 110. Reading and analysis of major texts of authors from Latin America. Cross-listed with LNST 120.

SPN 122A Introduction to Hispanic Cultural Studies
4 Lecture, 3 hours; extra reading, 2.5 hours; screening, 6 hours. Prerequisite(s): SPN 110. An introduction to cultural studies in Latin America and Spain. Explores the relation between high and popular culture, mass media and subcultures, stories and history, narrative and memory, representation and gender, and technology and the notion of “alterity.”

SPN 122B Transatlantic Cultural Studies
4 Lecture, 3 hours; extra reading, 2.5 hours; screening, 6 hours. Prerequisite(s): SPN 110. Offers a transatlantic cultural studies perspective that explores the shared histories of Spain, the Caribbean, and Latin America. Examines issues such as the legacies of the conquest of America and the slave trade, the nation-building process, theories of mestizaje and transculturation, and transatlantic exile.

SPN 123 (E-Z) Mexican Literary and Cultural Studies
4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): vary segment to segment; see individual segments for prerequisite information; or consent of instructor. Introduces a cultural studies approach to Mexican texts and theorists. Covers issues of nation-building, urbanization, modernization, mestizo imaginaries, representations of violence, gender and nation, indigeneity, race and ethnicity, and borders and migration. Involves reading and discussions of cultural criticism, film, visual culture, and literary texts.
SPN 123E Mexican Modernities 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): SPN 110; or consent of instructor. Introduction to the construction of Mexico as a modern nation in popular, mass, and literary cultures from the 19th to mid-20th century. Focuses on the phenomenon of cultural nationalism through the critical discussion of multiple modernities in competition. Analyzes literature, film, and visual culture.

SPN 123F Global Mexico 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): SPN 123E; or consent of instructor. Continues the study of Mexican cultural development. Focuses on Mexican cultural politics and dynamics from post-1960s up to current times. Analyzes literature, film, and visual culture. Topics may include state violence, neoliberal culture, globalization, indigenous cultural production, migration, border narratives, women's literature, Nuevo Cine Mexicano, and Mepolitization.

SPN 123G Nation of Women 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): SPN 110; or consent of instructor. Introduces the intervention of women as cultural producers throughout Mexican history (17th to the 21st century). Focuses on convergences and divergences between high and low/popular and mass culture through a gender studies approach. Analyzes literature, film, visual culture, and music.

SPN 125 (E-Z) Topics in Latin American Film and Media 5 Lecture, 3 hours; extra reading, 3 hours; screening, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Intensive formal, historical, and theoretical analysis of a theme or issue in Latin American film and media. E. Indigenous Video & Latin America. Cross-listed with LNST 125 (E-Z), and MCS 125 (E-Z).

SPN 130 Digital Dialectology 4 Lecture, 4 hours. Prerequisite(s): SPN 101A, SPN 101B or SPN 109A, SPN 109B; or consent of instructor. Contemporary approach to the study of dialects. Examines the uses and projections of a natural language within a digital realm for both digital or analogical materials. Also studies the different interactions between two or more languages or dialects in the digital production of an individual and how those affect communities.

SPN 140 (E-Z) Renaissance and Baroque Literatures 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): SPN 110. A concentrated study of a genre, movement, author, or outstanding work of Spanish literature of the sixteenth or seventeenth century. E. Renaissance And Baroque Literature; H. La Celestina; I. Golden Age Of Poetry; P. La Novela Picaresca; T. Spanish Theatre Of The Golden Age.

SPN 141 Cervantes 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): SPN 110. An overview of Cervantes’ texts within their time and place; discussion of his importance in the development of the novel; and close reading of Don Quixote.

SPN 142 Continuities of the Spanish Golden Age in Modern Latin America 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): SPN 110. Introduces the relationship of key golden age and Spanish colonial texts to modern Latin American narrative and essay. Explores questions of literary genealogy as well as issues of cultural identity and the reclamation of history.

SPN 145 Performative Expression in Contemporary Latin American Culture 4 Lecture, 3 hours; screening, 5 hours; individual study, 2.5 hours. Prerequisite(s): SPN 110. Addresses divisions and continuities between word and action and art and politics in Latin American short stories, films, and Web projects. Explores performative language that questions separations between saying and doing. Considers performance art as the disruption—or reiteration—of frameworks dividing artistic production from reality. Conducted in Spanish.

SPN 155 The Generation of 1898 4 Lecture, 3 hours; individual study 3 hours. Prerequisite(s): SPN 110. A study of the major writers constituting the generation emerging from the national conflict produced in Spain as a consequence of the defeat in the Spanish American War. Readings and discussion of essays, fiction, and poetry of writers such as Unamuno, Baroja, Valle-Inclán, Antonio Machado, Azorín, and Benavente.

SPN 160 (E-Z) Studies in Twentieth-Century Spanish Literature 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): SPN 110. A concentrated study of a genre, period, author, or outstanding work of twentieth-century Spanish literature. E. Spanish Poetry; N. Contemporary Novel In Spain; T. Contemporary Theatre In Spain.

SPN 165 Spanish and Latin American Cultural Studies: Violence and Representation 4 Lecture, 3 hours; screening, 1 hour; extra reading 2 hours. Prerequisite(s): SPN 110. Introduces students to a cultural studies approach to Latin American and Spanish texts and theorists. Covers the Southern Cone dictatorships, post-Franco Spain, and emerging urban imaginaries. Involves readings and discussions of cultural criticism, films, urban chronicles, and literary texts.

SPN 171 Reel to Real: Latin American Film and Social Change 4 Seminar, 3 hours; screening, 3 hours. Prerequisite(s): SPN 110. Introduces Latin American film as it articulates with contemporary history and current events. Cross-listed with MCS 171.

SPN 172 The Testimonio and Cultural History 4 Lecture, 3 hours; extra reading. 3 Prerequisite(s): SPN 110. Explores the relationship between the testimonial genre and the emergence of Latin American cultural studies, subaltern studies, and postcolonial studies. Involves readings and discussions of a representative sample of testimonial literature and criticism.

SPN 179 Gender, Media, and Latin America 4 Lecture, 3 hours; screening 3 hours; research, 3 hours. Prerequisite(s): MCS 020 or upper-division standing or consent of instructor. Explores the way Latin Americans have thought of and represented gender across a variety of media including essays, film, novel, short story, and performance. Compares the possibilities and limitations of these media for representing gender in the Latin American context. Cross-listed with MCS 179, LNST 109, and GSST 179.

SPN 180A Survey of Spanish Literature, Middle Ages-1699 4 Lecture, 3 hours; individual study 3 hours. Prerequisite(s): SPN 110. Survey of literary movements and trends and major writers of medieval and Golden Age Spanish literature. Covers writers such as Cervantes, Lope de Vega, Tirso de Molina, Quevedo, and Góngora.

SPN 180B Survey of Spanish Literature, 1700-Present 4 Lecture, 3 hours; extra reading 3 hours. Prerequisite(s): SPN 110. Survey of literary movements and trends and major writers of eighteenth-, nineteenth-, and twentieth-century Spanish literature. Readings in fiction, poetry, drama, and essay. Covers writers such as Moratin, Beccquer, Galdos, Larra, Azorín, and García Lorca.

SPN 181A Survey of Spanish American Literature, Discovery to Modernismo 4 Lecture, 3 hours; extra reading 3. Prerequisite(s): SPN 110. Survey of literary movements and trends and major Spanish American writers from the colonial period to Modernismo. Readings are in fiction, poetry, drama, and essay. Covers writers such as Sor Juana Inés de la Cruz, Echeverría, Sarmiento, and Martí.

SPN 181B Survey of Spanish American Literature, Modernismo to the Present 4 Lecture, 3 hours; extra reading 3 hours. Prerequisite(s): SPN 110. Survey of literary movements and trends and major Spanish American writers from Modernismo to the present. Readings are in fiction, poetry, drama, and essay. Covers writers such as Dario, Azuela, Vallejo, Huidobro, García Marquez, Fuentes, Paz, Buenaventura, and Elena Poniatowska.

SPN 185 Imagining the Nation: Film and Media in Latin America 4 Lecture, 3 hours; screening 3 hours. Prerequisite(s): MCS 020 or upper-division standing or consent of instructor. Study of the role of media and film in creating a national imaginary in Latin America. Focus is on one region or nation—such as the Andes, the Caribbean, Mexico, Argentina, or Chile—relating local history to the global context. Course is repeatable as topics change to a maximum of 8 units. Cross-listed with MCS 185, and LNST 105.
SPN 187 Latin American Science Fiction 4
Lecture, 3 hours; discussion 1 hour. Prerequisites(s): SPN 110. Focuses on intersections between literature and scientific discourse. Considers how popular notions of science inform the production and reading of the literary text. Topics may include the function of power in scientific discourse, the politics of alternative universes, and science and gender. Course is repeatable as content changes to a maximum of 8 units.

SPN 188 Interdisciplinary Studies: the Hispanic World 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): SPN 110. Includes reading, research, and discussion on particular problems related to Spain and Latin America that lend themselves to interdisciplinary analysis. Course is repeatable as topics change to a maximum of 8 units.

SPN 190 Special Studies 1 to 5
Individual Study, 3 to 15 hours. Prerequisite(s): SPN 110; consent of Department Chair. Individual study, directed by a faculty member, to meet special curricular needs. Course is repeatable.

SPN 192 Tutorial Activities 2
Activity, 6 hours. Prerequisite(s): SPN 110; senior standing; consent of Department Chair. Under faculty supervision, students conduct discussion sections of elementary Spanish courses. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 6 units.

SPN 193 Senior Seminar in the Literatures and Cultures of the Hispanic World 4
Seminar, 3 hours; research, 1 hour; extra reading, 2 hours. Prerequisite(s): restricted to class level standing of senior; or consent of instructor. Introduction to research methods and documentation necessary for completion of a long final project. Specific topics vary depending on the instructor. Intended for Spanish majors. Course is repeatable as content or topic changes to a maximum of 8 units.

SPN 197 Research For Undergraduates 1 to 4
Research, 3 to 12 hours. Prerequisite(s): SPN 101A; SPN 101B or SPN 109A; SPN 109B; restricted to class level standing of junior, or senior; and consent of instructor. Directed original research. Course is repeatable to a maximum of 8 units.

SPN 199H Senior Honors Research 1 to 5
Course is repeatable.

Graduate Courses

SPN 203 Problems in Spanish Linguistics 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. An introduction to the historical and theoretical evolution of Spanish linguistics as a scholarly discipline. Topics include perennial problems, schools, and history of linguistics. Course is repeatable.

SPN 207 History of the Spanish Language 4
Lecture, 3 hours, individual study, 3 hours. Prerequisite(s): graduate standing; SPN 105, SPN 106, SPN 107, or equivalents. The development of the Spanish language from its origins to modern times.

SPN 208 Linguistic Approaches to Literature 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing. Presentation and discussion of semantics, speech acts, and speech genres, and discourse analyses in the framework of contemporary linguistic studies. Topics include the role of speech act theory, fiction and nonfiction discourse, pragmatics, syntax, frames of reference, and narrative tense. Other linguistic levels (e.g., phonology, morphology) are also discussed.

SPN 220 Criticism and Critical Documentation 4
Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing. Covers strategies of reading and analysis. Topics may include critical approaches such as formalism, new criticism, structuralism, deconstruction, and new historicism; psychoanalysis; gender studies; performance studies; and cultural studies. Also may include practice in Modern Language Association (MLA) documentation. Course is repeatable.

SPN 251 Seminar in the Literature of the Middle Ages and Early Renaissance 4
Seminar, 3 hours; consultation, 1 hour. Prerequisite(s): graduate standing. Intensive study of selected topics in Spanish literature through the fifteenth century. Topics may vary. May be repeated for credit.

SPN 257 Seminar in Hispanic Civilization 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing. Intensive study of special topics in Hispanic civilization. Topics vary. Course is repeatable to a maximum of 12 units.

SPN 258 (E-Z) Genres of Hispanic Literature 4
Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing. Close reading, analysis, and discussion of the major Hispanic texts, plays, and poems. E. Hispanic Literature And The Art Of Poetry; S. The Satiric Tradition In Hispanic Letters.

SPN 261 (E-Z) Studies in Golden Age Literature 4
Seminar, 3 hours; consultation, 1 hour. Prerequisite(s): graduate standing. Intensive study of topics in Spanish literature of the sixteenth and seventeenth centuries. G. The Spanish Comedia; I. Spain And The Western Tradition.

SPN 262 Seminar in Don Quijote 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing. Critical and theoretical perspectives on Cervantes' masterpiece; assumes prior close reading of the text. Emphasis on narratology and genre, pointing toward a deconstructive/reconstructive reading.

SPN 264 Seminar in Spanish Literature of the Nineteenth-Century 4
Seminar, 3 hours; consultation, 1 hour. Prerequisite(s): graduate standing. Study of a genre, movement, or outstanding author of this period. Topics may vary. May be repeated for credit.

SPN 269 (E-Z) Studies in Twentieth-Century Spanish Literature 4
Seminar, 3 hours; consultation, 1 hour. Prerequisite(s): graduate standing. Study of authors, movements, or genres from the Generation of '98 to the present. E. Spanish Literature Of The Generation Of '98; F. Spanish Poetry: The Avant-garde And The Generation Of '98; P. Postwar Spanish Novel (1940 To Present); T. Theatre Of The Postwar And Democratic Epoch (1940-2000). Course is repeatable to a maximum of units.

SPN 270 (E-Z) Latin American American Literature 4
Seminar, 3 hours; consultation, 1 hour. Prerequisite(s): graduate standing. Study of the main authors and schools in Latin American literature. F. Latin American Film; K. The Mexican Novel; O. The Modern Novel In Colombia; Q. The Postmodern Novel In Latin America (1968-present); T. Latin American Theatre: Sixteenth Through Twentieth Centuries; X. Twentieth-century Spanish American Poetry; Y. The Latin American Avant-garde. Course is repeatable to a maximum of units.

SPN 271 Jorge Luis Borges: the Antinomies of Cosmopolitanism and National Populism 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Studies the poetic and narrative oeuvre of Jorge Luis Borges in relation to theoretical discussions around concepts such as, but not limited to, ideology, materialism, hegemony, populism, and totality. Offers a critical appraisal of Borges' fictions and the theoretical articulation of cultural critique in Latin America. Course is repeatable to a maximum of 8 units.

SPN 272 Seminar in the Literature of A Specific Latin American Country 4
Seminar, 3 hours; consultation, 1 hour. Prerequisite(s): graduate standing. The in-depth study of the most important literary achievements of a single country such as Mexico, Argentina, Chile, or Peru, varying each time the course is offered. May be repeated for credit.

SPN 273A Literature and Culture of Colonial Latin America: the Colonial Period and its Interpreters 4
Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing. A panoramic introduction to colonial literature from pre-Columbian times to the eighteenth century. Explores the major texts in their historical and literary contexts. Approaches specific passages from several theoretical perspectives. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

SPN 273B Literature and Culture of Colonial Latin America: Spain and the New World 4
Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing. Examines the interrelationship between key Golden Age and Spanish colonial texts and modern Latin American narrative and essay. Explores issues of literary genealogy, cultural identity, and the reclamation of history. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.
SPN 273C Literature and Culture of Colonial Latin America: Foundational Narratives of Latin America 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing. Examines how narrative, history, and the formation of collective consciousness intertwine in Latin America. Considers various periods and their respective mythologies, especially creation myths, with an eye towards teasing out the foundational archetypes and master narratives. Also addresses the purposes of such myths and archetypes. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

SPN 274 Aesthetics as Critique: From the Critique of Aesthetics to A Decolonial Perspective 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduction to modern aesthetics in dialogue with decolonial perspectives on aesthetics and art. Emphasis will be given to how aesthetics is always an already political realm where a re-distribution of sense is in dispute. Moves from aesthetics understood as critique to a decolonial critique of aesthetics. Course is repeatable to a maximum of 8 units.

SPN 275 Seminar in Literary Criticism 4 Seminar, 3 hours. Prerequisite(s): graduate standing.

SPN 276 Latin American Corporealities 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Approaches the histories of bodies in Latin America focusing on the general region or a specific country. Uses literature, film, and cultural production to understand history and society as embodied realities. Presents applied philosophy and cultural theory, particularly from Latin America. Topics include women’s histories, racialization, gender and sexual diversity. Course is repeatable to a maximum of 8 units.

SPN 277 Poetry and Translation 4 Workshop, 3 hours; extra reading, 1.5 hours; research, 1.5 hours. Prerequisite(s): graduate standing; reading proficiency in Spanish. Designed to advise and assist candidates who are preparing for examinations. Open to MA and Ph.D. candidates. Does not count toward the unit requirement for the M.A. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

SPN 290 Directed Studies 1 to 6 Prerequisite(s): graduate standing. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

SPN 291 Individual Studies in Coordinated Areas 1 to 6 variable hours. Prerequisite(s): graduate standing. A program of studies designed to advise and assist candidates who are preparing for examinations. Open to MA and Ph.D. candidates. Does not count toward the unit requirement for the M.A. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

SPN 292 Concurrent Analytical Studies 2 Research, 6 hours. Prerequisite(s): consent of instructor; concurrent enrollment in a SPN 100 course series. Completion of a graduate paper based on research related to the SPN 100 course series. Course is repeatable.

SPN 299 Research For Thesis Or Dissertation 1 to 12 Prerequisite(s): graduate standing. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

SPN 301 Teaching Spanish at the College Level 2 Seminar, 2 hours. Prerequisite(s): graduate standing. Theories of language and language acquisition which underlie modern methods of Spanish language teaching at the college level. Practical experience in grading, test construction, lesson planning, teaching techniques, effective aspects of teaching, and creativity in teaching. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

SPN 302 Teaching Practicum 1 to 4 Practicum, 3 to 12 hours. Prerequisite(s): CPLT 301 or equivalent; graduate standing; employment as a teaching assistant or associate in supervised teaching in lower-division courses. Required of all teaching assistants in Spanish. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Portuguese

Lower-Division Courses

PORT 090 Special Studies 1 to 3 Prerequisite(s): To be taken with the consent of the Chair of the Department as a means of meeting special curricular problems.

Upper-Division Courses

PORT 101A Intensive Brazilian Portuguese For Speakers of Spanish 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): PORT 101A or PORT 101B or equivalent. An introduction to Brazilian Portuguese for students knowing Spanish. Emphasizes comparing and contrasting grammatical constructions. Provides examples from Brazilian literature.

PORT 101B Intensive Brazilian Portuguese For Speakers of Spanish 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): PORT 101A or equivalent. Continuation of PORT 101A. Covers advanced language through conversation, composition, and readings.

PORT 101C Intensive Brazilian Portuguese For Speakers of Spanish 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): PORT 101B or equivalent. Completes the study of structures of oral and written Portuguese, builds vocabulary, and hones the skills necessary to read Brazilian literature, discuss its content and importance, and write short essays explaining its nature.

PORT 162 (E-Z) Survey in Brazilian Fiction 4 Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): PORT 101B. Reading and analysis of selected works of major Brazilian prose writers. Topics may vary each time course is offered. E. Jorge Amado And Machado De Assis; F. Graciliano Ramos, Rego, Queiroz, Azevedo, Amado, G. Verissimo, Amado. Course To Be Taught In The Original Language.

PORT 190 Special Studies 1 to 5 variable hours. Prerequisite(s): consent of chair of the department.

Graduate Courses

PORT 201 Brazilian Literature 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing. A survey of Brazilian literature from the colonial period to present, including chronicles, poetry, the short story, and the novel. Selected works from the several historical literary periods are read and analyzed. All readings and lectures are done in Portuguese; class discussion and examinations may be done in Portuguese, Spanish, or English.

PORT 202 The Brazilian Novel 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing. Reading and discussion of selected Brazilian novels from the nineteenth and twentieth centuries, with emphasis on the most important authors (e.g., Joaquin Manuel de Macedo, Alusio Azevedo, Machado de Assis). Reading and lectures are in Portuguese; class discussion is in Portuguese, Spanish, or English.

 Majors
History plays a central role in general education for all undergraduate students. History stresses an understanding of changes that take place in society over time. It also provides a meaning to the past that has many implications for the future. Through the study of history, we can greatly broaden our learning by understanding the experience of others, removed in time and distant in space from our immediate world. The study of history is as useful as it is fascinating. History majors develop an ability to communicate well, both orally and in writing, and the capacity to think clearly and analytically. Whatever one's goals, history is an important component of any degree program.

History/Administrative Studies Major
The History/Administrative Studies major is designed to combine the discipline of History, with its emphasis on changes in society over time, with the study of administrative behavior, the development of public policy, and the tools of decision making. The addition of an Administrative Studies component provides History majors with analytical administrative skills as well as familiarity with the theories and policies of public administration. The concepts of organizational behavior and decision making, when combined with the perspectives provided through the History major, ought to be of particular value to those planning to enter careers in business, federal, state, or local levels of public or private administration; government work or to those planning to attend a professional school of administration or to those utilizing the major in a variety of positions in the public or private sector. (See also the Public History Program, which outlines public sector careers in History.)

History/Law and Society Major
The History/Law and Society major is designed to offer students the opportunity to combine the study of history, with its emphasis on changes over time in society, politics, the economy, and culture, with the study of legal and law-like relationships and institutions. The coherent series of courses included in this major ought to be of particular value to those intending to study law or to enter other graduate fields as well as to those planning professional careers in government, public administration, business, or other areas where the relationship between history and the law is of significance.

Career Opportunities
Many students planning graduate work find history an excellent preparation for professional schools such as law and business administration. For those planning a legal career, a strong background in Western institutions and values can be obtained in a variety of courses in the department. And, of course, a major in history prepares the student for graduate study in this field as well as a broad range of general careers in business, government work and foreign affairs that ask for written and verbal skills developed in the major.

University Requirements
See Undergraduate Studies section.

College Requirements
See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

Major Requirements
The History Department offers the B.A. degree in History, History/Administrative Studies, and History/Law and Society. Students seeking deeper engagement in research may choose the ‘With Distinction’ option described below.

To provide intellectual focus as each student proceeds through the major, the department offers a number of content pathways, geographical and thematic. Each History major is urged to consult regularly with faculty and staff academic advisors for assistance in selecting courses that will conform to one of the pathways.

No later than 2 quarters after earning upper division class standing, each major must receive the Undergraduate Advisor's approval for a Student Pathway Plan through the major, developed in consultation with members of the Undergraduate Advising Committee and with faculty mentors. Individual Student Pathway Plans should identify a primary pathway that the student will focus on, and should also address the diversity of human historical experiences by including courses in at least two historical fields, regions, or eras. While normally based on the pathways offered by the department, individual Student Pathway Plans may be customized to take account of student interests, course availability, and faculty specializations.

Change of Major
Students switching to the History Major must have completed two History courses with a grade of “C” or better. Students switching to the History/Administrative Studies, or the History/Law and Society Major must have completed three History courses with a grade of “C” or better. Advanced Placement units earned can be applied towards one course when determining major change eligibility.

History Major
The B.A. degree in History requires satisfactory completion of 52 units as follows:

1. Lower-division requirements (20 units):
   a) one world history course (4 units)
   b) HIST 99W (with at least a grade of “C”) (4 units)
   c) Three lower division elective courses in History (12 units).

2. Upper-division requirements (24 units):
   a) Six upper-division elective courses in History (24 units).
   b) Students are encouraged to include one HIST 197 Research for Undergraduate seminar (4 units) in their courses for the upper-division requirement, in addition to the seminar requirement below.

3. Seminar Requirement (8 units):
   a) Eight (8) units from the following seminar courses: HIST 001 (Historian as Detective), HIST 197 (Research for Undergraduates), HIST 195A/B (Senior Thesis), and HIST 199/199H (taken in connection with a HIST 197 seminar).
   b) By choosing HIST 197 seminars, students should select sections whose theme pertains to upper-division courses they have already taken.

Students who wish to be recognized as completing the B.A. degree with distinction normally complete HIST 195A and HIST 195B, the two-quarter Senior Thesis. Majors who complete HIST 197 followed by a connected HIST 199 or 199H, or who complete HNPG 195 and whose senior thesis is accepted by the University Honors Program are also eligible. The B.A. degree with distinction also requires a minimum 3.5 GPA in the major at the time of graduation.

Lower-division courses taken elsewhere may be counted toward the lower-division requirement; up to four advanced placement units earned in high school may count toward its fulfillment as well. Students may petition to apply up to two relevant upper-division courses (8 units) from other UC departments towards the upper-division elective requirement. Please consult with the academic advisors for further details.
History/Administrative Studies Major

The major requirements for the B.A. degree in History/Administrative Studies are as follows:

History requirements (52 units):

All requirements for the B.A. in History

Administrative Studies requirements (37 units)

1. Lower-division courses (17 units)
   a) BUS 010, BUS 020
   b) STAT 008 or equivalent (may be used to satisfy breadth requirements)
   c) CS 008 (may be used to satisfy breadth requirements)

2. Upper-division requirements (20 units)
   a) Two courses (8 units) from the list below:
      1) ECON 102 or ECON 103 or ECON 104A or ECON 130 or ECON 162/BUS 162
      2) PSYC 140 or PSYC 142
      3) SOC 150 or SOC 151
      4) POSC 181 or POSC 182 or POSC 183 or POSC 186
      5) ANTH 127 or ANTH 127S or ANTH 131
   b) A three-course track (12 units) in Business Administration courses from one of the following:
      1) Organizations (General): BUS 100 or BUS 100W, BUS 107, BUS 158/ANTH 105, BUS 176/SOC 176, SOC 150, SOC 151
      2) Human Resources Management/Labor Relations: BUS 100 or BUS 100W, BUS 107, BUS 121, BUS 144, BUS 145, BUS 153/ECON 153, BUS 155, BUS 156, BUS 157, PSYC 142
      3) Business and Society: BUS 100 or BUS 100W, BUS 102, BUS 107, PHIL 116, POSC 182, POSC 186
      4) Marketing: BUS 103, and two from BUS 111, BUS 112, BUS 113, BUS 114, BUS 115, BUS 116, BUS 117, BUS 118, BUS 119, BUS 124, BUS 126, BUS 151, BUS 152, BUS 159, BUS 164
      5) Managerial Accounting/Taxation: BUS 108, and two from BUS 166, BUS 168A, BUS 168B
      7) Finance: BUS 106/ECON 134 and two from BUS 131, BUS 132, BUS 134, BUS 135, BUS 136, BUS 137, BUS 138, BUS 139 BUS 140, BUS 141, BUS 147
      8) Management Information Systems: BUS 101, BUS 110, BUS 125, BUS 128, BUS 171, BUS 172, BUS 173, BUS 174, BUS 175, BUS 179
   c) Two courses chosen from HISA 120A, HISA 120B, BUS 175, BUS 179
      d) Two courses chosen from HISA 120A, HISA 120B, BUS 175, BUS 179
      e) Two courses chosen from HISA 120A, HISA 120B, BUS 175, BUS 179
      f) LWSO 193, Senior Seminar

History/Law and Society Major

The Law and Society major is open to undergraduate students with junior standing who have completed LWSO 100 with a grade of “C” or higher. The major requirements for the B.A. degree in History/Law and Society are as follows:

1. History requirements (52 units):
   All requirements for the B.A. in History

2. Law and Society requirements (36 units)
   a) PHIL 007 or PHIL 007H
   b) LWSO 100 (with a grade of “C” or better)
   c) One course chosen from POSC 114, PSYC 012, SOC 004 (or equivalent course in research methods)
   d) Three courses chosen from ANTH 127, ECON 119, HISE 153, PHIL 165, POSC 167, PSYC 175, SOC 159
   e) Two courses chosen from HISA 120A, HISA 120B, BUS 123, LWSO 175 (E-Z), PHIL 164, POSC 111, POSC 166, POSC 168, POSC 186, SOC 147, SOC 149, SOC 180
   f) LWSO 193, Senior Seminar

Note on Majors and Minors

Students undertaking a minor in History are urged to consult with the academic advisors for quarterly advising and meet with the undergraduate advisor at least once a year. Appointments can be made through the academic advisors.

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Recommended Prelaw Courses

The History major has long been considered as an ideal major for students planning to study law since it meets the three goals that law schools recommend for undergraduate applicants:

1. That they achieve an understanding of the development of social, political, and economic institutions
2. That they develop an ability to communicate well, both orally and in writing
3. That they possess the capacity to think clearly and analytically.

The History Department especially recommends the following upper-division courses to prelaw students:

- HISE 150 (Ancient/Medieval England)
- HISE 153 (History of the Common Law)
- HISA 120A, HISA 120B (The Supreme Court and the Constitution)

Education Abroad

Education Abroad is an excellent opportunity to learn more about another country and its culture while taking courses to earn units toward graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit Education Abroad at ea.ucr.edu or call (951) 827-4113.

See Education Abroad in the Educational Opportunities section in the beginning of this catalog.

Graduate Program

The Department of History offers the M.A. and the Ph.D. in History. Students may choose a concentration in Public History in conjunction with the M.A. in History or as a field for the Ph.D. in History.

Admission

The department accepts admissions applications from students intending to earn each of these degrees. Applicants must have either the B.A. in History or the baccalaureate in another field and be able to demonstrate a satisfactory knowledge of history. Applications for admission to the graduate programs in History are normally accepted for the fall quarter only. Scores for the GRE are required of all applicants, and applicants must submit a writing sample. Students entering the Ph.D. program without an M.A. may also earn the M.A. in History, as described below. Students admitted to the M.A. program may later request admission to the Ph.D. program.
Entering students choose a faculty advisor, who works closely with the graduate advisor in approving the student's course of study.

Detailed rules for each program are contained in the departmental protocols.

**Master's Degree**

The Department of History offers two courses of study: History and Public History. Students in the History program have the option of completing the degree via Thesis (Plan I) or Comprehensive Exam (Plan II). Students in Public History must complete the thesis.

Students seeking the M.A. degree choose a field of specialization from the list below, and follow one of two plans:

**Areas of Specialization (and related courses)**

1. United States (HIST 201A, 201B, 201C, 205A, 272AB, 273AB, 274AB, 275AB, 276AB)
3. Ancient Mediterranean (HIST211, 221, 222, 223, 225AB, 251AB, Tri-Campus Classics or seminars in related departments with approval from Graduate Advisor)
4. European, with concentration in either Early Modern Europe, Modern Europe, Britain, or Russia (HIST 200, 204, 205A, 205B, 209A, 209B, 224, 240E, 240F. 251AB, 253AB, 255AB, 256AB, 258AB)
5. Latin American (206A, 206B, 285AB, 251AB)
6. Southeast Asia (HIST 242 or courses in related departments with approval from Graduate Advisor. 243AB, 251AB)

**Plan I (Thesis)**

Candidates must complete 40 units of required course work beyond the baccalaureate, 36 of which must be at the graduate level. The student's curriculum must include the following:

1. At least one reading seminar in the student's area of specialization (Reading seminars include HIST201A, 201B, 201C, 203A, 203B, 203C, 237, 201, 204, 205A, 205B, 209A, 209B 206B, 211, 221, 222, 223, 224, 240E, 240F, 242, 250, 254 or courses in related departments with approval from Graduate Advisor)
2. At least one two-quarter research seminar, preferably in the student's area of specialization (Two-quarter research seminars include 265AB, 272AB, 273AB, 274AB, 275AB, 251AB, 253AB, 255AB, 256AB, 258AB, 285AB, 225AB, 243AB or courses in related departments with approval from Graduate Advisor)
3. At least 16 units in courses outside the student's area of specialization.

Candidates prepare a portfolio selected by the student and advisor, and must pass a comprehensive oral examination based on the submitted material. The examination committee consists of two faculty members.

**Language Requirement**

Candidates must demonstrate an ability to read one foreign language.

**Public History Program**

This program provides historical training in academic research and historiography as well as preparation for careers outside of the academy, in archives, historic preservation, museums, oral history and other realms of public engagement with the humanities, including the digital.

Students prepare in two areas:

1. A historical field outside of Public History
2. Public History

**Course Work**

Candidates must complete a minimum of 40 units of courses as follows:

1. One two-quarter graduate history research seminar. (Two-quarter research seminars include 265AB, 272AB, 273AB, 274AB, 275AB, 251AB, 253AB, 255AB, 256AB, 258AB, 285AB, 225AB, 243AB or courses in related departments with approval from Graduate Advisor)
2. Two graduate reading seminars in the historical field (selected from Areas of Specialization listed above. Reading seminars include HIST201A, 201B, 201C, 203A, 203B, 203C, 237, 200, 204, 205A, 205B, 209A, 209B, 206B, 211, 221, 222, 223, 224, 240E, 240F, 242, 250, 254 or courses in related departments with approval from Graduate Advisor)
3. At least one of the following: HIST 260, HIST 262, HIST 263, HIST238 or additional courses with approval of the Public History advisor.

**Plan II (Comprehensive Examination)**

Candidates must complete 40 units of required course work beyond the baccalaureate. 32 of which must be at the graduate level. The curriculum must include the following:

1. At least one reading seminar in the student's area of specialization (Reading seminars include HIST201A, 201B, 201C, 203A, 203B, 203C, 237, 200, 204, 205A, 205B, 209A, 209B, 206B, 211, 221, 222, 223, 224, 240E, 240F, 242, 250, 254 or courses in related departments with approval from Graduate Advisor)
2. At least one two-quarter research seminar, preferably in the student's area of specialization (Two-quarter research seminars include 265AB, 272AB, 273AB, 274AB, 275AB, 251AB, 253AB, 255AB, 256AB, 258AB, 285AB, 225AB, 243AB or courses in related departments with approval from the Graduate Advisor)
3. At least 16 units in courses outside the student's area of specialization.

Candidates prepare a portfolio selected by the student and advisor, and must pass a comprehensive oral examination based on the submitted material. The examination committee consists of two faculty members.

**Language Requirement**

Candidates must demonstrate an ability to read one foreign language.

**Doctoral Degree**

The Department of History offers the Ph.D. in History. The Ph.D. program in History prepares graduates for careers as university teachers, public historians, and professional researchers and analysts.

**Admission**

Students may prepare for entry into the Ph.D. program by earning a B.A. or an M.A. degree in History or by earning a degree in a closely related field that involves significant study of history. Students holding a degree in another related department (or in related departments with approval from Graduate Advisor) or another degree (with approval of the Public History advisor) may be able to waive certain course requirements listed below. The student's curriculum during the entire graduate career must include the following:

1. At least two two-quarter graduate research seminars. One two-quarter research seminar may be waived by petition for students completing a MA in Public History at UCR.
2. At least six reading seminars or equivalent courses, chosen from the student's fields.
3. At least three courses approved by the graduate advisor for the teaching field requirement, of which two must be at the graduate level.

All Ph.D. students must also complete HIST 301. This course does not count towards unit requirements.

Courses should be chosen in consultation with the student’s faculty advisor and the graduate advisor; suitable courses are described in the departmental protocols. HIST 290 may be used towards the specific requirements above only with the permission of the graduate advisor.

**Ph.D. Fields**

Students prepare three fields: a research field, a complementary field, and a teaching field. The research fields that the department offers are listed below; complementary and teaching fields may be chosen from among the research fields or from the list of additional fields. In special cases, students may petition to replace the complementary field with a custom field designed by the student in consultation with two faculty members who agree to administer the written examination in the field. Students may not offer three fields that all deal with a single country or region.

**Research Fields:**

- Early America
- Nineteenth-Century United States
- Twentieth-Century United States
- American West
- Native American History
- Ancient Mediterranean
- Early Modern Europe
- Modern Europe
- Early Modern England
- Modern England
- Modern Russia
- Colonial Latin America
- Modern Latin America
- Southeast Asia
- Public History

**Additional Fields**

- Early Modern World History
- Modern World History
- Gender History

**Sixth-Quarter Review**

All Ph.D. students undergo a comprehensive review no later than the sixth quarter of enrollment in the program, based on a portfolio selected by the student and advisor. The graduate studies committee reviews the student’s record and makes one of the following recommendations: proceed, hold, or terminate. Students receiving a hold may reapply once, within three quarters. Students receiving a terminate may continue enrolling for no more than three quarters to complete M.A. requirements.

Only under extraordinary circumstances may a student continue enrolling for more than 9 quarters (including enrollment while an M.A. student at UCR) without permission to proceed to examinations.

**M.A. in History degree for Ph.D. Students**

Students enrolled in the Ph.D. program may apply for the M.A. degree in History once they have completed the requirements for the degree.

**Requirements for completing the Ph.D. degree**

**Examinations**

Students are examined in their research and complementary fields by a single written examination and at the Ph.D. oral examination. To take the Ph.D. oral qualifying examination, the student must submit a preliminary draft of the dissertation proposal. The teaching field is satisfied by course work.

**Language Requirement**

Students must demonstrate reading proficiency in at least one language other than English. In certain research fields, students may be required to demonstrate a higher level of proficiency or to demonstrate proficiency in additional languages. Consult the departmental protocols for specific requirements.

**Candidacy**

Students advance to candidacy after completing all examinations, the teaching field, and the language requirement. By the end of the following academic quarter, each student must submit to the graduate study committee a dissertation proposal approved by the student’s faculty advisor.

**Dissertation**

Candidates must submit a dissertation that demonstrates scholarly, original, and independent investigation of a subject in the student’s research field chosen with the advice and approval of the dissertation committee.

**Normative Time to Degree**

17 quarters (including M.A. work).

**Lower-Division Courses**

The History Department offers these lower-division courses for the benefit of the entire campus, not specifically for History majors. HIST 010, HIST 015, HIST 017A, HIST 017B, and HIST 020 are appropriate preparation for upper-division work in the department.

**HIST 001 The Historian as Detective 4**

Seminar, 3 hours; extra reading, 2 hours; term paper, 1 hour. Introduces close reading of the primary sources and secondary literature that historians use to reach conclusions about the past. Provides an opportunity to work creative-ly with historical materials and become the historian as detective.

**HIST 004 Introduction to Chicano History 4**

Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. Covers the historical heritage of the Chicano from Spanish and Indian origins to the Chicano movement. Emphasizes the period since 1845. Cross-listed with ETST 004.

**HIST 010 World History: Prehistory to 1500 4**

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduces early human societies from a global perspective. Covers the emergence of urban societies, diverging political and social orders, and global connections from the Neolithic to 1500 CE. Themes include technologies and ecology, governance and conflict, social and cultural identities, religious and ideological movements, and developing patterns of interregional contact. Credit is awarded for one of the following HIST 010, HIST 010H, or HIST 010W.

**HIST 010H Honors World History: Prehistory to 1500 4**

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): admission to University Honors. Honors course corresponding to HIST 010. Introduces early human societies from a global perspective. Covers the emergence of urban societies, diverging political and social orders, and global connections from the Neolithic to 1500 CE. Themes include technologies and ecology, governance and conflict, social and cultural identities, religious and ideological movements, and developing patterns of interregional contact. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for one of the following HIST 010H, HIST 010, or HIST 010W.

**HIST 010W World History: Prehistory to 1500 4**

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENGL 001B with a grade of C or better. Introduces early human societies from a global perspective. Covers the emergence of urban societies, diverging political and social orders, and global connections from the Neolithic to 1500 CE. Themes include technologies and ecology, governance and conflict, social and cultural identities, religious and ideological movements, and developing patterns of interregional contact. Fulfills the third-quarter writing requirement for students who earn a grade of”C” or better for courses that the Academic Senate designates, and that the student’s college permits, as alternatives to English 001C. Credit is awarded for one of the following HIST 010W, HIST 010, or HIST 010H.

**HIST 015 World History: 1500 to 1900 4**

Lecture, 3 hours; discussion, 1 hour. A critical analysis of globalization after 1500CE as it shaped the modern world. Students investigate agrarian societies, industrialization, and environmental challenges; conquest, colonialism, and imperialism; enslavement and migrations; resistance and survival under colonial systems; religious, economic, and political revolutions; the development of science and medicine; and changes in everyday life. Credit is awarded for one of the following HIST 015 or HIST 015H.
HIST 015H Honors World History: 1500 to 1900 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): admission to University Honors. Honors course corresponding to HIST 015. A critical analysis of globalization after 1500CE as it shaped the modern world. Students investigate agrarian societies, industrialization, and environmental challenges; conquest, colonialism, and imperialism; enslavement and migrations; resistance and survival under colonial systems; religious, economic, and political revolutions; the development of science and medicine; and changes in everyday life. Credit is awarded for one of the following HIST 015H or HIST 015.

HIST 017A Introduction to United States History 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to the major themes and issues in the history of the United States from colonialization to the middle of the nineteenth century.

HIST 017B Introduction to United States History 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to the major themes and issues in the history of the United States from the middle of the nineteenth century to the present.

HIST 020 World History: the Long Twentieth-Century 4 Lecture, 3 hours; discussion, 1 hour. A critical analysis of global historical changes in the twentieth century, and how they shape the world we live in today. Students explore popular revolutions, World Wars and the Cold War, social & cultural change, capitalism, imperialism & decolonization; environmental crises; technological innovation and other contemporary global developments. Credit is awarded for one of the following HIST 020, HIST 020H, or HIST 020W.

HIST 020H Honors World History: the Long Twentieth-Century 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): admission to University Honors. Honors course corresponding to HIST 020. A critical analysis of global historical changes in the twentieth century, and how they shape the world we live in today. Students explore popular revolutions, World Wars and the Cold War, social & cultural change, capitalism, imperialism & decolonization; environmental crises; technological innovation and other contemporary global developments. Credit is awarded for one of the following HIST 020H, HIST 020, or HIST 020W.

HIST 020W World History: the Long Twentieth-Century 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENGL 001B with a grade of C or better, ENGL 007, may be taken concurrently; for concurrent enrollment in ENGL 007, review the course titles or topics in the current online Schedule of Classes to find the corresponding ENGL 007 writing workshop. A critical analysis of global historical changes in the twentieth century and how they shape today's world. Explores popular revolutions; World Wars and the Cold War; social and cultural change; capitalism, imperialism, and decolonization; environmental crises; technological innovation; and other contemporary global developments. Fulfills the third-quarter writing requirement for students who earn a grade of “C” or better for courses that the Academic Senate designates, and that the student's college permits, as alternatives to English 001C. Credit is awarded for one of the following HIST 020W, HIST 020, or HIST 020H.

HIST 025 The Ancient Mediterranean 4 Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): none. Surveys the political history of the ancient Mediterranean world from the Bronze Age (3000 B.C.) to the beginning of the Common era. Focuses on the Near East (Sumer, Babylonia, Assyria, Egypt, Israel, Persia), Greece, and Rome. Provides a coherent background for advanced study in ancient Near Eastern, biblical, or classical history.

HIST 027 Rome: the Ancient City 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. Traces the development of the city of ancient Rome. By studying the literary and historical evidence alongside the physical remains of the city--its monuments, art, and historical and archaeological remains--this course seeks to introduce students to the Romans and to their importance for later ages. Cross-listed with AHS 030, and CLA 017.

HIST 030 Themes and Personalities in History 4 Lecture, 3 hours; extra reading 3 hours. Prerequisite(s): none. Enduring themes and great personalities in history selected from Western and non-Western traditions. Concentrates on particular subtopics to be announced in the Schedule of Classes. Course is repeatable as topics change to a maximum of 2x units. Credit is awarded for only one of HIST 041 or HIST 030 with subtitle: HIST: INFORMATION/COMMUNIC TECHNO.

HIST 033 Witchcraft in Colonial America 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduces the history of witchcraft beliefs and witch-hunting in colonial America. Explores witchcraft in its many dimensions: religious, cultural, psychological, political, legal, social, and economic. Students read original documents and study recent scholarly interpretations of early American events and attitudes.

HIST 034 Introduction to Native American Culture and Religion 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Interdisciplinary study of contemporary and historic Native American efforts to resist colonialism, with a strong emphasis on land matters, identity issues, and religious forms. Promotes critical reflection on historic and contemporary culture and politics. Cross-listed with RLST 024.

HIST 035 History of North American Indians, 1491-1799 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Examines North American Indian history from 1491 through Handsome Lake’s Revitalization Movement, highlighting the experiences of selected Native groups during the colonial era. Special attention is given to the importance of Native American perspectives of historical issues and events.

HIST 036 History of North American Indians, 1800-1899 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Examines North American Indian history during the nineteenth century from Jefferson’s administration to McKinley’s administration. Explores government policies, native agency, and the interface of multiple cultures. Emphasizes Native American historical interpretations.

HIST 037 History of North American Indians, 1900–Present 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Examines North American Indian history during the twentieth century and early twenty-first century. Topics include allotment, the Indian New Deal, World War II, termination, self-determination, and tribal sovereignty. Students read original documents, study new interpretations, and learn about contemporary Native people.

HIST 039 Introduction to Asian American History 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduces the history of Asian Americans from the mid-nineteenth century to the present. Explores the migrations and lives of East, South, and Southeast Asian Americans within local, national, and global contexts. Major themes include imperialism, labor, race and racism, citizenship, and resistance.

HIST 040 Literary Response to Disaster and Repression 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): none. An examination of how literature (e.g., memoir, fiction, and poetry) can be utilized in the recovery from disaster or repression. Analyzes examples from Asia, Africa, and Europe to address the issues of looking squarely, coming to terms, commemoration, and apology. Cross-listed with CPLT 040. Credit is awarded for one of the following HIST 040, CPLT 040, or CPLT 040W.

HIST 041 The History of Media, Old and New 4 Lecture, 3 hours; extra reading, 1.5 hours; individual study, 1 hour; written work, 0.5 hours. Prerequisite(s): none. An historical overview of the technologies and institutions which have sustained the production and transmission of knowledge from antiquity to the present. Themes include literacy and its consequences, the book, manuscript production, the printing press, mass media, the computer, and the Internet. Explores literate traditions from across the world. Credit is awarded for only one of HIST 041 or HIST 030 with subtitle: HIST: INFORMATION/COMMUNIC TECHNO.

HIST 042 Medical Racism, Eugenics and the Tuskegee Study of Untreated Syphilis 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. Grapples with the history of racism, eugenics, and medicine in twentieth-century United States through close study of the Tuskegee Study of Untreated Syphilis (1932-1972.) Examines medical racism and healthcare activism before, during, and after the Tuskegee Study.
HIST 110 History of Ancient Astronomy 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the origins and history of ancient astronomy from Mesopotamia to the Greco-Roman world. Topics include the problems of the calendar and planetary motion, and the relation between astronomy and astrology in the ancient world. Focuses on readings from primary texts. Cross-listed with CPAC 134.

HIST 111 Public History and Community Voices 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduction to the study of public history and the use of oral history, narratives, written sources, photographs, material culture, and other documentary evidence important to presenting historical information and interpretation to a large audience. Analysis of archives, museums, government agencies, familial sources, and other historical repositories that hold community voices. Students present public history by producing an exhibit, published work, or community project.

HIST 121 Middle Eastern History, 1200 to 1800 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Explores the history of the Middle East from 1200 to 1800. Includes the Mongol conquests as well as the rise and expansion of the Ottoman empire.

HIST 122 Modern Middle East History (1800–1935) 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces the history of the modern Middle East from 1800 to the aftermath of WWI. Examines rise of colonial empires, imperial rivalries and clashes in the borderlands, and movements of autonomy.

HIST 124 Women in Middle Eastern and Islamic History 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Explores the history of women in the Middle East from the medieval to the modern period. Focuses on the legal status of women, their social and economic position, the rise and development of the feminist movement, and the impact of various Islamic movements.

HIST 125 Islam and Revolution in Iran 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the historical background to the Iranian revolution of 1978–1979. Offers a critical assessment of the existing scholarship. Includes the rise of Shi‘ism as Iran’s state religion; the relationship between religion, state, and society; and the role of Shi‘i Islam versus other ideologies with social movements.

HIST 126 Istanbul in History and Fiction 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores urbanization in Middle Eastern and Ottoman history. Includes the history of Istanbul from the Ottoman conquest to the end of that empire. Addresses questions of urban transformation, imperial cities, Islamization, urban institutions, cosmopolitanism, and modernity.

HIST 127 Israel: the Jewish State 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines Zionism and the state of Israel in the period from the first Zionist Congress in 1896 to the present. Addresses religious, social, economic, and political aspects of the Jewish state. Cross-listed with RLST 126.

HIST 128 Iran Through Literature and Cinema 4 Lecture, 3 hours; extra reading, 1 hour; screening, 1 hour; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines the history of Iran through its rich literary and film production. Examines the transformation of the country and its revolutionary age through the humanities, arts, and contributions to global cinema.

HIST 130A History of Christianity: Origins to the Reformation 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Surveys the history of Christianity from its origins through the Reformation. Includes the development of Christian beliefs, practices, and institutions in historical contexts. Cross-listed with RLST 135A.

HIST 130B History of Christianity: Modern Era 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Surveys the history of Christianity since 1500. Emphasizes the Christianization of Asia, Africa, and the Americas in the long colonial era. Follows developments in Christian belief, practice, and institutions up to the present. Topics include Reformation, mission, colonialism, empire, conversion, syncretism, modernity, Vatican II, and the rise of evangelical Christianity. Cross-listed with RLST 135B.

HIST 137 (E-Z) Themes and Topics in African History 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. A thematic and topical approach to the study of African history from the early Nile Valley civilizations to the twentieth century. Examines the temporal and spatial development of African societies—including their social, political, economic, and ideological systems—during the precolonial, colonial, and postcolonial periods. F. West African History To 1800; I. Nineteenth-And Twentieth-century Africa And European Imperialism; J. Ancient Africa; K. Africa From 1000-1880; M. Twentieth-century Africa. Cross-listed with ETST 117 (E-Z).

HIST 138 African Cities in Modern History 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A history of African cities from 1800 to the present. Examines the range of settlement patterns in Africa’s changing landscape. Also explores connections between urban and social change, gender, culture, architecture, colonialism, and the effects of rural-urban migration.

HIST 139 African: Fiction, Film and Science Fiction 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces the use of fiction, film and science fiction in the study of African history. Examines themes including gender, colonialism, sexuality, nationalism, urbanization and disease cultures.

HIST 140 Africa and the French Atlantic 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of the instructor. Introduces historical debates about French Atlantic expansion from the 17th century through the final French abolition of slavery in 1848 with a special focus on Africa. Explores distinctions between French and other European (especially British) imperial trajectories.

HIST 179 Introduction to Modern Japanese History 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A critical examination of key moments in the history of Japan from the Tokugawa period through the late twentieth century.

HIST 180 Early Traditional China 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor; at least one lower-division history course recommended. The history of China from Neolithic times to the end of the Tang Dynasty (early tenth century, C.E.) with emphasis on social, economic, and political history.

HIST 181 Late Traditional China 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of Chinese history from the tenth century to the early nineteenth century, covering the Song, Yuan, Ming, and part of the Qing dynasties. Emphasis on social, economic, and political history.

HIST 182 Modern China 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. HIST 180 and HIST 181 are recommended. Examines the history of China from the Opium War to the early Communist period (1842–1960). The emphasis is on reaction to the Western impact and modernization.

HIST 184 The Vietnam Wars 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. An introduction to Vietnamese history in the twentieth century. Covers the three Indochina wars (1945–1986) from different Vietnamese perspectives. Topics include experiences during French colonial rule; the anticolonial movements; periods of French and American military involvement up to 1975; the postwar society; and the post- doi moi society. Cross-listed with AST 160, SEAS 184, and VNM 184.
HIST 185 Southeast Asia, Prehistory to 1800
4 Lecture, 3 hours; extra reading, 3.
Prerequisite(s): upper-division standing or consent of instructor. Covers the major Southeast Asian historical periods and cultures. Includes prehistory, classical kingdoms, and early modern trading states. Considers the role of ancient stories, religious systems, technologies, and art forms in forming traditional Southeast Asian identities, as well as the influences on these identities from outside the region. Cross-listed with AST 126, and SEAS 185.

HIST 186 Modern Southeast Asia, 1800 to Present
4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the formation of modern Southeast Asian nations and cultures since 1800. Compares colonial and postcolonial experiences in the region. Studies the formation of nationalist movements and the relationship of nationalist history with traditional and local histories. Considers the role of the individual, modern media, and global trade in the near-present. Cross-listed with AST 129, and SEAS 186.

HIST 187 Vietnamese Literary History
4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing. A historical analysis of Vietnamese literature from its oral tradition to contemporary fiction. Follows the formation of the nation-state and the subsequent struggles with the Chinese, French, Japanese, and Americans. No knowledge of Vietnamese required. Readings are in translation or bilingual editions. Classes are conducted in English. Cross-listed with AST 162, VNM 162, and SEAS 162.

HIST 188 (E-Z) Topics in Chinese History
4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): HIST 180 or HIST 181 or HIST 182; restricted to class level standing of junior, or senior. An in-depth look at important topics in Chinese history. E. Chinese Food Culture; F. Four Great Inventions Of Imperial China; G. Environmental History Of China. Cross-listed with AST 188 (E-Z).

HIST 189 Encountering Vietnam
5 Lecture, 6 hours; tutorial, 6 hours; project, 6 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on literary and historical accounts of Vietnam. Utilizes translated travel writings from different genres and eras. Proficiency in Vietnamese not required. Taught in Vietnam and offered only in summer. Cross-listed with AST 189, SEAS 189, and VNM 189.

HIST 190 Special Studies 1 to 5
Prerequisite(s): To be taken with the consent of the chair of the department to meet special curricular problems. Course is repeatable to a maximum of 16 units.

HIST 191 (E-Z) Seminar in History
4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Requires a substantial research paper or project, the result of carefully guided independent work. E. Medieval History; F. Renaissance And Reformation; G. Seventeenth- And Eighteenth-century Europe; H. Colonial And Nineteenth-century America; I. Nineteenth-century Europe; J. Nineteenth- And Twentieth-century England; K. Twentieth-century Europe; L. Modern Russia; M. European Thought And Culture; N. Mexican Migration To The United States; P. Colonial American History; Q. Nineteenth-century American History; R. The American West; S. Twentieth-century American History; T. American Thought And Culture; U. Colonial And Nineteenth-century Latin America; V. Recent Latin America; W. Chinese History; X. Mass Media; Y. African History; Z. Ancient History.

HIST 195A Senior Thesis
4 Seminar, 3 hours; written work, 3 hours. Prerequisite(s): HIST 197; a major in History or History/Law and Society or History/Administrative Studies; consent of instructor. Original research and senior thesis writing under close faculty supervision. Included formulating an individual research question, evaluating competing narratives in both primary and secondary sources, and developing an original argument based on primary and secondary sources. Graded in Progress (IP) until HIST 195A and HIST 195B are completed, at which time a final grade is assigned. After completing both HIST 195A and HIST 195B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units.

HIST 195B Senior Thesis
4 Seminar, 3 hours; written work, 3 hours. Prerequisite(s): HIST 195A. Completion of a senior thesis under close faculty supervision. After completing both HIST 195A and HIST 195B, may repeat the sequence once for credit. Course is repeatable to a maximum of 8 units.

HIST 197 Research For Undergraduates
4 Seminar, 3 hours; written work, 3 hours. Prerequisite(s): HIST 195A. Advised to major(s) History, History/Administrative Studies, History/Law and Society; or consent of instructor. Introduces advanced historical research on specific topics using primary and secondary source materials. Analyses historical questions related to the selected topics and develops historical arguments to be explored further. Topics vary based upon the research focus of the instructor. Course is repeatable as content or topic changes to a maximum of 16 units.

HIST 198 R’course: Variable Topics
1 Activity hours vary per R’course proposal. Prerequisite(s): permission needed from department; sophomore standing or better. An opportunity for UCR undergraduate students to develop leadership skills, innovate the undergraduate curriculum, and promote democratic, experiential education. Original course topics are variable and unique from other departmental course offerings, designed to highlight the student facilitators’ expertise while working closely with a faculty mentor. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as topics change to a maximum of 8 units.

HIST 199G Public History Practicum
1 to 12 Seminar, 1 to 2 hours; research, 1 to 6 hours; internship, 3 to 24 hours. Prerequisite(s): restricted to class level standing of junior, or senior; and consent of instructor. Provides practical experience and project-based research in public history. Work with public history faculty or an appropriate professional organization to gain skills related to museum exhibitions, interpretive historic sites, archives and libraries, oral and digital history projects, historic preservation, and other forms of public history. Course is repeatable to a maximum of 16 units.

HIST 198I Individual Internship in History
1 to 12 Seminar, 1 to 2 hours; research, 1 to 6 hours; internship, 3 to 24 hours; term paper, 1 to 2 hours. Prerequisite(s): restricted to class level standing of junior, or senior; and consent of instructor. Presents the policies and operations (present and past) of cooperating agencies such as museums, archives, professional associations, clinics, hospitals, churches, and businesses. Includes becoming familiar with the ongoing operations of these organizations as well as researching and writing their histories under faculty supervision. Course is repeatable as content or topic changes to a maximum of 16 units.

HIST 199H Senior Honors Research
1 to 5 Research, 3 to 15 hours. Prerequisite(s): admission to University Honors or consent of instructor. Offers the opportunity for directed research at an honors level. Satisfactory (S) or No Credit (NC) grading is not available.

Graduate Courses
Consent of the instructor is required for enrollment in all graduate courses.

HIST 200 Reading Seminar in European History
4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces advanced study of major themes and areas in British, European, and Russian history. Concentrates on recent scholarship illustrating current methods and questions in European history. Covers all three major geographical areas, although emphasis may vary. Course is repeatable to a maximum of 8 units.

HIST 201A Reading Seminar in American History: Colonial North America
4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores colonial North American history as presented by primary and secondary sources. Course is repeatable to a maximum of 12 units.

</table>
HIST 218 Africa in the Era of the Transatlantic Slave Trade 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the political economies and the social and cultural histories of Atlantic Africa between 1500 and 1800 within the wider framework of the Atlantic world. Emphasis is on methodological and theoretical issues and questions. Readings are based on primary historical sources as well as on recent research in the field.

HIST 220 Reading Seminar in Women's History 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An exploration of the major methodological and historiographical issues in women's history. Focuses primarily but not exclusively on women in the United States.

HIST 221 Reading Seminar in Hellenistic History 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Introduces the Hellenistic age as it took shape in the Eastern and Western Mediterranean. Examines how new currents of thought emerged with preexisting institutions. Topics include political, social, religious, and intellectual developments. Course is repeatable to a maximum of 12 units.

HIST 222 Reading Seminar in Late Antiquity 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to the central historiographical debates in the field of Late Antiquity. Course is repeatable to a maximum of 12 units.

HIST 223 Reading Seminar in Early Medieval History 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces advanced scholarship in selected areas of early medieval historiography. Focuses on independent historiographical research. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

HIST 224 Research Seminar in Later Medieval History 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces advanced scholarship in selected areas of later medieval historiography. Focuses on independent historiographical research. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

HIST 225A Research Seminar in Ancient and Medieval History 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines a historical theme or issue in ancient and medieval history. Includes readings in primary sources and analysis of research methods. First of a two-quarter sequence in which work begins on a major research paper. After completing both HIST 225A and HIST 225B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units.

HIST 225B Research Seminar in Ancient and Medieval History 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor; HIST 225A. Examines a historical theme or issue in ancient and medieval history. Includes readings in primary sources and analysis of research methods. Second of a two-quarter sequence in which a major research paper is completed. After completing both HIST 225A and HIST 225B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units.

HIST 226 (E-Z) Special Topics in Latin American History 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): HIST 206A or HIST 206B; graduate standing. Analysis of selected specific topics in Latin American History. E. Latin American Social And Economic History; F. Race And Ethnicity In Latin America; G. Women In Latin America; I. Politics And The Formation Of Nation States; J. History Of The Latin American Family; K. Immigration, Emigration, And Migration; M. Mass Media In Latin America; N. U.S.-Latin American Relations; O. Nationalism, Liberalism, And Socialism In Latin America: The Southern Cone, 1880–1980; Q. Slavery And Slave Society In Nineteenth-century Latin America.

HIST 229 The American Other: Apparitions and Appropriations 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing. Cultural studies of the uncanny in American history in relation to race, gender, and colonialism.

HIST 230 The American Frontier: Ideas and Interpretations 4 Lecture, 3 hours; consultation and extra reading, 3 hours. Prerequisite(s): HISA 137. The broad themes and historical interpretations regarding the frontier as a factor in the American character and in American institutions.

HIST 237 Reading Seminar in Native American Historical Theory 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An examination of salient theoretical issues raised by Native American history. Critiques theoretical approaches and assumptions currently shaping Native American history and assesses the potential contributions to Native American history of theoretical approaches developed in other fields of concentration.

HIST 238 Reading Seminar in Oral History 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to the field of oral history. Explores the theoretical foundations, ethical issues, and new directions in oral history research.

HIST 238L Oral History Practicum 4 Lecture, 2 hours; research, 6 hours. Prerequisite(s): graduate standing or consent of instructor. A study of oral history methods, theory, and practice. Students conduct interviews, transcribe, and produce a paper which utilizes the oral history interviews. Includes discussion of final interviews, transcripts, analysis, and the paper. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 8 units.

HIST 240 (E-Z) Reading Seminar in Documentary Source Practices 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing. Introduction to the scholarly handling of texts including inscriptions, manuscripts, archival documents, and electronic material. Instruction in methodological, tools, sources, and in the editing and use of texts in history. Analysis of archival structure and organization, textual authorship, provenance, palaeography, language, internal structure, and variants. E. Russian; F. Early Modern Europe. Course is repeatable to a maximum of 12 units.

HIST 241 Reading Seminar in Asian History 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces students to central historical problems, historiographical debates, materials, and theoretical approaches in Southeast Asian history. Readings each week focus on a different theme. Course is repeatable to a maximum of 8 units. Cross-listed with SEAS 204.

HIST 243A Research Seminar in Southeast Asian History 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Discusses Southeast Asian topics from regional, comparative, and local perspectives. May be taken as a one- or two-quarter course (HIST 243A/SEAS 243A, HIST 243B/SEAS 243B). After completing both HIST 243A/SEAS 243A and HIST 243B/SEAS 243B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units. Cross-listed with SEAS 243A.

HIST 243B Research Seminar in Southeast Asian History 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor; HIST 243A/SEAS 243A. Discusses Southeast Asian topics from regional, comparative, and local perspectives. Students produce a substantial research paper that continues their work from HIST 243A/SEAS 243A. May be taken as a one- or two-quarter course (HIST 243A/SEAS 243A, HIST 243B/SEAS 243B). After completing both HIST 243A/SEAS 243A and HIST 243B/SEAS 243B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units. Cross-listed with SEAS 243A.

HIST 250 New Directions in Historical Research 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Frontiers of research in major historical periods. Explores emerging theories and innovative methods and considers their relevance to the future of the discipline. Discusses the methods and kinds of research which are most fruitful in the assigned instructor's particular specialty. Course is repeatable as topics change to a maximum of 12 units.
HIST 251A General Research Seminar in History 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A general research seminar in history including European, continental European, British, Russian, ancient, and Latin American history. Includes a major research paper based on extensive use of primary source material. Graded In Progress (IP) until HIST 251A and HIST 251B are completed, at which time a final grade is assigned. After completing both HIST 251A and HIST 251B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units.

HIST 251B General Research Seminar in History 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): HIST 251A; graduate standing or consent of instructor. A general research seminar in history including European, continental European, British, Russian, ancient, and Latin American history. Includes readings in archival and research methods. Also includes a major research paper based on extensive use of primary source material. After completing both HIST 251A and HIST 251B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units.

HIST 252 Materials Supplement 4 Seminar, 3 hours. Prerequisite(s): any course in 201-206 series. Designed as a supplement to program of readings covered in materials courses; additional works are to be drawn from reading lists for M.A. comprehensive examinations. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

HIST 253A Research Seminar in Renaissance and Reformation History 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Covers primary and secondary literature related to Renaissance and Reformation history. First of a two-quarter sequence in which students begin work on a research paper. After completing both HIST 253A and HIST 253B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units.

HIST 253B Research Seminar in Renaissance and Reformation History 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor; HIST 253A. Second of a two-quarter sequence in which students complete a research paper on Renaissance and Reformation history. After completing both HIST 253A and HIST 253B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units.

HIST 254 Reading Seminar in Historical Theory and Methods 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing; consent of instructor; consent of advisor if repeating the course. Studies the evolution of the discipline of history by exploring theories, philosophies, and methods that are used in historical explanation. Concentrates on how some particular body of theory has influenced the writing of history. Course is repeatable to a maximum of 12 units as topics change.

HIST 255A Research Seminar in Modern Russia 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): UC Riverside graduate standing; consent of one instructor. A research seminar on modern Russian history (1801 to present). Covers appropriate primary sources and secondary literature. Topics include but are not limited to social history, labor, ideology, politics, and revolutions from the Imperial and/or Soviet periods. An intercampus course taught jointly by faculty from UC Riverside, Irvine, San Diego, and Los Angeles. After completing both HIST 255A and HIST 255B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units.

HIST 255B Research Seminar in Modern Russia 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): UC Riverside graduate standing; consent of one instructor; HIST 255A. A research seminar on modern Russian history (1801 to present). Covers completion of research paper begun in HIST 255A. Topics include but are not limited to social history, labor, ideology, politics, and revolutions from the Imperial and/or Soviet periods. An intercampus course taught jointly by faculty from UC Riverside, Irvine, San Diego, and Los Angeles. After completing both HIST 255A and HIST 255B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units.

HIST 256A Research Seminar in English History 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing; HISE 151, HISE 152 or equivalents. A seminar on seventeenth- and eighteenth-century English history emphasizing on the historical literature within the field. Covers appropriate primary sources and secondary literature. After completing both HIST 256A and HIST 256B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units.

HIST 256B Research Seminar in English History 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing; HISE 151, HISE 152 or equivalents; HIST 256A. A seminar on seventeenth- and eighteenth-century English history emphasizing on the historical literature within the field. Includes completion of a research paper. After completing both HIST 256A and HIST 256B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units.

HIST 258A Seminar in Modern European History 4 Seminar, 3 hours. Prerequisite(s): graduate standing. Graded In Progress (IP) until HIST 258B is completed, at which time a final grade is assigned. Course is repeatable to a maximum of 8 units.

HIST 258B Seminar in Modern European History 4 Seminar, 3 hours. Prerequisite(s): graduate standing. Course is repeatable to a maximum of 8 units.

HIST 260 Historic Preservation 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to the history, theories, and practices of historic preservation and place-based interpretations of the past. Explores the role of history and memory in the construction of the built and natural environment as well as the socioeconomic, cultural, and political dynamics of preservation.

HIST 260L Preservation Conservation Practicum 4 Seminar, 2 hours; research, 6 hours. Prerequisite(s): HIST 260. Offers hands-on experience in the practice of historic preservation, conservation, and place-based interpretations of the past.

HIST 262 Museum Studies 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A graduate-level introduction to the history of museums and the field of museum studies. Explores new directions in the theory and practice of museum work and public history.

HIST 262L Museum Studies Practicum 4 Seminar, 2 hours; research, 6 hours. Prerequisite(s): concurrent enrollment in HIST 262. Supervised research and interpretation in a museum setting. Course is repeatable to a maximum of 8 units.

HIST 263 Archival Management 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Theory and practice of archival management; history of archives; professional ethics. See the History department for grading statement.

HIST 263L Archival Management Practicum 3 Research, 3 hours. Prerequisite(s): HIST 263. Supervised research and administrative experience in an archive; intended to follow HIST 263.

HIST 264 Reading Seminar in Public History 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces primary materials for public history and its central historical problems and historiography. Also discusses debates within the field. Course is repeatable to a maximum of 12 units.

HIST 265A Research Seminar in Public History 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to the history, theories, and practices of public history. Explores the role of public memory in the construction of the built and natural environment as well as the socioeconomic, cultural, and political dynamics of preservation.

HIST 265B Practicum 4 Seminar, 2 hours; research, 6 hours. Prerequisite(s): HIST 265A. Offers hands-on experience in the practice of public history.
HIST 265B Research Seminar in Public History 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on themes affecting the management of archives, museums, cultural resources, and historic preservation. Studies sources and documents and presents findings through an original research paper or museum, archival, or preservation project. Second of a two-quarter sequence. After completing both HIST 265A and HIST 265B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units.

HIST 272A Seminar in American Colonial and Early National History 4 Seminar, 3 hours. Prerequisite(s): graduate standing. Graded In Progress (IP) until all terms are completed, when a final grade will be assigned. Course is repeatable to a maximum of 8 units.

HIST 272B Seminar in American Colonial and Early National History 4 Seminar, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A research seminar focusing on themes in the study of the American West from the colonial era to the present. Explores migration, expansion, and modern urban development. Includes historical interpretations, readings, discussions, and research. Graded In Progress (IP) until HIST 272A and HIST 272B are completed, at which time a final grade is assigned. Students begin a paper based on archival research, oral history, and material culture. After completing both HIST 272A and HIST 272B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units.

HIST 273A Research Seminar in the American West 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A research seminar focusing on themes in the study of the American West from the colonial era to the present. Explores migration, expansion, and modern urban development. Includes historical interpretations, readings, discussions, and research. Graded In Progress (IP) until HIST 273A and HIST 273B are completed, at which time a final grade is assigned. Students begin a paper based on archival research, oral history, and material culture. After completing both HIST 273A and HIST 273B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units.

HIST 273B Research Seminar in the American West 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor; HIST 273A. A research seminar focusing on themes in the study of the American West from the colonial era to the present. Explores migration, expansion, and modern urban development. Includes historical interpretations, readings, discussions, and research. Students complete a paper based on archival research, oral history, and material culture. After completing both HIST 273A and HIST 273B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units.

HIST 274A Seminar in Nineteenth-Century United States History 4 Seminar, 3 hours. Prerequisite(s): graduate standing. Graded In Progress (IP) until HIST 274A and HIST 274B are completed, at which time a final grade is assigned. Course is repeatable to a maximum of 8 units.

HIST 274B Seminar in Nineteenth-Century United States History 4 Seminar, 3 hours. Prerequisite(s): graduate standing. Course is repeatable to a maximum of 8 units.

HIST 275A Seminar in Twentieth-Century United States History 4 Seminar, 3 hours. Prerequisite(s): graduate standing. Graded In Progress (IP) until HIST 275A and HIST 275B are completed, at which time a final grade is assigned. Course is repeatable to a maximum of 8 units.

HIST 275B Seminar in Twentieth-Century United States History 4 Seminar, 3 hours. Prerequisite(s): graduate standing. Course is repeatable to a maximum of 8 units.

HIST 276A Research Seminar in Native American History 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An examination of Native American historical research. Explores philosophy, methodology, historiography, and sources relative to American Indians. Students study a variety of sources and documents, compile an annotated bibliography, conceptualize and design a research project, and begin work on an original historical paper. Graded In Progress (IP) until HIST 276A and HIST 276B are completed, at which time a final grade is assigned. After completing both HIST 276A and HIST 276B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units.

HIST 276B Research Seminar in Native American History 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor; HIST 276A. A continuation of HIST 276A. Students conduct research on the topics selected in HIST 276A. Additional readings may be assigned at the discretion of the instructor. At the term’s end, students present their findings through an original historical research paper. Instructors may also assign oral presentations of research findings. After completing both HIST 276A and HIST 276B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units.

HIST 277 Reading Seminar in Early Modern World History 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Study of selected historical themes such as labor, gender, migration, cultural contact, and colonial systems in an early modern context. Focuses on regional studies and issues of global connection in the early modern period. Intensive discussions of current scholarship in the given field. Course is repeatable to a maximum of 12 units with consent of advisor.

HIST 278 Early Modern Empires in the Middle East: the Ottomans and the Safavids 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores the history of early modern empires in the Middle East (the Ottomans and Safavids) in a comparative format. Focuses on such issues as Islam and conquest, state formation, confessional empires and toleration, commerce, and culture. Cross-listed with MEIS 278.

HIST 280A Seminar in Latin American History 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing. Graded In Progress (IP) until both terms are completed, when a final letter grade will be assigned. Course is repeatable to a maximum of 8 units.

HIST 285A Seminar in Latin American History 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing. Course is repeatable to a maximum of 8 units.

HIST 287A Research Seminar in Nature, Place, and Space: Environmental and Spatial Approaches to History 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Surveys historical literature and methodologies involved in spatial and environmental analyses of the past. Examines technical and methodological issues involved in using spatial documents (maps). Discusses applications of historical research to environmental remediation. Includes work on a research paper. May be taken as a one- or two-quarter course (HIST 287A, HIST 287B). After completing both HIST 287A and HIST 287B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units.

HIST 287B Research Seminar in Nature, Place, and Space: Environmental and Spatial Approaches to History 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor; HIST 287A. Surveys historical literature and methodologies involved in spatial and environmental analyses of the past. Examines technical and methodological issues involved in using spatial documents (maps). Discusses applications of historical research to environmental remediation. Students discuss and critique each other’s research. After completing both HIST 287A and HIST 287B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units. Course is repeatable to a maximum of 8 units.

HIST 290 Directed Studies 1 to 6 Prerequisite(s): consent of the chair of the department. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

HIST 291 Individual Study in History 1 to 12 Prerequisite(s): graduate standing. A program of study designed to advise and assist graduate candidates who are preparing for examinations. Does not count toward the unit requirement for the master’s degree. Graded Satisfactory (S) or No Credit (NC).

HIST 292 Concurrent Analytical Studies 1 to 6 Research, 3 to 12 hours. Prerequisite(s): consent of instructor. Taken concurrently with some 100-series course, but on an individual basis. Devoted to completion of a graduate paper based on research or criticism related to the 100-series course, the program of study is worked out with the instructor. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.
HIST 297 Directed Research 1 to 6
Prerequisite(s): consent of instructor. Individualized graduate student research under the sponsorship of specific faculty members, in topics other than the student’s dissertation. Graded Satisfactory (S) or No Credit (NC). May be repeated for up to 8 units.

HIST 298G Public History Group Internship
1 to 12 Seminar, 2 hours; term paper, 1 to 6 hours; research, 1 to 6 hours; internship, 3 to 18 hours. Prerequisite(s): graduate standing or consent of instructor. Provides practical experience and project-based research in public history. Work with public history faculty or appropriate professional organization to gain skills related to the following areas: museum exhibitions, interpreting historic sites, archives and libraries, oral and digital history projects, historic preservation, and other forms of public history. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 16 units.

HIST 299 Research For Thesis Or Dissertation 1 to 12 Prerequisite(s): graduate standing. Research for thesis or dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses
HIST 301 The Teaching of History at the College Level 4 Seminar, 3 hours; consultation, 1 hour. Prerequisite(s): graduate standing. Normally required of all doctoral candidates and teaching assistants in the department; open to terminal M.A. students with consent of instructor. Credit not applicable to graduate unit requirements. Graded Satisfactory (S) or No Credit (NC).

HIST 302 Teaching Practicum 1 to 4 Seminar, 1 hour; clinic, 1 to 4 hours. Prerequisite(s): limited to departmental teaching assistants; graduate standing. Supervised teaching in upper- and lower-division history courses. Required of all History teaching assistants. Fulfills teaching portion of Ph.D. teaching requirement. Graded Satisfactory (S) or No Credit (NC).

HIST 398I Internship in Public History
8 to 12 Research, 8 to 12 hours; internship, 16 to 24 hours. Prerequisite(s): consent of program coordinator. An internship at a museum, archive, gallery, or other cooperating institution under the direction of a faculty member. Graded Satisfactory (S) or No Credit (NC).

HIST 402 Professional Practice For the Public Historian 2 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing. Case study approach to the practice, professional codes, and ethics of public historians, including problems in conflict of interest, fee services, political advocacy, expert legal testimony, civil service, conflict with other professions (e.g., architecture), bidding procedures, and proprietary rights.

History of the Americas Upper-Division Courses
HISA 110A Colonial America 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An exploration of early American society from settlement through the mid-eighteenth century. Topics include the convergence of Native American, European, and African cultures; the origins of slavery; religious diversity; and the growth and development of the colonies.

HISA 110B Revolutionary America 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An analysis of the political, social, and cultural movements that led to the American revolution and the formation of the Republic. Topics include crowd activity, imperial conflict, and the creation of the constitution.

HISA 110C The Early Republic: the United States, 1789-1848 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An analysis of the political, social, and cultural forces that transformed the United States from a fledgling preindustrial nation into a sprawling, exuberant, capitalist society. Topics include industrialism, capitalism, Christianity, democratic politics, slavery and racial structures, abolitionism, and American radicalism and nationalism.

HISA 113 Slavery and the Old South 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An investigation of slavery in the antebellum South. Topics include: the emergence of the self-conscious South, the romanticized plantation, American historians and slavery, etc.

HISA 114 The American Civil War 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An analysis of the American Civil War. Topics include slavery as a cause of the war as well as the impact of emancipation and of the war on both North and South. Credit is awarded for only one of HISA 114 or HISA 114S.

HISA 114S The American Civil War 4 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An analysis of the American Civil War. Topics include slavery as a cause of the war and the impact of emancipation and of the war on both North and South. Credit is awarded for only one of HISA 114 or HISA 114S.

HISA 115 Reconstruction 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Major leaders and events of post-Civil War America, with emphasis upon Reconstruction, racial and political conflict, industrial growth, and other historical developments that helped shape the modern South and the expanding nation.

HISA 116 The United States, 1877-1914 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An analysis of political, social, economic, and cultural developments in the United States between the end of Reconstruction and the beginning of World War I.

HISA 117A United States, 1914 to 1945 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Topics include the emergence of the United States as a global power, the second industrial revolution, the development of a consumer culture, and the creation of a regulatory state.

HISA 117B United States, 1945 to the Present 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Topics include the Cold War, the political and cultural consequences of post-World War II affluence, the social movements of the 1960s, Vietnam, and the conservative resurgence of the 1970s and 1980s.

HISA 119 Modern United States Consumer Culture 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Examines the history and culture of mass consumerism in the United States. Includes the shift from mass production to mass consumption; the growth of advertising and product marketing; the rise of the department store and shopping mall; the relationship of race, ethnicity, and gender to the market; globalization; and anti-consumerism.

HISA 120A The Supreme Court and the Constitution 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the intellectual and political sources of the Constitution in English, colonial, and revolutionary war history; the Philadelphia convention and the debate over ratification; the formative impact of the Marshall court; and the crisis over slavery and the nature of the Union. Discusses the role of the court in protecting U.S. capitalism and then examines the court’s role in legitimizing the New Deal by 1953. The main materials of the course are the actual opinions of the court.

HISA 120B The Supreme Court and the Constitution 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Examines constitutional history concerning the powers of the national government. Explores the court’s focus on the struggle over racial and gender equality and on the expansion and protection of individual liberties contained in the Bill of Rights.

HISA 122A Religious Cultures in Early America 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor; HIST 017A is recommended. An introduction to religious beliefs and practices during the seventeenth and eighteenth centuries in the colonies that became the United States. Cross-listed with RLST 137A.
HISA 122B Religious Cultures in Modern America Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor; HIST 017B is recommended. An introduction to a variety of religious traditions, movements, and cultures from 1800 to the present in the United States. Cross-listed with RLST 137B.

HISA 123 American Economic History Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 002 or ECON 002H; ECON 003 or ECON 003H. Examines the economic history of the United States with an emphasis on the incentives and events surrounding the colonization of modern day United States, the American Revolution, economic growth and expansion throughout the 1800’s, the American civil war, and other major historical events leading up to the present. Cross-listed with ECON 123.

HISA 124 Labor and Working Class History of the United States Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduction to the history of work, workers and their families, communities, organizations, unions, and workers’ organizations in the United States from the mid-nineteenth century to the present. Attention is paid to gender, race, immigration, and diversity of the work force, and role of government, within an economic and international context.

HISA 125 (E-Z) Topics in American Society and Culture Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Focused studies in American social and cultural history. Employs close study of a specific theme from a transnational perspective. E. United States In Global 1960s, F. Ethics&Society In Early Americ; G. United States&the Philippines; I. Cultr&poltics On San Francisco Ba.

HISA 126 Family Histories and American Culture Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores experiences of family and kinship in the nineteenth-century United States, especially in the context of Indian removal, racial slavery, and settler imperialism. Readings include family history, memoir, and historical monographs. Provides context for recent developments in genealogical research as they relate to American family history.

HISA 127 The United States and the World Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent from instructor. Examines the role of the United States in global affairs through specific historical themes and topics. Topics may include expansion and intervention in the 19th and 20th centuries; America as an economic, cultural, and diplomatic influence; U.S. immigration policies and patterns; and the influence of foreign nations and peoples. Course is repeatable as topics change to a maximum of 8 units.

HISA 128 American Nature Writing, Thoreau - Present Lecture, 3 hours; written work, 3 hours. Prerequisite(s): Restricted to class level standing of junior, or senior; or consent of instructor. Investigates a broad range of ideas about nature and the place of humans in the natural world through a survey of novels, poetry, essays, and polemics written by Americans since the mid-19th century. Topics include conservation, ecology, environmental activism, and the sanctity of the natural world.

HISA 132 United States Women, Gender, and Sexuality: 1620-1850 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Covers topics in early American women’s lives—work, politics, and sexuality—while charting the developments of gendered systems in the United States. Topics may include masculinity, the rise of the middle class, and the private-public dichotomy. Cross-listed with GSST 132.

HISA 133 Women, Gender, and Sexuality in United States History: 1850- Present Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces the major themes in the history of U.S. women and gender issues. Drawing upon recent work in the field, explores the relationships between gendered meanings of politics and the politics of gender in the late nineteenth and twentieth centuries in the United States. Cross-listed with GSST 133.

HISA 134 Black Feminist Theory and Activism Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Considers the writings and collective organizational strategies of African American women intellectuals and activists developed in response to the ways racial, sexual, and economic oppression work interdependently and are institutionalized. Follows black women’s agendas for social change from the early women’s slave narratives to the present. Cross-listed with ETST 113.

HISA 135 The Civil Rights Movement, 1950-1970 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. The Civil Rights Movement of the 1950s and 1960s. The main focus will be on the “grass roots.” African American aspects of “The Movement;” as it was popularly known, from school desegregation to voting rights and beyond. Cross-listed with ETST 112.

HISA 136 Historical Perspectives On Mass Incarceration Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Historical perspectives on U.S. mass incarceration. Explores historic roots of conquest, colonialism, racial subjugation, capitalism, and labor systems linking current mass incarceration, detentions, and deportations of unauthorized immigrant classes. Examines critical historic turning points and current social, economic, and political dynamics. Course meetings alternate between historic and contemporary issues.

HISA 137 Frontier History of the United States Lecture, 3 hours; journal, 1 hour; term paper, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the frontier in U.S. history, with special attention to the Western frontier and borderlands.

HISA 138 California History Lecture, 3 hours; journal, 1 hour; term paper, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. HISA 137 is recommended but not required. The history of California from the earliest discoveries to the present.

HISA 139 American Musical Subcultures: A Genealogy of Rock Lecture, 3 hours; extra reading, 0 to 2 hours. Prerequisite(s): upper-division standing or consent of instructor. A historical and cultural overview of the genre of American popular music known as “rock.” Covers themes ranging from musical form and structure, aesthetics, and audio technology to community and individualism, gender and racial identity, political resistance, and the music industry. Cross-listed with MUS 140.

HISA 140 California Indian History Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Provides students with a broad understanding of the rich and varied heritage and history of California Indians from the invasion of the Spanish to the twentieth century. Examines geographically and culturally diverse groups as a means of illustrating the various Euro-American Indian policies that affected native Californians. Course is comparative and thematic. Cross-listed with ETST 180.

HISA 141 Southwestern Indian History Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Presents a historical examination of selected Native American groups in the Southwest. Examines the relationship of Southwestern Indians to the Spanish, Mexican, and United States governments. Focuses on Quechans, Tohono O’odom, Yavapai, Chi-racahua, Navajos, Zunis, Hopis, Comanches, and selected Pueblos along the Rio Grande. Cross-listed with ETST 181.

HISA 142 Northwestern Indian History Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines selected aspects of Northwestern Indian History, from approximately the 1750s to the twentieth century. Deals with several native groups along the Northwest coast from Alaska to Oregon. Compares policies of the Russian, Spanish, English, and United States governments. Particular emphasis on the 1850s when the U.S. negotiated a number of treaties with Native Americans in the Washington and Oregon territories. Cross-listed with ETST 182.

HISA 143 Native American Oral Literature Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ETST 007; upper-division standing or consent of instructor. Comparative examination of Native American oral literature of tribes in the United States, Canada, and Mexico. Enhances the student’s understanding of Native American language, literature, drama, geography, geology, biology, history, and culture. Cross-listed with ETST 183.
HISA 144 (E-Z) Topics in Native American History 4 Lecture, 3 hours; individual study, 3 hours. Selected topics addressing the issues of the Native American. Includes reading, research, and discussion on the Native American experience. F. Ely Amer:emergi interpretatins. Cross-listed with ETST 115 (E-Z).

HISA 145 (E-Z) Topics in African American History 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Examines topics on the history of African Americans from slavery to the present. E. Black Women's History.

HISA 146 History of Native American Women 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines selected topics on the history of Native American women including their political, economic, and religious participation in their societies. Further traces historic changes in Native women’s lives as a result of the colonization of the New World and examines the complex imagery of Native women that developed from colonial contact. Cross-listed with GSST 146.

HISA 147 Medicine Ways of Native Americans 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the medical history of Native Americans. Focuses on traditional Native American medicine and how Western diseases, medical practices, health care, and policies influenced American Indian health. Topics include medicine people, rituals, ceremonies, smallpox, measles, influenza, anomie, accidents, diabetes, suicides, mental illness, and murders. Cross-listed with ETST 116.

HISA 150 United States Urban History 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces the broad political, economic, and social forces that have shaped American cities from the nineteenth century through the present. Examines the ways that cities both integrate and segregate diverse populations. Emphasizes the physical spaces in which race, class, and gender identities are constructed and contested.

HISA 160 Colonial Latin America 4 Lecture, 3 hours; extra reading: 2 hour; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. A history of Latin America from pre-Columbian times to independence with an emphasis upon selected themes concerning the social, economic, and cultural aspects of colonialism. Cross-listed with LNST 170.

HISA 161 Nineteenth-Century Latin America 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Topics include the breakdown of political order and the problem of the nation-state, liberalism and conservatism, slavery and abolition, foreign intervention and capital investment, the reemergence of political order in the Age of Liberalism (1860-1900), and social and cultural change. Cross-listed with LNST 171.

HISA 162 Twentieth-Century Latin America 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Topics include the Mexican Revolution, the Great Depression, populism, industrialization, revolution, and the emergence of conservative regimes in the age of neoliberalism. Cross-listed with LNST 172.

HISA 163A Colonial Mexico 4 Lecture, 3 hours; extra reading, 2 hour; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. The history of Mexico to independence.

HISA 163B Modern Mexico 4 Lecture, 3 hours; extra reading, 2 hour; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. The history of Mexico since independence.

HISA 164A The United States and Latin America to 1930 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Analysis of United States-Latin American relations from 1776 to the Good Neighbor Policy. Topics include the Monroe Doctrine; United States expansionism and the Latin American response; the United States-Mexican War; and the age of imperialism, 1895-1928.

HISA 164B The United States and Latin America Since 1930 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Analysis of United States-Latin American relations from the Good Neighbor Policy to the present. Topics include United States intervention after 1945; the Cold War and counterrevolution; crises in Guatemala, Cuba, Brazil, Chile, Nicaragua, and El Salvador; and defining the new enemy after the Cold War.

HISA 165 Modern Brazil: State and Society 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Analyzes power and resistance in Brazilian history with emphasis on the social and political movements challenging state power. Topics include slave rebellions, bandeiranti, millenarian uprisings, the industrial working class, the urban poor, social Catholicism, feminism, and “Black Power.”

HISA 166 Modern Argentina: Democracy and Dictatorship 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the major issues in modern Argentine history. Topics include industrialization and trade union politics, Peronism, the rise of the revolutionary left, militarism, state terrorism, political culture and the cultural dimensions of violence, and state and society during the democratic transition.

HISA 167 Environmental History of the Americas 4 Lecture, 3 hours; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines the interaction of the natural world with human society from the colonial period through the twentieth century. Focuses on how the environment, human beings, and other species have lived, changed, and generally influenced one another over time in the Americas.

HISA 168 History of the Church in Latin America 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of the history of the church (e.g. Catholic, Protestant) in Latin America. Includes conquest and mission, indigenous responses to Christian conversion, the long colonial period, independence, revolution, and liberation theology movements. Explores the dynamics of church and culture, church and state, and church and social transformation. Cross-listed with RLST 177.

History of Europe Upper-Division Courses

HISE 110 Ancient Historians 4 Lecture, 3 hours; research, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. The historical development of historiography as evidenced in ancient historical writings from Near Eastern king lists and biblical histories to the narrative histories of Greece and Rome. Focuses on the ideas of history in the various cultures of the ancient Near East and Mediterranean and their relation to modern historical thought. Cross-listed with CLA 100.

HISE 111 Ancient Greece From the Bronze Age to the Persian Wars 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Survey of the history of Greece from the late Bronze Age to the end of the Persian Wars. Focuses on the Mycenaean civilization; the rise of the polis in Athens and Sparta; the Ionian Enlightenment; and the Persian Wars.

HISE 112 Ancient Greece From Classical Athens to the Death of Alexander 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Survey of the history of Greece from the Persian Wars to the death of Alexander the Great. Focuses on Athens, its empire and democracy, and on the Macedonian Empire of Philip and Alexander. Special attention is given to the Greek cultural achievement within the context of changing political and social conditions.

HISE 113 Comparative Ancient Historical Writing 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of the literary aspects of historical writing in ancient cultures, with some comparison of the ancient contribution to later authors of the genre. Cross-listed with CPAC 112, and CLA 113.

HISE 114 Ancient Writing and Literacy 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Uses cross-cultural comparison to survey writing and literacy in ancient civilizations and how they are related in the origin and development of selected ancient cultures. Cross-listed with CPAC 133.
HISE 115 The Roman Republic 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the political, economic, institutional, social, and cultural history of Rome from its foundation until the end of the Roman Republic (27 B.C.). Focuses on prominent figures and moments of crisis as it examines the forces that brought Rome to the forefront of the Mediterranean world.

HISE 116 The Roman Empire 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of the political, economic, institutional, social, and cultural history of the Roman Empire from the first Emperor, Augustus, until the first Christian emperor, Constantine. Focuses on notable figures such as the Julio-Claudian emperors, Nero and Claudius, and on significant periods to help students understand the successes and failures of the Roman Empire.

HISE 117 Decline and Fall of the Roman Empire 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the weaknesses in the Roman Empire that led to its demise, as well as the circumstances in which the new religions and empires came into existence, through a study of the period from the third to the seventh centuries A.D.

HISE 118 Ancient Greece: the Hellenistic Age From Alexander to Cleopatra, 336-31 B.C. 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Surveys the history of Greece and the Eastern Mediterranean from Alexander the Great to the death of Cleopatra (336-31 B.C.). Explores the dramatic political, social, economic, and cultural changes that took place during the Hellenistic Age until the conquest by Rome.

HISE 119 (E-Z) Topics in Ancient History: War in the Ancient Greek World 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Surveys the history of Greece and the Eastern Mediterranean from Alexander the Great to the death of Cleopatra (336-31 B.C.). Explores the dramatic political, social, economic, and cultural changes that took place during the Hellenistic Age until the conquest by Rome.

HISE 119E War in the Ancient Greek World 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing; HIST 010 or HISE 110 or HISE 111 or HISE 112 or HISE 118; restricted to class level standing of junior, or senior. Focused analysis of selected topics in the history of the Ancient Mediterranean region.

HISE 119F War in the Ancient Roman World 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing; HIST 010 or HISE 110 or HISE 115 or HISE 116 or HISE 117; or consent of instructor. Examines the relationship between war and society in Rome from its founding to the fall of the Roman Empire. Topics include the development of Rome’s army in relation to Roman society, struggles to control the military, conduct on the battlefield, and the impact of war on Rome and its neighbors.

HISE 120 Early Middle Ages 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Topics in medieval history, from the end of classical antiquity to the 11th Century, including Christianity, Islam, the Byzantine Empire, and the barbarians.

HISE 121 The High Middle Ages 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Topics in medieval history, from the 11th to the 16th century, including the development of medieval institutions, the 12th century Renaissance, and the rise of European universities.

HISE 123 Law and Society in Medieval Europe 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Surveys the legal system of Europe from the late crisis of the Roman Empire to the late fourteenth century. Explores the premedieval legal heritage of Europe (Roman law, early canon law, customary laws of various peoples), transformations of that heritage in the central Middle Ages (revival of Roman and canon law, custom and legislation, use and abandonment of the ordeal), and the relationship between the resulting legal systems and royal authority. Primary sources are the central component of the course materials.

HISE 131 The Renaissance 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. The history of Western Europe from 1400-1527 with special attention to Italy.

HISE 132 The Reformation 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. The history of Europe from 1517 to 1618, with special attention to the key events of the continental reformation.

HISE 133 Women Artists in Renaissance Europe, 1400-1600 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): restricted to class level standing of sophomore, junior, or senior. Surveys the lives and work of women artists in Renaissance Europe. Considers circumstances under which it was possible for women to become artists; how they evolved from practicing in the cloistered convent to participating in the competitive public market place; what they painted; and who their patrons were. Cross-listed with AHS 165, and GSST 170.

HISE 135 Absolutism and Enlightenment 4 Lecture, 3 hours; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. The development of monarchic absolutism in the 17th and 18th centuries and the intellectual Enlightenment.

HISE 140 Nineteenth-Century Europe 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. The history of Europe from 1815 to 1914. Topics include the Industrial Revolution, the revolutions of 1848, Bismarck and the unification of Germany, the rise of mass politics, imperialism, and the origins of World War I.

HISE 141 Europe, 1914-1945 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. The history of Europe from 1914 to the end of the Second World War. Topics include World War I, the rise of fascism and communism, the crisis of the Western democracies, the diplomacy of appeasement, World War II, and the Holocaust.

HISE 142 Europe Since 1945 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. The comparative social and political history of Europe from 1945 to the present. Topics include the cold war; decolonialization; the emergence of the neoliberal welfare state; the Common Market; de Gaulle, Communism and detente; technology and new forms of social protest.

HISE 145 World War I 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An examination of the origins of the conflict and its development into the world’s first war and the first total war. Focuses on the role of technology in the war and on the social consequences of the war. Credit is awarded for only one of HISE 145 or HISE 145S.

HISE 145S World War I 5 Lecture, 3 hours; discussion, 1 hour; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An examination of the origins of the conflict and its development into the world’s first war and the first total war. Focuses on the role of technology in the war and on the social consequences of the war. Credit is awarded for only one of HISE 145 or HISE 145S.

HISE 146 The Second World War 4 Lecture, 3 hours; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Explores the diplomatic origins of the war; the fighting in Europe, Asia, and Africa; Nazi oppression in conquered Europe and the destruction of the Jews; the social, economic, and technological impact of the conflict; and the origins of the Cold War. Credit is awarded for only one of HISE 146 or HISE 146S.
HISE 146S The Second World War 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Explores the diplomatic origins of the war; the fighting in Europe, Asia, and Africa; Nazi oppression in conquered Europe and the destruction of the Jews; the social, economic, and technological impact of the conflict; and the origins of the Cold War. Credit is awarded for only one of HISE 146 or HISE 146S.

HISE 147 The Holocaust 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the extermination of European Jewry during World War II. Surveys the history of the “Jewish Question”, Jewish-Christian relations; race; the systematic persecution and genocide of the Jews; and world responses to genocide. Addresses religious, philosophical, and political implications of the Holocaust, as well as continuing anti-Semitic trends. Cross-listed with RLST 127.

HISE 148A Women and Gender in Early Modern Europe, 1348-1800 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introductory survey of women and gender relations in early modern Europe. Topics include women in the Italian Renaissance, the Protestant and Catholic reformation, the witchcraft persecutions, the Enlightenment, and the French Revolution.

HISE 148B Women and Gender in Europe, 1800–Present 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introductory survey of women and gender in Europe. Topics include changes in gender relations and the roles of women in the family, workplace, and politics; sexuality and science; and the debate over the “woman question.”

HISE 149 The Body in Western Art: Antiquity to Present 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): Restricted to class level standing of sophomore, junior, or senior; Restricted to major(s) Anthropology, Art History, Art History/Admin Studies, Art History/Religious Studies, Gender and Sexuality Studies, History, History/Administrative Studies, History/Law and Society; or consent of instructor. Presents further questions and study of the human body and how it was depicted and interpreted in works of art from Roman Antiquity to the present. Explores a broad range of artworks in their specific historical, cultural, medical, social, religious, political, and intellectual contexts. Cross-listed with ANTH 161, GSST 130, and HISE 149. Credit is awarded for one of the following AHS 133, ANTH 161, GSST 130, HISE 149, or AHS 016.

HISE 150 Ancient and Medieval England 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A broad but occasionally intensive survey of England from its prehistory to the beginning of the Tudor period (c. 1500). Social and legal developments will be stressed.

HISE 151 England: 1485–1760 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An examination of the development of England from the sixteenth century until her emergence as a major power at the accession of George III. An assessment of social, economic, and legal changes as well as important political events.

HISE 152 Modern Britain 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An examination of the rise of Great Britain to world domination in the late eighteenth and nineteenth centuries and its subsequent fall from grace in the twentieth century. Special emphasis on major changes in the economy.

HISE 153 History of the Common Law 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An examination of the development of the English Common Law beginning with the reign of Henry II and extending into the early eighteenth century. Special attention to the history of the jury.

HISE 154 The History of London 4 Lecture, 3 hours; screening, 2 hours; extra reading, 1 hour. Prerequisite(s): upper division standing or consent of instructor. Examines the growth of London over the past 2000 years. Concentrates on how London became a world city, as well as how residents coped (or failed to cope) with the social and environmental problems created by the city’s enormous size.

HISE 155 Tudor England 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines sixteenth-century England with particular attention to the impact of the Reformation, the “price revolution,” and the development of the state.

HISE 156 Stuart Britain: A Century of Revolution, 1603–1714 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the social, religious, and political tensions in seventeenth-century Britain. Particular attention is paid to the revolutions of 1637-1660 and 1688-89.

HISE 157 Eighteenth-Century Britain, 1714–1815 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Analyzes Great Britain’s emergence as one of the dominant world powers in the eighteenth century. Particular attention is paid to the realm’s social and economic transformation and to its often problematic imperial visions.

HISE 160 India and the British Empire 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the trends and consequences of the relationship between Britain and India from initial trading contacts in the seventeenth century, through colonization, and on to political independence and migration flows in the late twentieth century. Focuses on cultural interactions.

HISE 162 Germany From Bismarck to Hitler 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Germany from Bismarck’s accession as chancellor in 1862 to Hitler’s defeat in 1945, with special attention to the economic underpinnings of the period and the process of social and economic modernization.

HISE 163 Modern German History Through Film 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores twentieth-century German history through film. Includes World Wars I and II, inflation and polarization of classes, Nazi Germany, representations of the Holocaust, and a divided and reunited Germany. Cross-listed with GER 163, MCS 115, and CPLT 115.

HISE 168 (E-Z) Topics in European History 4 Lecture, 3 hours; extra reading, 3 hours. Selected topics addressing the issues of European history F. Religious Conflict And Coexistence In Europe; G. Spain As A World Power, 1469-1821.

HISE 171 Early Russia 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Russia from pre-history to the establishment of the Romanov dynasty. Deals with the Slavic, Norse, and Asian origins of the Kievian state, the impact of the Mongol conquest, the rise of Moscow, and the Time of Troubles in the seventeenth century. Special attention to European vs. Asian influences.

HISE 172 Imperial Russia 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Russia under the Romanov dynasty, 1650-1917. Using the twin themes of absolute monarchy and the rise of revolutionary movements, the course deals with such topics as Peter the Great, autocracy, the nobility, serfdom, the radical intelligentsia, and the origins of the Russian Revolution.

HISE 173 Religion and Nationality in Imperial Russia 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Introduces the great religious, national, and ethnic diversity inside the Russian Empire (1552-1917). Topics include colonial expansion and frontiers; attitudes and policies toward non-Russians; discovery and defense of ethnoreligious identities; nation-building and nationalism; nationality conflicts; violence; and revolution.

HISE 174 Russia Since 1917 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Russia from 1917 to the present, with emphasis on the Russian Revolution, the Communist Party, Stalinism, the Great Purges, World War II, and the Khruščev, Brezhnev, and Gorbachev years. Revolutionary change in a traditional society will be a central theme.
HISE 175 (E-Z) Topics in Russian History 4
Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): HISE 172 or HISE 174. Selected topics addressing the issues of Russian history. E. The Stalin Period.

HISE 176 Serbia, Bosnia, and Kosovo: the Contemporary Crisis and its Historical Roots 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the tragic events of the 1990s and the South Slavic history from the Ottoman conquest to World War II. Focus is on the national histories and mythologies of Serbs, Bosnians, and Albanians.

Humanities, Arts, and Social Sciences

Subject abbreviation: HASS
College of Humanities, Arts, and Social Sciences
hass.ucr.edu

Committee in Charge
John Laursen (Political Science)
Erich Reck (Philosophy)
Daryle Williams, Dean, ex officio

Major
The Humanities, Arts, and Social Sciences major is an interdisciplinary major designed for students who have specific interests that cannot be accommodated within any one of the departments in the College of Humanities, Arts, and Social Sciences and who wish to construct a coherent program of their own. The Humanities, Arts, and Social Sciences major is not intended for students whose interests are undecided; students proposing a Humanities, Arts, and Social Sciences major must propose a specifically focused interdisciplinary topic or a two-field area. Such students must have a faculty advisor who is a member of the UCR Academic Senate.

The Humanities, Arts, and Social Sciences major is fulfilled by a course of studies determined in consultation with an advisor and with the full approval of the chair and three members of the committee overseeing the major. The student may construct either an interdisciplinary option or a two-field option for the major as described below.

Admission
Students who wish to select a Humanities, Arts, and Social Sciences major must fill out a form and submit a carefully worded statement of purpose showing meaningful course interrelations. The Humanities, Arts, and Social Sciences Interdisciplinary Committee considers each proposal in the context of the student’s topic and statement of purpose.

Students whose proposals are being approved should petition for a change in major only after they have been informed of the committee’s approval of their interdisciplinary program. Every subsequent change in the student’s initial program must be approved by the advisor; a record of the program and of program changes is kept in the student’s file.

Interdisciplinary Option
The interdisciplinary option is built around a central concept in humanities and social sciences. The concept might be a specific culture, country or ethnic group such as Italian civilization and culture; an age or period such as the Renaissance or the industrial revolution; a great social issue or human problem such as war, revolution, communication; or any other topic which receives significant attention from several disciplines.

Two-Field Option
In special circumstances the committee sponsors a two-field option for the major designed to allow students to combine studies in two disciplines. Such majors are approved only if they cannot be accommodated within a dual major or within the Liberal Studies Program.

University Requirements
See Undergraduate Studies section.

College Requirements
See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

Major Requirements
The major requirements for the B.A. degree in Humanities, Arts, and Social Sciences are as follows: Students may choose either an interdisciplinary or a two-field option.

Interdisciplinary Option
1. Upper-division requirements (38-unit minimum)
   a) A minimum of 32 units directly related to the chosen central concept
   b) At least 6 units (but not more than 8 units) HASS 195 and/or HASS 196

2. The committee may require upper-division courses beyond those indicated above if the topic of study requires specific language, quantitative, or methodological proficiency.

Note
The senior thesis or research paper is the culmination of the major and represents an interdisciplinary approach to the central concept of the major. HASS 195 (Senior Thesis) and HASS 196 (Senior Research Paper) are supervised by a faculty advisor and designed to bring into focus a substantial portion of the major.

The following are sample interdisciplinary programs:

Revolution
ANTH 127, ECON 115A or ECON 115B, HIST 104, HISE 174, POSC 112, PHIL 163, PHIL 153, HASS 195 (8 units).

Renaissance
AHS 161, CPLT 150, ENGL 153, ENGL 154, HISE 131, MUS 101A, SPN 140 (E-Z), HASS 195 (8 units).

Two-field Option
1. Upper-division requirements (56 units)
   Twenty-eight (28) units in each of two fields; supervised by a faculty advisor

2. The committee may require upper-division courses beyond those indicated above if the topic of study requires specific language, quantitative, or methodological proficiency.

Lower-Division Courses
HASS 001 Step-By-Step to College Success
For First Year Students 2
Lecture, 1.5 hours; extra reading, 3 hours; individual study, 1.5 hours. Prerequisite(s): restricted to class level standing of junior; or consent of instructor.

HASS 010 Arts and Ideas Experience 2
Workshop, 2 hours; individual study, 3 hours; written work, 2.5 hours. Prerequisite(s): none.

HASS 082 Major Themes in Contemporary Research and Thinking 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): none. Presents major themes in contemporary thinking and research in an area of the humanities, arts, or social sciences. Discussion sections focus on study of smaller topics and utilize source materials, selected intensive readings, etc. Emphasizes research and writing skills. Rotates among College of Humanities, Arts, and Social Sciences faculty and departments each year. Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 24 units.

HASS 089 Special Studies 1 to 3
Individual Study, 3 to 9 hours. Prerequisite(s): consent of the chair of the Humanities, Arts, and Social Sciences Interdisciplinary Program. Individual study, directed by a faculty member, to meet special curricular needs. Course is repeatable to a maximum of 8 units.
HA SS 092 First-Year Seminar in the Humanities, Arts, and Social Sciences 1
Seminar, 10 to 15 hours per quarter. Prerequisite(s): freshman standing; sophomore may enroll on a space-available basis with consent of instructor. Introduction to one of the many areas of study explored by the faculty of the College of Humanities, Arts, and Social Sciences in a small-group, highly interactive format. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as topics change to a maximum of 3 units of any combination of ENGR 092, HASS 092, and NASC 092; students may enroll in only 1 unit of ENGR 092, HASS 092, or NASC 092 per quarter.

HA SS 096 Environment and Society 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): lower-division standing or consent of instructor. Presents major environmental issues facing society from an interdisciplinary perspective. Topics may include water, energy, climate change, and urbanization. Cross-listed with NASC 096, and ENGR 096.

Upper-Division Courses
HA SS 100 Studies in Leadership and Organizational Effectiveness 5 Lecture, 3 hours; consultation, 3 per quarter, practicum, 3 hours; written work 21 hours per quarter. Prerequisite(s): consent of the instructor. Introduces social science literature on leadership studies. Includes planning and producing a campus event or research project and interaction with several California leaders.

HA SS 102 The McSweeny-McCauley Seminar 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): consent of instructor. Presents a topic selected by the current McSweeney-McCauley Chair in Teaching Excellence. Satisfactory (S) or No Credit (NC) grading is not available. Course is repeatable as topics change to a maximum of 16 units.

HA SS 189A Becoming An Scholar 4 Seminar, 2 hours; research, 3 hours; consultation, 1 hour. Prerequisite(s): admission into the Mellon Mays Undergraduate Fellowship Program; restricted to class level standing of junior, or senior. Prepares Mellon Mays Undergraduate Fellows to become scholars and academics. Focuses on the different paths open after the BA, especially those conducive to PhDs. Provides extensive training in how to apply to graduate school and how to be successful as an academic. Course is repeatable as content or topic changes to a maximum of 12 units.

HA SS 189B Conducting Academic Research 4 Seminar, 2 hours; research, 3 hours; consultation, 1 hour. Prerequisite(s): admission into the Mellon Mays Undergraduate Fellowship Program; restricted to class level standing of junior, or senior. Focuses on acquiring writing skills in the second course of the Mellon Mays Undergraduate Fellowship program. Also presents how to structure longer projects and organize workflows of writing. Course is repeatable as content or topic changes to a maximum of 12 units.

HA SS 189C Writing as An Academic 4 Seminar, 2 hours; research, 3 hours; consultation, 1 hour. Prerequisite(s): admission into the Mellon Mays Undergraduate Fellowship Program; restricted to class level standing of junior, or senior. The third course of the Mellon Mays Undergraduate Fellowship program focuses on presentation skills and presenting works to academic communities. Includes opportunities to speak at public events and conferences. Course is repeatable as content or topic changes to a maximum of 12 units.

HA SS 190 Special Studies 1 to 5 Conference, Prerequisite(s): consent of the Humanities, Arts, and Social Sciences Interdisciplinary Committee. Directed interdisciplinary study.

HA SS 191S Seminar in Sacramento 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor; admission to the UCR Center at Sacramento Program. Examines aspects of the Sacramento area, including cultural, political, and governmental institutions and the sciences, arts, and media. Requires a substantial research paper or project, the result of guided independent work drawing on the unique aspects of Sacramento. Required of participants in the UCR Center at Sacramento Program. Cross-listed with NASC 191S, and ENGR 191S.

HA SS 191T Internship 1 to 4 Internship, 10 hours per week for each 4 units. Prerequisite(s): upper-division standing and approval of Committee on Independent Student Projects. A student-defined project, the major portion of which is taken off campus. May be supervised by an off-campus instructor and/or UCR advisor. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

HA SS 195 Senior Thesis 1 to 8 Prerequisite(s): enrollment by request of student with approval of the advisor and the Humanities, Arts, and Social Sciences Interdisciplinary Committee. For honors students who may need one or more quarters to complete the research and writing of a senior thesis. Course is repeatable to a maximum of 12 units.

HA SS 196 Senior Research Paper 1 to 4 Prerequisite(s): consent of advisor.

HA SS 198 Internship 1 to 12 Internship, 10 hours per week for each 4 units. Prerequisite(s): upper-division standing and approval of Committee on Independent Student Projects. A student-defined project, the major portion of which is taken off campus. May be supervised by an off-campus instructor and/or UCR advisor. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

HA SS 199 Writing as An Academic 4 Seminar, 2 hours; research, 3 hours; consultation, 1 hour. Prerequisite(s): admission into the Mellon Mays Undergraduate Fellowship Program; restricted to class level standing of junior, or senior. Presents a topic selected by the current McSweeney-McCauley Chair in Teaching Excellence. Satisfactory (S) or No Credit (NC) grading is not available. Course is repeatable as topics change to a maximum of 16 units.

HA SS 199A Becoming An Scholar 4 Seminar, 2 hours; research, 3 hours; consultation, 1 hour. Prerequisite(s): admission into the Mellon Mays Undergraduate Fellowship Program; restricted to class level standing of junior, or senior. Prepares Mellon Mays Undergraduate Fellows to become scholars and academics. Focuses on the different paths open after the BA, especially those conducive to PhDs. Provides extensive training in how to apply to graduate school and how to be successful as an academic. Course is repeatable as content or topic changes to a maximum of 12 units.

HA SS 199B Conducting Academic Research 4 Seminar, 2 hours; research, 3 hours; consultation, 1 hour. Prerequisite(s): admission into the Mellon Mays Undergraduate Fellowship Program; restricted to class level standing of junior, or senior. Focuses on acquiring writing skills in the second course of the Mellon Mays Undergraduate Fellowship program. Also presents how to structure longer projects and organize workflows of writing. Course is repeatable as content or topic changes to a maximum of 12 units.

HA SS 199C Writing as An Academic 4 Seminar, 2 hours; research, 3 hours; consultation, 1 hour. Prerequisite(s): admission into the Mellon Mays Undergraduate Fellowship Program; restricted to class level standing of junior, or senior. The third course of the Mellon Mays Undergraduate Fellowship program focuses on presentation skills and presenting works to academic communities. Includes opportunities to speak at public events and conferences. Course is repeatable as content or topic changes to a maximum of 12 units.

HA SS 199D Internship 1 to 4 Internship, 10 hours per week for each 4 units. Prerequisite(s): upper-division standing and approval of Committee on Independent Student Projects. A student-defined project, the major portion of which is taken off campus. May be supervised by an off-campus instructor and/or UCR advisor. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

HA SS 199E Senior Thesis 1 to 8 Prerequisite(s): enrollment by request of student with approval of the advisor and the Humanities, Arts, and Social Sciences Interdisciplinary Committee. For honors students who may need one or more quarters to complete the research and writing of a senior thesis. Course is repeatable to a maximum of 12 units.

HA SS 199F Senior Research Paper 1 to 4 Prerequisite(s): consent of advisor.

HA SS 199G Internship 1 to 12 Internship, 10 hours per week for each 4 units. Prerequisite(s): upper-division standing and approval of Committee on Independent Student Projects. A student-defined project, the major portion of which is taken off campus. May be supervised by an off-campus instructor and/or UCR advisor. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

HA SS 199H Writing as An Academic 4 Seminar, 2 hours; research, 3 hours; consultation, 1 hour. Prerequisite(s): admission into the Mellon Mays Undergraduate Fellowship Program; restricted to class level standing of junior, or senior. Presents a topic selected by the current McSweeney-McCauley Chair in Teaching Excellence. Satisfactory (S) or No Credit (NC) grading is not available. Course is repeatable as topics change to a maximum of 16 units.

HA SS 199I Internship 1 to 4 Internship, 10 hours per week for each 4 units. Prerequisite(s): upper-division standing and approval of Committee on Independent Student Projects. A student-defined project, the major portion of which is taken off campus. May be supervised by an off-campus instructor and/or UCR advisor. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

HA SS 199J Senior Thesis 1 to 8 Prerequisite(s): enrollment by request of student with approval of the advisor and the Humanities, Arts, and Social Sciences Interdisciplinary Committee. For honors students who may need one or more quarters to complete the research and writing of a senior thesis. Course is repeatable to a maximum of 12 units.

HA SS 199K Senior Research Paper 1 to 4 Prerequisite(s): consent of advisor.

HA SS 199L Internship 1 to 12 Internship, 10 hours per week for each 4 units. Prerequisite(s): upper-division standing and approval of Committee on Independent Student Projects. A student-defined project, the major portion of which is taken off campus. May be supervised by an off-campus instructor and/or UCR advisor. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.
Inflammation and Infectious Disease Designated Emphasis

Designated Emphasis Requirements

The Designate Emphasis is an interdisciplinary graduate program of study to enhance student training in the field through a focused coursework across at least two departments. The program is optional and the courses required for completion of the Designated Emphasis must be taken from at least two different departments under the guidance of faculty. Undergraduate course taken to fulfill the requirement must be accompanied by a 292 course taken in the same quarter with extra work agreed upon by the professor and student.

2. BMSC 222 (2 units): Special Topics in Biomedical Sciences with emphasis in infectious diseases. The course will address the research pertaining to the student’s interest and prepare trainees in applying the knowledge of basic principles of immunology to the pathophysiology of infectious disease. Graded Satisfactory (S) or No Credit (NC)

3. Research Project: students will write a review article on a selected inflammation or infectious disease topic. The review will be evaluated by the Designated Emphasis Advisory Committee. It is the committee’s expectation that student will fulfill this component by submitting the review article for the journal publication. Successful completion of this review is required for the Designated Emphasis completion.

All requirements for the Designated Emphasis must be satisfied no later than one calendar year from the quarter in which candidate advances to candidacy in their Ph.D. field; a minimum GPA of 3.0 is required for the Designated Emphasis completion.

Interdisciplinary Studies

College of Humanities, Arts, and Social Sciences

Committee in Charge
(Minor in Moratorium)
The Interdisciplinary Studies major is not currently accepting new students. For more information, contact CHASS Student Academic Affairs, 3400 Humanities and Social Sciences Building, (951) 827-3683.

International Relations Minor

College of Humanities, Arts, and Social Sciences

Marissa Brookes, Ph.D., Chair
mbrookes@ucr.edu

Committee in Charge
Marissa Brookes, Chair (Political Science)
Marcelle Chauvet (Economics)
Thomas Cogswell (History)
Daryle Williams, Dean, ex officio

Offered by the department of Political Science, the International Relations minor offers a basic examination of the major approaches, disciplines, and perspectives of international relations. The study of international relations is necessarily interdisciplinary, focusing on economic, geographic, historical, and political issues and questions.

The International Relations minor is helpful in preparing students for the many careers in the international arena.

Requirements for the minor (38 units)
1. Eight (8) units from HISA 178, HISE 142, HISE 146, HISA 164B, HISE 174, HIST 182
2. Eight (8) units from ECON 171, ECON 175, ECON 178/BUS 178, ECON 181, ECON 182, ECON 185/ LNST 185
3. POSC 124 or POSC 124S
4. Eight (8) units from POSC 123, POSC 125, POSC 126 or POSC 126S, POSC 127, POSC 128, POSC 129, POSC 130, POSC 155 or POSC 155S, POSC 160 or POSC 160S

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Journalism Minor

College of Humanities, Arts, and Social Sciences

Andrew Winer, M.F.A., Chair
Department Office, ARTS 129 (951) 827-5424; creative writing.ucr.edu

Committee in Charge
Mike Davis, M.A. (Creative Writing)
Martin Johnson, Ph.D. (Political Science)
Milagros Peña Ph.D. Dean, College of Humanities, Arts and Social Sciences, ex officio

Offered by the Department of Creative Writing, the minor offers basic examination of the theory, practice and ethics of contemporary journalism, with an emphasis on reporting and editing. Coupled with work on student publications and internships, the minor serves as an entryway to professional writing in news media or to graduate study in journalism.
Lower-division requirements (9 units)

1. ART 003
2. CRWT 057C

Upper-division requirements (20 units)

1. Eight (8) units:
   a) CRWT 165
   b) CRWT 175
2. Eight (8) units:
   a) CRWT 174
   b) One (1) course either from an approved list of media-related upper-division courses, or, with the approval of the academic advisor for journalism minors, an upper-division course relevant to an area of journalism specialization.
3. Either CRWT 195: Senior Thesis [4], or CRWT 198: Internship [4]. Students electing a thesis will complete a series of news features or an investigative article or series requiring significant endeavor in reporting and writing and demonstrating an understanding of sound journalistic principles. CRWT 195 is open to seniors only. Students completing CRWT 198 must complete 4 units of internship with a journalism organization.

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

**Labor Studies Minor**

**Subject abbreviation:** LABR

**College of Humanities, Arts, and Social Sciences**

Ellen Reese, Ph.D., Chair
Office, 1217 Watkins Hall
(951) 827-2930; ellen.reese@ucr.edu

**laborstudies.ucr.edu**

**Committee in Charge**

Ellen Reese, Chair (Sociology)
Michael Bates (Economics)
Marissa Brookes (Political Science)
Amalia Cabezas (Media & Cultural Studies)
Alessandro Fornazzari (Hispanic Studies)
John N. Medearis (Political Science)
Dylan Rodriguez (Media & Cultural Studies)
Daryl Williams, Dean, ex officio

Labor studies is an interdisciplinary minor that focuses on the conditions, activities, and struggles of workers and other members of the working class from an international, contemporary, comparative, and historical perspective. Although trade unions are the primary focus, students will also examine other forms of working-class organizing, including community organizing, and organizing by women and people of color. Courses focus on work in formal workplaces, including service, industrial, clerical, professional, and managerial work, and may also address other forms of work, such as unpaid housework, prison labor, or work in the informal economy. The minor addresses issues affecting workers, including governmental policies, technological change, globalization, neoliberalism, and alternative models for organizing for social justice. In addition to taking academic courses, students gain hands-on experience through a one-quarter internship with a union or related organization. This minor helps to prepare students for careers in labor and community organizing, labor law, or labor regulatory agencies.

**Requirements for labor studies minor are as follows:**

1. Five courses (at least 20 units) from the approved list of courses
2. One of the following ‘core’ courses: LABR 001, HISA 124, ETST 102, SOC 112, SOC 135, GSST 101, POSC 138
3. A labor internship course (at least 4 units or the equivalent) completed through the following course: LABR 198-I
6. Students can also petition to the chair of the program to count towards the minor an independent study or regular course not listed above that is relevant to labor studies.

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

**Lower-Division Courses**

LABR 001 Introduction to Labor Studies
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. Through comparative and historical perspective, examines the social forces shaping labor conditions and workers' struggles for justice. Covers the changing nature of work under capitalism, race and gender discrimination in the labor market, the impact of economic globalization, and unions' successes and limitations.

**Upper-Division Courses**

LABR 1981 Individual Internship in Labor Studies
Lecture, 1 to 12 internship, 2 to 24 hours; written work, 1 to 12 hours. Prerequisite(s): upper-division standing; consent of instructor. Supervised experience in a labor union or related community organization. Focuses on the issues affecting workers and/or low-income people, as well as the prospects and challenges for achieving social justice for working-class people in the contemporary United States. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.
Latin American and Latino Studies Designated Emphasis

Subject abbreviation: LAS
College of Humanities, Arts, and Social Sciences
Jennifer Scheper Hughes, Chair
Associate Professor Department of History
jhughes@ucr.edu

Curriculum Committee
Alfonso Gonzalez, Associate Professor, Department of Ethnic Studies, alfonso.gonzales@ucr.edu

Designated Emphasis Requirements
The Designated Emphasis is a rigorous course of study, requiring students to demonstrate focused coursework and research in the field with three core requirements:

1. Four (4) graduate courses (16 units) with at least one of these courses emphasizing U.S.-Latin America experience and at least two with a primary axis of Mexico, Central America, South America, or the Caribbean. These courses must be taken in at least two different departments: AHS 260, ANTH 209, ANTH 218, ANTH 251, ANTH 264, ECON 260, ECON 261, ECON 262, ECON 264, ECON 265, ETS 223, ETS 244, ETS 245, ETS 246, HIST 206A, HIST 206B, HIST 285A, HIST 285B, MUS 271, MUS 263, POSC 278, PORT 246, HIST 206A, HIST 206B, HIST 285A, HIST 285B, MUS 271, MUS 263, POSC 278, PORT 201, SOC 243 (E-Z), SOC 261, SOC 265 (E-Z), SOC 282, SPN 257, SPN 258, SPN 270, SPN 272, SPN 273A, SPN 278, SPN 279, SPN 301.

2. Submission of a research portfolio within one year after the quarter in which the student advances to candidacy. The portfolio, to be reviewed by a standing committee of LAS faculty, will demonstrate significant research in the field, include two research papers and syllabi from the four courses accompanied by an introductory self-statement (of no more than 1000 words) articulating the particular research emphasis and its depth and breadth of engagement with the field along with an explanation of specific expertise and emphases.

3. Language certification is required through examination or coursework in a Latin American language: Spanish, Portuguese, Kreyol, or an indigenous language. Evidence of language certification must be included in the research portfolio (passing of a written translation exam, a full length (15pp+) research paper written in the language, or two or more years of language courses at the college or university level).

Major
Latin American Studies is an interdisciplinary, area studies major that allows students to combine insights from many related disciplines. The interdisciplinary focus permits students to study the anthropology, economics, geography, history, sociology, languages and cultures of the region to gain a broad understanding of a complex world area.

The Latin American Studies major provides great flexibility to explore a wide range of subjects of particular interest—from religious cults in the Caribbean to indigenous video in the Andes or the dynamics of agrarian reform in rural Mexico.

The flexibility of the major allows the possibility of completing a double major with other departments such as History, Anthropology, or Political Science.

UCR has a strong faculty in Latin American Studies, with more than 45 members drawn from departments across the campus. More than 125 courses taught at UCR have a significant focus on the region. The strength and breadth of the offerings at UCR permit each student to specialize in the particular country or discipline of greatest interest. Students have many opportunities to get involved in research projects with Latin American Studies professors. Students are encouraged to spend time living and studying in Latin America through, for example, Education Abroad.

Career Opportunities
The Latin American Studies major presents numerous opportunities after graduation. The interdisciplinary nature of the program prepares the student for further study in any number of academic fields at the graduate level, including anthropology, geography, history, sociology, Spanish and Portuguese, law, and journalism.

The B.A. degree itself is valuable preparation for many careers, including the U.S. foreign service, nongovernmental development and aid organizations, international organizations, large overseas corporations, banking, foreign missions, journalism and the media, and teaching.

University Requirements
See Undergraduate Studies section.

College Requirements
See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.
The specific requirements for the major are as follows:

1. Lower-division requirements (5 units)
   a) Introduction to Latin American Studies (LNST 001) or an equivalent course from the following list of lower-division courses:
      - LNST 001/ MUS 015, LNST 016/ MUS 016, LNST 017/ MUS 017, LNST 034/DNCE 034, LNST 035/DNCE 035, LNST 036/DNCE 036, LNST 037/DNCE 037, ANTH 010, ANTH 027/AHS 027, AHS 028, ETST 002, ETST 004/ HIST 004, ETST 008, MCS 025/ ENGL 021/TDFP 021, MCS 046/ SPN 046, HASS 022A, GBST 001, GBST 002, HIST 075, POSC 020, RLST 009, RLST 011, SPN 012, GSST 031H, GSST 020

b) Proficiency in Spanish to the SPN 005 level or in Portuguese to a comparable level

Note: Additional course work in Spanish and/or Portuguese recommended for students interested in careers in Latin American fields

2. Upper-division requirements (at least 36 units)
   a) At least two courses in three of the following groups (at least 24 units total):
      2. Economics and Business: BUS 114, BUS 138, BUS 185, ECON 122, ECON 178, ECON 181, ECON 182, ECON 185/ LNST 185, ECON 187/ LNST 187
      7. Politics: ETST 111, ETST 123, ETST 156, POSC 124 or POSC 125, POSC 126, POSC 157, POSC 159, POSC 160, LNST 142/POSOC 162, LNST 148/POSOC 158, SOC 181

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Graduate Program
The Ph.D. Designated Emphasis (DE) in Latin American Studies fosters communication, collaboration, and exchange with scholars across many departments within the university and at the national and international levels. Our faculty are active researchers in the social sciences, humanities and natural sciences. Students pursuing the D.E. will benefit from the prominence of the faculty combined with a range of courses and research opportunities.

Requirements
The Designated Emphasis is a rigorous course of study requiring students to demonstrate focused coursework and research in the field with three core requirements:

1. The program requires the completion of 4 graduate courses or 16 units (with at least one of these courses emphasizing U.S.-Latino experience and at least two with a primary axis of Mexico, Central American, South America, or the Caribbean). These courses must be taken in at least two different department and will be selected from the list below. Courses used to satisfy departmental Ph.D. requirements may not be applied to the D.E. (although courses taken within the student’s home department not required for the Ph.D. may be applied). The GPA for coursework cannot be below a 3.0.

2. The program also requires the submission of a research portfolio within one year after the quarter in which the student files for candidacy. The portfolio, to be reviewed by a standing committee of LAS faculty, will demonstrate significant research in the field, include 2-3 research papers and syllabi from the four courses accompanied by an introductory self-statement (of no more than 1000 words) articulating the particular research emphasis and its depth and breadth of engagement with the field along with an explanation of specific expertise and emphases.

3. Finally, the program requires language certification through examination or coursework in a Latin American language: Spanish, Portuguese, Kreyol, or an indigenous language. Evidence of language certification must be included in the research portfolio (passing of a written translation exam, a full length (15p+0) research paper written in the language, or two or more years of language courses at the college or university level).
Lower-Division Courses

LNST 001 Introduction to Latin American Studies 5 Lecture, 3 hours; screening, 1.5 hours; individual study, 3 hours; term paper, 1.5 hours. Introduces key issues in Latin American Studies and how scholars from diverse fields address them. Topics include indigenous cultures; colonial history; poverty; race, gender, and class inequalities; democracy and dictatorship; revolution; and civil war. Integrates film, literature, and music into the course.

LNST 015 Latin American Folk and Popular Styles 4 Lecture, 2 hours; discussion, 1 hour; assigned listening, 3 hours. Prerequisite(s): none. Introduction to the vast array of folk and popular styles of music in Latin America, with an emphasis on cultural and ethnic interaction and exchange in the context of Latin American history, politics, and society. Cross-listed with MUS 015.

LNST 016 Latin American Classical Heritage 4 Lecture, 2 hours, discussion, 1 hour; assigned listening, 3 hours. Prerequisite(s): none. Survey of the rich heritage of Latin American classical music from Renaissance sacred polyphony to contemporary styles. Emphasis on the gradual emergence of Latin American music from European domination and the establishment of distinctive national traditions in the post-colonial era. Cross-listed with MUS 016.

LNST 017 Music of Mexico 4 Lecture, 3 hours, discussion, 1 hour; assigned listening, 1 hour. Prerequisite(s): musical training and knowledge of Spanish is useful, but not required. Covers music from 1521 to the present day. Explores the rich musical tradition of Mexico, as well as the relationship between its art and popular music. Cross-listed with MUS 017.

LNST 027 Art of Pre-Columbian America 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): none. A survey course that provides a background to the ancient art of Mexico, Central America, and the Andean region of western South America. Discusses art of pre-Columbian America according to the three broad cultural regions of Mesoamerica, the lower part of central and northwestern South America, and the Andean area. Cross-listed with AHS 027, and ANTH 027.

LNST 028 Art and Architecture of Latin America 4 Lecture, 3 hours; discussion, 1 hour; individual study, 2 hours. Introduces Latin American art and architecture from the European conquest to the present. Topics include religious and secular art and architecture; hybridization of indigenous and imported styles; national styles after independence; Mexican murals; women artists; Latin American modernismo; and Chicano and Border art. Cross-listed with AHS 028.

LNST 073A Dance of Mexico 2 Studio, 3 hours; extra reading, 1 hour; screening, 1 hour; individual studio, 1 hour. Prerequisite(s): none. Covers the traditional dances of Mexico at the beginning level. Includes attendance at dance concerts outside of class. Recommended for both nondancers and dancers. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable. Cross-listed with MUS 073A.

LNST 073B Dance of Mexico 2 Studio, 3 hours; extra reading, 1 hour; screening, 1 hour; individual studio, 1 hour. Prerequisite(s): LNST 073A/MUS 073A is recommended. Covers the traditional dances of Mexico at the beginning level. Includes attendance at dance concerts outside of class. Recommended for both nondancers and dancers. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable. Cross-listed with MUS 073B.

Upper-Division Courses

LNST 104 An Introduction to the Study of Spanish and Comparative Linguistics 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. An introduction to the study of Spanish and comparative linguistics. Cross-listed with SPN 104.

LNST 105 Imagining the Nation: Film and Media in Latin America 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): MCS 020 or upper-division standing or consent of instructor. Focus is on one region or nation such as the Andes, the Caribbean, Mexico, Argentina, or Chile—relating local history to the global context. Course is repeatable as topics change to a maximum of 8 units. Cross-listed with MCS 185, and SPN 185.

LNST 109 Gender, Media, and Latin America 5 Lecture, 3 hours; screening 3 hours; research 3 hours. Prerequisite(s): MCS 020 or upper-division standing or consent of instructor. Explores the way Latin Americans have thought of and represented gender across a variety of media including essays, film, novel, short story, and performance. Compares the possibilities and limitations of these media for representing gender in the Latin American context. Cross-listed with MCS 179, SPN 179, and GSST 179.

LNST 112 The Art of the Aztec Empire 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): AHS 027/ANTH 027/LNST 027 or upper-division standing or consent of instructor. Introduces the art of the Aztec Empire. Studies architecture, sculpture, ceramics, painting, lapidary work, gold work, and feather work. Explores the relationship between art and ritual and art and the imperial state. Cross-listed with AHS 112 and ANTH 151.

LNST 114 History of Brazilian Art & Architecture 4 Lecture, 3 hours; outside research, 1 hour; term paper, 1 hour; written work, 1 hour. Prerequisite(s): the instructor, junior, or senior standing or consent of instructor. The history of Brazilian art and architecture from the nineteenth century to present. Explores visual culture including painting, sculpture, prints, murals, architecture, urbanism, landscape design, and installation art. Studies artworks and buildings through a social historical framework, taking into consideration topics like colonialism, modernization, underdevelopment, race, nationalism, internationalism, and globalization. Cross-listed with AHS 114.

LNST 115 Modern and Contemporary Art of Latin America 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. A study of Latin American art from circa 1900 to the present. Considers national and regional histories and artistic trajectories beginning with the advent of an artistic avant-garde. Investigates the relationships between European and Latin American developments. Cross-listed with AHS 115.

LNST 116 Architecture and Arts of the Andes 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. An introduction to architecture, urbanism, and related material culture of the Andes from ancient times to the present. Focuses on the diverse and rich architectural heritage of an important building center in the Americas. Addresses architecture’s relationship to artistic and material production such as painting, pottery, sculpture, city planning, and textiles. Cross-listed with AHS 116.

LNST 117 Visual Culture of the Incas 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the art, architecture, and urban form of the Inca civilization. Examines how these elements influenced state formation, conquest, and resistance. Includes studies of urban plans, buildings, paintings, textiles, prints, sculpture, metalwork, and ceramics. Cross-listed with ANTH 157, and AHS 117.

LNST 120 Major Topics in Hispanic Literature: Latin America 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): SPN 110. Reading and analysis of major texts of authors from Latin America. Cross-listed with SPN 120C.

LNST 124 Conceptual Art in Latin America 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Considers conceptual art made across Latin America, from 1960s to present. Focuses on subversive strategies artists developed to critique military dictatorships then in power, while circumventing legalized censorship. Considers localized versions of conceptual art in Santiago, Buenos Aires, Rio de Janeiro, Havana, Mexico City, and situate them within international movement. Cross-listed with AHS 124.

LNST 125 (E-Z) Topics in Latin American Film and Media 5 Lecture, 3 hours; extra reading, 3 hours; screening, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Intensive formal, historical, and theoretical analysis of a theme or issue in Latin American film and media. E. Indigenous Video & Latin America. Cross-listed with MCS 125 (E-Z), and SPN 125 (E-Z).
LNST 129A Introduction to Maya Hieroglyphs 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or ANTH 005 or ANTH 007 or ANTH 007S; or consent of instructor. Introduces the Maya hieroglyphs and critically evaluates its political history. Topics include three Maya calendars, a basic grammar (logographs, syllables, verbs, pronouns), three writing methods (transcriptions, transliteration, and translation), dynastic events, gods, supernaturals, and political interactions. Cross-listed with ANTH 129A, and CPAC 129A.

LNST 129B The Linguistics of Ancient Maya Writing 4 Lecture, 3 hours; extra reading, 2 hours; research, 3 hours; term paper, 1 hour. Prerequisite(s): ANTH 129A; or consent of instructor. Analyzes and critically evaluates the linguistics of Ancient Maya Writing. Topics include grammar (transitive, intransitive, positional, active, passive, mediopassive, antipassive, inchoactive verbs, tense, aspect, transitive perfect, noun, pronoun, morphosyllable, phonology); three writing methods (transcriptions, transliteration, and translation); title and rank; scripts and ideologies; and dynastic interactions. Cross-listed with ANTH 129B, and CPAC 129B.

LNST 142 Latin America: the Quest For Development and Democracy 4 Lecture, 3 hours; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): restricted to class level standing of junior; or senior; or consent of instructor. Provides a comparative examination of central issues in and components of Latin American political life. Covers economic development, regimes and alliances, guerrilla wars, the armed forces, human rights, and democratic consolidation. Includes Argentina, Chile, Venezuela, and Peru. Cross-listed with POSC 162. Credit is awarded for one of the following POSC 162, LNST 142, LNST 142S, or POSC 162S.

LNST 142S Latin America: the Quest For Development and Democracy 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): restricted to class level standing of junior; or senior. A comparative examination of central issues in and components of Latin American political life. Covers economic development, regimes and alliances, guerrilla wars, the armed forces, human rights, and democratic consolidation. Includes Argentina, Chile, Venezuela, and Peru. Cross-listed with POSC 162S. Credit is awarded for one of the following POSC 162S, LNST 142S, LNST 142, or POSC 162S.

LNST 148 Politics of Mexico 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. A survey of contemporary Mexican politics. Emphasis is on recent economic and social changes and their impact on Mexico's political system. Topics include relations with the United States, the rise of drug trafficking in Mexico, and the recent emergence of opposition politics. Cross-listed with POSC 158.

LNST 168 Caribbean Culture and Society 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. An overview of the Caribbean region from a historical, cultural, and political perspective. Emphasizes contemporary issues affecting the Caribbean and the struggle of its people to maintain their identities. Cross-listed with ANTH 146G, and ETST 148.

LNST 170 Colonial Latin America 4 Lecture, 3 hours; extra reading, 2 hour; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. A history of Latin America from pre-Columbian times to independence with an emphasis upon selected themes concerning the social, economic, and cultural aspects of colonialism. Cross-listed with HISA 160.

LNST 171 Nineteenth-Century Latin America 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Topics include the breakdown of political order and the problem of the nation-state, liberalism and conservatism, slavery and abolition, foreign intervention and capital investment, the reemergence of political order in the Age of Liberalism (1860-1900), and social and cultural change. Cross-listed with HISA 161.

LNST 172 Twentieth-Century Latin America 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Topics include the Mexican Revolution, the Great Depression, populism, industrialization, revolution, and the emergence of conservative regimes in the age of neoliberalism. Cross-listed with HISA 162.

LNST 185 Economic Development in Latin America 4 Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 103 or ECON 104A or ECON 105A. A comparative analysis of the major trends in Latin American economies in the twentieth century. Includes historical legacies, import substitution industrialization, and the debt crisis. Also covers stabilization and structural adjustment, poverty and inequality, agriculture, and labor reform, and the environmental impact of development. Cross-listed with ECON 189.

LNST 189 Economic Development in Brazil 4 Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A; ECON 103 or ECON 105A. An analysis of the successes and failures of economic development in the largest country in Latin America. Reviews current issues facing Brazilian policy makers. Topics include historical legacies, import substitution and industrialization, poverty and inequality, agriculture and labor reform, and the environmental impact of development. Cross-listed with ECON 189.

LNST 190 Special Studies 1 to 5 Consent of the instructor and the Latin American Studies Committee required.

Law and Society

Subject abbreviation: LWSO
College of Humanities, Arts, and Social Sciences
Piotr Gorecki, Ph.D., Chair
Committee Office, 1604 Humanities and Social Sciences
(951) 827-5208; lawandsociety.ucr.edu

Committee in Charge
Piotr Gorecki, Chair (History)
John COFFI (Political Science)
Carl Cranor (Philosophy)
Paul Green (Ethnic Studies)
Alexander Haskell (History)
Fariba Zarinebaf (History)
Daryle Williams, Dean, ex officio

Professors Emeriti
David Eastmond (Neuroscience)
Robert Parker (Sociology)
Georgia Warnke (Philosophy)

Major
The Law and Society major is open to undergraduate students with junior standing who have completed LWSO 100 with a grade of “C” or higher. The major offers an interdisciplinary liberal arts approach to the study of legal and law-like relationships and institutions. The program combines the perspectives of various disciplines in the Humanities and Social Sciences. The multidisciplinary approach introduces students to a wider range of views about law than is generally possible within a single department, provides a coherent and rigorous program of courses organized around the theme of law and law-like relationships, and allows students to develop critical thinking about law and social institutions.
For students not planning to pursue graduate studies, this program offers a means of understanding some complex relationships between social institutions. For those who plan to pursue graduate studies, the breadth of course work should provide a sound basis for graduate study in areas related to law: history, philosophy, political science, and sociology, among others. And for students who choose to pursue the study of law in a professional school of law, the curriculum can offer a sound background.

Students may select Law and Society as a major with the departments of Anthropology, Economics, History, Philosophy, Political Science, Psychology, and Sociology.

University Requirements
See Undergraduate Studies section.

College Requirements
See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

Major Requirements
The major requirements for the B.A. degree in Law and Society are as follows:

1. Specified requirements of the cooperating department (See the departments of Anthropology, Economics, History, Philosophy, Political Science, Psychology, or Sociology.)

2. Law and Society requirements (36 units)
   a) PHIL 007 or PHIL 007H
   b) LWSO 100 (with a grade of "C" or better)
   c) One course chosen from POSC 114, PSYC 012, SOC 004 (or equivalent course in research methods)
   d) Three courses chosen from ANTH 127, ECON 119, HISE 153, PHIL 165, POSC 167, PSYC 175, SOC 159
   e) Two courses chosen from HISA 120A, HISA 120B, HISE 123, LWSO 175 (E-Z), PHIL 164, POSC 111, POSC 166, POSC 168, POSC 186, SOC 147, SOC 149, SOC 180
   f) LWSO 193, Senior Seminar

Note
For sections 2.d) and 2.e) combined, not more than two courses may be taken from the same department. In filling the dual requirements of the major, students may not count more than two courses toward both parts of their total requirements (specified departmental requirements and Law and Society requirements).

Minor
The minor in Law and Society has the following requirements.

1. Upper Division (six courses [at least 24 units])
   a) LWSO 100
   b) Three courses chosen from ANTH 127, ECON 119, HISE 153, PHIL 165, POSC 167, PSYC 175, SOC 159
   c) Two courses chosen from HISA 120A, HISA 120B, HISE 123, PHIL 164, LWSO 175 (E-Z), POSC 111, POSC 166, POSC 168, POSC 186, SOC 147, SOC 149, SOC 180

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Upper-Division Courses
LWSO 100 Introduction to the Study of Law and Society 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to class level standing of sophomore, junior, or senior; or consent of instructor. An introduction to the interdisciplinary study of the role of law and legal institutions in society. Examines the role of criminal, tort, contract, constitutional, or other areas of the law in society from different disciplinary perspectives. Credit is awarded for one of the following LWSO 100 or LWSO 100H.

LWSO 100H Honors Introduction to the Study of Law and Society 4 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Honors course corresponding to LWSO 100. An introduction to the interdisciplinary study of the role of law and legal institutions in society. Examines the role of criminal, tort, contract, constitutional, or other areas of the law in society from different disciplinary perspectives. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of LWSO 100 or LWSO 100H.

LWSO 175 (E-Z) Topics in Law and Society 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): LWSO 100 or LWSO 100H. Addresses current topics in law and society.

LWSO 175E Convicting the Innocent 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): LWSO 100 or LWSO 100H; upper-division standing. Considers the causes of false convictions.

LWSO 180A Symposium in the Law 1 Seminar, 10 hours per quarter. Prerequisite(s): upper-division standing; consent of instructor in the preceding quarter. A discussion of legal matters of common interest, in conjunction with experts from outside the university. After completing LWSO 180A, LWSO 180B, and LWSO 180C, students may repeat the sequence once for credit; total credit for each course may not exceed 2 units.

LWSO 180B Symposium in the Law 1 Seminar, 10 hours per quarter. Prerequisite(s): LWSO 180A. A discussion of legal matters of common interest, in conjunction with experts from outside the university. After completing LWSO 180A, LWSO 180B, and LWSO 180C, students may repeat the sequence once for credit; total credit for each course may not exceed 2 units.

LWSO 180C Symposium in the Law 1 Seminar, 10 hours per quarter. Prerequisite(s): LWSO 180B. A discussion of legal matters of common interest, in conjunction with experts from outside the university. Graded Satisfactory (S) or No Credit (NC). After completing LWSO 180A, LWSO 180B, and LWSO 180C, students may repeat the sequence once for credit; total credit for each course may not exceed 2 units.

LWSO 192 Science and Law 4 Lecture, 3 hours; extra reading, 1 hour; outside research, 1 hour; term paper, 1 hour. Prerequisite(s): LWSO 100 or LWSO 100H. Discusses the intersection between science and law. Also compares legal and scientific procedures and decision making.

LWSO 193 Senior Seminar in Law and Society 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): LWSO 100 or LWSO 100H; senior standing in Law and Society/Anthropology, Law and Society/Economics, Law and Society/History, Law and Society/Philosophy, Law and Society/Political Science, Law and Society/Psychology, or Law and Society/Sociology. Aims to synthesize multidisciplinary perspectives and knowledge provided by other courses in the Law and Society Program through readings, group discussion, and research on an issue or problem in law and society. Covers topics such as law and morality, law and social change, law and religion, and law and culture. Satisfactory (S) or No Credit (NC) grading is not available.

LWSO 1981 Individual Internship in Law and Society 4 to 8 Consultation, 1 to 2 hours; term paper, 3 to 6 hours; internship, 8 to 16 hours. Prerequisite(s): LWSO 100 or LWSO 100H; consent of instructor and department chair; upper-division standing. An individual internship in the professional legal or policy-making community. Requires a substantive paper relating the internship to the student’s area of study.

Liberal Studies
Subject abbreviation: LBST
College of Humanities, Arts, and Social Sciences
Heidi Brayman, Ph.D., Director
liberalstudies.ucr.edu

Stephen James (Liberal Studies)
Cathy Lussier (Learning and Behavioral Sciences)
Danyle Williams, Dean, ex officio

Major
Liberal Studies is the major of choice for students seeking a broad liberal arts education in the humanities, arts, and social sciences. The flexibility of the requirements allows students to tailor the major to their interests across multiple disciplines, as they prepare for graduate study and careers in education, law, business, and medicine. For students planning on teaching careers in elementary education, a core of lower-division courses provides broad subject matter coverage, and upper-division work includes Education courses.

For information about undergraduate requirements, contact the LBST Advisors at chassmajorsadvising.ucr.edu. Information about UCR’s credential programs can be found at the School of Education website, education.ucr.edu/teach or at 1124 Sproul Hall.
University Requirements
See Undergraduate Studies section.

College Requirements
See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

Major Requirements
The major requirements for the B.A. degree in Liberal Studies are as follows:

1. Lower-division requirements (12 courses (at least 48 units)). Courses can be used to fulfill college breadth requirements.
   a) Science and Mathematics (4 courses (at least 16 units)) from: BIOL, CHEM, CS, GEO, MATH, or PHY.
   b) Humanities and Fine Arts (4 courses (at least 16 units)) from: ART, AHS, CPLT, CRWT, DANCE, ENGL, LING, MUS, PHI, or TFD.

2. Upper-division requirements: 10 courses (at least 40 units).
   a) One writing course from: ENGL 103 or CRWT 130.
   b) One course in American/European Literature or Arts, not to include language study, from: ART, AHS, CLA, CPAC, CPLT, DANCE, ENGL, EUR, FREN, GER, ITAL, LATIN, LNST, MUS, MCS, PHI, PORT, RUSN, SPN, or TFD.
   c) One course in non-Western Literature or Arts or Gender Studies, not to include language study, from: AHS, ART, ARLC, AST, CHN, CPLT, DANCE, ETST, GSST, JPN, KOR, MCS, MUS, PHI, PORT, RUSN, SPN, or TFD.
   d) One course in U.S. History or Government/Politics, Economics, or Society from: ANTH, ECON, HIST, POSC, or SOC.
   e) One course in Communications or Technology from: ANTH, AHS, ART, CPLE, CS, ECON, ENGL, ETST, GSST, MCS, PHI, or TFD.
   f) One course with a Global Perspective from: AHS, ANTH, ECON, ETST, GSST, HIST, LNST, PHI, POSC, RLLST, or SOC.
   g) Three additional upper-division courses offered in the College of Arts and Social Sciences OR for pre-teaching credential students, three from the following: EDUC 132, EDUC 147, EDUC 162, EDUC 171 or 172, EDUC 177 or 178, EDUC 179A.
   h) Liberal Studies Capstone Course: LBST 191 or LBST 190

3. Exit Portfolio: Students will compile at least three pieces of written work from upper-division courses, one of which must specifically address research methodology, broadly understood, and evidence of applied research or work experience – e.g., a fourth paper, journal/report from an internship or experiential learning exercise, or, for pre-teaching credential students, a record of classroom experience.

Lower-Division Courses

**LBST 001 Introduction to Liberal Studies 5**
Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours. Introduces the richness of the Liberal Studies tradition. Incorporates approaches and integrates learning from the Natural Sciences, Social Sciences, and Arts and Humanities.

**LBST 020W Writing Across the Disciplines in Liberal Studies 5**
Lecture, 3 hours; discussion, 1 hour; written work, 3 hours; extra reading, 3 hours. Prerequisite(s): ENGL 001B with a grade of C or better; ENGL 007 may be taken concurrently; for concurrent enrollment in ENGL 007, review the course titles or topics in the current online Schedule of Classes to find the corresponding ENGL 007 writing workshop. Develops expository and analytical writing skills. Explores the varying expectations, forms, and objectives across the range of disciplines incorporated in the Liberal Studies major. Focuses on multi- and interdisciplinary writing to prepare for upper-division courses offered in the College of Humanities and Social Sciences. Fulfills the third-quarter writing requirement for students who earn a grade of “C” or better for courses that the Academic Senate designates, and that the student's college permits, as alternatives to English 001C.

Upper-Division Courses

**LBST 190 Special Studies 1 to 5**
Individual Study, 2 to 10 hours; written work, 5 to 2.5 hours; tutorial, 5 to 2.5 hours. Prerequisite(s): upper-division standing or consent of instructor. Includes preparation of a written proposal endorsed by a supervising instructor as a means of meeting individual curricular needs.

**LBST 191 Seminar in Liberal Studies 4**
Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Facilitates student efforts to bring together the knowledge, skills, and interests developed to this point through all aspects of their education. Includes a paper or project and completion of an e-portfolio.

Management

**Subject abbreviation: MGT**

**The A. Gary Anderson Graduate School of Management**

Kathleen Montgomery, Ph.D. Distinguished Professor (Management)
Michael Moore, Ph.D. (Accounting and Information Systems)
Ammon Rapoport, Ph.D. Distinguished Professor (Management)
Waymond Rodgers, Ph.D. (Accounting and Information Systems)
Jorge Silva-Risso, Ph.D. (Marketing)
David Stewart, Ph.D. Distinguished Professor (Marketing)

**Associate Professors**

Hai Che, Ph.D. (Marketing)
Long Gao, Ph.D. (Operations and Supply Chain Management)
Elodie Goodman, Ph.D. (Operations and Supply Chain Management)
Michael P. Haselhuhn, Ph.D. (Management)
Hyun ‘Shana’ Hong, Ph.D. (Accounting and Information Systems)
Yawen Jiao, Ph.D. (Finance)
Ye Li, Ph.D. (Management)
Boris Maciejovsky, Ph.D. (Management)
Marlo Raveendran, Ph.D. (Management)
Ashish Sood, Ph.D. (Marketing)
Danko Turcic, Ph.D. (Operations and Supply Chain Management)
Elaine Wong, Ph.D. (Management)
Ivy Zhang, Ph.D. (Accounting and Information System)

**Assistant Professors**

Eric Allen, Ph.D. (Accounting)
Alexander Barinov, Ph.D. (Finance)
Neman Desai, Ph.D. (Accounting)
Mengmeng Dong, Ph.D. (Finance)
Kyle Ingram, Ph.D. (Management)
Mingyu (Max) Joo, Ph.D. (Marketing)
Demetrius Lewis, Ph.D. (Management)
Johnthan Lim, Ph.D. (Marketing)
Haibo Liu, Ph.D. (Management)
Sanjoy Moulik, Ph.D. (Information Systems)
Adem Orsdemir, Ph.D. (Operations and Supply Chain Management)
Greg Richey, Ph.D. (Finance)
Rich Yueh, Ph.D. (Information System)
Y. Charles Zhang, Ph.D. (Marketing)

**Lecturers**
Sean Jasso, Ph.D. (Management and Marketing)
Asish Satpathy, Ph.D. (Information Systems and Finance)
Raj Singh, Ph.D. (Management and Marketing)

**Graduate Programs**
The A. Gary Anderson Graduate School of Management offers a variety of programs leading to the M.B.A. (Master of Business Administration) degree. These include a two-year, full-time M.B.A. program, and a Professional M.B.A. (PMBA) program, which may be completed in 27-33 months. AGSM also offers a Master of Professional Accountability (M.P.A.C.) and a Master of Finance (M.Fin.). The Ph.D. Program in Business Administration offers the Doctor of Philosophy Degree (Ph.D.). In limited circumstances, students in the Ph.D. Program may be awarded a degree (the Master of Arts (M.A.) in Management should they fail to complete their doctoral studies.

**Master of Business Administration**
Applications for the full-time M.B.A. program are accepted for fall, winter, and spring entry. The program is open to eligible students from all undergraduate majors. Quantitative methods (business calculus, statistics, and linear algebra) is a prerequisite to the program. Qualified students who have not taken this prerequisite course may be admitted, but must meet this requirement during their first two quarters in residence.

Admission to the full-time MBA program is made based on a holistic assessment of the applicant’s background and achievements, including academic preparedness (mandatory undergraduate GPA and optional GMAT/GRE scores), professional and/or academic experiences including extra-curricular activities, recommenders’ opinions and supporting evidence, written and oral communication, leadership potential, overcoming adversity and contributions to diversity.

Although submitting GMAT/GRE score is optional, a superior GMAT/GRE score may help offset weakness in other evidence of academic preparation and can enhance funding considerations. Not submitting GMAT/GRE score does not reduce an applicant's chances of being admitted if their GPA is 3.0 or better.

Applicants whose first language is not English are required to submit acceptable scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System.

All other application requirements are specified in the graduate application or in the General UCR catalog.

**Masters of Business Administration Course Work**
The M.B.A. program can be completed in two years on a full-time basis or in three to four years on a part-time basis. In the 80-unit program (20 courses), all students take 36 units in a common body of knowledge that consists of courses in quantitative analysis, managerial economics, financial accounting, finance, operations and management science, information systems, organizational behavior and theory, strategic management, and marketing management. Thereafter, students complete a required internship, 28-36 units selected from electives, a management synthesis course, and a thesis or an industry-based case project (in the management synthesis class MGT 238).

Electives are selected with the assistance of a faculty advisor to meet individual educational and career goals. Electives are offered in areas such as accounting, entrepreneurial management, finance, human resources management, international management, management science, management information systems, marketing, and production and operations management. The program is flexible to meet individual student interests, and students are also encouraged to take courses in related disciplines such as economics, statistics, computer science, and sociology.

**Prerequisite Requirement:**
Students without a quantitative background are required to complete a quantitative review. This can be done through an external quantitative review or through completion of MGT 403: Review of Quantitative Methods for Management. If students choose to do the external review, this must be completed prior to, and no later than one week before their MBA program begins. AGSM will provide recommendations for external review programs at the point of admission.

Choosing a concentration is optional. Students who choose to specialize in a second concentration has to take 40 units of electives courses. They have to complete additional 4 units beyond the 36 units required for graduation.

**Degree Requirements:**
1. **Prerequisite Requirement:** Students without a quantitative background are required to complete an external quantitative review program prior to, or during, their MBA program. AGSM will provide recommendations for review programs at the point of admission.
2. **Professional Workshops (2 units)**
   a. Full Time MBA Students Only: MGT 402: Business Career Professional Development Workshop
3. **Common Body of Knowledge (36 units)**
   a. MGT 200: Organizational Behavior and Theory
   b. MGT 201: Quantitative Analysis
   c. MGT 202: Financial Management
   d. MGT 203: Economics for Management
   e. MGT 205: Information Systems
f. MGT 207: Operations Management for Competitive Advantage
h. MGT 209: Marketing Management
i. MGT 239: Strategic Management
4. **Fieldwork in Management (4 units)** – MGT 298i
5. **Electives Courses and Concentration:** Students are required to complete at least 28 units of electives for the thesis option and 36 units for the comprehensive exam (MGT 238) option. Students may choose to focus their elective courses such that they complete one or more concentrations in Accounting, Business Analytics, Finance, Information Systems, Management, Marketing, or Operations and Supply Chain Management (OSCM). Students who choose to specialize in a second concentration must take an additional 4 units beyond the 36 units required for graduation (comprehensive exam option). Each concentration consists of five courses as follows:

**Accounting:**
Choose five courses from the seven courses below:
MGT 204 - Cost and Management Accounting
MGT 225 - Professional & Forensic Accounting
MGT 226 - Fraud and Forensic Auditing
MGT 229 - Accounting Ethics & Professional Responsibilities
MGT 240A - Taxation
MGT 240B - Advance Taxation
MGT 241 - Accounting Systems and Control
MGT 245 - Financial Statement Analysis
MGT 277 - Advanced Financial Accounting
MGT 278A - Foundations of Auditing and Assurance Services
MGT 278B - Information Technology & Auditing Assurance
MGT 278C - Internal Auditing

**Business Analytics:**
The concentration consists of two required courses and three elective courses:

**Required Courses:**
MGT 251 - Marketing Analytics
MGT 256 - Business Analytics for Management

**Elective Courses:**
MGT 219 - Spreadsheet Modeling for Decision Making
MGT 230: Databases for Management
MGT 233 - Marketing Research
MGT 239 - Simulation for Business
MGT 267 - Applied Business Forecasting
Finance:
The concentration consists of three required courses and two elective courses:

**Required Finance Courses:**
- MGT 227 - Fixed-Income Securities and Markets
- MGT 231 - Corporate Finance
- MGT 252 - Investments and Portfolio Management

**Elective Finance Courses:**
- MGT 213 - Trading Strategies and Financial Models
- MGT 232 - Derivatives and Asset Pricing
- MGT 237 - International Financial Management
- MGT 244 - Corporate Risk Management
- MGT 268 - Entrepreneurial Finance and Venture Capital
- MGT 276 - Financial Strategy and Corporate Control
- MGT 295F - Seminars in Finance: Empirical Methods in Finance
- MGT 295G - Seminars in Finance: Corporate Finance

**Information Systems:**
Choose five courses from the nine courses below:
- MGT 230 - Database for Management
- MGT 239 - Business Modeling and Simulation
- MGT 241 - Accounting Systems and Control
- MGT 256 - Business Analytics for Management
- MGT 264 - Information Systems Resource Management
- MGT 278B - Information Technology Auditing and Assurance
- MGT 280 - Business Issues in Electronic Commerce
- MGT 281 - System Analysis and Design
- MGT 282 - Business Data Communication

**Marketing:**
Choose five courses from eight courses below:
- MGT 228 - Consumer Behavior
- MGT 233 - Marketing Research
- MGT 234 - Brand Management
- MGT 242 - Global Marketing Management
- MGT 243 - Entrepreneurial Marketing
- MGT 247 - Advertising and Sales Promotion Management
- MGT 248 - New Product Development
- MGT 249 - Pricing Strategy
- MGT 250 - Marketing Channels and Sales Force
- MGT 251 - Marketing Analytics
- MGT 253 - Digital Marketing
- MGT 254 - Internet Retailing Project
- MGT 257 - Marketing Strategy

**OSCM:**
Must complete five courses from the list below:
- MGT 219 - Spreadsheet Modeling for Decision-Making
- MGT 221 - Decision Making Under Uncertainty
- MGT 239 - Business Modeling and Simulation
- MGT 256 - Business Analytics for Management
- MGT 258 - Logistics and Supply Chain Management
- MGT 266 - Project Management
- MGT 267 - Applied Business Forecasting

**Normative Time to Degree**
- 7 quarters - M.B.A.; 6 quarters - M.Fin. and M.P.Ac.
- 15 quarters – Ph.D.

**Masters of Business Administration**
Candidates for the M.B.A. are required to complete all the general requirements specified in the Graduate Studies section of this catalog. The program conforms to Plan I or Plan II.

**Plan I (Thesis)**
For thesis work, a maximum of 8 units of credit is granted. The thesis is a two or more quarter research endeavor to be initiated during a student’s final year in the program. It is expected that most students will develop theses related to advanced work in their electives. The format and other details of the thesis must meet the requirements of the Graduate Division of UCR.

**Plan II (Comprehensive Examination)**
Students who elect Plan II must complete an industry-based group case analysis as part of the management synthesis course. This case serves in lieu of a comprehensive final examination. Students whose case analyses are deemed "not acceptable" are given one additional quarter to revise them to an "acceptable" level.

**Professional M.B.A.**
The Professional M.B.A. program provides an M.B.A. experience tailored according to one’s schedule. It allows flexibility and convenience in attaining one of the most sought-after degrees. The Professional M.B.A. is the program of choice for a broad swath of students. Among them might be full-time students who want to earn an M.B.A. on a fast track or who seek to take longer with their studies, international students looking for an M.B.A. at a top university, working professionals seeking a graduate degree without interrupting their careers, or individuals who need to accommodate responsibilities at home and with family as they pursue their academic goals.

**Professional Master of Business Administration Program (Professional M.B.A.) Track-1**

| Time MBA curriculum, but students have the option to attend classes on weeknights and weekends during the program. Additionally, students in the PMBA Track 1 program are exempt from MGT 402. |

The Professional M.B.A. program admits new students for enrollment in fall, winter, or spring. Further information may be obtained by contacting the University of California, Riverside, Professional M.B.A. Program Office.

Students interested in pursuing the PMBA degree must have earned a BA, or its equivalent, with training comparable to that provided by the University of California. Evaluation of the applicant’s file for admission to the Professional M.B.A. degree program is similar to that of the full-time M.B.A. program and will consist of an integrated assessment of all materials (test scores, transcripts of previous academic work, essays, and letter(s) of recommendation). No specific undergraduate major or course work is required for admission, though preparation in quantitative methods (such as calculus and statistics) is strongly encouraged. Students who do not have adequate quantitative preparation at the time of admission will need to complete preparatory coursework in mathematics in addition to the courses required for the degree.

Admission to the PMBA program is made on a holistic assessment of the applicant’s background and achievements, including academic preparedness (mandatory undergraduate GPA and optional GMAT/GRE scores), professional and/or academic experiences including extra-curricular activities, recommenders’ opinions and supporting evidence, written and oral communication, leadership potential, overcoming adversity and contributions to diversity.
Although submitting GMAT/GRE score is optional, a superior GMAT/GRE score may help offset weakness in other evidence of academic preparation and can enhance funding considerations. Not submitting GMAT/GRE score does not reduce an applicant’s chances of being admitted if their GPA is 3.0 or better.

Applicants whose first language is not English are required to submit acceptable scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System.

Applicants must submit at least one letter of recommendation from individuals who can attest to their professional and leadership skills and to their potential for business leadership.

All other application requirements are specified in the graduate application or in the General UCR catalog.

Normative time
27-33 months

Further information may be obtained by contacting the Graduate Programs Office at the School of Business.

Professional Master of Business Administration Program
(Professional M.B.A.) Track-2

The Professional M.B.A. Program Track-2 will provide a more efficient path way to earn an MBA for undergraduate students, as well as graduates from other schools. The proposed program will be available to students in all 4+1 and 2+ 1 programs (BS/ MBA, BA/MBA, MD /MBA, MS/MBA, MA/MBA) as well as for professionals with at least 3 years of work experience, and students from any other special programs created in future.

Admissions: The admission criteria for Track 2 is the same as the criteria for Track 1.

Course Work

The Professional MBA Track 2 is a 64 units degree consisting of 36 units of core courses, 20 units of elective courses, a 4 unit required internship course, and 4 units of a capstone course. To continue in the program students must maintain a minimum cumulative GPA of 3.0.

The curriculum includes the following components:

1. Common Body of Knowledge (36 units)
   a. MGT 200: Organizational Behavior and Theory
   b. MGT 201: Quantitative Analysis
   c. MGT 202: Financial Management
   d. MGT 203: Economics for Management
   e. MGT 205: Information Systems
   f. MGT 207: Operations Management for Competitive Advantage
   g. MGT 209: Marketing Management
   h. MGT 211: Financial Accounting
   i. MGT 235: Strategic Management

2. Elective Courses (20 units)
   a. Students will complete 20 units of elective courses (MGT 210, MGT 212-MGT 233, MGT 236-MGT 282, MGT 288A- 290, MGT 292-MGT 298i)

3. Fieldwork in Management: MGT 298i (4 units)

4. Capstone (4 units): Students are required to complete either Plan I or Plan II for the capstone requirement. See the MBA section of the catalog for more details.

Executive Master of Business Administration Program (E.M.B.A.)

The E.M.B.A. program is not currently accepting new students. For more information, contact SB’s M.B.A. Program Office, 102 Anderson Hall, South; (951) 827-6200.

Applications for the Executive M.B.A. program are no longer accepted. Applications are not accepted for the M.A. in Management degree.

Master of Finance (M.Fin.)

The A. Gary Anderson Graduate School of Management offers a Master of Finance (M.Fin.) degree. The degree program consists of a full-time one-academic-year program (or its equivalent on a part-time basis).

Admission

The M.Fin. is offered as a one-year program (48 units) for graduates who hold a baccalaureate degree in a field that provides sufficient quantitative background to enable successful completion of the program. Appropriate undergraduate majors include, but are not limited to, business, engineering, mathematics, statistics, and physics, among others.

All applicants to this program must have completed a bachelor’s degree or its equivalent from an accredited institution, and have attained an undergraduate record that satisfies the standards established by the Graduate Division and University Graduate Council.

Applications are accepted for fall term.

Admission to the MFin program is made based on a holistic assessment of the applicant’s background and achievements, including academic preparedness (mandatory undergraduate GPA and optional GMAT/ GRE scores), professional and/or academic experiences including extra-curricular activities, recommender’s opinions and supporting evidence, written and oral communication, leadership potential, overcoming adversity and contributions to diversity.

Although submitting GMAT/GRE score is optional, a superior GMAT/GRE score may help offset weakness in other evidence of academic preparation and can enhance funding considerations. Not submitting GMAT/GRE score does not reduce an applicant’s chances of being admitted if their GPA is 3.0 or better.

Applicants whose first language is not English are required to submit acceptable scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) unless they have a degree from an institution where English is the exclusive language of instruction. Additionally, each applicant must submit at least one letter of recommendation. All other application requirements are specified in the graduate application or in the General UCR catalog.

Course Work

Required courses
1. MGT 201: Quantitative Analysis
2. MGT 202: Financial Management
3. MGT 211: Financial Accounting
4. MGT 227: Fixed Income Securities and Markets
5. MGT 231: Corporate Finance
6. MGT 252: Investments and Portfolio Management

Restricted elective courses currently offered to MBA students (2 of the following 7 courses)
1. MGT 213: Trading Strategies and Financial Models
2. MGT 232: Derivatives and Asset Pricing
3. MGT 237: International Financial Management
4. MGT 264: Corporate Risk Management
5. MGT 268: Entrepreneurial Finance and Venture Capital
6. MGT 276: Special Topics in Finance
7. MGT 276: Financial Strategy and Corporate Control

Required courses offered to Ph.D. and Master of Finance students
1. MGT 295F Seminar in Empirical Methods in Finance
2. MGT 295G Seminar in Corporate Finance

Other Electives

1. Students are expected to choose two electives from an extensive range of graduate courses. Recommended Finance Elective includes MGT 203: Economics for Management; However, any elective course within AGSM that is relevant to a student’s educational objectives is acceptable. Courses from departments outside AGSM such as statistics and economics are also acceptable, but must be approved by the MFIN program director.

Comprehensive Exam

To receive the degree, every candidate must pass, with a grade of B- or better in each part, a written comprehensive examination. The exam is taken in two parts after completion of the two “capstone” seminar courses, MGT 295F and MGT 295G. The exam will cover the topics taught throughout the entire program. This exam will ensure that all students receiving the degree have internalized the central lessons of the degree.

Normative Time to Degree

One year

Master of Professional Accountancy (MPAc)

The Master of Professional Accountancy program provides advanced education in audit and assurance, taxation, accounting information systems and ethics. The MPAc is offered in two tracks. The first track is for graduates of a baccalaureate degree with a concentration or major in accounting and is designed to be completed in 3 quarters. The second track is for graduates of a baccalaureate degree without a concentration or major in accounting and is designed to be completed in 4 quarters.
All applicants to this program must have completed a bachelor’s degree or its approved equivalent from an accredited institution and to have attained undergraduate record that satisfies the standards established by the Graduate Division and University Graduate Council. Applications are accepted for full term.

Admission to the MPAc program is made based on a holistic assessment of the applicant’s background and achievements, including academic preparedness (mandatory undergraduate GPA and optional GMAT/GRE scores), professional and/or academic experiences including extra-curricular activities, recommenders’ opinions and supporting evidence, written and oral communication, leadership potential, overcoming adversity and contributions to diversity.

Although submitting GMAT/GRE score is optional, a superior GMAT/GRE score may help offset weakness in other evidence of academic preparation and can enhance funding considerations. Not submitting GMAT/GRE score does not reduce an applicant’s chances of being admitted if their GPA is 3.0 or better.

Applicants whose first language is not English are required to submit acceptable scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) unless they have a degree from an institution where English is the exclusive language of instruction.

Applications for the M.P.Ac. program are accepted for the Fall quarter. Applications for the M.Fin. program are accepted for the Fall quarter. Applications for the MSBA program are accepted for the Fall quarter. Applications for the Ph.D. program are accepted for the Fall quarter. Coursework for the M.P.Ac. program is expected to be completed in one academic year.

Additionally, each applicant must submit at least one letter of recommendation from individuals who can attest to their professional and/or academic skills. All other application requirements are specified in the graduate application or in the General UCR catalog.

All other application requirements are specified in the graduate application or in the General UCR catalog.

Candidates in the first track must complete 48 units to earn the degree. Of the 48 units, 20 units are required:

- MGT 225. Professional Accounting and Auditing Research
- MGT 229. Sustainability and Ethical Control Systems
- MGT 240B. Advanced Taxation,
- MGT 278A. Auditing and Assurance Services: Theory and Practice,
- MGT 278B. Information Technology Auditing and Assurance

The balance of the 28 elective units will include other courses in accounting and auditing, courses offered by AGSM in other graduate programs and by other departments in UCR.

In addition to the above requirements, students who are admitted to the second track of the program must complete the following courses during the first term at the program:

- MGT 400A - Financial Accounting Principles and Practices I
- MGT 400D - Taxation of Individuals and Business Entities
- MGT 400E - Auditing and Assurance Further, students in the second track, based on their own academic and professional background, might be asked to take other preparatory courses that would ensure their success at the program.

Units earn in the MGT400 series are not for degree credit.

Plan I (Thesis) is not an option for the MPAc degree program. Plan II (Comprehensive Examination) Plan II requires that at least 18 units be in graduate-level courses taken at a UC campus. None of these may be in courses numbered 297 or 299. To receive the degree, students must pass a comprehensive examination, the content of which is determined by AGSM faculty. The exam is taken after advancing to candidacy and at the end of all coursework (in the last week of the Spring Quarter). The exam will cover the topics taught throughout the entire program.

This exam is designed to ensure that all students receiving the degree have internalized the central knowledge, problem solving and ethical skills necessary if they are to act as overseers of public trust.

Plan II (Comprehensive Examination) Normative Time to Degree
3 or 4 quarters, depending on the program’s track.

The Master of Science in Business Analytics (MSBA)
The Master of Science in Business Analytics (MSBA) program is designed to extend the training of students with analytical backgrounds in business or statistics to allow them to apply their skills to business data. Increasingly large amounts of data are available about customers, costs, and suppliers, which can be analyzed to improve operations, increase the yield on marketing programs and understand pricing and financing better, which all add to the value of the business.

The MSBA interdepartmental program is offered by the School of Business and the Department of Statistics. The degree requires 48 units of study, which can be done as a full-time one-academic-year program or over a longer period on a part-time basis.

Admission
To ensure that students have the prior knowledge to succeed in the program, admission is limited to applicants who have studied either statistics or a quantitative business discipline (such as operations, finance and marketing) as undergraduates. Applicants to the program must have completed a bachelor’s degree or its approved equivalent in one of the above disciplines. Applicants who do not have an undergraduate degree in statistics or one of the quantitative business disciplines may be considered for admission if they provide sufficient evidence of appropriate training.

Applicants must have received their undergraduate degrees from an accredited institution, and have attained a record that satisfies the standards established by the Graduate Division and University Graduate Council.

All applicants must submit scores from the Graduate Management Admissions Test (GMAT) or Graduate Record Exam, General Test (GRE). Applicants whose first language is not English are required to submit acceptable scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) unless they have a degree from an institution where English is the exclusive language of instruction. Additionally, each applicant must submit at least two letters of recommendation, at least one of which must be an academic reference. All other application requirements are specified in the graduate application or in the General UCR catalog.

Course Work
Once admitted, students follow one of two tracks: The statistics track is for students who studied a quantitative discipline other than statistics or one of the business disciplines as undergraduates (finance, operations, or marketing) and the business track is for students who focused on statistics as undergraduates.

Required courses
1. MGT 256 Business Analytics for Management
2. MGT 286A-B Capstone in Business Analytics
3. STAT 208 Statistical Data Mining Methods
4. STAT 232 Statistics for Business Analytics

Business Track (Choose any four from the following five courses):
5. MGT 202 Financial Management
6. MGT 204 Cost and Management Accounting
7. MGT 207 Operations Management
8. MGT 209 Marketing Management
9. STAT 206 Statistical Computing

Statistics Track:
5. Choose one of the following:
   - MGT 202 Financial Management or
   - MGT 204 Cost and Management Accounting or
   - MGT 207 Operations Management or
   - MGT 209 Marketing Management
6. MGT 219 Spreadsheet Modeling for Decision-Making or
7. MGT 267 Applied Business Forecasting
8. STAT 200 Foundational Methods for Business Analytics
9. STAT 206 Statistical Computing
Concentrations
Students choose a set of three courses in either marketing analytics, supply chain analytics or financial analytics. These concentration courses provide depth to the student's understanding of the area in which they will carry out a capstone course project.

**Marketing Analytics**
*(prerequisite: MGT 209):*
1. MGT 251 Marketing Analytics and any two of the following:
2. MGT 233 Marketing Research
3. MGT 249 Pricing Strategy
4. MGT 250 Marketing Channels and Salesforce
5. MGT 253 Digital Marketing
6. MGT 257 Marketing Strategy

**Supply Chain Analytics**
*(prerequisite: MGT 207):*
1. MGT 267 Applied Business Forecasting or MGT 219 Spreadsheet Modeling for Decision-Making
2. MGT 239 Simulation for Business
3. MGT 258 Logistics and Supply Chain Management

**Financial Analytics**
*(prerequisite: MGT 202):*
1. MGT 227 Fixed Income Securities and Markets or MGT 244 Corporate Risk Management
2. MGT 232 Derivatives and Asset Pricing
3. MGT 252 Investments and Portfolio Management or MGT 295F Empirical Methods in Finance

**Professional Development Requirement:**
(a) MGT 286B gives students training in the ability to use fundamental statistical techniques to formulate problems and solutions in diverse real-world applications;
(b) the ability to use at least one statistical software package to conduct statistical data analysis;
(c) the ability to communicate with business managers about statistical data by using graphical methods in conjunction with written analysis to describe and interpret information.

**Plan I (Thesis)** is not an option for the MSBA degree program.

**Plan II (Comprehensive Examination)** requires that at least 18 units be in graduate level courses taken at a UC campus. None of these may be in courses numbered 297 or 299. Every candidate must take a comprehensive examination, the content of which is determined by the program. Candidates for the degree are required to complete all of the general requirements specified by Graduate Studies. The program is intended to conform to Plan II.

**Normative Time**
One year for full-time students; Two years for part-time enrollees.

---

**Doctoral Degree**
The Ph.D. Program in Business Administration offers the Doctor of Philosophy Degree (Ph.D.). See Ph.D. Program in Business Administration in this section of the catalog.

**Ph.D. Program in Business Administration**
The Ph.D. Program in Business Administration offers the Doctor of Philosophy Degree (Ph.D.). Concentrations are offered in five major field areas:
- Accounting
- Finance
- Marketing
- Operations
- Management

The Ph.D. Program in Business Administration trains doctoral students in the design and execution of original research in Management.

**Admissions**
Applicants will be expected to have completed a bachelor’s degree at a four-year accredited college or university and to have attained an undergraduate academic record that satisfies the standards established by the Graduate Division, University of California, Riverside. In addition to the following requirements, all applicants must meet the general requirements as set forth in the Graduate Studies section of the General Catalog.

A prior business degree is not a requirement. However, if a student has no previous business coursework, he/she must consult with the Graduate Advisor about whether any coursework in the major field area will be necessary.

Applicants will be required to submit official GMAT or GRE exam scores. Preference for one exam is not given over the other. All applicants whose first language is not English must also submit an acceptable TOEFL test score prior to admittance. The successful applicant is expected to score at least 560 on the paper exam or 220 on the computer based exam, or 80 on the TOEFL iBT. Applications are accepted for admission for Fall Quarter.

**Language Requirement**
There is no foreign language requirement, but students who wish to TA must pass an English language proficiency exam. Students are expected to communicate their research findings in English in written and oral presentations.

**Plan I (Comprehensive Examination)**
The M.A. Degree, Plan II, requires the approval of the Graduate Advisor and is only available to doctoral students who are not continuing in the Ph.D. program. In addition, it requires completion of a minimum of 36 units of approved graduate-level course work and passing the comprehensive examination at least at the M.A. level. The comprehensive examination will be prepared and administered by the Graduate Examination Committee. The comprehensive examination will cover a broad range of topics chosen from the core research, major field, and elective graduate courses taken by the student in their first two years of study. Students must be in residence for 3 quarters.

UCR will not award M.A. degrees to students already possessing an M.A. in Management.

**Required/Elective Courses & Required Research**
- Required Research Methods Courses
- Required Field Seminars
- Other Research Courses
- Field Colloquium
- First Year Research Paper
- Professional Development Course

Each of these requirements is detailed below according to the area of concentration within the Management program. Each area requires at least 16 courses related to its field of study. In addition, some specializations require a field colloquium until the student advances to candidacy.

**Required Research Methods Courses**
Research methods courses are intended to provide the student with a strong foundation in research methodology. Students who wish to have courses waived must first obtain the approval of the Graduate Advisor and then the Graduate Dean. Each area’s required research method courses (between five and seven, depending on the area) are as follows:

1. **Accounting**
   - Students are required to take five courses from among ECON 205A-C, ECON 283E-G, PSYC 211-213, PSYC 243, PSYC 259, SOC 201A-B, SOC 203A-B, and SOC 205.

2. **Finance**
   - Complete the six courses in this list: ECON 205A-C and ECON 2853E-G.

3. **Marketing**

4. **Operations**
   - Complete ECON 200A-C. In addition, complete either ECON 205A-C or STAT 201A-C.

5. **Management**

**Required Field Seminars**
Ph.D. students are required to complete field seminars in their major field area. The requirements for each area are as follows:

1. **Accounting**
   - Students are required to take three courses from among MGT 295F-G, MGT 295S, MGT 295K and MGT 295M.

2. **Finance**
   - Complete the following five courses: MGT 295F-G, MGT 295S, MGT 295K and MGT 295M.

3. **Marketing**
   - Complete the following three courses: MGT 288A-B, and complete either MGT 288C or MGT 288D.
4. **Operations**  
Students are required to complete three courses from among MGT 296E-Z.

5. **Management**  
Complete the following four courses: MGT 289A-D.

**Other Research Courses**

It is important that Ph.D. students develop a deep understanding of a basic discipline related to their major field area. Thus, students are required to complete other graduate-level courses (200 level or higher). The requirements are as follows:

1. **Accounting**  
Students are required to take three other courses from a department outside of the School of Business. This leaves five electives for the students to choose, which typically include finance courses in 295F-M.

2. **Finance**  
Students are required to take ECON200A-C and two electives.

3. **Marketing**  
Students are required to take three courses from a department outside of the School of Business. This leaves four elective courses for students to choose.

4. **Operations**  
Students are required to take seven other graduate-level courses (200 level or higher). The following courses are highly recommended: MATH 217, MATH 209A-C, MATH 228, STAT 203A-B, STAT 205, STAT 206, STAT 207, STAT 210A-B, STAT 215 ECON 244, ECON 283J, ECON 283N, ECON 283Q, EE 231.

5. **Management**  
Students are required to take three courses from a department outside of the School of Business. This leaves four elective courses for students to choose.

**Field Colloquium**

It is essential that Ph.D. students actively participate in the intellectual life of the school. In particular, students are expected to attend research presentations of visiting scholars. To facilitate this, field colloquia (MGT 285) will be offered each quarter. Ph.D. students in Marketing and Management are required to take the field colloquium each quarter for course credit until they advance to Ph.D. candidacy. MGT 285 does not count as an elective in the Other Courses listed above.

**First Year Research Paper**

Ph.D. students must complete an original research paper at a level consistent with the quality of a rigorous Ph.D. program during their first year. The student works with the area faculty to develop the research topic, set expectations, and provide feedback. A committee consisting of the program faculty evaluates the submitted paper. Students whose paper is deemed substandard by the area faculty may be terminated from the Ph.D. program.

**Professional Development Course**

In order to ensure that doctoral students are prepared to enter future careers as researchers and are able to communicate their work to other researchers, students are required to take a professional development course (MGT 402). MGT 402 does not count as an elective in the Other Courses listed above.

**Comprehensive Examination**

The comprehensive examination serves as both a major field examination, as well as an examination of topics covered in core research courses. Subsequent to the comprehensive examination a committee of the relevant area faculty will issue a grade of passing at the Ph.D. level, passing at the M.A. level, or failing. If, in the first attempt, a student fails the comprehensive examination or passes at the M.A. level, he or she may be allowed to retake the examination. No more than two attempts to pass this exam are allowed. Students who pass only at the M.A. level may be recommended for a Master’s Degree (if they do not already hold an M.A. in Management). The comprehensive exam must be taken no later than the end of the seventh quarter. Additional requirements for each concentration are as follows:

1. **Accounting, Finance and Operations**  
The comprehensive exam contains two parts. Students first take a written part and receive a grade as outlined above. If they pass at the Ph.D. level, then they are required to take an oral exam. The grading scheme is the same for both parts, as are the rules for retakes. The written exam must be taken by the end of the seventh quarter, while the oral exam must be taken no later than the end of the eighth quarter.

2. **Marketing and Management**  
There are no additional requirements.

**Qualifying Examination**

(Notes to the Dissertation Proposal Defense)

When all requirements are completed, students take their oral qualifying exam, which is a defense of the dissertation proposal. Conducted by the Ph.D. Qualifying Committee, the exam is based upon the student’s dissertation proposal, and includes a broad inquiry into the student’s preparedness to conduct research and provides an opportunity to discuss the proposed dissertation. After completing the oral qualifying examination and all course requirements successfully, the student is formally advanced to candidacy.

**Final Examination (Dissertation Defense)**

A candidate for the degree of Ph.D. may be asked to defend his or her dissertation in a public, oral presentation at a time announced to members of the University community. Upon the candidate’s successful defense of the dissertation, the Ph.D. Dissertation Committee will make a recommendation to the Graduate Division that the Ph.D. degree be conferred.

**Dissertation**

The dissertation culminates the student’s academic endeavors. Of substantial magnitude, the dissertation should make a significant contribution to the advancement of knowledge in the chosen field of study. The dissertation must be filed with the Graduate Division according to their formatting requirements.

**Normative time to degree**

5 years

**Graduate Courses**

**MGT 200 Organizational Behavior and Theory**  
4 Lecture, 3 hours; extra reading, 1.5 hours; activity, 1.5 hours. Prerequisite(s); graduate standing; or consent of instructor. Enhances understanding of social organizational life using multiple perspectives at the micro and macro levels. Addresses theories and research pertaining to organizational structure, culture, group dynamics, interpersonal relations, and social psychological factors. Develops capabilities for diagnosing organizational problems and identifying appropriate solutions.

**MGT 201 Quantitative Analysis**  
4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s); MGT 403 with a grade of S or better; or passing score on assessment test; or completing or Master of Finance (MFin); or department approval; consent of instructor; may not be taken for degree credit by students in statistics undergraduate or graduate programs; graduate standing; or consent of instructor. Addresses decision-making and solving management problems using data. Covers the foundation of probability and statistics as well as statistical inference and interpretation of statistical analysis. Topics include probability, sampling, estimation, confidence intervals, hypothesis testing, and linear regression.

**MGT 202 Financial Management**  
4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s); MGT 201, may be taken concurrently; MGT 211, may be taken concurrently; graduate standing. Provides a foundation in theories of finance. Topics include time value of money, security valuation, financial institutions, theories of risk measurements, managing a firm’s investment decisions, capital structure, and sources of financing for a firm.

**MGT 203 Economics For Management**  
4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s); MGT 403; or equivalent; graduate standing. A study of the use of microeconomics and macroeconomics in managerial decision making. Topics include demand and supply, production and cost functions, competition, labor supply, national income accounting, aggregate output, interest rates, fiscal and monetary policy, inflation, economic growth, and business cycles.

**Course Descriptions**

- **MGT 201 Business Dimensions of the Manager**: Focuses on the broader issues of total quality management, statistical process control, and the difficulties in implementing quality efforts in organizations.
- **MGT 204 Cost and Management Accounting**: A study of accounting information for managerial planning and control. Topics include managerial applications for product costing, budgeting, and performance evaluation; accounting techniques for modern manufacturing systems; activity-based accounting and cost management; international cost accounting systems; and the behavioral implications of accounting information.
- **MGT 205 Information Systems**: Emphasizes teambuilding and teamwork. Includes project management techniques for modern manufacturing systems; activity-based accounting and cost management; international cost accounting systems; and the behavioral implications of accounting information.
- **MGT 206 Operations Management For Competitive Advantage**: Covers the development of innovative information systems for meeting HRM objectives.
- **MGT 207 Business, Government, and Society**: Examines the corporate strategies of multi-business organizations, assesses their effectiveness, and develops more viable alternatives.
- **MGT 208 Marketing Management**: Provides a managerial perspective on the relationship between business and its external stakeholders. Topics include diversity in organizations, and workplace inclusion.
- **MGT 209 Human Resources Management**: Focuses on the broader issues of total quality management, statistical process control, and the difficulties in implementing quality efforts in organizations.
- **MGT 210 Financial Accounting**: Covers financial accounting concepts and the analytical tools needed to understand and interpret financial statements. Examines the uses of financial accounting information.
MG 225 Professional Accounting and Auditing Research 4 Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing. Provides an in-depth examination of the professional accounting and auditing research process. Includes issue identification; location and evaluation of authority using online and electronic accounting, auditing, and tax research databases; developing conclusions and recommendations; and communication of research results.

MG 226 Fraud and Forensics Auditing 4 Lecture, 3 hours; extra reading, 1.5 hours; outside projects, 1.5 hours. Prerequisite(s): MGT 204 or equivalent. Addresses forensic accounting and fraud examination in how it pertains to both civil and criminal matters. Develops a basic understanding of the characteristics of fraud, fraud prevention and detection, investigative techniques, asset recovery, and use of information technology.

MG 227 Fixed-Income Securities and Markets 4 Lecture, 3 hours; extra reading, 1.5 hours; outside projects, 1.5 hours. Prerequisite(s): MGT 201. Covers analytical techniques related to fixed-income securities. Includes basic analytical tools in fixed-income markets. Topics include relative pricing of fixed-income securities, yield-curve estimation, securities with embedded options, and trading strategies. Utilizes interest rate swaps, mortgage-backed securities, and credit derivatives.

MG 228 Consumer Behavior 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): MGT 209; graduate standing; or consent of instructor. Studies the processes individuals and groups use to select, secure, use, and dispose of products, services, experiences, or ideas to satisfy needs. Explores the impacts that these processes have on the consumer and society. Addresses external and internal influences on consumer behavior.

MG 229 Accounting Ethics and Professional Responsibilities 4 Lecture, 3 hours; extra reading, 1.5 hours; outside projects, 1.5 hours. Prerequisite(s): MGT 204 or equivalent. Examines the ethical and professional responsibilities of accountants and auditors. Focuses on ethics, the American Institute of Certified Public Accountants (AICPA)'s Code of Professional Conduct, Circular 230, the Sarbanes-Oxley Act (SOX), Securities and Exchange Commission (SEC) laws and regulations, Public Company Accounting Oversight Board (PCAOB) standards, state and federal laws relevant to accountants, auditors, and Certified Public Accountants.

MG 230 Databases For Management 4 Lecture, 3 hours; outside projects and readings, 3 hours. Prerequisite(s): MGT 205. Examines the features and capabilities of database management systems, including database classification, data structures, file organizations, evaluation, and management of database systems.

MG 231 Corporate Finance 4 Lecture, 3 hours; extra reading, 1.5 hours; outside problem sets, 1.5 hours. Prerequisite(s): MGT 202. An intensive analysis of the effects of corporate financial policy decisions on firm value. Examines the interrelation of firm value, financing policy, investment decisions, and other considerations. Provides an understanding of the theoretical issues involved in the choice of these policies.

MG 232 Derivatives and Asset Pricing 4 Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): MGT 202. Explores the pricing of derivatives-based securities. Covers various topics in derivatives markets. Introduces pricing techniques for forwards, futures, options, swaps, and other derivatives. Utilizes empirical data and financial modeling.

MG 233 Marketing Research 4 Lecture, 3 hours; outside projects and extra reading, 3 hours. Prerequisite(s): MGT 201, MGT 209; or consent of instructor. Examines how marketing-related data is gathered from individuals and organizations. Explores the importance of integrating problem formulation, research design, questionnaire construction, and sampling so as to yield the most valuable information. Also studies the proper use of statistical methods and the use of computers for data analysis.

MG 234 Brand Management 4 Lecture, 3 hours; activity 2 hours; term paper, 1 hour. Prerequisite(s): MGT 209; graduate standing; or consent of instructor. Provides an understanding of the activities and responsibilities of a brand or product manager. Discusses brand equity and how to measure and build brand equity. Analyzes brand manager’s activities as creating, building, and growing the brand and managing the marketing mix activities as advertising and promotion to achieve desired results.

MG 235 Strategic Management 4 Lecture, 3 hours; activity, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Studies the formulation, implementation, and evaluation of business unit and corporate strategies and the organizational policies and managerial practices that support them. Applies theory to actual general management problems using cases, group exercises, and other simulations of strategic challenges.

MG 236 Decision Making Under Certainty 4 Lecture, 3 hours; outside projects and extra reading, 3 hours. Prerequisite(s): MGT 207 or consent of instructor. Introduces basic tools for using data to make informed managerial decisions under certainty. Covers modeling and solution methods in network optimization, integer and nonlinear programming, and multiple criteria decision analysis. Examines applications and case studies in operations, logistics, finance, and marketing.

MG 237 International Financial Management 4 Lecture, 3 hours; extra reading, 1 hour; outside projects, 2 hours. Prerequisite(s): MGT 202. Focuses on the nature, risks, and management of foreign exchange exposure in a corporate setting. Covers trade and international investment theories. Topics include the international financial systems, balance of payments, foreign exchange markets, measurement of foreign exchange risk, hedging, international asset pricing, and trade financing.

MG 238 Management Synthesis 4 Lecture, 3 hours; activity, 3 hours. Prerequisite(s): MGT 200; MGT 202; MGT 203; MGT 205; MGT 207; MGT 209; MGT 235; graduate standing. A team-taught, integrative case course that focuses on managing the complex tasks of the total organization. Examines the interdependence of the functional areas of management. Student teams analyze cases involving several functional areas and recommend actions for improvement.

MG 240 Simulation For Business 4 Lecture, 3 hours; outside projects and extra reading, 3 hours. Prerequisite(s): MGT 211 or equivalent or consent of instructor. Covers federal income tax laws as they apply to individuals, partnerships, and corporations. Also discusses tax planning, tax policy, and other special tax issues.

MG 240B Advanced Taxation 4 Lecture, 3 hours; outside case analysis, 3 hours. Prerequisite(s): MGT 240A or equivalent. Articulates advanced topics in federal taxation and tax planning. Explores many facets of the complex body of tax law including tax research, alternative minimum tax, investment losses, employee compensation, corporate distributions, and federal transfer taxes.

MG 241 Accounting Systems and Control 4 Lecture, 3 hours; extra reading, 1.5 hours; outside projects, 1.5 hours. Prerequisite(s): MGT 204 or equivalent. A study of the design and implementation of internal control systems. Emphasizes auditing, accounting information systems, ethical and trust systems, and related issues.

MG 242 Global Marketing Management 4 Lecture, 3 hours; activity, 2 hours; extra reading, 1 hour. Prerequisite(s): MGT 209; graduate standing; or consent of instructor. Examines the processes and the means by which companies can successfully extend their marketing operations internationally and globally. Provides the frameworks, knowledge, and sensitivities to formulate and effectively implement marketing plans in various countries and regions of the world.
MGT 243 Entrepreneurial Marketing 4
Lecture, 3 hours; activity, 2 hours; individualized study, 1 hour. Prerequisite(s): MGT 209; graduate standing; or the consent of instructor. Addresses the marketing challenges in conceptualizing, launching, and growing an entrepreneurial venture. Provides a conceptual framework and market research tools for evaluating and validating entrepreneurial ideas. Discusses alternative business models and promotion strategies for launching entrepreneurial ventures.

MGT 244 Corporate Risk Management 4
Lecture, 3 hours; written case analyses and reports, 3 hours. Prerequisite(s): MGT 202. Provides an overview of derivative financial instruments. Focuses on the use of derivatives to manage risk in a corporate setting. Utilizes the case-method to develop strategies and policies for managing the risk exposure of an enterprise, as well as to assess the relations between risk management and value creation.

MGT 245 Financial Statement Analysis 4
Lecture, 3 hours; research, 3 hours. Prerequisite(s): MGT 211 or consent of instructor. Explains the role of financial statement analysis in an efficient capital market. Data from financial statements of major corporations is analyzed to develop skills necessary to interpret financial accounting information. Designed for future professionals who will be intensive users of financial accounting reports (e.g., security analysts, credit analysts).

MGT 246 Entrepreneurial Management 4
Lecture, 3 hours; activity, 3 hours. Prerequisite(s): MGT 202, MGT 209; graduate standing; or consent of instructor. Studies the entrepreneurial process, its challenges, and the driving forces behind it—the managerial skills, mental attitudes, and basic knowledge necessary for creating and growing a new venture. Topics include opportunity assessment, building the management team, marshalling capital and other critical resources, and harvest strategies.

MGT 247 Advertising and Sales Promotion Management 4
Lecture, 3 hours; activity, 3 hours. Prerequisite(s): MGT 209; graduate standing; or consent of instructor. Examines the role and use of advertising and sales promotion within the marketing function. Topics include setting program objectives with an integrated marketing communication perspective; developing creative approaches; making media decisions; developing sales promotion programs; and budgeting and evaluating advertising and promotion programs.

MGT 248 New Product Development 4
Lecture, 3 hours; term paper, 1 hour; research, 2 hours. Prerequisite(s): MGT 209; graduate standing; or consent of instructor. Covers the management of a new product development process. Includes opportunity identification and idea generation, concept and product testing, pre-launch forecasting, and managing a product launch.

MGT 249 Pricing Strategy 4
Lecture, 3 hours; consultation or discussion, 1 hour. Prerequisite(s): MGT 209 or consent of instructor. The concepts of competitive pricing, price leadership, price discrimination, price warfare, and the strategic implication of skimming versus penetration strategies with respect to the experience curve will be developed.

MGT 250 Marketing Channels and Sales Force 4
Lecture, 3 hours; outside project, 3 hours. Prerequisite(s): MGT 209. Examines decisions related to distribution channels and sales force. Discusses how to select the most appropriate marketing channel. Channel management topics include distribution intensity, power, control, and channel conflict. Covers issues in sales-force management, compensation, structure, and size.

MGT 251 Marketing Analytics 4
Lecture, 3 hours; activity, 3 hours. Prerequisite(s): MGT 209; graduate standing; or consent of instructor. Examines advanced topics in marketing with emphasis on utilizing quantitative tools to aid marketing decision making. Topics include demand and market-share forecasting; conjoint analysis; market segmentation and cluster analysis; brand positioning and competitive market structures; and assessing market response to price, advertising, promotion, distribution, and sales force.

MGT 252 Investments and Portfolio Management 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): MGT 202. Discusses standard asset pricing models, portfolio theory, and empirical uses of securities data. Addresses pricing in the capital markets and empirical issues in testing asset pricing models. Other topics include risk-adjusted portfolio performance, term structure, bond pricing, and bond portfolio management.

MGT 253 Digital Marketing 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): MGT 209; graduate standing; or consent of instructor. Develops an understanding of digital marketing and how it affects and augments the traditional marketing mix. Topics covered include online retailing and the long tail, online pricing, multi-channel and mobile marketing, search engine optimization, display and sponsored search advertising, and social media marketing.

MGT 254 Internet Retailing Project 4
Lecture, 3 hours; extra reading, 1.5 hours; outside projects, 1.5 hours. Prerequisite(s): MGT 209; consent of instructor. A practical examination of the Internet retailing customer chain from a managerial perspective. Involves special-topic lectures, directed readings, active discussion, and student presentations. Culminates in a class-written book comprised of chapters focusing on team-developed solutions to industry problems.

MGT 255 Procurement and Strategic Sourcing 4
Lecture, 3 hours; term paper, 1 hour; written work, 2 hours. Prerequisite(s): MGT 207 or consent of instructor. Basic concepts and processes in purchasing and sourcing management. Addresses global sourcing techniques and application on various management tools and quality tools in purchasing. Focuses on proactive and planned analysis of supply markets and selection of suppliers with objective of delivering solutions to meet pre-determined and agreed upon organizational needs.

MGT 256 Business Analytics For Management 4
Lecture, 3 hours; written work, 1 hour; extra reading, 1; practicum, 1 hour. Prerequisite(s): MGT 201 or consent of instructor. Provides the fundamental concepts and tools needed to understand the emerging role of business analytics in organizations and apply basic business analytics tools in a spreadsheet environment. Makes extensive use of data, statistical and quantitative analysis, exploratory and predictive models, and fact-based management to drive decisions and actions.

MGT 257 Marketing Strategy 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): MGT 209; graduate standing; or consent of instructor. Presents a framework for an integrated, dynamic analysis of customers and competitors to enable marketing strategy development for long-term success. Uses case studies, lecture-discussions, and a computer-simulated competitive marketing strategy game.

MGT 258 Logistics and Supply Chain Management 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): MGT 209; graduate standing; or consent of instructor. Studies the integration of value-creating elements in supply, procurement, manufacturing, distribution, and logistics processes using information technologies as a main enabler. Topics include distribution networks, demand management, sourcing, transportation, pricing, supply chain coordination, information technology, and e-business.

MGT 260 Contemporary Issues in Management 4
Seminar, 30 hours per quarter; individual study, 30 hours per quarter. Prerequisite(s): graduate standing or consent of instructor. Focuses on recent developments and selected topics in contemporary management practices. Discusses innovative practices in areas such as marketing, finance, accounting, information technology, production, and distribution. Includes presentations by students, invited scholars and business professionals. Course is repeatable to a maximum of 8 units.

MGT 261 Contemporary Issues in Entrepreneurship 4
Seminar, 30 hours per quarter; individual study, 30 hours per quarter. Prerequisite(s): graduate standing or consent of instructor. Addresses current issues and innovations in entrepreneurial management to develop a broad understanding of the interrelationship among all functions of management, including marketing, finance, accounting, information technology, production, and distribution. Discusses topics such as family business management, entrepreneurial marketing, managing growth, strategies for innovation, and market entry and exit decision making.
MGT 262 Advanced Topics in Management 4
Seminar, 3 hours per quarter; outside research, 30 hours per quarter. Prerequisite(s): graduate standing or consent of instructor. Intensive study of selected topics in management. Includes readings, discussion, and presentation of research. Requires completion of an analytical research paper based on recent advances in management strategy. Topics include leadership, change, value creation, and innovations in strategies related to the functional areas of management. Course is repeatable to a maximum of 8 units.

MGT 263 Advanced Topics in Entrepreneurship 4
Seminar, 30 hours per quarter; outside research, 30 hours per quarter. Prerequisite(s): graduate standing or consent of instructor. Explores various topics relevant to the development of entrepreneurial skills in a variety of management functions, including marketing, finance, and operations. Includes lectures, case studies, presentations by entrepreneurs, and exercises to provide students with a realistic understanding of entrepreneurial challenges.

MGT 264 Information Systems Resources Management 4
Seminar, 3 hours; outside research, 2 hours; extra reading, 1 hour. Prerequisite(s): MGT 205 or consent of instructor. Provides an understanding of the issues, strategies, and tactics involved in managing information systems in large organizations. Topics include cost allocation, capacity planning, congestion problems, and distributed information systems. Relies heavily on case studies.

MGT 266 Project Management 4
Seminar, 3 hours; activity, 3 hours. Prerequisite(s): MGT 207; graduate standing. Addresses issues of project planning and control. Topics include differences between projects and production systems; project selection; project teams; breakdown structures of organization and work; scheduling and budgeting; resources management; project control and evaluation; and current project management software.

MGT 267 Applied Business Forecasting 4
Seminar, 3 hours; activity, 3 hours. Prerequisite(s): MGT 201; or equivalent; graduate standing; graduate standing. Provides experience in developing forecasting models and applying them to problems in marketing, production, inventory management, business economics, and other fields. Discusses issues in data acquisition, data analysis, modeling of relations between variables, trend analysis, and seasonal forecasting. Uses case studies and applications from a variety of management areas.

MGT 268 Entrepreneurial Finance and Venture Capital 4
Seminar, 3 hours; extra reading, 1 hour; activity, 2 hours. Prerequisite(s): MGT 202; graduate standing. For the MGT 268 online section; enrollment in the Executive Masters of Business Administration program; graduate standing. Covers financing of nonpublic and early-stage venture. Includes financial modeling, cash needs assessment, valuation, deal structure, financing alternatives, and harvesting.

MGT 269 The New Venture and the Business Plan 4
Seminar, 3 hours; outside research, 2 hours; case study preparation, 1 hour. Prerequisite(s): MGT 266 or consent of instructor. Focuses on the entrepreneurial process from conception to birth of a new venture. Explores the process of developing an opportunity assessment, structuring and rewarding the founding management team, and marshalling necessary critical resources through the development of a full-scale business plan.

MGT 271 Quantitative Decision Making and Analysis 4
Lecture, 3 hours; written work, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Covers many approaches to solving business problems from a managerial point of view. Surveys various optimization techniques with an emphasis on the why and how of these types of models. Utilizes spreadsheet solvers to accomplish the mathematical manipulations. Emphasizes input requirements and interpretation of results.

MGT 272 Global Strategy and Management 4
Seminar, 3 hours; outside projects, 3 hours. Prerequisite(s): MGT 200, MGT 202, MGT 209; or consent of instructor. Provides an overview of the strategic issues that multinational firms and managers encounter in a global marketplace. Topics include the globalization of the world economy, mode of entry into markets, analysis of political risk, global strategic alliances, and competing in emerging economies.

MGT 274 Special Topics in Finance 4
Seminar, 3 hours; research 3 hours. Prerequisite(s): MGT 202. Explores the latest developments in theoretical and empirical finance. Topics include asset pricing, performance evaluation, derivative securities, market microstructure, corporate finance, and corporate control and governance.

MGT 275 Transportation and Logistics Management 4
Lecture, 3 hours; term paper, 1 hour; written work, 2 hours. Prerequisite(s): MGT 207 or consent of instructor. Provides insight into the key functional areas related to transportation and logistics management within supply chain operations. Focuses on the role of transportation systems and the managerial and economic aspects of various transportation modes, transport, storage/handling, and facility location decisions. Presents applications to both domestic and international operations.

MGT 276 Financial Strategy and Corporate Control 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): MGT 202. Covers the nexus among finance, strategy, governance, and corporate control. Examines the theory and empirical evidence for models of corporate financial policy and the market for corporate control. Emphasizes critical evaluation of the evidence for different models of corporate financial policy.

MGT 277 Advanced Financial Accounting 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): BUS 165C or equivalent (may be taken concurrently). Covers advanced financial accounting and reporting practices. Emphasizes topics such as consolidated financial statements, branch accounting, foreign transactions, segment reporting, partnership accounting, and accounting for nonprofit organizations.

MGT 278A Foundations of Auditing and Assurance Services 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): admission to the Master of Professional Accountancy (MPA) program or graduate standing and consent of instructor. Examines the history, demand, and foundations of audit and assurance. Focuses on judgment and fundamentals of evidential reasoning. Topics include risk assessment, internal control, audit evidence, independence and objectivity, measurement theory, suitable criteria, standards and regulation, framing, heuristics and biases, and the role of technology.

MGT 278B Information Technology Auditing and Assurance 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): MGT 278A or consent of instructor. Covers basic concepts and techniques used in the provision of information technology audit and assurance services. Topics include information technology security; risk assessment; internal control; nature of audit evidence; independence and objectivity; suitable criteria; the role of standards and technology; and ethical issues.

MGT 278C Internal Auditing 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): MGT 278A or consent of instructor. Examines the nature and practices of internal (operational) audit and assurance, the management audit process, and the use of internal auditing by top management and governing boards. Develops skills to understand, analyze, and critically evaluate internal audit research.

MGT 280 Business Issues in Electronic Commerce 4
Seminar, 3 hours; activity, 3 hours. Prerequisite(s): MGT 205; graduate standing. Provides an understanding of the various business strategies, management issues, and pertinent technologies related to electronic commerce. Explores several of the problems surrounding electronic commerce including security issues, privacy, encryption, safeguarding of intellectual property rights, acceptable use policies, and legal issues.

MGT 281 Systems Analysis and Design 4
Seminar, 3 hours; outside project, 3 hours. Prerequisite(s): MGT 205, MGT 230; or consent of instructor. Provides an understanding of the systems development life cycle with emphasis on the analysis and design phases. Familiarizes students with the tools and processes used by system developers to analyze, design, and construct computer-based systems. Provides experience in analyzing and designing a computer-based system.

MGT 282 Business Data Communications 4
Seminar, 3 hours; activity, 3 hours. Prerequisite(s): MGT 205; graduate standing. Provides insight into the role of telecommunications in business, with an emphasis on information management. Specific topics include data communications (hardware components, interfaces, and link protocols); architecture and technology (protocols, local area networks, and emerging digital services); and network management (control and security).
MGT 285 Field Colloquium 1 Colloquium 1, Prerequisite(s): graduate standing or consent of instructor. Includes oral reports by visiting scholars, faculty, and students on current research topics in management. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

MGT 286A Capstone in Business Analytics 4 Seminar, 3 hours; research, 1 hour; written work, 2 hours. Prerequisite(s): STAT 209, MGT 256; graduate standing; graduate standing; or consent of instructor. Uses the skills and knowledge developed in business analytics courses to complete an individual empirical study. Focuses on finishing work initiated in MGT 286A involving a project that uses quantitative skills to begin analyzing an issue in business. Topics covered include data sources, statistical techniques, business operations, and profitability.

MGT 286B Capstone in Business Analytics II 4 Seminar, 3 hours; research, 1 hour; written work, 3 hours. Prerequisite(s): STAT 209, MGT 256, MGT 286A; graduate standing; graduate standing; or consent of instructor. Uses the skills and knowledge developed in business analytics courses to complete an individual empirical study. Focuses on finishing work initiated in MGT 286A involving a project that uses quantitative skills to begin analyzing an issue in business. Topics include data sources, statistical techniques, business operations, and profitability.

MGT 288A Behavioral Research in Marketing 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): doctoral standing or consent of instructor. Examination of the development of consumer behavior research and evaluation from theoretical as well as practical perspectives. Provides insight into the integrative framework for organizing knowledge of consumer behavior and conducting research.

MGT 288B Quantitative Research in Marketing 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): doctoral standing or consent of instructor. Introduces the fundamentals of modeling in marketing. Studies research issues associated with marketing management decisions. Emphasizes empirical research. Examines of strategic marketing, marketing segmentation, new product development and introduction, pricing strategies, channel policy, promotion decisions, and sales force management.

MGT 288C Special Topics in Marketing - Behavioral 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): doctoral standing or consent of instructor. An in-depth examination selected topics in consumer behavior. Utilizes journal articles to facilitate exploration of these topics.

MGT 288D Special Topics in Marketing - Quantitative 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): doctoral standing or consent of instructor. A study of the modeling of consumers and markets. Topics include conjoint analysis, logit choices models, market structure analysis, consideration sets, variety seeking, and models of purchase timing and purchase quantity. Utilizes journal articles to facilitate exploration of these topics.

MGT 289A Micro Organizational Theory 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): doctoral standing or consent of instructor. A study of the intersection of individual and group behavior within organizations. Introduces the behavioral science literature relevant to the study of behavior in organizational. Topics include emotions in organizations, motivation, leadership, decision making, interpersonal relations, diversity and identity, culture, and organizational learning and routines.

MGT 289B Macro Organizational Theory 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): doctoral standing or consent of instructor. A study of theories related to structure of organizations and control systems both within and external to the organization. Emphasizes the interaction of organizations with their environments. Incorporates theoretical and empirical contributions from institutional analysis, resource dependence, population ecology, and transaction costs.

MGT 289C Strategic Management 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): doctoral standing or consent of instructor. Focuses on the conduct and performance of organizations. Topics in strategy research explain differences in organizations’ profitability and survival by relating variance in performance outcomes to factors at multiple levels. Provides theoretical perspectives from economics, sociology, and psychology to supplement approaches to understanding firm performance and related issues.

MGT 289D Designing Organizational Research 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): doctoral standing or consent of instructor. Provides a survey of the design approaches for non-laboratory study within and across organizations. Covers research strategies appropriate to the study of different organizational question. Topics include issues of measurement, types of data, and data collection methods (including archival, surveys, interviews, and social network data).

MGT 290 Directed Studies 1 to 6 Research, 3 to 18 hours. Prerequisite(s): consent of instructor. Directed studies and research in selected problems or theories of management for advanced graduate students to pursue special areas of interest. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

MGT 292 Concurrent Studies in Management 1 to 4 Research, 3 to 12 hours. Prerequisite(s): graduate standing; consent of instructor. Explores one or more graduate projects based on content related to an appropriate undergraduate course. Includes faculty guidance and evaluation. Taken concurrently with the undergraduate course.

MGT 293 (E-Z) Seminars in Accounting 4 Seminar, 3 hours; individual study, 1 hour; extra reading, 2 hours. Prerequisite(s): restricted to major(s) Accounting, Auditing & Assurance, Finance, Management, Management; graduate standing. Topics include financial accounting; accounting standards; earning quality and management; earnings forecasts and financial analyst; valuation; performance evaluations; strategic management accounting; auditor behavior and decision making; tax policy planning; managerial accounting decision-making; accounting information systems, accounting and capital markets, research design methodologies in accounting, accounting information, disclosure game theory.

MGT 293F Capital Markets Research in Accounting 4 Seminar, 3 hours; extra reading, 2 hours; individual study, 1 hour. Prerequisite(s): graduate standing in Management, or consent of the instructor. Includes issues in financial accounting related to the interaction of accounting and capital markets. Focuses on selected classic and current empirical and theoretical research in financial accounting. Provides advanced training in empirical accounting research with an emphasis on securities market effects of accounting policies and practices.

MGT 295 (E-Z) Seminars in Finance 4 Seminar, 3 hours. Prerequisite(s): restricted to major(s) Accounting, Auditing & Assurance, Finance, Management, Management; graduate standing. Topics include discrete and continuous time asset pricing theory and portfolio choice; empirical research in finance (including recent developments in empirical asset pricing); and advanced topics in corporate finance theory and related empirical research.

MGT 295E Theory of Exchanges Under Uncertainty 4 Seminar, 3 hours; term paper, 10 to 15.5 hours per quarter, extra reading, 2 hours. Prerequisite(s): graduate standing in Management; or consent of instructor. An introduction to the theory of financial economics. Covers the implications of no arbitrage, decisions under uncertainty, and various equilibrium models in a world with only one decision period. Extends these concepts to multiple periods in discrete time and continuous time.

MGT 295F Empirical Methods in Finance 4 Seminar, 3 hours; term paper, 10 to 15.5 hours per quarter, problem sets involving statistical analysis of stock returns. Students should spend at least 2 hours a week. Prerequisite(s): MGT 201, MGT 202, graduate standing in Management, or consent of instructor. Covers econometric approaches to analyzing common problems encountered when conducting empirical research. Focuses on hypothesis testing, specification tests, general methods of moments estimation, the capital asset pricing model, multifactor asset pricing models, event studies, operating performance studies, simultaneous equations models, and endogeneity issues. Demonstrates programming in SAS and/or Gauss.

MGT 295G Corporate Finance 4 Seminar, 3 hours; extra reading 2 hours; written work, 2 hours. Prerequisite(s): graduate standing in Management or consent of instructor. Deals with the contemporary issues in corporate finance. Focuses on selected classic and current empirical and theoretical research in corporate finance. Seeks to provide an advanced and rigorous background in the mainstream issues of modern corporate finance from an emphasis on empirical methodology.
MGT 295I Asset Pricing Theory 4 Seminar, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): MGT 295F, ECON 205A, graduate standing in Management; or consent of the instructor. Covers equilibrium models of stock returns and their relation to utility theory, arbitrage-based pricing models, options, term structure models and limits to arbitrage.

MGT 295J Empirical Methods in Finance 4 Seminar, 3 hours, practicum, 1 hour; extra reading, 2 hours. Prerequisite(s): MGT 295I, graduate standing in Management; or consent of instructor. Covers empirical methods in finance research with an emphasis on empirical asset pricing studies. Topics include methods of testing models related to the theory of asset prices, stock market volatility, and stock returns.

MGT 295K Corporate Finance Research 4 Seminar, 3 hours; extra reading, 2 hours; written work, 1 hour; individual study, 3 hours. Prerequisite(s): MGT 295G, graduate standing in Management; or consent of instructor. Covers fundamental articles incorporate finance and more recent empirical papers. Topics include agency problems, asymmetric information, governance, capital structure and merges.

MGT 295M Research Seminar in Finance 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing in Management; or consent of instructor. Designed for finance Ph.D. students in their second through fifth year. Study finance economics articles and present research papers. Course is repeatable to a maximum of 20 units.

MGT 296 (E-Z) Seminar in Operations 4 Seminar, 3 hours; individual study, 1 hour; extra reading, 2 hours. Prerequisite(s): STAT 215 or MATH 209A, MATH 209B; graduate standing. Topics include revenue optimization; stochastic and deterministic dynamic programming applications in operations; inventory management; supply chain systems; dynamic optimization applications of management, economics and engineering; agency theory; signaling games; actions; behavioral economics pricing management; price discriminations; supply risk; sales force management; operations-marketing interface.

MGT 296E Dynamic Optimization 4 Seminar, 3 hours; extra reading, 2 hours; individual study, 1 hour. Prerequisite(s): STAT 215 or MATH 209A, MATH 209B; graduate standing; or consent of instructor. Focuses on basic models and solution techniques for problems of sequential decision making under uncertainty (stochastic control). Considers optimal control of a dynamical system over both a finite and an infinite number of stages. Includes application domains, revenue management and pricing, manufacturing, supply chains, service systems and economics.

MGT 296F Game Theory Models in Operations 4 Seminar, 3 hours; extra reading, 2 hours; individual study, 1 hour. Prerequisite(s): ECON 201A, ECON 201B, graduate standing in Management; or consent of instructor. Focuses on game theory and industrial organization ideas applied to operations management. Topics include strategic form games, dynamic games, signaling games, agency theory, mechanism design, market design, and their applications in operations management.

MGT 296G Pricing and Revenue Management 4 Seminar, 3 hours; extra reading, 2 hours; individual study, 1 hour. Prerequisite(s): MGT 296E, MGT 296F, graduate standing; or consent of instructor. Focuses on pricing and revenue management ideas applied to operations management. Topics include price discrimination, contract theory, auctions, advertisement, and industry applications.

MGT 296H Inventory and Supply Chain Management 4 Seminar, 3 hours; extra reading, 2 hours; individual study, 1 hour. Prerequisite(s): MGT 296E, MGT 296F, graduate standing; or consent of instructor. Focuses on inventory theory and supply chain contracting. Topics include inventory policies, strategic competition, coordination, contracts in supply chain.

MGT 297 Directed Research 1 to 6 Prerequisite(s): consent of instructor. Directed research in selected problems of management for graduate students with special research interests. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

MGT 298I Fieldwork in Management 1 to 4 Consultation, 1 hour; field, 3 to 12 hours. Prerequisite(s): consent of instructor. Supervised field experience culminating in a final report or other academic component. May be repeated for up to 8 units of credit toward the degree.

MGT 299 Research For Thesis Or Dissertation 1 to 12 Prerequisite(s): consent of instructor. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

MGT 302 Apprentice Teaching 1 to 4 Seminar, 1 to 4 hours. Prerequisite(s): limited to departmental teaching assistants; graduate standing. Supervised individual instruction in teaching including monitoring of teaching assistant’s activities and regular consultation with assistant concerning teaching responsibilities. Graded Satisfactory (S) or No Credit (NC). May be repeated; not for degree credit.

MGT 400A Financial Accounting Principles and Practices I 4 Lecture, 20 hours per quarter; discussion, 20 hours per quarter. Prerequisite(s): graduate standing and consent of instructor or admission to the Master of Professional Accountancy (M.P.Ac.) program. Technical accounting theory and principles necessary for graduate work. Credit toward degree limited to M.P.Ac. students.

MGT 400B Financial Accounting Principles and Practices II 4 Lecture, 20 hours per quarter; discussion, 20 hours per quarter. Prerequisite(s): MGT 400A or consent of instructor. A continuation of technical accounting theory and principles necessary for graduate work. Credit toward degree limited to M.P.Ac. students.

MGT 400C Managerial Accounting/Accounting Information Systems 4 Lecture, 20 hours per quarter; discussion, 20 hours per quarter. Prerequisite(s): graduate standing and consent of instructor or admission to the Master of Professional Accountancy (M.P.Ac.) program. Managerial accounting and accounting information systems concepts necessary for graduate work.

MGT 400D Taxation of Individuals and Business Entities 4 Lecture, 20 hours per quarter; discussion, 20 hours per quarter. Prerequisite(s): graduate standing and consent of instructor or admission to the Master of Professional Accountancy (M.P.Ac.) program. Taxation rules and regulations for individuals and business entities necessary for graduate work.

MGT 400E Auditing and Assurance 4 Lecture, 20 hours per quarter; discussion, 20 hours per quarter. Prerequisite(s): graduate standing and consent of instructor or admission to the Master of Professional Accountancy (M.P.Ac.) program. Audit and assurance concepts necessary for graduate work.

MGT 402 Business Career Professional Development Workshop 2 Seminar, 1 hour; consultation, 1 hour; individual study, 4 hours. Prerequisite(s): graduate standing in a program in the Anderson Graduate School of Management. Provides skill development and experience to network in person and via social media outlets. Offers a platform for practical implementation of effective job search strategies in various industries. Sets stage for development and presentation of student’s ideas clearly at internship and job interviews. Graded Satisfactory (S) or No Credit (NC).

MGT 403 Review of Quantitative Methods For Management 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Reviews quantitative concepts and techniques related to the various functional areas of management. Topics include properties of functions, systems of equations and matrices (linear algebra), differentiation and integration (calculus), and basic probability concepts. Graded Satisfactory (S) or No Credit (NC).

MGT 404 Communications, Leadership, Teams, and Ethics 2 Lecture, 7 hours per quarter; workshop, 28 hours per quarter. Prerequisite(s): graduate standing. Uses case discussions, presentations, and theoretically informed readings to develop communication, presentation, and leadership skills; examine the principles of effective teamwork; and introduce representative ethical issues confronting managers. Not for degree credit. Graded Satisfactory (S) or No Credit (NC).
Marxist Studies Minor

College of Humanities, Arts, and Social Sciences
Bronwyn Leebaw, Chair
Sproul 4124
(951) 827-1473; marxiststudies.ucr.edu

Committee in Charge
Bronwyn Leebaw, Chair (Political Science)
Jennifer Doyle (English)
Alfonso Gonzalez, (Ethnic Studies)
Daryle Williams, Dean, ex officio

The Marxist Studies minor integrates courses from various disciplines in order to examine the theory and main applications of Marxism in the social sciences and humanities disciplines.

Requirements for the minor (24 units)
1. Theory, method, and history of thought requirement
   a) PHIL 153
2. Four courses from the following dealing with applications of Marxist studies in various fields:
   a) ANTH 131
   b) CPLT 180X
   c) ECON 175
   d) POSC 160
   e) WRLT 170/ETST 170

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Materials Science and Engineering

Subject abbreviation: MSE
The Marlan and Rosemary Bourns College of Engineering
Juchen Guo, Ph.D., Chair
Materials Science and Engineering Program

Program Faculty
Distinguished Professors
Reza Abbaspour, Ph.D. (Mechanical Engineering)
Pingyong Feng (Chemistry)
Umar Mohideen, Ph.D. (Physics and Astronomy)
Ashok Mulchandani, Ph.D. (Chemical and Environmental Engineering)
Jing Shi (Physics)
Kambiz Vafai, Ph.D. (Mechanical Engineering)
Michael R. Zachariah, Ph.D. (Chemical and Environmental Engineering)
Francisco Zaera, Ph.D. (Chemistry)

Professors
Christopher Bardeen, Ph.D. (Chemistry)
Ludwig Bartels, Ph.D. (Chemistry)
Boniface Fokwa Ph.D. (Chemistry)
Nathaniel Gabor Ph.D. (Physics and Astronomy)
Juchen Guo Ph.D. (Chemical and Environmental Engineering)
Roger Lake, Ph.D. (Electrical and Computer Engineering)
Huinan Liu Ph.D. (Bioengineering)
Jianlin Liu, Ph.D. (Electrical and Computer Engineering)
Stefano Lonardi, Ph.D. (Chemical and Engineering)
Christopher Lynch, Ph.D. (Dean, BCOE)
Lorenzo Mangolini Ph.D. (Mechanical Engineering)
Allen Mills, Ph.D. (Physics and Astronomy)
Leonard Mueller, Ph.D. (Chemistry)
Cengiz Ozkan, Ph.D. (Mechanical Engineering)
Mihriz Oztan, Ph.D. (Electrical and Computer Engineering)
Victor Rodgers, Ph.D. (Bioengineering)
Jing Shi, Ph.D. (Physics and Astronomy)
Harry W.K. Tom, Ph.D. (Physics and Astronomy)
Kathryn Uhrich, Ph.D. (Dean, College of Natural & Agricultural Sciences)
Valentine Vullev, Ph.D. (Bioengineering)
Bryan Wong Ph.D. (Chemical and Environmental Engineering)
Jianzhong Wu, Ph.D. (Chemical Engineering)
Guanshui Xu, Ph.D. (Mechanical Engineering)
Yadong Yin, Ph.D. (Chemistry)

Associate Professors
Sinisa Coh Ph.D. (Mechanical Engineering)
Shane Cybart, Ph.D. (Mechanical Engineering)
Juan Pablo Giraldo, Ph.D. (Botany and Plant Sciences, CNAS)
Alexander Greaney Ph.D. (Mechanical Engineering)
Elaine Haberer, Ph.D. (Electrical and Computer Engineering)
Chen Li Ph.D. (Mechanical Engineering)
Ming Liu, Ph.D. (Electrical and Computer Engineering)
Jin Nam, Ph.D. (Bioengineering)
Masaru Rao, Ph.D. (Mechanical Engineering)
Peng Wei Ph.D. (Physics and Astronomy)
Richard Wilson Ph.D. (Mechanical Engineering)
Ruoxue Yan, Ph.D. (Chemical and Environmental Engineering)

Assistant Professors
Igor Barsukov, Ph.D. (Physics and Astronomy)
Xi Chen, Ph.D. (Electrical and Computer Engineering)
Yongtao Cui, Ph.D. (Physics and Astronomy)
Boerge Hemmerling (Physics)
Kandis Leslie Gilliard-AbdulAziz (Chemical and Environmental Engineering)
Tamar Mentzel (Mechanical Engineering)
Timothy Su (Chemistry)
Luat Thanh Vuong, Ph.D. (Mechanical Engineering)
Dmytro Zagrebelyny (Mechanical Engineering)

Adjunct Professors
Alfredo Martinez-Morales, Ph.D. (Managing Director of the Southern California Research Initiative for Solar Energy (SC-RISE))
Suveen Mathaudhu (Colorado School of Mines)
Mahesh R. Neupane, Ph.D. (ARL-WEST Los Angeles)

Major
The B.S. degree in Materials Science and Engineering is offered jointly by the five participating departments of The Marlan and Rosemary Bourns College of Engineering. The program aims to produce students who are effective team players in materials engineering or related engineering science or managerial positions, who use and improve on their skills in the job; who can enter into graduate or professional degree programs; and who are responsible engineers, professionals or scientists demonstrating ethical and professional responsibility and continuing to learn through a variety of educational experiences.

The Materials Science and Engineering Program Educational Objectives are to prepare our graduates to impact an evolving society by producing materials science and engineering constituents who:

- are successful in both education and industry
- can demonstrate professionalism and leadership in cutting edge interdisciplinary materials science and engineering practices
- can utilize an understanding of the principles of materials science and engineering to improve existing systems and innovate and design next generation technologies
- will contribute effectively as individuals, team members, and/or leaders to achieve personal, group and institutional goals.

The Materials Science and Engineering B.S. degree program at UCR is accredited by the Engineering Accreditation Commission of ABET, abet.org.

Change of Major Criteria
All students who request a change of major to Materials Science and Engineering must meet the following requirements:

- Be in good academic standing
- Have no less than a C- in any Math, Science and Engineering coursework
- Have a minimum 2.0 GPA in all Math, Science and Engineering required coursework
- Be able to complete major within maximum allowable units
- Complete all the courses listed below, based on the total number of units earned, prior to submitting the major change request
- UCR transfer students interested in changing to a BCOE major must have been admissible to the major at point of entry, or must satisfy transfer admission and change of major requirements before earning 120 units
- If changing in the 90-119 units category student must have the ability to complete major within 5 years of entry as a Freshmen or 3 years after entry as a Transfer student
- Students who have earned 120 or more units are not eligible for a change of major in BCOE. NOTE: AP/IB units are excluded from maximum unit calculation
University Requirements
See Undergraduate Studies section.

College Requirements
See The Marlan and Rosemary Bourns College of Engineering, Colleges and Programs section.

The Materials Science and Engineering major uses the following major requirements to satisfy the college’s Natural Sciences and Mathematics breadth requirement.

1. One course in the biological sciences chosen from an approved list
2. CHEM 001A, CHEM 001LA
3. MATH 009A
4. PHYS 040A, PHYS 040B

Major Requirements

1. Lower-division requirements (75 units)
   a) CHEM 001A, CHEM 01LA, CHEM 001B, CHEM 01LB, CHEM 001C, CHEM 01LC
   b) CS 009A or CS 010A
   c) EE 005
   d) MATH 009A, MATH 009B, MATH 009C, MATH 010A, MATH 010B, MATH 046
   e) ME 010
   f) MSE 001, MSE 002L, MSE 003L, MSE 004L
   g) PHYS 040A, PHYS 040B, PHYS 040C
   h) CHEM 008A, CHEM 081A

2. Upper-division requirements (76 units)
   a) BIEN 140A/CEE 140A
   b) CHE 100
   c) EE 138
   d) ENGR 180W
   e) ME 110, ME 114, ME 156
   f) MSE 134, MSE 135, MSE 160, MSE 161, MSE 175A, MSE 175B
   g) STAT 155
   h) Technical Electives (20 units):
      (1) Four (4) units of required technical electives, MSE 143
      (2) Sixteen (16) units chosen from BIEN / MSE 136, BIEN 140B/CEE 140B, CHE 105, CHE 161, EE 133, EE 136, EE 137, EE 139, EE 162, ME 153, MSE 142, MSE 148, MSE 155, MSE 156, MSE 197

Visit the Student Affairs Office in the College of Engineering or student.engr.ucr.edu for a sample program.

Graduate Program

Admission

Applicants should have completed a program equivalent to UCR’s B.S. in Materials Science and Engineering, obtained a B.S. in a related discipline and demonstrated particular interest/aptitude for Materials Science and Engineering, or demonstrate the required knowledge and proficiency in the following subjects.

   1. Fundamentals of Materials Science and Engineering (equivalent to MSE 001)
   2. Fundamentals of Chemistry (equivalent to Chem 001A & Chem 001B & Chem 001C)
   3. Fundamentals of Physics (equivalent to Phys 040A & Phys 040B and Phys 040C)
   4. Fundamentals of Materials Synthesis or Processing (for instance, equivalent to Chem 112A)
   5. Nanostructure Characterization or Materials Characterization (equivalent to MSE 160 or MSE 161).

Under special circumstances, students who have not completed all preparation course requirements may be admitted provided that the deficiencies are corrected within the first year of graduate study. Deficiencies limited to 12 units maximum. Courses taken for this purpose do not count towards an advanced degree.

All applicants must submit official scores. All applicants whose native language is not English and who do not have a degree from an institution where English is the exclusive language of instruction must complete the Test of English as a Foreign Language (TOEFL) with a minimum score of 550 (paper-based), 213 (computer-based), or 80 (Internet-based). UCR will accept scores from the Academic Modules of the International English Language Testing System IELTS, which is jointly managed by the British Council, IELTS Australia and the University of Cambridge ESOL Examinations. The exam must be taken within two years of the time prior to enrollment at UCR. The minimum acceptable scores are: all band score of 7 with no individual section score less than 6. Please request an official Test Report Form (TRF) of your IELTS. Remember to order the TRF from the test center where you took the test and ask the administrator to send the official TRF to:

Graduate Admissions Office
Graduate Division
University Office Building
University of California, Riverside
Riverside, CA 92521 USA

For more information about registering for this exam or to locate the office of any test center, consult the IELTS website.

Applicants must meet the general admission requirements of the Riverside Division of the Academic Senate and the UCR Graduate Council as set forth in the UC Riverside Graduate Student Application.

Master of Science

The Program of Materials Science and Engineering offers the M.S. degree in Materials Science and Engineering. Students may obtain an M.S. degree in Materials Science and Engineering through one of two plans: 1) Thesis or 2) Comprehensive Examination.

Plan I (Thesis)

Students must complete 36 units of graduate or upper-division undergraduate course work, of which 24 must be graduate level units. Student must complete at least one course from 3 of the 5 areas of Materials Science and Engineering (MSE 201-209, 210-219, 220-229, 230-239, 240-249) as well as at least one unit of MSE 200 and at least five units of MSE 250. Students must enroll in MSE 200 the first time it is offered during their residency. At least two units of MSE 250-259 must be taken for a letter grade. Students can take a maximum of 12 units in Graduate Research and a maximum 6 units in Direct-ed Studies. The course of study needs to be approved each quarter by the research advisor (when determined) and the graduate advisor. The degree will be awarded when all these requirements are met and the thesis has been submitted successfully.
Plan II (Comprehensive Exam)
All students must complete 36 units of graduate or upper division undergraduate courses, of which 18 units must be graduate level. Students must complete at least one course from each of the 5 areas of Materials Science and Engineering (MSE 201-209, 210-219, 220-229, 230-240, 240-249) as well as at least one unit of MSE 200 and at least four units of MSE 250. At least one unit of MSE 250-259 must be taken for a letter grade. None may be in graduate research (MSE 297 or MSE 299). A maximum of 6 units may be in Directed Studies. Students must enroll in MSE 200 the first time it is offered during their residency. The course of study needs to be approved each quarter by the MSE graduate advisor.

Students will take a written comprehensive examination conducted jointly with the Ph.D. preliminary examination. The examination emphasizes the fundamental knowledge of the study area rather than the specifics covered in individual courses.

Students concurrently enrolled in a Ph.D. program in another department must have their course of study approved by the Graduate Advisor. Coursework used to complete requirements in a non-MSE Ph.D. program cannot be used towards the Master’s degree in MSE. An Oral Comprehensive Examination that measures the student’s breadth of knowledge in Materials Science and Engineering will be given after the appropriate course of study has been completed.

Normative Time to Degree
Six quarters (two years)

Doctoral Degree
The Program of Materials Science and Engineering offers the Ph.D. degree in Materials Science and Engineering.

Admission
In addition to the requirements set forth for a M.S. degree, applicants should demonstrate exceptional achievement that clearly indicates their ability to conduct Ph.D. level studies.

Course Work
There is no comprehensive course requirement for the Ph.D. degree; only a few courses are mandatory. The faculty recommends that the student take a minimum of 36 units of graduate or upper-division undergraduate course work covering all five areas of study in Materials Science and Engineering: Thermodynamic Foundation of Materials, Crystal Structure and Bonding, Materials Characterization Techniques, Functional Materials, and Materials Synthesis and Processing (MSE 201-MSE 209, MSE 210-MSE 219, MSE 220-MSE 229, MSE 230-MSE 239, MSE 240-MSE 249). Students must enroll in MSE 200 the first time it is offered during their residency. Students must enroll in MSE 250 during all quarters of residency and must obtain a letter grade in an MSE 250-MSE 259 course once during each academic year of residency except for the first one.

The courses may include graduate course work used for the M.S. degree. The course of study needs to be approved each quarter by the research advisor (when determined) and the MSE graduate advisor. Students may need to take considerably more than the courses indicated above to prepare for and conduct their Ph.D. research.

Preliminary Examination
The purpose of the preliminary examination is to screen candidates for continuation in the doctoral program. The examination is administered by the graduate program committee jointly with the M.S. comprehensive examination. Candidates must pass at least one problem in each of the five areas of study in Materials Science and Engineering. Plan II M.S. candidates who took the combined M.S. comprehensive and Ph.D. preliminary examination and successfully passed at the Ph.D. level are given credit for having passed the Ph.D. preliminary examination.

Dissertation Proposal and Oral Qualifying Examination
After passing the preliminary examination at the Ph.D. level, doctoral candidates must prepare and submit a dissertation proposal to their qualifying examination committee at least one month before the qualifying examination. The format of the proposal is flexible, but the proposal should clearly indicate the proposed problem under study, demonstrate substantial knowledge of the topic and related issues, state the progress made towards a solution, and indicate the work remaining to be done. The new approaches and methods to be used in the research should also be discussed. An extensive bibliography for the problem under study should be attached to the proposal. Within one week after submission, the student is informed whether the proposal meets these standards and the student is permitted to proceed to the oral exam.

The oral qualifying examination focuses on the dissertation problem. It includes considerable depth in the student’s area of specialization, as required for a successful completion of the dissertation. The examination is a three-hour session, which begins with the student’s presentation of the dissertation topic and is followed with questions and suggestions by the doctoral committee.

Dissertation Examination and Defense
A doctoral dissertation should be an original and substantial contribution to knowledge in the student’s major field. The dissertation must demonstrate the student’s ability to carry out a program of independent advanced research and to report the results in accordance with standards observed in recognized scientific journals. When the doctoral committee determines that a suitable draft of the dissertation has been presented, a dissertation examination and defense for the student is scheduled. The defense consists of a public seminar followed by questions from the committee members and the audience.

Normative Time to Degree
12 quarters (15 quarters for students without an M.S. in Materials Science and Engineering)

Preparation for Careers in Teaching
All doctoral students are encouraged to serve as teaching assistants for at least three quarters during their graduate career. The program offers a Teaching Practicum in Materials Science and Engineering (MSE 302).

Dissertation Examination and Defense
Contact the Graduate Student Affairs Assistant at the Department of Materials Science and Engineering, (951) 827-3383, or visit mse.ucr.edu for information on graduate courses.

Lower-Division Courses
MSE 001 Fundamentals of Materials Science and Engineering 2 Lecture, 1 hour; discussion, 1 hour; laboratory, 1 hour. Prerequisite(s): none. An introduction of properties and applications of different types of materials essential for various areas of engineering. Explores the relationship between structure and properties as well as processing of the materials. Illustrates a wide range of properties required for different types of applications. Graded Satisfactory (S) or No Credit (NC).

MSE 002L General Materials Laboratory Spring 1 Laboratory, 3 hours. Prerequisite(s): MSE 001 with a grade of C- or better; restricted to major(s) Materials Science and Engineering; or consent of instructor. Provides hands-on laboratory experience in topics related to the Structure-Composition-Processing-Performance relationship of ceramics, electronic materials, metals, and polymers. Experiments cover mechanical testing and properties of different materials classes and introduce students to microscopic characterization techniques. Satisfactory(S) or No Credit(N/C) is not available.

MSE 003L General Materials Laboratory Fall 1 Laboratory, 3 hours. Prerequisite(s): MSE 001 with a grade of C- or better; restricted to major(s) Materials Science and Engineer; or consent of instructor. Provides hands-on laboratory experience in topics related to the Structure-Composition-Processing-Performance relationship of ceramics, electronic materials, metals, and polymers. Experiments cover materials processing and failure modes of different materials classes. Satisfactory(S) or No Credit(N/C) is not available.

MSE 004L General Materials Laboratory Winter 1 Laboratory, 3 hours. Prerequisite(s): MSE 001 with a grade of C- or better; restricted to major(s) Materials Science and Engineer; or consent of instructor. Provides hands-on laboratory experience in topics related to the Structure-Composition-Processing-Performance relationship of ceramics, electronic materials, metals, and polymers. Experiments cover electrical, thermal, optical, and magnetic properties. Introduces composites and the factors that affect its properties and mechanical performance. Satisfactory(S) or No Credit(N/C) is not available.
Upper-Division Courses

MSE 134 Microstructural Transformations in Materials 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ME 114 or consent of instructor. An introductory study of the fundamentals (thermodynamics and kinetics) controlling microstructural transformations in materials and their application to both liquid-solid and solid-solid transformations. Focuses on the important transformations that ultimately control the microstructures and properties of crystalline solids. Cross-listed with ME 134.

MSE 135 Introduction to Inorganic Material Synthesis 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MSE 001, CHE 100, ME 114, CHEM 008A; or consent of instructor. Introduction to the synthesis methods of modern materials. Topics include solid-state reactions, gas-phase and solution phase synthesis, templating methods, synthesis and modification of inorganic polymers, semiconductor thin-film deposition, and the growth of nanomaterials.

MSE 136 Tissue Engineering 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): BIOL 005B; CHEM 001C or CHEM 01HC; BIEN 140A or CEE 140A; restricted to class level standing of junior, or senior; or consent of instructor. Covers progress in cellular and molecular biology and engineering. Provides the basis for advancing tissue repair and regeneration with the goal of restoring compromised tissue functions. Presents methods for cell culture, tissue design and development, manipulation of the cell/tissue microenvironment, and current strategies for functional reconstruction of injured tissues. Cross-listed with BIEN 136.

MSE 142 Corrosion Science 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MSE 134; restricted to class level standing of senior; or consent of instructor. Introduces the principles of corrosion in metals and alloys. Discusses the relevant elements of electrochemistry, electrochemical corrosion, thermodynamics, and the kinetic aspects of corrosion. Includes projects that provide practical hands-on experience using state-of-the-art computational techniques in materials science. Credit is awarded for one of the following MSE 142 or MSE 233A.

MSE 143 Failure Analysis and Prevention 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ME 114 with a grade of C or better; restricted to class level standing of senior; or consent of instructor. Topics include failure modes due to overload, fatigue, fracture, and creep. Also addresses statistical analysis, probability of failure, quality assurance, and elements of fracture mechanics. Cross-listed with ME 157. Credit is awarded for one of the following ME 157, MSE 143, or MSE 233B.

MSE 148 Advanced Solidification Processing 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MSE 143 or ME 157; restricted to class level standing of senior; or consent of instructor. An overview of the fundamentals of solidification processing. Includes integrated interplay of heat flow, mass transport, and solid/liquid interfacial kinetics during discontinuous change of state from liquid to solid of single phase and polynuclear materials. Cross-listed with ME 158. Credit is awarded for one of the following MSE 148, ME 158, ME 279, or MSE 248C.

MSE 155 Materials Science of the Solid State 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 138. Explores at an advanced level the quantum mechanical behavior of electron motion and atom vibration in a periodic solid and their effect on the electronic and thermal properties of matter. The course discusses modern materials science research problems. Credit is awarded for one of the following MSE 155 or MSE 211.

MSE 156 Atomistic Modeling of Solid State Materials 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MSE 155; restricted to class level standing of senior; or consent of instructor. Introduces a basic understanding of computational methods in materials science. Emphasizes the fundamentals of density functional theory and its use in the solid-state context. Includes projects that provide practical hands-on experience using state-of-the-art computational techniques in materials science. Credit is awarded for one of the following MSE 156 or MSE 224.

MSE 160 Nanostructure Characterization Laboratory 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): ME 114. Covers structure of materials at the nanoscale, including semiconductors, ceramics, metals, and carbon nanotubes. Explores relationships among morphology, properties, and processing. Addresses primary methods of characterization, including scanning electron microscopy, scanning probe microscopy, X-ray diffraction, and transmission electron microscopy. Also covers elementary discussions of X-ray, vibrational, and electron waves in solids and introductory diffractometry. Credit is awarded for one of the following MSE 160 or MSE 224.

MSE 161 Analytical Materials Characterization 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): MSE 160. Analysis of the surfaces of materials via ion, electron, and photon spectroscopies. Covers Rutherford back scattering secondary ion mass spectroscopy; electron energy loss spectroscopy; Auger electron spectroscopy; X-ray photoelectron spectroscopy; photoluminescence; extended X-ray absorption fine structure; Fourier transform infrared spectroscopy; Raman spectroscopy; sputtering high-vacuum generation; and focused ion beam milling. Cross-listed with EE 165.

MSE 175A Senior Design 4 Lecture, 2 hours; discussion, 1 hour; practicum, 3 hours. Prerequisite(s): restricted to class level standing of senior; restricted to major(s) Materials Science and Engineer. Covers preparation of formal engineering reports and statistical analysis on a series of problems illustrating methodology from various branches of applied materials science and engineering. Addresses the entire design process: design problem definition; generation of a design specification; documentation; design review process; prototype fabrication; testing and calibration; cost estimation; and federal guidelines. Term project and oral presentation. Satisfactory (S) or No Credit (NC) grading is not available.

MSE 175B Senior Design 4 Lecture, 3 hours; discussion, 1 hour; practicum, 6 hours. Prerequisite(s): MSE 175A; senior standing in Materials Science and Engineering. Covers preparation of formal engineering reports and statistical analysis on a series of problems illustrating methodology from various branches of applied materials science and engineering. Addresses the entire design process: design problem definition; generation of a design specification; documentation; design review process; prototype fabrication; testing and calibration; cost estimation; and federal guidelines. Requires a term project and oral presentation. Satisfactory (S) or No Credit (NC) grading is not available.

MSE 197 Research For Undergraduates 1 to 4 Laboratory, 3 to 12 hours. Prerequisite(s): sophomore or junior or senior standing in Materials Science and Engineering or consent of instructor. Research conducted under the supervision of a MSE faculty member on selected problems in materials science and engineering supporting the focus area of the student. Course is repeatable to a maximum of 8 units; maximum of 4 units may count toward the technical elective requirement.

Graduate Courses

MSE 200 Graduate Studies in Materials Science and Engineering 4 Lecture, 4 hours. Prerequisite(s): Restricted to major(s) Materials Science and Engineer; graduate standing; or consent of instructor. Introduces the fundamentals of materials science and engineering including materials selection, processing, and manufacturing. Utilizes materials design, selection-based approach, and team activities to enhance learning and presentations. Provides information on how to research and survey literature and make technical presentations.

MSE 201 Thermodynamic Foundations of Materials 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing in Materials Science and Engineering or consent of instructor. MSE 201 online section; enrollment in the Online Master-in-Science in Engineering program. Covers the laws of thermodynamics and fundamental equations for multi-component elastic solids, electromagnetic media, and equilibrium criteria. Describes applications to solution thermodynamics, point defects in solids, elastic effects, phase diagrams, transitions, and interfaces. Includes nucleation theory, kinetics (diffusion of heat, mass, and charge), and coupled flows.
MSE 204 Thermodynamics and Statistical Mechanics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; consent of instructor. Covers thermodynamics, statistical mechanics, ideal Bose systems, ideal Fermi systems, and bulk motion. Cross-listed with PHYS 212A.

MSE 205 Advanced Physical Chemistry: Thermodynamics 3 Lecture, 3 hours. Prerequisite(s): CHEM 110A and CHEM 110B with grades of “C” or better. Covers concepts in thermodynamics including fundamental equations, potentials, Maxwell relations, and stability criteria. Cross-listed with CHEM 201D.

MSE 207 Applied Quantum Mechanics 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): MATH 046, PHYS 040A; or consent of instructor. Covers topics in quantum mechanics including Schroedinger equation; operator formalism; harmonic oscillator; quantum wells; spin, bosons, and fermions; solids; perturbation theory; Wentzel-Kramers-Brillouin approximation; tunneling; tight-binding model; quantum measurements; quantum cryptography; and quantum computing. Cross-listed with EE 201.

MSE 208A Plasma-Aided Manufacturing and Materials Processing 4 Lecture, 4 hours. Prerequisite(s): graduate standing or consent of instructor. For ME 274/MSE 208A online section: enrollment in the Online Master-in-Science in Engineering program; graduate standing. Covers the fundamentals of gaseous plasmas and the physics of both equilibrium and non-equilibrium discharges. Explores the basic techniques for plasma diagnostics. Discusses the use of plasmas as a materials processing medium for a variety of manufacturing processes. Includes topics such as the processing of nanostructured materials using plasmas. Cross-listed with ME 274.

MSE 208B Nanoscale Heat Transfer and Energy Conversion 4 Lecture, 4 hours. Prerequisite(s): 2 of the following: MSE 207, ME 100A, ME 116A, EE 201, EE 202, MSE 217; or equivalents; graduate standing. Explores fundamental processes of energy transport and conversion at short length and time scales. Introduces classical and quantum-mechanical size effects on electrons, phonons, and photons. Topics include modes of energy storage, coupling between energy carriers, and electrical and thermal transport using the Boltzmann transport equation and/or kinetic theory. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with ME 274.

MSE 210 Crystal Structure and Bonding 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): graduate standing in Materials Science and Engineering or consent of instructor. MSE 210 online section; enrollment in the Online Master-in-Science in Engineering program. Covers regular and irregular arrays of points and spheres. Includes lattices (direct and reciprocal); crystallographic point and space groups; and atomic structures. Also addresses bonding in molecules and solids, ionic Pauling rules; and covalent and metallic bonding. Surveys the structure of elements, compounds, minerals, and polymers.

MSE 211 Materials Science of the Solid State 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; or consent of instructor. Explores at an advanced level the quantum mechanical behavior of electron motion and atom vibration in a periodic solid and their effect on the electronic and thermal properties of matter. The course discusses modern materials science research problems. Credit is awarded for one of the following MSE 211 or MSE 155.

MSE 212 Quantum Electron Transport 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 208 or MSE 227B; graduate standing; or consent of instructor. Covers the theory and methods used to model quantum electron transport in ultrascaled traditional semiconductor devices such as transistors, nanoscaled research semiconductor devices (such as quantum dots), and novel electronic material systems (such as carbon nanotubes and molecular wires.) May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with EE 212.

MSE 214 Condensed Matter Physics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 221C; graduate standing; or consent of instructor. Topics include classical and quantum theories of the electron gas; crystal and reciprocal lattices; crystal symmetries; electrons in a periodic potential; nearly free electrons; tight binding band structure; metals, insulators and semiconductors; semiclassical dynamics; and semiclassical transport. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with PHYS 240A.

MSE 217 Fundamentals of Semiconductors and Nanostructures 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): EE 133, EE 201/EE 201(N); graduate standing; or consent of instructor. Examines principles of semiconductor materials and nanostructures. Topics include periodic structures, electron and phonon transport, defects, optical properties, and radiative recombination. Also covers absorption and emission of radiation in nanostructures and nonlinear optics effects. Emphasizes properties of semiconductor superlattices, quantum wells, wires, and dots. Cross-listed with EE 202.

MSE 218 Imperfections in Solids 4 Lecture, 4 hours. Prerequisite(s): graduate standing; or consent of instructor. Covers fundamentals of crystal structures and crystal defects. Includes the generation of point defects, nucleation and propagation of dislocations, perfect and partial dislocations, twins, stacking faults, transformations, mechanics of semiconductor and metallic thin films, and multilayered structures. Cross-listed with ME 278.

MSE 220 Materials Characterization Techniques 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing in Materials Science and Engineering or consent of instructor. Covers basic principles of techniques used in the characterization of engineering materials by electron microscopy, diffraction, and spectroscopy. Provides analysis of defects responsible for materials properties. Addresses modern electrical, optical, and particle beam techniques for material characterization. Includes Hall Effect and Raman spectroscopy.

MSE 221 Electron Microscopy and Microanalysis 3 Lecture, 3 hours. Prerequisite(s): graduate standing in Materials Science & Engineering or consent of instructor. Introduces electron microscopy and microanalysis of inorganic solids including synthetic nanomaterials and minerals. Provides the underlying physical principles of electron microscopy and microanalysis; the strengths and limitations of the method; and the potential applications in characterization of morphology, structure, composition, and defects of inorganic materials and nanostructures. Optional, related laboratory courses are available: MSE 222L, MSE 223L.

MSE 222L Laboratory in Transmission Electron Microscopy 1 Laboratory, 2 hours; written work, 1 hour. Prerequisite(s): Concurrent or previous enrollment in MSE 221 or consent of instructor. Provides practical training in transmission electron microscopy and associated techniques including sample preparation.

MSE 223L Laboratory in Scanning Electron Microscopy 1 Laboratory, 2 hours; written work, 1 hour. Prerequisite(s): Concurrent or previous enrollment in MSE 221 or consent of instructor. Provides practical training in scanning electron microscopy and associated techniques including sample preparation.

MSE 224 Atomic Modeling of Solid State Materials 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 138 or MSE 211 or PHYS 150A; graduate standing; or consent of instructor. Introduces computational methods in materials science. Emphasizes fundamentals of density functional theory and its use in the solid-state context. Includes projects that provide practical hands-on experience. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory(S) or No Credit(NC) grade. Credit is awarded for one of the following MSE 224 or MSE 156.

MSE 225A Spectroscopy in Organic Structure Analysis 3 Lecture, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Utilizes modern spectroscopic techniques such as IR, mass spectrometry, and 1H and 13C NMR to determine the structure of complex organic molecules. Topics include advanced NMR techniques such as 2D NMR, NMR pulse sequences, diffusion NMR, and MRI. Cross-listed with CHEM 211D.

MSE 225B Advanced Analytical Chemistry: Optical Spectroscopy 3 Lecture, 3 hours. Prerequisite(s): CHEM 125; graduate standing; or consent of instructor. Provides an overview of modern analytical optical spectroscopic techniques including theory, instrumentation, and applications. Cross-listed with CHEM 221B.

MSE 225C Introduction to Computational Quantum Chemistry 3 Lecture, 3 hours. Prerequisite(s): CHEM 113 or equivalent, graduate standing; or consent of instructor. Introduces computational techniques in quantum chemistry. Includes Hartree-Fock theory, Density Functional Theory, and electron correlation methods. Emphasizes practical applications in a research setting. Cross-listed with CHEM 206A.
MSE 226 Optical Methods in Biology, Chemistry, and Engineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 109 or equivalent; graduate standing; consent of instructor. Covers the origin of fluorescence and other emission processes that modulate the characteristics of molecular emissions. Presents emission-based analytical and bioanalytical methods and techniques. Reviews state-of-the-art instrumentation, including their applicability, limitations, and sources. Also provides interpretation and meaning of the measured signals as applied to biological systems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes. Cross-listed with BIEN 245.

MSE 227A Nanoscale Characterization Techniques 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): EE 201 or MSE 207; graduate standing; consent of instructor. An in-depth study of nanoscale materials and device characterization techniques. Emphasizes atomic force microscopy (AFM) and scanning tunneling microscopy (STM). Includes semiconductor fabrication fundamentals; metrology requirements; in situ monitoring; interconnects and failure analysis; principles of AFM, STM, and scanning electron microscopy; X-ray methods; optical and infrared techniques; and electrical characterization. Cross-listed with EE 206.

MSE 227B Semiconductor Electronic and Optical Properties 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 221B, may be taken concurrently or EE 202, may be taken concurrently or MSE 217, may be taken concurrently; graduate standing. Introduction to electronic bandstructure. Topics include electronic structure of semiconductors, graphene, localised orbital models, k dot p models, spin-orbit coupling, and optical generation of spin. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with EE 208.

MSE 229 Advanced Computation For Materials Design 4 Lecture, 4 hours. Prerequisite(s): graduate standing; consent of instructor. Covers both desktop computing and high-performance computing (i.e., supercomputing resources) in the engineering sciences to understand and design materials using computational methods. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CEE 240.

MSE 230 Functional Materials: Semiconductors 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): graduate standing in Materials Science and Engineering or consent of instructor. Covers semiconductor crystal growth techniques; purification; doping; radiation damage; annealing; metal-semiconductor interfaces; defects and impurities; and major electronic and optical methods for the analysis of semiconductors. Includes semiconductor device fabrication issues.

MSE 233A Corrosion Science 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MSE 233A online section; enrollment in the Online Master-in-Science in Engineering program. MSE 233A in-person section; graduate standing; consent of instructor. Introduces the principles of electrochemistry and the essential elements of electrochemical corrosion, thermodynamics, and kinetic aspects of Material Sciences. Provides a fundamental understanding of the mechanisms of corrosion, testing, and protection as well as the influence of pH, dissolved gases, dissolved salts, temperature, and biological microorganisms. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following MSE 233A or MSE 142.

MSE 233B Failure Analysis and Prevention 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MSE 233B online section; enrollment in the Online Master-in-Science in Engineering program. MSE 233B in-person section; graduate standing; consent of instructor. Introduces the principles of failure analysis and prevention, emphasizing the influence of defects produced during casting, forming, and welding. Provides a fundamental understanding of overload failure modes, fatigue, and fracture toughness, and creep. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following MSE 233B, ME 157, or MSE 143.

MSE 233C Physics of Nanoscale Systems 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; consent of instructor. Introduction to fundamental quantum physics in nanoscale systems and low dimensional materials. Including synthesis of low-dimensional material systems; physics-based experimental approaches to nanotechnology; mesoscopic quantum transport of electrons; quantum phenomena involving spin; silicon nanoelectronics and beyond; and future electronics based on topological materials. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with PHYS 234.

MSE 233D SpINTRONICS and Nanoscale Magnetism 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Provides an overview of contemporary issues in nanoscale magnetism and spin-dependent phenomena in solids, including the fundamentals of magnetism, magnetism in reduced dimensions, novel magnetic materials, spin-polarized transport, spin coherence in semiconductors, magnetization dynamics, and device applications. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with PHYS 235.

MSE 235 Inorganic Chemistry 3 Lecture, 3 hours. Prerequisite(s): CHEM 231A/MSE 245B or consent of instructor. Covers the advanced synthesis, structure, bonding, and properties of inorganic materials. Cross-listed with CHEM 231C.

MSE 236 Nanomaterials For Regenerative Medicine 4 Lecture, 4 hours. Prerequisite(s): BIOL 005C, CHEM 001C (or CHEM 01HC), MSE 001, or equivalents; graduate standing or consent of instructor. Covers recent advances in nanomaterial synthesis, fabrication, and characterization. Focuses on the medical applications of nanomaterials and nanotechnologies. Addresses methods of synthesis of nanomaterials such as nanoparticles, nanotubes, and nanofibers. Includes critical design criteria and assessment methods for properties of nanomaterials to meet medical requirements. Cross-listed with BIEN 236.

MSE 237A Quantum Magnetism 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; consent of instructor. Introduces fundamental physical properties of magnetism and quantum behavior of magnetic materials for the understanding of modern magnetic devices. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with EE 220A.

MSE 237B Nanoscale Phonon Engineering 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): EE 202/MSE 217. Studies acoustic and optical phonons that affect electrical, thermal, and optical properties of materials. Focuses on the confinement-induced changes of phonon properties in nanostructures and their implications for the design of electronic, thermoelectric, and optoelectronic devices. Explores phonon theory, Raman spectroscopy and other phonon characterization techniques, thermal conductivity, and related measurements. Cross-listed with EE 216.

MSE 237C Solid State Devices 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): EE 133 or consent of instructor. Covers electronic devices including p-n junctions, field-effect transistors, heterojunction bipolar transistors, and nanostructure devices. Explores electrical and optical properties of semiconductor heterostructures, superlattices, quantum wires, and dots, as well as devices based on these structures. Cross-listed with EE 203.

MSE 238 Introduction to Microelectromechanical Systems 4 Lecture, 4 hours. Prerequisite(s): ME 110, ME 114, or equivalents; for MSE 238 online section; enrollment in the Online Master-in-Science in Engineering program. An introduction to the design and fabrication of microelectromechanical systems (MEMS). Topics include micromachining processes; material properties; transduction; applications in mechanical, thermal, optical, radiation, and biological sensors and actuators; microfluidic devices; Bio-MEMS and applications; packaging and reliability concepts; and metrology techniques for MEMS. Cross-listed with ME 270.
Functional materials include semiconductors, functional materials and materials processing. Consent of instructor. Covers synthesis of 1 hour. Prerequisite(s): graduate standing or consent of instructor. Covers key concepts in synthesis and characterization techniques of nanoscale materials. Explores top down and bottom-up strategies for synthesizing low-dimensional materials. Introduces topics such as properties of semiconductors, cleanroom environment, epitaxy, ion implantation, etching, lithography, device architecture, testing, and fault detection. May offer field trips. Cross-listed with CHEM 208, and PHYS 202.

MSE 246C Nanoscience and Nanotechnology 3 Lecture, 3 hours. Prerequisite(s): graduate standing in Chemistry, Physics, Engineering, or a related subject or consent of instructor. Provides a condensed, interdisciplinary overview of selected fields of nanoscience and emerging nanotechnological applications. Focuses on applications relevant for the campus research community that are not based on electronic applications of silicon. Cross-listed with CHEM 203.

MSE 245D Interdisciplinary Overview of Current Issues in Semiconductor Processing 3 Lecture, 3 hours. Prerequisite(s): graduate standing in Chemistry, Physics, Engineering, or a related subject or consent of instructor. An interdisciplinary overview of present-day semiconductor processing. Introduces topics such as properties of semiconductors, cleanroom environment, epitaxy, ion implantation, etching, lithography, device architecture, testing, and fault detection. May offer field trips. Cross-listed with CHEM 208, and PHYS 202.

MSE 246 Cellular and Molecular Engineering 4 Lecture, 2 hours; discussion, 1 hour; practicum, 3 hours. Prerequisite(s): graduate standing or consent of instructor. BIEN 224 online session; enrollment in the Online Master-in-Science in Engineering program. Emphasizes biophysical and engineering concepts intrinsic to specific topics at the cellular and molecular level. Includes receptor-ligand dynamics in cell signaling and function; DNA replication and RNA processing; cellular and protein sorting; control of gene expression; membrane structure, transport and traffic; biological signal transduction; and mechanics of cell division. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CEE 224.

MSE 246A Nanoscale Science and Engineering 4 Lecture, 4 hours. Prerequisite(s): graduate standing or consent of instructor. For the MSE 246A/ME 272 online sections: enrollment in the Online Master-in-Science in Engineering program; graduate standing. An overview of the machinery and science of the nanometer scale. Topics include patterning of materials via scanning probe lithography; electron beam lithography; nanoimprinting; self-assembly; mechanical, electrical, magnetic, and chemical properties of nanoparticles, nanotubes, nanowires, and biomolecules (DNA, protein); self-assembled monolayers; and nanocomposites and synthetic macromolecules. Cross-listed with ME 272.

MSE 248B Mechanics and Physics of Materials 4 Lecture, 4 hours. Prerequisite(s): graduate standing or consent of instructor. Course introduces students to topics related to Structure-Composition-Processing-Performance relationship of metallic materials. It will cover fundamentals of materials science, materials selection, processing and manufacturing. Materials design or selection-based approach and team activities will be utilized to enhance learning and presentation skills. Cross-listed with ME 266.

MSE 248C Advanced Solidification Processing 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MSE 134 or ME 134; graduate standing; or consent of instructor. An overview of the fundamentals of solidification processing. Includes integrated interplay of heat flow, mass transport, and solid/liquid (s/l) interfacial kinetics during discontinuous change of state from liquid to solid of single phase and polyphase materials. Cross-listed with ME 279. Credit is awarded for one of the following: MSE 248B, ME 279, ME 158, or MSE 148.

MSE 250 Colloquium in Materials Science and Engineering 1 Colloquium, 1 hour. Prerequisite(s): graduate standing in Materials Science and Engineering or consent of instructor. Presentations on current topics in Materials Science and Engineering presented by invited speakers, UCR faculty, and graduate students. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

MSE 251 Topics in Materials Science and Engineering 1 Seminar, 1 hour. Prerequisite(s): graduate standing in Materials Science & Engineering or consent of instructor. Presentations on current topics in Materials Science and Engineering by special speakers, UCR faculty, and graduate students. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 21 units.

MSE 280 Special Topics in Biomaterials and Tissue Engineering 1 to 2 Seminar, 1 to 2 hours; term paper, 0 to 3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on advanced biomaterials and tissue engineering for medical applications. Explores the design, processing, characterization, and evaluation of biomaterials. Examines current development in novel materials and recent advances in their applications in tissue engineering, drug delivery, gene therapy, cell therapy, medical devices, and implants. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable as content changes to a maximum of 30 units. Cross-listed with BIEN 272.

MSE 290 Directed Studies 1 to 6 Individual Study, 3 to 18 hours. Prerequisite(s): consent of instructor and graduate advisor. Individual study directed by a faculty member on selected topics in Materials Science and Engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

MSE 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): consent of instructor and graduate advisor. Research conducted under the supervision of a faculty member on selected topics in Materials Science and Engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.
MSE 298 Individual Internship in Materials Science & Engineering 1 to 12 Internship, 2 to 24 hours; written work, 1 to 12 hours. Prerequisite(s): graduate standing; consent of instructor. Provides the Materials Science & Engineering graduate student with career experience as an engineer in an industrial or national lab setting. Includes fieldwork with an approved professional individual or organization and academic work under the direction of a faculty member. Requires a final report. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

MSE 299 Research For the Thesis Or Dissertation 1 to 12 Research, 3 to 36 hours. Prerequisite(s): consent of instructor; graduate standing Research in materials science and engineering for the M.S. thesis or Ph.D. dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses
MSE 302 Teaching Practicum 1 to 2 Consultation 1 To 2, Prerequisite(s): appointment as a teaching assistant in Materials Science and Engineering; consent of instructor and graduate advisor. Topics include effective teaching methods, such as those involved in leading discussion sections and preparing and grading examinations, as well as student-instructor relations in lower- and upper-division Materials Science and Engineering courses. Required each quarter of teaching assistants and associates in Materials Science and Engineering. Graded Satisfactory (S) or No Credit (NC).

Mathematics
Subject abbreviation: MATH

College of Natural and Agricultural Sciences
Frederick Wilhelm, Ph.D., Chair
Department Office, 238 Skye Hall
(951) 827-3113; mathdept.ucr.edu

Professors
Mark Alber, Ph.D., Distinguished Professor
Vyjayanthi Chari, Ph.D., Distinguished Professor
Wee Liang Gan, Ph.D.
Jacob Greenstein, Ph.D.
Michel L. Lapidus, Ph.D., Distinguished Professor
Yat Sun Poon, Ph.D.
Ziv Ran, Ph.D.
Rodolfo Torres, Ph.D., Distinguished Professor
Stefano Vidussi, Ph.D.
Frederick H. Wilhelm, Jr., Ph.D.
Bun Wong, Ph.D.
Feng Xu, Ph.D.
Qi S. Zhang, Ph.D.

Malempati M. Rao, Ph.D.
Louis J. Ratliff, Jr., Ph.D.
Reinhard Schultz, Ph.D.
James D. Stafney, Ph.D.
Albert R. Stralka, Ph.D.

Associate Professors
Po-Ning Chen, Ph.D.
James Kelliher, Ph.D.
Carl Mautner, Ph.D.
Amir Moradifam, Ph.D.
Peter Samuelson, Ph.D.
Zhenghe Zhang, Ph.D.

Associate Professors of Teaching
Kevin Costello, Ph.D.
Sara Lapan, Ph.D.
David Weisbart, Ph.D.

Assistant Professors
Patricio Gallardo Candela, Ph.D.
Weitao Chen, Ph.D.
Heyrim Cho, Ph.D.
Yat Tin Chow, Ph.D.
Brian Collier, Ph.D.
Matthew Durham, Ph.D.
Jose Gonzalez, Ph.D.
Jia Gou, Ph.D.
Mykhailo Potomkin, Ph.D.
Maziar Raissi, Ph.D.
Qixuan Wang, Ph.D.
Yiwei Wang, Ph.D.
Agnieszka Zelerowicz, Ph.D.

Associate Professor of Teaching
Sarah Yeakey, Ph.D.
**

Visiting Assistant Professors
Kaya Arro, Ph.D.
Hassan Attarchi, Ph.D.
Max Bacharak, Ph.D.
David Clausen, Ph.D.
Liping Deng, Ph.D.
Courtney George, Ph.D.
Pallav Goyal, Ph.D.
Fazel Hadadifard, Ph.D.
Matthew Harper, Ph.D.
Krishnendu Khan, Ph.D.
Hamid Naderiyah, Ph.D.
Boris Tsvelikovskiy, Ph.D.
Liaosha Xu, Ph.D.
Keija Zhu, Ph.D.

Lecturer
Michael Curtis

Cooperating Faculty
Bai-Lian “Larry” Li, Ph.D. (Botany and Plant Sciences)

Academic Coordinator
Savanna Gee, Ph.D.

Major
The Department of Mathematics offers a B.A. and B.S. degree in programs that share a common, solid mathematical foundation but differ in their specializations in the pure and applied areas of mathematics. These programs can provide the basis for careers in mathematics itself or within the many scientific and business fields, which, in today’s technological society, depend on a basic knowledge of mathematical methods.

The B.A. in Mathematics, following the liberal arts tradition, combines a broad coverage of the humanities and social sciences with a moderate amount of advanced mathematics in the major. It is selected most often either by students who intend to obtain a teaching credential with a specialty in mathematics or by students who wish to pursue graduate work in business or the social sciences.

The B.S. in Mathematics is more technical and contains a greater concentration of work in the major field. The Pure Mathematics program is directed toward students who may wish to pursue graduate work in pure mathematics. The General Applied Math option is directed toward students who may wish to pursue graduate work in applied mathematics.

The other Applied Mathematics programs, with options in Biology, Chemistry, Economics, Environmental Sciences, Physics, and Statistics, are designed to provide a rigorous training in mathematics together with a substantial background in the discipline of the option. The Computational Mathematics program is designed to prepare the student for professional work with computers and computer systems and for graduate work in computer science.

The B.S. in Mathematics for Secondary Teachers is intended for students planning to pursue a career in secondary education. Its courses cover the high school curriculum from an advanced perspective. Students are required to complete mathematics education and education courses in order to facilitate presence in the classroom early in their undergraduate career and to better prepare them for entry in a credential program.

Academic Advising
Each Mathematics major is assigned a faculty advisor who assists the student in formulating educational goals and monitors the student’s subsequent progress in an academic program. Each quarter a study list must be approved by this advisor. Advising for all math majors is conducted by the CNAS Academic Advising Center in 1223 Pierce Hall.

Teaching Credential
Teachers in the public schools in California must have a credential approved by the State Commission on Teacher Credentialing. The credential requires an undergraduate major, baccalaureate degree, and completion of a graduate credential program such as that offered by the School of Education at UCR (see Education in this catalog). The Bachelor of Science in Mathematics for Secondary Teachers assists students in their preparation to face the challenges of a credentialing program. Before admission and student teaching in a graduate credential program, the candidate must pass the California Basic Education Skills Test (CBEST) and demonstrate subject-matter proficiency in the fields which the candidate will teach. The candidate can demonstrate proficiency either by passing the commission’s subject-matter assessment examination or completing an undergraduate program that is state approved for teacher preparation.

California Teach-Science and Mathematics Initiative (CalTeach-SMI)
California Teach-Science and Mathematics Initiative (CalTeach-SMI) has a goal of addressing the critical need of highly qualified K-12 science and mathematics teachers in California. With an economy increasingly reliant on science, technology, engineering, and...
mathematics (STEM) and the anticipated large scale retirement of qualified teachers, this is an essential time to explore and prepare for a career in teaching science or mathematics.

CalTeach-SMI at UCR offers undergraduate students paid/unpaid opportunities, such as the Scholar Apprentice Program, to explore STEM teaching as a career option. Through CalTeach-SMI, students receive advising and mentoring to prepare for entrance into an intern teaching credential program while diligently coordinating with academic advisors to ensure completion of STEM degree requirements. The CalTeach-SMI Resource Center provides future STEM teachers with material and financial resources which includes the National Science Foundation (NSF) Noyce Scholarship Program, to promote planning and professional development towards a science/mathematics education career.

For more information about the CalTeach-SMI program, please visit smi.ucr.edu, the Resource Center at 1114 Pierce Hall, or on Facebook at facebook.com/ScienceMathInitiativeAtUcr and on Instagram at instagram.com/smiatucr/

Change of Major Criteria
All courses taken to fulfill major requirements must be completed with grades of C- or better after repeats.

Freshman (0-4.9 units earned)
Completion of the following with grade of "C"-or better and must be in good academic standing (2.0 quarter and cumulative GPA).

- MATH 005B or MATH 007A or MATH 009A or MATH 009HA

Sophomores (45-89.9 earned units)
Completion of the following three criteria with grade of "C"-or better and must be in good academic standing. (2.0 quarter and cumulative GPA).

- MATH 005B or MATH 007A or MATH 009A or MATH 009HA
- MATH 005C or MATH 007B or MATH 009B or MATH 009HB
- MATH 005C or MATH 009C or MATH 010A

Juniors & Seniors (90 or more earned units)
Completion of the following five criteria with grade of "C"-or better and must be in good academic standing. (2.0 quarter and cumulative GPA).

- MATH 005B or MATH 007A or MATH 009A or MATH 009HA
- MATH 005C or MATH 007B or MATH 009B or MATH 009HB
- MATH 005C or MATH 009C or MATH 010A
- MATH 010A
- MATH 031

Major change requests are reviewed during the 2nd, 3rd, 4th & 10th weeks of each quarter. Students are required to complete degree programs without exceeding 216 earned units.

Transfer Selection Criteria
Applicants to majors in the College of Natural and Agricultural Sciences are selected on the basis of academic preparation, as assessed by their GPA and the strength of preparation for the intended major. A GPA of at least 2.70 is required. (This is a baseline GPA for consideration and not a guarantee of admission.)

In addition, applicants will need to complete college courses comparable to at least two of the following UCR year-long sequences in order to meet selection criteria for this major. Courses must be completed with "C" grades or better:

At least one sequence from:
1. MATH 007A or MATH 009A, MATH 007B or MATH 009B, and MATH 009C (mandatory)
2. MATH 005A, MATH 005B, MATH 005C (mandatory)

And at least one sequence from:
1. BIOL 005A/Biol 05LA and BIOL 005B (and BIOL 005C, if articulated)
2. CHEM 001A, CHEM 01LA, CHEM 011B, CHEM 011C, and CHEM 011LC
3. PHYS 040A, PHYS 040B, and PHYS 040C
4. MATH 010A, MATH 010B, and MATH 045/EE 020A or MATH 046

Courses must be completed with a letter grade, with no grade lower than a "C." Students should visit assist.org for updated and comprehensive major preparation requirements.

University Requirements
See Undergraduate Studies section.

College Requirements
See College of Natural and Agricultural Sciences, Colleges and Programs section.

Major Requirements for the Bachelor of Arts and Bachelor of Science in Mathematics
To fulfill the Natural Sciences requirement, the Department of Mathematics requires the following:

1. One of the year sequences:
   a) BIOL 002, BIOL 003, BIOL 005C
   b) CHEM 001A, CHEM 001B, CHEM 001C, CHEM 011A, CHEM 011B, CHEM 011C
   c) PHYS 040A, PHYS 040B, PHYS 040C

2. Either one course in the physical sciences listed above if (a) above is completed or one course in the biological sciences if (b) or (c) above is completed

The major requirements for the B.A. and B.S. degrees in Mathematics are as follows:

For the Bachelor of Arts
1. Lower-division requirements (25-27 units)
   a) MATH 005B or MATH 007A or MATH 009A or MATH 09HA
   b) MATH 005C or MATH 007B or MATH 009B or MATH 09HB
   c) MATH 010A, MATH 010B, MATH 031
   d) MATH 045/EE 020A or MATH 046

2. Four (4) units of either CS 010A or one upper-division course in Statistics
3. A minimum of 36 units of upper-division mathematics, excluding courses in the MATH 190-199 series

For the Bachelor of Science
Lower-division requirements for all programs are (33-36 units)
   a) MATH 005B or MATH 007A or MATH 009A or MATH 09HA
   b) MATH 005C or MATH 007B or MATH 009B or MATH 09HB
   c) MATH 005C or MATH 009C
   d) MATH 010A, MATH 010B, MATH 031
   e) MATH 045/EE 020A or MATH 046
   f) CS 010A (CS 010B is recommended)

1. Pure Mathematics program (52 units)
   a) Thirty-six (36) units of upper-division mathematics to include at least 24 units from MATH 131, MATH 132, MATH 145A, MATH 145B, MATH 151A, MATH 151B, MATH 151C, MATH 171, MATH 172
   b) At least three courses from (a) above must be from MATH 145A, MATH 145B, MATH 151A, MATH 151B, MATH 151C
   c) Courses in the MATH 190-199 series are excluded
   d) Sixteen (16) additional units of upper-division mathematics, upper-division computer science, or other related courses approved by the undergraduate advisor (For students who wish to pursue graduate work, courses in complex variables, differential equations, and probability may be particularly useful.)

2. Applied Mathematics programs
   MATH 131, MATH 135A and MATH 135B, or MATH 149A and MATH 149B. MATH 146A, MATH 146B, MATH 146C and the courses in one of the following options:
   a) General Applied Mathematics option
      1) MATH 150A or MATH 151A
      2) MATH 168
   b) Three courses from MATH 120, MATH 121, MATH 126, MATH 141, MATH 147, MATH 148, MATH 135A, MATH 135B, MATH 149B
      4) BIOL 102, BIOL 105, BIOL 108
      5) Four (4) additional units of upper-division biology
   c) Chemistry option
      1) CHEM 001A, CHEM 001B, CHEM 001C, CHEM 011A, CHEM 011B, CHEM 011C
      2) PHYS 040A, PHYS 040B, PHYS 040C
      3) Three courses from MATH 120, MATH 135A, MATH 135B, MATH 149A, MATH 149B, MATH 165A, MATH 165B
      4) CHEM 110A, CHEM 110B, CHEM 111, CHEM 113
      5) Four (4) additional units of upper-division chemistry
d) Economics option
(1) MATH 120, MATH 121, MATH 149A, MATH 149B
(2) Four upper-division Economics courses (17-20 units) including:
(a) ECON 104A

e) Environmental Sciences option
(1) CHEM 001A, CHEM 001B, CHEM 001C, CHEM 014A, CHEM 014B, CHEM 014C
(b) ECON 006/ENSC 006
(3) GEO 001 is recommended
(4) MATH 149A
(5) Two courses from MATH 120, MATH 121, MATH 135A, MATH 135B, MATH 149B, CS 177, STAT 155
(6) ENSC 100, ENSC 101, ENSC 102
(7) Four (4) additional units of upper-division environmental sciences

f) Physics option
(1) MATH 135A, MATH 165A
(2) Either MATH 120 or MATH 171
(3) PHYS 130A, PHYS 130B
(4) Either PHYS 135A, PHYS 135B, PHYS 136 or PHYS 156A, PHYS 156B

3. Computational Mathematics program
a) MATH 011/CS 011, MATH 131, MATH 120, MATH 132, MATH 135A, MATH 135B
b) CS 010B, CS 010C, CS 141, CS 150
c) One additional CS course to be chosen from the list of approved technical elective courses.
d) Sixteen (16) units of technical electives to be chosen from
(1) CS 111, MATH 121, MATH 126, MATH 146A, MATH 146B, MATH 146C, MATH 149A, MATH 149B, MATH 171
(2) CS 130, CS 166, CS 170, CS 177

Major Requirements for the Bachelor of Science in Mathematics for Secondary School Teachers
1. Lower-division Mathematics requirements (27-29 units)
a) MATH 005B or MATH 007A or MATH 009A or MATH 099A
b) MATH 005C or MATH 007B or MATH 009B or MATH 099B
c) MATH 005C or MATH 009C
d) MATH 010A, MATH 010B, MATH 031
e) MATH 045/EE 020A or MATH 046
2. Upper-division Mathematics requirements (36 units)
a) MATH 131, MATH 133, MATH 140, MATH 144, MATH 153
b) MATH 150A or MATH 151A
c) Three courses from: MATH 132, MATH 136, MATH 137, MATH 138A, MATH 145A, MATH 145B, MATH 149A, MATH 149B, MATH 150B, MATH 151B, MATH 151C, MATH 171, MATH 172
3. Additional Mathematics and related disciplines requirements (12 units)
a) CS 010A
b) CS 011/MATH 011
c) STAT 155
4. Natural Sciences (16-20 units)
a) BIOL 002 or BIOL 003 or BIOL 005A and BIOL 05LA
b) CHEM 01A and CHEM 01A or CHEM 01A and CHEM 1HLA
c) PHYS 040A
d) CHEM 01B and CHEM 01B or CHEM 01B and CHEM 1HLB or PHYS 040B or an advanced laboratory Biological science course
5. Social Sciences (16 units)
a) One course in ECON or POSC
b) One course in ANTH
c) One course in PSYC
d) One course in SOC
6. Mathematics Education and Education requirements (18 or 19 units): EDUC 003 or EDUC 004 or EDUC 100B or equivalent, EDUC 104, EDUC 132, EDUC 147, EDUC 162
7. Recommended Courses LING 020 or LING 021, EDUC 177 or EDUC 178, EDUC 179A.

Mathematics Honors Program
Candidates for the Honors Program in Mathematics must complete
1. Earn an overall GPA of at least 3.50 in Mathematics.
2. Earn a grade of "B" or better in each of MATH 151A, MATH 151B and MATH 151C.
3. Earn a grade of "B" or better in each of MATH 145B and MATH 171 OR in each of MATH 146A, MATH 146B and MATH 146C OR in each of MATH 149A and MATH 149B.
4. Satisfactorily complete one of the following:
   i) A research project earning a grade of "A" in MATH 197.
   ii) Two courses chosen from one of the sequences: MATH 201A, 201B, 201C; MATH 205A, MATH 205B, MATH 205C; MATH 206A, MATH 206B, MATH 206C, MATH 209A, MATH 209B, MATH 209C; MATH 210A, MATH 210B, MATH 210C with a grade of "C" or better in each course and a GPA of 3.00 in each chosen sequence
2. As a substitute for one or more course sequences in (1), passing a Ph.D. qualifying examination fulfills the course requirement of the corresponding sequence
3. Taking 36 units of courses numbered between MATH 110 and MATH 189, or between MATH 200 and MATH 210. At least 18 must be from courses numbered between MATH 200 and MATH 210.
4. Completion of 2 units of MATH 401, Professional Development in Mathematics.
The requirements of 1 and 2 above constitute the comprehensive final examination requirement for the degree.

Education Abroad
Education Abroad is an excellent opportunity to learn more about another country and their culture while taking courses to earn units toward graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit Education Abroad at ea.ucr.edu or call (951) 827-4113.

See Education Abroad in the Educational Opportunities section in the beginning of this catalog.

Graduate Programs
The Department of Mathematics offers the M.A., M.S., and Ph.D. degrees in Mathematics.

Admission
A bachelor’s degree, or its equivalent, from an accredited institution is required. GRE test scores are not required or considered.

M.A. or M.S. in Mathematics
General university requirements are listed in the Graduate Studies section of this catalog. Specific requirements are as follows:
1. Completion of two of the following sequences: MATH 201A, MATH 201B, MATH 201C, MATH 205A, MATH 205B, MATH 205C; MATH 206A, MATH 206B, MATH 206C, MATH 209A, MATH 209B, MATH 209C; or MATH 210A, MATH 210B, MATH 210C with a grade of "C" or better in each course and a GPA of 3.00 in each chosen sequence
2. As a substitute for one or more course sequences in (1), passing a Ph.D. qualifying examination fulfills the course requirement of the corresponding sequence
3. Taking 36 units of courses numbered between MATH 110 and MATH 189, or between MATH 200 and MATH 210. At least 18 must be from courses numbered between MATH 200 and MATH 210.
4. Completion of 2 units of MATH 401, Professional Development in Mathematics.
The requirements of 1 and 2 above constitute the comprehensive final examination requirement for the degree.
Lower-Division Courses

Mathematics advisory examinations are scheduled before each quarter. The UCR Mathematics Advisory Exam is a prerequisite for students who wish to enroll in math courses but have not received course equivalence in MATH 005A, MATH 007A, MATH 009A, MATH 009HA, or MATH 022.

MATH 004 Introduction to College Mathematics For Business and the Social Sciences 5 Lecture, 3 hours; additional lecture, 2 hours. Prerequisite(s): a sufficiently high score on the Mathematics Advisory Examination, as determined by the Mathematics Department. Not open to students in the Bourns College of Engineering or the College of Natural and Agricultural Sciences or to students majoring in Economics or Business Economics. Covers functions and their graphs including linear and polynomial functions, zeroes, and inverse functions as well as exponential, logarithmic, and trigonometric functions and their inverses. Also includes counting including elementary probability. Involves applications to business and social sciences. Credit is awarded for one of the following MATH 004A, MATH 005A, MATH 006A, or MATH 006B.

MATH 005A The Principles of Calculus I 5 Lecture, 3 hours; additional lecture, 2 hours. Prerequisite(s): a score of 2 on the AP Calculus AB Exam or a sufficiently high score on the Mathematics Advisory Examination, as determined by the Mathematics Department. A study of inequalities, absolute value, functions, graphing, logarithms, trigonometry, roots of polynomials, counting, vectors, and other elementary concepts of mathematics. Covers functions and their graphs including linear and polynomial functions, zeroes, and inverse functions as well as exponential, logarithmic, and trigonometric functions and their inverses. Also includes counting including elementary probability. Involves applications to business and social sciences. Credit is awarded for one of the following MATH 005A, MATH 004, MATH 006A, or MATH 006B.

MATH 005B The Principles of Calculus II 5 Lecture, 3 hours; discussion, 2 hours. Prerequisite(s): MATH 005A with a grade of C- or better. An introduction to application of finite approximation to study functions of one variable. Topics include sequences, series, differential calculus, and antiderivatives. Credit is awarded for one of the following MATH 005B, MATH 007A, MATH 009A, or MATH 09HA.

MATH 005C The Principles of Calculus III 5 Lecture, 3 hours; discussion, 2 hours. Prerequisite(s): MATH 005B with a grade of C- or better. Further topics on infinite series including test of convergence and Taylor’s series. An introduction of integral calculus of one-variable with applications. Credit is awarded for one of the following MATH 005C, MATH 007B, MATH 009B, MATH 009C, MATH 09HB, or MATH 09HC.

MATH 006A Precalculus: An Introduction to Functions 1 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 006A, may be taken concurrently; a sufficient score on the Mathematics Advisory Examination as determined by Mathematics Department; or consent of instructor. Develops and refines quantitative and covariational reasoning skills and problem solving skills in preparation for calculus. Topics include functions, properties of functions, ways to create new functions, and modeling real-world situations with functions. Specific functions covered include linear, exponential, and logarithmic functions. Credit is awarded for one of the following MATH 006A, MATH 004, or MATH 005A.

MATH 006B Precalculus: An Introduction to Functions 2 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 006A with a grade of B- or better or MATH 006A with a grade of C- or better, MATH 06LB, may be taken concurrently; or consent of instructor. Develops and refines quantitative and covariational reasoning skills and problem solving skills in preparation for calculus. Topics include functions, properties of functions, modeling real-world situations with functions, limits, and continuity. Specific functions covered include polynomial, rational, trigonometric, and inverse trigonometric functions. Credit is awarded for one of the following MATH 006B, MATH 004, or MATH 005A.

MATH 06LA Precalculus Study Group: An Introduction to Functions 11 Discussion, 1 hour. Prerequisite(s): MATH 006A, may be taken concurrently; a sufficient score on the Mathematics Advisory Examination, as determined by the Mathematics Department; or consent of instructor. Just-in-time lessons and activities to enhance student foundations on functions and properties of functions from four perspectives (verbal, visual, numeric, and symbolic) to complement and support MATH 006A. Graded Satisfactory (S) or No Credit (NC).

MATH 06LB Precalculus Study Group: An Introduction to Functions 2 1 Discussion, 1 hour. Prerequisite(s): MATH 006A with a grade of B- or better or MATH 006A with a grade of C- or better, MATH 06LB, may be taken concurrently; or consent of instructor. Just-in-time lessons and activities to enhance student foundations on functions and properties of functions from four perspectives (verbal, visual, numeric, and symbolic) to complement and support MATH 006B. Graded Satisfactory (S) or No Credit (NC).

MATH 007A Calculus For Life Sciences 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 005A or MATH 006A. Introduction to the differential calculus of functions of one variable for students majoring in Life Sciences. Credit is awarded for one of the following MATH 007A, MATH 005B, MATH 009A, or MATH 09HA.

MATH 007B Calculus For Life Sciences 4 Discussion, 1 hour; lecture, 3 hours. Prerequisite(s): MATH 007A with a grade of C- or better or MATH 009A with a grade of C- or better or MATH 099A with a grade of C- or better. Introduction to the integral calculus of functions of one variable. For Life Sciences majors. Credit is awarded for one of the following MATH 007B, MATH 005C, MATH 099B, or MATH 099B.

MATH 009A First-Year Calculus 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 005A with a grade of C- or better or MATH 006B. Introduction to the differential calculus of functions of one variable. Credit is awarded for one of the following MATH 009A, MATH 005B, MATH 007A, or MATH 09HA.
MATH 009B First Year Calculus 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 005B with a grade of C- or better or MATH 009A or MATH 09HA. Introduction to the integral calculus of functions of one variable. Credit is awarded for one of the following MATH 009B, MATH 005C, MATH 007B, or MATH 09HB.

MATH 009C First Year Calculus 4 Discussion, 1 hour; lecture, 3 hours. Prerequisite(s): MATH 009B with a grade of C- or better or MATH 09HB with a grade of C- or better or MATH 007B with a grade of C- or better. Further topics from integral calculus, improper integrals, infinite series, Taylor's series, and Taylor's theorem. Credit is awarded for one of the following MATH 009C, MATH 005C, or MATH 09HC.

MATH 09HA First-Year Honors Calculus 4 Discussion, 1 hour; lecture, 3 hours. Prerequisite(s): admission to University Honors. Honors course corresponding to MATH 009A. Honors course corresponding to MATH 009A for students with strong mathematical backgrounds. Introduces the integral calculus of functions of one variable. Emphasis is on theory and rigor. Satisfactory(S) or No Credit(N/C) is not available. Credit is awarded for one of the following MATH 09HA, MATH 005B, MATH 007A, or MATH 009A.

MATH 09HB First-Year Honors Calculus 4 Discussion, 1 hour; lecture, 3 hours. Prerequisite(s): MATH 09HA with a grade of B or better; admission to University Honors. Honors course corresponding to MATH 009B. Honors course corresponding to MATH 009B for students with strong mathematical backgrounds. Introduces the integral calculus of functions of one variable. Emphasis is on theory and rigor. Credit is awarded for one of the following MATH 09HB, MATH 005C, MATH 007B, or MATH 009B.

MATH 09HC First-Year Honors Calculus 4 Discussion, 1 hour; lecture, 3 hours. Prerequisite(s): MATH 09HB with a grade of B or better or MATH 009B with a grade of B or better; admission to University Honors. Honors course corresponding to MATH 009C. Further topics from integral calculus, improper integrals, infinite series, Taylor's series, and Taylor's theorem. Satisfactory(S) or No Credit(N/C) is not available. Credit is awarded for one of the following MATH 09HC, MATH 005C, or MATH 009C.

MATH 010A Calculus of Several Variables 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 007B or MATH 009B or MATH 09HB with a "C-" or better or equivalent. Topics include Euclidean geometry, matrices and linear functions, determinants, partial derivatives, directional derivatives, Jacobians, gradients, chain rule, and Taylor's theorem for several variables.

MATH 010B Calculus of Several Variables 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 010A with a grade of "C-" or better or equivalent. Covers vectors; differential calculus, including implicit differentiation and extreme values; multiple integration; line integrals; vector field theory; and theorems of Gauss, Green, and Stokes.

MATH 011 Introduction to Discrete Structures 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 007A or MATH 009A or MATH 09HA; CS 010A or MATH 007B or MATH 09B or MATH 09HB. Introduction to basic concepts of discrete mathematics emphasizing applications to computer science. Topics include propositional and predicate calculus, elementary set theory, functions, relations, proof techniques, elements of number theory, enumeration, and discrete probability. Cross-listed with CS 011.

MATH 022 Calculus For Business 5 Lecture, 3 hours; discussion, 2 hours. Prerequisite(s): MATH 004 with a grade of C- or better or MATH 006B with a grade of C- or better or MATH 005A, or a sufficiently high score on the placement examination, as determined by the Mathematics Department. Explores relations and functions (e.g., linear, polynomial, logarithmic, and exponential). Addresses differential calculus of functions of one and two variables as well as integration (indefinite and definite) with applications to business and economic problems. Credit is not awarded for MATH 022 if a grade of "C-" or better has already been awarded for MATH 007A, MATH 009A, MATH 09HA, or MATH 005B.

MATH 031 Applied Linear Algebra 5 Lecture, 3 hours; discussion, 2 hours. Prerequisite(s): MATH 007A with a grade of C- or better or MATH 009A with a grade of C- or better or MATH 09HA with a grade of C- or better or CS 010A with a grade of C- or better or MATH 007B with a grade of C- or better or MATH 009B with a grade of C- or better or MATH 09HB with a grade of C- or better. A study of matrices and systems of linear equations, determinants, Gaussian elimination, vector spaces, linear independence and linear transformation, orthogonality, eigenvalues, and eigenvectors. Also examines selected topics and applications. Credit is awarded for one of the following MATH 031 or CS 020B.

MATH 045 Introduction to Ordinary Differential Equations For Physical Sciences and Engineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 007B with a grade of C- or better or MATH 009B with a grade of C- or better or MATH 09HB with a grade of C- or better; or equivalent; or consent of instructor. Introduction to ordinary differential equations; complex numbers; trigonometric, compact and exponential Fourier Series; frequency spectrum; and Laplace transform, Fourier transform, and their application to the solution of integro-differential equations as they appear in the physical sciences and engineering. Cross-listed with EE 020A. Credit is awarded for one of the following EE 020A, MATH 045, or MATH 046.

MATH 046 Introduction to Ordinary Differential Equations 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 007B with a grade of C- or better or MATH 009B with a grade of C- or better or MATH 09HB with a grade of C- or better. Introduction to first-order equations, linear second-order equations, and Laplace transforms, with applications to the physical and biological sciences. Credit is awarded for one of the following MATH 046, EE 020A, or MATH 045.

Upper-Division Courses

Courses numbered MATH 100–109 do not meet upper-division mathematics requirements.

MATH 120 Optimization 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 010A with a grade of "C-" or better; MATH 031 with a grade of "C-" or better. Introduction to classical optimization including unconstrained and constrained problems in several variables. Addresses Jacobian and Lagrangian methods and the Kuhn-Tucker conditions. Covers the basic concepts of linear programming including the simplex method and duality with applications to other subjects.

MATH 121 Game Theory 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 010A with a grade of "C-" or better. Examines games in extensive, normal, and characteristic form as models of conflict and/or cooperation. Covers two-person zero-sum games, minmax theorem, and relation to linear programming. Includes non-zero-sum games, Nash equilibrium theorem, bargaining, the core, and the Shapley value. Addresses economic market games.

MATH 126 Combinatorics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 011/CS 011 with a grade of "C-" or better. A study of elements of combinatorics theory. Topics include chromatic polynomials, enumerating partitions of sets and integers, asymptotic enumeration, Polya theory, and Ramsey theory.

MATH 131 Linear Algebra I 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 010A with a grade of "C-" or better (may be taken concurrently); MATH 031 with a grade of "C-" or better. An introduction to vector spaces, matrices, and linear transformations.

MATH 132 Linear Algebra II 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 131 with a grade of "C-" or better or equivalent. Further study of topics in linear algebra including eigenvalues. Exploration of Hermitean and unitary matrices, positive definite matrices, and canonical forms.

MATH 133 Geometry 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 031 with a grade of "C-" or better, or consent of instructor. Analyzes elementary theory of affine and projective planes, the line at infinity, finite geometries, Euclidean and non-Euclidean geometries, groups of transformations, and other algebraic structures related to geometry.

MATH 135A Introduction to Numerical Analysis 1 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 010A with a grade of C- or better, may be taken concurrently; MATH 031 with a grade of C- or better, may be taken concurrently; or equivalent; or consent of instructor. Introduces basic numerical techniques for computing solutions of problems in science and engineering as well as computational implementation of such techniques using MATLAB and Python. Topics include floating point computation, error analysis, numerical methods for solutions of linear and nonlinear scalar and systems of equations, and numerical interpolation.
MATH 135B Introduction to Numerical Analysis 2
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 135A with a grade of C- or better; or equivalent; or consent of instructor. Introduces basic numerical techniques for computing solutions of problems in science and engineering as well as computational implementation of such techniques using MATLAB and Python. Topics include numerical integration, Runge-Kutta methods for initial value problems, matrix factorizations, eigenvalues, and eigenvectors.

MATH 135C Introduction to Numerical Analysis 3
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 135B with a grade of C- or better; or equivalent; or consent of instructor. A continuation of MATH 135B. Topics include least square method, Fourier series, numerical methods for PDEs, and numerical optimization.

MATH 136 Introduction to the Theory of Numbers
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 031 with a grade of C- or better; MATH 171 and MATH 172 with a grade of "C-" or better are recommended. A study of the complex projective plane, homogeneous polynomials, plane curves, intersection multiplicities, and Bezout's theorem.

MATH 137 Plane Curves
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 031 with a grade of "C-" or better; MATH 171 and MATH 172 with a grade of "C-" or better. Examines elementary theory of curves and surfaces. Includes first and second fundamental forms.

MATH 138A Introduction to Differential Geometry
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 010A, MATH 031 with a grade of "C-" or better. Examines elementary theory of curves and surfaces. Includes first and second fundamental forms.

MATH 138B Introduction to Differential Geometry
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 010B with a grade of "C-" or better; MATH 138A with a grade of "C-" or better. Covers Gaussian curvature, geodesics, and the Gauss-Bonnet Theorem.

MATH 140 Polynomials and Number Systems
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 011/MATH 011 with a grade of "C-" or better; MATH 031 with a grade of "C-" or better. Topics include number systems, elementary number theory, rings, fields, polynomials, congruencies, and applications of finite fields.

MATH 141 Fractal Geometry With Applications
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 010B with a grade of "C-" or better; MATH 046 with a grade of "C-" or better; concurrent enrollment or completion of MATH 144 with a grade of "C-" or better; or consent of instructor. Covers classical fractals; fractal dimensions; self-similar fractals; fractal curves and sets; random fractals; chaotic dynamics and fractals; iteration theory; Julia set; and the Mandelbrot set. Explores the beauty of fractals; mathematical description of irregular shapes (clouds, trees, coastlines, mountains, galaxies, lungs, snowflakes); and applications to physics, engineering, biology, and computer graphics.

MATH 144 Introduction to Set Theory
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 010A with a grade of "C-" or better. Covers algebra of subsets of a set. Addresses algebra of relations and functions. Explores cardinal and ordinal numbers and their arithmetic operations. Includes the well-ordering theorem, transfinite induction, and Zorn's lemma.

MATH 145A Introduction to Topology
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 144 with a grade of "C-" or better. Addresses elementary topology in metric spaces.

MATH 145B Introduction to Topology
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 145A with a grade of "C-" or better. Explores geometric topology, algebra associated with finite complexes, and applications.

MATH 146A Ordinary and Partial Differential Equations
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 009C or MATH 09HC with a grade of "C-" or better; or MATH 010A with a grade of "C-" or better; or MATH 031 (may be taken concurrently) with a grade of "C-" or better or equivalent; MATH 046 with a grade of "C-" or better. Focuses on the theory of linear differential equations and transform methods.

MATH 146B Ordinary and Partial Differential Equations
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 146A with a grade of "C-" or better. Further study of the theory of linear differential equations and problems in valuing ordinary differential equations.

MATH 146C Ordinary and Partial Differential Equations
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 010B with a grade of "C-" or better; MATH 146B with a grade of "C-" or better. Explores boundary value problems for partial differential equations, orthogonal expansions, and separation of variables.

MATH 147 Introduction to Fourier Analysis and its Applications
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 009C or MATH 09HC with a grade of "C-" or better; MATH 010B with a grade of "C-" or better; MATH 031 with a grade of "C-" or better (may be taken concurrently); MATH 046 or MATH 146A with a grade of "C-" or better. Covers Fourier series expansions of periodic functions, properties, and convergence; the Dirichlet kernel; Fourier integrals and the Fourier transform in one and several variables; the Plancherel theorem; and Fourier inversion. Includes applications of Fourier analysis (e.g., to spectral theory, numerical analysis, ordinary and partial differential equations, and wavelet transform).

MATH 148 Introduction to Chaotic and Complex Dynamical Systems
Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): MATH 010B with a grade of "C-" or better; MATH 031 with a grade of "C-" or better; or consent of instructor. Explores examples of dynamical systems, quadratic maps, maps of the circle, and higher-dimensional examples. Includes symbolic dynamics, Sarkovskii's theorem, hyperbolicity, and structural stability. Introduces chaotic dynamical systems and the period doubling route to chaos. Also introduces basic notions from complex dynamics. Includes the Julia set and the Mandelbrot set.

MATH 149A Probability and Mathematical Statistics
Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): MATH 010A with a grade of "C-" or better, MATH 010B with a grade of "C-" or better, concurrent enrollment in or completion of MATH 046 with a grade of "C-" or better. An introduction to the mathematical theory of probability and discrete and continuous distributions.

MATH 149B Probability and Mathematical Statistics
Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): MATH 010A with a grade of "C-" or better, MATH 010B with a grade of "C-" or better, MATH 046 with a grade of "C-" or better, MATH 149A with a grade of "C-" or better. A continuation of MATH 149A. Topics include sampling and limit distributions.

MATH 150A Intermediate Analysis
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 009C or MATH 005C or MATH 09HC with a grade of "C-" or better; MATH 010B with a grade of "C-" or better; or equivalent; or consent of instructor. Explores examples of linear analysis, ordinary and partial differential equations and transform methods.

MATH 150B Intermediate Analysis
Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): MATH 131 with a grade of "C-" or better; MATH 150A or MATH 151A with a grade of "C-" or better. MATH 132 with a grade of "C-" or better is recommended. A study of infinite series and multivariable advanced calculus. Credit is awarded for only one of MATH 150B or MATH 151B.

MATH 151A Foundations of Real Analysis 1
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 009C, MATH 010B with a grade of "C-" or better; or equivalent; or consent of instructor. Provides a rigorous development of mathematical analysis. Includes the formal theory of the real numbers, convergent sequences, monotone sequences, subsequences, convergent tests, limit superior, limit inferior, Bolzano-Weierstrass theorem, Cauchy sequences, limit of functions, continuous functions, extreme value theorems, intermediate value theorems, uniform continuity, and continuity of monotone functions. Credit is awarded for one of the following MATH 151A or MATH 150A.

MATH 151B Foundations of Real Analysis 2
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 151A with a grade of "C-" or better; or equivalent; or consent of instructor. Provides a rigorous development of mathematical analysis. Includes the derivative, mean value and intermediate value theorems, Taylor's Theorem, inverse function theorem, Riemann integrable functions, fundamental theorem of calculus, series sequences of functions, pointwise and uniform convergence, continuity, integral, and derivative of the limit. Credit is awarded for one of the following MATH 151B or MATH 150B.
MATH 151C Foundations of Real Analysis 3 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 131 with a grade of C- or better; MATH 151B with a grade of C- or better; or equivalent; or consent of instructor. Provides a rigorous development of mathematical analysis. Includes metric spaces, open and closed sets, connected sets, closure and boundary, convergent sequences, Cauchy sequences, completeness, compactness, Heine-Borel theorem, continuity, uniform continuity, limits, the derivative, gradients, curves, partial derivatives, the Jacobian, continuity and the derivative, and inverse and implicit function theorems.

MATH 153 History of Mathematics 4
Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): MATH 009C with a grade of “C-” or better or consent of instructor. A survey from a historical point of view of various developments in mathematics. Emphasizes the nineteenth and early twentieth centuries.

MATH 161 Mathematical Foundations of Machine Learning 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 010A with a grade of C- or better; MATH 031 with a grade of C- or better; or equivalent; or consent of instructor. Introduction to mathematical concepts in machine learning methods emphasizing the theoretical tools needed for developing new machine learning algorithms. Topics include linear algebra and vector calculus in application to supervised learning, regression, classification, unsupervised learning, clustering, dimensionality reduction and optimization, and probability theory used in machine learning algorithms.

MATH 163 Applied Dynamical Systems 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 045 with a grade of C- or better or MATH 046 with a grade of C- or better; MATH 031 with a grade of C- or better; MATH 135A with a grade of C- or better; or equivalent; or consent of instructor. Introduction to dynamical systems with applications to problems in Physics, Biology, Chemistry, and Engineering. Topics include phase plane analysis, stability of dynamical systems, and numerical methods for dynamical systems.

MATH 165A Introduction to Complex Variables 4
Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): MATH 010B with a grade of “C-” or better. An introduction to the theory of analytic functions of a complex variable. Includes mappings by elementary functions and complex integrals, as well as Cauchy's theorem, power series, and Laurent series.

MATH 165B Introduction to Complex Variables 4
Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): MATH 010B with a grade of “C-” or better; MATH 165A with a grade of “C-” or better. Topics include the theory of residues, conformal mapping, and applications to physical problems.

MATH 168 Introduction to Mathematical Modeling 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 146A. A detailed study of how mathematical methods are applied to specific problems in the sciences and engineering fields. Utilizes examples taken from the theories of mechanical vibrations, population dynamics, and flow phenomena.

MATH 171 Introduction to Modern Algebra 4
Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): MATH 131 with a grade of “C-” or better; MATH 144 with a grade of “C-” or better. An introduction to the fundamental concepts of modern algebra. Covers groups, subgroups, quotient groups, homomorphisms, symmetry groups, fundamental properties of rings, integral domains, ideals, and quotient rings.

MATH 172 Modern Algebra 4
Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): MATH 171 with a grade of “C-” or better. Covers fundamental concepts of modern algebra. Includes groups, fields, polynomials, geometric constructions, algebraic coding, and boolean algebras.

MATH 190 Special Studies 1 to 5
Tutorial, 3 to 15 hours. To be taken with the consent of the chair of the department as a means of meeting special curricular problems. Course is repeatable.

MATH 194 Independent Reading 1 to 2
Tutorial, 3 to 6 hours. Independent reading in materials not covered in course work. Normally taken in the senior year. Total credit for MATH 194 may not exceed 4 units.

MATH 197 Research For Undergraduates 1 to 4
Research, 3 to 12 hours. Prerequisite(s): upper-division standing; consent of instructor. Involves a research project on a problem in, or related to, mathematics conducted under the supervision of a Mathematics faculty member. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 8 units.

MATH 198I Internship in Mathematics 1 to 2
Outside research, 3 hours. Prerequisite(s): MATH 171, MATH 172, or equivalents. Topics include basic theory of groups and rings, the Sylow theorems, solvable groups, and the Jordan-Holder theorem.

MATH 201B Algebra 4
Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 201A. Topics include rings, the functors hom and tensor, modules over a principle ideal domain, and applications to matrices.

MATH 201C Algebra 4
Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 201B. Topics include algebraic and transcendental extensions of fields and the Galois theory, and the tensor and exterior algebras.

MATH 202 Numerical Linear Algebra 4
Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): MATH 132. Covers standard decompositions of matrices and their computational uses, conditioning data, stability of solutions, and effective numerical methods for computing eigen values.

MATH 205A Topology 4
Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 145B or equivalent. An introduction to point set topology.

MATH 205B Topology 4
Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 205A or equivalent. Covers homotopy theory and homology theory.

MATH 205C Topology 4
Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 205A, MATH 205B, or equivalents. Covers differential topology.

MATH 206A Theory of Probability 4
Lecture, 3 hours; individual study, 2 hours, written work, 4 hours. Prerequisite(s): MATH 149A or equivalent; or consent of instructor. Introduces probability theory from the measure-theoretic perspective. Topics include construction of independent random variables, laws of large numbers, central limit theorems, and concentration of measure of sums of independent variables.

MATH 206B Numerical Analysis 4
Lecture, 3 hours; individual study, 2 hours, written work, 4 hours. Prerequisite(s): MATH 135A or equivalent; or consent of instructor. An introduction to numerical analysis. Topics include numerical solution of nonlinear differential equations, numerical linear algebra, interpolation and extrapolation, numerical differentiation and integration, initial value problems and boundary value problems of ordinary differential equations and approximation theory.

MATH 206C Method of Applied Mathematics 4
Lecture, 3 hours; individual study, 2 hours, written work, 4 hours. Prerequisite(s): MATH 146A; MATH 150A or MATH 151A; or consent of instructor. Introduction of basic applied to mathematics methods including variational methods with examples from mechanics, ordinary differential equations, bifurcation theory and perturbation methods.

MATH 207A Ordinary Differential Equations 4
Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 146B, MATH 151B; or consent of instructor. Covers existence, uniqueness, and stability of solutions to ordinary differential equations. Addresses important examples, dynamical flows associated to solutions, stable and unstable manifold phenomena, and boundary value problems. Also includes Lyapunov functions, Poincaré Map, and Sturm-Liouville Boundary Value Problems.
MATH 207B Partial Differential Equations I 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 010B, MATH 151B; or consent of instructor. Discusses various methods used in the study of partial differential equations (PDEs). Addresses energy estimates, characteristics, similarity solutions, numerics, and fundamental solutions. Focuses on concrete examples of PDEs including conservation laws, the transport equation, the heat equation, the porous media equation, the Navier-Stokes equation, the Laplace equation, and the wave equation.

MATH 207C Partial Differential Equations II 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 207B; or consent of instructor. A continuation of MATH 207B. Discusses various problems and methods in the study of partial differential equations (PDEs). Topics include Green's functions, boundary value problems, regularity of solutions, eigenvalue problems, energy methods, and variational methods.

MATH 209A Real Analysis 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 151C. Topics include Lebesgue measure, integration, and differentiation.

MATH 209B Real Analysis 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 209A. Topics include representation theorems, Hilbert space, Lebesgue spaces, and Banach spaces.

MATH 209C Real Analysis 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 209B. Topics include complex measures, general measure spaces, integration on product spaces, and Lebesgue spaces.

MATH 210A Complex Analysis 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 151C, MATH 165A. Studies include complex analytic functions, Cauchy's theorem, Cauchy's integral formula and the Laurent series, and the residue theorem.

MATH 210B Complex Analysis 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 210A. Studies include entire and meromorphic functions, normal families and the Riemann mapping theorem, and harmonic functions and the Dirichlet problem.

MATH 210C Complex Analysis (riemann Surfaces) 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): MATH 210B, graduate standing, or consent of instructor. Studies Riemann surfaces and their origins, analytic and meromorphic functions on Riemann surfaces, the topology of surfaces, and calculus on surfaces. Also covers the Laplace operator and Hodge theory on Riemann surfaces, the Riemann-Roch formula, the uniformization theorem, and other selected topics.

MATH 211A Ordinary Differential Equations 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 146B, MATH 151C. Covers the existence and uniqueness of solutions; linear differential equations; singularities of the first and second kind; self-adjoint eigenvalue problems on a finite interval; and singular self-adjoint boundary-value problems for second-order equations.

MATH 211B Ordinary Differential Equations 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 211A. Topics include the method of averaging and numerical integration, autonomous systems, the method of Liapounov, and stability for linear systems.

MATH 212 Partial Differential Equations 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 151C and MATH 165A. Classical theory of initial and boundary value problems for hyperbolic, parabolic and elliptic partial differential equations.

MATH 213A Numerical Methods For Partial Differential Equations I 4 Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): MATH 206B, MATH 207B; graduate standing; or consent of instructor. Introduces standard numerical methods to approximate solutions to parabolic equations; elliptic equations including finite difference; finite element; multi-grid method, spectral method; method of lines, exponential time differencing method; and integration factor method. Investigates stability, accuracy, and convergence of numerical methods. Includes implementation of numerical methods on specific problems.

MATH 213B Numerical Methods For Partial Differential Equations II 4 Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): MATH 206B, MATH 207B; graduate standing; or consent of instructor. Introduces standard numerical methods to approximate solutions to hyperbolic conservation laws such as upwind, Lax Friedrichs, Lax-Wendroff, construction of limiters, ENO, and WENO. Investigates entropy conditions, construction of numerical fluxes, monotonicity, and convergence and accuracy of numerical methods. Implements numerical methods on classic examples such as the Euler system.

MATH 213C Numerical Methods For Stochastic Partial Differential Equations 4 Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): MATH 206A, MATH 207B; graduate standing; or consent of instructor. Introduces stochastic optimization and standard numerical methods to approximate solutions to stochastic ordinary differential equations and stochastic partial differential equations. Investigates consistency, stability, and convergence of numerical methods. Also investigates convergence, rate of convergence, and its connection with stochastic differential equations. Includes applications and implementation of stochastic methods.

MATH 216A Combinatorial Theory 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 111. Addresses the solving of combinatorial problems by studying their morphisms (transformations preserving the problem). Covers optimum path problems and their variants. Develops general techniques and the ability to work through the solutions of challenging special cases. Focuses on utilizing symmetry to systematically reduce a problem.

MATH 216B Combinatorial Theory 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 216A. Addresses the solving of combinatorial problems by studying their morphisms (transformations preserving the problem). Covers optimum flow problems. Develops general techniques and work through the solutions of challenging special cases. Particular focus given to utilizing symmetry to systematically reduce a problem.

MATH 217 Topics of Probability Theory 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 206A. Topics include independence, strong limit theorems including the strong law and the Kolmogorov three-series theorem, weak law and the central limit theorem, the Kolmogorov three-series theorem, and Bochner's theorem on positive definite functions.

MATH 221 Several Complex Variables 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 151A, MATH 151B, MATH 165A, MATH 165B. Hartog's theorems, domains of holomorphy, pseudoconvexity, Levi's problem, coherent analytic sheaves, Cartan's theorems A and B.

MATH 222 Algebraic Groups 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 201B, MATH 205A. Introduction to linear algebraic groups, structure, and representation.

MATH 223 Algebraic Number Theory 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 201A. Topics include algebraic number theory, principal ideal domains, integral dependence, algebraic number fields, classical ideal theory in Dedekind domains, classes of ideals, valuations, and p-adic numbers.

MATH 224 Introduction to Homological Algebra 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 201C or consent of instructor. Theory of derived functors and its application to rings and associative algebras.

MATH 225 Commutative Algebra 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 201A. Covers basic theory of commutative rings, primary decomposition, integral dependence and valuation rings, and the intersection theorem of Krull.

MATH 226 Algebraic Analysis 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 201B, MATH 205A. Introduction to the theory of modules over rings of differential operators. Topics include holonomic D-modules, functorial properties, and applications.

MATH 227A Lie Algebras 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 201A, MATH 201B. Studies include basic definitions, solvable and nilpotent Lie algebras, and structure and classification of semisimple Lie algebras.

MATH 227B Lie Algebras 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 227A. Studies include enveloping algebras and representation theory, representations of semisimple Lie algebras, generalization to Kac-Moody Lie algebras, and modular Lie algebras.
MATH 228 Functional Analysis 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): MATH 209A, MATH 209B, MATH 209C. Topological linear spaces; function spaces; linear operators; spectral theory; operational calculus; and further selected topics.

MATH 230 Deformation Theory 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 201B, MATH 232B. Introduction to deformation quantization. Topics include Hochschild complexes of associative algebras, differential graded Lie algebras, quasi-isomorphisms, Kontsevich’s formality theorem, and star-products.

MATH 232A Geometry I (introduction to Manifolds) 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 131 and MATH 151C. Basic notions and examples; vector fields and flows; tensors and vector bundles; differential forms, integration and deRham’s theorem.

MATH 232B Geometry II (introduction to Differential) 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 232A. Local and global theory of curves. Surfaces in R3: the Gauss map, fundamental forms, curvature. Riemannian geometry: the Levi-Civita connection, curvature, geodesics, exponential map, completeness, Gauss-Bonnet theorem for surfaces.

MATH 233 Comparison Geometry 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): MATH 232B or consent of instructor. Explores the question of how curvature affects topology.

MATH 241 Mathematical Physics: Classical Mechanics 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 205A, MATH 205B, MATH 205C; or PHYS 205; or consent of instructor. Hamilton’s principle of least action. Variational methods and Lagrange’s equations. Hamilton’s equations. Introduction to symplectic geometry and its applications to classical mechanics. Poisson brackets. Conserved quantities and Noether’s theorem. Examples of Hamiltonian and dissipative dynamical systems. Introduction to classical chaos.

MATH 242 Mathematical Physics: Quantum Mechanics 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 205A, MATH 205B, MATH 205C; or PHYS 205; or consent of instructor. Foundations of quantum theory together with the relevant mathematics. Probabilistic interpretation of quantum mechanics, self-adjoint operators and physical observables, noncommutativity and the uncertainty principle. Spectral theory for (unbounded) self-adjoint operators. Stone’s theorem and other topics.

MATH 243A Algebraic Geometry 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 201A, MATH 201B. Topics include algebraic varieties in affine and projective space and their basic attributes such as dimension, degree, tangent space, and singularities; and products, mappings, and correspondences.

MATH 243B Algebraic Geometry 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 243A. Topics include further study of varieties, sheaves, and cohomology and detailed study of curves and special topics.

MATH 245 Analytic Number Theory 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 165B, MATH 209A; or consent of instructor. Explores the key structures of analytic number theory. Addresses the theory of the Riemann zeta function: functional equation, analytic continuation, and zero-free regions. Illustrates application to the prime number theorem. Considers the Mellin transform and other Dirichlet series, including Dirichlet L-functions.

MATH 246A Algebraic Topology 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 205A, MATH 205B or equivalent. Topics include simplicial and cell complexes, polyhedra, manifolds, homology and cohomology theory, and homotopy theory.

MATH 246B Algebraic Topology 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 246A. Covers topics such as topological indices, Lefschetz fixed point theory, Poincaré duality, vector bundles and characteristic classes, and transformation groups.

MATH 247 Theory of Distributions and Applications 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 146A, MATH 209C; or consent of instructor. Explores approximation of differentiable functions. Addresses theory of distributions, including basic properties, differentiation, and key operators. Covers applications to multivariable calculus and classical equations of mathematical physics. Examines particular spaces of distributions; convolution and Fourier transform; fractional differentiation; Fourier integral operators; and pseudo differential operators.

MATH 248 Harmonic Analysis and Applications 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 146C, MATH 165B, MATH 209C; or consent of instructor. A study of Fourier series. Includes summability methods, kernels, Fourier transform, unitality, applications to the uncertainty principle, and distributional Fourier transform. Introduces Hardy spaces, singular integral operators, and wavelet theory and its applications. Other topics include interpolation of linear operators and spectral analysis and applications.

MATH 249 Introduction to Dynamical Systems 4 Lecture, 3 hours, outside research, 3 hours. Prerequisite(s): MATH 146B, MATH 151C, MATH 205C or MATH 232A; or consent of instructor. Explores diffeomorphisms and flows, Poincaré maps, and Hamiltonian flows. Includes hyperbolicity, homoclinic points, center manifold theorem, structural stability, and Hopf bifurcations. Explores the Poincaré–Birkhoff theorem, basin of attraction and strange attractors, and Lyapunov exponents and entropy. Introduces chaotic dynamical systems, KAM theory, and complex dynamics.

MATH 250A Mathematical and Computational Modeling With Applications A: Stability of Applied Dynamical Systems 4 Lecture, 3 hours, extra reading, 3 hours. Prerequisite(s): MATH 206C; graduate standing or consent of instructor. Introduction to stability analysis of continuous dynamical systems with applications in physics, biology, and engineering. Topics include phase plane analysis; stability of equilibria; asymptotic stability and Lyapunov stability; linear stability analysis of infinite-dimensional dynamical systems; limit cycles; and global attractors and their fractal dimension.

MATH 250B Mathematical and Computational Modeling With Applications B: Multi-Scale Analysis With Applications 4 Lecture, 3 hours, extra reading, 3 hours. Prerequisite(s): MATH 206C; graduate standing or consent of instructor. Introduction to perturbation methods in multi-scale systems with applications in physics, biology, and engineering. Topics include matched asymptotics analysis, homogenization; sharp interface limit, viscosity solutions, and mean field approaches to many particle systems.

MATH 250C Mathematical and Computational Modeling With Applications C: Modeling With Differential Equations 4 Lecture, 3 hours, extra reading, 3 hours. Prerequisite(s): MATH 168, MATH 206C; graduate standing; or consent of instructor. Introduction to mathematical modeling and model calibration. Focuses on modeling with ordinary and partial differential applications in solid and fluid mechanics as well as biology, chemistry, and engineering. Topics include reaction kinetics equations; population models; parameter estimation; sensitivity analysis; modeling elastic, viscoelastic, plastic materials, and fluids; and cellular automata.

MATH 259 Topics in Mathematics 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Explores various intermediate graduate topics in mathematics. Course is repeatable as content or topic changes. Course is repeatable as content or topic changes.

MATH 260 Seminar On Special Topics of Mathematics 1 to 4 Variable hours. Prerequisite(s): consent of department. Seminar on special topics of mathematics in preparation for individual research. Course is repeatable.

MATH 261 Advanced Topics in Mathematics 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Explores various research level topics in mathematics. Course is repeatable as content or topic changes.

MATH 289 Colloquium in Mathematics 1 Colloquium, 1 hour. Prerequisite(s): graduate standing. Specialized discussions by staff, students and visiting scientists on current research topics in Mathematics. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.
MATH 290 Directed Studies 1 to 6 Tutorial, 3 to 18 hours. Prerequisite(s): consent of instructor. Research and special studies in mathematics. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

MATH 291 Individual Study in Coordinated Areas 1 to 6 Individual study, 3 to 18 hours. Prerequisite(s): graduate standing in Mathematics or consent of instructor. Designed to advise and assist candidates with exam preparation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable prior to successful completion of the qualifying examination for M.A. and M.S. students to a maximum of 6 units and for Ph.D. students to a maximum of 12 units.

MATH 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): consent of department. Directed research in mathematics. Graded Satisfactory (S) or No Credit (NC). Course is repeatable more than once per quarter if studying with two or more faculty members.

MATH 299 Research For Thesis Or Dissertation 1 to 12 Thesis, 3-36 hours. Prerequisite(s): Original research in an area selected for the advanced degree. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

MATH 302 Apprentice Teaching 2 to 4 Lecture, 0 to 1 hour; seminar, 2 to 4 hours; consultation, 1 to 2. Prerequisite(s): graduate standing. Supervised training for teaching in lower- and upper-division Mathematics courses. Modern trends in mathematical pedagogy at the college level. Covers instructional methods and classroom/section activities most suitable for teaching Mathematics. Designed for new graduate students in the Mathematics Department. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

MATH 401 Professional Development in Mathematics 2 Lecture, 1 hour; consultation, 1 hour. Prerequisite(s): graduate standing in Mathematics. Includes professional and research ethics, scientific writing and publications, oral presentation skills, career options in academia, and nonacademic careers. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Mechanical Engineering

Subject abbreviation: ME

The Marlan and Rosemary Bourns College of Engineering

Guanshui Xu, Ph.D. Chair
Department Office, A361 Bourns Hall
(951) 827-2497; https://www.me.ucr.edu/

Professors
Reza Abbaspour, Ph.D. Distinguished Professor
Chris Lynch, Ph.D., Dean, Bourns College of Engineering
Lorenzo Mangolini, Ph.D.
Cengiz Ozkam, Ph.D.
Fabio Pasqualetti, Ph.D.
Marko Princevac, Ph.D.
Thomas Stahovich, Ph.D.
Kambiz Vafai, Ph.D. Distinguished Professor
Akula Venkatram, Ph.D.
Guanshui Xu, Ph.D.

Professor Emeritus
Guillermo Aguilar, Ph.D.

Associate Professors
Sinisa Coh, Ph.D.
Hee jung Jung, Ph.D.
Chen Li, Ph.D.
Masaru P. Rao, Ph.D.
Hideaki Tsutsui, Ph.D.
Richard Wilson, Ph.D.

Assistant Professors
Mona Eskandari, Ph.D.
P. Alex Greaney, Ph.D.
Kaveh Laksari, Ph.D.
Tamar Mentzel, Ph.D.
Erfan Nozari, Ph.D.
Bhargav Rallabandi, Ph.D.
Jonathan Reinaldo, Ph.D.
Luat Vuong, Ph.D.

Assistant Professors in Teaching
V. Sundar, Ph.D. **

Adjunct Professors
Guillermo Aguilar, Ph.D.
Santiago Camacho-Lopez, Ph.D.
Juan Hernandez-Cordero, Ph.D.
Suveen Mathaudhu, Ph.D.

Adjunct Associate Professor
Khalid Hattar, Ph.D.

Lecturers
James Sawyer, Ph.D.
Farbod Khoshnoud, Ph.D.

Cooperating Faculty
Bahman Anvari, Ph.D. (Bioengineering)
Matthew Barth, Ph.D. (Electrical and Computer Engineering)
Wei Ren, Ph.D. (Electrical and Computer Engineering)

Major

The design and production of machines requires a broad-based education. The Mechanical Engineering degree program has been structured to provide the necessary background in chemistry, physics, and advanced math to achieve success in the advanced engineering subjects. In addition, students are taught the basics of Mechanical Engineering while learning about the latest developments and experimental techniques.

The Mechanical Engineering Program Educational Objectives are to prepare graduates to make a positive impact on society by being successful in:

• careers as mechanical engineers and as engineering leaders
• graduate studies and research
• professional careers besides mechanical engineering
• advocating for the engineering profession and inspiring others to develop a passion for engineering profession.

The Mechanical Engineering B.S. degree program at UCR is accredited by the Engineering Accreditation Commission of ABET, abet.org. For more details see https://www.me.ucr.edu/.

All undergraduates in the College of Engineering must see an advisor at least annually. Visit student.engr.ucr.edu for details.

Change of Major Criteria

All students who request a change of major to Mechanical Engineering must meet the following requirements:

• Be in good academic standing
• Have no less than a C- in any Math, Science and Engineering coursework
• Have a minimum 2.0 GPA in all Math, Science and Engineering required coursework
• Be able to complete major within maximum allowable units
• Complete all the courses listed below, based on the total number of units earned, prior to submitting the major change request
• UCR transfer students interested in changing to a BCME major must have been admissible to the major at point of entry, or must satisfy transfer admission and change of major requirements before earning 120 units
• If changing in the 90-119 units category student must have the ability to complete major within 5 years of entry as a Freshmen or 3 years after entry as a Transfer student
• Students who have earned 120 or more units are not eligible for a change of major in BCME. NOTE: AP/IB units are excluded from maximum unit calculation

Completed 0 to less than 45 units: Completion of ENGL 001A with C or better and completion of the following with at least 2.500 GPA:

• MATH 009A or MATH 09HA
• MATH 009B or MATH 09HB
• PHYS 040A

Completed 45 to less than 90 units: Completion of ENGL 001A with C or better and completion of the following with at least 2.500 GPA:

• ME 002
• ME 018A
• MATH 009A or MATH 09HA
• MATH 009B or MATH 09HB
• MATH 009C or MATH 09HC
• PHYS 040A
Completed 90 to less than 120 units
Completion of ENGL 001A and ENGL 001B with C or better and completion of the following with at least 2.500 GPA:

- ME 002
- ME 010
- ME 018A
- ME 018B
- MATH 009A or MATH 09HA
- MATH 009B or MATH 09HB
- MATH 009C or MATH 09HC
- PHYS 040A
- PHYS 040B

University Requirements
See Undergraduate Studies section.

College Requirements
See The Marlan and Rosemary Bourns College of Engineering, Colleges and Programs section.

The Mechanical Engineering major uses the following major requirements to satisfy the college's Natural Sciences and Mathematics breadth requirement.

1. MATH 009A
2. PHYS 040A, PHYS 040B, PHYS 040C

Major Requirements

1. Lower-division requirements (78 units)
   a) CHEM 001A, CHEM 001B, CHEM 010A, CHEM 010B
   b) EE005
   c) MATH 009A, MATH 009B, MATH 009C, MATH 010A, MATH 010B, MATH 046
   d) ME 002, ME 009, ME 010, ME 018A, ME 018B
   e) PHYS 040A, PHYS 040B, PHYS 040C
   f) STAT 010

2. Upper-division requirements (72 units)
   a) ME 100A, ME 103, ME 110, ME 113, ME 114, ME 116A, ME 118, ME 120, ME 135, ME 170A, ME 170B, ME 174, ME 175A, ME 175B, ME 175C
   b) Choose one Focus Area:

   (1) Materials and Structures
   Sixteen (16) units of technical electives chosen from ME100B, ME116B, ME121, ME122, ME134/MSE134, ME153, ME156, ME157/MSE143, ME158/MSE148, ME180, ME197

   (2) Energy and Environment
   Sixteen (16) units of technical electives chosen from ME 100B, ME 116B, ME 117, ME 136, ME 137, ME 138, ME 197

   (3) Design and Manufacturing
   Sixteen (16) units of technical electives chosen from ME 121, ME 122, ME 130, ME 131, ME 133, ME 140, ME 144/EE 144, ME 145, ME 153, ME 156, ME 175D, ME 176, ME 180, ME 197

   (4) General Mechanical Engineering
   Sixteen (16) units of technical electives chosen from the following list, in consultation with an advisor:
   ME 100B, ME 116B, ME 117, ME 121, ME 122, ME 130, ME 131, ME 133, ME 134/MSE 134, ME 136, ME 137, ME 138, ME 140, ME 144/EE 144, ME 145, ME 153, ME 156, ME157/MSE143, ME158/MSE148, ME180, ME175D, ME176, ME176, ME180, ME197

Visit the Student Affairs Office in the College of Engineering or student.engr.ucr.edu for a sample program.

Graduate Program

The Department of Mechanical Engineering offers graduate educational programs leading to M.S. and Ph.D. degrees in Mechanical Engineering. Broad areas of research include:

1) mechanics and materials, 2) fluids and thermal sciences and 3) information computation and design. Specific research focus areas include the following:

   - Air quality, small and large-scale pollutant dispersion in urban flows, turbulent combustion and wildland fire behavior, engine emissions and nanoparticle science, thermal and electrical properties of nanowires and nanotubes, direct energy conversion, porous media and multiphase transport, bioheat transfer, biomedical optics, and medical laser applications
   - Wafer fab processing, thin film mechanics and nanotechnology, bio-inspired materials, mechanical behavior of thin films and other small-featured structures, mechanics of interfaces and surfaces, mechanical properties of carbon nanotubes and ferroelectric/piezoelectric materials, sensing and imaging, mechanics of geophysical materials, advanced material synthesis, composites, MEME, BioMEMS, biomedical devices, and processing of nanocrystalline materials
   - Artificial intelligence, computer-aided design or manufacturing, process planning, sensor networks, and distributed computing and control

Visit https://www.me.ucr.edu/research for detailed information on the research programs of individual faculty members.

Admission

In addition to the following requirements, all applicants must meet the general requirements of the Riverside Division of the Academic Senate and the UCR Graduate Council as set forth in this catalog under the Graduate Studies section.

Language Requirement

All international students whose first language is not English must demonstrate proficiency in spoken English by securing at least a “conditional pass” score on the TAST or SPEAK test before they can be appointed as a TA. However, to be considered for subsequent TA appointments, they must secure a “clear pass” on the TAST or SPEAK. The fee associated with this test is paid by the department for the first attempt only. The TAST or SPEAK requirement is, however, waived for international students who are appointed as GSRs or are self-supported throughout their studies at UCR.

Master’s Degree

The Department of Mechanical Engineering offers the M.S. degree in Mechanical Engineering.

Admission

Applicants should have an undergraduate degree in engineering, physical sciences, or mathematics; a satisfactory GPA for the last two years of their undergraduate studies; and high scores on the GRE General Test. All official transcripts, official GRE reports and three letters of recommendation must be submitted for evaluation. Foreign students and permanent residents whose first language is not English must also submit an acceptable TOEFL test score prior to admittance; the minimum TOEFL exam score is 550 (paper-based), 213 (computer-based), or 80 (Internet-based).

The M.S. degree in Mechanical Engineering can be earned by either completing a thesis (Plan I), which reports a creative investigation of a defined problem, or passing a comprehensive examination (Plan II). A minimum of three quarters of residency is required. Students should enroll in 12 units each quarter unless the graduate advisor grants an exception.

Course work used to satisfy the student’s undergraduate degree requirements may not be applied toward the 36-unit M.S. requirement.

Plan I (Thesis)

Requires completion of a minimum of 36 units of upper-division and graduate-level approved course work and submission of an acceptable thesis. At least 24 of these units must be in graduate courses (200-series courses), a minimum of twenty of these units being Mechanical Engineering graduate courses (ME 200 or higher, excluding ME 250, ME 290, ME 297, ME 2981, and ME 299). The student must take at least 3 units of seminar (ME 250) and at least 7 but no more than 11 units of directed or thesis research credits (ME 297 or ME 299). No more than 8 units of course work may be satisfied with directed studies (ME 290) or individual internship (ME 2981). Students must defend the thesis.

Plan II (Examination)

Requires completion of a minimum of 36 units of upper-division and graduate-level approved course work and submission of an acceptable thesis. At least 24 of these units must be in graduate courses (200-series courses), a minimum of twenty of these units being Mechanical Engineering graduate courses (ME 200 or higher, excluding ME 250, ME 290, ME 297, ME 2981, and ME 299). The student must take at least 3 units of seminar (ME 250) and at least 7 but no more than 11 units of directed or thesis research credits (ME 297 or ME 299). No more than 8 units of course work may be satisfied with directed studies (ME 290) or individual internship (ME 2981). Students must defend the thesis.

Plan III (Seminar)

Requires completion of a minimum of 36 units of upper-division and graduate-level approved course work and submission of an acceptable thesis. At least 24 of these units must be in graduate courses (200-series courses), a minimum of twenty of these units being Mechanical Engineering graduate courses (ME 200 or higher, excluding ME 250, ME 290, ME 297, ME 2981, and ME 299). The student must take at least 3 units of seminar (ME 250) and at least 7 but no more than 11 units of directed or thesis research credits (ME 297 or ME 299). No more than 8 units of course work may be satisfied with directed studies (ME 290) or individual internship (ME 2981). Students must defend the thesis.
An acceptable M.S. thesis must be submitted. The M.S. thesis may be based on:
1. A research or advanced design project, either analytical, computational or experimental;
2. An extensive report consisting of theoretical, computational or experimental contribution to mechanical engineering.
The student’s M.S. Thesis Committee is responsible for approving the thesis. The thesis committee is composed of three members (including the research advisor).

Plan II (Comprehensive Examination)
Requires completion of a minimum of 36 units of upper-division and graduate-level approved course work and successfully passing a comprehensive examination. At least 2/3 of these units must be in graduate courses (200 series courses), a minimum of twenty of these units being Mechanical Engineering graduate courses (ME 200 or higher, excluding ME 250, ME 290, ME 297, ME 298-1, and ME 299). Typically students also enroll in ME 250 and ME 297 units their first year. The student may be advised to take additional courses prior to advancement to candidacy.

Seminar Requirement
The student must also complete 6 units of ME 250 (seminar) prior to graduation. One unit of ME 250 is offered each quarter. These units do not have to be completed before the dissertation proposal defense.

Research Units
At least 36 units of directed or thesis research credits (ME 297 or ME 299) must be taken prior to graduation.
Courses taken as part of the Ph.D. requirement in Mechanical Engineering at UCR can be used to satisfy the course requirements for an M.S. in Mechanical Engineering at UCR and vice versa.

Normative Time to Degree
Five years
Refer to the department’s graduate program guidelines for further details.

Doctoral Degree
The Department of Mechanical Engineering offers the Ph.D. degree in Mechanical Engineering.

Admission
An M.S. or equivalent degree in engineering or physical sciences or mathematics is normally required for admission to the Ph.D. program, although applicants with exceptional undergraduate or research record may be admitted directly into the Ph.D. program without an M.S. degree. Applicants for the Ph.D. degree must also meet the same requirements as for the master’s programs. Students in the M.S. program of Mechanical Engineering who desire to pursue the Ph.D. degree must formally apply for admission to the Ph.D. program.

The procedure for satisfying the requirements for the Ph.D. degree in Mechanical Engineering at UCR consists of four principal parts:
1. Successful completion of an approved program of course work below
2. Passing a written and oral preliminary examination
3. Successful oral defense of a written dissertation proposal
4. Defense and approval of the dissertation

Course Work
A course work plan has to be formulated by the student in coordination with their research advisor or the program graduate advisor. It is understood that changes to this may occur as the student’s research progresses. These changes should be documented after consultation with the research advisor or the program graduate advisor.

Core Course Work
Before the oral defense of the dissertation proposal at least 32 units of course work must be completed. This is excluding seminar and research credits. Of these a minimum of twenty-four graduate units must be in Mechanical Engineering courses (ME 200 or higher, excluding ME 250, ME 290, ME 297, ME 298-1, and ME 299). Typically students also enroll in ME 250 and ME 297 units their first year. The student may be advised to take additional courses prior to advancement to candidacy.

Seminar Requirement
The student must also complete 6 units of ME 250 (seminar) prior to graduation. One unit of ME 250 is offered each quarter. These units do not have to be completed before the dissertation proposal defense.

Research Units
At least 36 units of directed or thesis research credits (ME 297 or ME 299) must be taken prior to graduation.
Courses taken as part of the Ph.D. requirement in Mechanical Engineering at UCR can be used to satisfy the course requirements for an M.S. in Mechanical Engineering at UCR and vice versa.

Normative Time to Degree
Five years
Refer to the department’s graduate program guidelines for further details.

Lower-Division Courses
ME 002 Introduction to Mechanical Engineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 040A or PHYS 002A or PHYS 02HA or PHYS 040HA or PHYS 041A. An introduction to the field of mechanical engineering. Topics include the mechanical engineering profession; machine components; forces in structures and fluids; materials and stresses; thermal and energy systems; machine motion; and machine design.

ME 003 How Things Work: the Principles Behind Technology 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): none. Introduces the basic physical principles of engineering systems from everyday life such as automobiles, computers, and household appliances. Topics include conservation laws and the physics and chemistry of engineering systems. Does not confer credit towards a degree in the Bourns College of Engineering.

ME 004 Energy and the Environment 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): none. Covers energy conservation, energy sources, market dynamics, and climate change. Addresses cultural, political, and social trends and their impact on the ecosystem. Discusses renewable and nonrenewable energy sources. Technical background not required. Does not confer credit towards a degree in the Bourns College of Engineering.

ME 005 The Science of Mythbusting 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): none. Introduces to the scientific method for non-science majors. Explores the application of scientific concepts to test the validity of myths and events from news stories, movies, and other popular media. Provides critical reasoning skills necessary to interpret advertiser’s product claims, critique information on the World Wide Web, and understand new technologies.
ME 009 Engineering Graphics and Design 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Covers graphic concepts and projective geometry relating to spatial visualization and communication in design. Includes technical sketching, computer-aided design with solid modeling, geometric dimensioning and tolerancing, and an introduction to the engineering design process.

ME 010 Statics 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): MATH 009C, PHYS 040A or PHYS 040HA. Covers equilibrium of coplanar force systems; analysis of frames and trusses; noncoplanar force systems; friction; and distributed loads.

ME 018A Introduction to Engineering Computation 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): MATH 009A with a grade of C- or better or MATH 09HA with a grade of C- or better; or equivalent. An introduction to the use of MATLAB in engineering computation. Covers scripts and functions, programming, input/output, and two- and three-dimensional graphing. Introduces data analysis, numerical analysis, and numerical solutions for engineering problems.

ME 018B Introduction to Computational Modeling in Mechanical Engineering 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): MATH 009B with a grade of "C-" or better; ME 018A. Introduces students to concepts of computational modeling in mechanical engineering. Topics include formulation of models to solve problems involving vector analysis, linear algebra, differential and integral calculus. Explores analytical and numerical solutions to problems in mechanical engineering.

Upper-Division Courses

ME 100A Thermodynamics 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): MATH 010A, ME 018B with a grade of C- or better, PHYS 040B or PHYS 040HB. Introduces basic concepts and applications of thermodynamics relevant to mechanical engineering. Topics include work and energy, the first law of thermodynamics, properties of pure substances, system and control volume analysis, the Carnot cycle, heat and refrigeration cycles, the second law of thermodynamics, entropy, and reversible and irreversible processes. Credit is awarded for one only of CHE 100 or ME 100A.

ME 100B Thermodynamics 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): ME 100A. Topics include the second law of thermodynamics, entropy function, entropy production, analysis of cycles, vapor power systems, gas power systems, refrigeration and heat pump systems, equations of state, thermodynamic property relations, ideal gas mixtures and psychrometrics, multicomponent systems, combustion, and reacting mixtures.

ME 103 Dynamics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 046; ME 010 with a grade of C- or better; ME 018B with a grade of C- or better or CS 010B or MATH 031. Topics include vector representation of kinematics and kinetics of particles; Newton's laws of motion; force-mass-acceleration, work-energy, and impulse-momentum methods; kinetics of systems of particles and kinematics; and kinetics of rigid bodies.

ME 110 Mechanics of Materials 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ME 010 with a grade of C- or better, MATH 046. Topics include mechanics of deformable bodies subjected to axial, torsional, shear, and bending loads; combined stresses; and their applications to the design of structures. Satisfaction(s) or No Credit(N/C) is not available.

ME 113 Fluid Mechanics 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): MATH 046, PHYS 040B or PHYS 040HB, ME 010 with a grade of C- or better, ME 018B with a grade of C- or better. Introduces principles of fluid mechanics relevant to mechanical engineering. Topics include shear stresses and viscosity, fluid statics, pressure, forces on submerged surfaces, Bernoulli and mechanical energy equations, control volume approach, mass conservation, momentum and energy equations, the differential approach, turbulent flow in pipes, and lift and drag. Credit is awarded for only one of CHE 114 or ME 113.

ME 114 Introduction to Materials Science and Engineering 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 001B, PHYS 040C or PHYS 040HC, upper-division standing. Introduces classification, atomic structure and interatomic bonding, crystal structure of metals, imperfections in solids, diffusion, mechanical properties of engineering materials, strengthening mechanisms, basic concepts of fracture and fatigue, phase diagrams, ceramics, polymers, and composites.

ME 116A Heat Transfer 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): CHEM 001B, PHYS 040C, upper-division standing. Covers the analysis of steady and transient heat conduction, fin and heat generating systems, two-dimensional conduction, internal and external forced convection, natural convection, radiation heat transfer, heat exchangers, and mass transfer. Credit is awarded for only one of CHE 116 or ME 116A.

ME 116B Heat Transfer 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): ME 116A. Introduces the analysis and design of feedback control systems using classical control methods. Topics include control system terminology, block diagrams, analysis and design of control systems in the time and frequency domains, closed-loop stability, root locus, Bode plots, and an introduction to analysis in state-space. Credit is awarded for one of the following ME 121 or EE 132.

ME 117 Combustion and Energy Systems 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ME 100A; ME 113; ME 116A; for ME 117 online section; enrollment in the Online Master of Science in Engineering program; graduate standing. Discusses premixed and diffusion flames; fuel-air thermochemistry; combustion-driven engine design and operation; engine cycle analysis; fluid mechanics in engine components; pollutant formation; and gas turbines.

ME 118 Mechanical Engineering Modeling and Analysis 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): MATH 046, ME 018B with a grade of C- or better. Introduces data analysis and modeling used in engineering through the software package MATLAB. Numerical methods include descriptive and inferential statistics, sampling and bootstrapping, fitting linear and nonlinear models to observed data, interpolation, numerical differentiation and integration, and solution of systems of ordinary differential equations. Final project involves the development and evaluation of a model for an engineering system. Credit is awarded for only one of ENGR 118 or ME 118.

ME 120 Linear Systems and Controls 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 005 or EE 030A, EE 030LA; CS 010B, MATH 031 or ME 018B. Introduces the modeling and analysis of dynamic systems, emphasizing the common features of mechanical, hydraulic, pneumatic, thermal, electrical, and electromechanical systems. Controls are introduced through state equations, equilibrium, linearization, stabilization, and time and frequency domain analysis.

ME 121 Feedback Control 4 Discussion, 1 hour; lecture, 3 hours. Prerequisite(s): ME 118, ME 120. Introduces the analysis and design of feedback control systems using classical control methods. Topics include control system terminology, block diagrams, analysis and design of control systems in the time and frequency domains, closed-loop stability, root locus, Bode plots, and an introduction to analysis in state-space. Credit is awarded for one of the following ME 121 or EE 132.

ME 122 Vibrations 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): ME 103. Covers free and forced vibration of discrete systems with and without damping resonance; matrix methods for multiple degree-of-freedom systems; normal modes, coupling, and normal coordinates; and use of energy methods.

ME 130 Kinematic and Dynamic Analysis of Mechanisms 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): ME 009, ME 103. Explores the kinematic analysis of planar mechanisms including linkages, cams, and gear trains. Introduces concepts of multibody dynamics.

ME 131 Design of Mechanisms 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): ME 130. Involves design of planar, spherical, and spatial mechanisms using both exact and approximate graphical and analytical techniques. Requires a computer-aided design project.

ME 133 Introduction to Mechatronics 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): EE 005 or EE 030A, EE 030LA. Introduces hardware, software, sensors, actuators, physical systems models, and control theory in the context of control system implementation. Covers data acquisition (Labview), sensors, actuators, electric circuits and components, semiconductor electronics, logic circuits, signal processing using analog operational amplifiers, programmable logic controllers, and microcontroller programming and interfacing. Uses MATLAB and Simulink.
ME 134 Microstructural Transformations in Materials 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ME 114 or consent of instructor. An introductory study of the fundamentals (thermodynamics and kinetics) controlling microstructural transformations in materials and their application to both liquid-solid and solid-solid transformations. Focuses on the important transformations that ultimately control the microstructures and properties of crystalline solids. Cross-listed with MSE 134.

ME 135 Transport Phenomena 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): ME 100A, ME 113, ME 116A. Introduces new concepts of thermodynamics, fluid mechanics, and heat transfer; sychrometry, combustion, one-dimensional compressible flow, and turbomachinery. Integrates the most important concepts of transport of momentum, heat, and mass.

ME 136 Environmental Impacts of Energy Production and Conversion 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ME 100A; ME 113; ME 116A; for the ME 136 online version section; enrollment in the Online Master of Science in Engineering program; graduate standing. Covers thermodynamics, heat transfer, and fluid mechanics as applied to the examination of the environmental impacts of energy production and conversion. Topics include pollution associated with fossil fuel combustion, environmental impacts of energy use, turbulent transport of pollutants, and principles used in the design of pollution control equipment.

ME 137 Environmental Fluid Mechanics 4 Lecture, 3 hours; discussion 1 hour. Prerequisite(s): ME 100A, ME 113. Covers the application of fluid mechanics to flows in the atmosphere and oceans. Topics include hydrostatic balance, Coriolis effects, geostrophic balance, boundary layers, turbulence, tracer and heat transport.

ME 138 Transport Phenomena in Living Systems 4 Lecture, 3 hours; discussion 1 hour. Prerequisite(s): BIEN 105 or ME 113, MATH 046, PHYS 040B or PHYS 040HB. An introduction to the application of the basic conservation laws of mechanics (mass, linear momentum, and energy) to the modeling of complex biological systems. Emphasizes how these concepts can explain and predict life processes.

ME 140 Ship Theory 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ME 103, ME 113. Covers ship hull form, static and dynamic stability, ship response to waves, grounding and flooding, numerical integration of complex three-dimensional curved shapes and mathematical modeling of curved surfaces. Explores engineering approximations necessary for applications of fundamental principles to complex engineering systems such as ships.

ME 144 Foundations of Robotics 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): EE 020B or MATH 031 or ME 018B; EDUC 016 or CS 010B or ME 118; EE 106 or CS 141 or ME 120; restricted to class level standing of junior, or senior; or consent of instructor. Provides foundational knowledge on analysis, control, and programming of robots. Considers configuration space; rigid body motion; forward, inverse, and velocity kinematics; dynamics; trajectory planning; robot motion control; localization and mapping and robot ethics. Integrates hands-on labs to program robots in simulation and experimentally by reading and interpreting sensor data. Cross-listed with EE 144. Credit is awarded for one of the following EE 144, ME 144, or EE 283A.

ME 145 Robotic Planning and Kinematics 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): ME 120 or equivalent; or consent on instructor. Motion planning and kinematics topics with an emphasis in geometric reasoning, programming, and matrix computations. Motion planning includes configuration spaces, sensor-based planning, decomposition and sampling methods, and advanced planning algorithms. Kinematics includes reference frames, rotations and displacements, and kinematic motion models. Cross-listed with EE 145.

ME 153 Finite Element Methods 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ME 113. Covers weak formulation, the Galerkin method and its computational implementation, mesh generation, data visualization, as well as programming finite element codes for practical engineering applications.

ME 156 Mechanical Behavior of Materials 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): ME 110; ME 114. Covers weak formulation, the Galerkin method and its computational implementation, mesh generation, data visualization, as well as programming finite element codes for practical engineering applications.

ME 157 Failure Analysis and Prevention 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ME 114 with a grade of C or better; restricted to class level standing of senior; or consent of instructor. Topics include failure modes due to overload, fatigue, fracture, and creep. Also addresses statistical analysis, probability of failure, quality assurance, and elements of fracture mechanics. Cross-listed with MSE 143. Credit is awarded for one of the following ME 157, MSE 143, or MSE 233B.

ME 158 Advanced Solidification Processing 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MSE 143 or ME 157; restricted to class level standing of senior; or consent of instructor. An overview of the fundamentals of solidification processing. Includes integrated interplay of heat flow, mass transport, and solid/liquid interfacial kinetics during discontinuous change of state from liquid to solid of single phase and polychrome materials. Cross-listed with MSE 148. Credit is awarded for one of the following MSE 148, ME 158, ME 279, or ME 248C.

ME 170A Experimental Techniques 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): EE 005; ME 018B with a grade of C- or better. Covers the principles and practice of measurement and control and the design and implementation of experiments. Topics include dimensional analysis, error analysis, signal-to-noise problems, filtering, data acquisition and data reduction, and statistical analysis. Includes experiments on the use of electronic devices and sensors and practice in technical report writing.

ME 170B Experimental Techniques 4 Laboratory, 6 hours; discussion, 2 hours. Prerequisite(s): ME 103, ME 110, ME 113, ME 116A, ME 170A. Analysis and verification of engineering theory using laboratory measurements in advanced, project-oriented experiments involving fluid flow, heat transfer, structural dynamics, thermodynamic systems, and electromechanical systems.

ME 174 Machine Design 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ME 009, ME 103 can be taken concurrently with ME 110. ME 114. An introduction to the fundamentals of strength-based design. Topics include deflection and stiffness, static failure, and fatigue failure.

ME 175A Professional Topics in Engineering 2 Lecture, 2 hours. Prerequisite(s): senior standing in Mechanical Engineering major; ME 009. Topics include technical communication, team work, project management, engineering economics, professional ethics, and computer-aided design. Satisfactory (S) or No Credit (NC) grading is not available.

ME 175B Mechanical Engineering Design 3 Lecture, 2 hours; laboratory, 2 hours. Prerequisite(s): senior standing in Mechanical Engineering. ME 113, ME 116A, ME 170A, ME 174, ME 175A (may be taken concurrently). Outlines the defining of a design problem and the conception and detail of the design solution. Explores design theory, design for safety, reliability, manufacturability, and assembly. Graded In Progress (IP) until ME 175B and ME 175C are completed, at which time a final, letter grade is assigned.

ME 175C Mechanical Engineering Design 3 Lecture, 1 hours; discussion, 1 hour; laboratory, 3 hours. Prerequisite(s): senior standing in Mechanical Engineering. ME 113, ME 116A, ME 170A, ME 174, ME 175A (may be taken concurrently). Outlines the defining of a design problem and the conception and detail of the design solution. Explores design theory, design for safety, reliability, manufacturability, and assembly. Graded In Progress (IP) until ME 175B and ME 175C are completed, at which time a final, letter grade is assigned.

ME 175D Technological Entrepreneurship 4 Lecture, 2 hours; workshop, 2 hours. Prerequisite(s): senior standing in Mechanical Engineering. Introduces concepts of business and management required to convert a technology into a viable business. Topics include technological assessment, market analysis, strategy, decision making, legal and intellectual property issues in business, financial analysis, business ethics and communication. Satisfactory (S) or No Credit (NC) grading is not available.
ME 176 Sustainable Product Design 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ME 103, ME 110, ME 113, ME 116A. Introduces the principles of sustainable product design. Topics include life cycle design; design for reliability, maintainability, and recycling; reuse/remanufacture; materials selection; and manufacturing processes. Includes project in which students analyze the environmental impact of a product and redesign it to reduce the impact. Credit is awarded for only one of ME 176 or ME 210.

ME 180 Optics and Lasers in Engineering 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): EE 005, MATH 010B; or equivalent; or consent of instructor. Introduces basic principles of optics and lasers, wave equations, interferometry, diffraction, Fourier optics, light-matter interactions, ultrafast and nonlinear optics, and nanophotonics. Frames introductory concepts with experimental design and computer analysis. Includes applications and analytical exercises with microscopy and spectroscopy, smart-phone camera hacks, thin-film and bulk materials characterization, and communication systems. Credit is awarded for one of the following ME 180 or ME 280.

ME 190 Special Studies 1 to 5 Individual Study, 3 to 15 hours. Prerequisite(s): consent of instructor, department chair, and Mechanical Engineering Undergraduate Program Committee chair. Individual study to meet special curricular needs. Requires a formal written report. Course is repeatable to a maximum of 9 units.

ME 197 Research For Undergraduates 1 to 4 Research, 3 to 12 hours. Prerequisite(s): consent of instructor and Mechanical Engineering Undergraduate Program Committee chair. Directed research in a particular subject relevant to mechanical engineering. Requires a formal written technical report. Course is repeatable to a maximum of 8 units.

ME 198 R'course: Variable Topics 1 Activity, 3 hours. Prerequisite(s): permission needed from department; sophomore standing or better. An opportunity for UCR undergraduate students to develop leadership skills, innovate the undergraduate curriculum, and promote democratic, experiential education. Original course topics are variable and unique from other departmental course offerings, designed to highlight the student facilitators' expertise while working closely with a faculty mentor. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as topics change to a maximum of 8 units.

Graduate Courses

ME 200 Methods of Engineering Analysis 4 Lecture, 4 hours. Prerequisite(s): graduate standing in engineering or consent of instructor. Topics include linear algebra theory, vector spaces, eigenvalue problems, complex analytic functions, contour integration, integral transforms, and basic methods for solving ordinary and partial differential equations in mechanical engineering applications.

ME 201 Computational Methods in Engineering 4 Lecture, 4 hours. Prerequisite(s): graduate standing or consent of instructor. Explores numerical methods with computer applications. Topics include solution of nonlinear algebraic equations, solution of systems of linear equations, interpolation, integration, statistical description of data, model fitting, Fast Fourier Transform and applications, and numerical solution of ordinary and partial differential equations.

ME 202 Spectral Computational Methods 4 Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): ME 200 or equivalent; ME 240A is recommended. Introduces data analysis, including discrete Fourier transforms, sampling theorem, and power spectra. Reviews Sturm-Liouville eigenfunction expansions, Gibbs phenomenon, convergence theorems, and Chebyshev transforms. Additional topics include Galerkin, tau, collocation, and pseudo-spectral methods, aliasing, time-advancement, and numerical stability. Explores applications to incompressible Navier-Stokes equations, compressible flows, reacting flows, and complex geometries. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable.

ME 203 Design and Analysis of Engineering Experiments 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. ME 203 online section; enrollment in the Online Master-in-Science in Engineering program. Introduces research methods in engineering. Topics include design of experiments, basic statistical tools, data analysis in the time-domain and frequency domain, machine learning and pattern recognition approaches, and computational tools. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

ME 210 Sustainable Product Design 4 Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): graduate standing or consent of instructor. ME 210 online section; enrollment in the Online Master-in-Science in Engineering program. Introduces the principles of sustainable product design. Topics include life cycle design; design for reliability, maintainability, and recycling; reuse/remanufacture; materials selection; and manufacturing processes. Includes project in which students analyze the environmental impact of a product and redesign it to reduce the impact. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for only one of ME 176 or ME 210.

ME 220 Optimal Control and Estimation 4 Lecture, 4 hour; term paper, 1 hour. Prerequisite(s): ME 120, ME 121 or equivalent; or consent of instructor. Introduces optimal control and estimation with specific focus on discrete time linear systems. Topics include analysis of discrete Riccati equations; asymptotic properties of optimal controllers; optimal tracking; an introduction to Receding Horizon control; derivation of the Kalman filter; Extended Kalman Filter; and Unscented Kalman filter. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with EE 233.

ME 221 Kinematics and Dynamics of Robots 4 Lecture, 4 hours. Prerequisite(s): graduate standing; consent of instructor. Introduces methods to describe the position, orientation, and location of a rigid body. Explores position, velocity, and acceleration analysis of serial and parallel manipulators. Examines statics, dynamics, and stiffness analysis of robotic manipulators. Introduces Lagrangian dynamics and applications to wrist mechanisms and tendon-driven manipulators.

ME 222 Robot Sensing and Navigation 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 236 or ME 236; ME 120; or equivalent; graduate standing; consent of instructor. Topics include robot navigation; description of robot sensors and their characteristics; sensor data processing; feature extraction; and matching. Also covers representations of space for mapping; map-based localization; simultaneous localization and mapping; and image-based motion estimation. Cross-listed with EE 245.

ME 223 Secure and Reliable Control Systems 4 Lecture, 4 hours. Prerequisite(s): graduate standing or consent of instructor. ME 223 online section; enrollment in the Online Master-in-Science in Engineering program. An introductory study of fault-tolerant and secure control systems. Topics include models of dynamical systems; linear system theory; detectability of attacks and failures; model-based fault detection; analytical redundancy; unknown-input observers; statistical methods for fault detection; graphical models and structured system theory; and fault-tolerant control. Letter Grade or S/NC; no petition required.

ME 224 Computational Methods For Robotics 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): graduate standing; consent of instructor. Provides the students with the mathematical and computational tools used in many diverse areas of robotics. Topics include numerical tools for inverse kinematics, representation and manipulation of model data, optimization methods for obstacle avoidance, and simulation of robot dynamics. Covers popular computational environments for robotics.

ME 225 Design and Fabrication of Robots 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): graduate standing; consent of instructor. Reviews traditional precision machine design, electromagnetic driving systems, and integration principles. Also presents state-of-the-art actuators, sensors, transducers, and fabrication methods with their applications to modern robotic systems. Provides extensive training in the modeling, design, and fabrication of mechatronic components and complete robotic systems.

ME 226 Vehicle Dynamics 4 Lecture, 4 hours. Prerequisite(s): graduate standing; consent of instructor. For the ME 226 online version section; enrollment in the Online Master of Science in Engineering program; graduate standing. Introduces concepts of forward, lateral, and roll dynamics of vehicles. Includes mechanics of tires, drivetrains, steering, and suspensions. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.
ME 227 Vehicle Propulsion 4 Lecture, 4 hours. Prerequisite(s): graduate standing or consent of instructor. For ME 227 online section, enrollment in the Online Master-in-Science in Engineering program; graduate standing. Introduces concepts of vehicle energy and fuel consumption. Develops models of contemporary vehicle propulsion systems including internal combustion engines, electric propulsion, hybrid propulsion and fuel-cell based propulsion. Introduces concepts of supervisory control strategies for vehicle propulsion. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

ME 230 Computer-Aided Engineering Design 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): graduate standing or consent of instructor. ME 230 online section; enrollment in the Online Master-in-Science in Engineering program. Introduces fundamentals of interactive computer graphics, three-dimensional representations of curves and surfaces, Bezier parameterizations, and optimization methods. Demonstrates applications of computer graphics and computational geometry to mechanical system simulations, computer-aided design, and engineering design.

ME 231 Pen-Based Computing 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor; computer programming experience. Introduces computational techniques for pen-based user interfaces. Covers fundamental issues such as ink segmentation, sketch parsing and shape recognition. Explores the topic of sketch understanding, including reasoning about context and correcting errors. Also addresses issues related to building practical pen-based systems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CS 233.

ME 232 Computational Design Tools 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. An introduction to the theoretical foundations and practical application of computational techniques for engineering design. Topics include geometric modeling, numerical optimization, and artificial intelligence techniques. Includes programming projects in which both symbolic and numerical computational techniques are used to solve engineering problems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

ME 233 Artificial Intelligence For Design 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Explores the application of artificial intelligence to engineering design. Topics include the use of search, knowledge-based systems, machine learning, and qualitative physical reasoning for design automation. Addresses the theory behind these techniques and issues related to their practical application. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes.

ME 235 Linear System Theory 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): EE 132. Provides a review of linear algebra. Topics include the mathematical description of linear systems; the solution of state-space equations; controllability and observability; canonical and minimal realization; and state feedback, pole placement, observer design, and compensator design. Cross-listed with EE 235.

ME 236 State and Parameter Estimation Theory 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 215 with a grade of C or better; graduate standing. Covers Fisher information, Cramer-Rao lower bound, efficiency, and sufficient statistics. Addresses minimum variance unbiased, best linear unbiased, maximum likelihood, least squares, maximum a posteriori, and mean-squared estimation. Also covers Weiner and Kalman filtering as well as applications in navigation, signal processing, machine learning, and dynamical systems. Cross-listed with EE 236.

ME 237 Nonlinear Systems and Control 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): EE 235/ME 235. Explores nonlinear systems and control. Topics include: non-linear differential equations, second order nonlinear systems, equilibrium and phase portrait, limit cycle, harmonic analysis and describing function, Lyapunov stability theory, absolute stability, Popov and circle criterion, input-output stability, small gain theorem, averaging methods, and feedback linearization. Cross-listed with EE 237.

ME 238 Linear Multivariable Control 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): EE 235/ME 235. Investigates multivariable feedback systems, stability, performance, uncertainty, and robustness. Topics include analysis and synthesis via matrix factorization; Q-parameterization and all stabilizing controllers; frequency domain methods; and Hoo (insert infinity) design and structured singular value analysis. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with EE238.

ME 239 Optimal Control 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): EE 215, EE 235/ME 235. Presents the theory of stochastic optimal control systems and methods for their design and analysis. Covers principles of optimization; Lagrange’s equation; linear-quadratic-Gaussian control; certainty-equivalence; the minimum principle; the Hamilton-Jacobi-Bellman equation; and the algebraic Ricatti equation. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with EE 239.

ME 240A Fundamentals of Fluid Mechanics 4 Lecture, 4 hours. Prerequisite(s): graduate standing or consent of instructor. ME 240A online section; enrollment in the Online Master-in-Science in Engineering program. Introduction to fluid mechanics. Explores equations of motion, stress tensor, the Navier-Stokes equations, boundary conditions, exact solutions, vorticity, and boundary layers.

ME 240B Fundamentals of Fluid Mechanics 4 Lecture, 4 hours. Prerequisite(s): ME 240A or consent of instructor. Covers inviscid flow, the Euler and Bernoulli equations, potential flow, and wing theory and introduces stability theory and turbulence.

ME 241A Fundamentals of Heat and Mass Transfer 4 Lecture, 4 hours. Prerequisite(s): ME 240A or consent of instructor. Introduces in-depth derivations of equations and principles governing heat and mass transfer with an emphasis on formulation of problems. Topics include equations involved in conduction, convection, radiation, energy, and species conservation and the analytical and numerical solution of transport problems. Mechanical Engineering graduate students receive a letter grade; other students receive a letter grade or Satisfactory (S) or No Credit (NC) grade.

ME 241B Transport Through Porous Media 4 Lecture, 4 hours. Prerequisite(s): graduate standing. Covers current theories on flow, heat, and mass transfer and the mechanisms of multiphase transport in porous media. Mechanical Engineering graduate students receive a letter grade; other students receive a letter grade or Satisfactory (S) or No Credit (NC) grade.

ME 241C Electronic Cooling and Thermal Issues in Microelectronics 4 Lecture, 4 hours. Prerequisite(s): graduate standing. Discusses thermal issues associated with the life cycle of electronic products. Covers passive, active, and hybrid thermal management techniques, computational modeling approaches, and advanced thermal management concepts such as single phase, phase change and heat pipes. Mechanical Engineering graduate students receive a letter grade; other students receive a letter grade or Satisfactory (S) or No Credit (NC) grade.

ME 242 Turbulence in Fluids 4 Lecture, 4 hours. Prerequisite(s): ME 240A or consent of instructor. An introduction to the application of fundamental conservation laws of mechanics (mass, momentum, and energy) to the modeling of complex turbulent natural and human-made flows. Covers tensor notation, statistical and spectral analysis, and basic turbulent closure techniques, including understanding of turbulence with intuitive insight into the problems that cannot be rigorously solved. May be taken Satisfactory (S) or No Credit (NC) by students advanced to candidacy for the PhD.

ME 243A Advanced Mechanical Engineering Thermodynamics I 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Reviews fundamental concepts in classical thermodynamics such as conservation of energy, entropy, thermodynamic cycles, and functions. Covers Maxwell relations, chemical potential, and stability criteria for thermodynamic systems. Applications include chemical equilibrium and reactions as well as phase transitions, and diagrams. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.
ME 243B Advanced Mechanical Engineering Thermodynamics II 4 Lecture, 3 hours; discussion; 1 hour. Prerequisite(s): graduate standing; or consent of instructor. Introduces the statistical foundations of thermodynamics. Presents the fundamental postulate of thermodynamics and uses microstatistics to derive entropy, pressure, temperature, chemical potential, and free energies. Covers kinetic theory of gases. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

ME 244 Nanoscale Heat Transfer and Energy Conversion 4 Lecture, 4 hours. Prerequisite(s): 2 of the following: MSE 207, ME 100A, ME 116A, EE 201, EE 202, MSE 217; or equivalents; graduate standing. Explores fundamental processes of energy transport and conversion at short length and time scales. Introduces classical and quantum-mechanical size effects on electrons, phonons, and photons. Topics include modes of energy storage, coupling between energy carriers, and electrical and thermal transport using the Boltzmann transport equation and/or kinetic theory. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with MSE 208B.

ME 245 Radiative Heat Transfer 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ME 116A or ME 116B or equivalent or consent of instructor. Offers in-depth study of topics related to radiative heat transfer. Builds upon curriculum of radiation presented at the undergraduate level. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

ME 246 Computational Fluid Dynamics With Applications 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): ME 240A or consent of instructor. Introduces finite difference, finite volume, and finite element; spectral methods, governing equations for nonreacting and reacting flows; and stability and convergence for steady and unsteady problems. Students use commercial computational fluid dynamics (CFD) software for the course project.

ME 248 Internal Combustion Engines 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ME 100A; graduate standing. For the ME 248 online section; enrollment in the Online Master of Science in Engineering program; graduate standing. Covers engine types and their operation. Also addresses engine design and operating parameters, thermodynamics of fuel-air mixture, engine cycles, spark ignition and compressed ignition engines, and emissions. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

ME 250 Seminar in Mechanical Engineering 1 or 2 Seminar, 1 or 2 units. Prerequisite(s): graduate standing. Seminar in selected topics in mechanical engineering presented by graduate students, staff, faculty, and invited speakers. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

ME 255 Transport Processes in the Atmospheric Boundary Layer 4 Lecture, 4 hours. Prerequisite(s): ME 100A or CHE 100, ME 113 or CHE 114, and ME 116A or CHE 116; or consent of instructor. Examines heat, mass, and momentum transport processes in the atmospheric boundary layer using current understanding of micrometeorology. Topics include surface energy balance, Monin-Obukhov similarity theory, and dispersion of pollutants in the atmospheric boundary layer. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

ME 260 Continuum Mechanics 4 Lecture, 4 hours. Prerequisite(s): graduate standing or consent of instructor. Covers vector and tensor notation and analysis. Introduces the concept of deformation, strain, and stress tensors. Elaborates fundamental balance and conservation laws of mass, momentum, and energy. Describes constitutive equations for elastic, viscoelastic, and plastic solids; and ideal, compressible, and viscous fluids. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

ME 261 Theory of Elasticity 4 Lecture, 4 hours. Prerequisite(s): ME 110 or consent of instructor. Introduction to tensors, strain, equations of motion, and constitutive equations. Topics include typical boundary value problems of classical elasticity, problems of plane strain and plane stress, and variational principles.

ME 266 Mechanics and Physics of Materials 4 Lecture, 4 hours. Prerequisite(s): graduate standing or consent of instructor. Course introduces students to topics related to Structure-Composition-Processing-Performance relationship of metallic materials. It will cover fundamentals of materials science, materials selection, processing and manufacturing. Materials design or selection-based approach and team activities will be utilized to enhance learning and presentation skills. Cross-listed with MSE 246B.

ME 267 Finite Element Methods in Solid Mechanics 4 Lecture, 4 hours. Prerequisite(s): ME 261 or consent of instructor. Covers the formulation and implementation of finite element methods, including the Galerkin and energy methods. Topics include the static and dynamic analysis of mechanical and multiphysical systems and techniques of automatic mesh generation.

ME 270 Introduction to Microelectromechanical Systems 4 Lecture, 4 hours. Prerequisite(s): ME 110, ME 114, or equivalents, for MSE 238 online section; enrollment in the Online Master-in-Science in Engineering program. An introduction to the design and fabrication of microelectromechanical systems (MEMS). Topics include micromachining processes; material properties; transduction; applications in mechanical, thermal, optical, radiation, and biological sensors and actuators; microfluidic devices; Bio-MEMS and applications; packaging and reliability concepts; and metrology techniques for MEMS. Cross-listed with MSE 238.

ME 271 Therapeutic Biomedical Microdevices 4 Lecture, 4 hours. Prerequisite(s): ME 270/MSE 238 or equivalent or consent of instructor. Introduces the application of micro device technology towards biomedical therapeutics. Topics include emerging micro device fabrication techniques, bio compatibility requirements, and applications in areas such as cardiovascular intervention, minimally-invasive drug delivery, neuroprosthetic interfaces, and cellular engineering. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

ME 272 Nanoscale Science and Engineering 4 Lecture, 4 hours. Prerequisite(s): graduate standing or consent of instructor. For the MSE 248A/ME 272 online sections: enrollment in the Online Master-in-Science in Engineering program; graduate standing. An overview of the machinery and science of the nanometer scale. Topics include patterning of materials via scanning probe lithography; electron beam lithography; nanoinprinting; self-assembly; mechanical, electrical, magnetic, and chemical properties of nanoparticles, nanotubes, nanowires, and biomolecules (DNA, protein); self-assembled monolayers; and nanocomposites and synthetic macromolecules. Cross-listed with MSE 248A.

ME 273 Principles and Designs of Micro Transducers 4 Lecture, 3 hours; term paper, 1 hour; extra reading, 1 hour; written work, 1 hour. Prerequisite(s): ME 270 or ME 238 or equivalent; or consent of instructor. Emphasizes physical principles and designs of microscopic sensors and actuators. Topics include macroscopic and microscopic physical phenomena and properties; signal processing; mechanical transducers; thermal transducers; electrical transducers; magnetic transducers; optical transducers; chemical and biological transducers; and applications in areas such as lab-on-a-chip, medical diagnosis and power MEMS.

ME 274 Plasma-Aided Manufacturing and Materials Processing 4 Lecture, 4 hours. Prerequisite(s): graduate standing or consent of instructor. For ME 274/MSE 208A online section: enrollment in the Online Master-in-Science in Engineering program; graduate standing. Covers the fundamentals of gaseous plasmas and the physics of both equilibrium and non-equilibrium discharges. Explores the basic techniques for plasma diagnostics. Discusses the use of plasmas as a materials processing medium for a variety of manufacturing processes. Includes topics such as the processing of nanostructured materials using plasmas. Cross-listed with MSE 208A.

ME 278 Imperfections in Solids 4 Lecture, 4 hours. Prerequisite(s): graduate standing or consent of instructor. Covers fundamentals of crystal structures and crystal defects. Includes the generation of point defects, nucleation and propagation of dislocations, perfect and partial dislocations, twins, stacking faults, transformations, mechanics of semiconductor and metallic thin films, and multilayered structures. Cross-listed with MSE 218.
ME 279 Advanced Solidification Processing 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MSE 134 or ME 134; graduate standing; or consent of instructor. An overview of the fundamentals of solidification processing. Includes integrated interplay of heat flow, mass transport, and solid/liquid (s/l) interfacial kinetics during discontinuous change of state from liquid to solid of single phase and polynphase materials. Cross-listed with MSE 248C. Credit is awarded for one of the following MSE 248C, ME 279, ME 158, or MSE 148.

ME 280 Optics and Lasers in Engineering and Applied Science 4
Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): graduate standing, or consent of instructor. Focuses on advanced understanding of optics. Includes wave equations, interferometry, diffraction, Fourier optics, light-matter interactions, ultra-fast and nonlinear optics, and nanophotonics. Frames advanced concepts with experimental and numerical analysis. Applications include smart-phone camera hacks, imaging and microscopy, thin-film and bulk materials characterization, communication systems, spectroscopy, laser machining, and optical trapping. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and academic advisor. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

Professional Course
ME 302 Apprentice Teaching 1 to 4
Seminar, 1 to 4 hours. Prerequisite(s): appointment as a teaching assistant or an associate in Mechanical Engineering. Topics include effective teaching methods, such as those involved in leading discussion sections and preparing and grading examinations, and student-instructor relations in lower- and upper-division Mechanical Engineering courses. Required each quarter of teaching assistants and associates in Mechanical Engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

Mechanisms of Gene Expression and Regulation
Studies Designated Emphasis

Subject abbreviation: GERS
School of Medicine

David Lo (Biomedical Sciences), Co-Director
Thomas Girke (Institute for Integrative Genome Biology), Co-Director
david.lo@ucr.edu
thomas.girke@ucr.edu

Advisory Committee & Participating Faculty

Devin Binder (Biomedical Sciences)
Monica Carson (Biomedical Sciences)
Djurdjica Coss (Biomedical Sciences)
Iryna Ethell (Biomedical Sciences)
Emma Wilson (Biomedical Sciences)
Meera Nair (Biomedical Sciences)
Declan McCole (Biomedical Sciences)
David Lo (Biomedical Sciences)
Christian Lytle (Biomedical Sciences)
Nicholas DiPatrizio (Biomedical Sciences)
Seema Tiwari-Woodruff (Biomedical Sciences)
Sika Zheng (Biomedical Sciences)
Karine LeRoch (Molecular, Cell and Systems Biology)
Frances Sladek (Molecular, Cell and Systems Biology)
Ted Karginov (Molecular, Cell and Systems Biology)
Yinsheng Wang (Chemistry)
Thomas Girke (Institute for Integrative Genome Biology)
Xinpeng Cui (Statistics)
Katherine Borkovich (Microbiology)
James Borneman (Microbiology)
Jason Stajich (Microbiology)
Shou-Wei Ding (Microbiology)

Designated Emphasis Requirements

The Designated Emphasis is an interdisciplinary graduate program of study to enhance student training in the field through a focused coursework across at least two departments. The program is optional and the courses used for the DE may not be counted toward MS or PhD requirements.

1. Three (3) courses (12 units) with a focus in basic principles of genetics gene regulation (epigenetics, non coding RNA) and bioinformatics will be selected from:
   MCBL 221 - Microbial Genetics
   CMDB 201 - Molecular Biology
   CMDB 203 - Advanced Genetics
   GEN 203 - Advanced Genetic Analysis of Model Organisms
   GEN 241 - Advances in Genomics
   GEN 242 - Data Analysis in Genome Biology
   GEN 206 - Gene Silencing
   GEN 220 - Computational Analysis of High Throughput Biological Data
   BPSC/Biol 148 - Quantitative Genetics
   EEOB 214 - Evolutionary Genetics
   EEOB 216 - Theory of Evolution
   ENTX 204 - Genome Maintenance and Stability
   STAT 100A Introduction to Statistics
   BPSC 234 – Statistical Genomics
   STAT 110 - Biostatistical Methods in Life Sciences
   CS234: Computational Methods for Biomolecular Data
   CS238: Algorithmic Techniques in Computational Biology

Students must select courses with relevant content in consultation with the Designated Emphasis Advisory Committee comprising of three participating faculty including student’s major professor. Students must select courses from at least two different departments. Undergraduate course taken to fulfill the requirement must be accompanied by a 292 course taken in the same quarter with extra work agreed upon by professor and student.

2. BMSC 222 (2 units): Special Topics in Biomedical Sciences with emphasis in Gene expression and regulation. The course will address the research pertaining to the student’s interest and prepare trainees in applying the knowledge of basic principles in regulation of gene expression and bioinformatics data analysis of next generation sequencing approaches. Graded Satisfactory (S) or No Credit (NC)

3. Research Project: students will write a research article on a selected genetics/ bioinformatics/ regulation of gene expression topic. The review will be evaluated by the Designated Emphasis Advisory Committee. It is the committee’s expectation that student will fulfill this component by submitting the review article for the journal publication in a pubmed indexed journal. Successful completion of this review is required for the Designated Emphasis completion.

All requirements for the Designated Emphasis must be satisfied no later than one calendar year from the quarter in which candidate advances to candidacy in their PhD field; a minimum GPA of 3.0 is required for the Designated Emphasis completion.
Major Requirements

1. Lower-division requirements (5 lower-division courses [at least 20 units]):
   a) MCS 001
      Students are required to take MCS 001 and must receive a “C-/above” in this course to declare MCS as their major. The department will consider grade petitions on a case-by-case basis.
   b) Any 3 of the following 7 courses:
      MCS 002, ART 004/MCS 004, MCS 005, MCS 010, MCS 015, MCS 020, AHS 020/
      M 023
   c) One additional course (at least 4 units) from the following:
      ART 006/MCS006, MCS 009/MUS 007, MCS
      015, CPLET 021/MCS021, AST 022/JPN 022/M
      CS 022, GER 045/MCS 042, MCS 043/
      RUSH 045, ITAL 045/MCS 044, FREN 045/
      MCS 045, MCS 046/SPN 046, AST 047/KOR
      047/MCS 047, AST 064/MCS 049/VNM 064,
      CRWIT 066/MCS 066/TFDP 066

2. Upper-division requirements (minimum 9 upper-division courses [at least 36 units]):
   a) 6 upper division MCS courses (strongly recommended to be taken with MCS faculty) chosen from [at least 24 units total]
      MCS 102, ANTH 103/MCS 103, ENGL 104/
      MCS 104, MCS 105, MCS 106, MCS 107,
      MCS 108, MCS 109, MCS 110 (E-Z), MCS
      111, GSST 112/LGBS 112/MCS 112, MCS
      113, CPLET 134/GER 134/JPN 134/MCS 134,
      MCS 115, MCS 116, MCS 117, GER 118 (E-
      Z)/MCS 118 (E-Z), MCS 119 A & MCS 119B,
      MCS 120, MCS 122, GSST 124/MCS 123/
      SEAS 125, MCS 124, LNST 125 (E-Z)/MCS
      125 (E-Z)/SPN 125 (E-Z), CPLET 126/GER
      126/MCS 126, GSST 166/MCS 127, MCS
      128, MCS 129, MCS 130, ART 131/MCS 131,
      MCS 132, MCS 134, ART 135/MCS 135, ART
      136/MCS 136, AHS 136/MCS 137, AHS
      137/MCS 138, AHS 139/MCS 139, MCS
      140, MCS 141/GER 142/CPIT 125/EUR 125,
      MCS 142/SEAS 172/GSST 122, MCS 143
      (E-Z)/LGBS 163 (E-Z)/ENGL 143 (E-Z),
      ENGL 144 (E-Z)/MCS 144 (E-Z)/ENGL145
      (E-Z)/MCS 145 (E-Z), ENGL 146 (E-Z)/MCS
      146 (E-Z), MCS 147, MCS 148, MCS 149,
      ART 150/MCS 150, DNCE 171 (E-Z)/MCS
      151 (E-Z), DNCE 172 (E-Z)/MCS 152 (E-Z),
      DNCE 173 (E-Z)/MCS 153 (E-Z)/MCS
      154 (E-Z)/MCS 155/ART 155, MCS 156
      (E-Z), MCS 157, MCS 158/MCS 159/URST
      159, MCS 160, DNCE 161/MCS 161, DNCE
      162/MCS 162, MCS 163, ART 161/MCS 163,
      MCS 164, MCS 165, MCS 166, MCS 167,
      MCS 168, MCS 169, MCS 170, MCS 171,
      MCS 172, MCS 173 (E-Z)/MCS 174 (E-Z),
      MCS 175, MCS 176, MCS 177, MCS 178,
      MCS 179, MCS 180, MCS 181, MCS 184,
      MCS 185, MCS 186, MCS 187, MCS 188
   b) 3 elective upper division courses
      [12 units total]. Majors are encouraged to take one production course but it is not required. ART 140, ART 145, ART
      146 (E-Z), ART 155/MCS 155, ART 167,
      ART 168, ART 169 (E-Z), ART 175/MCS1981,
      TFDP 101, TFDP 109, TFDP 132, TFDP 133,
      TFDP 135, TFDP 138, TFDP 143, TFDP
      150, TFDP 156A, TFDP 156B, TFDP 157,
      TFDP 166A, TFDP 166B, TFDP 166C, TFDP 167,
      TFDP 168, TFDP 169
   c) No more than four units of MCS 190 or MCS 193 and a total of four units of MCS 198-I may be applied may
      be applied towards the minimum requirement.

Minor

The Media and Cultural Studies minor provides an interdisciplinary examination of film, video, television, multimedia, visual and digital cultures with a primary emphasis on history and theory and a secondary focus on creative intervention in media environments through production.

A minimum of 24 units (two lower-division courses and four upper-division courses) are required.

1. Lower-division requirements (2 lower-division courses [at least 8 units]):
   a) MCS 001
      Students are required to take MCS 001 and must receive a “C-/above” in this course to declare MCS as their minor. The department will consider grade petitions on a case-by-case basis.
   b) 1 lower division course chosen from the following
      MCS 002, ART 004/MCS 004, MCS 005, MCS
      010, MCS 015, MCS 020, AHS 020/MCS
      023

2. Upper-division requirements (a minimum of 4 courses [at least 16 units]):
   a) 4 upper division MCS courses (strongly recommended to be taken with MCS faculty) chosen from [at least 16 units]:
      MCS 102, ANTH 103/MCS 103, ENGL 104/
      MCS 104, MCS 105, MCS 106, MCS 107,
      MCS 108, MCS 109, MCS 110 (E-Z), MCS
      111, GSST 112/LGBS 112/MCS 112, MCS
      113, CPLET 134/GER 134/JPN 134/MCS 134,
      MCS 115, MCS 116, MCS 117, GER 118 (E-
      Z)/MCS 118 (E-Z), MCS 119 A & MCS 119B,
      MCS 120, MCS 122, GSST 124/MCS 123/
      SEAS 125, MCS 124, LNST 125 (E-Z)/MCS
      125 (E-Z)/SPN 125 (E-Z), CPLET 126/GER
      126/MCS 126, GSST 166/MCS 127, MCS
      128, MCS 129, MCS 130, ART 131/MCS 131,
      MCS 132, MCS 134, ART 135/MCS 135, ART
      136/MCS 136, AHS 136/MCS 137, AHS
      137/MCS 138, AHS 139/MCS 139, MCS
      140, MCS 141/GER 142/CPIT 125/EUR 125,
      MCS 142/SEAS 172/GSST 122, MCS 143
      (E-Z)/LGBS 163 (E-Z)/ENGL 143 (E-Z),
      ENGL 144 (E-Z)/MCS 144 (E-Z)/ENGL145
      (E-Z)/MCS 145 (E-Z), ENGL 146 (E-Z)/MCS
      146 (E-Z), MCS 147, MCS 148, MCS 149,
      ART 150/MCS 150, DNCE 171 (E-Z)/MCS
      151 (E-Z), DNCE 172 (E-Z)/MCS 152 (E-Z),
      DNCE 173 (E-Z)/MCS 153 (E-Z)/MCS
      154 (E-Z)/MCS 155/ART 155, MCS 156
      (E-Z), MCS 157, MCS 158/MCS 159/URST
      159, MCS 160, DNCE 161/MCS 161, DNCE
      162/MCS 162, MCS 163, ART 161/MCS 163,
      MCS 164, MCS 165, MCS 166, MCS 167,
      MCS 168, MCS 169, MCS 170, MCS 171,
      MCS 172, MCS 173 (E-Z)/MCS 174 (E-Z),
      MCS 175, MCS 176, MCS 177, MCS 178,
      MCS 179, MCS 180, MCS 181, MCS 184,
      MCS 185, MCS 186, MCS 187, MCS 188
b) One media production course (4 units) chosen from the list below may be used towards the total of four upper division courses chosen from:

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

**Lower-Division Courses**

**MCS 001 Introduction to Media and Cultural Studies** 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Examines media from economic, political, and cultural perspectives. Discusses their relation to U.S. export economic, political, and cultural perspectives. Explores the relationships among media, culture, and society and the importance of the economy, politics, public relations, and the role of race and gender in suburbia; suburban sprawl in Southern California; and sustainability and suburban development. Cross-listed with URST 025.

**MCS 002 Introduction to Immersive Media Production** 4 Lecture, 3 hours; workshop, 1 hour; individualized study, 2 hours. Prerequisite(s): MCS 001 with a grade of C- or better; or consent of instructor. Focuses on tools for fast prototyping interactive media. Combines contemporary board and pencil and paper game and card design with computer game design VR, and digital/web production.

**MCS 003 Immersive Media Production** 4 Lecture, 3 hours; workshop, 1 hour; individualized study, 2 hours. Prerequisite(s): MCS 002 with a grade of B- or better; permission of the instructor (auditioned by portfolio); or consent of instructor. Focuses on creative activity. Students with existing expertise in a design field are brought together for a devised project.

**MCS 004 Introduction to Moving Images: Film, Video and New Media** 4 Lecture, 3 hours; studio 3 hours; screening, 3 hours. Prerequisite(s): none. Explores issues and skills of video/film/media art based in production, history, and theory of the moving image. Introduces basic production, editing concepts of video/film/media art based in production, history, and theory of the moving image. Soundtracks, national cinemas, and film movements. Explores the emerging field of digital journalism. Discusses its theoretical, professional, and practical dimensions. Topics include history, technology, political economy, content, and pattern of digital journalism; innovative journalistic practices; and the impact of digital media on contemporary culture, politics, and society.

**MCS 006 Introduction to Contemporary Critical Issues in Art** 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Examines basic principles and methodologies of theory as applied to the interpretation and creation of works of art. Includes screenings. Cross-listed with ART 006.

**MCS 007 Digital Journalism and Society** 4 Lecture, 3 hours; extra reading, 1 hour; written work, 1 hour; term paper, 1 hour. Prerequisite(s): none. Explores the emerging field of digital journalism. Discusses its theoretical, professional, and practical dimensions. Topics include history, technology, political economy, content, and pattern of digital journalism; innovative journalistic practices; and the impact of digital media on contemporary culture, politics, and society.

**MCS 009 Music in Movies and TV** 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An exploration of popular film and TV soundtrack music, emphasizing drama and musical style. Scene study features such films as The Matrix, Casablanca, The X-Files, and Altered States. Cross-listed with MUS 007.

**MCS 010 Cultural Studies: Historical and Contemporary Perspectives** 4 Lecture, 3 hours; discussion, 1 hour. Investigates culture through the frameworks of feminism, Marxism, and race theories. Analyzes the different methodologies cultural critics use to theorize subcultures, cultural policies, and consumption. Explores ways cultural works are not only produced and received but also distributed and circulated within national and transnational contexts.

**MCS 011 Drug Markets as Conformity and Resistance** 4 Lecture, 3 hours; extra reading, 2 hours; term paper, 1 hour; written work, 2 hours. Prerequisite(s): none. Examines the emergence, stability, and decline of illegal drug markets. Analyzes the meanings, behaviors, and interactions of illegal drug market participants. Emphasizes the roles of economic, political, and criminal justice factors in shaping and influencing illegal drug markets.

**MCS 012 Gangs: A Critical Analysis** 4 Lecture, 3 hours; extra reading, 2 hours; term paper, 1 hour; written work, 2 hours. Examines the origins, growth, and decline of gangs. Analyzes the meanings, behaviors, and interactions of gang members within their communities. Emphasizes the importance of the economy, politics, public perceptions, and historical context in shaping and influencing gang formation and structure.

**MCS 015 Introduction to Television Studies** 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to the study of television, including its stylistic conventions, primary genres, modes of production, economics, and important critical methodologies.

**MCS 020 Introduction to Film Studies** 4 Lecture, 3 hours; screening, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to the formal and narrative principles of film construction and to various critical approaches to the cinema, such as auteur and genre theory. Provides an overview of world cinemas.

**MCS 021 Introduction to Film, Literature, and Culture** 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. Surveys critical approaches to the cinema such as auteur and genre theory. Studies literature and film, national cinemas, and film movements. Cross-listed with CPLT 021.

**MCS 022 Introduction to Japanese Film** 4 Lecture, 3 hours; discussion, 1 hour; screening, 2 hours. An introduction to major genres, styles, and creators in the Japanese film world. Focuses on formal analysis and critical writing about film. Works studied range from the samurai epics of Kurosawa to recent anime. All films have subtitles. No previous knowledge of Japanese language or culture required. Cross-listed with AST 022, and JPN 022.

**MCS 023 Introduction to Media Art** 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to the impact of media technology on the visual arts from photography to the Internet. Addresses mechanical reproduction, perception, gender, sexuality, identity, interactivity, cybernetics, and popular culture. Cross-listed with MCS 024.

**MCS 024 World Cinema** 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. Introduction to world cinema as a fusion of national and international, culturally specific, and globally universal characteristics. Topics include realism, the role of world wars, Hollywood’s global reach, alternative aesthetics of third-world cinemas, cross-fertilization between Europe and Asia, and the function of international film festivals and the international film market. Cross-listed with CPTL 024.

**MCS 025 Introduction to the Built Environment: Suburbia** 4 Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours. Introduces the history of suburbia from the Industrial Revolution to the present. Includes the rise of suburbs in England; classic suburbs in the United States; the spread of suburbs and mass transportation; the role of race and gender in suburbia; suburban sprawl in Southern California; and sustainability and suburban development. Cross-listed with URST 025.

**MCS 026 Art of the Synthesizer** 4 Lecture, 3 hours; discussion, 1 hour. Explores the history of synthesizers through the stories of pioneering electronic musicians. Introduces the concepts of modular synthesis through applied patch designs with virtual software. Cross-listed with MUS 026.

**MCS 027 Introduction to Video Game Studies** 4 Lecture, 3 hours; extra reading, 4 hours; written work, 1 hour. Offers an introduction to the critical study of video games. Considers questions about the meaning of play. Explores media form and content including video game representations and media effects on individuals and groups.

**MCS 036 Food in Film** 4 Lecture, 3 hours; discussion, 1 hour; screening, 3 hours. Explores the representation of food, cooking, and restaurant rows from different national traditions. Includes gender roles; sensuality and sexuality; social class and the economics of food; and excess and lack. Cross-listed with CPLT 027.
MCS 038 The Ancient World in Film and Television 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. A study of representations of Greece and Rome in film, television, and other modern media. Introduces these "visual texts" both as popular art forms on their own and in relation to their ancient and modern literary sources. Cross-listed with CLA 045.

MCS 042 Introduction to German Cinema 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. Introduction to the history of German cinema from the advent of the studio system to the present. Covers film in Germany, Switzerland, and Austria. Attention is paid to the work of German-speaking filmmakers living in the parts of the world. Instruction is in English; all films have subtitles. Cross-listed with GER 045.

MCS 043 Soviet Cinema 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. An overview of Soviet cinema, beginning with the film innovations of the 1920s and continuing with representative films from each of the ensuing periods of Soviet culture. All work done in English. Cross-listed with RUSN 045.

MCS 044 Italian Cinema 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. Covers major works of the Italian cinema from Neo-Realism to the present. Emphasizes the historical evolution and representation of major elements of Italian culture. Knowledge of Italian not required. Cross-listed with ITAL 045.

MCS 045 French Cinema 4 Lecture, 3 hours; discussion, 1 hour; screening, 3 hours. Examines the evolution of French cinema from the beginnings to the present. Emphasizes major themes and directors. Considers genre, film techniques, and concepts including social class, gender, race, nationality, and language. Films are subtitled in English and the course taught entirely in English. Cross-listed with FREN 045.

MCS 046 Introduction to Latin American Film 5 Lecture, 3 hours; screening, 3 hours, discussion 1 hour. Prerequisite(s): none. Provides an historical overview of Latin American film production. Introduces students to film industries, revolutionary cinema, the role of television, and recent international co-productions. Cross-listed with SPN 046.

MCS 047 Introduction to Korean Film 4 Lecture, 3 hours; screening, 2 hours; discussion, 1 hour. An introduction to the major directors and films of Korea. Covers the genres and periods of works produced from the 1960s to the present. All films have English subtitles. No previous knowledge of Korean language or culture required. Cross-listed with AST 047, and KOR 047.

MCS 048 Chinese Cinema 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. A study of selected films from China and Taiwan focusing on cultural context. Includes what to look for in these films; the interrelations with theater, photography, and literature; and how these films are understood as an art form. Cross-listed with AST 048, CHN 048, and CPLT 048.

MCS 049 Introduction to Vietnamese and Diasporic Film Culture 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. Engages in critical viewing strategies and analytical visual critique. Explores the revival of film production in Vietnam following the Vietnam War, with a focus on the means of production, state control, and international distribution. Readings are in translation; classes conducted in English. Cross-listed with VNM 064, AST 064, and SEAS 064.

MCS 066 Screenwriting: How Movies Work 4 Lecture, 3 hours; discussion, 1 hour; screening, 8 hours per quarter. Prerequisite(s): none. An Introduction to writing for stage and screen. Addresses structure, character, dialogue, theme, and story. Cross-listed with CRWT 066, and TFDP 066.

MCS 069 The Politics of Public Space 4 Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours. Prerequisite(s): none. Introduces theories and history of public space in modern cities. Topics include public space during the Industrial Revolution; modern urban planning and urban renewal; political uses of public space including demonstrations and occupations; privatization and policing of public spaces; and changing concepts of public and private space in contemporary society. Cross-listed with URST 069.

Upper-Division Courses

MCS 101 Race, Gender, and the Superhero 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the racialization and gendered construction of superheroes across the genres of comics, television, graphic novels, film, animation, Japanese manga and other digital forms. Content may emphasize themes of sustainability, and the history of superheroes in the US and Japan.

MCS 103 Introduction to Visual Anthropology 4 Seminar, 3 hours; individual study, 3 hours; research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W; or consent of instructor. An introduction to the field of visual anthropology. Examines similarities and differences between ethnographic film, critical studies, and written ethnographies. Explores the politics of representing other cultures visually. Cross-listed with ANTH 103, MCS 103, ANTH 103S, or MCS 103S.

MCS 103S Intro to Visual Anthropology 5 Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours; research, 3 hours. Prerequisite(s): ANTH 001 with a grade of C- or better or ANTH 001H with a grade of B or better or ANTH 001W with a grade of C- or better; or consent of instructor. An introduction to the field of visual anthropology. Examines the similarities and differences between ethnographic film, critical studies, and written ethnographies. Explores the politics of representing other cultures visually. Cross-listed with ANTH 103S. Credit is awarded for one of the following ANTH 103, MCS 103, ANTH 103S, or MCS 103S.

MCS 104 Film and Media Theory 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): restricted to class level standing or consent of instructor. Explores different types of film and media theory. Addresses formalist, psychoanalytic, Marxist, feminist, and other approaches to the cinema and other media. Cross-listed with ENGL 104.

MCS 105 Global Communication 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces a variety of theoretical perspectives that inform global communication and media studies. Compares different world media systems. Surveys global media conglomerates and explores global communication in a digital age.

MCS 106 Disability Culture and Media 4 Lecture, 3 hours; extra reading, 1 hour; written work, 1 hour; activity, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Explores disability rights politics and activism through cultural production. Explores access to art production, aesthetics, and disability, and the role of art in social change. Surveys several genres of art production including dance, theatre, language and visual arts, and film and video.

MCS 107 History of Documentary Film 4 Lecture, 3 hours; screening, 3 hours; written work, 2 hours; individualized study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Transnational survey of the documentary film from the silent era to the digital age. Topics include how to define nonfiction cinema; the social issue documentary of the 1930s; Cinéma vérité; propaganda; ethnographic media; the essay film; experimental forms; media activism; re-enactment; and the role of changing technologies.

MCS 108 Electric Earth: Media Ecology Theory Culture 4 Seminar, 3 hours; individualized study, 3 hours. Prerequisite(s): MCS 001 with a grade of C- or better. Introduces media ecology theory and history. Explores key topics, concepts, and issues at the upper-division level. Develops methods for thinking about contemporary media ecology, examining objects such as smart cities, animal technologies, and the media saturated planet. Outside class assignments include readings and conducting individual research and writing projects.

MCS 109 Algorithms and Everyday Life 4 Seminar, 3 hours; individualized study, 3 hours. Prerequisite(s): MCS 005 with a grade of C- or better. Explores technologies including artificial intelligence, Tinder, and Uber to examine cultures of algorithms, data, and code. Explores the use of algorithms to shape futures, govern bodies, advance systemic violence, and conceal injustices. Also addresses the use of data to intervene in these unjust data scapes.

MCS 110 (E-Z) Topics in Film and Media History 4 Lecture, 3 hours; screening, 3 hours. Considers topics in the history of film and media with attention to their aesthetic, socio-political, and economic contexts. J. Film And Media History After World War II.
MCS 111 History of Media Theory 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent from instructor. Provides a historical trajectory of theories of evolving media effects. Explores methods that serve as reference points for mass communication research.

MCS 112 History of Queer Cinema 4 Lecture, 3 hours; screening, 3 hours; activity 2 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the aesthetic hallmarks, political impulses, and theoretical responses that distinguish queer cinema as a unique, important tradition within film history. Provides a historical overview of global, independent, Hollywood, and alternative queer production from the 1960s to the present. Cross-listed with LGBS 112, and GSST 112.

MCS 113 Silent Cinema: Practice and Culture 4 Lecture, 3 hours; discussion, 1 hour; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces early modes of cinema production, distribution, and exhibition. Takes an international perspective in the study of the political economy of silent cinema. Examines silent era cinema and industry.

MCS 114 Cinematic War Memory 4 Lecture, 3 hours; screening, 2 hours; extra reading, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines cinematic confrontations involving World War II in Germany and Japan. Topics include desire between victims and perpetrators, representation of trauma, and ethical responsibility. All screenings have English subtitles. Cross-listed with CPLT 134, GER 134, and JPN 134.

MCS 115 Modern German History Through Film 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores twentieth-century German history through film. Includes World Wars I and II, inflation and polarization of classes, Nazi Germany, representations of the Holocaust, and a divided and reunited Germany. Cross-listed with GER 163, HISE 163, and CPLT 115.

MCS 116 On Networks: Digital Culture, Media, Technology 4 Seminar, 3 hours; workshop, 1 hour; research, 1 hour; individual study, 2 hours. Prerequisite(s): MCS 005. Examines theories, histories, forms, aesthetics, and cultures of the network. Establishes touchpoints of network theory and history and uncovers key topic areas. Addresses how networked life transforms understandings of individuality and concepts of agency and helps foster collective units, propagate contagious affect, and re-organize space and place.

MCS 117 Posthuman Bodies in Science, Media, and Culture 4 Seminar, 3 hours; workshop, 1 hour; research, 1 hour; individual study, 2 hours. Prerequisite(s): MCS 005. Introduces cultures and theories of posthuman media. Examines media technologies, representations, and representative practices in the sciences. Topics include biopolitics, posthumanism, ecocickness, and speculation. Approaches posthuman media studies with perspectives from queer theory, eco-feminist theory, and disability studies.

MCS 118 Topics in German Cinema 4 Lecture, 3 hours; screening, 3 hours. Study of selected films, directors, and movements in German film. Films are in German with English subtitles. No knowledge of German is required. Cross-listed with GER 118 (E-Z).

MCS 118E Weimar Cinema and After 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An investigation of the silent and sound films of the Weimar era, focusing on the works of Fritz Lang, G. W. Pabst, and F. W. Murnau and their impact on film directors such as Werner Herzog and Rainer W. Fassbinder. Includes readings in film theory and in the literature and cultural history of the period. Cross-listed with GER 118E.

MCS 118F The Cinema of Fritz Lang 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. In-depth study of the films of the Austrian-born director Fritz Lang (1890-1976), whose work spans the silent era, the Golden Age of Hollywood, and later. Explores the evolution of film technique, changes in cinematic paradigms, and Lang's engagement with ideology. Cross-listed with GER 118F.

MCS 118G Film and the Holocaust 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the moral, philosophical, and cultural legacy of the Holocaust in documentary and narrative films. Films and selected theoretical and literary texts involve key issues such as truthfulness, politicization, marginalization, universalization, trivialization, abstraction, representation of trauma, abstraction, aestheticization, and testimonies. Cross-listed with GER 118G.

MCS 119A Topics in Memory and Resistance I 4 Lecture, 1 hour; seminar, 1 hour; workshop, 1 hour; research, 3 hours. Prerequisite(s): restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Introduces the theory, methods, ethics, and political stakes of Memory and Resistance work. Offers training in and application of needed media skills including the production of short-form media. Course is repeatable as content or topic changes to a maximum of 8 units.

MCS 119B Topics in Memory and Resistance II 4 Lecture, 1 hour; seminar, 1 hour; workshop, 1 hour; research, 3 hours. Prerequisite(s): MCS 119A; restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Expands upon the conceptual, technical, and creative work completed in previous quarters. Engages in a large-scale collaborative media project with a grassroots organization. Course is repeatable as content or topic changes to a maximum of 8 units.

MCS 120 Major Figures in Film and Media 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Intensive analysis of the work of a significant figure in film, television, or other media who functions as an “auteur” (e.g. an influential director, star, or producer). Course is repeatable as topics change to a maximum of 8 units.

MCS 121 Live-Streaming and Gaming Enthusiography: Online Research Methods 4 Seminar, 3 hours; written work, 2 hours; extra reading, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior. Develops a skill set of online research methods tailored to address questions concerning live-streaming, gaming, and online social media interaction.

MCS 122 Sustainability as the Future of Democracy 5 Lecture, 3 hours; screening, 3 hours; activity, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A critical cultural analysis of the discourses underlying and validating the degradation and destruction of our natural environments, engendering vast income inequalities.

MCS 123 Asian American Women: Writing the Self in Literature and Film 4 Lecture, 3 hours; screening, 1 hour; written work, 1 hour; extra reading, 1 hour. Prerequisite(s): MCS 010, upper-division standing, or consent of instructor. Analyses Asian American autobiographies and films written and directed by women. Explores how the genre of autobiography is enabling and contentious within Asian American women's writings. Examines films to see how such women filmmakers contend with memory, gender, and identity. Cross-listed with GSST 124, and SEAS 175.

MCS 124 Latin America, Democracy, and the Media 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the construct of democracy in Latin America related to various media. Introduces current political and cultural issues in multiple countries. Critically reflects on the concept of democracy and how different social actors understand democracy. Examines the role of media in democratic processes.

MCS 125 (E-Z) Topics in Latin American Film and Media 5 Lecture, 3 hours; extra reading, 3 hours; screening, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Intensive formal, historical, and theoretical analysis of a theme or issue in Latin American film and media. E. Indigenous Video & Latin America. Cross-listed with LHST 125 (E-Z), and SPN 125 (E-Z).

MCS 126 From Novel to Screen: Film Adaptations of German Literature 4 Lecture, 3 hours; screening, 2 hours; individual study, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An introduction to classic works of German literature and their film adaptations. Explores adaptations by film directors such as Welles, Kubrick, Visconti, and Fassbinder. Studies the nexus between literature, film, and theatre. Course conducted in English. Cross-listed with CPLT 126, and GER 126.

MCS 127 Chicana/O Cultural Studies and Gender Politics 4 Lecture, 3 hours; individual study, 1 hour; extra reading, 1 hour; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines the field of Chicana/o cultural studies and investigates the gender politics that attest to its intersectional approach. Considers how power and gendered politics have impacted the restructuring of the split subject in Chicana/o cultural studies. Cross-listed with GSST 166.
MCS 128 Queer of Color Cultural Critique 4
Seminar, 3 hours; project, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores emerging themes in queer of color critique. Includes modes of analysis, subjects, political prioritization, and paradigm shifts. Examines theory and seeks to locate theorizing in multiple sites and forms to encourage and imagine real world applications for cultural critique (including its translation to and from arenas of social justice).

MCS 129 Disney: Producing Race, Gender and Sexuality 4
Lecture, 3 hours; extra reading, 1 hour; written work, 1 hour; activity 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Investigates the articulation of race, gender, sexuality, and class in Disney-based productions. Examines how globalization, capitalism and consumption intersect in the production of race, gender, class, disabilities and sexualities. Considers the relation between the Disney Corporation and cultures as commodities and imperialist corporate politics. Credit is awarded for only one of MCS 129 or MCS 129S.

MCS 129S Disney: Producing Race, Gender and Sexuality 5
Lecture, 3 hours; discussion, 1 hour; extra reading 1 hour; written work, 1 hour; activity, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Investigates the articulation of race, gender, sexuality, and class in Disney-based productions. Examines how globalization, capitalism and consumption intersect in the production of race, gender, class, disabilities and sexualities. Considers the relation between the Disney Corporation and cultures as commodities and imperialist corporate politics. Credit is awarded for only one of MCS 129 or MCS 129S. See the Student Affairs Office in the College of Humanities, Arts, and Social Sciences for breadth requirement information.

MCS 130 Filipino American Culture 4
Seminar, 3 hours; screening, 3 hours. Prerequisite(s): MCS 001. Explores the politics of a range of Filipino American expressive, performative, and creative forms (e.g., Pilipino Culture Night) video, art, fiction, theater, in tandem with the study of theoretical and socio-historical scholarship in the interdisciplinary field of Filipino American Studies. Cross-listed with SEAS 130.

MCS 131 Intermediate Photography and Digital Technology 4
Lecture, 3 hours; laboratory, 4 hours. Prerequisite(s): ART 003 or consent of instructor. Covers the complete cycle of photographic production from scanning to output. Emphasizes developing skill in creating digital photographic imagery for creative and cultural expression. Software and some digital equipment are provided. A 35mm single lens reflex (SLR) or digital cameras and flash drives are required. Course is repeatable to a maximum of 8 units. Cross-listed with ART 131.

MCS 132 Intersections of Media and Popular Culture 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper division standing or consent from instructor Examines the interconnections of media technologies, modes of audience engagement, and the political and economic contexts of audience formation. Focuses on production sites and distribution and consumption of media. Explores how theoretical frameworks converge in the examination of connections between cultural texts and social contexts and between media and society.

MCS 133 Mediating the Anthropocene 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Examines anthropogenic climate change and activism as cultural and media events.

MCS 134 Transmedia: Demonstration Project 4
Lecture, 2 hours; workshop, 1 hour; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces strategies for organizing and presenting materials, ideas, and arguments in various media. Includes visual, written, and audio texts; the spoken word; and performance.

MCS 135 Intermedia: Art, Media, and Culture 4
Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of performance, photography, video, film, television, installation, and other related “intermedias.” Focuses on intermedial artworks and how they are constructed, documented, analyzed, and viewed in the larger context of culture. Cross-listed with ART 135.

MCS 136 Installation and Site-Specific Art 4
Lecture, 3 hours; studio, 3 hours. Prerequisite(s): consent of instructor. Focuses on performance, photo installation, computer art, video/film, site-specific installation, sculpture, and/or other intermedia. Concentrates on production and analysis of site-specific art. Course is repeatable to a maximum of 8 units. Cross-listed with ART 136. Fulfills the Humanities requirement for the College of Humanities, Arts, and Social Sciences.

MCS 137 History of Video Art 4
Lecture, 3 hours; screening, 3 hours. Prerequisite(s): restricted to class level standing of sophomore, junior, or senior. Traces the evolution of video art from the invention of the Portapak and early video collectives to the current ubiquity of video installation, single-channel, and multimedia art. Emphasizes video art in the United States. Cross-listed with AHS 136.

MCS 138 History of Experimental Cinema 4
Lecture, 3 hours; screening, 3 hours. Prerequisite(s): sophomore, junior, or senior standing or consent of instructor. A survey of cinema outside of the economic, institutional, and aesthetic imperatives of mainstream film production. Covers an array of alternative film movements including surrealism and dada, Soviet avant-garde, the Cine 16 Group, French new wave, North American avant-garde, and the artist’s film. Cross-listed with AHS 137.

MCS 139 Mass Media and Popular Culture 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): SOC 001 or SOC 001H. A comparative analysis of the television, radio, record, cinema, and journalism industries as social institutions and a discussion of contemporary developments in mass communications theory. A study of the relationship between the social processes of modern society and the content of popular culture. Cross-listed with SOC 139.

MCS 140 Alternative Media Production and Social Movements 4
Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces the history, theory, and practices of alternative forms of media production. Focuses on how various media forms were used to disseminate information in order to motivate audiences to take action for social change. Provides opportunities to learn documentary making, experiment with media forms, and produce alternative media projects. Course is repeatable as topics change to a maximum of 12 units.

MCS 141 German Fairy Tales: From Brothers Grimm to Hollywood 4
Lecture, 3 hours; screening, 2 hours; written work, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Explores German and European folk and fairy tales from the 18th and 19th centuries, their precursors, and their later variations and receptions in oral, literary, and media cultures of the past and present. Includes their role in American popular culture through adaptations by Disney and Hollywood. Cross-listed with CPLT 125, EUR 125, and GER 125.

MCS 142 Gender in Southeast Asian Diasporic Literature and Film 5
Lecture, 3 hours; screening, 3 hours; written work, 1 hour; extra reading 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on former Indochinese refugees who are producing literature and films in the United States and France. Examines how the perception of Indochina has been constructed, particularly how the region has been gendered female in the colonial imaginary. Explores the return of Southeast Asian immigrants to the Western gaze. Cross-listed with GSST 122, and SEAS 122.

MCS 143 (E-Z) Gender, Sexuality, and Visual Cultures 4
Lecture, 3 hours; screening, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Intensive formal, historical, and theoretical analysis of gender and sexuality in film, television, and visual culture. Cross-listed with ENGL 143 (E-Z), and LGBS 143 (E-Z).

MCS 144 (E-Z) Race, Ethnicity, and Visual Culture 4
Lecture, 3 hours; screening, 3 hours. Intensive formal, historical, and theoretical analysis of race and ethnicity in film, television, and visual culture. Weekly screenings and readings. I. Racial Difference And Visual Culture In The Postcolonial World Context; J. Film, Race, And Ideology: The Case Of The Vietnam War; K. Decolonizing The Screen. Cross-listed with ENGL 144 (E-Z).
MCS 145 (E-Z) Special Topics in Film and Visual Culture 4 Lecture, 3 hours; screening, 3 hours. An intensive formal, historical, and theoretical analysis of a theme or issue in film, media, television, and visual culture. E. Hollywood In The 1960s; F. Television And American Culture; G. Film As Writing And Writing As Film; I. Liberal Hollywood And Social “problems”; J. The Horror Film; K. African American Visual Culture; M. The Male Nude In Photography And Film. Cross-listed with ENGL 145 (E-Z).

MCS 146 (E-Z) Special Topics in Technoculture and Digital Media 4 Lecture, 3 hours; screening, 3 hours. Advanced study of theories and practices of reader and audience interaction with technologies of cultural production in general and digital media in particular. Includes praxis-oriented composition or research. Cross-listed with ENGL 146 (E-Z).

MCS 147 Visual Culture and Afrofuturism 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the cultural production spaces of previous called Afrofuturism and the history of the black speculative arts. Includes how the speculative affects representations of race and blackness in literature, visual culture, and music.

MCS 148 Bodies in Motion: Cinema as Choreography 4 Lecture, 3 hours; discussion, 1 hour; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduction of cinema as a kind of choreography. Examines how it sets bodies in motion both on and in front of the screen. Considers some of the ways bodily movement was understood philosophically, scientifically, and bureaucratically at the moment cinema emerged.

MCS 149 Between the Panels: Introduction to United States and Identity in Visual Culture 4 Lecture, 3 hours; extra reading, 2 hours; activity, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the history of the medium of comics in the United States. It will also examine the tensions between the mainstream focus of comics and graphic novels represented via the superhero genre and the alternatively diverse narratives that are afforded through the medium.

MCS 150 Intermediate Moving Images: Film Video and New Media 5 Lecture, 3 hours; studio, 3 hours; screening, 3 hours. Prerequisite(s): ART 004/MCS 004. Examines the moving image through installation, documentary, experimental film, video art, sound art, and performance. Builds upon production and editing concepts introduced in ART 004/MCS 004. Explores issues and skills of video/film/media art based in production, history, and theory of the moving image. Covers editing theory, lighting, and sound editing. Course is repeatable to a maximum of 10 units. Cross-listed with ART 150.

MCS 151 (E-Z) Filmic Bodies 4 For hours and prerequisites, see segment descriptions. Assesses a multiplicity of filmic genres through the portals of the dancing and mobilized body as related to race, gender, class, and other identifiers. Explores the politics of movement on film, the mechanics of making film work, and the political economy of dance on film. Dance experience is usually not required. Course is repeatable to a maximum of units. Cross-listed with DNCE 171 (E-Z).

MCS 151F Ethnographic Representation of Dance On Film: “. . . and Then They Danced 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Analyzes the juncture between representation and presentation in everyday dance genres on film. Explores race, class, tropes of authenticity, and ownership of cultural production through screenings, lectures, and theoretical writings. No previous dance experience required. Course is repeatable. Cross-listed with DNCE 171F.

MCS 151G Gender, Mechanization, and Shape 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Utilizes film, video, and texts to examine the relationship among gender, mechanism, and shape during the twentieth century. Focuses on the performing arts, industrial and technological design, and the relationship of visual culture to changing notions of gender. Course is repeatable. Cross-listed with DNCE171G.

MCS 151J Spectatorship 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the nature of film studies through the eyes of the audience. Uses film, videos, and texts (in addition to outside viewing of films in cinematic locales) to formulate how viewing film constructs the viewer’s subjectivity and a film’s cultural context. Course is repeatable. Cross-listed with DNCE 171J.

MCS 151K Attractions, Interruptions, Disruptions: Narrative Film: Fight Scenes, Dance Sequences, Special Effects 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Analyzes the way film regulates the movement of bodies on and off screen through narrative and what happens when the movement exceeds that regulation. Utilizes selected films to explore the fight scenes, dance sequences, and computer generated imagery in film. Includes screenings both in class and outside of class. Course is repeatable. Cross-listed with DNCE 171K.

MCS 151M Bollywood 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of the vast corpus of films that constitute the genre called Bollywood. Focuses on the genre’s music and dance styles. Includes weekly film screenings. No previous dance experience required. Course is repeatable. Cross-listed with DNCE 171M.

MCS 152 (E-Z) Televsual Bodies 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Analyzes choreographic practices within television broadcast and marketing and their relation to popular culture. Also examines situational or tactical use and misuse of satellite, cablecast, and broadcast television by unintentional audiences that subsequently reconstitute themselves as communities via the programming. Focuses on video as an archival and/or choreographic tool. J. Corporations And Corporalities: Commodities, Culture, And Choreography; K. Television As Location: The Satellite Feed; M. Music Television (MTV) And Popular Culture. Course is repeatable to a maximum of units. Cross-listed with DNCE 172 (E-Z).

MCS 153 (E-Z) Digitized Bodies 4 Lecture, 3 hours; laboratory, 3 hours; screening, 1 hour. Prerequisite(s): MCS 020; restricted to class level standing of junior, or senior. Provides a theoretical approach to digital subjectivities, bodies in motion, products, and realities. Addresses issues of liveness, new media, mediated cultural identities, speed, transfer, telepresence, and coded and encoded sexualinity within programming. Focuses primarily on the body-computer interface. J. Digital Games, Violence, And The Body; K. Virtual Subjectivity: Persona, Identity, And Body. Course is repeatable to a maximum of units. Cross-listed with DNCE 173 (E-Z).

MCS 154 Media, Gender, and Violence 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines media representations of women and violence. Topics include feminist and queer theory, pornography, sexual violence, state violence, censorship, militarization, policing, and intersections with race, ethnicity, class, sexualities, and citizenship. Analyzes cinema, television, video gaming, digital print, and other visual and acoustic media. Course repeatable as topics change to a maximum of 12 units.

MCS 155 Advanced Moving Images: Film, Video and New Media 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): ART 150/MCS 150. Expands on skills introduced in ART 150/MCS 150. Explores issues and skills connected with video/film/media art based on the production, history, and theory of the moving image. Covers recording, editing theory, lighting, and sound mixing. Examines time-based media through installation, documentary, experimental film, video art, sound art, and performance. Course is repeatable to a maximum of 12 units. Cross-listed with ART 155.

MCS 156 (E-Z) South Asian Media and Cultures 4 Lecture, 3 hours; screening, 3 hours. Explores the construction of various South Asian media. Considers confluence of new technologies of production and distribution, as well as the liberalization and globalization of different economies and social structures. E. Bollywood.
MCS 157 Afrofuturism & the Visual Cultures of Horror 4 Lecture, 3 hours; activity, 1 hour; extra reading, 2 hours. Prerequisite(s): MCS 001, may be taken concurrently; or consent of instructor. An introduction to the trope of the grotesque and the myriad societal fears regarding what the monster symbolizes in visual mediations of the horror genre. Analyzes the tensions between the imaginings of the monstrous and how identity is constructed and consumed.

MCS 158 Afrofuturism and the Politics of the Black Superhero 4 Lecture, 3 hours; extra reading, 2 hours; activity, 1 hour. Prerequisite(s): MCS 001, may be taken concurrently; or consent of instructor. This course deals with the political aspects of the superhero genre and its historical tensions with representations of black characters. It also deals with how black superheroes speak to the cultural production system called Afrofuturism and its inherent celebration of agency regarding black subjectivity in the comics medium.

MCS 159 Race, Space, and Identity 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Examines the intersection of race, space, and identity in modern and contemporary culture. Explores the critical and constitutive importance of race in the built environment. Topics include the racialization of space; colonialism and colonial cities; expositions and world’s fairs; segregation; race and the canon; decolonization; and urban renewal. Cross-listed with URST 159.

MCS 160 Race, State Violence, and Incarceration in the United States 4 Lecture, 3 hours; individual study, 6 hours; research, 1 hour; term paper, 2 hours. Prerequisite(s): MCS 010 with a grade of C- or better; or consent of instructor. Course offers a historical, analytical, and theoretical examination of the cultural formation of criminalization and incarceration in the United States. Contextualizes the US carceral regime’s roots in the cultural-political structures of racial chattel slavery, land conquest, settler colonization, and the statecraft of anti-black violence.

MCS 161 Choreographing the Screen 4 Lecture, 3 hours; screening, 2 hours; term paper, 1 hour. Prerequisite(s): DNCE 019 (may be taken concurrently) or consent of instructor. Focuses on choreographing for the camera and the screen. Topics include video art, classic film choreography, music video, and digital dance technologies. Students prepare a choreographic piece for the camera as a final project. Cross-listed with DNCE 161.

MCS 162 Tool, Technique, Technique 4 Lecture, 3 hours; screening, 3 hours; laboratory, 3 hours. Prerequisite(s): DNCE 019 or MCS 019 or consent of instructor. Practicum in video and digital production with an emphasis on capturing and editing the moving body. Students are encouraged to bring their own video or digital recording device. Editing equipment will be available. Cross-listed with DNCE 162.

MCS 163 Special Topics in Art Criticism and Theory 4 Seminar, 3 hours; activity, 3 hours. Prerequisite(s): MCS 001 with a grade of C- or better or ART 160 with a grade of C- or better; restricted to class level standing of junior, or senior; or consent of instructor. Advanced topics in contemporary art theory and criticism. Examines the reception, analysis, and theoretical underpinning of works of art in relation to contemporary and historical issues in the visual arts. Course is repeatable to a maximum of 12 units. Cross-listed with ART 161.

MCS 164 Digital Media and Participatory Citizenship 4 Workshop 3 project, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A critical analysis of the new media environment. Explores options of operating as producers of culture. Includes design of an innovative intervention for circulation in the evolving digital media environment, as well as evaluation of its contribution and possible impact. Course is repeatable with consent of department or as topics change to a maximum of 12 units.

MCS 165 The Queer 1980s 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): MCS 001. An examination of film, video, print media, music, and other expressive forms from the U.S. and the United Kingdom during the 1980s. Considers how the Reagan/Thatcher era and the emergence of the AIDS pandemic gave rise to various forms of activism leading to the development of queer studies.

MCS 166 Punk and Post-Punk Cultures 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): MCS 010; or the consent of instructor. Examination of the history and politics of punk and post-punk cultures from the United States and Great Britain since the mid-1970s. Assesses the impact and enduring appeal of punk and post-punk attitudes and aesthetics across the Atlantic divide through music, fashion, film, and other expressive forms.

MCS 168 Hong Kong Cinema: Gender, Genre, and the “New Wave” 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): MCS 020 or upper-division standing or consent of instructor. Examines contemporary Hong Kong films, specifically the “New Wave” genre. Particular focus is on the sociopolitical conditions of Hong Kong and its relations with Great Britain and China, the linkages of which set the stage for the films and thematic concerns. Cross-listed with AST 186.

MCS 169 New Chinese Cinema 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): MCS 020, upper-division standing or consent of instructor. A study of representative films from the People’s Republic of China, with a focus on those made during the last decade. Conducted in English; most films have English subtitles. Cross-listed with AST 185, and CHN 185.

MCS 170 Senior Seminar On the Anthropocene 5 Seminar, 3 hours; field, 3 hours; writing work, 3 hours. Prerequisite(s): MCS 108, MCS 109, MCS 122, MCS 140, MCS 163, MCS 177; or equivalent; restricted to class level standing of senior; restricted to major(s) Media and Cultural Studies; prior research and/or course work on sustainability, climate change, media or art production; and consent of instructor. Explores anthropogenic climate change.

MCS 171 Reel to Real: Latin American Film and Social Change 4 Seminar, 3 hours; screening, 3 hours. Prerequisite(s): SPN 110. Introduces Latin American film as it articulates with contemporary history and current events. Cross-listed with SPN 171.

MCS 172 Topics in Film and Media Genres 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Topics may include study of a specific film or media genre; comparative genre studies (including a survey of the history and theory of two or more genres); or analysis of the concept of genre in film and media studies. Each segment is repeatable as its content changes to a maximum of 8 units.

MCS 173 (E-Z) International Cinemas 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Considers non-Hollywood cinemas in the national, historical, political, and cultural contexts which produced them. E. Experimental And Avant-garde Film; F. French New Wave; G. New German Cinema; I. Italian Neorealism; M. Global Chinese Martial Arts Cinema; T. Third World Cinema; U. Global Perspective On The Vietnam War. Cross-listed with CPLT 173 (E-Z).

MCS 174 (E-Z) Comparative Studies in Film 4 Lecture, 3 hours; screening, 3 hours. Considers film in the context of the other arts. Compares the treatment of various themes or problems in film and other media. E. Film & Literature Avant-garde. Cross-listed with CPLT 174 (E-Z).

MCS 175 Human and Nonhuman: Decolonial and Audiovisual Perspectives On Life On A Diminished Planet 4 Seminar, 3 hours; screening, 2 hours; written work, 1 hour; extra reading, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior. A study of decolonial and audiovisual approaches to conceiving human/nonhuman from Latin American perspectives. Examines issues of extractivism, environmental justice, the debate on living well, the relation between human and nonhuman, and how films make these issues.

MCS 176 The Holocaust in Literature, Film and Culture 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Examines the Shoah, the Hebrew term for the World War II genocide also known as The Holocaust. Reviews texts in multiple genres and media from Europe and Asia. Topics include the following: Resistance and Collaboration; the Role of Women; Hidden Children; The Yellow Star; Concentration Camps; Trauma; and Spectacle. Cross-listed with CPLT 176.

475
MCS 177 Indigenous Media 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines and compares the strategies indigenous videomakers use to counter the imperial gaze of cinema. Discusses possibilities for turning the art form of capitalism and colonialism into a tool for decolonization.

MCS 178 Berlin Metropolis in Literature, Film, Music, and Art 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): Restricted to class level standing of sophomore, junior, or senior; or consent of instructor. An introduction to the metropolis Berlin as a gateway between the East and West. Explores topography of the city through film, art, music, and literary texts. Considers Berlin's dramatic transformations as a microcosm of Germany and Europe's troubled history in the twentieth century. Course conducted in English. Cross-listed with AHS 120, CPLT 111, EUR 120, and GER 111.

MCS 179 Gender, Media, and Latin America 5 Lecture, 3 hours; screening 3 hours; research 3 hours. Prerequisite(s): MCS 020 or upper-division standing or consent of instructor. Explores the way Latin Americans have thought of and represented gender across a variety of media including essays, film, novel, short story, and performance. Compares the possibilities and limitations of these media for representing gender in the Latin American context. Cross-listed with LNST 109, SPN 179, and GSST 179.

MCS 180 Japanese Documentary 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Studies the history of Japanese documentary cinema. Teaches strategies for reading non-fiction visual narrative. Explores other forms of documentation controversial in modern Japanese history including oral testimony, photography, and internet activism. Topics may include war, war protest, peace activism, environmental activism, nuclear politics, and green energy. Course is repeatable as topics and instructor change to a maximum of 8 units. Cross-listed with JPN 180, and AST 180.

MCS 181 Existentialism in Literature, Film, and Culture 4 Lecture, 3 hours; screening, 2 hours; outside research, .5 hours; term paper, 5 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the Existentialist movement in literature, film, and culture. Texts range from essays, plays, and novels to documentary and fiction film. Topics include choice, subjectivity, and alienation. Cross-listed with FREN 181, and CPLT 181.

MCS 182 Topics in Television Genres 4 Lecture, 3 hours; screening, 3 hours; extra reading, 3 hours; written work, 3 hours. Prerequisite(s): MCS 015. An in-depth analysis of a selected television genre. May include history of the upper-division genre, or upper-division time periods, or may focus on a specific time period. Combines screenings of episodes and scholarly readings about the medium. Topics include aesthetics, political economy, and cultural critique. Course is repeatable as content or topic changes to a maximum of 8 units.

MCS 183 Special Topics in Television Culture 4 Lecture, 3 hours; written work, 3 hours; screening, 3 hours; extra reading, 3 hours. Prerequisite(s): MCS 015; or equivalent. Provides comprehensive introduction to a particular debate in television studies. Combines screenings of episodes with scholarly reading. Selected topic will vary with each offering. Topics include politics of representation; broadcast, cable, and streaming an in-depth analysis of a specific series. Combines historical with aesthetic approaches. Course is repeatable as content or topic changes to a maximum of 8 units.

MCS 184 Japanese Media and Cultural Studies 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Investigates Japanese media and culture including film, television, video games, manga (comics), anime, music, and print and digital media. Analyzes the function of media relating to issues of national identity, imperial culture, collective memory, and censorship. Includes transnational circulation of Japanese cultural forms, alternative media, and historical changes in technologies. Cross-listed with AST 184, and JPN 184.

MCS 185 Imagining the Nation: Film and Media in Latin America 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): MCS 020 or upper-division standing or consent of instructor. Study of the role of media and film in creating a national imaginary in Latin America. Focus is on one region or nation—such as the Andes, the Caribbean, Mexico, Argentina, or Chile—relating local history to the global context. Course is repeatable as topics change to a maximum of 8 units. Cross-listed with LNST 105, and SPN 185.

MCS 186 Media and Movements: Film, Video, Photography, and the Visual Arts 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on key cultural movements or developments in global arts over the past century. Provides a thematic history of the avant-garde and experimental arts including painting, sculpture, photography, video, film, performance, installation, and new media art. Cross-listed with AHS 186. Fulfills the Humanities requirement for the College of Humanities, Arts, and Social Sciences.

MCS 187 Theorizing New Media 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing, consent of instructor. Approaches new media through its archaeology. Introduces theories of media and mediation, focusing on digital media and networked society. Draws from classic theory and from contemporary activist practice. See the Student Affairs Office in the College of Humanities, Arts, and Social Sciences for breadth requirement information.

MCS 188 Media & Militarism 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Studies the function and effects of militarism and media. Includes how militarism is represented through various media genres such as cinema, television, advertising, documentary films, video games, digital, and new media. Explores its intersection with gender, race, class, religion, and nation. Fulfills the Humanities requirement for the College of Humanities, Arts, and Social Sciences.

MCS 189 Political Culture of Race and Policing: Domestic Warfare, Counter-insurgency, and Abolition 4 Lecture, 3 hours; individual study, 2 hours; written work, 1 hour. Prerequisite(s): MCS 010; or consent of instructor. Introduces a critical, analytical, and theoretical approach to the culture of modern police and policing focusing on the United States. Lectures and course assignments examine how the cultures of law-and-order and domestic warfare normalize antiblack, racist, and colonial state violence.

MCS 190 Special Studies 1 to 5 Consultation, 1 hour; individual study, 3 to 12 hours; term paper or project, 1-3 hours. Prerequisite(s): upper-division standing; consent of instructor and program chair. Faculty-driven individual study to meet special curricular needs. Requires a final paper or creative project. Course is repeatable to a maximum of 15 units.

MCS 192 Junior Seminar 1 to 4 Seminar, 3 hours; activity, 3 hours. Prerequisite(s): MCS 001, MCS 010; restricted to class level standing of junior, or senior; restricted to major(s) Media and Cultural Studies; or consent of instructor. Critical study, practice, and assessment of cultural studies research methods. Course is repeatable to a maximum of 8 units.

MCS 193 Senior Seminar 4 Seminar, 3 hours; project, 3 hours. Prerequisite(s): senior standing or consent of instructor. Advanced research in various fields of faculty interest. Includes completion of a research paper and a class presentation of its contents. Topics vary from year to year. Course is repeatable to a maximum of 8 units. Fulfills the Humanities requirement for the College of Humanities, Arts, and Social Sciences.

MCS 198 R'Course: Variable Topics 1 Activity hours vary per R’Course proposal. Prerequisite(s): permission needed from department; sophomore standing or better. An opportunity for UCR undergraduate students to develop leadership skills, innovate the undergraduate curriculum, and promote democratic, experiential education. Original course topics are variable and unique from other departmental course offerings, designed to highlight the student facilitators’ expertise while working closely with a faculty mentor. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as topics change to a maximum of 8 units.
MCS 198I Individual Internship in Media and Cultural Studies 1 to 12 Consultation, 1 to 3 hours; internship, 1 to 12 hours; individual study 1 to 6 hours; term paper, 1 to 3 hours; written work, 2 to 6 hours. Prerequisite(s): upper-division standing; consent of instructor and the Media and Cultural Studies Chair. An internship in a professional organization or with an individual to gain skills and experience for a career in visual media. Requires the writing of reports, final paper, or the making of a creative project. Course is repeatable to a maximum of 16 units. Fulfills the Humanities requirement for the College of Humanities, Arts, and Social Sciences.

Graduate Courses

MCS 201 Racial-Colonial (state) Violence 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Provides an intensive theoretical engagement with the structural, conceptual, and material regimes of gendered racist violence in the hegemonic modern North American period. Focuses on how state and extra-state violence constitute and are constituted by gendered racism as a singular regime of social ordering.

MCS 202 Special Topics in Television Culture 4 Seminar, 3 hours; extra reading, 20 hours per quarter; term paper, 40 hours per quarter. Prerequisite(s): graduate standing; or consent of instructor. Intensive research in television studies. Includes screenings of series and readings in the scholarly tradition. Combines history of the medium, orientation to the field’s critical terms and techniques, and analysis of aesthetic practices. Prepares for conducting independent research in the field using multiple methods. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 8 units.

MCS 278 Seminar in Minority Discourse 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Intensive study and research in cultural traditions formerly excluded from literary history, such as African American, Asian American, Chicano, and Native American. Includes cross-cultural studies in the representations of such marginalized groups. Topics may include the African American novel; border culture; nineteenth-century Black bodies; oral history, and literature. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content or topic changes. Cross-listed with ENGL 278.

MCS 280 Colloquium in Book, Archive and Manuscript Studies 2 Colloquium, 2 hours. Prerequisite(s): graduate standing. Addresses current research topics pertaining to the program in designated emphasis. Includes events conducted both on and off campus. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

MCS 290 Directed Studies 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor and department chair. A directed studies course designed to address special curricular problems. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade if specialized topics are studied. Course is repeatable.

MCS 292 Concurrent Analytical Studies in Media and Cultural Studies 1 to 4 Research, 3 to 12 hours. Prerequisite(s): graduate standing; consent of instructor and graduate advisor. To be taken concurrently with a 100-series course, but on an individual basis. Limited to research, criticism, and written work. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade if specialized topics are studied. Course is repeatable.

Professional Course

MCS 302 Teaching Practicum 1 to 4 Practicum, 3 to 12 hours. Prerequisite(s): appointment as a teaching assistant; graduate standing. Supervised teaching in undergraduate Media and Cultural Studies courses. Required for all Media and Cultural Studies teaching assistants. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 4 units.

Medical and Health Humanities Designated Emphasis

College of Humanities, Arts, and Social Sciences

Juliet McMullin (Anthropology), Director juliet.mcmullin@ucr.edu

Advisory Committee & Participating Faculty

Emily Rapp Black (Creative Writing) Lucille Chia (History) Allison Hedge Coke (Creative Writing) William Dunlop (Psychology) María Regina Firmino-Castillo (Dance) Katie Ford (Creative Writing) Kimberly Guerrero (Theater, Film, and Digital Production) Rickerby Hinds (Theater and Film Studies) Tamara Ho (Gender & Sexuality Studies) Agnieszka Jaworska (Philosophy) Gloria Chan-Sook Kim (Media & Culture Studies) Matthew King (Religious Studies) Jeanette Kohl (Art History) Antoine Lentacker (History) Goldbery Long (Creative Writing) Luis Lara Malvacias (Dance) Carla Mazzio (English) Allison Merlin (Theater, Film, and Digital Production) Yolanda Moses (Anthropology) Worku Nida (Anthropology) Dana Simmons (History) Annika Speer (Theater, Film, and Digital Production) Jennifer Syvertsen (Anthropology) Chikako Takeshita (Gender and Sexuality Studies) Clifford Trafer (History) Sherryl Vint (English and Media and Culture Studies) Fusion Wang (English) NiJa Whitson (Dance) Brigham C. Willis (Pediatrics, School of Medicine) Susan Zieger (English)

Designated Emphasis Requirements

The Designated Emphasis is a 16-unit interdisciplinary graduate course of study, requiring students to demonstrate focused coursework and research in the field. Two of the four required courses, if otherwise eligible, may count towards the student’s Ph.D. requirements. There are two core requirements:

1. Four (4) graduate courses (16 units). Students will only be allowed to take one (1) undergraduate qualified course paired with a 292 in this DE. These courses must be taken in at least two different departments: ANTH 261, ANTH 262, ANTH 265, ANTH 281, CWPA 210, CWPA 279, CWPA 285, DNCE 254, DNCE 257, ENGL 247, ENGL 273, ENGL 274, ENGL 278, ETST 201, ETST 221, ETST 222, HIST 230, HIST 238, PHI 261, PHI 283, PSYC 225, PSYC 255, PSYC 262, RSLT 224.

2. Submission of a research portfolio within one year after the quarter in which the student advances to candidacy. The portfolio will be reviewed by a standing committee of the Medical and Health Humanities faculty, will demonstrate significant research in the field, include two research papers (one research paper must be the product of one of the 4 unit qualifying courses) and syllabi from the four completed courses. The student will also submit a self-statement (of no more than 1000 words) articulating their particular research emphasis and expertise, and one Medical and Health Humanities syllabus created by student.

All requirements for the Designated Emphasis must be satisfied within one year after the quarter in which a student advances to candidacy in their Ph.D. field; a minimum GPA of 3.0 is required for the award of the Designated Emphasis.
**Medical and Health Humanities Studies Minor**

### 1. Requirements (20 Units)

- **a)** Four (4) units from MHHS 001
- **b)** Twelve (12) additional units, selected from the following streams. Students must take at least Four (4) units from two of the three groups.

#### STREAM ONE: Science and Medicine.
- GSST 183; GSST 167; GSST 161S; GSST 171; GSST 189; HIST 106

#### STREAM TWO: Society, Culture and Health.
- ANTH 133; ANTH 160; ANTH 162; ANTH 166; ENGL 122Q; ENGL 141M; GSST 185; HISA 147/ETST 116; HIST 107; HIST 188E/AST188E; PHIL 112, PHIL 167, PHIL 168; RLST 110; RLST 122

#### STREAM THREE: Arts in Wellness.
- CRWT 130; CRWT 134; CRWT 150; CRWT 155; CRWT 170; CRWT 176; DNCE 115E; DNCE 115G; DNCE 133; DNCE 134; DNCE 181; MCS 106; MCS 135/ART135; TFDP 122; TFDP 156; TFDP 191T
- Four (4) units from MHHS 191

All students must take the introductory course (MHHS 001) and the senior seminar. There is no required order in which elective courses must be taken but credit in MHHS 001 is required for entry into MHHS 191.

Students wishing to earn credit in Stream Three: Arts in Wellness must obtain consent from the instructor and MHHS Chair prior to enrolling in CRWT, DNCE, MCS, or TFDP courses.

See Minors under the College of Humanities, Arts and Social Sciences in the Colleges and Programs for additional information on minors.

### Purpose

The Minor in Medical and Health Humanities Studies (MHHS) at UCR emphasizes the inextricable relationship between the humanities, social sciences, and the arts and their contributions to explicating health, illness, and medicine. This proposal fits within the growing national and international recognition of Medical and Health Humanities in providing students with the skills to perceive, understand, and document diverse human experiences in health and medicine. The three proposed streams; Science and Medicine, Society, Culture, and Health, and Arts in Wellness represent traditional foci in the fields of Medical and Health Humanities and are areas of faculty research and art making at UCR. The Minor will serve as the foundation for students to examine current and historical narratives, discourses, and artistic expressions of health, and emphasizes that health and pathology are not only the domain of medicine and biomedical sciences but also rich topics for interdisciplinary humanities and artistic inquiry. As an interdisciplinary field the our MHHS Minor expands the sites and measures of medicine beyond the clinical encounter. The intentional integration of Humanities, Social Sciences, and Arts is a recognition that medicine is best viewed not as in service or in opposition to the clinical and life sciences, but as generatively enmeshed with a biomedical culture and diverse understandings of what constitutes medicine, health, and wellness.

### Committee in Charge

Carla Mazzio (English), Co-Chair
Fusion Wang (English), Co-Chair

### Supporting Faculty

- Gloria Chan-Sook Kim (Media & Culture Studies)
- Lucille Chia (History)
- Maria Regina Firmado-Castillo (Dance)
- Katie Ford (Creative Writing)
- Kimberly Guerrero (Theater, Film, and Digital Production)
- Allison Hedge Coke (Creative Writing)
- Tamara Ho (Gender & Sexuality Studies)
- Matthew King (Religious Studies)
- Jeanette Kohl (Art History)
- Antoine Lentacker (History)
- Goldbbery Long (Creative Writing)
- Luísa Malvacias (Dance)
- Allison (Bella) Merlin (Theater, Film, and Digital Production)
- Yolanda Moses (Anthropology)
- Worku Nida (Anthropology)
- Jennifer Syvertsen (Anthropology)
- Annika Speer (Theatre, Film, and Digital Production)
- Chiakko Takeshita (Gender & Sexuality Studies)
- Sherryl Vint (English and Media & Culture Studies)
- NíJa Whitson (Dance)
- Susan Zieger (English)

### Lower Division Courses: 4 Units, Lecture, 3 hours; activity, 2 hours; extra reading, 1 hour.

Prerequisite(s): none. Introduces medical and health humanities. Explores the importance of humanities and arts to medicine, the diverse understandings of health and illness, and the complex social and economic forces that inform how people are cared for during times of illness. Mandatory course in the Medical and Health Humanities minor.

### Upper Division Courses: 4 Units, Seminar, 3 hours; activity, 2 hours; extra reading, 0.5 hour; research, 0.5 hour.

Prerequisite(s): MHHS 001 with a grade of C- or better. Examines selected topics in the medical and health humanities from religion, anthropology, literature or history to creative arts. Examines the role of humanities in medicine. Develops skill sets through seminars with medical humanities experts. Mandatory course in the Medical and Health Humanities minor.

### Medical

#### Subject abbrevation: MDC.

#### School of Medicine

#### Division of Biomedical Sciences

#### Division of Clinical Sciences

- Deborah Deas, M.D., M.P.H., Vice Chancellor, Health Sciences; the Mark and Pam Rubin Dean, UCR School of Medicine
- Pablo Joo, M.D. Senior Associate Dean, Clinical Medical Education
- David Lo, M.D., Ph.D. Senior Associate Dean, Research
- Raul Ruiz, M.D. Senior Associate Dean, Community Engagement and Partnerships
- Daniel Teraguchi, Ed.D. Executive Associate Dean, Student Affairs
- Maria Aldana, M.B.A. Associate Dean and Chief Financial & Administrative Officer
- Iryna Ethell, Ph.D. Associate Dean, Academic Affairs
- Rajesh Gulati, M.D. Associate Dean, Graduate Medical Education
- Denise Martinez, M.D. Associate Dean, Diversity, Equity and Inclusion
- Elizabeth Morrison-Banks, M.D. Associate Dean, Medical Education Quality
- Khiet Ngo, D.O., M.S. Associate Dean, Clinical Skills Education and Innovation
- Maurizio Pellecchia, Ph.D., Interim Associate Dean, Pre-clerkship Medical Education
- Joel Purkiss, Ph.D. Associate Dean, Assessment and Evaluation
- Emma Simmons, M.D. Associate Dean, Student Affairs
- Anne VanGarssen, M.D. Associate Dean, Clinical Medical Education
- Linda Reimann, M.B.A. Assistant Dean, Strategic Initiatives and Chief of Staff
- Monica J. Carson, Ph.D. Chair, Division of Biomedical Sciences; S. Sue Johnson Presidential Endowed Chair in Giall-Neuronal Interactions
- Lisa Fortuna, M.D., M.P.H. Chair, Psychiatry and Neuroscience
- Rajesh Gulati, M.D. Interim Chair, Internal Medicine
Asma Jafri, M.D. Chair, Family Medicine
Samar Nahas, M.D. Chair, Obstetrics and Gynecology

UCR School of Medicine
The mission of the UCR School of Medicine is to improve the health of the people of California and, especially, to serve Inland Southern California by training a diverse workforce of physicians and by developing innovative research and health care delivery programs that will improve the health of the medically underserved in the region and become models to be emulated throughout the state and nation.

With its opening in 2013, the UCR School of Medicine became the first new public medical school in California in more than four decades. It is expressly designed to meet the physician
workforce needs in Inland Southern California and to improve the health of people living in the region. The school’s community-based model provides medical students with clinical experiences in a variety of healthcare settings with diverse patient populations.

The UCR School of Medicine seeks students with diverse intellectual and life experiences. The school values broad academic backgrounds that include humanities, foreign language, social sciences and the arts to help prepare future physicians for interacting with increasingly diverse patient populations, health care professionals and colleagues. Each applicant’s complete portfolio will be reviewed carefully in order to select students who are not only academically qualified but who have the breadth of volunteer/community and personal experiences to ensure that they will become physicians well prepared to care for the diverse population in our communities. [somsa.ucr.edu](http://somsa.ucr.edu)

**The Thomas Haider Program** at the UCR School of Medicine is a special program within the school that provides a unique pathway into medical school for UCR students, with up to 24 seats filled by students who attend UCR for at least six consecutive quarters and complete their bachelor’s degree at UCR. [somsa.ucr.edu/haider-program](http://somsa.ucr.edu/haider-program)

All School of Medicine applicants apply to the UCR School of Medicine through the American Medical College Application Service, at [students-residents.aamc.org/applying-medical-school-amcas/applying-medical-school-amcas](http://students-residents.aamc.org/applying-medical-school-amcas/applying-medical-school-amcas), following its guidelines and deadlines. Students may submit their applications at any time during the application period, as early as June (14 months before medical school classes begin in August at UCR) or as late as November 2 (9 months before classes begin). Applications without recent MCAT scores are considered incomplete. Review the application guidelines at [somsa.ucr.edu](http://somsa.ucr.edu).

**The Program in Medical Education (PRIME)** is designed to produce physicians who are specifically trained to address the healthcare needs of the African, Black, and Caribbean (ABC) communities of Inland Southern California. UCR’s PRIME will admit six students annually, who will complete educational and clinical activities that prepare them to provide equitable care to ABC populations. The program begins with a two-week summer immersion program prior to the start of the academic school year. The School of Medicine will partner with ABC clinicians and organizations to allow students to integrate working with ABC populations throughout the course of their medical education. Students will have the option to pursue a master’s degree (e.g., MPH, MPP, MBA, etc.) in the field of their choosing, before completing their final year of medical school. [https://ume.ucr.edu/prime](http://https://ume.ucr.edu/prime)

**Program Prerequisites**

**Pre-medical Education**

The School of Medicine expects candidates to be well prepared to engage curriculum in the basic sciences. Applicants are expected to cover foundational areas to demonstrate the ability to succeed in medical school. Lab course hours do NOT count toward total semester hours.

**Required Science Core**
- Mathematics (8 semester hours) in calculus and/or statistics
- Physics (8 semester hours), labs optional
- General Chemistry, Organic Chemistry, Biochemistry (16 semester hours), labs optional
- Biology (8 semester hours), labs optional

**Recommended Humanities Core**

The School of Medicine seeks to develop the whole Student with curriculum that prepares future physicians to meet the needs of underserved communities. To that end, courses that emphasize culture, ethic, public health, spiritual practices, and other aspects of diversity are recommended. The committee appreciates candidates listing their humanities or social science courses in these subject areas.
- English, Writing, Composition, Logic or Critical Thinking (8 semester hours)
- Humanities/Social Science (8 semester hours)
- Spanish (3 semester hours)

**Completion of Requirements**

Students must complete all premedical requirements before beginning the first year of medical study. Although these requirements need not be completed at the time application for admission is filed, AP credit with a score of 4 or 5 (or International Baccalaureate score of 6 or 7) can be used to satisfy all subjects.

**Medical College Admission Test (MCAT)**

The MCAT must be taken not later than fall of the year preceding admission to the School of Medicine. If more than one MCAT was taken, all the test grades must be included when making an application. The test must be repeated if, at the time of application, more than three years have elapsed since it was taken. Requests for test reports and all other correspondence and requests for information concerning the administration, processing, and scoring of the MCAT should be directed to the MCAT Program Office.

Additional details regarding application requirements and the admissions process can be found at [somsa.ucr.edu](http://somsa.ucr.edu).

**Academic Advising**

UCR undergraduates receive academic advising from professional staff and faculty of the department or program of their chosen major. Professional staff and peer mentors in the medical school’s Health Professions Advising Center are available to guide students in planning pre-health professions course work, gaining health-related experiences, completing service work and can assist with preparing to apply for admission to graduate and professional programs. **Medical/Professional Courses**

**MDCL 230 Introduction to Prime Program 1**

Lecture, 3 hours; discussion, 2 hours. Pre-requisite(s): restricted to major(s) Medicine, Medicine-Prime; and consent of instructor. Introduces PRIME candidates to the overall expectations and requirements of the program. Course duration is two weeks. Pass/Fail

**MDCL 231 Foundations of Medicine 1 10.5**

Lecture, 67.5 hours per quarter; discussion, 30 hours per quarter; laboratory, 20.5 hours per quarter; clinic, 15 hours per quarter. Prerequisite(s): restricted to major(s) Medicine, Medicine-Prime. Covers basic principles of disease processes, genetics, and molecular, cellular, and development biology. Instruction is driven by cases and accomplished through lectures and discovery in small group discussions, laboratories, and conferences. Also covers aspects of anatomy, doctoring, case-based learning, patient examination, and the longitudinal ambulatory clinical experience. Graded In Progress (IP) until MDCL 231, MDCL 232, MDCL 233, MDCL 234 and MDCL 235 are completed, at which time a final grade is assigned. Credit is awarded for one of the following MDCL 231, BMSC 223E, BMSC 229, or BMSC 231.

**MDCL 232 Cardiovascular, Renal and Respiratory Sciences 1 17.5**

Lecture, 113 hours per quarter; discussion, 45 hours per quarter; laboratory, 28 hours per quarter; clinic, 36 hours per quarter. Prerequisite(s): restricted to major(s) Medicine, Medicine-Prime. Covers physiology, pathophysiology, physical diagnosis and imaging in the cardiovascular, renal and respiratory sciences. Instruction is driven by cases and accomplished through lectures and discovery in small group discussions, laboratories, and conferences. Also covers aspects of anatomy, doctoring, case-based learning, patient examination, and the longitudinal ambulatory clinical experience. Graded In Progress (IP) until MDCL 231, MDCL 232, MDCL 233, MDCL 234 and MDCL 235 are completed, at which time a final grade is assigned. Credit is awarded for one of the following MDCL 232, BMSC 223F, BMSC 223G, BMSC 223I, or BMSC 232.

**MDCL 233 Gastrointestinal, Endocrine and Reproductive Health I 14**

Lecture, 94 hours per quarter; discussion, 25 hours per quarter; laboratory, 33 hours per quarter; clinic, 34 hours per quarter. Prerequisite(s): restricted to major(s) Medicine, Medicine-Prime. Covers biochemistry, pathophysiology, physical diagnosis & imaging associated with gastrointestinal, endocrine & reproductive health. Instruction is driven by cases & accomplished through lectures and discovery in small group discussions, laboratories & conferences. Also covers aspects of anatomy, doctoring, case-based learning, patient examination, and the longitudinal ambulatory clinical experience. Graded In Progress (IP) until MDCL 231, MDCL 232, MDCL 233, MDCL 234 and MDCL 235 are completed, at which time a final grade is assigned.
MDCL 234 Musculoskeletal Medicine 8 Lecture, 50 hours per quarter; discussion, 14 hours per quarter; laboratory, 37 hours per quarter; clinic, 15 hours per quarter. Prerequisite(s): restricted to major(s) Medicine, Medicine-Prime. Covers musculoskeletal system, biology & pathology of peripheral nervous system & physical diagnosis. Promotes discovery of learning by small group discussions, laboratories & conferences. Also covers aspects of anatomy, doctoring, case-based learning, patient examination, and the longitudinal ambulatory clinical experience. Pass/Fail.

MDCL 235 Clinical Neurosciences 19 Lecture, 51 hours per quarter; discussion, 24 hours per quarter; laboratory, 33 hours per quarter; clinic, 15 hours per quarter. Prerequisite(s): restricted to major(s) Medicine, Medicine-Prime. Covers neurobiology & provides an introduction to neurology & psychiatry, as well as physical diagnosis & imaging of the nervous system. Promotes discovery of learning by small group discussions, laboratories & conferences. Also covers aspects of anatomy, doctoring, case-based learning, patient examination, and the longitudinal ambulatory clinical experience. Pass/Fail.

MDCL 236 Foundations of Medicine II 14 Lecture, 97 hours per quarter; discussion, 28 hours per quarter; laboratory, 10 hours per quarter; clinic, 42 hours per quarter. Prerequisite(s): restricted to major(s) Medicine, Medicine-Prime; and consent of instructor. Covers pathophysiology, pharmacology, physical diagnosis & treatment of infectious diseases, clinical hematology, oncology, epidemiology & clinical reasoning skills. Utilizes weekly cases presented through lecture, small group discussion & laboratories. Also covers aspects of anatomy, doctoring, patient examination & LACE. Includes problem-based learning. Graded In Progress (IP) until MDCL 236, MDCL 237, MDCL 238, MDCL 239 and MDCL 240 are completed, at which time a final grade of Pass is assigned. Credit is awarded for one of the following MDCL 236 or BMSC 236.

MDCL 237 Cardio, Renal & Resp Sciences II 12 Lecture, 62 hours per quarter; discussion, 44 hours per quarter; laboratory, 36 hours per quarter; clinic, 33 hours per quarter. Prerequisite(s): restricted to major(s) Medicine, Medicine-Prime; and consent of instructor. Advanced clinical perspective of anatomy, physiology, cardiology, physical diagnosis & imaging in the cardiovascular, renal & respiratory sciences. Utilizes weekly cases presented through lecture, small group discussions, laboratories & conferences. Also covers aspects of anatomy, doctoring, patient examination & LACE. Includes problem-based learning. Graded In Progress (IP) until MDCL 236, MDCL 237, MDCL 238, MDCL 239 and MDCL 240 are completed, at which time a final grade is assigned.

MDCL 238 Gastrointestinal, Endocrine and Reproductive Health II 13 Lecture, 80 hours per quarter; discussion, 34 hours per quarter; laboratory, 18 hours per quarter; clinical 42 hours per quarter. Prerequisite(s): restricted to major(s) Medicine, Medicine-Prime; and consent of instructor. Advanced clinical perspective of anatomy, biochemistry, pathology, physical diagnosis & imaging associated with gastrointestinal, endocrine & reproductive health. Utilizes weekly cases presented through lecture, small group discussions, laboratories & conferences. Also covers aspects of anatomy, doctoring, patient examination & LACE. Includes problem-based learning. Graded In Progress (IP) until MDCL 236, MDCL 237, MDCL 238, MDCL 239 and MDCL 240 are completed, at which time a final grade is assigned.

MDCL 239 Clinical Neurosciences II 10 Lecture, 74 hours per quarter; discussion, 20 hours per quarter; laboratory, 6 hours per quarter; clinical 18 hours per quarter. Prerequisite(s): restricted to major(s) Medicine, Medicine-Prime; and consent of instructor. Covers advanced clinical perspective of neurology, neuropathology, psychiatry & neuropsychopharmacology that is coordinated with physical & psychological clinical skills development. Utilizes weekly cases presented through lecture, small group discussions, laboratories & conferences. Also covers aspects of anatomy, doctoring, patient examination & LACE. Includes problem-based learning. Graded In Progress (IP) until MDCL 236, MDCL 237, MDCL 238, MDCL 239 and MDCL 240 are completed, at which time a final grade is assigned.

MDCL 240 Integrative Human Biology & Disease 3 Discussion, 30 hours per quarter. Prerequisite(s): restricted to major(s) Medicine, Medicine-Prime; and consent of instructor. Reviews concepts of human biology and disease covered in MDCL 231, MDCL 232, MDCL 233, MDCL 234, MDCL 235, MDCL 236, MDCL 237, MDCL 238 and MDCL 239. Prerequisite(s): third year standing in Medical school. Third year required clerkship in Internal Medicine. Part 1 of 2. Graded In Progress (IP) until MDCL 244A and MDCL 244B are completed, at which time a final grade is assigned.

MDCL 241A Internal Medicine I 5 Clinical, 160 hours per quarter. Prerequisite(s): third year standing in Medical school. Third year required clerkship in Internal Medicine. Part 1 of 2. Graded In Progress (IP) until MDCL 241A and MDCL 241B are completed, at which time a final grade is assigned.

MDCL 241B Internal Medicine II 5 Clinical, 160 hours per quarter. Prerequisite(s): third year standing in Medical school. Third year required clerkship in Internal Medicine. Part 2 of 2. Graded In Progress (IP) until MDCL 241A and MDCL 241B are completed, at which time a final grade is assigned.

MDCL 242A Surgery I 5 Clinical, 160 hours per quarter. Prerequisite(s): third year standing in Medical school. Third year required clerkship in Surgery. Part 1 of 2. Graded In Progress (IP) until MDCL 242A and MDCL 242B are completed, at which time a final grade is assigned.

MDCL 242B Surgery II 5 Clinical, 160 hours per quarter. Prerequisite(s): third year standing in Medical school. Third year required clerkship in Surgery. Part 2 of 2. Graded In Progress (IP) until MDCL 242A and MDCL 242B are completed, at which time a final grade is assigned.

MDCL 243A Pediatrics I 4 Clinical, 126 hours per quarter. Prerequisite(s): third year standing in Medical school. Third year required clerkship in Pediatrics. Part 1 of 2. Graded In Progress (IP) until MDCL 243A and MDCL 243B are completed, at which time a final grade is assigned.

MDCL 243B Pediatrics II 4 Clinical, 126 hours per quarter. Prerequisite(s): third year standing in Medical school. Third year required clerkship in Pediatrics. Part 2 of 2. Pass/Fail/Honors.

MDCL 244A Obstetrics/Gynecology I 4 Clinical, 126 hours per quarter. Prerequisite(s): third year standing in Medical school. Third year required clerkship in Obstetrics/Gynecology. Part 1 of 2. Graded In Progress (IP) until MDCL 244A and MDCL 244B are completed, at which time a final grade is assigned.

MDCL 244B Obstetrics/Gynecology II 4 Clinical, 126 hours per quarter. Prerequisite(s): third year standing in Medical school. Third year required clerkship in Obstetrics/Gynecology. Part 2 of 2. Pass/Fail/Honors.

MDCL 245 Family Medicine 5 Clinical, 40 hours. Prerequisite(s): restricted to department(s) School of Medicine; restricted to major(s) Medicine; and consent of instructor. Third year required clerkship in Family Medicine. Part 1 of 2. Graded In Progress (IP) until MDCL 245A and MDCL 245B are completed, at which time a final grade is assigned.

MDCL 245B Family Medicine II 4 Clinical, 126 hours per quarter. Prerequisite(s): third year standing in Medical school. Third year required clerkship in Family Medicine. Part 2 of 2. Pass/Fail/Honors.

MDCL 246 Psychiatry 5 Clinic, 40 hours. Prerequisite(s): restricted to department(s) School of Medicine; restricted to major(s) Medicine; and consent of instructor. Third year required clerkship in Psychiatry. Pass/Fail/Honors.

MDCL 246A Psychiatry I 1 Clinical, 44 hours per quarter. Prerequisite(s): third year standing in Medical school. Third year required clerkship in Psychiatry. Part 1 of 4. Graded In Progress (IP) until MDCL 246A, MDCL 246B, MDCL 246C and MDCL 246D are completed, at which time a final grade is assigned.

MDCL 246B Psychiatry II 1 Clinical, 44 hours per quarter. Prerequisite(s): third year standing in Medical school. Third year required clerkship in Psychiatry. Part 2 of 4. Graded In Progress (IP) until MDCL 246A, MDCL 246B, MDCL 246C and MDCL 246D are completed, at which time a final grade is assigned.

MDCL 246C Psychiatry III 1 Clinical, 44 hours per quarter. Prerequisite(s): third year standing in Medical school. Third year required clerkship in Psychiatry. Part 3 of 4. Graded In Progress (IP) until MDCL 246A, MDCL 246B, MDCL 246C and MDCL 246D are completed, at which time a final grade is assigned.
are completed, at which time a final grade is assigned. MDCL 247A, MDCL 247B, MDCL 247C and MDCL 247D are completed, at which time a final grade is assigned.

MDCL 247A Emergency Medicine I Clinical, 36 hours per quarter. Prerequisite(s): third year standing in Medical school. Third year required clerkship in Emergency Medicine. Part 1 of 4. Graded In Progress (IP) until MDCL 247A, MDCL 247B, MDCL 247C and MDCL 247D are completed, at which time a final grade is assigned.

MDCL 247B Emergency Medicine II Clinical, 36 hours per quarter. Prerequisite(s): third year standing in Medical school. Third year required clerkship in Emergency Medicine. Part 1 of 4. Graded In Progress (IP) until MDCL 247A, MDCL 247B, MDCL 247C and MDCL 247D are completed, at which time a final grade is assigned.

MDCL 247C Emergency Medicine III Clinical, 36 hours per quarter. Prerequisite(s): third year standing in Medical school. Third year required clerkship in Emergency Medicine. Part 3 of 4. Graded In Progress (IP) until MDCL 247A, MDCL 247B, MDCL 247C and MDCL 247D are completed, at which time a final grade is assigned.

MDCL 247D Emergency Medicine IV Clinical, 36 hours per quarter. Prerequisite(s): third year standing in Medical school. Third year required clerkship in Emergency Medicine. Part 4 of 4. Pass/Fail/Honors.

MDCL 248A Longitudinal Ambulatory Care Experience I Clinical, 36 hours per quarter. Prerequisite(s): third year standing in Medical school. Third year required clerkship in Longitudinal Ambulatory Care Experience (LACE). Part 1 of 2. Graded In Progress (IP) until MDCL 248A, MDCL 248B, MDCL 248C and MDCL 248D are completed, at which time a final grade is assigned.

MDCL 248B Longitudinal Ambulatory Care Experience II Clinical, 36 hours per quarter. Prerequisite(s): third year standing in Medical school. Third year required clerkship in Longitudinal Ambulatory Care Experience (LACE). Part 2 of 2. Graded In Progress (IP) until MDCL 248A, MDCL 248B, MDCL 248C and MDCL 248D are completed, at which time a final grade is assigned.

MDCL 248C Longitudinal Ambulatory Care Experience III Clinical, 36 hours per quarter. Prerequisite(s): third year standing in Medical school. Third year required clerkship in Longitudinal Ambulatory Care Experience (LACE). Part 3 of 4. Graded In Progress (IP) until MDCL 248A, MDCL 248B, MDCL 248C and MDCL 248D are completed, at which time a final grade is assigned.

MDCL 248D Longitudinal Ambulatory Care Experience IV Clinical, 36 hours per quarter. Prerequisite(s): third year standing in Longitudinal Ambulatory Care Experience (LACE). Third year required clerkship in Emergency Medicine. Part 4 of 4. Pass/Fail/Honors.

MDCL 249 Neurology 2.5 Clinical, 40 hours. Prerequisite(s): restricted to department(s) School of Medicine; restricted to major(s) Medicine; and consent of instructor. Third year required clerkship in Neurology. Pass/Fail/Honors.

MDCL 250 Clinical Sub-Internship 8 Clinical, 240 hours per quarter. Prerequisite(s): fourth year standing in Medical school. Fourth year required sub-internship in one of the following specialties: Family Medicine, Internal Medicine, Pediatrics, Obstetrics/Gynecology, General Surgery, or Psychiatry. Course is repeatable as content/topics change. Pass/Fail/Honors.

MDCL 251 Radiology 8 Clinical, 240 hours per quarter. Prerequisite(s): fourth year standing in medical school. Fourth year required Radiology rotation. Pass/Fail/Honors.

MDCL 252 Critical Care 8 Clinical, 240 hours per quarter. Prerequisite(s): fourth year standing in medical school. Fourth year required Critical Care rotation. Pass/Fail/Honors.

MDCL 253 Transition to Residency 8 Clinical, 240 hours per quarter. Prerequisite(s): restricted to major(s) Medicine. Fourth year required Transition to Clerkship experience. Pass/Fail/Honors.

MDCL 254 Fourth Year Clinical Rotation 8 Clinical, 240 hours per quarter. Prerequisite(s): fourth year standing in medical school. Fourth year required elective rotation. Pass/Fail/Honors.

MDCL 289 Medical Selectives 1 to 3 Lecture, 3 to 9 hours per quarter. Prerequisite(s): restricted to major(s) Medicine, Medicine-Prime. Seminar course presenting various relevant topics in medicine. Content and instructor(s) may vary each time course is offered. Pass/Fail Course is repeatable as content or topic changes.

MDCL 290 Directed Studies 1 to 6 Lecture, 3 to 18 hours per quarter. Prerequisite(s): first or second year standing in medical school. Experimental or literature studies on specifically selected topics under direction of a staff member. Course is repeatable. Pass/Fail.

MDCL 293 Third Year Clinical Electives 1 Clinic, 10 hours per quarter. Prerequisite(s): restricted to major(s) Medicine, Medicine-Prime; and consent of instructor. Third year medical school elective. Course is repeatable as content or topic changes. Pass/Fail/Honors.

MDCL 294D Psychiatry IV Clinical, 44 hours per quarter. Prerequisite(s): third year standing in Medical school. Third year required clerkship in Psychiatry. Part 4 of 4. Pass/Fail/Honors.
Richard Stouthamer, Ph.D. (Entomology)  
Marylynn V. Yates, Ph.D. (Environmental Sciences)

**Associate Professors**  
Emma Aronson, Ph.D. (Microbiology and Plant Pathology)  
Gregor Blaha, Ph.D. (Biochemistry)  
Adler Dillman, Ph.D. (Nematology)  
Xin Ge, Ph.D. (Chemical and Environmental Sciences)  
Juan Pablo Giraldo Gomez, Ph.D. (Botany and Plant Sciences)  
Ansel Hsiao, Ph.D. (Microbiology and Plant Pathology)  
Rong Hai, Ph.D. (Microbiology and Plant Pathology)  
Patricia Manosalva, Ph.D. (Microbiology and Plant Pathology)  
Quinn McFrederick, Ph.D. (Entomology)  
Meera Nair, Ph.D. (School of Medicine)  
James Ng, Ph.D. (Microbiology and Plant Pathology)

**Assistant Professors**  
Patrick Degnan, Ph.D. (Microbiology and Plant Pathology)  
Emma Gachomo, Ph.D. (Microbiology and Plant Pathology)  
Joseph Genevreux, Ph.D. (Chemistry)  
Sydney I. Glassman, Ph.D. (Microbiology and Plant Pathology)  
Robert Jinkerson, Ph.D. (Chemical and Environmental Engineering)  
Yanran Li, Ph.D. (Chemical and Environmental Engineering)  
Yujie Men, Ph.D. (Department of Chemical and Environmental Engineering)  
Juliet Morrison, Ph.D. (Microbiology and Plant Pathology)  
Samantha Ying, Ph.D. (Environmental Sciences)

**Major**

Microorganisms play key roles in ecosystems and human civilization. They can both cause and prevent a wide array of diseases in animals and plants. They are key components in the manufacturing of bread, cheese, and other food products. Microbes are involved in soil formation, global environmental processes and detoxifying contaminated environments. In addition, they contain a wealth of useful compounds and enzymes for biotechnology.

The Microbiology major is unique because it offers research based capstone course (MCBL 125) that trains students to become research scientists. The major also offers many laboratory courses enabling students to obtain highly valuable skills.

Students earning a degree will be prepared to continue studies at the graduate level, earn teaching credentials, or enter professional schools in medicine, pharmacy, optometry, dentistry, veterinary medicine, and clinical laboratory science among others. Students will also be trained for technical careers in medicine, agriculture, biotechnology and environmental fields. For information on how to select elective coursework for specific career paths, visit the CNAS Undergraduate Academic Advising Center.

Students in the Microbiology major can obtain either B.A. or B.A. degrees or both B.S. and M.S. in our combined program. The B.S. degree offers students with a strong interest in the natural sciences an opportunity to emphasize this aspect of their education. The B.A. degree is available to students who wish to obtain a broader background in the humanities and social sciences than is required of students in the B.S. program.

**University Requirements**

See the Undergraduate Studies section for requirements that all students must satisfy.

**College Requirements**

See Degree Requirements, College of Natural and Agricultural Sciences, in the Undergraduate Studies Section, for requirements that students must satisfy.

**Major Requirements**

Some of the following requirements for the Microbiology major may also fulfill the College’s breadth requirements. Consult with an advisor for course planning.

1. **Core Curriculum (72–77 units)**
   - Students must complete all required core curriculum courses with a grade of “C-” or better and with a cumulative GPA in the courses of at least 2.0. Grades of “D” or “F” in two required courses, either separate courses or repetitions of the same course, are grounds for discontinuation from the major.
   - a) BIOL 005A, BIOL 05LA or BIOL 020, BIOL 005B, BIOL 005C
   - b) CHEM 001A and CHEM 01LA or CHEM 01HA and CHEM 01HLA, CHEM 001B and CHEM 01LB or CHEM 01HB and CHEM 01HLC, CHEM 001C and CHEM 01LC or CHEM 01HC and CHEM 01HLC
   - c) CHEM 008A and 08LA or CHEM 08HA and CHEM 8HLA, CHEM 008B and CHEM 08HB and CHEM 8HLB, CHEM 008C and CHEM 08LC or CHEM 08HC and CHEM 8HLC
   - d) PHYS 002A and PHYS 02LA or PHYS 022A and PHYS 02HLA, PHYS 002B and PHYS 02LB or PHYS 022B and PHYS 02HLB, PHYS 002C and PHYS 02LC or PHYS 02HC and PHYS 02HLC, or PHYS 040A, PHYS 040B, PHYS 040C
   - e) MATH 007A or MATH 009A, MATH 007B or MATH 009B
   - f) STAT 010
   - g) BCH 100 or BCH 100H, or BCH 110A or BCH 110A and BCH 110B or BCH 110HB

2. **Upper-Division Requirements (37–38 units)**
   - a) Major Core (19 or 20 units): BIOL 102, BIOL 107A, MCBL 121/Biol 121, MCBL 121L/Biol 121L or MCBL 121S, MCBL 125
   - b) Major Electives. A minimum of 18 units from the following to be selected in consultation with a faculty advisor: BIOL 128/CBNS 128, BIOL 157, BIOL 158, CBNS 101, ENSC 120/NEC 120, MCBL 120/Biol 120/PLPA 120, MCBL 120L/Biol 120L/PLPA 120L, MCBL 122/Biol 122, MCBL 123/Biol 123/PLPA 123, MCBL 124/Biol 124, MCBL 126, MCBL 127, MCBL 128, MCBL 129, MCBL 1907, MCBL 1972, MCBL/ENSC 133, PLPA 134/Biol 134, PLPA 134L/Biol 134L, MCBL 139

3. **Other Requirements**

For the Bachelor of Science degree, an additional 16 units in upper-division microbiology courses and/or substantive courses in a field or fields related to the major. Acceptable courses include BCH 162, BIOL 107B, BIOL 109, BIOL 119, MCBL 198-12; a more complete list of acceptable courses is available at the CNAS Undergraduate Academic Advising Center.

For the Bachelor of Arts degree, the foreign language requirement may be fulfilled by completing level-four coursework or by demonstrating the equivalent proficiency in one foreign language.

Notes:
1. Students may take courses in summer session to (i) reduce the unit load during the normal academic year (ii) complete the degree requirements in less than four years or (iii) enable the acquisition of a minor or double major in four years.
2. No more than 4 units of either MCBL 190 or MCBL 197 can be applied toward the Major Electives unit requirement, unless approved by the Microbiology Steering Committee.
3. No more than 4 units can be applied toward the Other Requirements unit requirement, unless approved by the Microbiology Steering Committee.
4. Students are encouraged to take a class in ethics.

Combined B.S. + M.S. Five-Year Program Requirements

The Undergraduate and Graduate Programs in Microbiology offers a combined B.S. + M.S. program in Microbiology designed to lead to a Bachelor of Science degree as well as a Master of Science degree in five years.

Applicants for this program must intend to enroll in the UCR Microbiology M.S. program, have a high school GPA above 3.6 (when applying as a freshman or during their freshman year), a 3.5 GPA in major (upper division classes only), minimum of 11 units to be completed by the end of junior year, and a 3.2 GPA overall in their undergraduate program. Interested students who intend to enter the program in their junior year should check with their academic advisor for information on eligibility, admission requirements, and other details.

During the M.S. portion of this program, students must maintain a grade-point average (both in the major and overall) of at least 3.0 for all course work, both cumulatively and for each quarter of enrollment. If the student’s GPA falls below 3.0 (for either the major or overall), the student may be dropped from the program.

Master of Science

The Graduate Program in Microbiology offers the M.S. degree in Microbiology.

General university requirements are listed in the Graduate Studies section of this catalog. Students may obtain an M.S. degree in Microbiology through Plan II (Comprehensive Examination).

Professional Development

All M.S. students participate in the program’s seminar (MCBL 250) each quarter of the master’s year when offered, and they are also encouraged to take the program’s professional development course (PLPA 265).

Plan II (Comprehensive Examination)

Overall Requirements

Students must complete 36 units of approved graduate work in Microbiology. At least 24 of these 36 units must be graduate level courses (200-level). A maximum of 12 units of upper-division (100-level) MCBL courses can be applied toward the 36-unit requirement.

Course Requirements

- Microbiology Graduate Core Courses (MCBL 202, 211, 221)
- 24 units graduate level MCBL courses (200-level) minimum
- Additional 200 and 100 level courses to complete the 36 units

Written Comprehensive Exam

Students take a comprehensive exam created from relevant material from at least 3 of the 200-level microbiology courses, usually the microbiology core courses. Failure to pass the comprehensive examinations after two opportunities constitutes grounds for dismissal from the program.

Normative Time to Degree

15 quarters (B.S. + M.S.)
3 quarters (M.S.)

Graduate Program

The Graduate Program in Microbiology is an interdisciplinary program with participating faculty from the departments of Evolution, Ecology and Organismal Biology, Molecular, Cell, and Systems Biology, Chemical and Environmental Engineering, Chemistry, Entomology, Environmental Sciences, Microbiology and Plant Pathology, and the Division of Biomedical Sciences. Faculty research interests are concentrated in several disciplines in the areas of basic and applied microbiology. These disciplines include the following:

- Microbial Pathogenesis
- Environmental Microbiology and Ecology
- Microbial Evolution, Genomics, and Metagenomics
- Molecular and Cellular Microbiology

Admission

For admission into the graduate program in Microbiology, a student must have a B.A. or B.S. degree from an accredited institution and an academic record that satisfies the minimum admission standards established by the UCR Graduate Division.

Although no specific undergraduate degree specialization is required, applicants should have an adequate background in the physical and biological sciences, including the following or equivalent courses:

- CHEM 001A, CHEM 001B, CHEM 001C (General Chemistry), CHEM 008A and 008LA or CHEM 008A and CHEM 008LA, CHEM 008B and CHEM 008LB and CHEM 008B and CHEM 008LB, CHEM 008C and CHEM 008C or CHEM 008C and CHEM 008C and CHEM 008HL (Organic Chemistry), BCH 110A or BCH 110A, BCH 110B or BCH 110B (Biochemistry), MATH 007A or MATH 009A, MATH 007B or MATH 009B (Calculus), STAT 010 or STAT 120A (Statistics), BIOL 102 (Genetics), BIOL 121A/MCBL 121A, BIOL 121L/MCBL 121L (Microbiology), BIOL 107A or BCH 110C (Molecular Biology)

This list is intended to represent the minimum background required for students wishing to pursue a graduate degree in Microbiology. Additional course work and laboratory experience in microbiology, biochemistry or genetics is highly desirable. However, upon the recommendation of the graduate advisory committee, occasionally a student may be admitted into the graduate program with one or more course work deficiencies; such students must satisfy these course work deficiencies usually within the first and no later than within the second year of graduate study.

Curriculum

The program is designed to prepare students for teaching and research careers in colleges and universities, as well as basic and applied research in private, industrial, and government laboratories. To attain this goal, a three-tiered set of coursework has been designed: See Master’s Degree and Course Work section under Doctoral Degree.
Ph.D. and M.S. students must attend one seminar per week each quarter, when offered, in programs collaborating with Microbiology. The seminar course must be chosen from the following list: MCBL 250, PLPA 250. Other seminar courses may be approved by the graduate advisor. Students are also required to present one seminar during their tenure in the program. The seminar can be either on the student’s thesis research or related topics and can be presented in any of several program student seminar series.

**Master’s Degree**

M.S. students must fulfill the requirements for Plan I (Thesis) or Plan II (Comprehensive Examination) of the Graduate Council. All students must complete at least 11 units of 200-level coursework, which can include the microbiology core courses and/or other microbiology courses chosen in consultation with the student advisory committee. Non-microbiology courses can also be used for this 200-level coursework requirement with approval from the student’s advisory committee and the graduate advisor. Plan I requires 36 units, of which 24 must be in graduate level courses. Of the 24, a maximum of 12 may be in graduate research for the thesis. The student must also submit and defend an acceptable research thesis. For the Plan II Masters, the Comprehensive Examination option, students must complete 36 units total, of which at least 24 must be in 200-level coursework, which should include the microbiology core courses and/or other microbiology courses chosen in consultation with the student advisory committee. Of the 24, 200-level units, a maximum of 6 units may be in graduate research, but no research units are required for this option. The student must also pass a comprehensive exam created from relevant material from at least 3 of the 200-level microbiology courses that the student has already completed, usually the 3 microbiology core courses.

**Normative Time to Degree**

6 quarters

**Doctoral Degree**

Ph.D. students must meet all requirements of the Graduate Council. Students satisfactorily complete the core class requirements and a program of courses approved by the student advisory committee. The Ph.D. degree is awarded upon passing the preliminary and qualifying examinations and demonstrating an ability to carry out original research by preparing and submitting an acceptable dissertation.

Students enrolled in the Ph.D. program are expected to become actively engaged in a research project no later than the end of their first year, and research progress is monitored by the student’s advisory committee until the student advances to candidacy and a dissertation committee is appointed. The program stresses the importance of innovative and independent laboratory research as the major component of the student’s education.

**Course Work**

The program is designed to prepare students for teaching and research careers in colleges and universities, as well as basic and applied research in private, industrial and government laboratories. To attain this goal, a three-tiered curriculum has been designed whereby students are expected to complete the following:

1. A core sequence of classes in microbiology: MCBL 202 (Microbial Pathogenesis and Physiology), BIOL 221/MCBL 221 (Microbial Genetics), and MCBL 211 (Microbial Ecology)
2. A selection of at least one elective graduate (200-level) course in microbiology or other relevant field(s) chosen in consultation with the student’s major professor and the advisory committee in order to develop depth in particular areas of specialization.
3. Research training in specific areas of microbiology (at least 6 units of MCBL 297 or MCBL 299).

Students fulfill their professional development training by enrolling in PLPA 265, a 3 unit course that covers a range of topics including careers in microbiology, CV preparation, skills on giving scientific presentations, strategies for success in the candidacy examination and graduate school, data acquisition, management and ownership, policy and regulation, and intellectual property.

**Preliminary Examination**

The preliminary examination, consisting of a written, comprehensive examination is based on general microbiology and required material in the student’s area of specialization. If a student fails this examination, the advisory committee recommends either additional course work in specific areas of weakness, transfer to a terminal M.S. degree program, or withdrawal from the program. The preliminary examination may only be repeated once and must be passed for the student to continue in the Ph.D. program. The preliminary examination is normally taken in the spring quarter of the second year.

**Oral Qualifying Examination**

After completion of the preliminary examination, the qualifying committee is established, and the oral qualifying examination is normally taken no later than the eighth quarter (year three) of academic work, not counting summer quarters.

A qualifying committee is nominated by the graduate advisory committee and submitted to the graduate dean for approval. Suggestions of potential members of the qualifying committee may be submitted to the advisory committee by the student and the student’s major professor. The qualifying committee is composed of five faculty members: three with expertise in the area of specialization in microbiology, one representing a different area from microbiology, and one outside member. The student’s major professor may not serve on the qualifying committee. Prior to the oral qualifying examination, the student submits a written dissertation research proposal to the members of the qualifying committee. The oral examination covers the student’s area of specialization and research field and must be passed for the student to continue in the program. Upon successful completion of the qualifying examination, the student is advanced to candidacy. The qualifying examination may be repeated only once.

**Dissertation and Final Oral Examination**

The dissertation committee is nominated by the graduate advisor for approval by the graduate dean (upon successful completion of the qualifying examination) and is composed of the student’s major professor and at least two other faculty members suggested by the student and the student’s major professor. Before approval of the dissertation, the student is expected to present orally the dissertation research at an announced defense seminar.

**Teaching Requirement**

Two quarters of teaching experience is required, which may be satisfied by serving as a teaching assistant in any of the microbiology courses listed.

**Foreign Language Requirement**

None

**Normative Time to Degree**

15 quarters

**Upper-Division Courses**

**MCBL 120 Introduction to Plant Pathology**

3 Lecture, 3 hours. Prerequisite(s): BIOL 005A, BIOL 05LA or BIOL 020, BIOL 05SB, BIOL 05SC, CHEM 001C or CHEM 01HC, CHEM 008C and CHEM 08LC, or CHEM 08HC and CHEM 08HLC, MATH 007B or MATH 009B or MATH 09HB, PHYS 002C or PHYS 02HC, PHYS 02LC or PHYS 02HLC, BCH 100 or BCH 110A or BCH 110HA, one course in statistics; or consent of instructor. Introduction to the study of plant diseases. Topics include diseases and disease-causing agents, host-pathogen interaction during disease development, and strategies for disease management. An optional, separate laboratory is offered. Cross-listed with BIOL 120, and PLPA 120. Credit is not awarded for PLPA 210 if it has already been awarded for BIOL 120/MCBL 120/PLPA 120 and/or BIOL 120L/ MCBL 120L/ PLPA120L.

**MCBL 120L Introduction to Plant Pathology Laboratory**

1 Laboratory, 4 hours. Prerequisite(s): BIOL 005A, BIOL 05LA or BIOL 020, BIOL 05SB, BIOL 05SC, CHEM 008C or CHEM 08HC; CHEM 08LC or CHEM 08HLC; MATH 007B or MATH 009B or MATH 09HB; PHYS 002C or PHYS 02HC, PHYS 02LC or PHYS 02HLC; BCH 100 or BCH 110A or BCH 110HA; MCBL 120, may be taken concurrently or BIOL 120, may be taken concurrently or PLPA 120, may be taken concurrently; STAT 010, may be taken concurrently; BIOL 121/MCBL 121 and BIOL 124/MCBL 124 recommended; or consent of instructor. Covers fundamentals in the use of laboratory instruments and techniques for the detection, isolation, and identification of representative infectious agents that cause disease in plants. Cross-listed with BIOL 120L and PLPA 120L. Credit is awarded for one of the following PLPA 120L, BIOL 120L, MCBL 120L, or PLPA 210.
MCBL 121 Introductory Microbiology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A; BIOL 05LA or BIOL 020; BIOL 005B; BIOL 005C; CHEM 001C or CHEM 01HC; MATH 007B or MATH 009B or MATH 09HB; PHYS 002A, may be taken concurrently or PHYS 02HA, may be taken concurrently; PHYS 02LA, may be taken concurrently or PHYS 02HLA, may be taken concurrently, BCH 100, may be taken concurrently or BCH 110A, may be taken concurrently or BCH 110HA, may be taken concurrently; STAT 010; or consent of instructor. An intensive introduction to the fundamental physiology and molecular biology of bacteria and viruses. Covers bacterial and viral molecular genetics, an introduction to microbial pathogenesis, and applications of microbiology in modern societies. Cross-listed with BIOL 121. Credit is awarded for one of the following MCBL 121, BIOL 121, or MCBL 131.

MCBL 121L Microbiology Laboratory 3 Lecture, 1 hour; laboratory, 6 hours. Prerequisite(s): BIOL 121 with a grade of C- or better or MCBL 121 with a grade of C- or better. Laboratory exercises in diagnostic bacteriology, basic virology, and epidemiology. Includes fundamental quantitative and diagnostic microbiological procedures, basic mechanisms of microbial genetic exchange, and a project examining bacterial epidemiology. Cross-listed with BIOL 121L. Credit is awarded for one of the following MCBL 121L, BIOL 121L, or MCBL 131L.

MCBL 122 Food Microbiology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 05LA or BIOL 020; BIOL 005B; BIOL 005C; CHEM 008C or CHEM 008HC; CHEM 08LC or CHEM 08HLC; MATH 007B or MATH 009B or MATH 09HB; PHYS 002C or PHYS 02HC; PHYS 02LC or PHYS 02HLC; BCH 100 or BCH 110A or BCH 110HA; STAT 010; or consent of instructor. Covers spoilage and preservation of food; food quality and indicator organisms; the role of microorganisms in the production of dairy goods and fermented beverages; food-borne pathogens and microbiological production of toxins; and classical and modern molecular methods for detection of food microorganisms. Cross-listed with BIOL 122.

MCBL 123 Introduction to Comparative Virology 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 05LA or BIOL 020, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 008C and CHEM 08LC or CHEM 08HC and CHEM 08HLC; MATH 007B or MATH 009B or MATH 09HB; PHYS 002C or PHYS 02HC; PHYS 02LC or PHYS 02HLC, BCH 100 or BCH 110A or BCH 110HA, one course in statistics; or consent of instructor. Considers viruses as infectious agents of bacteria, plants, and animals (vertebrates and invertebrates). Compares the major groups of viruses to each other with respect to their biological and biochemical properties, molecular and genetic characteristics, and modes of replication. Cross-listed with BIOL 123, and PLPA 123.

MCBL 124 Medical Microbiology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A; BIOL 05LA or BIOL 020; BIOL 005B; BIOL 005C; CHEM 008C or CHEM 008HC; CHEM 08LC or CHEM 08HLC; MATH 007B or MATH 009B or MATH 09HB; PHYS 002C or PHYS 02HC; PHYS 02LC or PHYS 02HLC; BCH 100 or BCH 110A or BCH 110HA; STAT 010; or consent of instructor. An intensive introduction to the fundamental physiology and molecular biology of bacteria and viruses. Covers research strategies for examining microbial pathogenic mechanisms. Cross-listed with BIOL 124.

MCBL 125 Experimental Microbiology 4 Lecture, 15 hours; workshop, 1 hour; laboratory, 6 hours. Prerequisite(s): BIOL 102; BIOL 107A; MCBL 113; MCBL 131L; restricted to class level standing of junior or senior; restricted to major(s) Microbiology; or consent of instructor. Introduces the process of performing experimental research in a microbiology laboratory. Teaches skills used in formulating hypotheses, designing experiments, performing laboratory experiments, analyzing data, and preparing and presenting research in written and oral formats. Experimental systems utilized vary from quarter to quarter.

MCBL 126 Microbiomes 3 Lecture, 3 hours. Prerequisite(s): BIOL 005A, BIOL 05LA or BIOL 020; BIOL 005B; BIOL 005C; CHEM 008C or CHEM 008HC; CHEM 08LC or CHEM 08HLC; MATH 007B or MATH 009B or MATH 09HB; PHYS 002C or PHYS 02HC; PHYS 02LC or PHYS 02HLC; BCH 100 or BCH 110A or BCH 110HA; STAT 010; or consent of instructor. Introduces microbiomes, which are the collections of microorganisms that inhabit particular environments or locations and play crucial roles in agriculture, the environment, and human health and disease. Covers fundamental knowledge about microbiomes and experimental strategies to understand and utilize microbiomes to prevent or treat human and plant diseases. Credit is awarded for one of the following MCBL 126 or MCBL 226.

MCBL 127 Microbial Evolution 4 Lecture, 3 hours; workshop, 1 hour. Prerequisite(s): BIOL 005A, BIOL 05LA or BIOL 020; BIOL 005B; BIOL 005C; CHEM 008C or CHEM 008HC; CHEM 08LC or CHEM 08HLC; MATH 007B or MATH 009B or MATH 09HB; PHYS 002C or PHYS 02HC; PHYS 02LC or PHYS 02HLC, BCH 100 or BCH 110A or BCH 110HA; STAT 010; or consent of instructor. Explores fundamental knowledge and experimental strategies to understand and utilize microbiomes to prevent or treat human and plant diseases. Credit is awarded for one of the following MCBL 127 or MCBL 227.

MCBL 128 Field Mycology: Ecology, Evolution, and Diversity of Fungi 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005A, BIOL 05LA, BIOL 005B, BIOL 005C; or consent of instructor. Overview of fungal diversity, morphology, ecology, and societal impacts. Topics include fungal diversity, mushroom identification, fungal culturing, molecular methods, and bioinformatics. Explores impacts of fungi on ecosystem functions such as decomposition and symbiosis, as well as impacts of fungi on society including art, medicine, poisons, and food. Credit is awarded for one of the following MCBL 128 or MCBL 228.

MCBL 129 Host Responses to Viral Pathogens 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A; BIOL 05LA or BIOL 020; BIOL 005B; BIOL 005C; CHEM 008C or CHEM 008HC; CHEM 08LC or CHEM 08HLC; MATH 007B or MATH 009B or MATH 09HB; PHYS 002C or PHYS 02HC; PHYS 02LC or PHYS 02HLC, BCH 100, may be taken concurrently or BCH 110A, may be taken concurrently or BCH 110HA, may be taken concurrently or BCH 110HA, may be taken concurrently; or consent of instructor. Explores host responses to viral infections. Presents content that will promote understanding of how viruses interact with innate immune responses of the mammalian host and how these responses impact disease outcomes for better or worse. Credit is awarded for one of the following MCBL 129 or MCBL 229.

MCBL 130 Microbial Threats and Biodefense 3 Lecture, 2 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 05LA or BIOL 020; BIOL 005B; BIOL 005C; CHEM 008C or CHEM 008HC; CHEM 08LC or CHEM 08HLC; MATH 007B or MATH 009B or MATH 09HB; PHYS 002C or PHYS 02HC; PHYS 02LC or PHYS 02HLC, BCH 100 or BCH 110A or BCH 110HA; STAT 010; or consent of instructor. Explores the historical development, strategies, and current status of major microbial threats and biodefense responses. Addresses the impact of microbes on human, animal, and plant health. Includes natural outbreaks and pandemics, epidemiology, detection technologies, ethics, and biodefense. Considers how these topics relate to plant, animal, and human health.

MCBL 131 Introductory Microbiology 2 & 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 05LA or BIOL 020; BIOL 005B; BIOL 005C; CHEM 001C or CHEM 01HC; MATH 007B or MATH 009B or MATH 09HB; BCH 100, may be taken concurrently or BCH 100H, may be taken concurrently or BCH 110A, may be taken concurrently or BCH 110HA, may be taken concurrently; restricted to major(s) Microbiology; or consent of instructor. An intensive introduction to the fundamental cellular and molecular biology of bacteria and viruses. Covers bacterial and viral molecular genetics, regulation, and physiology, as well as an introduction to microbial pathogenesis. Restricted to major(s) in Microbiology. Credit is awarded for one of the following MCBL 131, BIOL 121, or MCBL 121.

MCBL 131L Microbiology Laboratory 2 & 4 Lecture, 1 hour; discussion, 1 hour; laboratory, 6 hours. Prerequisite(s): MCBL 131 with a grade of C- or better; restricted to major(s) Microbiology; or consent of instructor. Laboratory and written exercises in diagnostic bacteriology, basic virology, and epidemiology. Topics include fundamental quantitative and diagnostic microbiological procedures, basic mechanisms of microbial genetic exchange, and a project examining bacterial epidemiology. Restricted to major(s) in Microbiology. Credit is awarded for one of the following MCBL 131L, BIOL 121L, or MCBL 121L.
MCBL 133 Environmental Microbiology 4
Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 05LA or BIOL 020, BIOL 005B, BIOL 005C, or consent of instructor. Introduction to nonpathogenic microorganisms in the environment. Topics include an introduction to microbial biology and microbially and metabolic genetic diversity; methods; symbiotic interactions; biofilms; and genomic and biodiversity. Explores life in extreme environments and the effects of the physical and chemical environment on microbes. Cross-listed with ENSC 133.

MCBL 139 The Evolution of Conflict and Cooperation: Cheaters and Altruists 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005C; or consent of instructor. Explores the evolution of selfish and selfless behavior. An analysis of the evolutionary forces that create either conflict or cooperation among genes, microorganisms and their hosts, and kin. Cross-listed with ENTM 139.

MCBL 190 Special Studies 1 to 5
individual study, 3 to 15 hours. Prerequisite(s): permission of instructor and major chairperson. Provides an opportunity to meet specific curricular needs. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. No more than 4 units can be applied toward the degree without permission from the Microbiology Steering Committee.

MCBL 197 Research For Undergraduates 1 to 4
Directed research, 3 to 12 hours. Prerequisite(s): consent of instructor; up to division standing. Individual research in microbiology performed under the guidance of the staff or faculty. Letter grades are assigned to students presenting a research paper; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 9 units.

MCBL 198I Individual Internship in Microbiology 1 to 12
Written Work: 1 to 12 hours; in an upper division standing. Individual research in microbiology performed under the guidance of the staff or faculty. Letter grades are assigned to students presenting a research paper; other students receive a Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

Graduate Courses

MCBL 202 Microbial Pathogenesis and Physiology 4
Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. An in-depth examination of microbes that cause human and animal disease. Explores physiology and pathogenesis of bacterial, fungal, protist, and viral pathogens and their vectors. Includes study of antimicrobial drugs and resistance mechanisms, mode of action for toxins, immunological responses of the host, epidemiological considerations, and development of control practices.

MCBL 206 Gene Silencing 3
Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): graduate standing, BIOL 107A or CNS 101; or consent of instructor. An in-depth coverage of mechanisms, functions, and applications of RNAi and related gene regulatory pathways guided by small RNAs such as siRNAs and miRNAs in plants and animals. Cross-listed with GEN 206, and CMBD 206.

MCBL 210 Molecular Biology of Human Disease Vectors 3
Lecture, 2 hours; seminar, 1 hour. Prerequisite(s): consent of instructor. Covers the molecular aspects of vectors transmitting most dangerous human diseases. Includes lectures and student presentations about current issues in molecular biology and genomics of vector insects and pathogens they transmit. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with ENTM 210, and CMBD 210.

MCBL 211 Microbial Ecology 3
Lecture, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Application of ecological principles to microbial communities. Emphasizes methods for analysis of diversity and community structure and statistical methods relating genetic and biochemical fingerprints to functional properties. Case studies explore applications for agriculture, disease biocontrol, and bioremediation of environmental contaminants.

MCBL 221 Microbial Genetics 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110C or BIOL 107A; BIOL 102. In-depth coverage of the genetics of microbes. Emphasizes the primary data and the foundation of modern techniques using viruses, archaea, prokaryotes, and eukaryotes. Includes genome sequences and organization, plasmids and other vectors, and mutation and genetic screens. Also covers transposable elements, recombination, and regulation of gene expression, development, and pathogenesis. Cross-listed with BIOL 221, and PLPA 226.

MCBL 226 Microbiomes 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Introduces microbiomes, which are collections of microorganisms inhabiting particular locations, and which play crucial roles in agriculture, the environment, and human health and disease. Covers fundamental knowledge and experimental strategies to understand and use microbiomes to prevent or treat human and plant diseases, with the primary focus on human disease. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following MCBL 226 or MCBL 126.

MCBL 227 Microbial Evolution 5
Lecture, 3 hours; discussion, 1 hour; workshop, 1 hour. Prerequisite(s): graduate standing; or consent of instructor. Microbes perform essential roles in biogeochemical cycles, directly influence human, plant and animal health and disease, and are important platforms for research and biotechnology. Understanding how all of this is possible requires an understanding the evolutionary history and processes that underlie the critical roles of microbes. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following MCBL 227 or MCBL 127.

MCBL 228 Field Mycology 5
Lecture, 3 hours; laboratory, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing, or consent of instructor. Overview of fungal diversity, morphology, ecology, and societal impacts. Topics include fungal diversity, mushroom identification, fungal culturing, molecular methods, and bioinformatics. Explores impacts of fungi on ecosystem functions (such as decomposition and symbiosis) and on society including art, medicine, poisons, and food. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following MCBL 228 or MCBL 128.

MCBL 229 Host Responses to Viral Pathogens 5
Lecture, 3 hours; discussion, 2 hours. Prerequisite(s): graduate standing, or consent of instructor. Overview of how cellular and system-wide responses to viral infections promote or prevent viral diseases. Topics include emerging viruses, innate and adaptive immunity, vaccines, impacts of host genetics and biological sex, and animal models. Approaches the subject matter from the standpoint of developing host-targeted treatments for viral diseases. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following MCBL 229 or MCBL 129.

MCBL 241 Special Topics 2
Lecture, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Oral presentations and intensive small-group discussion of selected topics in each faculty member’s area of specialization. Course content emphasizes recent advances in the special topic area and varies accordingly. Graded Satisfactory (S) or No Credit (NC). Course is repeatable. Cross-listed with PLPA 241.

MCBL 250 Seminar in Microbiology 1
Seminar, 1 hour. Prerequisite(s): graduate standing. Formal seminars by graduate students, faculty, and invited scholars on selected topics in microbiology. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

MCBL 262 Seminar in Molecular Biology and Genomics of Disease Vectors 2
Seminar, 1 hour; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Seminar series sponsored by the Center for Disease-Vector Research at the Institute for Integrative Genome Biology. Provides an opportunity for graduate students to discuss current issues of molecular biology and genomics of vector insects and pathogens they transmit with guest speakers. Course is repeatable to a maximum of 4 units. Cross-listed with ENTM 262.

MCBL 290 Directed Studies 1 to 6
Research, 3 to 18 hours. Prerequisite(s): graduate standing, or consent of instructor and graduate advisor. Experimental or literature studies on specifically selected topics conducted under the direction of a faculty member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.
MCBL 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing. Directed research in microbiology. Performed prior to advancement to candidacy and in preparation for thesis or dissertation projects. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

MCBL 299 Research For Thesis Or Dissertation 1 to 12 Research, 3 to 36 hours. Prerequisite(s): graduate standing. Original research in the area selected for the advanced degree. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Middle East and Islamic Studies

Subject abbreviation: MEIS
College of Humanities, Arts, and Social Sciences
Muhamad Ali, Ph.D. Director
Department Office, INT 5 2018
(951) 827-5111; muhamad.ali@ucr.edu

Committee in Charge
Muhamad Ali, Chair (Religious Studies)
Sahin Acikgoz (Religious Studies)
Reza Asian (Creative Writing)
Sherine Hafez (Gender & Sexuality Studies)
Erith Jaffe-Berg (Theatre, Film, and Digital Production)
Ruh Kang (Media and Cultural Studies)
Kyle Khelaf (Comp Lit & Lang)
Laila Lalam (Creative Writing)
Benjamin Liu (Hispanic Studies)
Fatima Quraishi (History of Art)
Jeff Sacks (Comp Lit & Lang)
Fariba Zarinebaf (History)
Daryle Williams, Dean, ex officio

Majors

The Middle East and Islamic Studies major is designed to provide undergraduate students with a broad understanding of Middle Eastern and Islamic societies and cultures. The program offers an interdisciplinary approach to the study of the Middle East and Islamic traditions with focuses on religion, history, gender and sexuality, literature, art, and popular discourses and practices, which can vary from North Africa to Southeast Asia.

The multidisciplinary nature of the program prepares students for a critical understanding of current issues and further study in a number of academic fields at the graduate level. The major is useful to students planning careers in politics and government, business, education, international and national non-governmental organizations, journalism, and the art, as well as for those who desire a better understanding of the Middle East, Islam, and Islamic cultures.

University Requirements
See Undergraduate Studies section.

College Requirements
See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

Major Requirements

The major requirements for the B.A. in Middle East and Islamic Studies are as follows (48 units):

1. Language requirement: 4 courses (16 units) Students are required to fulfill the language requirement by taking 4 classes in a language in MEIS (Arabic, Persian, Turkish, Hebrew, Urdu, Malay, Indonesian) or pass the proficiency requirement by taking a test administered by the department. Currently UCR offers only Arabic, but students can take language classes either abroad (i.e. AUC in Cairo, Bogaziçi University in Istanbul) or in other UC campuses (UCLA, Irvine) upon the approval of MEIS director.

2. Senior Research (4 units): Students must take MEIS 199 or HIST 197 with MEIS content (taken senior year with the prior approval of the instructor and MEIS Director as the MEIS Director should be able to review the content to ensure that it fits the major)

3. Required courses: 3 courses (12 units) (at least one should be taken from area I and one from area II)

   ii. Specialized courses: AHS 125, ANTH 169/GBST 169, GSST 162/RLST 162, HIST 125, HIST 126

4. Select 4 from the elective courses (16 units of elective courses):

   a) Arabic Literatures and Cultures
      ARLC 120, ARLC 151/CPTL 151/MEIS 151, ARLC 152/CPTL 152, ARLC 154/CPTL 154/PHIL 128, ARLC 156/CPTL 156/MEIS 156/RLLST 156, ARLC 158/CPTL 158/MEIS 158/RLLST 158

   b) Anthropology
      ANTH 136/SEAS 136, ANTH 140/GBST 151, ANTH 189/GSST 168, ANTH 109

   c) Art History
      AHS 126

   d) Asian Studies
      AST 167/CPTL 167/SEAS 167

   e) Comparative Ancient Civilizations
      CPAC 121/CLA 121/POSC 121

   f) Comparative Literature
      CPLT 153

   g) Gender and Sexuality Studies
      GSST 151/ANTH 188, GSST 162/RLLST 162, GSST 169

   h) History
      HISE 170, HISE 160, HISE 112, HISE 116, HISE 118, HIST 128, HIST 137

   i) Religious Studies
      RLLST 112, RLLST 113, RLLST 116, RLLST 126/RLLST 127, RLLST 148, RLLST 150/SEAS 150, RLLST 151, RLLST 155

   j) Theatre, Film, and Digital Production
      TFDP 177

Minor

The Middle East and Islamic Studies minor offers a broad course of interdisciplinary and theoretically informed study. Students draw upon the range of materials covered in departments including Religious Studies, History, Anthropology, Gender and Sexuality Studies, Creative Writing, Hispanic Studies, Media and Cultural Studies, Theater, Film, and Digital Production, Comparative Literature and Languages, and Art History. Students gain critical knowledge of the texts, histories, practices, and institutions of the Middle East and Islamic traditions in diverse, multilingual, and global contexts.

1. Select 2 from the required courses (8 units)
   a) Arabic Literatures
      ARBC 105
   b) Arabic Literatures and Cultures
      ARLC 120, ARLC 151/CPTL 151/MEIS 151, ARLC 152/CPTL 152, ARLC 154/CPTL 154/PHIL 128, ARLC 156/CPTL 156/MEIS 156/RLLST 156
   c) Anthropology
      ANTH 136/SEAS 136, ANTH 140-I
   d) Asian Studies
      AST 167/CPTL 167/SEAS 167
   e) Comparative Literature
      CPLT 153
   f) Gender and Sexuality Studies
      GSST 151/ANTH 188, GSST 162/RLLST 162, GSST 169
   g) History
      HISE 170, HISE 160, HISE 112, HISE 116, HISE 118, HIST 128, HIST 137
   h) Religious Studies
      RLLST 112, RLLST 113, RLLST 116, RLLST 126/RLLST 127, RLLST 148, RLLST 150/SEAS 150, RLLST 151, RLLST 155
   i) Theatre, Film, and Digital Production
      TFDP 177

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Lower-Division Courses

MEIS 012 Islam and Feminism 4 Lecture. 3 hours; discussion, 1 hour; written work, 1 hour; term paper, 1 hour. Prerequisite(s): none. Focuses on the intersections between Islam and feminism. Topics include feminist interpretations of the Qur’án, Muslim women’s movements and activism in Islamic and non-Islamic societies, and the complex interactions between the nation-state, religion, gender, and sexuality. Cross-listed with GSST 012, and RLST 011. Credit is awarded for one of the following: RLST 011, GSST 012, MEIS 012, GSST 012H, MEIS 012H, or RLST 011H.

489
Upper-Division Courses

MEIS 110 Gender, Sexuality, and Islam 4 Lecture, 3 hours; written work, 2 hours; term paper, 1 hour. Prerequisite(s): restricted to class level standing of sophomore, junior, or senior. Focuses on the intersections between gender, sexuality, and religion in Islamicate societies. Discusses the ways in which those formations have been shaped by histories of slavery, imperialism, colonialism, human rights discourses, neoliberalism, contemporary practices of Islamophobia, nationalism, and global LGBTQ activism. Cross-listed with GSST 110, and RLST 105.

MEIS 151 Palestine/Algeria 4 Lecture, 3 hours; screening 6 hours per quarter; extra reading, 24 hours per quarter. Prerequisite(s): upper-division standing or consent of instructor. Considers two distinct and related literary and historical moments: Palestine and Algeria. Topics include the relations between language and context; literature and literary historiography; genre and idiom; violence and the body; and the state and institutional practices of reading. Cross-listed with ARLC 151, and CPLT 151.

MEIS 155 Introduction to Arabic Literature 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. An introduction to Arabic literature that focuses on language and rhetoric. Consider major issues such as colonialism, secularism, modernity, language, and the state. Utilizes texts from literature, the law, and philosophy. Cross-listed with ARLC 155, and CPLT 155.

MEIS 156 Jews and Arabs 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Traces the formation of the shared and divided history of the Jewish and Arab peoples. Focuses on the literary and institutional dimensions of this history, as well as the formation of related areas of study, such as religion, philosophy, literature, and psychoanalysis. Cross-listed with ARLC 156, CPLT 156, and RLST 156.

MEIS 199 Senior Research 4 Consultation, 1 hour; extra reading, 6 hours; term paper, 3 hours. Prerequisite(s): senior standing; consent of Middle East and Islamic Studies Steering Committee chair. Directed original research in topics related to the Middle East, Islamic studies, or Islamic cultures. Administered under the direction of members of the Middle East and Islamic Studies Steering Committee or an approved faculty member.

Graduate Course

MEIS 278 Early Modern Empires in the Middle East: the Ottomans and the Safavids 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores the history of early modern empires in the Middle East (the Ottomans and Safavids) in a comparative format. Focuses on such issues as Islam and conquest, state formation, confessional empires and toleration, commerce, and culture. Cross-listed with HIST 278.

Middle East and Islamic Studies Designated Emphasis

Subject abbreviation: MEIS
College of Humanities, Arts, and Social Sciences
Muhamad Ali (Religious Studies) Director
(951)827-5111; muhamad.ali@ucr.edu

Committee in Charge
Muhamad Ali, Director (Religious Studies)
Reza Aslan (Creative Writing)
Sherine Hafez (Gender and Sexuality Studies)
Erith Jaffe-Berg (Theatre, Film and Digital Production)
Ruhi Khan (Media and Cultural Studies)
Kyle Khelilaf (Comp Lit & For Lang)
Laila Lalami (Creative Writing)
Benjamin Liu (Hispanic Studies)
Jeff Sacks (Comparative Literature)
Fariba Zarinebaf (History)
Daryle Williams, Dean, ex officio

Designated Emphasis Requirements

The DE in Middle East and Islamic Studies offers two tracks, one with a requirement for proficiency in a relevant language (Arabic, Persian, Turkish, Hebrew, Urdu or another language, with the approval of the chair of the DE), and/or a placement test and a second track without a language requirement.

Students may double count two courses with MEIS content between the DE and the Ph.D.

Track One
Twelve (12) units plus language proficiency (4-6 quarters)
Three (3) courses (12 units) selected from the list below, at least one of which must be outside of the student’s Ph.D. department, plus the completion of four (4-6) quarters of language study, as described above.

Track Two
Sixteen (16) units
Three (4) courses (16 units) selected from the list below, at least one of which must be outside of the student’s Ph.D. department.

In both tracks, the student is required to take a 2 quarter graduate seminar with the prior approval of faculty member in the relevant discipline. It is understood that the second quarter would be devoted to substantial research and writing.

Applicable Courses

Current Graduate Seminars

AHS 263, CWPA 256, CWPA 257, HIST 254, HIST 277, HIST 278, RLST 200, RLST 249, RLST 252

Petitionable Graduate Seminars

CPLT 215B, CPLT 284, RLST 200A, RLST 201, RLST 202, RLST 203, RLST 204, RLST 205, SPN 251, SPN 279

Current Upper Division Undergraduate Courses

AHS 125, AHS 126; ANTH 136/SEAS 136, ANTH 169/GBST 169, ARLC 120, ARLC 151/CPLT 151, ARLC 152/CPLT 152, ARLC 154/CPLT 154/PHIL 154, ARLC 155/RLST 157, ARLC 156/CPLT 156/RLST 156, ARLC 158/CPLT 158/RLST 158, GSST 151, GSST 162, GSST 168, GSST 169, HIST 121, HIST 122, HIST 124, HIST 125, HIST 126, MCS 172, POSC 133, POSC 152, POSC 165, RLST 111, RLST 113, RLST 116, RLST 149, RLST 150, RLST 151, RLST 155/PHIL 155, SPN 193, TFDP 191

(951)827-5111;
Lockers for small- and medium-size instruments are available to students inside Arts 068 (Instrument Storage Room). A limited number of lockers next to the Piano Lab are reserved for large instruments. The department owns significant collection of early-music instruments, including a number of early keyboard instruments, as well as instruments for use in traditional chamber, orchestral, and wind ensembles. The department also owns the instruments for several Asian ensembles, i.e., Japanese gamelan, Japanese taiko, Philippine rondalla, North Indiana tabla, and Korean drums, as well as for two Latin American ensembles, Andean and Mexican folkloric music. The Experimental Acoustic Research Studio (EARS) supports the composition of electronic music and is housed at a location near campus. The department is also home to the Center for Iberian and Latin American Music, which sponsors concerts and lectures in addition to maintaining a website and scholarly journal.

The UCR library holds strong music-research collections located in two facilities. Approximately 36,000 books about music may be found in the Rivera Library, along with an authoritative collection of reference works, journal back-files and microforms. The Rivera library also provides listening equipment, computers, and houses collections of more than 12,500 records and CDs, a growing collection of music DVDs, and more than 38,000 music scores. The UCR Library also provides online access to music, recordings, videos, books, and journals for use in music research. Special Collections, on the 4th floor of the Rivera Library, holds numerous 18th- and 19th-century scores of major German and Austrian composers, as well as the Oswald Jonas and Joaquin Nin-Culmell archives. The UCR library homepage, library.ucr.edu, provides access to the UC system's online catalog, as well as links to a wide variety of electronic resources.

**Music Major**

The Department of Music offers a Bachelor of Arts in music within the context of a liberal arts curriculum. Students acquire practical knowledge of music performance and composition through individual study as well as participation in one or more of the department's several ensembles. Development of the student's vocal and/or instrumental technique is enhanced by the study of musicianship, theory, and history, which impart a deeper understanding of the structure of music and the cultural forces that shape it.

**Time to degree**

Time to degree is four years. Freshman year: preparatory courses MUS001 and MUS010. Sophomore year: lower division requirements; piano proficiency. Junior year: upper division requirements (130AB, 138, 112ABC), track requirements, and electives. Senior year: upper division track requirements, and electives.

Students declare a Major in Music in the General or Music Industry Tracks by the end of their freshman year. Students that wish to declare a Major in Music within the Performance Track must first pass an audition. Students that wish to declare a Major in Music within the Composition Track must first take MUS 037 and pass an audition.

The Major offers four curricular tracks, among which students may choose a concentration:

1. **Music – General**
2. **Music – Composition**
3. **Music – Performance**
4. **Music – Music Industry**

**Music and Culture Major**

The Music and Culture major offers a predominantly scholarly and critical approach to music as culture from the perspective of research, criticism, and interpretation, with an emphasis on historical and ethnomusicological approaches. It is oriented primarily toward understanding music as a culturally expressive form. Courses in music and/or dance performance are required but are positioned more broadly within the major as a means to explore interrelationships between music and other forms of performance.

**University Requirements**

See Undergraduate Studies section.

**College Requirements**

See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

**Major Requirements**

**Music Major**

The major requirements for the B.A. degree in Music for the general performance, and composition tracks are as follows:

1. Participation in a major ensemble each quarter, sophomore through junior years (9-18 units): MUS 160, MUS 161, MUS 162, MUS 163, MUS 164, MUS 165, MUS 166(E-Z)
2. Lower-division requirements (1-25 units)
   a) MUS 030A, MUS 030B, MUS 030C (12 units or proficiency)
   b) MUS 031A, MUS 031B, MUS 031C (12 units or proficiency)
   c) MUS 080P (1 unit and piano proficiency)
3. Upper-division requirements (20-32 units)
   a) MUS 112A, MUS 112B, MUS 112C (12 units)
   b) MUS 130A (4 units)
   c) MUS 131A, MUS 131B, MUS 131C (12 units or proficiency)
   d) MUS 138 (4 units)
4. Upper-division track requirements: choose from one of the following tracks
   a) Music – General (32 units) 32 units from the following:
   b) Music – Composition (A successful portfolio review and completion of MUS 037 with a C or higher—or instructors’
consent—by the end of sophomore year is required to enter the track (28 units)
1. 4 units from the following: MUS 136, MUS 147, MUS 157
2. MUS 134, MUS 145A (8 units)
3. MUS 149(16 units)
4. 3 units from the following: MUS 112A, MUS 112B, MUS 112C, MUS 118, MUS 120, MUS 124/AST 124, MUS 125, MUS 126/ANTH 172/GSST 126, MUS 130A, MUS 136, MUS 138, MUS 140/HISA 139, MUS 140L, MUS 146, MUS 155 (E-Z)/DNCE 155 (E-Z), MUS 184
5. 4-12 units of the following: MUS 145B, MUS 198I, BUS 103, BUS 107

Note
Students seeking a teaching credential are advised to take MUS 133, MUS 150A, MUS 150B, MUS 150C, MUS 150D, MUS 151, and MUS 152.
Consult the School of Education for credit requirements.

Examinations and Auditions
The ability to play simple piano music is required of all majors. Students lacking keyboard proficiency when the major is declared must enroll in MUS 080P to prepare them for the proficiency examination, administered by the Department’s piano instructor. Alternatively, students with previous keyboard experience can request to take the proficiency examination instead of enrolling in MUS 080P. This examination must be passed by the junior year.
Consult the department for examination requirements.

Students that wish to declare a Major in Music within the Performance track must complete all audition requirements and scheduling.
Consult the department for audition requirements.

Students that wish to declare a Major in Music within the Composition Track must 1) complete MUS 037 with a grade C or higher, and 2) present three diverse works (one of which must be realized through music notation) to the composition faculty during a brief audition at the end of the sophomore year.
If entering as a Junior, transfer Performance and Composition students will need to schedule an audition upon arrival to campus. The MUS 037 prerequisite for Composition students can be waived at the faculty’s discretion.

MUS 031A, MUS 031B, and MUS 031C are taken until proficiency for admission to MUS 131A is achieved. The completion of MUS 131A, MUS 131B, and MUS 131C is required for graduation.
All students normally participate in a major ensemble each quarter. Admission to any ensemble course is by consent of instructor. All students intending to participate in an ensemble course must audition during registration.

Juries
Juries are mandatory for Music juniors and seniors enrolled in the Performance Track. Students must play for two of them, on two different quarters, within each academic year. Students do not play for juries the quarter in which they perform a senior recital. Juries are optional for non-Music Majors, and Music Majors who are not in the Performance Track but who are nevertheless taking Voice & Instrument lessons at the Department. Please note that an instructor may require that a student participate play for juries even if they are not in the Performance Track.

Fees
An additional course fee will be charged at the time of registration for MUS 080 (E-Z), MUS 081 (E-Z) (half-hour private lessons in voice or instrument), MUS 180 (E-Z), and MUS 181 (E-Z) (one-hour private lessons in voice or instrument). A limited number of scholarships will be made available.

Music and Culture Major
The major requirements for the B.A. degree in Music and Culture are as follows:
1. Students participate in a major ensemble each quarter. Students may enroll in DNCE 067A through DNCE 075B instead of, or in addition to, any of the music ensemble courses (6-12 units).
2. Lower-division requirements (16 units)
a) MUS 012
b) MUS 006
c) MUS 008
d) MUS 014
3. Upper-division requirements (36 units)
a) Music courses (24 units)
   (2) Ethnomusicology (20 units): MUS 113, MUS 117, MUS 118, MUS 119, MUS 120, MUS 122, MUS 123, MUS 124/AST 124, MUS 125, MUS 126/ANTH 177/GSST 126, MUS 127/ANTH 176/AST 127/DNCE 127/ETST 172, MUS 140/HISA 139, MUS 146, MUS 184
b) Other upper-division courses (12 units)
   (1) Dance History (4–8 units): ANTH 130, DNCE 171 (E-Z), DNCE 172 (E-Z), DNCE 173 (E-Z)
   (2) Anthropology or Sociology (4–8 units)
   (3) English or Media and Cultural Studies (4–8 units)
   (4) Other courses in the Social Sciences, Humanities, or Arts could count towards these units if the students petition and an advisor’s permission is granted.
Minor

The minor in Music is designed for students who wish to continue their musical studies while pursuing another major. Within the required 24 upper-division units, the minor provides basic skills in music theory and first-level studies in music history and literature while still offering modest flexibility to pursue individual interests.

1. Lower-division preparation: (12-20 units)
   a) MUS 001, MUS 010 or equivalent
   b) MUS 030A, MUS 030B, MUS 030C

2. Upper-division requirements (24 units)
   a) Eight (8) units from MUS 112A, MUS 112B, MUS 112C
   b) Twelve (12) units selected from: MUS 113, MUS 114, MUS 115, MUS 116, MUS 117, MUS 118, MUS 119, MUS 120, MUS 121, MUS 122, MUS 123, MUS 124, MUS 125, MUS 126, MUS 127, MUS 128, MUS 130A, MUS 130B, MUS 134, MUS 135, MUS 136, MUS 137, MUS 138, MUS 139, MUS 140, MUS 142, MUS 145A, MUS 145B, MUS 146, MUS 147, MUS 150A, MUS 150B, MUS 150C, MUS 150D, MUS 151, MUS 152, MUS 153, MUS 154 (E-Z), MUS 155 (E-Z), MUS 180 (E-Z), MUS 181 (E-Z) (no more than 4 units), MUS 184, MUS 185, MUS 191 (E-Z)
   c) Four (4) additional units in ensemble performance: MUS 160, MUS 161, MUS 162, MUS 163, MUS 164, MUS 165, MUS 166, MUS 168, MUS 169, MUS 170, MUS 171, MUS 172, MUS 174, MUS 175A, MUS 175B, MUS 176, MUS 177, MUS 178, MUS 179, MUS 182, MUS 183

As a freshman or sophomore, the student should complete MUS 030A, MUS 030B, MUS 030C (Harmony). This is a prerequisite for all later studies in the minor. Harmony has a prerequisite of MUS 001 (Introduction to Basic Musical Concepts) and MUS 010 or the equivalent.

Two required courses from MUS 112A, MUS 112B, MUS 112C should be completed following MUS 030A, MUS 030B, MUS 030C and not later than the junior year.

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Education Abroad

Education Abroad is an excellent opportunity to learn more about another country and its culture while taking courses to earn units toward graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit Education Abroad at ea.ucr.edu or call (951) 827-4113.

See Education Abroad in the Educational Opportunities section in the beginning of this catalog.

Graduate Program

The Department of Music offers the M.A. and Ph.D. degrees in Music with a specialization in three areas: composition, ethnomusicology, and musicology. Students are encouraged to view music in the broad context of culture: communication between the intradisciplinary areas is built into the program, and courses outside the department are either encouraged or required in order to develop an interdisciplinary outlook.

Admission

Applicants may apply for a terminal M.A. degree. Applicants intending to pursue a Ph.D. as their final degree objective should apply directly to the Ph.D. program. Applicants with a B.A. should follow the requirements for the M.A. for the first six quarters.

Applicants are admitted into the graduate program in the fall quarter only. All applicants must submit an example of their writing.

Composers must also submit three to five original compositions and corresponding recordings (MIDI mockups are acceptable). At least two pieces should be realized with notation software, while others may take the form of electronic music. In addition, composers are encouraged to submit music software that they have authored or other digital audio related activity (papers, sound installations, etc.).

Graduate composition applicants may come from an untraditional background and not possess previous music degrees. However, applicants must have earned an undergraduate degree to be considered for admission.

Musicology applicants must have an M.A. or undergraduate degree in music, including pianoforte proficiency and musicianship (ear training).

Ethnomusicology applicants must have a background in music or anthropology. Evidence of superior intellectual ability in another field combined with some demonstrable expertise in any musical tradition is also viewed favorably.

Entering graduate students in composition and musicology must take an advisory examination. In musicology, admission to full graduate status is contingent upon the removal of any deficiencies in undergraduate preparation as shown by this advisory examination. In digital composition, deficiencies in undergraduate preparation must be completed by the time of the Comprehensive Examination.

In composition, deficiencies in undergraduate preparation must be completed by the time of the Comprehensive Examination.

Professional Development Requirements

The Professional Development courses (MUS 301 and MUS 400, taken jointly) satisfy the Professional Development requirement for both the MA and PhD degrees. Topics discussed typically include: course design; pedagogy; flipped classrooms; designing examinations; facilitating discussion; gender and race issues in the classroom; interviewing, writing, and oral presentation skills; publishing the academic job market and the job application process; and nonacademic careers.

Master’s Degree

The M.A. Degree

The Department of Music offers the M.A. degree in Music under Plan II (Comprehensive Examination).

Requirements

In addition to the coursework indicated below, all students must meet the following requirements.

1. Comprehensive examination

All students must pass a written and/or oral comprehensive examination during their sixth quarter, testing knowledge over a broad spectrum of their field of study.

a. The ethnomusicology comprehensive exam consists of the following: 1) A portfolio of the student’s work from the first 5 quarters in the program, prepared under the supervision of the student’s chosen advisor. This portfolio should include an introduction, CV, representative work from seminars or other courses, and one revised and augmented seminar paper of article length directed at publication. To prepare the portfolio, students may take up to one quarter of MUS 291 (Individual Study in Coordinated Areas, 4 credits) with their advisor, typically in the winter quarter of their second year. The complete portfolio should be submitted to the committee at the beginning of the spring quarter (~April 1st), and the oral exam is scheduled for later that month.

b. A one-hour oral exam with a committee of three faculty, chaired by the student’s advisor. The portfolio and revised seminar paper are the subject of the oral exam. The oral exam may be conducted in-person or hybrid, at the discretion of the student’s advisor.

c. A composition comprehensive exam consists of the following: 1) A portfolio of the student’s work from the first 5 quarters in the program, along with a brief introduction, prepared under the supervision of the student’s advisor; and 2) A one-hour written exam covering Western art music theory and history. For students interested in continuing to the PhD, the portfolio should also include an additional revised and augmented seminar paper of 8,000-10,000 words, directed toward publication, prepared under the supervision of the student’s advisor. The portfolio and results of the written exam will be reviewed by a committee of three faculty to determine the outcome of the comprehensive exam.
2. Foreign Language Requirement

Students must demonstrate a reading knowledge of a foreign language, of use in scholarship within their discipline or chosen to support their research and creative interests, with the approval of the department. The requirement can be satisfied either by examination or by enrolling in 4 quarters of a language course with a grade of "B" or better.

3. Coursework

Each area requires a minimum of 48 units of graduate (200 series) or upper-division undergraduate courses (100 series), these may include up to 8 units of MUS 299 (Thesis Preparation). Twenty four units must be graduate level. None may be MUS 291, MUS 301 or MUS 400.

Performance courses (MUS 160-181) do not count toward the degree, with the exception of 4 units in world music ensembles required of ethnomusicology students (see requirements below). The courses comprising the remaining required units are disposed differently in each of the three areas as specified below.

1. Digital Composition

a) Core requirements
   MUS 200, MUS 201, MUS 206 or MUS 207B, MUS 256, MUS 258 (repeatable), MUS 265, MUS 293 (6 units), MUS 301, MUS 400

b) Three of the following repeatable courses:
   MUS 232, MUS 249, MUS 251, MUS 257, MUS 259, MUS 264

2. Ethnomusicology

a) Core courses
   MUS 200, MUS 207A, MUS 207B, MUS 207C, MUS 255, MUS 301, MUS 400

b) At least two quarters of the following courses:
   MUS 270, MUS 271

c) Two of the following courses:
   MUS 113, MUS 117, MUS 118, MUS 119, MUS 120, MUS 122, MUS 123, MUS 124, MUS 126, MUS 127, MUS 128, MUS 140, MUS 146, MUS 184

d) One graduate seminar in musicology or composition/theory:
   MUS 201, MUS 206, MUS 232, MUS 249, MUS 251, MUS 252, MUS 256, MUS 257, MUS 258, MUS 259, MUS 261, MUS 262, MUS 263, MUS 264, MUS 265, MUS 266, MUS 293

e) Two graduate courses outside the department; may use directed studies (MUS 290) for one.

f) Four units in one of the following ensembles:
   MUS 168, MUS 169, MUS 170, MUS 174, MUS 175A, MUS 175B, MUS 176, MUS 177, MUS 178, MUS 179

3. Musicology

a) Core requirements
   MUS 200, MUS 201, MUS 206, MUS 207B, MUS 301, MUS 400

b) Six courses in the 260s series:
   MUS 261, MUS 262, MUS 263

c) Two graduate courses outside the Music Department; may use directed studies (MUS 290)

d) Two of the following courses:
   MUS 118, MUS 155 E-Z, MUS 126, MUS 153, MUS 255, MUS 265, MUS 255, MUS 259, MUS 270

Normative time to degree

6 quarters

Doctoral Program

The Department of Music offers the Ph.D. degree in Music. Students are invited by the faculty to continue toward candidacy for the Ph.D. degree on the basis of performance in courses and seminars, the quality of their portfolios, passing the comprehensive examination at the Ph.D. level, satisfactory completion of the M.A. requirements, and the recommendation of the faculty in their track (digital composition, musicology or ethnomusicology), in consultation with the graduate advisor.

Students with an M.A. degree from other universities are eligible for admission. The process of admission is the same as for students with a B.A.

Requirements

1. Foreign language requirement
   Musicology and ethnomusicology students must demonstrate a reading knowledge of a second foreign language, of use in scholarship within their discipline or chosen to support their research and creative interests. Students in these concentrations with an M.A. from other universities, who did not have to meet a foreign language requirement, must demonstrate a reading knowledge of two foreign languages during their residency at UCR. Digital composition students are also expected to pass a test containing ear-training, keyboard, and basic compositional skills. Qualifying examinations are normally taken in the ninth quarter for students entering with a B.A., and in the sixth quarter for students entering with an M.A.

2. Coursework
   Students continuing toward the Ph.D. must take 36 additional units earned in seminars and in MUS 291 and MUS 299 courses geared toward preparation for the qualifying examinations. None may be MUS 301 or MUS 400.

Students entering with an M.A. from another institution must take a minimum of 48 units earned in seminars and directed studies (MUS 290). These must include the following required courses, although waiver may be granted for specific courses on an individual basis, depending on the student’s prior graduate training and pending faculty approval. Students are encouraged to take additional seminars and MUS 291 and MUS 299 courses geared toward preparation for the qualifying examinations.

Ethnomusicology students must meet the course requirements of the M.A. as stated above.

Digital composition students are required to take:

a) Core requirements
   MUS 200, MUS 201, MUS 206 or MUS 207B, MUS 256, MUS 258 (repeatable), MUS 265, MUS 293 (6 units), MUS 301, MUS 400

b) Two of the following repeatable courses:
   MUS 232, MUS 249, MUS 251, MUS 257, MUS 259, MUS 264

Musicology students are required to take:

a) Core requirements
   MUS 200, MUS 201, MUS 206, MUS 207B or MUS 255, MUS 301, MUS 400

b) Five courses in the 260s series:
   MUS 261, MUS 262, MUS 263

3. Qualifying examinations
   Students must take the qualifying examinations, both written and oral, supervised by a faculty committee as stipulated in the regulations of the Graduate Division. The qualifying examinations concentrate on testing advanced skills and knowledge of specialized fields. Digital composition students are also expected to pass a test containing ear-training, keyboard, and basic compositional skills. Qualifying examinations are normally taken in the ninth quarter for students entering with a B.A., and in the sixth quarter for students entering with an M.A.

4. Dissertation prospectus
   Students must write a dissertation prospectus as part of the written qualifying examinations.

Advancement to candidacy for the Ph.D. degree
   Students advance to candidacy for the Ph.D. degree once they have passed all coursework and the written and oral qualifying examinations.

Dissertation and final oral examination
   A dissertation to be presented as prescribed by the Graduate Council is prepared under the direction of the candidate’s dissertation committee. After completion of the dissertation, the candidate may be examined in its defense by the dissertation committee.
Normative time to degree
For students in Digital Composition and Musicology: 15 quarters for students entering with a B.A. degree; 12 quarters for students entering with an M.A. degree. For students in Ethnomusicology: 21 quarters for students entering with a B.A. degree; 15 quarters for students entering with an M.A. degree.

The descriptions of many courses listed below carry the phrase “or consent of instructor.” This is meant to encourage musically qualified students who are not majors to participate in the courses and activities of the department. Any nonmajor having interest in a specific course should confer with the instructor about the qualifications for enrollment.

Lower-Division Courses
MUS 001 Basic Musical Concepts 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Covers the fundamentals of music, including notations, rhythm, major and minor scales, intervals, tonality, and triads. Includes ear training, sight singing, and elementary analysis. Musical literacy not required. To be taken during freshman year in preparation for the Music Major.

MUS 002 Introduction to Western Music 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): none. A survey of the major styles and genres of Western music. Emphasis on creative and analytical listening without the use of musical notation. Designed for the general student with an interest in music and cultural practice. No previous musical background required.

MUS 003 Introduction to Opera 4 Seminar, 3 hours; assigned listening, 3 hours. Prerequisite(s): none. Explores social, political, gender-related, and moral issues represented in 10 major operas between the seventeenth and twentieth centuries. Introduces dramatic and musical structures of opera, value of performance, and operatic conventions shared by composers, singers, and audience.

MUS 005 Women in Music 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): none. A survey course designed primarily for nonmajors. Examines representative works by women composers from antiquity to the present.

MUS 006 Introduction to World Music 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): none. A survey of people, identity, and music making. Includes listening to music from many cultural contexts. Also covers a variety of scholarly topics in world music. Cross-listed with ANTH 006.

MUS 007 Music in Movies and TV 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): none. An exploration of popular film and TV soundtrack music, emphasizing drama and musical style. Scene study features such films as The Matrix, Casablanca, The X-Files, and Altered States. Cross-listed with MCS 009.

MUS 008 Popular Music Cultures of the United States 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): none. Explores the so-called popular musics and music cultures of the United States and the social history of these cultures to provide students with a sonic understanding of these extremely fractured, ever reconstituted “United States.”

MUS 009 Introduction to Digital Music 4 Lecture, 2 hours; workshop, 2 hours. Prerequisite(s): none. Teaches basic theory and practical skills for understanding digital audio, recording, editing, and processing sound. Students work with audio and MIDI sequencers with the goal of writing musical compositions with computer notation programs.

MUS 010 Advanced Fundamentals 4 Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): MUS 001; or a passing score on a diagnostic examination and consent of instructor. Advanced study of musical notation, meter and rhythm. Includes major and minor scales, keys, tonal functions, compound meter, and mixed meter. Also provides training in sight singing, interval recognition, and chord quality identification for triads and seventh chords. To be taken during freshman year in preparation for the Music Major.

MUS 011 Interactive Digital Music and Multimedia Performance 4 Lecture, 3 hours; individual study, 4 hours. Prerequisite(s): none. An introduction to interactive digital music and multimedia performance. Includes development of individual and collaborative performance projects using sound, video, dance, and interactive technology. Requires a laptop and a license of the software Max/Msp/Jitter. No previous knowledge of music or technology required.

MUS 012 Introduction to Music and Culture 4 Lecture, 3 hours; extra reading, 2 hours; activity, 1 hour; listening activity, 1 hour. Prerequisite(s): none. Introduces methods and develops skills for understanding music in society. Includes an overview of music’s social roles, including personal identity, nationalism, and political movements. Students listen to music of multiple genres and cultural areas, participate in activities and workshops, and develop writing skills to describe and analyze musical practices.

MUS 013 Popular Music Analysis: Text and Context 4 Colloquium, 2 hours; seminar, 1 hour; workshop, 1 hour. Prerequisite(s): none. A textual and critical analysis of mass-mediated popular music. Explores theories of popular culture and traditional approaches from Western music theory as applied to the study of creation, interpretation, and reception of popular music.

MUS 014 Popular Musics of the World 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduction to issues surrounding popular and urban musics of the world, focusing on three major geocultural areas: Africa, Asia, and the Americas. Emphasizes the relationship between mass-mediated music and issues of cultural hegemony, resistance, and subversion. Analyzes the cultural impact of media technology on music performance and reception. Cross-listed with ETST 014, and UREST 014.

MUS 015 Latin American Folk and Popular Styles 4 Lecture, 2 hours; discussion, 1 hour. Prerequisite(s): none. Introduction to the vast array of folk and popular styles of music in Latin America, with an emphasis on cultural and ethnic interaction and exchange in the context of Latin American history, politics, and society. Cross-listed with LNST 015.

MUS 016 Latin American Classical Heritage 4 Lecture, 2 hours, discussion, 1 hour. Prerequisite(s): none. A survey of the rich heritage of Latin American classical music from Renaissance sacred polyphony to contemporary styles. Emphasis on the gradual emergence of Latin American music from European domination and the establishment of distinctive national traditions in the post-colonial era. Cross-listed with LNST 016.

MUS 017 Music of Mexico 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): none. Explores the rich musical tradition of Mexico, as well as the relationship between its art and popular music. Cross-listed with LNST 017.

MUS 018 Music of Spain 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): none. A survey of Spanish music from the Middle Ages to the present. Covers regional folklore and popular styles (especially flamenco) as well as developments in classical music through the major style periods. Examines music in its historical and cultural context. Knowledge of Spanish and music not required.

MUS 019 Music of Brazil 4 Lecture, 3 hours; discussion, 1 hour; extra reading, 1 hour; activity, 1 hour; listening, 1 hour. Prerequisite(s): none. An exploration of Brazilian music from nineteenth to early twentieth-first centuries with an emphasis on traditional and popular practices and styles. Discusses the music of different regions and periods in their social, political, ethnic, and aesthetic contexts. Credit is awarded for only one of MUS 019 or MUS 113.

MUS 020 Music of Scotland 4 Seminar, 3 hours; term paper, 1 hour; assigned listening, 2 hours. Examines the rich heritage of Scottish music from the Middle Ages to the modern day, including folk, popular, and classical traditions. Emphasis is on the music of the Scottish highlands and the bagpiper. Explores the role of music during war and peace within the context of Scottish history.

MUS 021 Canntaireachd: Scottish Classical Music 4 Lecture, 3 hours; term paper, 1 hour per quarter; practice, 3 hours. Prerequisite(s): none. Examines the Scottish classical music called Canntaireachd. In-depth study of the music, its leading performers and composers, within the context of Scottish history and culture. Special emphasis on the singing of the music as soloists and as a choir.
MUS 023 Audio Recording and Production 4
Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): none. Introduces the fundamentals of audio recording. Includes basic design and uses of a recording studio, digital audio workstations, microphones, and recording, processing, and mixing techniques. Course is repeatable to a maximum of 8 units.

MUS 026 Art of the Synthesizer 4
Lecture, 3 hours; discussion, 1 hour. Explores the history of synthesizers through the stories of pioneering electronic musicians. Introduces the concepts of modular synthesis through applied patch designs with virtual software. Cross-listed with MCS 026.

MUS 030A Harmony 4
Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): MUS 010; or a passing score on a diagnostic examination. MU 3 major are required to concurrently enroll in MUS 031A; or consent of instructor. First of a three-quarter long study of harmony. Includes diatonic primary and secondary chords in root position and inversions, four-part vocal writing, melodic harmonization, and introduction to non-chord tones. Highly recommended to complete this requirement during sophomore year. Open to non-majors with consent of instructor.

MUS 030B Harmony 4
Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): MUS 030A; Music majors are required to concurrently enroll in MUS 031B; or consent of instructor. Second of a three-quarter long study of harmony; diatonic chords and non-chord tones followed by diatonic seventh chords. Begins the study of chromatic harmony with secondary dominants. Highly recommended to complete this requirement during sophomore year. Open to non-majors with consent of instructor.

MUS 030C Harmony 4
Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): MUS 030B; MU 3 majors are required to concurrently enroll in MUS 031C; or consent of instructor. Last course of a three-quarter long study of harmony. Includes chromaticism associated with secondary dominants followed by secondary leading tone chords, the Neapolitan chord and augmented sixth chords, and modulations. Highly recommended to complete this requirement during sophomore year. Open to non-majors with consent of instructor.

MUS 031A Music Theory and Musicianship I 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MUS 010; or a passing score on a diagnostic examination. MUS majors are required to concurrently enroll in MUS 031A; or consent of instructor. First of a three-quarter-long applied skills-based course integrating concepts learned while concurrently enrolled in MUS 030B. Addresses application of non-chord tones to existing melodies and melodic dictation above a harmonic sequence going diatonic triads to diatonic seventh chords and secondary functional chords. Recommended to complete this requirement during sophomore year.

MUS 031B Music Theory and Musicianship I 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MUS 031A; Music majors are required to concurrently enroll in MUS 030B; or consent of instructor. Second of a three-quarter-long applied skills-based course integrating concepts from MUS 030B. Addresses application of non-chord tones to existing melodies and melodic dictation above a harmonic sequence going diatonic triads to diatonic seventh chords and secondary functional chords. Recommended to complete this requirement during sophomore year.

MUS 031C Music Theory and Musicianship I 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MUS 031B; or consent of instructor. Third of a three-quarter long applied skills-based course integrating concepts learned while concurrently enrolled in MUS 030C. Covers sight singing, harmonic dictation, and melodic dictation with secondary leading-tone, Neapolitan, and augmented-sixth chords. Highly recommended to complete this requirement during sophomore year.

MUS 037 Introduction to Composition 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): MUS 001, MUS 010, may be taken concurrently; or consent of instructor. Introduces the art of music composition through applied exercises. Covers basic computer music notation. Course is a prerequisite for Music Majors in the Composition Track.

MUS 044 Introduction to Songwriting 4
Lecture, 3 hours; activity, 3 hours. Prerequisite(s): none. Explores fundamentals of songwriting from writing lyrics to finding a structure. Focuses on analyzing several songs and techniques from various time periods and creating model exercises.

MUS 073A Dance of Mexico 2 Studio, 3 hours; extra reading, 1 hour; screening, 1 hour; individual studio, 1 hour. Prerequisite(s): none. Covers the traditional dances of Mexico at the beginning level. Includes attendance at dance concerts outside of class. Recommended for both nondancers and dancers. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable. Cross-listed with LNST 073A.

MUS 073B Dance of Mexico 2 Studio, 3 hours; extra reading, 1 hour; screening, 1 hour; individual studio, 1 hour. Prerequisite(s): LNST 073A/MUS 073A is recommended. Covers the traditional dances of Mexico at the beginning level. Includes attendance at dance concerts outside of class. Recommended for both nondancers and dancers. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable. Cross-listed with LNST 073B.

MUS 080 (E-Z) Private Instruction: Voice, Keyboard, and Strings 1
Individual study, 5 hours; studio, 0.5 hour. Consists of a half-hour lesson and practice for 5 to 10 hours each week (see the note regarding fees under the Major Requirements section). Offered as demand indicates. E. Voice; F. Classical Piano; G. Jazz Piano; I. Harpsichord; J. Carillon; K. Jazz Guitar; L. Electronic Bass Guitar; M. Lute; N. Classical Guitar; O. Viola Da Gamba; P. Piano Proficiency; Q. Organ; R. Violin; S. Viola; T. Violoncello; U. Double Bass Viol; V. Harp. Course is repeatable to a maximum of units.

MUS 081 (E-Z) Private Instruction: Brass, Woodwinds, Percussion, and Other Instruments 1
Individual study, 5 hours; studio, 0.5 hour. Consists of a half-hour lesson and practice for 5 to 10 hours each week (see the note regarding fees under the Major Requirements section). Offered as demand indicates. E. Trumpet; F. Trombone; G. Tuba; I. French Horn; J. Flute; K. Oboe; L. Clarinet; M. Bassoon; N. Saxophone; O. Recorder; P. Percussion; R. Bagpipe; S. Scottish Drums; Z. Caribbean Steel Pan. Course is repeatable.

Upper-Division Courses

MUS 111 Music Resources and References 2
Studio, hours; extra reading, 1 hour; individual study, 1 hour; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor and/or successful completion of one or more introductory course(s) in the discipline. Introduces the methods of finding and using music resources and references. Explores the musical resources of the UCR libraries and beyond. Topics include but are not limited to UCR’s music collections (print, online, and audio formats) including scores, databases, reference sources, journals, and multimedia.

MUS 112A History of Western Music: Middle Ages to 1700 4
Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): MUS 030A, MUS 030B, MUS 030C; or consent of instructor. An intensive survey of music history and literature from the Middle Ages to 1700. Involves score reading, listening, and analysis of pieces with emphasis on historical characteristics.

MUS 112B History of Western Music: 1700–1900 4
Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): MUS 030A, MUS 030B, MUS 030C; or consent of instructor. An intensive survey of music history and literature from the 1700 to 1900. Involves score reading, listening, and analysis of pieces with emphasis on historical characteristics.

MUS 112C History of Western Music: Twentieth-Century 4
Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): MUS 030A, MUS 030B, MUS 030C; or consent of instructor. An intensive survey of music history and literature from 1900 to the present. Involves score reading, listening, and analysis of pieces with emphasis on historical characteristics.
MUS 113 Brazilian Music 4 Lecture, 3 hours; extra reading, 2 hours; assigned listening, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Introduces the music of Brazil, focusing on the history and the current variety of musical languages, styles, and forms of the present. Analyzes the crucial question of national identity in Brazilian culture and society through the study of its music.

MUS 116 Opera 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Study of selected operas from the Western repertory for 1600 to the present.

MUS 115 Renaissance and Baroque Music of Latin Europe and Latin America 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): MUS 112A, MUS 112B, MUS 112C; or upper-division standing and consent of instructor. Study of the sacred and secular musics of Italy, France, the Iberian Peninsula, and Latin America, 1450-1750. Emphasis is on the repertoires, styles, and genres that are relevant to understanding the musical past of the Americas, from (Alta) California to South America.

MUS 117 Music and Ritual 4 Lecture, 3 hours; written work, 1 hour; fieldwork, 20 hours per quarter. Prerequisite(s): upper-division standing or consent of instructor. Examines music cross-culturally in a ritual context. Incorporates readings from ethnomusicology, anthropology, folklore, and performance studies. Addresses how music operates within specific ritual events and how it relates to cosmology. Also examines the role of music in achieving altered states (dreams, meditation, trance, and possession), as well as helping to constitute gendered authority.

MUS 118 Music, Politics, and Social Movements 4 Lecture, 3 hours; extra reading, 2 hours; assigned listening, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines the role of music in social and political movements. Emphasis is on understanding the textual and musical features of politically engaged music within its historical, social, and cultural context.

MUS 119 Javanese Music and Culture 4 Lecture, 3 hours; term paper, 1 hour; online discussion and listening, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines Javanese traditional and contemporary music. Focuses on the music of the Javanese gamelan and its relation to larger cosmological themes. Other topics include rural versus court traditions, popular music, mass media, piracy, Hindu roots, modernity, and local practices versus global trends. Cross-listed with AST 119.

MUS 120 Contemporary Native American Music 4 Lecture, 3 hours; extra reading, 2 hours; listening to prepared audio examples of music, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Explores the music of Native American peoples today, the contexts and behaviors with which such music is associated, and the ways these elements are discussed within Native communities. Emphasis is on “Pan Indian” music, including music for pow wows and syncretic religious music, and Native popular music, including folk, country, rock, and hip-hop.

MUS 122 Music and Performance in the Andes 4 Lecture, 3 hours; extra reading, 2 hours; assigned listening, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Introduction to the musical practices of the central Andean countries, including indigenous, mestizo, Creole, and Afro-Andean traditions. Music is presented as part of a broader realm of performance in the Andes, incorporating dance, ritual, drama, and popular culture, and its relationship with notions of identity, nationalism, modernity, folklore, and politics.

MUS 123 Southeast Asian Performance 4 Lecture, 3 hours; screening, 2 hours; extra reading, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Introduction to the roles and genres of expressive culture in Southeast Asia, including dance, music, theater, film, and digital culture. Performance is discussed as both a time-honored and a contemporary medium for cultural production, from the courts to everyday experience. Cross-listed with AST 123, ANTH 126, DNCE 123, and SEAS 123.

MUS 124 Music of Asian America 4 Lecture, 3 hours; music listening, 1 hour; individual study, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores music as a window on the cultural politics of Asian America. Examines expressive culture as a constitutive site for ethnic identities and emergent political formations. Covers music of Asian immigrants and of subsequent generations, including Asian American jazz and hip-hop. Cross-listed with AST 124.

MUS 125 Music of Central America, Mexico, and the Caribbean 4 Lecture, 3 hours; extra reading and listening to prepared tapes of music, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of different musical traditions from Central America, Mexico, and the Caribbean, with an emphasis on popular music. Examines the impact of intercultural contact on the musical styles of these regions. A background in Western music is not required.

MUS 126 Gender, Sexuality, and Music in Cross-Cultural Perspectives 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An overview of gendered performance genres from a number of cultures. Explores gender-specific music and notions of gender that are often constructed, maintained, transmitted, and transformed through music and performance. Cross-listed with ANTH 177, and GSST 126.

MUS 127 Music Cultures of Southeast Asia 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of music, dance, theatre, and ritual in the Philippines, Indonesia, Malaysia, Thailand, Myanmar (Burma), Laos, Cambodia, and Vietnam. Designed for the student interested in the performing arts and cultures of mainland and insular Southeast Asia. No Western music background is required. Cross-listed with ANTH 176, AST 127, DNCE 127, ETST 172, and SEAS 127.

MUS 130A Counterpoint 4 Lecture, 3 hours; activity, 3 hours. Prerequisite(s): MUS 030C, MUS 031C, or consent of instructor. A study of techniques of composing simultaneous, independent melodic lines within selected harmonic and stylistic contexts. Includes but is not limited to sixteenth-century counterpoint. To be taken during junior year.

MUS 130B Counterpoint 4 Lecture, 3 hours; activity, 3 hours. Prerequisite(s): MUS 130A; or consent of instructor. A study of advanced techniques of composing simultaneous, independent melodic lines within selected harmonic and stylistic contexts. Includes but is not limited to eighteenth-century counterpoint. To be taken during junior year.

MUS 131A Music Theory and Musicianship II 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): MUS 131B. Study and practice of music theory. Includes advanced ear training, sight singing, melodic and harmonic dictation, rhythm skills, keyboard skills, twentieth-century harmony, twelve-tone serialism, atonalism, and electronic and computer music.

MUS 131B Music Theory and Musicianship II 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): MUS 131A. Study and practice of music theory. Includes advanced ear training, sight singing, melodic and harmonic dictation, rhythm skills, keyboard skills, twentieth-century harmony, twelve-tone serialism, atonalism, and electronic and computer music.

MUS 131C Music Theory and Musicianship II 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): MUS 131B. Study and practice of music theory. Includes advanced ear training, sight singing, melodic and harmonic dictation, rhythm skills, keyboard skills, twentieth-century harmony, twelve-tone serialism, atonalism, and electronic and computer music.

MUS 133 Instrumentation 4 Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): MUS 030A, MUS 030B, MUS 030C; or consent of instructor. Investigation of the technical and color possibilities of various instruments, with scoring projects.

MUS 134 Orchestration 4 Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): MUS 133 or consent of instructor. Advanced scoring projects with emphasis on stylistic aspects and relationship of orchestral color to form.
MUS 136 Jazz Theory 4 Lecture, 3 hours; extra reading and listening to music tapes, 3 hours. Prerequisite(s): MUS 030A; MUS 031A or MUS 031B or MUS 031C; or consent of instructor. Examines concepts and practices in harmony, melody, rhythm, and form as they relate to jazz and other popular idioms. Provides basic ear training for the recognition of changes in traditional jazz tunes, primary blues forms, modulations, and classic jazz bridges.

MUS 137 Composition Seminar 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): MUS 030A, MUS 030B, MUS 030C: or consent of instructor. Assists in the successful composition of pieces in a variety of genres and media. Includes compositional models and the creation of musical scores. Course is repeatable to a maximum of 12 units.

MUS 138 Form and Analysis in Western Music 4 Lecture, 3 hours; activity, 3 hours. Prerequisite(s): MUS 030C, MUS 031C: strongly recommended music majors complete this course during their junior year, or first-quarter available upon transfer, or consent of instructor. Studies the dynamic design produced by musical elements functioning in context and their significance in shaping music. Explores different approaches to analysis using works in contrasting styles and forms and through practical application of course material.

MUS 140 American Musical Subcultures: A Genealogy of Rock 4 Lecture, 3 hours; extra reading, 0 to 2; listening, 2-3 hours. Prerequisite(s): upper-division standing or consent of instructor. A historical and cultural overview of the genre of American popular music known as "rock." Covers themes ranging from musical form and structure, aesthetics, and audio technology to community and individualism, gender and racial identity, political resistance, and the music industry. Cross-listed with HISA 139.

MUS 140L American Musical Subcultures: A Genealogy of Rock Practicum 4 Lecture, 3 hours; practicum, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; requires concurrent enrollment in 080E, 080G, 080M, 080K, 081P or 180E, 180G, 180M, 180K, 181P, or enrollment in instrument lessons on another rock instrument; or consent of instructor. A historical and cultural overview of the genre of American popular music known as "rock." Covers themes ranging from musical form and structure, aesthetics, and audio technology to community and individualism, gender and racial identity, political resistance, and the music industry.

MUS 142 Film and Video Game Scoring 4 Lecture, 3 hours; discussion, 1 hour; activity, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. An introduction to scoring films and video games. Explores instrumentation, drama, orchestration, and new technologies in a multimedia context. Discusses approaches to storytelling in virtual, digital, and cinematic art forms.

MUS 145A Digital Audio and Sound 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. College math is recommended. An introduction to the theory and practice of manipulating digital sound. Provides an understanding of digital audio devices associated with media production and of audio processing in general. Topics include basic psychoacoustics, digital audio theory, and digital audio editing.

MUS 145B Digital Audio and Sound 4 Lecture, 3 hours; laboratory, 4 hours. Prerequisite(s): MUS 145A or theory proficiency and practical experience in digital audio. Advanced theory and practice of manipulating digital sound. Includes sound processing, synthesis, and composition, as well as multimedia and audiovisual composition and interactive media production. Provides an understanding of dedicated software for sound, music, and multimedia, including the programming environment Max/MSP. Course is repeatable to a maximum of 8 units.

MUS 146 Genealogy of Electronica 4 Lecture, 3 hours; term paper, 1 hour; online discussion and listening, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the history of electronica and electronic music. Focuses on particular issues, including youth culture, dance and ecstatic trance, subcultures and club cultures, hallucinogenic drugs and psychedelic aesthetics, globalization, audio piracy, media and audio technologies, music and politics, and gender and sexuality.

MUS 147 Advanced Contemporary Analysis: Music After 1945 4 Lecture, 3 hours; activity, 3 hours. Prerequisite(s): MUS 138 or consent of instructor. A study of the diverse range of styles and movements of Western art music from 1945 through the present. Examines critical repertoire through a historical context including issues of pitch derivation, formal architecture, and compositional aesthetics. Satisfactory (S) or No Credit (NC) grading is not available.

MUS 148 Sound Studies and Sound Art 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Introduction to the interdisciplinary field of sound studies and sound art. Explores cultural, social, political, and philosophical issues of sound, listening, and auditory media. Examines the contemporary practices of sound production including the experimental field of sound art. Cross-listed with GBST 148.

MUS 149 Composition Forum and Studio 4 Colloquium, 1.5 hours; consultation, 1.5 hours; individual study, 3 hours. Prerequisite(s): MUS 037, restricted to class level standing of junior, or senior; open to Music Majors in the Composition Track; or consent of instructor. Individual or group lessons featuring applied composition exercises and listening assignments in various styles. Students share works in progress and attend guest lectures during a weekly forum. Course is repeatable to a maximum of 16 units.

MUS 150A Instrumental Technique: Strings 2 Lecture, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Study of basic techniques of orchestral string instruments.

MUS 150B Instrumental Technique: Woodwinds 2 Lecture, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Study of basic techniques of orchestral woodwind instruments.

MUS 150C Instrumental Technique: Brass 2 Lecture, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Study of basic techniques of orchestral brass instruments.

MUS 150D Instrumental Technique: Percussion 2 Lecture, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Study of basic techniques of orchestral percussion instruments.

MUS 150E Instrumental Technique: Voice Studio 2 Studio, 4 hours. Prerequisite(s): MUS 080E and MUS 180E. An introduction to performance that provides singers an opportunity to present and perform the material on which they are currently working. Also reviews the International Phonetic Alphabet and how it may be applied to improve a singer’s pronunciation and understandability by an audience. Course is repeatable to a maximum of 4 units.

MUS 151 Orchestral Conducting 4 Lecture, 3 hours; studio, 2 to 3 hours. Prerequisite(s): consent of instructor. Study of choral repertoire, rehearsal methods, voice production, and techniques of conducting.

MUS 152 Choral Conducting 4 Lecture, 3 hours; studio, 2 to 3 hours. Prerequisite(s): consent of instructor. Study of choral repertoire, rehearsal methods, voice production, and techniques of conducting.

MUS 153 Homosexuality and Music 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Uses a topical rather than a chronological approach to investigate homosociality on the part of composers, performers, critics, theorists, and historians and how this has shaped the history of music in the West. Cross-listed with LGBT 153.

MUS 154 (E-Z) Critical Approaches to the Western Canon 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): MUS 112A; MUS 112B; MUS 112C. Critical study of selected repertoires within Western music, and the multiple and potentially problematic aspects of their construction as iconic and paradigmatic. E. Beethoven: The Music &the Myth.

MUS 155 (E-Z) Seminar in Dance and Music 4 Seminar, 3 hours; term paper, 3 hours. Introduces relationships and representations between music and dance. Explores musical and choreographic form, compositional strategies, hybridization of style, cultural meanings and registers in which these were made, the agencies such representations enabled, interpretive communities, and cross-cultural interactions. Cross-listed with DNCE 155 (E-Z).
MUS 155E Representations of Spain in Dance and Music, 1700-2000 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces representations of Spain articulated in music and dance of Europe and the Americas from the eighteenth through twentieth centuries. Cross-listed with DANCE 155E.

MUS 155F The Ballets Russes 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores how the Diaghilev Ballets Russes' repertory and collaborative practices challenged the nature of artistic labor; negotiated traditional patronage and new commercial modes; engaged with cultural nationalism, gender role contention, and emerging models of sexuality, and deployed representational strategies that played into period debates about power and social organization. Cross-listed with DANCE 155F.

MUS 157 Topics Interdisciplinary Approaches to Composition 4 Lecture, 3 hours; activity, 1 hour, extra reading, 1 hour; term paper, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior, or consent of instructor. Examines interdisciplinary and critical approaches to composition (understood in a broad sense) that are not part of the regular curricular offerings. Course content varies and is announced as the course is offered. Course is repeatable as content or topic changes to a maximum of 12 units.

MUS 160 Orchestra 1 to 2 Studio, 2 to 6 hours. Prerequisite(s): consent of instructor. Study and performance of standard orchestral literature. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. May be repeated for credit.

MUS 161 Collegium Musicum 1 to 2 Activity, 2 to 6 hours. Prerequisite(s): consent of instructor. Study and performance of Medieval, Renaissance, and Baroque music. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. May be repeated for credit.

MUS 162 University of California, Riverside Chorale 1 to 2 Studio, 2 to 6 hours. Prerequisite(s): consent of instructor. Study and performance of standard choral literature. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 32 units.

MUS 163 Chamber Singers 1 to 2 Studio, 2 to 6 hours. Prerequisite(s): consent of instructor. Study and performance of works selected from different genres and periods. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable.

MUS 164 Jazz Ensemble 1 to 2 Studio, 2 to 6 hours. Prerequisite(s): consent of instructor. Study and performance of literature for large jazz ensemble and stage band, and preparation of improvised solos. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable.

MUS 165 Concert Band 1 to 2 Studio, 2 to 6 hours. Prerequisite(s): consent of instructor. Study and performance of literature for the concert band. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable.

MUS 166 (E-Z) Chamber Music 1 to 2 Studio, 3 hours. Study and performance in varied small ensembles. E. Musical Instrument Digital Interface (midi) Ensemble; F. Improvisatory Ensemble; G. Chamber Music. Course is repeatable to a maximum of units.

MUS 167 Senior Recital 1 to 2 Activity, 6 to 12 hours. Prerequisite(s): consent of instructor. Preparation and presentation of a formal recital. Limited to advanced performers only. Graded Satisfactory (S) or No Credit (NC).

MUS 168 Javanese Gamelan Ensemble: Beginning 2 Studio, 6 hours. Prerequisite(s): upper-division standing and consent of instructor. Study and performance of the Central Javanese gamelan, consisting mainly of gongs and gong-chime instruments. Readings and discussions focus on Javanese culture. Course is repeatable. Cross-listed with AST 168 and SEAS 168.

MUS 169 Taiko Ensemble 1 Studio, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Study and performance of Japanese drumming. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable. Cross-listed with AST 169.

MUS 170 Rondalla Ensemble 1 to 2 Studio, 2 to 4 hours. Prerequisite(s): upper-division standing or consent of instructor. Study and performance of the Filipino rondalla, an ensemble consisting of various sizes of lute-like and guitar-like instruments. Discussions focus on Filipino culture. Cross-listed with AST 170 and SEAS 170. Courses is repeatable.

MUS 172 Chamber Orchestra 1 Studio, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Participation in a performance ensemble comprised mainly of strings, with occasional winds and horns as needed. Includes string techniques instruction. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable to a maximum of 4 units.

MUS 174 Latin American Music Ensemble 1 to 2 Studio, 2 to 6 hours. Prerequisite(s): upper-division standing or consent of instructor. Study and performance of select Latin American folk music traditions, with special emphasis on music of the Andean region. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work. Course is repeatable.

MUS 175A Beginning Mariachi Ensemble 1 to 2 Studio, 3 hours; individual studio, 1-2 hours. Prerequisite(s): upper-division standing or consent of instructor. A study and performance of selections from the Mexican folk music tradition. Emphasizes mariachi and son jarocho. Includes popular corridos and rancheras. Students who participate in a performance submit a written review receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

MUS 175B Intermediate Mariachi Ensemble 1 to 2 Studio, 3 hours; individual studio, 1-2 hours. Prerequisite(s): MUS 175A or consent of instructor. A study and performance of selections from the Mexican folk music tradition. Emphasizes mariachi and son jarocho. Includes popular corridos and rancheras. Students who participate in a performance receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

MUS 176 Bagpipe Ensemble 1 Studio, 2 hours. Prerequisite(s): consent of instructor. Study and performance of Scottish bagpipe music. Students who participate in a performance receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

MUS 177 Music of North India: Tabla (drums) 1 to 2 Studio, 2 to 4 hours. Prerequisite(s): upper-division standing and consent of instructor. Explores the tradition of the Hindustani/North Indian tabla, which is a pair of drums that accompany improvised solos on melody instruments such as the sitar. Considers the tabla as a virtuosic solo instrument. Course is repeatable.

MUS 178 Bluegrass Ensemble 1 Studio, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. The study and performance of bluegrass music (instrumental and vocal) from the Appalachian region. Explores both traditional and contemporary styles. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

MUS 179 Music Improvisation Ensemble 1 to 2 Studio, 3 to 6 hours. Prerequisite(s): upper division standing and consent of instructor. Participation in an improvisational ensemble comprised of electronic (preferably laptop computer based) and/or electro-acoustical musical instruments. Rehearsals will cover a range of improvisational techniques from highly structured to free form and from tonality to noise experimentation. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable to a maximum of 24 units.
MUS 180 (E-Z) Private Instruction: Voice, Keyboard, and Strings 2 Individual study, 5 hours; studio, 1 hour. Consists of an one-hour lesson and practice for 5 to 10 hours each week (see the note regarding fees under the Major Requirements section). Offered as demand indicates. E. Voice; F. Classical Piano; G. Jazz Piano; I. Harpsichord; J. Carillon; K. Jazz Guitar; L. Electric Bass Guitar; M. Lute; N. Classical Guitar; O. Viola Da Gamba; P. Piano Proficiency; Q. Organ; R. Violin; S. Viola; T. Violoncello; U. Double Bass Viol; V. Harp. Course is repeatable to a maximum of units.

MUS 181 (E-Z) Private Instruction: Brass, Woodwinds, Percussion, and Other Instruments 2 Individual study, 5 hours; studio, 1 hour. Consists of an one-hour lesson and practice for 5 to 10 hours each week (see the note regarding fees under the Major Requirements section). Offered as demand indicates. E. Trumpet; F. Trombone; G. Tuba; I. French Horn; J. Flute; K. Oboe; L. Clarinet; M. Bassoon; N. Saxophone; O. Recorder; P. Percussion; R. Bagpipe; S. Scottish Drums; Z. Caribbean Steel Pan. Course is repeatable.

MUS 183 Percussion Ensemble 1 to 2 Studio, 2 to 4 hours. Prerequisite(s): upper-division standing or consent of instructor. Study and performance of percussion ensemble literature. Course is repeatable.

MUS 184 Genealogy of Hip Hop 4 Lecture, 3 hours; extra reading, 3 hours; listening, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces hip hop culture from its origins to its contemporary global spread. Focuses particularly on rap music, addressing themes evoked in hip hop practice, particularly regionalism, feminism, gender identity, racialization, and globalization.

MUS 185 Arts, Management, and Community 4 Lecture, 4 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to business and arts management including the study of film and television production, stage management, and music production. Offers hands-on experience for practicing management skills working in partnership with local organizations and artists of Riverside and the Inland Empire. Cross-listed with TFDP 185. Credit is awarded for only one of MUS 185/TFDP 185 or MUS 185S/TFDP 185S.

MUS 185S Arts, Management, and Community 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An introduction to business and arts management including the study of film and television production, stage management, and music production. Offers hands-on experience for practicing management skills working in partnership with local organizations and artists of Riverside and the Inland Empire. Cross-listed with TFDP 185S. Credit is awarded for only one of MUS 185/TFDP 185 or MUS 185S/TFDP 185S.

MUS 190 Special Studies 1 to 5 Prerequisite(s): To be taken with the consent of the chair of the department as a means of meeting special curricular problems. Course is repeatable to a maximum of 12 units.

MUS 191 (E-Z) Seminar in Music 4 Seminar, 3 hours; individual study, 3 hours. Topics dealing with aspects of individual composers and genre studies. F. Music Of Beethoven; H. Construction Of Early Instruments; I. Performance Practice; J. Music Of Haydn; K. Interpretation Of Symphonic Literature; M. Russian Romantic Music; N. Early American Music; O. Music Of Mozart; R. Survey Of Sonatas From The Seventeenth Through The Twentieth Centuries; S. The Evolution And Practice Of Jazz; U. Music Criticism; V. Studies In Twentieth-century Music.

MUS 194 Independent Reading 1 to 2 Prerequisite(s): junior standing Independent reading in materials not covered in course work. Normally begun in the junior year. May be repeated for credit. Total credit for course 194 may not exceed 4 units.

MUS 195 Senior Thesis 1 to 4 Required for students who are candidates for honors in music. Open to other music majors by invitation. Total credit may not exceed 6 units.

MUS 198 R'Course: Variable Topics 1 Activity hours vary per R'Course proposal, Prerequisite(s): permission needed from department; soyomore standing or better. An opportunity for UCR undergraduate students to develop leadership skills, innovate the undergraduate curriculum, and promote democratic, experiential education. Original course topics are variable and unique from other departmental course offerings, designed to highlight the student facilitators’ expertise while working closely with a faculty mentor. Graded Satisfactory (S) or No Credit (NC).Course is repeatable as topics change to a maximum of 8 units.

MUS 198I Individual Internship 1 to 12 variable hours, Prerequisite(s): upper-division standing, evidence of prior arrangements with the professional(s) involved; approval by the department chair after consulting the music faculty. Work with an appropriate professional individual or organization to gain experience and skill in the student’s chosen specialty. Graded Satisfactory (S) or No Credit (NC). May be repeated to a total of 16 units.

MUS 199H Senior Honors Research 1 to 5 Research, 3-15 hours.

Graduate Courses

MUS 200 Music Bibliography 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Fundamentals of music bibliography. Emphasizes reference materials and other standard bibliographical tools. Covers research tools and professional writing.

MUS 201 Proseminar in the Analysis of Western Music 4 Seminar, 3 hours; individual guided research, 3 hours. Prerequisite(s): graduate standing. Analysis of selected musical works from various periods exploring different music-theory models.

MUS 206 Proseminar in Musicology 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): MUS 200. Study of significant issues and recent developments in musicology and criticism. Study and practice of expository writing about music. Covers research methods and professional ethics.

MUS 207A Proseminar in Ethnomusicology: History and Foundations 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing. Explores the early history of ethnomusicology as a discipline. Includes its foundation in comparative musicology and its connections with folklore.

MUS 207B Proseminar in Ethnomusicology: Current Theoretical Directions 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing. Explores ethnomusicology as a discipline. Focuses on the relationships between ethnomusicology and musicology and on ethnomusicology as an interdisciplinary field. Draws from performance studies, ethnopoetics, postmodernism, transcendental theories, and postcolonialism. Covers research methods and professional ethics.

MUS 207C Proseminar in Ethnomusicology: Public Sector 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Explores ethnomusicology careers in the public sphere outside educational institutions. Draws from ethnomusicology, folklore, anthropology, and public history. Covers archives, museums, non-profit organizations, tourism, prisons, community-driven cultural projects, and public writing. Addresses national, state, and local infrastructures. Explores the skills, methods, and ethics involved in a public sphere career.

MUS 232 Soundtrack Composition 3 Lecture, 3 hours; individual study, 1 hour. Prerequisite(s): MUS 145A or MUS 145B or consent of instructor; graduate standing or both upper-division standing and keyboard proficiency. Concerns musical composition for visual art and entertainment. Covers classic underscoring for dramatic effect, experimentation with music use in film and live-scripted situations, and composition of a musical piece. May be taken Satisfactory (S) or No Credit (NC) by students advanced to candidacy for the Ph.D.

MUS 249 Audiovisual and Multimedia Composition 4 Lecture, 3 hours; individual study, 4 hours. Prerequisite(s): graduate standing. Explores new fields of artistic creativity emerging from the convergence of sound and image. Focuses on audiovisual and multimedia composition, as well as on the collaboration process embracing research, composition, and performance. Encourages exploration of the links among sound, image space, environment, and digital media. May be taken Satisfactory (S) or No Credit (NC) by students advanced to candidacy for the Ph.D.
MUS 251 Music in Computer Gaming 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces students to the history and theory of music use in computer games, including the development of classical commercial gaming and game design and the related use of dramatic music. Topics cover adventure game history, narrative underscoring, commercial computer game genres, and contemporary issues related to interactivity, performance, and reception.

MUS 252 Notation For Composers 4
Lecture, 3 hours; individual study, 4 hours. Prerequisite(s): upper-division standing or consent of instructor. Combines a critical study of notation history and survey of contemporary techniques for the conceptualization and display of visual information with computer-oriented musical applications. Includes common practice computer music notation, graphics software, and the translation of data between music software. Students interested in candidacy for the Ph.D. receive a Satisfactory (S) or No Credit (NC) grade.

MUS 254 Listening 4
Seminar, 3 hours; activity, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An in-depth study of soundscape, deep listening, mediated listening, and improvisation. Applies concepts from a variety of situated listening practices. Requires active music making and participation in embodied listening activities. Ability to read musical notation not required. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

MUS 255 Field Methods in Ethnomusicology 4
Seminar, 3 hours; research, 1 hour; field, 2 hours. Prerequisite(s): graduate standing. A theoretical and practical introduction to fieldwork in music and performance. Each student focuses on a different performance group and documents its activities. Covers interviewing, audiotyping, videotaping, transcribing music and dance, and describing performance events.

MUS 256 Electroacoustic and Computer Music Composition 4
Seminar, 3 hours; laboratory, 3 hours. Prerequisite(s): graduate standing or consent of instructor; MATH 004 or equivalent is recommended. Covers electroacoustic and computer music composition techniques in the context of development of original pieces. Topics include electronic and computer music history and theory, as well as digital audio and sound processing theory (including synthesis techniques and real-time sound processing and instrument design).

MUS 257 Music and Audio Production 4
Lecture, 3 hours; studio, 8 hours per quarter; individual study, 3 hours. Prerequisite(s): MUS 145A; MUS 145B or consent of instructor. Addresses techniques of commercial music production, including recording, editing, sequencing, notation preparation, and sound reinforcement. Combines an examination of the history of commercial sound aesthetics with structured exercises in producing, including software benchmarking, project management, budgeting, audio devices, mastering, and design for sound reinforcement and mixing. May be taken Satisfactory (S) or No Credit (NC) by students advanced to candidacy for the Ph.D.

MUS 258 Composition Seminar 4
Seminar, 3 hours; consultation, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Individual projects and issues in musical composition. Course is repeatable.

MUS 259 Musical Semiotics: Approaches to Meaning and Form 4
Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Study of musical semiotics focusing on recent theories and related areas such as cybernetics, cognitive science, and theory of systems. Examines questions of meaning and form in the domains of aesthetics, musical theory, analysis, composition, performance, and new approaches of digital media and music.

MUS 261 Seminar in Performance Practice 4
Seminar, 3 hours; consultation, 1 hour. Prerequisite(s): MUS 200 and MUS 201, or consent of instructor. Investigations into the historically accurate performance styles of music based on information contemporary with the music. Topics and content will vary each quarter depending on student interest. May be repeated for up to 8 units.

MUS 262 Seminar in Western Music History 4
Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): MUS 206, graduate standing or consent of instructor. Addresses selected issues in the history of music in the context of the social, political, religious, and intellectual culture of the West. Focuses on historical and analytical literature on particular historical periods. Course is repeatable.

MUS 263 Seminar in Special Topics in Musicology 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): MUS 206, graduate standing or consent of instructor. Focuses on current scholarship in musicology and related fields with a strong critical content. Addresses particular topics relative to their historical and stylistic periods. Topics include nationalism, gender and sexuality in music, identity in music, individual genres and composers, and exoticism. Course is repeatable.

MUS 264 Music in Fantasy and Science Fiction 4
Seminar, 3 hours; written work, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A survey of the use of music in science fiction and fantasy. Covers Tales of Hoffman and Aniara to Star Trek and Solaris. Examines music’s textural, sonic, and political roles in terms of traditional functions, as well as those associated with the explication of the synthetic and fantastic.

MUS 265 Electroacoustic Music: History, Theory, and Aesthetics 4
Lecture, 3 hours; individual study, 4 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on historical, theoretical, and esthetic issues of electroacoustic music from the beginning of the twentieth century to the present. Topics include foundations of electroacoustic music, electronic music studios, analog and digital technology, sound art, and live electronics. Includes listening to and analysis of key works of electroacoustic music.

MUS 266 Seminar in Improvisational Studies 4
Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on specific musical concepts and processes as well as broader sociocultural issues related to improvisational performance. Designed for graduate and approved upper-level undergraduate students interested in the scholarly study of music improvisation and contemporaneous musicality.

MUS 270 Special Topics in Ethnomusicology 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on current scholarship in ethnomusicology and related fields. Emphasis is usually on theory and methodology or the study of particular performance traditions. Theme varies each quarter. Course is repeatable to a maximum of 24 units.

MUS 271 Area Studies Research in Music 4
Seminar, 3 hours; extra reading, 2 hours; listening, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Focuses on historical and ethnomusicological literature of particular geographical areas. Discusses scholarly literature on music and expressive culture generally, including dance, theater, and ritual of a particular geocultural region. Course is repeatable as topics change to a maximum of 8 units.

MUS 272 Musics of Southeast Asia 4
Seminar, 3 hours; term paper, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on historical and ethnomusicological literature of Southeast Asia and its diasporas. Discusses scholarly literature on music and expressive culture generally, including dance, theater, and ritual. Cross-listed with SEAS 201.

MUS 290 Directed Studies 1 to 6
Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

MUS 291 Individual Study in Coordinated Areas 1 to 6
Individual Study, 6 to 25 hours. Prerequisite(s): graduate standing, consent of instructor and graduate advisor. A program of study designed to assist graduate candidates who are preparing for M.A. comprehensive or Ph.D. qualifying examinations. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

MUS 292 Concurrent Analytical Studies in Music 1 to 4
Prerequisite(s): graduate standing; approval of instructor and graduate advisor. Each 292 course will be taken concurrently with some 100-series course but on an individual basis. It will be devoted to research, criticism, and written work of a graduate order commensurate with the number of units elected. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

MUS 293 Composition Practicum 1
Lecture, 1 hour; practicum, 8 hours per quarter; individual study, 3 hours; Studio, 16 hours per quarter. Prerequisite(s): graduate standing or consent of instructor. A series of performance activities and appreciation for composers. Includes production of a composition concert and attendance at designated presentations in music and scholarship. Addresses career and job market guidance. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 6 units.
MUS 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing consent of instructor; graduate advisor. Individual graduate student research under the sponsorship of specific faculty members. Addresses topics and selected problems in theoretical and historical research in music not directly related to student’s thesis. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

MUS 299 Research For Thesis Or Dissertation 1 to 12 Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

MUS 301 Directed Studies in the Teaching of Music 3 Seminar, 2 hours; consultation, 1 hour. Prerequisite(s): graduate standing. A program of weekly meetings and individual formative evaluation required of new Music teaching assistants. Covers instructional methods and classroom/section activities. Conducted by department faculty. Graded Satisfactory (S) or No Credit (NC).

MUS 302 Teaching Practicum 1 to 4 Lecture, 2 hours; clinic, 1 hour; practicum, 1 hour. Prerequisite(s): appointment as a teaching assistant in Music; graduate standing. Supervised teaching in undergraduate Music courses. Required of all Music teaching assistants. Graded Satisfactory (S) or No Credit (NC).

MUS 400 Research and Professional Development Workshop 1 Workshop, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Addresses recent trends and methods of research. Covers strategies for job placement and public speaking. Organized in conjunction with the Music Graduate Students Association. Topics presented by faculty and guest lecturers. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 4 units.

Upper-Division Courses

NASC 188 Introduction to Oral Presentations 2 Seminar, 1 hour; discussion, 1 hour. Prerequisite(s): enrollment in the MARC-USTAR program. Prepares science majors for oral presentations and formal research talks. Includes student presentations and discussions. Also covers the electronic preparation of figures and tables.

NASC 189 Reading and Analysis of Scientific Articles 1 Lecture, 1 hours. Prerequisite(s): enrollment in the MARC-USTAR program. Introduces the analysis of biomedically-aimed scientific articles. Includes reading of current research papers, presentation of data, and critiquing of papers.

NASC 191S Seminar in Sacramento 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor; admission to the UCR Center at Sacramento Program. Examines aspects of the Sacramento area, including cultural, political, and governmental institutions and the sciences, arts, and media. Requires a substantial research paper or project, the result of guided independent work drawing on the unique aspects of Sacramento. Required of participants in the UCR Center at Sacramento Program. Cross-listed with HASS 191S, and ENGR 191S.

NASC 192 Introduction to Stem Teaching 1 Seminar, 1 hour. Prerequisite(s): EDUC 003, may be taken concurrently; Restricted to class level standing of sophomore, junior, or senior; and consent of instructor. Covers preparation for a career in science/math pedagogy and evaluation of student learning. Designed for students who plan to teach science or mathematics in the public school system.

NASC 192L Introduction to Stem Teaching Laboratory 1 Discussion, 1 hour; laboratory, 2 hours. Prerequisite(s): EDUC 003, may be taken concurrently, NASC 192, may be taken concurrently; Restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Covers preparation for a career in science/math pedagogy and evaluation of student learning. Laboratory field work includes participation and observation in public school classrooms.

NASC 198 R’course: Variable Topics 1 Activity, 1 to 3 hours. Prerequisite(s): permission needed from department; sophomore standing or better. An opportunity for UCR undergraduate students to develop leadership skills, innovate the undergraduate curriculum, and promote democratic, experiential education. Original course topics are variable and unique from other departmental course offerings, designed to highlight the student facilitators’ expertise while working closely with a faculty mentor. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as topics change to a maximum of 8 units.

NASC 198I Individual Internship in the Natural and Agricultural Sciences 1 to 12 Internship, 2 to 24 hours; written work, 1 to 12 hours. Prerequisite(s): upper-division standing in the College of Natural and Agricultural Sciences (CNAS); consent of instructor. An internship to provide CNAS students with on-the-job experience in government, industry, or clinical laboratories. Each individual project must be approved by the CNAS associate dean and the laboratory director where the internship is to be carried out. Requires a written report. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

Natural and Agricultural Sciences

Subject abbreviation: NASC
College of Natural and Agricultural Sciences

Lower-Division Courses

NASC 091 Freshman Advising Seminar in the Natural and Agricultural Sciences 1 Seminar, 1 hour. Prerequisite(s): first-year freshman standing in the College of Natural and Agricultural Sciences (CNAS). Introduction to UCR for students in the sciences. Includes selection of majors, curriculum planning, career options and goals in the sciences, opportunities for undergraduate research, development of learning and study skills, ethics in research and education, and an introduction to the faculty in CNAS. Graded Satisfactory (S) or No Credit (NC). Credit is awarded for only one of BCH 095, NASC 091, or NASC 093.

NASC 092 Lower Division Seminar in the Natural and Agricultural Sciences 1 Seminar, 10 to 12 hours per quarter. Prerequisite(s): freshman or sophomore standing; or consent of instructor. Introduction to one of the many areas of study explored by the faculty and alumni of natural and agricultural sciences in a small-group, highly interactive format. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 3 units of any combination of ENGR 092, HASS 092, and NASC 092; students may enroll in only 1 unit of ENGR 092, HASS 092, or NASC 092 per quarter.

NASC 093 Freshman Advising Seminar in the Natural and Agricultural Sciences 2 Seminar, 1 hour; discussion, 1 hour. Prerequisite(s): first-year freshman standing in the College of Natural and Agricultural Sciences (CNAS). Introduction to UCR for students in the sciences. Includes selection of majors, curriculum planning, career options and goals in the sciences, opportunities for undergraduate research, development of learning and study skills, ethics in research and education, and an introduction to the faculty and professional academic advisors in CNAS. Graded Satisfactory (S) or No Credit (NC). Credit is awarded for only one of BCH 095, NASC 091, or NASC 093.

NASC 096 Environment and Society 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): lower-division standing or consent of instructor. Presents major environmental issues facing society from an interdisciplinary perspective. Topics may include water, energy, climate change, and urbanization. Cross-listed with ENGR 096, and HASS 096.

NASC 189 Reading and Analysis of Scientific Articles 1 Lecture, 1 hours. Prerequisite(s): enrollment in the MARC-USTAR program. Introduces the analysis of biomedically-aimed scientific articles. Includes reading of current research papers, presentation of data, and critiquing of papers.

NASC 191S Seminar in Sacramento 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor; admission to the UCR Center at Sacramento Program. Examines aspects of the Sacramento area, including cultural, political, and governmental institutions and the sciences, arts, and media. Requires a substantial research paper or project, the result of guided independent work drawing on the unique aspects of Sacramento. Required of participants in the UCR Center at Sacramento Program. Cross-listed with HASS 191S, and ENGR 191S.
Nematology

Subject abbreviation: NEM
College of Natural and Agricultural Sciences

Adler R. Dillman, Ph.D., Chair
Department Office, 207B Genomics
(951) 827-3912
nematology.ucr.edu

Professor
Adler R. Dillman, Ph.D.
Isgouhi Kaloshian, Ph.D.

Professors Emeriti
James G. Baldwin, Ph.D.
Edward G. Platzer, Ph.D.
(Entomology/Biology)
Philip A. Roberts, Ph.D.

Associate Professor
Paul De Ley, Ph.D. (Emeritus)

Assistant Professor
Simon/Niles Groen, Ph.D.
Jieu-in Yang, Ph.D.

Professors of Cooperative Extension
J. Ole Becker, Ph.D.
Antoon T. Ploeg, Ph.D.
Andreas Westphal, Ph.D.

Affiliated Faculty
Michael V. Mckenny, Ph.D. (Emeritus)

Cooperating Faculty
Morris F. Maduro, Ph.D. (Molecular, Cell, and Systems Biology)
Meera G. Nair, Ph.D. (Biomedical Sciences)

Nematology is the study of roundworms, the most genetically diverse invertebrate phylum that occurs worldwide in virtually every environment. Only about 3 percent of all species have been studied or identified, and these include significant parasites of humans, animals, and plants. A primary mission of the Department of Nematology is to develop environmentally sound approaches to manage nematodes that worldwide cause nearly $100 billion annual damage to crops. Other objectives are to use nematodes that benefit agriculture and the environment as agents of nutrient cycling and soil fertility and for biological control of some insect pests. Additional objectives focus on nematodes as fundamental models for addressing basic biological questions in genetics, development, and molecular biology. The department offers graduate and postgraduate opportunities in biocontrol, ecology, genetics, molecular biology, physiology, and systematics. It offers specific expertise in applied nematode problems of subtropical and desert agriculture.

A graduate program in Nematology is offered within a broad biological context. Students are enrolled in a more general department or interdepartmental program that provides a core of graduate courses. The general departments may include Botany and Plant Sciences, Entomology, Evolution, Ecology, and Organismal Biology, Microbiology and Plant Pathology, and Environmental Sciences as well as a wide range of interdepartmental programs. Dissertation research opportunities, major research professor, curriculum advisor, and specific courses are provided by the Department of Nematology to complement requirements of the more general department or program.

Upper-Division Courses

NEM 120 Soil Ecology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 002 or BIOL 005A, BIOL 05LA; CHEM 001C, CHEM 01HC, or CHEM 01HC, CHEM 01HL; ENSC 100; or consent of instructor. A study of soil biota and their relationships with plants and the soil environment. Emphasizes life strategies of soil organisms and methods to study them. Examines importance of microbial and faunal groups from the rhizosphere to the ecosystem. Explores impact on soil fertility, carbon and nitrogen cycles, and Earth’s climate. Cross-listed with ENSC 120.

NEM 159 Biology of Nematodes 3 Lecture, 2 hours; discussion and demonstration, 1 hour. Prerequisite(s): BIOL 005A, BIOL 05LA or BIOL 020, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 006C and CHEM 086C or CHEM 086C and CHEM 086LC, MATH 007B or MATH 009B or MATH 099B, PHYS 002C or PHYS 02HC, PHYS 02LC or PHYS 02HL, BCH 100 or BCH 110A or BCH 110A, one course in statistics. An introduction to the biology of nematodes. Topics include the morphology, physiology, development, genetics, behavior, and ecology of nematodes from parasitic and free-living habitats. In the discussion and demonstration sections, students observe the comparative morphology and biology of nematodes and give oral presentations on selected nematode life histories. Cross-listed with BIOL 159.

NEM 190 Special Studies 1 to 4 Individual Study, 3 to 12 hours. Prerequisite(s): consent of instructor and Department Chair. Individual study, directed by a faculty member, to meet special curricular needs. A written report is required. Course is repeatable.

NEM 197 Research For Undergraduates 1 to 4 Laboratory, 3 to 12 hours. Prerequisite(s): consent of instructor and Department Chair. Five-day lecture and laboratory course on morphological identification of economically important plant parasitic nematodes in Tylenchida and Dorylaimida using dissecting and bright field microscopy. Includes preparation of microscope slides, diagnosis of field samples, and use of diagnostic keys. Offered in summer only.

NEM 205 Identification of Plant Parasitic Nematodes 1 Lecture, 5 hours; laboratory, 25 hours. Prerequisite(s): graduate standing or consent of instructor. Five-day lecture and laboratory course on morphological identification of economically important plant parasitic nematodes in Tylenchida and Dorylaimida using dissecting and bright field microscopy. Includes preparation of microscope slides, diagnosis of field samples, and use of diagnostic keys. Offered in summer only.

NEM 206 Phytopathogens: Nematodes 2 Lecture, 1 hour; laboratory, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Recognition, diagnosis, biology, and control of major nematode diseases of plants. Laboratory covers identification techniques, soil sampling and processing techniques, and process of pathogenesis. Cross-listed with PLPA 206.

NEM 250 Seminar in Nematology 1 Seminar, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Intensive study of selected topics in nematology. Includes lectures by students, staff, faculty, and invited scholars on related subjects. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

NEM 270 Special Topics in Nematology 1 Seminar, 2 hours. Prerequisite(s): consent of instructor. Discussion of current literature within special areas of nematology. Graded Satisfactory (S) or No Credit (NC).

NEM 290 Directed Studies 1 to 6 Prerequisite(s): graduate standing. Individual studies on specially selected topics in nematology under the direction of a staff member. Graded Satisfactory (S) or No Credit (NC).

NEM 297 Directed Research 1 to 6 Experimental studies on specially selected topics in nematology under the direction of a staff member. Graded Satisfactory (S) or No Credit (NC).

Neuroscience Undergraduate Major

Subject abbreviation: CBNS
College of Humanities, Arts, and Social Sciences

Undergraduate Program for Neuroscience Department of Psychology
Scott N. Currie, Ph.D., Vice-Chair
Undergraduate Program for Neuroscience Molecular, Cell and Systems Biology
Program Office
1223 Pierce Hall
(951) 827-7294
neuroscience.ucr.edu

Committee in Charge
Michael Adams (Molecular, Cell and Systems Biology, Entomology)
Margarita Curras-Collazo (Molecular, Cell and Systems Biology)
Scott Currie (Molecular, Cell and Systems Biology)
Peter Hickmott (Psychology)
Kelly Huffman (Psychology)
Edward Korzus (Psychology)
Khaleel Razak (Psychology)
B. Glenn Stanley (Molecular, Cell and Systems Biology)
Daryle Williams, Dean, College of Humanities Arts, and Social Sciences, ex officio
Kathryn Uhrich, Dean, College of Natural and Agricultural Sciences, ex officio
Major
The Neuroscience major is an intercollege major offered by the colleges of Humanities, Arts, and Social Sciences and Natural and Agricultural Sciences. It offers upper-division courses that contribute to an academic program emphasizing the functioning of nervous systems at the molecular, cellular, system, behavioral, and cognitive levels. Some of the topics covered include neuroanatomy, neurophysiology, and neurochemistry in humans and other animals; neural mechanisms underlying sensory system function and perception; neural organization of behavior; development of the nervous system; and neural mechanisms of learning and memory.

Both a B.A. and a B.S. degree are offered by each college. When students declare the major, they choose from which college they wish to have their degree awarded. Students whose degrees are awarded by the College of Humanities, Arts, and Social Sciences are advised in and have their records maintained by the Department of Psychology; students whose degrees are awarded by the College of Natural and Agricultural Sciences are advised in and have their records maintained by the CNAS Academic Advising Center. Breadth requirements vary by college, and students must fulfill the breadth requirements of the college they choose.

For information about student advising, contact the CNAS Academic Advising Center, (951) 827-7294, or the Department of Psychology, (951) 827-5386, University of California, Riverside, CA 92521.

Change of Major Criteria
Students must be in good academic standing at the time the Change of Major Petition is filed. Students must successfully repeat any outstanding Life Science Core course prior to acceptance into the major.

2nd and 3rd Quarter Freshmen
The following math and science courses must be completed with a grade of C- or better:
CHEM 001A, CHEM 01LA, CHEM 01LB, CHEM 007A or MATH 009A

4th Quarter Freshman and Sophomore (up to 89 earned units)
The following math and science courses must be completed with a grade of C- or better:
CHEM 001A, CHEM 01LA, CHEM 01LB, CHEM 001C, CHEM 01LC BIOL 005A, BIOL 051A or BIOL 020, BIOL 005B, MATH 007A or MATH 009A, MATH 007B or MATH 009B

Junior (90 - 134 earned units)
The following math and science courses must be completed with a grade of C- or better. Grades of D- or higher are acceptable for courses marked with an asterisk (*):
CHEM 001A, CHEM 01LA, CHEM 01LB, CHEM 007C, CHEM 01LC BIOL 005A, BIOL 051A or BIOL 020, BIOL 005B, BIOL 005C*, MATH 007A or MATH 009A, MATH 007B or MATH 009B and MATH 009B and completion of at least one of the following sequences with no grade lower than a C-:
CHEM 008A and CHEM 08LA or CHEM 08HA and CHEM 8HLA or CHEM 12A, CHEM 008B and CHEM 08LB or CHEM 08HB and CHEM 8HLB or CHEM 12B, CHEM 008C and CHEM 08LC or CHEM 08HC and CHEM 8HLC or CHEM 12C.* PHYS 002A, PHYS 02LA, PHYS 002B, PHYS 02LB, PHYS 002C*, PHYS 02LC*

Senior (135 + units)
The following math and science courses must be completed with grade of C- or better. Grades of D- or higher are acceptable for courses marked with an asterisk (*):
CHEM 001A, CHEM 01LA, CHEM 01LB, CHEM 001C, CHEM 01LC BIOL 005A, BIOL 051A or BIOL 020, BIOL 005B, BIOL 005C*, MATH 007A MATH 009A, MATH 007B or MATH 009B, CHEM 008A and CHEM 08LA or CHEM 08HA and CHEM 08LA or CHEM 08HA and CHEM 8HLA or CHEM 12A, CHEM 008B and CHEM 08LB or CHEM 08HB and CHEM 8HLB or CHEM 12B, CHEM 008C and CHEM 08LC or CHEM 08HC and CHEM 8HLC or CHEM 12C.*, PHYS 002A, PHYS 02LA, PHYS 002B, PHYS 02LB, PHYS 002C*, PHYS 02LC*

Foreign Language
In fulfilling the Foreign Language breadth requirement for both the B.A. and B.S. degrees, a modern language such as Spanish, Russian, Chinese, German, or French must be used.

Natural Sciences and Mathematics
The Neuroscience Core in the Neuroscience major satisfies the Natural Sciences and Mathematics breadth requirement.

For the College of Natural and Agricultural Sciences

Humanities
For the B.S. degree, 16 units instead of 12 units are required to fulfill the Humanities breadth requirement. PHIL 134 and PHIL 137 are recommended.

Social Sciences
For the B.S. degree, 16 units instead of 12 units are required to fulfill the Social Sciences breadth requirement. Psychology courses not required or approved for the Neuroscience major may be used in meeting the Social Sciences breadth requirement.

Foreign Language
In fulfilling the Foreign Language breadth requirement for the B.A. degree, a modern language such as Spanish, Russian, Chinese, German, or French must be used. Further, fourth-quarter level proficiency in one foreign language (not level 2 in two languages) is required.

Natural Sciences and Mathematics
The Neuroscience Core in the Neuroscience major satisfies the Natural Sciences and Mathematics breadth requirement.

Major Requirements
1. Neuroscience Core (66-72 units; satisfies the Life Sciences Core required for some majors in the College of Natural and Agricultural Sciences). Up to 12 units of upper-division life sciences courses (for this major, courses from the departments of Biochemistry, Biology, Cell Biology and Neuroscience, and Entomology) not being used to satisfy the core may be taken prior to completion of the core; permission from the program chair or the program chair’s designate is required to take upper-division units in excess of these 12 units.

2. Students must complete all required Life Science Core courses with a grade of “C-” or better and with a cumulative GPA in the courses of at least 2.0. Grades of “D” or “F” in two required courses, either separate courses or repetitions of the same course, are grounds for discontinuation from the major.

a) BIOL 005A, BIOL 051A or BIOL 020, BIOL 005B, BIOL 005C (BIOL 002 and BIOL 003 may be substituted for BIOL 005A, BIOL 051A, and BIOL 005B with advisor’s approval.)

b) PSYC 011 or STAT 004 or STAT 010

c) MATH 007A or MATH 009A or MATH 09HA; MATH 007B or MATH 009B or MATH 09HB
3. Upper-division requirements

Students must complete all required First Tier and Second Tier courses with a grade of "C-" or better and with a cumulative GPA in the courses of at least 2.0. Grades of "D" or "F" in two required courses, either separate courses or repetitions of the same course, are grounds for discontinuation from the major.

a) First Tier (14 units)
   (1) CBNS 106
   (2) CBNS 120/PSYC 120
   (3) CBNS 120L/PSYC 120L or PSYC 122L or CBNS 130L/PSYC 130L
   (4) CBNS 124/PSYC 124

b) Second Tier (at least 12 units for the B.A. or at least 20 units for the B.S.)
   BIOL 178; CBNS 101, CBNS 116, CBNS 121/PSYC 121, PSYC 122, CBNS 125/PSYC 125, CBNS 126/PSYC 126, CBNS 127/PSYC 127, CBNS 129, PSYC 112, PSYC 117, PSYC 129

c) Third Tier (additional units to reach a total of 36 units for the B.A. or 44 units for the B.S.) Select from upper-division courses listed under Neuroscience Core, Second Tier above not used to satisfy those requirements, and the additional courses listed below. The combined number of units taken under First Tier, Second Tier, and Third Tier must total either 36 if the B.A. is sought or 44 if the B.S. is sought.
   BCH 102, BCH 110B, BCH 110C, BCH 120; BIOL 100/ENTM 100, BIOL 102, BIOL 105, BIOL 107A, BIOL 108, BIOL 109, BIOL 110, BIOL 151, BIOL 160, BIOL 161A, BIOL 161B; BIOL 162/ENTM 162, BIOL 171, BIOL 171L, BIOL 173/ENTM 173, BIOL 175, BIOL 185P; CBNS 108, CBNS 150/ENTM 150, CBNS 165, CBNS 169; up to 9 units from CBNS 194, CBNS 197 and/or CBNS 199; CS 170; PHYS 139L; PSYC 115, PSYC 130, PSYC 132, PSYC 134, PSYC 135, ANTH 146/PSYC 146

Note

No courses other than those listed may be used in the major unless specifically approved by the program chair or the program chair’s designate.
Minor
A minor in Neuroscience is available. For more information on minor requirements, refer to the discussion of minors in the appropriate college section of the General Catalog.

1. First tier (14 units)
a) CBNS 106 with a grade of C- or better
b) CBNS 120/PSYC 120
c) CBNS 120L/PSYC 120L or PSYC 122L
   or CBNS 130L/PSYC 132L
d) CBNS 124/PSYC 124

2. Second Tier (6 units)
Select additional units from the list below so that the units from the First Tier combined with the units from the Second Tier equal at least 20.

BIOL 178; CBNS 101, CBNS 116, CBNS 121/PSYC 121, PSYC 122, CBNS 125/PSYC 125,
CBNS 126/PSYC 126, CBNS 127/PSYC 127; PSYC 112, PSYC 117, PSYC 129

Descriptions for all courses used in the Neuroscience major and minor may be found in the appropriate department section.

Neuroscience Graduate Program

Subject abbreviation: NRSC
College of Natural and Agricultural Sciences

Khaled Razak, Ph.D. Director
Psychology Bldg.
(951) 827-5060
Program Office, 1140 Batchelor Hall North
(951) 827-4716; (800) 735-0717
neuro.ucr.edu

Professors
Michael E. Adams, Ph.D.
(Molecular, Cell, and Systems Biology, Entomology)
Devin Binder, M.D. Ph.D. (Biomedical Sciences)
Monica J. Carson, Ph.D. (Biomedical Sciences)
Djurdjica Coss, Ph.D. (Biomedical Sciences)
Margarita C. Curras-Collazo, Ph.D.
(Molecular, Cell, and Systems Biology)
Iryna M. Ethell, Ph.D. (Biomedical Sciences)
Martin I. Garcia-Castro, Ph.D. (Biomedical Sciences)
Theodore Garland, Jr., Ph.D. (Evolution, Ecology, and Organismal Biology),
Distinguished Professor of Evolution, Ecology, and Organismal Biology
Xiaoping Hu, Ph.D. (Bioengineering)
Kelly J. Huffman, Ph.D. (Psychology)
Ryan Julian, Ph.D. (Chemistry)
Marcus Kaul, Ph.D. (Biomedical Sciences)
Manuela Martins-Green, Ph.D.
(Molecular, Cell, and Systems Biology)
Anandasanak Ray, Ph.D.
(Molecular, Cell, and Systems Biology)
Khaled Razak, Ph.D. (Psychology)
Wendy G. Saltzman, Ph.D. (Evolution, Ecology, and Organismal Biology)
B. Glenn Stanley, Ph.D.
(Molecular, Cell, and Systems Biology)
Seema Tiwari-Woodruff, Ph.D. (Biomedical Sciences)
Emma Wilson, Ph.D. (Biomedical Sciences)
Sika Zheng, Ph.D. (Biomedical Sciences)
Raphael Zidovetzki, Ph.D.
(Molecular, Cell, and Systems Biology)

Associate Professors
Ilana Bennett, Ph.D. (Psychology)
Polly Campbell, Ph.D. (Evolution, Ecology, and Organismal Biology)
Jun-Hyeong Cho, Ph.D.
(Molecular, Cell, and Systems Biology)
Scott N. Currie, Ph.D.
(Molecular, Cell, and Systems Biology)
Anupama Bahurukan, Ph.D.
(Molecular, Cell, and Systems Biology)
Nicholas V. DiPatrizio, Ph.D. (Biomedical Sciences)
Todd Faaco, Ph.D.
(Molecular, Cell, and Systems Biology)
Peter W. Hickmott, Ph.D. (Psychology)
Edward Korzus, Ph.D. (Psychology)
Martin Riccomagno, Ph.D.
(Molecular, Cell, and Systems Biology)
Vijayalakshmi Santhakumar, Ph.D.
(Molecular, Cell, and Systems Biology)
Rachel Wu, Ph.D. (Psychology)
Naoki Yamanaka, Ph.D. (Entomology)
Edward Zaghia, Ph.D. (Psychology)
Weiwei Zhang, Ph.D. (Psychology)

Assistant Professors
Garret Anderson, Ph.D. (Molecular, Cell, and Systems Biology)
Sihem Cheloufi, Ph.D. (Biochemistry)
Regin Firit, Ph.D. (Sociology)
Ysabel Giraldo, Ph.D. (Entomology)
Anubhuti Goel, Ph.D. (Psychology)
Sachiko Haga-Yamanaka, Ph.D.
(Molecular, Cell, and Systems Biology)
Katherine Meltzoff, Ph.D. (Graduate School of Education)
Kalina Michalska, Ph.D. (Psychology)
Jernej Murn, Ph.D. (Biochemistry)
Christopoulos Vasilieos, Ph.D.
(Bioengineering)
Hongdian Yang, Ph.D.
(Molecular, Cell, and Systems Biology)
Natalie Zebnek, Ph.D. (Biomedical Sciences)

Adjunct Professor
Shu-Wei (Richard) Sun, Ph.D.

Graduate Program

The multidisciplinary interdepartmental graduate program in Neuroscience offers instruction and research training leading to the Ph.D. degree in Neuroscience. A Thesis Plan (Plan I) or Non-Thesis Plan (Plan II) M.S. degree in Neuroscience is available under special circumstances, when the work leading to the Ph.D. degree cannot be completed. Whether either of these options is appropriate will be decided by the student’s Guidance Committee typically either at the end of the first year, or at the time of the qualifying examination. See General University requirements for Plan I and Plan II M.S. degrees: graduate.ucr.edu/programs.

The goal of this program is to prepare students for careers in research, teaching, industry, and scientific administration. The program is aimed at providing high-quality graduate training for students who come from a variety of undergraduate backgrounds, but share a commitment and an intense interest in nervous system research. Students are expected to learn the fundamentals of neuroscience, starting with the required core sequence, become knowledgeable concerning a range of research methods as taught in neuroscience laboratories and demonstrate capability in original research. Graduate student training reflects the research competence and specialties of the faculty. That is, the specific research training received by a graduate student is the responsibility of the major professor/mentor in whose laboratory the student carries out the research projects leading to the degree. Students benefit from an interdisciplinary training approach, tailored by the major advisor but enriched by the readily available expertise and laboratory facilities of program faculty with backgrounds ranging from chemistry to psychology.

Current UCR Neuroscience faculty have major appointments in several different departments but have a considerable degree of common interest in research problems and techniques. Furthermore, the three chief levels of analysis at which nervous systems are currently studied (molecular/cellular, systems, and behavioral) are more or less evenly represented by the interests and expertise of the faculty. Some faculty, as may be expected, carry out research programs that combine two or more of these levels of analysis. These levels of analysis, which characterize the faculty’s research, indicate the breadth of integrated neuroscience at UCR but do not represent “fields of emphasis” in which students are to be trained.

Areas that faculty investigate include the following:

- Giall-Neuronal Interactions
- Physiological actions of ion channel toxins
- Modulation of ion channels by neurotransmitters and hormones
- Auditory processing
- Synaptic transmission and neural plasticity in mammalian nervous systems
- Signal transduction in excitable cells
- Sensory and perceptual processes
- Molecular biology of ion channel structure and function
- Receptor–channel interactions
- Synaptic and non-synaptic mechanisms in neuroendocrine systems
- Plasticity in adult central nervous systems
- Neurodevelopment
- Neuroinflammation
- Neurodegeneration
- Gut-brain interactions
- Neurotoxicology
- Neurogenetics
- Addiction
- Behavior genetics
- CNS-Immune system interactions
Areas involving behaviors and diseases include the following:

- Roles of glial cells in neurological disease
- Neural control of eating, locomotory, and social behaviors
- Neuroendocrine regulation of innate and social behaviors
- Neural basis of language and reading
- Neural networks controlling locomotion in the spinal cord and brainstem
- Auditory function in Fragile X Syndrome and age-related hearing loss
- Neurolinguistics
- Individual differences in cortical anatomy and relation to behavior
- Learning and memory
- Mechanisms of neuronal death in Alzheimer’s disease, stroke, and other disorders

Admission

Applicants must meet the general admissions requirements of the Riverside Division of the Graduate Council as set forth in the Graduate Studies section of this catalog, including completion of an undergraduate degree (B.S. or B.A.). They should have an adequate background in biological, behavioral and physical sciences, ideally including courses in the following or equivalent areas: General Biology, Genetics, General Chemistry, Biochemistry, Organic Chemistry, Physics, Calculus, and Statistics. Additionally, at least 20 quarter-units of courses distributed among the following areas are required, although applicants may be admitted with limited course work deficiencies and required to make up deficiencies as specified by the admissions committee: Biochemistry, Cell Biology; Molecular Biology; Physiology; Neuroimmunology; Animal Behavior; Learning and Memory; Perception; Computer Science; and Neuroscience, Neurobiology, or Physiological Psychology, with laboratory.

Doctoral Degree

Course Work

Core requirements include:

1. NRSC 200A/PSYC 200A (Cell/Molecular Neuroscience)
   NRSC 200B/PSYC 200B (Systems Neuroscience)
   NRSC 200C/PSYC 200C (Behavioral Neuroscience)
2. Two elective courses selected by the student in consultation with the major professor and/or guidance committee. Elective choices are flexible and meant to enhance and strengthen the student’s expertise in the research area of interest and with attention given to ultimate career goals. Given the interdisciplinary nature of Neuroscience, courses may be chosen from any program or department. Graduate courses are preferred; undergraduate courses may be used only with approval of the Graduate Advisor (or Program Director). Elective courses should be substantial, although unit requirements are flexible. A course in statistics relevant to the area of research is strongly recommended.

3. During each quarter in academic residence every student enrolls and participates in the Colloquium in Neuroscience (NRSC 287/PSYC 287), and, until passing the oral qualifying examination, every student enrolls in two seminars, Special Topics in Neuroscience (NRSC 289, 2 units), during each year of academic residence. One seminar (NRSC 289) per year is required after the qualifying examination is passed.

4. After completing the course requirements and no later than the ninth quarter in residence, the student is given a two-part qualifying examination, one written and one oral.

5. Regardless of whether financial support comes from fellowships or research assistantships, etc., students must be teaching assistants for at least two quarters in Neuroscience or related-area courses, such as those taught by their mentors.

6. Within three months of advancement to candidacy, the student must submit a written dissertation proposal to the dissertation committee for comments and approval. Before the dissertation is given final approval, the student must present a public lecture on the dissertation research to faculty and students in the program. Following the public lecture, the student meets with the dissertation committee for an oral defense in accordance with the regulations of the Graduate Division.

Normative Time to Degree

16 quarters

Graduate Courses

NRSC 200A Fundamentals of Neuroscience 3 Lecture, 3 hours. Prerequisite(s): graduate standing or consent of instructor. The fundamentals of neuroscience in molecular and cellular mechanisms, neural and hormonal systems, and neural control of behavior. Cross-listed with PSYC 200A.

NRSC 200B Fundamentals of Neuroscience 3 Lecture, 3 hours. Prerequisite(s): graduate standing or consent of instructor; NRSC 200A/PSYC 200A. The fundamentals of neuroscience in molecular and cellular mechanisms, neural and hormonal systems, and neural control of behavior. Cross-listed with PSYC 200B.

NRSC 200C Fundamentals of Neuroscience 3 Lecture, 3 hours. Prerequisite(s): graduate standing or consent of instructor; NRSC 200B/PSYC 200B. The fundamentals of neuroscience in molecular and cellular mechanisms, neural and hormonal systems, and neural control of behavior. Cross-listed with PSYC 200C.

NRSC 202 Advanced Methods in Neuroscience 3 Lecture, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Covers topics on a variety of advanced methods in neuroscience research including molecular, genetic, anatomical, physiological, and behavioral approaches. Provides a deeper understanding of experimental approaches related to thesis research as well as other studies in the literature. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

NRSC 280 Neuromodulation of Behavior 3 Lecture, 3 hours. Prerequisite(s): NRSC 200A or PSYC 200A; NRSC 200B or PSYC 200B, graduate standing, or consent of instructor. Explores the roles of specific brain circuits such as neuromodulatory systems and other subcortical areas in modulating animal behavior.

NRSC 287 Colloquium in Neuroscience 1 Colloquium, 1 hour. Prerequisite(s): restricted to major(s) Neuroscience, Psychology, graduate standing or consent of instructor. Involves oral presentations on current research topics in neuroscience by visiting scholars, faculty, and students. Graded Satisfactory (S) or No Credit (NC). Course is repeatable. Cross-listed with PSYC 287.

NRSC 289 Special Topics in Neuroscience 2 Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. An interdisciplinary seminar consisting of student presentations and discussion of selected topics in neuroscience. Content and instructor(s) vary each time course is offered. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. Cross-listed with BIOL 289, CHEM 289, ENTM 289, and PSYC 289.

NRSC 290 Directed Studies 1 to 6 Individual Study, 3 to 18 hours. Prerequisite(s): graduate standing, consent of instructor. Individual study, directed by a faculty member, of specially selected topics in neuroscience. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

NRSC 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing, consent of instructor. Research and experimental studies conducted under the supervision of a faculty member on specially selected topics in neuroscience. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

NRSC 299 Research for the Thesis 1 to 12 Research, 3 to 36 hours. Prerequisite(s): graduate standing, consent of instructor. Original research in an area selected for the advanced degree. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.
Peace and Conflict Studies Minor

Subject abbreviation: PCST
College of Humanities, Arts, and Social Sciences
(In Moratorium)

The Peace and Conflict Studies minor is not currently accepting new students. For more information, contact CHASS Student Academic Affairs, 3400 Humanities and Social Sciences Building, (951) 827-3683.

Juliann Emmons Allison, Ph.D., Co-Chair (951) 827-5524; juliann.allison@ucr.edu
Erith Jaffe-Berg, Ph.D., Co-Chair (951) 827-4418; erith.jaffe-berg@ucr.edu

Advising Office, CHASS INTS 3rd Floor
MDU Academic Advising Center Lobby peaceandconflictstudies.ucr.edu

Committee in Charge

Juliann Allison, Co-Chair
(Gender & Sexuality Studies)
Erith Jaffe-Berg, Co-Chair (Theatre)
Rickerby Hinds (Theatre)
Bronwyn Leebaw (Political Science)
Daryle Williams, Dean, ex officio

Administered through the Interdisciplinary Studies Office, the Peace and Conflict Studies Minor provides opportunities for undergraduate students to give sustained attention to the diverse origins and expressions of conflict, to models for resolution advised by scholars and practitioners, to proactive peacemaking through the investigative and creative strategies fostered in higher education.

Students must take 5 upper-division courses as specified in sections 1 and 2 below.

1. Students must take at least one course from each of the following three rubrics plus a fourth course from the list below from any rubric:

   b) Social Scientific Perspectives ETST 111, POSC 123, POSC 124, POSC 125/POS 129, POSC 142L, POSC 150, POSC 159, POSC 160, POSC 169, SOC 122

   c) Historical Perspectives HISA 114, HISA 135/ETST 112, HISA 162/LNST 172, HISA 165, HISA 166, HISE 145, HISE 146, HIST 184/AST 160/SEAS 184/VNM 184, MCS 173 (E-Z)/CPLT 173 (E-Z), POSC 125, POSC 162/LNST 142

   2. Capstone Course; one of the following: PCST 190, PCST 197, PCST 198-I

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Upper-Division Courses
PCST 190 Special Studies 1 to 5 Consultation, 10 hours per quarter; extra reading, 6 to 9 hours; written work, 3 to 6 hours. Prerequisite(s): upper-division standing; consent of Peace and Conflict Studies Committee chair; consent of faculty advisor is required for students repeating the course. Individual study in the areas of conflict resolution and mediation. Examines theories in depth, as well as case studies introduced in previous courses.

PCST 197 Research For Undergraduates 4 Consultation, 10 hours per quarter; extra reading, 6 hours; written work, 3 hours. Prerequisite(s): upper-division standing; consent of Peace and Conflict Studies Committee chair. Directed original research in the fields of conflict resolution, mediation, and peace studies.

PCST 197 Research For Undergraduates 4 Consultation, 10 hours per quarter; extra reading, 6 hours; written work, 3 hours. Prerequisite(s): upper-division standing; consent of Peace and Conflict Studies Committee chair. Directed original research in the fields of conflict resolution, mediation, and peace studies.

PCST 197 Research For Undergraduates 4 Consultation, 10 hours per quarter; extra reading, 6 hours; written work, 3 hours. Prerequisite(s): upper-division standing; consent of Peace and Conflict Studies Committee chair. Directed original research in the fields of conflict resolution, mediation, and peace studies.

PCST 197 Research For Undergraduates 4 Consultation, 10 hours per quarter; extra reading, 6 hours; written work, 3 hours. Prerequisite(s): upper-division standing; consent of Peace and Conflict Studies Committee chair. Directed original research in the fields of conflict resolution, mediation, and peace studies.

PCST 198I Individual Internship in Peace and Conflict Studies 4 Consultation, 1 hour; internship, 8 hours; written work, 3 hours. Prerequisite(s): upper-division standing; consent of Peace and Conflict Studies Committee chair; consent of faculty advisor is required for students repeating the course. Provides internship opportunities in organizations that engage in mediation and conflict resolution. Includes supervision under an assigned faculty member. Course is repeatable up to 16 units.

Pest Management

Subject Abbreviation: PSMT
College of Natural and Agricultural Sciences

The M.S. program in Pest Management is not currently accepting new students. For further information call (800) 735-0717 or (951) 827-5621.

Majors

The Department of Philosophy offers a major and minor in Philosophy and a major in Philosophy/Law and Society.

The Philosophy major is designed to introduce students to the important issues and arguments surrounding such subjects as morality, knowledge, the nature of the mind and of the physical world, science, and language. The program provides a rigorous background in the history of Western philosophy, and studies contemporary approaches (both analytic and Continental) to philosophical issues. The B.A. degree in Philosophy prepares students for graduate study in philosophy, and is also excellent preparation for law school. For students interested in a double major, philosophy also serves as an excellent complement to psychology, mathematics, political science, and the natural sciences.

The Philosophy/Law and Society major is open to undergraduate students with junior standing who have completed LWSO 100 with a grade of “C” or higher. The major offers students a means of understanding complex relationships between social institutions and provides a strong basis for graduate studies in areas related to law and philosophy. The Philosophy/Law and Society curriculum is sound background for students planning on pursuing the study of law.

University Requirements
See Undergraduate Studies section.

College Requirements
See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

Major Requirements

The department offers two majors: the traditional Philosophy major, and a Philosophy/Law and Society major.

Philosophy Major

The major requirements for the B.A. degree in Philosophy are as follows:

Fifty-six (56) units of course work in Philosophy including at least 36 upper-division units.

1. PHIL 007 or PHIL 007H and PHIL 008 or PHIL 008H
2. PHIL 100 or PHIL 101 (Sophomore-Junior Seminar)
3. Three courses in the history of philosophy, at least one of which must be in ancient Greek or Roman philosophy. Select courses from PHIL 030 (E-Z), PHIL 120 (E-Z), PHIL 121 (E-Z), PHIL 122 (E-Z); a specific list is provided by the Philosophy Department. Not more than two courses may be from PHIL 030 (E-Z).

4. At least two courses in metaphysics, epistemology, or philosophy of language: PHIL 130 through PHIL 152, PHIL 159.

Students are urged to consult the department’s undergraduate advisor in preparing their course of study each quarter while at UCR.

**Philosophy/Law and Society Major**

Major requirements for a B.A. degree in Philosophy/Law and Society are as follows:

1. Philosophy requirements (36 units)
   a) PHIL 007 or PHIL 007H
   b) Three courses in the history of philosophy (two of which must be upper-division): PHIL 030 (E-Z), PHIL 120 (E-Z), PHIL 121 (E-Z), PHIL 122 (E-Z)
   c) Five courses in moral and political philosophy: PHIL 108, PHIL 116, PHIL 117, PHIL 119, PHIL 153, and PHIL 161 through PHIL 169 (E-Z)

2. Law and Society requirements (36 units)
   a) PHIL 007 or PHIL 007H
   b) LWSO 100 (with a grade of “C” or better)
   c) One course chosen from POSC 114, PSYC 012, SOC 004 (or equivalent course in research methods)
   d) Three courses chosen from ANTH 127, ECON 119, HISE 153, PHIL 165, POSC 167, PSYC 175, SOC 159
   e) Two courses chosen from HISA 120A, HISA 120B, HISE 123, LWSO 175 (E-Z), PHIL 164, POSC 111, POSC 166, POSC 168, POSC 186, SOC 147, SOC 149, SOC 180
   f) LWSO 193, Senior Seminar

**Note:** For sections 2.d) and 2.e) combined, not more than two courses may be taken from the same department. In filling the dual requirements of the major, students may not count more than two courses toward both parts of their total requirements (Philosophy Department requirements and Law and Society requirements). The department has its own Philosophy/Law and Society undergraduate advisor, and each student is urged to consult the advisor in preparing a course of study each quarter while at UCR.

**Minor**

A student may minor (24 units) in Philosophy by taking either PHIL 007, PHIL 007H, PHIL 008 or PHIL 008H, four upper-division philosophy courses, and one other philosophy course at any level.

Students may also choose to do a Philosophy minor with special emphasis, taking their four upper-division courses from one of the areas listed below:

1. Philosophy, Literature, and History of Philosophy: PHIL 120 (E-Z), PHIL 121 (E-Z), PHIL 122 (E-Z), PHIL 132, PHIL 151, PHIL 152, PHIL 150, PHIL 159
2. Philosophy and Cognitive Science: PHIL 125, PHIL 126, PHIL 130, PHIL 131, PHIL 132, PHIL 133, PHIL 134, PHIL 135
3. Philosophy and the Natural Sciences: PHIL 117, PHIL 130, PHIL 134, PHIL 137, PHIL 140, PHIL 151, PHIL 167

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

**Track for Distinction in Philosophy**

The undergraduate track for Distinction in Philosophy is designed to give qualified upper division students the opportunity to do additional upper division work in Philosophy in a seminar format beyond what is required for the major. It will give students the opportunity and the training to do independent research in Philosophy.

Each Philosophy major in the track for Distinction in Philosophy will be assigned a faculty mentor upon entering the program. Faculty are encouraged to provide more challenging assignments to these students in their upper-division classes (such as term papers, revision of a paper in response to feedback, etc.).

Philosophy students who successfully complete this program are awarded and have posted on their transcript the designation Distinction in Philosophy.

Complete details and an application form are available from the Philosophy Student Affairs Officer.

**Prerequisites for the track for Distinction in Philosophy**

1. Submission of an application during the last quarter of the sophomore year or during the junior year (no later than the last quarter of the junior year).
2. Completion of 90 units (junior standing).
3. Completion of PHIL 7, PHIL 8, PHIL 100/101, and 2 upper-division courses in Philosophy. Students are encouraged to take the 2 courses in the PHIL 30 series (see below) as early in their major as possible.
4. Cumulative GPA of 3.5 in Philosophy These pre-requisites can be waived by permission of the Department under exceptional circumstances. Inquiries may be directed to the Philosophy Student Affairs Officer.

**Requirements for the track for Distinction in Philosophy**

This track adds some requirements to the Philosophy major:

1. 64 units in Philosophy, of which 48 units must be upper division. (The major requires 56 units, of which 36 units must be upper division.)
2. 2 courses in the PHIL 30 series. (These courses count toward the 64 units and the three courses in the History of Philosophy.)
3. 2 quarters of either PHIL 193 OR PHIL 195 (8 units total). Students in the University Honors Program may substitute 4 units of HNPG 199H for 4 units of PHIL 195. (These courses count towards the 64 units. With Department approval, PHIL 193 and PHIL 195 may be applied toward the History of Philosophy, Metaphysics/Epistemology/Philosophy of Language, or Moral/Political Philosophy requirements.)
4. To receive Distinction in Philosophy, students must have a cumulative GPA of 3.5 in Philosophy upon completion of the program.

**Graduate Program**

The Department of Philosophy offers the M.A. and Ph.D. degrees in Philosophy.

**Admission**

All applicants to this program must have completed a bachelor’s degree or its approved equivalent from an accredited institution and have attained an undergraduate record that satisfies the standards established by the Graduate Division and University Graduate Council. Applications are accepted for the fall quarter only. We do not accept terminal MA students. Applicants whose first language is not English are required to submit acceptable scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) unless they have a degree from an institution where English is the exclusive language of instruction. Additionally, each applicant must submit a writing sample and three letters of recommendation, at least two of which must be academic references. All other application requirements are specified in the graduate application.

Upon entering the program, a student is assigned a faculty mentor who consults with the student each quarter to discuss the student’s individual course of study, progress in the program, and recent performance. Students also consult the Graduate Adviser regularly to discuss their course of study and progress in the program. In the first year, students (whether they have entered with an M.A. or a B.A.) take three pro-seminars for first-year graduate students, two in Metaphysics and Epistemology, and one in Moral Philosophy (PHIL 275A, PHIL 275B, PHIL 275C). The pro-seminars are designed to acquaint first-year students with the current state of discussion in central areas of contemporary philosophy and to impart the skills needed to conduct their own research.
Master's Degree
The Department of Philosophy offers the M.A. degree in Philosophy under Plan II (M.A. Paper).

Course Work
Students must complete, with a grade of "B" or better, course work totaling 48 units of graduate credit in philosophy. Of these, 12 units must be in the three proseminars for first-year graduate students (PHIL 275A-B-C), and an additional 20 units must be taken from PHIL 272A-B-C, 280-283, 284A-B or 285A-B. Up to 16 units may be drawn from PHIL 125, courses in the PHIL 220-266 series, PHIL 290 or PHIL 292 paired with a 100-level course, depending on the student’s interests and background. These courses are to be chosen only in consultation with the student’s advisory committee and the graduate advisor.

Courses taken on a Satisfactory (S)/No Credit (NC) basis cannot be used to satisfy course requirements.

Students should note that although they need not complete distributional requirements or a language requirement to acquire the M.A. degree, there are strict distributional and language requirements for the Ph.D. degree, as well as a colloquium and professional development workshop requirement (described below under the Ph.D. requirements). Students who expect to continue on in the Ph.D. program must begin to fulfill these requirements immediately upon entering the program if they expect to acquire the Ph.D. degree within the prescribed period of time.

M.A. Logic Requirement
The logic requirement for the M.A. degree is completion of PHIL 124 with a grade of "B" or better. Students may be excused from this requirement if they show sufficient knowledge of logic upon entering the graduate program, as indicated by an optional diagnostic examination administered at the start of each academic year. Students who are unsure about the adequacy of their background are encouraged to take the test for diagnostic purposes.

M.A. Paper
Student select a paper to submit to the graduate advisor as their M.A. paper no later than the end of the spring quarter of their second year. M.A. papers can be seminar papers, revised seminar papers, or any other paper that the student has written (of 25 pages or less). Further information on what constitutes an acceptable paper is available from the graduate advisor.

Upon the submission of this paper, the graduate advisor selects three faculty members to serve as the M.A. committee, which conducts an oral examination on the paper. Normally the oral examination will be completed before the end of the student’s second year, but it may be postponed until the fall quarter of the student’s third year. Failure to pass the M.A. oral examination after two opportunities constitutes grounds for dismissal from the program. In addition, completion of the M.A. requirements does not guarantee permission to continue in the Ph.D. program.

Doctoral Degree
The Department of Philosophy offers the Ph.D. degree in Philosophy.

Admission
Students are invited to continue toward candidacy for the Ph.D. degree on the basis of performance in courses and seminars, satisfactory completion of the M.A. requirements, and the recommendation of the graduate advisor. A student’s course of study is supervised by the student’s faculty mentor, in consultation with the graduate advisor until the student’s dissertation committee is appointed. Students with a master’s degree in Philosophy from other universities are eligible for admission. These students must enroll in the first-year proseminars.

Course Work
Students must complete 12 more units in philosophy, with a grade of “B” or better, in addition to the 48 units for the M.A. degree. Of the student’s 60 graduate units in philosophy, 12 units must be in the area of the history of philosophy, with 4 of these in ancient philosophy, 4 units in addition to the proseminar (PHIL 275A, PHIL 275B) in the area of metaphysics and epistemology, and 8 units in addition to the proseminar (PHIL 275C) in the area of ethics, political philosophy, and aesthetics. Courses taken on a Satisfactory (S)/No Credit (NC) basis cannot be used to satisfy course requirements.

Forty of these 60 units must be seminars and workshops taken from PHIL 272A-B-C, 275A-B-C, 276, 283, 284A-B or 285A-B. (Only 4 graded units of PHIL 276 count towards the Ph.D course requirement.) Up to 20 units may be drawn from PHIL 125, courses in the PHIL 220-266 series, or PHIL 290-292. Students are required to enroll in PHIL 276 during winter and spring quarters of their third year and winter quarter of their fourth year, for 2 units on an S/NC basis in the winter quarters of their third and fourth years, and for 4 units on a graded basis in the spring quarter of their third year. (Students who have advanced to candidacy are exempted from the fourth year winter quarter requirement.) Seminars from other UC Philosophy Departments via Intercampus Exchange count toward the Ph.D. course and seminar requirements. Graduate seminars in other disciplines (either at UCR or via Intercampus Exchange at another UC campus) may count toward the Ph.D. course and seminar requirements by petition to the Graduate Adviser. Students are in addition expected to take one seminar on an S/NC basis each quarter until they advance to candidacy (taken from PHIL 272A-B-C, 280-283, 284A-B, 285A-B).

Colloquia and Professional Development Workshop Requirement
Students must register for the PHIL 270 (Philosophy Colloquia) during each quarter of their first and second years. Students must register for PHIL 400 (Research and Professional Development Workshop) during each quarter of their second and third years.

Language Requirement
Students must show the competence necessary to work in one of four foreign languages: French, German, Latin, or Greek. Another language may be substituted upon approval of the faculty if it agrees better with the student’s area of their research.

Logic Requirement
To satisfy the logic requirement, students must pass PHIL 125 (Intermediate Logic) with a grade of “B” or better.

Proposition Requirement
All Ph.D. students must complete an acceptable proposition normally during their third year in the program.

A proposition is a paper, no more than forty pages in length, devoted to a significant problem in philosophy. It should show the ability to mount a sustained thesis and to work with the relevant primary or secondary literature.

Written and Oral Qualifying Examinations
Students must write a dissertation prospectus and pass a qualifying oral examination before advancing to candidacy. This examination, which is supervised by a faculty committee as stipulated in the regulations of the Graduate Division, concentrates on the students’ preparation for writing a dissertation as indicated by the dissertation prospectus. It must be taken after the student has passed the M.A., language, and proposition requirements and normally occurs within two quarters of the completion of these requirements.

Dissertation and Final Oral Examination
A dissertation to be presented as prescribed by the Graduate Council is prepared under the direction of the candidate’s dissertation committee. After completion of the dissertation, the candidate is examined in its defense by the dissertation committee.

Normative Time to Degree
18 quarters

Lower-Division Courses
PHIL 001 Introduction to Philosophy
4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introductory exploration into the nature of the individual, his/her place in the universe, and the forces that shape his/her destiny. Credit is awarded for one of the following PHIL 001 or PHIL 001H.

PHIL 001H Honors Introduction to Philosophy
4 Lecture, 2 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to PHIL 001. An introductory course designed to explore a small number of classical texts central to philosophy and the liberal arts and sciences. Students examine issues surrounding the nature of knowledge, the foundations of moral philosophy, and the relation of both to the development of the human and natural sciences. Texts may vary from year to year and include works by such authors as Plato, Aristotle, Descartes, Hobbes, Hume, and Kant. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of PHIL 001 or PHIL 001H.
PHIL 002 Contemporary Moral Issues 4 Lecture, 3 hours; discussion, 1 hour. A philosophical analysis of contemporary moral issues such as abortion, discrimination, sexual morality, punishment, the obligation to obey the law, suicide, euthanasia, war, and privacy. Credit is awarded for one of the following PHIL 002 or PHIL 002H.

PHIL 002H Honors Contemporary Moral Issues 4 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to PHIL 002. A philosophical analysis of contemporary moral issues such as abortion, discrimination, sexual morality, punishment, the obligation to obey the law, suicide, euthanasia, war, and privacy. Credit is awarded for one of the following PHIL 002H or PHIL 002.

PHIL 003 Ethics and the Meaning of Life 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Approaches the basic question of value: how should one live? Covers classical and contemporary discussions of issues such as the human good, human virtue, the role of pleasure and happiness, egoism and altruism, duty, the relativity and objectivity of value, the meaning of life, death, autonomy, integrity, and conscience. Credit is awarded for one of the following PHIL 003H, PHIL 003W, or PHIL 003X.

PHIL 003H Honors Ethics and the Meaning of Life 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to PHIL 003. Approaches one of the basic questions of value: How should one live? Covers classical and contemporary discussions of issues such as the human good, human virtue, the role of pleasure and happiness, egoism and altruism, duty, the relativity and objectivity of value, the meaning of life, death, autonomy, integrity, and conscience. Credit is awarded for only one of PHIL 003, PHIL 003H, PHIL 003W, or PHIL 003X.

PHIL 003W Ethics and the Meaning of Life 4 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): ENGL 001B with a grade of C or better, ENGL 007, may be taken concurrently; for concurrent enrollment in ENGL 007, review the course titles or topics in the current online Schedule of Classes to find the corresponding ENGL 007 writing workshop; or consent of instructor. Approaches one of the basic questions of value: how should one live? Covers classical and contemporary discussions of issues such as the human good; human virtue; the role of pleasure and happiness; egoism and altruism; duty; the relativity and objectivity of value; the meaning of life; death; autonomy; integrity; and conscience. Credit is only awarded for one of PHIL 003 or PHIL 003H or PHIL 003W or PHIL 003X.

PHIL 003X Ethics and the Meaning of Life and 4 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): admission to University Honors and ENGL 001B with a grade of “C” or better or consent of instructor. Honors course corresponding to PHIL 003W. Approaches one of the basic questions of value: how should one live? Covers classical and contemporary discussions of issues such as the human good, human virtue, the role of pleasure and happiness, egoism and altruism, duty, the relativity and objectivity of value, the meaning of life, death, autonomy, integrity, and conscience. Credit is awarded for one of the following PHIL 003 or PHIL 003W.

PHIL 003X Honors Ethics and the Meaning of Life 4 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): admission to University Honors and ENGL 001B with a grade of “C” or better or consent of instructor. Honors course corresponding to PHIL 003W. Approaches one of the basic questions of value: how should one live? Covers classical and contemporary discussions of issues such as the human good, human virtue, the role of pleasure and happiness, egoism and altruism, duty, the relativity and objectivity of value, the meaning of life, death, autonomy, integrity, and conscience. Credit is awarded for one of the following PHIL 003 or PHIL 003X.

PHIL 004 Introduction to the Philosophy of Race 4 Lecture, 3 hours; discussion, 1 hour; Prerequisite(s): none. Introduction to the philosophy of race from classical theorists to contemporary critical race theory. Topics covered include the Enlightenment, discussions of race in the founding of the American Republic, Supreme Court decisions from Dred Scott to recent affirmative action decisions, and the concept of race as a social construction.

PHIL 005 Evil 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to the nature of evil, its motivation, and its origins. Utilizes a variety of sources to examine these themes including classical philosophical texts and contemporary films. Credit is awarded for one of the following PHIL 005 or PHIL 005H.

PHIL 005H Honors Evil 4 Lecture, 3 hours; discussion, 1 hour; Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to PHIL 005. An introduction to the nature of evil, its motivation, and its origins. Utilizes a variety of sources to examine these themes, including classical philosophical texts and contemporary films. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of PHIL 005 or PHIL 005H.

PHIL 006 Reason, Belief, and Truth 4 Lecture, 3 hours; discussion, 1 hour; Prerequisite(s): none. An introductory examination of the nature of reason, rationality, argument, proof, and persuasion and the nature of theory, belief, faith and conviction, and truth and falsity. Discusses the various bases of belief and modes of inquiry, such as the natural and social sciences, the humanities, morality, religion, and mathematics.

PHIL 007 Introduction to Critical Thinking 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. A practical examination of reasoning and argument topically illustrated. Credit is awarded for one of the following PHIL 007 or PHIL 007H.

PHIL 007H Honors Introduction to Critical Thinking 4 Lecture, 3 hours; discussion, 1 hour; Term Paper, 3 hours. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to PHIL 007. A practical examination of reasoning and argument, topically illustrated. Satisfactory (S) or No Credit (NC) grading is not available. Credit is only awarded for one of PHIL 007 or PHIL 007H.

PHIL 008 Introduction to Logic 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to symbolic logic. Teaches how to distinguish in a precise way valid deductive arguments from those that are invalid. Includes learning to use logical symbolism, truth tables, and formal deductions. Credit is awarded for one of the following PHIL 008 or PHIL 008H.

PHIL 008H Honors Introduction to Logic 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to PHIL 008. An introduction to symbolic logic. Teaches how to distinguish in a precise way valid deductive arguments from those that are invalid; includes learning symbolism, truth tables, and formal deductions. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of PHIL 008 or PHIL 008H.

PHIL 009 Biomedical Ethics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduces the major camps in ethical theory: utilitarianism, deontology, virtue ethics, and feminist ethics. Applies these theories to critically examine contemporary issues in bioethics. Includes stem-cell research, assisted reproductive technologies, contract gestation, maternal-fetal conflicts, genetic and pharmacological enhancements, access to health care, and physician-assisted suicide. Credit is awarded for one of the following PHIL 009 or PHIL 009H.

PHIL 009H Honors Biomedical Ethics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to PHIL 009. Introduces the major camps in ethical theory - utilitarianism, deontology, virtue ethics, and feminist ethics. Applies these theories to critically examine contemporary issues in bioethics. Includes stem-cell research, assisted reproductive technologies, contract gestation, maternal-fetal conflicts, genetic and pharmacological enhancements, access to health care, and physician-assisted suicide. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of PHIL 009 or PHIL 009H.

PHIL 010 Language, Mind, and Reality 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to PHIL 010. Introduces the major camps in ethical theory - utilitarianism, deontology, virtue ethics, and feminist ethics. Applies these theories to critically examine contemporary issues in bioethics. Includes stem-cell research, assisted reproductive technologies, contract gestation, maternal-fetal conflicts, genetic and pharmacological enhancements, access to health care, and physician-assisted suicide. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of PHIL 010 or PHIL 010H.
PHIL 010H Honors Language, Mind, and Reality 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to PHIL 010. Explores the nature of language, communication, and mentality and their role in shaping our thought and experience of the world. Tackles questions about the innateness of concepts, the social and rational norms governing communication, the nature of speech acts and their connection to hate speech and pornography, and the scope of mentality. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of PHIL 010 or PHIL 010H.

PHIL 012 Introductory Seminar in Moral Philosophy 4 Seminar, 3 hours; extra reading, 32 hours. Prerequisite(s): none. An introduction to a small number of central moral issues. Small class size in order to provide for substantial discussion and close supervision of written papers.

PHIL 030 (E-Z) Introduction to the History of Philosophy 4 Lecture, 3 hours; discussion, 1 hour. Introductory surveys of important periods and subjects in the history of Western philosophy. Topics include E. Hellenic Philosophy: Pre-Socratics Through Aristotle; F. Hellenistic Philosophy: Epicureans, Stoics, And Skeptics; G. Medieval Philosophy; I. Early Modern Philosophy; J. Late Modern Philosophy; K. Nineteenth-century Philosophy; M. History Of Ethics; N. History Of Political Philosophy.

Upper-Division Courses

PHIL 100 Sophomore-Junior Seminar 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): one course in philosophy, sophomore, junior, or senior standing in Philosophy or Philosophy/Law and Society. A writing-intensive seminar designed to introduce students to philosophical analysis and writing through an in-depth focus on a philosophical text or issue. Content varies. Credit is awarded for only one of PHIL 100 or PHIL 101.

PHIL 101 Sophomore and Junior Lecture 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): one course in philosophy; sophomore, junior, or senior standing in Philosophy or Philosophy/Law and Society. A writing-intensive seminar designed to introduce students to philosophical analysis and writing through an in-depth focus on a philosophical text or issue. Content varies. Credit is awarded for only one of PHIL 100 or PHIL 101.

PHIL 107 Languages and Minds 4 Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): one course in philosophy or consent of instructor. An investigation of interrelated issues in the philosophy of mind and language, including the mind-body relation, theories of meaning, how thoughts and language represent states of affairs in the world, and the nature of consciousness.

PHIL 108 Philosophical Issues of Race and Gender 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Investigates philosophical issues concerning race and gender. Includes the role of cultural and biological criteria in defining these concepts; roles of race and gender in personal identity; nature of racism, sexism, and their variants; and policy implications such as affirmative action and the civil status of homosexual relationships. Cross-listed with GST 108.

PHIL 109 Philosophy of Technology 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): Restricted to class level standing of junior, or senior; or consent of instructor. An introduction to philosophical issues concerning technology. Includes the nature of technology; technical artifacts and design; technological knowledge; techno-science; the development of technology; ethical problems concerning technology; technology and gender; socio-technological systems and technocracy; anti-technology; technology and art; and technology and the environment.

PHIL 110 Asian Philosophy 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of Asian contributions to philosophy focusing on the Indian and Chinese traditions. Examines questions concerning how best to live one’s life, what can be known, the relation between mind and body, whether there are minds and bodies, and the nature of the universe. Cross-listed with CHN 112.

PHIL 111 Philosophy, Film, and Reflective Popular Culture 4 Lecture, 3 hours; screening, 1 hour; extra reading, 2 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Examines a number of philosophical themes as depicted in film and other media of reflective popular culture. Includes screenings of four or five films; each is examined for the philosophical issues it raises. Themes may include integrity, love, spirituality, meaning, identity, and morality.

PHIL 112 Mortal Questions 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Focuses on aspects of the distinctively human capacity to lead a meaningful life by investigating aspects of the nature of the mind and human freedom. Discusses the nature of death and its place in the context of a meaningful life.

PHIL 113 God 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing. Topics include examination of the nature of divinity and the nature of evil, the influence of the concept of God upon philosophical history, the value of, and the riddle of an after-life.

PHIL 114 Science and Human Understanding 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): one course in philosophy or consent of instructor. Discusses how contemporary philosophers have examined human understanding as exemplified in science.

PHIL 115 The Care of the Soul 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A historical and contemporary examination of the role philosophy has played in nurturing the human spirit in the face of other philosophical efforts to demythologize the soul into neural functions or even mere congeries of atoms in motion in the void.

PHIL 116 Business Ethics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An inquiry into some of the moral issues arising from business life, such as conflicts of interest, responsibility to consumers, corporate culture and character, and the morality of competition. Also considers the history of ethics and the history of business as an institution.

PHIL 117 Environmental Ethics 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): one course in philosophy or consent of instructor. A philosophic consideration of ethical problems that arise from the use and exploitation of the environment. Topics covered include workplace pollution hazards; environmental pollution and protection of collective natural resources; the rights of future generations; the rights of animals; the protection of endangered species.

PHIL 118 Personhood and Personal Identity 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Develops the basic elements of the concept of personhood, and how persons are alleged to be crucially different from non-human animals. Various theories are considered about what is essential to us as individuals and what makes us the same person over time. Explores the relationship between these metaphysical issues and moral issues, such as euthanasia, animals’ rights, and abortion.

PHIL 119 Economics and Philosophy 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 104B or consent of instructor. Examines issues on the boundary of economics and philosophy. Topics include social choice theory and economic justice; foundations of utility theory, rational choice, and economic welfare; and epistemology and the philosophies of science of Popper, Kuhn, and others. Cross-listed with ECON 117.

PHIL 120 (E-Z) Ancient Philosophy 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): PHIL 001 or PHIL 004H or PHIL 002 or PHIL 002H or PHIL 003 or PHIL 003H or PHIL 003W or PHIL 003X or PHIL 004 or PHIL 005 or PHIL 006 or PHIL 007 or PHIL 007H or PHIL 008 or PHIL 008H or PHIL 009 or PHIL 009H or PHIL 010 or PHIL 010H or PHIL 012 or PHIL 030E or PHIL 030F or PHIL 030G or PHIL 030I or PHIL 030J or PHIL 030K or PHIL 030M or PHIL 030N. Each segment covers a major figure in ancient Greek or Roman philosophy. E. Plato; F. Aristotle; G. Plato And Aristotle; I. Cicero; J. Seneca; K. Plutarch.
PHIL 127 Advanced Topics in Logic 4 Lecture, 3 hours; extra reading, 1 hour; activity, 3 hours. Prerequisite(s): PHIL 124 with a grade of C- or better; or consent of instructor. A study of selected non-truth-functional and nonstandard logics. Includes modal logics, tense logics, free logics, paraconsistent logics, and set theory. Course is repeatable.

PHIL 128 Introduction to Arabic Philosophy 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to Arabic philosophical texts. Provides close and literary reading of texts in philosophy, as well as considers the impact these texts have had or can have on Western cultural formation. Cross-listed with ARLC 154, and CPLT 154.

PHIL 129 History of Philosophy in India 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. An examination of the main philosophical themes, figures, and texts in premodern India. Pays particular attention to Hindu, Buddhist, and Jain philosophy. Cross-listed with AST 130, and RLST 129.

PHIL 130 Theory of Knowledge 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): PHIL 101 or PHIL 001H or PHIL 002 or PHIL 002H or PHIL 003 or PHIL 003H or PHIL 003W or PHIL 004 or PHIL 004H or PHIL 005 or PHIL 005H or PHIL 006 or PHIL 006H or PHIL 007 or PHIL 007H or PHIL 008 or PHIL 008H or PHIL 009 or PHIL 009H or PHIL 010 or PHIL 010H or PHIL 012 or PHIL 012H or PHIL 030 or PHIL 030H or PHIL 030W or PHIL 031 or PHIL 031H or PHIL 032 or PHIL 032H or PHIL 033 or PHIL 033H or PHIL 034 or PHIL 034H. Topics include E. Ancient Philosophy; F. Medieval Philosophy; I. French Renaissance Philosophy; J. Early Modern Philosophy; M. Moral Theories Of Hutu And Kan; N. Nineteenth-century Philosophy; O. Kant And Post-Kantian European Moral Philosophy; Q. Political Philosophy; R. Origins Of Analytical Philosophy.

PHIL 131 Twentieth-Century Analytic Philosophy 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): PHIL 101 or PHIL 001H or PHIL 002 or PHIL 002H or PHIL 003 or PHIL 003H or PHIL 003W or PHIL 004 or PHIL 004H or PHIL 005 or PHIL 005H or PHIL 006 or PHIL 006H or PHIL 007 or PHIL 007H or PHIL 008 or PHIL 008H or PHIL 009 or PHIL 009H or PHIL 010 or PHIL 010H or PHIL 012 or PHIL 012H or PHIL 030 or PHIL 030H or PHIL 030W or PHIL 031 or PHIL 031H or PHIL 032 or PHIL 032H or PHIL 033 or PHIL 033H or PHIL 034 or PHIL 034H or PHIL 035 or PHIL 035H or PHIL 036 or PHIL 036H or PHIL 037 or PHIL 037H. A study of some of the main issues and thinkers in the tradition dominant in twentieth-century British and American philosophy. Philosophers discussed might include Frege, Russell, Carnap, Quine, Kripke, and D. Lewis.

PHIL 132 Philosophy of Language 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. A study of some of the traditional issues in the philosophy of language, such as analyticity, theories of reference, truth, speech act theory, and philosophical theories of formal grammar.

PHIL 133 Metaphysics 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): PHIL 001 or PHIL 001H or PHIL 002 or PHIL 002H or PHIL 003 or PHIL 004 or PHIL 003H or PHIL 003W or PHIL 004 or PHIL 005 or PHIL 005H or PHIL 006 or PHIL 006H or PHIL 007 or PHIL 007H or PHIL 008 or PHIL 008H or PHIL 009 or PHIL 009H or PHIL 010 or PHIL 010H or PHIL 012 or PHIL 012H or PHIL 030 or PHIL 030H or PHIL 030W or PHIL 031 or PHIL 031H or PHIL 032 or PHIL 032H or PHIL 033 or PHIL 033H or PHIL 034 or PHIL 034H or PHIL 035 or PHIL 035H or PHIL 036 or PHIL 036H or PHIL 037 or PHIL 037H; or consent of instructor. An inquiry into the nature of mind and body, the determinism versus free will debate, and the nature of time and space.

PHIL 134 Philosophy of Mind 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): PHIL 001 or PHIL 001H or PHIL 002 or PHIL 002H or PHIL 003 or PHIL 004 or PHIL 003W or PHIL 004H or PHIL 005 or PHIL 005H or PHIL 006 or PHIL 006H or PHIL 007 or PHIL 007H or PHIL 008 or PHIL 008H or PHIL 009 or PHIL 009H or PHIL 010 or PHIL 010H or PHIL 012 or PHIL 012H or PHIL 030 or PHIL 030H or PHIL 030W or PHIL 031 or PHIL 031H or PHIL 032 or PHIL 032H or PHIL 033 or PHIL 033H or PHIL 034 or PHIL 034H; or consent of instructor. A study of several theories of the nature of mind and an analysis of particular issues occasioned by them: the mind-body problem, personal identity, emotions, human action, self-knowledge, knowledge of other minds, and explanations of human behavior.

PHIL 135 Philosophy of Psychology 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): PHIL 001 or PHIL 001H or PHIL 002 or PHIL 002H or PHIL 003 or PHIL 004 or PHIL 003W or PHIL 004W or PHIL 005 or PHIL 005H or PHIL 006 or PHIL 006H or PHIL 007 or PHIL 007H or PHIL 008 or PHIL 008H or PHIL 009 or PHIL 009H or PHIL 010 or PHIL 010H or PHIL 012 or PHIL 012H or PHIL 030 or PHIL 030H or PHIL 030W or PHIL 031 or PHIL 031H or PHIL 032 or PHIL 032H or PHIL 033 or PHIL 033H or PHIL 034 or PHIL 034H or PHIL 035 or PHIL 035H or PHIL 036 or PHIL 036H or PHIL 037 or PHIL 037H; or consent of instructor. Examines philosophical issues arising in the context of empirical psychology. Topics may include moral development, artificial intelligence and the modeling of cognition, the nature of perception and memory, fallacies in human reasoning, mechanisms of self-understanding, and mental illness and personhood.

PHIL 137 Philosophy of Science 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): PHIL 001 or PHIL 001H or PHIL 002 or PHIL 002H or PHIL 003 or PHIL 004 or PHIL 003W or PHIL 004H or PHIL 005 or PHIL 005H or PHIL 006 or PHIL 006H or PHIL 007 or PHIL 007H or PHIL 008 or PHIL 008H or PHIL 009 or PHIL 009H or PHIL 010 or PHIL 010H or PHIL 012 or PHIL 012H or PHIL 030 or PHIL 030H or PHIL 030W or PHIL 031 or PHIL 031H or PHIL 032 or PHIL 032H or PHIL 033 or PHIL 033H or PHIL 034 or PHIL 034H or PHIL 035 or PHIL 035H or PHIL 036 or PHIL 036H or PHIL 037 or PHIL 037H; or consent of instructor. Examines the scientific methodology and its logic; and the history and sociology of science; realism and anti-realism about scientific theories; scientific methodology and its logic; and the nature of scientific explanation.
PHIL 138 Philosophy of Agency 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): PHIL 001 or PHIL 001H or PHIL 002 or PHIL 002H or PHIL 003 or PHIL 003H or PHIL 003W or PHIL 003X or PHIL 004 or PHIL 005 or PHIL 006 or PHIL 007 or PHIL 007H or PHIL 008 or PHIL 008H or PHIL 009 or PHIL 009H or PHIL 010 or PHIL 010H or PHIL 012 or PHIL 030 or PHIL 030F or PHIL 030G or PHIL 030H or PHIL 030J or PHIL 030K or PHIL 030M or PHIL 030N; or consent of instructor. An investigation of problems that arise in attempts to understand human agency: the nature and explanation of action, intention, free will and moral responsibility, and weakness of will.

PHIL 139 Philosophy of Mathematics 4 Lecture, 3 hours; activity, 3 hours. Prerequisite(s): PHIL 124; or one mathematics course; or consent of instructor. Discusses topics including abstract nature of mathematical objects, the sources of mathematical knowledge, the relation between mathematics and logic, and the infinite in mathematics. Considers the development of some selected parts of mathematics (especially arithmetic, geometry, algebra, and set theory) and of various corresponding philosophical positions (platonism, formalism, intuitionism, structuralism). Course is repeatable.

PHIL 140 Topics in Metaphysics 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): one course in philosophy or consent of instructor. An in-depth discussion of selected issues in contemporary metaphysics, such as abstract objects, essentialism and identity, laws of nature, free will, and determinism. Course is repeatable as content changes.

PHIL 142 Advanced Topics in the Philosophy of Language 4 Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): PHIL 107 or PHIL 132 or consent of instructor. An in-depth study of a particular topic in the philosophy of language. Potential topics include context-sensitivity (how the meaning of a sentence depends upon nonlinguistic facts about context); theories of meaning (e.g., the Frege-Russell account in terms of propositions, the Lewis-Stalnaker possible worlds account, and Davidson’s truth theory account). Courses is repeatable as content changes to a maximum of 8 units. Credit is awarded for only one of PHIL 142 or PHIL 242.

PHIL 144 Advanced Topics in Philosophy of Mind 4 Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): PHIL 107 or PHIL 134 or consent of instructor. Examines a selected topic in philosophy of mind. Potential topics include consciousness and self-consciousness; intentionality and theories of mental content; mental causation; consciousness and free will; introspection and knowledge of other minds; perception; emotion; imagination; concepts and rationality; artificial minds; and animal minds. Course is repeatable as content changes to a maximum of 8 units. Credit is awarded for only one of PHIL 144 or PHIL 244.

PHIL 150 Philosophy in Literature 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): one course in philosophy or consent of instructor. An examination of philosophical issues raised by selected novelists, poets, and playwrights.

PHIL 151 Existentialism 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. An examination of philosophical and literary works which deal with the significance of some fundamental human experiences: identity crises, choice and commitment, anxiety and death, the experience of meaninglessness, and alienation.

PHIL 152 Twentieth-Century Continental Philosophy 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): PHIL 001 or PHIL 001H or PHIL 002 or PHIL 002H or PHIL 003 or PHIL 003H or PHIL 003W or PHIL 003X or PHIL 004 or PHIL 005 or PHIL 006 or PHIL 007 or PHIL 007H or PHIL 008 or PHIL 008H or PHIL 009 or PHIL 009H or PHIL 010 or PHIL 010H or PHIL 012 or PHIL 030 or PHIL 030F or PHIL 030G or PHIL 030H or PHIL 030J or PHIL 030K or PHIL 030M or PHIL 030N; or consent of instructor. Examines the characters and consequences of several recent movements in continental philosophy, including hermeneutics, structuralism, deconstruction, and critical theory. Authors discussed include Heidegger, Gadamer, Habermas, Derrida, and Foucault.

PHIL 153 Marxist Critique 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An examination of the ideas central to the tradition of Western Marxism: ideology, critique, reification, instrumental reason, the domination of nature, and communicative action. Theorists discussed typically include Hegel, Marx, Lukacs, Adorno, Horkheimer, Benjamin, and Habermas. Credit is awarded for only one of PHIL 153 or PHIL 253.

PHIL 154 Phenomenology 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of the structures and conditions of our lived experience of the world. Explores the major issues, the methodology, and the historical development of the phenomenological tradition in philosophy. Philosophers discussed might include Edmund Husserl, Edith Stein, Martin Heidegger, Max Scheler, Jean-Paul Sartre, Simone de Beauvoir, and Maurice Merleau-Ponty.

PHIL 155 Peace in the Middle East 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of the roots of the Middle Eastern crises. Focuses on the Arab-Israeli conflict and possible solutions toward peace. Addresses problems through historical, religious, and political lines of inquiry. Cross-listed with RLST 155.

PHIL 159 Philosophy of Religion 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. A historical, critical examination of the concepts and arguments involved in the Judeo-Christian God-hypothesis, and the influence of this world view upon the ideals and values of the Western world.

PHIL 161 Ethics 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): PHIL 001 or PHIL 001H or PHIL 002 or PHIL 002H or PHIL 003 or PHIL 003H or PHIL 003W or PHIL 003X or PHIL 004 or PHIL 005 or PHIL 006 or PHIL 007 or PHIL 007H or PHIL 008 or PHIL 008H or PHIL 009 or PHIL 009H or PHIL 010 or PHIL 010H or PHIL 012 or PHIL 030 or PHIL 030F or PHIL 030G or PHIL 030H or PHIL 030J or PHIL 030K or PHIL 030M or PHIL 030N; or consent of instructor. A study of the major classical moral philosophers in the Western tradition and of some selected problems of metaethics.

PHIL 162 Human Nature and Radical Evil 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): PHIL 001 or PHIL 001H or PHIL 002 or PHIL 002H or PHIL 003 or PHIL 003H or PHIL 003W or PHIL 003X or PHIL 004 or PHIL 005 or PHIL 006 or PHIL 007 or PHIL 007H or PHIL 008 or PHIL 008H or PHIL 009 or PHIL 009H or PHIL 010 or PHIL 010H or PHIL 012 or PHIL 030 or PHIL 030F or PHIL 030G or PHIL 030H or PHIL 030J or PHIL 030K or PHIL 030M or PHIL 030N; or consent of instructor. A philosophical analysis of the concept of justice.

PHIL 163 Political Philosophy 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. An inquiry into some of the main philosophic issues arising from political life, such as the nature and justification of authority, democracy, natural rights, justice, equality, and civil disobedience.

PHIL 164 Justice 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. A philosophical analysis of the concept of justice.

PHIL 165 Philosophy of Law 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. An inquiry into the nature of criminal law, the relation between law and morality, the nature of legal responsibility, and the obligation to obey the law. Credit is awarded for one of the following PHIL 165 or PHIL 165H.

PHIL 165H Honors Philosophy of Law 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; admission to University Honors; or consent of instructor. Honors course corresponding to PHIL 165. An inquiry into the nature of criminal law, the relation between law and morality, the nature of legal responsibility, and the obligation to obey the law. Credit is awarded for one of the following PHIL 165H or PHIL 165.

PHIL 166 Philosophy of Feminism 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. An analysis of current concepts and debates in feminist philosophy including gender equality, gender difference, and the relation of sex and gender. Situates various approaches to these topics in the history of philosophy.
PHIL 167 Biomedical Ethics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. A philosophical discussion of newly emerging issues, both ethical and social, in biology and medicine, such as genetic engineering, euthanasia, experimentation with human subjects, abortion, behavior control, and patient’s right to know.

PHIL 168 Ethics and Families 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Analyzes ethical issues with regard to families of different kinds such as gender relations in traditional marriages; the ethics of same-sex marriage; the morality of abortion, surrogate mothering, and cloning; the justice of school vouchers; the grounds for universal health care; and possible gender inequalities in divorce. Cross-listed with GSST 141.

PHIL 169 (E-Z) Topics in Value Theory 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): PHIL 001 or PHIL 010 or PHIL 002 or PHIL 002H or PHIL 003 or PHIL 003H or PHIL 003W or PHIL 003X or PHIL 004 or PHIL 005 or PHIL 006 or PHIL 007 or PHIL 008 or PHIL 008H or PHIL 009 or PHIL 009H or PHIL 010 or PHIL 010H or PHIL 012 or PHIL 030 or PHIL 030F or PHIL 030G or PHIL 030I or PHIL 030J or PHIL 030K or PHIL 030M or PHIL 030N; restricted to class level standing of junior, or senior. Topics include E. Ethics; F. Aesthetics; G. Political Philosophy; I. Social Philosophy; J. Philosophy Of Law.

PHIL 171 Feminist Bioethics 4 Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An exploration of the ways in which feminist theory provides insight on contemporary issues in bioethics. Topics include women in clinical research, cosmetic surgery, abortion, contract gestation, fetal protection policies, and the politics of mental illness. Cross-listed with GSST 106.

PHIL 172 Reading Philosophical German 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): GER 002R or GER 004 or consent of instructor. Develops reading strategies and translation skills for German philosophical texts through a review of grammar and readings in the original language. Prepares for a graduate-level translation exam and independent research in German. Intermediate to advanced German reading proficiency required; familiarity with German philosophical works is recommended but not required. Cross-listed with GER 172.

PHIL 173 Philosophy of Sex and Sexuality 4 Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Investigates philosophical issues relating to human sexual behaviors and identities. Topics include attempts to distinguish sexual from nonsexual activities; the construction and medicalization of sex and sexuality; and historical and contemporary ethical evaluations of various sexual activities and identities (homo-, hetero-, sex, masturbation, sadomasochism, various fetishes, polymy, and other nonmonogamies).

PHIL 174 Philosophy of Art and Aesthetics 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): Restricted to class level standing of junior, or senior; or consent of instructor. Examination of the main topics in the philosophy of art and aesthetics through both historical and contemporary sources. Addresses the following questions: What is art? What is beauty? What is the relation between the beautiful, the true, and the good? Is beauty mind-dependent? Are there objective standards for judging artworks?

PHIL 190 Special Studies 1 to 5 Prerequisite(s): to be taken with the consent of the department chair as a means of meeting special curricular problems. Course is repeatable to a maximum of 16 units.

PHIL 193 Senior Seminar 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): two upper-division courses in philosophy; senior standing in Philosophy or Philosophy/Law and Society or consent or instructor. Advanced seminar for Philosophy majors. Course is repeatable as content changes to a maximum of 8 units.

PHIL 195 Senior Thesis 1 to 4 Prerequisite(s): enrollment by request of student with approval of department chair. Course is graded in Progress (IP) until the thesis is completed. Course is repeatable to a maximum of 8 units.

PHIL 198 R’Course: Variable Topics 1 Activity hours vary per R’Course proposal. Prerequisite(s): permission needed from department; sophomore standing or consent of instructor. An internship for UC Irvine undergraduate students to develop leadership skills, innovate the undergraduate curriculum, and promote democratic, experiential education. Original course topics are variable and unique from other departmental course offerings, designed to highlight the student facilitators’ expertise while working closely with a faculty mentor. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as topics change to a maximum of 8 units.

PHIL 1981 Individual Internship in Philosophy 2 to 8 Internship, 4 to 16 units; written work, 2 to 8 hours. Prerequisite(s): upper-division standing; consent of instructor. An intern assignment in government, education, science, business, or other field related to philosophy. Students write a substantive philosophical paper pertaining to the work done in the internship. Course is repeatable to a maximum of 8 units.

Graduate Courses

PHIL 220 (E-Z) Ancient Philosophy 4 Lecture, 3 hours; seminar, 1 hour. Prerequisite(s): graduate standing. Each segment covers a major figure in the history of ancient Greek or Roman philosophy. E. Plato; F. Aristotle; G. Plato And Aristotle; I. Cicero; J. Seneca; K. Plutarch.

PHIL 221 (E-Z) Major Philosophers 4 Lecture, 3 hours; seminar, 1 hour. Prerequisite(s): graduate standing. Each segment covers a major figure in the history of medieval, early modern, or late modern philosophy. E. Aquinas; F. Descartes; G. Leibniz; I. Spinoza; J. Locke; K. Hume; M. Reid; N. Kant; O. Hegel; Q. Nietzsche; R. Royce; S. Freud; T. Heidegger; V. Wittgenstein; X. Kripke.

PHIL 222 (E-Z) Topics in History of Philosophy 4 Lecture, 3 hours; seminar, 1 hour. Prerequisite(s): graduate standing. Topics include E. Ancient Philosophy; F. Medieval Philosophy; I. French Renaissance Philosophy; J. Early Modern Philosophy; M. Moral Theories Of Hume And Kant; N. Nineteenth-century Philosophy; Q. Kant And Post-kantian European Moral Philosophy; Q. Political Philosophy; R. Origins Of Analytical Philosophy.

PHIL 242 Advanced Topics in the Philosophy of Language 4 Lecture, 3 hours; seminar, 1 hour. Prerequisite(s): graduate standing. An in-depth study of a particular topic in the philosophy of language. Potential topics include context-sensitivity (how the meaning of a sentence depends upon nonlinguistic facts about context); theories of meaning (e.g., the Frege-Russell account in terms of propositions, the Lewis-Stalnaker possible worlds account, and Davidson’s truth theory account). Students who complete all writing assignments, including a term paper, receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 8 units. Credit is awarded for only one of PHIL 142 and PHIL 242.

PHIL 244 Advanced Topics in Philosophy of Mind 4 Lecture, 3 hours; seminar, 1 hour. Prerequisite(s): graduate standing. Examines a selected topic in philosophy of mind. Potential topics include consciousness and self-consciousness; intentionality and theories of mental content; mental causation; conscious and free will; introspection and knowledge of other minds; perception; emotion; imagination; concepts and rationality; artificial minds; and animal minds. Students who complete all writing assignments, including a term paper, receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 8 units. Credit is awarded for only one of PHIL 144 and PHIL 244.

PHIL 253 Marxist Critique 4 Lecture, 3 hours; seminar, 1 hour. Prerequisite(s): graduate standing. An examination of the ideas central to the tradition of Western Marxism: ideology, critique, reification, instrumental reason, the domination of nature, and communicative action. Theorists discussed typically include Hegel, Marx, Lukacs, Adorno, Horkheimer, Benjamin, and Habermas. Students who complete all writing assignments, including a term paper, receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Credit is awarded for only one of PHIL 153 or PHIL 253.
PHIL 270 Philosophy Colloquia 1 Colloquium, 1 hour. Prerequisite(s): graduate standing. Visiting scholars give oral reports on current research in philosophy and discuss them with students and faculty. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PHIL 272A Workshop in Philosophy 2 to 4 Workshop 2 To 3, Research 1 To 3. Prerequisite(s): graduate standing; consent of instructor. Close reading of a philosophical text or texts on a single topic. May be undertaken as a one-, two-, or three-quarter course (PHIL 272A, PHIL 272B, PHIL 272C). Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. PHIL 272A, PHIL 272B, and PHIL 272C are repeatable to a maximum of 12 units on one topic and to a maximum of 36 units for the three courses.

PHIL 272B Workshop in Philosophy 2 to 4 Workshop 2 To 3, Research 1 To 3. Prerequisite(s): PHIL 272A; consent of instructor. Close reading of a philosophical text or texts on a single topic. May be undertaken as a one-, two-, or three-quarter course (PHIL 272A, PHIL 272B, PHIL 272C). Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. PHIL 272A, PHIL 272B, and PHIL 272C are repeatable to a maximum of 12 units on one topic and to a maximum of 36 units for the three courses.

PHIL 272C Workshop in Philosophy 2 to 4 Workshop 2 to 3, Research 1 to 3. Prerequisite(s): PHIL 272B; consent of instructor. Close reading of a philosophical text or texts on a single topic. May be undertaken as a one-, two-, or three-quarter course (PHIL 272A, PHIL 272B, PHIL 272C). Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. PHIL 272A, PHIL 272B, and PHIL 272C are repeatable to a maximum of 12 units on one topic and to a maximum of 36 units for the three courses.

PHIL 275A Proseminar For First-Year Graduate Students: Metaphysics and Epistemology 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): first-year standing in the graduate program in Philosophy. One course in a three-term sequence designed to introduce new graduate students to current issues and methods of research in metaphysics and epistemology.

PHIL 275B Proseminar For First-Year Graduate Students: Metaphysics and Epistemology 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): PHIL 275A; first-year standing in the graduate program in Philosophy. One course in a three-term sequence designed to introduce new graduate students to current issues and methods of research in additional areas of metaphysics and epistemology.

PHIL 275C Proseminar For First-Year Graduate Students: Moral Philosophy 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): first-year standing in the graduate program in Philosophy. One course in a three-term sequence designed to introduce new graduate students to current issues and methods of research.

PHIL 276 Third and Fourth Year Research Seminar 2 or 4 Seminar, 2 hours; extra reading, 3 hours; research, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Close reading of a philosophical text or texts on a single topic. May be undertaken as a one-, two-, or three-quarter course (PHIL 272A, PHIL 272B, PHIL 272C). Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. PHIL 272A, PHIL 272B, and PHIL 272C are repeatable to a maximum of 12 units on one topic and to a maximum of 36 units for the three courses.

PHIL 280 Seminar in Philosophical Problems 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Considers an important philosophical problem. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

PHIL 280A Seminar in Philosophical Problems 4 Seminar, 1 to 3 hours; consultation, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Considers a problem in the history of philosophy. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

PHIL 280B Seminar in Philosophical Problems 4 Seminar, 1 to 3 hours; consultation, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Considers an important philosophical problem. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

PHIL 280C Seminar in Philosophical Problems 4 Seminar, 1 to 3 hours; consultation, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Considers a problem in the history of philosophy. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

PHIL 280D Seminar in Philosophical Problems 4 Seminar, 1 to 3 hours; consultation, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Considers an important philosophical problem. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

PHIL 281 Seminar in Individual Philosophers 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Considers a major figure in the history of philosophy. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

PHIL 282 Seminar in Contemporary Philosophy 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Covers an aspect of contemporary philosophy. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

PHIL 283 Seminar in Contemporary Philosophy 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Covers an aspect of contemporary philosophy. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

PHIL 284A Problems in the History of Philosophy 4 Seminar, 3 hours; research, 9 hours. Prerequisite(s): graduate standing or consent of instructor. Focused reading of texts or problems in the history of Philosophy. May be taken as a one quarter course or with PHIL 284B as part of a two quarter sequence. Students taking PHIL 284A as a one quarter course who submit a term paper receive a letter grade; other students taking it as a one quarter course receive a Satisfactory (S) or No Credit (NC) grade. Students taking PHIL 284A as part of a two quarter sequence with PHIL 284B receive In Progress (IP) until PHIL 284B is completed, at which time one final grade is assigned for both courses. Course is repeatable to a maximum of 40 units.

PHIL 284B Problems in the History of Philosophy 4 Seminar, 3 hours; research, 9 hours. Prerequisite(s): graduate standing or consent of instructor. Focused reading of texts or problems in the history of Philosophy. May be taken as a one quarter course or with PHIL 284A as part of a two quarter sequence. Students taking PHIL 284B as a one quarter course who submit a term paper receive a letter grade; other students taking it as a one quarter course receive a Satisfactory (S) or No Credit (NC) grade. Students taking PHIL 284B as part of a two quarter sequence with PHIL 284A receive In Progress (IP) until PHIL 284B is completed, at which time one final grade is assigned for both courses. Course is repeatable to a maximum of 40 units.

PHIL 285A Problems in Contemporary Philosophy 4 Seminar, 3 hours; research, 9 hours. Prerequisite(s): graduate standing or consent of instructor. Covers a problem or a literature in an area of contemporary philosophy. May be taken as a one quarter course or with PHIL 285B as part of a two quarter sequence. Students taking PHIL 285A as a one quarter course who submit a term paper receive a letter grade; other students taking PHIL 285A as a one quarter course receive a Satisfactory (S) or No Credit (NC) grade. Students taking PHIL 285A as part of a two quarter sequence with PHIL 285B receive In Progress (IP) until PHIL 285B is completed, at which time one final grade is assigned for both courses. Course is repeatable to a maximum of 40 units.

PHIL 285B Problems in Contemporary Philosophy 4 Seminar, 3 hours; research, 9 hours. Prerequisite(s): graduate standing or consent of instructor. Covers a problem or a literature in an area of contemporary philosophy. May be taken as a one quarter course or with PHIL 285B as part of a two quarter sequence. Students taking PHIL 285-A as a one quarter course who submit a term paper receive a letter grade; other students taking it as a one quarter course receive a Satisfactory (S) or No Credit (NC) grade. Students taking PHIL 285-A as part of a two quarter sequence with PHIL 285-B receive In Progress (IP) until PHIL 285-B is completed, at which time one final grade is assigned for both courses. Course is repeatable to a maximum of 40 units.
PHIL 292 Concurrent Analytical Studies in Philosophy 1 to 4 Prerequisite(s): consent of instructor. Each 292 course will be taken concurrently with some 100-series course, approved by the Graduate Advisor, but on an individual basis. It will be devoted to completion of a graduate paper based on research or criticism related to the 100-series course. Faculty guides and evaluations will be provided throughout the quarter. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PHIL 297 Directed Research 1 to 6 Prerequisite(s): graduate standing. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PHIL 299 Research for Thesis Or Dissertation 1 to 12 Prerequisite(s): graduate standing. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

**Professional Courses**

PHIL 301 Directed Studies in the Teaching of Philosophy Seminar, 1 hour. Prerequisite(s): graduate standing. A program of orientation, lectures, and workshops designed to enhance the Teaching Assistant’s understanding of teaching methods in philosophy and to provide opportunities to work closely with experts in college teaching in order to improve the quality of instruction. Required of all new Teaching Assistants. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PHIL 302 Teaching Practicum 1 to 4 Prerequisite(s): employment as Teaching Assistant or Associate. Supervised teaching in lower-division courses and LWSO 100. Required of all teaching assistants in philosophy. Does not count toward the unit requirement for the M.A. degree. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

PHIL 400 Research and Professional Development Workshop Workshop, 8 hours; extra reading, 8 hours. Prerequisite(s): graduate standing. A series of presentations and workshops focused on a variety of issues in research, professional development, and teaching. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 18 units.

**Physical Sciences**

**College of Natural and Agricultural Sciences**

The Physical Sciences major is not accepting new students at this time. For more information, contact the CNAS Undergraduate Academic Advising Center, 1223 Pierce Hall, or call (951) 827-7294.

**Physics and Astronomy**

**Subject abbreviation: PHYS**

**College of Natural and Agricultural Sciences**

Miguel Arratia Munoz, Ph.D.
Jon Richardson, Ph.D.
Shawn Westerdale, Ph.D.

**Major**

The Department of Physics and Astronomy offers two undergraduate degrees: the B.A. and B.S. in Physics.

The B.S. program is designed for students with a strong interest in the sciences or engineering who wish to emphasize this aspect of their education and training. The B.S. degree provides a strong background for students who wish to continue on to graduate school.

The B.A. program follows the liberal arts tradition with a broader coverage of the humanities and social sciences. It is selected often by students who intend to obtain a teaching credential with a specialty in science or to pursue a career combining business management opportunities with a knowledge in science and technology.

The extensive course offerings and modern facilities within the Department of Physics and Astronomy, coupled with close, personal counseling by faculty advisors, provide students with a physics program that is characterized by its breadth and flexibility.

**Career Opportunities**

Graduates with a bachelor’s degree in Physics generally begin their careers in government or industry. Professions include research and development, system modeling and analysis, and sales in a large variety of fields. A Physics degree provides one of the most flexible qualifications with direct applications to materials science, advanced electronics, lasers and microwave devices, computing and communications.

The federal government and national laboratories employ many physicists as do industries in medical and scientific instruments, computers, audio and telecommunications equipment, financial analysis and investments, material science, and engineering.

The bachelor’s degree programs in the UCR Department of Physics and Astronomy are well suited for continued education in graduate school and for preparation in technical and professional careers. Colleges or universities, national laboratories, industry, and governmental agencies employ students with graduate training.
Transfer Students
Students transferring to the Physics major must complete courses comparable to the following one-year sequences before they transfer:

1. General physics (calculus-based) equivalent to PHYS 040A, PHYS 040B, PHYS 040C
2. First-year calculus, equivalent to MATH 007A or MATH 009A, MATH 007B or MATH 009B, MATH 009C

Students must have a minimum grade point average of 2.70 in transferable college courses. UCR has articulation agreements with most of the California community colleges. These agreements list specific community college courses that have been designated as comparable to UCR courses (see the statewide articulation Web site at www.assist.org). Transfer students will usually find it advantageous to complete most or all sequences before starting at UCR. All prospective transfers should try to complete the sequences they begin rather than divide a sequence between two campuses.

University Requirements
See Undergraduate Studies section.

College Requirements
See College of Natural and Agricultural Sciences, Colleges and Programs section.

Some of the following requirements for the major may also fulfill some of the college’s breadth requirements. Consult with a department advisor for course planning.

Major Requirements
The major requirements consist of a core curriculum and additional requirements for various B.S. degrees. The core requirements for the B.A. and B.S. degrees in Physics are as follows:

1. Lower-division requirements (70 units)
   a) one of the following sequences: PHYS 04A, PHYS 04B, PHYS 04C, or PHYS 04A or PHYS 04HA, PHYS 04B or PHYS 04HB, PHYS 04C or PHYS 04HC, PHYS 04D, PHYS 04E. The first sequence is preferred for the B.S. in Physics.
   b) PHYS 039
   c) MATH 007A or MATH 009A or MATH 009A or MATH 007B or MATH 009B or MATH 009B, MATH 009C, MATH 010A, MATH 010B, MATH 046
   d) CHEM 001A, CHEM 001B, CHEM 001C, CHEM 001A, CHEM 018, CHEM 018C
   e) CS 010A or CS 009P. A higher-level CS course may satisfy this CS requirement with approval.

2. Upper-division requirements (41 to 42 units)
   a) PHYS 130A, PHYS 130B, PHYS 132, PHYS 135A, PHYS 135B, PHYS 156A, PHYS 156B
   b) PHYS 139L (5 units), PHYS 142L (4 units) or PHYS 142W (5 units). Note that PHYS142W satisfies the ENGL 001C requirement.
   c) 4 units of upper-division Physics electives. Upper-division math, science or engineering may be substituted with approval.

Physics: Standard Track (B.S. degree)
1. Additional upper-division requirements (16 to 17 units)
   a) PHYS 136
   b) One of the following: one additional quarter of PHYS 142L (4 units) or PHYS 142W (5 units); at least 4 units of Senior Thesis (PHYS 195A, PHYS 195B, PHYS 195C, PHYS 195D); at least 4 units of internship in Physics (PHYS 198I); participation in an approved summer research program, such as a NSF REU, and an additional 4 units of upper-division physics elective.
   c) 8 additional units of upper-division Physics electives. PHYS 156C is highly recommended for those planning to go to graduate school in physics.

Physics: Biophysics Track (B.S. degree)
1. Additional lower-division requirements (25 units)
   a) BIOL 005A, BIOL 005B, BIOL 005C, BIOL 05LA or BIOL 020.
   b) CHEM 008A, or CHEM 008A, CHEM 008B or CHEM 008B, CHEM 008C or CHEM 008C, CHEM 008A or CHEM 008B, CHEM 008B or CHEM 008B.
   c) 8 additional upper-division units taken from BCH 110A, BCH 110B, BCH 110C or BIOL 107A (other upper-division CHEM/BIOL/BCH may be substituted upon approval)

2. Additional upper-division requirements (8 units)
   a) PHYS 130A
   b) PHYS 132
   c) PHYS 135A
   d) One Upper Division Physics elective from PHYS 111, PHYS 150A, PHYS 151, PHYS 164, PHYS 165, PHYS 166, PHYS 177

Physics Education Track (B.S. degree)
1. Additional lower-division requirements (6 units)
   a) EDUC 003, EDUC 004

2. Additional upper-division requirements (8 units)
   a) Choose two courses from the following list: EDUC 105 (highly recommended), EDUC 147, EDUC 162, EDUC 132, EDUC 177, EDUC 179A

Physics: Astrophysics Track (B.S. degree)
1. Additional upper-division requirements (20 units)
   a) PHYS 136, PHYS 111, PHYS 112, PHYS 166, PHYS 140L (PHYS 111, PHYS 112, or PHYS 166 can also satisfy the 4 units of upper-division core requirements in 2c. above.

Students continuing on to graduate school are encouraged to take additional upper-division courses in Mathematics, such as MATH 146A, MATH 146B, MATH 146C, MATH 165A, MATH 165B, and MATH 131.

Students may wish to earn a Minor in Mathematics which requires an additional 24 units of upper-division math.

To graduate, a minimum grade point average of 2.00 (C) is necessary overall and in the upper-division courses taken for the major (including upper-division courses listed under each track).

Bachelor of Arts
For the B.A. degree, additional units are required in Humanities, Social Sciences, and foreign language to meet the breadth requirements.

Minor
The minor in Physics consists of 26 upper-division units in Physics. A minimum of 16 units must be unique to the minor and may not be used to satisfy major requirements.

1. First Tier (16 units)
   a) PHYS 130A
   b) PHYS 132
   c) PHYS 135A
   d) One Upper Division Physics elective from PHYS 111, PHYS 150A, PHYS 151, PHYS 164, PHYS 165, PHYS 166, PHYS 177

2. Second Tier; at least 10 units from any upper-division Physics courses not chosen in the First Tier. The combined units from the First and Second Tiers should add to at least 26.

3. No more than 4 units of 190-199 courses may be used to fulfill the upper-division units for the minor.

See Minors under the College of Natural and Agricultural Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Community College Transfers
The department provides special advisory services to aid community college transfer students in formulating their program and in remedying any deficiencies in required course work. Transfer students who have followed the prescribed program at the community college should be able to continue with the sample program at the junior level.
**Graduate Program in Physics**

The Department of Physics and Astronomy offers the M.S. and Ph.D. degrees in Physics.

Ongoing research in the Department of Physics and Astronomy includes astrophysics and space physics, condensed matter physics, particle physics, heavy ion physics, surface science, laser physics, and environmental physics. Large-scale experiments are carried out at the major U.S. and European accelerator laboratories or observatories.

Admission All applicants must submit scores from the GRE General and Physics subject tests. Questions about requirements for admission should be directed to the graduate advisor at (951) 827-5332.

**Master’s Degree**

A student is recommended for the degree of M.A. or M.S. in Physics upon completion of the following requirements:

1. Satisfactory completion of a minimum of 36 quarter units of approved physics courses taken for a letter grade after admission to graduate study. Of these, at least 24 quarter units must be in the 200 series. Each course must be passed with a grade of "B" or better. Each student must maintain an average for all courses of "B" or better.

2. Either of the following two plans:

**Plan I (Thesis)**

Satisfactory completion of a thesis in a field of physics to be chosen in consultation with a faculty supervisor. This thesis is approved by a committee designated by the department.

**Plan II (Comprehensive Examination)**

Satisfactory performance on the comprehensive examination.

Under either plan all requirements for the master’s degree must be completed not later than the end of the sixth quarter.

**Normative Time to Degree** Six quarters

**Doctoral Degree**

The Department of Physics and Astronomy offers the Ph.D. degree in Physics.

It is recommended that students in the Ph.D. program become associated with a research advisor by the end of Spring Quarter of their first year.

A student is recommended for advancement to candidacy for the Ph.D. degree in Physics upon completion of requirements (1), (2), and (3) below. The student is recommended for the Ph.D. degree upon completion of requirements (4) and (5) below.

1. **Course Work**

   Each course must be passed with a grade of "B" or better. Each student must maintain an average of "B" or better for all courses.

   **A. Core courses for students pursuing a program in Physics (other than the Astrophysics Track):**

      PHYS 205 (Classical Mechanics)
      PHYS 210A, PHYS 210B, PHYS 210C (Electromagnetic Theory)
      PHYS 212A (Thermodynamics and Statistical Mechanics)
      PHYS 221A, PHYS 221B, PHYS 221C (Quantum Mechanics)
      PHYS 296 (Summer Research in Physics and Astronomy)
      PHYS 401 (Professional Development in Physics and Astronomy)

   **B. Core courses for students pursuing a program in Physics on the Astrophysics Track:**

      PHYS 205 (Classical Mechanics)
      PHYS 210A, PHYS 210B, PHYS 210C (Electromagnetic Theory)
      PHYS 212A (Thermodynamics and Statistical Mechanics, Part A)
      PHYS 214 (Techniques of Observational Astrophysics)
      PHYS 215 (Dynamics and Evolution of Galaxies)
      PHYS 218 (Fundamentals of Astrophysics)
      PHYS 219 (Cosmology and Structure Formation)
      PHYS 296 (Summer Research in Physics and Astronomy)
      PHYS 401 (Professional Development in Physics and Astronomy)

   In addition, students in both programs must complete at least three additional elective graduate level lecture courses, taken for a letter grade. These courses must be physics or astronomy-related and relevant to the student's dissertation research. The program for each student must be approved by the Graduate Advisor and the student's Research Advisor. Such a program may entail more than the minimum number of courses and may also involve a mixture of courses from different areas.

**The elective courses include the following,**

but other courses may be approved by the Graduate Advisor in consultation with the Graduate Advisory Committee:

   **a) Condensed Matter, Surface, Biophysics and Atomic, Molecular and Optical Physics**

      PHYS 209A (Quantum Electronics)
      PHYS 209B (Nonlinear Optics)
      PHYS 209C (Advanced Topics in Quantum Optics)
      PHYS 234 (Physics of Nanoscale Systems)
      PHYS 235 (Spintronics and Nanoscale Magnetism)
      PHYS 240A, PHYS 240B (Condensed Matter Physics)

      PHYS 241A, PHYS 241B, PHYS 241C (Advanced Statistical Physics and Field Theory)
      PHYS 242 (Physics at Surfaces and Interfaces)
      PHYS 245 (Atomic and solid-state physics with positrons)
      PHYS 246 (Biological physics)
      PHYS 260 (Special topics in Condensed Matter Physics)

   **b) Nuclear and Particle Physics**

      PHYS 224 (Frontiers of Physics and Astrophysics)
      PHYS 225A, PHYS 225B (Elementary Particles)
      PHYS 230A, PHYS 230B, PHYS 230C (Advanced Quantum Mechanics and Quantum Theory of Fields)
      PHYS 262 (Special topics in High Energy Physics)

   **c) Astronomy, Astrophysics, Cosmology and Astroparticle Physics**

      PHYS 203 (Statistical Astronomy)
      PHYS 204 (Advanced Galaxy Formation and Cosmology)
      PHYS 208 (General Relativity)
      PHYS 21A (Radiative Processes in Astrophysics)
      PHYS 21B (Astrophysical Fluid Dynamics)
      PHYS 213 (Astrophysics of the Interstellar Medium)
      PHYS 216 (Star Formation)
      PHYS 217 (Stellar Structure and Evolution)
      PHYS 226 (Cosmology)
      PHYS 227 (Particle Astrophysics)
      PHYS 229 (Theor y of dark matter halos and galaxies)
      PHYS 261 (Special topics in Astrophysics)

2. **Written Comprehensive Examinations**

   Students must have satisfactory performance on a comprehensive examination, to be taken at the end of the student's first year. In the event of a failure, a make-up exam is offered in the winter quarter of the second year. The comprehensive examination for students pursuing the physics program consists of an exam that covers Mechanics, Statistical and Thermal Physics, Quantum Mechanics, and Electromagnetism. The comprehensive examination for students pursuing the astronomy specialization consists of an exam that covers Mechanics, Statistical and Thermal Physics, Electromagnetism, and Fundamental Astrophysics.
3. Oral Qualifying Examination in General Area of Proposed Research
Satisfactory performance on an oral examination in the general area of the student's proposed research. This examination is conducted by a doctoral committee, charged with general supervision of the student's research. It is normally taken during the academic year following that in which the comprehensive examination requirement has been successfully completed. A student who fails this examination on the first attempt may, at the discretion of the committee, be permitted to take it a second time.

4. Dissertation Examination
Students must complete a dissertation containing a review of existing knowledge relevant to the area of the candidate's research, and the results of the candidate's original research. This research must be of sufficiently high quality to constitute a contribution to knowledge in the subject area.

5. Final Oral Examination
A final oral defense may be required.

Normative Time to Degree
18 quarters

Graduate Program in Astronomy
The Department of Physics and Astronomy offers the M.S. and Ph.D. degrees in Astronomy.

Ongoing research in the Department of Physics and Astronomy includes observational, theoretical, and computational astrophysics and cosmology. Observational programs are carried out at UC Observatories facilities, including Lick Observatory and the W. M. Keck Observatory, as well as with other national and international ground- and space-based facilities.

Admission
Students entering the program should have completed a Bachelor's (B.S. or B.A.) or Master's degree (M.S.) in Physics, Astrophysics, Astronomy, or a closely related field from an accredited 4-year college or university. This degree must represent the completion of a program that meets the standards established by the Graduate Division at the University of California, Riverside.

International applicants are required to take the TOEFL examination as part of the pre-qualification process for admission and financial support. The scores should be submitted directly from ETS and should have a test date no older than two years from the intended date of enrollment at UCR.

Doctoral Degree
The Department of Physics and Astronomy offers the Ph.D. degree in Astronomy.

A student is recommended for advancement to candidacy for the Ph.D. degree in Astronomy upon completion of requirements (1), (2), and (3) below. The student is recommended for the Ph.D. degree upon completion of requirements (4) and (5) below.

1. Course Work
Each course must be passed with a grade of "B+" or better. Each student must maintain an average of "B" or better for all courses.

Core Courses
PHYS 206 (Computational Astrophysics)
PHYS 211A (Radiative Processes in Astrophysics)
PHYS 213 (Astrophysics of the Interstellar Medium)
PHYS 214 (Techniques of Observational Astrophysics)
PHYS 215 (Dynamics & Evolution of Galaxies)
PHYS 217 (Stellar Structure & Evolution)
PHYS 219 (Cosmology & Galaxy Formation)

First-year students will also take two quarters of PHYS 297 (Directed Research), starting in the Winter quarter. The advisor for this research will be chosen by the start of the Winter quarter.

In addition, students must complete two elective graduate-level courses, taken for a letter grade. These courses must be physics or astronomy-related and relevant to the student's dissertation research. The program for each student must be approved by the Graduate Advisor and the student's Research Advisor. Such a program may entail more than the minimum number of courses and may also involve a mixture of courses from different areas.

The elective courses include the following, but other courses may be approved by the Astronomy Graduate Advisor in consultation with the Astronomy Graduate Advisory Committee:

PHYS 203 (Statistical Astronomy)
PHYS 204 (Advanced Galaxy Formation and Cosmology)
PHYS 208 (General Relativity)
PHYS 211B (Astrophysical Fluid Dynamics)
PHYS 216 (Star Formation)
PHYS 218 (Fundamentals of Astrophysics)
PHYS 226 (Cosmology, Advanced Topics)
PHYS 227 (Particle Astrophysics)
PHYS 229 (Theory of Dark Matter Halos and Galaxies)
PHYS 247 (Introduction to Applied Data Science)
PHYS 261 (Special Topics in Astrophysics)

2. Comprehensive Examination
Students must have satisfactory performance on a comprehensive examination, to be taken at the end of the student's first year. In the event of a failure, a make-up exam is offered by the end of the fall quarter of the second year. The comprehensive examination for students pursuing the Astronomy program consists of (i) a written exam covering the core courses, and (ii) an oral report on the research undertaken during the two graded research classes taken in the first year.

3. Oral Qualifying Examination in General Area of Proposed Research
Students must have satisfactory performance on an oral examination in the general area of the student's proposed research. This examination is conducted by a doctoral committee, charged with general supervision of the student's research. The exam must be taken before the end of the student's third year in the program.

A student who fails this examination on the first attempt may, at the discretion of the committee, be permitted to take it a second time.

4. Dissertation
Doctoral candidates must complete a satisfactory written dissertation that presents a review of existing knowledge relevant to the candidate's original research, an outline of specific problems addressed by the candidate's work, and a detailed description of the strategies, analysis techniques and results of the candidate's original research. The dissertation will be reviewed by a dissertation committee, charged with general supervision of the student's research.

5. Final Oral Examination
Doctoral candidates must perform satisfactorily in a final oral defense of their dissertation before the candidate's dissertation committee. The oral defense will consist of a public presentation followed by a closed-door examination period with the committee.

A student who fails (5) on the first attempt may, at the discretion of the committee, be permitted to take it a second time.

Professional Development
Students must complete PHYS 401 (Professional Development in Physics and Astronomy)

Normative Time to Degree
18 quarters
PHYS 002C General Physics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 002B or PHYS 02HB with a grade of "C-" or better; concurrent enrollment in PHYS 02LC or a grade of "C-" or better in PHYS 02LC. Covers topics in waves and modern physics. Includes harmonic oscillations; mechanical and electromagnetic waves; geometrical optics; reflection, refraction, interference, diffraction, and polarized light; and quantum, atomic, and nuclear physics. For biological sciences students. Credit is not awarded for PHYS 002C if it has already been awarded for PHYS 02HC or PHYS 041C.

PHYS 02HA Honors General Physics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 007A or MATH 009A or MATH 09HA with a grade of B- or better; concurrent enrollment in PHYS 02LA or a grade of B- or better in PHYS 02HLA. Honors course corresponding to PHYS 002A. Covers topics in classical mechanics including Newton's laws of motion in one and two dimensions; work, energy, and conservation of energy, momentum and collisions; rotational motion; and orbital motion. For biological sciences students. Satisfactory (S) or No Credit (NC) grading is not available. Credit is not awarded for PHYS 02HA if it has already been awarded for PHYS 002A or PHYS 040A or PHYS 040HA or PHYS 041A.

PHYS 02HB Honors General Physics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 002A or PHYS 02HA; MATH 007B or MATH 009B or MATH 09HB with a grade of B- or better; concurrent enrollment in PHYS 02LB or a grade of B- or better in PHYS 02HLB. Honors course corresponding to PHYS 002B. Covers topics in mechanics, thermodynamics, and electromagnetism. Includes fluid mechanics; temperature and heat; the laws of thermodynamics; kinetic theory of gases; electric fields and potentials; current and DC circuits; capacitance and inductance; magnetism; and Faraday's law. For biological sciences students. Satisfactory (S) or No Credit (NC) grading is not available. Credit is not awarded for PHYS 02HB if it is already awarded for PHYS 002B or both PHYS 040B or PHYS 040HB and PHYS 040C or PHYS 040HC or PHYS 041B.

PHYS 02HC Honors General Physics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 002B or PHYS 02HB with a grade of "B-" or better; concurrent enrollment in PHYS 02LC or a grade of "B-" or better in PHYS 02HLC. Honors course corresponding to PHYS 002C. Covers topics in waves and modern physics. Includes harmonic oscillations; mechanical and electromagnetic waves; geometrical optics; reflection, refraction, interference, diffraction, and polarization; and quantum, atomic, and nuclear physics. For biological sciences students. Satisfactory (S) or No Credit (NC) grading is not available. Credit is not awarded for PHYS 02HC if it has already been awarded for PHYS 02HC or PHYS 041C.

PHYS 02HLA Honors General Physics Laboratory 1 Laboratory, 3 hours. Prerequisite(s): concurrent enrollment in PHYS 02HA or a grade of "B-" or better in PHYS 02HA. Honors course corresponding to PHYS 02LA. Illustrates the experimental foundations of physics presented in PHYS 002A. Covers the basic principles of classical mechanics. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of PHYS 02LA or PHYS 02HLA.

PHYS 02HLB Honors General Physics Laboratory 1 Laboratory, 3 hours. Prerequisite(s): PHYS 02HA or PHYS 002A with a grade of "B-" or better; PHYS 02HLA or PHYS 02LA with a grade of "B-" or better; concurrent enrollment in PHYS 02HB or a grade of "B-" or better in PHYS 02HB. Honors course corresponding to PHYS 02LB. Illustrates the experimental foundations of physics presented in PHYS 002B. Covers the basic principles of fluid and rotational mechanics, temperature, heat, and electromagnetism. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of PHYS 02LB or PHYS 02HLB.

PHYS 02HLC Honors General Physics Laboratory 1 Laboratory, 3 hours. Prerequisite(s): PHYS 02HBA or PHYS 002B with a grade of "B-" or better; PHYS 02HLB or PHYS 02LB with a grade of "B-" or better; concurrent enrollment in PHYS 02HC or a grade of "B-" or better in PHYS 02HC. Honors course corresponding to PHYS 02LC. Illustrates the experimental foundations of physics presented in PHYS 002C. Covers the basic principles of oscillations, waves, optics, and radioactivity. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of PHYS 02LC or PHYS 02HLC.

PHYS 02LA General Physics Laboratory 1 Laboratory, 3 hours. Prerequisite(s): concurrent enrollment or a grade of "C-" or better in PHYS 002A or PHYS 02HA. Illustrates the experimental foundations of physics presented in PHYS 002A. Covers the basic principles of classical mechanics. Credit awarded for only one of PHYS 02LA or PHYS 02HLA.

PHYS 02LB General Physics Laboratory 1 Laboratory, 3 hours. Prerequisite(s): PHYS 002A and PHYS 02LA or PHYS 02HA and PHYS 02HLA with grades of "C-" or better; concurrent enrollment or a grade of "C-" or better in PHYS 002B or PHYS 02HB. Illustrates the experimental foundations of physics presented in PHYS 002B. Covers the basic principles of fluid and rotational mechanics, temperature, heat, and electromagnetism. Credit is awarded for only one of PHYS 02LB or PHYS 02HLB.

PHYS 02LC General Physics Laboratory 1 Laboratory, 3 hours. Prerequisite(s): PHYS 002B and PHYS 02LB or PHYS 02HB and PHYS 02HLB with a grade of "C-" or better; concurrent enrollment or a grade of "C-" or better in PHYS 002C or PHYS 02HC. Illustrates the experimental foundations of physics presented in PHYS 002C. Covers the basic principles of oscillations, waves, optics, and radioactivity. Credit is awarded for only one of PHYS 02LC or PHYS 02HLC.
PHYS 005 History of the Universe 4 Lecture, 3 hours; discussion, 1 hour. An introduction to "The Big Bang" model and its observational tests. Topics include dark energy, dark matter, rapid growth of universe at early times, leftover radiation from "The Big Bang", galaxy formation, bending of light by gravity, black holes, extraterrestrial life, and the likely fate of the universe.

PHYS 006 The Violent Universe 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to violent phenomena that power the universe, specifically phenomena that illustrate basic astrophysical principles. Topics include impacts in our planetary system: explosions of stars, bursts of star formation, galaxy collisions, black holes, quasars, cosmic jets, and the "Big Bang."
PHYS 040E General Physics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 046 (may be taken concurrently); PHYS 040D with a grade of "C-" or better. For engineering and physical sciences students. Covers topics in modern physics including the quantum theory of light and particles; quantum mechanics in one and three dimensions; tunneling phenomena; the hydrogen atom; statistical physics; lasers; molecular structure; and solid state, nuclear, and particle physics. Credit is not awarded for PHYS 040E if it has already been awarded for PHYS 002C or PHYS 02HC or PHYS 041C.

PHYS 040HA Honors General Physics 5 Lecture, 3 hours; discussion, 1 hour; laboratory, 3 hours. Prerequisite(s): MATH 007A with a grade of "C-" or better or MATH 009A with a grade of "C-" or better or MATH 009HA with a grade of "C-" or better; MATH 007B with a grade of "C-" or better or MATH 009B with a grade of "C-" or better, may be taken concurrently or MATH 099B with a grade of "C-" or better; MATH 009B with a grade of "C-" or better (MATH 007B or MATH 009B or MATH 099B may be taken concurrently); PHYS 002A with a grade of "B-" or better or PHYS 040A with a grade of "C-" or better or PHYS 041A with a grade of "C-" or better or consent of instructor. Covers relativity oscillations, mechanical waves, fluids, electrostatics, magnetism, and circuits. Credit is not awarded for PHYS 041B if it has already been awarded for PHYS 040C.

PHYS 041C Introductory Physics For Majors 8 Lecture, 4 hours; discussion, 2 hours; laboratory, 6 hours. Prerequisite(s): MATH 009C or MATH 09HC with a grade of "C-" or better or MATH 099C or MATH 099HC (may be taken concurrently); PHYS 040A or PHYS 040HA; PHYS 002A, PHYS 02HA, PHYS 040A, or PHYS 041A; PHYS 041B Introductory Physics For Majors 8 Lecture, 4 hours; discussion, 2 hours; laboratory, 6 hours. Prerequisite(s): MATH 007B or MATH 009B or MATH 099B with a grade of "C-" or better (MATH 007B or MATH 099B or MATH 099HC may be taken concurrently); PHYS 002A with a grade of "B-" or better or PHYS 040A with a grade of "C-" or better or PHYS 041A with a grade of "C-" or better or consent of instructor. Covers relativity oscillations, mechanical waves, fluids, electrostatics, magnetism, and circuits. Credit is not awarded for PHYS 041B if it has already been awarded for PHYS 040C.

PHYS 050 Introduction to Applied Data Science: A Multi-Disciplinary Approach 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduces students from different disciplines (physical, biological, engineering, finance, economy, humanities) to data science techniques and applications. Provides background knowledge in data science and prepares for a career in this field. Provides basic knowledge to continue on to more advanced topics in data science and apply it to practical problems.

PHYS 097 Lower-Division Research 1 to 4 Individual Study, 3 to 12 hours. Prerequisite(s): consent of instructor. Engages students in research projects in physics performed under the supervision of a member of the staff. This course may not be used to satisfy the undergraduate unit requirements in the major. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

Upper-Division Courses
PHYS 111 Astrophysics and Stellar Astronomy 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 010B, MATH 046, or equivalents; one of the following: PHYS 040D with a grade of "C-" or better, PHYS 041C with a grade of "C-" or better, PHYS 002C with a grade of "B-" or better. Covers stellar interiors, radiations, and evolution; the origin of the elements; particle and electromagnetic radiation; pulsars, quasars, and other unusual objects; and galactic structure and cosmology.

PHYS 112 Galaxies and Extragalactic Astronomy 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 111 with a grade of "C-" or better. Topics include the structure of the Milky Way, the observed properties of galaxies, active galactic nuclei and supermassive black holes, the intergalactic medium, the theory of galaxy formation and evolution, galaxy clusters, and the large scale structure of our universe.

PHYS 117 Advanced Mathematical Methods of Physics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 010B with a grade of "C-" or better, MATH 046 with a grade of "C-" or better. This course covers advanced mathematical methods for upper division and graduate physics courses. Topics include dimensional analysis, infinite dimensional vector spaces, integral transforms, complex analysis, and the use of Green's functions to solve inhomogeneous differential equations. This course is strongly recommended for students with a focus on theoretical physics.

PHYS 130A Classical Mechanics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 009C, MATH 010A (may be taken concurrently); one of the following: PHYS 002A or PHYS 02HA with a grade of "B-" or better, PHYS 040A or PHYS 040HA with a grade of "C-" or better, PHYS 041A with a grade of "C-" or better. Covers stellar interiors, radiations, and evolution; the origin of the elements; particle and electromagnetic radiation; pulsars, quasars, and other unusual objects; and galactic structure and cosmology.

PHYS 130B Classical Mechanics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 010A, MATH 010B (may be taken concurrently), PHYS 010A; MATH 046 (may be taken concurrently), PHYS 040A; PHYS 040HA with a grade of "C-" or better, PHYS 040A or PHYS 040HA with a grade of "C-" or better, PHYS 041A with a grade of "C-" or better. Explores vector calculus, single-particle motion, oscillations, Lagrangian and Hamiltonian dynamics, central-force motion, and celestial mechanics.
**PHY 133 Advanced Statistical Physics 4**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 132 and PHYS 156B. Covers advanced topics in statistical mechanics, ensembles, and classical and quantum statistical mechanics. Explores the connection between statistical mechanics and thermodynamics.

**PHY 135A Electromagnetism 4**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 010B; MATH 046; one of the following: PHYS 002B or PHYS 02HB with B- or better, PHYS 040C or PHYS 040HC with C- or better, PHYS 041B with C- or better. Topics include vector calculus; Coulomb's law and the electric field; Gauss' law; scalar potential; conductors in electrostatic fields; electrostatic energy; electric multipoles; boundary conditions; electrostatics in the presence of matter; and special methods in electrostatics.

**PHY 135B Electromagnetism 4**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 135A. Topics include electric currents and circuits, Ampere's law, the magnetic field, the integral form of Ampere's law, the vector potential, Faraday's law of induction, magnetic energy, magnetic multipoles, magnetism in the presence of matter, Maxwell's equations, and plane waves.

**PHY 136 Electromagnetic Waves 4**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 135B. Covers Maxwell's equations; propagation of electromagnetic waves in wave guides, coaxial lines, and optical fibers; reflection, refraction, and diffraction of waves; dispersion of waves in gases and plasmas; interference and coherence and their role in holography; electromagnetic radiation from charged particles, antennas, masers, and lasers; and relativistic electrodynamics.

**PHY 139L Electronics For Scientists 5**
Lecture, 3 hours; laboratory, 6 hours. Prerequisite(s): One of the following: PHYS 002B or PHYS 02HB with B- or better, PHYS 040C or PHYS 040HC with C- or better, PHYS 041B with C- or better, or consent of instructor. Introduces basic analog and digital circuit designs that emphasize practical applications. Includes properties of diodes and transistors; operational amplifiers for use as amplifiers, oscillators, and function generators; properties and use of logic gates, counters, and timers; data storage and synchronization; multiplexer and decoder applications; microprocessor functions; and computer interfacing.

**PHY 140L Techniques of Observational Astronomy 4**
Lecture, 2 hours; laboratory, 6 hours. Prerequisite(s): PHYS 002C with a grade of B- or better or PHYS 002HC with a grade of B- or better or PHYS 040E with a grade of C- or better or PHYS 041C with a grade of C- or better; restricted to class level standing of senior; or consent of instructor. Covers modern techniques of observational astronomy including digital optical imaging, photometry, spectroscopy, radio observations, error propagation and statistical inference. Lab practice includes calibrating digital images and spectra, computer programming for data analysis, quantifying uncertainties in astronomical measurements, and written communication of scientific results.

**PHY 142L Advanced Physics Laboratory 4**
Lecture, 12 hours. Prerequisite(s): PHYS 002C with a grade of B- or better or PHYS 02HC with a grade of B- or better or PHYS 040E with a grade of C- or better or PHYS 041C with a grade of C- or better; restricted to class level standing of senior; or consent of major(s) Physics; or consent of instructor. A capstone experience consisting of experiments chosen from areas in contemporary tests of the Lorentz invariance is repeatable to a maximum of 8 units. Credit is awarded to a maximum of 10 units for either or both PHYS 142L and/or PHYS 142W.

**PHY 142W Advanced Physics Laboratory 5**
Lecture, 11 hours; individual study, 6 hours; workshop, 0.8 hour. Prerequisite(s): ENGL 001B with a grade of C- or better; PHYS 002C with a grade of B- or better or PHYS 02HC with a grade of B- or better or PHYS 040E with a grade of C- or better; ENGL 007, may be taken concurrently; for concurrent enrollment in ENGL 007, review the course titles or topics in the current online Schedule of Classes to find the corresponding ENGL 007 writing workshop; restricted to class level standing of senior; or consent of instructor. A capstone experience consisting of experiments chosen from areas in contemporary physics. Includes writing instruction with an emphasis on technical communication. Fulfills the third-quarter writing requirement for students who earn a grade of "C" or better for courses that the Academic Senate designates, and that the student's college permits, as alternatives to English 001C. Course is repeatable to a maximum of 10 units. Credit is awarded to a maximum of 10 units for either or both PHYS 142L or PHYS 142W.

**PHY 145A Biophysics 4**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 001C or CHEM 010C, MATH 010B; MATH 046; one of the following: PHYS 002C or PHYS 02HC with B- or better, PHYS 041C with a C- or better, PHYS 040E with a C- or better. Covers physical modeling of the structure of proteins; protein folding; structure of nucleic acids; electrostatic potential of DNA; dynamics of biomolecules; structure of a biological cell; osmotic pressures of cells; non-equilibrium thermodynamics; and biochemical reactions.

**PHY 145B Biophysics 4**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 145A; BCH 100 or BCH 110B or BCH 110HB; or consent of instructor. Covers conformation of bio-polymers, intermolecular forces, dynamics of biopolymers, Brownian motion, biopolymers as polyelectrolytes, electrolytic solutions, and the Debye-Huckel theory.

**PHY 145C Biophysics 4**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 145B or consent of instructor. Examines stochastic thermodynamics; the Fluctuation Theorems and the Jarzynski relation; protein and RNA denaturation; laser spectroscopy; the quantum harmonic oscillator; chemical forces and self-assembly; enzymes and molecular machines; survey of molecular devices found in cells; and kinetics of real enzymes and machines.

**PHY 150A Introduction to Condensed Matter Physics 4**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): One of the following: PHYS 002B with B- or better, PHYS 040E with a C- or better, PHYS 041C with a C- or better; or consent of instructor. Covers properties of systems composed of many atoms arranged in a periodic lattice. Topics include crystal structure, symmetry, and diffraction; crystal cohesion; lattice dynamics; thermal properties; metallic properties; and the Fermi surface; band theory of metals and semiconductors; and collective excitations.

**PHY 150B Introduction to Condensed Matter Physics 4**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 150A. Covers properties of systems composed of many atoms arranged in a periodic lattice. Topics include superconductivity; magnetism; non-crystalline solids; defects in solids; surface and interface physics; and alloys.

**PHY 151 Topics in Modern Condensed Matter Research 4**
Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): One of the following: PHYS 002B or BCH 110HB with a grade of "B-" or better, PHYS 040E with a C- or better, PHYS 041C with a grade of "C-" or better. Consent of instructor is required for students repeating the course. Introduces cutting-edge physics research being conducted in laboratories and institutes around the world. Focuses on a single research area (e.g., nanoscale physics, biological physics) that may change each quarter. Includes experimental methods and theoretical concepts. Course is repeatable as content changes to a maximum of 12 units.

**PHY 152A Exploring Many-Body Quantum Physics With Mathematica 2**
Lecture, 2 hours. Prerequisite(s): MATH 046; one of the following: PHYS 002B with B- or better, PHYS 040E with a C- or better, PHYS 041C with a C- or better; or consent of instructor. MATH 031 is recommended. An introduction to numerics and visualization using Mathematica. Topics include random numbers and stochastic processes; time-dependent and stationary equations in matrix form; single-particle tight-binding model; single-spin dynamics; pure and mixed states; spin echo; the direct product of matrices; many-body quantum mechanics; and quantum spin chains.

**PHY 152B Exploring Many-Body Quantum Physics With Mathematica 2**
Lecture, 2 hours. Prerequisite(s): PHYS 152A or consent of instructor. Covers the symmetry of many-body wavefunction, including bosons and fermions; secondary quantization; harmonic oscillators; ladder operators, eigenvalues, and eigenfunctions; interacting many-body systems; mean field approximation; and density matrix of a subsystem and decoherence.

**PHY 156A Quantum Mechanics 4**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 010B, MATH 046, PHYS 130B; one of the following: PHYS 002C or PHYS 02HC with a grade of "B-" or better, PHYS 040E with a grade of "C-" or better, PHYS 041C with a grade of "C-" or better. Topics include wave-particle duality, the Schrodinger equation, superposition, the uncertainty principle, and one-dimensional harmonic oscillator.
PHYS 165B Quantum Mechanics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 156A. Topics include the hydrogen atom, angular momentum and spin representations, many-electron systems, the Pauli exclusion principle, and perturbation theory.

PHYS 156C Quantum Mechanics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 156B. Applications in quantum mechanics. Includes perturbation theory and other approximations, scattering, and an introduction to advanced topics such as relativistic quantum mechanics.

PHYS 163 Atomic Physics and Spectroscopy 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 113 or PHYS 156A with a C- or better, PHYS 135A with a C- or better, or consent of instructor. Covers the role of atomic physics and spectroscopy in the development of quantum mechanics; Bohr’s old quantum theory; Heisenberg’s matrix mechanics; Schrodinger’s wave mechanics; Dirac equation; the g-factor; Zeeman effect; the Darwin term; Spin-orbit coupling and Thomas precession; Dirac hydrogen atom; Fine structure; Hyperfine structure; Lamb shift.

PHYS 164 Introduction to Nuclear Physics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): One of the following: PHYS 002C or PHYS 020H with a grade of B- or better, or PHYS 040E with a grade of C- or better, or PHYS 041C with a grade of C- or better. Addresses the basic nuclear properties, as well as the nuclear building blocks and structure. Explores radioactivity, nuclear interactions, the strong force, the confinement and chiral phase transitions, the quantum chromodynamics (QCD) vacuum, and matter at extreme temperatures and densities.

PHYS 165 Introduction to Particle Physics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 156A. Explores the classification of particles in terms of the Standard Model. Includes methods and techniques for particle acceleration and detection; conservation laws and symmetries; the basic interactions of particles (electromagnetic, strong, weak); and electroweak unification.

PHYS 166 Cosmology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 156A. Discusses current topics in astrophysics and cosmology from the perspective of elementary particle physics. Topics include the development and structure of the universe, dark matter and dark energy, cosmic radiation, and particle physics in the stars.

PHYS 168 Energy and the Environment 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 010B with a grade of C- or better, PHYS 040C with a grade of C- or better or PHYS 041C with a grade of C- or better; or consent of instructor. Explores a variety of energy sources such as electricity, transportation, and heating. Examines how energy is obtained and transformed (e.g., fossil fuels, nuclear, hydropower, heat engines). Also addresses renewable energy (photovoltaics, wind, batteries, fuel cells) in the context of climate change and sustainability.

PHYS 177 Computational Methods For Physical Sciences 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 009A or CS 010A or CS 010B; PHYS 002C with a grade of B- or better or PHYS 020C with a grade of B or better or PHYS 040E with a grade of C- or better or PHYS 041C with a grade of C- or better; or consent of instructor. Covers computer applications for solving problems in physical sciences. Addresses symbolic manipulation languages such as Mathematica, mathematical operations, plotting, and symbolic and numerical techniques in calculus. Includes numerical methods such as histogramming, the Monte-Carlo method for modeling experiments, statistical analysis, curve fitting, and numerical algorithms.

PHYS 190 Special Studies at Los Alamos National Laboratory 1 to 8 Individual Study, 3 to 24 hours. Prerequisite(s): admission to the UCR/LANL Educational Internship Program; consent of advisor and department chair. Individual study to meet special curricular needs. Course is repeatable to a maximum of 9 units; a maximum of 5 units may be used to substitute for PHYS 142L.

PHYS 190L Special Studies at Los Alamos National Laboratory 1 to 8 Individual Study, 3 to 24 hours. Prerequisite(s): admission to the UCR/LANL Educational Internship Program; consent of advisor and department chair. Individual study to meet special curricular needs. Course is repeatable to a maximum of 16 units.

PHYS 195A Senior Thesis 1 to 4 Thesis, 3 to 12 hours. Prerequisite(s): senior standing; consent of instructor. A thesis written on research conducted under the supervision of a faculty member. May be undertaken as a one-, two-, three-, or four-quarter course (PHYS 195A, PHYS 195B, PHYS 195C, PHYS 195D). Total credit awarded for PHYS 195A plus PHYS 195B plus PHYS 195C plus PHYS 195D may not exceed 8 units; a maximum of 4 units may be used to satisfy the unit requirement for the major, and a maximum of 5 units of any combination of PHYS 195A, PHYS 195B, PHYS 195C, and PHYS 195D may be used to substitute for PHYS 142L. Graded In Progress (IP) until the last quarter is completed, at which time a final grade is assigned; a Satisfactory (S) or No Credit (NC) grade is awarded unless the course is taken to substitute for PHYS 142L.

PHYS 195B Senior Thesis 1 to 4 Thesis, 3 to 12 hours. Prerequisite(s): senior standing; consent of instructor; PHYS 195A. A thesis written on research conducted under the supervision of a faculty member. May be undertaken as a one-, two-, three-, or four-quarter course (PHYS 195A, PHYS 195B, PHYS 195C, PHYS 195D). Total credit awarded for PHYS 195A plus PHYS 195B plus PHYS 195C plus PHYS 195D may not exceed 8 units; a maximum of 4 units may be used to satisfy the unit requirement for the major, and a maximum of 5 units of any combination of PHYS 195A, PHYS 195B, PHYS 195C, and PHYS 195D may be used to substitute for PHYS 142L. Graded In Progress (IP) until the last quarter is completed, at which time a final grade is assigned; a Satisfactory (S) or No Credit (NC) grade is awarded unless the course is taken to substitute for PHYS 142L.

PHYS 196 Senior Thesis 1 to 4 Thesis, 3 to 12 hours. Prerequisite(s): senior standing; consent of instructor; PHYS 195A. A thesis written on research conducted under the supervision of a faculty member. May be undertaken as a one-, two-, three-, or four-quarter course (PHYS 195A, PHYS 195B, PHYS 195C, PHYS 195D). Total credit awarded for PHYS 195A plus PHYS 195B plus PHYS 195C plus PHYS 195D may not exceed 8 units; a maximum of 4 units may be used to satisfy the unit requirement for the major, and a maximum of 5 units of any combination of PHYS 195A, PHYS 195B, PHYS 195C, and PHYS 195D may be used to substitute for PHYS 142L. Graded In Progress (IP) until the last quarter is completed, at which time a final grade is assigned; a Satisfactory (S) or No Credit (NC) grade is awarded unless the course is taken to substitute for PHYS 142L.

PHYS 197 Research For Undergraduates 1 to 4 Individual Study, 3 to 12 hours. Prerequisite(s): upper-division standing and consent of instructor. Special research projects in physics performed under the supervision of a member of the staff. This course may not be used to satisfy the undergraduate unit requirement in the major. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

PHYS 198I Individual Internship in Physics 1 to 12 Written Work, 1 to 12 hours; internship, 2 to 24 hours. Prerequisite(s): upper-division standing; consent of department chair. Provides experience as a practicing scientist in a government or industrial laboratory. Includes joint supervision by an off-campus sponsor and a Physics faculty member. Course is repeatable to a maximum of 12 units; a maximum of 4 units may be used to satisfy major requirements, and a maximum of 5 units may be used to substitute for PHYS 142L.

Graduate Courses

PHYS 202 Interdisciplinary Overview of Current Issues in Semiconductor Processing 3 Lecture, 3 hours. Prerequisite(s): graduate standing in Chemistry, Physics, Engineering, or a related subject or consent of instructor. An interdisciplinary overview of present-day semiconductor processing. Introduces topics such as properties of semiconductors, cleanroom environment, epitaxy, ion implantation, etching, lithography, device architecture, testing, and fault detection. May offer field trips. Cross-listed with CHEM 208, and MSE 245D.
PHYS 203 Statistical Astronomy 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 218. Introduces statistical methods needed to analyze astronomical data. Provides case examples of problems in observational astronomy and applies statistical techniques to solve them. Covers probability, correlation and association, hypothesis testing, data modeling, maximum likelihood technique, detection and surveys, sequential data, and surface distribution. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 204 Advanced Galaxy Formation and Cosmology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 218, PHYS 219; graduate standing; or consent of instructor. Covers topics on galaxy formation, star formation in galaxies, intergalactic medium, first generation of stars and galaxies, high redshift Universe, reionization, evolution of galaxies and stellar population, and number counts. Also covers luminosity functions, correlation functions, and clustering. Introduces new techniques and latest data sets and archives used for research. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 205 Classical Mechanics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing in Physics. Tensors, covariant derivative, the Riemann curvature tensor and Einstein’s equation. The Schwartzchild metric and applications to the solar system and black holes. Gravity waves and expanding universe.

PHYS 206 General Relativity 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 205; graduate standing; or consent of instructor. An introduction to general relativity. Covers tensors, covariant derivatives, the Riemann curvature tensor, and Einstein’s equation. Explores the Schwartzchild and Kerr black hole metrics and wormholes. Also addresses gravitational waves and their detection. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 209A Quantum Electronics 4 Lecture, 4.5 hours. Prerequisite(s): PHYS 135B, PHYS 156A; or consent of instructor. Quantum theory of light and interaction of light with atoms. Density matrix formulation of atomic susceptibility. Propagation of light in matter and optical waveguides. Optical resonators. Theory and operation of common lasers. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 209B Nonlinear Optics 4 Lecture, 4.5 hours. Prerequisite(s): PHYS 209A or consent of instructor. Wave propagation in nonlinear media. Electro-optic effect, three- and four-wave mixing, high-resolution nonlinear spectroscopy, rare atom and molecule detection, laser manipulation of particles, high-intensity laser physics, laser-plasma interactions. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 209C Advanced Topics in Quantum Optics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 209A, PHYS 209B; or consent of instructor. Advanced topics in quantum optics and nonlinear optics. Topics include high resolution spectroscopy, atom trapping and manipulation, transient and time-resolved spectroscopy, coherent spectroscopy, GHz to X-ray sources and spectroscopy and coherent control in atoms, molecules, liquids, solids, surfaces and interfaces. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as topics change to a maximum of 12 units.

PHYS 210A Electromagnetic Theory 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; consent of instructor. Covers topics in electromagnetism. Includes magnetostatics, quasi-stationary electromagnetism, Maxwell’s equations, gauge transformations, Maxwell’s stress tensor, analyticity of dielectric susceptibility, and electromagnetic waves in uniform media and waveguides.

PHYS 210B Electromagnetic Theory 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 210A; graduate standing; consent of instructor. Covers topics in electromagnetism. Includes magneto-statics, quasi-stationary electromagnetism, Maxwell’s equations, gauge transformations, Maxwell’s stress tensor, analyticity of dielectric susceptibility, and electromagnetic waves in uniform media and waveguides.

PHYS 210C Electromagnetic Theory 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 210B or consent of instructor. Covers electromagnetic radiation and scattering; propagation of electromagnetic fields in non-uniform media (geometrical optics, interference, and diffraction); special theory of relativity; Lagrangian formalism; and dynamics of relativistic particles in external fields. Also examines Cherenkov radiation and magnetic monopoles.

PHYS 211A Radiative Processes in Astrophysics 4 Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): PHYS 135A, PHYS 135B, PHYS 136, PHYS 156A, PHYS 156B. Radiative transfer of continuum and line radiation, Einstein coefficients, photoionization equilibrium, radiation by free electrons, bremsstrahlung and synchrotron emission, Compton and inverse Compton scattering, wave propagation through magnetized plasmas, atomic and molecular structure and spectra, atomic fine structure, and molecular hyperfine lines. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 211B Astrophysical Fluid Dynamics 4 Lecture, 3; consultation, 1 hour. Prerequisite(s): PHYS 211A. Covers hydrodynamics, sound waves, turbulence, supersonic turbulence, magnetohydrodynamics, Alfven waves, astrophysical relativity, jets, supersonic jets, galactic spiral structure and density-wave theory, accretion disk theory, Balbus-Hawley instability, and stellar winds. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 212A Thermodynamics and Statistical Mechanics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; consent of instructor. Covers thermodynamics, statistical mechanics, ideal Bose systems, ideal Fermi systems, and bulk motion. Cross-listed with MSE 204.

PHYS 212B Thermodynamics and Statistical Mechanics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MSE 204/PHYS 212A; graduate standing; consent of instructor. Addresses functional integrals and approximation techniques. Provides an introduction to phase transitions and the renormalization group.

PHYS 213 Astrophysics of the Interstellar Medium 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing. An overview of the interstellar medium and relevant physical processes. Covers the structure and evolution of ionized hydrogen regions associated with massive stars and supernovae. Also addresses the neutral and ionized phases of the interstellar medium, as well as cooling processes. Includes the interpretation of spectral lines. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 214 Techniques of Observational Astronomy 4 Lecture, 2 hours; laboratory, 3 hours; written work, 3 hours. Prerequisite(s): graduate standing. An introduction to the basic tools of observational astronomy. Topics include astronomical telescopes and detectors, observing techniques, calibration, and error analysis. Students whose research is related to astronomy receive a letter grade; others receive a letter grade or Satisfactory (S) or No Credit (NC) grade.

PHYS 215 Dynamics and Evolution of Galaxies 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing. Discusses the structure, stability, and dynamic and cosmologic evolution of galaxies. Interprets observational data on galaxies within a coherent theoretical framework. Topics include potential theory, orbits, collisionless systems, and the structure and evolutionary history of galaxies. Students whose research is related to astronomy receive a letter grade; other students receive a letter grade or Satisfactory (S) or No Credit (NC) grade.

PHYS 216 Star Formation 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing. Discusses the processes involved in the formation of stars: the initial conditions in the interstellar medium that leads to star formation and the formation of planets and planetary systems around young stars. Topics include molecular cloud formation, the properties of young stars, jets and outflows, massive stars, and cosmological star formation. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.
PHYS 217 Stellar Structure and Evolution 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing. Topics include physics of stellar structure and main sequence evolution, and energy production and transport; post main sequence evolution through the giant stage and the formation of compact objects; supernovae, nucleosynthesis, pulsars, and the role of accretion within the framework of stellar evolution; and the physics of white dwarfs, neutron stars, and black holes. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 218 Fundamentals of Astrophysics 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Develops basic astrophysical concepts from fundamental physics. Topics include nucleosynthesis, stellar structure, evolution of stars of different masses, end-states of stars, and bremsstrahlung and synchrotron radiation. Also covers cross-sections, opacities, hydrogen atom transitions, forbidden lines, and molecular lines. Addresses the ongoing search of life in the Universe. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 219 Cosmology and Structure Formation 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Explores cosmology, models for the universe, galaxy formation scenarios, evolution of galaxies and stellar populations, and number counts. Also covers star formation activity in the universe, cosmic background radiation, dark matter, and dark energy. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 220 Quantum Computing 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): EE 201/MSE 207 or equivalent; graduate standing or consent of instructor. Introduction to quantum computing. Topics include qubits, entanglement, quantum gates, quantum circuit diagrams, simple quantum algorithms, quantum teleportation, quantum cryptography, Shor’s factorization algorithm, Grover’s search algorithm, and quantum error correction. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with EE 214.

PHYS 221A Quantum Mechanics 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; consent of instructor. Examines the fundamental concepts of quantum mechanics including wave functions and the uncertainty relations. Also covers time dependence of quantum systems, such as the simple harmonic oscillator and simple two-level systems.

PHYS 221B Quantum Mechanics 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 221A; graduate standing; consent of instructor. Covers angular momentum and approximation methods, including perturbation theory.

PHYS 221C Quantum Mechanics 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 221B; graduate standing; consent of instructor. Covers symmetries in quantum mechanics, identical particles, and scattering theory.

PHYS 224 Frontiers of Physics and Astrophysics 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Covers particle physics to cosmology from an experimental perspective. Includes the present status of our understanding of the physics of the universe, the major challenges, and future opportunities. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 225A Elementary Particles 4
Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): PHYS 221A, PHYS 221B, PHYS 221C, or consent of instructor. Provides an overview of particle physics. Topics include Quantum Electrodynamics (QED), the Quark-Parton Model, and Quantum Chromodynamics (QCD). Also discusses experimental techniques for particle detection and energy measurement. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 225B Elementary Particles 4
Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): PHYS 225A or consent of instructor. Covers advanced topics in particle physics such as the Standard model, Charge-Parity (CP) violation and conservation laws, and mixing in the neutral strange and bottom meson systems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 226 Cosmology 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing. PHYS 208. Discusses advanced topics in cosmology: Friedmann models and the large-scale structure of the universe, Hubble constant and deceleration parameter, and galaxy counting and the physics of the early universe. Also covers vacuum phase transitions, inflation, baryon number generation, fluctuations, topological defects and textures, primordial nucleosynthesis, density fluctuations, dark matter candidates, and the age of the universe. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 227 Particle Astrophysics 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing. PHYS 226. An introduction to current research in particle astrophysics: the very early universe, the origin of matter, primordial perturbations, the origin of structure, the nature of dark matter, vacuum energy, matter-antimatter asymmetry, neutrino astrophysics, gravitational radiation, black holes, the origin of ultrahigh energy cosmic rays, and Hawking radiation. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 229 Theory of Dark Matter Halos and Galaxies 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; consent of instructor. A theory-based study of the properties of dark matter halos and their connection to galaxy properties. Topics include dark matter collapse in the non-linear regime, Press-Schechter, self-similar collapse, acquisition of mass, and angular momentum. Includes the impact of dark matter properties on hosted galaxies, mergers, environmental effects, and scaling relations. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 230A Advanced Quantum Mechanics and Quantum Theory of Fields 4
Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): PHYS 221A or consent of instructor. Topics include quantization of fields for particles with spins 0, 1/2, and 1; path integrals; Feynman diagrams; and scattering amplitude and cross sections. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 230B Advanced Quantum Mechanics and Quantum Theory of Fields 4
Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): PHYS 230A or consent of instructor. Explores renormalization of quantum field theory, gauge invariance, spontaneous breaking of gauge symmetry, Quantum Chromodynamics, and electroweak interactions. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 230C Advanced Quantum Mechanics and Quantum Theory of Fields 4
Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): PHYS 230B or consent of instructor. A study of current topics in quantum field theory, including solitons and instantons, supersymmetry, and the unification of all forces. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 231 Methods of Theoretical Physics 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. A study of analytic functions, Cauchy’s theorem, Taylor series, Laurent series expansions, the residue theorem, and analytic continuation.

PHYS 234 Physics of Nanoscale Systems 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; consent of instructor. Introduction to fundamental quantum physics in nanoscale systems and low dimensional materials. Includes synthesis of low-dimensional material systems; physics-based experimental approaches to nanotechnology; mesoscopic quantum transport of electrons; quantum phenomena involving spin; silicon nanoelectronics and beyond; and future electronics based on topological materials. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with MSE 234A.
PHYS 235 Spintronics and Nanoscale Magnetism 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Provides an overview of contemporary issues in nanoscale magnetism and spin-dependent phenomena in solids, including the fundamentals of magnetism, magnetism in reduced dimensions, novel magnetic materials, spin-polarized transport, spin coherence in semiconductors, magnetization dynamics, and device applications. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with MSE 234B.

PHYS 236 Experimental Techniques in Condensed Matter Physics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Survey of common experimental techniques used in the field of condensed matter physics. Topics include nanofabrication and characterization, advanced thin film growth methods, vacuum techniques, electrical and magnetic characterization, cryogenic instrumentation, optical measurements, X-ray techniques, data acquisition and analysis, and general lab techniques. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 237 Experimental Quantum Computing 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Covers experimental approaches to quantum computing. Includes the basics of quantum computing and an introduction to physical realizations of a quantum computer. Focuses on ion traps and experimental implementation of quantum gates and quantum algorithms including search algorithms, quantum Fourier transform, and factorization. Also addresses quantum error correction codes. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 240A Condensed Matter Physics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 221C; graduate standing or consent of instructor. Topics include classical and quantum theories of the electron gas; crystal and reciprocal lattices; crystal symmetries; electrons in a periodic potential; nearly free electrons; tight binding; band structure; metals, insulators and semiconductors; semiclassical dynamics; and semiclassical transport. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with MSE 214.

PHYS 240B Condensed Matter Physics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 240A; graduate standing or consent of instructor. Topics include electron scattering, electron-electron interactions, classical and quantum harmonic crystals, and phonon dispersion relations. Also addresses dielectric properties, magnetism, and superconductivity. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 241A Advanced Statistical Physics and Field Theory 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 212B; PHYS 221C; graduate standing or consent of instructor. Topics include elementary excitations in many-body systems, critical phenomena and the renormalization group technique, Green’s functions and Feynman diagrams, and other field-theory techniques, and advanced topics in condensed matter physics. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 241B Advanced Statistical Physics and Field Theory 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing. PHYS 241A. Topics include advanced field-theory techniques applied to many-body systems, exactly soluble classical and quantum models in one and two dimensions, quantum Hall effect, and other advanced topics in condensed matter physics. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 241C Advanced Statistical Physics and Field Theory 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing. PHYS 241B. Topics include quantum magnetism, unconventional superconductivity, localization, transport phenomena, mesoscopic systems, nonequilibrium phenomena, and advanced field-theory methods, such as methods for treating disorder. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 242 Physics at Surfaces and Interfaces 4 Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Overview of surface science, electronic and geometric structure of clean surfaces, techniques for investigating structure, electron spectroscopy of surfaces, adsorption on surfaces, vibrations on surfaces, and epitaxial growth and applications of surface science. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 243 Foundations of Applied Machine Learning 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. For PHYS 243 online section: enrollment in the Online Master-in-Science in Engineering program. Covers basic principles of machine learning (ML) and Python Programming and introduces deep learning. Topics include ML algorithms, practical examples, and case studies for application of ML and deep learning to different disciplines. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 244 Application of Visualization in Data Science 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. For PHYS 244 online section: enrollment in the Online Master-in-Science in Engineering program. Develops interactive visualization and data mining techniques for massive multidimensional datasets. This includes 3D visualization and interaction, fast data exploration and development of big data solutions for text and binary data-intensive applications. Includes details of advanced data visualization techniques and the tools for handling and visualizing massive datasets.

PHYS 245 Atomic and Solid-State Physics With Positrons 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. An overview of the field of antimatter science. Includes beta decay, positron sources, positronium physics, positron annihilation spectroscopy, slow positron physics, solid state physics with slow positrons, atomic physics with slow positrons, and many positron physics. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 246 Biological Physics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate or consent of instructor. Introduces topics at the interface of physics and biology: cell physiology, probability and information, diffusion, random walks, electrostatics, elasticity of biopolymers and membranes, DNA topology, friction in fluids, and low Reynolds numbers. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 247 Introduction to Applied Data Science 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 247 online section: enrollment in the Online-Master-in-Science in Engineering program. PHYS 247 in-person section: graduate standing or consent of instructor. Designed to provide all the necessary background knowledge to follow other data science courses. Covers basic principles of machine learning (ML) and Python Programming and introduces deep learning. Topics include ML algorithms, practical examples, and case studies for application of ML and deep learning to different disciplines. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PHYS 250 Special Topics Seminar in Physics and Astronomy 2 Seminar, 2 hours. Prerequisite(s): graduate standing in Physics and Astronomy or consent of instructor. Includes oral presentations and intensive small-group discussion of selected topics in the area of specialization of each faculty member. Emphasizes recent advances in the special topic area; course content varies accordingly. Students who present a seminar receive a letter grade; other students receive credit for 2 units; other students receive credit for 1 unit. Graded Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

PHYS 256 Advances in Nanoscale Physics 1 or 2 Seminar, 1 hour; individual study, 0 or 3 hours. Prerequisite(s): graduate standing. Seminars on current topics in nanoscale physics and materials science, including nanoelectronic devices, nanoelectromechanical systems, nanoscale biophysics, spintronics, nanoscale magnetism, nanophotonic systems, and advanced characterization techniques. Students who give class presentations receive credit for 2 units; other students receive credit for 1 unit. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.
PHYS 258 Seminar in Surface Science 1  
Seminar, 1 hour. Prerequisite(s): graduate standing in Physics or Chemistry or consent of instructor. Oral presentations by participating visiting scholars, postdoctoral researchers, students, and UCR faculty on current research topics in surface science. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Cross-listed with CHEM 258.

PHYS 260 Special Topics in Condensed Matter Physics 4  
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; or consent of instructor. Explores topics in condensed matter physics that emphasize recent advances. Content varies. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 12 units.

PHYS 261 Special Topics in Astrophysics 4  
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Explores topics in astrophysics that emphasize recent advances. Content varies. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 12 units.

PHYS 262 Special Topics in High Energy Physics 4  
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; or consent of instructor. Explores topics in high energy physics that emphasize recent advances. Content varies. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 12 units.

PHYS 288 Current Research Themes in Physics 2  
Seminar, 1 hour; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Introduces first-year graduate students to current issues in physics research at UCR. Involves seminars by faculty on their research and interaction with advanced students and postdoctoral researchers. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PHYS 289 Colloquium in Physics 1  
Colloquium, 1 hour. Prerequisite(s): graduate standing; consent of instructor. Specialized discussions by visiting scientists, faculty, and students on current research topics in physics. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PHYS 290 Directed Studies 1 to 6  
Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor; consent of advisor or Department Chair. Individual study, directed by a faculty member, of specially selected topics. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PHYS 291 Individual Study in Coordinated Areas 1 to 6  
Individual Study, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor. Faculty-assisted programs of individual study for candidates who are preparing for examinations. Graded Satisfactory (S) or No Credit (NC). Course is repeatable within the following limits: Up to 6 units may be taken prior to award of the Master’s degree, such units to be in addition to minimum unit requirements for the degree. Up to 12 additional units may be taken (continued) prior to advancement to candidacy for the Ph.D.

PHYS 296 Summer Research in Physics 2  
Research, 20 hours per quarter. Prerequisite(s): graduate standing; or consent of instructor. Provides mentoring by faculty on research and interaction with advanced graduate students and postdoctoral researchers. Graded Satisfactory (S) or No Credit (NC).

PHYS 297 Directed Research 1 to 6  
Research, 3 to 18 hours. Prerequisite(s): graduate standing; consent of instructor. Original research, in an area selected for the advanced degree, performed under the direction of a faculty member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PHYS 299 Research For Thesis Or Dissertation 1 to 12  
Thesis, 3 to 36 hours. Prerequisite(s): graduate standing; consent of instructor. Original research, in an area selected for the advanced degree, performed under the direction of a faculty member. This research is to be included as a part of the dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

PHYS 301 Teaching of Physics at the College Level 2  
Lecture, 2 hours. Prerequisite(s): graduate standing in Physics or consent of instructor. Required of all Teaching Assistants in the Department. Designed to introduce effective methods for teaching physics and to evaluate and improve teaching skills. Topics covered include lecture techniques, effective visual aids, improving laboratory and recitation section learning situations. Credit not applicable toward degree course requirements. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PHYS 302 Teaching Practicum 1 to 4  
Consultation, 1 hour; laboratory, 3 to 12 hours; practicum, 3 to 12 hours. Prerequisite(s): Appointment as a departmental Teaching Assistant; graduate standing. Supervised teaching in Physics courses and regular consultation with faculty supervisor(s) regarding teaching responsibilities. Credit not applicable toward degree course requirements. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

PHYS 401 Professional Development in Physics and Astronomy 2  
Lecture, 1 hour; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor; Introduces students to strategies for successful graduate study and early career development. Covers research and professional ethics, scientific writing (proposals, manuscripts, and abstracts), conference presentations, effective job search skills including preparation of curriculum vitae and networking, effective oral presentations, and job interviews. Visiting experts may give lectures on various topics. Graded Satisfactory (S) or No Credit (NC)

Peter H. Tsoo, Ph.D.

Associate Professors

Emma Aronson, Ph.D.  
Rong Hai, Ph.D.  
Ansel Hsiao, Ph.D.  
Patricia Manosalva, Ph.D.  
James Ng, Ph.D.

Assistant Professors

Patrick Degnan, Ph.D.  
Emma Gachomo, Ph.D.  
Sydney I. Glassman, Ph.D.  
Fatemeh Khodadadi, Ph.D.  
Juliet Morrison, Ph.D.  
Olakunle Olawole, Ph.D.  
Alexander Putman, Ph.D.

Affiliated Faculty

J. Ole Becker, Ph.D. (Nematology)  
Isougui Kaloshian, Ph.D. (Nematology)  
Kerry Mauck, Ph.D. (Entomology)  
Philippe Rolhausen (BPSC)  
Joel Sachs, Ph.D. (Biology)  
Andreas Westphal, Ph.D. (Nematology).

Undergraduate Curriculum

The Department of Microbiology and Plant Pathology participates in the Microbiology and Botany and Plant Sciences majors leading to the baccalaureate degree. See the Microbiology or Botany and Plant Sciences section of this catalog.

Graduate Program

The Department of Microbiology and Plant Pathology offers the M.S. and Ph.D. degrees in Plant Pathology.
Admission
In addition to meeting the requirements for admission to the Graduate Division, students typically have a baccalaureate major in a biological science or training equivalent to that given in the Plant Science curriculum of the College of Natural and Agricultural Sciences. Majors in the physical sciences are welcomed, but students must be prepared to augment their undergraduate preparation with courses in the biological sciences.

All candidates for the M.S. or the Ph.D. degree should have good basic preparation in chemistry and biology. It is common for students to have completed courses in biochemistry, organic chemistry, cell and molecular biology, calculus, general physics, general botany, microbiology, genetics, plant physiology, mycology, and plant pathology. If these courses have been completed as an undergraduate, graduate study is facilitated. If students have not completed these courses prior to admission, they may be required to take them early in their graduate career.

Master's Degree
General university requirements are given in the Graduate Studies section of this catalog. The master's degree in Plant Pathology is offered under Plans I or II.

Plan I (Thesis) requires 36 units of upper-division and graduate courses, of which at least 24 must be in the 200-series courses in Plant Pathology or Nematology. A maximum of 12 units may be in graduate research for the thesis.

Plan II (Comprehensive Examination) requires 36 units of upper-division and graduate courses, of which at least 18 must be in the 200-series courses in Plant Pathology or Nematology, excluding graduate research for a thesis or dissertation, and a comprehensive final examination in the major subject.

The departmental graduate advisory committee, in consultation with the student’s major professor or curriculum advisor, is responsible for prescribing the course of study, which requires as a minimum of PLPA 200, PLPA 206/NEM 206, PLPA 207, PLPA 210, PLPA 234, PLPA 250 and PLPA 265.

Doctoral Degree
In accord with the student's preparation and specific interests, the departmental graduate advisory committee, in consultation with the student's major professor or curriculum advisor, prescribes areas where study is required. In addition to selected subjects in plant pathology, related fields in which some degree of competence may be expected is drawn normally from biochemistry, biology, chemistry, cell and molecular biology, entomology, genetics, genomics, mathematics, microbiology, nematology, plant physiology, soils, and statistics.

The departmental graduate advisory committee, in consultation with the student's major professor or curriculum advisor, is responsible for prescribing the course of study.

Course Work
The course of study requires as a minimum PLPA 200, PLPA 206/NEM 206, PLPA 207, PLPA 210, PLPA 234, PLPA 250 and PLPA 265.

Written and Oral Qualifying Examinations
Students must demonstrate to the departmental graduate advisory committee, by written and oral examination, adequate preparation in the fields fundamental to plant pathology and in any area in which students have placed special emphasis in their training. A written dissertation research proposal is to be prepared before the qualifying examination and defended during the oral examination. After successful completion of the qualifying examination and all other formal requirements to the satisfaction of the dean of the Graduate Division, the student is advanced to candidacy for the Ph.D. degree.

Dissertation and Final Oral Examination
A dissertation is required of every candidate. The dissertation must be approved by the dissertation committee before the candidate may take the final oral examination. The final oral examination deals primarily with defense of the dissertation and its relation to the field in which its subject lies.

Professional Development Training
Both M.S. and Ph.D. students fulfill their professional development training by enrolling in PLPA 265, a 3-unit course that covers a range of topics including careers in plant pathology, cv preparation, skills on giving scientific presentations, strategies for success in the candidacy examination and graduate school, data acquisition, management and ownership, policy and regulation, as well as intellectual property.

Teaching Requirement
Ph.D. students must fulfill a one-quarter teaching requirement.

Normative Time to Degree
15 quarters

Lower-Division Courses

PLPA 010 Microbes and Society: A Window Into the Microbial World Around Us 4
Lecture, 3 hours; extra reading, 3 hours. An introduction to the remarkable diversity and biology of microorganisms. Emphasizes the areas microorganisms impact human affairs, including food production, agriculture, medicine, and history. Includes cheese-, yogurt-, wine-, beer- and bread-making; the Irish potato famine; tulipomania; antibiotics; mushrooms and mushroom lore; food preservation; microbial toxins and food poisoning; and vaccines and useful viruses.

Upper-Division Courses

PLPA 120 Introduction to Plant Pathology 3
Lecture, 3 hours. Prerequisite(s): BIOL 005A, BIOL 05LA or BIOL 020, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 008C and CHEM 08LC, or CHEM 08HC and CHEM 08HLC, MATH 007B or MATH 009B or MATH 09HB, PHYS 002C or PHYS 02HC, PHYS 02LC or PHYS 02HLC, BCH 100 or BCH 110A or BCH 110HA, one course in statistics; or consent of instructor. An introduction to the study of plant diseases. Topics include diseases and disease-causing agents, host-pathogen interaction during disease development, and strategies for disease management. An optional, separate laboratory is offered. Cross-listed with BIOL 120 and MCBL 120. Credit is not awarded for PLPA 210 if it has already been awarded for BIOL 120/MCBL 120/PLPA 120 and/or BIOL 120L/ MCBL 120L/PLPA120L.

PLPA 120L Introduction to Plant Pathology Laboratory 1 Laboratory, 4 hours. Prerequisite(s): BIOL 005A, BIOL 05LA or BIOL 020, BIOL 005B; BIOL 005C; CHEM 008C or CHEM 08HC; CHEM 08LC or CHEM 08HLC; MATH 007B or MATH 009B or MATH 09HB; PHYS 002C or PHYS 02HC, PHYS 02LC or PHYS 02HLC, BCH 100 or BCH 110A or BCH 110HA; MCBL 120, may be taken concurrently or BIOL 120, may be taken concurrently or PLPA 120, may be taken concurrently; STAT 010, may be taken concurrently; BIOL 121/MCBL 121 and BIOL 124/MCBL 124 recommended; or consent of instructor. Covers fundamentals in the use of laboratory instruments and techniques for the detection, isolation, and identification of representative infectious agents that cause disease in plants. Cross-listed with BIOL 120L and MCBL 120L. Credit is awarded for one of the following PLPA 120L, BIOL 120L, MCBL 120L, or PLPA 210.

PLPA 123 Introduction to Comparative Virology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 05LA or BIOL 020, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 008C and CHEM 08LC or CHEM 08HC and CHEM 08HLC, MATH 007B or MATH 009B or MATH 09HB, PHYS 002C or PHYS 02HC, PHYS 02LC or PHYS 02HLC, BCH 100 or BCH 110A or BCH 110HA, one course in statistics; or consent of instructor. Compares the major groups of viruses to each other with respect to their biological and biochemical properties, molecular and genetic characteristics, and modes of replication. Cross-listed with BIOL 123, and MCBL 123.

PLPA 125 Pesticides, Biological Organisms, and the Environment 3 Lecture, 3 hours. Prerequisite(s): two of the following courses: BIOL 005A; BIOL 005B; BIOL 005C; CHEM 008A and CHEM 08LA or CHEM 08HA and CHEM 08H; CHEM 008B and CHEM 08BL or CHEM 08BH and CHEM 08HBL; CHEM 008C and CHEM 08LC or CHEM 08HC and CHEM 08HLC. An introduction to the chemistry, mode of action, and use of insecticides, acaricides, herbicides, and biopesticides from discovery to environmental interactions. Includes genetics of pesticide resistance development and government regulation. Cross-listed with ENMT 125 and ENTX 125.
PLPA 134 Introduction to Mycology 3 Lecture, 3 hours. Prerequisite(s): BIOL 005A, BIOL 051A or BIOL 052, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 008C and CHEM 08LC, or CHEM 08HC and CHEM 08HLC, MATH 007B or MATH 009B or MATH 09HB, PHYS 002C or PHYS 02HC, PHYS 02LC or PHYS 02HLC, BCH 100 or BCH 110A or BCH 110A, one course in statistics; or consent of instructor. An extensive introduction to the morphology, taxonomy, genetics, physiology, ecology, and economic importance of the major groups of fungi. Cross-listed with BIOL134.

PLPA 134L Introduction to Mycology Laboratory 1 Laboratory, 3 hours. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, or equivalents; concurrent enrollment in BIOL 134/PLPA 134; or consent of instructor. Introduces fundamentals in the use of laboratory instruments and techniques for the isolation, cultivation, and identification of representatives of the major taxon of fungi. Cross-listed with BIOL134L.

PLPA 190 Special Studies 1 to 5 Prerequisite(s): consent of instructor. To be taken as a means of meeting special curricular problems.

PLPA 197 Research For Undergraduates 1 to 4 Prerequisite(s): consent of instructor. Individual research in plant pathology performed under the guidance of members of the staff.

Graduate Courses

PLPA 200 Fungal Diseases of Plants 3 Lecture, 2 hours; laboratory, 3 hours. Prerequisite(s): BIOL 133/PLPA 133 or consent of instructor. A study of important fungal diseases of plants including biology of development of pathogens, host-parasite relations, and survival strategies. Emphasizes disease physiology, epidemiology, etiology, and control measures including breeding for resistance and chemical and biological control.

PLPA 206 Phytopathogens: Nematodes 2 Lecture, 1 hour; laboratory, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Recognition, diagnosis, biology, and control of major nematode diseases of plants. Laboratory covers identification techniques, soil sampling and processing techniques, and process of pathogenesis. Cross-listed with NEM 206.

PLPA 207 Bacterial and Viral Diseases of Plants 3 Lecture, 2 hours; laboratory, 3 hours. Prerequisite(s): BIOL 120, MCBL120, or PLPA 120; or consent of instructor. An extensive introduction to bacterial diseases of plants including symptomatology, epidemiology, diagnosis, control, and the physiology and biochemistry of plant-bacterial interactions.

PLPA 210 Introduction to Plant Pathology 5 Lecture, 3 hours; laboratory, 3 hours; discussion, 1 hour; term paper, 2 hour. Prerequisite(s): graduate standing. Studies the major concepts and principles of plant pathology to become familiar with the group of pathogens causing infectious diseases in plants. Offers an understanding of the most recent approaches to study plant pathogens and the interactions with their hosts as they may be applied to animal and human research. Credit is not awarded for PLPA 210 if it has already been awarded for BIOL 120/BIOL 120L and/or PLPA 120/PLPA120L and/or MCBL 120/MCBL 120L.

PLPA 219 Molecular Plant Virology 3 Lecture, 3 hours. Prerequisite(s): PLPA 207. Molecular biology of plant, animal, and bacterial viruses and viroids. Emphasizes plant viruses, replication strategies, evolution, genetics, viruses as genetic vectors, and recombination.

PLPA 221 Chemical Control of Plant Diseases 3 Lecture, 3 hours. Prerequisite(s): consent of instructor. A study of the principles of selective toxicity as applied to the control of plant diseases; the chemistry and mechanism of action of antimicrobial agents.

PLPA 226 Microbial Genetics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110C or BIOL 107A; BIOL 102. In-depth coverage of the genetics of microbes. Emphasizes the primary data and the foundation of modern techniques using viruses, archaea, prokaryotes, and eukaryotes. Includes genome sequences and organization, plasmids and other vectors, and mutation and genetic screens. Also covers transposable elements, recombination, and regulation of gene expression, development, and pathogenesis. Cross-listed with BIOL 221, and MCBL 221.

PLPA 230 Molecular Plant-Microbial Interactions 3 Lecture, 2 hours; discussion, 1 hour. Prerequisite(s): BCH 100, BIOL 120/ MCBL 120/PLPA 120, or equivalents. A study of the physiology of host-pathogen interactions with emphasis on the metabolism of diseased plants, nature of pathogenicity, and defense mechanisms in plants. Cross-listed with BPSC 230, CMBD 230, and GEN 230.

PLPA 234 Introduction to Mycology 5 Lecture, 3 hours; laboratory, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing in Plant Pathology. Introduction to the kingdom fungi and related kingdoms of organisms. Includes overview of major taxonomic groups of fungi and their morphology, physiology, classical genetics, and ecology. Discusses the economic importance of fungi as related to plant pathology. Credit is not awarded for PLPA 234 if it has already been awarded for BIOL 133/PLPA 133 and/or BIOL 134/PLPA 134L.

PLPA 235 Epidemiology of Plant Disease 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 120/MCBL 120/PLPA 120. An introduction to the study of plant disease epidemics and their management. Topics will include: temporal, spatial, and genetic aspects of disease development in plant populations; assessment and prediction of disease and crop loss; inoculum density-disease relationships; and modeling.

PLPA 240 Field Plant Pathology 1 field trips, Prerequisite(s): consent of instructor. This course will deal with diagnosis of plant disease in the field, collection methods, identification of pathogens, and control methods. Graded Satisfactory (S) or No Credit (NC).

PLPA 241 Special Topics 2 Lecture, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Oral presentations and intensive small-group discussion of selected topics in each faculty member’s area of specialization. Course content emphasizes recent advances in the special topic area and varies accordingly. Graded Satisfactory (S) or No Credit (NC). Course is repeatable. Cross-listed with MCBL 241.

PLPA 245 Field Mycology 1 field trips, Prerequisite(s): BIOL 133/PLPA 133 or consent of instructor. This course will deal with observation, collection and identification of fungi both in the field and the laboratory. Graded Satisfactory (S) or No Credit (NC).

PLPA 246 Diagnosis of Plant Disease 2 Lecture, 3 hours; laboratory, 1 hour; field, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Field trips to observe symptomatology of diseases in nature, identification by laboratory and greenhouse tests, approaches to control, culture practices for major California crops, and influences of crop management on disease development.

PLPA 250 Seminar in Plant Pathology 1 Seminar, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Reports and discussions of selected topics in plant pathology by graduate students. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PLPA 261 Seminar in Genetics, Genomics, and Bioinformatics 1 Seminar, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Oral reports by visiting scholars, faculty, and students on current research topics in Genetics, Genomics, and Bioinformatics. Graded Satisfactory (S) or No Credit (NC). Course is repeatable. Cross-listed with BCH 261, BIOL 261, BPSC 261, ENMT 261, and GEN 261.

PLPA 265 A Colloquium On the Principles of Plant Pathology 3 Lecture, 3 hours. Prerequisite(s): advanced standing in the program. Faculty members will rotate as leaders in structured discussions leading to a synthesis of concepts from other courses, the heterogeneity of pathology as a scientific discipline, and its unifying principles. Graded Satisfactory (S) or No Credit (NC).

PLPA 290 Research Or Study On Special Topics By Individual Graduate Students 1 to 6 Research, 1 to 6 hours. Prerequisite(s): graduate status. This course is designed to allow graduate students to study an area or areas not covered by formal course work under a professor who will direct the amount and judge the quality of the work. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PLPA 291 Individual Study in Coordinated Areas 1 to 6 Research, 1 to 6 hours. Prerequisite(s): graduate status. A program of study designed to advise and assist candidates who are preparing for examinations. A student may take up to 12 additional units prior to successful completion of the Ph.D. qualifying examination. Graded Satisfactory (S) or No Credit (NC).

PLPA 297 Directed Research 1 to 6 Graded Satisfactory (S) or No Credit (NC). Course is repeatable.
Political Science

Subject abbreviation: POSC
College of Humanities, Arts, and Social Sciences

Jennifer Merolla, Ph.D., Chair
Department Office, 2206 Watkins Hall
politicalscience.ucr.edu

Professors
Benjamin Bishin, Ph.D.
Shaun Bowler, Ph.D. Distinguished Professor
Paul D’Anieri, Ph.D.
Kevin M. Esterling, Ph.D.
Farah Godrej Ph.D.
Indridi Indridason, Ph.D.
Keluchi A. Kalu, Ph.D.
John N. Medearis, Ph.D.
Jennifer Merolla, Ph.D.
David S. Pion-Berlin, Ph.D. Distinguished Professor

Professors Emeriti
John C. Laursen, Ph.D.
Max Neiman, Ph.D.
Georgia Warnke, Ph.D. Distinguished Professor

Associate Professors
Daniel Biggers, Ph.D.
Marissa Brookes, Ph.D.
Miguel Carreras, Ph.D.
John W. Cioffi, Ph.D.
Kim Dionne, Ph.D.
Laura Evans, Ph.D.
Jana Grittersova, Ph.D.
Bronwyn A. Leeaw, Ph.D.
Ronald O. Loveridge, Ph.D.
Benjamin Newman, Ph.D.
Nicholas Weller, Ph.D.

Assistant Professors
Diogo Ferrari, Ph.D.
Noel P. Johnston, Ph.D.
Steven Liao, Ph.D.
Desireé Melonas, Ph.D.
David Ryan Miller, Ph.D.
Nicholas Napoli, Ph.D.

Assistant/Associate Professors of Teaching
Yasemin Irepoglu-Carreras, Ph.D.
Joshua Wood, Ph.D.

Lecturers
Bruce Bordner, Ph.D.
Jeremy Busacca, Ph.D.
Peter Mort, J.D.
W. Parkes Riley, Ph.D.
Luanne Serieux-Lubin, Ph.D.

Counseling
Counseling on graduation and departmental requirements and on enrollment is handled in the department office by the student affairs staff.

For more information about the undergraduate programs, call or write the Department of Political Science, (951) 827-5502 or (951)827-5312.

Political Science Major
The study of political science provides undergraduates with career opportunities in law, government service, education, journalism, and business. Because career goals may vary, the department offers two distinct majors. For students considering careers in government service, especially for such positions as program and budget analyst, urban planner, and executive or administrative assistant, the appropriate major is the Political Science/Public Service major. Further information on the study of law or the legal profession may be obtained from the departmental prelaw counselor.

Political Science/Administrative Studies Major
The Political Science/Administrative Studies major combines the disciplinary interests of political science with a particular focus on administrative behavior, tools of decision making and politics of public policy. The Administrative Studies component provides an interdisciplinary approach to training in administrative analytical skills and, more importantly, to the study of the policies, politics, and theories of public administration. The Business Administration courses provide a variety of perspectives on these objectives. In addition, they should be of particular value to those planning to either enter directly into public administration (federal, state, or local levels) or attend a professional school of administration.

Political Science/Law and Society Major
The Law and Society major is open to undergraduate students with junior standing who have completed LWSO 100 with a grade of “C” or higher. The major combines the breadth of a political science major with a particular focus on the theme of law and law-like relationships. The major provides a multidisciplinary approach to the study of legal and law-like institutions and relationships and focuses on relationships that have formed the core of political science: the emergence and development of law, the relationship between law and values, and the growth of the power of the state, among others. The courses provide a variety of perspectives on this theme, and the range of courses should be of particular benefit to those who plan to attend law school.

Political Science/Public Service Major
The Political Science/Public Service major introduces students to knowledge and skills associated with managerial career positions in government, without sacrifice of either a broad knowledge of politics or a liberal arts education.

University Requirements
See Undergraduate Studies section.

College Requirements
See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

Majors
The Political Science Department offers undergraduate majors leading to B.A. degrees in Political Science, Political Science/Administrative Studies, Political Science/International Affairs, Political Science/Law and Society, and Political Science/Public Service. In addition, the department offers minors in Political Science and International Relations.

A course in statistics is strongly recommended.

Political Science/Administrative Studies Major

The major requirements for the B.A. degree in Political Science/Administrative Studies are as follows. Note that the prerequisite for POSC 198-I is a GPA of 2.70 or better.

Political Science requirements (68 units)

1. Lower-division requirements

   Three courses from POSC 005 or POSC 005H or POSC 005W or POSC 007; POSC 010 or POSC 010H or POSC 010W; POSC 015 or POSC 015H or POSC 017; POSC 020 or POSC 020H

   Students in the major must complete two of the three lower-division Political Science courses with a grade of "C" or better in order to take upper-division political science courses.

2. Upper-division requirements

   a) Three courses from POSC 181, POSC 182, POSC 183, POSC 186

   b) At least one course from each of the following:

      (1) U.S. Government and Politics: POSC 100, POSC 101, POSC 104 or POSC 104S, POSC 108, POSC 143, POSC 144 or POSC 144S, POSC 145, POSC 164, POSC 168 or POSC 168H or POSC 168S, POSC 160, POSC 166, POSC 167, POSC 168, POSC 170, POSC 171, POSC 173 or POSC 173S, POSC 180 or POSC 180S, POSC 181, POSC 182, POSC 183, POSC 184 or POSC 184S, POSC 186

      (2) Comparative Government and Politics: POSC 109/RLST 173 POSC 120, POSC 151 or POSC 151S, POSC 152, POSC 153, POSC 154, POSC 155 or POSC 155S, POSC 156, POSC 157 or POSC 157S, POSC 158/LNST 148, POSC 159 or POSC 159S, POSC 160 or POSC 160S, POSC 161/LNST 188, POSC 162/LNST142 or POSC 162S/LNST 1425, POSC 163 or POSC 163S, POSC 164 or POSC 164S, POSC 165 or POSC 165S, POSC 178 or POSC 178S, POSC 188 or POSC 188S

      (3) International Relations and Foreign Policy: POSC 123, POSC 124 or POSC 124S, POSC 125, POSC 126 or POSC 126S, POSC 127 or POSC 127S, POSC 128, POSC 129, POSC 130, POSC 132 or POSC 132S, POSC 134 or POSC 134S, POSC 135, POSC 136 or POSC 136S, POSC 138 or POSC 138S, POSC 139 or POSC 139S, POSC 147 or POSC 147S, POSC 150 or POSC 150S, POSC 169

   (4) Political Theory: POSC 106 or POSC 106S, POSC 110 or POSC 110S, POSC 111 or POSC 111S, POSC 112 or POSC 112S, POSC 113, POSC 115 or POSC 115S, POSC 116 or POSC 116S, POSC 117 or POSC 117S, POSC 119, POSC121/CLA 121/CPAC 121 or POSC 121S /CLA 121S/CPAC 121S, POSC 122 or POSC 122S

   b) Five additional courses in Political Science course work (Not more than 2 courses from the 190 series and POSC 142 are allowed toward the nine-course upper-division requirement.)

   A course in statistics is strongly recommended.

Administrative Studies requirements (37 units)

1. Lower-division courses (17 units)

   a) BUS 010, BUS 020

   b) STAT 008 or equivalent (may be used to satisfy breadth requirements)

   c) CS 008 (may be used to satisfy breadth requirements)

2. Upper-division requirements (20 units)

   a) Two courses (8 units) from the list below: (1) ECON 102 or ECON 103 or ECON 104 or ECON 104A or ECON 130 or ECON 162/BUS 162

   (2) PSYC 140 or PSYC 142

   (3) SOC 150 or SOC 151

   (4) POSC 181 or POSC 182 or POSC 183 or POSC 186

   (5) ANTH 127 or ANTH 127S or ANTH 131

   These two courses must be outside the discipline of Political Science and cannot be courses included as part of the three course Business Administration track or their cross-listed equivalents.

   b) A three-course track (12 units) in Business Administration courses from one of the following:

      (1) Organizations (General): BUS 100 or BUS 100W, BUS 107, BUS 158/ANTH 105, BUS 176/SOC 176, SOC 150, SOC 151

      (2) Human Resources Management/ Labor Relations: BUS 100 or BUS 100W, BUS 107, BUS 121, BUS 144, BUS 145, BUS 153/ECON 153, BUS 155, BUS 156, BUS 157, PSYC 142

      (3) Business and Society: BUS 100 or BUS 100W, BUS 102, BUS 107, PHIL 116, POSC182, POSC 186

      (4) Marketing: BUS 103, and two from BUS 111, BUS 112, BUS 113, BUS 114, BUS 115, BUS 116, BUS 117, BUS 118, BUS 119, BUS 124, BUS 126, BUS 151, BUS 152, BUS 159, BUS 164

      (5) Managerial Accounting/Taxation: BUS 108, and two from BUS 166, BUS 168A, BUS 168B

      (7) Finance: BUS 106/ECON 134 and two from BUS 131, BUS 132, BUS 134, BUS 135, BUS 136, BUS 137, BUS 138, BUS 139 BUS 140E, BUS 141, BUS 147

     (8) Management Information Systems: BUS 101, BUS 110, BUS 125, BUS 128, BUS 171, BUS 172, BUS 173, BUS 174, BUS 175, BUS 179

      (9) Production Management: BUS 104/STAT 104, and two from BUS 105, BUS 122, BUS 127/STAT 127

Note: In filling the dual requirements of the selected major, students may not count more than two courses toward both parts of their total requirements (Political Science requirements and Administrative Studies requirements).
Political Science/International Affairs Major
The major requirements for the B.A. degree in Political Science/International Affairs are as follows:

1. Lower-division requirements (two courses [at least 8-10 units]): One course from a and one course from b:
   a) POSC 015 or POSC 015H or POSC 017
   b) POSC 020 or POSC 020H.

Students in the major must complete two lower-division Political Science courses with a grade of “C” or better in order to take upper-division political science courses.

Upper-division requirements (11 courses, 44-55 units):

a) International Relations (three courses) POSC 123, POSC 124 or POSC 124S, POSC 125, POSC 126 or POSC 126S, POSC 127 or POSC 127S, POSC 128, POSC 129, POSC 130, POSC 132 or POSC 132S, POSC 134 or POSC 134S, POSC 135, POSC 136 or POSC 136S, POSC 137 or POSC 137S, POSC 138 or POSC 138S, POSC 139 or POSC 139S, POSC 147 or POSC 147S, POSC 150 or POSC 150S, POSC 169
b) Comparative Politics (three courses) POSC 109/RLST 173, POSC 120, POSC 151 or POSC 151S, POSC 152, POSC 153, POSC 154, POSC 155 or POSC 155S, POSC 156, POSC 157 or POSC 157S, POSC 158L/ LNST 148, POSC 159 or POSC 159S, POSC 160 or POSC 160S, POSC 161/LNST 188, POSC 162/LNST 142 or POSC 162S/LNST 142S, POSC 163 or POSC 163S, POSC 164 or POSC 164S, POSC 165 or POSC 165S, POSC 178 or POSC 178S, POSC 188 or POSC 188S
c) General Political Science (three other political science courses in any subfield).
d) In addition, students must take two courses from the following:

Students may petition for permission to count a specific course not on this list.

Political Science/International Affairs majors are strongly encouraged to learn a language other than English. The university offers language instruction in Chinese, French, German, Greek, Italian, Japanese, Korean, Latin, Portuguese, Spanish, and Vietnamese.

Political Science/Law and Society Major
The major requirements for the B.A. degree in Political Science/Law and Society are as follows:

1. Political Science requirements (60 units)
   All major requirements for the B.A. in Political Science

2. Law and Society requirements (36 units)
   a) PHIL 007 or PHIL 007H
   b) LWSO 100 (with a grade of “C” or better)
   c) One course chosen from POSC 114, PSYC 012, SOC 004 (or equivalent course in research methods)
   d) Three courses chosen from ANTH 127, ECON 119, HISE 153, PHIL 165, POSC 167, PSYC 175, SOC 159
   e) Two courses chosen from HISA 120A, HISA 120B, HISE 175 (E-Z), PHIL 164, POSC 111, POSC 166, POSC 168, POSC 186, SOC 147, SOC 149, SOC 180
   f) LWSO 193, Senior Seminar

Note: For sections 2.d) and 2.e) combined, not more than two courses may be taken from the same department in filling the dual requirements of the major; students may not count more than two courses toward both parts of their total requirements (Political Science requirements and Law and Society requirements).

Political Science/Public Service Major
The major requirements for the B.A. degree in Political Science/Public Service are as follows. Note that the prerequisite for POSC 198-I is a GPA of 2.70 or better.

1. Lower-division requirements (five courses [at least 20-25 units])
   a) POSC 010 or POSC 010H or POSC 010W
   b) One course from POSC 005 or POSC 005H or POSC 005W, POSC 007, POSC 015 or POSC 015H or POSC 017, POSC 020 or POSC 020H
   c) ECON 003
   d) SOC 004
   e) SOC 005 or STAT 040

Students in the major must complete two of the lower-division Political Science courses with a grade of “C” or better in order to take upper-division political science courses.

2. Upper-division requirements (11 courses [at least 40-48 units])
   a) Political Science distribution: choose one course from each group
   (1) Comparative Government and Politics Group: POSC 109/RLST 173, POSC 120, POSC 151 or POSC 151S, POSC 152, POSC 153, POSC 154, POSC 155 or POSC 155S, POSC 156, POSC 157 or POSC 157S, POSC 158/LNST 148, POSC 159 or POSC 159S, POSC 160 or POSC 160S, POSC 161/LNST 188, POSC 162/LNST 142 or POSC 162S/LNST 142S, POSC 163 or POSC 163S, POSC 164 or POSC 164S, POSC 165 or POSC 165S, POSC 178 or POSC 178S, POSC 188 or POSC 188S
   (2) International Relations and Foreign Policy Group: POSC 123, POSC 124 or POSC 124S, POSC 125, POSC 126 or POSC 126S, POSC 127 or POSC 127S, POSC 128, POSC 129, POSC 130, POSC 132 or POSC 132S, POSC 134 or POSC 134S, POSC 135, POSC 136 or POSC 136S, POSC 137 or POSC 137S, POSC 138 or POSC 138S, POSC 139 or POSC 139S, POSC 147 or POSC 147S, POSC 150 or POSC 150S, POSC 169
   (3) Political Theory Group: POSC 106 or POSC 106S, POSC 110 or POSC 110S, POSC 111 or POSC 111S, POSC 112, POSC 113, POSC 115 or POSC 115S, POSC 116 or POSC 116S, POSC 117 or POSC 117S, POSC 119, POSC 121/CLA 121/CPAC 121 or POSC 121S/CLA 121S/CPAC 121S, POSC 122 or POSC 122S

b) Public Service requirement
   (1) POSC 181, POSC 183
   (2) Eight (8) units from POSC 198G and POSC 198H (prerequisite: GPA of 2.70 or better)
   (3) An additional four courses from POSC 170, POSC 171, POSC 182, POSC 186

Minor
The Political Science Department offers a minor in Political Science.

1. One lower-division course (at least 5 units) in political science, selected from POSC 005 or POSC 005H or POSC 005W or POSC 007; POSC 010 or POSC 010H or POSC 010W; POSC 015 or POSC 015H or POSC 017; POSC 020 or POSC 020H

2. Five upper-division courses (at least 20 units) to be selected as follows:
   a) One course in each of the following areas (4 courses):
      (1) American Politics: POSC 100, POSC 101, POSC 104 or POSC 104S, POSC 108, POSC 143 or POSC 143S, POSC 144 or POSC 144S, POSC 145, POSC 146, POSC 148 or POSC 148H or POSC 148S, POSC 149, POSC 166, POSC 167, POSC 168, POSC 170, POSC 171, POSC 173 or POSC 173S, POSC 180 or POSC 180S, POSC 181, POSC 182, POSC 183, POSC 184 or POSC 184S, POSC 186
(2) **Comparative Politics**: POSC 109/RLST 173, POSC 120, POSC 151 or POSC 155, POSC 152, POSC 153, POSC 154, POSC 155 or POSC 155S, POSC 156, POSC 157 or POSC 157S, POSC 158/LNST 148, POSC 159 or POSC 159S, POSC 160 or POSC 160S, POSC 161/LNST 188, POSC 162/LNST 142 or POSC 162S/LNST 142S, POSC 163 or POSC 163S, POSC 164 or POSC 164S, POSC 165 or POSC 165S, POSC 170 or POSC 178S, POSC 188 or POSC 188S

(3) **International Relations**: POSC 123, POSC 124 or POSC 124S, POSC 125, POSC 126 or POSC 126S, POSC 127 or POSC 127S, POSC 128, POSC 129, POSC 130, POSC 132 or POSC 132S, POSC 134 or POSC 134S, POSC 135, POSC 136 or POSC 136S, POSC 137 or POSC 137S, POSC 139 or POSC 139S, POSC 147 or POSC 147S, POSC 150 or POSC 150S, POSC 159, POSC 164, POSC 165, POSC 166, POSC 167 or POSC 167S, POSC 168 or POSC 168S, POSC 169

(4) **Political Theory**: POSC 106, POSC 106S or POSC 107, POSC 110 or POSC 110S, POSC 112 or POSC 112S, POSC 115, POSC 115S, POSC 116, POSC 117 or POSC 117S, POSC 119, POSC 121/CLA 121/CPAC 121 or POSC 121S/CLA 121S/CPAC 121S, POSC 122 or POSC 122S

b) One additional course selected by the student from among those listed in (1) through (4) above.

The Political Science Department also offers a minor in **International Relations** (listed elsewhere in this catalog). Also, see Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

**Honors Program**

The Political Science undergraduate Honors Program is designed to provide qualified upper-division Political Science majors with opportunities to engage in upper-division course work in the field in an intensive seminar format and to obtain the necessary training to engage in independent research in the field.

Upon successful completion of the program, students are awarded and have posted on their transcripts, the designation Honors, Department of Political Science Undergraduate Honors Program.

Complete details and an application are available from the Political Science Student Affairs Officer.

**Prerequisites for the Honors Program**

1. Submission of an application during the last quarter of the sophomore or junior year
2. Junior standing (completion of a minimum of 86 units)
3. Minimum GPA requirements or consent of director

a) Cumulative GPA of 3.50

b) A GPA of 3.50 in upper-division major courses

4. Statistics or methods course required. One course chosen from POSC 114 or POSC 114S, PSYC 101, SOC 304 (or an equivalent course in research methods)

**Requirements for the Honors Program**

Twelve (12) units/three courses from the following:

- POSC 175H (Introduction to the Honors Thesis)
- POSC 176H (Seminar on Writing the Honors Thesis)
- POSC 177H (Honors Thesis)
- POSC 199 (Senior Research [Thesis Optional])

**Model United Nations (MUN)**

The Model United Nations (MUN) program is a campuswide activity that combines academic and social aspects. The academic preparation takes place within the Political Science Department, with one course, POSC 142L. The simulation preparation takes place within the UCRMUN organization, for participation in external conferences. Each year, the UCRMUN organization hosts a two-day MUN conference, which attracts over a thousand high school students. In recent years, the UCRMUN High School MUN has been the third largest in the nation. Planning and running this conference is entirely in the hands of UCR students participating in the UCRMUN program. The program provides training in administration and diplomacy. In the spring, a UCRMUN delegation attends either a local conference or the National Model United Nations Conference in New York City.

**Education Abroad**

Education Abroad is an excellent opportunity to learn more about another country and its culture while taking courses to earn units toward graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit Education Abroad at ea.ucr.edu or call (951) 827-4113.

See Education Abroad in the Educational Opportunities section in the beginning of this catalog.

**Graduate Program**

The Department of Political Science offers the M.A. and Ph.D. degrees in Political Science.

**Admission**

Admission to both the M.A. and Ph.D. degrees is based on the quality and character of previous academic work, scores on the GRE, and letters of evaluation from previous instructors. Applications are accepted for the fall quarter only.

**Master's Degree**

The Department of Political Science offers the M.A. degree in Political Science.

Usually, the department operates under Plan II.

**Plan I (Comprehensive Examination)** Students must complete 36 units, of which at least 32 units must be in 200-level Political Science courses, including POSC 201, POSC 202A, and POSC 203. In addition, students must complete at least one course from at least three of the five fields offered by the department (see listing below). Up to 4 units of academic work in related fields may be approved by the graduate advisor as part of the 36 units.

The examination must be passed in one of the following fields:

1. **Comparative Politics**
   - Students must complete the core course POSC 217 and at least one additional course in the field.

2. **International Relations**
   - Students must complete the core course POSC 216 and at least one additional course in the field.

3. **American Politics**
   - Students must complete the core course POSC 249 and at least one additional course in the field.

4. **Mass Political Behavior**
   - Students must complete a core course, either POSC 255 or POSC 256, and at least one additional course in the field.

5. **Political Theory**
   - Students must complete the core course POSC 212 and at least one additional course in the field.

Permission to complete the M.A. program under Plan I (Thesis) is restricted to students who can demonstrate a readiness to undertake advanced independent research and who can identify a faculty member willing to supervise preparation of the thesis.

**Doctoral Degree**

The Department of Political Science offers the Ph.D. degree in Political Science.

The first two years of the program are devoted to course work and preparation for the Ph.D. examination. During this period, students obtain substantive background in the discipline through completion of three graduate courses per quarter. Course work, which will usually continue beyond the second year, includes the following required components:

1. Selecting two major fields of concentration from the five fields listed below.
2. Satisfying course requirements for the major fields, which requires a total of eight graduate courses. (This is the Major Field Requirement; see details below.)
3. Taking one course in each of the three fields of study not selected by the student as a major field. (This is the Distribution Requirement.)
4. Taking three additional graduate courses in any field of study, according to the student’s choice, in consultation with the faculty advisors. With permission of the Graduate Advisor, one or more of these courses may be graduate-level courses outside of Political Science. (This is the Depth Requirement.)
5. Students must complete POSC 201, 202A and 203 and at least two additional graduate courses in methods. The two additional courses may include POSC 202B, 204, 205, 207, 225, or other graduate methods courses. One of these may be from outside the Political Science Department, by permission of the Graduate Advisor. (This is the Methods Requirement.)

6. Enrollment in POSC 230. Students must be enrolled in the course during their first year in the program, and subsequently during quarters of their choice, until completion of 10 units, to be completed by the end of their fifth year. Exceptions only by permission of Graduate Advisor. (This is the Professional Development Requirement.)

The major fields may be chosen from among American Politics, Mass Political Behavior, Comparative Politics, International Relations, and Political Theory.

1. **Comparative Politics**
   Students must complete the core course POSC 217 and at least three additional courses in the field.

2. **International Relations**
   Students must complete the core course POSC 216 and at least three additional courses in the field.

3. **American Politics**
   Students must complete the core course POSC 249 and at least three additional courses in the field.

4. **Mass Political Behavior**
   Students must complete a core course, either POSC 255 or POSC 256, and at least three additional courses in the field.

5. **Political Theory**
   Students must complete the core course POSC 212 and at least three additional courses in the field.
   One POSC 290 course may be accepted in lieu of a seminar. This limit may be exceeded by permission of Graduate Advisor if course staffing or scheduling problems require it. All POSC 290 courses must have prior approval of the graduate advisor. A POSC 290 course should only be taken if the material to be covered is not available in a scheduled course.

6. **Written Qualifying Examination**
   Students should ordinarily complete major field course requirements during Years One and Two. In the fall quarter of Year Three, the student continues to enroll in POSC 230, while also enrolling in POSC 291 (Individual Coordinated Study), which is designed to aid preparation for the comprehensive examination. Written examinations in the two major fields are normally taken in the two weeks before the start of the fall quarter of the third year. Postponements to this schedule are allowed in exceptional circumstances; all delays in taking comprehensive examinations must be approved by the Graduate Committee.

---

**Oral Defense of Prospectus**

The winter and spring quarters of Year Three and all of Year Four are devoted to Directed Research (POSC 297) to prepare a dissertation prospectus under the direction of the principal advisor; to additional substantive seminars; and to continued participation in POSC 230. The choice of substantive seminars during this time should be made in conjunction with faculty advisors and should usually be applicable either to the distribution or depth requirements, although students may also take courses in excess of these requirements. In the fall quarter of Year 5, students are advanced to candidacy upon successful completion of the oral defense of their dissertation prospectus. Oral exams (or prospectus defense) should be completed no later than quarter 13 or fall of year 5.

Normative time to completion of the program is six years. Additional time is provided if circumstances warrant it. Whether circumstances justify additional time is to be determined by the Graduate Committee, in cooperation with the thesis advisor.

Students who do not complete their degree requirements during this two-year period are closely reviewed on a biannual basis. These reviews are provided by the graduate advisor, after consultation with the dissertation advisor. Until completion of the Ph.D. requirements, each review includes targeted amounts of required progress, to be completed prior to the next review. Students who fail to complete their scheduled work are reviewed by the Graduate Program Committee for a recommendation of termination from the Political Science graduate program.

**Normative Time to Degree**
18 quarters.

General regulations applying to the dissertation and qualifying examinations are found in the Graduate Studies section of this catalog and in other Graduate Division and department publications.

For further information, contact the graduate advisor, Department of Political Science.

---

**Lower-Division Courses**

**POSC 005 Political Ideologies 5**
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): none. An introductory exploration of political theory from the ancient world to the present. Covers either Western theorists (from Aristotle to Rawls) or non-Western theorists (from Confucius to Gandhi). Topics include citizenship, community, political change, and human flourishing. Credit is awarded for one of the following POSC 005W, POSC 005, or POSC 005H. Credit is awarded for one of the following POSC 005W, POSC 005, or POSC 005H.

**POSC 005W Political Ideologies 5**
Lecture, 3 hours, discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): ENGL 001B with a grade of C or better; ENGL 007, may be taken concurrently; for concurrent enrollment in ENGL 007, review the course titles or topics in the current online Schedule of Classes to find the corresponding ENGL 007 writing workshop; or consent of instructor: An introductory study of the ideologies of the modern era. Explores selected thinkers and texts representative of liberalism, conservatism, socialism, fascism, nationalism, nonviolence, and feminism, as well as various non-Western ideologies. Fulfills the third-quarter writing requirement for students who earn a grade of “C” or better for the course. Credit is awarded for one of the following POSC 005W, POSC 005, or POSC 005H.

**POSC 007 Introduction to Political Theory 5**
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): none. An introductory exploration of political theory from the ancient world to the present. Covers either Western theorists (from Aristotle to Rawls) or non-Western theorists (from Confucius to Gandhi). Topics include citizenship, community, political change, and human flourishing. Fulfills the third-quarter writing requirement for students who earn a grade of “C” or better for the course. Credit is awarded for one of the following POSC 007 or POSC 007W.

**POSC 007W Introduction to Political Theory 5**
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): ENGL 007, may be taken concurrently, ENGL 001B with a grade of C or better; for concurrent enrollment in ENGL 007, review the course titles or topics in the current online Schedule of Classes to find the corresponding ENGL 007 writing workshop; or consent of instructor: An introductory exploration of political theory from the ancient world to the present. Covers either Western theorists (from Aristotle to Rawls) or non-Western theorists (from Confucius to Gandhi). Topics include citizenship, community, political change, and human flourishing. Fulfills the third-quarter writing requirement for students who earn a grade of “C” or better for the course. Credit is awarded for one of the following POSC 007 or POSC 007W.

**POSC 010 American Politics 5**
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): none. An introduction to the principles and practices of government. Focuses on the policy process and selected political issues in the United States. Credit is awarded for one of only one of POSC 010 or POSC 010H or POSC 010W.
POSC 010H Honors American Politics 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to POSC 010. An introduction to the principles and practices of government. Focuses on the policy process and selected political issues in the United States. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of POSC 010 or POSC 010H or POSC 010W.

POSC 010W American Politics 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): ENGL 001B with a grade of C or better, ENGL 007, may be taken concurrently; for concurrent enrollment in ENGL 007, review the course titles or topics in the current online Schedule of Classes to find the corresponding ENGL 007 writing workshop; or consent of instructor. An introduction to the principles and practices of government. Focuses on the policy process and selected political issues in the United States. Fulfills the third- quarter writing requirement for students who earn a grade of “C” or better for courses that the Academic Senate designates, and that the student’s college permits, as alternatives to English 001C. Credit is awarded for one of the following POSC 010W, POSC 010, or POSC 010H.

POSC 015 Comparative Politics 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): none. A comparative analysis of contemporary political systems, practices, and institutions. Credit is awarded for only one of POSC 015 or POSC 015H.

POSC 015H Honors Comparative Politics 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to POSC 015. A comparative analysis of contemporary political systems, practices, and institutions. Credit is awarded for only one of POSC 015 or POSC 015H.

POSC 017 Politics of the Underdeveloped World 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): none. An introduction to the political processes and problems confronting third-world states. Topics include poverty, violence, dictatorship, civil-military relations, regime transitions, and democracy.

POSC 020 World Politics 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Explores approaches to and models of international relations. Includes theories, the causes of war, international organizations, cooperation and conflict, international political economy, regional economic agreements, and international social issues such as human rights and the environment. Credit is awarded for one of the following POSC 020 or POSC 020H.

POSC 020H Honors World Politics 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): admission to the University Honors. Program or consent of instructor. Honors course corresponding to POSC 020. Explores approaches to and models of international relations: theories, the causes of war, international organizations, cooperation and conflict, international political economy, regional economic agreements, and international social issues such as human rights and the environment. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of POSC 020 or POSC 020H.

POSC 045 Special Seminar in Political Science 1
Intensive examination of specific political arenas, utilizing the expertise of prominent political practitioners. Will be offered not more than once a quarter; can be repeated up to four times for credit.

Upper-Division Courses

POSC 100 Presidential Politics 4
Lecture, 3 hours; research, 1 hour; individual study, 1 hour; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Analyzes modern presidential leadership and power. Topics include the institutional presidency, presidential selection, and the presidency’s relationship to the Congress, interest groups, the press, and the public. Considers what makes presidents popular and what determines the effectiveness of presidential leadership.

POSC 101 The United States Congress 4
Lecture, 3 hours; research, 1 hour; extra reading, 1 hour; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Analyzes the politics of the contemporary U.S. Congress, with an emphasis on the historical roots of the institution. Topics include representation, elections, parties and leaders, committees, public policy, and the relationships between Congress and the other branches of government.

POSC 102 Political Behavior in Comparative Perspective 4
Lecture, 3 hours; extra reading, 3 hours; written work, 1 hour. Prerequisite(s): restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Introduces theories of public political behavior from a comparative perspective, including explanations from the political psychology, political sociology, and political economy perspectives. Topics include public ideology, political polarization, attitudes toward minority groups, parties, and welfare policies in European and American countries. Credit is awarded for one of the following POSC 102 or POSC 102S.

POSC 102S Political Behavior in Comparative Perspective 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours; written work, 1 hour. Prerequisite(s): restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Introduces theories of public political behavior from a comparative perspective, including explanations from the political psychology, political sociology, and political economy perspectives. Topics include public ideology, political polarization, attitudes toward minority groups, parties, and welfare policies in European and American countries. Credit is awarded for one of the following POSC 102S or POSC 102.

POSC 104 Special Topics in the Politics of Race, Immigration, and Ethnicity 4
Lecture, 3 hours; extra reading, 2 hour; term paper, 1 hour. Prerequisite(s): upper-division standing; POSC 010 or POSC 010H or POSC 010W or consent of instructor. Provides an in-depth examination of the politics of race, immigration, and ethnicity in the United States. Emphasizes the role of political institutions and political behavior. Covers one of the following topics: African American Politics, Asian American Politics, Latino Politics, Native American Politics. Course is repeatable as topics change to a maximum of 12 units. Credit is not awarded to POSC 104 if it has already been awarded to POSC 104S if the content or topic are the same.

POSC 104S Special Topics in the Politics of Race, Immigration, and Ethnicity 5
Lecture, 3 hours; discussion, 1 hour; term paper, 3 hours. Prerequisite(s): upper-division standing; POSC 010 or POSC 010H or POSC 010W or consent of instructor. Provides an in-depth examination of the politics of race, immigration, and ethnicity in the United States. Emphasizes the role of political institutions and political behavior. Covers one of the following topics: African American Politics, Asian American Politics, Latino Politics, Native American Politics. Course is repeatable as topics change to a maximum of 15 units. Credit is not awarded to POSC 104S if it has already been awarded to POSC 104 if the content or topic are the same.

POSC 106 Environmental Political Thought 4
Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Addresses various philosophical aspects of the human relationship to the environment from social, political, and economic perspectives. Includes debates related to issues such as how should human beings interact with their environment, as well as the relationship of environmental practice to liberalism, democracy, and capitalism. Credit is awarded for only one of POSC 106 or POSC 106S.
POSC 106S Environmental Political Thought 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Addresses various philosophical aspects of the human relationship to the environment from social, political, and economic perspectives. Includes debates related to issues such as how should human beings interact with their environment, as well as the relationship of environmental practice to liberalism, democracy, and capitalism. Credit is awarded for only one of POSC 106 or POSC 160S.

POSC 107 Non Western Political Thought 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Explores some of the key political thinkers, ideas, and cultural-religious legacies of non-Western societies. Addresses pertinent non-Western civilizations and crucial problems in comparative political theory. Provides a detailed analysis of political thinking in regions such as the Middle East, South Asia, and East/Southeast Asia. Cross-listed with GBST 107.

POSC 108 Politics of Race, Immigration, and Ethnicity in the United States 5 Lecture, 3 hours; discussion, 1 hour; term paper, 2 hours; extra reading, 1 hour. Prerequisite(s): POSC 010 or POSC 010H or POSC 010W; restricted to class level standing of junior, or senior; or consent of instructor. Examines the politics of race, immigration, and ethnicity in the United States including comparisons between African Americans and Latino, Asian, and European immigrants. Emphasizes the role of institutions in shaping the importance of race to politics in the United States.

POSC 109 Political Religions and Religious Politics 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Investigation of major themes and issues in the intersection of religion and politics, such as the sacralization of politics, religious nationalisms, sacral kingship, revolutionary asceticism, "throne and altar," civil religion, millennialism, political myth and ritual, integralism, and the conformity of the polity to religious values. Cross-listed with RLST 173.

POSC 110 The Origins of Political Ideas 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of the major schools of political thought of ancient times. Covers political philosophers such as Plato, Aristotle, Confucius, and Ashoka. Credit is awarded for only one of POSC 110 or POSC 110S.

POSC 110S The Origins of Political Ideas 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. A study of the major schools of political thought of ancient times. Covers political philosophers such as Plato, Aristotle, Confucius, and Ashoka. Credit is awarded for only one of POSC 110 or POSC 110S.

POSC 111 Democracy and the Social Contract 4 Lecture, 3 hours; extra reading, 2 hour; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. A study of the major political philosophers of the social contract and their critics on issues such as individualism versus community; the roles of religion and markets in politics; and the adequacy of contract theory for women and minorities. Credit is awarded for only one of POSC 111 or POSC 111S.

POSC 111S Democracy and the Social Contract 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hour; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. A study of the major political philosophers of the social contract and their critics on issues such as individualism versus community; the roles of religion and markets in politics; and the adequacy of contract theory for women and minorities. Credit is awarded for only one of POSC 111 or POSC 111S.

POSC 112 Modern Political Theory 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Critically explores selected works of political theory from the eighteenth century to the present. Concentrates on issues such as freedom, utility, justice, nature, citizenship, tolerance, equality and inequality, autonomy, democracy, power, rights, and identity. Credit is awarded for only one of POSC 112 or POSC 112S.

POSC 112S Modern Political Theory 4 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Critically explores selected works of political theory from the eighteenth century to the present. Concentrates on issues such as freedom, utility, justice, nature, citizenship, tolerance, equality and inequality, autonomy, democracy, power, rights, and identity. Credit is awarded for only one of POSC 112 or POSC 112S.

POSC 113 American Political Thought 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of developments in American political thought from the seventeenth century to the present.

POSC 114 Theory and Methodology of Political Science 4 Lecture, 3 hours; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Covers the development and scope of political science as a discipline. Addressing selected theoretical and methodological issues in contemporary political and social science. Credit is awarded for only one of POSC 114, POSC 114H, or POSC 114S.

POSC 114H Honors Theory and Methodology of Political Science 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): upper-division standing, admission to University Honors; or consent of instructor. Honors course corresponding to POSC 114 and POSC 114S. Covers the development and scope of political science as a discipline. Addresses selected theoretical and methodological issues in contemporary political and social science. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of POSC 114, POSC 114H, or POSC 114S.

POSC 114L Theory and Methodology of Political Science 4 Seminar, 3 hours; written work, 3 hours. Prerequisite(s): and consent of instructor. Covers analytical approaches used in contemporary political science emphasizing practical application. Addresses research design, research ethics, data collection and management, and public engagement. Utilizes a lab model to offer practical skills training in research methods.

POSC 114S Theory and Methodology of Political Science 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Covers the development and scope of political science as a discipline. Addresses selected theoretical and methodological issues in contemporary political and social science. Credit is awarded for only one of POSC 114, POSC 114H, or POSC 114S.

POSC 115 Utopia and Dystopia 4 Lecture, 3 hours; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing. Examines the political theory of utopian literature from ancient Greece to the present including analysis of utopian and dystopian elements in each work. Authors include Plato, Thomas More, James Harrington, Ernest Callenbach, and Katherine Forrest. Credit is awarded for only one of POSC 115 or POSC 115S.

POSC 115S Utopia and Dystopia 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing. Examines the political theory of utopian literature from ancient Greece to the present including analysis of utopian and dystopian elements in each work. Authors include Plato, Thomas More, James Harrington, Ernest Callenbach, and Katherine Forrest. Credit is awarded for only one of POSC 115 or POSC 115S.

POSC 116 Capitalism, Socialism, and Political Theory 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines debates about economic life. Focuses on issues such as markets and marketization, labor, globalization, freedom, class, corporations, democracy, the welfare state, and power. Credit is awarded for only one of POSC 116 or POSC 116S.
POSC 116 Capitalism, Socialism, and Political Theory 5 Lecture, 3 hours; discussion, 1 hour; written work, 1 hour; extra reading, 3 hours. Prerequisite(s): upper division standing or consent of instructor. Examines debates about economic life. Focuses on issues such as markets and marketization, labor, globalization, freedom, class, corporation, democracy, the welfare state, and power. Credit is awarded for only one of POSC 116 or POSC 116S.

POSC 117 Contemporary Democratic Theory 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A critical survey of the principal approaches to thinking about democracy since the World War II. May cover elite, pluralist, deliberative and participatory theories. Addresses questions about inclusiveness and the optimal character and scope of democracy. Credit is awarded for only one of POSC 117 or POSC 117S.

POSC 117S Contemporary Democratic Theory 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours; written work, 1 hour. Prerequisite(s): upper division standing or consent of instructor. A critical survey of the principal approaches to thinking about democracy since World War II. May cover elite, pluralist, deliberative and participatory theories. Addresses questions about inclusiveness and the optimal character and scope of democracy. Credit is awarded for only one of POSC 117 or POSC 117S.

POSC 119 Political Thinkers in Depth 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing. Intensive reading of one or more great political thinkers from around the world, with special attention to contested readings of each figure. Examples might include Plato, Confucius, Machiavelli, Marx and Engels, John Stuart Mill, or Gandhi.

POSC 120 The Politics of India and Pakistan 4 Lecture, 3 hours; extra reading and term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of the domestic and international politics of India and Pakistan, with attention to other South Asian countries. Explores nationalist movements, struggles for development, contrasting experiences with democracy and dictatorship, and internal and external conflicts.

POSC 121 Monarchy 4 Lecture, 3 hours; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. A cross-cultural survey of the institution of monarchy in the ancient world and its role in political, social, economic, and religious life. Cross-listed with CPAC 121, and CLA121. Credit is awarded for only one of CLA 121/CPAC 121/POSC 121 or CLA 121S/CPAC 121S/POSC 121S.

POSC 121S Monarchy 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines the cross-cultural survey of the institution of monarchy in the ancient world and its role in political, social, economic, and religious life. Cross-listed with CLA 121S, and CPAC 121S. Credit is awarded for only one of CLA 121/CPAC 121/POSC 121 or CLA 121S/CPAC 121S/POSC 121S.

POSC 122 Skepticism and Liberalism 4 Lecture, 3 hours; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Explores the origins of the modern way of thinking about politics (i.e., liberalism in a sense that includes both conservatives and liberals) by the ancient and early modern skeptics such as Montaigne, Spinoza, Hume, and Kant. Credit is awarded for only one of POSC 122 or POSC 122S.

POSC 122S Skepticism and Liberalism 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Explores the origins of the modern way of thinking about politics (i.e., liberalism in a sense that includes both conservatives and liberals) by the ancient and early modern skeptics such as Montaigne, Spinoza, Hume, and Kant. Credit is awarded for only one of POSC 122 or POSC 122S.

POSC 123 Conflict Resolution 4 Lecture, 3 hours; extra reading, 1 hour; term paper, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of conflict resolution in international relations and domestic conflict. Topics covered include theories of conflict and conflict resolution, negotiation, the role of external powers, mediation, and peacekeeping.

POSC 124 International Relations 4 Lecture, 3 hours; term paper, 1 hour; extra reading, 2 hours. Prerequisite(s): POSC 020. An in-depth consideration of the major theories of contemporary international relations. Focuses on core issues in international security affairs, such as the causes of war and peace, cooperation and conflict, alliances, perception and misperception, ethnic conflict, and the link between democracy and war. Credit is awarded for only one of POSC 124 or POSC 124S.

POSC 124S International Relations 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): POSC 020; upper-division standing or consent of instructor. An in-depth consideration of the major theories of contemporary international relations. Focuses on core issues in international security affairs, such as the causes of war and peace, cooperation and conflict, alliances, perception and misperception, ethnic conflict, and the link between democracy and war. Credit is awarded for only one of POSC 124 or POSC 124S.

POSC 125 United States Foreign Policy Since World War II 4 Lecture, 3 hours; research, 1 hour; extra reading, 1 hour; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. A survey and evaluation of the major developments in U.S. foreign policy from 1945 to the present. Focuses on relations with the Soviet Union, its successor states, and the Third World, within which the uses of force and diplomacy are emphasized.

POSC 126 The Politics of International Trade, Finance, and Development 4 Lecture, 3 hours; term paper, 2 hours; extra reading, 1 hour. Prerequisite(s): POSC 020 or POSC 020H; restricted to class level standing of junior, or senior. Studies the interaction between international economics and world politics. Focuses on the evolution of the institutions governing world trade and finance; role of multinational corporations; Third World debt and development; the European Union; economic reform in transitional economies; gender; economics and environment; and role of technology in international political economy. Credit is awarded for one of the following POSC 126 or POSC 126S.

POSC 126S The Politics of International Trade, Finance, and Development 5 Lecture, 3 hours; discussion, 1 hour; term paper, 2 hours; extra reading, 1 hour. Prerequisite(s): POSC 020 or POSC 020H. Studies the interaction between international economics and world politics. Focuses on the evolution of the institutions governing world trade and finance; role of multinational corporations; Third World debt and development; the European Union; economic reform in transitional economies; gender; economics and environment; and role of technology in international political economy. Credit is awarded for one of the following POSC 126S or POSC 126.

POSC 127 Global Environmental Politics 4 Lecture, 3 hours; field, 1 hour; individual study, 1 hour; writing work, 1 hour. Prerequisite(s): POSC 020 or POSC 020H. Introduces the study and practice of global environmental politics. Explores major developments in the evolution of international environmental law and policy. Covers ozone depletion, acid rain, marine pollution and whaling, tropical deforestation, overpopulation, and the impact of environmental degradation. Credit is awarded for only one of POSC 127 or POSC 127S.

POSC 127S Global Environmental Politics 5 Lecture, 3 hours; discussion, 1 hour; field, 1 hour; individual study, 1 hour; written work, 1 hour. Prerequisite(s): POSC 020 or POSC 020H. Introduces the study and practice of global environmental politics. Explores major developments in the evolution of international environmental law and policy. Covers ozone depletion, acid rain, marine pollution and whaling, tropical deforestation, overpopulation, and the impact of environmental degradation. Credit is awarded for only one of POSC 127 or POSC 127S.

POSC 128 Comparative Foreign Policy 4 Lecture, 3 hours; individual study, 1 hour; extra reading, 1 hour; one term paper, Prerequisite(s): upper-division standing. Compares foreign policies of the United States and the Soviet Union with special attention to the influence of historical, political, ideological, and systemic factors on their international behavior. Close attention paid to their use of military and economic instruments in their relationship with various actors.
POSC 129 The Proliferation of Weapons of Mass Destruction 4 Lecture, 3 hours; individual study, 1 hour; extra reading, 1 hour; term paper, 1 hour. Prerequisite(s): upper-division standing. Introduces students to the politics of weapons of mass destruction, including nuclear, chemical, and biological weapons. Topics covered include why states develop such weapons and whether possession of them increases or decreases the likelihood of war. Also covered are international efforts to stop weapons proliferation, and specific cases of proliferation such as those in India, and Pakistan, North Korea, Iraq, and Iran.

POSC 130 Politics and Economics of the Pacific Rim 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Provides students with a broad understanding of the politics and economics of countries that border the Pacific Rim, including Japan, South Korea, Singapore, Taiwan, and China, and of their relationship to the United States. The major issues addressed include economic growth, sociopolitical development, trade, and interdependence.

POSC 132 Postconflict Justice and Reconciliation 4 Lecture, 3 hours; term paper, 2 hours; individual study, 1 hour. Prerequisite(s): upper-division standing. Examines a range of strategies for pursuing justice and reconciliation in the aftermath of war and other forms of violent conflict. Topics include the laws of war and war theory, international criminal justice, truth commissions, and restorative justice. Credit is awarded for only one of POSC 132 or POSC 132S.

POSC 132S Postconflict Justice and Reconciliation 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing. Examines a range of strategies for pursuing justice and reconciliation in the aftermath of war and other forms of violent conflict. Topics include the laws of war, just war theory, international criminal justice, truth commissions, and restorative justice. Credit is awarded for only one of POSC 132 or POSC 132S.

POSC 134 Political Economy of International Finance 4 Lecture, 3 hours; individual study, 1 hour; extra reading, 1 hour; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines historical and contemporary issues in international money finance. Explores how financial globalization shaped policy decisions at the national and the international level. Utilizes examples from developed and developing countries with different political and legal regimes. Credit is awarded for only one of POSC 134 or POSC 134S.

POSC 134S Political Economy of International Finance 5 Lecture, 3 hours; discussion, 1 hour; individual study, 1 hour; extra reading, 1 hour; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines historical and contemporary issues in international money finance. Explores how financial globalization shaped policy decisions at the national and the international level. Utilizes examples from developed and developing countries with different political and legal regimes. Credit is awarded for only one of POSC 134 or POSC 134S.

POSC 135 Ethics and International Politics 4 Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines the ethical dimensions of contemporary debates in international politics. Topics include international justice, humanitarian aid, military intervention, and just war theory. Credit is awarded for only one of POSC 135 or POSC 267.

POSC 136 Political Economy of International Migration 4 Lecture, 3 hours; extra reading, 1 hour; individual study, 1 hour; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines the political and economic causes and consequences of international migration. Explores the effects of migration in both sending and receiving countries and how policymakers respond to these effects. Focuses on public opinion formation, interest group politics, immigration policy making, brain drain, remittances, diaspora engagement policies, and refugee policy. Credit is awarded for only one of POSC 136 or POSC 136S.

POSC 136S Political Economy of International Migration 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 1 hour; individual study, 1 hour; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines the political and economic causes and consequences of international migration. Explores the effects of migration in both sending and receiving countries and how policymakers respond to these effects. Focuses on public opinion formation, interest group politics, immigration policymaking, brain drain, remittances, diaspora engagement policies, and refugee policy. Credit is awarded for only one of POSC 136 or POSC 136S.

POSC 137 Environmental Justice and Human Rights 4 Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines how notions of justice and human rights have been brought to bear on environmental and sustainability debates. Also examines the theoretical and historical basis of the environmental justice and human rights movements. Topics include local concerns (including “food deserts”) and air pollution, as well as global problems. Credit is awarded for only one of POSC 137 or POSC 137S.

POSC 137S Environmental Justice and Human Rights 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines how notions of justice and human rights have been brought to bear on environmental and sustainability debates. Also examines the theoretical and historical basis of the environmental justice and human rights movements. Topics include local concerns (including “food deserts”) and air pollution, as well as global problems. Credit is awarded for only one of POSC 137 or POSC 137S.

POSC 138 Labor and Globalization 4 Lecture, 3 hours; individual study, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines the relationship between globalization and labor in contemporary context. Focuses on four key political actors who shape workers’ fates in the global economy: multi-national corporations, national governments, international organizations, and workers themselves. Credit is awarded for only one of POSC 138 or POSC 138S.

POSC 138S Labor and Globalization 5 Lecture, 3 hours; discussion, 1 hour; individual study, 2 hours; term paper, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Examines the relationship between globalization and labor in contemporary context. Focuses on four key political actors who shape workers’ fates in the global economy: multi-national corporations, national governments, international organizations, and workers themselves. Credit is awarded for one of the following POSC 138S or POSC 138.

POSC 139 Environment, Sustainability, and Society 4 Lecture, 3 hours; individual study, 2 hours; written work, 1 hour. Prerequisite(s): POSC 017 or POSC 020 (or POSC 020H) or SOC 020; or consent of instructor. Examines the relationship of human society to the natural environment from a multi-disciplinary approach. Considers ways in which values, paradigms, policies, technologies, and their interactions have determined humans’ current unsustainable relationship with the earth. Explores challenges inherent in moving society toward a more environmentally sustainable future. Credit is awarded for only one of POSC 139 or POSC 139S.

POSC 139S Environment, Sustainability, and Society 5 Lecture, 3 hours; discussion, 1 hour; individual study, 2 hours; written work, 1 hour. Prerequisite(s): POSC 017 or POSC 020 (or POSC 020H) or SOC 020; or consent of instructor. Examines the relationship of human society to the natural environment from a multi-disciplinary approach. Considers the ways in which values, paradigms, policies, technologies, and their interactions have determined humans’ current unsustainable relationship with the earth. Explores challenges inherent in moving society toward a more environmentally sustainable future. Credit is awarded for only one of POSC 139 or POSC 139S.
CPAC 141. Militarism and Hegemony in the Ancient World 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): CHN 030 or AST 030 or CHN 104 or CHN 107 or AST 142 or CHN 142 or RLST 142 or AST 148 or CHN 148 or CLA 010A or CLA 010B or CLA 010C or CLA 040 or CLA 050 or CLA 100 or HISE 110 or CLA 112 or RLST 112 or RLST 117 or CLA 114 or CPLE 114 or CLA 120E or CPAC 102 or CLA 102 or CPAC 112 or CLA 113 or HISE 113 or CPAC 121 or CLA 125 or POSC 121 or CPAC 132 or AST 132 or CHN 132 or CLA 132 or CPAC 133 or HISE 114 or CPAC 134 or HIST 110 or CLA 143 or CPAC 143 or CHN 143 or RLST 143 or CLA 120F or CLA 120G or CLA 120J or CPLE 030; restricted to class level standing of junior, or senior; or consent of instructor. Comparative study of ancient warfare and hegemony in two or more civilizations of the ancient world. Perspectives may include social and political contexts, gender and war, acquisition of empire, religious wars, and weapons, strategies and tactics in theory and practice. Study of primary source material in texts and visual arts. Cross-listed with AST 145, CHN 141, CLA 141, and CPAC 141.

POSC 141 Women and the American Political Process 4 Lecture, 3 hours; individual study, 1 hour; term paper, 1 hour; written work, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. A general introduction to the field of women and politics. Explores the ways in which gender enters and shapes politics, primarily in the U.S. context. Topics include women's activism, voting behavior, and opinions. Also addresses women as candidates and in government.

POSC 142 (E-Z) Simulation Laboratory 2 to 4 Participation in and analysis of laboratory models of complex political systems.

POSC 142L The United Nations 2 Lecture, 2 hours. Prerequisite(s): Examination of the structure and functioning of the United Nations with major emphasis on the principal organs (Security Council, General Assembly), ECOSOC, the Trusteeship Council and the leading committees. The course will examine theories on the pacific settlement of disputes, collective security and functionalism. The focus will be on the United Nations as a living, contemporary political institution.

POSC 142M Model United Nations: Country Studies (simulation) 2 Simulation, 2 hours, Prerequisite(s): POSC 142L. An intensive study of the foreign policy of two selected countries, normally one developed and one undeveloped country, conducted through lectures, discussion, and simulations of their foreign policies being projected in the arena of the United Nations. Can be repeated twice for a total of 6 units.

POSC 143 Elections and Political Participation 4 Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An examination of political behavior in the United States with emphasis on political participation and voting behavior. Credit is awarded for only one of POSC 143 or POSC 143S.

POSC 143S Elections and Political Participation 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An examination of political behavior in the United States with emphasis on political participation and voting behavior. Credit is awarded for only one of POSC 143 or POSC 143S.

POSC 144 Politics Through Film 4 Lecture, 3 hours; screening, 5 hours; extra reading, 1 hour; term paper, 1.5 hours. Prerequisite(s): upper-division standing. Uses film to explore how the values of democracy inform the operation of government. Topics include collective action, principal-agent problems, equality, liberty, popular sovereignty, and strategic behavior. Credit is awarded for only one of POSC 144 or POSC 144S.

POSC 144S Politics Through Film 5 Lecture, 3 hours; discussion, 1 hour; screening, 5 hours; term paper, 2 hours; extra reading, 1 hour. Prerequisite(s): upper-division standing. Uses film to explore how the values of democracy influence the operation of government. Topics include collective action, principal-agent problems, equality, liberty, popular sovereignty, and strategic behavior. Credit is awarded for only one of POSC 144 or POSC 144S.

POSC 145 Money in American Politics 4 Lecture, 3 hours; term paper, 1 hour; extra reading, 2 hours. Prerequisite(s): POSC 010 or POSC 010H or POSC 010W; or consent of instructor. Analyzes the role of money in elections and in formulation of public policy. Examines the role of parties in raising and spending campaign money, the explosion of “soft money” in congressional and presidential elections, and the effect of campaign spending on electoral outcomes. Explores how campaign contributions influence public policy.

POSC 146 Mass Media and Public Opinion 4 Lecture, 3 hours; term paper and reading, 1 hour. Prerequisite(s): Analysis of public opinion—character, sources, and functions—and especially its relationship to mass media. Particular attention will be devoted to the role and importance of television in American politics.

POSC 147 Political Theory of Globalization 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing. PHIL 001 or PHIL 001H or POSC 005 or POSC 005H or POSC 005W. Examines how the phenomenon of globalization has been theorized within the discipline of political philosophy. Covers how the effects of globalization have been addressed by leading political theorists. Focuses on concepts such as cosmopolitanism, nation-states and citizenship, cultural diversity, moral universalism, and international distributive justice. Credit is awarded for only one of POSC 147 or POSC 147S.

POSC 147S Political Theory of Globalization 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing. PHIL 001 or PHIL 001H or POSC 005 or POSC 005H or POSC 005W. Examines how the phenomenon of globalization has been theorized within the discipline of political philosophy. Covers how the effects of globalization have been addressed by leading political theorists. Focuses on concepts such as cosmopolitanism, nation-states and citizenship, cultural diversity, moral universalism, and international distributive justice. Credit is awarded for only one of POSC 147 or POSC 147S.

POSC 148 Politics of Congressional Elections 4 Lecture, 3 hours; term paper, 2 hours; individual study, 1 hour. Prerequisite(s): upper-division standing. POSC 010 or POSC 010H or POSC 010W; or consent of instructor. An introduction to the politics of congressional elections. Topics include campaigning for Congress, strategic behavior in the decision to run for election, incumbency, and money in congressional elections. Credit is awarded for only one of POSC 148, POSC 148H, or POSC 148S.

POSC 148H Honors Politics of Congressional Elections 5 Lecture, 3 hours; discussion, 1 hour; term paper, 2 hours; extra reading, 1 hour. Prerequisite(s): admission to University Honors, upper-division standing, POSC 010 or POSC 010H or POSC 010W; or consent of instructor. Honors course corresponding to POSC 148 and POSC 148S. An introduction to the politics of Congressional elections. Topics include campaigning for Congress, strategic behavior in the decision to run for election, incumbency, and money in congressional elections. Credit is awarded for only one of POSC 148, POSC 148H, or POSC 148S.

POSC 148S Politics of Congressional Elections 5 Lecture, 3 hours; discussion, 1 hour; term paper, 3 hours. Prerequisite(s): upper-division standing, POSC 010 or POSC 010H or POSC 010W; or consent of instructor. An introduction to the politics of congressional elections. Topics include campaigning for Congress, strategic behavior in the decision to run for election, incumbency, and money in congressional elections. Credit is awarded for only one of POSC 148, POSC 148H, or POSC 148S.

POSC 149 Presidential Elections 4 Lecture, 3 hours; laboratory, 1 hour; extra reading, 1 hour; term paper, 1 hour. Prerequisite(s): Restricted to class level standing of junior, or senior. Examines the politics of presidential elections. Topics include presidential primaries, the presidential general election, campaigns, the role of parties, candidate behavior, public opinion and voting choice, and the influence of money. May include hands-on exploration of public opinion and demographic data to explore individual-level voter decision making. Credit is awarded for one of the following POSC 149 or POSC 149S.
POSC 149S Presidential Elections 5 Lecture, 3 hours; discussion, 1 hour; laboratory, 1 hour; extra reading, 1 hour; term paper, 1 hour. Prerequisite(s): Restricted to class level standing of junior, or senior. Examines the politics of presidential elections. Topics include presidential primaries, the presidential general election, campaigns, the role of parties, candidate behavior, public opinion and voting choice, and the influence of money. May include hands-on exploration of public opinion and demographic data to explore individual-level voter decision making. Credit is awarded for one of the following POSC 149S or POSC 149.

POSC 150 Human Rights in Theory, Law, and Politics 4 Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the theory, politics, and law of human rights. Examines the emergence of human rights institutions since World War II and ongoing dilemmas in the field. Topics include cultural relativism, criminal tribunals, truth commissions, and refugees. Credit is awarded for only one of POSC 150 or POSC 150S.

POSC 150S Human Rights in Theory, Law, and Politics 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the theory, politics, and law of human rights. Examines the emergence of human rights institutions since World War II and ongoing dilemmas in the field. Topics include cultural relativism, criminal tribunals, truth commissions, and refugees. Credit is awarded for only one of POSC 150 or POSC 150S.

POSC 151 African Politics 4 Lecture, 3 hours; extra reading, 1 hour; individual study, 1 hour; written work, 1 hour. Prerequisite(s): Restricted to class level standing of Junior, or Senior; Or the consent of instructor; Examines politics in African countries, with a focus on the contemporary period. Covers both political institutions and political behavior. Topics include role of the state, democracy vs. dictatorship, political participation, public goods provision, and development. Credit is awarded for only one of POSC 151 or POSC 151S.

POSC 151S African Politics 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 1 hour; individual study, 1 hour; written work, 1 hour. Prerequisite(s): Restricted to class level standing of Junior, or Senior; Or the consent of instructor; Examines politics in African countries, with a focus on the contemporary period. Covers both political institutions and political behavior. Topics include role of the state, democracy vs. dictatorship, political participation, public goods provision, and development. Credit is awarded for only one of POSC 151S or POSC 151.

POSC 152 Politics of the Middle East 4 Lecture, 3 hours; individual study, 1 hour; extra reading, 1 hour; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. The domestic policies and international relations of the contemporary states of the Middle East. Includes analysis of the politics of various transnational forces and the policies of external powers as they impinge on the area.

POSC 153 Russian Foreign Policy in Transition 4 Lecture, 3 hours; extra reading and term paper, 3 hours. Prerequisite(s): POSC 020 or POSC 020H; upper-division standing or consent of instructor. Surveys postwar Russian foreign policy with an emphasis on recent changes in relations between the United States and Eastern Europe and the independent states that formerly comprised the USSR. Utilizes various international relations theories and concepts to help students understand these significant changes.

POSC 154 Politics of the European Union 4 Lecture, 3 hours; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines the formation of the European Union, its institutional structure, and its policy-making processes. Explores its role in Europe and in the world in the face of political and economic challenges.

POSC 155 Government and Politics in Western Europe 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A comparative study of government and politics in Western Europe and how economic and cultural factors influence their formation. Analyzes how parties, bureaucracies, legislatures, and executives influence the political life of Western Europe. Focuses on the governing bodies in Britain, France, and Germany. Credit is awarded for only one of POSC 155 or POSC 155S.

POSC 155S Government and Politics in Western Europe 5 Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A comparative study of government and politics in Western Europe and how economic and cultural factors influence their formation. Analyzes how parties, bureaucracies, legislatures, and executives influence the political life of Western Europe. Focuses on the governing bodies in Britain, France, and Germany. Credit is awarded for only one of POSC 155 or POSC 155S.

POSC 156 Political Systems Across Muslim Societies 5 Lecture, 3 hours; discussion, 1 hour; term paper, 1 hour; extra reading, 1 hour; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. A survey of the different political systems and institutional arrangements regulating the relationship between religion and the state across the Muslim world. Includes the history and main tenets of Islam and case studies such as Iran, Indonesia, Jordan, Pakistan, Nigeria, and the United States.

POSC 157 Modern Dictatorships 4 Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Considers how dictatorships come to power and abuse that power. Also explores the dilemmas dictatorships faced, their successes, and why they met ultimate defeat. Includes study of dictatorships in Argentina, Chile, Haiti, Guatemala and Syria. Credit is awarded for only one of POSC 157 or POSC 157S.

POSC 157S Modern Dictatorships 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Considers how dictatorships come to power and abuse that power. Also explores the dilemmas dictatorships faced, their successes, and why they met ultimate defeat. Includes study of dictatorships in Argentina, Chile, Haiti, Guatemala and Syria. Credit is awarded for only one of POSC 157S or POSC 157.

POSC 158 Politics of Mexico 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. A survey of contemporary Mexican politics. Emphasis is on recent economic and social changes and their impact on Mexico's political system. Topics include relations with the United States, the rise of drug trafficking in Mexico, and the recent emergence of opposition politics. Cross-listed with LNST 148.

POSC 159 The Armed Forces and Politics 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the origins, nature, and behavior of the military within political systems. Focuses on the political interaction between the armed forces and civilians. Topics include military intervention, democracy, human rights, missions, defense organizations, and civilian control. Explores case studies of the United States, Russia, and countries from Latin America and Asia. Credit is awarded for only one of POSC 159 or POSC 159S.

POSC 159S The Armed Forces and Politics 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the origins, nature, and behavior of the military within political systems. Focuses on the interaction between the armed forces and civilians, as well as the origins of military subordination and insubordination. Topics include military intervention, civilian control strategies, military missions, defense organization, civil-military relations in peace and wartime, and human rights. Covers case studies from Latin America, the United States, Russia, and Eastern Europe. Credit is awarded for only one of POSC 159S or POSC 159S.

POSC 160 Globalization and Underdevelopment 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on the political causes and consequences of the spread of the modern state, the competitive market, and political democracy. Examines how these political institutions interact with one another and shape the possibility of development. Credit is awarded for only one of POSC 160 or POSC 160S.
POS 160S Globalization and Underdevelopment 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior. Examines the phenomenon of globalization and its impact on state development. Focuses on political, economic, and social examples of globalization (among other areas). Credit is awarded for one of the following POSC 160S or POSC 160.

POS 161 United States and Latin American Relations 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Explores international relations between the United States and the nations of Latin America. Examines different theories for explaining changes in the conduct of U.S.-Latin American relations over time. Topics include democracy and empire, revolution and counter-insurgency, economic integration and trade, petroleum politics, drug trafficking, and migration flows. Cross-listed with LNST 188.

POS 162 Latin America: the Quest For Development and Democracy 4 Lecture, 3 hours; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. A comparative examination of central issues in and components of Latin American political life. Covers economic development, regimes and alliances, guerrilla wars, the armed forces, human rights, and democratic consolidation. Includes Argentina, Chile, Venezuela, and Peru. Cross-listed with LNST 142. Credit is awarded for one of the following POSC 162, LNST 142, LNST 142S, or POSC 162S.

POS 162S Latin America: the Quest For Development and Democracy 4 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. A comparative examination of central issues in and components of Latin American political life. Covers economic development, regimes and alliances, guerrilla wars, the armed forces, human rights, and democratic consolidation. Includes Argentina, Chile, Venezuela, and Peru. Cross-listed with LNST 142S. Credit is awarded for one of the following POSC 162, LNST 142, LNST 142S, or POSC 162S.

POS 163 Ethnic Politics 4 Lecture, 3 hours; individual study, 2 hours; extra reading, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the politics of ethnicity. Surveys theory and evidence utilizing a wide range of cases from around the world. Credit is awarded for only one of POSC 163 or POSC 163S.

POS 163S Ethnic Politics 5 Lecture, 3 hours; discussion, 1 hour; individual study, 2 hours; extra reading, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the politics of ethnicity. Surveys theory and evidence utilizing a wide range of cases from around the world. Credit is awarded for only one of POSC 163 or POSC 163S.

POS 164 The Nation State and Capitalism 4 Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Covers the comparative political economy of advanced industrial countries. Examines forms of capitalism after World War II. Studies political foundations and institutional features and their relation to economic growth, investment, innovation, international trade, employment, and economic quality. Analyzes the impact of globalization on labor relations, social welfare, financial market regulation, and corporate governance. Credit is awarded for only one of POSC 164 or POSC 164S.

POS 164S The Nation State and Capitalism 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Covers the comparative political economy of advanced industrial countries. Examines forms of capitalism after World War II. Studies political foundations and institutional features and their relation to economic growth, investment, innovation, international trade, employment, and economic quality. Analyzes the impact of globalization on labor relations, social welfare, financial market regulation, and corporate governance. Credit is awarded for only one of POSC 164S or POSC 164S.

POS 165 Strategy and Politics 4 Lecture, 3 hours; individual study, 1 hour; written work, 1 hour; extra reading, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the formal analysis of politics, the role of strategic behavior, and the importance of political institutions in influencing political outcomes. Covers the basics of social choice and game theory and their applications to strategic voting, bargaining, cooperation, agenda setting, executive vetoes, conflict, and legislative bargaining. Credit is awarded for only one of POSC 165 or POSC 165S.

POS 165S Strategy and Politics 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the formal analysis of politics, the role of strategic behavior, and the importance of political institutions in influencing political outcomes. Covers the basics of social choice and game theory and their applications to strategic voting, bargaining, cooperation, agenda setting, executive vetoes, conflict, and legislative bargaining. Credit is awarded for only one of POSC 165S or POSC 165S.

POS 166 Judicial Politics and Policy Making 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An examination of the characteristics of judicial bodies, emphasizing their interaction with other policy-makers and social and political problems. Investigates the policy roles of local, state, and lower federal courts and the U.S. Supreme Court.

POS 167 Constitutional Law: Fundamental Freedoms 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. A study of the legal and political context in the U.S. of freedom of expression, the press, and religion; separation of church and state; equal rights for women and minorities; voting rights; and citizenship.

POS 168 Constitutional Law: Criminal Justice 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An examination of the rights of criminal defendants; the role of lawyers, police, prosecutors, and judges in the criminal process in the United States; and the function of criminal law.

POS 169 Terrorism and Political Violence 4 Lecture, 3 hours; extra reading and term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the nature and origin of political conflict, violence, and rebellion. Examines political violence as a political pathology and as an instrument of supporters and opponents of regimes. Examines types of political violence: terrorism, ethnic and communal conflict, rebellion, and revolutionary and counter-revolutionary violence.

POS 170 Local Leadership in California 4 Lecture, 3 hours; consultation, 1 hour. A survey of the local leadership structure--official and unofficial--in California. An analysis of who decides and influences local policy decisions.

POS 171 American State Politics 4 Lecture, 3 hours. A critical examination of the activities, structure, and function of the states in the American political system. Concern is with the politics and major policy issues of the 50 states, with a special interest in California.

POS 173 Government and Politics of California 4 Lecture, 3 hours; individual study, 1 hour; extra reading, 1 hour; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines the political process of California. Focuses on both the electoral and legislative politics and the contribution they make to democratic governance under conditions of social diversity. Credit is awarded for only one of POSC 173 or POSC 173S.

POS 173S Government and Politics of California 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 1 hour; individual study, 1 hour; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines the political process of California. Focuses on both the electoral and legislative politics and the contribution they make to democratic governance under conditions of social diversity. Credit is awarded for only one of POSC 173 or POSC 173S.
POSC 175H Introduction to the Honors Thesis 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Familiarizes students with the procedures and techniques, from theory construction to data collection and analysis, needed to design and conduct original research for an honors thesis. Satisfactory (S) or No Credit (NC) grading is not available.

POSC 176H Seminar On Writing the Honors Thesis 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): POSC 175H; upper-division standing or consent of instructor. Provides guidance for students writing an honors thesis in political science. Topics include bibliographic research, fieldwork, statistics, case study analysis, professional writing, and standards of academic scholarship. Satisfactory (S) or No Credit (NC) grading is not available.

POSC 177H Honors Thesis 1 to 4 Thesis, 3 to 12 hours. Prerequisite(s): POSC 175H; POSC 176H; upper-division standing or consent of instructor. Independent research and preparation of an honors thesis completed under the supervision of a faculty member. Satisfactory (S) or No Credit (NC) grading is not available. Course is repeatable to a maximum of 12 units.

POSC 178 Political Consequences of Electoral Institutions 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An examination of the structures of the various electoral systems used around the world. Explores how different electoral systems influence the choices made by voters and political candidates. Analyzes how these choices influence factors including representation, accountability, party systems, corruption, and economic growth. Credit is awarded for only one of POSC 178 or POSC 178S.

POSC 178S Political Consequences of Electoral Institutions 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An examination of how the wide variety of electoral systems that are used in the world function. Explores how different electoral systems influence the choices made by voters and political candidates. Analyzes how these choices influence factors including representation, accountability, party systems, corruption, and economic growth. Credit is awarded for only one of POSC 178 or POSC 178S.

POSC 180 The Politics of Public Health 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on the social, environmental, and political factors that shape population health. Utilizes public health topics to illustrate the fundamental problems of the politics of regulation and social policy. Credit is awarded for only one of POSC 180 or POSC 180S.

POSC 180S The Politics of Public Health 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on the social, environmental, and political factors that shape population health. Utilizes public health topics to illustrate the fundamental problems of the politics of regulation and social policy. Credit is awarded for only one of POSC 180 or POSC 180S.

POSC 181 Public Policy: Values, Conflict, and Politics 4 Lecture, 3 hours; research, 1 hour; individual study, 1 hour; term paper, 1 hour. Prerequisite(s): upper-division standing; POSC 1013 or POSC 1014H or POSC 1014W. Introduces methods and approaches used to describe, explain, and evaluate public policies. Examples include group theories, system approaches, program planning, and budgeting systems.

POSC 182 (E-Z) Politics and Economic Policy 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Examines the political and administrative processes of economic policy formation, the rationale of government programs, and the mixture of facts, values, and social forces that determine policy. Emphasizes issues of government-economy interaction emerging under the impact of modern technology. Segment G may be offered online or in-person. E. Politics And Economic Policy: American Politics; F. Politics And Economic Policy: International Relations; G. Politics And Economic Policy: Strategy And Institutions.

POSC 183 Administrative Politics and Theory 4 Lecture, 3 hours; research, 1 hour; extra reading, 1 hour; term paper, 1 hour. Prerequisite(s): POSC 1015 or POSC 1015H or POSC 1015W; upper-division standing or consent of instructor. An introduction to the politics and theory of public administration. Topics include decision-making processes, leadership, formal and informal organization, and the interrelationships among values, structures, and behavior patterns.

POSC 183E Bureaucratic Politics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): POSC 1015 or POSC 1015H or POSC 1015W; restricted to class level standing of junior, or senior. An introduction to the politics and theory of public administration.

POSC 183F Strategies of Compliance 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): POSC 1010 or POSC 1010H or POSC 1010W; restricted to class level standing of junior, or senior. Examines the policies and theory of public administration focusing on compliance. Topics may include decision-making processes, leadership, formal and informal organizations, and the interrelationships among values, structures, and behavioral patterns.

POSC 184 Digital Government 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores extent to which emerging digital communication technologies transform the institutions and practice of democratic government in the United States. Topics include the impact of emerging communication technology on campaigning, legislative representation, agency rulemaking, and deliberation, as well as the legal, regulatory, and political context of public sector technology. Credit is awarded for only one of POSC 184 or POSC 184S.

POSC 184S Digital Government 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores extent to which emerging digital communication technologies transform the institutions and practice of democratic government in the United States. Topics include the impact of emerging communication technology on campaigning, legislative representation, agency rulemaking, and deliberation, as well as the legal, regulatory, and political context of public sector technology. Credit is awarded for only one of POSC 184 or POSC 184S.

POSC 185 Regulation: A Political Perspective 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Examines government regulation from a political perspective, covering both traditional areas of business regulation and the newer social regulation in areas of environment, health, and safety, and personal behavior. Evaluates rationales for and against regulation, in theory and through case studies.

POSC 188 Political Violence in Latin America 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the nature, origins, and purposes of political violence in Latin America. Examines different forms of violence perpetuated by states, insurgents, military, police, and organized crime. Includes case studies of repression in Argentina, genocide in Guatemala, counter-insurgency in Colombia, and drug-related violence in Mexico, Brazil, and Central America. Credit is awarded for only one of POSC 188 or POSC 188S.
POSC 188S Political Violence in Latin America 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the nature, origins, and purposes of political violence in Latin America. Examines different forms of violence perpetuated by states, insurgents, military, police, and organized crime. Includes case studies of repression in Argentina, genocide in Guatemala, counter-insurgency in Colombia, and drug-related violence in Mexico, Brazil, and Central America. Credit is awarded for only one of POSC 188 or POSC 188S.

POSC 190 Special Studies 1 to 5 Individual Study, 3 to 15 hours. Prerequisite(s): consent of instructor and department chair. Student prepares a written proposal endorsed by a supervising instructor, as a means of meeting individual curricular needs. Course is repeatable to a maximum of 15 units.

POSC 196A Moot Court A: Legal Research, Writing, and Advocacy 4 Seminar, 4 hours. Prerequisite(s): POSC 187 or POSC 168 or PHIL 007; restricted to class level standing of junior, or senior; 3.4 GPA; or consent of instructor. Introduction to the judicial process and legal argument. Explores how attorneys devise and make legal arguments, oral presentations, argument skills. Addresses the basics of legal analysis. Credit is awarded for one of the following POSC 196A or POSC 196C. Credit is awarded for only one of POSC 196A or POSC 196A.

POSC 196B Moot Court B: Moot Court Competition 3 Seminar, 3 hours. Prerequisite(s): POSC 196A; restricted to class level standing of senior; and consent of instructor. Builds on the skills developed in POSC 196A. Focuses on writing an appellate brief and orally arguing an appeal. Includes participation in the American Moot Court Association competition against other colleges and universities across the nation.

POSC 197 Research For Undergraduates 1 to 4 Research, 3 to 12 hours. Prerequisite(s): consent of instructor. Offers opportunity for directed individual research, to result in a substantial paper, when a student wishes to do a deeper study of a topic than is possible in the normal term paper.

POSC 198G Field Work 1 to 12 Lecture, 1 hour; field, 3 to 9 hours; written work, 2 to 24 hours; consultation, 3.5 hours per quarter. Prerequisite(s): consent of instructor. Direct evaluation of the local political process through participant observation, combining academic instruction and supervised field work. Students will examine firsthand political behavior and the policy process in one location in local political systems. Course is repeatable to a maximum of 16 units.

POSC 198I Individual Internship in Political Science 1 to 12 Internship, 2 to 24 hours; reading and writing, 1 to 12 hours. Prerequisite(s): a GPA of 2.70 or better; upper-division standing; consent of instructor. Intern assignments in major political offices. Students participate in and observe substantive theoretical analyses of political behavior and policy processes. Course is repeatable to a maximum of 16 units.

POSC 199 Senior Research 1 to 4 Research, 3 to 12 hours. Prerequisite(s): upper-division standing and consent of instructor. Independent work under the direction of members of the staff. The project may be undertaken as a one-, two-, or three-quarter sequence. In the case of a two- or three-quarter sequence, the final grade may be deferred until completion of the last quarter. Course is repeatable to a maximum of 12 units.

Graduate Courses

POSC 201 Introduction to Political Inquiry 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduction to the logic of political inquiry. Problems of theory-building, research design, case selection, and measurement are covered in the context of quantitative and qualitative political research.

POSC 202A Survey of Quantitative Methods 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): POSC 201 or approval of department graduate committee. Introduction to statistical analysis. Topics include descriptive statistics, probability, sampling distributions, parameter estimation, hypothesis testing, correlation, and bivariate regression analysis.

POSC 202B Survey of Quantitative Methods 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): POSC 201 or approval of department graduate committee. Covers data analysis for political science applications. Topics include Statistical Package for the Social Sciences (SPSSX), regression analysis, causal modeling, factor analysis, and cluster analysis in research design context.

POSC 202C Theory and Methods of Causal Inference and Causal Analysis 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): POSC 202A, POSC 202B; or equivalent; graduate standing; or consent of instructor. Introduces modern techniques for causal inference in quantitative analysis. Topics include the potential outcome framework, causal graphs, regression discontinuity, DID, matching methods, instrumental variables, causal bounds, and selection of covariates in regression analyses. Combines theory and practical applications with examples.

POSC 203 Social Science, History, and Qualitative Methodology 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduction to the basic epistemology of qualitative social science. Students with a working knowledge of the strengths and weaknesses of the historical and comparative case study approaches to social science.

POSC 204 Mathematical Modeling in Political Science 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Survey of basic mathematical tools relevant to research in political science and other disciplines of the social sciences, with an emphasis on concepts and applications. Topics include sets, matrix algebra, comparative-static analysis, optimization problems, exponential and logarithmic functions, equality constraints in optimization, and integration.

POSC 205 Advanced Regression Analysis 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): POSC 202B. Introduction to the use of advanced techniques in regression analysis. Topics include model specification, measures of goodness of fit, two-stage least squares, and models with binary dependent variables.

POSC 207 Advanced Quantitative Analysis 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): POSC 202B; graduate standing. Introduction to the use of advanced techniques in quantitative analysis. Topics include maximum likelihood, sample selection bias, and simultaneous equations. Course is repeatable to a maximum of 8 units.

POSC 208 Seminar in Representation 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines representation in America. Topics include what it means to represent, the different means of representation; to what degree the elected behave consistently with constituents’ preferences; and the accountability of elected officials. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

POSC 210 Qualitative Interpretive Research Methods 4 Seminar, 3 hours; individual study, 1 hour; written work, 1 hour; extra reading, 1 hour. Prerequisite(s): graduate standing; or consent of instructor. Covers interpretive methods used in social science research including interviews, ethnography, participant-observation, archival research, and case studies. Considers trade-offs involved in choosing one method or type of evidence over another. Provides practical experience with the major steps of interpretive research including project design and implementation, data analysis, writing, and publishing.

POSC 212 Political Theory 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A survey of general issues in political theory. Proponents covered may include Plato, Montesquieu, Weber, Arendt, Rawls, Foucault, and others. Debate models covered may include hermeneutics and normativity vs. science; power vs. truth; and democracy vs. liberalism. Course is repeatable to a maximum of 12 units.

POSC 213 Rhetoric and Argument in Ancient China and Greece 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A study of theories and practices of rhetoric, argument, persuasion, and, in some cases, poetics in ancient China and Greece (texts dating from the fifth to the third centuries B.C.), as well as some of their implications for contemporary theory and practice. Students who submit a seminar paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. This course may be taken on a Satisfactory (S) or No Credit (NC) basis by students advanced to candidacy for the Ph.D. Cross-listed with CPLT 213.
POSC 214 Political Economy of International Trade 4 Lecture, 3 hours; individual study, 1 hour; research, 1 hour; written work, 1 hour. Prerequisite(s): POSC 216 recommended; graduate standing. Overview of the literature in International Political Economy IPE relevant to the study of trade and globalization. Introduces the relationship between international politics and the world economy. Examines theoretical debates relevant to trade politics including economic growth and development, gender, environmental protection, migration, trade in services and intellectual property protection. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

POSC 215 Political Economy of International Finance 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Conducts a broad theoretical and historical survey of the politics and economics of international money and finance. Topics include monetary and exchange rate regimes, foreign direct investment, capital flows, sovereign debt, financial regulation and international macroeconomic coordination, the role of finance in economic development, and international financial crises. Cross-listed with ECON 226.

POSC 216 International Relations 4 Lecture, 3 hours. Prerequisite(s): consent of instructor. Historical development and present range of political thought on relations among nations, origins and implications of the idea of sovereignty, the theory of an international community, theories of imperialism. The analysis of selected contemporary problems—bipolarity, emergent nations, alliance systems in the light of recent contributions to international relations theory.

POSC 217 Comparative Politics 4 Lecture, 3 hours. Survey and introduction to comparative politics with emphasis on major ideas, trends, and issues in the field. Critical assessment of the literature on systems, political culture, development and underdevelopment, and elites.

POSC 218 Political Economy of International Migration 4 Lecture, 3 hours; individual study, 1 hour; research, 1 hour; written work, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Examines the political and economic causes and consequences of international migration. Explores the effects of migration in both sending and receiving countries and how policymakers respond to these effects. Focuses on public opinion formation, interest group politics, immigration policy making, brain drain, remittances, diaspora engagement policies, and refugee policy. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

POSC 220 Politics of Race, Immigration, and Ethnicity 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the politics of race, immigration, and ethnicity in the United States, including comparisons to ethnic politics in other regions of the world. Emphasizes the role of political institutions and processes in making race, immigration, and ethnicity more or less salient in elections, legislation, social movements, and interpersonal and intergroup relations. Course is repeatable to a maximum of 8 units.

POSC 225 Formal Analysis 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduction to the use of formal theory in political science. Covers the basics of game theoretical analysis and applications to substantive issues in the discipline. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 8 units.

POSC 227 Seminar in Religion and Politics 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A critical examination of the relationship between religion and politics from a comparative perspective. Studies politicization of religion in political issues such as secularism, gender rights, minority rights, terrorism, civil conflict, foreign policy, political Islam, and Christian democracy. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 8 units.

POSC 230 Research Colloquium in Political Science 1 Colloquium, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Provides professional development through training in full and effective engagement in scholarly inquiry and exchange. Utilizes tiered participation in student and faculty presentations. Discussion of current research in fields of political science: American politics, comparative politics, international relations, mass politics, and political theory. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 13 units.

POSC 249 American Politics 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Surveys major theoretical approaches to the study of American politics and enduring research questions in the field. Topics vary and could include the politics of race and ethnicity, the historical development of government institutions, political parties, voting behavior, federalism, and the policy-making process in the United States. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 8 units.

POSC 250 Seminar in Politics and the Legal Order 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Intensive reading and research on selected topics in politics and the legal order, such as law and social change, compliance with judicial decision making, and important areas of constitutional law.

POSC 252 Public Policy 4 Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores approaches to public policy analysis, emphasizing interaction between substance and process in policy development. Covers both theories and concrete case studies; special attention given to the administrative stage of policy development.

POSC 254 Seminar On the United States Congress 4 Seminar, 3 hours. An examination of major research on the U.S. Congress. Emphasis will be placed upon substantive questions requiring further research and upon methodological techniques appropriate to such research.

POSC 255 Seminar in American Electoral Behavior 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores the literature on electoral behavior in the United States. Focuses on the major models of voting behavior developed since 1945. In addition, issues such as voter turnout, economic voting, and presidential primaries are covered.

POSC 256 Seminar in Public Opinion and Mass Media 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores classic and contemporary research on public opinion and mass media. Topics in public opinion include political socialization, attitude constraint, and theories of attitude change. Topics in mass media include agenda setting and framing effects.

POSC 257 Comparative Political Behavior and Elections 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores classic and contemporary behavior and elections in the theoretical literature on voting studies by using examples mainly from outside the U.S.

POSC 258 Congressional Elections 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Congressional elections are a growing field of inquiry in American electoral politics. Much scholarly debate has been generated over a variety of phenomena in this area. This seminar provides an overview of a number of these controversies and offers students the conceptual framework to critically analyze a rather large body of literature.

POSC 259 Women and the American Political Process 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An examination of the role of women in the American political process. Topics include the women's movement as a social movement and as an interest group, women as voters, candidates and office holders, and women's issues and the public policy process.

POSC 260 Economics and Elections 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the impact of issues and economic conditions on voting behavior in elections, with primary focus on United States presidential elections. The roles of campaigns and information are also covered.
POSC 261 American Political Institutions 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Surveys the principal theoretical and empirical issues involved in the study of American political institutions. Covers the major U.S. national political institutions, including Congress, the presidency, the judiciary, the bureaucracy, interest groups, and political parties.

POSC 262 War Termination and Conflict Resolution 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Considers competing explanations of why and when conflicts come to an end. Focuses on international and civil wars. Addresses questions such as the following: Why do civil wars last longer than international ones? Why are civil wars difficult to settle through negotiation? What impact does domestic politics have on international war termination?

POSC 263 Seminar On Conflict and Peace 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Considers some of the principal problems, issues, and findings in the study of the causes and consequences of war. Focuses on a number of key variables and their links to war under certain conditions and introduces students to standard data sources.

POSC 264 Seminar in International Political Economy 4
Seminar, 3 hours; consultation, 1 hour. Prerequisite(s): graduate standing or consent of instructor. An examination of major economic institutions, developments, and forces in world politics. Emphasizes contending theoretical approaches, issues in North-South relations, and consequences for regional and national political-economic development. Course is repeatable to a maximum of 12 units.

POSC 266 Political Economy of Growth 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): POSC 202A, POSC 202B, or consent of instructor. Examination of political and economic aspects of growth using a formal and quantitative approach. Topics include political institutions, social development, economic growth, and democratization. Emphasis is on the interaction and causality between political and economic variables.

POSC 267 Ethics and International Politics 4
Seminar, 3 hours; extra reading, 1.5 hours; written work, 1.5 hours. Prerequisite(s): graduate standing or consent of instructor. Examines ethical debates in the field of international politics. Topics include just war theory, humanitarian aid, military intervention, international justice and human rights, aggression, peacekeeping, and global inequality. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for only one of POSC 135 or POSC 267.

POSC 268 Human Rights 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor; consent of instructor is required for students repeating the course. Surveys the primary theoretical and empirical issues in the study of human rights. Explores major themes and contemporary topics, including, but not limited to, cultural relativism, the evolution of the human rights regime, and the impact of globalization, domestic, and international institutions. Course is repeatable to a maximum of 8 units.

POSC 269 Political Economy of International Labor 4
Seminar, 3 hours; individual study, 1 hour; research, 1 hour; written work, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Conducts a broad overview of the international political economy of labor in both historical and contemporary context. Critically examines scholarly theories of labor in the context of capital mobility, global value chains, foreign direct investment, national and international institutions, international law, corporate governance, workers’ movements, global unions, and labor transnationalism. Course is repeatable to a maximum of 12 units.

POSC 270 Comparative Political Economics 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Past attempts to address such questions as “What part does government play in the economy?” have been made within the disciplinary boundaries of political science or economics. Such questions, however, cut across the domains of economics and political science, and the new political economy attempts to integrate theories and insights from both disciplines. This course will examine this literature to see how successful it has been in explaining important aspects of the interrelationship between politicians and the economy.

POSC 271 Comparative Political Economics 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines some of the literature on parties and party systems in Western Europe, with special attention to the role of such systems in modern representative democracies and to debates in the literature on this topic.

POSC 272 Parties and Party Systems in Western Europe 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the principal theoretical, historical, and methodological challenges of fieldwork-based analysis.

POSC 273 Rational Choice in Comparative Politics 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. The rational choice approach has begun to gain favor among a number of comparative political scientists. This seminar critically reviews and discusses the contribution the rational choice perspective has made as well as the debates it has sparked.

POSC 274 The Armed Forces and Politics 4
Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the role of the armed forces in political society, covering western-democratic, communist, postcommunist, and third world systems. Comparisons of civic-military relations across regions are made, with an emphasis on military political intervention and civilian control strategies.
POSC 282 Political Theory and Policy Analysis 4 Seminar, 3 hours; extra reading, 1.5 hours; written work, 1.5 hours. Prerequisite(s): graduate standing or consent of instructor. Provides an overview of the literature focusing on the analysis of individual behavior within various types of institutional arrangements. Introduces a diversity of work oriented in rational choice theory, broadly defined. Emphasis is placed on applying institutional analysis to legislative, bureaucratic, and so-called informal institutions.

POSC 283 Political Thinkers in Depth 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores in depth one or more great political thinkers from around the world. Focuses on methodologies of research and interpretation. May include works by Plato, Confucius, Machiaveli, Marx and Engels, John Stuart Mill, or Gandhi. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 12 units.

POSC 285 Professional Research Paper 4 Research, 12 hours. Prerequisite(s): graduate standing or consent of instructor. An independent study course focusing on writing a substantial research paper, emphasizing research design problems. Must be accomplished within two quarters following doctoral qualifying examinations. Course is repeatable.

POSC 290 Directed Studies 1 to 6 Research, 3 to 18 variable hour. Prerequisite(s): consent of instructor. Advanced work in a topic or topics appropriate to the student's special interests and needs. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

POSC 291 Individual Study in Coordinated Areas 1 to 12 Prerequisite(s): consent of instructor. A program of study designed to advise and assist candidates who are preparing for doctoral examinations. Does not count toward the unit requirement for the master's degree. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

POSC 292 Concurrent Analytical Studies in Political Science 2 to 4 Research, 8 to 16 hours. Prerequisite(s): graduate standing; and consent of instructor. Taken concurrently with a 100-series course on an individual basis. Includes a graduate-level paper based on research or criticism related to the 100-series course. POSC 114, POSC 142E-2, POSC 186, POSC 190, and POSC 196A through POSC 199 may not be used. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

POSC 293 Research Topics in Political Science 1 Lecture, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Lectures and discussions by invited scholars and faculty on selected research topics in political science. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

POSC 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing or consent of instructor. Individual research performed under the direction of a faculty advisor. Designed for students preparing their dissertation prospectuses. Students meet in groups by appointment with a faculty advisor to discuss issues of dissertation writing. Emphasis is placed on the development of research design. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

POSC 299 Research For Thesis Or Dissertation 1 to 12 Thesis 3 to 36 hours. Prerequisite(s): graduate standing or consent of instructor. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

POSC 301 Teaching of Political Science at the College Level 2 Seminar, 1 hour; practical, 3 hours. Prerequisite(s): graduate standing in Political Science. A program of weekly meetings and individual formative evaluation of new Political Science Teaching Assistants. Covers instructional methods and classroom/section activities most suitable for teaching Political Science. Conducted by departmental faculty or the Teaching Assistant Development Program. Graded Satisfactory (S) or No Credit (NC).

POSC 302 College Teaching Practicum 1 to 4 Practicum, 2 to 8 hours; consultation, 1 to 4 hours. Prerequisite(s): graduate standing and consent of instructor. Required of all teaching assistants in the department. Credit not applicable to graduate unit requirements. Supervised teaching in college level classes under the supervision of the course instructor. Graded Satisfactory (S) or No Credit (NC).

Population Biology
College of Natural and Agricultural Sciences

The interdepartmental Ph.D. program in Population Biology is not currently accepting new students. For further information call (800) 735-0717 or (951) 827-5621.

Psychology

Subject abbreviation: PSYC

College of Humanities, Arts, and Social Sciences

Daniel J. Ozer, Ph.D., Chair
Department Office, 1111 Psychology Building; (951) 827-5243

Undergraduate Advising Office
1200 Psychology (951) 827-5386; psych.ucr.edu

Professors

Kim A. Wilcox, Ph.D. Chancellor
David C. Funder, Ph.D. Distinguished Professor of the Graduate Division
Howard S. Friedman, Ph.D. Distinguished Professor of the Graduate Division
Kelly Huffman-Neal, Ph.D.
Sonja Lyubomirsky, Ph.D. Distinguished Professor

Carolyn Murray, Ph.D. Professor of the Graduate Division
Misaaki Nishimura Natsuaki, Ph.D.
Daniel J. Ozer, Ph.D.
Khaleel Abdul Razak, Ph.D.
Chandra Reynolds-Gebelin, Ph.D.
Rebekah Richert, Ph.D.
David Rosenbaum, Ph.D. Distinguished Professor
Lawrence Rosenblum, Ph.D.
Robert Rosenthal, Ph.D. Distinguished Professor of the Graduate Division
Aaron Seitz, Ph.D.
B. Glenn Stanley, Ph.D. (Psychology/Cell Biology and Neuroscience)
Katharine Sweeney, Ph.D.
Tuppett Yates, Ph.D.

Professors Emeriti

G. John Andersen, Ph.D.
R. Curt Burgess, Ph.D.
Christine Chiarello, Ph.D.
Steven E. Clark, Ph.D.
M. Robin DiMatteo, Ph.D.
Mary T. Gauvain, Ph.D.
Marvin Nachman, Ph.D.
Ross Parke, Ph.D.
Robert D. Singer, Ph.D.
Ovid J-L. Tseng, Ph.D.
David H. Warren, Ph.D.

Associate Professors

Cecilia Cheung, Ph.D.
Elizabeth Davis, Ph.D.
John Franchak, Ph.D.
Peter Hickmott, Ph.D.
Edward Korzus, Ph.D.
Aerika Loyd, Ph.D.
Megan Robbins, Ph.D.
Thomas Sy, Ph.D.
Rachel Wu, Ph.D.
WeiWei Zhang, Ph.D.

Assistant Professors

Ilana Hershman Bennett, Ph.D.
Diamond Bravo, Ph.D.
Jimmy Arthur Calanchini, Ph.D.
Anubhuti Goel, Ph.D.
Brent Hughes, Ph.D.
Kalina Michalska, Ph.D.
Edward Zagha, M.D., Ph.D.

Assistant Professor of Teaching
Annie Ditta, Ph.D.

majors and career opportunities

The major in Psychology is designed to give students a broad, general exposure to knowledge in the various areas of psychology and to the methods psychologists use to conduct research. The B.A. degree in Psychology is useful to those students seeking careers in probation and parole, corrections, personnel, industrial relations, mental health work, social work, or positions as trainees in a variety of executive training programs. The degree also prepares students for graduate school in psychology in either M.A. or Ph.D. programs. Such graduate programs prepare students for a variety of career possibilities. Careers include teaching and research positions in community and private colleges and state and other universities as well as career positions such as research psychologist, clinical psychologist, counseling psychologist, and industrial psychologist. For more information, see psych.ucr.edu.
The department offers a minor in Psychology and a major in Psychology/Law and Society.

**Transfer Students**
Transfer applicants must have a minimum GPA of 2.70. Applicants must also have a minimum of one UC transferable mathematics course equivalent to Math 004 or higher.

**Change of Major Criteria**
Students switching to the Psychology or Psychology/Law and Society must have completed the following courses with grades of C- or better and have been in good academic standing for two quarters or more.

1. **Lower Division requirements**
   a. PSYC 001, PSYC 002, PSYC 011 and MATH 004 or higher

Transfer students and others entering the major after achieving sophomore standing must complete the requirements within one year by enrolling in applicable courses every quarter until the requirement is met. Students who do not complete the lower-division requirements in this timely fashion and with at least the minimum required grade average will not be permitted to continue in the Psychology major. Students must check course descriptions for prerequisite requirements.

**University Requirements**
See Undergraduate Studies section.

**College Requirements**
See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

The lower-division biological, physical sciences, and mathematics requirements for the Psychology major also count toward the college’s Natural Sciences and Mathematics breadth requirement. Consult with a departmental advisor.

**Major Requirements**

**Psychology Major**
Psychology offers B.A. and B.S. degrees. The Psychology major requires completion of the lower-division requirements listed below by the end of the sophomore year, with an average grade of "C" or better with no grade below a "C-", before upper-division Psychology courses are taken. All courses must be taken for a letter grade.

For the Bachelor of Arts
The major requirements for the B.A. degree in Psychology are as follows:

1. **Lower-division requirements (at least 39 units)**
   a. One course in Mathematics equivalent to MATH 004 or higher; or a score on the MAE (Math Advisory Exam) sufficient for placement into MATH 022 or higher.
   b. One 4 unit course in Biological Sciences (Biochemistry, Biology, Botany and Plant Sciences, Entomology, Nematology, or Plant Pathology)
   c. One 4 unit course in Physical Sciences (Chemistry, Physics, Earth Sciences, excluding cultural Geography courses)
   d. Two additional 4 unit courses that satisfy the CHASS Natural Sciences and Mathematics breadth requirements.
   e. PSYC 001, PSYC 002, PSYC 011, PSYC 012

2. **Upper-division requirements (37 units)**
   a) PSYC 110 or CBNS 106
   b) PSYC 140, PSYC 150
   c) PSYC 132 or PSYC 134
   d) PSYC 160 or PSYC 161 or PSYC 162 or PSYC 163
   e) Four additional 4-unit, upper-division Psychology courses, with the following restrictions: only one quarter of PSYC 190 (for a total of 4 units, letter grade required); only one quarter of PSYC 195 (for a total of 4 units, letter grade required); only one quarter of PSYC 197 (for a total of 4 units, letter grade required); only one quarter of PSYC 199 (for a total of 4 units, letter grade required); only one quarter of PSYC 199H (for a total of 4 units, letter grade required); only one quarter of PSYC 198H, or one 4- to 8-unit quarter of PSYC 198I may be included.

Students planning for graduate school should take into consideration any specific graduate school requirements when choosing these elective Psychology courses.

Note: Students who have taken general or introductory Psychology courses other than PSYC 001 and PSYC 002 must consult with a departmental advisor.

For the Bachelor of Science
The B.S. degree is designed to provide a research-intensive curriculum for students who want a deeper understanding of how knowledge is created through research and for students who may be interested in research-based graduate programs in psychology and the biological sciences.

Psychology courses must be taken for a letter grade. Students must check course descriptions for prerequisite requirements.

**Admission**
A limited number of students are accepted into the B.S. degree of the Psychology major. Acceptance is according to overall GPA and acceptable progress towards the Psychology major, including PSYC 001, PSYC 002, PSYC 011 and PSYC 012 with a B- or better. Students must apply when they have completed between 75 and 100 quarter units of college work.

The major requirements for the B.S. degree in Psychology are as follows:

1. **Lower-division requirements for the B.S. (at least 39 units)**
   a) One course in Mathematics equivalent to MATH 004 or higher; or a score on the MAE (Math Advisory Exam) sufficient for placement into MATH 022 or higher.
   b) One 4 unit course in Biological Sciences (Biochemistry, Biology, Botany and Plant Sciences, Entomology, Nematology, or Plant Pathology)
   c) One 4 unit course in Physical Sciences (Chemistry, Physics, Earth Sciences, excluding cultural Geography courses)
   d) Two additional 4 unit courses that satisfy the CHASS Natural Sciences and Mathematics breadth requirements.
   e) PSYC 001, PSYC 002, PSYC 011, PSYC 012 with no grade below a B-

2. **Upper-division requirements (37 units)**
   a) PSYC 110 or CBNS 106
   b) PSYC 140, PSYC 150
   c) PSYC 132 or PSYC 134
   d) PSYC 160 or PSYC 161 or PSYC 162 or PSYC 163
   e) Any three of the following: PSYC 109, PSYC 120L/CBNS 120L, PSYC 122L, PSYC 123L, PSYC 180, PSYC 181, PSYC 182 (E-2), PSYC 195, PSYC 197 (for a total of 4 units, letter grade required), PSYC 199H. Also 195/197 can be applied twice (4 units and letter grade repeatable for up to 8 units).
   f) One of the following: PSYC 117, PSYC 136, PSYC 139, PSYC 148, PSYC 169, or PSYC 190 (for a total of 4 units, letter grade required). One of the following: PSYC 180, PSYC 181, PSYC 182, PSYC 182 (E-2), PSYC 195, PSYC 197, PSYC 199H, PSYC 199H (for a total of 4 units, letter grade required).

   g) One additional 4-unit, upper-division Psychology course, with the following restrictions: only one quarter of PSYC 190 (for a total of 4 units, letter grade required); only one quarter of PSYC 195 (for a total of 4 units, letter grade required); only one quarter of PSYC 197 (for a total of 4 units, letter grade required); only one quarter of PSYC 199 (for a total of 4 units, letter grade required); only one quarter of PSYC 199H (for a total of 4 units, letter grade required); only one quarter of PSYC 199H, or one 4- to 8-unit quarter of PSYC 198I may be included.

Students planning for graduate school should take into consideration any specific graduate school requirements when choosing these elective Psychology courses.

**Psychology/Law and Society Major**
The Law and Society major is open to undergraduate students with junior standing who have completed LWSO 100 with a grade of “C” or higher.

**All requirements for the B.A. in Psychology (39 lower-division units, which includes 16 units that are also used for college breadth requirements; 37 upper-division units)**

1. **Lower-division requirements (at least 39 units)**
   a) One course in Mathematics equivalent to MATH 004 or higher; or a score on the MAE (Math Advisory Exam) sufficient for placement into MATH 022 or higher.
b) One 4 unit course in Biological Sciences (Biochemistry, Biology, Botany and Plant Sciences, Entomology, Nematology, or Plant Pathology)

c) One 4 unit course in Physical Sciences (Chemistry, Physics, Earth Sciences, excluding cultural Geography courses)

d) Two additional 4 unit courses that satisfy the CHASS Natural Sciences and Mathematics breadth requirements.

e) PSYC 001, PSYC 002, PSYC 011, PSYC 012

2. Upper-division requirements (37 units)

a) PSYC 110 or CBNS 106
b) PSYC 140, PSYC 150
c) PSYC 132 or PSYC 134
d) PSYC 160 or PSYC 161 or PSYC 162 or PSYC 163
e) Four additional 4-unit, upper-division Psychology courses, with the following restrictions: only one quarter of PSYC 190 (for a total of 4 units, letter grade required); only one quarter of PSYC 195 (for a total of 4 units, letter grade required); only one quarter of PSYC 197 (for a total of 4 units, letter grade required), only one quarter of PSYC 195H (for a total of 4 units, letter grade required); only one quarter of PSYC 199 (for a total of 4 units, letter grade required); only one quarter of PSYC 199H (for a total of 4 units, letter grade required); only one quarter of PSYC 198G, or one 4-to-8-unit quarter of PSYC 198I may be included.

3. Requirements for Law and Society (36 units)

a) PHIL 007 or PHIL 007H
b) LWSO 100 (with a grade of "C" or better)
c) One course chosen from POSC 114, PSYC 012, SOC 004 (or equivalent course in research methods)
d) Three courses chosen from ANTH 127, ECON 119, HISE 153, PHIL 165, POSC 167, PSYC 175, SOC 159
e) Two courses chosen from HISA 120A, HISA 120B, HISE 123, LWSO 175 (E-Z), PHIL 164, POSC 111, POSC 166, POSC 168, POSC 186, SOC 147, SOC 149, SOC 180
f) LWSO 193, Senior Seminar

Note: For sections 3.d) and 3.e) combined, not more than two courses may be taken from the same department. In fulfilling requirements of two or more majors, students may not count more than two courses toward both parts of their total requirements. For this major, PSYC 012 fulfills a requirement in both Psychology and Law and Society.

Minor

Prerequisites for the minor in Psychology are PSYC 001, PSYC 002, PSYC 011, and PSYC 012, with an average grade of "C" or better, with no grade below a "C-".

Requirements for the Psychology minor are as follows (21 units):

1. Twenty-one (21) upper-division Psychology units
   a) PSYC 110 or CBNS 106
   b) PSYC 132 or PSYC 134
   c) PSYC 140 and PSYC 150
   d) PSYC 160 or PSYC 161 or PSYC 162 or PSYC 163

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Education Abroad

Education Abroad is an excellent opportunity to learn more about another country and its culture while taking courses to earn units toward graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit Education Abroad at ea.ucr.edu or call (951) 827-4113.

See Education Abroad in the Educational Opportunities section in the beginning of this catalog.

Graduate Program

The Department of Psychology offers the M.A. and Ph.D. degrees in Psychology; however, applications are not accepted from students wishing to work towards the master’s degree only.

Graduate training in Psychology is offered in four major areas: Cognition and Cognitive Neuroscience, Social/Personality, Developmental, and Behavioral Neuroscience.

Admission

Students are normally expected to have completed the equivalent of an undergraduate major in Psychology at the UC, with background preparation in basic science and mathematics. The Ph.D. degree is a research degree. Students must demonstrate the ability to complete rigorous empirical research and must be active in research throughout their graduate career. The course requirements in the Ph.D. program are directed toward establishing a foundation for critical evaluation of research literature and designing conceptually important empirical research.

Doctoral Degree

Course Work The courses normally required during the first two years include the following:

1. PSYC 211; PSYC 212; and PSYC 213 or 214 (Behavioral Neuroscience students take two of the three, as directed by the student’s advisor.)

3. Five additional courses or seminars selected to provide further study beyond the area core course requirements. Courses or seminars must be 3- or 4-units, and at least one must be a Departmental core course (listed in 2, above) outside the student’s area of specialization. The student’s adviser and the department graduate adviser must approve the list of courses used to satisfy this further study requirement. Students who have completed graduate-level course work prior to entering the UCR program may request that specific courses be accepted toward the satisfaction of this requirement. This request will be reviewed using procedures and standards typically applied to the approval of courses to satisfy this requirement.

4. PSYC 301: Required of all graduate students prior to or concurrent with the first teaching assistant appointment unless waived by petition due to previous experience.

The Psychology Department requires that each student earn a “B” average in the PSYC 211; PSYC 212; and PSYC 213/214 sequence and in the student’s area core courses, with no grade lower than a “B-“.

In addition, students must be enrolled in the appropriate area of Proseminar every quarter until advancement to candidacy.

Cognition and Cognitive Neuroscience: PSYC 283 Developmental: PSYC 284 Social/Personality: PSYC 285 Behavioral Neuroscience: PSYC 287 or PSYC 289

Progress in the program is formally evaluated in June of each year and informally on a continuing basis by noting participation in class and in research.

All students in the graduate program are held to these requirements whether or not they have taken graduate work at, or hold an M.A. from, another institution. The only exception may be for previously-taken graduate-level course work which is thought to be equivalent to one or more of PSYC 211, PSYC 212, or PSYC 213, or PSYC 214 if a grade of “B” or better was received, and with the approval of the advisor, the student may be tested by a departmental instructor of the course(s) in question. On the basis of the results of the test, the instructor decides if the course can be waived.
Professional Development Requirement
The Professional Development course (PSYC 309B) curriculum satisfies the Professional Development requirement. Topics discussed typically include: interviewing, writing, and oral presentation skills; the academic job market and the job application process; and nonacademic careers.

Master's Degree
Although there is not a separate terminal master’s program, students may apply for the master’s degree at the beginning of the quarter in which they expect to complete the statistical sequence, the appropriate area core, two of the five further study courses, PSYC 301 (see 1, 2, 3, and 4 above), and a minimum of 36 units in graduate status (of which at least 18 must be in graduate course work) and pass an oral comprehensive examination administered by the Psychology Department.

Teaching Experience
Each student must gain experience in a teaching capacity for the equivalent of at least three full quarters. Teaching assistants assist a faculty member in an undergraduate course by preparing and grading examinations, reading papers, lecturing, and conducting discussion and laboratory sections.

Written and Oral Qualifying Examinations
The qualifying examination should be taken during the third year of full-time graduate study. It consists of a written component and an oral examination, and focuses on the subject matter in the student's chosen area of concentration.

A qualifying committee should be nominated early in the third year, and all core and breadth requirements must be completed no later than the quarter in which the qualifying examination is taken.

On the basis of this examination (and completion of the core and breadth requirements), the student may pass and be advanced to candidacy for the Ph.D., fail, and be permitted one retake; be awarded the M.A. (if not previously awarded) but not be advanced to candidacy for the Ph.D.; or not be advanced to candidacy for the Ph.D.

Upon successful completion of 1, 2, 3, and 4, passing the qualifying examination, and nomination of the dissertation committee, the Graduate Division sends the student an application for advancement to candidacy.

Dissertation and Final Oral Examination: Students must complete a dissertation on a subject chosen by the candidate, bearing on the principal area of concentration and showing the student’s ability in independent investigation. The dissertation committee guides the student in preparing the dissertation and examines the student during the defense of the dissertation.

Each of the four major areas may have additional requirements. Occasionally, a change in courses used to satisfy specific requirements may be justifiable. For a complete description of the program, visit psych.ucr.edu.

Normative Time to Degree 15 quarters

Optional Specialized Subfield of Study
In addition to pursuing a doctoral degree in one of the core areas of psychology, graduate students may qualify, under the direction of the committee in charge of the relevant Specialized Subfield of Study, for any one or more of three subfields of study: Quantitative Psychology, Health & Well-Being Psychology, and Diversity & Inequality Psychology. Students wishing to pursue a Specialized Subfield of Study should typically pursue one or at most two subfields, in the rating interests dictate. Exceptional requests to pursue more than two subfields may be granted by the Graduate Advisor in consultation with the relevant subfield committees and the student's primary advisor. Each Specialized Subfield of Study has the following requirements:

1. Submission of a letter of interest to the chair of the relevant specialized subfield committee, in which the student should articulate their interest in the specialization with regard to its relevance for the student's course of graduate study and the student's longer-term career plans.
2. Enrollment and satisfactory completion of at least three quarters of the relevant subfield.
3. Satisfactory completion of at least three courses relevant to the relevant Specialized Subfield of Study topic, as approved by the relevant subfield of study committee. No more than two courses used to satisfy a Specialized Subfield of Study requirement may be utilized to fulfill the general further studies requirement for doctoral study in psychology, and no more than two courses may be used to satisfy the requirements of multiple Specialized Subfields of Study (i.e., at least one core course for each subfield must be uniquely applied to that subfield’s requirements).

The qualifying courses vary from subfield to subfield. However, no core course (i.e., PSYC 200A/B/C, 203A/B/C, 207A/B/C, 208, 225, 226, or 227) may count toward a subfield’s requirements. Statistical and methods courses (e.g., 233, 259) are typically not appropriate for these requirements except in the case of the Quantitative Psychology Subfield. Exceptions may be granted by the Graduate Advisor in consultation with the relevant subfield committee and the student’s advisor.

4. Successful completion of an oral examination based upon a project completed by the student on a topic relevant to the subfield of study. A three-person faculty committee, approved by the chair of the committee in charge of the relevant subfield of study, must grant prior approval of the topic of the project and conduct the oral examination. No more than two members can overlap between subfield committees for a given student (i.e., at least one member of the evaluating committee must be unique to each Specialized Subfield of Study). The student and the committee determine the format of the oral exam; a presentation in the relevant pro-seminar based on the project satisfies the oral examination requirement.

5. Submission of a form to the relevant subfield of study committee confirming completion of all requirements.

Subfield of Study-specific requirements:
Quantitative Psychology: Further requires completion of PSYC 211, PSYC 212, and PSYC 213 or 274, with a grade of "A-" or better in each course, or passing an examination covering the three courses. The relevant subfield is PSYC 270.
Health & Well-Being Psychology: Further requires submission of a written paper on the completed project, due to the faculty committee prior to the oral examination. The relevant subfield is PSYC 286.
Diversity & Inequality Psychology: Further requires submission of a written paper on the completed project, due to the faculty committee prior to the oral examination. The relevant subfield is PSYC 286.

Opportunities for Graduate Study in Neuroscience
Faculty from the Department of Psychology participate in a unique graduate specialization in Neuroscience which draws on the strengths of distinguished scientists from several units. For further information concerning work in this area, see Neuroscience Graduate Program in the Programs and Courses section of this catalog.

Lower-Division Courses
PSYC 001 Introductory Psychology 4 Lecture, 3 hours; discussion, 1 hour. An introduction to psychology as an experimental science. Emphasizes topics in cognitive (including learning, memory, sensation, perception), comparative, and physiological psychology.

PSYC 002 Introductory Psychology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Emphasizes topics in development psychology, tests and measurements, social psychology, personality, and abnormal behavior.

PSYC 011 Psychological Methods: Statistical Procedures 5 Lecture, 3 hours; discussion, 2 hours. Prerequisite(s): MATH 004 with a grade of C- or better or MATH 005A with a grade of C- or better or MATH 006A with a grade of C- or better or MATH 006B with a grade of C- or better or MATH 007A with a grade of C- or better or MATH 007B with a grade of C- or better or MATH 009A with a grade of C- or better or MATH 009B with a grade of B or better or MATH 009C with a grade of C- or better or MATH 09HC with a grade of B or better or MATH 010A with a grade of C- or better or MATH 010B with a grade of C- or better or MATH 022 with a grade of C- or better; PSYC 001 with a grade of C- or better; PSYC 002 with a grade of C- or better; or a score on the Math Advisory Exam sufficient for placement into MATH 022 or higher. Covers descriptive and inferential statistics, measures of central tendency, variability, and correlation. Introduces sampling distributions, statistical inference, and hypothesis testing.
| PSYC 012 Psychological Methods: Research Procedures 6 | Lecture, 3 hours; laboratory, 3 hours; research, 3 hours; term paper, 1 hour; extra reading, 2 hours. Prerequisite(s): ENGL 001B with a grade of C or better; PSYC 001 with a grade of C- or better; PSYC 002 with a grade of C- or better; PSYC 011 with a grade of C- or better; PSYC 004 with a grade of C- or better or MATH 005A with a grade of C- or better or MATH 006A with a grade of C- or better or MATH 006B with a grade of C- or better or MATH 007A with a grade of C- or better or MATH 007B with a grade of C- or better or MATH 009A with a grade of C- or better or MATH 09HA with a grade of B or better or MATH 099B with a grade of C- or better or MATH 09HB with a grade of B or better or MATH 099C with a grade of C- or better or MATH 09HC with a grade of B or better or MATH 010A with a grade of C- or better or MATH 010B with a grade of C- or better or MATH 022 with a grade of C- or better or equivalent; a score on the Math Advisory Exam sufficient for placement into MATH 022 or higher; consent of instructor is required for students repeating the course. A systematic survey of research methodologies in psychology. Laboratory assignments include evaluating and testing psychological theories, assessing methodologies and research designs; designing and implementing research; collecting data and analyzing statistics; writing research reports; and discussing ethical issues in science. |
| PSYC 013 Skepticism and Pseudoscience in Psychology 4 | Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): a grade of “C-” or better in ENGL 001A or consent of instructor. Studies topics at the borderland of psychology (e.g., extra-sensory perception, repressed memory, pseudoscientific beliefs, parapsychology, psychic phenomena, faith healing, mass hysteria). Explores the relationship among skepticism, cynicism, and “gullibility” and the rhetoric of extraordinary claims. Stresses the development of scientific literacy, critical thinking skills, hypothesis testing, and understanding psychology as an empirical science. |
| PSYC 049 Topics in Psychology 4 | Lecture, 3 hours; discussion, 1 hour. Explores a topic of general interest in psychology. Debate and dialog are the distinguishing features of this course. Topics are announced in the Schedule of Classes. Course is repeatable as content or topic changes to a maximum of 16 units. |
| PSYC 096 Research For Lower-Division Students 1 to 2 | Scheduled research, 3-6 hours. Prerequisite(s): freshman or sophomore standing and consent of instructor. An introduction to research in psychology. Emphasis is upon aspects of library and laboratory research within the content of ongoing faculty research programs. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 6 units. |

**Upper-Division Courses**

| PSYC 109 Advanced Research Methods 4 | Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): PSYC 001, PSYC 002, PSYC 011, PSYC 012, each with a grade of "C-" or better or equivalents; or consent of instructor. Advanced theory and practice of planning, conducting, reporting, and evaluating research in the social and behavioral sciences. Students conduct original research that, if desired, can lead to (and become part of) a senior honors thesis or other senior-level research project. Satisfactory (S) or No Credit (NC) grading is not available. |
| PSYC 110 The Brain and Behavior 4 | Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PSYC 001 with a grade of "C-" or better, or equivalents, or consent of instructor. Explores the principles of neuroanatomy and neurophysiology and their relationship to brain function. Topics include sensory and perceptual processes, biological aspects of learning and memory, motivation, emotion, language, and abnormal behavior. |
| PSYC 112 Neural Mechanisms of Animal Behavior 4 | Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 106 with a grade of "C-" or better or PSYC 110 with a grade of "C-" or better or PSYC 110 with a grade of "C-" or better or consent of instructor. Studies how the nervous systems of vertebrates and invertebrates contribute to and control their behavior. Focuses on aspects of sensory physiology with a brief orientation to the structure and function of nervous systems. Emphasizes a top-down approach to neurobiology, with specific behaviors providing guidelines for an examination of neural mechanisms. |
| PSYC 115 Drugs and Behavior 4 | Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 106 with a grade of "C-" or better or PSYC 110 with a grade of "C-" or better or consent of instructor. Describes both legal and illegal drugs. Analyzes drug-nervous system interactions and how the use of various drugs (particularly drugs of abuse) affects behavior and psychological well-being. |
| PSYC 117 Cognitive Neuroscience of Memory and Consciousness 4 | Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): CBNS 106 with a grade of "C-" or better or PSYC 110 with a grade of "C-" or better or PSYC 110 with a grade of "C-" or better. Surveys the neural basis of mental processes, focusing on memory and consciousness and their behavioral manifestations. Emphasizes current research literature. |
| PSYC 120 Cellular Neuroscience: Membrane and Synaptic Phenomena 4 | Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 106 or consent of instructor. An examination of cellular and molecular mechanisms of nervous system function using concepts drawn from the study of vertebrates and invertebrates with emphasis on mammalian systems. Cross-listed with CBNS 120. |
| PSYC 121 Developmental Neuroscience 4 | Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 106 or consent of instructor. A study of the development of nervous systems. Examines the cellular and molecular mechanisms of neural development and the determinants of cell birth and death, axonal pathfinding, neuronal connections, and development of neural systems underlying behavior. Cross-listed with CBNS 121. |
| PSYC 122 Human Neuroimaging 4 | Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PSYC 110 or CBNS 106 or consent of instructor. PSYC 122 can be taken without PSYC 122L. An introduction to magnetic resonance imaging in psychological research with an emphasis on the merits and limitations of structural and functional neuroimaging in humans. |
| PSYC 122L Human Neuroimaging Laboratory 2 | Lecture, 1 hour; laboratory, 3 hours. Prerequisite(s): concurrent enrollment in PSYC 122; or consent of instructor. Laboratory exercises in the design, acquisition, and analysis of structural and functional magnetic resonance imaging data. |
| PSYC 123L Computational Neuroscience Laboratory: Introduction to Brain Modeling Techniques 2 | Lecture, 1 hour; laboratory, 3 hours. Prerequisite(s): CBNS 120 or PSYC 120; or consent of instructor. Introduces computer modeling techniques used to study neurons and neural systems. Selected topics include biological models of single neurons, small neural circuits, synaptic interactions, and larger scale network models. Cross-listed with CBNS 130L. |
| PSYC 124 Systems Neuroscience 4 | Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 120 or PSYC 120. Examines synaptic neurotransmitter systems, mechanisms, and pharmacological agents and effects, which are fundamental to neural information processing. Cross-listed with CBNS 125. |
| PSYC 125 Neuropharmacology 4 | Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 120/PSYC 120. Examines synaptic neurotransmitter systems, mechanisms, and pharmacological agents and effects, which are fundamental to neural information processing. Cross-listed with CBNS 125. |
| PSYC 126 Neuroscience of Learning and Memory 4 | Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 106 or PSYC 110 or consent of instructor. Covers mechanisms of learning and memory across levels of analysis, including genetic, neuronal, systems and theory. Topics include the multiple memory systems, memory consolidation, working memory, emotional memory, recognition memory, spatial memory, and human amnesia. Cross-listed with CBNS 126. |
| PSYC 127 Behavioral Control Systems 4 | Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 106 or PSYC 110 or consent of instructor. Covers mechanisms of learning and memory across levels of analysis, including genetic, neuronal, systems and theory. Topics include the multiple memory systems, memory consolidation, working memory, emotional memory, recognition memory, spatial memory, and human amnesia. Cross-listed with CBNS 126. |
PSYC 128 Language and the Brain 4 Lecture, 3 hours; research, 2 hours; extra reading, 2 hours. Prerequisite(s): LING 020 or PSYC 110 or PSYC 135 or CBNS 106; or consent of instructor. Interdisciplinary introduction to the study of language and the brain. Includes brain evolution for language, neural bases for language production and language comprehension, aphasiology and language disorders, and additional special topics. Cross-listed with LING 162.

PSYC 129 Human Neuropsychology 4 Lecture, 3 hours; discussion, 1.5 hours. Prerequisite(s): a grade of “C-” or better in one of the following courses or consent of instructor: CBNS 106, PSYC 110, PSYC 132, PSYC 134, PSYC 135. Surveys how high psychological functions (e.g., perception, memory, language) are organized in the human brain. Special emphasis is on behavioral and cognitive impairments due to brain injury and how they may inform our view of normal cognitive functions.

PSYC 130 Fundamentals of Learning and Conditioning 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PSYC 001, PSYC 002, PSYC 011, PSYC 012 with grades of “C-” or better; or equivalents; or consent of instructor. A survey course that includes both historical and current models of human learning, conditioning, and memory. Provides a good foundation for research or future study in learning and memory by covering fundamental theories established by Pavlov and Skinner while incorporating new theories of human behavioral control.

PSYC 131 Computational and Mathematical Models in Cognitive Science 4 Lecture, 3 hours; extra reading, 1.5 hours; written work, 1.5 hours. Prerequisite(s): a grade of “C-” or better in PSYC 001, PSYC 002, PSYC 011, PSYC 012 or consent of instructor. Introduces students to the technical and theoretical issues involved in using models to understand behavior. Involves analysis of model predictions and simulation of behavioral data. Course is repeatable to a maximum of 12 units if taken with different instructors.

PSYC 132 Perception 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PSYC 001, PSYC 002, PSYC 011, PSYC 012 with grades of “C-” or better; or equivalents; or consent of instructor. An analysis of the role played by sensory mechanisms, experiences, expectations, and needs in recognizing objects in the environment.

PSYC 133 Human Factors 4 Lecture, 3 hours; extra reading, 3 hours; term paper, 1 hour. Prerequisite(s): a grade of “C-” or better in one of the following courses or consent of instructor: PSYC 132 or PSYC 134. Provides an overview of the human capabilities and limitations considered in the design of person-machine systems. Evaluates factors critical to performance in person-machine systems, including attention, decision making, motor performance, and memory.

PSYC 134 Cognitive Processes 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PSYC 001, PSYC 002, PSYC 011, PSYC 012 with grades of “C-” or better; or equivalents; or consent of instructor. Introduces the technical and theoretical research in several subareas within contemporary cognitive psychology. These subareas include attention, mental representation, information organization and retrieval from memory, psycholinguistics, problem solving, decision making, thinking, and artificial intelligence and computer simulation of cognitive processes.

PSYC 135 Psycholinguistics 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): a grade of “C-” or better in the following courses or consent of instructor: PSYC 001, PSYC 002, PSYC 011, PSYC 012. Introduction to psycholinguistics emphasizing the psychological implications of linguistic theory, including the effect of syntactic structure on the comprehension, production, and retention of speech; the course of language acquisition; and models of the adult language user.

PSYC 136 Topics in Cognitive Neuroscience 4 Seminar, 3 hours; extra reading, 1.5 hours; written work, 1.5 hours. Prerequisite(s): a grade of “C-” or better in one of the following courses or consent of instructor: CBNS 106, PSYC 110, PSYC 129, PSYC 132, PSYC 134, PSYC 135. Intensive study of selected topics in cognitive neuroscience. Stresses the methodology and interpretation of current research topics. Course is repeatable as topics change to a maximum of 12 units.

PSYC 139 Topics in Cognitive Psychology 4 Seminar, 3 hours; extra reading, 1.5 hours; written work, 1.5 hours. Prerequisite(s): a grade of “C-” or better in the following courses or consent of instructor: PSYC 001, PSYC 002, PSYC 011, PSYC 012; or PSYC 132 or PSYC 134 or PSYC 135. Intensive study in cognitive psychology. Stresses literature, methodology, and experimental design and analysis. Course is repeatable as topics change to a maximum of 16 units.

PSYC 140 Social Psychology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PSYC 001, PSYC 002, PSYC 011, PSYC 012 with grades of “C-” or better; or equivalents; or consent of instructor. An analysis of the research and theories regarding the major types of abnormal behavior, including the neuroses, schizophrenia, psychosomatic disorders, sexual disorders, drug and stress induced states, and organic disorders.

PSYC 142 Industrial/Organizational Psychology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PSYC 002. Introduction to the field of industrial/organizational psychology covering fundamental theory and research in personnel and organizations. Topics include employee selection and training, performance appraisal, motivation, organizational dynamics, leadership, and job satisfaction.

PSYC 148 Topics in Social Psychology 4 Lecture, 3 hours; extra reading or term paper, 3 hours. Prerequisite(s): a grade of “C-” or better in the following courses or consent of instructor: PSYC 001, PSYC 002, PSYC 011, PSYC 012, PSYC 140. Intensive study of selected topics in social psychology such as race relations, attitude formation and change, biases of social science researchers, and the application of psychological principles in community organization. Emphasis is on the study of these areas in natural settings. Specific course content varies. Course is repeatable to a maximum of 16 units.

PSYC 149 The Science of Well-Being 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PSYC 001 and PSYC 002. Covers current theory and research in positive psychology and the scientific study of optimal human functioning. Topics include the causes and benefits of happiness; how happiness can be measured and increased; positive emotions; flow; and human strengths and virtues including optimism, love, altruism, forgiveness, and gratitude.

PSYC 150 Personality 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PSYC 001, PSYC 002, PSYC 011, PSYC 012 with grades of “C-” or better; or equivalents; or consent of instructor. An introduction to the principal theories of personality with attention to the experimental methods and findings on which they are based.

PSYC 152 Abnormal Psychology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PSYC 001, PSYC 002, PSYC 011, PSYC 012 with grades of “C-” or better; or equivalents; or consent of instructor. An introduction to the research and theories regarding the major types of abnormal behavior, including the neuroses, schizophrenia, psychosomatic disorders, sexual disorders, drug and stress induced states, and organic disorders.

PSYC 153 Introduction to Clinical Psychology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PSYC 001, PSYC 002, PSYC 011, PSYC 012. Introduction to the field of clinical psychology. Emphasizes the application and evaluation of techniques of individual and group counseling and therapy. Also addresses the application and evaluation of psychological tests in the assessment of psychological problems.

PSYC 155 Personality Assessment 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): a grade of “C-” or better in the following courses or consent of instructor: PSYC 001, PSYC 002, PSYC 011, PSYC 012, PSYC 152. Covers the personality assessment through self-report tests, projective tests, and systematic observations. Also entails a discussion of the psychometrics of testing as it applies to the problems in studying personality.
PSYC 160 Life Span Development 5 Lecture, 3 hours; discussion, 1 hour; term paper, 3 hours. Prerequisite(s): PSYC 001 with a grade of C- or better; PSYC 002 with a grade of C- or better; PSYC 011 with a grade of C- or better; PSYC 012 with a grade of C- or better. Introduces the biological, social, and cognitive processes that influence development from the prenatal period through late adulthood. Topics include development in physical, motor, perceptual, cognitive, emotional, and social areas. Includes discussion of issues related to intellectual functioning, personality, social roles and relationships, coping and adjustment, and aging.

PSYC 161 Socioemotional and Personality Development 5 Lecture, 3 hours; discussion, 1 hour; term paper, 3 hours. Prerequisite(s): PSYC 001 with a grade of C- or better; PSYC 002 with a grade of C- or better; PSYC 011 with a grade of C- or better; PSYC 012 with a grade of C- or better; or consent of instructor. A study of the development of human personality from birth through late adolescence. Emphasizes the impact of interpersonal relationships on the acquisition of human traits, emotional reactions, and patterns of adjustment.

PSYC 162 Biological Issues in Development 5 Lecture, 3 hours; discussion, 1 hour; term paper, 3 hours. Prerequisite(s): PSYC 001, PSYC 002, PSYC 011, and PSYC 012 with grades of “C-” or better; or equivalents; or consent of instructor. An analysis of intellectual development from birth through maturity and into stages of aging. Discusses historical and contemporary theoretical and experimental approaches to studying the mechanisms of intellectual growth and development.

PSYC 163 Cognitive Development 5 Lecture, 3 hours; discussion, 1 hour; term paper, 3 hours. Prerequisite(s): PSYC 001, PSYC 002, PSYC 011, and PSYC 012 with grades of “C-” or better; or equivalents; or consent of instructor. An analysis of intellectual development from birth through maturity and into stages of aging. Discusses historical and contemporary theoretical and experimental approaches to studying the mechanisms of intellectual growth and development.

PSYC 164 Emotional and Behavioral Disorders of Childhood 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): PSYC 001, PSYC 002, PSYC 011, PSYC 012, PSYC 152, and PSYC 160 with grades of C- or better; or equivalents; or consent of instructor. Provides an overview of behavioral and emotional disorders affecting children and adolescents within a developmental context. Examines disorders affecting youth in terms of prevalence, developmental course, and theories. Topics include theoretical models of child psychopathology; diagnostic, assessment, and treatment practices; and the descriptive psychopathology of major childhood disorders.

PSYC 165A The Cultural Bases of Human Development 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): PSYC 001, PSYC 002, PSYC 011, and PSYC 012 with grades of “C-” or better; or equivalents; or consent of instructor. Examines the social, emotional, and intellectual aspects of human development from a cultural perspective. Covers theory, research, and methods of studying the cultural bases of psychological growth. Topics include socialization practices, parenting, social relations, language and cognition, schooling and academic achievement, acculturation, and ethnicity.

PSYC 165B The Development of Immigrant and Ethnic Minority Youth 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PSYC 001, PSYC 002, PSYC 011, PSYC 012, and PSYC 160 with grades of “C-” or better; or equivalents; or consent of instructor. Covers current theory and research on the development of immigrant and ethnic minority youth in the United States. Focuses on the social, cultural, and psychological processes influencing the biological, cognitive, and social development of youth from immigrant and ethnic minority families.

PSYC 166A Infancy 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PSYC 001, PSYC 002, PSYC 011, PSYC 012 all with grades of “C-” or better; or consent of instructor. Covers current theory and research on development during the period of infancy. Addresses the key biological, cognitive, emotional, and social developments during this period.

PSYC 166B Childhood 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PSYC 001, PSYC 002, PSYC 011, PSYC 012 all with grades of “C-” or better; or consent of instructor. Covers current theory and research on development during the period of childhood. Addresses the key biological, cognitive, emotional, and social developments during this period.

PSYC 166C Adolescence and Emerging Adulthood 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PSYC 001 with a grade of C- or better; PSYC 002 with a grade of C- or better; or consent of instructor. Covers current theory and research on development during the period of adolescence and the transition to adulthood. Addresses the key biological, cognitive, emotional, and social developments during this period.

PSYC 166D Adulthood and Aging 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PSYC 001 with a grade of C- or better; PSYC 002 with a grade of C- or better; PSYC 011 with a grade of C- or better; PSYC 012 with a grade of C- or better. Covers current theory and research on development during the period of adulthood and the process of aging. Addresses the key biological, cognitive, emotional, and social developments during this period.

PSYC 167 Psychological Development of Black Children 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): PSYC 002. This course will analyze both the traditional theoretical approaches to the study of Black children and innovative approaches that are currently being developed by Black psychologists. The course will cover topics in the areas of cognitive, social, and personality development. Cross-listed with ETST 167.

PSYC 168 Psychological Aspects of the Black Experience 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): PSYC 002. This course examines the interdependence between personal characteristics, Afro-American culture, and the social conditions which foster the Black experience. Group membership, life styles, role factors, and situational settings as social norms will be explored in order to understand the uniqueness of the Black experience. Cross-listed with ETST 168.

PSYC 169 Topics in Developmental Psychology 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): PSYC 001 with a grade of C- or better; PSYC 002 with a grade of C- or better; PSYC 011 with a grade of C- or better; PSYC 012 with a grade of C- or better; or equivalents; or consent of instructor. Covers current theory and research on development during the period of infancy. Addresses the key biological, cognitive, emotional, and social developments during this period.

PSYC 170 Psychology of Gender 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): PSYC 012 with a grade of “C-” or better or consent of instructor. Examines psychological theory and research on gender, including ethnic and cultural variations in male and female experience. Topics include gender roles, gender development, gender differences and stereotypes, biological influences on gender, gender and health, gender and language, gender and achievement, and men and women in the workplace.

PSYC 175 Psychology and Law 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PSYC 001 with a grade of C- or better, PSYC 002 with a grade of C- or better or LWSO 100 with a grade of C- or better or LWSO 100H with a grade of B or better. A study of psychological theory and empirical research as it relates to the law. Topics include jury decision making, eyewitness memory, child custody, criminal responsibility and intent, competence, rehabilitation and punishment, ethics and legal responsibilities in therapy, and psychological research.

PSYC 178 Health Psychology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PSYC 002 or SOC 001 or SOC 001H. An examination of the importance of interpersonal relationships to physical health and effective medical care. Applies social psychological perspectives to such topics as stress-related diseases, placebo effects, doctor-patient interactions, dying, and the hospital environment.

PSYC 179 Health and Behavior Change 4 Lecture, 3 hours; discussion, 1 hour; term paper, 1 hour. Prerequisite(s): PSYC 002 with a grade of C- or better or PSYC 178 with a grade of C- or better. Examines psychological constructs in health behavior change. Covers theories and research on preventive health behavior; adherence to treatment; health lifestyles; substance use and abuse; and anxiety and depression in medical illness. Also examines cognitive and behavioral techniques; helping skills; placebo effect; social support; therapeutic communication; medical care; and ethical issues.
PSYC 181 Laboratory in Cognitive Psychology 4 Lecture, 3 hours; research, 1.5 hours; extra reading, 1.5 hours. Prerequisite(s): PSYC 001, PSYC 002, PSYC 011, PSYC 012, and PSYC 134 with grades of “C-” or better. Integrates the conceptual and theoretical foundations of cognitive psychology with the mechanics of conducting research. Students develop and design research studies and collect, analyze, and interpret data.

PSYC 182 (E-Z) Laboratory in Psychology 5 Lecture, 3 hours; research, 3 hours; term paper, 3 hours. Prerequisite(s): for PSYC 182E: PSYC 160 or PSYC 161 or PSYC 162 or PSYC 163 with a grade of C- or better or consent of instructor; for PSYC 182F: PSYC 132 with a grade of C- or better or consent of instructor; for PSYC 182G: PSYC 140 and PSYC 150 with a grade of C- or better or consent of instructor; for PSYC 182I: PSYC 012 with a grade of C- or better or consent of instructor; for PSYC 182J: PSYC 132 or PSYC 134 with a grade of C- or better or consent of instructor; for PSYC 182K: PSYC 012 with a grade of C- or better or consent of instructor; for PSYC 182L: PSYC 132 or PSYC 134 with a grade of C- or better or consent of instructor; for PSYC 182M: PSYC 134 with a grade of C- or better or consent of instructor; for PSYC 182N: PSYC 160 or PSYC 161 or PSYC 162 or PSYC 163 with a grade of C- or better or consent of instructor. Provides hands-on experience in various research approaches in psychology. Involves in-class discussion of research design and methods as well as outside data collection. E. Child Development; F. Sensation And Perception; G. Social And Personality Psychology; H. Motor Behavior; J. Attention And Memory; K. Design And Implementation Of Experiment; M. Measuring And Training Cognition; N. Adult Development And Aging. Course is repeatable as content or topic changes to a maximum of 15 units.

PSYC 189 Advanced Topics in Psychology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PSYC 001, PSYC 002, PSYC 011, and PSYC 012 with grades of “C-” or better, or consent of instructor. Intensive study in psychology. Stresses literature, methodology, and experimental design and analysis. Specific course content varies. Course is repeatable as topics change to a maximum of 16 units.

PSYC 190 Special Studies 1 to 5 Prerequisite(s): upper-division standing with consent of instructor. Individual study under the direction of a faculty member. Course is repeatable to a maximum of 16 units.

PSYC 191A Seminar in Developmental Psychology Research 2 Seminar, 2 hours. Prerequisite(s): consent of instructor. Discussion of selected topics of research in developmental psychology. Some combination of readings, short written assignments, and oral presentation is required. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

PSYC 191B Seminar in Neuroscience Research 2 Seminar, 2 hours. Prerequisite(s): consent of instructor. Discussion of selected topics of research in neuroscience. Some combination of readings, short written assignments, and oral presentation is required. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

PSYC 191C Seminar in Personality Psychology Research 2 Seminar, 2 hours. Prerequisite(s): consent of instructor. Discussion of selected topics of research in personality psychology. Some combination of readings, short written assignments, and oral presentation is required. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

PSYC 191D Seminar in Social Psychology Research 2 Seminar, 2 hours. Prerequisite(s): consent of instructor. Discussion of selected topics of research in social psychology. Some combination of readings, short written assignments, and oral presentation is required. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

PSYC 191E Seminar in Cognitive Psychology Research 2 Seminar, 2 hours. Prerequisite(s): consent of instructor. Discussion of selected topics of research in cognitive psychology. Some combination of readings, short written assignments, and oral presentation is required. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

PSYC 194 Independent Reading 1 to 4 Prerequisite(s): upper-division standing with consent of instructor. Individual reading under faculty direction. Course is repeatable to a maximum of 4 units.

PSYC 195 Senior Thesis 1 to 4 Thesis, 3 to 12 hours. Prerequisite(s): senior standing in Psychology; consent of instructor. The student works with a faculty member to prepare a thesis based on independent research. Course is repeatable to a maximum of 12 units.

PSYC 195H Senior Honors Thesis 1 to 4 Term paper, 3 to 12 hours. Prerequisite(s): Restricted to class level standing of senior; Restricted to major(s) Psychology. Honors course corresponding to PSYC 195. The student will work independently with a faculty member preparing a thesis as a final phase of participation in the program. Satisfactory (S) or No Credit (NC) grading is not available. Course is repeatable to a maximum of 12 units.

PSYC 197 Research For Undergraduates 1 to 4 Individual research, 3 to 12 hours. Prerequisite(s): upper-division standing with consent of instructor. Directed original research. Graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned special projects. Course is repeatable.

PSYC 198 R’course: Variable Topics 1 Activity, 1 to 3 hours. Prerequisite(s): permission needed from department is required. An opportunity for UCR undergraduate students to develop leadership skills, innovate the undergraduate curriculum, and promote democratic, experiential education. Original course topics are variable and unique from other departmental course offerings, designed to highlight the student facilitators’ expertise while working closely with a faculty member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

PSYC 198G Group Internship in Psychology 2 to 5 Lecture, 1 hour; internship, 4 to 10 hours; written assignments, 2-4 hours. Prerequisite(s): PSYC 002 or consent of instructor. Supervised clinical experience in community settings such as mental health clinics, hospitals, and group homes. A written assignment such as a short research paper or a weekly journal is required. Enrollment is for 4 units; a rare exception may be made, in writing, by the instructor for 2, 3, or 5 units. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

PSYC 198H Junior Honors Research 2 Research, 6 hours. Prerequisite(s): junior standing in Psychology and admission to the Psychology Department Undergraduate Honors Program. Original research undertaken under the direction of individual faculty members. Satisfactory (S) or No Credit (NC) grading is not available. Course is repeatable to a maximum of 4 units.

PSYC 198I Individual Internship in Psychology 2 to 8 Internship, 4 to 16 hours; consultation, 1 hours; written work, 1 to 4 hours; individual study, 0 to 4 hours. Prerequisite(s): PSYC 001, PSYC 002, PSYC 011, and PSYC 012 with grades of “C-” or better; upper-division standing; consent of instructor. Individual internship in nonclinical psychology fieldwork. The student spends three hours per week in a prescribed combination of academic activities and internship for each unit of credit. Students keep a weekly log and write a summary of the internship experience. Students who complete additional assigned reading and submit a substantive term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 16 units.

PSYC 199 Senior Thesis Research 1 to 5 Research, 3 to 15 hours. Prerequisite(s): restricted to class level standing of senior; restricted to major(s) Psychology; and consent of instructor. Original research undertaken under the direction of individual faculty members. Psychology Department undergraduates may enroll for 2 units each quarter of their senior year except for the thesis-writing quarter. Course is repeatable to a maximum of 16 units. Credit is awarded for one of the following PSYC 199 or PSYC 199H.

PSYC 199H Senior Honors Research 1 to 5 Research, 3 to 15 hours. Prerequisite(s): restricted to class level standing of senior; restricted to major(s) Psychology; and consent of instructor. Original research undertaken under the direction of individual faculty members. Program participants must enroll for 2 units each quarter of their senior year except for the thesis-writing quarter. Course is repeatable as content or topic changes to a maximum of 16 units. Credit is awarded for one of the following PSYC 199 or PSYC 199H.
Graduate Courses

PSYC 200A Fundamentals of Neuroscience 3 Lecture, 3 hours. Prerequisite(s): graduate standing or consent of instructor. The fundamentals of neuroscience in molecular and cellular mechanisms, neural and hormonal systems, and neural control of behavior. Cross-listed with NRSC 200A.

PSYC 200B Fundamentals of Neuroscience 3 Lecture, 3 hours. Prerequisite(s): graduate standing or consent of instructor; NRSC 200A/PSYC 200A. The fundamentals of neuroscience in molecular and cellular mechanisms, neural and hormonal systems, and neural control of behavior. Cross-listed with NRSC 200B.

PSYC 200C Fundamentals of Neuroscience 3 Lecture, 3 hours. Prerequisite(s): graduate standing or consent of instructor; NRSC 200B/PSYC 200B. The fundamentals of neuroscience in molecular and cellular mechanisms, neural and hormonal systems, and neural control of behavior. Cross-listed with NRSC 200C.

PSYC 203A Experimental Psychology 3 Lecture, 3 hours. Prerequisite(s): graduate standing in Psychology or Neuroscience; or consent of instructor. Focuses on the history and philosophy of cognitive science. Covers the theories and models and gives an empirical overview of perception.

PSYC 203B Experimental Psychology 3 Lecture, 3 hours. Prerequisite(s): graduate standing in Psychology or Neuroscience; or consent of instructor. Covers the theories and models and gives an empirical overview of attention and memory.

PSYC 203C Experimental Psychology 3 Lecture, 3 hours. Prerequisite(s): graduate standing in Psychology or Neuroscience; or consent of instructor. Covers the theories and models and gives an empirical overview of higher level language and memory processes.

PSYC 207A Theories in Developmental Psychology 3 Lecture, 3 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing; or consent of instructor. A consideration of major issues and theories in the area of developmental psychology. Covers social learning theory, structural theories, sociobiology, and theories of personality development. Topics include life span models and plasticity of human behavior.

PSYC 207B Social Development 3 Lecture, 3 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing; or consent of instructor. Provides theoretical and empirical consideration of various topics in social development including attachment, aggression, dependence, cooperation, and competition. Also considers methodological issues appropriate to investigations of these phenomena.

PSYC 207C Processes of Cognitive Development 3 Lecture, 3 hours. Prerequisite(s): restricted to major(s) Biomedical Sciences, Psychology; graduate standing; or consent of instructor. Examines the cognitive changes in humans throughout the life cycle. Topics include Piagetian theory and memory, information processing, attention, and intelligence with a focus on the changes that occur in these skills.

PSYC 208 Research Methods in Development 3 Lecture, 3 hours. Prerequisite(s): PSYC 211; PSYC 212; restricted to major(s) Psychology; graduate standing; or consent of instructor. Develops skills in evaluating current research methodologies to answer developmental questions and in critically evaluating a variety of research methodologies currently in use. Topics include measurement of developmental dimensions and methods for assessing interrelations among developmental dimensions.

PSYC 210 Preparing Research Proposals in Psychology 3 Seminar, 3 hours; written work, 2 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing; or consent of instructor. Designed for advanced graduate psychology majors planning a research career. Focuses on funding opportunities for predoctoral research support. Topics include sources of grant support, mechanisms of grant support, and essentials of grant writing. Graded Satisfactory (S) or No Credit (NC).

PSYC 211 Introduction to Quantitative Methods in Psychology 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing; or consent of instructor. Examines basic issues related to the application of statistical inference, effect size estimation, and significance tests to various research paradigms in psychology. Discusses aspects of psychological measurement and the appropriateness of particular statistical techniques to different types of psychological data.

PSYC 212 Multiple Regression and Correlation Analysis 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): PSYC 211; restricted to major(s) Psychology; graduate standing; or consent of instructor. Covers multiple regression, the general linear model, their relationship to analysis of variance, and extensions to multivariate analysis. Also addresses the use of assorted computer statistical packages.

PSYC 213 Experimental Design and Analysis of Variance 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): PSYC 211, PSYC 212; restricted to major(s) Psychology; graduate standing; or consent of instructor. Covers experimental design and analysis of variance including repeated measures and mixed designs. Focuses on exploratory data analysis, nested designs, interactions, and contrasts.

PSYC 214 Latent Variable Analysis 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): PSYC 211, PSYC 212; restricted to major(s) Psychology; graduate standing; or consent of instructor. Covers latent variable models including principal component analysis, factor analysis, structural equation modeling, and related approaches. Also covers the use of statistical packages to fit exploratory and confirmatory latent variable models. Includes hands-on exercises to reinforce the application of the techniques to example data.

PSYC 225 Theories and Concepts of Social Psychology 3 Lecture, 3 hours. Prerequisite(s): restricted to major(s) Medical and Health Humanities, Psychology; graduate standing; or consent of instructor. Covers advanced theories and concepts of social psychology. Focuses on the history and development of the major concepts of the field. Required of all social-personality graduate majors.

PSYC 226 Theories and Concepts of Personality Psychology 3 Lecture, 3 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing; or consent of instructor. Explores advanced critical review of the theories, assessment techniques, and empirical literature in personality psychology. Focuses on the interactionist perspective. Required of all social-personality graduate majors.

PSYC 227 Research Methods in Social and Personality Psychology 3 Lecture, 3 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing; or consent of instructor. Covers laboratory and field research methods, personality and dependent variable measurement, research design, bias and artifacts, and meta-analysis. Also addresses interview and surveys, focus groups, research publication, and ethics.

PSYC 231 Mathematical and Computational Models in Cognitive Science 3 Lecture, 3 hours; extra reading, 1.5 hours; written work, 1.5 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing; or consent of instructor. Introduces the technical and theoretical issues involved in using models to understand behavior. Emphasizes hands-on analysis of model predictions and simulation of behavioral data. Must be taken with different instructors to receive repeat credit. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 9 units.

PSYC 233 Research Methods in Cognitive Science 3 Lecture, 3 hours. Prerequisite(s): restricted to major(s) Biomedical Sciences, Psychology; graduate standing; or consent of instructor. Develops skills in various research methodologies currently available to cognitive scientists Emphasizes critically examining assumptions of methods and current research utilizing each method and on how each is being utilized to address theoretical and empirical questions. Must be taken with different instructors to repeat for credit. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 9 units.
PSYC 234 Data Analysis in Cognitive Sciences 3 Lecture, 3 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing or consent of instructor. Focuses on the analysis of cognitive psychological data obtained using specialized methodologies particularly relevant to cognitive psychology research including computer simulation, online experimentation, and eye tracking. Topics include real-time data analysis, signal detecting theory, Fourier analysis, and reaction time data. Must be taken with different instructors to receive repeat credit. Course is repeatable to a maximum of 9 units.

PSYC 243 Topics in Multivariate Statistics 3 Lecture, 3 hours; laboratory, 1 hour. Prerequisite(s): PSYC 211, PSYC 212; PSYC 213 or PSYC 214; restricted to major(s) Management, Psychology; graduate standing or consent of instructor. A study of selected advanced topics in quantitative methods specifically for behavioral research (especially multivariate analysis). Focuses on the theoretical and practical applications of quantitative methods. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as content or topic changes.

PSYC 251 Seminar in Cognitive Neuroscience 3 Seminar, 3 hours. Prerequisite(s): restricted to major(s) Medical and Health Humanities, Psychology; graduate standing or consent of instructor. Consists of seminars, oral reports, and discussions by students, faculty, and visiting scholars on current trends in cognitive neuroscience. Focuses on a memory phenomenon. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PSYC 255 Seminar in Social Psychology 3 Seminar, 3 hours. Prerequisite(s): restricted to major(s) Medical and Health Humanities, Psychology; graduate standing or consent of instructor. Selected advanced topics in social psychology. Course content will vary. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PSYC 256 Seminar in Perception 3 Seminar, 3 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing or consent of instructor. Promotes study and discussion of experimental papers in relation to the theory of perceptual processes. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PSYC 257 Seminar in Personality Psychology 3 Seminar, 3 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing or consent of instructor. SELECTED ADVANCED TOPICS IN PERSONALITY EMPHASIZING EXPERIMENTAL FINDINGS AND THEORETICAL INTERPRETATIONS. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PSYC 258 Seminar in Developmental Psychology 3 Seminar, 3 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing or consent of instructor. SELECTED ADVANCED TOPICS IN DEVELOPMENTAL PSYCHOLOGY. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PSYC 259 Topics in Quantitative Methods 3 Lecture, 3 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing or consent of instructor. A study of selected advanced topics in quantitative methods specifically for behavioral research (especially multivariate analysis). Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PSYC 262 Developmental Biopsychology 3 Lecture, 3 hours. Prerequisite(s): restricted to major(s) Medical and Health Humanities, Psychology; graduate standing or consent of instructor. Covers basic processes of brain development and plasticity from conception to adulthood. Emphasizes relationships between biological and psychological phenomena such as sensation, perception, and learning. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) No Credit (NC) grade.

PSYC 263 Seminar in Behavioral Neuroscience 3 Seminar, 3 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing or consent of instructor. Consists of readings, oral reports, and discussions by students, faculty, and visiting scholars of selected areas in behavioral neuroscience. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 36 units.

PSYC 265 Auditory Neuroscience 3 Seminar, 3 hours. Prerequisite(s): NRSC 200C or PSYC 200C; restricted to major(s) Neuroscience, Psychology; graduate standing or consent of instructor. Studies ways in which the mammalian auditory system is organized and functions. Focuses on aspects of auditory physiology that give rise to auditory perceptions. Emphasizes the use of the auditory system to understand principles of sensory system organization and to compare and contrast different sensory modalities.

PSYC 270 Current Research in Quantitative Psychology 2 Seminar, 2 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing or consent of instructor. Discusses selected research topics in quantitative psychology. Emphasizes contemporary research design and quantitative problems relevant to the ongoing research areas of graduate students and faculty. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

PSYC 271 Current Issues in Cognition 3 Seminar, 3 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing or consent of instructor. Examines current issues in memory, learning, and psycholinguistics. Emphasizes recent and important experimental findings and theoretical development. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PSYC 276 Intro to Neuroimaging With MRI 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Focuses on the use of magnetic resonance imaging (MRI) in the study of the brain. Topics include structural imaging, functional imaging, diffusion tensor imaging, and brain connectivity. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with BIEN 276.

PSYC 283 Proseminar On Current Research in Cognitive Psychology 1 Seminar, 1 hour; written work, 4 hours per quarter; extra reading, 1 to 3 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing or consent of instructor. Presentations by students, departmental faculty, and visiting scholars describing current research in cognitive psychology. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 15 units.

PSYC 284 Proseminar On Current Research in Developmental Psychology 1 Seminar, 1 hour; written work, 4 hours per quarter; extra reading, 1 to 3 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing or consent of instructor. Presentations by students, departmental faculty, and visiting scholars describing current research in developmental psychology. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 15 units.

PSYC 285 Proseminar On Current Research in Social/Personality Psychology 1 Seminar, 1 hour; written work, 4 hours per quarter; extra reading, 1 to 3 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing or consent of instructor. Presentations by students, departmental faculty, and visiting scholars describing current research in social/personality psychology. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 15 units.

PSYC 286 (E-Z) Proseminar in Psychology 1 Seminar, 9 hours; extra reading, 18 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing or consent of instructor. Covers selected advanced topics in Psychology. Content of each segment varies. See individual segments for descriptions. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 15 units.

PSYC 286E Proseminar in Diversity and Inequality 1 Seminar, 9 hours per quarter; extra reading, 18 hours per quarter. Prerequisite(s): restricted to major(s) Psychology; graduate standing or consent of instructor. Discusses assigned readings on the study of diversity and inequality through the lens of psychology and related disciplines. Includes presentations by students, faculty, and visiting scholars describing current research in diversity and inequality. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 15 units.

PSYC 286F Proseminar in Health and Well Being 1 Seminar, 9 hours; extra reading, 18 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing or consent of instructor. Discusses assigned readings on the study of health and well-being through the lens of psychology and related disciplines. Includes presentations by students, faculty, and visiting scholars describing current research in health and well-being. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 15 units.
PSYC 287 Colloquium in Neuroscience 1
Colloquium, 1 hour. Prerequisite(s): restricted to major(s) Neuroscience, Psychology; graduate standing; or consent of instructor. Involves oral presentations on current research topics in neuroscience by visiting scholars, faculty, and students. Graded Satisfactory (S) or No Credit (NC). Course is repeatable. Cross-listed with NRSC 287.

PSYC 289 Special Topics in Neuroscience 2
Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. An interdisciplinary seminar consisting of student presentations and discussion of selected topics in neuroscience. Content and instructor(s) vary each time course is offered. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. Cross-listed with BCH 289, BIOL 289, CHEM 289, ENTM 289, and NRSC 289.

PSYC 290 Directed Studies 1 to 6
Research, 3 to 18 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing; or consent of instructor. Advanced work in a topic or topics appropriate to the student’s special interests and needs. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PSYC 291 Individual Study in Coordinated Areas 1 to 6
Research, 3 to 18 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing; or consent of instructor. A program of study designed to advise and assist candidates who are preparing for doctoral examinations. Units do not count toward the Master’s Degree. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PSYC 292 Concurrent Analytical Studies 1 to 6
Research, 3 to 12 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing; or consent of instructor. Each 292 course will be taken concurrently with a 100-series course, but on an individual basis. It will be devoted to specific additional projects related to the 100-series course. Faculty guidance and evaluation will be provided through the quarter. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PSYC 296 Research Tutorial 3
Research, 6 hours; extra reading, 3 hours; written work, 3 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing; or consent of instructor. Research performed under the supervision of a faculty advisor. Course is repeatable to a maximum of 18 units.

PSYC 297 Directed Research 1 to 6
Research, 3 to 18 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing; or consent of instructor. Minor research studies or exploratory work toward the development of the dissertation problem. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PSYC 299 Research For Thesis Or Dissertation 1 to 12
Thesis, 3 to 36 hours. Prerequisite(s): restricted to major(s) Psychology; graduate standing; or consent of instructor. Research for thesis or dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses
PSYC 301 Teaching Psychology at the College Level 2 Seminar, 1 hour; practicum, 3 hours. Prerequisite(s): admission to graduate standing in Psychology Teaching Assistant Development Program offered by the Teaching Assistant Development Office of the Graduate Division. Required prior to or concurrent with the student’s first teaching assistant appointment. May be waived by petition based on previous experience. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PSYC 309A Professional Development and Research Ethics For Early Career Graduate Students 3 Seminar, 3 hours. Prerequisite(s): graduate standing in Psychology. Designed for beginning graduate students planning an academic or research career in psychology. Includes transition to graduate school, setting career goals, time management, professional and research ethics, scientific writing and publication, preparation of fellowship applications, and oral presentation skills. Graded Satisfactory (S) or No Credit (NC).

PSYC 309B Professional Development 3 Seminar, 3 hours. Prerequisite(s): graduate standing in Psychology. Designed for advanced graduate students planning a teaching and/or research career in psychology. Covers teaching conducting research; interviewing, writing, and oral presentation skills; the academic job market and the job application process; and nonacademic careers. Graded Satisfactory (S) or No Credit (NC).

Public Policy
Subject abbreviation: PBPL

School of Public Policy
School of Public Policy
Mark Long, MPP, Ph.D., Dean
Bruce Babcock, Ph.D., Associate Dean
Program Office, INTS 4146
(951) 827-5663;
sppp.ucr.edu

Major
Public policy analysis is the use of decision-making theory and evidence-based methods to the study of substantive public policy problems. The objective of public policy analysis is to improve the quality of public policy-making by critically examining the design and relevance of public policies, their implementation and execution, and their impact on households, communities, and the society at large. By its very nature, policy analysis is multidisciplinary. For instance, policies to address health problems in society must draw on developments in philosophy, economics, political science, medicine, and ethics (among other disciplines).

Career Opportunities
A degree in public policy equips students to go into a range of different careers. Examples include working as a policy analyst for local, regional, state, or national government agencies; a governmental or public relations officer for a private sector firm; an employee of a public advocacy group; or as a leader of a community-based, non-profit organization.

University Requirements
See Undergraduate Studies section.

College Requirements
See School of Public Policy section.

Major Requirements
The major requirements for the B.A. degree in Public Policy are as follows:

1. Lower-division requirements (six courses [at least 24 units])
   a) PBPL 001
   b) PBPL 002
   c) ECON 003
   d) PBPL 004
   e) Math 004
   f) One course from CS 005 or CS 009A

2. Upper-division requirements
   a) Upper Division Core (3 courses required (at least 12 units)
      PBPL 100A, PBPL 100B, PBPL 101
   b) Upper Division Electives (8 courses required (at least 32 units)
      PBPL 102, PBPL 103, PBPL 127, PBPL 130, PBPL 132, PBPL 150, PBPL 155, PBPL 157,
      PBPL 160, PBPL 162, PBPL 164, PBPL 167, PBPL 170, PBPL 171, PBPL 172, PBPL 180,
      PBPL 182, PBPL 185, PBPL 186

3. Public Policy Seminar/Colloquia
   During the junior and senior years, students must enroll in PBPL 191 (Seminar in Public Policy), which includes attendance at public lectures to the campus community given by outside speakers — typically policy makers, administrators and researchers — on timely and important policy issues facing the Inland Empire, the state, the nation, and the world.

4. Domestic or International Policy Practicum
   In the third or fourth year of the program (or during the summer between the third and fourth years), students must undertake a policy practicum (PBPL 198-I), which consists of an internship (paid or voluntary) on a policy issue or problem with a local, state or federal government agency, nonprofit or for-profit organization, a trade association, a labor/union, or a public-affairs firm. The Public Policy Program Committee helps students locate internship opportunities. The internship provides students with an opportunity to gain real-world experience and apply the analytical skills learned in the classroom. Students enrolled in the UC Washington Center (UCDC) and UC Center Sacramento (UCCS) programs or the Education Abroad Program can apply that experience toward the policy practicum requirement, and do not need to undertake a separate internship.
5. **Senior Thesis (for Honors candidates only)**

Students who have an outstanding academic record in their course work during the first three years of the program can become candidates for Honors in Public Policy during the spring quarter of their junior year. All honors candidates must enroll in a two-quarter senior thesis seminar (PBPL 195H) that will culminate in a written thesis covering a real policy problem of the student’s choice. The thesis project could grow out of the practicum experience.

**Minor**

1. **Lower-division requirements**
   - (three courses [at least 12 units])
     - a) PBPL 001
     - b) PBPL 002
     - c) PBPL 004

2. **Upper-division requirements**
   - a) Upper Division Core
     - PBPL 100A
   - b) Upper Division Electives (5 courses required [at least 20 units])
     - PBPL 100B, PBPL101, PBPL102, PBPL 103, PBPL 127, PBPL 130, PBPL 132, PBPL 150, PBPL 155, PBPL 157, PBPL 160, PBPL 162, PBPL 164, PBPL 167, PBPL 170, PBPL 171, PBPL 172, PBPL 180, PBPL 182, PBPL 185, PBPL 186

3. **Public Policy Seminar/Colloquia**

During the junior and senior years, students must enroll in PBPL 191 (Seminar in Public Policy), which includes attendance at public lectures to the campus community by outside speakers — typically policy makers, administrators and researchers — on timely and important policy issues facing the Inland Empire, the state, the nation, and the world.

**Combined B.A. + M.P.P. Five-Year Program**

The School of Public Policy offers a combined B.A. + M.P.P. program in public policy, designed to lead to a Bachelor of Arts degree as well as a Master of Public Policy degree in five years. The coursework for the new program will be the same as that for the existing BA and MPP programs. Only students who are public policy majors with a cumulative GPA at least 3.0 overall and 3.3 in the major (upper division classes only, with a minimum of 16 units of these courses to be completed by the end of spring quarter of the senior year) are eligible to apply for this program before the end of their junior year. Students in the B.A. + M.P.P. program are allowed to count up to 12 units of MPP elective courses toward the upper-division track classes required for the BA program. Applicants to the combined program must include a statement of interest, indicating why the student is interested in an M.P.P. degree and how prior academic and work experience has prepared the student an M.P.P. degree, and a minimum of two recommendation letters from UCR faculty members, at least one of whom must be a faculty member in the School of Public Policy. The GRE requirement will be waived for these applicants.

**Graduate Program**

The School of Public Policy offers the Master of Public Policy (MPP) program leading to a Master’s degree in public policy.

**Admissions Requirements**

Applications for the MPP program, which is housed within the UCR School of Public Policy, are accepted for fall entry. Applicants must have completed a bachelor’s degree or an approved equivalent from an accredited institution, and must have successfully taken courses in microeconomics, statistics, and an introduction to politics and government, or their equivalent during their undergraduate study. Applicants whose first language is not English are required to submit acceptable scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). Additionally, each applicant must submit three letters of recommendation, at least one letter of recommendation must be an academic reference and any others can reflect work or internship experience. All other application requirements are specified in the graduate application.

**Program of Study**

The MPP program consists of 72 units of graduate courses. The curriculum consists of 10 required core courses, a required capstone research project spanning two quarters (which substitutes for a final examination), and a total of six elective courses.

Students entering the MPP program from the Graduate Preparatory Program in Public Policy (GPP-PP) from University Extension will complete 36 units. Of the 36 units, 24 units are required:

- PBPL 202
- PBPL 216
- PBPL 220
- PBPL 289A
- PBPL 289B
- PBPL 298I

The balance of the 12 units will include courses from the elective areas.

1. **Core Courses**
   - a) *The Policy Process (3 courses)*: PBPL 200, PBPL 202, PBPL 206
   - b) *Policy Methods (4 courses)*: PBPL 210, PBPL 212, PBPL 214, PBPL 216
   - c) *Institutional Context (2 courses)*: PBPL 220, PBPL 222
   - d) *Internship*: PBPL 298I

2. **Elective Courses**

Students are required to complete 6 courses from the selection below. The elective courses can be chosen from the list of courses in sections A – G. Additional courses can be approved with the consent of the graduate advisor.

- a) Environmental and Resource Policy: PBPL 233, PBPL 241, PBPL 245
- b) Health Policy: PBPL 230F
- c) Education Policy: PBPL 260/EDUC 209, PBPL 261, PBPL 262
- d) Urban Policy: PBPL 235, PBPL 236E, PBPL 252, PBPL 266, PBPL 273
- e) Inequality and Poverty: PBPL 234
- f) Race and Immigration Policy: PBPL 270E, PBPL 270F, PBPL 271, PBPL 272
- g) Additional Elective Courses: PBPL 204, PBPL 224, PBPL 255, PBPL 264, PBPL 265, PBPL 280, PBPL 290

**Capstone Research Project**

Students must complete a capstone research project in the second year of the program.

- a) PBPL 289A, PBPL 289B

**Normative Time to Degree**

Two years

**Lower-Division Courses**

**PBPL 001 Introduction to Public Policy Analysis**

- Lecture, 3 hours; discussion, 1 hour. Introduces the basic concepts and processes underlying policy analysis. Includes application of these concepts to economic and budgetary policy, health care policy, welfare and social security policy, education policy, and environmental and energy policy.

**PBPL 002 Politics and Public Policy 4**

- Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to the political institutions and processes that govern public policy in the United States and the tools and techniques used in public policy analysis. Part I presents policymaking models and methods of policy analysis. Part II applies these concepts to specific policy areas, illustrated by real-world case studies.

**PBPL 004 Ethics, Professionalism, and Public Policy 4**

- Lecture, 3 hours; discussion, 1 hour. Introduces the field of public health as a multidisciplinary area of research and practice. Provides an appreciation of its approaches, goals, and history. Surveys its many conceptual and methodological tools for addressing a range of health issues.

**PBPL 006 Introduction to Geographic Information Systems 4**

- Lecture, 3 hours; discussion, 1 hour. Provides an introduction to the fundamental concepts of Geographic Information Systems (GIS), Geographic Information Science (GlScience), and their application to public policy and social science research. Also covers the use of geographic data and software in public policy and related practice.

**PBPL 090 Special Studies 1 to 3**

- Individual Study, 3 to 9 hours. Prerequisite(s): consent of program chair. Individual study, directed by a faculty member, to meet special curricular needs. Course is repeatable to a maximum of 8 units.
Upper-Division Courses

PBPL 100A Data Analysis For Public Policy 1 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): PBPL 001 with a grade of C- or better; CS 009A with a grade of C- or better; restricted to class level standing of junior, or senior; or consent of instructor. Introduction to data input, output, and calculation of key summary statistics. Explores concepts of correlation, measurement, and the requirements for establishing causality. Covers regression analysis, the normal distribution, and the law of large numbers.

PBPL 100B Data Analysis For Public Policy 2 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): PBPL 100A with a grade of C- or better; restricted to class level standing of junior, or senior; or consent of instructor. Introduction to the concept of sampling uncertainty and hypothesis testing required to establish causal inference. Explores inclusion of control variables in a multiple regression framework and why data generated from natural experiments and randomized control trials are valuable to policy analysts.

PBPL 101 Case Studies in Public Policy 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ECON 003 with a grade of C- or better or ECON 003H; PBPL 002 with a grade of C- or better; STAT 004 or STAT 008 or POSC 114 or POSC 114S or ECON 101 or PSYC 011 or SOC 005 or STAT 010. Explores one or more policy issues in depth. Includes transportation, crime, immigration, healthcare, poverty, inequality, social policy, environment, and natural resources. Involves training in social science and public policy methods including case studies, surveys, experiments, and others. Course topics vary reflecting faculty expertise.

PBPL 102 Borderline Immigration Policies and Community Change Processes 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces experiences of immigrants in the southwest borderland region of the U.S. Immigration history, trends, and legislation are critical components to the course. Examine immigration policy impact on economic and health indicators as well as the family system. Examine a range of change strategies used to empower the immigrant community.

PBPL 103 Economic Development Policy 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Provide a broad overview of theories and models of urban growth and economic development, as well as the strategies and practices in implementing different strategies. Identifies the challenges of developing regions, cities and communities that are economically dynamic, socially equitable and environmentally sustainable.

PBPL 127 Sociological Determinants of Health 4 Lecture; 3 hours; discussion; 1 hour; extra reading; 5 hours; research; 3 hours. Prerequisite(s): SOC 001 with a grade of C- or better or SOC 001H with a grade of C- or better; or consent of instructor. Introduces the role that social factors play in shaping the occurrence and distribution of disease and death in populations with an emphasis on socioeconomic status, racism, social relationships and social stress. A particular emphasis is placed on sociological origins of health inequalities. Cross-listed with SOC 127.

PBPL 130 Management of International Water 4 Lecture, 3 hours; research; 3 hours. Prerequisite(s): PBPL 100A with a grade of C- or better; restricted to class level standing of junior, or senior. Introduction to the complexities of water resource management, economics, and policy in California, and comparison to other states and countries. Examines the California water sector, its problems, and approaches used to address them. Explores contemporary water issues and policy interventions that have been attempted, with resulting efficiency and equity.

PBPL 132 Water Economics, Management and Policy: California and Beyond 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Introduction to the complexities of water resource economics, management and policy in California, and comparison to other states and countries. Examines the California water sector, its problems, and approaches used to address them. Explores contemporary water issues and policy interventions that have been attempted, with resulting efficiency and equity.

PBPL 150 Exploring Urban Communities Using Geographic Information System 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): PBPL 010 with a grade of C- or better; restricted to class level standing of junior, or senior. Analyzes the spatial structure of cities for a range of socioeconomic issues such as demographic changes, affordable housing, and economic development. Utilizes up-to-date geographic information systems (GIS) techniques to gain hands-on learning experiences with the core theories in urban geography and their policy applications in both U.S. and international contexts.

PBPL 155 Women’s Labor and the Economy 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A. A special-topics based labor economics course. Focuses on one important dimension of worker differences: gender. Covers the topics of human capital, wages and employment, occupational choice, discrimination, the family as an economic unit, and public policy. Cross-listed with ECON 155, and GSST 155.

PBPL 157 Labor in the Public Sector 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A. A labor economics course on employment in the public sector. Explores questions of wages and contract structuring, recruitment, training, risk, collective bargaining, licensing, rent-seeking and corruption, and influence in the public sector. Cross-listed with ECON 157.

PBPL 160 Immigrant Health and Wellbeing 4 Lecture, 3 hours; individual study, 2 hours; term paper, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior. Introduction to community-engaged methods in health disparities research. Examines health disparities and social determinants of health and conducts in-depth examination of community engaged research methods. Provides theoretical principles, methods, and skills needed to plan and implement community-engaged research.

PBPL 162 Health in All Policies 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PBPL 001 with a grade of C- or better or SOC 001 with a grade of C- or better or SOC 001H with a grade of B or better; restricted to class level standing of junior, or senior. Explores social influences on health and the role that public policies play in shaping the social determinants of health. Examines the link between social circumstances (socioeconomics, race, ethnicity, environment) and health outcomes. Identifies connections and considers whether and to what extent public policy mitigates harmful influences or stimulates positive outcomes.

PBPL 164 Social Innovation in Theory and Practice 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Introduction to theories and practices associated with social innovation and public policy. Explores key concepts and debates in the field of social innovation including social entrepreneurship, systems approaches, and design thinking. Evaluates practices of social innovation through case studies and applications to policy and civic engagement.

PBPL 167 Medical Sociology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Introduces key concepts and theories in medical sociology and their application to a variety of health issues. Exemplar topics include social construction of health and illness, medicalization, stigma and labeling, patient-provider interaction, sociology of medical professionals, social determinants of health, and political economy of health. Cross-listed with SOC 167.

PBPL 170 Technology, Policy, and Ethics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing. Provides contemporary perspectives on interplays between technology, public policy, and ethics. Covers social, legal, and ethical issues such as liability, as well as environmental, patent, and copyright law. Cross-listed with ENGR 170.

PBPL 171 Globalization 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): junior standing. Covers technological drivers of globalization. Includes social, economic, and political consequences. Explores the cultural aspects of globalization, including barriers and drivers for economic and cultural interdependence and integration, as well as virtual global organizations. Cross-listed with ENGR 171.
disparities in policing outcomes.

Evaluates the study of race and policing to explore the evidence of racial bias in the work, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior. Explores various topics of public policy within the instructor’s area of specialization. Course is repeatable as content or topic changes to a maximum of 12 units.

PBPL 182 Urban Problems 4 Lecture, 3 hours; discussion, 1 hour; term paper, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior. An interdisciplinary examination of selected urban problems such as civil disorders, transportation, housing, welfare, and planning. Cross-listed with SOC 182, and URST 182.

PBPL 185 Race and Law Enforcement 4 Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Explores the role of race and ethnicity in the historical and contemporary practice of United States law enforcement. Evaluates the study of race and policing to explore the evidence of racial bias in the application of police tactics and uncover evidence-based methods for reducing racial disparities in policing outcomes.

PBPL 186 Policy Evaluation in Development Economics 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): ECON 003 or ECON 003H, or consent of instructor. An overview of randomized impact evaluation as a tool of the causal revolution in development economics. Introduces experimental methods and covers the application of those methods to conducting impact evaluations in a range of development settings including education, health, labor, and economics of the firm, microfinance, environment, and political economy. Cross-listed with ECON 186.

PBPL 190 Special Studies 1 to 5 Individual Study, 3 to 15 hours. Prerequisite(s): consent of program chair. Individual study, directed by a faculty member, to meet special curricular needs. Course is repeatable to a maximum of 15 units.

PBPL 191 Seminar in Public Policy 2 Seminar, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Seminars by faculty, invited policy scholars, and policy makers on timely policy issues facing the region, state, nation, and the world, such as economic and budgetary policy, health care policy, welfare and social security policy, education policy, environmental and energy policy, and foreign policy. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

PBPL 195H Senior Honors Thesis 1 to 4 Thesis, 3 to 12 hours. Prerequisite(s): senior standing in Public Policy; admission to University Honors or consent of instructor. Students complete research in public policy and write a senior honors thesis under the guidance of a faculty member. Satisfactory (S) or No Credit (NC) grading is not available. Course is repeatable to a maximum of 12 units.

PBPL 197 Research For Undergraduates 1 to 4 Consultation, 1 to 4 hours; research, 1 to 4 hours. Prerequisite(s): BUS 115 or PSYC 011 or SOC 005 or STAT 004 or STAT 008 or STAT 155. Examines community activities and legislative processes in the region and the state. Includes designing and shaping research to address community needs and objectives; planning and performing applied research using quantitative, qualitative, and mixed methods; and developing writing and oral communication skills. Course is repeatable to a maximum of 8 units.

PBPL 198 Individual Internship in Public Policy 1 to 12 Written Work, 1 to 12 hours. Prerequisite(s): junior standing in Public Policy; consent of instructor. Internship in a public or quasi-public agency or business concern in matters relating to public policy. Course is repeatable to a maximum of 16 units.

Graduate Courses

PBPL 200 Introduction to Policy Analysis 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Studies the process by which policy decisions are made. Focuses on the analytical tools (benefit-cost, cost effectiveness, decision tree, and optimization analysis) that are used to choose among competing proposals as well as the analytical motivations for choice.

PBPL 202 Policy Institutions and Processes 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Explores the various institutions in a country that shape, formulate, implement, and enforce policy as well as the manner in which these institutions make or influence policy. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 204 Regional Policy-Making Across Administrative Jurisdictions 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Introduction to the analytical tools used in regional policy analysis as well as to the processes of policy development, implementation, and evaluation. Includes analysis of case studies of councils of government and other regional bodies that have emerged or been created to provide regional governance. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 206 State Governments as Laboratories of Change 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Examines the politics, institutions, and policy processes of state governments and assesses the extent to which variation in state political institutions shapes politics and policies across states. Substantive topics include health care, education, corrections, economic development, land use planning, environmental protection, and social welfare. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 210 Quantitative Methods For Public Policy Analysis 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Provides students with the ability to understand and evaluate policy information obtained through quantitative research methods and to employ these methods in their own research. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 212 Qualitative Social Science Methods 4 Lecture, 3 hours; extra reading, 1.5 hours; research, 1.5 hours. Prerequisite(s): graduate standing; or consent of instructor. Introduces the qualitative methods widely used in the social sciences and their use in analyzing policy formulation, policy implementation, and policy effects. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 214 Applied Microeconomics For Public Policy 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Shows how economic analysis impacts public policy issues. Identifies the relevant economic analyses to address various public policy problems and to comprehend and assess what professional economists can contribute to the shaping, implementation, and evaluation of public policies. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 216 Public Leadership and Management 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Introduction to the basic principles and practices of leadership suitable for local, regional, national, and global/international settings. Also assists in developing the capacity to be a public leader. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 220 Policy Evaluation 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Introduces statistical methods for policy evaluation covering process evaluation and impact evaluation. Topics include randomized control trials, regression and matching, difference in differences, and regression discontinuity design. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.
PBPL 222 Ethics, Professionalism, and the Normative Bases of Public Policies 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Examines the normative bases of public policies - in other words, the extent to which issues of fairness, social justice, and morality should factor into the choice of public policies. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 224 Global-Local Policy Connections: Case Studies in Poverty, Water, and Sustainable Development 4 Lecture, 3 hours; extra reading, 1.5 hours; research, 1.5 hours. Prerequisite(s): graduate standing or consent of instructor. Illustrates how the United States can learn from the successful policy experiences of other countries, and vice versa. Explores global experiences in four topical areas including poverty, environment, urbanism, and health. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 230 (E-Z) Topics in Health Policy 4 Prerequisite(s): graduate standing. Topics related to health policy. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 230F Public Policy and Health 4 Seminar, 3 hours; term paper, 1 hour; extra Reading, 1 hour; research, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Introduces multiple public policy domains - housing, environment, immigration and others - affect the health of populations. It follows that as public policy is the developed the health of populations is influenced. Students learn how public policy initiatives in multiple domains can be leveraged to improve population health. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 233 Environmental Economics and Policy 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Theory and practice of environmental economics and its application to environmental policymaking. Applies tools of economic theory to problems of managing natural resources and environmental quality, with particular emphasis on externalities, sustainability, pollution control, resource extraction, and environmental valuation. Alternative public policy instruments for environmental management are considered and evaluated. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for one of the following PBPL 233 or ECON 226.

PBPL 234 Poverty in Global Perspective 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Interdisciplinary and international view of the social sciences of poverty. Topics include causes, consequences, and potential solutions to poverty. Compares different social science methodologies and theories. Evaluates and debates relevant social policies. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 235 Economic Development in United States Cities 4 Lecture, 3 hours; extra reading, 1.5 hours; term paper, 1.5 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces theories and models of urban growth and economic development. Analyzes and evaluates the strategies and practices in implementing these theories and models. Examines the challenges of developing regions, cities, and communities that are economically dynamic, socially equitable, and environmentally sustainable. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 236E (E-Z) Urban and Spatial Analyses 4 Prerequisite(s): graduate standing. Topics related to urban and spatial analyses. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 236E United States Census Data and Policy Studies 4 Seminar, 3 hours; term paper, 1 hour; research, 1 hour; extra reading, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Addresses in depth the census data as the primary resource for analyzing local and regional changes, especially in urban settings. Substantive topics include, but not limited to, immigration, racial and ethnic change, employment, health, and poverty issues. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 241 Climate Change Policy 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Introduction to Climate Change policy at the local, regional, national and global levels. Examines the various policies and policy making organizations surrounding the issue of Climate Change. Includes channels for disseminating Climate Change Policy, as well as, specific gendered, ethnic, class and racial dynamics of policy creation. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 245 Comparative Global Water Policy 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Covers issues and problems faced by developing and industrialized countries. Compares and analyzes the debate about efficiency vs. equity and protection of the environment, prices vs. quotas, water as a public good, economic good or social good, and adaptation in the water sector to climate change. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 246 Agricultural and Food Policy 4 Seminar, 3 hours; written work, 2 hours; extra reading, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Focuses on the application of economic principles and data analysis to analyze current public policy issues affecting U.S. and world food systems and agricultural sectors. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 252 Crime Mapping Analysis 4 Lecture, 3 hours; laboratory, 1 hour; research, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Covers crime mapping and crime analysis including the systematic application of geovisualization tools combined with statistical, geometric, and spatial analysis. Explores the distribution of criminal events in both space and time, the efficiency and efficacy of police services, and the interactions of offenders and targets.

PBPL 255 Mapping For the Common Good 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Provides a theoretical and technical understanding of maps, spatial data, and geovisualization. Highlights how geographic information technologies and spatial reasoning skills impact our understanding of the world. Explores how spatial data and mapping can develop strategies, plans, and policies to improve the quality of life for communities and their citizens. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 260 Education Policy Analysis 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines major issues and reform movements in public education that are at the forefront of the national policy agenda today. Views each educational reform issue in light of its connection to four themes driving reform efforts: (1) equity, (2) adequacy, (3) autonomy, and (4) accountability. Credit is awarded for one of the following PBPL 260 or EDUC 209.

PBPL 261 Higher Education Policy 4 Seminar, 3 hours; extra reading, 2 hours; research, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Provides an advanced introduction to higher education policy and policymaking. Begins with theories of power and how they relate to higher education policy. Examines process models of policy making. Considers five areas of higher education policymaking: science policy, competitiveness policy, student aid policy, access and completion policy, and accountability policy. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 262 Economics in Higher Education 4 Seminar, 3 hours; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Examines the economics of higher education from two perspectives. First, it examines the debate on why college costs have escalated, how that affects access, and what might be done. Second, it looks inside universities, where their money comes from, the debate over budgeting systems, and means of managing costs internally. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.
PBPL 264 Methods in Health Disparities Research: An Introduction to Community Engaged Research 4 Seminar, 3 hours; individual study, 2 hours; term paper, 1 hour. Prerequisite(s): PBPL 230F or SOC 288; graduate standing; or consent of instructor. Introduction to community-engaged methods in health disparities research. Examines health disparities and social determinants of health and conducts in-depth examination of community-engaged research methods. Provides theoretical, principles, methods, and skills needed to plan and implement community-engaged research.

PBPL 265 Advanced Methods in Health Disparities Research: An Application of Community Engaged Research 4 Lecture, 1 hour; research, 6 hours; term paper, 3 hours. Prerequisite(s): PBPL 264; graduate standing; or consent of instructor. Advanced course in the application of community-engaged methods in health disparities research. Provides students with hands-on experience to plan and implement community-engaged health disparities research as an independent scholar. Course is repeatable to a maximum of 12 units.

PBPL 266 Transportation Policy 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Introduces transportation planning, finance, and policymaking focusing on policies and practices in the United States. Discusses the interaction of transportation, land use, pricing, finance, and project evaluation. Includes a discussion of transportation equity, transportation technology, and the intersection of transportation and public health. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 270 (E-Z) Topics in Immigration Policy 4 Prerequisite(s): graduate standing. Topics related to immigration policy. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 270E General Perspectives On Immigration Policy 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Introduction to a global and comparative perspective on immigration policy, with a special focus as it applies to the United States. Focus on debates over the political rights of immigrants, immigration enforcement, unauthorized migration, economic migration, family migration, refugee flows, citizenship, social integration, and political participation. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 270F Borderland Policies and Community Processes 4 Seminar, 3 hours; term paper, 1 hour; research, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces the experiences of immigrants in the southwest borderland region of the U.S. Explores immigration history, trends, and legislation. Examines the immigration policy impact on economic and health indicators as well as the family systems and dynamics. Attention to change strategies used to empower the immigrant community. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 271 Racial Inequality in Politics and Policy 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Politics and policy of race and social inequality in the United States. Topics include disparities in health, education, income, wealth, and civic engagement. Students gain an understanding of the history of racial inequality, including its changes over time, and the efficacy of contemporary solutions to address ongoing racial disparities. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 272 Policy and Politics in California 4 Lecture, 3 hours, discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Introduction to politics and policy in California, paying particular attention to the nature of American federalism, institutions of state government, direct democracy, the role of partisanship and demographic diversity, and various problems of governance as they relate to issues at the state and local levels. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 273 Geographic Information Systems For Public Policy 4 Lecture, 4 hours. Prerequisite(s): graduate standing or consent of instructor. Introduction to geographic information systems (GIS), spatial data and applications of spatial analysis in the social sciences and public policy. Theoretical, technical, and policy dimensions of GIS in policy settings. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 274 Social Innovation in Theory and Practice 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Introduces the theories and practices associated with social innovation and public policy. Explores key concepts and debates that include discussions about social entrepreneurship, systems approaches, and design thinking. Follows with practices of social innovation including case studies at varying levels and applications specific to public policy areas. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 280 Special Topics in Public Policy 4 Seminar, 4 hours. Prerequisite(s): graduate standing; or consent of instructor. Seminars or lectures on current topics in public policy and other related fields presented by faculty members. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content or topic changes.

PBPL 289A Capstone Research Project 4 Seminar, 4 hours. Prerequisite(s): graduate standing or consent of instructor. Research and investigate a topic of policy significance and relevance, producing a technical paper of publishable quality. Includes specific topic of investigation designed to foster integration of learning by incorporating knowledge acquired throughout the 2-year program. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Graded In Progress (IP) until PBPL 289A and PBPL 289B are completed, at which time a final grade is assigned.

PBPL 289B Capstone Research Project 4 Seminar, 4 hours. Prerequisite(s): PBPL 289A; consent of instructor. Research and investigate a topic of policy significance and relevance, producing a technical paper of publishable quality. Includes specific topic of investigation designed to foster integration of learning by incorporating knowledge acquired throughout the 2-year program. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

PBPL 290 Directed Studies 1 to 6 Activity, 3 to 18 hours. Prerequisite(s): graduate standing and consent of instructor. Advanced work in a topic or topics appropriate to the student’s special interests and needs. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PBPL 291 Individual Study in Coordinated Areas 1 to 12 Activity, 3 to 36 hours. Prerequisite(s): graduate standing and consent of instructor. A program of study designed to advise and assist candidates who are preparing for masters and/or doctoral examinations. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PBPL 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing and consent of instructor. Individual research performed under the direction of a faculty advisor. Designed for students preparing their capstone prospectuses. Students meet in groups by appointment with a faculty advisor to discuss issues of capstone writing. Emphasis is placed on the development of research design. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

PBPL 298I Individual Internship 1 to 12 Internship, 2 to 24 hours; written work 1 to 12 hours. Prerequisite(s): graduate standing or consent of instructor. Internship in a public or quasi-public agency concerning matters relating to public policy. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.
Public Policy
Designated Emphasis

Subject abbreviation: PBPL
School of Public Policy

School of Public Policy
Mark Long, MPP, Ph.D., Dean
Bruce Babcock, Ph.D. Associate Dean
bruce.babcock.ucr.edu

Advisory Committee & Participating Faculty
Cecilia Ayon (Public Policy)
Ken Baerenklau (Public Policy)
David Brady (Public Policy)
Steve Brint (Sociology, Public Policy)
Richard Carpiano (Public Policy)
Paul D’Anieri (Political Science, Public Policy)
Ronald Loveridge (Political Science)
Sharon Oselin (Public Policy)
Ben Newman (Political Science, Public Policy)
Bruce Link (Public Policy)
Kevin Esterling (Political Science, Public Policy)
Anil Deolalikar (Economics, Public Policy)
Qingfang Wang (Public Policy)
Kurt Schwabe (Public Policy)

Designated Emphasis
Requirements

Students must complete four graduate courses (16 units) in total, of which two should be core courses in the Master of Public Policy program, one course from the list of MPP program elective courses, and one graduate course (from an approved list) offered by a department that is not the student’s own department. Note that students cannot apply units taken to fulfill the DE program requirement toward their own graduate program requirements.

1. Two (2) required core courses (8 units) offered by the School of Public Policy:
   - PBPL 200, PBPL 220.
2. One (1) required elective course (4 units) offered by the School of Public Policy selected from:
3. One (1) required course from any of the following programs that is not the student’s own graduate program:
   - ECON 236, ECON 237, ECON 240, ECON 241, ECON 243, ECON 250, ECON 254, ECON 260, ECON 261, ECON 264, ECON 265, EDUC 203, EDUC 265M, EDUC 265G, EDUC 269E, CEE 232, ENGR 200, ENGR 201, ENGR 203, ENSC 201, ENSC 206, ENSC 227, GEO 205, GEO 252, GEO 255, GEO 260, POSC 252, POSC 268, POSC 271, POSC 282, SOC 245, SOC 257, SOC 258, SOC 252, SOC 253
4. Research Requirement: Students in the Designated Emphasis are required to demonstrate their research capacity by writing a review paper that will focus on a policy issue/problem and the policy solutions (including design, implementa-

tion, and cost-effectiveness) to address the problem. Selection of the policy issue and the structure of the paper are to be agreed upon with a faculty member from the School of Public Policy, who will serve as a mentor, with an option for joint mentorship with a faculty member from another department (including the student’s own department). It is expected that the review paper, of about 25-30 pages long, will be at a publishable quality to be completed within 1-2 quarters.

All requirements for the Designated Emphasis must be satisfied within a year of a student advancing to candidacy in their Ph.D. field; a minimum GPA of 3.0 is required for the award of the Designated Emphasis.

Robots Program

Robotics Engineering
Undergraduate Major

Major

Robotics studies the design, operation, and deployment of autonomous intelligent systems and mechanisms. Robotics is a fundamentally multidisciplinary field, with core components spanning engineering and computer science, and applications extending beyond science and technology. Courses in the B.S. in Robotics Engineering program focus both on the theory and the practice of contemporary robotics science and engineering, and prepare students for professional careers and graduate studies in robotics and beyond (e.g., autonomous systems, intelligent control systems, and decision making).

The B.S. in Robotics Engineering major is an interdepartmental program offered by the Marlan and Rosemary Bourns College of Engineering (BCOE), and involves the Departments of Mechanical Engineering, Electrical and Computer Engineering, and Computer Science and Engineering. Students are advised in and have their records maintained by the BCOE Office of Student Academic Affairs. Students must fulfill the breadth requirements of the Bourns College of Engineering.

University Requirements

See Undergraduate Students section.

College Requirements

For details on breath requirements, see the Colleges and Programs section of this catalog. Students are encouraged to consult their advisor regarding requirements.

Major Requirements

1. Lower-division requirements (72 units)
   a. MATH 009A or MATH 009AH, MATH 009B, or MATH 009BH; MATH 009C
   b. MATH 009CH; MATH 101A; MATH 101B; MATH 111; MATH 131; MATH 46
   c. PHYS 040A, PHYS 040B, PHYS 040C
   d. CS 010A, CS 010B, CS 010C, CS 061
   e. ME 009, ME 010
   f. EE 005, EE 010, EE 011, EE 014, EE 120A, or EE 120B, EE 132, EE 142, CS 0171, EE 144, ME 144
   g. CS 017A and CS 017B
   h. ME 175B and ME 175C

2. Upper-division requirements (65 units)
   a. CS 100, CS 120B, or EE 120B
   b. ME 103, ME 120, ME 145, or EE 145
   c. EE 106, EE 111, EE 114, EE 120A, or CS 120A, EE 132, EE 142, CS 171, EE 144, ME 144
   d. Four courses (at least 16 units) from the following list, none of which can also be used to satisfy other major requirements:
      - CS 111, CS 122A, CS 122B, CS 135, CS 141, CS 145, CS 150, CS 170, CS 172, CS 173, ME 110, ME 122, ME 130, ME 131, ME 133, ME 153, EE 100A, EE 115, EE 128, EE 141, EE 146, EE 147, EE 150, EE 151, EE 152, ENGR 160
   e. One of the following two-course sequences:
      - CS 178A and CS 178B
      - EE 175A and EE 175B
      - ME 175B and ME 175C

Change of Major Criteria

All students who request a change of major to Robotics Engineering must meet the following requirements:

- Be in good academic standing
- Have no less than a C- in any Math, Science, and Engineering coursework
- Be able to complete major within maximum allowable units
- Complete all the courses listed below, based on the total number of units earned, prior to submitting the major change request
- UCR transfer students interested in changing to a BCOE major must have been admissible to the major at point of entry, or must satisfy transfer admission and change of major requirements before earning 120 units.
- If changing in the 90-119 units category, student must have the ability to complete major within 5 years of entry as a Freshman or 3 years after entry as a Transfer student.
- Students who have earned 120 or more units are not eligible for a change of major in BCOE. NOTE: AP/IB units are excluded from maximum unit calculation.
- Any deviations will require approval of the Robotics Program Chair.

0 – 45 Units

Completion of ENGL 001A with C or better and completion of the following with at least a 3.0 GPA:

- MATH 009A
- MATH 009B
- CS 010A
- CS 010B
- PHYS 040A
46 – 89 Units
Completion of ENGL 001A with C or better and completion of the following with at least a 3.0 GPA:
- MATH 009A
- MATH 009B
- MATH 009C
- MATH/CS 011
- CS 010A
- CS 010B
- CS 010C
- PHYS 040A

90 – 119 Units
Completion of ENGL 001A with C or better and completion of the following with at least a 3.0 GPA:
- MATH 009A
- MATH 009B
- MATH 009C
- MATH/CS 011
- MATH 031
- MATH 046
- CS 010A
- CS 010B
- CS 010C
- PHYS 040A
- PHYS 040B
- ME 010

Graduate Program
The Robotics program offers the M.S. degree in Robotics after completion of the following requirements.

Master of Science in Robotics
Admission
All applicants to this program must have completed a Bachelor’s degree or its approved equivalent from an accredited institution and to have attained undergraduate record that satisfies the standards established by the Graduate Division and University Graduate Council. Applicants should have at least an undergraduate major in Mechanical Engineering, Computer Engineering, Computer Science, Electrical Engineering or a closely related field. Applicants who fail to meet this criterion may sometimes be admitted with course deficiencies, provided they take remedial steps to cover the deficiencies.

A student who is deficient in a competency area may be asked to complete the corresponding UCR course with a letter grade of at least B, or to pass a challenge examination based on that course’s final exam with a grade of at least B. All such remedial work should be completed within the first year of graduate study, and in all cases the deficiency(s) must be corrected before a student can enroll in any graduate course from the same specialty area. The details will be decided by the Graduate Advisor of the program in consultation with the student.

All applicants must submit scores from the Graduate Record Exam, General Test (GRE). Relevant GRE subject tests may be beneficial to the candidate’s application, but are not required. Applicants whose first language is not English are required to submit acceptable scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) unless they have a degree from an institution where English is the exclusive language of instruction. Additionally each applicant must submit letters of recommendation, as per the admission requirements. All other application requirements are specified in the graduate application.

The committee designing the program fully recognizes that students from ME, EE, CEN and CS have different undergraduate training. The program is designed so that all students who have completed their undergraduate degrees in these areas will be able to take these courses. The program also allows for a number of undergraduate courses which can be taken to build the fundamentals necessary before the graduate course is taken.

Course Work
The MS in Robotics requires the completion of 40 units of coursework, including a capstone experience. Units are divided among core, focus area, and elective courses. A total of 12 units maximum can be at the undergraduate level, selected from the list of courses below. Colloquium units do not count towards the 40 units.

Core Courses:
Five courses for a total of 20 units are required. All students must complete the same core courses:
- CS 224 – Machine Learning Fundamentals
- EE 235 – Linear control systems
- EE 283A – Foundations of Robotics
- ME 224 – Computational methods for robotics
- ME 225 – Design and fabrication of robots

Focus Area Courses:
Three courses for a total of 12 units are required. Courses must belong to the same focus area, which is selected by the student from the four possible choices. At most, one focus course can be at the undergraduate level.

1. Mechanical design and fabrication
   ME 174, ME 175B, ME 175C, ME 210, ME 230, ME 232, ME 233, ME 271
2. Embedded platforms and system design
   CS 171, CS 256
   EE 217, EE 246, EE 255, EE 258
3. Control and navigation
   EE 132, EE 144, EE 151, EE 231, EE 236, EE 237, EE 238, EE 239, EE 245, EE 246
   ME 121, ME 145, ME 220, ME 221, ME 223
4. Artificial intelligence and perception
   CS 170, CS 171, CS 173, CS 205, CS 227, CS 229/EE 240, CS 235
   EE 142, EE 146, EE 236, EE 241, EE 243, EE 244, EE 245, EE 247
   ME 202, ME 233

Elective Courses:
Students completing the comprehensive exam option will take two courses for a total of 8 units chosen from the options below. Students completing the project option will complete 8 units of CS, EE, or ME 297. Any courses not listed will require approval of the program graduate advisor.

1. course from the focus areas above that hasn’t already been used.
2. ME 114, ME 118, ME 120, ME 130, ME 133, ME 153, ME 176, ME 200, ME 201, ME 203, ME 210, ME 231, ME 233, ME 270, ME 274
3. Any course listed in the EE Graduate Manual in the areas Signals, Systems and Machine Intelligence (SSMI) and VLSI Circuits and Systems (VCS).
4. Undergraduate courses in the following undergraduate focus areas are allowed: Communications, Signal Processing and Networking; Controls, Robotics and Machine Intelligence; and VLSI and Embedded Systems.
5. Any graduate CS course listed in the Catalog under the CS Graduate Program in the Major Specialty Areas of C (Databases, Information Retrieval, Data Mining, and Machine Learning), D (Operating Systems, Distributed Systems, and High Performance Computing), or E (Computer Networks).
6. Undergraduate CS courses CS170, CS 171, CS 172, CS 173.
7. one of these two courses can be taken for credit in the program: EE 132 and ME 121

Professional Development
All M.S. Robotics students must satisfactorily complete a colloquium course every quarter of their study, CS 287, EE 259, or ME 250. The inter-departmental nature of the Robotics program calls for students attending colloquia in multiple departments. The program oversight committee will coordinate with the three departments to identify the set of colloquia that the students should attend.

Additionally, students in the program must submit a Professional Development Report that details the students’ efforts in developing their technical writing and presentation skills. This report should be submitted to and approved by the program Oversight Committee, as part of the Capstone experience. Specific guidance for this report will be provided by the committee to the students.

Capstone Experience (Plan II)
Students must complete a capstone experience that integrates knowledge from across their course of study by selecting one of the two options below:

a. Comprehensive Exam Option – Students take a comprehensive exam based on the courses in the program. The faculty committee overseeing the program will coordinate with the individual departments on the logistics of the exam.
Normative Time – Six quarters (two years)

Sociology

Subject abbreviation: SOC
College of Humanities, Arts, and Social Sciences

Adalberto Aguirre, Jr., Ph.D., Chair

For the Bachelor of Arts

Sociology Department requirements
(14 courses [at least 56 units])

Students will not be admitted into the major until lower-division requirements are satisfied. All courses in the major must be taken for a letter grade.

1. Lower-division requirements
(5 courses [at least 20 units])
- SOC 001 or SOC 001H with a grade of “C-” or better
- SOC 003, SOC 004, SOC 005 with a grade of “C-” or better in each
- One additional lower-division Sociology course with a grade of “C-” or better

2. Upper-division requirements
(9 courses [at least 36 units])
- SOC 168 or SOC 169
- A minimum of one course each selected from four of the following five areas of emphasis:
  (1) Social Institutions, Organizations and Change:
      SOC 112, SOC 121, SOC 122, SOC 123, SOC 125, SOC 130, SOC 139/MCS 139, SOC 143/URST 143, SOC 150, SOC 151, SOC 156, SOC 160, SOC 176/BUS 176, SOC 179, SOC 181, SOC 182/URST 182, SOC 184
  (2) Social Psychology:
      SOC 173, SOC 174, SOC 175, SOC 177 E-Z, SOC 178, SOC 186E, SOC 186F, SOC 186G
  (3) Social Inequality:
      SOC 128, SOC 129, SOC 130, SOC 131 E-Z, SOC 132, SOC 133, SOC 135, SOC 161, SOC 162, SOC 163, SOC 164, SOC 165
  (4) Criminology and Deviance:
      SOC 134, SOC 144, SOC 145, SOC 147, SOC 149, SOC 159, SOC 180
  (5) Family and Gender:
      SOC 140, SOC 141, SOC 142, SOC 146, SOC 155 E-Z

An additional four elective courses (at least 16 units) in Sociology (No more than 5 units from any combination of SOC 190, SOC 197, SOC 198-1.)
Sociology/Administrative Studies Major
The major requirements for the B.A. and B.S. degree in Sociology/Administrative Studies are as follows:

For the Bachelor of Arts
Sociology Department requirements (14 courses [at least 56 units])

Students will not be admitted into the major until lower-division requirements are satisfied. All courses in the major must be taken for a letter grade.

1. Lower-division requirements (5 courses [at least 20 units])
   a) SOC 001 or SOC 001H with a grade of "C-" or better
   b) SOC 003, SOC 004, SOC 005 with a grade of "C-" or better in each
   c) One additional lower-division Sociology courses with a grade of "C-" or better

2. Upper-division requirements (9 courses [at least 36 units])
   a) SOC 168 or SOC 169
   b) A minimum of one course each selected from four of the following five areas of emphasis:
      (1) Social Institutions, Organizations and Change: SOC 112, SOC 121, SOC 122, SOC 123, SOC 125, SOC 126, SOC 137, SOC 139/MCS 139, SOC 143/URST 143, SOC 150, SOC 151, SOC 156, SOC 160, SOC 176/BUS 176, SOC 179, SOC 181, SOC 182/URST 182, SOC 184
      (2) Social Psychology: SOC 173, SOC 174, SOC 175, SOC 177 E-Z, SOC 178, SOC 186E, SOC 186F, SOC 186G
      (3) Social Inequality: SOC 128, SOC 129, SOC 130, SOC 131 E-Z, SOC 132, SOC 133, SOC 135, SOC 161, SOC 162, SOC 163, SOC 164, SOC 165
      (4) Criminology and Deviance: SOC 134, SOC 144, SOC 145, SOC 147, SOC 149, SOC 159, SOC 180
      (5) Family and Gender: SOC 140, SOC 141, SOC 142, SOC 146, SOC 155 E-Z
   c) An additional four elective courses (at least 16 units) in Sociology (No more than 5 units from any combination of SOC 190, SOC 197, SOC 198-1.)

Administrative Studies requirements (37 units)

   1. Lower-division courses (17 units)
      a) BUS 010, BUS 020
      b) STAT 008 or equivalent (may be used to satisfy breadth requirements)
      c) CS 008 (may be used to satisfy breadth requirements)

   2. Upper-division requirements (20 units)
      a) Two courses (8 units) from the list below:
         (1) ECON 102 or ECON 103 or ECON 104A or ECON 130 or ECON 162/BUS 162
         (2) PSYC 140 or PSYC 142
         (3) SOC 150 or SOC 151

For the Bachelor of Science
Sociology Department requirements (16 courses [at least 64 units])

Students will not be admitted into the major until lower-division requirements are satisfied. All courses in the major must be taken for a letter grade.

1. Lower-division requirements (5 courses [at least 20 units])
   a) SOC 001 or SOC 001H with a grade of "C-" or better
   b) SOC 003, SOC 004, SOC 005 with a grade of "C-" or better in each
   c) One additional lower-division Sociology courses with a grade of "C-" or better

2. Upper-division requirements (11 courses [at least 44 units])
   a) SOC 110, SOC 168, SOC 169
   b) A minimum of one course each selected from four of the following five areas of emphasis:
      (1) Social Institutions, Organizations and Change: SOC 112, SOC 121, SOC 122, SOC 123, SOC 125, SOC 126, SOC 137, SOC 139/MCS 139, SOC 143/URST 143, SOC 150, SOC 151, SOC 156, SOC 160, SOC 176/BUS 176, SOC 179, SOC 181, SOC 182/URST 182, SOC 184
      (2) Social Psychology: SOC 173, SOC 174, SOC 175, SOC 177 E-Z, SOC 178, SOC 186E, SOC 186F, SOC 186G
      (3) Social Inequality: SOC 128, SOC 129, SOC 130, SOC 131 E-Z, SOC 132, SOC 133, SOC 135, SOC 161, SOC 162, SOC 163, SOC 164, SOC 165
      (4) Criminology and Deviance: SOC 134, SOC 144, SOC 145, SOC 147, SOC 149, SOC 159, SOC 180
      (5) Family and Gender: SOC 140, SOC 141, SOC 142, SOC 146, SOC 155 E-Z
   c) An additional four elective courses (at least 16 units) in Sociology (No more than 5 units from any combination of SOC 190, SOC 197, SOC 198-1.)

Administrative Studies requirements (37 units)

   1. Lower-division courses (17 units)
      a) BUS 010, BUS 020
      b) STAT 008 or equivalent (may be used to satisfy breadth requirements)
      c) CS 008 (may be used to satisfy breadth requirements)

   2. Upper-division requirements (20 units)
      a) Two courses (8 units) from the list below:
         (1) ECON 102 or ECON 103 or ECON 104A or ECON 130 or ECON 162/BUS 162
         (2) PSYC 140 or PSYC 142
         (3) SOC 150 or SOC 151
         (4) POSC 181 or POSC 182 or POSC 183 or POSC 186
For the Bachelor of Arts
Sociology Department requirements
(14 courses (at least 56 units))

The Law and Society major is open to undergraduate students with junior standing who have completed LWSO 100 with a grade of "C" or higher. Students will not be admitted into the major until lower-division SOC requirements are satisfied. All courses in the major must be taken for a letter grade.

1. Lower-division requirements (5 courses [at least 20 units])
   a) SOC 001 or SOC 001H with a grade of "C-" or better
   b) SOC 003, SOC 004, SOC 005 with a grade of "C-" or better in each
   c) One additional lower-division Sociology course with a grade of "C-" or better

2. Upper-division requirements (9 courses [at least 36 units])
   a) SOC 168 or SOC 169
   b) A minimum of one course each selected from four of the following five areas of emphasis:
      (1) Social Institutions, Organizations and Change: SOC 112, SOC 121, SOC 122, SOC 123, SOC 125, SOC 137, SOC 143/URST 143, SOC 150, SOC 151, SOC 156 SOC 160, SOC 176/BUS 176, SOC 179, SOC 181, SOC 182/URST 182, SOC 184
      (2) Social Psychology: SOC 173, SOC 174, SOC 175, SOC 177 E-Z, SOC 178, SOC 186 E, SOC 186 F, SOC 186 G
      (3) Social Inequality: SOC 128, SOC 129, SOC 130, SOC 131 E-Z, SOC 132, SOC 133, SOC 135, SOC 161, SOC 162, SOC 163, SOC 164, SOC 165
      (4) Criminology and Deviance: SOC 134, SOC 144, SOC 146, SOC 147, SOC 149, SOC 159, SOC 180
      (5) Family and Gender: SOC 140, SOC 141, SOC 142, SOC 146, SOC 155 E-Z
   c) An additional four elective courses (at least 16 units) in Sociology (No more than 5 units from any combination of SOC 190, SOC 197, SOC 198-1.)

For the Bachelor of Science
Sociology Department requirements
(16 courses (at least 64 units))

The Law and Society major is open to undergraduate students with junior standing who have completed LWSO 100 with a grade of "C" or higher. Students will not be admitted into the major until lower-division SOC requirements are satisfied. All courses in the major must be taken for a letter grade.

1. Lower-division requirements (5 courses [at least 20 units])
   a) SOC 001 or SOC 001H with a grade of "C-" or better
   b) SOC 003, SOC 004, SOC 005 with a grade of "C-" or better in each
   c) One additional lower-division Sociology course with a grade of "C-" or better

2. Upper-division requirements (11 courses [at least 44 units])
   a) SOC 110, SOC 168, SOC 169
   b) A minimum of one course each selected from four of the following five areas of emphasis:
      (1) Social Institutions, Organizations and Change: SOC 112, SOC 121, SOC 122, SOC 123, SOC 125, SOC 137, SOC 143/URST 143, SOC 150, SOC 151, SOC 156 SOC 160, SOC 176/BUS 176, SOC 179, SOC 181, SOC 182/URST 182, SOC 184
      (2) Social Psychology: SOC 173, SOC 174, SOC 175, SOC 177 E-Z, SOC 178, SOC 186 E, SOC 186 F, SOC 186 G
      (3) Social Inequality: SOC 128, SOC 129, SOC 130, SOC 131 E-Z, SOC 132, SOC 133, SOC 135, SOC 161, SOC 162, SOC 163, SOC 164, SOC 165
      (4) Criminology and Deviance: SOC 134, SOC 144, SOC 146, SOC 147, SOC 149, SOC 159, SOC 180
      (5) Family and Gender: SOC 140, SOC 141, SOC 142, SOC 146, SOC 155 E-Z
   c) An additional four elective courses (at least 16 units) in Sociology (No more than 5 units from any combination of SOC 190, SOC 197, SOC 198-1.)

Note: For sections d) and e) combined, not more than two courses may be taken from the same department. In filling the dual requirements of the major, students may not count more than two courses toward both parts of their total requirements (Sociology requirements and Law and Society requirements).
Law and Society requirements (36 units)
   a) PHIL 007 or PHIL 007H
   b) LWSO 100 (with a grade of "C" or better)
   c) One course chosen from POSC 114, PSYC 012, SOC 004 (or equivalent course in research methods)
   d) Three courses chosen from ANTH 127, ECON 119, HISE 153, PHIL 165, POSC 167, PSYC 175, SOC 159.
   e) Two courses chosen from HISA 120A, HISA 120B, HIS 123, LWSO 175 (E-2), PHIL 164, POSC 111, POSC 166, POSC 168, POSC 186, SOC 147, SOC 149, SOC 180.
   f) LWSO 193, Senior Seminar

Note: For sections d) and e) combined, not more than two courses may be taken from the same department. In filling the dual requirements of the major, students may not count more than two courses toward both parts of their total requirements (Sociology requirements and Law and Society requirements).

Minor
The requirements for the minor in Sociology are as follows:

1. SOC 001, SOC 004, SOC 005
2. Sixteen (16) upper-division units from
   a) SOC 168 or SOC 169
   b) Any three additional upper-division courses in Sociology with no more than 4 units in any combination of SOC 190, SOC 197, SOC 198-I

There can be no substitution for the courses listed without prior departmental approval.

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Sociology Undergraduate Honors Program
Students who meet the departmental requirements for academic excellence are invited at the end of their junior year to participate in the Sociology Undergraduate Honors Program during their senior year. The students enroll in SOC 195 to work on an honors thesis under the supervision of a faculty member, for a total of 12 units distributed over three quarters. Students in the program also participate in SOC 199H, a year-long seminar led by the chair of the Undergraduate Affairs Committee, for which they receive a total of 3 additional units of credit.

Education Abroad
Education Abroad is an excellent opportunity to learn more about another country and its culture while taking courses to earn units toward graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit Education Abroad at ea.ucr.edu or call (951) 827-4113.

See Education Abroad in the Educational Opportunities section in the beginning of this catalog.

Graduate Program
The Department of Sociology offers the M.A. and Ph.D. degrees in Sociology. The graduate program in Sociology is designed to prepare students for research and teaching careers in the discipline of sociology. The graduate program is designed as a full-time course of study for students seeking the Ph.D. degree. The M.A. degree in Sociology is awarded as part of a student’s required progress toward admittance into the Ph.D. program in Sociology. The Department of Sociology does not award an M.A. degree to a student who already received an M.A. degree in Sociology from another institution.

Doctoral Degree
Admission
Admission into the graduate program is based on the following criteria:
1. Prior academic performance, especially in undergraduate or graduate Sociology classes
2. Performance on the GRE
3. Letters of reference from persons familiar with an applicant’s potential for achieving academic excellence
4. The extent to which an applicant’s areas of expressed interest coincide with teaching and research emphases in the department

Applicants to the graduate program in Sociology are encouraged to submit a copy of a professional or term paper with their application for consideration in the admissions process. In general, students are admitted for the fall quarter of each academic year. Applicants to the graduate program for mid-year admissions are not recommended because the sequence of core courses is designed to begin with the fall quarter. The deadline for an application for admission for the fall quarter is December 5, also the deadline for various university fellowship programs. A detailed statement of degree requirements and procedures for the graduate degree is available at https://sociology.ucr.edu/prospective-grad-student-info/

General university requirements of the Graduate Division are at graduate.ucr.edu and in the Graduate Studies section of this catalog.

The graduate program is designed to allow students to proceed through three distinct stages in their pursuit of the Ph.D. degree: the basic core program, the period of specialization, and writing the dissertation.

Basic Core Program
All students must complete the basic core program, regardless of whether they hold a baccalaureate or master’s degree at the time of admission. A student is expected to complete the basic core program in not less than three and not more than six academic quarters. The chair of the graduate affairs committee advises students about the core program.

Course Requirements for the Core Program
1. In the core program, the minimum requirement is 44 units of academic work with no grade less than a "B". Work in the basic core courses must be distributed as follows:
   a) Core sequence in theory: SOC 202A, SOC 202B
   b) Core course in research design: SOC 200
   c) Core sequence in qualitative methodology: SOC 204A, SOC 204B
   d) Core sequence in statistics: SOC 203A, SOC 203B
   e) Proseminar in Sociology: SOC 232
   f) Research colloquium: SOC 293 (required in the first year)
   g) Thesis writing: SOC 250
   h) A minimum of one course from each of two specialization areas (excluding all courses in a-g above, as well as SOC 205, SOC 206, SOC 208, SOC 258, SOC 290, SOC 291, SOC 297, SOC 293, SOC 299, SOC 301 and SOC 401).

M.A.Thesis and Oral Examination
Each student must complete a thesis for the completion of the master's degree. This paper reflects the student’s areas of theoretical and substantive interest since entrance into the program, and it is written in a form, content, and style appropriate for publication. A three-person faculty committee oversees the evaluation of the paper and the oral defense of the thesis. The thesis must be completed and presented to the full department by the end of the student's sixth quarter of enrollment. If a student does not possess a Sociology MA from another institution and wishes to apply for the MA degree at UCR, the thesis must be submitted electronically to the Graduate Division, following the formatting guidelines provided on the Graduate Division web page. The normative time to an MA degree is 2 years.

On the basis of a favorable recommendation from the three-person faculty committee, the faculty votes to recommend the awarding of the M.A. degree in Sociology. If the M.A. is awarded or if the student already has an M.A. in Sociology, the faculty then votes on whether the student should continue in the Ph.D. program. If a student is allowed to continue in the Ph.D. program, the faculty then votes on whether to accept the two areas of specialization in which the student requests to be examined.

Professional Development Training
Each student must complete the following professional training courses: Soc 232 and Soc 293. Normally Soc 232 (Proseminar in Sociology) is completed in the fall of the first year as part of the core program. Soc 293 (Research Topics in Sociology) is required in the first year. In addition, Sociology 301: Directed Studies in the Teaching of Sociology is required prior to or concurrent with the completion of teaching assistantships in the program.
Period of Specialization
After admission to two areas of specialization (see M.A. Thesis and Oral Examination, above), students must complete coursework and qualifying examinations in two (one primary and one secondary) areas of specialization. A student must complete specialization coursework with a grade of "B" or better in each course. Other graduate-level courses may be used to fulfill this requirement with Graduate Affairs Committee approval. The areas of specialization offered in the department, and course requirements in these areas, are as follows:

1. Criminology and Sociolegal Studies
SOC 219. Two (if primary) or one (if secondary) of the following SOC courses: SOC 219, 264, 268, 278, 279, 280E, 280F, 280G, 280H, 280I, 280K, 280M, 280S.

2. Gender Studies
Two (if primary) or one (if secondary) of the following SOC courses: 240, 256, 262, 264E, 264F, 264G, 264M, 264P, 267, 268, 285N.

3. Medical Sociology
SOC 284 and SOC 283. If primary, one additional from the following SOC courses: 286, 287, 288.

4. Organizations and Institutions

5. Political Economy and Global Social Change
SOC 281. Two (if primary) or one (if secondary) of the following SOC courses: 243, 243K, 243S, 251, 252, 255M, 257E, 257N, 257T, 258, 263, 264M, 264P, 264T, 265, 271, and 282. 258 can be taken to fulfill the specialization requirement or the advanced methods requirement, but not both. SOC 259 and SOC 260 are two unit courses that can be combined to substitute for one of the four unit courses listed above.

6. Race and Class Inequality
SOC 246. Two (if primary) or one (if secondary) of the following SOC courses: 265F, 265I, 265L, 265R, 266, 267, 268, 271, 282, 283, 284, 285, 286, 288.

7. Social Psychology

A student’s program must include at least one academic quarter of classroom teaching experience at the college level. In addition, students must take one course in any area of specialization and at least one course (or the equivalent, 4 units) of advanced methods from within the department (SOC 205, SOC 206, SOC 208, SOC 258) with a grade of “B” or better in each course. Students must also give one additional research presentation (to the presentation of the MA) as part of the department colloquium series at graduate level. All required coursework must be completed by the end of year three (9th quarter).

Examination Sequence
1. Standing committees composed of faculty in each area administer the written qualifying examination in the student’s primary and secondary areas of specialization. A student must complete written examinations in each area of specialization before the end of the fourth year of graduate study. Note: In lieu of an exam in a secondary specialization, a student may produce, during the student’s residence in the program, a solo-authored paper that has been published or accepted for publication as a peer-reviewed article or book chapter that fits the secondary specialization, as determined by the chair of the secondary specialization committee.
2. Upon completion of 1) the two written area examinations, 2) the selection of a dissertation committee approved by the Graduate Affairs Committee, and 3. a dissertation proposal, the student must complete and pass an oral examination covering the areas of specialization and the dissertation proposal. The oral examination is conducted by a committee of at least five faculty members, including 1) at least one faculty member from each of the two specialization areas, 2) three members of the student’s dissertation committee (who may also represent the areas of specialization), and 3) one "outside member” from another department representing the faculty as a whole.

Students who pass the oral examination and all course requirements are advanced to candidacy for the Ph.D. degree.

Dissertation and Final Oral Examination
The dissertation is normally completed within one year after advancement to candidacy. After the dissertation is prepared according to the rules and format of the Graduate Division and signed and approved by a student’s dissertation committee, an oral defense of the dissertation is held. The defense may be waived in exceptional circumstances. The dissertation must be filed electronically with the Graduate Division.

Normative Time to Degree for the PhD is 6 years, inclusive.

Lower-Division Courses
SOC 201 Introduction to Sociology 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 70 or 81. An introduction to sociology for non-sociology majors. The nature and patterning of social relations and processes of social interaction. Sociological theory and method.

SOC 201H Honors Introduction to Sociology 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to SOC 201. An in-depth look at concepts and theories relating to the study of society and social interaction. Prerequisites: completion of three semesters of college course work. Open to University Honors students only.

SOC 002 (E-Z) Sociological Foundations 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): SOC 201 or SOC 201H. Selected topics which promote critical thinking skills essential for success in upper-division sociology courses. For hours and prerequisites, see segment descriptions.

SOC 002F The City 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): SOC 201 or SOC 201H. An introductory exploration of urban processes. Examinations and processes of urban regions as seen from the viewpoints of various disciplines.

SOC 002G Introduction to Global Change and Inequality 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): SOC 201 or SOC 201H. Introduces basic concepts and perspectives in the macro-comparative study of social change and inequality at the global level. Explores causes and consequences of globalization in the arenas of economy, politics, and culture. Emphasizes their impacts upon various forms of inequality worldwide.

SOC 002I Inequality in American Society 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): SOC 201 or SOC 201H. Examines inequality in modern American society and how gender, race, ethnicity, and social class maintain inequality.

SOC 002J Juvenile Delinquency 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): SOC 201 or SOC 201H. Examines the nature of delinquency and juvenile justice in American society. Emphasizes divergent models for administering justice, including pre-court stages, intake procedures, custody treatment, detention and release, adjudication, disposition, and post-adjudicatory supervision (including institutionalization).

SOC 002M Introduction to Criminology 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): SOC 201 or SOC 201H. Analyzes the nature and patterning of criminality, focusing on theoretical and methodological issues encountered in research. Examines explanations and crime control policies regarding linkages among social conflicts and inequalities, criminal laws and enforcement practices, and social deviance.

SOC 002R Racial and Ethnic Issues in American Society 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): SOC 201 or SOC 201H. Introduces issues and topics associated with racial and ethnic populations in U.S. society. Focuses on social processes that stratify American society by ethnicity and race.
SOC 002S Social Problems 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): SOC 001 or SOC 001H. The application of major sociological theories, concepts, and perspectives to the study of social problems in contemporary society. Utilizes an analytical approach.

SOC 003 Theoretical Perspectives in Sociology 4 Lecture, 3 hours; discussion, 1. Prerequisite(s): SOC 001 (or SOC 001H) with a grade of "C-" or better. Introduces the basic concepts and theoretical approaches that sociologists use to understand the social world. Prepares for upper-division sociology courses by examining major issues in sociology through the lens of different theoretical perspectives. Credit is awarded for only one of SOC 003 or SOC 003H.

SOC 003H Honors Theoretical Perspectives in Sociology 4 Lecture, 3 hours; discussion, 1 hour; written work, 1 hour; extra reading, 1 hour. Prerequisite(s): admission to University Honors or consent of instructor; SOC 001 or SOC 001H. Honors course corresponding to SOC 003. Introduces the basic concepts and theoretical approaches that sociologists use to understand the social world. Prepares for upper-division sociology courses by examining major issues in sociology through the lens of different theoretical perspectives. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of SOC 003 or SOC 003H.

SOC 004 Methods of Sociological Inquiry 5 Lecture, 3 hours; discussion, 1 hour; research, 3 hours. Prerequisite(s): SOC 001 (or SOC 001H) with a grade of "C-" or better. Applies the fundamentals of science to social research. Investigates problems of research design, sampling, measurement of social phenomena, conduct of field studies, and interpretation of qualitative and quantitative social data.

SOC 005 Statistical Analysis 5 Lecture, 3 hours; discussion, 1 hour; research, 3 hours. Prerequisite(s): SOC 004 with a grade of "C-" or better; or consent of instructor. Covers logical and procedural aspects of the application of statistical methods for data reduction and hypothesis testing in sociology. Includes distributions, tabulations, central tendency, variability, independence, contrasts, correlation and regression, and nonparametrics.

SOC 010 The Sociological Imagination 4 Lecture, 3 hours; extra reading, 7 hours; written work, 2 hours. Prerequisite(s): none. Designed to fulfill the breadth requirement for non-sociology majors in the humanities, arts, and social sciences. Introduces the sociological imagination through films and popular readings. Teaches sociological concepts as a means to think analytically about the social world and its diverse populations.

SOC 020 American Society 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): none. Examines the culture and structure of American society. Topics include beliefs, key institutions, community patterns, and systems of inequality.

SOC 028 Introduction to the Sociology of Gender 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduces gender as a system of inequality that organizes social life and shapes the distribution of resources, power, and privilege in ways that benefit men over women, including the social construction of gender in everyday life and the gendering of organizations and institutions such as the workplace.

SOC 030 Identity and Society 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): none. Studies the nature of the self, one’s identities, and their role in social behavior. Examines the processes of self-verification, self-esteem, self-efficacy, and authenticity using social psychological theories. Introduces research methods that allow the study of self and identity processes.

SOC 031 Couples and Families 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Examines the major trends in marriage, families, and intimate relationships. Focuses on how inequality and diversity affect loving and family relations. Discusses the dynamics of gender inequality among families and couples and how family life is shaped by race and ethnicity, social class, divorce, and sexuality.

Upper-Division Courses

SOC 110 Multivariate Analysis 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): SOC 005 with a grade of "C-" or better; or consent of instructor. Involves computer analysis of social and behavioral data using statistical inference, multiple-regression, simulation, and multivariate nonparametric techniques.

SOC 112 Sociology of the Labor Movement 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): SOC 001 or SOC 001H. Introduces sociological literature related to the labor movement. Provides a comparative and historical overview of research on unions, workers’ centers, and other organizational forms and collective actions through which working-class people have sought to improve their working and living conditions. Credit is awarded for only one of SOC 112 or SOC 112S.

SOC 112S Sociology of the Labor Movement 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 4 hours; research, 4 hours; term paper, 4 hours. Prerequisite(s): SOC 001 or SOC 001H. Introduces sociological literature related to the labor movement. Provides a comparative and historical overview of research on unions, workers’ centers, and other organizational forms and collective actions through which working-class people have sought to improve their working and living conditions. Credit is awarded for only one of SOC 112 or SOC 112S.

SOC 120 Society and Mental Health 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to class level standing of junior or senior; or consent of instructor. Covers the social causes and patterns of mental health and disorder in the United States. Examines scientific research on the social determinants of mental health and disorder, inequalities of mental health, and access to mental health care and US mental health care policies.

SOC 121 Sociology of the 1960s 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): SOC 001 or SOC 001H or consent of instructor. A sociological approach to the economic, political, and cultural events of the 1960s. Analyzes the impact of such phenomena as civil rights, popular culture, theology, and political participation. Discusses the present-day legacy including personal histories of former activists. Credit is awarded for only one of SOC 121 or SOC 121S.

SOC 121S Sociology of the 1960s 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 4 hours; research, 4 hours; term paper, 4 hours; written work, 4 hours. Prerequisite(s): SOC 001 or SOC 001H or consent of instructor. Introduces sociological literature related to the labor movement. Provides a comparative and historical overview of research on unions, workers’ centers, and other organizational forms and collective actions through which working-class people have sought to improve their working and living conditions. Credit is awarded for only one of SOC 121 or SOC 121S.

SOC 122 Social Change 5 Lecture, 3 hours; research, 3 hours; extra reading, 3 hours. Prerequisite(s): SOC 003 with a grade of "C-" or better or consent of instructor. A study of patterns of social change, resistance to change, and change-producing processes and agencies.

SOC 123 Human Societies 4 Lecture, 3 hours; discussion 1 hour. Prerequisite(s): SOC 003 with a grade of "C-" or better or consent of instructor. Examines the emergence and development of human societies from hunters and gatherers to horticultural, agrarian, and industrial forms of social organization. Explores social networks, societal change, the transition from food collecting to food producing, early Germanic societies, the rise of the West, and the causes of the Industrial Revolution.

SOC 124 Sports, Competition, and Society 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior or senior; or consent of instructor. Introduction to the sociology of sports. Surveys competitive sports groups with respect to the functions they perform, the allocation of roles, the use of rewards and punishments, risks and harms that athletes face, and deviant behavior. Offers a historical overview and examines factors that produce elite performance.

SOC 125 Evolutionary Sociology 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): SOC 003 with "C-" or better or consent of instructor. Examines the objectives and scope of a cross-section of approaches that use evolutionary reasoning to examine such topics as social evolution, human evolution, our primate heritage, neurobiology, and human nature.
SOC 127 Sociological Determinants of Health 4 Lecture, 3 hours; discussion, 1 hour; extra reading, 5 hours; research, 3 hours. Prerequisite(s): SOC 001 with a grade of C- or better or SOC 001H with a grade of C- or better; or consent of instructor. Introduces the role that social factors play in shaping the occurrence and distribution of disease and death in populations with an emphasis on socioeconomic status, racism, social relationships and social stress. A particular emphasis is placed on sociological origins of health inequalities. Cross-listed with PBPL 127.

SOC 128 Chicano Sociology 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Analysis of the Chicano experience in U.S. society. Explores the history as a minority; mass immigration in the twentieth century; relationships with American institutions; present socioeconomic status; variations in social status from region to region; political emergence and variations in values; and social relations and integration with non-Mexicans. Cross-listed with ETST 128. Credit is awarded for only one of ETST 128/SOC 128 or ETST 128S/ SOC 128S.

SOC 128S Chicano Sociology 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 4 hours; individual study, 4 hours; written work, 4 hours. Prerequisite(s): upper-division standing or consent of instructor. Analysis of the Mexican experience in U.S. society. Explores the history as a minority; mass immigration in the twentieth century; relationships with American institutions; present socioeconomic status; variations in social status from region to region; political emergence and variations in values; and social relations and integration with non-Mexicans. Cross-listed with ETST 128S. Credit is awarded for only one of ETST 128/SOC 128 or ETST 128S/SOC 128S.

SOC 129 Racism in Western Society 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): SOC 005 with a "C-" or better or consent of instructor. A study of the origins, character, maintenance, and consequences of racism in Western society focusing on the United States.

SOC 130 Race and Ethnic Relations 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): SOC 005 with "C-" or better or consent of instructor. A study of underrepresented racial and ethnic groups. Includes a comparative analysis of the dynamics and consequences of discrimination of racial and ethnic groups in the United States.

SOC 131 (E-Z) Selected Ethnic Groups 4 Lecture, 3 hours; extra reading, 3 hours. In-depth studies of particular ethnic groups in the United States. Treats a specific ethnic group for an entire quarter: F. Black Americans; H. Jewish Americans.

SOC 132 Field Research On Internalized Racism 4 Lecture, 3 hours; field, 3 hours. Prerequisite(s): SOC 001 or SOC 001H; ETST 128/SOC 128 or ETST 128S/SOC 128S or SOC 129 or SOC 130 or a segment of SOC 131 (E-Z) or SOC 133. Studies the dynamics of racism among people and communities of color using advanced research methods and data analysis.

SOC 133 Inequality and Social Class 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): SOC 005 with a "C-" or better or consent of instructor. Covers the analysis of theory and research concerning sources of inequality in the distribution of scarce rewards in societies. Addresses the influence of aspects of social class and processes involving the hierarchical allocation of social groups to positions.

SOC 134 Law, Race, Class, Gender, and Culture 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): SOC 001 or SOC 001H. An introduction to law, jurisprudence, and legal reasoning focusing on the roles that race, class, gender, culture, and language play in law and jurisprudence. Includes an overview of the development of modern American legal thought and various schools of jurisprudence such as legal realism. Discusses modern challenges to legal formalism by critical legal studies, critical race theory, and feminist jurisprudence. Analyzes the equal protection doctrine and recent legal attacks on affirmative action and immigrants.

SOC 135 Conflict 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): SOC 001 or SOC 001H. Analysis of the sources of social conflict, especially class conflict. Studies social movements arising out of such conflicts, which attempt to bring about fundamental social change. Credit is awarded for only one of SOC 135 or SOC 135S.

SOC 135S Conflict 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 4 hours; research, 4 hours; term paper, 4 hours. Prerequisite(s): SOC 001 or SOC 001H. Analysis of the sources of social conflict, especially class conflict. Studies social movements arising out of such conflicts, which attempt to bring about fundamental social change. Credit is awarded for only one of SOC 135 or SOC 135S.

SOC 137 Population 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): SOC 005 with a "C-" or better or consent of instructor. Introduction to the study of human populations including theories, concepts, and measures. Explores the social causes and consequences of population trends. Emphasizes population problems including population growth, fertility, migration, and mortality.

SOC 139 Mass Media and Popular Culture 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): SOC 001 or SOC 001H. A comparative analysis of the television, radio, record, cinema, and journalism industries as social institutions and a discussion of contemporary developments in mass communications theory. A study of the relationship between the social processes of modern society and the content of popular culture. Cross-listed with MCS 139.

SOC 140 The Sociology of Women 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): GSST 001 or GSST 001H or GSST 001S or SOC 001 or SOC 001H. Analyzes the role women have played in society emphasizing modern American society. Considers some of the social determinants of women’s positions and the efforts being made to bring about change. Cross-listed with GSST 143.

SOC 141 Men and Masculinity 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): SOC 005 with a "C-" or better or consent of instructor. A comparative and historical exploration of the social and personal meanings of masculinity focusing on the American experience. Topics include socialization, sports and war, friendship, intimacy, sexuality, fathering, and work. Concentrates on the role of masculinity in systems of gender inequality.

SOC 142 Sociology of the Family 5 Lecture, 3 hours; discussion, 1 hour; field, 3 hours. Prerequisite(s): SOC 005 with a "C-" or better or consent of instructor. A comparative and historical treatment of the family. Explores major theoretical frameworks developed for conceptualizing the family as a social system within the context of the relation between social structure and family group processes.

SOC 143 Urban Sociology 5 Lecture, 3 hours; extra reading, 3 hours; field, 3 hours. Prerequisite(s): SOC 001 or SOC 001H or consent of instructor. A comparative examination of metropolitan and other urban communities, with emphasis on processes of urbanization. Cross-listed with URST 143.

SOC 144 Interpersonal Relationship Violence 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): SOC 001 with a grade of C- or better or SOC 001H with a grade of C- or better; SOC 004 with a grade of C- or better; SOC 005 with a grade of C- or better; or consent of instructor. Addresses causes, identification, and prevention of and responses to interpersonal relationship violence, such as family violence and partner violence. Examines theories and research findings for practical field application. Promotes better understanding of this common social problem and prepares for careers involving contact with victims and/or perpetrators of relationship violence.

SOC 145 Law and Subordination 5 Lecture, 3 hours; field, 6 hours. Prerequisite(s): upper-division standing in Ethnic Studies or Sociology; ETST 128/SOC 128 or ETST 128S/SOC 128. A comparative and historical analysis of subordinated communities and law emphasizing integrating theoretical understanding of racial, class, and gender subordination. Includes field experience working directly with groups that have traditionally lacked equal access to the legal and judicial system. Cross-listed with ETST 145.

SOC 146 Gender in Global Perspective 4 Lecture, 3 hours; extra reading, 3 hours; written work, 3 hours. Prerequisite(s): SOC 001 or SOC 001H or SOC 028. Examines gender using global and comparative perspectives. Explores how gender is constructed in different societies. Proves the relationship between gender and globalization. Considers resistance to global processes that create and reinforce gender inequalities.
SOC 147 Corrections 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): SOC 005 with a "C-" or better or consent of instructor. Involves a review, analysis, and criticism of the major techniques of resocialization of adult and juvenile offenders. Surveys the history, application, and theory of probation, parole, incarceration, and delinquency prevention programs. Discusses the methods involved in evaluating the effectiveness of correctional programs. May provide opportunities for field work.

SOC 148 Special Topics Discussion in Sociology 2 Discussion, 2 hours; written work, 2 hours; extra reading, 2 hours. Prerequisite(s): upper-division standing in Sociology or consent of instructor. Examines selected topics in Sociology through readings, weekly papers, and active student participation in seminar discussions. Topics and content of the course vary and are announced as the course is offered. Course is repeatable as topics change for a maximum of 8 units.

SOC 149 Organized Crime 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): SOC 005 with "C-" or better or consent of instructor. A review of the operations, structures, history, and theories of syndicated crime in the United States. Emphasizes the implications of organized crime on the development of criminological theory, the operation of formal organizations, and American ethnic relations.

SOC 150 The Sociology of Economic Organizations 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines how the scope and nature of formal and informal organizations are shaped by sociological processes external to them, such as the influence of governments, institutions, networks, and resources. Illustrates the processes with examples from contemporary United States and from other periods and cultures.

SOC 151 Formal Organizations 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines how the structures of formal organizations, the forces that shape them, and the impact they have on their participants, their environments, and one another. Surveys the major classical and contemporary theories of human behavior in organizations.

SOC 155 (E-Z) Topics in the Sociology of Gender 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): SOC 001 or SOC 001H, SOC 028. Intensively studies selected topics in the sociology of gender. E. Feminist Movements In The United States; G. Queer Theory. Course is repeatable to a maximum of units.

SOC 156 Community 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): SOC 001 or SOC 001H. Involves a historical and comparative treatment of the community as a social system; political and economic forces shaping the sense of community; and influences of urbanization, industrialization, and bureaucratization on local social systems.

SOC 159 Sociology of Law 5 Lecture, 3 hours; discussion, 1 hour; field, 3 hours. Prerequisite(s): SOC 001 with a grade of C- or better or SOC 001H with a grade of C- or better; SOC 004 with a grade of C- or better; restricted to major(s) Law & Society, Sociology, Sociology/Administrative Stds, Sociology/Law and Society. Introduction to social scientific perspectives and research on the nature, sources, dimensions, and impact of law.

SOC 160 Sociology of Education 5 Lecture, 3 hours; discussion, 1 hour; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A comparative analysis of educational institutions in complex societies and their relation to a society’s political and economic structure. Examines the school as a societal subsystem consisting of teacher, student, and administrator roles with its own evolving subculture.

SOC 161 Immigration and Society 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): SOC 001 or SOC 001H. Examines the origins of immigration and its nature, patterns, and trends in the twentieth century in Western societies, with special emphasis on the United States. Topics include theories of immigration, causes of immigration, sources of immigrants, immigration laws, reactions to immigrants, and the effects of immigration on the host society.

SOC 162 Linguistic Diversity in the United States 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): SOC 001 or SOC 001H. Examines the linguistic diversity that has characterized the socio-historical development of United States society.

SOC 163 Social Forces and the Educational Condition of Chicanas/Os 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): SOC 001 or SOC 001H. Examines the social forces that have shaped the Chicanas/os’ educational condition and evaluates models in the sociology of education that explain their educational situation.

SOC 164 Racial and Ethnic Diversity Issues in Higher Education 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): SOC 001 or SOC 001H; SOC 160 or SOC 163. Explores the issue of diversity in higher education. Focuses on racial and ethnic minority students and faculty.

SOC 165 Sociolinguistics and the Chicana/O Community 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): SOC 001 or SOC 001H. Examines the regional and social variation in language use within the Chicana/o community. Focuses on the maintenance of Spanish language use, private versus public domains of language use, the need for bilingual social services, language as a human right versus language as a constitutional right, and the political economy context of language. Also addresses general sociolinguistic theory and methodology.

SOC 166 Sociology of Law 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): SOC 001 with a grade of C- or better or SOC 001H with a grade of C- or better; SOC 004 with a grade of C- or better, SOC 005 with a grade of C- or better. Covers the nature of face-to-face contact between persons in everyday life. Examines the relationship among the social self, social roles, and communication in the day-to-day activities of people in informal groups, closed establishments, and public contacts.

SOC 167 Medical Sociology 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Introduces key concepts and theories in medical sociology and their application to a variety of health issues. Exemplar topics include social construction of health and illness, medicalization, stigma and labeling, patient-provider interaction, sociology of medical professionalism, social determinants of health, and political economy of health. Cross-listed with PBPL 167.

SOC 168 Development of Sociological Theory 5 Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): SOC 003 with a grade of C- or better; restricted to class level standing of junior; or senior; or consent of instructor. Covers the emergence of sociology as a systematic discipline. Provides a critical analysis of sociological theory from the nineteenth and early and mid-twentieth centuries.

SOC 169 Modern Sociological Theory 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): SOC 003 with a grade of C- or better. An analysis and critical evaluation of sociological theory from 1920 to the present. Explores the growth of current sociological theories and recent trends in conceptual formulations.

SOC 173 Social Psychology: Sociological Orientation 5 Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): SOC 003 and SOC 005 with grades of "C-" or better or consent of instructor. A study of the sociological contributions to theory and research in social psychology. Focuses on the relationship between culture and group life to human behavior and personality.

SOC 174 Socialization and Personality 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): SOC 003 and SOC 005 with grades of "C-" or better or consent of instructor. Analyzes socialization from various theoretical perspectives with emphasis on the impact of patterns of child rearing on personality development. Provides a historical and cross-cultural treatment focusing on the relation among family structure, social structure, and socialization processes.

SOC 175 Social Roles and Interaction 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): SOC 001 with a grade of C- or better or SOC 001H with a grade of C- or better; SOC 004 with a grade of C- or better, SOC 005 with a grade of C- or better. Covers the nature of face-to-face contact between persons in everyday life. Examines the relationship among the social self, social roles, and communication in the day-to-day activities of people in informal groups, closed establishments, and public contacts.

SOC 176 The Sociology of Work in Organizations 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): SOC 001 or SOC 001H or consent of instructor. Emphasizes the roles of individuals in organizations. Topics include the effects of jobs on workers, short-term trends in the nature of work, and differences in work among major segments of the labor force. Cross-listed with BUS 176.
SOC 177 (E-Z) Topics in Social Psychology: Sociological Orientation 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): SOC 001 or SOC 001H; SOC 030. Intensively studies selected topics in social psychology, such as the individual and social change, attribution theory, experimentation in social psychology, exchange and consensus theories in social psychology, and applied social psychology. E. Social Psychology Of Gender; G. Theories Of Interpersonal Behavior.

SOC 178 Sociology of Emotions 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): SOC 001 with a grade of C- or better or SOC 001H with a grade of C- or better; SOC 004 with a grade of C- or better; SOC 005 with a grade of C- or better; SOC 173 or SOC 174 or SOC 175. Surveys theory and research on emotions. Focuses on sociological and social psychological theories. Also covers evolutionary, biological, and cognitive theories. Studies a range of emotions such as shame and embarrassment; guilt, empathy, and sympathy; jealousy and envy; and anger.

SOC 179 Social Movements and Collective Action 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): SOC 001 with a grade of C- or better or SOC 001H with a grade of C- or better; SOC 004 with a grade of C- or better; SOC 005 with a grade of C- or better; SOC 168 or SOC 169. Examines the emergence and outcomes of collective action and social movements. Considers the conditions under which social movements develop and why they succeed or fail. Utilizes sociological theories to understand collective action and social movements. Includes analysis of the U.S. civil rights movement, feminist movement, and LGBTT movement.

SOC 180 Deviance and Control 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): SOC 001 with a grade of C- or better or SOC 001H with a grade of C- or better; SOC 004 with a grade of C- or better; SOC 005 with a grade of C- or better; or consent of instructor. Introduction to sociological analysis of deviance as defined by informal and formal processes of social control in varying cultural, legal, and political contexts.

SOC 181 World-Systems and Globalization 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): SOC 001 with a grade of C- or better; SOC 005 with a grade of C- or better or ECON 101 with a grade of C- or better or PSYC 011 with a grade of C- or better or STAT 004 with a grade of C- or better or STAT 008 with a grade of C- or better; or consent of instructor. Systematic comparisons of societies and world-systems with emphasis on changes in the logic of social development. Credit is awarded for one of the following SOC 181S or SOC 181S.

SOC 181S World-Systems and Globalization 5 Lecture, 3 hours; discussion, 1 hour; research, 3 hours. Prerequisite(s): SOC 001 with a grade of C- or better, SOC 005 with a grade of C- or better or ECON 101 with a grade of C- or better or PSYC 011 with a grade of C- or better or STAT 004 with a grade of C- or better or STAT 008 with a grade of C- or better; or consent of instructor. Systematic comparisons of societies and world-systems with emphasis on changes in the logic of social development. Credit is awarded for one of the following SOC 181S or SOC 181.

SOC 182 Urban Problems 4 Lecture, 3 hours; discussion, 1 hour; term paper, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior. An interdisciplinary examination of selected urban problems such as civil disorders, transportation, housing, welfare, and planning. Cross-listed with PBPL 182, and URST 182.

SOC 183 (E-Z) Special Topics in Sociology 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Explores special topics in sociology. Segment H may be offered online or in-person. H. Aging In America; M. Geographic Inform Sysms & Mapping In Soc & Other Social Sciences: Principles, Techniques, & Research; P. Poverty And Welfare; W. Social Mobility.

SOC 184 Environmental Sociology 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): SOC 001 with a grade of C- or better or SOC 001H with a grade of C- or better; SOC 004 with a grade of C- or better, SOC 005 with a grade of C- or better. A sociological approach to the study of mainstream environmentalism. Addresses societal implications of environmental reform; the nature of distributive impacts (costs and benefits); environmental conflict resolution; land-use decision making; and the placement of noxious facilities in minority, working class, and poor communities.

SOC 186 (E-Z) Topics in Sociology 4 Seminar, 3 hours. Prerequisite(s): SOC 003 with a grade of C- or better; restricted to class level standing of junior, or senior; or consent of instructor. For additional activity hours see individual segments. Academic examination of issues relating to a wide variety of contemporary topics in Sociology. Satisfactory(S) or No Credit(N/C) is not available.

SOC 186E Mind, Brain and Society: Interdisciplinary Issues in Evolutionary Theory and Neurosociology 4 Seminar, 3 hours; term paper, 2 hours; individual study, 6 hours. Prerequisite(s): SOC 003 and SOC 004 with grades of “C-” or better; upper division standing in Sociology; or consent of instructor. Discusses selected topics in evolutionary theory and neurosociology focusing on mind, brain, and society. Satisfactory (S) or No Credit (NC) grading is not available.

SOC 186F Seminar in the Sociology of Morality 4 Seminar, 3 hours; discussion, 2 hours; individual study, 5 hours; written work, 2 hours. Prerequisite(s): SOC 003 and SOC 004 with grades of “C-” or better; upper division standing in Sociology; or consent of instructor. Discusses selected topics in the sociology of morality. Includes student-led discussions for part of each class. Satisfactory (S) or No Credit (NC) grading is not available.

SOC 186G Seminar in Micro Sociology 4 Seminar, 3 hours; individual study, 6 hours; written work, 2 hours; extra reading, 1 hour. Prerequisite(s): SOC 003 and SOC 004 with grades of “C-” or better; upper division standing in Sociology; or consent of instructor. Seminar on the theoretical and empirical work on the dynamics of interpersonal behavior. Includes emotions, motivations, status, roles, social structure, culture, interpersonal demography, and situational ecology. Satisfactory (S) or No Credit (NC) grading is not available.

SOC 187 Capstone Seminar in Sociology 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): SOC 003 and SOC 004 with grades of “C-” or better; upper-division standing; a major in sociology. Examines selected topics in Sociology through readings, oral presentations, research and writing, and active student participation in seminar discussions. Course is repeatable as topics change to a maximum of 12 units.

SOC 189 Globalization and Development 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): SOC 001 with a grade of C- or better or SOC 001H with a grade of C- or better; SOC 004 with a grade of C- or better; restricted to class level standing of junior, or senior; or consent of instructor. Examines the trend, nature, and implications of environmental reform; the nature of distributive impacts (costs and benefits); environmental conflict resolution; land-use decision making; and the placement of noxious facilities in minority, working class, and poor communities.

SOC 190 Special Studies 1 to 5 Individual Study, 3 to 15 hours. Prerequisite(s): upper-division standing; consent of instructor and Department Chair. Individual study, directed by a faculty member, to meet special curricular needs. Course is repeatable to a maximum of 15 units.

SOC 195 Senior Thesis 2 to 4 Total credit may not exceed 12 units. Required for all participants in the department’s senior honors program, who must enroll for 4 units per quarter for a total of three quarters. Students wishing to undertake senior thesis projects outside the senior honors program, may enroll in SOC 195 for 2-4 units per quarter for one, two, or three quarters.

SOC 197 Research For Undergraduates 1 to 4 variable hours, Prerequisite(s): upper-division standing with consent of instructor. Directed original research. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.
SOC 198I Individual Internship in Sociology 1 to 12 Internship, 2 to 24 hours; written work, 1 to 12 hours. Prerequisite(s): SOC 004 with a grade of C- or better; restricted to class level standing of junior, or senior; and consent of instructor. Individual internship in community agencies to observe community processes. Course is repeatable to a maximum of 16 units.

SOC 199H Senior Honors Research 1 Research, 3 hours. Prerequisite(s): senior standing in Sociology. Required seminar for all participants in the department’s senior honors program. Must be taken in conjunction with SOC 195, and for a total of three quarters. Course is repeatable.

Graduate Courses

SOC 200 Research Design 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Provides basic training in research design for sociologists. Begins with strategies for deriving theoretically informed empirical questions. Proceeds with discussion of how to collect and analyze data most appropriate to answer such questions. This course is required for both the M.A. and Ph.D. in Sociology. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

SOC 202A History of Sociological Theory 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the development of sociological theory from 1830 to 1930, stressing the major ideas, concepts, and principles developed by early social theorists.

SOC 202B Contemporary Sociological Theory 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): SOC 202A or consent of instructor. Examines sociological theory from 1930 to the present, stressing the major ideas, analyses, and principles developed by contemporary theorists.

SOC 203A Quantitative Methods I 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing in Sociology or consent of instructor. Covers principles of partial and joint association, variance, and statistical estimation through the use of the general linear model for normal linear regression with continuous or categorical multiple independent variables. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

SOC 203B Quantitative Methods II 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing in Sociology; SOC 203A or equivalent or consent of instructor. Covers generalizations of the general linear model to limited dependent variables. Also covers mixed models for data arising from nested, time-series, and pooled cross-sectional and time-series designs. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

SOC 204A Qualitative Methods I 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An overview of the uses of qualitative methods in sociology. Topics include epistemological questions, ethnography, interviewing, historical and comparative methods, and research ethics. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

SOC 204B Qualitative Methods II 4 Seminar, 3 hours; extra reading, 2 hours; research, 2 hours. Prerequisite(s): SOC 204A, graduate standing or consent of instructor. Designed to develop skills in conducting qualitative research. Emphasizes with the organization, interpretation/analysis, and presentation of textual data. Students who take this course to meet Sociology M.A./Ph.D. requirements receive a letter grade; other students may be graded Satisfactory (S) or No Credit (NC) with consent of the instructor.

SOC 205 Categorical and Survival Data Analysis 4 Seminar, 3 hours; laboratory, 1 hour; extra reading, 2 hours. Prerequisite(s): SOC 203B, graduate standing or consent of instructor. Introduces the analysis of limited dependent variables in social science and epidemiologic research. Covers in detail survival analysis including recent advances and emerging controversies. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

SOC 206 Advanced Methods in Quantitative Sociology 2 or 4 Seminar, 2 or 4 hours. Prerequisite(s): graduate standing or consent of instructor. Discusses sociological works in the quantitative tradition. Emphasizes developing and refining skills in quantitative methods. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content or topic changes to a maximum of 12 units.

SOC 208 Advanced Methods in Qualitative Sociology 2 or 4 Seminar, 2 or 4 hours. Prerequisite(s): graduate standing or consent of instructor. Discusses sociological works in the qualitative tradition. Emphasizes developing and refining skills in qualitative methods. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content or topic changes to a maximum of 12 units.

SOC 210 Citizenship 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Considers theories of citizenship. Focuses on the intersection of politics, economics, and culture, combining theoretical work and applied study. Designed for graduate students interested in social and political theory, cultural studies, and cultural policy studies. Sociology graduate students who are not advanced to candidacy for the Ph.D. receive a letter grade; other students receive a letter grade or petition for a Satisfactory (S) or No Credit (NC) grade.

SOC 220 Evolutionary Sociology 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing. Reviews theory and research within sociology on evolutionary processes. Includes stage models of societal evolution, rise and demise of inter-societal or world systems, and biological bases for human behavior, interaction, and social organization.

SOC 232 Proseminar in Sociology 2 Lecture, 2 hours. Prerequisite(s): admission to the graduate program. An orientation to sociology as a scholarly discipline and empirical science. Includes an overview of ethical standards required of members of the American Sociological Association and training in seeking external fellowships and grants. Required of all first-year graduate students. Graded Satisfactory (S) or No Credit (NC).

SOC 240 Sociology of Gender 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Course will cover a broad variety of issues in the sociology of gender including socialization to gender roles, sexuality and sexual relations, housework, changing patterns of labor force participation, women in politics, and other germane issues. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and advisor.

SOC 242 (E-Z) Sociological Theory 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): SOC 202A or SOC 202B; graduate standing. Advanced study in sociological theory: E. History Of Theory; F. Issues In Contemporary Theory; G. Issues In Theory Construction; M. Macrostructural Analysis.

SOC 243 (E-Z) Special Topics in Sociology 4 Lecture, 3 hours. Prerequisite(s): graduate standing. Critical analysis of current theory and research in special areas of sociology. Covers a single topic not contained in a regular course. Each topic is announced when the course is offered.

SOC 243E Evolutionary Sociology 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing. Consent of instructor. Examines new theoretical approaches that pursue evolutionary logic in sociology. Considers how these new theoretical insights and perspectives can be incorporated into traditional sociological models. Students who take the course to meet specialization requirements receive a letter grade; other students receive a letter grade or Satisfactory (S) or No Credit (NC) grade.

SOC 243F Sociology of Aging 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing; consent of instructor. Examines new theoretical approaches that pursue evolutionary logic in sociology. Considers how these new theoretical insights and perspectives can be incorporated into traditional sociological models. Students who take the course to meet specialization requirements receive a letter grade; other students receive a letter grade or Satisfactory (S) or No Credit (NC) grade.
SOC 243G Geographic Information Systems and Mapping in Sociology and Other Social Sciences 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): graduate standing; consent of instructor. Introduces principles and techniques of geographic information systems and mapping in relation to sociology and other social science disciplines, such as political science, anthropology, history, and economics. Explores research applications in sociology and related disciplines. Students who take the course to meet specialization requirements receive a letter grade; other students receive a letter grade or Satisfactory (S) or No Credit (NC) grade.

SOC 243J Comparative and World Historical Sociology 4 Lecture, 4 hours. Prerequisite(s): graduate standing; consent of instructor. Topics include comparative national development, comparing world-systems, globalization, and social movements. Students who take the course to meet specialization requirements receive a letter grade; other students receive a letter grade or Satisfactory (S) or No Credit (NC) grade.

SOC 243K Social Change: Global Perspectives 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing; consent of instructor. Analyzes the globalization of the world from the Paleolithic era to the present, emphasizing the modern period. Gives students a holistic understanding of social change by examining topics grouped under the rubric of globalization today. Students who take the course to meet specialization requirements receive a letter grade; other students receive a letter grade or Satisfactory (S) or No Credit (NC) grade.

SOC 243R Religion and Society 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing; consent of instructor. Analysis of the relationship between society and religion. An examination of the social structures of selected Eastern and Western religions and the interplay of religion with other societal institutions from both a historical and comparative perspective. Students who take the course to meet specialization requirements receive a letter grade; other students receive a letter grade or Satisfactory (S) or No Credit (NC) grade.

SOC 243S Social Movements 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing; consent of instructor. Provides an overview of the sociological literature on social movements. Reviews major theoretical debates about the rise, development, and impact of social movements as well as determinants of participation in social movements. Examines classic and contemporary case studies of various kinds of social movements. Students who take the course to meet specialization requirements receive a letter grade; other students receive a letter grade or Satisfactory (S) or No Credit (NC) grade.

SOC 244 Institutional Analysis 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. The comparative and historical analysis of human social institutions, with emphasis on: (a) the emergence and development of the basic institutional systems of economy, polity, kinship, religion, law, and education; (b) the structure and process of these institutions in varying types of societies; (c) the interrelation of these institutions to each other and to other structuring processes. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and advisor.

SOC 245 Large-Scale Organizations 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A review of the sociological literature on large-scale organizations. Provides an introduction to rational, political, ecological, economic, and institutional models of large-scale organizations. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and advisor.

SOC 246 Race and Class Inequality 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduction to the various theories of racial and class inequality. Areas covered will include social scientific explanations for racial and ethnic inequality; ideological justifications for racial, ethnic, and class inequality; intersection of caste, class, and race in world inequality; and strategies to end inequality. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and advisor.

SOC 248 Core Course On Social Psychology 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A review of the sociological literature on social psychology. Students who take the course to meet specialization requirements receive a letter grade; other students receive a letter grade or Satisfactory (S) or No Credit (NC) grade.

SOC 249 Contemporary Research and Theory in Criminology and Sociological Studies 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Review of basic issues and major contributions in studies of crime, deviance, and law. May be taken Satisfactory (S) or No Credit (NC) with permission of instructor and advisor.

SOC 250 Thesis Preparation 4 Seminar, 3 hours; Research, 3 hours. Prerequisite(s): SOC 200. Imparts the logic, process, and style of professional sociological research as students engage in supervised research integrating theory with data to satisfy the thesis requirements. Includes strategies to complete and communicate a thorough literature review, formulate theoretically driven empirical questions, report analytical results in a style consistent with professional standards. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

SOC 251 Current Research in Political Economy and Global Social Change 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Reviews current research in the field of political economy and global social change. Emphasizes new developments and promising new directions. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable.

SOC 253 Current Research in Organizations and Institutions 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Reviews the latest research and theory on organizations and institutions, focusing on the relationship between organizations and institutions or between one institutional complex and the organizational systems within it. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

SOC 254 Current Research in Social Psychology 4 Seminar, 2 hours; research, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Reviews current theory and research and addresses future directions in social psychology. Graded Satisfactory (S) or No Credit (NC).

SOC 255 (E-Z) Topics in Large-Scale Organizations 4 Seminar, 3 hours; research, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Advanced study of large-scale organizations: I. Organizational Theory; L. Methods Of Organizational Research; M. The Sociology Of Work; N. Economic Organization; O. Social Organization Of Sciences. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

SOC 256 Current Research in Feminist and Gender Sociology 4 Seminar, 2 hours; extra reading, 3 hours; written work, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Reviews current theory and research in feminist and gender sociology, with particular attention to new developments in the field. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 12 units.

SOC 257 (E-Z) Topics in Institutional Analysis 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Advanced seminars in institutional analysis: E. Economic Sociology; F. The Sociology Of Family And Kinship; G. The Sociology Of Education; J. Political Sociology. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.
SOC 258 Quantitative Macro Comparative Methods 4 Seminar, 3 hours; research, 2 hours; term paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Imparts methodological skills necessary to advance quantitative-macro comparative social science. Begins with the logic and trans-methodological concerns of macro-comparative analysis. Quantitative methods covered include models for static time-series cross-section and panel data, dynamic panel data, nested data, structural equations, social networks, identification/causality and techniques for testing conditional hypotheses and visualization. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

SOC 259 Research Practicum On Transnational Social Movements 2 Lecture, 2 hours; discussion, 1 hour; extra reading, 1 hour; written work, 1 hour; research, 1 hour. Prerequisite(s): graduate standing in Sociology. Examines the history of and current developments in transnational social movements including inter-movement relations and North-South issues within movements, as well as the development of global civil society. Focuses on collaborative research projects, though may also include development of individual projects. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable for a maximum of 12 units.

SOC 260 Research Practicum On the Evolution of Settlements and Polities 2 Lecture, 5 hours; discussion, 5 hours; practicum, 1 hour; workshop, 5 hours; extra reading, 2.5 hours; individual study, 2.5 hours; research, 2.5 hours; written work, 2.5 hours. Prerequisite(s): graduate standing in Sociology. Focuses on ongoing collective research projects on the evolution of polities and settlements. Studies the growth and decline of human settlements and polities in world historical and evolutionary perspective including those in nomadic and small-scale sedentary societies, early cities and states, and the emergence of empires and contemporary world cities. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 12 units.

SOC 261 World-Systems Analysis 4 Seminar, 4 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on social evolution, world-systems analysis, and globalization. Students who take the course to meet specialization requirements receive a letter grade; other students receive a letter grade or Satisfactory (S) or No Credit (NC) grade.

SOC 262 Feminist Theory 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Provides an overview of recent debates about theory and method in gender studies. Explores relationships between feminist theory, feminist practice, and social science. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

SOC 263 Women and Work in World Historical Perspective 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the role of women as workers in a variety of societies. Considers the role of women in developments and the impact of development on women’s economic roles. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

SOC 264 (E-Z) Topics in Gender Studies 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing. Advanced study in the sociology of gender. E. Gender And Families; F. Domestic And Sexual Violence; G. The Sociology Of Men; M. Gender In Comparative Perspectives; P. Gender, Politics, And Public Policy; T. Transnational Sex, Romance, And Marriage. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

SOC 265 (E-Z) Topics in Race and Class Inequality 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing. Advanced study in race and class inequality. F. Black America; I. Chicanos Sociology, I. World Inequality; R. Racial, Ethnic, And Immigrant Families. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

SOC 266 Race and Ethnic Relations 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A review of sociological literature on race and ethnic minorities, patterns of conflict and ethnic antagonism, and systems of dominance. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

SOC 268 Law, Race, Class, and Gender 4 Seminar, 3 hours, research, 3 hours, Prerequisite(s): graduate standing or consent of instructor. Presents an analysis of how issues of race, class, and gender shape legal thought and jurisprudence. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and advisor.

SOC 271 Inequality and Stratification 4 Lecture, 3 hours; seminar, 1 hour; research, 2 hours; term paper, 1 hour; written work 1 hour; individual study, 4 hours. Prerequisite(s): graduate standing or consent of instructor. Survey’s the broad sociological literature on inequality and stratification. Key foci include the principal causes of income and earnings inequality in the United States and internationally. After some attention to general theory, weekly topics include causes related to race, class, and gender, organizations, structural and socioeconomic changes and institutions. May be taken Satisfactory (S) or No Credit (NC) by students advanced to candidacy for the Ph.D.

SOC 278 Punishment and Correction: Evaluating Theories and Policies 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Takes a critical and evaluative approach to the punishment and correctional systems, assessing what “works and doesn’t work” in efforts to reduce crime and delinquency. Examines prisons, probation, and other crime control measures from a perspective emphasizing the need for systematic evaluation research. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

SOC 280 (E-Z) Topics in Criminology and Sociological Studies 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing. Advanced seminars in criminology and sociological studies. E. Patterns Of Criminal And Deviant Behavior; F. Ecological Perspectives On Crime And Delinquency; G. Biological And Psychobiological Studies Of Crime And Delinquency; I. Conflict And Radical Approaches In Criminology And Sociological Studies; J. Sociological Theories Of Law; K. Law, Power, And Social Conflict; M. Political Criminality; S. Substance Use And Crime. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

SOC 281 Political Economy and Global Social Change 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on classical and contemporary political economy, social movements, and the historical development of social systems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

SOC 282 International Migration 4 Seminar, 4 hours. Prerequisite(s): graduate standing or consent of instructor. A research course in the concepts, theories, and techniques used in the analysis of international migration. Covers the nature and origins of patterns and trends in global migration from colonial times to the twenty-first century. Provides an overview of migration theories, migration policies, current research on immigration. Course is repeatable.

SOC 284 Medical Sociology Graduate Seminar 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Survey’s key concepts and theories in medical sociology and their application to a variety of health issues. Exemplar topics include social construction of health and illness, medicalization, stigma and labeling, patient-provider interaction, sociolinguistics; J. Social Psychology Of Emotions; K. Small Groups; N. Social Psychology Of Gender; S. Self And Identity. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

SOC 285 (E-Z) Topics in Social Psychology 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Advanced study in family and social psychology. E. Theory In Social Psychology; F. Neurosociology, G. The Interaction Process; I. Sociolinguistics, J. Social Psychology Of Emotions; K. Small Groups; N. Social Psychology Of Gender; S. Self And Identity. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.
SOC 286 Life Course and Health 4 Seminar, 4 hours; term paper, 1 hour. Prerequisite(s): graduate standing; or consent of instructor. Covers sociological theories, interdisciplinary theories and methods for life course approaches to health. Discusses health outcome measurements, study design, and sources on bias. Includes historical influence, structural constraints, human agency, minority health and early origins of adult health and intergenerational influence. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

SOC 287 Migration and Health 4 Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing; or consent of instructor. Provides a comprehensive overview of the central theoretical debates and empirical work on migration and health. Topics include the theoretical and methodological challenges associated with studying migration and health; the long-term health effects of migration; and emerging areas in migration and health. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

SOC 288 Social Determinants of Health 4 Seminar, 4 hours; term paper, 5 hours. Prerequisite(s): recommended that students have basic qualitative and quantitative methods training; graduate standing; or consent of instructor. Focuses on how social factors shape patterns and experiences of health and illness for individuals and populations. Covers the impact on accessing medical care. Includes many other “mechanisms” or “pathways”, social environments, personal beliefs, behaviors/lifestyles, stress, and access to resources, that may promote or harm health. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

SOC 290 Directed Studies 1 to 6 Scheduled research, 3-15 hours; consultation, 1 hour. Prerequisite(s): graduate standing and consent of instructor. This course is designed to provide students with reading and research work under the tutorial supervision of a faculty member in support of developing their knowledge of specialty areas and/or preparing original research work. With consent of the graduate advisor, this course may be taken for a letter grade to satisfy required seminars in the period of specialization if regular seminars are not available. Otherwise course will be graded Satisfactory (S) or No Credit (NC). Course is repeatable.

SOC 291 Individual Study in Coordinated Areas 1 to 12 Individual Study, 3 to 36 hours. Prerequisite(s): graduate standing. A program of study designed to advise and assist candidates who are preparing for doctoral examinations. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

SOC 293 Research Topics in Sociology 2 Lecture, 2 hours. Prerequisite(s): graduate standing in Sociology. A series of lectures by guests, faculty, and advanced graduate students on research topics in sociology. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

SOC 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing. Individual research performed under the direction of a faculty advisor. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

SOC 299 Research For Thesis Or Dissertation 1 to 12 Prerequisite(s): graduate standing or consent of instructor. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Course

SOC 301 Directed Studies in the Teaching of Sociology 2 Consultation, 1 hour; practical, 3 hours. Prerequisite(s): consent of instructor; prior or concurrent enrollment in the Teaching Assistant Development Program offered by the Graduate Division. Discussion and evaluation of pedagogical techniques and materials used in the teaching of sociology at the college level. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Soil and Water Sciences

The program in Soil and Water Science is not currently accepting new students. We encourage you to visit the catalog section for Environmental Sciences to meet your graduate study needs.

If you have questions please call (800) 735-0717 or (951) 827-5621.

Southeast Asian Studies Minor

Subject abbreviation: SEAS
College of Humanities, Arts, and Social Sciences

Dr. David Biggs, Ph.D., Director, Program Office, INTS 3111
(951) 827-1877
dbiggs@ucr.edu; seatrip.ucr.edu

The SEATRIP Program at the University of California, Riverside—Southeast Asia: Texts, Rituals, Performance—brings together scholars who share an ongoing interest in the arts and humanities and are actively engaged with the languages and expressive cultures of Southeast Asia.

The Southeast Asian Studies minor is an interdepartmental program centered on the study of the arts and cultures of Southeast Asia. The scholars associated with the Program address regionally-specific texts, rituals and performances. They seek to develop better understandings of the forms and practices through which ideas and ideologies are creatively expressed, shaped and communicated within and among different societies of Southeast Asia as well as the Southeast Asian diaspora.

Southeast Asian Studies Graduate Program

Christina Schwenkel, Chair (Anthropology)
Rican Vue, Ph.D. (Education)
Deborah A. Wong (Music)
Darylle Williams, Dean, ex officio

1. Lower-division requirements (8 units)
   a) Four (4) units from lower lower-division lecture courses on Southeast Asian literature and culture:
      AST 049/HIST 046/SEAS 047, AST 062/CLPT 062, AST 063/CLPT 063, AST 064/MCS 049/VNM 064, AST 065
   b) Four (4) units chosen from above or from one of the Southeast Asian languages (Vietnamese/Indonesian/Tagalog).

2. Upper-division requirements (16 units):
   a) Sixteen (16) units in Southeast Asian literature and culture chosen from
      ANTH 126/AST 123/DNCE 123/MUS 123,
   b) No more than Four (4) units may count from performance ensemble courses.
Graduate Program

The Master’s Program in Southeast Asian Studies is an interdepartmental program centered on the study of the arts and cultures of Southeast Asia and its diasporas. To understand Southeast Asia as a region, students need to make sense of and engage with its diverse expressive forms of culture (including visual arts, literature, and performance) which are crucial in building and maintaining individual as well as group identity both within and across national or ethnic boundaries.

This program is designed for students with a strong interest in Southeast Asia, including those already admitted or enrolled in another graduate program. Students can be concurrently enrolled in both the Southeast Asian Studies M.A. program and another graduate degree program. Students may also apply concurrently for the Southeast Asian Studies M.A. - Ph.D. Track in Anthropology, Comparative Literature, Ethnic Studies, History or Music.

Admission

All applicants must fulfill the standard admission requirements as established by the Graduate Division. Additionally, applicants must submit a Statement of Purpose to indicate a serious interest in Southeast Asian Studies (or a specific country or area in this region) as well as a writing sample (such as a past term paper or course essay) to demonstrate basic skills of scholarship.

Foreign Language

Students must acquire (or increase) a distinct level of proficiency in at least one language relevant to Southeast Asian Studies prior to beginning research for the thesis and no later than the fifth quarter in the program. The required proficiency can be demonstrated by way of an exam, by completing one year of course work with a “B” or better, or by alternate certification, including completion of an approved intensive summer language program. International students from Southeast Asia may use their native language to fulfill this requirement.

Course Work

All students are required to pass the Proseminar in Southeast Asian Studies (ANTH 202/CPLT 200/SEAS 200) with a “B” or better. Additionally, students must pass (with a “B” or better) a graduate level seminar in four of the following six areas (any 100-level course must be paired with SEAS 292):

1. Southeast Asian performance
   ANTH 126/AST 123/DNCE 123/MUS 123,
   ANTH 176/AST 127/DNCE 127/ETST 172/MUS 127,
   AST 119/MUS 119, AST 126/MUS 126

2. Southeast Asian religions
   ANTH 257/RLST 253/SEAS 202, RLST 111,
   RLST 150/SEAS 150, RLST 200B, RLST 252

3. Southeast Asian cultures
   SEAS 203/ANTH 203, ANTH 136/SEAS 136,
   ANTH 140I

4. History of Southeast Asia
   SEAS 204/HIST 242, AST 126/HIST 185/SEAS
   185, AST 129/HIST 186/SEAS 186, AST 160/
   HIST 164/SEAS 184/VNM 184

5. Literatures of Southeast Asia
   SEAS 205/CPLT 205, AST 163/CPLT 163/
   SEAS 163, AST 167/CPLT 167/SEAS 167

6. Media in Southeast Asia
   SEAS 206, AST 187/SEAS 177, CPLT
   173U/MCS 173U

In addition, students can select four other graduate seminars or approved upper division undergraduate courses in accordance with their main field of interest and after approval by the Graduate Advisor and the student’s Thesis Committee. A total of 40 units of coursework, including thesis, are required for the degree in Southeast Asian Studies.

Students concurrently enrolled in another graduate program may, when appropriate, include units earned in that program toward the 40 units of the M.A. in Southeast Asian Studies. However, there must be at least 36 units uniquely applied to the Southeast Asian Studies degree.

Plan I (Thesis)

Students enrolled in the Southeast Asian Studies Graduate Program (for the terminal M.A.) who choose the thesis option must submit an essay (thesis) of 50-70 pages reflecting original research, written under the supervision of a member of the program who also functions as the chair of their Thesis Committee. At the beginning of the second year students should write a research proposal outlining their research project. Approximately ten pages in length this proposal should describe the aims of the research and provide a broader theoretical framework. After this is approved students begin to conduct individual research in the field or in the library. Students must enroll in a minimum of 4 units of Thesis Study (SEAS 299) or Directed Research (SEAS 297) under the supervision of a Southeast Asian Studies faculty. Before filing the thesis with the Graduate Division students must pass a formal oral examination or defense.

Plan II (Comprehensive Exam)

a) Students enrolled in the Southeast Asian Studies Graduate Program (for the terminal M.A.) who choose the comprehensive examination must submit a final project made up of two components: a) participation in community activism, volunteer work, or an internship; b) a written report of 25-30 pages. Students must enroll in a minimum of 4 units of Directed Research (SEAS 297) under the supervision of a Southeast Asian Studies faculty who also functions as the chair of their Comprehensive Exam Committee. The student’s coursework, activism or internship experiences, and written report will be the basis for a comprehensive oral exam. Students must submit the written report to their adviser and exam committee members before the exam. Students must pass the comprehensive exam in order to receive their M.A. degree.

b) Students concurrently enrolled in another degree program requiring an M.A. thesis may (with the approval of the Southeast Asian Studies faculty) be awarded the M.A. degree by passing a comprehensive oral examination on the basis of that thesis connected to Southeast Asia and its diasporas.

Concurrent Enrollment

Concurrent Enrollment students are enrolled in both the MA SEAS program and a Ph.D. program in a cooperating department. These students must complete the following 40 units to earn the degree:

• 20 units of core courses, listed above, unique to SEAS program.
  – SEAS 200
  – 4 courses from the 6 above areas
• 16 elective units can be from the home Ph.D. program with the approval of SEAS faculty.

4 units in either SEAS 297 or 299 toward completing the comprehensive exam or thesis.

M.A. – Ph.D. Track

M.A. – Ph.D. Track students are in the MA SEAS program and have been preliminarily accepted to a Ph.D. program in a cooperating department. These students must complete the following 40 units to earn the degree:

• 20 units of core courses, listed above, unique to SEAS program.
  – SEAS 200
  – 4 courses from the 6 above areas
• 16 elective units can be from the home Ph.D. program with the approval of SEAS faculty.
  – 4 units in SEAS 299 toward completing the thesis.

Continuation in the Ph.D. program is not guaranteed, but subject to review by the cooperating department. After completion of the M.A. in Southeast Asian Studies, M.A. – Ph.D. track students will need to reapply through Graduate Admissions (fee waived) to the cooperating department for approval and official admission into the Ph.D. program.

University Requirements

All master’s students must be enrolled for at least three quarters to fulfill the University residency requirement and must hold at least a 3.00 GPA in all upper division and graduate level course work related to the degree. A minimum of 40 units must be completed of which 36 must be graduate level (200 level) or approved upper division undergraduate (100 level) and apply only to the M.A. in Southeast Asian Studies.

Normative Time to Degree

Two years

Lower-Division Courses

SEAS 062 Introduction to Southeast Asian Literature
Lecture, 3 hours; extra reading, 1 hour. Prerequisite(s): none. An introduction to modern and contemporary Southeast Asian literature and culture with a focus on individual national histories. Explores the relationship between aesthetics, politics, and academic scholarship. Readings are in translation; classes conducted in English. Cross-listed with CPLT 062, and AST 062.
SEAS 063 Reading Southeast Asian Stories 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. An introduction to the modern short story in Southeast Asia with a focus on literariness and the act of reading. Readings are in translation; classes conducted in English. Course is repeatable as content changes to a maximum of 8 units. Cross-listed with CPLT 063, and AST 063.

SEAS 064 Introduction to Vietnamese and Diasporic Film Culture 4 Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. Engages in critical viewing strategies and analytical visual critique. Explores the revival of film production in Vietnam following the Vietnam War, with a focus on the means of production, state control, and international distribution. Readings are in translation; classes conducted in English. Cross-listed with VNM 064, AST 064, and MCS 049.

Upper-Division Courses

SEAS 123 Southeast Asian Performance 4 Lecture, 3 hours; screening, 2 hours; extra reading, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Introduction to the roles and genres of expressive culture in Southeast Asia, including dance, music, theater, film, and digital culture. Performance is discussed as both a time-honored and a contemporary medium for cultural production, from the courts to everyday experience. Cross-listed with ANTH 126, AST 123, DNCE 123, and MUS 123.

SEAS 127 Music Cultures of Southeast Asia 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of music, dance, theatre, and ritual in the Philippines, Indonesia, Malaysia, Thailand, Myanmar (Burma), Laos, Cambodia, and Vietnam. Designed for the student interested in the performing arts and cultures of mainland and insular Southeast Asia. No Western music background is required. Cross-listed with ANTH 176, AST 127, DNCE 127, ETST 172, and MUS 127.

SEAS 130 Filipino American Culture 4 Seminar, 3 hours; screening, 3 hours. Prerequisite(s): MCS 001. Explores the politics of a range of Filipino American expressive, performative, and creative forms (e.g., Pilipino Culture Night) video, art, fiction, theater, in tandem with the origins of Filipino American civic existence and its links to histories of U.S. racialization, racialized industrialization, and racialized frontier warfare. Cross-listed with ETST 143.

SEAS 136 Anthropological Perspectives On Gender in Southeast Asia 5 Lecture, 3 hours; discussion, 1 hour; field, 1 hour; extra reading, 2 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or equivalent. Examines the intersections of gender, power, and sexuality in post-colonial Southeast Asia. Revisits early ethnographic claims of gender equality. Addresses current anthropological literature on the effects of colonialism, capitalism, and globalization on gender roles and relations within national and transnational contexts. Cross-listed with ANTH 136. Credit is awarded for only one of ANTH 136/SEAS 136 or ANTH 136S/SEAS 136S.

SEAS 136 Anthropological Perspectives On Gender in Southeast Asia 5 Lecture, 3 hours; discussion, 1 hour; field, 1 hour; extra reading, 2 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or equivalent. Examines the intersections of gender, power, and sexuality in post-colonial Southeast Asia. Revisits early ethnographic claims of gender equality. Addresses current anthropological literature on the effects of colonialism, capitalism, and globalization on gender roles and relations within national and transnational contexts. Cross-listed with ANTH 136S. Credit is awarded for only one of ANTH 136/SEAS 136 or ANTH 136S/SEAS 136S.

SEAS 137 The Vietnamese Americans: the Refugee and Immigrant Experience 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on the Vietnamese American experience in contemporary society. Emphasizes the relationship of Vietnamese Americans to the larger society and on intergenerational strains and conflicts. Topics include socioeconomic and educational problems, family, religion, and the relationship between Vietnamese Americans and other ethnic groups. Cross-listed with ETST 137.

SEAS 143 Critical Filipino(a) Studies: Histories and Legacies of United States Conquest, Colonialism, & Empire 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): ETST 001 or ETST 001H or ETST 002 or ETST 002H or ETST 003 or ETST 004 or HIST 004 or ETST 005 or ETST 005H or ETST 007 or ETST 007H or ETST 008 or ETST 008H or ETST 012H or ETRL 012H or ETRL 012H or ETST 012H or ETST 014; or consent of instructor. Critically examines and theorizes the historical impact and legacies of U.S. conquest and colonialism in the Philippines. Analyzes the origins of Filipino American civic existence and its links to histories of U.S. racial formation, racialized industrialization, and racialized frontier warfare. Cross-listed with ETST 143.

SEAS 143A Critical Filipino(a) Studies: Histories and Legacies of United States Conquest, Colonialism, & Empire 5 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): one of the following courses: ETST 001, ETST 001H, ETST 002, ETST 002H, ETST 003, ETST 004 or HIST 004, ETST 005, ETST 005H, ETST 007, ETST 007H, ETST 008, ETST 012/RLST 012, ETST 012/RLST 012H, ETST 014; or consent of instructor. Critically examines and theorizes the historical impact and legacies of U.S. conquest and colonialism in the Philippines. Analyzes the origins of Filipino American civic existence and its links to histories of U.S. racial formation, racialized industrialization, and racialized frontier warfare. Cross-listed with ETST 143A.

SEAS 149 Southeast Asian Religions 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): one Religious Studies course or upper-division standing or consent of instructor. Introduces aspects of religion in various Southeast Asian countries including Indonesia, Malaysia, Thailand, Cambodia, Vietnam, and the Philippines. Provides contextualized readings featuring historical, anthropological, literary, and other disciplinary perspectives. Cross-listed with RLST 149.

SEAS 150 Islam in Southeast Asia 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces the religious, intellectual, and cultural history of Muslim Southeast Asia. Includes Indonesia, Malaysia, and Brunei, as well as minority communities in Singapore, Thailand, Cambodia, and the southern Philippines. Examines a series of contextualized readings in translated primary sources. Approaches texts from historical, anthropological, literary, and other disciplinary perspectives. Cross-listed with RLST 150.

SEAS 161 Translating Modern Southeast Asian Texts 4 Lecture, 3 hours; term paper, 1.5 hours; written work, 1.5 hours. Prerequisite(s): upper-division standing; knowledge of one Southeast Asian language is recommended. An introduction to translating modern Southeast Asian texts into English. Presents translations of texts from Vietnam, Indonesia, and the Philippines in a context of theory. Materials are in English. Course is repeatable as content changes to a maximum of 8 units. Cross-listed with AST 161.

SEAS 162 Vietnamese Literary History 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing. A historical analysis of Vietnamese literature from its oral tradition to contemporary fiction. Follows the formation of the nation-state and the subsequent struggles with the Chinese, French, Japanese, and Americans. No knowledge of Vietnamese required. Readings are in translation or bilingual editions. Classes are conducted in English. Cross-listed with AST 162, VNM 162, and HIST 187.

SEAS 163 Nationalism and the Novel 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the novel and its role within nationalism as a representative summary or mirror of the nation. Cross-listed with CPLT 163, and AST 163.

SEAS 164 Vietnamese American Culture 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of the pervasive aspects of Vietnamese American culture. Includes shared histories, acculturation patterns, class diversity, identity struggles, community-building, literary and cultural production, youth issues, and cultural survival. Also introduces foundational literature, visual culture, and scholarship in the field. Cross-listed with VNM 164, and AST 164.

SEAS 165 (E-Z) Themes in Vietnamese Literature 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior or senior. An exploration of Vietnamese literature in translation as seen through the lens of a particular theme or issue. Focuses on the implications of gender and sexuality on nation formation. All materials are read or viewed in English. E. Women And War. Cross-listed with AST 165 (E-Z), GSST 165 (E-Z), and VNM 165 (E-Z).
SEAS 166 Vietnam and the Philippines 4
Lecture, 3 hours; written work, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the comparative national histories of Vietnam and the Philippines by way of great literary works in various genres including poetry, short fiction, and novels. All materials are read in English. Cross-listed with CPLT 166, AST 166, and VNM 166.

SEAS 167 Postcolonial Literature and Criticism in Southeast Asia and South Asia 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores how the theoretical concepts of postcolonial criticism inform and challenge the literature of Southeast Asia and South Asia, as the literature itself pushes the limits of the criticism. Addresses themes of nation, identity, space, gender, home, diaspora, alterity, history, sexuality, transnationalism, neocolonialism, tourism, and education. Cross-listed with CPLT 167, and AST 167.

SEAS 168 Javanese Gamelan Ensemble: Beginning 2
Studio, 6 hours. Prerequisite(s): upper-division standing or consent of instructor. Study and performance of the Central Javanese gamelan, consisting mainly of gongs and gong-chime instruments. Readings and discussions focus on Javanese culture. Course is repeatable. Cross-listed with AST 168 and MUS 168.

SEAS 170 Rondalla Ensemble 1 to 2
Studio, 2 to 4 hours. Prerequisite(s): upper-division standing or consent of instructor. Study and performance of the Filipino rondalla, an ensemble consisting of various sizes of lure-like and guitar-like instruments. Discussions focus on Filipino culture. Cross-listed with AST 170 and MUS 170. Course is repeatable.

SEAS 172 Gender in Southeast Asian Diasporic Literature and Film 5
Lecture, 3 hours; screening, 3; written work, 1 hour; extra reading, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on former Indochinese refugees who are producing literature and films in the United States and France. Examines how the perception of Indochina has been constructed, particularly how the region has been gendered female in the colonial imaginary. Explores the return of Southeast Asian immigrants to the Western gaze. Cross-listed with GSST 122, and MCS 142.

SEAS 175 American Women: Writing the Self in Literature and Film 4
Lecture, 3 hours; screening, 1 hour; written work, 1 hour; extra reading, 1 hour. Prerequisite(s): MCS 101, upper-division standing or consent of instructor. Analyzes Asian American autobiographies and films written and directed by women. Explores why the genre of autobiography is enabling and contentious within Asian American women’s writings. Examines films to see how such women filmmakers contend with memory, gender, and identity. Cross-listed with GSST 124, and MCS 123.

SEAS 184 The Vietnam Wars 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior, or consent of instructor. An introduction to Vietnamese history in the twentieth century. Covers the three Indochina wars (1945-1986) from different Vietnamese perspectives. Topics include experiences during French colonial rule; the anticolonial movements; periods of French and American military involvement up to 1975; the postwar society; and the post-doí moi society. Cross-listed with AST 160, HIST 184, and VNM 184.

SEAS 185 Southeast Asia, Prehistory to 1800 4
Lecture, 3 hours; extra reading, 3. Prerequisite(s): upper-division standing or consent of instructor. Covers the major Southeast Asian historical periods and cultures. Includes prehistory, classical kingdoms, and early modern trading states. Considers the role of ancient stories, religious systems, technologies, and art forms in forming traditional Southeast Asian identities, as well as the influences on these identities from outside the region. Cross-listed with HIST 185 and AST 126.

SEAS 186 Modern Southeast Asia, 1800 to Present 4
Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the formation of modern Southeast Asian nations and cultures since 1800. Compares colonial and postcolonial experiences in the region. Studies the formation of nationalist movements and the relationship of nationalist history with traditional and local histories. Considers the role of the individual, modern media, and global trade in the near-present. Cross-listed with HIST 186, and AST 129.

SEAS 189 Encountering Vietnam 5
Lecture, 6 hours; tutorial, 6 hours; project, 6 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on literary and historical accounts of Vietnam. Utilizes translated travel writings from different genres and eras. Proficiency in Vietnamese not required. Taught in Vietnam and offered only in summer. Cross-listed with AST 189, HIST 189, and VNM 189.

Graduate Courses

SEAS 200 Topics in Southeast Asian Studies 4
Seminar, 3 hours; written work, 2 hours; term paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. An introduction to the world of Southeast Asia and the scholarly discussions about it, with an emphasis on cultural aspects, embedded in their historical context. Materials are in English. Course is repeatable as content changes to a maximum of 12 units. Cross-listed with ANTH 202 and CPLT 200.

SEAS 201 Musics of Southeast Asia 4
Seminar, 3 hours; term paper, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on historical and ethnomusicological literature of Southeast Asia and its diasporas. Discusses scholarly literature on music and expressive culture generally, including dance, theater, and ritual. Cross-listed with MUS 272.

SEAS 202 Southeast Asian Religions 4
Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Discusses different and dynamic aspects of religion in various Southeast Asian countries, including Indonesia, Malaysia, Thailand, Cambodia, Vietnam, and the Philippines. Explores contextualized readings featuring historical, anthropological, literary, and other disciplinary perspectives on this diverse region. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as topic changes up to 8 units. Cross-listed with ANTH 257 and RLST 253.

SEAS 203 Southeast Asian Cultures 4
Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Surveys ethnographic literature on Southeast Asian cultures, with an emphasis on contemporary research. Covers anthropological approaches to the study of text, ritual, and performance practices; intercultural dynamics; the impact of colonialism and nationalism on traditional cultures; and globalization. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with ANTH 203.

SEAS 204 Approaches to Southeast Asian History 4
Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces students to central historical problems, historiographical debates, materials, and theoretical approaches in Southeast Asian history. Readings each week focus on a different theme. Course is repeatable to a maximum of 8 units. Cross-listed with HIST 242.

SEAS 205 Literature of Southeast Asia 4
Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores themes and theories related to understanding literature and literary culture in Southeast Asia, insisting that the space of literature reaches beyond the text to include all disciplines. Students critically read, engage in, and question discourses of nationhood, identity, loss, mourning, history, and memoir. Course is repeatable as content changes to a maximum of 12 units. Cross-listed with CPLT 205.

SEAS 206 Southeast Asian Diasporic Literature and Film 4
Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores the contemporary works by Southeast Asian immigrants within the United States and France. Emphasizes the concept that the dynamic production of culture is a negotiation of power and an expression of resistance. Provides an interdisciplinary framework by utilizing historical as well as theoretical works to contextualize the cultural productions. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes to a maximum of 12 units.
SEAS 243A Research Seminar in Southeast Asian History 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Discusses Southeast Asian topics from regional, comparative, and local perspectives. May be taken as a one- or two-quarter course (HIST 243A/SEAS 243A, HIST 243B/SEAS 243B). After completing both HIST 243A/SEAS 243A and HIST 243B/SEAS 243B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units. Cross-listed with HIST 243A.

SEAS 243B Research Seminar in Southeast Asian History 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor; HIST 243A/SEAS 243A. Discusses Southeast Asian topics from regional, comparative, and local perspectives. Students produce a substantial research paper that continues their work from HIST 243A/SEAS 243A. May be taken as a one- or two-quarter course (HIST 243A/SEAS 243A, HIST 243B/SEAS 243B). After completing both HIST 243A/SEAS 243A and HIST 243B/SEAS 243B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units. Cross-listed with HIST 243B.

SEAS 290 Directed Studies 1 to 6 Individual Study, 3 to 18 hours. Prerequisite(s): consent of instructor and graduate advisor. Directed study to meet special curricular needs. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

SEAS 292 Concurrent Analytical Studies in Southeast Asian Studies 1 to 4 Individual Study, 3 to 12 hours. Prerequisite(s): graduate standing; consent of instructor and graduate advisor. Taken concurrently with a 100-series course, but on an individual basis. Devoted to research, criticism, and written work at the graduate level related to the 100-series course. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

SEAS 297 Research for the Thesis 1 to 4 Thesis, 3 to 36 hours. Prerequisite(s): consent of thesis director. Research and preparation for the thesis. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Southeast Asian Studies Designated Emphasis

Subject abbreviation: SEAS
College of Humanities, Arts, and Social Sciences

Dr. David Biggs, Ph.D., Director, Program Office, INTS 3111
(951) 827-1877
dbiggs@ucr.edu, seatrip.ucr.edu

Committee in Charge
Muhamad Ali, Ph.D. (Religious Studies)
David Biggs, Ph.D. (History)
Charmaine Craig, M.F.A. (Creative Writing)
Weihsin Gui, Ph.D. (English)
Tamara Ho, Ph.D. (Gender and Sexuality Studies)
Mariam Bevri Lam, Ph.D. (Comparative Literature and Foreign Languages)
Sally A. Ness, Ph.D. (Anthropology)
Victoria Reyes, Ph.D. (Sociology)
Maria Sarita See, Ph.D. (Media & Cultural Studies)
Christina Schwenkel, Ph.D., Chair (Anthropology)
Rican Vue, Ph.D. (Education)
Deborah A. Wong, Ph.D. (Music)

The Designated Emphasis in Southeast Asian Studies, a specialization that includes new methods of inquiry in conjunction with a student's disciplinary field of interest, is awarded in addition to a Ph.D. degree.

A total of 16 units of coursework is required:

1. 12 units of course work in SEAS, from at least two departments
   a. 4 units in (required)
      ANTH 202 / CPLT 200 / SEAS 200
   b. Choose the additional 8 units from the lists below

Graduate Seminars:
ANTH 257 / RILST 253 / SEAS 202, ANTH 203 / SEAS 203, HIST 242 / SEAS 204, CPLT 205 / SEAS 205, SEAS 206, SEAS 243A, SEAS 243B

Upper Division Undergraduate Courses:

2. 4 units of Thesis Study (SEAS 299) or directed Research (SEAS 297) resulting in a paper supervised by a member of the Southeast Asian Studies Program.

Courses taken for the Designated Emphasis cannot be used toward the Ph.D. Language proficiency is preferable, though not required.

Speculative Fiction and Cultures of Science Minor

Subject abbreviation: SFCS

The minor in Speculative Fiction and Cultures of Science explores intersections among speculative fiction, science and technology studies (STS), and traditions of speculative thought. We study the pervasive role of speculative discourses in public culture, investigating the complex and reciprocal exchanges among futurist discourses, research agendas, public policy decisions, media texts, and daily life in technologically saturated societies. Using the combined perspectives of cultural studies and STS helps students develop critical literacy about their media-dominated landscape through which to understand its discourses of science and the future. Bringing speculative fictions and STS into dialogue, our scholars focus on understanding technological change in specific contexts by analyzing the texts and practices that have responded to, critiqued, and build upon the ways science shapes our cultural, material, and economic milieus. Speculative thinking and speculative fictions are central to many of the most compelling contemporary research concerns, such as the Anthropocene, climate change, genetic engineering, and discourses of the posthuman. We examine the histories and cultures of science, technology, and medicine to understand the role culture plays in the production of science and the reciprocal way changes in science and technology shape culture. Our program uniquely emphasizes the role of popular
culture and the genres of speculative fiction, in particular, for serving as an imaginative testing ground for technological innovation, articulating hopes and anxieties regarding technological change, and mediating public understandings of science and its applications.

1. Requirements (24 units)
   a) Four (4) units from SFCS 001 or from the approved substitutes ENGL 146/MCS 146 or ANTH 162.
   b) Sixteen (16) additional units, selected from the following groups. Students must take at least four (4) units from two of the three groups.

GROUP ONE: Fine Arts; selected from CRWT 162; CRWT 172; MCS 146; MCS 133; MCS 151G; MCS 153 (E-Z); MCS 170; TFDP 166C.

GROUP TWO: Humanities; selected from CPAC 118; CPAC 132; ENGL 179A; ENGL 179SA; ENGL 179B; ENGL 179C; JPN 184; HIST 105; HIST 107; HISA 147; MCS 109; MCS 147; MCS 149; MCS 157; MCS 158; MCS 166; MCS 175; PHIL 137; PHIL 167.

GROUP THREE: Social Sciences; selected from ANTH 144F; ANTH 144E; GSST 106; GSST 161; GSST 185; GSST 187; GSST 189.
   c) Four (4) units from SFCS 193 (senior seminar) or CPTL 193 or ENGL 189 or MCS 193 or PHIL 193

All students must take the introductory course (SFCS 001) and the senior seminar or approved equivalents listed above. There is no required order in which elective courses must be taken but credit in SFCS 001 is required for entry into SFCS 193.

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for information on minors.

Lower-Division Courses
SFCS 001 Introduction to Speculative Fiction and Cultures of Science
   Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. Investigates the relationship among science, technology, medicine, and the genre of science fiction. Emphasizes exchanges between technology and popular culture. Covers fiction by H.G. Wells, Kim Stanley Robinson, and Nancy Kress and critical readings by Steven Shaffer, Donna Haraway, and Bruno Latour.

Upper-Division Courses
SFCS 123 Reclaiming the Dark: Black Life Is Speculative Fiction
   Lecture, 3 hours; activity, 2 hours; extra reading, 1 hour. Pre-requisite(s): restricted to class level standing of junior, or senior, or consent of instructor. Explores alternative states of being, doing, and imagining in, around, and through Black life and culture. Covers writers, artists, and activists such as Octavia Butler, Toni Morrison, Cedric Robinson, the Combahee River Collective, N. K. Jemisin, Adrienne Maree Brown, Kevin Quashie, Nnedi Okorafor, and Ursula K. Le Guin. Cross-listed with BLKS 123.

SFCS 193 Senior Seminar in Speculative Fiction and Cultures of Science
   Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): SFCS 001; or consent of instructor. Develops skills in the formulation and investigation of research questions in science fiction and technoculture studies. Synthesizes and integrates knowledge and skills obtained in the minor. Includes a major research project and presentations by guest speakers.

Speculative Fiction and Cultures of Science Designated Emphasis

Subject abbreviation: SFCS
College of Humanities, Arts, and Social Sciences

Dana Simmons (History)
Eric Schwitzgebel (Philosophy)
Chikako Takeshita (Gender and Sexuality Studies)
James Tobias (English)
Sherryl Vint (English / Media and Cultural Studies)
Susan Zieger (English)

Designated Emphasis Requirements
The Designated Emphasis is a 12-unit interdisciplinary graduate course of study, requiring coursework across at least two departments. Two of the three required courses, if otherwise eligible, may count towards the student’s Ph.D. requirements.

1. All students must complete a ENGL 297 course with extra work mutually agreed upon by professor and student. Undergraduate courses taken to fulfill these requirements must be accompanied by a 292 course with extra work mutually agreed upon by professor and student.

All requirements for the Designated Emphasis must be satisfied before a student advances to candidacy in their Ph.D. field; a minimum GPA of 3.0 is required for the award of the Designated Emphasis.

Major

The Department of Statistics is concerned with teaching, research, and statistical consulting. The courses offered present a comprehensive spectrum of statistical and probability theory, in so far as such theory is necessary for the understanding and analysis of observational data. The applications of the theory delineated in the courses may be made in any field of experience. Laboratory classes in which examples related to the student's actual field of interest are worked out, play an essential part. The department offers both B.A. and B.S. degrees in Statistics as well as a B.S. in Statistics with options in Statistical Computing and Quantitative Management; the M.S. degree in Statistics; and the Ph.D. degree in Applied Statistics.

The Statistical Consulting Collaboratory

The Statistical Consulting Collaboratory is staffed by: Yehua Li, Ph.D., Faculty Director and Karen Huaying Xu, Ph.D., Associate Director and rotating graduate students.

Computing Laboratories

The department has two large undergraduate Windows-based teaching laboratories. These laboratories provide users access to a wide variety of statistical software packages including SAS, R, Minitab, and SPSS, and other popular software packages including Mathematica, Adobe Acrobat, and Microsoft Office. The department also houses the Garber Research Computing Laboratory, which is a combination of a UNIX/LINUX-based system with multiple workstations and several Windows-based machines.

Statistical Consulting Center

The Statistical Consulting Collaboratory provides a broad range of analytical and statistical support services, including design of experiments, statistical inference, hypothesis testing, and data modeling for the campus community, and promotes cooperative research between statisticians and other investigators in all fields of the application of statistics. The Collaboratory is staffed by: Yehua Li, Ph.D., Faculty Director and Karen Huaying Xu, Ph.D., Associate Director and rotating graduate students.

Change of Major Criteria

All courses taken to fulfill major requirements must be completed with grades of "C-" or better after repeats.

Freshman (0-4.9 units earned)

Completion of the following with grade of "C-" or better and must be in good academic standing (2.0 quarter and cumulative GPA)

- MATH 007A or MATH 009A or MATH 09HA, MATH 007B or MATH 009B or MATH 09HB, MATH 009C or MATH 09HC

Sophomores (45-89.9 earned units)

Completion of the following with grade of "C-" or better and must be in good academic standing (2.0 quarter and cumulative GPA)

- MATH 007A or MATH 009A or MATH 09HA, MATH 007B or MATH 009B or MATH 09HB, MATH 009C or MATH 09HC

Juniors (90-134.9 earned units)

Completion of the following with grade of "C-" or better and must be in good academic standing (2.0 quarter and cumulative GPA)

- MATH 007A or MATH 009A or MATH 09HA, MATH 007B or MATH 009B or MATH 09HB, MATH 009C or MATH 09HC

4 (four) additional units of college-level Mathematics or Statistics (STAT 010 recommended)

Seniors (135 or more earned units)

Completion of the following with grade of "C-" or better and must be in good academic standing (2.0 quarter and cumulative GPA)

- MATH 007A or MATH 009A or MATH 09HA, MATH 007B or MATH 009B or MATH 09HB, MATH 009C or MATH 09HC, STAT 010, STAT 011

8 (eight) additional units of college level Mathematics or Statistics (MATH 031 and STAT 107 recommended)

Major change requests are reviewed during the 2nd, 3rd, 4th & 10th weeks of each quarter.

Transfer Students

Students transferring to the Statistics major must complete courses comparable to the following one-year sequence before they transfer:

1. First-year calculus, equivalent to MATH 007A or MATH 009A or MATH 09HA, MATH 007B or MATH 009B or MATH 09HB, MATH 009C or MATH 09HC, each course completed with a grade of "B-" or better.

University Requirements

See Undergraduate Studies section.

College Requirements

See College of Natural and Agricultural Sciences, Colleges and Programs section.

Some of the following requirements for the major may also fulfill some of the college’s breadth requirements. Consult with a department advisor for course planning.

Major Requirements

The department offers both a B.A. and a B.S. degree in Statistics as well as a B.S. in Statistics with options in Statistical Computing and Quantitative Management.

The major requirements for the B.A. and the B.S. degrees in Statistics are as follows:

For the Bachelor of Arts

1. Core requirements (29–30 units)

   a) STAT 010, CS 010A, MATH 007A or MATH 009A or MATH 09HA, MATH 007B or MATH 009B or MATH 09HB, MATH 009C or MATH 09HC, MATH 010A
   b) MATH 031

2. Upper-division requirements (36–37 units)

   a) Thirty-two (32) units of upper-division course work to include twenty-eight units in (1) and four units in (2).

   b) Four (4) units of STAT 181 taken during senior year

   b) Four (4) units of additional coursework chosen from STAT 110, BUS 127/STAT 127, STAT 130, STAT 140, STAT 146, STAT 157, STAT 161, STAT 167 or from related fields with the approval of the major advisor.

And at least one sequence from:

1. BIOL 005A, BIOL 051A or BIOL 020 and BIOL 005B (and BIOL 005C, if articulated)

2. CHEM 001A, CHEM 01LA, CHEM 001B, CHEM 01LB, CHEM 001C, and CHEM 01LC

3. Organic chemistry (one-year lower-division), each course completed with a grade of "B" or better

4. PHYS 002A, PHYS 02LA, PHYS 002B, PHYS 02LB PHYS 002C, and PHYS 02LC

5. PHYS 040A, PHYS 040B, and PHYS 040C

6. MATH 010A and MATH 010B, or one course in linear algebra.
For the Bachelor of Science

1. Core requirements (29–30 units)
   a) STAT 010, CS 010A, MATH 007A or MATH 009A, MATH 009B or MATH 009B, MATH 009C or MATH 009C, MATH 010A
   b) MATH 031

2. Upper-division requirements (52–53 units)
   a) Thirty-two (32) units of upper-division course work to include twenty-eight units in (1) and four units in (2)
      (1) STAT 107, STAT 160A, STAT 160B, STAT 160C, STAT 169, STAT 170, STAT 171
      (2) Four (4) units of STAT 183 taken during senior year
   b) Twenty (20) units of additional course work chosen from STAT 110, STAT 127/BUS 127, STAT 130, STAT 140, STAT 146, STAT 157, STAT 161, STAT 167 or from related fields with the approval of the major advisor.

Statistical Computing Option
The requirements for this option are in addition to the requirements for the B.S. in Statistics, except that the option requirement takes the place of the 20 units in 2b) above.

1. Lower-division requirements (8 units):
   a) STAT 107, STAT 160A, STAT 160B, STAT 160C
   b) STAT 156A, STAT 160A, STAT 156B or STAT 160B

2. Upper-division requirements (16 units)
   a) STAT 167
   b) Twelve (12) units of coursework selected from
      (1) CS 141, CS 177
      (2) MATH 120, MATH 135A, MATH 135B

Quantitative Management Option
The requirements for this option are in addition to the requirements for the B.S. in Statistics, except that the option requirement takes the place of the 20 units in 2b) above.

1. Lower-division requirements (18 units)
   a) ECON 002, ECON 003 or ECON 03H
   b) BUS 010, BUS 020; BUS 020, BUS 021 for those who choose area (3) Accounting under below 2b).

2. Upper-division requirements (16 units)
   a) BUS/STAT 104
   b) Three courses from one area:
      (1) Marketing: BUS 103 and two other courses from BUS 111, BUS 112, BUS 114, BUS 115, BUS 116, BUS 117, BUS 118, BUS 119
      (2) Finance: BUS 106 and two other courses from BUS 138, BUS 139, BUS 140
      (3) Accounting: BUS 108, BUS 165A, BUS 165B, BUS 168A, BUS 168B, BUS 169A
      (4) Management: BUS 143, BUS 144, BUS 145, BUS 149, BUS 150
      (5) Information Systems: BUS 101 and two other courses from BUS 171, BUS 173, BUS 174, BUS 175
      (6) Operations & Supply Chain Management: BUS 122, BUS 123, BUS 124, BUS 125, BUS 126, BUS 128, BUS 130

Minor
The minor in Statistics is designed to give students in either the social sciences or the physical sciences a cohesive set of statistics courses to deal with the data analytic aspects of their disciplines and to understand the statistical summaries that are encountered in everyday activities.

The following are the requirements for the minor in Statistics.

1. Lower-division requirements (10 units):
   a) STAT 010, STAT 011
   b) Upper-division requirements (24 units):
      a) STAT 107
      b) STAT 156A or STAT 160A, STAT 156B or STAT 160B
      c) Twelve (12) units of upper-division statistics courses excluding STAT 155.

Of the specified upper-division units, a minimum of 16 must be unique to the minor and may not be used to satisfy major requirements.

No more than 4 units may be in courses numbered 190 through 199.

See Minors under the College of Natural and Agricultural Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Joint B.S.+1 Statistics M.S. Program
The College of Natural and Agricultural Science offers a combined B.S.+1 Statistics M.S. program, designed to allow successful B.S. graduates who have taken some graduate level statistics courses in their senior standing year in UCR to complete the Master of Science degree in Statistics in one year, by allowing up to 12 units of graduate level coursework taken in UCR as an undergraduate to be counted towards the MS degree requirements.

A student should apply for the B.S.+1 Statistics M.S. program (including transfer students) before the start of their senior standing year. To apply, the student must have a cumulative GPA at least 3.0 overall, 3.3 GPA in the statistics major, and have completed STAT 160ABC or equivalent. These are minimum requirements and do not guarantee the admission. The application to the B.S.+1 M.S. program must include a transcript, and at least two recommendation letters. Submission of GRE scores with the application is recommended but not required. During students’ senior year, students must apply via the Graduate Division for the MS portion. Matriculation into the graduate portion of the B.S.+1 M.S. program occurs in the fall term following their final year, provided: (a) the M.S. application is accepted, (b) throughout the final undergraduate year at UCR the student has a cumulative GPA 3.0 or higher, (c) by the end of senior standing year, the student completes the B.S. degree requirements.

Incoming freshman students who apply to the Statistics B.S. program may simultaneously apply for preliminary conditional admission into the B.S.+1 Statistics M.S. program provided their high-school GPA is at least 3.6, they satisfy the Entry-Level Writing requirement prior to matriculation, and they are eligible to enroll in or to receive credit for MATH 7A or MATH 9A upon arrival or in their first quarter.

Preliminary conditional admission status is maintained as long as the student is a Statistics B.S. student in good standing with a cumulative GPA of at least 3.0. Conditionally admitted students still need to apply for full admission by the start of their senior standing year as described above and apply via the Graduate Division for the MS portion. Continuing undergraduate students who meet the above criteria may apply to the program by submitting a petition and should confer with their staff advisor for details.

To earn the MS degree, students are required to complete a minimum of 41 units that must include STAT 201A, 201B, 201C, STAT 202A, 202B, 202C, STAT 207, STAT 208, STAT 288, and two quarters of STAT 293, and pass the written exam.

No more than 12 units earned prior to matriculation to graduate status can be applied towards the MS degree requirements. The courses that can be double counted must be graduate level courses and be eligible to be counted as electives in the B.S. requirements. Students receive credit toward the 41 units by completing STAT 201ABC (recommended) or some other graduate level courses, approved by the graduate advisor, as an undergraduate senior.

Comprehensive Examination
All M.S. students are required to take a written comprehensive examination and pass at the M.S. level, with no more than two attempts allowed to pass. A program proposal is not required.

Advancement to Candidacy
Advancement for the master’s candidacy occurs at the beginning of the quarter the student plans to graduate.

Professional Development
Students in the Statistics B.S.+1 M.S. Program must register two quarters of STAT 293, which give students training in (a) the ability to use fundamental statistical techniques to formulate problem and solution in diverse real-world application; (b) the ability to use at least one statistical software package to conduct statistical data analysis; (c) the ability to communicate with researchers in statistical community and other disciplines by using graphical methods to display and interpret information.

Normative time
The normative time to B.S. is four years, and the normative time of the MS portion is one year (five years total).
Graduate Programs

The Department of Statistics offers the M.S. degree in Statistics and the Ph.D. degree in Applied Statistics.

Admission

Domestic and international applicants must supply scores from the GRE general exam. In addition, TOEFL scores must be supplied by applicants whose first language is not English who do not hold a degree from a U.S. institution. The department considers applications for teaching assistantships at the same time as those for fellowships. Normally, Ph.D. eligible admitted students are awarded five year financial assistantship.

Master’s Program

The Department of Statistics offers the M.S. degree in Statistics.

Admission

Students entering the Master’s program must have completed a bachelor’s degree with sufficient training in Mathematics and a strong background in Statistics or have taken STAT 160A, STAT 160B, STAT 160C, STAT 161 and STAT 169, STAT 170, STAT 171, covering basic areas of probability and statistics.

Students must also meet the other requirements for admission as specified by the Graduate Division. The program is Plan II (Comprehensive Examination) described in the Graduate Studies section of this catalog. No foreign language is required.

Course Work

Graduate students in Statistics must have taken appropriate courses in Mathematics to give them the proper background for graduate work in Statistics. Important areas include Calculus (at least MATH 009A, MATH 009B, MATH 009C, and MATH 010A) and Linear Algebra (at least MATH 131).

Degree Requirements

Students are required to complete a minimum of 41 units that must include STAT 201A, 201B, 201C, STAT 202A, 202B, 202C, STAT 207, STAT 208, STAT 288, and two consecutive quarters of STAT 293.

Comprehensive Examination

All M.S. students are required to take a written comprehensive examination and pass at the M.S. level, with no more than two attempts allowed to pass. The written qualifying exam is offered two times in each year, the first in Summer and the second in Fall quarter. All students in the program are required to take their first attempt of the exam in Summer. The second exam in Fall can only be taken by the students who fail to pass the exam in their first attempt. Exceptions can be made based on the approval of Graduate Advisor. A program proposal is not required.

Advancement to Candidacy

Advancing to candidacy takes place when students complete all the course requirements and pass the written exam.

Professional Development Requirement:

Two quarters of STAT 293 give students training in (a) the ability to use fundamental statistical techniques to formulate problem and solution in diverse real-world application; (b) the ability to use at least one statistical software package to conduct statistical data analysis; (c) the ability to communicate with researchers in statistical community and other disciplines by using graphical methods to display and interpret information.

Petition to Change Degree Objective

Some students can petition to change their degree objective from the M.S. degree to the Ph.D. program in Applied Statistics depending on their performances in the written comprehensive exam and coursework.

The Master of Science in Business Analytics (MSBA)

The Master of Science in Business Analytics (MSBA) program is designed to extend the training of students with analytical backgrounds in business or statistics to allow them to apply their skills to business data. Increasingly large amounts of data are available about customers, costs, and suppliers, which can be analyzed to improve operations, increase the yield on marketing programs and understand pricing and financing better, which all add to the value of the business.

The MSBA interdepartmental program is offered by the School of Business and the Department of Statistics. The degree requires 48 units of study, which can be done as a full-time one-academic-year program or over a longer period on a part-time basis.

Admission

To ensure that students have the prior knowledge to succeed in the program, admission is limited to applicants who have studied either statistics or another quantitative discipline such as mathematics, physics, engineering, computer science, or economics or a quantitative business discipline (such as operations, finance and marketing) as undergraduates. Applicants to the program must have completed a bachelor’s degree or its approved equivalent in one of these four disciplines. Students who have weaker statistical training but otherwise show promise will be required to take STAT 171 or similar courses before entering the program. Applicants who do not have an undergraduate degree in statistics or one of the quantitative business disciplines may be considered for admission if they provide sufficient evidence of appropriate training.

Applicants must have received their undergraduate degrees from an accredited institution, and have attained a record that satisfies the standards established by the Graduate Division and University Graduate Council.

All applicants must submit scores from the Graduate Management Admissions Test (GMAT) or Graduate Record Exam, General Test (GRE). Applicants whose first language is not English are required to submit acceptable scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) unless they have a degree from an institution where English is the exclusive language of instruction. Additionally, each applicant must submit at least two letters of recommendation, at least one of which must be an academic reference. All other application requirements are specified in the graduate application or in the General UCR catalog.

Course Work

Once admitted, students follow one of two tracks: The statistics track is for students who studied a quantitative discipline other than statistics or one of the business disciplines as undergraduates (finance, operations, or marketing) and the business track is for students who focused on statistics as undergraduates. Both tracks culminate in a two-quarter capstone class that applies their understanding of business analytics to a project.

Required courses

1. MGT 256 Business Analytics for Management
2. MGT 286A-B Capstone in Business Analytics
3. STAT 208 Statistical Data Mining Methods
4. STAT 232 Statistics for Business Analytics

Business Track (Choose any four from the following five courses):

5. MGT 202 Financial Management
6. MGT 204 Cost and Management Accounting
7. MGT 207 Operations Management
8. MGT 209 Marketing Management
9. STAT 206 Statistical Computing

Statistics Track:

10. MGT 233 Marketing Research
11. MGT 267 Applied Business Forecasting
12. STAT 200 Foundational Methods for Business Analytics
13. STAT 206 Statistical Computing

Concentrations

Students choose a set of three courses in either marketing, operations or finance. These concentration courses provide depth to the student’s understanding of the area in which they will carry out a capstone course project.

Marketing:

1. MGT 228 Consumer Behavior or MGT 257 Marketing Strategy
2. MGT 251 Market Analytics
3. MGT 253 Digital Marketing

Operations:

1. MGT 219 (Spreadsheet Modeling for Decision-Making)
2. MGT 239 Simulation for Business
3. MGT 258 Logistics and Supply Chain Management
**Professional Development Requirement:**
1. MGT 286B gives students training in
   (a) the ability to use fundamental statistical techniques to formulate problems and solutions in diverse real-world applications;
   (b) the ability to use at least one statistical software package to conduct statistical data analysis;
   (c) the ability to communicate with business managers about statistical data by using graphical methods in conjunction with written analysis to describe and interpret information.

**Plan I (Thesis) is not an option for the MSBA degree program.**

**Plan II (Comprehensive Examination)** requires that at least 18 units be in graduate level courses taken at a UC campus. None of these may be in courses numbered 297 or 299. Every candidate must take a comprehensive examination, the content of which is determined by the program. Candidates for the degree are required to complete all of the general requirements specified by Graduate Studies. The program is intended to conform to Plan II.

**Normative Time**
One year for full-time students; Two years for part-time enrollees.

**Doctoral Degree**
The Department of Statistics offers the Ph.D. degree in Applied Statistics.

The program emphasizes both the theory of statistics and its application to special fields of interest. In addition to courses in statistics, a student would take courses in a substantive field from which a thesis problem requiring a statistical approach should arise. The substantive field may be chosen from areas such as biology, economics, political science, psychology or administration. Specialties might include, for example, population genetics, biological control, hydrology, epidemiology, geology, discrimination in learning, or scales and measurements.

**Admission**
Students entering the program must have completed either a bachelor’s degree or a Master’s degree in Statistics, Computer Science, Mathematics, or some other quantitatively based discipline. Students lacking sufficient preparation for some statistics graduate classes must complete some preparatory work in Statistics, Computer Science, or Mathematics depending on their background. Students also have to meet the general requirements listed in the Graduate Studies section of this catalog.

**Change Degree Objective**
Students with a Bachelor’s degree in the Ph.D. program who have satisfied all the requirements for the Master’s degree may apply for this degree while completing requirements for the Ph.D. program.

**Ph.D. Course Requirements**

I. Course Requirements
   (B) 24 units of additional 200 level Statistics courses not graded S/NC, excluding STAT 201A, STAT 201B, STAT 201C, STAT 231A and STAT 231B.
   (C) Substantive: Four units (or equivalent) in substantive field with a minimum GPA of 3.00 appropriate to the student’s interest. The requirement may be waived if the student already has the background in the substantive area.
   (D) Nine units of STAT 251 Statistics Colloquium before graduation.

II. Teaching: At least three quarters of teaching service.

III. Miscellaneous: In preparation for the written qualifying examinations, a student can register for up to 6 units of STAT 291 (Individual Studies in Coordinated Areas) only during quarters that the student actually participates in qualifying examinations.

**Foreign Language Requirement**
None

**Written and Oral Qualifying Examination**
All Ph.D. students are required to take a written qualifying examination and pass at the Ph.D. level, with no more than two attempts allowed to pass. The written qualifying exam is offered two times in each year, the first in Summer quarter and the second in Fall quarter. Students who start coursework with STAT 210A take the first attempt at the written exam Summer quarter before the start of their second year. Students who start coursework with STAT 210A take the first attempt at the written exam in Summer quarter before the start of the third year. The second exam can only be taken by students who fail to pass the exam in their first attempt. Students must take the second attempt in the Fall quarter immediately following the Summer quarter of the failed attempt. Exceptions can be made based on the approval of the Graduate Advisor. After passing the written exam the student will work with advisor to prepare for the oral examination.

**Advancement to Candidacy**
Oral Qualifying Exam must be completed no later than the end of Year Three of the student’s graduate training. Exceptions can be made based on the approval of Graduate Advisor. Advancing to candidacy takes place when students complete all the course requirements and pass the written and oral exams.

**Dissertation**
The dissertation is pertinent to a problem area specified by the candidate’s substantive field and is submitted in accordance with the requirements of the Graduate Division, Riverside.

**Teaching Requirement**
All students in the program, for at least three quarters, assist with laboratory (practice) sections of undergraduate Statistics courses or individual tutorial (consultative) work with undergraduate students.

**Professional Development Requirement:**
1. STAT 293 gives students training in
   (a) the ability to use fundamental statistical techniques to formulate problem and solution in diverse real-world application;
   (b) the ability to use at least one statistical software package to conduct statistical data analysis;
   (c) the ability to communicate with researchers in statistical community and other disciplines by using graphical methods to display and interpret information.

2. **Professional writing development:**
   Students are trained to prepare a research proposal on topics relevant to the student’s research area as part of their written qualifying exam.

3. **Pedagogy:**
   Ph.D. students are required to enroll in Teaching Assistant Development Program (TADP) Orientation in order to TA and enroll in STAT302 during the quarter they teach. Three quarters of TA experience required.

**Normative Time to Degree**
15 quarters

**Lower-Division Courses**

**STAT 004 Elements of Data Science**
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Explores basic concepts, algorithms, and techniques of data science with simulation and data visualization. Topics include summarizing and visualizing data using R or Python, causality, randomness, decision making in the presence of uncertainty, prediction, and classification. Credit is not awarded for STAT 004 if it has already been awarded for STAT 008, STAT 010, or STAT 011.

**STAT 008 Statistics For Business**
Lecture, 3 hours; discussion, 1 hour; laboratory, 3 hours. Prerequisite(s): CS 008 or CS 009A or CS 010A; MATH 004 or MATH 005A or MATH 006B or MATH 007A or MATH 009A or MATH 009A or MATH 022; or equivalent. An introduction to statistics using business applications. Topics include descriptive statistics; probability; discrete and continuous distributions; Bayes’ theorem; random variables; estimation and confidence intervals; hypothesis testing; and simple linear regression. Credit is awarded for one of the following STAT 008 or STAT 010.
STAT 010 Introduction to Statistics 5
Lecture, 3 hours; discussion, 1 hour; laboratory, 3 hours. Prerequisite(s): MATH 005A or MATH 006B or MATH 007A or MATH 009A or MATH 09HA. A general introduction to descriptive and inferential statistics. Topics include histograms; descriptive statistics; probability; normal and binomial distributions; sampling distributions; hypothesis testing; and confidence intervals. Credit is awarded for one of the following STAT 010 or STAT 008.

STAT 011 Introduction to Statistical Modeling 5
Lecture, 3 hours; discussion, 1 hour; laboratory, 3 hours. Prerequisite(s): STAT 008 with a grade of C- or better or STAT 010 with a grade of C- or better. Topics include linear regression, correlation, analysis of variance, and simple experimental designs.

Upper-Division Courses

STAT 104 Decision Analysis and Management Science 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 008 or STAT 010; or equivalent. A survey of deterministic and probabilistic models for decision making. Topics include linear programming and extensions, networks, dynamic programming, decision trees, queuing models, and simulation. Explores the application of these models in decision making. Cross-listed with BUS 104.

STAT 107 Introduction to Statistical Computing With R 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 008 or STAT 010; or equivalent. Introduction to R. Topics include data management, basic statistical analysis and graphics, use of functions and packages, simple programming, and reproducible work.

STAT 108 Data Science Ethics 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 105 or STAT 107 or CS 171; or consent of instructor. Covers ethics specifically related to data science. Topics include data privacy, data curation and storage; discrimination and bias arising in the machine learning process; statistical topics such as generalization, causality, curse of dimensionality, and sampling bias; data communication; and strategies for conceptualizing, measuring, and mitigating problems in data-driven decision-making. Cross-listed with CS 108.

STAT 110 Biostatistical Methods in Life Sciences 5
Lecture, 3 hours; discussion, 1 hour; laboratory, 3 hours. Prerequisite(s): STAT 011 or STAT 107; or equivalent. Provides undergraduate majors or those interested in life sciences with statistical tools for analyzing different types of data frequently encountered in life sciences. Emphasizes applications of methodology including contingency table analysis, linear regression and ANOVA, maximum likelihood method and the estimation-maximization algorithm, logistic regression, Poisson regression, and survival analysis.

STAT 127 Introduction to Quality Improvements 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 008 or STAT 010. Explores Deming’s 14 points for management, graphical methods, fishbone diagram, Pareto analysis, control charts for attributes and variables, cusum and moving average charts, process-capability. Also covers economic design, acceptance sampling, Taguchi method, parameter design, tolerance design, reliability, hazard rate, censoring, and accelerated life testing. Cross-listed with BUS 127.

STAT 130 Sampling Surveys 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 011 or STAT 107; or equivalent. Covers simple random sampling, stratified sampling, cluster sampling, and ratio and regression estimates. Also explores random response, capture-recapture, and jack-knife techniques.

STAT 140 Nonparametric Techniques 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 011 or STAT 107; or equivalent. Covers nonparametric randomization tests, rank tests, methods of association, and distribution-free tests.

STAT 146 Statistical Forecasting Techniques 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 156A or STAT 160A. Topics include exponential smoothing, simple and multiple regression analysis, time series, trend analysis, and seasonal analysis.

STAT 155 Probability and Statistics For Science and Engineering 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 009C, may be taken concurrently or MATH 09HC, may be taken concurrently. Covers sample spaces and probability, random variables and probability distributions, elements of statistical inference, and testing and estimation. Also addresses selected topics in multivariate distributions and introduces stochastic processes. Credit is not awarded for STAT 155 if it has already been awarded for STAT 156A or STAT 160A.

STAT 156A Mathematical Statistics With Applications For Data Science I 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 009C with a grade of C- or better or MATH 09HC. Introduction to frequentist probability theory, random variables, and their distributions. Discusses key theorems and inequalities in probability theory. Introduces to frequentist methods of point and interval estimation. Credit is awarded for one of the following STAT 156A or STAT 160A.

STAT 156B Mathematical Statistics With Applications For Data Science II 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 156A with a grade of C- or better. Topics include illustrative applications of Frequentist theory to linear regression; logistic regression and ANOVA; introduction to Bayes’ rule, Bayesian probability concepts, credible intervals; analysis of contingency tables; applications of sequential statistics; and methods for observational studies and missing data. Credit is awarded for one of the following STAT 156B or STAT 160B.

STAT 157 Statistical Computing With SAS 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 010 with a grade of C- or better, CS 010A with a grade of C- or better or STAT 107 with a grade of C- or better; or equivalent. Statistical computing with SAS. Topics include syntax and programming logic; data management; basic statistical analysis; statistical graphics; regression; and macros.

STAT 160A Elements of Probability and Statistical Theory 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 009C, may be taken concurrently or MATH 09HC, may be taken concurrently. Topics include statistical regularity, probability spaces, fundamental theorems in discrete probability, Bayes’ theorem, random variables, densities and distribution functions, and continuous distributions. Credit is awarded for one of the following STAT 160A or STAT 156A.

STAT 160B Elements of Probability and Statistical Theory 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 160A with a grade of C- or better. Topics include transformations of random variables and central limit theorem, distributions of sample statistics, statistical inference, and estimation. Credit is awarded for one of the following STAT 160B or STAT 156B.

STAT 160C Elements of Probability and Statistical Theory 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 160B with a grade of C- or better. Topics include hypothesis testing, chi-square tests, and nonparametric methods.

STAT 161 Introduction to Probability Models 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 156B with a grade of C- or better or STAT 160B with a grade of C- or better. Covers compound distributions, branching processes, and random walk. Explores continuous time models such as Poisson process and queuing models. Examines the Markov property and introduces Markov chains. Also covers simple time series models.

STAT 167 Introduction to Data Science 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 107 with a grade of C- or better; CS 010A with a grade of C- or better. Introduction to data science using the R programming language. Topics include big data management, visualization and analytical skills, supervised and unsupervised statistical learning methods, and real-world data science application examples.

STAT 169 Design of Experiments 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 107; STAT 156B or STAT 160B; or equivalent. Topics include principles of design; completely randomized designs; and one-way analysis of variance. Covers complete block designs and two-way analysis of variance; multiple comparisons; and complete factorial experiments. Explores fixed, random, and mixed models; split-plot designs; nested designs; analysis of covariance; sample size determination; and power analysis.
STAT 170 Regression Analysis 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 107; STAT 156B or STAT 160B; or equivalent. Topics include simple and multiple linear regression, scatter-plots, and point and interval estimation. Addresses prediction, testing, calibration, interpretation, and practical applications of multiple regression. Explores simple, partial, and multiple correlation; variable selection methods; diagnostic procedures; and regression for longitudinal data.

STAT 171 General Statistical Models 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 170. Covers generalized linear models and least squares, analysis of covariance, nonlinear regression, and nonlinear least squares. Explores regression methods for discrete data including logistic models, logistic regression, and discriminant analysis. Also addresses regression methods for life data, the Cox survival model, the Kaplan-Meier estimate, and the Mantel-Haenszel test.

STAT 183 Statistical Consulting 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 169; STAT 170; STAT 171; restricted to class level standing of senior. Introduces the statistical consulting process. Promotes consulting skills including developing effective communication skills, applying statistical methodology to client projects, and learning how to manage time and resources in a consulting environment. Satisfactory(S) or No Credit(N/C) is not available.

STAT 190 Special Studies 1 to 5 hours to be arranged. To be taken with the consent of the chair of the department as a means of meeting special curricular problems. Course is repeatable to a maximum of 10 units.

STAT 197 Research For Undergraduates 2 to 4 Research, 3 to 6 hours; individual study, 3 to 6 hours. Prerequisite(s): restricted to class level standing of junior, or senior; and consent of instructor. An introduction to research in Statistics. Requires a research project completed under the supervision of a Statistics faculty member or a group of faculty members. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit(N/C) grade. Course is repeatable to a maximum of 8 units.

STAT 198I Individual Internship in Statistics 1 to 12 Internship, 2 to 24 hours; research, 1 to 12 hours. Prerequisite(s): restricted to class level standing of junior, or senior; and consent of instructor. An internship to provide statistical field experience in governmental, industrial, or research units. Projects must be approved by the Statistics Department and the head of the unit in which the internship is to be carried out. Requires a written report. Total credit toward graduation may not exceed 12 units. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

STAT 199H Senior Honors Research 1 to 5 Prerequisite(s): senior standing with major concentration in statistics and with consent of instructor. Senior standing with major concentration in statistics and with consent of instructor. Course is repeatable to a maximum of 10 units.

Graduate Courses

STAT 200 Foundational Methods For Business Analytics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 201; graduate standing or consent of instructor. Introduces the fundamental methods of data analysis, visualization, inference, and prediction needed for business analytics. Provides a working knowledge of using R to perform data analysis.

STAT 201A Theory of Probability and Statistics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 170; graduate standing or consent of instructor. Topics include probability and conditional probability; random variables: univariate and multivariate; distributions; independence; moments; generating functions; transformations, and standard distributions. Also addresses multivariate normal distribution; order statistics; inequalities; convergence concepts; law of large numbers, and the central limit theorem. Credit is not awarded for STAT 201A, if it has already been awarded to STAT 210A if STAT 210A was taken prior to Fall 2013.

STAT 201B Theory of Probability and Statistics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; STAT 201A or equivalent; or consent of instructor. Topics include exponential families; delta method; inference concepts; sufficiency; point estimation; unbiasedness; completeness; and consistency. Also explores relative efficiency; maximum likelihood; method of moments; interval estimation; pivots; and approximate intervals and regions. Credit is not awarded for STAT 201B if it has already been awarded to STAT 210B if STAT 210B was taken prior to Fall 2013.

STAT 201C Theory of Probability and Statistics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; STAT 201B or equivalent, or consent of instructor. Topics include Bayesian estimation; prior or selection; loss functions; admissibility; hypothesis testing; Neyman-Pearson lemmas; size; power; UMP tests; likelihood ratio tests; sequential tests; non-parametric tests; and bootstrap. Credit is not awarded to STAT 201C if it has already been awarded to STAT 210C.

STAT 202A Regression, Anova, and Design 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 170, or equivalent; graduate standing; or consent of instructor. Topics include linear regression models; correlations; fitting and prediction; diagnostics; transformations; collinearity; and influential observations. Also addresses model selection; subset selection; Bayesian model selection; regularization; shrinkage methods; and non-parametric and semi-parametric regressions.

STAT 202B Regression, Anova, and Design 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 169, STAT 170 or STAT 202A; or equivalent; graduate standing; or consent of instructor. Topics include fixed effects models with or without interactions; Types 1-4 ANOVA; multiple testing; ANCOVA; mixed effects models; ML and REML estimation methods; BLUP; multiple crossed and nested factors; analysis of longitudinal data; general linear mixed models; parametric models for covariance structure; and Bayesian ANOVA.

STAT 202C Regression, Anova, and Design 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 169, STAT 170 or STAT 202B; or equivalent; graduate standing; or consent of instructor. Topics include basic principles of experimentation; clinical trials; completely randomized design; power and sample size; randomized block design; Latin square design; factorial experiments; response surface experiments; case control studies; matched case-control studies; choice experiments; and Bayesian design of experiments.

STAT 203A Bayesian Statistics I 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 160C or equivalent. Subjective probability, Renyi axiom system, Savage axioms, coherence, Bayes theorem, credibility intervals, Lindley paradox, empirical Bayes estimation, natural conjugate priors, de Finetti’s theorem, approximation methods, Bayesian bootstrap, Bayesian computer programs.

STAT 203B Bayesian Statistics II 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 203A. Assessing priors, nonparametric density estimation for expert group judgments, Bayesian regression, Bayesian analysis of variance, Bayesian regression with correlated disturbances and heteroscedasticity, Bayesian inference in time series models, Bayesian classification, Bayesian inference in spatial statistics, Bayesian factor analysis, disputed authorship.

STAT 204A Advanced Design and Analysis of Experiments 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 202C or equivalent, graduate standing; or consent of instructor. Topics include block, row-column, crossover and repeated measure designs; factorial experiments; confounding; fractional factorials; response surface designs; method of steepest ascent; canonical representation; rotatable, minimum bias, variance, and mean square error designs.

STAT 204B Advanced Design and Analysis of Experiments 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 204A or equivalent, graduate standing; or consent of instructor. Topics include mixture experiments; split-plot; optimum design theory; locally optimal designs; binomial experiments; dose response experiments; group sequential and time sequential design and analysis for failure time end points; adaptive designs.

STAT 205 Discrete Data Analysis 4 Lecture, 3 hours; discussion 1 hour. Prerequisite(s): STAT 160A, STAT 160B, STAT 160C or equivalents; or consent of instructor. Contingency tables, log-linear models, information theory models, maximum likelihood estimation, goodness of fit, measures of association, computational procedures.

STAT 206 Statistical Computing 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 160C or consent of instructor. STAT 206 online section; enrollment in the Online-Master-in-Science in Engineering program. Topics include statistical programming, simulation studies, smoothing and density estimation, generating random variables, optimization, Monte Carlo methods, Bootstrap, permutation methods, cross-validation.
STAT 207 Advanced Statistical Computing 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 201A and STAT 206 or equivalents; or consent of instructor. Topics include computational aspects of optimization; numerical integration; Advanced Monte Carlo methods; expectation maximization (EM) algorithm; Markov chain and Monte Carlo methods; and other current computational methods.

STAT 208 Statistical Data Mining Methods 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 201A; STAT 201B; STAT 202A; graduate standing; or consent of instructor. Covers principle data-mining methodologies and applications. Includes Bayes and LDA classifiers, logistic regression and neural network classifiers; support vector classifiers, classification trees, predictive modeling, ridge and lasso regressions, k-means and Dendrogram clustering methods, business analytics, and mining association rules. Features R and SAS programming languages. Credit is awarded for one of the following STAT 208 or ECON 220.

STAT 209 Software Tools For Big Data Analysis 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 206, STAT 208; graduate standing; or consent of instructor. Introduction to modern software tools for big data analytics and visualization, supervised and unsupervised statistical learning, database management systems, and parallel and distributed computing. Includes hands-on exercises on the aforementioned topics using R, Python, and SQL. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

STAT 210A Advanced Theory of Probability and Statistics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; STAT 201C or equivalent; or consent of instructor. Topics include measure spaces; measure integration; convergence theorems; absolute continuity; product spaces; Tonelli-Fubini theorems; convolutions and transforms; probability spaces; and existence and extension theorems. Also covers inequalities; independence; conditional probability and expectation; convergence concepts; laws of large numbers; weak convergence; and central limit theorem. Credit is not awarded for STAT 210A if it has already been awarded to STAT 210A if STAT 210A was taken prior to Fall 2013.

STAT 210B Advanced Theory of Probability and Statistics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 210A. Topics include estimation, decision theory, Bayes and empirical Bayes rules, and efficiency. Credit is not awarded for STAT 210B if it has already been awarded to STAT 210B if STAT 210B was taken prior to Fall 2013.

STAT 217 Mixture Models and Their Applications 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 170, STAT 171, STAT 201C; or equivalent; graduate standing. An introduction of mixture models (also known as latent class models or unsupervised learning models). Includes expectation-maximization (EM) algorithm, mixtures of regression models, and their applications such as clustering and density estimation.

STAT 218 Survival Analysis 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 170; graduate standing; or consent of instructor. Introduction to common statistical concepts and methods for analyzing time-to-event data. Topics include survival and hazard functions, censoring and truncation, Kaplan-Meier estimator, log-rank test, Cox proportional hazards model and partial likelihood, variants of Cox model, and alternatives to Cox model. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

STAT 220A Multivariate Analysis 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 160A, STAT 160B, STAT 160C, or equivalents; familiarity with matrix algebra. Topics include algebra and calculus of vectors and matrices, special multivariate distributions (Normal, Wishart, Hotelling’s T-squared, multivariate T, multivariate log-normal, etc.).

STAT 220B Multivariate Analysis 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 220A or consent of instructor. Topics include categorical dependent variable regression, log-linear models, inference in the multivariate normal distribution, multivariate multiple regression, hypothesis testing, likelihood ratio tests, multivariate analysis of variance and covariance, principal components analysis, factor analysis, and classification and discrimination models.

STAT 231A Statistics For Biological Sciences 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 011; or equivalent; restricted to major(s) Biochemistry and Molecular Bio, Biomedical Sciences, Botany, Botany (Plant Genetics), Botany/Plant Sciences, Cell, Molecular, and Development, Entomology, Environmental Toxicology, Evolution, Ecology, and Organismal Biology, Genetics, Genomics, & Bioinformatics, Microbiology, Neuroscience, Plant Biology, Plant Biology (Plant Genetics), Plant Pathology; graduate standing; or consent of instructor. Covers one- and two-sample tests, one- and two-way analysis of variance, multiple comparison, simple and multiple linear regression, nonparametric statistics, and categorical data.

STAT 231B Statistics For Biological Sciences 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 031; or equivalent; STAT 231A or consent of instructor; graduate standing in Biochemistry and Molecular Biology; Biomedical Sciences; Botany, Cell, Molecular, and Developmental Biology; Entomology; Environmental Toxicology; Genetics, Genomics, & Bioinformatics; Evolution, Ecology, and Organismal Biology; Microbiology; Nematology; Neuroscience; Plant Biology, Plant Genetics; Plant Pathology; or Plant Science. Covers logistic regression, analysis of covariance, advanced experimental designs, randomization, bootstrapping, jackknifing, and other procedures.

STAT 232 Statistics For Business Analytics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 011; or equivalent; STAT 232 is for Master of Business Analytics (BSBA) program and cannot be used to fulfill credit requirements towards Statistics PhD (STAP); graduate standing; or consent of instructor. Focuses on computing techniques and statistical decision-making approaches. Offers hands-on experience in analyses using R, the interface between relational database and R; data wrangling and visualization; analysis of variance; regression; variable selection; and forecasting. Includes statistical concepts such as correlation versus causality and designed experiments versus observational studies.

STAT 251 Statistics Colloquium 1 Colloquium, 1.5 hours. Prerequisite(s): consent of instructor. Presentation of current research in statistics by faculty, advanced graduate students, and guest lecturers. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

STAT 255(E-2) Seminar On Topics in Applied Statistics 4 Seminar, 3 hours; discussion, 1 hour. Prerequisite(s): see individual segments for prerequisites; graduate standing; or consent of instructor. Provides discussions and lectures by graduate students and faculty on topics related to student and faculty research. The department will maintain a listing of all 255 segments, their unit value, and grading basis.

STAT 255G Seminar On Topics in Applied Statistics 4 Seminar, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; or consent of instructor. Covers linear models; theory of least squares; general prediction theory; testing lack of fit; model assessment and selection; mixed models and variance components; collinearity and alternative estimates; generalized linear models; lasso for linear models and generalized linear models; and Bayesian linear models.

STAT 255I Seminar in Order Statistics 4 Seminar, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 160C and graduate standing. Basic distribution theory of order statistics. Bounds and approximations for moments of order statistics. Inference using order statistics. Record values, concomitants, and outliers. Asymptotic theory. Students may receive either a letter grade or Satisfactory (S) or No Credit (NC) grade. See instructor for grading basis; no petition is necessary.
petition is required. Students may receive either a letter grade or Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. 

STAT 255K Inference For Stochastic Process 4 Seminar, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing. Maximum likelihood estimation for Markov chains, branching processes, and general stochastic processes; properties of maximum likelihood estimates; likelihood ratio test for Markov chains; and sequential probability ratio tests for some stochastic processes. Students may receive either a letter grade or Satisfactory (S) or No Credit (NC) grade. See instructor for grading basis; no petition is required.

STAT 255M Seminar On Topics in Applied Statistics 4 Seminar, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; or consent of instructor. Includes industrial experiments, evolutionary operations, quality assurance, on-line and off-line quality improvement, signal-to-noise ratios, performance criteria, control charts, acceptance sampling, and basic concepts of reliability. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

STAT 255N Seminar in Advanced Statistics 4 Seminar, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing. Analysis of data, taking into account of spatial variations; optimal selection of sample sites; related design considerations; appropriate estimation techniques; variogram and covariance functions estimation using residuals; and practical illustrations. Students may receive either a letter grade or Satisfactory (S) or No Credit (NC) grade. See instructor for grading basis; no petition is required.

STAT 255Q Reliability and Life Testing Models 4 Seminar, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 160A, STAT 160B, STAT 160C and graduate standing. Structural properties and reliability of coherent systems; cumulative-damage models; fault tree analysis; renewal theory in replacement models; maintenance and replacement models; availability theory; limit distributions for series and parallel systems; censored sampling.

STAT 255R Statistics For Epidemiological Studies 4 Seminar, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing: STAT 160C, STAT 171, or equivalents or consent of instructor. An introduction to statistical methods for detecting and monitoring disease outbreaks. Focuses on the methods currently in use and the latest developments in literature. Includes univariate and multivariate temporal methods, as well as spatio-temporal methods. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination.

STAT 255S Seminar On Topics in Applied Statistics 4 Seminar, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; or consent of instructor. Topics in health statistics essential for statisticians in the health field. Includes life tables, survival analysis, and an introduction to epidemiology and intermediate biostatistics. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

STAT 25ST Seminar On Topics in Applied Statistics 4 Seminar, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing; or consent of instructor. Addresses topics related to modern nonparametric statistics. Includes nonparametric density estimation, nonparametric regression, permutation test, bootstrap, and multivariate nonparametric methods. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

STAT 288 Literature Seminar 1 Seminar, 1 hour. Students will make oral presentations summarizing important research papers in the statistics literature. All graduate students are encouraged to participate. Topics may vary each term. Graded Satisfactory (S) or No Credit (NC).

STAT 290 Directed Studies 1 to 6 Prerequisite(s): graduate standing and consent of instructor. Individual studies on specially selected topics in statistical applications. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

STAT 291 Individual Studies in Coordinated Areas 1 to 6 Consultation, 1 to 6 hours. Prerequisite(s): graduate standing. A program of studies designed to assist candidates who are preparing for examinations. Open to M.S. and Ph.D. students; does not count toward the unit requirement for the M.S. degree. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

STAT 292 Concurrent Analytical Studies 1 to 6 Research, 3 to 12 hours. Prerequisite(s): consent of instructor and concurrent enrollment in 100-series course. To be taken on an individual basis. Student will complete a graduate paper related to the 100-series course. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

STAT 293 Methods in Applied Statistics 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 201C, STAT 202C or equivalent, or consent of instructor. Illustrates problems in interdisciplinary collaborations. Motivates the study and application of advanced statistical methods in applied statistics. Course is repeatable to a maximum of 8 units.

STAT 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): graduate standing and consent of instructor. Directed research in applications of statistics in biological studies, including computer simulation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

STAT 298I Individual Internship in Statistics 1 to 12 Research, 1 to 12 hours; internship, 2 to 24 hours. Prerequisite(s): restricted to major(s) Statistics; graduate standing; or consent of instructor. An internship to provide statistical field experience in governmental, industrial, or research units. Projects must be approved by the Statistics Department and the head of the unit in which the internship is to be carried out. Requires a written report. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

STAT 299 Research For Thesis Or Dissertation 1 to 12 Research, 3 to 36 hours. Prerequisite(s): graduate standing and consent of instructor. Original research in an area selected for the advanced degree. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Course

STAT 302 College Teaching Practicum 1 to 6 Practicum, 3 to 12 hours. Prerequisite(s): graduate standing and consent of instructor. Required of all teaching assistants in the department. Credit not applicable to graduate unit requirements. Supervised teaching in college level classes under the supervision of the course instructor. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Study of Religion

Subject abbreviation: RLST College of Humanities, Arts, and Social Sciences

Melissa M. Wilcox, Ph.D., Chair
Department Office, 3033C CHASS
Interdisciplinary South
melissa.wilcox@ucr.edu
(951) 827-7969; religiousstudies.ucr.edu

Distinguished Professor
Pashaura Singh, Ph.D. Dr. Jasbir Singh Saini Endowed Chair in Sikh and Punjabi Studies

Full Professors
Michael Alexander, Ph.D. Maimonides Chair in Jewish Studies
Matthew King, Ph.D.
Amanda Lucia, Ph.D.
Melissa M. Wilcox, Ph.D. Holstein Family and Community Chair in Religious Studies

Professors Emeriti
Vivian-Lee Nyitray, Ph.D.
Ivan A. Sterenski, Ph.D.

Associate Professors
Muhamad Ali, Ph.D.
Ana Bajželj, Ph.D., Shrimad Rajchandra Endowed Chair in Jain Studies

Assistant Professors
Sahin Acikgoz, Ph.D.
Elyse Ambrose, Ph.D.
Paul Chang, Ph.D.
Major
The Department of Religious Studies provides an opportunity for students to interrogate religion, as a subject always entangled with ethnicity, politics, economics, gender, class, sexuality, and race. With a degree in religion, students examine how religious life is mediated by practice, materiality, language, the senses, embodiment, and culture. The religious studies is interdisciplinary, and students engage in social scientific and historical interpretive methods to study a broad spectrum of the world’s religious traditions. Majoring in Religious Studies can be an excellent preparation for a variety of careers, such as law, bioethics, human services, business, medicine, education, social work, writing, and the arts.

Religious Studies at UCR develops students a variety of valuable and transferable skills. These include disciplined attention to the facts (texts, ideas, history, behavior), critical reflection and analysis about claims of meaning and value and about assumptions and methods used in the religious studies, and descriptive and analytical writing about religious history, ideas, motivations, practices, and ethical concerns. A minor in Religious Studies is also a productive way to couple interests in such areas as political science, sociology, medicine, psychology, and law with the ethical and cultural contexts in which such fields are enmeshed. Students are encouraged to consult with the department chair and other faculty about their questions and interests.

The Holstein Family and Community Chair in Religious Studies
The Holstein Family and Community Chair in Religious Studies is an endowed faculty chair, the result of a generous contribution given by the Robert and Loretta Holstein family and by friends of the Holstein family and the university. Dr. Melissa M. Wilcox, the holder of this chair, is a distinguished scholar and teacher whose work focuses on queer and transgender studies in religion, and on religion, power, and social justice more broadly. For more information on programs and events sponsored by the Holstein Chair, please see http://religiousstudies.ucr.edu/holstein-chair/

The Dr. Jasbir Singh Saini Endowed Chair in Sikh and Punjabi Studies
The Dr. Jasbir Singh Saini Endowed Chair in Sikh and Punjabi Studies is the result of a generous contribution given by the Saini Foundation, the Sikh Foundation and by a number of individuals and the University. Dr. Pashaura Singh has been appointed to the Chair and is a leading scholar and teacher whose work in the field of Adi Granth studies is internationally acclaimed. For more information on the Endowed Chair, please visit the following website: http://spstudies.ucr.edu/

Maimonides Chair in Jewish Studies
The Maimonides Endowed Chair in Jewish Studies was established in 2014 with support from nearly three dozen individuals, foundations and organizations to fund research and other activities aimed at fostering better understanding of the history of the heritage of Jewish people. The chair Dr. Michael Alexander is a leading scholar and teacher whose work addresses religion, ethnicity, genocide, and issues of modern Jewish identity. For more information on the Endowed Chair, please visit the website: http://jewishstudies.ucr.edu

Shriram Rajchandra Endowed Chair in Jain Studies
The Shriram Rajchandra Endowed Chair in Jain Studies was made possible by generous donations from Dr. Jasvant Modi and Dr. Meera Modi, Mr. Mahesh Wadher and Mrs. Usha Wadher, Mr. Vijay Chheda and Mrs. Madhu Chheda, and other members of the Jain community of Southern California. Established in 2017, commemorating the 150th birth anniversary of the Jain spiritual teacher and reformer Shriram Rajchandra, the Chair’s mission is to pursue critical scholarly research of Jainism and advance its study at UCR. Dr. Ana Bajzelj was appointed to the Chair in 2018.

University Requirements
See Undergraduate Studies section.

College Requirements
See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

Major Requirements
The major requirements for the B.A. degree in Religious Studies are as follows:

1. Lower-division requirements (12 units)
   a) RLST 005
   b) RLST 012/ETST 012 or RLST 012W/ETST 012W
   c) One additional 4-unit course in Religious Studies or equivalent

2. Upper-division requirements (40 units)
   a) At least four courses from Traditions and Regions and at least two courses from Themes

   Traditions and Regions:
   - RLST 104 Sikhism
   - RLST 106 Buddhism
   - RLST 108 Modern Hinduism
   - RLST 109 New Religious Movements
   - RLST 111 Islam
   - RLST 114 Jainism: An Indian Religion of Nonviolence
   - RLST 123 Global Christianity and Mission
   - RLST 126/ HIST 127 Israel: The Jewish State
   - RLST 161/GGST 158 Gender and Sexuality in U.S. Religious History

3. Optional 190 level work in either Art History or Religious Studies

Asian Concentration (52 units)

1. Lower-division requirements (12 units)
   a) Art History (4 units): AHS 015
   b) Asian Studies (4 units): AST 030/CHN 030
   c) Religious Studies (4 units): RLST 005

2. Upper-division requirements (40 units)
   a) Art History (16 units): AHS 140, AHS 141, AHS 143, CPLT 141
   b) Religious Studies (24 units) choose from: RLST 101, RLST 103, RLST 105, RLST 106, RLST 142/AST 142/CHN 142, RLST 144/CPLT 144

3. Optional 190 level work in either Art History or Religious Studies

Art History/Religious Studies Major

The Art History/Religious Studies Major combines the disciplinary interest in the history of the visual arts with its related religious content and background. Three concentrations are offered. Students must select one family of religions, either Asian or Western, and combine it with the study of the history of the visual arts in the corresponding area of artistic endeavor. Or, students wishing to combine Asian and Western materials to serve a comparative purpose are invited to design their own major in consultation with faculty representatives from both departments. Students are encouraged to include study abroad as part of their major and should plan well in advance to ensure that the courses taken fit with their overall program at UCR. Students in this major will be well prepared for graduate studies in either art history or religious studies.

Major Requirements

The major requirements for the B.A. degree in Art History/Religious Studies are as follows:

1. Lower-division requirements (12 units)
   a) Art History (4 units): AHS 015
   b) Asian Studies (4 units): AST 030/CHN 030
   c) Religious Studies (4 units): RLST 005

2. Upper-division requirements (40 units)
   a) Art History (16 units): AHS 140, AHS 141, AHS 143, CPLT 141
   b) Religious Studies (24 units) choose from: RLST 101, RLST 103, RLST 105, RLST 106, RLST 142/AST 142/CHN 142, RLST 144/CPLT 144

3. Optional 190 level work in either Art History or Religious Studies
Student-designed Comparative Concentration (52 units)

1. Lower-division requirements (12 units)
   a) Art History, choose at least 4 units: AHS 015, AHS 017A, AHS 017B, AHS 017C, AST 030/CHN 030
   b) Religious Studies, choose at least 4 units: RLST 005, RLST 007, RLST 010

2. Upper-division requirements (40 units)
   a) Art History, choose at least 12 units: AHS 140, AHS 141, AHS 143, AHS 155, AHS 156, AHS 157, AHS 159, AHS 161, AHS 162, AHS 164, AHS 171, AHS 172, CPLT 141
   b) Religious Studies, choose at least 12 units: RLST 100, RLST 101, RLST 103, RLST 105, RLST 106, RLST 111, RLST 121, RLST 128 (E-Z), RLST 130, RLST 131, RLST 135/ HIST 130, RLST 136, RLST 142/AST 142/ CHN 142, RLST 164/CPLT 144

3. Optional 190 level work in either Art History or Religious Studies

Western Concentration (52 units)

1. Lower-division requirements (16 units)
   a) Art History (12 units): AHS 017A, AHS 017B, AHS 017C
   b) Religious Studies (4 units) choose from: RLST 007, RLST 010

2. Upper-division requirements (36 units)
   a) Art History (16 units) choose from: AHS 155, AHS 156, AHS 157, AHS 159, AHS 161, AHS 162, AHS 164, AHS 171, AHS 172
   b) Religious Studies (20 units) choose from: RLST 100, RLST 111, RLST 121, RLST 128 (E-Z), RLST 130, RLST 131, RLST 135/ HIST 130, RLST 136

3. Optional 190 level work in either Art History or Religious Studies

Minor
Requirements for a minor in Religious Studies are as follows:

1. Lower-division requirements (12 units)
   a) RLST 005
   b) RLST 012/ETST 012 or RLST 012W/ETST 012W
   c) One additional 4-unit course in Religious Studies

2. Upper-division requirements (16 units)
   a) At least two courses from Traditions and Regions and at least one course from Themes

   Traditions and Regions:
   - RLST 104 Sikhsim
   - RLST 106 Buddhism
   - RLST 108 Modern Hinduism
   - RLST 109 New Religious Movements
   - RLST 111 Islam
   - RLST 114 Jainism: An Indian Religion of Nonviolence
   - RLST 123 Global Christianity and Mission
   - RLST 126/ HIST 127: Israel: The Jewish State
   - RLST 161/ GSTST 158 Gender and Sexuality in U.S. Religious History

   Themes:
   - RLST 101 Religions of India
   - RLST 116 Religion and Violence
   - RLST 127/ HISE 147 The Holocaust
   - RLST 135A/ HIST 130A History of Christianity: Origins to the Reformation
   - RLST 135B/ HIST 130B History of Christianity: Modern Era
   - RLST 149/ SEAS 164 Southeast Asian Religions
   - RLST 152 Religion and Oppression
   - RLST 153 Religion and Social Justice
   - RLST 159/ GSTST 159 Queer Religiosities
   - RLST 160/ GSTST 160 Religion, Gender and Sexuality
   - RLST 180 Saints and Gurus

   b) Four (4) upper-division units from those courses approved for the Religious Studies major

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Education Abroad
Education Abroad is an excellent opportunity to learn more about another country and its culture while taking courses to earn units toward graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit Education Abroad at ea.ucr.edu or call (951) 827-4113.

See Education Abroad in the Educational Opportunities section in the beginning of this catalog.

Graduate Program
The Department of Religious Studies offers the M.A. and Ph.D. degrees in Religious Studies.

The graduate program in Religious Studies instructs students in the critical academic religious studies. The Ph.D. program focuses on preparing students to enter into academia as researchers and university instructors in a specific field of expertise.

Admission
Although an undergraduate major in religious studies is not required for admission into the graduate program, applicants should demonstrate significant interest and background in the critical academic religious studies and the appropriate scholarly approaches to religious studies. Applicants to the M.A. and Ph.D. programs must demonstrate scholarly acuity, as well as interest in the critical questions of the discipline of religious studies. Given the broader scope of the M.A. program, applicants to this degree program do not need to specify a particular field of study or concentration they wish to pursue in the program. Applicants to the Ph.D. program, however, should indicate in their applications the current direction of their interests with regard to a specific Ph.D. concentration and field of study.

Master’s Degree (M.A.)
The Department of Religious Studies offers two programs of study leading to the M.A. degree (Plan I and Plan II).

Course work
All M.A. students must complete a minimum of 36 units for the degree, including specific course requirements as follows:

1. RLST 201: Thinking about Religion: Classic Theories in the Religious Studies
2. RLST 202: Contemporary Theories and Theorists in the Religious Studies
3. At least 16 additional units at the 200 level in Religious Studies. With approval from the Director of Graduate Studies, 200-level courses in related departments may also fulfill this requirement.
4. Professional development requirement: All M.A. students are required to take three units of the Colloquium in Religious Studies and one unit of additional 400-level coursework in religious studies.
5. The remaining 12 units may be taken as 200-level courses, or as 100-level courses taken in conjunction with RLST 292: Concurrent Studies in Religious Studies. Any RLST course at these levels may fulfill this requirement, and with approval from the Director of Graduate Studies, courses at these levels in related departments may also fulfill this requirement.

Capstone: M.A. Plan I
In addition to the coursework listed above, Plan I M.A. students must prepare a Master’s thesis of publication length (typically 25-30 pages) that presents original research and analysis relevant to the field of religious studies under the supervision of a thesis committee.

Capstone: M.A. Plan II
In addition to the coursework listed above, Plan II M.A. students must successfully complete a final master’s project under the supervision of a master’s committee. Students have some flexibility in the nature of this project, which may take the form of a single, comprehensive written examination designed by the master’s committee in consultation with the student, or an applied project suitable for the student’s future career goals.
Students planning to complete the Ph.D. must complete the M.A. Plan I.

**Language Requirement**

Students must demonstrate reading proficiency in a language other than English that is relevant to their interests in religious studies; the department must approve the choice of language prior to completion of the language requirement. If a language is primarily used in spoken form, then spoken proficiency must be demonstrated instead of written proficiency. If there is no clear choice of language for a student's interests (e.g. in the case of a student whose interests lie primarily with theoretical approaches stemming from Anglophone theorists), then the student should select either French or German. This requirement can be fulfilled through a departmental examination of written and/or spoken proficiency, by passing a designated language course (e.g., FREN 009A, FREN 009B, GERM 002R), or by alternative certification (such as a diploma from a foreign language institute).

**Normative Time to Degree** 6 quarters.

**Doctoral Degree (Ph.D.)**

**Coursework**

The following courses are required for all Ph.D. students:

1. RLST 201: Thinking about Religion: Classic Theories in the Study of Religion
2. RLST 202: Contemporary Theories and Theorists in the Study of Religion
3. One of the following core courses, as appropriate for the student's chosen concentration:
   a. RLST 203: Hermeneutics and History
   b. RLST 204: Analytics of Power
   c. RLST 205: Transnational Religions
4. One course in research methods relevant to the student's area of interest. The following courses may fulfill this requirement:
   a. RLST 231: Ethnographic Methodology
   b. RLST 263: Histriography of Sikh Hermeneutics
   c. With the approval of the Director of Graduate Studies, methods courses in related departments at the 200-level (or the 100-level accompanied by 292: Concurrent Enrollment)
5. Professional development requirement
   Six units of 400-level professional development courses in religious studies, including four units of Religious Studies colloquium and two other units from RLST 400 level courses of their choice.

**Concentration**

Ph.D. students must select one of the following concentrations, and are expected both to take the associated core course and to focus aspects of their doctoral exams and their dissertation on this theme:

- Hermeneutics and History
- Analytics of Power
- Transnational Religions

**M.A. in Religious Studies degree for Ph.D. students**

Students entering the Ph.D. program without an M.A. in Religious Studies may apply for the M.A. degree after they have completed the requirements for the M.A. Plan I.

**Sixth quarter review**

All Ph.D. students will undergo a review of their performance in the program by the end of their sixth quarter. The review, conducted by the Graduate Program Committee in consultation with the faculty members whose areas of specialization most closely match those of the student, will be based on evaluation of a portfolio of written work compiled by the student in consultation with the faculty member(s) with whom the student has worked the most closely. The committee will make one of three recommendations: Proceed, Hold, or Terminate. Students receiving a recommendation of Hold may reapply once, within three quarters, to proceed in the program; those receiving a recommendation of Terminate who have not previously completed an M.A. in Religious Studies may continue enrolling for no more than three quarters to complete the requirements for the M.A. Plan I or the M.A. Plan II.

**Written and oral qualifying examinations**

Students must complete a round of qualifying written examinations, followed by an oral defense of those examinations, by the end of their third year and following the completion of all coursework. Students complete the three written examinations over a two- to three week period.

The topic and the content of each exam is determined by the student in consultation with the examination committee, and must be approved by that committee.

After completing the written examinations, students undergo an oral examination by committee. The content of the oral examination is based on the written examination questions and answers.

Both the written and oral examination are composed, administered, and evaluated by a qualifying committee, nominated nine to twelve months before the exam by the student in consultation with the department faculty, and appointed by the graduate dean.

Upon successful completion of the written and oral qualifying examinations, the student is recommended to the graduate dean for advancement to candidacy; at this time, the student also nominates a dissertation committee.

**Language requirement**

Students must demonstrate reading proficiency in two languages other than English that are relevant to their interests in religious studies; the department must approve the choice of languages prior to completion of the language requirement. If a language is primarily used in spoken form, then spoken proficiency must be demonstrated instead of reading proficiency. If there is no clear choice of language for a student's interests (e.g. in the case of a student whose interests lie primarily with theoretical approaches stemming from Anglophone theorists), then the student should select French and German. This requirement can be fulfilled through a departmental examination of written and/or spoken proficiency, by passing a designated language course (e.g., FREN 009A, FREN 009B, GERM 002R), or by alternative certification (such as a diploma from a foreign language institute).

**Dissertation and final defense**

Following advancement to candidacy, and working closely with the dissertation committee, doctoral candidates must prepare a dissertation prospectus for approval by that committee. Once all committee members have communicated their approval of the prospectus and all other relevant approvals (e.g., Institutional Review Board) have been obtained, the candidate should begin the process of researching and writing the dissertation, which should be prepared and presented as prescribed by the Graduate Division. When the dissertation is complete and all members of the dissertation committee are satisfied with the written work, the candidate must schedule a dissertation defense. This final, public oral examination consists of a 45-minute keynote-style presentation of the dissertation research, followed by questions from the committee and the public audience.

**Normative Time to Degree** 18 quarters.

**Lower-Division Courses**

**RLST 001 Sex, Sin, and Scripture** Lecture, 3 hours; discussion, 1 hour; individual study, 5 hours; term paper, 5 hours. Prerequisite(s): none. An introduction to the academic study of religion. Engages the study of religion thematically, thinking through taboos and injunctions as they are related to specific social and historical contexts. Examines global religious beliefs and practices from diverse cultural perspectives. Credit is awarded for only one of RLST 001 or RLST 001H.

**RLST 001H Honors Sex, Sin, and Scripture** Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours; individual study, 5 hours; term paper, 5 hours. Prerequisite(s): admission to the University Honors Program or consent of instructor. Honors course corresponding to RLST 001. An introduction to the academic study of religion. Engages the study of religion thematically, thinking through taboos and injunctions as they are related to specific social and historical contexts. Examines global religious beliefs and practices from diverse cultural perspectives. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of RLST 001 or RLST 001H.

**RLST 002 Introduction to Comparative Scripture** Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduction to Comparative Scripture; which includes Sikhism, Zoroastrianism, Judaism, Christianity, Islam, Hinduism, Buddhism, Taoism, Confucianism, and a number of modern New Religious Movements.

**RLST 003 Is There A Path of Joy?** Seminar, 3 hours. Prerequisite(s): none. Explores therapeutic wisdom traditions that make claims about how to reduce suffering and achieve fulfillment and happiness. Considers worldwide literatures and rituals for their therapeutic claims. Also examines the positive psychology movement, which weds academic research to the task of individual self-help.
RLST 004 Religion, Society, and Culture 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduction to the study of religion through the lenses of sociology and cultural studies. Explores the mutual influence of religion and social institutions, politics, social movements, and popular culture. Topics may include pluralism, new religious movements and "spirituality", popular culture, social power, and politics. Credit is awarded for only one of RLST 004 or RLST 004H.

RLST 004H Honors Religion, Society, and Culture 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to RLST 004. Introduction to the study of religion through the lenses of sociology and cultural studies. Explores the mutual influence of religion and social institutions, politics, social movements, and popular culture. Topics may include pluralism, new religious movements and "spirituality", popular culture, social power, and politics. Credit is awarded for only one of RLST 004 or RLST 004H.

RLST 005 Introduction to Asian Religions 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to Asian religions including Hinduism, Buddhism, Sikhism, Confucianism, Taoism, and Shinto. Credit is awarded for one of the following RLST 005 or RLST 005H.

RLST 005H Honors Introduction to Asian Religions 4
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): admission to University Honors; or consent of instructor. Honors course corresponding to RLST 005. Introduction to Asian religions including Hinduism, Buddhism, Sikhism, Confucianism, Taoism, and Shinto. Credit is awarded for one of the following RLST 005H or RLST 005.

RLST 006 Jesus 4
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): none. Examines the figure of Jesus from two main perspectives: historical perspectives on Jesus in his first-century context and representations of Jesus in the United States, primarily in the 19th and 20th centuries. Explains why representations of Jesus remain simultaneously so contested and so influential.

RLST 007 Jews, Christians, and Muslims 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Surveys the history and contemporary religious institutions and representations of Jews, Christians, and Muslims. Includes distinguishing characteristics, foundational texts, interpretive traditions, rituals, material culture, ethics, political ideologies, and historical interactions. Credit is awarded for one of the following RLST 007 or RLST 007H.

RLST 007H Honors Jews, Christians, and Muslims 5
Lecture, 3 hours; discussion, 2 hours; extra reading, 3 hours. Prerequisite(s): admission to University Honors. Honors course corresponding to RLST 007. Surveys the history and contemporary religious institutions and representations of Jews, Christians, and Muslims. Includes distinguishing characteristics, foundational texts, interpretive traditions, rituals, material culture, ethics, political ideologies, and historical interactions. Credit is awarded for one of the following RLST 007H or RLST 007.

RLST 010 Introduction to the Bible 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): none. A preparation for informed study of the Bible. Examines contemporary interpretive stances, history, methods, and major themes through the study of significant portions of the Bible.

RLST 011 Islam and Feminism 4
Lecture, 3 hours; discussion, 1 hour; written work, 1 hour; term paper, 1 hour. Prerequisite(s): none. Focuses on the intersections between Islam and feminism. Topics include feminist interpretations of the Qur’an, Muslim women’s movements and activism in Islamic and non-Islamic societies, and the complex interactions between the nation-state, religion, gender, and sexuality. Cross-listed with GSST 012, and MEIS 012. Credit is awarded for one of the following RLST 011, GSST 012, MEIS 012H, MEIS 012H, or RLST 011H.

RLST 011H Honors Islam and Feminism 4
Lecture, 3 hours; discussion, 1 hour. Honors course corresponding to RLST 011. Focuses on the intersections between Islam and feminism. Topics include feminist interpretations of the Qur’an, Muslim women’s movements and activism in Islamic and non-Islamic societies, and the complex interactions between the nation-state, religion, gender, and sexuality. Cross-listed with GSST 012H, and MEIS 012H. Credit is awarded for one of the following RLST 011H, GSST 012H, MEIS 012H, GSST 012, MEIS 012, or RLST 011.

RLST 012 Religious Myths and Rituals 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to the meanings, origins, and functions of religion; the roles of myths, rituals, and symbols; and images of transcendence. Examines religious beliefs and expressions from diverse cultural perspectives. Utilizes source materials from indigenous Native (North and South) American, African American, and/or Asian American religions. Cross-listed with ETST 012. Credit is awarded for only one of ETST 012/RLST 012 or ETST 012H/RLST 012H.

RLST 012H Honors Religious Myths and Rituals 4
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to ETST 012/RLST 012. An introduction to the meanings, origins, and functions of religion; the roles of myths, rituals, and symbols; and images of transcendence; and understanding religious beliefs and expressions from diverse cultural perspectives. Utilizes source materials from indigenous Native (North and South) American, African American, and/or Asian American religions. Satisfactory (S) or No Credit (NC) grading is not available. Cross-listed with ETST 012H. Credit is awarded for only one of ETST 012/RLST 012 or ETST 012H/RLST 012H.

RLST 014 Religion and Science 5
Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): none. Covers major themes in the relation of science and religion. Primary focus is on issues between science and Western religions, with attention to Islam, Buddhism, and Hinduism. Major attention is given to creationism and Darwinian evolution. Explores religious meaning in a scientific cosmos through the study of contemporary science fiction and film.

RLST 015 Death 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Investigates the psychological aspects of facing death and dealing with dying persons; cross-cultural religious and philosophical interpretations of death (as new life, resurrection, rebirth, etc.); and medical, ethical, and legal issues such as physician-assisted suicide and euthanasia. Credit is awarded for only one of RLST 015 or RLST 015H.

RLST 015H Honors Death 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): admission to University Honors or consent of instructor. Honors course corresponding to RLST 015. An examination of three sets of issues pertaining to death and dying: psychological and experiential aspects of facing medical crisis, illness, death, and grief; cross-cultural perspectives on the ways in which death is conceived in selected religions of the world with respect to life and claims about afterlife; public policy issues that involve ethical, legal, and medical concerns regarding euthanasia, physician-assisted suicide, and hospice alternatives. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of RLST 015 or RLST 015H.

RLST 016 Sexuality and Religion in Global Perspective 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduces sexuality studies within the comparative study of religion, rooted in the theoretical frameworks of gender and sexuality studies. Transnationalism and global dynamics of power are central themes. Focus is on critical heterosexuality studies, with some LGBT studies and an underlying queer studies perspective. Cross-listed with GSST 016. Credit awarded for only one of GSST 016/RLST 016 or GSST 016H/RLST 016H.
RLST 016H Honors Sexuality and Religion in Global Perspective 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): admission to the University’s Honors Program or consent of instructor. Honors course corresponding to GSST 016/RLST 016. Introduces sexuality studies within the comparative study of religion, rooted in the theoretical frameworks of gender and sexuality studies. Transnationalism and global dynamics of power are central themes. Focus is on critical heterosexuality studies, with some LGBT studies and an underlying queer studies perspective. Satisfactory (S) or No Credit (NC) grading is not available. Cross-listed with GSST 016H. Credit awarded for only one of GSST 016/RLST 016 or GSST 016H/RLST 016H.

RLST 019 Black Religion in the United States 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduction to religion in the experiences of Black people in the United States. Topics include Black religion in the social imagination, in ritual, the arts (e.g., African American spirituals, literature), Black Nationalism, social change, and queerness in Black religion. Engages primary sources for examining religious contributions in society. Cross-listed with BLKS 019.

RLST 024 Introduction to Native American Culture and Religion 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Interdisciplinary study of contemporary and historic Native American efforts to resist colonialism, with a strong emphasis on land matters, identity issues, and religious forms. Promotes critical reflection on historic and contemporary culture and politics. Cross-listed with HIST 034.

RLST 044 Gods, Ghosts, and Grandparents 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduction to the rich diversity of Chinese beliefs and practices concerning gods, ghosts, and ancestors through primary and secondary sources. Includes oracle bone inscriptions, philosophical arguments on the existence of spirits, tomb contracts, sutra promoting the goddess Guanyin as Giver of Sons, ghost stories, and eyewitness accounts of funeral rituals. Cross-listed with HIST 044.

RLST 067 Language and Text in Contemporary South Asian Religions 4 Seminar, 3 hours; written work, 6 hours. Prerequisite(s): none. Prepares to undertake independent research of literary sources in contemporary South Asian religious traditions, as well as navigating impacts of Hindu and Urdu linguistic traditions. Focuses on the modern linguistic landscape of Hindu-stani (hybrid Hindi/Urdu) within the context of religious and culturally revered literary texts. Cross-listed with AST 067.

RLST 068 Language and Text Inner Asian Religions 4 Seminar, 3 hours; written work, 6 hours. Prerequisite(s): none. Focuses on classical linguistic landscape of Tibetan and, in some years, classical Mongolian within the context of religious and culturally revered texts and literary practices. Introduces students to advanced study of major classical language and literature. Cross-listed with AST 068.

RLST 098 Religion of Modern China 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Examines religions of modern China from Ming to the present. Considers religion and its relationship to politics, society, and culture in the imperial, republican, and communist contexts and the American diaspora. Engages with both heterodox and “mainstream” or “officially sanctioned” traditions while evaluating the factors that merit labels.

Upper-Division Courses

RLST 100 The Problem of Religion 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): one Religious Studies course or upper-division standing or consent of instructor. A survey of critics and defenders of religion who debate meanings and functions of religion in relation to modern challenges such as religious pluralism, secularism, and scientific inquiry. Addresses topics of assigned instructor’s expertise.

RLST 101 Religions of India 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): one lower-division course in Religious Studies or consent of instructor. An examination of the major religious traditions in India with special emphasis on Hinduism and Buddhism.

RLST 102 Contemporary Themes in Religion and Theory 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of contemporary cultural issues which pose challenges to the nature of religion and the way it is studied in the public university. Issues discussed include race, gender, power, colonialism, and religious commitment.

RLST 103 Decolonizing Religion 4 Lecture, 3 hours; individual study, 3 hours; research, 2 hours; term paper, 1 hour; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior or senior. Introduces the constitution of the Western category of religion as it was (and is) fortified through colonial encounters. Engages deeply with colonial archives and underscores the collaboration between religion and colonial domination. Topics also include decolonizing methodologies in Religious Studies including liberation theology and critical theory.

RLST 104 Sikhism 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the social and religious evolution of Sikhism over the past five centuries, tracing its formation in North India to traditions beyond the Indian subcontinent; examines the teachings of Guru Nanak and major doctrinal developments under subsequent Gurus.

RLST 105 Gender, Sexuality, and Islam 4 Lecture, 3 hours; written work, 2 hours; term paper, 1 hour. Prerequisite(s): restricted to class level standing of sophomore, junior, or senior. Focuses on the intersections between gender, sexuality, and religion in Islamicate societies. Discusses the ways in which these formations have been shaped by histories of slavery, imperialism, colonialism, human rights discourses, neoliberalism, contemporary practices of Islamophobia, nationalism, and global LGBTQ activism. Cross-listed with GSST 110, and MEIS 110.

RLST 106 Buddhism 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Aspects of the history and development of Buddhism in its major forms (Theravada, Mahayana, and Vajrayana). Studies of principal sutas, biographies, ethical treatises, birth narratives, and poetry.

RLST 108 Modern Hinduism 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of developments in the Hindu religious tradition during the nineteenth and twentieth centuries, inside and outside of India. Topics covered include the impact of colonialism and nationalism on Hinduism, the rise of neo-Hindu movements, modern Hindu “fundamentalism,” and Hinduism in the modern Western world.

RLST 109 New Religious Movements 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the contexts in which new religions emerge, their relations with dominant religious traditions or normative cultures, and the religious content of such movements. Examines the “cult” versus “religion” debate; apocalyptic, eschatological, and millennial views of the world; the nature of charismatic leadership; regional patterns; and transnational trends.

RLST 110 Yoga: Ancient and Modern 4 Lecture, 3 hours; individual study, 1 hour; research, 1 hour; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Investigates yoga in its transition from an ancient Indic system of contemplative practice to its modern postural forms. Engages the history of yoga in India and its primary texts and current cultural and religious debates activated through the globalization of modern postural yoga.

RLST 111 Islam 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An overview of Islam from the time of Muhammad (d. 632 A.D.) to the present. Attention is given to its distinctive beliefs and practices, its influence upon societies in which it became dominant, and its interaction with other traditions.

RLST 112 Islam in America 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Explores historical and contemporary dimensions of Islam in America and the way in which Islam shapes and is shaped by American politics and cultures. Introduces analytical tools for understanding Islam and contemporary ideas and practices including conversion, migration and diaspora, ritual, politics, ethics, education, gender, and media.

RLST 113 Topics in Modern Islam 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines key issues facing Islam in the modern world such as Islam’s engagement with and reaction to nationalism, feminism, the status of sacred texts in the face of critical historical and philological studies, science, and technology.
The Problem of Evil: Understanding Evil and its Manifestations

A comparative study of mythic traditions from several world cultures and religions viewed from a variety of theoretical perspectives. Includes material drawn from epics, religious texts, divine hymns, creation myths, heroic legends, and concepts of the afterlife as reflected in literary and nonliterary sources. Cross-listed with CLA 112, and CPLT 112.

The Hebrew Bible/Old Testament

Lecture, 3 hours; research, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Introduces the Indian religion of Jainism. Explores various aspects of Jainism including history, sectarian divisions, texts, doctrines, practices, and its relationship with other Indian traditions.

The Problem of Evil: Understanding Evil and its Manifestations

Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of the collection of books usually called the Old Testament by Christians and the Bible by Jews (the acronym T\'CH is often used by Jews as well). The books are examined in their historical, cultural, and religious contexts, with attention to the methods of modern literary criticism.

The Bible: New Testament

Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An examination of the literature and history of the early Christian movement. Attention is given to New Testament materials and apocryphal writings.

Religion and Violence

Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of various figures and communities that have resisted hegemonic norms in Black religion in the United States. Explores historical primary resources, literature, oral histories, and contemporary artistic and cultural productions. Examines moral visions of Black and collective resistance and thriving. Cross-listed with BLKS 115.

Religion, Violence, and Film

The Problem of Evil: Understanding Evil and its Manifestations

Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the capacity of religion to mobilize and legitimate violence. Materials covered include theoretical texts by Rene Girard, Walter Burkert, Jonathan Z. Smith, and others, and include theoretical texts by Rene Girard, Walter Burkert, Jonathan Z. Smith, and others, and includes material drawn from epics, religious texts, divine hymns, creation myths, heroic legends, and concepts of the afterlife as reflected in literary and nonliterary sources. Cross-listed with CLA 112, and CPLT 112.

Religion, Violence, and Film

The Problem of Evil: Understanding Evil and its Manifestations

Lecture, 3 hours; research, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Explores the relationship between religious cosmologies, the organization of knowledge, and the practices for managing bodily and natural order that underpin three major medical traditions of Asia in premodern and modern periods: Ayurveda, Traditional Chinese Medicine, and Tibet’s Four Tantra Tradition.

The Bible: New Testament

Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Surveys the history of Christianity from its origins through the Reformation. Includes the development of Christian beliefs, practices, and institutions in historical contexts. Cross-listed with HIST 130A.

Religion, Violence, and Film

The Problem of Evil: Understanding Evil and its Manifestations

Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of the collection of books usually called the Old Testament by Christians and the Bible by Jews (the acronym T\'CH is often used by Jews as well). The books are examined in their historical, cultural, and religious contexts, with attention to the methods of modern literary criticism.

The Bible: New Testament

Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An examination of the literature and history of the early Christian movement. Attention is given to New Testament materials and apocryphal writings.

Religion, Violence, and Film

The Problem of Evil: Understanding Evil and its Manifestations

Lecture, 3 hours; research, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Explores the extermination of European Jewry during World War II. Surveys the history of the “Jewish Question”; Jewish-Christian relations; race; the systematic persecution and genocide of the Jews; and world responses to genocide. Addresses religious, social, economic, and political aspects of the Jewish state. Cross-listed with HIST 127.

The Bible: New Testament

Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of the social, religious, and cultural development of Christianity in its first six centuries. Particular attention paid to issues of heresy/orthodoxy, material piety, and the rise of ecclesiastical institutions.

Religion, Violence, and Film

Includes the development of Christian beliefs, practices, and institutions in historical contexts. Cross-listed with HIST 130A.
RLST 142 Zhuangzi 4 Lecture, 3 hours; research, 1 hour; extra reading, 1 hour; term paper, 1 hour. Prerequisite(s): CHN 107 or CHN 112 or PHIL 110. An examination of change, epistemological and linguistic relativism, fate, skill, and the character of the sage in the Chinese Daoist text Zhuangzi. Discusses the structure and style of this literary masterpiece. Students with knowledge of classical Chinese may arrange additional work through special studies. Cross-listed with AST 142, and CHN 142.

RLST 143 Divination and Prediction in China and Greece 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): AST 030 or CHN 030 or CPLT 030 or CHN 104 or CHN 107 or AST 142 or CHN 142 or RLST 142 or AST 148 or CHN 148 or CLA 010A or CLA 010B or CLA 010C or CLA 040 or CLA 050 or CLA 100 or CLA 112 or HISE 110 or CLP 112 or RLST 117 or CLA 114 or CPLT 114 or CLA 120 or CPAC 102 or CLA 102 or CPAC 112 or CLA 113 or HISE 113 or CPAC 121 or CLA 121 or POSC 121 or CPAC 132 or AST 132 or CHN 132 or CLA 132 or CPAC 133 or HISE 114 or CPAC 134 or HIST 110 or CPAC 141 or AST 145 or CHN 141 or CLA 141 or POSC 140; restricted to class level of junior, or senior; or consent of instructor. Comparative study of early divination and prediction in early China, ancient Greece, and two other areas of the ancient world. Perspectives include social and intellectual contexts and institutions, as well as gender and boundaries between science, philosophy, and religion. Utilizes primary source material in texts and visual arts. Cross-listed with CHN 143, CLA 143, and CPAC 143.

RLST 144 Buddhist Literature 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Readings in canonical and non-canonical Buddhist texts. Includes Buddhist-influenced literature written by Asian, European, and American authors. Examines themes of emptiness, impermanence, and no-self. Cross-listed with CPLT 144, and AST 133.

RLST 146 Rhetoric and Discipline in Buddhist Studies 4 Lecture, 3 hours; written work, 2 hours; activity, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of key works in Buddhist studies in an effort to flesh out a critical history of academic portrayals of Buddhism. Explores the history and boundaries of the field and its relationship to modes of Buddhist and non-Buddhist rhetoric and interpretation in colonial, Orientalist, socialist, and neo-liberal contexts.

RLST 148 Religions of the Silk Road 4 Lecture, 3 hours; individual study, 3 hours; written work, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduction to religious traditions that flourished along the ancient Silk Road. Includes Zoroastrianism, Buddhism, Manichaeism, Nestorian Christianity, Islam, and Judaism. Focuses on the spread, development, and interaction through the medieval period. Considers ways in which the Silk Road period legacy figures in religious and political debates in contemporary Central Asia.

RLST 149 Southeast Asian Religions 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): one Religious Studies course or upper-division standing or consent of instructor. Introduces aspects of religion in various Southeast Asian countries including Indonesia, Malaysia, Thailand, Cambodia, Vietnam, and the Philippines. Provides contextualized readings featuring historical, anthropological, literary, and other disciplinary perspectives. Cross-listed with SEAS 149.

RLST 150 Islam in Southeast Asia 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces the religious, intellectual, and cultural history of Muslim Southeast Asia. Includes Indonesia, Malaysia, and Brunei, as well as minority communities in Singapore, Thailand, Cambodia, and the southern Philippines. Examines a series of contextualized readings in translated primary sources. Approaches texts from historical, anthropological, literary, and other disciplinary perspectives. Cross-listed with SEAS 150.

RLST 151 Reading the Qur’an 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of the Qur’an, Islam’s primary scripture. Examines the contexts in which the text originated. Offers critical analyses of the Qur’an and discussion of its roles in the cultural histories of Muslim societies.

RLST 152 Religion and Oppression 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): GSST 001 or GSST 001H or GSST 001S or RLST 001 or RLST 001H or RLST 002 or RLST 003 or RLST 005 or RLST 005H or RLST 007 or RLST 007H or RLST 010 or RLST 010H or ETST 012H or RLST 024 or RLST 026H or RLST 026 or RLST 028 or ETST 028 or HLST 044; may be taken in sequence with RLST 153; or consent of instructor. Analyzes the relationship between religion and oppression, including religion as target of oppression, religion as causative or exacerbating force in oppression. Religious studies, feminist, critical race, queer, and post/anti-colonial theoretical perspectives undergird the analysis.

RLST 153 Religion and Social Justice 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): GSST 001 or GSST 001H or GSST 001S or RLST 001 or RLST 001H or RLST 002 or RLST 003 or RLST 005 or RLST 005H or RLST 007 or RLST 007H or RLST 010 or RLST 010H or ETST 012 or RLST 012 or ETST 012H or ETST 012H or ETST 024 or ETST 044 or HIST 044; may be taken in sequence with RLST 153; or consent of instructor. Analyzes the relationship between religion and oppression, including religion as target of oppression, religion as causative or exacerbating force in oppression. Religious studies, feminist, critical race, queer, and post/anti-colonial theoretical perspectives undergird the analysis.

RLST 154 Islam in Southeast Asia 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of the Qur’an, Islam’s primary scripture. Examines the contexts in which the text originated. Offers critical analyses of the Qur’an and discussion of its roles in the cultural histories of Muslim societies.

RLST 155 Peace in the Middle East 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of the roots of the Middle Eastern crises. Focuses on the Arab-Israeli conflict and possible solutions toward peace. Addresses problems through historical, religious, and political lines of inquiry. Cross-listed with PHIL155.

RLST 156 Jews and Arabs 4 Lecture, 3 hours; extra reading, 3 hours Prerequisite(s): upper-division standing or consent of instructor. Traces the formation of the shared and divided history of the Jewish and Arab peoples. Focuses on the literary and institutional dimensions of this history, as well as the formation of related areas of study, such as religion, philosophy, literature, and psychoanalysis. Cross-listed with ARLC 156, CPLT 156, and MEIS 156.

RLST 159 Queer Religiosities 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): GSST 001 or GSST 001H or GSST 001S or RLST 001 or RLST 001H or RLST 002 or RLST 003 or RLST 005 or RLST 005H or RLST 007 or RLST 007H or RLST 010 or RLST 010H or ETST 012 or RLST 012 or ETST 012H or RLST 014 or RLST 015 or RLST 015H or RLST 024 or HIST 034 or RLST 044 or HIST 044. A comparative, thematic exploration of religion in the lives of contemporary same sex attracted and gender variant or gender nonconforming people around the world. Topics may include intersections of religion with neoliberal economic and political strategies; globalization; global North/South inequities; settler colonialism; racial, economic, and gender inequalities; homonormativity/homonationalism; queer activism. Cross-listed with GSST 159.

RLST 160 Religion, Gender and Sexuality 4 Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examination of attitudes toward and images of women in diverse religious traditions. Includes issues such as the presence and absence of women in leadership roles; women’s spiritual experiences; female founders of religious groups; and recent developments in feminist religious thought. Cross-listed with GSST 160.

RLST 161 Gender and Sexuality in U.S. Religious History 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): GSST 001 or GSST 001H or GSST 001S or RLST 001 or RLST 001H or RLST 002 or RLST 003 or RLST 005 or RLST 005H or RLST 007 or RLST 007H or RLST 010 or RLST 010H or ETST 012 or RLST 012 or ETST 012H or ETST 012H or ETST 024 or ETST 044 or HIST 044; may be taken in sequence with RLST 161; or consent of instructor. Overview and analysis of gender and sexuality in religion from colonial period (including Spanish, French, Russian, and British colonies in what is now the United States) to present day. Combines critical and comparative religious studies approaches with historical methods and the analytical perspectives of intersectional gender, sexuality, and queer studies. Cross-listed with GSST 158.
RLST 162 Women’s Issues in Modern Muslim Thought 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): one Religious Studies course or upper-division standing or consent of instructor. Introduces complex religious and social issues related to the role of women in modern Islamic societies ranging from North America to Southeast Asia. Examines Muslim writings produced during the past century. Cross-listed with GSST 162.

RLST 163 The Women of Early Christianity 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the social roles and literary constructs of early Christian women as evidenced in the New Testament, patristic, and Apocryphal writings. Also considers the significance of those textual traditions for later Western ideas about women’s social roles including traditional and feminist theories. Cross-listed with GSST 163.

RLST 166 Evangelical Religion, Media, and Culture in America 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces the history of the use of media technologies among evangelicals. Addresses the interconnections between religious productions of meaning, proselytization, and politics. Explores the ways the critical interlace of religion and media both shapes and is shaped by the ways participants understand themselves as racial, gendered and classed subjects.

RLST 169 Religion and Music 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the complex intersection of sound, religion, religious experience, and culture. Explores how sacred music and varieties of sound-induced or sound-enhanced religious experience enables groups of people to construct religious meaning and understand their world. Focuses on musical forms of practices and embodied experiences of the sacred.

RLST 173 Political Religions and Religious Politics 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Investigation of major themes and issues in the intersection of religion and politics, such as the sacralization of politics, religious nationalism, sacrality of kingship, revolutionary asceticism, “throne and altar,” civil religion, millennialism, political myth and ritual, integralism, and the conformity of the pieties to religious values. Cross-listed with POSC 109.

RLST 176 Peace and War 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of peace and war from diverse religious and ethical perspectives. Addresses nuclear and conventional war and revolutionary wars of liberation as ethical issues requiring social policy and personal decision. Topics include “just war,” “holy war,” nonviolence, and pacifism.

RLST 177 History of the Church in Latin America 4 Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of the history of the church (e.g., Catholic, Protestant) in Latin America. Includes conquest and mission, indigenous responses to Christian conversion, the long colonial period, independence, revolution, and liberation theology movements. Explores the dynamics of church and culture, church and state, and church and social transformation. Cross-listed with HISA 168.

RLST 179 Pilgrimage 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of pilgrimage and religious tourism in selected traditions. Includes historical, sociological, anthropological, and ritual analysis of the construction of sacred time and space and of the formation of communal and personal identity.

RLST 180 Saints and Gurus 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores how religious virtuosi have shaped religious practice and the teaching of Hinduism, Buddhism, Jainism, Sikhism, and Islam in South Asia. Examines history, myth, poetry, meditation, yoga, and ritual, with a focus on how the ascetic ideal has shaped global imagination about South Asia.

RLST 190 Special Studies 1 to 5 Individual Study, 3 to 15 hours. Prerequisite(s): consent of instructor and department chair. To be taken to meet special curricular problems. Course is repeatable to a maximum of 16 units.

RLST 193 Senior Seminar 4 Seminar, 3 hours; written work, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Advanced undergraduate study of specific religious texts, traditions, or key underlying themes as set by the instructor. Topics vary each year.

RLST 195 Senior Thesis 1 to 4 Enrollment by request of student with the approval of the Program faculty, which must be granted no later than the quarter before the course is to be taken. May be taken for four units only in the first or second quarter of the senior year; two more units may be taken in a subsequent quarter. Total credit may not exceed 6 units.

RLST 197 Research For Undergraduates 1 to 2 Individual research, 3 to 6 hours. Prerequisite(s): upper-division standing or consent of instructor. Directed individual research. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable to a maximum of 4 units.

RLST 198I Individual Internship 1 to 6 Internship, 2 to 12 hours; reading and writing, 1-6 hours. Prerequisite(s): upper-division standing or consent of instructor; consent of department chair. An individually designed, academically grounded internship that provides an opportunity for advanced majors to apply their knowledge of religion to businesses and organizations outside the university. Prior approval of the instructor and supervisor is required for units, fieldwork, and academic content. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 6 units.

Graduate Courses

RLST 200A Religion, Politics, and Public Discourse 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor; consent of graduate advisor is required for students repeating the course. Critical examination of the intersections of religious identities and public politics. Topics vary by instructor but may include human rights, “church-state” debates, Islamism, civil religion, and postcolonial religions. Completion of the RLST 200A, RLST 200B, RLST 200C sequence fulfills the Graduate Professional Development Requirement. Course is repeatable to a maximum of 8 units if taken with different instructors.

RLST 200B Representations, Interpretations, and Critical Histories 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor; consent of graduate advisor is required for students repeating the course. Examines how religious identity and studies have shaped and been shaped by modes of representation, interpretation, and historical awareness. Topics vary but may include biographies, art and architecture, mass media, and scriptural interpretation. Completion of the RLST 200A, RLST 200B, RLST 200C sequence fulfills the Graduate Professional Development Requirement. Course is repeatable to a maximum of 8 units if taken with different instructors.

RLST 200C Religions in Contact 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor; consent of graduate advisor is required for students repeating the course. Examines how religions confront each other historically, politically, and metaphorically. Specific topics vary according to instructor but may include syncretism, mission and colonization, religions wars, ecumenism, and “world religion” movements. Completion of the RLST 200A, RLST 200B, RLST 200C sequence fulfills the Graduate Professional Development Requirement. Course is repeatable to a maximum of 8 units if taken with different instructors.
RLST 201 Thinking About Religion: Classic Theories in the Study of Religion 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A critical study of classic theories and theorists in the study of religion within their historical contexts. Featured thinkers include Frazer, Eliade, Smart, Spinoza, Durkheim, Freud, and Weber. Considers such intellectual movements as Higher Criticism of the Bible, psychoanalysis, phenomenology, and hermeneutics. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

RLST 202 Contemporary Theories and Theorists in the Study of Religion 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor; consent of graduate advisor is required for students repeating the course. A critical consideration of leading contemporary theories and theorists in religious studies. Selection of theories and theorists changes according to the interests of the instructor. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 16 units if taken with different instructors.

RLST 203 Hermeneutics and History 4 Seminar, 3 hours; term paper, 1 hour; extra reading, 2 hours. Prerequisite(s): graduate standing; consent of instructor. Advanced topics in the critical study of religion, history, social theory, and hermeneutics. This course serves as the core course for the Hermeneutics and History Ph.D. track in Religious Studies.

RLST 204 Analytics of Power 4 Seminar, 3 hours; term paper, 1 hour; extra reading, 2 hours. Prerequisite(s): graduate standing; consent of instructor. Advanced topics in the study of religion, power, and resistance. This course serves as the core course for the Analytic of Power Ph.D. track in Religious Studies.

RLST 205 Transnational Religions 4 Seminar, 3 hours; term paper, 1 hour; extra reading, 2 hours. Prerequisite(s): graduate standing; consent of instructor. Advanced topics in the study of religion and transnationalism. Serves as the core course for the Transnational Religions PhD track in Religious Studies.

RLST 206 Queering Islam 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing; consent of instructor. Explores whether queer and trans can function as useful and productive categories in Islamicate contexts despite their dominant Eurocentric and secular underpinnings. Also investigates what it would mean to integrate these categories through an Islamicate lens.

RLST 207 Queering Religion in the African Diaspora 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing; consent of instructor. Surveys contemporary contributions to the disciplinary lines of queer African diaspora religious studies in the Americas and the Caribbean. Explores how queerness and queering functions in the study of spiritual and religious spaces. Includes study of embodiment, divinities, rituals, and spiritual and religious practices.

RLST 220 Advanced Topics in Method and Theory in the Study of Religion 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An inquiry into the major conceptual issues of the methods and theories employed in the study of religion. Topic varies from quarter to quarter. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

RLST 221 The Religious Studies-Teology Debate 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Addresses current debates concerning the relation of theologies to humanistic studies of religion. Covers neoorthodox, liberal, post-liberal and postmodern theologies as alternatives to varieties of the humanistic study of religion in the public university. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

RLST 224 Comparative Religious Ethics 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Inquiry into a variety of debates about ethics: religious and philosophical, theoretical and applied. Topics may include policy debates about bioethics, moral inquiries into virtue, ethics and minority discourse, violence and nonviolence as means of social change, or fundamental moral problems generated by suffering. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

RLST 226 Via Mystica 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores the connection between these religions in terms of ritual technology, soteriological goals, meditative practices, and eschatological articulations. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

RLST 227 Asceticism 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Provides an analysis of the theories and practices associated with bodily renunciation, focused especially on the first Christian centuries. Explores issues such as fasting, sexual abstinence, and social withdrawal from a variety of critical perspectives, with special attention paid to gender, status, and the body in religion. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

RLST 228 South Asian Islam 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores major issues in recent scholarship in South Asian Islam. Topics include debates over emerging theories such as narrative and market model approaches; secularism; immigration, race, and ethnicity; religion and national identity formation; religious imagination in regards to border and boundary crossing; and the role of Protestant privilege. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

RLST 229 Public Religious Discourses in Modern Islam 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): consent of instructor. Explores the public religious discourses in modern Islam as lived by Muslims in local and global contexts by examining the content and dynamics of modern discussions of religious and social issues in Muslim “public spheres.” Includes primary and secondary sources of information. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

RLST 230 Comparative Religious History 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An in-depth inquiry into the major conceptual issues of the methods and theories employed in the study of religion. Topic varies from quarter to quarter. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

RLST 231 Theoretical Methodology 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on the Sikh sacred text as a primary example, investigates the intellectual and emotional factors underlying the composition, copying, canonization, and transmission of sacred texts, with attention to issues of production and reception in historical communities. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

RLST 237 Ethnographic Methodology 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Surveys contemporary contributions to the disciplinary lines of queer African diaspora religious studies in the Americas and the Caribbean. Explores how queerness and queering functions in the study of spiritual and religious spaces. Includes study of embodiment, divinities, rituals, and spiritual and religious practices.

RLST 240 Advanced Topics in the Study of North American Religion 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores major issues in recent scholarship in North American religion. Topics include debates over emerging theories such as narrative and market model approaches; secularism; immigration, race, and ethnicity; religion and national identity formation; religious imagination in regards to border and boundary crossing; and the role of Protestant privilege. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

RLST 241 From Text to Scripture: Canon, Performance, Reception 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on the Sikh sacred text as a primary example, investigates the intellectual and emotional factors underlying the composition, copying, canonization, and transmission of sacred texts, with attention to issues of production and reception in historical communities. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

RLST 245 Via Mystica 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores the connection between these religions in terms of ritual technology, soteriological goals, meditative practices, and eschatological articulations. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

RLST 246 South Asian Islam 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): consent of instructor. Explores the public religious discourses in modern Islam as lived by Muslims in local and global contexts by examining the content and dynamics of modern discussions of religious and social issues in Muslim “public spheres.” Includes primary and secondary sources of information. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

RLST 247 Southeast Asian Islam 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores the public religious discourses in modern Islam as lived by Muslims in local and global contexts by examining the content and dynamics of modern discussions of religious and social issues in Muslim “public spheres.” Includes primary and secondary sources of information. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

RLST 248 The Religious Studies-Teology Debate 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Addresses current debates concerning the relation of theologies to humanistic studies of religion. Covers neoorthodox, liberal, post-liberal and postmodern theologies as alternatives to varieties of the humanistic study of religion in the public university. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.
RLST 253 Southeast Asian Religions 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Discusses different and dynamic aspects of religion in various Southeast Asian countries including Indonesia, Malaysia, Thailand, Cambodia, Vietnam, and the Philippines. Explores contextualized readings featuring historical, anthropological, literary, and other disciplinary perspectives on this diverse region. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as topic changes to a maximum of 8 units. Cross-listed with ANTH 257 and SEAS 202.

RLST 254 Queer and Transgender Studies in Religion 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Advanced study of classic and current works in the subfields of queer and transgender studies in religion. Specific topics may include: queer analysis of sacred texts and religious histories, gender variance in religious traditions, queer/ trans religious innovation, and queer feminist, critical race, and anti- and postcolonial studies perspectives on religion. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

RLST 257 The Sufis 4 Seminar, 3 hours; term paper, 2 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to sufism through an in-depth reading of the great Sufi poets. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CWPA 257.

RLST 261 Problems in the Study of Buddhism 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines controversies in the field of Buddhist studies. Topics include the rise of asceticism in India, the composition of the earliest Buddhist texts, the processes of transmission of texts and translation problems, the rise of sectarian debate, and women’s role in Buddhist ecclesia. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

RLST 263 Historiography of Sikh Hermeneutics 4 Seminar, 3 hours. research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the historiography of Sikh hermeneutics, focusing on the historical contexts of various schools of interpretations of the Adi Granth in premodern, modern, and postmodern periods. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

RLST 270 Topics in Jewish Studies 4 Seminar, 3 hours. research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines current problems in the field of Jewish studies. Topics address issues related to memory, identity, economy, power, gender, race, genetics, and culture. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

RLST 272 Jews and the Economy 4 Seminar, 3 hours. research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Surveys facts and fictions about Jews and the economy. Topics include usury, the court Jew, finance, retail and manufacturing, labor movements, organized crime, and culture industries. Addresses select issues of culture and economy, as well as depictions of Jewish money in literature, film, and journalism. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

RLST 290 Directed Studies 1 to 5 Research, 3 to 15 hours. Prerequisite(s): consent of instructor and graduate advisor. Advanced work in a topic or topics appropriate to the student’s special interests and needs. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

RLST 291 Individual Study in Coordinated Areas 1 to 12 Individual Study, 3 to 36 hours. Prerequisite(s): consent of instructor; doctoral standing. Program of study designed to advise and assist candidates who are preparing for qualifying examinations. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

RLST 292 Concurrent Studies in Religious Studies 1 to 4 Research, 3 to 12 hours. Prerequisite(s): consent of instructor; concurrent enrollment in a RLST-100 level course. Taken concurrently with a 100-level RLST course, but on an individual basis. Devoted to completion of a graduate paper based on research related to the 100-level course. Faculty guidance and evaluation is provided throughout the quarter. RLST 190, RLST 193, RLST 195, RLST 197, and RLST 198-I may not be used for this course arrangement. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

RLST 297 Directed Research 1 to 6 Research, 3 to 18 hours. Prerequisite(s): consent of instructor; graduate standing. Individualized research under the sponsorship of specific faculty members. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

RLST 299 Research for the Dissertation 1 to 12 Research, 3 to 36 hours. Prerequisite(s): satisfactory completion of the Ph.D. qualifying examination. Research, under the direction of a faculty member, for preparation of the thesis or dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

RLST 302 Teaching Practicum 1 to 4 Practicum, 3 to 12 hours. Prerequisite(s): appointment as a Teaching Assistant; graduate standing. Supervised teaching in lower- and upper-division Religious Studies courses. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

RLST 401 Colloquium in Religious Studies 1 Colloquium, 1 hour. Prerequisite(s): graduate standing; consent of instructor. Specialized colloquium participation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as content or topic changes to a maximum of 6 units.

RLST 402 Pedagogy 1 Seminar, 1 hour; written work, 0.5 hour; extra reading, 0.5 hour. Prerequisite(s): graduate standing; consent of instructor. Pedagogical considerations in the teaching of religious studies. Graded Satisfactory (S) or No Credit (NC).

RLST 403 Surviving the Job Market 1 Seminar, 1 hour; written work, 1 hour. Prerequisite(s): graduate standing; consent of instructor. Preparation for the traditional academic job market in religious studies. Graded Satisfactory (S) or No Credit (NC).

RLST 404 Research, Writing, and Publication 1 Seminar, 1 hour; written work, 1 hour. Prerequisite(s): graduate standing; consent of instructor. Professional skill development in research preparation, funding, and publication. Graded Satisfactory (S) or No Credit (NC).

Related Courses

ANTH 124 Ritual and Religion 4 Lecture, 3 hours. The elements and forms of religious belief and behavior; functions of ritual in society. Cross-cultural comparisons.

AHS 155 Cultures in Conflict: Art at the Fall of the Roman Empire 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Covers architecture, mosaic, wall painting, manuscript illumination, and sculpture from the origins of Christianity to the final dissolution of the Roman Empire. Stresses the role of art in the co-optation of the Church by the Empire and then in the aftermath of its fall.

AHS 156 Memory of Empire: the Art of Early Medieval Europe 4 Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Covers manuscript illumination, barbarian jewelry, architecture, and sculpture from the fall of the Roman Empire and through the Carolingian Empire up to the tenth century. Stresses the interplay between indigenous Germanic and foreign classical traditions.

ENGL 100 (E-Z) Scriptures, Myths, and Interpretation 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior. Focuses on issues of scriptural and mythical analysis. Explores the impact of scripture and myth on literature written in English; textual development of the Hebrew scripture including the development of the King James version; major authors’ uses of scripture and myth; exegesis; scripture and myth in current criticism and theory.

Michael Bucklin, M.F.A.
Louis Carazo, M.F.A.

Major

The Department of Theatre, Film, and Digital Production offers a B.A. in Theatre, Film, and Digital Production. The major focuses on three broad areas of theatre and film: literature, history, and criticism; performance, design, direction, and technology; and the elements of production. Students have the opportunity to write, perform, direct, and design. Four stages are available for rehearsals and performances: the 500-seat prosenium University Theatre, the 150-seat Studio Theatre in the Arts building with state-of-the-moment equipment for facilities, and the 120-seat Rehearsal Lab.

Students are able to practice acting in faculty-directed shows, student productions, and class presentations. Special projects and studies are offered for advanced students to produce an original work or to study in more depth acting, directing, scenic design, or playwriting.

As part of the Theatre, Film, and Digital Production Department’s ongoing goal to provide a comprehensive and world-class program in the performing arts, a Filmmaking Track is offered for students who are primarily interested in pursuing the goal of becoming filmmakers. In addition to taking classes in filmmaking, screenwriting, acting, and technology, students will also take classes in literature and theory as requirements.

Student assistantships, work-study, Gluck Fellowships, and scholarships such as the Chancellor’s Performance Award are available to students. For further information, call the Theatre, Film, and Digital Production Department, (951) 827-5568.

University Requirements
See Undergraduate Studies section.

College Requirements
See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

Major Requirements

The major requirements for the B.A. degree in Theatre, Film, and Digital Production are as follows:

Lower-division requirements (9 units)
1. TFDP 099
2. TFDP 020
3. Either TFDP 010, TFDP 021, TFDP 022, TFDP 050, TFDP 0505, TFDP 066, or TFDP 067

Track 1: Literature, History, Criticism and Dramaturgy

Upper-division requirements (40/44 units)

1. Literature, History, Criticism and Dramaturgy requirement (20 units)
   a) Literature, History, and Criticism emphasis (12 units): TFDP 100, TFDP 120A, TFDP 120B
      1) Eight (8) additional units from TFDP 121, TFDP 122, TFDP 123, TFDP 124A, TFDP 124B, TFDP 125 (E-Z), TFDP 127, TFDP 161, TFDP 177 or TFDP 177S, TFDP 191 (E-Z)
   b) Dramaturgy emphasis (12 units): TFDP 100, TFDP 120A, TFDP 120B
      1) Eight (8) additional units from TFDP 103, TFDP 121, TFDP 122, TFDP 123, TFDP 124A, TFDP 124B, TFDP 125 (E-Z), TFDP 127, TFDP 161, TFDP 177 or TFDP 177S, TFDP 191 (E-Z)

3. Production requirement (8/12 units)
   a) Literature, History, and Criticism emphasis: Eight (8) units from TFDP 170, TFDP 171, TFDP 172, TFDP 173, TFDP 174, or TFDP 175
   b) Dramaturgy emphasis: TFDP 174 (4 units) and eight (8) units from TFDP 170, TFDP 171, TFDP 172, TFDP 173, or TFDP 175

Track 2: Writing for the Performing Arts

Upper-division requirements (44 units)

1. Literature, History, and Criticism (12 units)
   a) TFDP 120A, TFDP 120B (8 units)
   b) Four (4) units from TFDP 122, TFDP 123, TFDP 124A, TFDP 124B, TFDP 125 (E-Z), TFDP 127, TFDP 191 (E-Z)

2. Writing for the Performing Arts (20 units)
   a) TFDP 164A, TFDP 164B, TFDP 164C
   b) TFDP 166A, TFDP 166B

3. Eight (8) elective units from TFDP 109, TFDP 110A, TFDP 114, TFDP 115, TFDP 150A, TFDP 150B, TFDP 152, TFDP 163, TFDP 165, TFDP 166C, TFDP 167, TFDP 169, TFDP 195, TFDP 198-1

4. Production requirement: Four (4) units from TFDP 170, TFDP 171, TFDP 172, TFDP 173, TFDP 174, or TFDP 175

Track 3: Filmmaking

Upper-division requirements (40 units)

1. Filmmaking (16 units)
   a) TFDP 155 and TFDP 153A or TFDP 154 (8 units)
   b) Eight (8) additional units from TFDP 117, TFDP 130A, TFDP 130B, TFDP 142, TFDP 144, TFDP 151, TFDP 153B, TFDP 156A, TFDP 156B, TFDP 157, TFDP 159

2. Screenwriting (4) units from TFDP 163

3. Sixteen (16) elective units from TFDP 100, TFDP 101, TFDP 109, TFDP 115, TFDP 120A, TFDP 120B, TFDP 122, TFDP 123, TFDP 133, TFDP 140A, TFDP 150A, TFDP 152, TFDP 150B, TFDP 160, TFDP 161, TFDP 165, TFDP 167, TFDP 171, TFDP 172, TFDP 177 or TFDP 177S, TFDP 180 (E-Z), TFDP 185/MUS 185 or TFDP 185S/MUS 185S, TFDP 191 (E-Z), TFDP 195, TFDP 198-1

4. Production requirement: Four (4) units from TFDP 170, TFDP 171, TFDP 172, TFDP 173, TFDP 174, or TFDP 175

Track 4: Acting and Directing

Upper-division requirements (40-44 units)

1. Acting/Directing (16 units)
   a) Acting emphasis: TFDP 109, TFDP 110A, TFDP 110B (12 units)
      1) Four (4) additional units from TFDP 111A, TFDP 111B, TFDP 111C, TFDP 111D, TFDP 112 (E-Z), TFDP 113 (E-Z)
   b) Directing emphasis: TFDP 109, TFDP 150A, TFDP 150B (12 units)
      1) Four (4) additional units from TFDP 110A, TFDP 112 (E-Z), TFDP 113 (E-Z), TFDP 117, TFDP 153A, TFDP 154

2. Literature History and Criticism (12 units):
   TFDP 100, TFDP 120A, TFDP 120B
## Track 5: Production and Design

**Upper-division requirements (40-44 units)**

1. **Production and Design (16 units)**
   
a. **TFDP 101 (4 units)**

   b. **Twelve (12) units from TFDP 131, TFDP 132, TFDP 133, TFDP 135, TFDP 142, TFDP 143, TFDP 145, TFDP 149, TFDP 180 (E-Z)**

2. **Literature, History, and Criticism (12 units)**
   
a. **TFDP 100 (4 units)**
   
b. **Eight (8) units from TFDP 120A, TFDP 120B, TFDP 121, TFDP 122, TFDP 124A, TFDP 124B, TFDP 125 (E-Z), TFDP 161, TFDP 176/DNCE 128/ANTH 128/AST 128, TFDP 177 or TFDP 177S, TFDP 191 (E-Z)**

3. **Four (4) units from TFDP 109, TFDP 115, TFDP 150A, TFDP 150B, TFDP 152, TFDP 160, TFDP 195, TFDP 198-I**

4. **Production requirement (8-12) units from TFDP 170, TFDP 171, TFDP 172, TFDP 173, TFDP 174, or TFDP 175**

## Track 6: General Theatre, Film, and Digital Production

**Upper-division requirements (40 units)**

1. **Twelve (12) units of Literature, History, and Criticism: TFDP 100, TFDP 120A, TFDP 120B**

3. **Electives (8) eight units from TFDP 115, TFDP 122, TFDP 124A, TFDP 124B, TFDP 125 (E-Z), TFDP 152, TFDP 161, TFDP 176/DNCE 128/ANTH 128/AST 128, TFDP 177 or TFDP 177S, TFDP 185/MUS 185 or TFDP 185S/MUS 185S, TFDP 180 (E-Z), TFDP 191 (E-Z), TFDP 195, TFDP 199**

4. **Production requirement (8) units from TFDP 170, TFDP 171, TFDP 172, TFDP 173, TFDP 174, or TFDP 175**

## Minor

The minor in Theatre, Film, and Digital Production follows the structure of the major requirements by exposing students to each of the areas that are essential to the creation of theatre and film, with the opportunity to take an additional course for depth or more exposure. The inclusion of production courses TFDP 170, TFDP 171, TFDP 172, TFDP 173, TFDP 174 and TFDP 175 gives the students the opportunity to put course work into the proper context and provides them with a practical understanding of the workings and problems of production. The minor in Theatre, Film, and Digital Production provides students with a basic understanding in major areas of study including performing arts literature, performance, and design. It also introduces the nonmajor to the discipline, providing breadth for those students majoring in unrelated disciplines.

**Requirements for the minor (20 units)**

1. **TFDP 100, TFDP 101, TFDP 109**

2. **Four (4) units from TFDP 170, TFDP 171, TFDP 172, TFDP 173, TFDP 174 or TFDP 175**

3. **One 4-unit upper-division course selected from the department’s Literature, History, Criticism area or the Performance, Direction, Playwriting, Screenwriting, Design, and Theatre Technology area.**

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

## Education Abroad

Education Abroad is an excellent opportunity to learn more about another country and its culture while taking courses to earn units toward graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit Education Abroad at ea.ucr.edu or call (951) 827-4113. See Education Abroad in the Educational Opportunities section in the beginning of this catalog.

## Graduate Program

The Department of Theatre, Film, and Digital Production in conjunction with the Department of Creative Writing offers the M.F.A. degree in Creative Writing and Writing for the Performing Arts. See Creative Writing and Writing for the Performing Arts in this catalog for more information and program requirements.

## Lower-Division Courses

**TFDP 010 Introduction to Acting (4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none) Introduction to acting in theatre, film, television, and performance art. Through exercises, lectures, videos, and on-site visits, explores the work of actors and their collaborations with other artists in historical and contemporary settings. Recommended for nonmajors.**

**TFDP 020 Production Techniques For Theatre, Film, and Television (4 Lecture, 3 hours: laboratory, 3 hours. Prerequisite(s): none. A study of technical production practices, equipment, and architecture for theatre, film, and television design. Explores the application of production practices and principles of stagework in relation to scenic, costume, lighting, sound, and projection design.**

**TFDP 021 Introduction to Latinx Cultural Production On Stage and Screen (4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to Latino theatre and film from 1965 to the present. Examines the major works of playwrights and important films and videos.**

**TFDP 022 Shakespeare in Performance (4 Lecture, 2 hours; workshop, 2 hours. Prerequisite(s): none. A study of contemporary Shakespearean production on stage and film. Considers the problems of adapting the text, creating visual elements, speaking the language, and performing the characters. Explores a wide range of performance styles.**

**TFDP 042 Costume Construction (4 Lecture, 2 hours; laboratory, 6 hours. Prerequisite(s): none. A theoretical and practical study of theatrical costume production. Topics include draping and flat pattern development, fabric fitting, and sewing techniques. Costume projects are required. Sewing skills helpful but not essential.**

**TFDP 044 Makeup For Theatre, Film, and Television (4 Discussion, 4 hours, Prerequisite(s): none. A study of the theory and practice of makeup for theatre, film, and television. Includes demonstrations by industry professionals.**

**TFDP 050 Public Speaking (4 Lecture, 3 hours; studio, 3 hours. Covers the principles and practice of effective speech composition and delivery. Provides the communicative skills essential in professional careers and community life. Credit is awarded for one of the following TFDP 050 or TFDP 050S.**

**TFDP 050S Public Speaking (4 Lecture, 3 hours; discussion, 1 hour. Covers the principles and practice of effective speech composition and delivery. Provides the communicative skills essential in professional careers and community life. Credit is awarded for one of the following TFDP 050S or TFDP 050.**

**TFDP 066 Screenwriting: How Movies Work (4 Lecture, 3 hours; discussion, 1 hour; screening, 8 hours per quarter. Prerequisite(s): none. An Introduction to writing for stage and screen. Addresses structure, character, dialogue, theme, and story. Cross-listed with CRWT 066, and MCS 066.**

**TFDP 067 Introduction to Playwriting and Screenwriting (4 Workshop, 3 hours; written work, 3 hours; screening, group activity, 3 hours/quarter; screening, individual activity, 3 hours/quarter. Prerequisite(s): CRWT 066/MCS 066/TFDP 066 with a grade of “C” or better or consent of instructor. An introduction to writing for stage and screen. Addresses structure, character, dialogue, theme, and story.**
TFDP 099 Introduction to the Theatre Department 1 Lecture, 1 hour. Prerequisite(s): none. An introduction to the faculty and areas of study offered by the Department of Theatre. Promotes a better understanding of undergraduate opportunities, graduate training, and careers in the entertainment industry. Graded Satisfactory (S) or No Credit (NC).

Upper-Division Courses
TFDP 100 Play Analysis 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. In-depth analysis of selected plays. Explores structure, character, and imagery.

TFDP 101 Introduction to Design 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): TFDP 020; or consent of instructor. A comprehensive introduction to design for theatre, film, and television. Topics include design principles and practice of set, costume, and lighting. Includes the history of design and conceptual approaches and research.

TFDP 103 Introduction to Dramaturgy 4 Seminar, 4 hours. Prerequisite(s): TFDP 100; upper-division standing. Introduction to theatre dramaturgy, script analysis and advising for production. Topics include analyzing a dramatic text, researching production histories, preparing research materials for a production, season planning, lobby display, and working with new work.

TFDP 109 Acting: the Process 4 Lecture, 2 hours; workshop, 2 hours; written work, 1 hour; extra reading, 2 hours; individual study, 3 hours. Prerequisite(s): TFDP 099 or MCS 001; or consent of instructor. A comprehensive introduction to the process of acting. Topics include imagination, communication, and the psychophysical development of the actor’s instrument. Explores basic approaches to the acting process through monologues and introductory scene study.

TFDP 110A Acting: Fundamentals 4 Lecture, 2 hours; workshop, 2 hours; activity, 2 hours; individual study, 3 hours; written work, 1 hour; extra reading, 2 hours. Prerequisite(s): TFDP 109 with a grade of D or better; or consent of instructor. A study of the acting fundamentals and the actor’s basic tool kit. Topics include text analysis, actions and activities, problems and objectives, and audition technique. Explores basic approaches to characterization through audition practice, monologues, and scene study using methods such as Stanislavsky’s “system,” the American Method, and Meisner Technique.

TFDP 110B Acting: Techniques 4 Lecture, 2 hours; workshop, 2 hours; activity, 2 hours; individual study, 3 hours; written work, 1 hour; extra reading, 2 hours. Prerequisite(s): TFDP 110A; or consent of instructor. An examination of acting techniques from various global practitioners. Topics include advanced psychophysical work, advanced text analysis, the architecture of the stage space, and the actor-audience relationship in dynamic storytelling. Explores analysis and performance of scenes from a range of world dramas.

TFDP 111A Advanced Acting: Shakespeare and the Power of Language 4 Lecture, 2 hours; workshop, 2 hours; activity, 2 hours; individual study, 3 hours; written work, 1 hour; extra reading, 2 hours. Prerequisite(s): TFDP 110B; or consent of instructor. Advanced scene study in classic theatre to develop the actor’s skills with heightened language. Emphasizes works by Shakespeare. Topics include performance styles, working on text and voice, and the power of images.

TFDP 111B Advanced Acting: Acting with Facts and Playing With The Truth 4 Lecture, 2 hours; workshop, 2 hours; activity, 2 hours; individual study, 3 hours; extra reading, 3 hours. Prerequisite(s): TFDP 110B; or consent of instructor. Advanced scene study in world theatre of the realistic mode to expand the actor’s emotional repertoire, character range, and worldview. Includes in text and subtext, performance styles in fact-based and verbatim dramas, and the nature of truth in acting. Explores realism from Anton Chekhov to Anna Deavere Smith.

TFDP 111C Advanced Acting: Acting for the Camera 4 Lecture, 2 hours; studio, 4 hours. Prerequisite(s): TFDP 110B; or consent of instructor. A practical exploration of acting for camera. Topics include technicalities of performing for screen, adaptation of interpretative acting tools to performance from stage to screen, and auditioning for camera. Explores analysis of film/television scripts, recorded performance to camera, and analysis of iconic screen performances.

TFDP 111D Advanced Acting: the Business of Acting 4 Lecture, 2 hours; workshop, 2 hours; activity, 3 hours; individual study, 3 hours; written work, 1 hour; extra reading, 2 hours. Prerequisite(s): TFDP 110A or TFDP 111B or TFDP 111C; or consent of instructor. Examines professional strategies of the working actor. Topics include analysis of the casting process, portfolio creation (headshot, resume, reel), audition techniques, and business strategies and protocols.

TFDP 112 (E-Z) 4 Lecture, 2 hours. Study in voice, vocal performance techniques, and theories for actors.

TFDP 112E Dramatic Interpretation 4 Lecture, 4 hours. Prerequisite(s): upper-division standing or consent of instructor. Vocal presentation of text. Includes the use of various literary forms emphasizing rhythm, tonality, diction, imagery, focus, and phrasing as implement to convey the text, character, actions, and intentions.

TFDP 112F Voice and Diction 4 Lecture, 2 hours; workshop, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. The study of vocal production for actors. Focuses on breathing, relaxation, articulation, communication, and projection, enabling the actor to fill a theatre with clear, understandable speech. Also examines the International Phonetic Alphabet to assist in pronunciation.

TFDP 113 (E-Z) Movement For Actors and Performers 4 Lecture, 2 hours; workshop, 2 hours. Prerequisite(s): restricted to class level standing of junior, or senior. A study of movement techniques and theories for actors and performers. F. Stage Combat; M. Mime; N. Nonverbal Theatre.

TFDP 114 Acting For Writers 4 Lecture, 2 hours; discussion, 2 hours; research, 2 hours. Prerequisite(s): CRWT 164C or TFDP 164C or TFDP 166C; or consent of instructor. Examines the theory and practice of acting to enable writers to better understand how language reflects character, as well as how actors turn the written word into spoken language. Includes text work and improvisation. Credit is awarded for one of the following TFDP 114 or CWPA 214.

TFDP 115 Hip Hop Theatre 4 Lecture, 2 hours; workshop, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Provides tools to create new work by using elements of hip hop culture such as Graffiti Art, Emcein’ (rappin’), Deejayin’ and Breakdancin’ as primary means of storytelling on stage. Explores theoretical aspects of hip hop culture and a working knowledge of playwriting, acting, directing, and design.

TFDP 117 Directing For the Screen 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): TFDP 114; or consent of instructor. Examines the skills, tools, and methods of directing stories for the screen. Covers visual storytelling, casting, and collaborating with actors, writers, producers, editors, script supervisors, assistant directors, and other crew members. Emphasizes preparation, reflection, intuition, resourcefulness, risk-taking, punctuality, and professionalism. Includes directing various exercises.

TFDP 120A Literature and History of the Theatre: the Classical Period Through the Italian Renaissance 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines the literature and history of the theatre from the classical period through the Italian Renaissance. Focuses on analysis of representative plays, theatrical architecture, and production modes.

TFDP 120B Literature and History of the Theatre: the Elizabethan Period Through the Nineteenth-Century 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines the literature and history of the theatre from the Elizabethan period through the nineteenth century. Focuses on analysis of representative plays, theatrical architecture, and production modes.

TFDP 121 Dramaturgy: World of the Play 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. A study of a significant play in the context of the social, intellectual, and artistic movements of its time. Offered simultaneously with the Theatre Department’s production of the play. May also consider related works and writings. Course is repeatable as content changes to a maximum of 8 units.
South America.

TFDP 123 Asian/American Theatre: Disorienting the Stage 4 Seminar, 4 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the histories, theories and texts of Asian/American theatre. Explores themes such as Orientalism, imperialism, and immigration.

TFDP 124A American Theatre, 1900-1945 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examination of the major American playwrights, theatrical figures, and movements from 1900 through World War II.

TFDP 124B American Theatre, 1945–Present 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examination of the major American playwrights, theatrical figures, and movements from World War II to the present.

TFDP 125 (E-2) History of the Theatre 4 Lecture, 4 hours. A study of the plays, playhouses, and players of the following theatrical eras: E. Classical Theatre; F. Medieval Theatre; G. Renaissance Theatre; I. Romantic Theatre; J. Realistic Theatre; K. Contemporary Theatre; M. American Theatre; N. Neo-classic Theatre; P. American Theatre And Drama Of The Great Depression; S. American Musical Theatre; T. Asian Theatre; X. Experimental Theatre In America. Course is repeatable.

TFDP 126A History of Dress 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. A study of the psychological, sociological, and economic history of fashion and dress from 4000 B.C. to A.D. 1700.

TFDP 126B History of Dress 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. A study of the psychological, sociological, and economic history of fashion and dress from A.D. 1700 to the present.

TFDP 127 Theories of the Modern Theatre 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the major theories underlying twentieth-century theatre practice. Special attention is paid to the ideas of important theatre artists such as Konstantin Stanislavsky, E. Gordon Craig, Antonin Artaud, and Bertolt Brecht.

TFDP 128 Seminar On the Life and Work of Tomas Rivera 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): consent of instructor. Introduction to the life and work of Tomas Rivera, UCR Chancellor (1979-1984) and foundational Chicana/o author. Explores the breadth of Rivera's writing (novel, poems, short stories, speeches) and his contributions through administrative leadership in higher education as well as personal papers in the UCR Tomas Rivera Archives in Special Collections.

TFDP 129 History of the Modern Theatre: Nineteenth–Century – Present 4 Lecture, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing. Introduces the main developments in modern theatre from a global perspective. Explores major historical developments in theatre as a response to globalization, colonization, feminism, and other cultural developments. Course is repeatable as content changes to a maximum of 8 units.

TFDP 130A Producing Short Episodic Content A 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): TFDP 144 or TFDP 153B or TFDP 156A or consent of instructor. Introduces techniques involved in producing a pilot for a short episodic content series in video. Reviews the entire production cycle for a pilot including casting and location scouting, working with actors, shooting, and editing. TFDP 130B Producing Short Episodic Content B 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): TFDP 144 or TFDP 153B or TFDP 156A or TFDP 156B; or consent of instructor. Covers techniques and skills needed for producing episodes of a short episodic content series in video. Reviews the entire production cycle for two episodes including producing, directing, photographing, and editing.

TFDP 131 Sound Design For Theatre, Film, and Television 4 Lecture, 2 hours; workshop, 2 hours. Prerequisite(s): TFDP 101; or consent of instructor. Introduces sound design for theatre, film, and television productions. Covers topics such as critical listening, psychoacoustics, computer editing, sound recording and processing, and copyright laws pertaining to sampling.

TFDP 132 Lighting Design For Theatre, Film, and Television 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): TFDP 101; or consent of instructor. A study of design, technical production practices, and equipment for lighting in theatre, film, and television. Explores the application of production practices and principles of designing light for entertainment. Develops skills associated with the creation and execution of a lighting design.

TFDP 133 Scene Design For Theatre, Film, and Television 4 Lecture, 4 hours. Prerequisite(s): TFDP 101; or consent of instructor. An introduction to basic skills and techniques for theatre design and to issues of contemporary design for theatre, film, and television. Topics include sketching, rendering, drafting, and model making.

TFDP 135 Costume Design For Theatre, Film, and Television 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): TFDP 101; or consent of instructor. A study of theory, principles, and practice of costume design for theatre, film, and television.

TFDP 136 History of Theatre Design 4 Lecture, 4 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the development of scenic, costume, lighting, and sound design in theatre. Examines different styles of theatrical aesthetics throughout history focusing on Western culture.

TFDP 138 Art Direction For Film and Television 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): TFDP 101; or consent of instructor. An introduction to the design principles and methods professional art directors use in the entertainment industry. Projects related to feature film and television design explore current methods of presentation and composition for the film and television camera.

TFDP 142 The Art of Film 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): TFDP 155; or consent of instructor. An introduction to the analysis of cinema. Topics include film forms, genres, and Mise-en-Scene. Examines how creative choices by filmmakers affect what viewers experience and how they respond. Develops the skills of watching and listening closely that are necessary to become informed filmmakers.

TFDP 143 Scene Painting 4 Lecture, 2 hours; studio, 2 hours; individual study, 3 hours. Prerequisite(s): TFDP 102; or consent of instructor. Covers techniques and skills used to create the various elements of scene design. Includes methods of set preparation, coating, mixing, palette preparation, spraying, transfer, texturing, finishing, and wall papering.

TFDP 144 Directing Actors For the Screen 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): TFDP 155; or consent of instructor. Develops skills needed to direct actors for the screen. Topics include communication, breaking down screenplays, identifying characters’ objectives and arcs, and blocking actors for the camera. Studies giving directions using action verbs, facts, imagination, and physical activities. Students will learn by directing and acting in scenes.

TFDP 145 Computer Aided Design For Theatre, Film, and Television 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): TFDP 101 or TFDP 020; or consent of instructor. Explores and applies techniques and materials used to create the various elements of scene design. Includes methods of set preparation, coating, mixing, palette preparation, spraying, transfer, texturing, finishing, and wall papering.

TFDP 149 Stage Management 4 Lecture, 4 hours. Prerequisite(s): TFDP 099. Explores the role and function of the stage manager in theatrical production. Provides basic skills to work in the field of stage management emphasizing organization, documentation, and dissemination of information.
TFDP 150A Directing 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): TFDP 099; or consent of instructor. Introduces directing for theater and film. Includes analyzing texts, preparing a rehearsal schedule, communicating with actors and designers, blocking scenes, utilizing space and lighting, and introducing concepts for directing projects. Also proposes various theories of directing.

TFDP 150B Directing 4 Lecture, 4 hours. Prerequisite(s): TFDP 150A or consent of instructor. An examination of the rehearsal process focusing on combining the elements of text, acting, and design.

TFDP 151 Transition to the Film Industry 4 Lecture, 3 hours; laboratory, 3 hours; research, 1 hour; screening, 1 hour; written work, 1 hour. Prerequisite(s): TFDP 155; restricted to class level standing of junior, or senior; or consent of instructor. Introduces basic operations and skills standing or consent of instructor. An intense practice-based laboratory in communication, rhetoric, and delivery. Designed to strengthen practical and professional skills in conducting research, crafting presentations for diverse interdisciplinary audiences, and dynamic delivery. Includes visual rhetoric, online presentations, argument, debate, and preparation for the written materials and impromptu speech necessary to thrive in job interviews.

TFDP 153A Introduction to Cinematography 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): TFDP 050 or TFDP 050S; or consent of instructor. An intense practice-based laboratory in communication, rhetoric, and delivery. Designed to strengthen practical and professional skills in conducting research, crafting presentations for diverse interdisciplinary audiences, and dynamic delivery. Includes visual rhetoric, online presentations, argument, debate, and preparation for the written materials and impromptu speech necessary to thrive in job interviews.

TFDP 153B Advanced Cinematography 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): TFDP 153A; or consent of instructor. Addresses visual perception through practice with a variety of lenses, light fixtures, cameras, and formats. Focuses on cinematic thought in both documentary and dramatic work. Includes practical film exercises designed to develop more creative and personal expression.

TFDP 154 Introduction to Filmmaking 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): TFDP 020; restricted to class level standing of junior, or senior; or consent of instructor. Introduces filmmaking, basic elements of film sets, functions and terminology of various roles on a film set, and mechanics of the film industry.

TFDP 155 Introduction to Digital Film Production 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CRWT 066 or MCS 066 or TFDP 066; TFDP 020; restricted to class level standing of junior, or senior; or consent of instructor. Introduces the skills needed for making a narrative film. Includes examining and utilizing scripts, cameras, lighting, sound, and editing. Also includes filmmaking projects.

TFDP 156A Digital Film Production 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): TFDP 153A with a grade of C- or better or TFDP 155; or consent of instructor. Examines the techniques of narrative filmmaking and directing for the camera. Emphasizes the working relationship with actors.

TFDP 156B Digital Film Production 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): TFDP 155 or TFDP 156A. Examines the techniques of production and postproduction for narrative filmmaking. Emphasizes sound and editing processes.

TFDP 157 Introduction to Film Editing 4 Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): TFDP 153A or TFDP 154 or TFDP 155; restricted to class level standing of junior, or senior; or consent of instructor. Examines the art and craft of editing the narrative film. Includes hands-on work in editing a montage, a short documentary, and a narrative fiction scene.

TFDP 158 Storytelling of Witness: Introduction to Documentary Theatre and Film 4 Lecture, 3 hours; screening, 2 hours; research, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Introduces vocabulary, themes, genres, and methods of documentary storytelling in theater and film. Explores the evolution of documentary storytelling focusing on signature works by noted playwrights and filmmakers. Addresses craft, voice, and legacy of documentary storytelling from strictly recorded (verite, interview) to creatively devised narratives (post-event recreation, hybrid forms).

TFDP 159 Documentary Production 4 Workshop, 3 hours; laboratory, 3 hours. Prerequisite(s): TFDP 153A or TFDP 154 or TFDP 155; or consent of instructor. Creation of independent, low-budget documentaries through hands-on experience in pre-production, production, and post-production. Presents works in progress and finished pieces throughout the quarter. Considers peer feedback.

TFDP 160 The Filmmaker’s Life 4 Seminar, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An overview of the various jobs (and their requirements) connected to the process of creating products for film and television entities.

TFDP 161 African American Drama 4 Lecture, 4 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the major African American plays and playwrights from the 1800s to the present.

TFDP 162 Writing the Half-Hour Television Comedy 4 Workshop, 3 hours; written work, 3 hours. Prerequisite(s): TFDP 166A or consent of instructor. Introduction to the style, form, content, and creation of a half-hour television comedy series.

TFDP 163 Writing the Short Film 4 Lecture, 3 hours; written work, 3 hours. Prerequisite(s): TFDP 066 or CRWT 066 or MCS 066, TFDP 153A or TFDP 154; or consent of instructor. Addresses the mechanical and creative components of crafting a screenplay for a short film.

TFDP 164A Beginning Playwriting 4 Seminar, 3 hours; discussion, 1 hour. Prerequisite(s): CRWT 056 or TFDP 100 or consent of instructor. Seminar in the practice of playwriting centering on the construction of a plot. Cross-listed with CRWT 164A.

TFDP 164B Intermediate Playwriting 4 Seminar, 3 hours; discussion, 1 hour. Prerequisite(s): CRWT 164A/TFDP 164A. Seminar in the practice of playwriting. Revisions of works in progress emphasizing character development and techniques for writing dialogue. Cross-listed with CRWT 164B.

TFDP 164C Advanced Playwriting 4 Seminar, 3 hours; discussion, 1 hour. Prerequisite(s): CRWT 164B/TFDP 164B. Seminar in the practice of playwriting. Includes playwrights’ participation in staged readings of their work. With consent of instructor, course is repeatable to a maximum of 8 units. Cross-listed with CRWT 164C.

TFDP 165 Creating the Webseries 4 Workshop, 3 hours; written work, 3 hours. Prerequisite(s): TFDP 166B; or consent of instructor. An introduction to the demands and processes of creating and writing a web series. Designed to produce a full season of fifteen to twenty-five-minute episodes. Course is repeatable to a maximum of 8 units.

TFDP 166A Screenwriting: Introduction 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): CRWT 066 or MCS 066 or TFDP 066, TFDP 020; or consent of instructor. An introduction to the process and craft of screenwriting. Includes developing and presenting an idea for a screenplay created over the breadth of this three-part series TFDP 166A, TFDP 166B, TFDP 166C. TFDP 166A includes creation of an outline for the entire screenplay and the writing of the first act.

TFDP 166B Screenwriting: Outline to First Draft 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): TFDP 166A, or consent of instructor. An introduction to the process and craft of screenwriting. Continues to develop the idea of the screenplay began in TFDP 166A. Utilizes the previously created outline and first act to write Act 2 and Act 3 and produce a complete rough draft.

TFDP 166C Screenwriting: Rewrites and Writing For Television 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): TFDP 166B; or consent of instructor. An introduction to the process and craft of screenwriting. Includes a page one rewrite of the screenplay developed in TFDP 166A and TFDP 166B. Teaches the rewriting process utilizing notes provided in TFDP 166A and TFDP 166B and instructor input to further develop the original screenplay. Course is repeatable to a maximum of 8 units.
TFDP 167 Writing For Television: Creating the One-Hour Series Drama 4 Seminar, 3 hours; written work, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces the craft of writing for television focusing on production of original work. Includes writing a one-hour pilot, creating series guidelines, and formulating work leading to a 13-episode series. Course is repeatable to a maximum of 12 units.

TFDP 169 Rewriting the Script 4 Workshop, 4 hours. Prerequisite(s): CRWT 164C/TFDP 164C or TFDP 166C; consent of instructor is required for students repeating the course. Covers rewriting a full-length script (screenplay or play). Course is repeatable to a maximum of 8 units. Credit is awarded for only one of CRWA 269 or TFDP 169.

TFDP 170 Performance in Production 1 to 4 Studio, 5 to 20 hours. Prerequisite(s): permission by department. Students act in full productions. Students are cast in roles and throughout the rehearsal period are taught by the director how to perform their assigned roles in a professional manner. Course is repeatable to a maximum of 32 units.

TFDP 171 Technical Production 1 to 4 Studio, 5 to 20 hours. Prerequisite(s): permission by department. Provides training to serve in various capacities on theatre or film production crews. Includes work in assigned crew positions on departmental productions during pre-production, rehearsals, performances, and post-production. Course is repeatable to a maximum of 32 units.

TFDP 172 Design in Production 1 to 4 Studio, 5 to 20 hours. Prerequisite(s): permission by department. Provides training to be a designer on theatre or film productions. Includes work with a mentor designer on departmental productions throughout pre-production, production, and post-production. Course is repeatable to a maximum of 32 units.

TFDP 173 Management and Directing in Production 1 to 5 Studio, 5 to 25 hours. Prerequisite(s): permission by department. Provides training to become stage managers, production managers, and directors on theatre and film productions. Includes attending production meetings, rehearsals, and performances of departmental productions. Course is repeatable to a maximum of 32 units.

TFDP 174 Writing and Dramaturgy in Production 1 to 4 Studio, 5 to 20 hours. Prerequisite(s): permission by department. Provides training to write scripts or serve as a dramaturge on theatre and film productions. Includes working with a mentor on departmental productions during the pre-production process and attending some rehearsals and performances. Course is repeatable as content or topic changes to a maximum of 32 units.

TFDP 175 Fabrication in Production 1 to 4 Studio, 5 to 20 hours. Prerequisite(s): permission by department. Teaches fabrication while working in the scene shop, costume shop, or the lighting/sound shop during the build process of theatre or film productions. Course is repeatable to a maximum of 32 units.

TFDP 176 Performing Arts of Asia 4 Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of music, dance, theatre, and ritual in four major geographic regions of Asia: Central, East, South and Southeast. No Western music training is required. Course is repeatable to a maximum of 8 units. Cross-listed with ANTH 128, AST 128, and DNCE 128.

TFDP 177 Staging the Middle East 4 Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the ways in which theatre, performance, and film engage with and critique the representations of peoples and cultures of the Middle East. Includes films and plays from the region as well as the work of Americans representing the Middle East. Credit is awarded for only one of TFDP 177 or TFDP 177S.

TFDP 177S Staging the Middle East 4 Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines the ways in which theatre, performance, and film engage with and critique the representations of peoples and cultures of the Middle East. Includes films and plays from the region as well as the work of Americans representing the Middle East. Credit is awarded for only one of TFDP 177 or TFDP 177S.

TFDP 180 (E-Z) Theatre Practicum 4 Discussion, 4 hours. Prerequisite(s): restricted to class level standing of junior, or senior. An investigation of theatrical production theories and practices. E. Contemporary Mexican Theatre; F. Musical Comedy; M. Arts Management; Q. Plays In Progress; R. New Plays; S. Improvisation.

TFDP 185 Arts, Management, and Community 4 Lecture, 4 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to business and arts management including the study of film and television production, stage management, and music production. Offers hands-on experience for practicing management skills working in partnership with local organizations and artists of Riverside and the Inland Empire. Cross-listed with MUS 185. Credit is awarded for only one of MUS 185/TFDP 185 or MUS 185S/TFDP 185S.

TFDP 185S Arts, Management, and Community 4 Seminar, 3 to 12 hours. Prerequisite(s): consent of chair of the department. Research in the practice and/or theory of the theatre. Open to seniors by invitation only.

TFDP 190 Special Studies 1 to 5 Research, 3 to 15 hours. Prerequisite(s): consent of the chair of the department. Independent study and research by qualified undergraduate students under supervision of a faculty member. Course is repeatable to a maximum of 20 units.

TFDP 191 (E-Z) Seminar in Theatre 4 Seminar, 3 hours; extra reading, 3 hours. Covers various topics on a rotating basis. Includes playwriting, acting, directing, scenic design, theatre history, and dramatic literature. E. Hamlet: Who is Hamlet And Why Should You Care?; M. American Frontier In American Drama; N. Theatre Of Eugene O'Neill; S. Script To Production; T. Women In Theatre: Theory And Performance.

TFDP 195 Senior Thesis 1 to 4 Thesis, 3 to 12 hours. Prerequisite(s): senior standing; consent of Department Chair. Open by invitation only. Presentation of a significant piece of creative work with faculty supervision. Course is repeatable to a maximum of 8 units.

TFDP 1981 Individual Internship in Theatre 1 to 12 Internship, 3 to 36 hours, reading and written work, 1-12 hours. Prerequisite(s): upper-division standing; consent of instructor. An internship in a theatre, television, or film production company. Includes work with directors or designers in one or more areas of professional production such as acting, design, costumes, lighting, and sound. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

TFDP 199 Senior Research 1 to 4 Research, 3 to 12 hours. Prerequisite(s): consent of chair of the department. Research in the practice and/or theory of the theatre. Open to seniors by invitation only.

UC Washington Center (UCDC) Academic Internship Program

Subject abbreviation: UCDC
Division of Undergraduate Education
Richard A. Cardullo, Ph.D., Faculty Advisor (951) 827-7389
engage@ucr.edu; ucdc.ucr.edu

The UC Washington Center (UCDC) Academic Internship Program provides undergraduate students with a multi-dimensional educational experience in Washington, D.C. Students undertake academic pursuits as well as cultural and social activities. The program combines course work with field research and internship experience. Students also have the opportunity to tour local sites and dialogue with distinguished professionals in the Speaker Series. For more information see UC Washington Center (UCDC) Academic Internship Program in the front of this catalog. For more information on application requirements, visit ucdc.ucr.edu

Curriculum
The UCDC program is open to all undergraduate students in all majors with upper-division junior/senior standing and a 3.0 cumulative GPA. All UCDC participants remain UCR students during the program. Students must be accepted into the UCDC program, be residents of the UC Washington Center, and enroll in an academic internship taking place in the Washington, D.C. region in order to participate in the UCDC curriculum.
During the Fall, Winter, and Spring quarters, students are enrolled in full-time credit units comprising internship units, a seminar, and an optional elective course. For summer enrollments, please consult with the program staff at UC R.

Internship (8-16 units)
The focal point of the academic program is the internship, which is based on the students' interests and major, and it is arranged before the student leaves for Washington, D.C. Students must enroll in a 198I course, which is usually taken in the student's major department. This course is letter graded.

Core Research Seminar (4 units)
UCR students must enroll in a seminar from the UCDC 191 A-M series. Students meet weekly with an instructor and conduct research linked to their internship. Students must take seminars for a letter grade only, and should consult with their major department concerning the applicability of UCDC seminars to major requirements.

Elective (4 units)
Students may select courses from the UCDC 150-159 series. These courses are letter graded. Students should consult with their major department about the applicability of UCDC electives to major requirements.

Upper-Division Courses
UCDC 150 Special Topics in Political Science 4 Lecture, 3 hours; term paper, 2 hours; outside research, 1 hour. Prerequisite(s): upper-division standing or consent of the instructor; admission to the UC Washington Center program. Addresses topics in political science from the perspective of Washington, D.C. Topics vary each term and may be viewed at www.ucdc.edu. Course is repeatable as topics change to a maximum of 8 units.

UCDC 151 Special Topics in International Relations 4 Lecture, 3 hours; term paper, 2 hours; research, 1 hour. Prerequisite(s): upper-division standing or consent of the instructor; admission to the UC Washington Center program. Addresses topics in International Relations from the perspective of politics in Washington, D.C. Topics vary each term and may be viewed at www.ucdc.edu. Course is repeatable as topics change to a maximum of 8 units.

UCDC 152 Special Topics in Social Science 4 Lecture, 3 hours; term paper, 2 hours; research, 1 hour. Prerequisite(s): upper-division standing or consent of the instructor; admission to the UC Washington Center program. Addresses topics in the social sciences from the perspective of Washington, D.C. Topics vary each term and may be viewed at www.ucdc.edu. Course is repeatable as topics change to a maximum of 8 units.

UCDC 153 Special Topics in Economics and Business 4 Lecture, 3 hours; term paper, 2 hours; research, 1 hour. Prerequisite: admission to the UC Washington Center Program. Addresses topics in business and economics from the perspective of Washington, D.C. Topics vary each term, and may be viewed at www.ucdc.edu. Course is repeatable as topics change to a maximum of 8 units.

UCDC 154 Special Topics in Arts 4 Lecture, 3 hours; research, 2 hours; field trip, 1 hour. Prerequisite(s): admission to the UC Washington Center program. Addresses topics in the arts from the perspective of Washington, D.C. Topics vary each term, and may be viewed at www.ucdc.edu. Course is repeatable as topics change to a maximum of 8 units.

UCDC 155 Special Topics in Humanities 4 Lecture, 3 hours; term paper, 2 hours; research, 1 hour. Prerequisite(s): admission to the UC Washington Center program. Addresses topics in the humanities from the perspective of Washington, D.C. Topics vary each term, and may be viewed at www.ucdc.edu. Course is repeatable as topics change to a maximum of 8 units.

UCDC 156 Special Topics in History 4 Lecture, 3 hours; term paper, 2 hours; research, 1 hour. Prerequisite(s): admission to the UC Washington Center program. Addresses topics in the humanities from the perspective of Washington, D.C. Topics vary each term, and may be viewed at www.ucdc.edu. Course is repeatable as topics change to a maximum of 8 units.

UCDC 157 Special Topics in Media and Communications 4 Lecture, 3 hours; term paper, 2 hours; research, 2 hours; field trip, 1 hour. Prerequisite(s): admission to the UC Washington Center program. Addresses topics in the media and communications from the perspective of Washington, D.C. Topics vary each term, and may be viewed at www.ucdc.edu. Course is repeatable as topics change to a maximum of 8 units.

UCDC 158 Special Topics in Science, Technology, Engineering and Mathematics 4 Lecture, 3 hours; term paper, 2 hours; research, 1 hour. Prerequisite(s): admission to the UC Washington Center program. Addresses topics in the natural sciences, technology, engineering and mathematics from the perspective of Washington, D.C. Topics vary each term, and may be viewed at www.ucdc.edu. Course is repeatable as topics change to a maximum of 8 units.

UCDC 159 Washington Special Topics 4 Lecture, 3 hours; term paper, 2 hours; research, 1 hour. Prerequisite(s): admission to the UC Washington Center program. Addresses topics relevant to Washington, D.C. from an interdisciplinary or non-disciplinary perspective. Topics vary each term, and may be viewed at www.ucdc.edu. Course is repeatable as topics change to a maximum of 8 units.

UCDC 191A Seminar For General Research 4 Seminar, 3 hours; written work, 3 hours. Prerequisite(s): upper-division standing or consent of the instructor; admission to the UC Washington Center program. Complements the internship experience of participants in the UCDC program by connecting their internship experience to a focused research project. Guides students through the process of conducting focused and detailed research. Satisfactory (S) or No Credit (NC) grading is not available.

UCDC 191B Seminar On Congress 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of the instructor; admission to the UC Washington Center program. Explores how Congress works, including representation of constituents, congressional elections, internal rules, the role of parties, relations with the executive branch, and policymaking. Complements the internship experience of participants in the UCDC program who intern on Capitol Hill. Guides students through the process of conducting focused and detailed research. Satisfactory (S) or No Credit (NC) grading is not available.

UCDC 191C Seminar On the Presidency and Executive Branch 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of the instructor; admission to the UC Washington Center program. Examines American presidential leadership, the evolving role of the presidency in American culture. Introduces students to major thematic debates that define presidential politics. Complements the internship experience of participants in the UCDC program who intern in the Executive Branch. Guides students through the process of conducting focused and detailed research. Satisfactory (S) or No Credit (NC) grading is not available.

UCDC 191D Seminar In Environmental Policy 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of the instructor; admission to the UC Washington Center program. Examines the complex policy community-including governmental, non-governmental, and intergovernmental actors—that engages in forging international policy. Complements the internship experience of students whose internships relate to foreign policy by connecting their internship experience to a focused research project. Guides students through the process of conducting focused and detailed research. Satisfactory (S) or No Credit (NC) grading is not available.

UCDC 191E Seminar In International Policy 4 Seminar, 3 hours; research, 3 hours. Prerequisite(s): upper-division standing or consent of the instructor; admission to the UC Washington Center program. Investigates the complex policy community-including governmental, non-governmental, and intergovernmental actors—that engages in forging international policy. Complements the internship experience of students whose internships relate to foreign policy by connecting their internship experience to a focused research project. Guides students through the process of conducting focused and detailed research. Satisfactory (S) or No Credit (NC) grading is not available.
University Honors

Subject abbreviation: HNPG
College of Humanities, Arts, and Social Sciences

Richard A. Cardullo, Ph.D.,
Howard H Hays, Jr. Endowed Chair and
Faculty Director, University Honors
381 Skye Hall
(951) 827-5323; honors@ucr.edu
honors.ucr.edu

Outstanding students from all majors can participate in University Honors. University Honors challenges students to take an active role in shaping their education through a variety of curricular, co-curricular, extra-curricular, and service-learning opportunities. Students benefit from University Honors staff support, in the areas of academic counseling, professional development, and guidance on applying for internships, fellowships, awards, and graduate or professional school. A study room and student lounge are available to University Honors students.

First-Year Experience
Admission to the first-year cohort in University Honors is based on high school grade point average and the successful completion of a University Honors admission application. During the first-year, students take University Honors courses, participate in University Honors programs and events, and receive guidance from University Honors Ambassadors. First-year courses expose students to innovative teaching methods, interdisciplinary thinking, and increased depth of course content. One goal of University Honors courses is to expose students to methods of conceptualizing issues and framing questions that promote scholarship, engagement, and student success.

Second-Year Experience
The second-year cohort in University Honors is designed to expose students to the concept of civic engagement and to introduce them to the abundance of opportunities available to undergraduate students at UC Riverside. During the second-year, students engage in scholarly experiences that will allow them to interact with faculty members and begin considering topics for their eventual capstone projects. The second-year cohort consists of continuing first-year University Honors students, as well as high-achieving UCR students who did not have the opportunity to participate in the first-year cohort. Admission to the second-year cohort is based on a specified UCR cumulative grade point average and the successful completion of a University Honors admission application.

Upper-Division Experience
The upper-division curriculum provides students with the framework to produce a capstone project, resulting from faculty-mentored, undergraduate research, creative activity, or experiential learning. This structure is adaptable to almost any major and allows each student the flexibility to work with a faculty-mentor to shape a research, creative activity, or experiential learning program to meet the ambitions of the project. University Honors provides resources to assist students with finding a faculty-mentor and guidance throughout the process of completing the capstone project. Continuing UCR students with an excellent academic record may apply to participate in University Honors. Students who transfer to UCR as juniors with excellent academic records may also apply to University Honors. During the junior year, students narrow their research, creative activity, or experiential learning focus, select a faculty-mentor, and prepare to undertake the capstone project. The program provides support in all phases of this planning. The capstone project is usually undertaken by the spring quarter of the junior year and is completed well before graduation. The completed capstone project is submitted to the student’s faculty-mentor for approval. Completion of an approved capstone project, and satisfaction of all other University Honors requirements, will qualify a student for graduation with University Honors distinction, which is noted on the official transcript.

Lower-Division Courses

HNPG 002W Principles of Civic Engagement
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENGL 001B with a grade of C or better, ENGL 007, may be taken concurrently; for concurrent enrollment in ENGL 007, review the course titles or topics in the current online Schedule of Classes to find the corresponding ENGL 007 writing workshop; admission to University Honors. Aims to cultivate, enhance, and facilitate interest in social change. Bridges the academic and personal life by providing knowledge and tools for civic engagement. Fulfills the third-quarter writing requirement for students who earn a grade of “C” or better for courses that the Academic Senate designates, and that the student’s college permits, as alternatives to English 001C. Satisfactory(S) or No Credit(N/C) is not available.

HNPG 003 Implementing Civic Engagement
Workshop, 1 hour. Prerequisite(s): HNPG 002W with a grade of B or better; admission to University Honors. Guides through the initiation, planning, research, and implementation of a civic engagement plan. Applies the principles of civic engagement towards creating social change on campus and in the community. Satisfactory(S) or No Credit(N/C) is not available.

HNPG 004 Implementing Civic Engagement II
Workshop, 1 hour. Prerequisite(s): HNPG 003 with a grade of B or better; admission to University Honors. Continues the process of working on the research, implementation, assessment, and presentation of a selected civic engagement project initiated in HNPG 003.

HNPG 010 First-Year Colloquium
Colloquium, 1 hour. Prerequisite(s): open only to students in the University Honors Program who are freshmen or first-year transfer students. Introduces students to academic research conducted by UCR faculty. Presentations are multidisciplinary and cover the sciences, humanities, and social sciences. Graded Satisfactory(S) or No Credit(NC).
HNPG 016 Ignition Seminar in Humanities 4
Seminar, 3 hours; activity, 3 hours. Prerequisite(s): admission to University Honors. Addresses interdisciplinary topics drawn from the humanities. Topics vary from quarter to quarter. Satisfactory (S) or No Credit (NC) is not available.

HNPG 017 Ignition Seminar in Social Sciences 4
Seminar, 3 hours; activity, 3 hours. Prerequisite(s): admission to University Honors. Addresses interdisciplinary topics drawn from the Social Sciences. Topics vary from quarter to quarter. Satisfactory (S) or No Credit (NC) is not available.

HNPG 018 Ignition Seminar in Interdisciplinary Studies 4
Seminar, 3 hours; activity, 3 hours. Prerequisite(s): admission to University Honors. Addresses interdisciplinary topics drawn from the humanities and social sciences. Topics vary from quarter to quarter. Satisfactory (S) or No Credit (NC) is not available.

HNPG 090 Special Studies 2 to 4
Consultation, 1 hour; research, 6 to 12 hours. Prerequisite(s): admission to University Honors or consent of instructor; a written proposal approved by the program chair. Structured to meet specific educational needs. Addresses course content, style, and requirements determined in collaboration with the instructor. Satisfactory (S) or No Credit (NC) grading is not available. Course is repeatable to a maximum of 12 units.

HNPG 190 Special Studies 1 to 4
Consultation, 1 hour; research, 3 to 12. Prerequisite(s): admission to upper-division University Honors or consent of instructor; a written proposal approved by the program chair. Structured to meet specific educational needs. Addresses course content, style, and requirements determined in collaboration with the instructor. Satisfactory (S) or No Credit (NC) grading is not available. Course is repeatable to a maximum of 12 units.

HNPG 197H Honors Research For Undergraduates 1 to 4
Research, 3 to 6 hours; individual study, 3 to 6 hours. Prerequisite(s): admission to University Honors or consent of instructor; upper-division standing. An introduction to research under the supervision of University Honors Program faculty. Requires a research project. Satisfactory (S) or No Credit (NC) grading is not available. Course is repeatable to a maximum of 12 units.

HNPG 198H Junior Honors Research 1
Research, 3 hours. Prerequisite(s): HNPG 150 with a grade of D- or better; restricted to class level standing of sophomore, junior, or senior; admission to University Honors. Research in support of the University Honors capstone project under supervision of a faculty-mentor. Letter grade only. Satisfactory (S) or No Credit is not available.

HNPG 198I Honors Individual Internship 1 to 4
Consultation, 1 hour; internship, 3 to 12 hours; written work, 1 to 4 hours. Prerequisite(s): admission to University Honors or consent of instructor; upper-division standing. Internship placement on or off campus that provides opportunities to acquire skills and experience for future endeavors. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 4 units.

HNPG 199H Senior Honors Research 1 to 5
Research, 2 to 10 hours; term paper, 1 to 5 hours. Prerequisite(s): HNPG 198H with a grade of B or better; restricted to class level standing of sophomore, junior, or senior; admission to University Honors. Research in support of the University Honors capstone project under supervision of a faculty mentor. Graded In Progress (IP) until the final quarter is completed, at which time a final grade is awarded. Course is repeatable to a maximum of 12 units.

HNPG 199H Senior Honors Research 1 to 5
Research, 2 to 10 hours; term paper, 1 to 5 hours. Prerequisite(s): HNPG 198H with a grade of B or better; restricted to class level standing of sophomore, junior, or senior; admission to University Honors. Research in support of the University Honors capstone project under supervision of a faculty mentor. Graded In Progress (IP) until the final quarter is completed, at which time a final grade is awarded. Course is repeatable to a maximum of 12 units.

Upper-Division Courses
HNPG 150 Research and Creative Activity Across the Disciplines 4
Lecture, 1 hour; discussion, 1 hour; research, 4 hours; written work, 2 hours. Prerequisite(s): Restricted to class level standing of sophomore, junior, or senior; admission to University Honors. Addresses the questions “What is knowledge?” and “What is research?” Illustrates how researchers select a significant issue, review what is already known about it, and pose a research question whose answer promises to advance knowledge. Explores ways in which these processes differ across the humanities, social sciences, and natural sciences. Satisfactory (S) or No Credit (NC) is not available.

HNPG 182/SOC 182
Research, 2 to 10 hours; term paper, 1 to 5 hours. Prerequisite(s): HNPG 198H with a grade of B or better; restricted to class level standing of sophomore, junior, or senior; admission to University Honors. Research in support of the University Honors capstone project under supervision of a faculty mentor. Graded In Progress (IP) until the final quarter is completed, at which time a final grade is awarded. Course is repeatable to a maximum of 12 units.

HNPG 184/AHS 184
Research, 2 to 10 hours; term paper, 1 to 5 hours. Prerequisite(s): HNPG 198H with a grade of B or better; restricted to class level standing of sophomore, junior, or senior; admission to University Honors. Research in support of the University Honors capstone project under supervision of a faculty mentor. Graded In Progress (IP) until the final quarter is completed, at which time a final grade is awarded. Course is repeatable to a maximum of 12 units.

Urban Studies Minor
Subject abbreviation: URST
College of Humanities, Arts, and Social Sciences
Patricia Morton, Ph.D., Chair
Office, INTS 3110 (951) 827-2698; urbanstudies.ucr.edu

Committee in Charge
Pat Morton (Media and Cultural Studies)
Daryle Williams, Dean, ex officio

The Urban Studies minor is an adaptation of a well-developed interdisciplinary focus on urban concepts, issues, and problems in order to offer the chance for increased understanding of urban processes. The minor also provides preparation leading to increased employment opportunities at the municipal, state, or federal level, or to graduate work in one of several areas related to urban studies.

Requirements for the minor (24 units)
1. SOC 020
2. URST 143/SOC 143
3. URST 146/ECON 146
4. URST 172/POSC 172
5. URST 182/SOC 182
6. URST 184/AHS 184

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Lower-Division Courses
URST 014 Popular Musics of the World 4
Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduction to issues surrounding popular and urban musics of the world, focusing on three major geocultural areas: Africa, Asia, and the Americas. Emphasizes the relationship between mass-mediated music and issues of cultural hegemony, resistance, and subversion. Analyzes the cultural impact of media technology on music performance and reception. Cross-listed with ETST 014, and MUS 014.

URST 025 Introduction to the Built Environment: Suburbia 4
Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours. Introduces the history of suburbia from the Industrial Revolution to the present. Includes the rise of suburbs in England; classic suburbs in the United States; the spread of suburbs and mass transportation; the role of race and gender in suburbia; suburban sprawl in Southern California; and sustainability and suburban development. Cross-listed with MCS 025.
URST 069 The Politics of Public Space 4
Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours. Prerequisite(s): none. Introduces theories and history of public space in modern cities. Topics include public space during the Industrial Revolution; modern planning and urban renewal; political uses of public space including demonstrations and occupations; privatization and policing of public spaces; and changing concepts of public and private space in contemporary society. Cross-listed with MCS 069.

Upper-Division Courses
URST 143 Urban Sociology 5
Lecture, 3 hours; extra reading, 3 hours; field, 3 hours. Prerequisite(s): SOC 001 or SOC 001H or consent of instructor. A comparative examination of metropolitan and other urban communities, with emphasis on processes of urbanization. Cross-listed with SOC 143.

URST 146 Urban Economics 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A. Applies basic microeconomic principles to the spatial concentration of economic activity, the operation of the urban land, housing, transportation, and labor markets, the role of government in the urban economy, and urban economic problems, including pollution, crime, and homelessness. Cross-listed with ECON 146.

URST 159 Race, Space, and Identity 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): restricted to class level standing of junior, or senior; or consent of instructor. Examines the intersection of race, space, and identity in modern and contemporary culture. Explores the critical and constitutive importance of race in the built environment. Topics include the racialization of space; colonialism and colonial cities; exhibitions and world’s fairs; segregation; and the canons; de-colonization; and urban renewal. Cross-listed with MCS 159.

URST 178 The Modern City 4
Lecture, 3 hours; research, 3 hours. Prerequisite(s): Restricted to class level standing of sophomore, junior, or senior; or consent of instructor. Examines the modern metropolis from the Industrial Revolution to the present. Explores the history and theory of modern urbanism through case studies of metropolitan areas with a rich urban culture, architecture, and morphologic features. Investigates approaches to the problems of the large urban agglomeration in the context of social Cross-listed with AHS 178.

URST 182 Urban Problems 4
Lecture, 3 hours; discussion, 1 hour; term paper, 1 hour. Prerequisite(s): restricted to class level standing of junior, or senior. An interdisciplinary examination of selected urban problems such as civil disorders, transportation, housing, welfare, and planning. Cross-listed with PBPL 182, and SOC 182.

URST 184 Modern Architecture 4
Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Explores modern architecture and its sources from 1800 to the present. Cross-listed with AHS 184.
### The Board of Regents

#### Ex Officio Regents

- Maria Anguiano (2026)
- Elaine Batchlor (2026)
- Carmen Chu (2026)
- Michael Cohen (2026)
- Anel E. Segoviano (2026)
- Howard "Peter" Guber (2026)
- Jose M. Hernandez (2026)
- Nancy Lee (2026)
- Richard Leib (2026)
- Hadia Makerechan (2026)
- Ana Mato-Santos (2026)
- Lark Park (2026)
- John A. Perez (2026)
- Janet Reilly (2026)
- Mark Robinson (2026)
- Gregory Sarris (2026)
- Richard Sherman (2026)
- Jonathan "Jay" Sures (2026)
- Merhawi Tesfai (Student Regent, 2026)

#### Regent Designate
- Geoffrey Pack
- Alfonso Salazar
- Josiah Beharry (Student Regent-designate)

#### Faculty Representatives to the Regents
- Susan Cochrane
- James Steinrager

#### Advisors to the Regents
- Ann Jeffrey
- Lucy Tseng

#### Principal Officers of the Regents
- Charles F. Robinson (General Counsel and Senior Vice President, Legal Affairs)
- Tricia Lyall (Chief Investment Officer, Vice President of Investments)
- Jagdeep Singh Bachher (Sr. Vice President and Chief Compliance and Audit Officer)
